7. DRILL: Walk around in the streets and buildings nearby and spot where several individuals are on the Tone Scale. Do this until you are confident that you can easily obnose where a person is on the scale. Do not create Dev-T while doing this action but you may engage in conversation. DO NOT EVER TELL A PERSON WHERE YOU THINK HE IS ON THE SCALE (that would be evaluation); just make your obnosis and keep the results to yourself. Make a written report on each. (50 study points per 10 people.)
