5. Take the best reading Dianetic item from the list in 4. Run R3R Quad.
6. Complete items on 4 above with R3R Quad.
7. Take another drug from 3 above that reads.
8. Repeat 4.
9. Repeat 5.
10. Use up the whole list in 4 above in this way until the entire list of drugs F/Ns when called.
11. Do Prior Assessment to Drugs (or alcohol). R3R Quad.
12. Quad R3R on any missing flows of earlier Dn items run.
13. Do Health Form.
14. Proceed with routine Quad Dianetics.

This program is the one that would be done at step 4 in the full Drug Pgm above that includes the TR Course and Class VIII Rundown.

However, when only Dianetic Auditors are available, at least the above Dianetic Program must be done.

This repairs an omission in the Dianetic pack and unblocks the case gain of a great many pcs on whom a drug or alcohol history was never noticed or handled.

*C/S Series 49R*

**ASSISTS**

There are three types of assists.

They are:

1. Contact Assist
2. Touch Assist
3. Dianetic Assist.

They are quite different from each other. They are VERY effective when properly done.

A severe injury or illness case can be run on all three and SHOULD BE.

If the handling is very soon after injury, burns do not blister, breaks heal in days, bruises vanish.

But to obtain such results it is necessary that the C/S and auditor or auditor alone know and RESPECT the assist tech. It is too often a toss-off, only one kind being done and then not to EP.

Every assist must end with an F/N (at Examiner or checked on a meter).

**CONTACT ASSIST**

Done off meter at the physical Mest Universe location of the injury. EP - Pain Gone. Cog. F/N.

See HCO B 9 Oct 67, Assists for Injuries. [See BTB 18 Feb 74, same title.]

**DIANETIC ASSIST**

Done in session on the meter. EP Pain Gone. Cog. F/N.

See HCO Bs

## UNCONSCIOUS PC

An unconscious pc can be audited off a meter by taking his hand and having him touch nearby things like pillow, floor, etc or body without hurting an injured part.

A person in a coma for months can be brought around by doing this daily.

One tells them a hand signal like, "Press my hand twice for 'Yes', once for 'No'," and can get through to them, asking questions and getting "Yes" and "No" hand responses. They usually respond with this, if faintly, even while unconscious.

When one has the person conscious again one can do the assists.

---

FIRST AID RULES APPLY TO INJURED PERSONS.

IN MAKING THEM TOUCH SOMETHING THAT WAS MOVING, STOP IT FIRST.

IN MAKING THEM TOUCH THINGS THAT WERE HOT, COOL THEM FIRST.

WHEN POSSIBLE MAKE THEM HOLD THE THINGS THEY WERE HOLDING, IF ANY, WHILE DOING A *CONTACT ASSIST*.

IF AFTER A TOUCH OR CONTACT ASSIST THEY DON'T F/N WHEN TAKEN TO OR GIVEN AN EXAM, CHECK FOR O/R AND IF NO F/N TAKE THEM AWAY AND COMPLETE THE ASSIST.

DIANETIC ASSISTS CAN BE RUN TRIPLE.

---

This is important tech. It saves pain and lives. Know it and use it.

**QUADS CANCELLED**

The disadvantages of Quad Dianetics outweigh any advantages in actual practice.

*Flow Zero* is therefore cancelled as part of Dianetics and lower grades.

This flow is self to self. It remains in use only in C/S Series 37R where it is one of the 7 basic flows.

What happens when you use Flow Zero as an addition to Flow 1 (another to self), Flow 2 (self to another), and Flow 3 (others to others) is that the pc now and then runs the same chain twice, usually two F 1 s rather than an F 1 and F0.

In the Interiorization Rundown, when Flow Zero is run one is running a lie. A static cannot go into itself. It can only appear to go into itself by calling other things "self". Further, in the Int RD some pcs get into an implant chain when they try to run F0 and the TA goes up.

In getting in the fourth flow by rerun of singles and triples (was called Quading for Quadruple or 4) a pc is sometimes made to run a chain twice and this will send the TA up.

Therefore, so as to simplify matters, do not run Flow Zero self to self on any rundown except 37R.

**REPAIR**

The majority of cases benefited from Quads.

Those that did not can easily be repaired by the use of L3B, the Dianetic correction list.

In repairing an Interiorization Rundown it will almost always be found that the Int RD was overrun in the first place. Int RDs often go flat on Secondary F2 or even Recall steps. Continuing to run all secondaries and engrams *and* Flow Zero after the rundown flattened, for example on F1 Engrams, is to overrun the Interiorization Rundown.

In making a repair of Int this is easily checked by asking if the Int RD was overrun.

If this is found to be the case, one then *dates* the Int RD exactly. If it was overrun it will quickly F/N.

If it does *not* F/N, then it was never completed.

If it *does* F/N on the date, also have the pc point to where it was done (location) and it will F/N again.

If this doesn't work, one uses L3B on the Int RD.

Repairing any jam-up in Quads is done by the use of L3B. To L3B one should add "Wrong flow?" when repairing Quad.

#### CANCELLATION

It was no overt to run Quad and has not ruined any cases.

But it is not easy to handle and can jam up and require repair. Thus its advantages are not great enough to continue it in use.

The same auditing time spent on other things will give more gain.

*C/S Series 50*

**C/S CASE GAIN**

Some C/Ses get audited over the present time problem "How to get case gain."

Working with pcs who sometimes don't can become a minor PTP.

This is also true of some auditors.

The way to C/S this is to run it triple PTP, but in this sequence:

**THE C/S**

1. 2WC Have you ever had a problem in getting case gain for another? E/S to F/N.
2. 2WC What solutions have you had in getting case gain for another? E/S to F/N.
3. 2WC Have others ever had a problem getting case gain for others? E/S to F/N.
4. 2WC What solutions have others had getting case gain for others? E/S to F/N.
5. 2WC Have you ever had a problem getting case gain for yourself? E/S to F/N.
6. 2WC What solutions have you had getting case gain for yourself? E/S to F/N.

Once handled it ceases to be a problem when one does it in the future.

**DRUG HANDLING**

*See:* HCO B 28 Aug 68, Issue II, "Drugs"  
HCO B 29 Aug 68, "Drug Data"  
HCO B 23 Sept 68, "Drugs & Trippers"  
*Refer:* HCO B 19 May 69, "Drug and Alcohol Cases  
PRIOR Assessing"  
HCO B 12 Aug 69 (HCO B 10 Dec 68 Updated),  
Confidential—"Case Supervisor Actions"  
(Page 24 Resistive Case 220D.) [Now BTB]

(In this revision of HCO B 4 July 71, C/S Series 48,  
Quad [4] Flow has been changed to Triple Flow.  
There is no other change.)

A person who has been on Drugs is one of the "Seven types of resistive cases".  
(These types are found on the Scientology Green Form No. 40.)

In other words, someone who has been on drugs does not make good case gain  
until the drugs are handled. The same somatics will come back again. The case roller-  
coasters—goes up and down.

Drugs since 1962 have been in very widespread use. Before then they were rare. A  
worldwide spread of drugs occurred. A large percentage of people became and are drug  
takers.

By drugs (to mention a few) are meant—tranquilizers, opium, cocaine, marijuana,  
peyote, amphetamine and the psychiatrist's gift to Man, LSD, which is the worst. Any  
medical drugs are included. Drugs are drugs. There are thousands of trade names and  
slang terms for these drugs.

ALCOHOL is included as a drug and receives the same treatment in auditing.

They are supposed to do wonderful things but all they really do is ruin the person.

Even someone off drugs for years still has "blank periods". The abilities to  
concentrate or to balance are injured.

The moral part of it has nothing to do with auditing. The facts are that:

- (a) People who have been on drugs can be a liability until the condition is  
handled in auditing.
- (b) A former drug user is a resistive case that does not make stable gains until the  
condition is handled.
- (c) Auditing is the only successful means ever developed for handling drug  
damage.

## THOSE ON DRUGS

On persons who are currently on drugs, it is necessary to take them through a special TR Course while they are still on them. They gradually come off of them voluntarily in most cases without painful “withdrawal symptoms” (which is the term for the agony and convulsions caused, particularly in the case of heroin takers, by just stopping the drug. Alcoholics are of course included.)

## DRUG ENGRAMS

People who have been on drugs are sometimes afraid of running engrams.

In fact, it is almost a way to detect a “druggie”.

The drugs, particularly LSD and even sometimes antibiotics or other medicines to which the person has an allergy, can turn on whole track pictures violently.

These tend to overwhelm the person and make him feel crazy. Some of these people are afraid to confront the bank again.

The TR and other steps of the special TR Course improve their confront.

If a person “doesn’t like Dianetics” and doesn’t want to be run on engrams, it is necessary to put them on the special course. If Dianetics *has* been run but poorly, it should of course be repaired fully with an L3B (List used to correct Dianetic errors). But if the person still flinches, the Special Course successfully completed will handle. It contains recall steps giving the pc a chance to confront the bank more easily and get used to it.

## FULL AUDITING RUNDOWN

A full auditing rundown on drugs, all done on the same pc, would be:

1. Special TR Course for ex-drug users or alcoholics.
2. Pc Assessment Form.
3. Class VIII Drug Rundown Triple (done by a Class IV or VI).
4. By a Dianetic Auditor: Pains, emotions, sensations, attitudes connected with drugs (or alcohol), R3R Triple.
5. Prior Assessment to Drugs, Triple R3R, Dianetic Auditor.

This can be followed by routine Triple Dianetics to EP for the grade.

## DONE FIRST

Drugs are done *first*. They are NOT done after the Health Form and regular Dianetics.

Why? Because Drugs make a resistive case! Regular Dianetics will get loses.

Any current Dianetic case failures are from flubby Dianetic auditing or the person has been on Drugs or alcohol which were not handled by Dianetics.

It hasn’t harmed anyone to omit drugs. But it made it hard or impossible to get stable case gain.

**THUS ANY DIANETIC PC WHO HAS HAD DRUG HANDLING OMITTED MUST BE RUN ON DRUGS AS SOON AS POSSIBLE BEFORE MORE AUDITING IS GIVEN.**

I repeat, drugs or alcohol in most instances make a resistive case so the point must be handled before the case will attain and hold case gain.

**ANY PC WHO IS NOT MAKING IT IN AUDITING SHOULD BE CHECKED FOR A DRUG OR ALCOHOL HISTORY.**

## DISCOVERY

In investigating a series of cases who were not making it, I found in each one that the person had been on drugs or alcohol and that drugs or the alcohol had not been run out.

Drug data was not covered fully enough in the Dianetics pack. Only Prior Assessment to Drugs was given.

Thus I find several Dianetic pcs were only run on the Prior Assessment to Drugs. This is not good enough.

## DIANETICS ONLY

Where Dianetic Auditing only is available and the rest of the rundown given above is not, drugs can still be handled by a Dianetic Auditor in this way with this Dianetic Pgm.

1. PC Assessment Form.
2. Full C/S 1, also doing the TRs well with the pc.
3. Write down the drugs from the pc assessment form. Take the one that reads best on the meter.
4. List, what pains, emotions, sensations or attitudes are connected with taking (the drug).
5. Take the best reading Dianetic item from the list in (4). Run R3R Triple.
6. Complete items on the (4) above with R3R Triple.
7. Take another drug from (3) above that reads.
8. Repeat (4).
9. Repeat (5).
10. Use up the whole list in (4) above in this way until the entire list of drugs F/Ns when called.
11. Do Prior Assessment to Drugs (or alcohol). R3R Triple.
12. Triple R3R on any missing flows of earlier Dn items run.
13. Do Health Form.
14. Proceed with routine Triple Dianetics.

This program is the one that would be done at step 4 in the full Drug Pgm above that includes the TR Course and Class VIII Rundown.

However, when only Dianetic Auditors are available, at least the above Dianetic Program must be done.

This repairs an omission in the Dianetic pack and unblocks the case gain of a great many pcs on whom a drug or alcohol history was never noticed or handled.

C/Ses  
Testing Personnel  
Class IX Checksheet

*C/S Series 51*

**OUT OF VALENCE**

(OCA Graph)

On OCA graphs (the plotted test score of a pc) you find sometimes a case that read high on the graph will drop and read lower after auditing.

This is caused by the fact that the person was OUT OF VALENCE in the first place.

Social machinery was what the first registered.

Now after auditing the graph expresses something closer to the actual being even though it dropped.

We have known about this since '57 or '58 but I do not think it was fully written up. Further, we now know MORE about it.

If you look into Suppressive Person tech you will find an SP *has* to be out of valence to be SP. He does not know that he is because he is himself in a non-self valence. He is "somebody else" and is denying that he himself exists, which is to say denying himself as a self.

Now this doesn't mean all persons whose graphs dropped were active SPs. But it *does* mean they weren't being themselves.

After some auditing they became themselves somewhat and this self isn't the social cheery self the first graph said.

But the dropped graph is nearer truth.

Now, how to get the graph UP again?

The person with the dropped graph is closer to being himself but is not yet fully restored, not yet fully into his "own valence".

While Class XI would handle this a bit differently, Class VIII rundown already has an answer.

The Class VIII out of valence lists LX1, LX2 and LX3 and the recall, secondary and engram triples for each assessed item from these lists is a way to handle.

Completing any cycle the pc is on is of course fundamental. And even if the pc goes on to next grade the graph will improve.

The fact is that the pc is emerging more and more and becoming himself and then he himself begins to gain.

The graph that dives will come back up if general processing is done.

The pc will keep saying he is "more there". And it is true.

*C/S Series 52*

**INTERNES**

The word INTERN or INTERNE means “An advanced graduate or a recent graduate in a professional field who is getting practical experience under the Supervision of an experienced worker”.

An Internship then is serving a period as an Interne, or an activity offered by an org by which EXPERIENCE can be gained.

Internships have been arranged this long while for every auditing class.

The apprenticeship of an auditor is done as an org Interne.

C/Ses very often have Internes on their lines and sometimes have trouble with getting them to audit.

The WHY of this is that the Interne seldom knows the definition of the word “Interne” (which is as above). They sometimes think they are still students. They do not know this fact:

**A COURSE GRADUATE BECOMES AN AUDITOR BY AUDITING.**

That means LOTS of auditing.

The failure of “auditors” is that they go from one level to the next, HDC to IV to VIII, without ever becoming an auditor for that Class.

Thus you can get a silly situation where a Class IX can’t audit or C/S well. Thus you get tech going out.

An HDC graduate who doesn’t then audit under an experienced Case Supervisor who knows and demands the standard actions rarely gets to *be* an HDC *AUDITOR*. It takes tons of hours to make a real Dianetic auditor who can toss off standard sessions and get his routine miracles.

So if an HDC doesn’t INTERNE, but simply goes on to the Academy Courses or SHSBC he has skipped his apprenticeship as a Dianetic Auditor.

If he gets his Class VI and never Internes but goes on to VIII well, we now have somebody who has long since lost touch with the reality of why he is studying.

Therefore you CAN’T take a Class VI graduate who was never a Dianetic Auditor and Interne him as a VI. He’ll goof-goof-goof. So you have to Interne him as an HDC.

WHEN he can turn out flawless Dianetic sessions on all kinds of pcs you can Interne him as a IV etc.

In other words you have to catch up all neglected Apprenticeships.

I don’t care if the guy is an VIII, if he wasn’t ever a Dianetic Auditor and a Class VI Auditor and isn’t Interning as an VIII then he is only a provisional.

Flubby auditors are the biggest time wasters a C/S has. If auditors on his lines aren’t good, he’ll take forever to get his C/S work done. And he won’t get results.

The answer is, regardless of Class as a course graduate, a C/S MUST INTERNE HIS AUDITORS FOR EACH INTERNESHIP MISSED ON THE WAY UP.

The “ok to audit” system is used.

One takes any graduate and Internes him on the lowest Internship he has missed. He reviews his material, gets his drills checked, gets his misunderstood words cleared

and gets an “ok to audit” for *that* level. If he goofs he is crammed. And sometimes wholly retreated. The “ok to audit Dianetics” would be his first okay. This suspends if he has to retreat.

When he then has turned out pcs, pcs, pcs, pcs, 5, 6, 8, 10 hours a day for weeks and weeks and is a total success as a Dianetic Auditor, he can go on up.

At first as a Dianetic Interne he is part time studying Dianetics. Then as he gets flawless and while he is getting experience and practice on Dianetics, he can gradually phase over into re-studying his next Internship, usually IV or VI.

Then one day he is word cleared, checked out on his drills, and he qualifies for “ok to audit” for IV or VI.

Now it begins all over again. Flubs—Cramming, midnight oil, audit audit cramming audit audit new word clear new drill work audit audit audit audit 5, 6, 8, 10 hours a day.

Now he *is* a IV or VI auditor.

His next real step is a VI or VII Interne at an SH. If he has been a good IV Interne *Auditor* his VI Internship after his SHSBC will be a VII Internship. VII *is* an Interne activity.

When he’s an *Auditor* that can do VI and Power, he is ready for VIII and IX.

If he is going to be a good VIII-IX auditor he will Interne in an AO or SH under an experienced C/S.

Now when he goes to his own org, you have a real honest to goodness C/S. And as a C/S he must know how you use Internships to make auditors.

Wherever this function is neglected, you don’t get auditors. You get doubtful students and out-tech.

On Flag C/Ses have to catch up every missed Internship to make a high volume high quality auditor.

The world renowned Superiority of Flag Auditors is built just like I am telling you here.

There is no reason just that same quality can’t be built in any org.

One does it by the Interne method.

By using this method you get IN tech and high volume.

Any auditor in any org that is limping and fumbling simply has never been properly Interned.

The way to remedy it is to set up a good Cramming that uses only HCO Bs and has them available (and no verbal tradition), a Good Word Clearer and a Qual “okay to audit” Interne system. The Internes are a Section in Qual. They have a Course Supervisor. They study and audit cram audit cram study audit, audit audit audit.

And one day you have IN tech and high volume high Class auditing all over the place.

Otherwise you just have a bunch of students, in doubt, chewing on their misunderstood words and failed tech.

There IS a right way to go about it.

It is by Internship.

HCO BULLETIN OF 21 JULY 1971 REVISED

Remimeo

(Revised 9 Aug 71 )  
(Reference WORD CLEARING METHOD 1  
HCO B 30 June 71 REVISED)

**WORD CLEARING CORRECTION LIST**

(Use to correct upsets, high or low TA  
occurring in word clearing sessions.)

Assess this list once thru noting reads (Method 5).

Carry all Reads to an F/N or get the reading item fully repaired to F/N.

1. UNFLAT INT/EXT  
(Correct by using L3B & handling.) -----
2. OVERRUN INT/EXT  
(Correct by dating exactly first Int Rundown to F/N  
and then locating to F/N—per HCO B 15 July 71,  
“Quads Cancelled”. If it doesn’t F/N use L3B on the  
Int Rundown. ) -----
3. AUDITED OVER EXTERIOR  
(Full Int Rundown if never done before. If already  
done—by folder inspection—correct as per 2.) -----
4. LIST ERROR  
(Use L4B and handle.) -----
5. UNFLAT ENGRAM CHAIN  
(Get which chain and flow and flatten—use L3B if it  
bogs. ) -----
6. ARC BREAK  
(Use ARCU CDEI itsa earlier similar itsa.)  
(Or LIC Method 3 if it does not clean up.) -----
7. PTP  
(PRESENT TIME PROBLEM)  
(Handle by itsa E/S itsa.) -----
8. WITHHOLD  
(Pull it-what, when, all, who E/S.) -----
9. OVERT  
(Pull it E/S.) -----
10. UNREADING SUBJECT  
(Get which one PC thought didn’t read—put in buttons  
suppress, invalidate and protest and clean it up.) -----
11. READING ON PROTEST  
(Get which word, clean off protest and indicate  
by-passed charge.) -----
12. OVERRUN A WORD  
(Get which one and rehab.) -----
13. COULDN’T HEAR THE WORD CLEARER  
(2wc E/S and clean it up.) -----

14. DIDN'T UNDERSTAND WHAT THE WORD CLEARER SAID  
(2wc E/S and clean it up.) -----
15. DIDN'T UNDERSTAND THE ACTION BEING DONE -----
16. CONFUSED BY SOMETHING  
(Work it out by 2-way comm and E/S.) -----
17. A WORD ON THE LIST OF SUBJECTS WAS MISUNDERSTOOD  
(Clear it.) -----
18. OVERRUN A SUBJECT  
(Get which one and rehab release point.) -----
19. WORD STILL MISUNDERSTOOD  
(Get it cleared up with a dictionary and take E/S word/subject to F/N.) -----
20. SUBJECT STILL MISUNDERSTOOD  
(Get which subject and which word and handle per usual word clearing tech.) -----
21. AUDITOR EVALUATION  
(Clean up with eval button E/S to EP.) -----
22. WORD CLEARING IN THE MIDDLE OF ANOTHER INCOMPLETE AUDITING CYCLE  
(Get which cycle PC is on and by folder inspection evaluate which one needs to be completed first—make sure it is fully noted on PGM to complete word clearing if the other action is handled first.) -----
23. WORD CLEARING WHILE DOING TR COURSE  
(Have PC finish the course.) -----
24. INCOMPLETE TR COURSE  
(Complete TR Course—then complete word clearing cycle.) -----
25. NOT GETTING THE BASIC WORD  
(Find which subject/word is incomplete by two-way comm and then take it to EP.) -----
26. NOT GETTING THE BASIC SUBJECT  
(Handle as in 25.) -----
27. AUDITOR FORGOT TO GO EARLIER SIMILAR  
(Get which subject/word and take to EP—if several subjects have been started take first one semi-run and flatten, then next, etc.) -----
28. NOT YOUR MISUNDERSTOOD  
(Clean it up by two-way comm.) -----
29. INVALIDATION OF KNOWINGNESS  
(Clean up using inval E/S.) -----
30. BY-PASSED A WIN  
(Rehab it.) -----

HUBBARD COMMUNICATIONS OFFICE  
Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 23 JULY 1971

Remimeo

(Corrected in this type style, 4 May 1972)

(Revises and replaces HCO B 15 Mar 71  
of same title)

**ASSISTS**

**A FLAG EXPERTISE SUBJECT**

(Commands are the only change)

For a pc being run on a Touch Assist for handling something around the head (for example: teeth), go further even to the toes as the area extends through the nerve channel to the whole body. Right—left and also whole body. A head somatic also sticks in the spine.

**Assist EP**

All Assists are run to cognition and should F/N VGI at the Examiner.

**Injury Rundown**

On an injury, after the *Touch Assist*, a *Contact Assist* and then an *LIC on the injured member* could be done. Usual Dianetic actions would follow as necessary.

**Pc Running a Temperature**

COMMANDS CORRECTED FROM EARLIER ISSUE.

A persistent temperature can be brought down by running the pc on Objective “Hold it still”.

This *can* be run on a two command basis.

**VERSION A**

For a pc running a temperature too ill for regular auditing, he should be given antibiotics and an assist type boost, not a major action like Dianetics.

This version would be run if the pc is *far* too ill to get up. The pc is run on a meter to Cog F/N VGIs.

1. 2 command Repetitive Process alternate commands:

- a. Look around here and find something.
- b. Hold it still (until pc can or feels he can).

Then (a) again.

Then (b) again, etc.

This will drop a fever.

2. 2 WC How do you feel? Have you felt like this before? Earlier Similar to F/N VGIs.

VERSION A is NOT very lasting. It is for very ill pcs and very high temperatures.

#### VERSION B

This is true Objective “Hold it still” and is very lasting.

It is done on a pc who can, even with effort, walk around a room.

It is done OFF the meter to Cog, GIs. The pc then should at once be put on the meter and will be found to have an F/N. If no F/N on the meter the process is either (a) unflat or (b) overrun. *If unflat it is continued, flattened off the meter and the same meter test follows. If overrun the re/ease point is rehabbed.*

VERSION B Commands are:

- (a) Look around here and find something.
- (b) Walk over to it.
- (c) With your hands, hold it still.

The three commands are given in (a) (b) (c) sequence one after the other, the pc executing each command and being acknowledged until the pc has a cognition and GIs. He is then checked on the meter.

A thermometer can be used to check temperature after the meter check for F/N. The temperature will be found to have subsided.

---

Both A and B versions can be used on the same pc.

Let us say on Monday, A Version is used. Then on Tuesday if temperature has gone back up but pc is better B Version is then used.

---

The temperature process is most effective on a low order persistent fever that goes on and on for days and even weeks. In such cases Version B would be used and the temperature would come down and stay down very nicely.

ALL RIGHTS RESERVED

2. Use only the ticks or falls or BDs. The rises will however show where mass lies.
  - A. If A or any of the A Group, and the pc has *had* an Int RD,
 

*Date*—tell pc date Int RD was run from Folder Summary, then date the point it was flat by exact time—hour, minute, second until it F/Ns and he says something blew.

*Locate*—have pc point where the Int RD was done, get distance away, part of room, etc until it F/Ns and he says something blew.

If these do not happen it is not Flat so do L3B on each Flow and handle per the L3B directions.

If Pc *has never had an Int RD*, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.
  - B. If any of these read, do an L4B on the earliest lists you can find that have not been corrected. Lacking these do an L4B in general. You can go over an L4B several times handling each read to F/N until the whole L4B gives nothing but F/Ns.
  - C. If any of these, handle with 2 way comm and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 6 F/Ns.
  - D. If any of these, do full Drug RD as per HCO B 15 July 1971, Issue III.
  - E. If any of these, do L3B and handle according to what is stated to do on L3B.
  - F. Do exactly as in A using the earliest time it was done.
  - G. Find out what it is. If Yoga or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do L1C on *that* period of pc's life.

General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.

DIANETICS

*C/S Series 54*

**DIANETICS, BEGINNING A PC ON**

Make Dianetics work fully in our modern culture.

DO NOT BEGIN DIANETICS WITH A HEALTH FORM ANY LONGER.

BEGIN DIANETICS WITH A PC ASSESSMENT SHEET, HCO B 24 April 1969.

This is VITAL.

DRUGS

IF YOU GET ANY TA ACTION OR READS ON DRUGS EVEN IF THE PC SAYS "NO" THE FIRST DIANETIC ACTION IS THE THIRD PAGE OF HCO B 15 July 1971, Issue III.

If the pc is currently on Drugs, then a Special Drug TR COURSE IS VITAL until the pc is off them. *Then* do the third page of HCO B 15 July 1971, Issue III.

ACCIDENTS

If you get a read on Part E of Assessment Form, Accidents, run them out Narrative R3R Triple.

ILLNESS

If Illness Part F Assessment Form reads, run it out Narrative R3R Triple.

MENTAL TREATMENT

If Mental Treatment reads, run it out Narrative R3R Triple.

OPERATIONS

If Operations Part G reads run the reading one out Narrative R3R Triple.

MEDICINE

If Medicine Part M reads TREAT IT HCO B 15 Jul 71, Iss III, as it reacts like any other drug but pcs don't sometimes think of medicines as drugs when they are.

DEATHS

If Deaths of relatives, etc read on Part 7, run them out Narrative as SECONDARIES R3R TRIPLE.

## FAMILY INSANITY

If Part L reads on a member of the family going insane, run it out Narrative SECONDARIES R3R TRIPLE.

## PERCEPTION

Lack of perception (sight, hearing, etc) comes from overts and improves when Flow 2 is done on any of the above or any R3R.

## PROGRAM

The C/S Programs the Case from the Assessment Form as above, using Drugs or Medicine first and the rest by largest reads first.

Narrative Items or incidents were used for years with great effect. BUT THE ITEM MUST BE DONE R3R TRIPLE and is once in a while very long.

## REPAIR

Repair by L3B ANY FLUBBED DIANETIC SESSION OR CHAIN WITHIN 24 HOURS. Do not let it go unrepaired.

## HEALTH FORM

WHEN any and all of the above are handled, then and only then proceed with the usual Health Form by item.

The pc in many cases won't be able to run engrams at all unless you run out drugs or medicines first. They will run these and these alone until the engrams are gone.

People who "can't run engrams" are usually drug cases.

---

This is CORRECT Dianetic Programming.

MAKE DIANETICS WORK FOR YOU.

Program it correctly. C/S it correctly.

It won't work unless used on where the pc's attention is.

IT WILL WORK IF YOU USE IT.

Not Confidential

**TRS, SOLO COURSE AND ADVANCED COURSES**

(Definition - TR means Training Drills)

Do not put a student who has done a Solo Course onto TRs before auditing.

A wrong sequence would be R6EW study—TR Course—Solo Auditing. Another wrong sequence would be CC or OT Material Study—TR Course or TRs—Solo Auditing.

WHY? Because with all the study materials stirred up ready to Audit, the TRs are the wrong process to run it out. If put on TRs then the as yet unaudited bank tends to cave in.

While it would run out on TRs the basic bank is so heavy that very unnecessary stress is put on the student and he is subjected to distressing somatics and ideas.

Therefore on

1. R6EW SOLO STUDENTS
2. ANY AD COURSE

the rule applies

**DO NOT MIX TRS WITH SOLO OR ADVANCED COURSES.**

The time to put a student through the TR Course is BEFORE Solo or after he is OT, not in the time between.

Factually Scientologists should be TR public course grads even before a Dianetics completion.

People before extensive auditing make great gains on a properly run word cleared TR Course.

A Clear OT has a ball doing TRs the Hard Way.

But when you put the TRs out of sequence on the Grade Chart they can distress people. Way up on the Chart or way down, not in between.

HCO BULLETIN OF 4 AUGUST 1971

Remimeo  
Dept 13  
Qual Div  
Qual Bur

**PURPOSE CLEARING**

(This HCO B is the basic action of the  
Post Purpose Clearing Section of Dept 13  
Div V, Qual Div or by auditors as a  
technology.)

An essential part of HATTING as done in HCO is to get the person's POST PURPOSE  
CLEARED by an auditor.

**INSTANT PURPOSE**

HCO usually tells the person what the purpose of the post is and certainly the staff member's  
seniors would.

This action is not metered and goes along with Instant hatting. It is not done by an auditor.

"George, the purpose of your post is to \_\_\_\_\_. Any questions?" Questions are answered and  
clarified.

Giving the person on the post the purpose is a basic hatting step.

**FULL POST CLEARING**

This requires an auditor, an E-Meter, and is done in session.

Usually this is done after Mini-hatting and after some experience with the post. It is NOT done  
in this full fashion before the person has any knowledge of the post. It can also be done during or at the  
end of full hatting.

But the sooner it is done after Mini-hatting and some weeks' experience on the post the more  
successful it will be.

**AUDITOR QUALIFICATIONS**

The auditor doing Post Purpose Clearing must be expert with

1. TRs
2. Metering
3. Code
4. 2 Way Comm
5. Flying rudiments.

**ADMIN**

A Post Purpose Clearing is given full worksheet and report handling and person goes to  
Examiner.

A record of the session is kept with others done in the PPC RECORD BOOK with especially  
noted High or Low TA and vitally, *any Rock slam*.

**PC**

The pc must not be in an Ethics cycle, must be rested, not hungry and not ill or on drugs or  
medication.

ANY RINGS ON THE PC'S HANDS MUST BE REMOVED AS THEY CAUSE A FALSE  
ROCK SLAM.

## HAT FOLDER

Staff Member must bring hat folder to the PPC session so if there is any confusion on purposes in it they can be cleared from the Hat Folder.

## CASE FOLDER

Case folder of the pc must also be collected and examined before session. This is repeated in the Rundown so it won't be missed.

## POST PURPOSE CLEARING STEPS

PPC 1 - Get the staff member's folder. Verify that he is not in the middle of some processes, repair or Major Grade. If so, don't touch.

PPC 2 - Fly a rud or talk the TA down if high. Note that it WAS high on the session worksheet. If the TA does not come down refer the case to Staff Staff Auditors and do not proceed. Case would need Folder Error Summary, Int Rundown verified, C/S Series 53 and handled.

PPC 3 - 2wc about person's post. Be alert to problems or w/hs and if these seem to be there do E/S to F/N on Problems and/or E/S to F/N on w/hs.

PPC 4 - 2wc "What is your post?" Need not F/N but if pc can't tell you resort to his hat and clear up confusions to F/N.

PPC 5 - 2wc "What opportunities would you have on your post?" This is carried to F/N. If no F/N treat it as a w/h and ask if there's anything pc isn't telling you. Carry any w/h to F/N.

Then check the question again and get the F/N back by 2wc or E/S to F/N. (If you start to clear w/hs in the middle of the Q then the w/hs will F/N but the Q hasn't yet so must be F/Ned also. Overts may come up as well as w/hs and if so F/N them by E/S.) Pc should finish this step with F/N Cog and GIs.

PPC 6 - 2wc "How does your job align (compare) with what you incline (would like) to do?" Get any conflicts into view if not clean. Go E/S to F/N if there is conflict. If no F/N despite Itsa on conflict ask for overts or withholds and carry this to F/N. Check Q again to be sure it's clean or F/Ns.

PPC 7 - 2wc "What do you imagine the purposes of your post are?" Take it to clean needle or F/N.

PPC 8 - 2wc "How does this purpose tie in with the purpose of your Division?" Clean this up if there's doubt. Use folders or OEC books. Be sure it's clean if not an F/N. F/N is the ideal.

PPC 9 - 2wc "How does your purpose tie in with the purpose of the org?" Clean this up.

PPC 10 - 2wc "If your post was not done what would happen to the org?" Clean this up.

PPC 11 - 2wc "What is the purpose of your post?" This should go to F/N.

PPC 12 - Thank pc and send to Examiner.

---

Complete Worksheet. Enter results in log.

Put the session report in pc's folder.

Send a report to the E/O AND TO FLAG if the person Rock slams.

If you can get no satisfactory F/Ns and cogs and VGIs or if Exam report is bad, DIRECT THE FACT TO THE ATTENTION OF THE HAS AND THE C/O AND THE CASE SUPER.

---

Post Purpose Clearing counts as a completion for the Dept on an F/N at Examiner's.

*C/S Series 55*

**THE IVORY TOWER**

It has been stated before that the Case Supervisor is most successful when he supervises in seclusion.

This is called the IVORY TOWER rule.

It comes from the practical experience that in C/Sing thousands of cases the only few mistakes I made (and repaired) were when I listened to the opinion of the auditor or saw the pc.

This can be quite fatal to a case's progress.

The fantastic results I achieve as a C/S mainly stem from not permitting what I know of tech and cases to be clouded by "Human Emotion and Reaction" (a Scn Public Relations term) by others.

Part of a C/S's duty is to get the case through it despite auditor opinions and flubs or the opinions of others.

A C/S has no political or personnel opinions. He can of course have his own opinions of the pc's case. But he is the FRIEND of the pc even when being harsh.

Often the C/S, unseen by the pc, is sometimes never suspected but quite often adored by those for whom he C/Ses. One often sees this in success stories, "Thank you, thank you to my great auditor (name) and the C/S (name) and Ron." Sometimes it's only the auditor. But mos. pcs know the C/S is there.

This awareness is also a great trust and it is a trust that is earned by great results and is never betrayed.

To the majority of pcs, then, it is a trio—always in the same order—his auditor, his C/S and myself.

He trusts us. And we do our best for him.

We don't change our actions, then, if he is a dope addict, a wife beater, a criminal, a degraded being or an upstat (one who has high statistics) and a sterling person.

When we are researching, C/Sing or auditing, we do our best for him.

We have nothing to do with whether his seniors like him or for that matter whether we like him.

It is our job. We hold it in trust.

In our hands is his future, his sanity, his immortality.

It depends on us whether he survives and lives a full life or whether he goes into limbo.

If we do our duty, when we know and do our jobs, he achieves everything. When we don't, he is gone.

No priest or fancied idol has ever been endowed with more cause over the beingness of another than a C/S and his auditor. This isn't my opinion or my feeling about it. It's the way pcs look at it.

Actually one can't really state the full actuality of it.

The pc is justified in trusting us when we keep up to date on our tech, know our job, take every care that a good job is done and do our duty.

#### AUDITOR OPINION

Some auditors develop overts and withholds on pc and color their auditing reports with critical remarks about a pc = more withholds.

A C/S who pays much attention to these *opinions is* foolish. When they get too bad on too many pcs, get the auditor's overts and withholds pulled as he'll begin to flub.

The Worksheet and What the pc said or did is important. The opinions aren't.

An auditor has a right to refuse to audit certain pcs as long as he audits others. That's as it should be.

But a lot of "dog cases" are just unsolved cases that can be solved. Some are very difficult, true, but the difficulty is finding the bug. Some pcs are rather wild in conduct. But they solve too.

So an auditor's *opinion is* not a study of the case. Talking to an auditor about a case he is auditing is *not* of any technical value to a C/S.

Again, a case does not know what is wrong with it or it would as-is and wouldn't be wrong. So talking to a case about his case is a waste of time for a C/S. Some write huge notes to a C/S. The only value in all this is to analyze whether it's a hidden standard or an ARC Brk or a w/h or a PTS matter. TECHNICAL considerations are all that enter in looking over such.

EXECUTIVE opinion is the world's worst source of data on a pc. No C/S should ever take what seniors say about a junior. It's all Human Emotion and Reaction. It's not tech.

FAMILY, husbands, wives, fathers, mothers, brothers and sisters, aunts and uncles are of little value to listen to about a case. The most they could give you would be a list of accidents or illness or time in a home. But beware, they may be worse off than the pc.

No. The C/S is the pc's safest friend.

The pc trusts the C/S and the auditor. Or he wouldn't sit still at all.

Sometimes he only trusts me. And that's the time I have to trust you.

And I do.

*Healing* \_\_\_\_\_

*Illnesses* \_\_\_\_\_  
*Spoken Words* \_\_\_\_\_

Add items dealing with this specific Pc's life.

---

---

---

---

---

---

3. Ask the Question, "Is there any word on this list you didn't understand?" Clear it. (Do not reassess because there was a list word not understood.)
4. Take each reading item from the best read on down and with E/S pull each one to F/N.

"In the subject of \_\_\_\_\_ what word has been misunderstood? "

He *MUST* look them up, so have a good dictionary handy. *Do not accept "I know the meaning" if the subject or word reads.*

It isn't an earlier time he misunderstood *that* word. It's an earlier word in that subject and it can be an earlier subject.

Considerations about it and other questions are not touched.

Overts, W/Hs, etc are *neglected*. They are not done on the subject of the word. They are done in the session ruds.

Just do the process and it will eventually F/N on each chain.

5. When all reads on the first assessment are handled to F/N, REASSESS the whole list. Do not take off the list items already handled.
6. Repeat Step 4.
7. Repeat Step 5.
8. Repeat Step 6, etc.
9. A persistent F/N should be attained on assessing the whole list as the End Phenomena of the Word Clearing sessions.

HCO BULLETIN OF 16 AUGUST 1971  
Issue II

Remimeo  
Courses  
Checksheets

**TRAINING DRILLS MODERNIZED**

(Revises 17 APRIL 1961.  
This HCO B cancels the following:

Original	HCOB 17 April 1961, "Training Drills Modernized"
Revised	HCO B 5 Jan 1971, "Training Drills Modernized"
Revised	HCO B 21 June 1971, "Training Drills Modernized" Issue III
	HCO B 25 May 1971, "The TR Course"

This HCO B is to replace all other issues of  
TRs 04 in all packs and checksheets.)

Due to the following factors, I have modernized TRs 0 to 4.

1. The auditing skill of any student remains only as good as he can do his TRs.
2. Flubs in TRs are the basis of all confusion in subsequent efforts to audit.
3. If the TRs are not well learned early in Scientology training courses, **THE BALANCE OF THE COURSE WILL FAIL AND SUPERVISORS AT UPPER LEVELS WILL BE TEACHING NOT THEIR SUBJECTS BUT TRS.**
4. Almost all confusions on Meter, Model Sessions and Scientology or Dianetic processes stem directly from inability to do the TRs.
5. A student who has not mastered his TRs will not master anything further.
6. Scientology or Dianetic processes will not function in the presence of bad TRs. The preclear is already being overwhelmed by process velocity and cannot bear up to TR flubs without ARC breaks.

Academies were tough on TRs up to 1958 and have since tended to soften. Comm Courses are not a tea party.

These TRs given here should be put in use at once in all auditor training, in Academy and HGC and in the future should never be relaxed.

Public courses on TRs are NOT "softened" because they are for the Public. Absolutely no standards are lowered. **THE PUBLIC ARE GIVEN REAL TRS ROUGH, TOUGH AND HARD.** To do otherwise is to lose 90% of the results. There is nothing pale and patty-cake about TRs.

**THIS HCO B MEANS WHAT IT SAYS. IT DOES NOT MEAN SOMETHING ELSE. IT DOES NOT IMPLY ANOTHER MEANING. IT IS NOT OPEN TO INTERPRETATION FROM ANOTHER SOURCE.**

**THESE TRS ARE DONE EXACTLY PER THIS HCO B WITHOUT ADDED ACTIONS OR CHANGE.**

**NUMBER: OT TR 0 1971**

**NAME:** Operating Thetan Confronting.

**COMMANDS:** None.

**POSITION:** Student and coach sit facing each other with eyes closed, a comfortable distance apart—about three feet.

**PURPOSE:** To train student to be there comfortably and confront another person. The idea is to get the student able to BE there comfortably in a position three feet in front of another person, to BE there and not do anything else but BE there.

**TRAINING STRESS:** Student and coach sit facing each other with eyes closed. There is no conversation. This is a silent drill. There is *NO* twitching, moving, confronting with a body part, “system” or vias used to confront or anything else added to BE there. One will usually see blackness or an area of the room when one’s eyes are closed. BE THERE, COMFORTABLY, AND CONFRONT.

When a student can BE there comfortably and confront and has reached a *major stable win*, the drill is passed.

**HISTORY:** Developed by L. Ron Hubbard in June 71 to give an additional gradient to confronting and eliminate students confronting with their eyes, blinking, etc. Revised by L. Ron Hubbard in August 1971 after research discoveries on TRs.

**NUMBER: TR 0 CONFRONTING REVISED 1961**

**NAME:** Confronting Preclear.

**COMMANDS:** None.

**POSITION:** Student and coach sit facing each other a comfortable distance apart—about three feet.

**PURPOSE:** To train student to confront a preclear with auditing only or with nothing. The whole idea is to get the student able to be there comfortably in a position three feet in front of a preclear, to BE there and not do anything else but BE there.

**TRAINING STRESS:** Have student and coach sit facing each other, neither making any conversation or effort to be interesting. Have them sit and look at each other and say and do nothing for some hours. Student must not speak, blink, fidget, giggle or be embarrassed or anaten. It will be found the student tends to confront WITH a body part, rather than just confront, or to use a system of confronting rather than just BE there. The drill is misnamed if Confronting means to DO something to the pc. The whole action is to accustom an auditor to BEING THERE three feet in front of a preclear without apologizing or moving or being startled or embarrassed or defending self. Confronting with a body part can cause somatics in that body part being used to confront. The solution is just to confront and BE there. Student passes when he can just BE there and confront and he has reached a *major stable win*.

**HISTORY:** Developed by L. Ron Hubbard in Washington in March 1957 to train students to confront preclears in the absence of social tricks or conversation and to overcome obsessive compulsions to be “interesting”. Revised by L. Ron Hubbard April 1961 on finding that S.O.P. Goals required for its success a much higher level of technical skill than earlier processes. Revised by L. Ron Hubbard in August 1971 after research discoveries on TRs.

**NUMBER: TR 0 BULLBAIT REVISED 1961**

**NAME:** Confronting Bullbaited.

**COMMANDS:** Coach: “Start” “That’s it” “Flunk”.

**POSITION:** Student and coach sit facing each other a comfortable distance apart—about three feet.

**PURPOSE:** To train student to confront a preclear with auditing or with nothing. The whole idea is to get the student able to BE there comfortably in a position three feet in front of the preclear without being thrown off, distracted or reacting in any way to what the preclear says or does.

**TRAINING STRESS:** After the student has passed TR 0 and he can just BE there comfortably, “bull baiting” can begin. Anything added to BEING THERE is sharply flunked by the coach. Twitches, blinks, sighs, fidgets, anything except just being there is promptly flunked, with the reason why.

**PATTER:** Student coughs. Coach: “Flunk! You coughed. Start.” This is the whole of the coach’s patter as a coach.

**PATTER AS A CONFRONTED SUBJECT:** The coach may say anything or do anything except leave the chair. The student’s “buttons” can be found and tromped on hard. Any words not coaching words may receive *no* response from the student. If the student responds, the coach is instantly a coach (see patter above). Student passes when he can BE there comfortably without being thrown off or distracted or reacting in any way to anything the coach says or does and has reached a *major stable win*.

**HISTORY:** Developed by L. Ron Hubbard in Washington in March 1957 to train students to confront preclears in the absence of social tricks or conversation and to overcome obsessive compulsions to be “interesting”. Revised by L. Ron Hubbard April 1961 on finding that S.O.P. Goals required for its success a much higher level of technical skill than earlier processes. Revised by L. Ron Hubbard in August 1971 after research discoveries on TRs.

**NUMBER: TR 1 REVISED 1961**

**NAME:** Dear Alice.

**PURPOSE:** To train the student to deliver a command newly and in a new unit of time to a preclear without flinching or trying to overwhelm or using a via.

**COMMANDS:** A phrase (with the “he said’s” omitted) is picked out of the book “Alice in Wonderland” and read to the coach. It is repeated until the coach is satisfied it arrived where he is.

**POSITION:** Student and coach are seated facing each other a comfortable distance apart.

**TRAINING STRESS:** The command goes from the book to the student and, as his own, to the coach. It must not go from book to coach. It must sound natural not artificial. Diction and elocution have no part in it. Loudness may have.

The coach must have received the command (or question) clearly and have understood it before he says “Good”.

**PATTER:** The coach says “Start”, says “Good” without a new start if the command is received, or says “Flunk” if the command is not received. “Start” is not used again. “That’s it” is used to terminate for a discussion or to end the activity. If session is terminated for a discussion, coach must say “Start” again before it resumes.

This drill is passed only when the student can put across a command naturally, without strain or artificiality or elocutionary bobs and gestures, and when the student can do it easily and relaxedly.

*HISTORY:* Developed by L. Ron Hubbard in London, April 1956, to teach the communication formula to new students. Revised by L. Ron Hubbard 1961 to increase auditing ability.

***NUMBER: TR 2 REVISED 1961***

*NAME:* Acknowledgements.

*PURPOSE:* To teach student that an acknowledgement is a method of controlling preclear communication and that an acknowledgement is a full stop.

*COMMANDS.* The coach reads lines from “Alice in Wonderland” omitting “he said” and the student thoroughly acknowledges them. The coach repeats any line he feels was not truly acknowledged.

*POSITION:* Student and coach are seated facing each other at a comfortable distance apart.

*TRAINING STRESS:* Teach student to acknowledge exactly what was said so preclear knows it was heard. Ask student from time to time what *was* said. Curb over and under acknowledgement. Let student do anything at first to get acknowledgement across, then even him out. Teach him that an acknowledgement is a stop, not beginning of a new cycle of communication or an encouragement to the preclear to go on.

To teach further that one can fail to get an acknowledgement across or can fail to stop a pc with an acknowledgement or can take a pc’s head off with an acknowledgement.

*PATTER:* The coach says “Start”, reads a line and says “Flunk” every time the coach feels there has been an improper acknowledgement. The coach repeats the same line each time the coach says “Flunk”. “That’s it” may be used to terminate for discussion or terminate the session. “Start” must be used to begin a new coaching after a “That’s it”.

*HISTORY:* Developed by L. Ron Hubbard in London in April 1956 to teach new students that an acknowledgement ends a communication cycle and a period of time, that a new command begins a new period of time. Revised 1961 by L. Ron Hubbard.

***NUMBER: TR 3 REVISED 1961***

*NAME:* Duplicative Question.

*PURPOSE:* To teach a student to duplicate without variation an auditing question, each time newly, in its own unit of time, not as a blur with other questions, and to acknowledge it. To teach that one never asks a second question until he has received an answer to the one asked.

*COMMANDS:* “Do fish swim?” or “Do birds fly?”

*POSITION:* Student and coach seated a comfortable distance apart.

*TRAINING STRESS:* One question and student acknowledgement of its answer in one unit of time which is then finished. To keep student from straying into variations of command. Even though the same question is asked, it is asked as though it had never occurred to anyone before.

The student must learn to give a command and receive an answer and to acknowledge it in one unit of time.

The student is flunked if he or she fails to get an answer to the question asked, if he or she fails to repeat the exact questions, if he or she Q and As with excursions taken by the coach.

*PATTER:* The coach uses “Start” and “That’s it”, as in earlier TRs. The coach is not bound after starting to answer the student’s question but may comm lag or give a commenting type answer to throw the student off. Often the coach should answer.

Somewhat less often the coach attempts to pull the student in to a Q and A or upset the student. Example:

Student: “Do fish swim?” Coach: “Yes.” Student: “Good . “ Student: “Do fish swim?” Coach: “Aren’t you hungry?” Student: “Yes.” Coach: “Flunk.”

When the question is not answered, the student must say, gently, “I’ll repeat the auditing question,” and do so until he gets an answer. Anything except commands, acknowledgement and, as needed, the repeat statement, is flunked. Unnecessary use of the repeat statement is flunked. A poor command is flunked. A poor acknowledgement is flunked. A Q and A is flunked (as in example). Student misemotion or confusion is flunked. Student failure to utter the next command without a long comm lag is flunked. A choppy or premature acknowledgement is flunked. Lack of an acknowledgement (or with a distinct comm lag) is flunked. Any words from the coach except an answer to the question, “Start”, “Flunk”, “Good” or “That’s it”, should have no influence on the student except to get him to give a repeat statement and the command again. By repeat statement is meant, “I’ll repeat the auditing command.”

“Start”, “Flunk”, “Good” and “That’s it” may not be used to fluster or trap the student. Any other statement under the sun may be. The coach may try to leave his chair in this TR. If he succeeds it is a flunk. The coach should not use introverted statements such as “I just had a cognition.” “Coach divertive” statements should all concern the student, and should be designed to throw the student off and cause the student to lose session control or track of what the student is doing. The student’s job is to keep a session going in spite of anything, using only command, the repeat statement or the acknowledgement. The student may use his or her hands to prevent a “Blow” (leaving) of the coach. If the student does anything else than the above, it is a flunk and the coach must say so.

*HISTORY:* Developed by L. Ron Hubbard in London in April 1956 to overcome variations and sudden changes in sessions. Revised 1961 by L. Ron Hubbard. The old TR has a comm bridge as part of its training but this is now part of and is taught in Model Session and is no longer needed at this level. Auditors have been frail in getting their questions answered. This TR was redesigned to improve that frailty.

***NUMBER: TR 4 REVISED 1961***

*NAME:* Preclear Originations.

*PURPOSE:* To teach the student not to be tongue-tied or startled or thrown off session by originations of preclear and to maintain ARC with preclear throughout an origination.

*COMMANDS:* The student runs “Do fish swim?” or “Do birds fly?” on coach. Coach answers but now and then makes startling comments from a prepared list given by Supervisor. Student must handle originations to satisfaction of coach.

*POSITION:* Student and coach sit facing each other at a comfortable distance apart.

*TRAINING STRESS:* The student is taught to hear origination and do three things. 1. Understand it; 2. Acknowledge it; and 3. Return preclear to session. If the coach feels abruptness or too much time consumed or lack of comprehension, he corrects the student into better handling.

*PATTER:* All originations concern the coach, his ideas, reactions or difficulties, none concern the auditor. Otherwise the patter is the same as in earlier TRs. The student's patter is governed by: 1. Clarifying and understanding the origin. 2. Acknowledging the origin. 3. Giving the repeat statement "I'll repeat the auditing command," and then giving it. Anything else is a flunk.

The auditor must be taught to prevent ARC breaks and differentiate between a vital problem that concerns the pc and a mere effort to blow session. (TR 3 Revised.) Flunks are given if the student does more than 1. Understand; 2. Acknowledge; 3. Return pc to session.

Coach may throw in remarks personal to student as on TR 3. Student's failure to differentiate between these (by trying to handle them) and coach's remarks about self as "pc" is a flunk.

Student's failure to persist is always a flunk in any TR but here more so. Coach should not always read from list to originate, and not always look at student when about to comment. By Originate is meant a statement or remark referring to the state of the coach or fancied case. By Comment is meant a statement or remark aimed only at student or room. Originations are handled, Comments are disregarded by the student.

*HISTORY:* Developed by L. Ron Hubbard in London in April 1956 to teach auditors to stay in session when preclear dives out. Revised by L. Ron Hubbard in 1961 to teach an auditor more about handling origins and preventing ARC breaks.

As TR 5 is also part of the CCHs it can be disregarded in the Comm Course TRs despite its appearance on earlier lists for students and staff auditors.

#### TRAINING NOTE

It is better to go through these TRs several times getting tougher each time than to hang on one TR forever or to be so tough at start student goes into a decline.

HCO BULLETIN OF 20 AUGUST 1971  
Issue I

**HAS SPECIALIST AUDITING PROGRAM**  
(Reference HCO PL 20 Aug 71,  
Issue I, "HAS TROUBLES")

The HAS (HCO Area Secretary), any HCO Executive Secretary, HCO Cope Officer, HCO Org Officer, Tech Establishment Officer, any HAS Deputy OR any Executive or Divisional Head or staff member who shows a tendency to transfer or unstabilize staff members or who fails to hat others, must be processed especially in order to be totally stable on post.

The HAS and Establishment Officers are peculiarly subject to efforts to unstabilize them. These require the Program to be done in any case whether stable or not.

Executives or staff members who show signs of obsessive transfer of the staff or org are also greatly benefited.

The HAS Specialist Rundown consists of processes which increase the ability to hold a position.

THE RUNDOWN MAY ONLY BE DONE WHEN NO EXISTING AUDITING PROGRAM IS ONLY PARTIALLY DONE. COMPLETE THE EXISTING CYCLE FIRST.

HAS SPECIALIST PGM

(HCO B 24 May 1970 Revised)

*C/S Series 1*

**AUDITOR'S RIGHTS**

(Revised to update and delete the O/R list  
and add Auditing Over Out Ruds.  
*All changes are in this type style. )*

**AUDITOR RESPONSIBILITY FOR C/Ses**

An auditor who receives a Case Supervisor direction (C/S) of what to audit on a pc is NOT discharged of his responsibility as an auditor.

THE AUDITOR HAS A SERIES OF RESPONSIBILITIES THAT ARE PART OF EVERY C/S HE GETS TO AUDIT.

**ACCEPTING THE PC**

No auditor is required to accept a specific pc just because the pc is assigned to him.

If an auditor does not believe he can help that particular pc or if he dislikes auditing that particular pc the auditor has a right to refuse to audit that pc. The auditor must state why.

The Case Supervisor, Director of Processing or Director of Review, nor any of their seniors, may not discipline the auditor for refusing to audit a particular pc.

An auditor who refuses to audit his quota of hours or sessions is of course subject to action.

Thus refusing to audit a particular pc, so long as one is not refusing to audit other pcs, is not actionable.

"I do not wish to audit this pc because\_\_\_\_\_. I am willing to audit other pcs," is the legal auditor statement in the matter.

Some pcs get a bad name with some auditors, some don't appreciate the auditing, some conflict with a particular auditor's own personality. There are such instances. It does not mean certain pcs cannot be helped by others.

It is also true that an auditor who dislikes a pc may not do a good job so the rule also has a practical side to it.

One auditor disliked young men and did a bad job on them. Another disliked old ladies and chopped them up in session. One pc had messed up several Scientologists and couldn't find anyone to audit him at all.

We are not auditing people to make amends to the world.

Thus an auditor has a right to reject or accept the pcs he is given.

## ACCEPTING A C/S

When the auditor gets a C/S to do on a case and if he thinks it is not the correct thing to do he has the right to reject the C/S for that pc and require another one he can agree to.

The auditor does *not* have the right to start doing a C/S and change it during the session except as noted below.

*The auditor may NOT C/S in the auditing chair while auditing the pc. If he has NO Case Supervisor at all the auditor still audits from a C/S. He writes the C/S before session and adheres to it in session. To do something else and not follow the C/S is called "C/Sing in the chair" and is very poor form as it leads to Q and A.*

## STALE DATED C/S

*A C/S that is a week or two old or a Repair (Progress) Pgm that is a month or two old is dynamite.*

*This is called a "Stale Dated Pgm" or a "Stale Dated C/S" meaning it is too old to be valid.*

*It should have been done sooner. The pc of last week when the C/S was written may have been well and happily employed but a week later may have headaches and reprimand from the boss.*

*It is dangerous to accept a Repair (Progress) Pgm if it is old.*

*The auditor who sees his C/S is old and sees the pc has Bad Indicators is justified in demanding a fresh C/S giving his reasons why.*

*A program written in January may be completely out of date in June. Who knows what may have happened in between.*

*Use fresh C/Ses and fresh Pgms.*

*Stale Dates only occur in poorly run backlogged Divisions anyway. The real remedy is reorganize and hire more and better auditors.*

## ENDING THE SESSION

When the C/S he has is proving unworkable *during* the session, the auditor has a right to end the session and send the folder to the C/S.

Ending the session is totally up to the auditor.

If the auditor just doesn't complete an action that was producing TA and could be completed it is of course a flunk. Such a case is just not running a basic engram the one more time through that would bring the TA down and give a proper end phenomena. This and similar actions would be an auditor error.

The judgement here is whether or not the auditor's action is justified in ending the session.

Even though he may have made an error, the auditor cannot be blamed for the *ending* off of the session as that is totally up to him. He can be given a flunk for the error

## AUDITING OVER OUT RUDS

*Auditing a pc on something else whose ruds are out is a MAJOR AUDITING ERROR.*

*Even if the C/S omits “Fly a rud” or “Fly ruds” this does not justify the auditor auditing the pc over out ruds.*

*The auditor can do one of two things: He can Fly all ruds or he can return the folder and request ruds be flown.*

*The DIANETIC AUDITOR is not excused from auditing over out ruds and in an HGC must be specially cautioned not to do so but return the folder for a new C/S. Better still he should learn to Fly ruds.*

#### INABILITY TO FLY RUDS

If an auditor cannot get a rud to F/N, cannot get any rud to F/N, he is justified in starting a Green Form.

The auditor solution to no F/N on ruds is to do a GF whether the C/S said to or not.

This is an expected action.

It is understood the auditor would use Suppress and False in trying to Fly ruds.

#### SESSIONS FAR APART

*When a pc has not had a session for some time, or when a pc gets sessions days apart, RUDS MUST BE FLOWN. Otherwise the pc will get audited over out ruds. This can develop mental mass.*

*Optimum session scheduling is a series of sessions or a whole program done in a block of sessions close together. This prevents the world from throwing the pc's ruds out between sessions.*

*Giving sessions far apart barely keeps up with life. The auditing time is absorbed in patching life up.*

*Rapid gain gets above life's annoyances and keeps the pc there.*

#### UNREADING ITEMS

When an item the auditor has been told to run doesn't read on the meter, even when the auditor puts in Suppress and Invalidate on it, the auditor MUST NOT do anything with the item no matter what the C/S said.

It is expected he will see if it reads and use Suppress and Invalidate on it. And if it still doesn't read he will be expected NOT to run it.

#### LISTS

When an auditor whose C/S told him to list “Who or what \_\_\_\_\_” or any list question finds that the list question does not read, the auditor MUST NOT list it.

When doing a list ordered by the C/S it is assumed that the auditor will test it for read before listing and that he will NOT list an unreading question. (A read is an actual fall, not a tick or a stop.)

#### LIST TROUBLE

When an auditor has trouble doing a list and getting an item it is expected he will use a Prepared List like L4B to locate the trouble and handle it.

As it is very hard on a pc to mess up a list it is expected the auditor will handle the situation then and there with no further C/S directions.

## HIGH TA

When the auditor sees the TA is high at session start yet the C/S says to “Fly a rud” or run a chain, the AUDITOR MUST NOT TRY TO FLY A RUD and he must not start on a chain.

Trying to bring a TA down with ARC Brks or ruds is very hard on a pc as ARC Breaks aren't the reason TAs go up.

Seeing a high TA at start the Dianetic auditor or Scn auditor up to Class II does *not* start the session but sends the folder back to the C/S and for a higher class auditor to do.

Seeing a high TA at start the Scientology auditor (Class III or above) (a) checks for exteriorization in a recent session and if so the session is ended and the C/S is asked for an “Interiorization Rundown”; (b) if the pc has had an Interiorization Rundown *the auditor asks the C/S for permission to do a “C/S Series 53” or a Hi-Lo TA assessment or whatever the C/S indicates. The Int RD may have been (usually is) overrun and needs rehab or correction and it is usual to check it—it is included in a “C/S 53” and a Hi-Lo TA.*

These actions are expected of the auditor even when not stated in the C/S.

### GOING ON HOPING

*When a case is running badly session to session the LAST thing you do is go on hoping, either in auditing or C/Sing.*

*“Let's try \_\_\_\_\_”, “Then this”, “Then this”, is not going to solve the case.*

*YOU GET DATA. You can get data by a White Form (Pc Assessment Form). You can get data from a GF fully assessed (Method 5). You can get data by 2-way comm on various subjects. You can have the D of P interview and get answers. You can even ask his mother.*

*You look for case errors. You study the folder back to where the pc ran well and then come forward and you'll find the error every time.*

*DO NOT JUST GO ON SESSION AFTER FAILED SESSION HOPING. That's pure idiocy.*

*You get data! from prepared lists, from life, from the pc, from the folder.*

*FIND THE BUG!*

*Ah, good Lord, he is a Pinkerton Agent sworn to secrecy! He does yoga exercises after every session. He was tried for murder when he was 16 and nobody has run the engram of it.*

*Various auditors ran the same engram chain four times*

*An auditor ran Int RD twice.*

*After Power she had her baby and nobody ran the delivery.*

*He doesn't like to talk but is a “Grade Zero”!*

*A dozen dozen reasons can exist*

*An auditor does NOT let a C/S C/S hopefully. He refuses the C/Ses until a Folder Error Summary is done and the bug found.*

## THINGS DONE TWICE

*By carelessness the same rundowns can be called for twice and done twice or even more.*

*A Folder Summary inside the front cover must exist and must be kept up.*

*Over it there must be a program on which the case is being audited. But just because it's covered, never neglect entering a session and what was run on the Folder Summary (FS).*

*If Hold it Still is ordered, see if it was run before.*

*Don't let major Rundowns be done twice.*

*DIANETIC ITEMS must NEVER be run twice. Dianetic lists must not be scattered through a folder. Bring them together and keep them together and being brought forward.*

## COPY

*Don't copy Dianetic lists or worksheets from notes or items from lists.*

*Keep all admin neat and in the original form.*

*Copying makes errors possible.*

## RUDS GOING OUT

When the ruds go out during the session the auditor recognizes the following:

Pc Critical = W/H from auditor

Pc Antagonistic = BPC in session

No TA = Problem

Tired = Failed Purpose or no sleep

Sad = ARC Break

Soaring TA = Overrun or Protest

Dope Off = By-passed F/N or not enough sleep

No Interest = Out Ruds or no interest in the first place.

An auditor who isn't sure what it is but runs into trouble with the pc (except on lists which he handles at once always) is smart to end off the session quickly, write down the full observation and get it to the C/S.

The auditor who is an old hand and knows what he is looking at as per above scale (and the C/S the C/S would give) handles it promptly.

Pc Critical = W/H = pull the W/H.

Pc Antagonistic = BPC = assess proper list (such as LI C) and handle.

No TA (or case gain) = Problem = locate the problem.

Tired = no sleep or Failed Purpose = check which it is and handle.

Sad = ARC Brk = locate and handle, Itsa earlier Itsa.

Soaring TA = O/R or Protest = find which and handle. Such an O/R is usually by rehab.

Dope Off = lack of sleep or BP F/N = check on sleep, or rehab F/N.

No Interest = no interest in first place or Out Ruds = check for interest or put in ruds.

List goes wrong = BPC = handle or do L4B or any L4 at once.

Ruds won't fly = some other error = assess GF and handle.

The auditor has no business trying to do the C/S given when it collides with and isn't designed to handle any of the above.

If the previous session disclosed such an error and this session C/S was designed to handle and doesn't, the auditor should end off and the next C/S should be "2-way comm for data".

#### CASE NOT HANDLED

When the auditor or the Examiner collides with a pc who is asserting his case has not been handled, there should not be a new set of actions based on little data but the auditor should end off and the C/S should order a "way comm on what hasn't been handled".

The auditor should not at once take this up as part of any other C/S.

In other words an auditor doesn't change the C/S to a 2-way comm on something not called for by C/S.

#### MAJOR ACTIONS

An auditor should *never* begin a major action on a case that is not "set up" for it.

As this can occur during a session it is vital to understand the rule and follow it. Otherwise a case can be bogged right down and will be hard to salvage as now a new action to repair has been added to an unrepaired action. Now, if the auditor starts a major action on a case not "set up" we get 2 things to repair where we only had 1 as the major action won't work either.

*Repair* = patching up past auditing or recent life errors. This is done by prepared lists or completing the chain or correcting lists or even 2-way comm or prepchecks on auditors, sessions, etc.

*Rudiments* = setting the case up for the session action. This includes ARC Brks, PTPs, W/Hs, GF or O/R listing or any prepared list (such as LIC, etc).

*Set up* = getting an F/N showing and VGIs before starting any major action. It means just that—an F/N and VGIs before starting *any* major action. Such may require a repair action and rudiments as well.

*Major Action* = any—but any—action designed to change a case or general considerations or handle continual illness or improve ability. This means a *Process* or even a series of processes like 3 flows. It doesn't mean a grade. It is any process the case hasn't had.

*Grade* = a series of processes culminating in an exact ability attained, examined and attested to by the pc.

*Program* = any series of actions designed by a C/S to bring about definite results in a pc. A program usually includes several sessions.

The vast bulk of auditing errors come about because C/Ses and auditors seek to use a Major Action to repair a case.

It is a responsibility of an auditor to reject a C/S which seeks to use one or more major actions to repair a case that isn't running well.

The auditor must understand this completely. He can be made to accept a wrong C/S for the pc and even more importantly can in his own session make the error and mess up the case.

Example: Pc has not been running well (no real TA or had a grumpy Exam report). Auditor sees C/S has ordered a major action, not a repair by prepared lists, ruds, etc. The auditor must reject the C/S as he will be made to fail in session by it.

Example: Auditor gets a C/S, “(1) Fly a rud; (2) Assess LX3; (3) Run 3-way recall, 3-way secondaries, 3-way engrams on all // X items”. The auditor can’t get a rud to fly. Does the LX3. In other words he flunks by failing to SET UP the case. It could also go this way. Auditor can’t get a rud to fly, does a GF, gets no F/N. He MUST NOT begin a major action but MUST end off right there.

It is fatal to begin any new process on the case designed to change the case if the case is not F/N VGIs.

The pc who starts processing for the first time and is surely not F/N VGIs must be *set up* by repair actions! Simple rudiments, life ruds, O/R list on life, even assessing prepared lists on life, these are repair actions. The pc *will* sooner or later begin to fly. Now at session start you put in a rud, get F/N VGIs and CAN start major actions.

So the auditor has a responsibility not to be led up a garden path by a C/S which orders a major action on a pc who isn’t repaired or by not being able in session to get an F/N VGIs by repair.

The *only* exceptions are a touch assist or life ruds or the Dianetic assist all on a temporarily sick pc. But that’s repair isn’t it?

#### PROGRAM VIOLATIONS

When an auditor receives a C/S and sees that it violates the pc’s program he should reject it.

The pc, let us say, is supposed to finish his Dianetic Triples but is suddenly being given a Group Engram Intensive. That violates the program and also the grade.

If the pc is running badly, a repair should be ordered. If not, the program should be completed.

Example: An effort is being made to get the pc to go backtrack. This is a program containing several major actions which probably consists of several sessions. Before this program is complete and before the pc has gone backtrack, the C/S orders “(1) Fly a rud, (2) 3 S & Ds”. The auditor should recognize in 3 S & Ds a major action being run into the middle of a program and reject it. The correct action is of course the next backtrack process.

#### GRADE VIOLATIONS

A pc who is on a grade and hasn’t attained it yet must not be given major actions not part of that grade.

Example: Pc is on Grade I. C/S orders a list having to do with drinking. It is not a process on that grade. It could be done after Grade I is attained and before Grade II is begun. The C/S is incorrect and should not be accepted.

#### ABILITY ATTAINED

Now and then before the full major action is complete or before all the grade processes are run, the pc will attain the ability of the grade or the end phenomena of the action.

This is particularly true of valence shifters or Interiorization Rundowns and can happen in grades.

The auditor should recognize it and, with the F/N VGIs always present at such moments, end off.

I know of one case who had a huge cog about Interiorization on Flow I Engrams and was pushed by both C/S and auditor to do Flows 2 and 3 who bogged so badly that it took a long while—weeks—to straighten the case out.

The ability itself gets invalidated by pushing on.

On the other hand this should never be taken as an excuse. “I think he clogged to himself so we ended off.” It must be a real “What do you know!” sort of out-loud cog with a big F/N and VVGIs and directly on the subject to end off a major action or a program or a grade before its actions are all audited.

### REVIEWING REVIEWS

An auditor who gets a C/S or an order to repair a case that is running well should reject doing the action.

I have seen a case ordered to repair who had Ext Full Perception Doing Great. The repair bogged the case. The case then got running well again but a second C/S ordered a new repair which of course bogged it. Then major actions were done. The case was again repaired and rehabbed and became ok. Three times the auditor should have said NO.

### FALSE REPORTS

*The vilest trick that can be played on a pc is for an auditor to falsify an auditing report.*

*It may be thought to be “good Public Relations” (good PR) for the auditor with the C/S.*

*Actually it buries an error and puts the pc at risk.*

*INTEGRITY is a hallmark of Dianetics and Scientology.*

*Just because psychiatrists were dishonest is no reason for auditors to be.*

*The results are there to be gotten.*

*False reports like false attests recoil and badly on both the auditor and pc.*

### OVERTS ON PCS

*When an auditor finds himself being nattery or critical of his pcs he should get his withholds on pcs pulled and overts on them off.*

*An auditor who goes sad is auditing pcs over his own ARC Break.*

*An auditor worried about his pc is working over a Problem.*

*Getting one’s ruds in on pcs or C/Ses or the org can bring new zest to life.*

### AUDITORS DON’T HAVE CASES

*In the chair no auditor has a case.*

*If breath shows on a mirror held to his face he can audit.*

*Faint afterwards if you must but see that the pc gets to the Examiner with his F/N.*

*Then get yourself handled.*

### “WHAT HE DID WRONG”

An auditor has a right to know what he did wrong in the session that went wrong.

Most often a sour session occurs only when the rules and data in this HCO B have been violated.

But an auditor's TRs can go out or his listing and nulling is in error.

After a session that went wrong somebody else (not the auditor) should ask the pc what the auditor did. This sometimes spots a false auditing report. But it also sometimes is a false report by the pc.

In any event, the auditor has a right to know. Then he can either correct his auditing or his know-how or he can advise the C/S the pc's report is untrue and better repair can be done on the pc.

Savage action against an auditor is almost never called for. He was trying to help. Some people are hard to help.

*Not only does an auditor have the right to be told what was wrong but he must be given the exact HCO B, date and title, that he violated.*

*Never take a verbal or written correction that is not in an HCO B or tape.*

*Don't be party to a "hidden data line" that doesn't exist*

*"You ruined the pc!" is not a valid statement. "You violated HCO B page \_\_\_\_" is the charge.*

*No auditor may be disciplined for asking, "May I please have the tape or HCO B that was violated so I can read it or go to Cramming."*

*If it isn't on a tape, a book or an HCO B IT IS NOT TRUE and no auditor has to accept any criticism that is not based on the actual source data.*

*"If it isn't written it isn't true" is the best defense and the best way to improve your tech.*

These are the rights of the auditor with relation to a C/S. They are all technical rights based on sound principles.

An auditor should know them and use them.

If an auditor stands on these rights and gets beaten down he should put all the facts before his nearest OTL or SO ship as something would be very wrong somewhere.

Auditing is a happy business—when it is done right.

### ASSISTS ADDITION

(Refers to HCO B 23 July 71 which revised  
HCO B 15 Mar 71)

In running Version A and Version B of a Hold it Still temperature assist DO NOT RUN IT OVER OUT RUDS.

Often a pc is ill because his ruds in life are out.

The Temperature Assist will only fail if the pc had an In Life ARC Break, Present Time Problem or Withhold.

Sometimes these alone will change the temperature for the better.

Each rud of course must be taken Earlier Similar to F/N if no F/N on the first answer given to a rud.

So Add to Version A C/S at the start:

0. Fly all ruds.

And to Version B C/S at the start:

0. Fly all ruds.

These are done with the pc holding the cans.

The walkabout version is done off the cans but checked.

Overrun is rehabbed.

If no rehab then flatten by further running.

When the pc off the cans in Version B has a cognition he should be put back on the cans and checked. Usually an F/N will be found.

---

It has not been fully determined how many times a pc can be run on "Hold it Still".

But if the pc has been run before on the process and does not run, it should be checked for overrun and rehabbed.

*Auditor Admin Series 2*

*C/S Series 56*

**HOW TO GET RESULTS  
IN AN HGC**

Obtaining excellent case results is an ADMINISTRATIVE not a wholly technical function.

Auditors and C/Ses are often weak on Administrative. They think general tech results improve only by more tech study. If they continue to think this way they wind up squirreling. For they are working on a wrong target for improvement, a wrong WHY or reason.

Auditing is a *team* activity. The day of the individual country doctor is dead. Even if an individual field auditor starts out as an individual he goes one of two directions—he overworks and squirrels himself into failure or he builds up a team—may only be a receptionist and an apprentice auditor but he is still building up a team. I have never seen individual auditors succeed over a long period. Failing to form or become part of a team, they eventually fade out or squirrel.

The reason is simple enough.

These rules apply:

TO IMPROVE TECH RESULTS YOU MUST IMPROVE ADMINISTRATION.

And I don't mean just writing better in folders.

DEFINITION

*ADMINISTRATION consists of the formation and handling of the lines and terminals involved in production.*

Unless an auditor understands this fully, he will never insist on a Tech Sec, a Tech Establishment Officer, D of P, C/S, Examiner, Pages, Folder Admin and himself will begin to omit keeping a Folder Summary and then omit the session actions and then, with big loses, retire from it all.

If I were an auditor and saw some of these things missing, I'd be liable to say, "Are you guys kidding? I thought we were here to audit pcs."

Without the correct pattern of lines and terminals YOU DON'T GET RESULTS, you get headaches, mad neighbors and refunds.

Auditing on lines, an auditor should regard himself as a highly skilled expert, a technical specialist whose work requires respect and *service*.

And Case Supervising on lines, a Case Supervisor should consider himself a sort of Czar whose word is so law even the Exec Director thinks several times before he approaches—duly servile of course and bowing the prescribed three times as he exits.

A Class XII on Flag is listened to by others with a hush even if he is only commenting on the weather.

These are the stars of the team. Their worldwide reputation for smooth flubless auditing is *an administrative* result!

Short of space, overloaded, short of admin personnel, turning out the highest well done hours in the world, Flag's Div IV produces because of an *Admin* system.

The highest of these C/Ses and auditors goes to Cramming if he misplaces a comma or drops a TR 1.

If the sessions' exams at Examiner drop from 90% F/N the whole place gets overhauled.

Folders are Folder Error Summaried by an FES section. The Folder Summary is kept up each session (or Cramming). The folder is studied and C/Sed. The D of P assigns the sessions. The C/S is done correctly (or Cramming). The folder travels on *its* lines. The tests are done.

In short it is a complex but constantly flowing pattern of moving pcs, folders and examinations interspersed with testing and interviews and re-registration.

There is *a right way* to do it.

## RESULTS

If *an* org has only 65% of its sessions F/N VGIs at Examiner the *right* answer is to organize the place.

Why?

Well, the first answer is that the *third* dynamic is stronger than the first dynamic.

An auditor auditing alone is a first dynamic. The pc is a first dynamic. As it is the auditor plus pc that must be greater than the reactive mind, one can easily work the rest out.

If the auditor is part of a functioning third dynamic, not just an individual, the auditor plus pc versus the bank is a LOT more than the bank.

Another answer is that an auditor knows the pc, if only because of sessions, and personal opinion enters into it. That is not a pure technical view as a C/S's must be.

Another answer is that an auditor in a group gets more *auditing* done.

Individually practicing auditors often fail because nobody is taking care of the auditor as a person. Further they get loses. No one sends them to Cramming. When they get loses they often start squirreling. Then they *really* get loses.

That ends them as auditors.

An auditor working in a good on policy organization is given service. He does get sent to Cramming. He does keep his tech updated. He gets wins. When he doesn't he's put back on standard tech. So he happily keeps going and makes lots of happy people.

So if I were auditing in a group I would *insist* as a condition of work that Div IV and Div V be good on policy divisions, fully organized with no nonsense.

I know whereof I speak. As a part-time duty I work as a consulting C/S with a good IV and a good V. Sometimes I have had to take over the whole C/S line. When the organization bogs in any way I know the whole thing is heading toward

single-handing the lot. So I get the lines back in and get people to Cramming and get the F/N at Examiner ratio approaching 100% again.

Thus, the advice you get about C/Sing is live-live-live, not canned theory.

### ORG WINS

Being on administrative lines to all orgs, I can tell you pointblank that

THEIR STATS DEPEND ON THEIR VOLUME AND QUALITY OF SERVICE.

That isn't propaganda. It's pure fact.

The F/N-no F/N at Examiner ratio tells you at once if Divs IV and V are organized and operating or if they are just fooling about.

At 50% to 75% F/N at Examiner the administrative functions of Divs IV and V are stinking bad. C/S Series 25 is out. Cramming is out. Hidden data lines exist. HCO Bs, books and tapes are not used.

The public, at that % of F/N, will stay away in droves. Registrars will go batty and adopt "Hot Prospect Systems".

The staff will go low pay and the execs will be a perpetual dark shade of purple from yelling. The cash-bills ratio will be the subject of finance missions and the neighbors will be phoning the police.

Why?

Because an org is itself a technical delivery organization and 50% to 75% F/N at Examiner is an overt product.

The Academy has already failed to apply student study tech and word clearing. Qual is a joke.

There is no library of tech available and if available isn't read.

The org as a tech service delivery unit is treating its public to a no-auditing situation and will get in trouble.

### REMEDY

The way to remedy is to get on policy with tech organization.

Put in a Qual with word clearing and a library and cramming.

Put in the C/S Series 25 Tech lines.

Tolerate NO out-tech or out-admin in folders.

Dummy run the lines until they're in.

Cram Cram Cram C/S and auditor and tech personnel flubs whenever they occur.

Get the organization functioning.

Your F/N at Examiner ratio will climb straight up to 90% 95% 98%.

By actual *test* pcs will flood in, Reg lines will get easy, success stats soar.

More auditors more C/Ses, more organization. A second, a third HGC.

And the more thoroughly the admin lines are manned the better the tech lines work.

This conclusion came from actual inspections of orgs and studies of their stats.

Orgs should be selling more training than processing.

But why train if you can't interne them in a good Qual and HGC? They'll never amount to anything as auditors unless they work in an organization that is on tech and on policy.

So you need an HGC.

Tech, done in a proper administrative framework, works.

Some orgs really don't believe they could ever attain the flubless auditing quality of Flag.

But they *can*.

It is even easy.

It is even easier to attain flubless quality of auditing than any other kind.

You put in a real on policy admin pattern in IV and V. You begin with a Qual Interne Course.

You send to Cramming for any C/S or auditing error no matter how minute.

The results come up.

The errors cease.

You're a success! If you do it.

### STUDENT COMPLETIONS

For statistical purposes a STUDENT COMPLETION must be PAID, must have passed EXAMINATION and must have an acceptable success story given by him to Success.

Any quickie or incompetent completion falsifies the statistic and is subject to discipline.

The completion list follows:

1. Student Hat *counts 1.*
2. Mini Course *counts 1.*
3. TR Course *counts 2.*
4. Theory portion of any classification course incl HDC *counts 5.*
5. Practical portion of any class incl HDC *counts 5.*
6. OK Interne to Audit as an Interne *counts 5.*
7. OK to Audit as an HGC Auditor *counts 5.*
8. OEC each Part *counts 5.*
9. Exec Cramming Course *counts 1.*
10. Course Super Mini Course *counts 5.*
11. Auditor Drills Course *counts 5.*
12. Supervisor Drills Course *counts 5.*
13. Int-Ext Pack or other such packs *counts 1.*
14. TR Course Super Course *counts 2.*
15. SO/WW ED 46R. *Counts 5* for course and all drills.

Any course whose value is unknown is to be queried of Training and Services Bureau CLO.

For every 9 public points paid there can be 1 point added for any crew or staff completion.

Retread courses count half.

Penalties: Blown Academy Student *10 points.* Blown or incomplete TR Student *5 points.*

## SH & AO

The following points are valid for SHs and AOs in addition to the above which are also valid in these orgs.

16. Class V and VI *15 points*.
17. Solo Course *10 points*.
18. Clearing Course *5 points*.
19. OT I *3 points*.
20. OT II *3 points*.
21. OTIII *5 points*.
22. OT III X *5 points*.
23. OT IV *3 points*.
24. OT V *3 points*.
25. OT VI *3 points*.
26. OT VII *3 points*.
27. OT VIII *3 points* (when released).
28. OT IX *3 points* (when released).
29. OT X *3 points* (when released).
30. Class VII *15 points*.
31. Class VIII *15 points*.
32. Class IX (HSST) *15 points*.
33. Class X *5 points*.

**PC COMPLETIONS**

For statistical purposes an Audited Completion must be PAID and have attested with an F/N VGIs and written a Success Story for the action.

Any quickie or incompetent completion falsifies the statistic and is subject to fine or penalty.

The Completions List follows:

1. Interiorization-Exteriorization Rundown. 1.
2. Life Repair. 1.
3. Student Rescue Intensive. 1.
4. Progress Pgm. 1.
5. Hubbard Consultant (HC) List (Data Series). 1.
6. Word Clearing Method One. 2.
7. C/S Series 54. (Pc Assessment Form and handling.) 2.
8. Drugs, Medicine, Alcohol Class VIII Remedy (3-way recall, secondaries, engrams). 1.
9. Pains Somatics Emotion each reading drug. 1.
10. Prior Assmt to Drugs. 1.
11. Dianetics Completion. 2 points.
12. ARC Str Wire Triple. 1. (No credit Singles.)
13. Each Expanded Grade. 2. (No credit Single or Triple Lower Grades.)
14. HCO B 24 July 69. 1 point.
15. Assists. 1/2 point.
16. Auditing Repair. 1/2point.
17. GF Method 5 Handled if not part of a Repair. 1/2 point.
18. GF 40 Expanded fully handled, lists and engrams, by itself whether part of a program or not. 2 points.
19. C/S Series 53 handled to F/N on all items whether part of a pgm or not. 1 point.
20. Incidental RDs such as Money Process. 1/2 point.
21. L10 Full List of actions. 10 points.

PENALTY 1 point loss for every percent below 90% F/N VGIs Examiner for the previous day. Example: 75% only F/N VGIs = 15 point loss.

GAIN: Add one point for every percent above 90% F/N VGIs at Examiner.

For every 9 points made 1 point may be added for staff auditing.

Student Co-Auditing: There are no points calculated or used for student coauditing completions or for free public completions done by students or public as these can be part of student completion requirements.

#### SH and AO

22. Power Set-up GF+40 Method 5 and Handle. 2 points.
23. POWER Single. 5 points.
24. POWER TRIPLE (when released). 10 points.
25. Complete your case items as per regular auditing as above.
26. Any OT Review. 1 point.
27. OT VII. 5 points.

Any omitted or added RD to be given points on request from Tr & Serv Aide

*Word Clearing Series 16R*

**CONFUSED IDEAS**

Whenever a person has a confused idea of something or believes there is some conflict of ideas IT IS ALWAYS TRUE THAT A MISUNDERSTOOD WORD EXISTS AT THE BOTTOM OF THAT CONFUSION.

Example: "I just don't understand this idea of opposing forces. I think it all ought to be rewritten and ...."

Method 2 Word Clearer: "Is there any word there you don't understand?" READ! *STUDENT*: "Oh no, I understand all the words. It's ...." "What word is this that's reading on the meter?" "Er . . . ah . . . Forces?" "Yes, that reads and blows down. Let's look it up." "Oh no, I know what it means. It's the idea that ...." "Let's look it up!" "Well, all right. Let's see D . . . E . . . F . . . FO . . . FORCES. Here it is. 'That which changes the motion of a body on which it acts.'" *WD CLEARER*: "'Use it in a sentence several times.'" *Student does*. ". . . er . . . ah. I've got it. Hell I thought it meant police brutality! Couldn't figure out why two police forces would fight!" Word Clearer: "Now how do you feel about this idea of opposing forces?" "Oh, let's see. Why that's clear enough. Just like I'd never read it before!" *METER*: *F/N*.

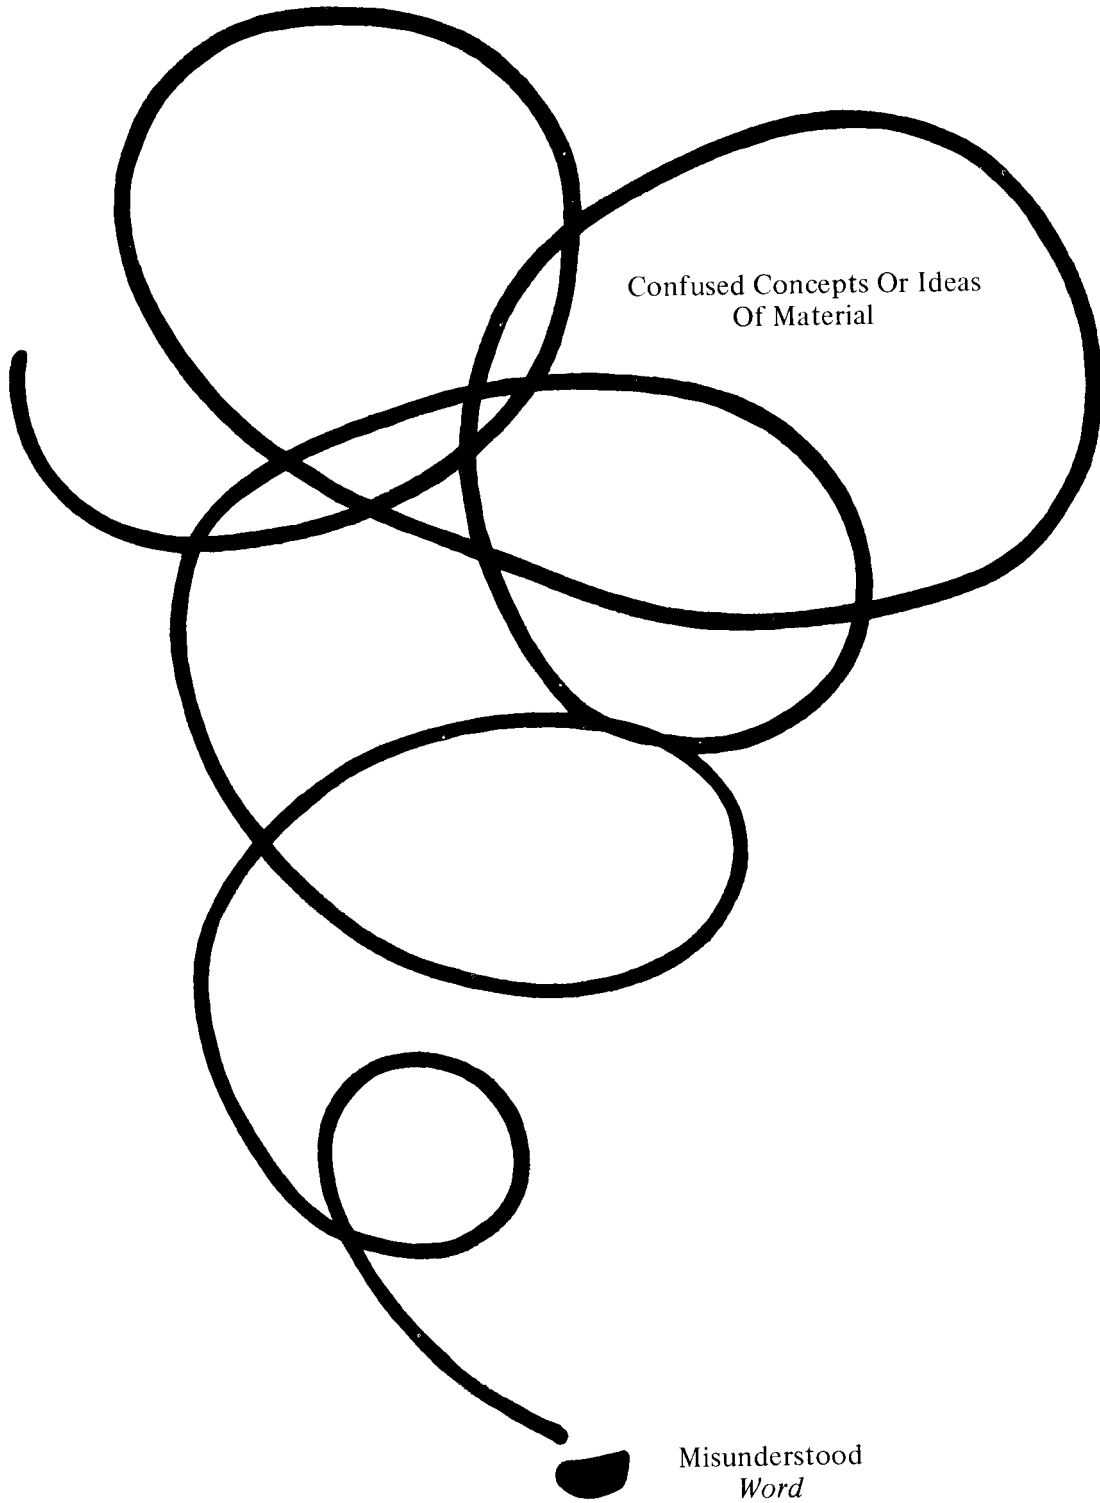

Every green body of students will argue and fuss about ideas or confusions in the directions or material they are given to read.

They will generate weird ideas and erroneous concepts of what the text says. They do wrong things and say the text said to. They ask strange ideas of their instructors. They clamor for "clarifications".

AND AT THE BOTTOM OF ALL THIS IS SIMPLY MISUNDERSTOOD WORDS.

There is not *also* misunderstood ideas. There is *only* the misunderstood word which breeds, then, huge towering wrong *ideas*.

A MISUNDERSTOOD WORD BREEDS STRANGE IDEAS.

Confused Concepts Or Ideas  
Of Material

Misunderstood  
*Word*  
Detectable Only  
By Meter

Picture of A  
Students *Mind*

*C/S Series 57*

**A C/S AS A TRAINING OFFICER  
A PROGRAM FOR FLUBLESS AUDITING**

It is wholly and entirely up to the C/S whether or not his auditors ever come to be FLUBLESS AUDITORS. Auditing flubs are the main things that make a C/S's job long and hard and the main thing that denies his pcs high results.

For example—with competent auditors I can C/S the day's folders in 2<sup>1</sup>/<sub>2</sub> hours. With green flubby auditors the same number of folders takes 6<sup>1</sup>/<sub>2</sub> hours.

The answer plainly is to groove the auditors in until they are flubless. And this is what a competent C/S does.

Because he has internes on his lines and because any group of auditors can be bettered, the training officer part of the C/S hat is one which is always worn.

Also, if the Tech-Qual administrative set-up is nonextant or a confused mess, the errors in folders and various upsets react suppressively both on the C/S and auditors and they—both C/S and auditors—make mistakes. So the administrative lines and terminals must be there.

Thus a C/S out of self-defense is not merely a training officer of auditors but of other Tech-Qual personnel as well.

Officially this hat belongs with the other terminals. But to *coordinate* the operation, the C/S has to have a large amount of know-how about the lines and terminals of Tech and Qual. As it is the C/S who is directing the running of cases and as the lines and terminals exist only to obtain auditing results in volume with high quality, no C/S can afford to neglect his duties as a training officer. Otherwise he will promptly drown.

The folder flow must be smooth with no flaps. The auditor-pc assignments must be smooth with no lost auditing time. The sessions must occur. The auditors who flub must be promptly handled. The Cramming Officer in Qual must know his business. The C/S depends on him to get the kinks out of the auditors' tech and its application.

The processing must be paid for adequately or there will be no funds to hire enough terminals and, indeed, there would be no HGC at all. The C/S is trying to obtain Volume, Quality and Viability.

By experience volume comes from the whole org working and the auditors auditing correctly without lost hours spent in fumbles and repairs. Quality comes from smooth Tech-Qual lines and hatted terminals and the auditors auditing flublessly.

It is not that the C/S is in charge of the whole org. But every point where a C/S is having trouble is where an org terminal has broken down. Therefore a C/S has every right to INSIST upon hatted functioning terminals.

The C/S has a definite effect upon the efficiency of an org's personnel. He can ensure the staff gets audited either on his lines or from Dept 13. And he can insist on quality staff auditing for it will help keep his own post going.

Tech *works*. It works splendidly. The materials are there. Read, understood and applied, FLUBLESS AUDITING occurs.

It is so *easy* to C/S just for cases using standard actions. All puzzles come from FLUBS.

The sequence of actions a C/S should take to attain Flubless Auditing could be listed more or less in this order.

1. Make sure his own tech is up to date and do part-time study or retread where needed.
2. Make sure *he* has no misunderstood words the length and breadth of the subject.

Get Word Clearing Method 2 on every major tech writing, each HCO B or P/L if it comes to that. Then get Word Clearing Method 1 to full EP.

3. Practice locating the bugs in “failed cases” or “dog cases” long in auditing until the C/S knows it was an application failure, an auditor failure or a former C/S failure.
4. Study out the terminals and lines necessary IN YOUR ORG, physically going over them, to
  - (a) Get a pc in.
  - (b) Get an auditor employed.
  - (c) Get a pc assigned to an auditor.
  - (d) Get auditor and pc together in an auditing room.
  - (e) Get the pc examined.
  - (f) Get the folder turned in for C/Sing.
  - (g) Get an auditor to Cramming and back.
  - (h) Get a pc to Ethics and *handled*.
  - (i) Get a D of P to interview pcs, muster auditors, do assignments and other D of P duties.
  - (l) Get a pc to attest.
  - (k) Get a pc to Success.
  - (I) Get folders FESed.
  - (m) Get folders stored and found.
  - (n) Get folders made up or neatly covered.
  - (o) Get supplies for auditors.
  - (p) Get an area for auditor admin.
  - (q) Get an area for pcs to wait.
  - (r) Get the various boards made and *kept up*.
  - (s) Get stats kept and reported.
  - (t) Get bonuses paid.
  - (u) Get pcs handled when adrift on lines.
  - (v) Get a Qual in.
  - (w) Do his own job.
  - (x) How to get and keep all this and any more points going all at once rapidly.

He will now know the *scene* and can achieve a more ideal scene by insisting the Org Officer (emergency) or the HAS (permanently) handle. Now it all gets less confusing as one understands what is out when it is out.

5. Set up a close fast line with the Cramming Officer so that auditors who flub are in actual fact rapidly straightened out and gotten back to auditing without great time loss.
6. Fend off and refuse to give tech advice as such. KNOW WORD CLEARING SERIES 16 THOROUGHLY and get a great reality on it and insist that the Qual Sec and Cramming Officer know it, use it and hammer away with it. Otherwise such weird tech confusions will be floating about that even the C/S gets confused and begins to wonder if the material IS in the books and bulletins!
7. Gather up a Tech and Admin Library for fast reference for personal use.
8. Get in a system whereby every flub by an auditor, a D of P, a Div IV or V Admin personnel, a page, anyone that flubs as it affects the C/S in ANY way gets a Cramming chit with the exact reference to be crammed on. Keep a carbon of the chit, send the original to Cramming, get the chit back when done and marked off on the carbon. Keep the Admin of it simple but the execution of it TOTALLY effective.
9. The Qual Sec, Cramming Officer and Interne Supervisor are the close technical links with the C/S. In technical matters the C/S is senior. Sometimes the C/S is sent to Cramming by the Qual Sec and should accept and do it gracefully. Sometimes there is a Senior C/S in the org (the Assistant Guardian, ED or some other senior exec may be an HSST or even a Class X). In such a case he has the right to cram or send any of these terminals (or any other terminal) to Cramming. Including any Senior C/S, and including any C/S for another Department or for crew or in the Guardian's Office, these terminals constitute the tech hierarchy of the org: Senior C/S, C/Ses, Qual Sec, Cramming Officer and the Interne Supervisor and they have to hold a hard *technical* line. The Tech Sec is mainly concerned with production and administration and a Tech Establishment Officer is concerned with establishing. It can happen that a Tech Sec or TEO are also very well trained technically and if so are part of this *technical* hierarchy but they are not necessarily so. Therefore there is a sort of ex-officio technical committee on the subject of technical matters composed generally of the Senior C/S, C/Ses, Qual Sec, Cramming Officer and Interne Supervisor that monitors the quality of HGC and Dept 10 auditing. The Director of Training can be advised concerning the results of his students after graduation in order to remedy his training and as such is a part of the Committee, as can be the Tech Sec. Most narrowly and most continually Tech quality is between the C/S and the Cramming Officer. More widely, the Senior C/S, Qual Sec and Interne Supervisor enter in. And in the widest sense, the Tech Sec, Tech Establishment Officer and Director of Training enter in. It is an error to suppose the C/S and auditors are the technical monitors of the org. They are the main technical personnel. But a C/S can waste tons of time by talking to or with auditors beyond an auditors' conference and can really get whizzing if he spends the same time with the Cramming Officer who then crams auditors and with the Interne Super who then persuades internes to function. Knowing who is as important in organization as knowing how. So hold some meetings small and large and thresh out the bugs.
10. Missing materials is a C/S point of upset.

“What is a Course” Policy Letter can be out on tech courses to a degree that you wouldn't believe. Not only no routing form or roll book but NO MATERIALS.

The Books, HCO Bs, tapes MUST be available. They exist. It is suppressive to run a course without them. Pubs Org, CLOs have them. Financial Planning can't deny this necessity as they're what their income comes from.

Qual MUST have a complete *and safeguarded* library for use in Cramming actions.

Under Omitted Materials would be omitted meters and at this writing there is no restriction on these and supply is abundant.

The "no materials" gag is the last straw for a C/S.

Future auditors won't have a clue and current auditors will have no way to find out.

So the C/S must not permit "economy" or plain laziness or "we sent a despatch three months ago" to get in the road of materials. IT IS CHEAPER TO PUT SOMEBODY ON A PLANE WITH A CHEQUE TO BRING THEM BACK than to do without materials.

So a C/S should definitely defend himself against a "no materials" blockage and handle it.

11. No Study. When one has materials and particularly when one is getting new materials a breakdown can occur when the materials, especially new ones, aren't read.

A technical person must keep up with the advances in technology. That is true of any profession.

A primary failure of new technology is (you won't believe it but it is true) the materials aren't read before the process is tried!

I have even caught Class IXs out on this, believe it or not, so don't think it can't happen.

Process G is received. Auditors audit it. Process fails. Why? Auditors never read the bulletin first!

**SO BE SURE YOUR AUDITORS READ THE MATERIALS AND CHECK OUT BEFORE THEY DO THE PROCESS.**

Write C/Ses like this — "Auditor to Cramming to check out on HCO B . . . .  
When attested, do the following 1. . . . , ,

Do this on new materials and, on new auditors, on any materials you believe he may goof.

Why have the first 12 pcs on Process G go sour just because the auditor only glanced at the commands and missed the tech?

Interiorization Rundowns are *still* in this category in some areas. The auditor doesn't study and Clay demo the pack before doing them. So they fail.

Now and then Power hits the same snag.

So, simple as it seems, get new materials read and checked out in Cramming as the first part of a C/S on them!

And get new materials read.

And keep up on them yourself.

12. Hidden Data Line trouble can wreck an HGC (and the org and field).

A “Hidden Data Line” is a pretense that certain data exists outside of HCO Bs, books and tapes. It can include “data in HCO Bs is conflicting” and “nowhere does it say how to \_\_\_\_\_”. This is deadly and a C/S should work hard to stamp it out. THE CAUSES OF A HIDDEN DATA LINE OR IMAGINED CONFLICTS IS A FAILURE TO USE WORD CLEARING METHODS TWO AND THREE ON COURSES AND A FAILURE TO USE AND ONLY USE METHOD TWO IN CRAMMING. A C/S can go straight up the wall trying to grapple with these omissions and eventually begin to believe that it takes 500 Cramming chits to make an auditor who still isn’t made and that flubless auditing can’t be done from HCO Bs, books and tapes. As soon as a C/S finds his Cramming orders getting too thick he should check

- (a) Is Method 2 (meter) Word Clearing used hard in Cramming as a first action?
- (b) Are Methods 2 and 3 Word Clearing in use constantly on tech courses?
- (c) Is Method 1 Word Clearing (full rundown) available and faultlessly done on every auditor?

Get these points IN.

Poof! The Hidden Data Line vanishes. (See Word Clearing Series 16.)

Word Clearing has been around for years but people sometimes are themselves so fogged by misunderstood words that they don’t hear you at all when you say USE WORD CLEARING!

13. Invalidation kills auditors. So don’t chew on them any harder than is necessary to get the job done.

Get “To Cramming” to mean, “normal procedure even for Class XIIIs” .

We had one student who every evening gasped with relief that he hadn’t been sent to Cramming. We finally found out that he was really terrified *he* would be found out for false study stats!

Only when an auditor refuses to go to Cramming do you begin to push.

The auditor sent to Cramming to do an action must not do the action on another pc until he has been to Cramming on it.

This can “hold up production” in somebody’s mind. But how an auditor can *produce* anything while flubbing is someone else’s misunderstood, not mine. He can’t. Better five hours in Cramming and one good session than no Cramming and five goofed sessions.

The *real* invalidation of an auditor is failing at tech. So don’t let them fail. “Johnny, your TRs are too hard to hear. Get over to Cramming and get hearable” is perfectly acceptable. If it is correct.

So Invalidation could be defined as

- (a) letting an auditor lose
- (b) correcting things he does right.

That’s about the extent of invalidation.

14. Auditor morale depends not on PR (Public Relations) or phoney stats. It depends on actual, honest completions.

A well trained auditor allowed to get completions will have high morale.

Thus, a C/S must push an auditor toward

- (a) Flubless tech
- (b) Completions

You keep pushing and he'll make it.

You don't push or push on the wrong things and he won't.

As to completions try to get auditors to do the whole program so something is completed. This is for the auditor not the pc. The Auditor's Code on a frequent change of auditors was written for pcs. But it also applies to auditors. Let them complete programs. Even if they spend half the day in Cramming. Don't yank them off cases. And don't let your D of P assign auditors to different cases or he'll soon have downtone apathetic auditors who never see what their auditing finally does for one particular pc.

Auditor Morale has little to do with anything but the above two things.

*Also* if you have those two things in as a C/S, you will see something new happen. Pcs will be around slapping auditors on the back and cheering the org and the place becomes a very happy place.

So work for auditor morale with pushing them relentlessly toward flubless tech and toward completions.

---

The above actions are numbered. If a C/S were to work to get these in, one by one, and if he then went over them again and again, he would wind up about the most complimented upstat C/S anywhere around.

These are the giant points to get in while plugging along each day C/Sing the usual and handling the noise.

The way to get out of cope is to organize. And these fourteen points give a sequence of organizational steps that lift one out of cope and into a smooth productive time of it.

The org would become very prosperous.

The staff would be very happy.

The field would be delighted.

Just remember that when you reach an average 700 well done auditing hours, you better have a new C/S in training and persuade him to follow himself these 14 points in a new and necessary additional HGC.

*Word Clearing Series 17*

**WORDS AND POSTS**

Those who do not want their posts generally do not know what their posts are.

The reason they do not know what their posts are is a host of misunderstood basic words connected with that post.

Put a person on a meter: Have the person read some of the material relating to his post or hat, beginning with the most basic material about it and starting at the very top of the first page, including even the heading and issue numbers.

Watch the meter carefully. Halt the person at *each* read and whether he says he knows the meaning or not, if it read, have him look it up in a good (big) dictionary.

Have him use the word in sentences of his own invention. Make him do this as long as it is bringing the TA down.

If you get into trouble with him go back and find the misunderstood you missed.

Keep hunting and keep working at it and his misunderstood words will blow and his inability to understand the post will blow.

EXPLANATION

Failed posts and duties trace back to misunderstood words. Until you see it you won't believe it.

One student who had studied his post for a third of a year was given Method 2 on its materials.

It took 15 hours of Method 2 work, protests, blows, upsets to finally discover that he did not know what POST meant! OR what the words in the title meant.

Another person studied half a year to be an administrator. Yet when he was given his personnel orders appointing him, and Method 2 was done on them, in the first 50 words of the personnel order there were 13 individual misunderstood words each one of which related to the post and were simple English. A similar ratio continued throughout the personnel order.

He was about to fail with a fanfare.

Behind post failure the explanation IS misunderstood words.

Psychosis (evil intention) is the only other reason for failure but even this can be handled by auditing today. And even psychosis lessens when misunderstood words are handled.

SUCSESSES

It is not difficult to use Method 2 Word Clearing.

One must be able to handle ARC Breaks, Problems and withholds and read a meter.

One must have a very big dictionary available when little ones fail. One must be persistent and not buy explanations or let the person run away.

And the Successes one has are fantastic!

Remimeo

*Word Clearing Series 19*

**ALTERATIONS**

There is a basic law in Word Clearing:

**AT THE BOTTOM OF ALL ALTERATION OF MEANING  
OR ACTION IS A MISUNDERSTOOD WORD.**

This law at once explains why communication, ideas or application become falsified, twisted and corrupted.

This law is of great use in Word Clearing:

- A. It indicates who has to be word cleared FAST, at once, NOW, before duties go off the rails any further.
- B. It detects the area just before which there is a misunderstood word.

A is useful to the administrator. Knowing it and knowing Word Clearing and being able to do it himself or get it done, he can avoid wholesale dismissals, frantic transfers, general inefficiency and organizational strain.

B is very useful to the Word Clearer.

Example of B. A person can do everything on an order except "File the Folders" which he insists on delivering to a wrong room. Look over the order and find where in it it talks about filing folders. Just above or beside that will be a misunderstood word. Locate it, get it identified, defined and used in sentences. The person can suddenly file folders!

Just BEFORE or WITH the point a person begins to alter will be found a misunderstood word.

Thus

1. Discover what a person alters.
2. Find what came just before that.
3. Find the misunderstood word.
4. Get it looked up.
5. Get it used in sentences as long as it moves a meter tone arm.
6. End off on F/N VGIs.

The ability to do it straight will have been returned.

It is very magical.

*Word Clearing Series 20*

**SIMPLE WORDS**

You might suppose at once that it is the BIG words or the technical words which are most misunderstood.

This is NOT the case.

On actual test, it was English simple words and NOT Dianetics and Scientology words which prevented understanding.

For some reason Dianetics and Scientology words are more easily grasped than simple English.

Words like “a”, “the”, “exist”, “such” and other “everybody knows” words show up with great frequency when doing a Method 2 Word Clearing. They read.

It takes a BIG dictionary to define these simple words fully. This is another oddity. The small dictionaries also suppose everybody knows.

It is almost incredible to see that a university graduate has gone through years and years of study of complex subjects and yet does not know what “or” or “by” or “an” means. It has to be seen to be believed. Yet when cleaned up his whole education turns from a solid mass of question marks to a clean useful view.

A test of schoolchildren in Johannesburg once showed that Intelligence DECREASED with each new year of school!

The answer to the puzzle was simply that each year they added a few dozen more crushing misunderstood words onto an already confused vocabulary that no one ever got them to look up.

Stupidity *is* the effect of misunderstood words.

In those areas which give Man the most trouble you will find the most alteration of fact, the most confused and conflicting ideas and of course the greatest number of misunderstood words. Take “economics” for example.

The subject of psychology began its texts by saying they did not know what the word means. So the subject itself never arrived. Professor Wundt of Leipzig University in 1879 perverted the term. It really means just “a study (ology) of the soul (psyche)”. But Wundt, working under the eye of Bismarck, the greatest of German military fascists, at the height of German war ambitions, had to deny Man had a soul. So there went the whole subject! Men were thereafter animals (it is all right to kill animals) and Man had no soul, so the word psychology could no longer be defined.

**THE EARLIEST MISUNDERSTOOD WORD IN A SUBJECT IS A KEY TO LATER MISUNDERSTOOD WORDS IN THAT SUBJECT.**

“HCO B” (Hubbard Communications Office Bulletin), “Remimeo” (Orgs which receive this must mimeograph it again and distribute it to staff), “TR” (Training Drill),

“Issue I” (first issue of that date), are the commonest misunderstands. Because they occur at the beginning of an HCO B !

Then come words like “a”, “the” and other simple English as the next words that often read.

In studying a foreign language it is often found that the grammar words of one’s *own* language that tell about the grammar in the foreign language are basic to not being able to learn the foreign language.

The test of whether the person understands a word is “does it read on the meter as a fall when he reads the word in the material being cleared”.

That a person *says* he knows the meaning is *not* acceptable. Have him look it up no matter how simple the word is.

*Word Clearing Series 21*

**CORRECT SEQUENCE  
QUALIFICATIONS OF WORD CLEARERS**

The principal methods of word clearing are numbered No. 1 for the full in-session rundown, No. 2 for the metered action of clearing up words in specific materials and No. 3 for looking up words seen and not understood by the student or reader.

This is correct sequence for doing the three types of word clearing.

By doing No. 1 in full session, using the list for assessment, one obtains the basic word and meaning errors of the past. By getting these out of the way, it is now possible to clean up current materials much more rapidly with Method 2, where the person is put on a meter and reads the material to another who is watching the meter and catching each read.

With Method 1 out of the way, Method 2 becomes more rapid.

Method 3 will then be done by the person himself because he now knows better.

No. 2 and No. 3 can be used on and on one or the other.

If you do it backwards, beginning with Method No. 3, much more time is consumed. If Method No. 2 is used without No. 1 being done, much more work has to be done to clean up an existing piece of study material or text.

So the correct sequence is No. 1, No. 2 and then No. 3.

This does not mean you cannot start with No. 3 or No. 2. It just means it is much faster to do them in correct sequence.

**PURPOSE CLEARING**

When purpose of the post is to be cleared it is done *after* Method No. 1 in general and Method No. 2 has been done on the duties and texts of the post.

With all such material handled with word clearing it is time then to do a Purpose Clearing of the person's job or situation in life.

**PROGRAM**

Thus a general program could be laid down as

1. Handle all ARC Breaks, present time problems and withholds, or set up the case with a Progress Program.
2. Method No. 1 Word Clearing.
3. Method No. 2 Word Clearing on the materials or duties the person has.
4. Purpose Clearing of the purpose of the post.

(In choosing the materials to be cleared in No. 3 above choose the texts, handbooks or materials most closely related to the post and most basic to the post.)

(In choosing the post, if the person is not employed remember that “student”, “housewife” and even “a human being” are posts.)

### WD CLEARING WD CLEARERS

When there is no qualified word clearer to word clear others, the program is changed for the word clearer to:

1. Choose 2 word clearers who then work on each other.
2. Any Progress Program for each one.
3. Word Clear the Word Clearing Series by Method 2.
4. Check out on the auditing required for Method 1.
5. Do Method No.1 on each other.
6. Do Purpose Clearing on each other.

This greatly reduces any errors in application.

(Note: A “Progress Program” or a “Repair Program” is a Scientology auditing program to clean up upsets in life.)

(“ARC Break” means A-Affinity, R-Reality, C-Communication, a break in any one of the three which has caused upset in the past.)

(A Class III Academy Auditor qualification is required to do Method No. 1 as the action requires assessing and the handling of ARC Breaks, problems and withholds, for which a Class III is trained. Anyone who is able to handle a meter is qualified to do Method No. 2. Any person can do Method No. 3.)

(Purpose Clearing also requires a Class III Academy Auditor.)

(By “meter” throughout this series is meant an “E-Meter” which means an “electro-psychometer”, an instrument which measures emotional reaction by tiny electrical impulses generated by thought.)

*C/S Series 58*

**PROGRAMMING CASES BACKWARDS**

When you see a case that has struggled along through 200 hours of processing without much gain you sometimes see a C/S has only recently ordered, or has not ordered at all as yet, an Interiorization RD check and a Green Form No. 40 Expanded. That would be programming backwards.

The tools of auditing are the Grade Chart Processes and the numerous correction lists.

Like a gardener, a C/S has the choice of numerous tools to raise a flower.

If you were to see a gardener digging holes with the lawn mower and cutting grass with a spade, you would say he needed to be checked out on the use of his tools, what each is for.

Similarly, running Power on someone who needs Dianetics, doing a life repair on someone who is ready for R6EW, would be a misuse of tools.

Similarly, going on auditing someone on Dianetics who desperately needs his ruds put in or an Interiorization Rundown is wasting auditing and messing up a preclear.

Let me give you some examples I have seen recently:

- A. Case audited through many major actions since his Int RD. Auditor and C/S in despair. Pc not progressing. A C/S 53 disclosed the Int RD was faulty *and* its repair was also faulty. Int Rundown was handled. Case began to run. Months of auditing had been wasted. Needed had been a C/S 53 where out Int would have shown.
- B. After 200 or more hours of no change in his personality graph (Oxford Capacity Analysis) the pc came up with the withhold that he was a homosexual and also that he did not know what "Scientology" meant. About 2 years of auditing had been wasted. Needed had been Word Clearing and rudiments.
- C. After scores of hours of no-win auditing and no graph change it was finally decided to run a GF 40X and found the person practised witchcraft!
- D. After a year of auditing on major grades all wasted it was finally found that the person had had a leg injury he was trying to cure that required only a simple Dianetic assist. Today that would be a C/S 54. He had never had a Pc Assessment Form.
- E. After racing from POWER to OT III without doing any real auditing or having any change, it was found on a GF 40X that the whole world had been unreal and the person could not begin to face the idea of looking at pictures or the bank and had not been able to since her first drug experiences. Needed had been Objective Processes, CCHs, Op Pro by Dup, etc which get a drug addict to look and be aware.

All these are simple if flagrant errors in ordering the right program actions.

In order to be able to say what should be done on the case, one has to have three things:

1. Data about the case.

2. A knowledge of what lists are available.
3. Auditors who can do the actions required.

From a C/S point of view, all these things are under the C/S's control.

#### DATA

In the Class VIII materials the 7 Resistive Cases are described. The full lot of them are now found in GF 40X.

There are numerous other lists for assessment.

If a C/S really doesn't know his lists he can order them all, Method 5 and take his choice of symptoms.

Also a C/S can have the pc simply asked questions.

From this data a C/S knows why the case is not running well and can order the actions to remedy it.

If nothing is wrong, complete the earliest incomplete grade on the Grade Chart.

#### KNOWLEDGE

A C/S who is well Word Cleared on his materials and has studied on the courses knows what things hang a case up more than what other things.

This gives one the knowledge necessary to choose what lists.

Case no case gain then it's GF 40X.

And to keep from auditing over an out Int RD there is C/S 53.

And for chronic aches and pains there is C/S 54.

And for "might be anything" there's a GF.

What lists and actions that can be done are for is very easy to sort out.

#### AUDITORS

If a C/S's auditors aren't flubless or expert one needs to get in a Cramming and needs to get hired and interned lots of new auditors. C/S Series 57, "A C/S as a Training Officer", solves a lot of this. And a Tech Establishment Officer is vital to keep it solved.

Then auditors, the numbers and quality of, are not on the C/S's plate as a continual problem. Scientologists want to audit. They will go on auditing as long as you make them audit well enough and C/S for them well enough to keep them winning on pcs.

#### SUMMARY

So the tools of the C/S are

1. Data from pcs.
2. Knowledge of list uses.
3. Knowledge of the Grade Chart.
4. Auditors.
5. The organization of delivery.

### **BIRTH CONTROL PILLS**

It has been thought that Birth Control Pills brought on dizziness and side effects and got in the road of auditing.

It has now been observed that where these effects occurred and the woman

- A. Changed Brands
- B. Changed Strength or amount or
- C. Both A and B

the condition vanished.

This information is given by the Medical Officer.

Therefore

1. There is no regulation or rule which states that a woman may not take Birth Control Pills and
2. There are apparently no side effects affecting auditing and
3. Where side effects do exist one should consult a doctor so that brand or amount or both can be changed.

Nothing in this HCO B recommends or prevents or prescribes Birth Control Pills and the information is simply passed on from medical authority.

*Word Clearing Series 23*

**TROUBLE SHOOTING**

In Word Clearing the troubles are actually very few.

However there are a few.

It is possible for an auditor or student doing word clearing on another to get misunderstood words himself unless he also looks at the definitions and understands them at the same time he is clearing them on the other person. This requires no extra step. In fact it would be rather hard not to also see the definition of the word.

A person trying to “blow” (leave) and refusing further Word Clearing almost always has a HUGE misunderstanding on some word not yet located. The correct action is to get him back and **FIND AND CLEAR THE WORD**.

Not getting a good result using Methods 1, 2 or 3 is cured by using the Word Clearing Correction List, HCO B 21 July 71, Revised 9 August 71.

This Correction List applies to all methods of word clearing.

For instance, if Method 2 goes sour and the student “knew all the words anyway” or “doesn’t understand it any better” or is critical or demonstrates any other unfavorable reactions which do not win through, there is always Word Clearing Correction List.

This list is done by a Class III or above auditor. It is quite miraculous.

Example: Student badly bogged after Method 2 by his twin. Handling: A Class III auditor does the Word Clearing Correction List on him.

The Correction List is handled as per HCO B 14 Mar 71, “F/N Everything”. In other words, one takes all reads on it to Floating Needle. Any other list called for by reads on the Correction List is taken to F/N and when that called-for list F/Ns then one considers that the Word Clearing Correction List line has F/Ned. (Correction List reads on 4. List Error. The auditor takes a list called L4B which corrects lists and makes every read on “L4B” F/N. Then “4. List Error” is marked “F/N”.)

The technology of handling a Word Clearing Correction List is all covered in the general materials of auditing.

Not knowing how to use a Meter can cause trouble.

A special Course in using an E-Meter is available. The E-Meter Drill Book gives all the drills. It does not take long to learn. Also E-Meters are abundantly available today.

Learning to be a Class III or preferably a Class IV Academy Auditor is not difficult IF one uses word clearing!

All word clearing is done under the discipline of The Auditor’s Code.

One’s “TRs” (TR = Training drills for auditing) can be straightened out on a TR Course on which one learns to confront, to speak so one can be heard, to acknowledge, to be able to repeat commands and to handle originations by the student.

Troubles in word clearing, then can be listed as coming from lack of training. So anyone doing word clearing should organize himself to (1) Do a TR Course, (2) Learn to use and acquire an E-Meter, (3) Learn the Auditor's Code and, (4) If not one already, learn to be an Academy Class III Auditor.

Knowing how to do 1 to 3 above is essential to do Method 2 Word Clearing. And the skills under (1) to (3) are very easy to acquire. Further, it is not all that difficult to become a Class III Auditor.

People sometimes think only someone who wants to be a professional auditor studies in the Academy, a false impression. One can't imagine how a father or businessman or mother or clerk or official could succeed without knowing the basics of human reaction and how to handle them. Someone who is a Class III or Class IV knows how. The real professional usually becomes a Class VI and the real experts are the VIIIs, IXs and Xs. It's a matter of how expert you want to be. A Flag Ship Class XII could turn a severe mental case from raving lunacy to not only sane but bright and normal in about 8 or 9 hours and a normal person to a genius in 15 to 20 hours.

But here we are dealing with the whole range of the human mind.

In word clearing Method 2 one certainly should know his "TRs", his Auditor's Code and his Meter. And for Method 1 it takes a Class III Academy Auditor.

Almost all troubles will be found to stem from an omission of these requirements AND not using Word Clearing on the materials one is studying to achieve these skills.

Very few troubles actually will be encountered if this HCO B is followed.

Word Clearing IS a precision technology and there IS something to know about it as it has never before been known.

*C/S Series 59*

**DIANETIC LIST ERRORS**

It *can* happen that a Dianetic list of somatics, pains, emotions and attitudes can act as a list under the meaning of the Laws of Listing and Nulling as per HCO B 1 August 68.

The most violent session ARC Brks occur because of list errors under the meaning of Listing and Nulling. Other session ARC Brks even under withholds are not as violent as those occurring because of listing errors.

Therefore when a violent or even a “total-apathy-won’t-answer” session upset has occurred in Dianetics, one must suspect that the preclear is reacting under the Laws of Listing and Nulling and that he conceives such an error to have been made.

The repair action is to assess the prepared list which corrects listing errors. This is L4B—HCO B 15 Dec 68 amended to 18 March 71.

It is used “On Dianetics Lists \_\_\_\_\_” as the start of each of its questions when employed for this purpose.

When a pc has not done well on Dianetics and when no other reason can be found the C/S should suspect some listing error and order an L4B to be done “On Dianetic lists “ at the start of each question.

Each read obtained on the list is carried Earlier Similar to F/N as per HCO B 14 Mar 71 “F/N Everything” or, preferably the list is found in the folder and properly handled in accordance with what read on L4B.

ALL Dianetic Lists can be carried to an item that blows down and F/Ns.

This does not mean the item found is now wholly clean. Even though it F/Ned it can be run by recall, by secondaries and by engrams as found in Class VIII materials. It is usually run by engrams, triple, R3R.

A C/S must be alert to the fact that

- (a) Extreme upsets and deep apathies are almost always list errors.
- (b) That a Dianetic List can be conceived to be a formal list and can behave that way.
- (c) L4B is the correction list used in such cases.

Very few Dianetic lists behave this way but when they do they must be handled as above.

IT IS UNDERSTOOD THAT BEFORE THIS SESSION PC WILL HAVE HAD  
WD CLEAR Method No. 1 and also Wd Clear 2 on Hats.

**C/S INSTRUCTIONS**

1. 2WC "What is your attention on?" If TA High or Low send to have C/S 53 done.
2. Fly all ruds, each one E/S to F/N. (Use "Suppress" on no reads and "false read" if a read is said to be not right or said before and carry it E/S to F/N.)
3. 2WC "How do you feel about being a member of this organization?" If sad run "Have you had an ARC Brk with this organization?" E/S to F/N. If not really know, "Have you had a problem with this organization?" E/S to F/N. If nattery or critical in any way, run "What have you done in this organization.? What have you withheld in this organization?" Alternate repetitive to F/N Cog VGIs. If you had to use any of these ruds about the organization, again ask 2-way comm "How do you feel about being a member of this organization?" to F/N.
4. 2-way comm pc's post: "TELL ME ABOUT YOUR POST." Be alert for. out Ruds.
5. 2-w comm "What is your post?" (Not necessarily to F/N, but if confusions show up, refer to the pc's hat folder. Check for "Any misunderstandings on your post." If this reads have Method 2 Word Clearing done on pc's hat or subject of his post. In this event or if any trouble has shown up end off and send folder to C/S and do post purpose later.)
6. 2WC "What opportunities would you have on your post?" TO F/N. If no F/N, ask what the pc isn't telling you and run that to an F/N, as with a W/H. Then return to opportunity question, and run it to F/N, even with E/S.
7. "How does your job align with what you would like to do?" (2-Way Comm.) If any conflict—go E/S. TO F/N.

8. “What do you imagine the purposes of your post are?” *TO F/N*.
9. “How does this purpose tie in with the purpose of your Division?” *TO F/N*.
10. “How does your purpose tie in with the purpose of your Org?” *TO F/N*. Clean up any conflicts encountered—clear the word or go E/S.
11. “If your post was not done, what would happen to the Org?” 2-way comm. *TO F/N*.
12. “What is the purpose of your post?” 2-way comm. *TO F/N*.
13. Thank pc and send to Pc Examiner.

*C/S Series 60*

**THE WORST TANGLE**

Sometimes a C/S gets a terrible tangle handed to him as follows.

1. INTERIORIZATION RUNDOWN IS UNDONE OR MESSED UP.
2. FAULTY LISTS HAVE BEEN DONE.
3. THE PC IS IN A HEAVY ARC BRK WITH PTPs AND W/Hs.

Now each *one* of these three things “must be done first”.

Auditing cannot be done with *Int messed up* except to handle the Int RD.

Auditing cannot be done over *bad lists* without repairing the lists.

Auditing cannot be done over out ruds without putting the ruds in.

So WHAT does the C/S do?

There is fortunately a different degree of upset in these three things.

Int RD trouble is worse than list trouble is worse than out ruds.

Therefore the correct C/S would be to

1. Repair Int
  2. Repair Lists
  3. Put in Ruds.
1. Repair Int RD is done by using L3B on each flow. And (on Flag) by dating to blow and locating to blow.
  2. Lists are repaired with L4B on each list, preferably with the list available and preferably with the actual list repaired (such as added to if incomplete or correct item found and given to pc).
  3. And if the pc also had out ruds THESE ARE NOW PUT IN WITH “Have you been audited over an (ARC Brk, PTP, w/h)?” as the pc has been.

It will all come out all right if properly done. Very few pcs get that messed up. But when they do even they can be untangled.

If a lot of engrams were also run on top of that and these are also in the mess, repair them last as a fourth action. And don't forget to send auditors responsible to Cramming and report C/Ses who get a case *that* snarled up.

C/S Series 53 is written with the above sequence of handling. But it omits ARC Brks (as these don't raise or lower TA out of normal range). And C/S Series 53 as it is designed only for high or low TA does not cover the trick of putting in the ruds as “Were you audited over an (ARC Brk, PTP, w/h)?” as it purposely has to omit ARC Brks.

Hope this helps.

*Word Clearing Series 24*

**LIBRARY**

You will begin to get an idea of how much library you will need when you have done a large number of word clearings.

The important thing is to realize that a library is necessary.

In an org this will be in Department 14 under the Librarian.

The greatest demand will be for dictionaries of many kinds.

First there is the consideration of just English dictionaries. Several, including large ones, should be to hand. Those that use big words to define words keep a pc chasing around and around and are of course poor dictionaries. Often one dictionary gives a better definition than another. So an assortment of English dictionaries is a first requirement.

Then come technical dictionaries or texts like engineering, physics, medical, chemistry, mechanics, seamanship, aviation, astronomy, military, etc, etc.

Then come philosophical, psychiatric and religious dictionaries if they can be found.

Foreign language dictionaries Latin, Greek, French, etc are a must.

An auditor doing word clearing can come up with some remarkable demands.

Texts or dictionaries covering the subject given on the assessment list (Word Clearing Series 8RR) are a basic starter.

I can see a word clearing auditor poking about in old mouldy bookshops and coming up with triumph—"Ah, look! Priceless. A slang dictionary on oil fields published in 1932! Priceless!"

If you get too stopped and are in a major city, you *could* end the session and send the pc to the local library. But if so have him write the definition down. It is not recommended but can be done.

The best solution is to have a good library covering the assessed subjects.

*C/S Series 61*

**THE THREE GOLDEN RULES  
OF THE C/S**

**HANDLING AUDITORS**

There are three firm rules in handling auditors which make the difference between good auditors and poor auditors or even having auditors or no auditors at all.

1. NEVER FAIL TO FIND AND POINT OUT AN ACTUAL GOOF AND SEND THE AUDITOR TO CRAMMING.
2. NEVER INVALIDATE OR HARASS AN AUDITOR FOR A CORRECT ACTION OR WHEN NO TECHNICAL GOOF HAS OCCURRED.
3. ALWAYS RECOGNIZE AND ACKNOWLEDGE A TECHNICALLY PERFECT SESSION.

By reversing these three things a C/S can wreck and blow every auditor in the place.

By *always* doing these three things correctly the C/S winds up with splendid auditors.

An auditor who knows he goofed and yet gets a well done doesn't think the C/S is a good fellow. He holds the C/S in contempt and his auditing worsens.

An auditor who didn't goof and yet is told he did becomes bitter or hopeless and begins to hate the C/S.

The test of a C/S in the auditor's eyes is "Is he spot on?" meaning is the C/S *accurate* in giving the right program, the right C/S, spotting the goof and ordering Cramming, and being well enough trained to see and commend a well done.

You never get Bad Indicators in an auditor or student when you state the truth.

You only get Bad Indicators when your statement is not true.

"PR" (Public Relations cheery falsehoods) has nothing to do with getting good indicators.

Good indicators in auditors are made with TRUTH.

"You goofed, go to Cramming, do TRs 101 to 104 until you cease to alter commands."

"Well done by Exams. Practice Handwriting so I don't take so long reading your worksheets."

"This F/N VGIs at session end and the Bad Exam Report do not agree. Is there any way this report was falsified? Is there any goof you didn't write down?"

or

“Very well done” on a very well done totally ON Tech, ON Admin and Correct Auditor’s C/S session.

Auditors work well even for a bad tempered C/S *when* that C/S is always “Spot on” with program, C/S, Auditor’s grade or censure of auditor and TO CRAMMING.

Auditors like a businesslike accurate C/S.

A “good fellow” C/S who “lets it slide” and says nothing becomes a very bad fellow indeed in auditors’ eyes.

A C/S who doesn’t recognize and who invalidates good auditing is looked on as a suppressive even when it’s just ignorance.

The Golden Rules of C/Sing are

1. Never fail to find and point out an actual goof and send the auditor to Cramming.
2. Never invalidate or harass an auditor for a correct action or when no technical goof has occurred.
3. Always recognize and acknowledge a technically perfect session.

Only those C/Ses who follow these Golden Rules are truly loved by their auditors.

Remimeo  
Interiorization  
Pack

*URGENT*

**INTERIORIZATION RUNDOWN**

It *usually* happens that an Interiorization Rundown (also known as Int-Ext RD for Interiorization-Exteriorization Rundown) is—

1. Done when not necessary.
2. Is flubbed in R3R.
3. Is Overrun.

**UNNECESSARY**

The words “Went In” and “Go In” **MUST** be said to the pc and *cleared* on the meter. If there is needle action, one runs an Int RD as per the Int Rundown *Pack*.

If there aren't any reads one does **NOT** do an Int Rundown on the pc as it is unnecessary and classifies as “running an unreading item”.

When this test is omitted you get an unnecessary Int RD being done on a pc.

This will eventually have to be repaired.

**FLUBBED R3R**

When the auditor does not do flubless auditing errors occur in the auditing itself. These will hang up an Int RD.

**OVERRUN**

It *usually* happens that an Int RD is overrun. It goes flat on Secondary F2, let us say. The auditor keeps on going past the win.

This will hang up the Rundown.

One of the ways an overrun occurs is the pc goes exterior during it. Yet the auditor keeps on.

Another way is pc has a big cog, big win. Auditor keeps going on with the RD.

**REASON FOR ERRORS**

The Int RD is not understood as a **REMEDY**. It is not something you do on all pcs.

Pc goes Exterior in auditing.

Later his TA goes high.

*Then you* do an Int RD.

You test Int for read as above. If it BDs you do an Int RD.

You just don't do one because a pc goes exterior.

One reason unnecessary Int RDs get done is that the Registrar sells one. That makes the Reg a C/S. So the C/S and auditor run it.

Maybe it wasn't needed.

So if it wasn't needed it will eventually have to be repaired.

### HEADACHES

Headaches are a symptom (not *every* headache is) of a needed or an incorrect Int RD.

### CORRECTION DRILL

The following is *the* Correction Drill for an Int RD.

Ninety percent of the pcs run on Int need it.

### REQUIREMENTS

An auditor before being allowed to go near a pc Int RD Correction must have:

1. Word Clear 2 the Int RD Pack.
2. Must have good TRs.
3. Must be good with a meter.
4. Must know and use the Auditor's Code.
5. **MUST DO THIS DRILL ON A DOLL UNTIL HE IS FLAWLESS.**

Then he can be trusted to do an Int RD Correction.

This is the drill (written by a Class XII Auditor for use on Flag):

#### *Drill-Int Ext Repair No.1*

### FAILED INT/EXT RD REPAIR DATE TO BLOW—LOCATE TO BLOW

1. By C/S or prepared list read, Int appears overrun.
2. Auditor: "We're going to take a look at the subject of going into things and your Int RD."
3. Auditor: "What was the first time in your auditing that you were willing to go into things?"
4. Auditor establishes by pc answer to above and any further 2wc if (a) a flat point exists in or as a result of auditing (or training), (b) the pc feels the Int RD is unflat, (c) the pc has misunderstands on the RD, or (d) the pc never had any trouble with going in and out of things or being audited after Exterior. The pc and auditor are satisfied with what they establish above.
5. If (a) flat point, auditor establishes what the point was. If (b) unflat, the auditor does an L3B "On your Int RD". If it does turn out on the L3B that the Int RD was overrun or unnecessary, the auditor proceeds per this drill. If (c) misunderstands, the auditor clears them up with the pc and *then* finds out if it was overrun, unflat or unnecessary and handles per this drill. If (d) unnecessary, the auditor indicates it was an unnecessary action and gets an F/N.

6. The Int RD was overrun and the flat point has been established per Step 5. The auditor tells the pc, “We’re going to date that point in years, months, etc, ago until something blows off—some mass or energy, etc. I want you to tell me as soon as that happens. Alright?”
7. If the pc is confused about “blow” the auditor can do a demo by putting his hand on the pc’s arm and taking it away suddenly.
8. When the pc understands what’s expected of him, the auditor establishes the order of magnitude by asking the pc, “Was it years or months ago?”
9. The auditor gets the years, months, days, hours, minutes, seconds and fractions of seconds ago to a point when something blows and F/Ns. If *the pc gives up* on this only then does the auditor meter date the flat point to a blow-F/N.
10. If a big BD occurs and the auditor suspects a blow but the pc will *not* originate it, the auditor can ask the pc if it blew.
11. If no blow occurs the auditor verifies *each* part of the date and corrects where necessary to a blow-F/N. If still no blow-F/N the auditor then checks for an earlier flat point. If there is one, the auditor dates that point to a blow-F/N. If still no blow-F/N the auditor does an L3B “On your Int RD” and handles fully.
12. When the date has gone to a blow-F/N and the F/N has been indicated the auditor tells the pc, “Now we’re going to spot the exact location where that flat point occurred, until something blows off. I want you to tell me when that happens. Alright?” The auditor is getting the *pt* phys. univ. location.
13. The auditor clears the words stars, planet, galaxy, location, point, if this is the first time Date Locate is being done on the pc.
14. When the pc understands what’s expected of him the auditor begins the Locate Steps.
15. The auditor says, “Point to that location.” The pc points with his finger until he is satisfied he has the exact direction. Then the auditor goes down the rest of the steps to a blow-F/N.

Distance?

Exact?

What Galaxy?

What Star?

What Planet?

What Country?

What City?

What Street?

What House?

Position on Street?

What room?

Distance from front of house?

Where in the room?

How far from *each wall*?

How far off the floor? How far from the ceiling?

16. If, while locating, the pc starts running the incident or gives too much “scene” the auditor has the pc point again then continues from where he left off on the Locate Steps.

17. If at some point on these steps the location turns out to be in the middle of the ocean or in a field, etc, the auditor uses available landmarks or reference points to get the location (i.e., distance from nearest point of land? or distance from the big rock?) down to a blow-F/N.
18. If no blow-F/N, the auditor verifies each *part* of the Locate Step and corrects any necessary to a blow-F/N.
19. If the auditor suspects a blow but the pc doesn't originate it, the auditor asks, "Did something blow?" If the auditor suspects he's gone past a blow he can check "Did it blow previously?" If so and no F/N the auditor rehabs by asking the pc how long ago that happened and gets the F/N.
20. If no blow after verifying the location, or after checking for an earlier location blow, the auditor then has to do an L3B "On your Int RD" and handle fully.

---

*NOTE:* A blow is a *definite* manifestation and the pc must say "something blew" or "it disappeared" or "it's gone" or "it vanished", *not* "I feel lighter".

This is a highly precise action to be done smoothly with good TRs. Its results are phenomenal.

(corrected and reissued)

*C/S Series 62*

**KNOW BEFORE YOU GO**

A C/S may and *should* know exactly what is wrong with a case.

When he “knows” by hunches or intuition and does not bother to confirm or make a wider effort, he can miss the case entirely.

Example: C/S says to himself—I know what’s wrong with Joe. His wife. So I’ll C/S “O/W on your wife”.

Some of the time the C/S will be right. This gives him a win and confirms him in sloppy C/Sing. He does not bother to know before he C/Ses.

A C/S who gets a low percentage of cracked cases and a low percent of F/N VGIs at Examiner usually fails to “know before he goes”. He just goes, which is to say he just writes programs and C/Ses without finding out enough about the case.

A skilled C/S may very well be able to figure out exactly what’s wrong with the case. That’s his job. But how does he find out anything about the case at all?

The answer is very simple. So simple it gets missed. THE C/S GETS DATA ON THE CASE.

How does he do this?

The broadest, most used answer to how to know is prepared lists. These have all sorts of questions on them that read or don’t read. There are *lots* of these lists beginning with the famous PC Assessment Form. There are all sorts of lists. An end product of any list is DATA ON THE PC ONE USES TO PROGRAM AND C/S THE CASE.

The next answer to how to get data is lists prepared by the C/S himself and which are assessed by the Auditor.

Another answer is 2-way comm on questions written by the C/S. “What do you consider hasn’t been handled on your case?” is a jewel which gives you the hidden standard to List and Null and run Who or what would have \_\_\_\_ to BD F/N Item and O/W on the item found. But there are dozens more. “How do you feel about your family?” “R Factor: The C/S is concerned about your saying your case sags after wins in auditing. Could you tell me exactly what happens and what your history has been on this?” There is no limit to such questions. And, if taken from what the pc says to Examiner or from auditors’ comments on Worksheets, they will usually F/N. But mainly they give *data*.

When regular actions fail, there is always the D of P. “D of P to Interview Richard Roe and find out what he’s trying to do in session. Also how he looks, mannerisms, etc.”

Data, Data, Data. Now you have a picture of this case.

## COMBINED ACTION

Usually, by prepared lists issued or from C/S prepared lists, the C/S finds and *gets* handled by the auditor in the same session much of what is wrong. This combines finding out with handling.

Any prepared list carried to F/N on each read (Method 3) or the indicated action done will give case gain. Maybe it's all the case gain one could ask for.

But such reads even if F/Ned and the text in the Worksheet give the C/S new data about this case.

## BROAD SHOOTING

Even if he now KNOWS, the C/S does not narrowly shoot at one target. He gives alternatives as well in his C/S.

Example: C/S knows pc is concerned about F/Ns. He does not necessarily just write "Prepcheck F/Ns". Instead the C/S writes "Assess Auditors, Auditing, Dianetics, Scientology, F/Ns, Processing, false reads. Prepcheck each reading item, taking largest read first." This gives a broader band, more chance of hitting the button needed.

There are many ways to do this. Example: You "know" it is a misdefined word. You don't C/S "Find the misdefined word". You write, "Assess Method 3 and Handle the Word Clearing Correction List". For you see, the session might also have been run over an out rud.

## EVALUATION

To abruptly C/S everything the pc has just said is a Q and A. But worse, it can lead to evaluation.

## LITTLE FLAGS

Pc Remarks are like little Flags that may signal a much deeper deposit of aberration. Only the little flag shows. "I don't like women," can uncover a whole background. "I keep getting this pain in my side" opens the door to a whole chain of operations and one to be done next week!

But by the broad rule, the C/S doesn't dive at it. He says "Pc has pain in side. I . C/S 54."

*Not* "List the somatics in his side". But a whole coverage of accidents, illnesses. *One* will also have a side pain as a result. "Appendicitis Operation" is enough to give anyone a pain in the side if never audited out!

## TAGGING CASES

A C/S who sees a case is thick foldered and not well tags the case "Resistive". There are 7 resistive cases listed in the Class VIII material. For this the C/S has "GF40 Expanded Method 3" and then handles the lists and engrams indicated in it in his next C/S.

If *this* doesn't handle, the case is in an out Ethics situation that should be looked into.

The C/S mentally tags the easy ones and the tough ones. The tough ones he plays on the Resistive Cases side.

The C/S can also find an auditor considers a fast case a bad case when it is just a fast case.

## PRIMARY RECORD

The primary record is the pc's folder. When the case does not run well it can be assumed that the case is

- (a) Resistive
- (b) Errors have been made in auditing.

These two assumptions are valid in all cases which do not easily resolve. They are both valid because the case, being resistive, was running poorly, was hard to audit and C/S earlier.

From the folder, from prepared lists, from C/S's own additions to prepared lists, from C/S's own prepared lists, from 2wc on questions and from D of P Interviews one can get ENOUGH DATA TO INTELLIGENTLY PROGRAM AND C/S A CASE.

All this may seem very obvious. BUT, in word clearing the most Common C/S error has been to fail to order a Word Clearing Correction List done. Instead one reads, "Correct the last word found". This misses that the whole thing may be being done over a withhold or ARC Break. It might be another word entirely. So a C/S who does this risks the wrong target. He is not C/Sing broadly enough.

Also one sees a repair or life program consisting of two or three special processes and without any lists at all.

One also sees a program which seeks to handle several things the C/S "knew" were wrong followed by "8. C/S 53, 9. GF 40X, 10. C/S 54." Having gone, this program then seeks to find out. It's quite backwards.

Thus the C/S who goes before he knows is going to have an awful lot of no F/Ns at the Examiner.

The watchword is KNOW BEFORE YOU GO.

Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 30 SEPTEMBER 1971

Remimeo  
HQS Course  
HQS Course  
Supers

Issue VI  
Amended & Reissued 19 April 1974  
(Only change is in signature &  
commands of CCH 7.)

**CCHs 5,6 & 7**

(Taken verbatim from HCO B 11 June 1957  
for use on the HQS Course.)

**NUMBER: CCH 5**

*NAME:* Location by Contact.

*COMMANDS:* "Touch that (indicated object)." "Thank you."

*POSITION:* Auditor and preclear may be seated where the preclear is very unable, in which case they are seated at a table which has a number of objects scattered on its surface. Or auditor and preclear may be ambulant, with the auditor in manual contact with the preclear as is necessary to face him toward and guide him to the indicated object.

*PURPOSE:* The purpose of the process is to give the preclear orientation and havingness and to improve his perception.

*TRAINING STRESS:* Training stress is upon gentleness, ARC and the raising of the preclear's certainty that he has touched the indicated object. It should be noticed that this can be run on blind people.

*HISTORY:* Developed by L. Ron Hubbard from Locational Processing in 1957.

---

**NUMBER: CCH 6**

*NAME:* Body-Room Contact.

*COMMANDS:* "Touch your (body part)." "Thank you." "Touch that (indicated room object)." "Thank you."

*POSITION:* Auditor and preclear move about together as needed, the auditor enforcing the commands by manual contact using the preclear's hands to touch objects and touch body parts.

*PURPOSE:* To establish the orientation and increase the havingness of the preclear and to give him in particular a reality on his own body.

*TRAINING STRESS:* Training stress is upon using only those body parts which are not embarrassing to the preclear as it will be found that the preclear ordinarily has very little reality on various parts of his body. Impossible commands should not be given to the preclear in any case.

*HISTORY:* Developed by L. Ron Hubbard in 1957 in Washington, D.C., as a lower step than Body-Room Show Me.

**NUMBER: CCH 7**

**NAME:** Contact by Duplication.

**COMMANDS:** “Touch that table.” “Thank you.” “Touch your (body part).” “Thank you.” “Touch that table.” “Thank you.” “Touch your (same body part).” “Thank you.” “Touch that table.” “Thank you.” “Touch your (same body part).” “Thank you,” etc, in that order.

**POSITION:** Auditor may be seated. Preclear should be walking. Usually auditor standing by to manually enforce the commands.

**PURPOSE:** Process is used to heighten perception, orient the preclear and raise the preclear’s havingness. Control of attention as in all these “contact” processes naturally takes the attention units out of the bank which itself has been controlling the preclear’s attention.

**TRAINING STRESS:** Training stress is on precision of command and motion, with each command in its unit of time, all commands perfectly duplicated. Preclear to continue to run process even though he dopes off. Good ARC with the preclear, not picking one body part which is aberrated at first but flattening some non-aberrated body part before aberrated body part is tackled.

**HISTORY:** Developed by L. Ron Hubbard in 1957 in Washington, D.C., as a lower level process than Opening Procedure by Duplication, or Show Me by Duplication. All contact processes have been developed out of the Pre-Logics.

*C/S Series 63*

**C/SING FOR NEW AUDITORS OR VETERANS**

There is a considerable difference between C/Sing for internes and new auditors and C/Sing for veterans.

This shows up mainly in C/Sing prepared lists.

For an interne or new auditor or one who is not very experienced or expert, the rule is that a C/S gives as little thinking to do as possible in the session.

It is enough for such an auditor to do the actions. It is too much to also ask him to use judgment or work something out *while* auditing.

A veteran on the other hand knows the tools so well that he can also figure out what to do.

Example:

C/S for non-veteran:

1. Assess GF Method 5 and return to C/S.

C/S for a veteran:

1. Assess GF Method 5 and Handle.

It is quite a trick to assess a whole list, then take the biggest reads and handle. It is quite beyond an auditor who is still worrying about his TRs or how you run a meter.

In an effort to speed up lines or escape work, a C/S can err *badly* in this. It becomes mysterious why Word Clearing Correction List ceases to work, why F/Ns are few at the Examiner.

Giving an inexperienced auditor the responsibility for assessing a list and also handling it is in fact asking him to audit and to a faint degree C/S in the chair. It is quite beyond a green auditor.

Given that he knows his Tech, most of a C/S's troubles come from

- (a) Asking green auditors to follow C/Ses for which they have not studied the HCO Bs or on which they have not been crammed,
- (b) C/Sing for green auditors to decide something in session or combine actions such as assessing and handling without a new C/S in between,
- (c) Not sending the auditor (green *or* veteran) to Cramming for *every* goof,
- (d) Having no Cramming.

It takes a while to make an auditor.

The C/S is responsible for all actions in the session. He has only himself to blame if he is asking someone to C/S for him in the chair.

It is easier to plan out and write up the needed GF actions (or any other list) from the Method 5 reads than it is to correct a messed-up handling. It does not save any time at all but more than likely makes new problems for the C/S.

It is very easy to have even a green auditor assess some prepared list. One can even now say, “Take the list just assessed and do 2wc on each item I have marked. Carry each E/S to an F/N before leaving it.” The C/S simply puts a dash ahead of each item that read in the assessment.

The C/S can also number the items in different order than the list (because of better programming or bigger reads) and have each one handled to F/N.

An L3B can be ordered “Method 5” and then the C/S can get it back and precisely order what’s to be done with its reads. And in what sequence.

This is true of any prepared list.

The only small hitch is that a C/S has to be there and available so as not to stall the session. Even so, in the long run it is faster because less mistakes are made. Assess—send to C/S—handle. Instead of “Assess and Handle”.

This even applies to a C/S 53 or C/S 54 or White Form or GF 40X. Any prepared list.

Perhaps this will greatly improve your F/N VGI ratio.

**F/Ning AUDITORS**

Students who study well are said to be F/Ning students.

An auditor who is auditing well could be said to be F/Ning the whole time.

When an auditor goofs or is having a rough time because of his own TRs and misunderstood words and lack of data, he is not F/Ning.

A C/S who lets an auditor struggle along without insisting on a Cramming being in existence and without sending an auditor to Cramming on each goof is actually condemning the auditor to a miserable time.

When an auditor's production is low and when he is making goofs, he is not an F/Ning auditor. This shows up heavily in the Exams of his pcs. These Exams will drop away from F/N VGIs.

An auditor should be sent to Cramming when his production is low or he goofs in order to get his TRs, misunderstood words and lack of data remedied.

Cramming should be carried out until he is F/N VGIs.

EVERY AUDITOR LEAVING CRAMMING SHOULD GO THROUGH THE EXAMINER.

The Exam report with TA and needle state and indicators should be done exactly like a pc report.

Compliance reports on the Cramming cycle should have the Exam report attached so the C/S can see if the fault was remedied. If it was, then it will be F/N GIs.

This also puts Cramming on its toes.

An auditor, just crammed, who doesn't F/N VGI should be hauled straight back into Cramming for the cycle is incomplete or invalidative or faulty in some way.

Cramming Officers who win on auditors and students are F/Ning Cramming Officers.

C/Ses who send auditors to a good Cramming for every goof will wind up as F/Ning C/Ses.

**INTENSIVES ADDED POINTS SYSTEM FOR PCS**

(Reference LRH ED 153 Int, HCO PL 29 Aug 71,  
“Org Conditions”, HCO PL 28 Sept 71, “Selling and  
Delivering Auditing”, and LRH ED 145R Int.)

An org selling one-week 12½ hour Intensives should use this point system.

ALL POINTS GIVEN IN HCO B 30 Aug 71, Issue II, are valid.

FOR EVERY PREPAID 12½ HOUR INTENSIVE DELIVERED IN ONE  
WEEK—5 POINTS.

This is in addition to rundown points. What is *achieved* during the 1 wk 1 2½  
hour Intensive is added.

Example:

1 12½ hour Intensive delivered in 1 wk	5
Included Progress Pgm with a success story	1
Included Life Repair with a success story	1
Completion Points	= 7

Example:

2 12 ½ hour Intensives one week each	= 10
C/S Series 54 and Handling with a success story	= 2
Completion Points	= 12

Randomly scheduled 12½ hrs of Auditing *not* given in one week but spread out  
or not delivered has *no* Intensive points beyond those given in HCO B 30 Aug 71,  
Issue II, “Pc Completions”.

Penalties of 30 Aug 71 still apply regardless of the 12 ½ hour Intensive but even  
if no F/N occurred in the whole Intensive 5 points would be gained if it were given in  
one week as well as the no F/N penalties.

It pays best to give the pc everything the C/S can, in as many hours as possible.

**FORCING A PC**

Forcing a pc to go on being audited when the pc is refusing or not wishing to go on upsets the pc and his case and will give the pc a heavy loss.

There is no excuse for it.

It invalidates the pc's cause.

The correct action is to either find out why he doesn't want to go on or send the pc to a Scientology Review.

### ASSISTS IN SCIENTOLOGY

**DEFINITION: AN ASSIST: AN ACTION UNDERTAKEN BY A MINISTER TO ASSIST THE SPIRIT TO CONFRONT PHYSICAL DIFFICULTIES.**

An assist is not normally done in a formal session. The way the term has been used is a very simple activity to relieve an immediate troublesome difficulty.

An assist is much more specifically and definitely anything which is done to alleviate a present-time discomfort.

An assist could happen almost anywhere. At the beginning of a session, no matter how formally this session is constituted, you are running an assist.

You have an auditing room. You have a preclear, and you are the auditor. You know all these things, but the preclear doesn't. Don't call it a formal session. Tell the preclear that it is an assist and that you are not intending anything very strenuous. In rendering an assist you should tell the preclear that "this is just an assist" to try and ease the pain in his hand a little, after which you are going to stop.

The handling of an assist as an auditor is different than the handling of a formal session since the factor of control is notably slackened, sometimes almost completely missing.

One of the factors in assists is that an assist has as a large part of its anatomy, "trying to help". Just remember that you are only trying to help and don't get your heart broken by the fact that the fellow's broken spine doesn't heal instantly.

Another factor is that an assist is differentiated and defined as addressing the game someone knows he is playing.

What techniques would comprise an assist? Anything that would help. And what are these? One of the easiest ones to render is Locational Processing. You tell the person, "Look at that chair. Look at that ceiling. Look at that floor. Look at that hand" (the auditor pointing to the objects), when he has an injured hand and the pain will diminish. This is a very easy assist.

For example, a person has a bad shoulder. You touch his hand of the same arm and say, "Close your eyes and look at my fingers." Make sure that he keeps his eyes closed. You then touch him on the elbow and say, "Look at my fingers." Do this anywhere on his body. Just touch him and say, "Look at my fingers." This is a communication process which eases his attention over from a concentration upon the injury to something else which is quite near the injury and thus doesn't result in too much of a shock. It reduces havingness but it is positive and gets positive results. It can be done by an untrained person.

You can teach this assist to anybody. You say, "If somebody has a bruise, injury, a burn, a cut, the way to handle this is to tell the person to close his eyes, and then you touch the area near and distant from the vicinity of the injured area, asking them, with their eyes closed, to look at your fingers. You contact them this way many times. They will experience sudden pains in the area, and you will discover that the 'psychic trauma' has been discharged."

You will find that most people do not have any upset about physical contact. Most people think that this is the thing to do.

Say you wanted to render an assist on somebody who had a very indefinite difficulty. That is the hardest one to render an assist on. The person has a pain but he cannot say where. He doesn't know what has happened to him. He just feels bad. Use Locational Processing as such. You will find out that this process will work when other processes fail.

An assist carries with it a certain responsibility. If you give an assist casually to somebody out in the public and do not shove a calling card in his pocket, you are making an error. The reason for this is that he will not know from whom and where help came. An auditor goes through life and he casts his shadow upon many people and they have really no cognizance of what has happened at all if he is rendering an assist. He says, "Do this, do that"—maybe he wins, or maybe he loses because this is the type of session least calculated to procure orderly results. But in the main these people have been helped. They don't know really by what, except some word that the auditor kept saying. They don't even know that he is an auditor. They don't know anything about it at all. Show a person where he can obtain further assistance, and by whom the assistance was given.

Be yourself. Be positive. Be professional and definite. Have a calling card and make sure the card is easily enough understood. Don't ask them for permission. Just do it. No reason to wander around and give them funny notions. If you are going to help some stranger out, help him out. Don't explain to him or any bystander, otherwise you are likely to stand there explaining, waiting for somebody's permission. Don't bother with that. You act as though you are the one in charge and you will be in charge. And this is part and parcel of the knowledge of how to do an assist. You have got to be the person in charge. This has to be so good, as far as you are concerned, that you overcome the informality of the session to a very marked degree. If you do it extremely well, the assist will amount to auditing.

Say, for example, there is a big accident and a crowd of people are pressing around. The police are trying to push the people back. Well, push the people back and then push the policeman back. Say, "Officer, keep these people at a distance." Then you lean over the victim and snap him back to rights. If you are enough THERE, everybody else will realize that you are the ONE that is THERE. Therefore, such things as panic, worry, wonder, upset, looking dreamily into the far distance, wondering what is wrong or what should be done, are no part of your make-up if you are rendering an assist. Cool, calm and collected should be the keynote of your attitude. Realize that to take control of any given situation it is only necessary to be there more than anybody else. There is no necromancy (magic; conjuration of the spirits of the dead in order to predict the future) involved. Just BE there. The others aren't. And if you are there enough, then somebody else will pull himself out of it and go on living.

Understand that an auditor when rendering an assist must make up with presence what he lacks in surroundings and agreements. It all comes under the heading of willingness to be there and willingness to control people.

One of the ways of convincing people of beingness and of being there is to exercise control—positive, undeniable Tone 40 exercise of control. Start to control the situation with high enough ARC, enough presence and factuality—there won't be anybody present that won't step back and let you control the situation. You are entitled to it in the first place because of senior "know-how". The control of body attention or thought comprises the majority of your knowledge. The majority in Scientology simply points in this direction. The observable thing is control of attention, objects and thoughts. When you have good confidence of being able to handle these, and when you positively know how to do these, then you can make sure that everybody else knows you can do this, and you make them realize this by doing it. You have all of these things available in rendering an assist.

You might never think of a riot as being a situation which necessitated an assist, or an assist as applicable to a riot, but a riot is simply a psychosomatic momentary injury or traumatic condition on the third dynamic. Could you settle a riot? Well, if

you can settle a riot, you can certainly settle one person who is in a riot. The antithesis of any pain, disturbance or tumult is order. The thing which controls tumult is order; and, conversely, the thing which controls order is tumult. You need only bring order into a confused situation and bring confusion into an orderly situation to control everything in the field of motion, action and objects.

This is a fantastic simplicity and one which takes some grasping. Conceive as order, merely a fixed position, idea and attitude. A policeman knows what he is supposed to do. Maybe he will put on a tourniquet or maybe he won't. Keep the people away and stop everything is his idea of how it should be. Now you can aid or abet the order he is creating, or cancel the order by creating a confusion which he cannot handle. Of the two, the first is the best in that situation. You aid and abet and cap the order he is creating. If you were to accuse him of having a confused accident scene, which is by now not at all confused, and ask him to straighten it out, you would channel his attention in the direction it is already gone, and so you control his attention.

Remember, those people are still moving a little bit; they are still breathing. There is still a tiny bit of motion going on. If you were to ask him something on the order of "Can't we have it a little quieter and more orderly here?", he would at once perceive that there was far too much confusion and motion, and he would simply come under your direction because you have simply channeled his attention in the direction it was already going. Therefore, you have taken control.

If you ever want to overset a fixed order, create a confusion. If you want to overset a confusion, create a fixed order. Pick out of the scene those beings in the scene whose attention is channeled in the direction you want attention to go, and you aid and abet that attention which already exists. Or, where you have too many fixed positions and fixed ideas to overcome, you simply take those turbulent individuals in the scene who are creating the confusion against those fixed ideas and channels and you make their confusion much more confused, at the same time yourself imposing another order in another direction.

The mechanics of taking over any confused scene are simply the mechanics of trying to get a preclear to see through the morass of cross purposes, commands, ideas, and environments in which he has lived. And whether that applies to the third dynamic or otherwise, the laws are still there and it tells you then that the imposition of order on a preclear comes foremost in an assist.

In an assist you always count on the fact that the thetan himself would, if he could, do the right thing. If you work on that postulate you will never be wrong. Get the idea that it is something else trying to do the wrong thing. The keynote of a thetan is order.

Where you are giving an assist to one person, you put things in the environment into an orderly state as the first step, unless you are trying to stop a pumping artery—but here you would use First Aid. You should understand that First Aid *always* precedes an assist. You should look the situation over from the standpoint of how much First Aid is required. Maybe you will find somebody with a temperature of 106 degrees. It may very well be that he needs to lie down and be covered up, and though antibiotics are much overrated, he might be better off with a shot of one of these than with an assist at that time.

Auditing will not shut off a pumping artery, but a tourniquet will. If you are going into the zone of accidents, you are going to be in the vicinity of a great deal of destruction and chaos, and you are very foolish not to have your Red Cross First Aid Certificate. You may often have to find some method of controlling, handling and directing personnel who get in your way before you can render an assist. You might just as well realize that an assist requires that you control the entire environment and personnel associated with the assist if necessary.

An assist is auditing on several dynamics. It is, therefore, much harder to do than auditing in a formal room as it requires presence. You must bring yourself to face the fact that you have to give enough presence and enough control to enough dynamics to bring the environment into a compliance with your postulate. If you postulate that somebody

is going to pick up his bed and walk, then you have to be willing to move and be capable of moving around the people who are going to watch him pick up his bed and walk.

A good example of an assist would be when somebody is washing dishes in the kitchen. There is a horrendous crash and the person comes down all over the sink, hits the floor and as she is going down, she grabs the butcher knife as it falls. You go in and say, "Well, let me fix that up." One of the first things you would have to do is to wind some bandage around the hand to stop the bleeding. Part of the First Aid would be to pick up the dishes and put them back on the sink, sweep the pieces together into a more orderly semblance. This is the first symptom of control. She becomes introverted into the cut to the point that she wouldn't particularly notice what you were doing. But you relieve the anxiety that all her blood is pouring out; your first attention to the case is attention to the environment.

Next you would make her sit down. To remove her from the scene of the accident is not as desirable as auditing her there. That is directly contrary, perhaps, to what you believe, but it is true. That is why you bring a little order into the environment. You position her and then you are ready for techniques. It is quite remarkable for you have manifested order in a much wider sphere than a cut hand in order to bring about a healing of the cut hand. If you understand that your responsibility always extends much wider than the immediate zone of commotion, you never miss. If you bring order to the wider environment you also bring it to the narrower environment. If you bring it into the narrow environment, you also bring it to the wider environment. It is a gradient scale of how much order you can bring.

In processing, you have to control or direct attention, objects, person, or thoughts of the injured person. If you are really good on the subject of assists, you will direct an additional thing: his knowingness. You can control a man's knowingness rather easily, but it is hard to see it. About the first thing that you can observe about somebody is his person. You are trying to straighten it out. Don't think even though you have this person sitting down that you have straightened it out, because it is still messed up. But there is something that you can straighten out easily—and that is his attention. If you could heighten his attention and his knowingness at the same time, you would really be in wonderful circumstances. You always shift and direct his attention, hence Locational Processing.

Because he is injured you are not going to move his person around. You have got his attention. Don't try to shift his thoughts around at first because they are dispersed and chaotic. This leaves you his attention only.

If someone is in terrible condition and he is really writhing around, and you want to render an assist, you don't wait until he stops writhing. He is liable to stop writhing dead. What you do with him is to direct his attention. You tell him to "*Shut your eyes and look at my fingers.*" You press your fingers hard enough so that he can't help but put his attention on them. In this wise you can always have a successful assist, because assists all come under the heading of control. The beingness of the person and his presence makes the control possible. So part of control is always presence, identity, person, the one who takes charge and has things under control. When you are able to control his attention, his body and thoughts, then he will be in session and you are no longer doing an assist.

Assists dominantly require that you direct the attention of the preclear and dispose his person one way or the other and eventually take over control of his thoughts on the subject. But by the time you have all these three in line, you are no longer doing an assist.

So what you really do is do an assist up to the time the person can handle the incident or pain, put him in a more favorable environment and give him auditing. So the assist is what you do on the street, and auditing is what you do in the auditing room when he comes to you after your assist has been successful.

*C/S Series 39R*

**STANDARD 12<sup>1</sup>/<sub>2</sub> HOUR INTENSIVE PROGRAMS**

The sale of 12<sup>1</sup>/<sub>2</sub> hour Intensives modifies earlier versions of Advance Programs (Grade Chart) since a C/S now needs everything he can get a pc audited on. It is not now a question of selling the public anything with a name. You just sell 12<sup>1</sup>/<sub>2</sub> hour Intensives. The C/S decides what to run and runs all he can as lengthily as he can. Refunds come from not enough auditing. Gains come from auditing in large blocks of hours such as 1 to 6 12<sup>1</sup>/<sub>2</sub> hr Intensives, always delivered at 12<sup>1</sup>/<sub>2</sub> hrs per week or weekend.

## **EXTERIORIZATION**

Exteriorization is defined as the act of moving out of the body with or without full perception.

It is the fact of this act which proves that the individual is not a body but an individual. This discovery in 1952 proved beyond any question the existence of a thetan, that the individual *was* a thetan, not a body, and disproved that man was an animal, and that he was a spiritual being timeless and deathless.

Checksheets

**FALSE TA**

Some pcs have a *very* difficult time in auditing due solely to can (electrode) outnesses.

Some auditors have heavy losses because they do not realize the troubles that can come from electrodes and thus remedy them.

**TA USE**

The TA must be between 2 and 3 for a correct F/N.

When the TA is reading falsely a pc can be butchered.

Example: Auditor talking the TA down. It gets to "3.1" by his meter. So he gets the pc to talk a bit more to get the TA between 2 and 3 and F/N. The TA suddenly rises to 3.8.

Pc and Auditor go desperate. What has happened is that the TA was a false read. It was really reading 2.9 and F/Ning but for reasons given below it read "3.1". Thus the auditor overran the F/N and by keeping on invalidated the release, pulled the pc's attention out of session and demanded more than the pc had to give.

Example: Auditor 2 way communicating with pc to get the TA up from "1.8". The TA suddenly sinks to 1.6, pc goes into apathy.

What happened was a missed F/N. For reasons covered below the TA at 1.8 was false and was really at 2.1 and F/Ning.

Example: Pc being asked for an earlier similar incident because TA is at "4.0". Pc can't get one, gets desperate, TA goes to 5.0.

For reasons given below the TA was at 3.0 but was reading falsely at "4.0".

Some cases get upset at the very idea of F/N when these mistakes are made.

More than one case has missed all his wins for a year because of a false TA.

So it is very important to know how a false TA comes about and how to avoid it.

*A properly set up meter with cans (electrodes) fitted to a pc who is holding them properly IS ALWAYS CORRECT.*

However, totally false Tone Arm readings can exist and *an auditor must know how these come about.*

**TRIM**

A meter can be improperly trimmed (not set at 2.0 with the trim knob) and can give a false TA position.

Further, when a meter is not left on a minute or two before trimming, it can drift in the session and give a slightly false TA.

The trim can be quietly checked in mid-session by snapping out the jack where the cord goes into the box and putting the TA on 2, seeing if the needle is now on SET. If not, the trim knob can be moved to adjust it. The jack is quietly slipped back in. All without distracting the pc.

## DISCHARGED

A cadmium cell meter discharges very suddenly when it does go flat.

In mid-session the meter can run out of battery. The TA will cease to act well and may go very false.

The remedy is to keep a meter charged at least one hour for every 10 of auditing for 240 AC volt charging current, or 2 hours for every 10 of auditing on a 110 AC volt charging current.

A meter lasts much longer than this in practice but the above is very safe.

Before each session snap the knob over to TEST. The needle should hit *hard* on the right side of the face. It can even bounce. This guarantees lots of charge in the battery and no chance of a meter going flat in session.

If the needle doesn't snap to the right hard or if it doesn't quite get there on TEST, then that meter will go flat in mid-session and give false TA and no reads or TA on hot subjects.

## ONE HAND ELECTRODE

A single hand electrode with two terminals separated by a rubber works. BUT it *always* gives a falsely high TA.

A Solo auditor who does not know this can get a release point and go half mad wondering why he is F/Ning at 4.0!

The answer is to make a "single hand" electrode out of two small cans (about 33 inches by 21/8 inches or 91/2 cm by 51/2 cm) (or even smaller for a very small-handed pc). Glue a thin circle of foam rubber solidly to the bottom of one can so it reaches out slightly around the bottom. (Don't glue it up the sides.)

Put the alligator jaw clips one to each can. Now put the can bottoms together and hold them in one hand. Mark the TA (1)—meaning one hand (such as 3.75 (1) ). Now take the cans one in each hand and mark the TA (2)—meaning two hands (such as 3.0

Audit with them in one hand. Keep your worksheet with (1) marks (such as 3.5 (1) ). Check at start and middle and end by taking a can in each hand and putting down the 2 can read (such as 2.5 (2) ).

It is too much trouble to totally change cans and the distraction can change the TA read.

This two small can arrangement is not quite accurate. It gives a *lower TA than big cans*. But the difference is slight. It can scare you with a 1.9 when trim is 2.0 and real TA is 2.0. If this happens check with big cans.

(As an added tip a solo auditor usually keeps the back of his hand on his leg while solo auditing. The small 71/2 volt current gives a tingle to the leg that is distracting when one's hand is moist. Put a piece of foam rubber in a plastic sack. Lay the sack on the leg, put your hand on this pad. It insulates the area and is very comfortable.)

## MOIST HANDS

When a pc's hands sweat a lot you will get a low TA.

Contrary to 19th Century superstition the meter does not work on sweat. Very sweaty hands as found on nervous persons give a false TA. It goes low.

*Many "low TA cases" are just sweaty hand cases.*

Paper handkerchiefs (Kleenex) are a standard item for an auditing room—for grief charges and burning eyes, etc. These should be available.

If the TA is low, check if the pc's hands are wet. If so, have him wipe them and get a new read. It is usually found that the 1.6 was really 2.0. Or the 1.6 was really 1.8 and the trim was 1.8 = 2.0.

Have the pc wipe hands, check and correct trim before you by-pass all a “low TA’s” F/Ns!

TAs can go low. Invalidation of the pc, lousy TRs can drive one low. If so the TA comes back up on repair.

But don’t brand a case a low TA case until you make sure his hands are dried and the meter trimmed.

Also, very small cans or cans too small for the pc can give a slightly low reading.

#### DRY HANDS

Some pcs have extremely dry hands, usually from industrial chemicals such as chlorine in dishwasher or skin scale.

This can give a wildly high TA.

The pc can be worried to death with high TA repairs when in fact he just doesn’t have contact with the electrode.

Metal foot plates connected to the meter and the pc barefooted in session will usually handle.

A quick test is have the pc put the cans under his armpits and you’ll see if it’s his calloused or chemically dried-out hands.

#### ARTHRITIC HANDS

A rare pc is so crippled with arthritis that he doesn’t make contact fully with the cans.

This gives a high TA.

Use foot plates or wide wrist straps and you’ll get a right read.

#### SLACK GRIP

Sometimes a rare pc lets his hands go slack on the cans, particularly if they are the wrong size cans, too big.

This gives a mysterious “high TA”. It is false. The TA will come down only to 3.2 and F/N and of course an overrun then really gives a high TA. And the pc goes a bit frantic and begins to believe things don’t erase or release.

Keep the pc’s hands in sight. Check the pc’s grip. Get smaller cans.

#### CAN SIZE

The most common fault is wrong can size.

For a normal or large-handed pc the can size is about 4 7/8 inches by 2 5/8 inches or 12 1/2 cm by 7 cm. This can be altered as big as 4 1/2 inches by 3 inches diameter or 11 cm by 8 cm. This is Standard.

This can is too large for people with small hands. These should use a can 3 3/4 inches by 2 1/8 inches or 9 cm by 5 cm diameter or thereabouts.

A small child would be lost even with that can. So a small 35 mm film can could be used. This is 2 inches long by 1 3/16 inches diameter or 5 cm by 3 cm. This works but watch it as these cans are aluminum. They do work but test for true read with a slightly larger can and then trim to adjust for the aluminum if any different.

Cans of course should be STEEL with a thin tin plating. Regular soup cans.

Can size to match the pc avoids slack can grip or tiring the hands into going slack, giving the auditor 3.2 F/Ns and trouble.

## COLD PC

A pc who is too cold sometimes has a falsely high TA.

Wrap him in a blanket or get a warmer auditing room.

The auditing environment is the responsibility of the auditor.

## LATE AT NIGHT

Between 2 and 3 AM or late at night a pc's TA may be very high. The time depends on when he sleeps usually.

This TA will be found normal in regular hours.

## RINGS

Rings on the pc's hands must always be removed. They don't influence TA but they give a false Rocksram.

## FLOATING TA

Many an auditor before now has gone a bit mad trying to handle a floating TA. They are not very common and are startling.

What happens is the pc is so released the needle can't be gotten onto the dial. The needle is swinging wider than the meter dial both ways from center and appears to lay first on one side then the other. The TA can't be moved fast enough to keep the extreme floating needle on the dial.

This gives a false TA of sorts as it can't be read.

Some auditors seeing it for the first time have even sent the pc out of the room so they could "adjust" the meter or get another one!

Thus the very highest state of release can be invalidated as where *is* the TA?

## RUSTY CORRODED CANS

You'd think soup was very expensive the way some auditors hold onto old cans.

Corroded cans can falsify TA. Get new ones now and then.

## TIGHT SHOES

And then there was the vain lady who wore shoes too small for her feet.

She removed them every session. The session went well each time.

Then she put on her agonizing shoes and went to the Examiner and the C/Ses and auditors all went mad trying to find out why every Exam had a high TA.

Tight shoes.

The E-Meter is accurate. It is a lovely instrument.

You have to fit the pc to it.

Good luck.

Remimeo

## DRUG DRYING OUT

It occasionally happens that someone is still on drugs when he or she requires drug processing.

This sets up a very rough problem.

### DRUGS PREVENT ANY CASE GAIN.

If the person is still on drugs, processing will have little effect. He will not cease to be a drug addict. The drugs trap him.

When the world went druggie (about 1960), this problem of drying out became one of the first order. It was not just a problem to us. All pre-Scientology efforts failed—and had been failing for all Man's history. But relatively small numbers had been involved. After 1960 the problem became planet-wide.

Our first organization to handle this was Los Angeles. They made the person cease to take drugs for 6 weeks, then audited the drugs out. Most of these cases stayed stable and thereafter had case gain and were no longer condemned to an eternity of disability.

However, some were unable to stop taking drugs.

What is called WITHDRAWAL SYMPTOMS set in. These are the body and mental reactions to no longer taking drugs. They are ghastly. No torturer ever set up anything worse.

The patient had this problem then:

- A. Stay on drugs and be trapped and suffering from here on out.
- B. Try to come off the drugs and be so agonizingly ill meanwhile that he couldn't stand it.

This was a dead if you do, dead if you don't sort of problem.

Medicine did not solve it adequately. Psychotherapy was impossible.

Two approaches now exist to this withdrawal problem.

1. Light objective (look outward, take attention off body) processes ease the gradual withdrawal and make it possible.
2. Nutritionist experiments indicate that vitamins assist the withdrawal.

Objective processes are covered elsewhere in this material.

## VITAMIN THERAPY

According to world-renowned nutritionist Adelle Davis, vitamin therapy has had success in handling Withdrawal Symptoms.

Instead of just telling the person to break off drugs with all that suffering and danger of failure, the patient is given heavy doses of vitamins. The data is repeated here for information.

## DRUG BOMB ONE DOSE

1,000 mg of niacin amide (*not* nicotinic acid as it is severely toxic in such amounts). This for any mental disturbance.

500 milligrams of magnesium carbonate (to make the Vitamin C effective).

2,000 milligrams of Vitamin C.

25 milligrams of B6.

200 milligrams of B Complex.

100 milligrams of pantothenic acid.

## ADMINISTRATION

The bomb is given four times a day, roughly every six hours.

It is given in a mild preparation that furnishes intestinal flora such as yoghurt.

GREAT CAUTION must be used to give the dose in such a way that the vitamins will not corrode the stomach. If this is neglected the patient can be given a false duodenal (upper intestine) ulcer and will be unable to continue the treatment. Druggies are usually in terrible physical condition anyway. Thus all the above would have to be in "enteric coated" capsules, meaning an intestinal shielding must be on the pills so they gradually dissolve and don't hit the sensitive upper stomach hard enough to corrode it.

Thus milk with powdered amino acids in it would have to be given to wash the pills down.

In testing these recommendations stomach corrosion from the bomb was the main barrier noted.

If the bomb is given without any cushion the patient can (a) feel too full after eating (b) have a stomach ache (c) have a burning sensation (d) the exterior of the stomach can get sore. These are all stomach ulcer symptoms.

If such symptoms turn on, end off the vitamins. Aluminum hydroxide tablets chewed up and swallowed in milk each time the symptoms start will ease the stomach. Amino acids, intestinal flora and milk must then be given until the stomach gets better.

Shots, with a needle, especially of Vitamin C can be too painful. Not the needle, that's nothing; but the vitamin itself.

Such medication is in a crude state of research, mainly because of the violent hostility earlier exerted against vitamin people by the American Medical Association and other reactionaries to anything beneficial or new.

It is hoped that the stomach corrosion factor can be lessened by new preparations which do the same thing but less violently.

I am not particularly advocating the use of the Drug Bomb but as a pioneer in this area of research I feel that any data of value on the subject of drug withdrawal should be widely published.

The difficulties and agonies of withdrawal are the primary failure point in trying to salvage a being from the insanity of drugs.

#### SUMMARY

People who have been on drugs do not make case gain until the drugs are handled in processing.

Processing such as Dianetics is not effective when done on a person who is taking drugs.

Withdrawal from drugs sometimes sets up a violent physical reaction too painful or depressing to be continued and the person goes back on drugs.

Anyone on drugs or who has taken drugs is doomed as a being just like that. He or she will cave right on in and finish up in the ash can from here on out.

*Only* processing by Dianetics and Scientology can handle the effects of drugs fully. No other technology, medical or biochemical, has ever helped—we have thousands of cases to prove this completely.

The primary barrier to processing is getting the person off drugs and keeping him off until he can be fully audited. Then he will be very okay.

Two means to do this are known—A. Light objective processes while “drying out” and B. Nutritional therapy.

A and B can be combined.

Neither A nor B will fully handle drugs. The person on vitamins if not processed will relapse.

Vitamins are not drugs. They are nutrition. A person can be processed while on them.

By close application of these principles the person can be salvaged.

And having been salvaged can go on up to greater freedom and ability.

He won't make it otherwise by any other known technology.

**AUDITOR FAILURE TO UNDERSTAND**

(Edited from HCOB 17 Oct 1962  
for use on the HQS Course)

If a pc says something and the auditor fails to understand what the pc said or meant, the correct response is:

“I did not (hear you) (understand what was said) (get that last).”

To do anything else is not only bad form, it can amount to a heavy ARC break.

**INVALIDATION**

To say “You did not speak loud enough\_\_\_\_\_” or any other use of “you” is an invalidation.

The pc is also thrown out of session by having responsibility hung on him or her.

The *Auditor is* responsible for the session. Therefore the auditor has to assume responsibility for all comm breakdowns in it.

**EVALUATION**

Far more serious than invalidation above, is the accidental evaluation which may occur when the auditor *repeats* what the pc said.

NEVER repeat anything a pc says after him, no matter why.

Repeating not only does not show the pc you heard but makes him feel you're a circuit.

The highest advance of 19th Century Psychology was a machine to drive people crazy. All it did was repeat after the person everything the person said.

Children also do this to annoy.

But that isn't the main reason you do *not* repeat what the pc said after the pc. If you say it wrong the pc is thrown into heavy protest. The pc must correct the wrongness and hangs up right there. It may take an hour to dig the pc out of it.

Further, don't gesture to find out. To say, pointing, “You mean this item, then,” is not only an evaluation but a nearly hypnotic command, and the pc feels he must reject very strongly.

Don't tell the pc what the pc said and don't gesture to find what the pc meant.

Just get the pc to say it again or get the pc to point it out again. That's the correct action.

**SUMMARY**

A very high percentage of ARC breaks occur because of a failure to understand the pc.

Don't *prove you* didn't with gestures or erroneous repeats.

Just audit, please.

Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 29 OCTOBER 1971 R  
REVISED 14 MAY 1974

Remimeo  
Auditors Class  
IV & Above  
C/Ses  
Int R/D  
Checksheet

**INT RUNDOWN CORRECTION LIST  
REVISED**

PC \_\_\_\_\_ DATE \_\_\_\_\_

PC GRADE \_\_\_\_\_ AUDITOR \_\_\_\_\_

The purpose of this list is to correct an unflat, overrun or otherwise messed up Int R/D which now has the pc's TA either high or low.

The list is used:

- (a) When a repair list with the subject of INT-EXT on it reads, and the Int R/D has already been done or corrected and the TA is high or low.
- (b) When a bog occurs in the Int R/D itself.
- (c) If the pc is upset after the Int R/D, and/or TA has gone high or low.

Assess this list once through noting reads (Method 5).

Take all reads to F/N or get the reading item fully repaired to F/N. This list is laid out in the sequence the reads are to be handled. Suppress and False can be used as needed to take a question to F/N. Handle each read to F/N, do not go on to another question leaving one that has not F/N'ed.

R-FACTOR. We are going to do an assessment concerning your Int R/D. (If pc does not understand this R-Factor clear up what the Int R/D was as he may not have recognized it.)

1. THE INT R/D WAS ALREADY FLAT. \_\_\_\_\_

Indicate it. Date/Locate.

2. THE INT R/D WAS OVERRUN. \_\_\_\_\_

Indicate it. D/L the flat point.

3. THE INT RUNDOWN WAS ALREADY FLAT AND NEED NOT HAVE BEEN RUN. \_\_\_\_\_

Indicate it. If no F/N, D/L it.

4. THE INT R/D CORRECTION LIST WAS OVERDONE. \_\_\_\_\_

Indicate it. If no F/N, D/L the point he felt his Int R/D was repaired.

5. THE INT R/D IS UNFLAT. \_\_\_\_\_

Find out what chain/flow is unflat, repair with an L3RD. Verify the remaining flows and chains.

6. SOME PART OF THE INT R/D WAS MISRUN. \_\_\_\_\_  
 Indicate it. Find out what, handle with an L3RD on any messed up chains/engrams.
7. ON THE INT R/D A CHAIN OR INCIDENT WAS LEFT UN-FLAT. \_\_\_\_\_  
 Indicate it. Find out which one(s), handle with an L3RD.
8. YOU DIDN'T RUN GO IN. \_\_\_\_\_  
 Sort it out. Find out what he did run. Handle any confusions. If it is established that he didn't run "Go In" and the R/D is *not* already flat or unnecessary, handle the remaining reads on the correction list. Then check "Go In" and "Went In" for read. If either read run the Int R/D properly. *Do not run if "Go In" or "Went In" don't read.*
9. YOU CAN'T GET IN. \_\_\_\_\_  
 If so, L&N to BD F/N item "Who or what was afraid to go into things?" Then "What did (item found) do?" "What did (item found) withhold?" to F/N and a blow.
10. YOU WERE CONFUSED ABOUT SOMETHING. \_\_\_\_\_  
 Indicate it. Find out what. Sort it out fully.
11. A WORD WAS MISUNDERSTOOD. \_\_\_\_\_  
 Indicate it. Find out which one. Clear it to F/N.
12. YOU WERE THINKING OF LEAVING DURING INT. \_\_\_\_\_  
 Indicate it. 2wc E/Sim to F/N.
13. YOU WERE LEAVING A POST. \_\_\_\_\_  
 Indicate it. 2wc E/Sim to F/N.
14. YOU WERE TRYING TO GET A POST. \_\_\_\_\_  
 Indicate it. 2wc E/Sim to F/N.
15. ANYTHING TO DO WITH JAILS. \_\_\_\_\_  
 2wc E/Sim to F/N.
16. ARE YOU WANTED ANYWHERE. \_\_\_\_\_  
 2wc E/Sim to F/N.
17. YOU ARE AFRAID THAT IF YOU GET OUT YOU WILL CAUSE DAMAGE. \_\_\_\_\_  
 2wc E/Sim to F/N.
18. LETTING YOU OUT WOULD BE AN OVERT. \_\_\_\_\_  
 2wc E/Sim to F/N.

19. YOU FAILED TO GET OUT IN AN EARLIER RELIGION OR PRACTICE. \_\_\_\_\_  
 Indicate it. 2wc E/Sim to F/N. Note for C/S to handle earlier practices on pgm.
20. YOU HAD AN OUT LIST. \_\_\_\_\_  
 Indicate it. Find out what it is and handle with an L4BR.
21. THE R/D WAS DONE OVER AN ARC BRK PROBLEM, W/H, OVERT \_\_\_\_\_  
 Indicate and handle each reading one to F/N.
22. THE R/D WAS DONE OVER SOME OTHER BPC. \_\_\_\_\_  
 Indicate it. Find out what it is and handle to F/N.
23. THERE WERE AUDITOR ERRORS. \_\_\_\_\_  
 Indicate it. Sort it out and clean up BPC. Use L3RD if engram errors or L1C as necessary.
24. THERE WERE ERRORS ON ENGRAMS. \_\_\_\_\_  
 Indicate it. Handle with L3RD.
25. YOU ARE WORRIED BECAUSE INTERIORIZATION CONTINUES TO READ. \_\_\_\_\_  
 Indicate it. 2wc E/Sim to F/N.
26. YOU ARE CONCERNED BECAUSE YOU HAVE TO BE REVIEWED. \_\_\_\_\_  
 Indicate it. 2wc E/Sim to F/N.
27. YOU JUST MOVE BACK INTO THE BODY AND PUSH AGAINST IT. \_\_\_\_\_  
 Indicate it. 2wc on doing this E/Sim to F/N.
28. THERE IS SOMETHING ELSE WRONG. \_\_\_\_\_  
 Indicate it. Find out what it is and handle.

### **TRIPLE GRADES vs EXPANDED**

On 12<sup>1/2</sup> hour intensives, cease to run Triple Lower Grades. They are not true lower grades and pcs seldom make the factual EP.

Advance Programs should contain Expanded Lower Grades, Triple.

QUICKIE LOWER GRADES (also called "Triple Grades") means one F/N for each of three flows or 3 F/Ns per grade.

There are not just 3 F/Ns per grade. There are dozens of F/Ns.

Also, do not rob Expanded Lower Grades of processes in order to do Repair Programs or "Special Intensives".

Follow the Grade Chart.

If you need extra processes use *The Book of Case Remedies* and those *Creation of Human Ability* processes not used in standard rundowns.

HCO BULLETIN OF 3 NOVEMBER 1971

Remimeo

Re-issued 6 November 1972 as

*Auditor Admin Series 15*

*C/S Series 66*

**AUDITOR'S WORKSHEETS**

A very fast way for a C/S to do himself in is to fail to insist on GOOD LEGIBLE HANDWRITING.

When a C/S has auditors who can't write well and rapidly, he gets misunderstood words when he tries to read the worksheets.

One temporary solution is to make the auditor block print the word in red above each hard to read word. Some auditors go to an extreme of block printing the whole WIS.

The more permanent solution is to have Auditors in Cramming practice writing WELL and CLEARLY no matter how slowly and then, maintaining the same clarity, speed it up. The auditor after many such practice sessions winds up writing clearly and fast. This can be increased until an auditor can write clearly as fast as people talk.

The occasional headaches a C/S might get are not from the restim of the case he's studying but are from the words on W/Ses he can't make out.

If a C/S does not insist on both block print clarification *and* auditor writing practice, he will wind up not reading worksheets and may even get foggy about certain cases.

A remedy is to go back to the first folders not understood and get the words clarified and then keep this C/S Series HCO B IN.

L. RON HUBBARD  
Founder

PS: In the 19th Century secretaries wrote beautiful copperplate longhand faster than a man could talk. So don't say it can't be done.

*URGENT*

*Word Clearing Series 25R*

*Tape Course Series 6R*

**TAPES, HOW TO USE**

(Reissued 23 November 1971 verbatim  
additionally as a Tape Course Series HCO B.)

FOREWORD

The most appalling ignorance has existed on the use of magnetic recording tapes.

It is therefore of the greatest possible importance that the subject of tape use be grasped and gotten rapidly into effect.

Probably half the technology of admin and tech exists only on tape.

Tapes, incorrectly used, can be the source of endless misunderstands. Because tapes have been almost uniformly misused in the past, these misunderstands have added up to a general misunderstood on the subject of tapes themselves.

Students have been known to copy down the whole tape so they could study it. This is a complete waste of time and misuse of student study hours.

Some orgs even played advanced study tapes to the public.

European orgs have even played translation quality tapes (usually not auditorium quality) of OEC Volumes as raw public lectures! (And lost their audience through lack of quality and inaudible and strange words.)

Casual staff briefing tapes, not okay for release, of very bad quality, have been played to staffs of other orgs and the public.

There is no end to the abuses.

Therefore, for the benefit of understanding words alone, it is VITAL that tapes be properly used and not abused.

TYPES OF TAPES

There are four classes of tapes. These are:

1. Course study tapes.
2. Public lecture tapes.
3. Briefing tapes.
4. Model performance tapes.

## COURSE STUDY TAPES

Tapes made for courses are of two varieties:

- (a) English, usually by LRH.
- (b) Translations, done by translators.

They are FOR COURSE USE. This is what the org sells—training on Tech or Admin.

These tapes appear on checksheets and are done at the points of checksheets where they are called for, and are done by Method 2 for tapes or Method 3 for tapes as required.

The foreign language tape courses are done from a special tape checksheet and are done exactly as laid down by Method 2 or Method 3.

None of these tapes are all written out by the student and then studied. This is a waste of time.

Further, such tapes are NOT played straight through with the student making notes of any misunderstood words “to look up later”. This will blank out the tape content on the student’s mind and knock out the student.

So to play a course tape straight through to any student is to risk a stupidity and a blow. IT IS NOT DONE. It does not matter whether the student takes notes of misunderstands or not. A COURSE TAPE IS NOT PLAYED STRAIGHT THROUGH. Only the earphone, footpedal start-stop control procedures are used.

A course tape is NEVER PLAYED TO A GROUP OF STUDENTS. When played to more than one student, *some* student is going to get a misunderstood and there goes a blank student.

Two students don’t even listen to a tape even on Method 2 Tape Word Clearing! One has the meter and footpedal and the other the earphones. The word clearer stops at each read. He does not otherwise listen.

Course tape quality must be good. All the words must be hearable and not inaudible. They must not be slurred or hard to make out.

The earphones and tape player used must be high fidelity just any old earphones won’t do.

The tape player “playing head” across which the tape passes must be clean—done by a cotton swab on a toothpick and cleaning fluid. The tape coating comes off on the playing head and after a time the sound is badly blurred.

Using a course tape any other way is now FORBIDDEN. Tests have shown that violations of this are the reason for student failures and blows and out-Ethics.

It goes without saying that the general handling of tape players and tapes must be well learned and practiced by Course Supervisors and students.

## PUBLIC LECTURE TAPES

The probable reason stats fall after tape congresses is the misunderstood word.

Congresses seldom use really high fidelity equipment. Further, tape copying is often done by outside firms and the tape copies themselves may be of poor quality. The combination is deadly.

We looked for the reason for stat drops after tape congresses and this is the only explanation which has come forth.

Doingness congresses that are mainly seminars have been very successful. (By doingness is meant TRs—training drills—and other ACTIONS.) The relay of data to a public whose vocabulary is usually inadequate is not likely to win, as it hits their faulty vocabulary for one thing and uses new words for another. You can *show* somebody how to do things far better than you can tell him.

This then extends into Div 6 Introductory Actions as well. The relay of data comes AFTER the demonstration in action terms.

The possibility of possible bad playing speakers, possible low tape copy quality, the barriers of languages not learned in the first place and the introduction of new mental concepts combine into a hurdle that makes tape or film public presentation adventurous.

Listening to public type tapes, by using footpedal start-stop tape players, is being put in a special public course category.

*Raw public tape and film presentations are however a must to keep the flavor and meaning of Dianetics and Scientology. So ensure excellent quality tapes and equipment are used with correct tapes for that public and you will have success.*

### BRIEFING TAPES

These are not to be confused with Special Briefing Course Tapes.

A briefing tape is done to brief or debrief missionaries or to record a conference or to record special instructions to a person or group. It can then be used for reference or to settle any dispute. It can also be used to inform a staff or several staffs.

A briefing tape is then a tape designed for a special and informed audience.

If the tape quality is good and the audience is already a familiar or trained audience, a briefing tape can be played ONLY TO THE AUDIENCE FOR WHICH IT WAS INTENDED.

To do otherwise is to risk misunderstood words and non-comprehension of what it is all about in general.

“Ron’s Journals” were *staff* briefing tapes. They began to be used for public. While they were not without success, one could no longer brief staffs on this line and the line was therefore cut. One could not make them with a security that they would be played to staffs.

An isolated briefing to a single executive on “these are our future hopes” has been thereafter used as a staff briefing of many orgs as “these are your orders”.

Any tape is designed for a specific public.

Briefing tapes are especially subject to abuse by being played to wrong publics.

Any briefing tape which contains specific orders and plans which could be misunderstood should be played only to the individuals concerned with a stop-start footpedal and Method 3 Word Clearing, not going past any misunderstood.

After a person has been briefed verbally, it is very revelatory to then Word Clear 2 the tape made at the same time. It will often be found that misunderstood words lead to potential alter-is in the actions required.

Tape in this instance is an enormous help in assisting and clarifying briefings.

A group can be briefed if thereafter each is Word Cleared Method 3 or 2 on the *tape* afterwards, using standard tape word clearing.

Needless to say such tapes must be of good quality.

### MODEL PERFORMANCE TAPES

Tapes exist which give a standard of performance.

In Dianetic and Scientology Auditing student auditors have never been known to achieve a high standard of session presence and Communication (and accordingly high results) without the careful study of tapes made of similar sessions by high level auditors.

A student musician is unlikely to achieve professional performance level unless he has heard a professional play.

It would take a film or live demonstration to communicate a high standard of performance in a purely action subject. For instance for centuries no one believed that Robin Hood could split his first target arrow with a second until a new generation worked on it and a few painfully recovered the lost art of archery and then demonstrated how it was done for others to *see*.

Tapes and films serve a vital purpose in maintaining a performance standard.

As these tapes and films show HOW it is done and the ATMOSPHERE and RHYTHM of ACTION they are not subject to word clearing.

### CONCLUSION

Tape and film training is vital, valuable and has its role.

But like showing a child how to open a book and read, there is exact technology in USING tapes and films.

The first thing one must realize is that the use of tape and film is itself a technical subject that must be studied and learned. One does not naturally know it.

The failures of universities to make educated and civilized men is because their own professors know nothing of misunderstood words and so lectured happily on and on to a snoring student body. One professor of physics used to open the classroom windows wide in freezing winter "to keep his students from going to sleep in HIS class". And then stood on the platform and defined nothing as he rambled on. All it did for his class was give them coughs between snores!

The handling and use of tape and film in training and administration IS a subject.

By failing to know it and use that information, one can block the road for himself and all others to being learned and being free.

HUBBARD COMMUNICATIONS OFFICE  
Saint Hill Manor, East Grinstead, Sussex

Add to E-Meter  
Books Studies  
Checksheets

HCO BULLETIN OF 12 NOVEMBER 1971 R  
(Revised 6 March 73. Only change is addition  
of the word "cold"—first para.)

**FALSE TA ADDITION**

(Refers and adds to HCO B 24 Oct 1971  
"False TA")

**COLD CANS**

Regardless of can size, cold E-Meter electrodes tend to give a much higher Tone Arm reading particularly on some pcs.

Until the cans warm up, the reading is generally false and is false in the direction of high.

A chilled pc almost always has a high TA until he or she gets warm. Just throwing a coat over the pc's shoulders can bring down a TA in a cool room. But some pcs are "cool blooded" and the shock of ice-cold cans can drive the TA up and it takes a while to drift down.

This has a great effect on Examinations where the cans are used very briefly.

A practice which gets around this is for the auditor or examiner to hold the cans briefly until they are warm and then give them to the pc. A variation is for the auditor or examiner to put the cans under his armpits while setting up. This warms them.

There are probably many other ways to warm up cans to body temperature.

**FOOTPLATES**

Tests show that footplates do not give exactly the same read as hand-held electrodes on pcs who have nothing wrong with their hands.

This is probably due to body imbalances. Cans held under the armpits or under knees (not advised as there sometimes is a tiny electrical sting) give varied reads from hand-held cans.

Where full weight rests on the footplates the read is also varied.

To all practical purposes the differences can be neglected unless they give trouble in getting F/Ns. One should simply be alert in using footplates and find out the differences if new problems of false TA or no F/Ns develop and handle any such trouble when it occurs. A person used to going barefoot for instance would have foot calluses and would give a false footplate TA.

**PCS WHO FALSIFY**

Some pcs (rare) take mistaken pride in being able to push the TA up by straining or tensing.

By just moving into the body the TA can be sent up by an otherwise exterior pc.

Some pcs also take a road out by "getting an F/N at will". They have various tricks that do this, the main one being to "think of something else" and get an F/N. Any of these (rare) pcs are manifesting out-of-sessionness. They aren't in session. The definition of In session is "interested in own case and willing to talk to the auditor". Remedy that and they cease such tricks.

Usually they aren't being run on what they are interested in or have comm blocks or withholds or no confidence.

They are easy to detect and easy to handle.

*(Revises HCO BULLETIN OF 20 AUGUST 1971  
Issue 1)*

**HAS SPECIALIST AUDITING PROGRAM (Revised)**

(Reference HCO PL 20 Aug 71,  
Issue I, "HAS TROUBLES")

*(This Program has been revised to  
improve results and stability.)*

The HAS (HCO Area Secretary), any HCO Executive Secretary, HCO Cope Officer, HCO Org Officer, Tech Establishment Officer, any HAS Deputy OR any Executive or Divisional Head or staff member who shows a tendency to transfer or destabilize staff members or who fails to hat others, must be processed especially in order to be totally stable on post.

The HAS and Establishment Officers are peculiarly subject to efforts to destabilize them. These require the Program to be done in any case whether stable or not.

Executives or staff members who show signs of obsessive transfer of the staff or org are also greatly benefited.

The HAS Specialist Rundown consists of processes which increase the ability to hold a position.

THE RUNDOWN MAY ONLY BE DONE WHEN NO EXISTING AUDITING PROGRAM IS ONLY PARTIALLY DONE. COMPLETE THE EXISTING CYCLE FIRST.

HAS SPECIALIST PGM

- Action 1. Do C/S Series 53 and handle. \_\_\_\_\_
- Action 2. GF Method 5 Handle. \_\_\_\_\_
- Action 3. TR COURSE to full EP. \_\_\_\_\_
- Action 4. ADMIN TRs OR UPPER INDOC if ADMIN TRs not available. \_\_\_\_\_
- Action 5. GF 40XR Method 3. \_\_\_\_\_
- Action 6. C/S Series 54 and handle. (Includes GF 40 engrams.) \_\_\_\_\_
- Action 7. CCHs. (Run or verify and rehab.) \_\_\_\_\_
- Action 8. Hold It Still. (HCO B 23 July 71, Version B.) (Run or verify and rehab.) \_\_\_\_\_
- Action 9. Start—Change—Stop (SCS) on an object. (Run or verify and rehab. ) \_\_\_\_\_
- Action 10. Start—Change—Stop. (Run or verify and rehab.) \_\_\_\_\_

- Action 11. Op Pro By Dup (Book and Bottle). \_\_\_\_\_  
(Run or verify and rehab. )
- Action 12. Effort Processing. \_\_\_\_\_
- Action 13. Rising Scale. \_\_\_\_\_
- Action 14. Verify Int RD, run if not run in No.1 or date to blow  
locate to blow if not done. \_\_\_\_\_
- Action 15. Fly all ruds and overts recently. \_\_\_\_\_
- Action 16. Program for further auditing in own org on Grade Chart. \_\_\_\_\_

\_\_\_\_\_

Caution: Do not repeat Processes already done on the pc.

PACK: HCO B 20 Nov 71 (*Revising HCO B 20 Aug 71, Issue II, Checklist*) is auditor's checksheet for the above, giving all materials. It is done by Tr and Serv Aide. Packs can be locally assembled or procured from CLO A/CS-2. Most of these materials occur in Level I PABs SHSBC.

*Tape Course Series 1*

**COURSE TRANSLATION TO TAPE**

(HCO Policy Letter of 16 November 1970  
Revised and Reissued as an HCO Bulletin.

*(Changes in this type style. )*

Translating Dianetic, Scientology study materials into foreign languages is inexpensively and effectively done by using "sight" (instantaneous) translation of bulletins, policy letters and tapes onto tapes.

The tape original is made, a copy master is made and thereafter copies can be run off for courses which can be attended by students, using only excellent tape copies and excellent reproduction equipment, *and listened to with high fidelity earphones. Word Clearing Technology is used to prevent the student losing interest because of misunderstood words*

*The tape players used must be equipped with a foot pedal start-stop control.*

The voice of the "sight" translator should be clear and the diction should be sharp and the tone should not be monotonous.

A "sight" translator is one equally good in 2 languages who can hear one language and speak the translation into the other language without hesitation. (They are employed in the UN.)

The material copied onto tapes can also be broken down into smaller reels for independent study.

By taking exact notes of the "auditing commands" and important rules the student will have the texts he needs for later reference.

The exact rundown of this is given:

In translating the materials of a course from a textbook or materials in one language to another, the following steps are taken.

*PRIMARY TARGETS:*

1. A person fully competent in both the languages and their cultures is found and retained.
2. The materials to be translated are made available.
3. A tape recorder which can be started and stopped easily without leaving clicks on the tape is procured. (Not a dictation machine.)
4. An adequate supply of regular recording tape is made available.
5. Other materials such as paper and ball-points are made available.
6. A quiet place where interruptions and outside noises will not ruin the tapes is found and the person is set up there.
7. A person knowledgeable in the subject and the language in which the original is written is retained and assists the translator.

### OPERATING TARGETS:

1. The translator (using *Word Clearing Technology* and a dictionary to clear up any misunderstandings) rapidly reads or goes through the materials to get a general grasp of the subject.
2. The technical assistant who knows the subject and the original language now goes through the materials with the translator. Every technical word or phrase or cultural idiom is underlined.
3. While underlining, the two persons decide on the correct translation of the technical word or phrase.
4. As these are decided, they are written down on note paper with a complete definition.
5. Each word, phrase and definition is translated into the language and written down on a separate sheet of paper.
6. The translated words, phrases and definitions will become a mimeographed glossary for the eventual student.
7. Each section and paragraph in the material is numbered.
8. With this glossary to hand, the translator now begins direct translation of the text onto tape. The number of the tape and its materials is given at the beginning of each tape used or new chapter begun.
9. The translator must be sure to read the materials in an interested voice and not let any hesitation or note of mystery creep in. The translator is actually lecturing and must sound so.
10. When the materials are complete, good production masters are copied off of the master tape. The master tape is set aside and not used further.
11. The production master is now cut into chapter lengths which are numbered the same as the book chapters.
12. Several sets of the Chapter Copies are now made and put in their boxes. Both tracks can be used. Even 4 tracks (not stereo) can be used.
13. The glossary in both the original language and the translated language is printed up along with course directions (which are described in another technical paper). *The checksheet and course rules are also translated and printed in the local language.*
14. The course is boxed in sets with the glossary and course directions.

Following this system one can rapidly produce sets of materials without the delays always experienced in printing as well as with cost reduction.

*The tapes are listened to on individual tape players equipped with earphones and a foot pedal start-stop control so the student's hands are free for taking notes and looking up words in the dictionary, etc..*

Learning rate in an aural society is much higher than in a society accustomed to print.

Even an illiterate person or a slow reader can be taught such a means.

A dictionary in the translated language must also be available in a classroom.

The quality of the translator's voice and clear diction are highly desirable.

*Tape Course Series 2*

**DIANETICS AND SCIENTOLOGY  
IN OTHER LANGUAGES**

(HCO Policy Letter of 11 May 1971  
Reissued as an HCO Bulletin)

Tapes and book translations of Dianetics and Scientology are being made into other languages than English.

It is necessary to know the MINIMUM materials an org in a non-English speaking country would need to function.

It is not enough to have one book published. It creates a demand for services. The demand for service must be met. An HAS Course in the language is not enough since it is not income producing. Thus the org could not survive financially. It must survive financially to deliver the service.

Even in a total socialism the service would have to be given.

Giving service depends on an org having the means of training auditors who can audit well and establishing the organization. Then the org could audit preclears as well as train more auditors.

If the auditors who are trained can audit well, they will produce excellent results and public repute will spread.

An org must *produce* to survive. By production is meant training auditors who can audit, auditing pcs to a good result and making money, or in a total socialism, obtaining adequate support in ratio to production.

If an org just teaches an HAS Course or tests people, it will not be able to survive for it will not be able to obtain enough funds or support. For this it is vital to train lots of auditors and audit lots of pcs.

Without its staff knowing the basic data of organization, the org will have difficulties in giving service. The technology of administration is important.

Thus we get the MINIMUM materials in the language vital to an org's survival:

PRINTED MATERIAL

The book DIANETICS: THE MODERN SCIENCE OF MENTAL HEALTH printed with hard covers in the language is vital.

When members of the public read it and take an HAS Course they want training or processing or both.

This book placed in bookstores, advertised in magazines, and sold by Field Staff Members and the org itself not only reaches the public but also in hardcover form pays for its own distribution. As a paperback it does not pay for itself.

To this add testing materials printed in the language for intelligence and personality testing and their marking directions.

### RECORDED TAPES

Recorded tapes and tape *players* in the org to play to individuals in classes is the easiest form in which to deliver data.

From such tapes students may take notes.

As time goes on the tapes will be transcribed and the material printed or mimeographed. (*This is not to be done by the individual orgs.*) It will be found however that tapes will always be necessary even when some is printed as the volume of data is very great.

Students should not be permitted to print copies of their notes and sell them as time has shown that such notes are not accurate enough and spread errors that show up in training and auditing failures.

In reviewing, a student must be sent back to the original, not to his notes, so he can correct his notes and get the data accurately.

Nearly all no-results are traced to altered data or poor training of the student, which amounts to the same thing.

The MINIMUM list of tapes is:

1. Mini Course Supervisor Hat
2. HAS Course
3. HDC Course
4. Academy Courses Levels 0 to IV
5. *Original Thesis*
6. *Notes on the Lectures*
7. Hat of a Scientologist
8. Staff Status I
9. Staff Status II
10. A Translated Org Bd

---

Given these bare essentials and teaching them *well* and using them will give an org sufficient survival to deliver results.

If every bit of the above is known and used by a staff they will not have too much trouble.

Set up and functioning and solvent, an org can then think about further materials.

Class VI, a Class VII, a Class VIII and a Class IX Course materials on tape should exist in a Saint Hill org in the language of that country.

For the org itself a Volume Zero of the OEC Course should exist on tape.

After that the full Course Supervisor's Course should exist.

Then further books such as *Dianetics '55!*, *Science of Survival* and *The Creation of Human Ability* should come out as tape and then in published hardcover form.

The full OEC should now be acquired on tape.

The full Study Tapes should be to hand.

The org will now be ready to use all the FEBC series and the FEBC tapes.

---

The hardest idea for an org staff to get is the idea of production in terms of auditors trained who can audit, pcs audited to excellent results and money or support produced to keep the staff members and the org solvent.

Because of this it is best for 2 or more bilingual executives to attain full FEBC training.

However, with the above minimum materials fully studied and in use, an org can survive until it is ready to prosper.

---

Note, at this writing many are working hard to complete the listed materials. They are not yet available in all languages.

There is only one other type of item needed by an org and that is the E-Meter. Supplies of these must be arranged for. A country running in very high volume will probably manufacture its own meters against an exact prototype under existing international patents.

#### ON SOURCE

It will be found in all countries where Dianetics and Scientology and orgs have been successful that a key part of the success was keeping the subject "on source".

The public at once distrusts persons or groups who alter the materials or "use some of them" or attribute them to others. This is quite factual and the public is right.

All great and lasting successes have been made by orgs that were on source and whose materials were straight and correct and used that way.

*(Revisions in this type style)*

***Tape Course Series 3R***

**TEACHING A TAPE COURSE**

(HCO Policy Letter of 6 December 1970,  
Issue II, Revised and Reissued as an HCOB.  
Changes in this type style.)

The instruction of students by tape is done by individual tape playbacks equipped with earphones and a foot pedal start-stop control.

It is imperative that the earphone quality be of the highest, and the tape copy have very good sound quality. Otherwise students go to sleep over misunderstood words.

The individual tape player method is used because (a) it can handle a large or small number of students, (b) it works where there is a trickle of students starting at different times, (c) it works where students studying subjects different from each other are using the same classroom. It takes more tape players and must be earphone equipped but it prevents students going past misunderstandings as can occur if they are all listening to a group tape play.

The foot controlled start-stop pedal is necessary so the student can use his hands freely to take notes and look up words in the dictionary. It also enables the tape to be stopped instantly without the time lag it takes to reach for and push a finger button—thus going past the place where the stop is desired.

**RULES & DESCRIPTION**

Only the Glossary, course rules and checksheets, with course description are translated into the language being used for teaching and mimeographed or printed into small booklets.

The description must include how to handle tape players and caution against machine or tape damage and inadvertent erasure of a tape. (To guard against actual erasure it is wisest to tape over the record button or preferably, to have the recording unit disengaged. Also, it is sometimes possible to buy, at cheaper prices, playback units only (tape machines in which the recording unit hasn't been installed). They must however be of good quality.

**ENROLLMENT**

Enrollment is done no matter how informal the course is. A waiver of accident or damage holding the school not responsible, must be signed by the student and, if a minor, by his parents or guardian on any tape course.

An enrollment invoice showing full course payment must be in the hands of the supervisor, giving the date of enrollment, home address and local address.

A roll book has every student's name, address and the course enrolled in and date. This must not be omitted as it is the only permanent record and is often resorted to to prove contentions.

#### FILES

A student file system must exist. A folder with the student's name on it and which will receive his completed checksheets, exam results, etc, must be made up at once.

#### CHECKSHEET

A checksheet for the course must exist, breaking the course down into small easily attained segments of Theory and Practical.

It must be in the student's language.

It has blanks opposite each segment so that a student checkout can be initialed with date by the person checking him out.

#### NOTEBOOKS

A student is expected to keep a notebook from his tape listening. This should be neat and complete. The student never copies out the whole tape. He takes exact verbatim notes of any Process Commands or Lists and notes down also the important technical rules.

A sample notebook should be provided.

A student should leave frequent spaces so he can enter new notes on a second and third play of the materials.

#### CHECKOUT

Where only tapes exist *and a checkout is required* students check each other out from the *actual tape, not from their notes.*

"Give me an example," is the keynote of such a checkout. (a) What is the , (b) Give me an example.

#### PRACTICAL

Each area of the course has demonstration and practical drills.

These drills must be written up and must match the basic personal skills required by the materials.

#### CLAY TABLE

Clay table training is a vital part of the Course curriculum.

The materials must be available.

And clay, not just modelling clay, can be used.

Flat surfaces must be provided.

The description of clay table training must be part of early checksheets in the school.

## DEFINITIONS

A student is drilled and does clay table on the glossary after he has been through the course once.

### CHECKSHEET SEQUENCE

*The student is required to go in sequence through the entire checksheet HCO PL of 31 August 1974, Issue II, "Fast Flow Training Reinstated", applies to Translated Tape Courses.*

*The checksheet is arranged double-spaced for Tape Counter Reading, date and initial in the first of the three columns.*

*For example:*

"Tape Counter

Reading Column

*Retread*

*Retrain*

1. *Chapter III—The  
Goal of Man*        \_\_\_\_\_        \_\_\_\_\_        \_\_\_\_\_ ”

### COURSE COMPLETION

*See HCO PL 31 August 1974, Issue II, "Fast Flow Training Reinstated"*

### PROGRESS BOARD

A student's progress is posted on a "progress board".

### SLOW STUDENTS

Any student falling asleep or being very slow is handled with Word Clearing which is the subject of the Word Clearing Series Bulletins and later issues in these Tape Course Series Bulletins.

## RESISTIVE CASES

### FORMER THERAPY

Hypnotism, “psycho” analysis, “psychiatry” and other implant type therapies often key in and jam the track.

These characters here, on any other planet and on the whole track *dramatize* implanting. The “therapy” involved would be a temporary relief brought by suggestion.

The wrong data of the “science” itself operates as a whole track lie. Getting well or able depends on establishing truth. These “scientific” lies are alterations of actual laws.

We often note electronics men have a rough case time. This traces to the lies Man uses for his “electrical science”. As the subject is based on false assumptions, it itself tends to aberrate.

Therefore we get out of the road any former “therapy”. We can rehab any moment of release in it, handle any overrun, etc.

We also do a New Style Remedy B to get old therapies spotted and run back.

The only cases which hang up are:

1. Unaudited cases (lies about grades, etc).
2. Drug cases (who seek in processing the delusions or madness which exhilarated them on drugs).
3. Former therapy cases. (In this or past lives.)
4. Out of valence cases.
5. Cases who continue to commit overts on Scn.
6. Cases “audited” with their ruds or grades out.
7. Seriously physically ill cases (where the illness makes too much PTP in PT).

Of all these the former therapy case is apt to be the roughest as any *auditing* session can be reactively mistaken for the “treatment”. The next roughest is the drug case as a false exteriorization often occurs on an enforced basis and may go into restim.

Some drug takers go plowing back into early implants and drug therapies so the two get crossed up on a case.

To isolate the reason for a highly resistive case or high TA you can assess the above 7 items and get a clue. Don't limit it to this lifetime. And don't do it so as to key the person in hard on things he wasn't in. And don't do it unless the case is very hard to get a gain on.

Engram running of a crude sort can be found hundreds, thousands or billions of years ago and consists if it appears, of an overrun. They didn't know much about it and overran them badly.

Implants, psychoanalysis, psychiatry, hypnotism get all snarled up with sex as these birds would commonly (and do) stage insane sex scenes. They violate the children and wives of officials even today to produce a degrade and to make a scene so insane that the "patient" if he remembers it really thinks he is insane. And if he tries to tell anybody (or if she tries to tell her husband) it's a prompt mess, so these "practitioners" hide their activities in this fashion.

The trouble with such former "therapies" and electric shock, etc, is that it:

- (a) groups track by the command of the practitioner
- (b) sends the pc to the start of track WAY back and sticks him there out of PT.

The keynote of piloting through messes like this is to (A) Know what kind of a mess it is and (B) Don't EVER force a pc back track or into anything he doesn't want to confront easily.

Drugs *force* the person back into these messes and stick him.

One of these former therapy or drug messes is only hard to untangle because they are full of incredibles. The pc doesn't accept them or just try to see what's in them.

The basic rule in any case is Reality is proportional to the amount of charge removed and so Reality can be increased simply by removing charge. These surges of the needle as well as the BDs of the TA are "charge coming off".

Anything eventually resolves if the pc just keeps on getting charge off.

The earliest charge is the most important.

Charge off the exact grades is the most valuable.

But ANY charge off will make it, even on former "therapies".

*IMPORTANT*

**END PHENOMENAS**

Feeding the pc the End Phenomena of a process or action is illegal and very out-tech.

Example: Auditor asks pc “Since the last session did \_\_\_\_\_(stating the E/P) ?”

Or “In this session did \_\_\_\_\_(stating the E/P) ?”

This is evaluating for the pc. The pc has to make it himself then he truly makes it.

The correct way to check to see if a pc has made an E/P (rare as pcs usually tell their auditor their cogs, etc) would be to ask “Did anything occur?” or “Since your last session did anything occur?” If the pc then states the E/P or words to that effect, with F/N and VGIs, the process can be terminated or if necessary, rehabbed and terminated. If the pc does not state the E/P the auditor then knows to continue the process.

These actions apply very definitely to Power Processing—where earlier HCOBs state the auditor can check to find out if the E/P occurred between sessions.

Usually sessions aren’t ended before F/N, VGIs and E/P on a process. It’s easier on the C/S, auditor and pc to complete a cycle of action in the one session.

**PTS RUNDOWN**

**CASES**

One remaining problem in cases was "PTS phenomena".

P.T.S. means Potential Trouble Source. When someone is suppressed he becomes a Potential Trouble Source.

There are numerous HCOBs and P/Ls on this subject. All of them are true observations and predictions.

The cause of ROLLERCOASTER is PTS. Rollercoaster means a slump after a gain. Pcs who do not hold their gains are PTS.

S and Ds (for Search and Discovery) was the earlier approach. These are still valid and "3 S&Ds" as a rundown is used in the PTS Rundown without change.

Now with the PTS Rundown, the handling of this common and all too frequent case condition can be handled.

**WHO DOES IT**

Hopefully it can be done by Class IVs who are also HDCs, HGC Okays to Audits.

For an auditor who is not HDC Class IV Okay to Audit HGC by competent Internship to attempt a PTS Rundown would be very risky for the pc as it needs exact listing, exact TRs, exact metering, exact Code keeping and very honest auditing and competent C/Sing.

**DEVELOPMENT**

Earlier discovery and development of the PTS theory is extensively covered.

The recent wrap-up came about through my OT research in November 1971.

The principal breakthrough was realizing one should NOT invalidate having known certain people before.

This is similar to the past life discovery in 1950. Some people thinking this was "unpopular" frowned on it. Some others were only famous characters so flagrantly that past lives were easily invalidated. But people who don't go past track in Dianetics don't recover. Even running them as "imaginary" as in *Science of Survival* advises suddenly breaks through for a stalled Dianetic Case.

In this same way with young men and girls using "I knew you when you were \_\_\_\_" for 2D advantage tended to invalidate having known certain individuals before this life.

But now it turns out that the ONLY PTS situation that is serious and lasting and can cause a rollercoaster comes from having known the person *before* this life.

Possibly in the last life or earlier lives one knew persons before *that* life too. This however shows up in the 3 S and Ds.

**BREAKDOWN**

There are only four points of breakdown of the PTS Rundown.

1. Improperly audited. Auditor not able to always do a correct list, TRs out,

metering out, poor R3R, just plain untrained or not totally familiar with this Rundown.

2. Pc not completely set up. Like: Has TA trouble but no C/S 53 done, is a no change case but no GF 40R done, old auditing not repaired by a GF and proper programming or no C/S 54 or too tired or too ill for the R3R.
3. The Rundown not fully and completely done, but chopped or left incomplete (pc will still rollercoaster).
4. People who “can’t run engrams”—which means a druggie who hasn’t had a full Drug Rundown.

There is nothing especially tricky about the auditing of the PTS Rundown except that all auditing should be of flubless quality and when the PTS RD is flubbed by bad lists or poor R3R or out TRs or poor metering it really IS a mess. The RD is so powerful that errors in C/Sing and auditing it are especially rough.

Currently sick pcs should not be run on the PTS Rundown as a standard practice. It IS what they need BUT you can easily overwhelm a sick pc with engram running.

The time to run a PTS RD is when the pc is set up and when it is noted the pc rollercoasters, not when he collapses with a temperature.

Rollercoaster can also be caused by a bad Interiorization RD or Int repair, out lists, bypassed charge of other descriptions. These should be gotten rid of before a PTS RD is attempted.

#### BEHAVIOR OF RD

Valence shifts occur rapidly and frequently in PTS RDs and should be noted on the Worksheet.

The R3R can sometimes be a bit of a long haul on a basic incident. Be sure with an L3B. But get an erasure of basic no matter how hard you have to work at it. In the PTS RD incidents can “develop”. Missing pieces can appear. A whole new slant can occur on the subject when one goes to F2 after finishing F1.

Chronic somatics are likely to appear and be handled on this Rundown. And case conditions not previously remedied by other means can be remedied by this Rundown.

#### END PHENOMENA

There is a point where the pc is absolutely sure he knew the person before this life. This is NOT the EP.

A pc can exteriorize on this RD. That is NOT the EP (but requires an Int RD if none has been done before going on).

**THE EP IS A PC WHO IS GETTING AND KEEPING CASE GAINS AND NEVER AGAIN ROLLERCOASTERS.**

#### PARTS

There are four parts to the RD.

- (a) Present and past S&Ds. Collect them up, handle each valid item with R3R Triple, ARC Brk, PTP, w/h and overts each triple. If no S&Ds exist do “3 S&Ds” and R3R and Ruds as above. If no folder, get the pc to tell you any past S&D items.
- (b) 2WC who the pc has known this lifetime who has troubled or worried him. Include father, mother, wife or wives (husband), brothers, sisters, aunts, uncles, grandparents, lovers. Treat any that read as likely. Ask if the pc has known person before this life. If read, R3R Triple, Ruds & Overts Triple.
- (c) 2WC Ask the pc who he has been after this life. Get various names. Ask if known before. Any that so read, R3R Triple, Ruds & Overts Triple.
- (d) 2WC Ask pc places and planets known before this lifetime. Get some. R3R Triple, Ruds & Overts Triple.

That is the extent of the Rundown.

## FLOWS

You cannot use Flow 1 as any old direction to or from pc. To do this fouls it up. *Flow 1 is to the pc.*

Flow 2 is pc to the person (or place).

Flow 3 is the person (or place) to others.

If you did F1 R3R as “Locate a time you knew\_\_\_\_\_” you might get to the pc, pc to the person or the person to others. You would not get a clean motivator F1. This would leave the PTS chain partially run.

This is also true of the ruds.

## RE-DOs

If the pc does *not* recover, then reasons for failure 1 to 4 above should be checked into.

Then the lists and R3R should be handled with L4B and L3B.

Then an overlooked item or person or place should be scouted for and handled. There is no question of the validity of the Rundown. It might have missed. “True love” might have been passed over as unlikely but such obsessive attraction is always based on having known (and probably done in) the other person.

Then the true EP will be attained where it only appeared to be before.

## THE COMMANDS

See 3 S&Ds HCO Bs 13 January 1968, “S&Ds”, 19 Jan 68, 16 Aug 69, 14 Jan 68, 28 Nov 67, 10 Nov 67, 9 Nov 67.

The commands and actions of doing 3 S&Ds are DRILL TR 4000-9 & TR 4000-10 3 S&Ds. HCO B 9 Oct 71, Issue VI.

The following R3R commands are used in every case. Put the person or place in the blank:

- F1. Locate a time when \_\_\_\_\_did something to you. R3R.
- F2. Locate a time when you did something to \_\_\_\_\_R3R.
- F3. Locate a time when\_\_\_\_\_did something to others. R3R.

## RUDS

- 1. Did \_\_\_\_\_ ARC Brk you? ARCU CDEINR. E/S to F/N.
- 2. Did you ARC Brk \_\_\_\_\_? ARCU CDEINR. E/S to F/N.
- 3. Did\_\_\_\_\_ARC Brk others? ARCU CDEINR. E/S to F/N.

ALWAYS DO A FRESH ARCU CDEINR ON EACH E/S.

- 4. Did\_\_\_\_\_give you a problem? E/S to F/N.
- 5. Did you give \_\_\_\_\_a problem? E/S to F/N.
- 6. Did\_\_\_\_\_give others problems? E/S to F/N.
- 7. Did you withhold anything from\_\_\_\_\_? E/S to F/N.
- 8. Did\_\_\_\_\_withhold anything from you? E/S to F/N.

9. Did \_\_\_\_\_ withhold anything from others? E/S to F/N.
10. Did \_\_\_\_\_ commit an overt (harmful act) on you? E/S to F/N.
11. Did you commit an overt (harmful act) on \_\_\_\_\_? E/S to F/N.
12. Did \_\_\_\_\_ commit an overt on others? E/S to F/N.

AUDITOR'S LIST OF ITEMS  
TO BE RUN

(a)	Old S&Ds	
	New S&Ds	
(b)	2WC reading items	
(c)	2WC after these items	
(d)	Places and Planets	
	Added Items for PTS Redo

**INTERIORIZATION ERRORS**

(References: HCO B 11 Apr 71 RA "L3RD"  
HCO B 27 Mar 71 "Dianetic Erasure")

Almost all the errors in an Interiorization Rundown are Dianetic errors. Most are very ordinary, even corny.

IT IS VITAL TO CORRECT AN INT RD ERROR AS A FIRST ACTION.

There is one Int RD error that is not a purely Dianetic error and that is the error doing anything else at all before an Int RD is done properly or an Int RD error is fully corrected.

The Int RD error may be simply that "Went In" and "Go In" did not read on the meter yet Int was run. This classifies as "running an unreading item".

Or the Int RD could have been overrun. It goes flat on Secondary F2, let us say. The Auditor keeps on going past the win. This will hang up the Rundown. One of the ways an overrun occurs is the pc goes exterior during it. Yet the Auditor keeps on. Another way is pc has a big cog, big win. Auditor keeps going on with the RD.

When a pc is exteriorized by auditing and is then audited further without being given an Interiorization Rundown, his TA will go high or low and he may be very upset. Heavy masses may come in and he may also get ill.

Int RD errors also may go back to earlier Dianetic errors. A number of unflat incidents invite the overrun of these if they also occur on a Dianetic chain.

To clean up a balled-up Int RD chain or incident one may have to find and clean up the Dianetic error it is sitting on *during* the clean-up of the Int RD error.

Int RD errors, goofs, etc, are handled by using an Int RD Correction List Revised, HCO B 29 Oct 71R.

Auditors who can't run ordinary R3R with great success should not be let near an Interiorization RD as their lack of smoothness in handling Dianetics will wreck the Int RD.

**CLASS IV, HDC AUDITORS**

An excellent Class IV HDC Auditor can easily repair a messed-up Interiorization Rundown after a folder study and by use of an Int RD Correction List Revised, HCO B 29 Oct 71R.

A Class IV HDC Auditor with an excellent Dianetic Record of wins can be given an Int RD to do or to correct IF HE IS STARRATED ON THE INT PACK AND THE TWO-WAY COMM PACK.

## REPAIR

Wherever you see a TA high and a pc in trouble your first suspicions should be:

1. Audited past Ext in Auditing without an Int RD being done.
2. Int RD botched by being unnecessary (“went in” didn’t read) or overrun or Auditor goofs in the session.
3. A previously messed-up Dianetic action has gotten fouled up with the Int RD.
4. The Int Command was improperly cleared (such as “means go in and out again” “means trapped” “meant leaving” etc).
5. Firefights and worries over the high or low TA have ensued after an Int ball-up has occurred.
6. Some major action like grades or items of Power have been run twice.
7. A C/S has hopefully kept on getting the pc audited without detecting the real reason as a flubbed Int RD.

## PERCENTAGES

The percent of misrun Int RDs is high, many being unnecessary or overrun.

The liability of leaving them unrepaired is high.

Reasons for high TA are averaging out close to 100% as an unrun or a flubbed and unrepaired Int RD.

## EXT IN SESSION

When a pc Exteriorizes in session it is the End Phenomena for that process or action. One gently ends off in any case. Then if after the fact of going exterior in auditing, a pc’s TA goes high, then you do the Int RD. You test Int for a read (test “went in” and “go in” per HCO B 24 Sept 71, “Interiorization Rundown”) and if it reads you do an Int RD.

You just don’t do one because a pc goes exterior.

Maybe it wasn’t needed. So if it wasn’t needed it will eventually have to be repaired.

If even years after an Int RD the pc has a high TA or a low TA then Int trouble is at once suspected and the original Int RD and any repair of it is suspect and must *be handled*.

The Int RD Correction List Revised, HCO B 29 Oct 71R, has been designed to straighten out Int RDs. L3RD handles the Dianetic errors. *Where Int RD Correction Lists have been done and the pc still has headaches, the C/S handles with AESPs (listed separately) that would make him interiorize.*

There is no real trick to either running a correct Int RD or repairing a flubbed one.

The whole clue is whether or not the Auditor can audit plain ordinary garden variety R3R.

So when ANY Auditor audits a pc past Exterior and the pc’s TA goes high he should be checked out fully on the Int RD Checksheet so he won’t continue to commit the error.

And when ANYONE is going to run an Int RD he must:

- A. Be an expert Dianetic Auditor and Class IV.
- B. Be Starrated on all the Int RD Pack.

And when any C/S is confronted with high TAs or low TAs and doesn't handle at once by getting an Int RD properly run or properly repaired he must be rechecked on the Dianetics Pack and the Int RD Pack.

#### DN C/S 1

A very careful Dianetic C/S 1 must be done on a previously unindoctrinated pc before he is run on an Int RD.

Otherwise it's all too new.

A C/S 1 isn't auditing.

The pc who can't do what the Auditor says or can't correct an erroneous action is lost.

A fully safe pc would be one who when he goes Ext in Auditing is made to do an HDC at once before he even gets any ruds put in and not audited again until he is an HDC. He'd be a pc who was relatively safe.

A pc who does what an inexpert Auditor says without question can really get fouled up ! Uneducated pcs require really flawless topnotch Auditors. The Auditor who can audit an uneducated pc is a jewel. He really has to know his business. Because the pc does whatever he says. And if he says wrongly, then there goes the session. Ever notice pc corrections in a worksheet? "I think you by-passed an F/N." "This feels overrun." "I *had* Grade I last year." Such Auditors are not fully enough trained to handle wholly green pcs!

#### SIMPLICITY

Honest fellows, it's as easy to run an Int RD as it is to run "an ear pain".

It isn't even mysterious or tough.

IT IS ONLY VERY IMPORTANT TO DETECT WHEN IT NEEDS TO BE DONE OR REPAIRED.

There are no mysteries.

Some Auditors have got me feeling like I'm trying to teach them to chew soft bread!

HCO BULLETIN OF 17 DECEMBER 1971

(HCOB 2 December 1970 Revised)

Remimeo  
Int RD  
Checksheet

*C/S Series 23 R*

**INTERIORIZATION SUMMARY**

(Revised and updated to include 1971 Int HCOBs)

*All changes are in this type.*

**INTERIORIZATION CAN BE BADLY MISRUN.**

The following HCOBs cover Interiorization Rundowns.

HCOB 5 Mar 1971	Exteriorization and High TA
HCOB 11 April 1970	Auditing Past Exterior
HCOB 6 May 1970	Blows, Auditing Past Exterior
HCOB 30 May 1970	Interiorization Intensive 2-Way Comm
HCOB 10 July 1970	Interiorization Intensive Goof
HCOB 20 Aug 1970	Exteriorization Rundown Musts
HCOB 24 Sept 1971	Urgent—Interiorization Rundown
HCOB 29 Oct 1971	Int Rundown Correction List Revised
<i>HCOB 16 Dec 1971</i>	<i>C/S Series 35 R (Revised)</i> <i>Interiorization Errors</i>
<i>HCOB 17 Dec 1971</i>	<i>C/S Series 23 R (this HCOB)</i>

The examination of *Interiorization* Rundowns done in the field discloses that some auditors engaged in running it have not been fully checked out on it. HCO PL 26 Aug 1965 gives the correct way to do a starrate checkout. Clay demos must also be correctly done. These are covered in HCOB 11 Oct 1967 and HCOB 30 Oct 1970. These HCOBs on /nt Rundown, Starrates and Clay Demos plus HCO PL 20 July 1970, Issue III, 2-WC as below, make the necessary pack for checking out an auditor before letting him near an /nt Rundown. And all *Interiorization* materials as above MUST BE CHECKED OUT STARRATE AND IN CLAY before a C/S permits one of his auditors to run it on a pc.

**QUADS CANCELLED**

*Note that Flow O of the Int RD is not now run. Refer HCOB 15 July 71 "Quads Cancelled"*

**UNNECESSARY**

*The words "Went in" and "Go in" MUST be said to the pc and cleared on the meter. If there is needle action, one runs an Int RD as per the Int Rundown Pack*

*If there aren't any reads one does NOT do an Int Rundown on the pc as it is unnecessary and classifies as "running an unreading item"*

*When this test is omitted you get an unnecessary Int RD being done on a pc.*

*This will eventually have to be repaired.*

### FLUBBED R3R

*When the Auditor does not do flubless auditing, errors occur in the auditing itself. These will hang up an Int RD.*

### OVERRUN

*It usually happens that an Int RD is overrun. It goes flat on Secondary F2, /et us say. The auditor keeps on going past the win.*

*This will hang up the Rundown.*

*One of the ways an overrun occurs is the pc goes exterior during it. Yet the auditor keeps on.*

*Another way is pc has a big cog, big win. Auditor keeps going on with the RD.*

### REPAIR OF INT

*If even years after an Int RD the pc has a high TA or a low TA, then Int trouble is at once suspected and the original Int RD and any repair of it is suspected and must be handled by HCOB 29 Oct 71, Int RD Correction List Revised.*

### TWO-WAY COMM

There is a two-way comm step that follows a day or so after an *Interiorization* Rundown.

An auditor doing this step, preferably the same auditor, **MUST BE CHECKED OUT ON TWO-WAY COMM.**

No C/S should permit any auditor to do any 2-way comm until the auditor has been checked out on HCO PL 20 July 1970, Issue III, "Two-Way Comm Checksheet". One can obtain these tapes easily from Pubs (as the Sea Org has recently forced in this line and quality and delivery). Pending such tapes one can certainly get the rest of the materials on the checksheet done by the auditor and let him do 2-way comm while being very watchful as a C/S.

### C/SING INT

The correcting of an *Interiorization* Rundown is far harder than making sure that auditors can do the usual in the first place.

Nearly all a C/S's hard work comes from auditors not well trained on courses (indifferent courses) and failing to check auditors out well on the materials *before* permitting them to deliver a new rundown.

The correction of *Int* is hard since until it is complete, other auditing is inadvisable. One, however, gets the *Int* Rundown done.

### INT IS A REMEDY

*The Int RD is not understood as a REMEDY. It is not something you do on all pcs.*

*Pc goes Exterior in auditing.*

*Later his TA goes high.*

*Then you do an Int RD.*

*You test Int for read as above. If it BDs you do an Int RD.*

*You just don't do one because a pc goes exterior.*

*One reason unnecessary Int RDs get done is that the Registrar sells one. That makes the Reg a C/S. So the C/S and auditor run it*

*Maybe it wasn't needed.*

*So if it wasn't needed it will eventually have to be repaired, with an Int RD Correction List Revised, HCOB 29 Oct 1971.*

The *Interiorization* Rundown is a REMEDY designed to permit the pc to be further audited after he has gone exterior.

The *Int* Rundown is NOT meant to be sold or passed off as a method of exteriorizing a pc. This is very important.

It is general auditing on usual Dianetics and Scientology actions that brings about Exteriorization.

When the pc goes or is found to be exterior one then orders the *Interiorization* Rundown. Otherwise the TA will misbehave.

The rundown is a REMEDY USED AFTER EXTERIORIZATION HAS OCCURRED BY REASON OF GENERAL AUDITING.

Anxiety to get exterior will prompt a pc to buy and a Registrar to sell an *Interiorization* Rundown. It is in effect just more auditing as far as the Registrar is concerned. When a pc has gone exterior the Registrar can insist on his buying enough hours for the remedy.

The *Int* Rundown stabilizes the exteriorization and makes it possible to audit the pc further.

#### DISABILITY

If an auditor can't smoothly audit a rundown as simple as an *Int* Rundown, then he is exposed as being unable to run standard Dianetics and should be cleared of his misunderstands and overts and retrained.

The only real trouble one gets into on an *Int* Rundown stems from the inability of the auditor to run a smooth, good TRed R3R session. Pcs are not hard to run on it.

#### C/S WINS

A C/S cannot win at all if he is continually having to make up for flubby auditing by the auditor.

Therefore the C/S must be very sure his auditors are fully checked out on things they are to run before running them.

If there is no Qual Staff Training Officer or no cramming, a C/S can fully afford to do the training and cramming himself. Otherwise he will lose far more than that time in C/Sing for auditors not checked out.

By the skill of his auditors you know the C/S. Not by his unusual solutions after flubs.

The *Int* Rundown is too easy to do to have any trouble—the trouble comes when the auditors are not checked out beforehand, starrate and in clay on new things they are to run.

*C/S Series 71*

**D OF P OPERATES BY OCAs**

A Director of Processing is a director of PROCESSING of cases.

All his functions are involved with this. He MUST understand his title and what its duties involve.

It is his job to get people PROCESSED.

To do this he has to KNOW (a) what people there are to be processed, (b) how much processing they will need, (c) what facilities can be maintained and expanded to get processing done and (d) to see that the processing is paid for and occurs.

The D of P does not have to be a C/S or to know C/Sing.

ALL HE HAS TO KNOW OF TECH IS HOW TO READ AN OCA, IQ, APTITUDE AND OTHER TESTS.

He does not even have to open a folder. If all he ever looked at was a pc's OCA (Oxford Capacity Analysis or by some other name) the D of P would win every time.

If the D of P considered his job as "To raise OCAs with paid for processing and to be sure the pc is happier" he would be performing his duties.

To raise OCAs one has to know how to "read" an OCA. That's easy. It says how right on its border. Unacceptable, Needing Improvement, Desirable, etc.

An OCA with any point on the left side of the graph in low or undesirable range means the pc is out of valence. Any low point on the right side of the graph means the pc is crazy.

If the graph is not in the desirable range and the pc happy and looking better, the HGC has not done its job yet.

The D of P goes wholly on the idea of MORE AUDITING when he wants to raise a graph or IQ.

It's not up to the D of P what is audited only that auditing is done. The C/S, if he knows his business, will say *what is* audited. The D of P just knows MORE AUDITING.

A D of P can tell by the OCA improvement and improvement of TONE and APPEARANCE of the pc and what the pc says in an interview whether the required high quality result has been achieved. If it has not, then it's MORE AUDITING.

The REGISTRAR can have very similar functions as to graphs and where there is no D of P the REGISTRAR must do these things.

A D of P who has a backlog is a dog. It means he isn't getting auditors or recruiting Academy students or getting people to Auditor Interne and isn't BEING by DEFINITION a D of P.

If there is an “ARC Broken field” look at the D of P. He didn’t see that the OCA was raised and that the pc was happy before he left the org.

A good D of P has a potential processing line of EVERY OCA EVER GIVEN BY THE ORG.

He is in the business of raising graphs and making people happy with their auditing IN PAID VOLUME. If his HGC isn’t turning out 700 well done hours a week, he’s failing. If he is, he’s a success. If he turns out more, a second HGC is needed.

The traffic cop is the D of P.

He has to know what traffic he will have and what traffic he does have.

He can be defeated by a poor registrar, a poor C/S and a poor Qual. Therefore he has the right to demand these people get hatted. But he only has the right if he himself is hatted and doing his job. Given that he can demand Comm Evs.

If a D of P exists, knows his job and does it an org will become prosperous.

The first thing he has to know is the meaning of his TITLE.

The second thing is that his job is getting OCA graphs raised IN PAID FOR VOLUME.

(By current US rates a D of P should be running at least a \$17,000 cash gross of auditing through an HGC each week to be considered a competent D of P.)

Any “field ARC Breaks” is a direct reflection on the D of P. He didn’t raise graphs and see people were happy before leaving.

During periods when the post of D of P was empty or “not on the org board” or not filled, the org has slumped.

The post is very important.

It is also a very simple, direct post.

Its duties are covered in C/S Series 25 along with others. But his use of the OCA is not listed there.

Procurement of auditors is currently the weakest point of a D of P’s duties. Without this he cannot deliver volume. I have known Ds of P to train auditors themselves to have auditors and others to train Academy Graduates after the course to have quality.

There are no limits on what a D of P can do—

So long as he is DIRECTING PROCESSING and RAISING OCAs *in paid volume*.

*C/S Series 72*

**USE OF CORRECTION LISTS**

A current survey shows that the weakest point in C/Sing done in orgs is failure to use Prepared Lists for Case Correction.

There are some other points. For some reason C/Ses are being inventive instead of following the C/S Series and doing standard repairs and grades.

Probably the failure to use Prepared Correction Lists derails the use of standard actions.

There are very few actions which do not have their own Correction Lists.

**THERE IS NOTHING IN DIANETICS AND SCIENTOLOGY AS MIRACULOUSLY WORKABLE AS CORRECTION LISTS.**

The only things which prevent the list from working are

- (a) AUDITOR'S METERING
- (b) AUDITOR'S TRs.

**METERING**

When the auditor's meter is habitually placed where he cannot see (1) The meter needle, (2) The worksheet and (3) The pc **WITH ONE DIRECTED LOOK**, then he misses reads.

All three have to be seen at once.

The faults are

- i) Eyesight poor
- ii) Glasses rims obscure one while looking at another
- iii) Position of the meter.

It is a Standard Cramming action to look into these points **WHENEVER A CORRECTION LIST IS SAID TO BE BLANK.**

For example a GF is done by Auditor A on Monday. It is done again by Auditor B on Tuesday. Reads are found by B. This means Auditor A is missing reads.

**THIS IS FAR MORE COMMON THAN BELIEVED.**

**TRs**

When an auditor can't be heard or is overwhelming the pc the list won't be valid.

An auditor's TRs show up more quickly on a Correction List than anything else.

A pc ARC Broken by TRs 0 to IV will not read properly on a Correction List.

### NUMBERS OF LISTS

The number of Correction Lists is large.

It is unthinkable to do Word Clearing without ever using a WC Corr List. Yet we find folders with bogged Word Clearing sessions where the list was never used.

There is the Green Form for general case upset, the Green Green Form for Solo, L 1 C for ARC Brks over a period, L3B for Dianetic bogs, L4B for listing and nulling goofs, Int RD Corr List for Int-Ext corrections, a Power Corr List for Power, GF 40R for resistive cases, C/S 53 and Hi Low TA for TA misbehavior, L7 for Clearing Course, and others.

C/Ses trying to "solve cases" without using Correction Lists is like trying to repair flat tires without puncture patches—it just CAN'T BE DONE.

### THE PRIMARY TOOL OF A C/S IS PREPARED CORRECTION LISTS.

It is not inventive ways of "solving cases".

### METHOD OF USE

Where you have inexpert auditors you always order Method 5, which is just a full rapid assessment. Then the C/S sorts out the reads and C/Ses what to do as very well covered on the lists themselves and the C/S Series.

Then the auditor does the C/S.

A Green Form is *always* done this way. It will bog on any other method like 3.

There are different methods of handling lists. L1C is always done Method 3, carrying each read as it is found Earlier Similar to F/N.

A GF 40R is done Method 3 and then the engrams are run for each read where engrams are indicated.

It's up to a C/S to use Correction Lists, to coach his auditors into proper list use and to get corrected any misuse.

A C/S who can't or doesn't use Prepared Correction Lists isn't a C/S at all but a "person puzzled about cases".

Correction Lists, standard programs and the Grade Chart and Grade Commands and materials.

These are the tools of the C/S.

There are NO others.

A C/S is one who uses these things. He is Supervising that they are used when they are supposed to be.

HCO BULLETIN OF 23 DECEMBER 1971

Remimeo

*Solo C/S Series 10*

*C/S Series 73*

**THE NO-INTERFERENCE AREA**

From R6 Solo to OT III one does not do anything except keep the pc winning for R6 Solo to OT III.

This is the critical band of the Gradation Chart.

On Flag it was learned the hard way that you don't do other major auditing actions between these two points.

Example: Action—Completed R6, Clear and OT I, then a Dianetic Completion was attempted. Result—failure. Right Action—Complete Dianetics before R6. Right Action—let it go until OT III well begun, then complete Dianetics.

Example: Pre OT doing OT II. A new PTS RD is done. Failure. Right Action—do it before R6 or after OT III.

Example: R6 done. Drug RD given. Result. Poor. Right Action—Do Drug RD before R6.

**EXCEPTION**

It will be found that a pc cannot confront doing Solo Grades. The reason will be found to be Drugs. All pcs who “cannot run engrams” CAN run Drug Engrams. They are afraid because they get into the bank heavily when on Drugs. *Only* Drugs can be run.

So a pc who has “done R6 and Clearing Course but hasn't made it” will be found to be a rabbiting (frightened and running away) druggie. He can and will run Drug Engrams.

Thus the right action is to do a full Drug Rundown, then start the pc all over again at R6.

It is an exception only because he hasn't done his Solo anyway.

**REPAIRS**

Where a Pre OT hasn't made the grade of a Solo level (or gets sick afterwards) a full repair must be done and the failed grade must be completed before he goes on up.

It is possible to repair a Pre OT between R6 and OT III so long as you are not trying to handle his whole case but only repairing the grade he missed.

**TRs**

Never order TRs after Solo Materials study or before OT III is attested.

TRs should be done before or during Solo Auditing study but not after materials are issued. And the TR Course may not be done from then on to OT III.

A partially completed earlier TR Course found to be hanging up a pc on Solo Grades can be handled to completion and should be. This does not mean long additional hours of TR 0. It usually means word clearing on the TR materials and rehab.

### MAJOR ACTIONS

It is a very losing game to throw a major rundown in between R6 and OT III. Such as L10 after Clearing and before OT I. The result is a mess.

The way to recover such a blunder is to get the pc rehabbed or to a rest point and then finish up the Solo Grades to OT III attest and then complete the rundown.

### SET UP

It is therefore VERY important that a pc be fully set up including Dianetics before he is let onto R6 Solo materials study.

### AUDITING SKILL

None of this states that you cannot improve a pc's auditing skill between R6 and OT III (excepting only TRs).

BIG wins are to be had by doing so.

THE MAJOR CAUSE OF FAILURE ON SOLO GRADES IS THE INABILITY TO AUDIT.

You can take a Pre OT who didn't really make Clear or OT I and move him back to R6 study and retread him as an auditor and then let him move back up the line and he'll win.

The sources of failure on Solo are

1. No Drug RD.
2. Dianetics Incomplete.
3. Case not set up.
4. Inability to audit.

### SUMMARY

Realize that from R6 to OT III you have a closed band for other major actions.

So don't let people onto R6 Auditing who have points 1-4 out.

If it has happened, patch it up as you can and let the pre OT get on with it.

Then after the first OT III attest, do whatever you like or that needs to be done before sending him on to OT IV.

- overwhelm would indicate need of a Repair and Return, 101
- rehab of processes on Return Program, 74
- Repair and Return Programs, use of, 69, 70
- sample Advance Program, 70, 263
- should contain Expanded Lower Grades, Triple, 432
- start lower than pc was if pc got in trouble where he was, 187
- written on bright blue sheets, 60, 69, 94
- affinity, *defn.*, emotional response, feeling of affection or lack of it, of emotion or misemotion connected with life, 291; *see also* ARC Emotion and Affinity Scale; *see* *Scn* 0-8
- affinity (*cont.*)
- tends to break down slightly where individual is too demanding, 240
- alcohol; *see* drugs, alcohol
- ally, *defn.*, person from whom sympathy came when pc was ill or injured, 26
- alterations and misunderstood words, 382
- anchor points, don’t drive in, by shoving things at or gesturing toward pc, 251
- antagonistic pc = BPC = assess proper list (such as LIC) and handle, 46, 359
- antibiotics, allergy to, can turn on whole track pictures violently, 328
- APA, American Personality Analysis; *see* OCAIAPA
- apathy, pcs with low TAs are more less in ~, 124
- apathy, “total-apathy-won’t-answer” [Dn] session upset, probable cause of, 392
- application, why C/S C/Ses for exact tech ~ and not exclusively for result, 284
- aptitude, low, handling of, 34
- aptitude, relation to misunderstood definitions, 294
- ARC, 240, 291; *see also* affinity; communication; reality; understanding
- angry man, ARC of, 291
- common denominators of bank are out of ARC and stop, 269
- don’t run an out of ARC process, 268
- equate into understanding, 291
- role in education, 232
- ARC break(s), ARC broken, *defn.*, A-affinity, R *defn.*, reality, C-communication, a break in any one of the three which has caused upset in past, 386; *see also* rudiments
- auditor who goes sad is auditing pcs over his own ARC break, 362
- “field ARC breaks” is a ~irect reflection on D of P, 463
- high percentage of ARC breaks occur because of failure to understand pc, 251, 428
- incomplete cycle of action causes ~, 268
- listing errors, why they are handled before~, 280
- lots of ARC breaks = Level 2 is out, 70
- LIC handles ARC broken, sad, hopeless or natterly pcs, 203
- most violent session ~ occur because of list errors under meaning of listing and nulling, 392
- out list can make an ~ that can’t be handled by ARC break but only by L4B, 273
- overrun is full of mass and ARC breaks, 268
- pc ARC broken by TRs 0 to IV will not read properly on a correction list, 465
- pc sad = ARC break = locate and handle, itsa earlier itsa, 46, 359
- TA, never try to get a TA down from 3.5 or above on ARC breaks, 274, 281

## SUBJECT INDEX— 1970/1971

- ARC break needle,  
*defn.*, floating needle between 2.0 and 3.0 TA  
 position with bad indicators, 117  
*defn.*, pc bad indicators while F/Ning, 145
- arthritic hands give high TA, 423
- artists are subject to actions of psychotics, 158
- as-is, as-ised, as-ising,  
 auditor + pc as two pole system to ~ mass, 238  
 cognition is as-ising aberration with realization  
 about life, 230  
 its a line is a report on what has been as-ised, 243
- ability to as-is or erase in a session is directly  
 proportional to the number of good indicators  
 present in session, 258  
 reactive mind straightens out by ~ its content, 230
- assessment; *see also* listing and nulling  
 method of assessment of correction lists, 51, 465;  
*see also* C/S Series 83RA [X-230]  
 Methods 1 to 4, 51  
 Method 3, do not read list while looking at pc, 316  
 Method 5 is once through marking length and BD  
 of all reads, 185, 280  
 pc still has somatics, no further items on assess-  
 ment list read, cause of and handling, 11  
 prepared lists; *see* prepared lists  
 repeated assessment, 282  
 which assessment method to use, 51, 465; *see also*  
 C/S Series 83RA [X-230]
- assist(s), 322, 335, 364, 415, *defn.*, an action under-  
 taken by a minister to assist the spirit to  
 confront physical difficulties, 415  
 accidents, using assists on, 417, 418  
 be professional and definite in assists, 416  
 Contact Assist; *see* Contact Assist  
 Dianetic Assist; *see* Dianetic Assist  
 different to auditing at large, 415  
 end phenomena of, 322, 335  
 Exam Reports, assists must be followed by, 167,  
 191, 322, 335  
 first aid always precedes an assist, 417  
 rules of, 323  
 techniques which comprise an assist, 415  
 “Close your eyes and look at my fingers”, 415  
 Locational Processing as assist, 415  
 “Shut your eyes and look at my fingers”, 418  
 Temperature Assist; *see* Temperature Assist  
 Touch Assist; *see* Touch Assist  
 types of assists, 322  
 worksheets must be done, 191
- attest, pc may only attest one grade at a time, 80  
 attest, pc who can't attest a grade ability at any point  
 has to have a Repair Program and Return  
 Program, 70  
 attest, when to send pc or pre-OT to attest, 285
- preattitudes, Dianetic breakthrough came in assessing  
 only somatics, sensations, emotions, ~, 9
- audit(ed)(ing), *defn.*, a contest of maintaining right-  
 nesses so that we can delete wrongnesses, 258  
 ability, processing is measured by gradual increase  
 in ability, 69
- audit(ed)(ing) (*cont.*)  
 above pc's level gives no gain, 85  
 administration, auditing requires, 365, 375  
 basic auditing is prior to technique, 239  
 by Lists; *see* Auditing by Lists  
 cases undergoing Ethics actions should not be  
 audited -until the Ethics matter is cleared up  
 and complete, 31, 96  
 comm cycle, 235, 248; *see also* communication  
 cycle  
 additives on, are any action, statement, ques pc's  
 tion or expression given in addition to TRs  
 04, 256  
 always in use, 235  
 basic tool of auditing, 238, 239  
 case runs on cycles of actions auditing comm  
 cycle, process cycle, program cycle, 261  
 completion, 371  
 cycle, communication cycles which make up the  
 auditing cycle, 244, 246  
 Dianetic auditing; *see* Dianetic auditing  
 drugs and auditing; *see* drugs  
 Ethics and auditing, 31, 96  
 exteriorization, auditing trouble after, 27 36, 42,  
 168, 208, 281  
 floating needles and auditing; *see* floating needles  
 flows, auditing additional flows while earlier items  
 remain Single or Triple restimulates missing  
 flows and stacks them up as mass, 210  
 flubless auditing, a program for, 375, 376  
 flubs, what they consist of, 138  
 getting auditing into an org, 209  
 gross auditing errors regarding metering, 177-78  
 High Crimes concerning delivering auditing, 80  
 illegal auditing, 167  
 illness and auditing, 2, 14, 139  
 intensives, reason for, 261, 419  
 is not a limited action, 3  
 “loses”, keep at it until it is a win, 5  
 meaning of things plays a secondary role in pro-  
 cessing to forces, 76  
 muzzled, *defn.*, using only TR 0, 1, 2, 3 and 4 by  
 the text, 256  
 new preclear, setting up, 47  
 OCA/APA drop after ~, pc was out of valence,  
 330  
 okays to audit in HGCs, 233  
 part of auditing is recognition of fact that truth is  
 present, 258  
 past a persistent F/N is waste of time, 145  
 pc doesn't want auditing, handle after out Int and  
 list errors, 280  
 perfectly, what it means, 241  
 previous bad auditing can be cured by LIC on  
 viousbadauditing, 281  
 procedure, most elementary, 241  
 process, auditing a, is a simple A to B action, 289  
 programming; *see* programming  
 quality is raised by getting in Cramming, 209  
 reach and withdraw, auditing as, 239

## SUBJECT INDEX—1970/1971

- audit(ed)(ing) (*cont.*)  
repair; see repair  
report, falsifying an auditing report, vilest trick that can be played on pc, 362  
result, do not lead pcs to expect instant results every time, 6  
rudiments; see rudiments  
rundown, one audits a rundown as itself, not as a botch of several actions run into it, 289  
Scientology ~ is more delicate than Dianetic ~, 21  
set-up actions, 14  
    on new pc, 47  
skill, 467  
Solo Grades, major cause of failure on Solo Grades is inability to audit, 467  
stages, auditing goes in two stages: form a comm line; do something for the pc, 240  
states attained by; see *also* *Scn* ~8  
team activity, auditing is a, 365  
time, it takes as long as it takes, 88, 91  
time track, auditing itself is a sort of time track, earliest session blows later sessions, 210  
tone arm, audit with TA in normal range or repair it so it is in normal range, 197; see *also* tone arm  
tools of auditing are the Grade Chart processes and the numerous correction lists, 387  
TRs; see *also* TRs  
    auditing skill of any student remains only as good as he can do his TRs, 348  
    person on a TR cycle may not also be audited, 260, 261, 262  
two-way comm; see communication, two-way  
uses of auditing, 2  
    any human situation containing pain or misemotion should be handled by auditing, 2  
    fever, handling with auditing, 335  
    pc's desire or complaint, no reason or excuse not to actually handle these with auditing, 4  
    volume and quality, what brings about, 375  
    wins are not always fast, total and appreciated volubly, 5  
Auditing by Lists, 316  
auditor(s)('s),  
    admin, 96; see *also* Auditor Admin Series [IX-1]  
    actions, 180, 181, 182  
    auditor falsifying report, how to handle, 229  
    forms and worksheets are never recopied, 215  
    handwriting, illegible, how to handle, 433  
    out admin—liability, 96  
    advantages of being part of group, 366  
    attitude toward self, 365  
    cases, auditors don't have, 362  
    case supervision and auditor; see *also* case supervising; Case Supervisor  
    auditor accepting a C/S, 44, 356  
    auditor accepting verbal C/S instruction is a High Crime, 94  
    auditor-as-a-C/S, action of, 180, 205  
auditor(s)('s) (*cont.*)  
    case supervision and auditor (*cont.*)  
    auditor does not let a C/S C/S hopefully, he refuses C/Ses until an FES is done and bug found, 358  
    auditor may not C/S in auditing chair while auditing pc, 356  
    auditor responsibility for C/Ses, 44, 355  
    auditor should never take a verbal or written correction that is not in an HCO B or tape, 363  
    auditor who knows he goofed and yet gets a well done holds the C/S in contempt and his auditing worsens, 398  
    auditor who knows his tech is able to hold the line on any given action in auditing or C/Sing and not mix up, 289  
    C/S is handling cases on via of an auditor, 274  
    C/S omits "Fly a rud" or "Fly ruds", does not justify ~ auditing pc over out ruds, 357  
    C/S proving unworkable during session, auditor has a right to end off, 44, 356  
    HCOBs and tapes are stable data that form agreement between auditor and C/S, 279  
communication and auditor,  
    auditor has to assume responsibility for all comm breakdowns in session, 250, 428  
    auditor must keep in his comm line to pc, 242, 243  
    auditor never repeats anything pc says, no matter why, 250, 428  
    auditor not in comm with pc means no cognitions, 241  
    auditor response when he doesn't understand pc, 250, 428  
    auditor watches pc's comm cycle; auditor's own is perfect, 248  
course graduate becomes an ~ by auditing, 331  
cramming; see cramming  
E-Meter, does not tell pc anything about meter or its reads ever, except to indicate F/N, 259  
E-Meter, don't use distractingly, 22, 230  
errors, 206  
    auditor goofing, what it means regarding training, 301  
    auditor has right to know what he did wrong, 48, 363  
    auditor who can't get reads, how to handle, 273  
    auditor who refuses to audit his quota of hours or sessions is subject to action, 44, 355  
    cure for auditor who can't control pc, 255  
    cure for auditor who is "letting pc itsa", 254  
    don't gesture toward pc, 250, 251, 428  
    new auditor flubs, 93  
F/Ning auditors, 412  
internship, auditors must take internship after each course, 331, 332  
invalidate, Class VIII take care not to invalidate junior auditors, 23  
invalidation of auditor by C/S, 128, 278, 379

## SUBJECT INDEX—1970/1971

- auditor(s) (s') (*cont.*)  
morale, what it depends on, 380  
must be interested not interesting, 230  
must check out on materials before application, 173, 378  
preclear and auditor; *see also* preclear  
as two pole system to as-is mass, 238  
auditor causes a restimulation, then pc needs to answer question to get rid of restimulation, 244  
auditor invalidation and evaluation of pc is just plain villainy, 230  
auditor must look at rightnesses of pc, not just wrongnesses, 257  
auditor musts to make pc gain and cognite, 230  
auditor plus pc is greater than pc's bank, 230, 366  
auditor's right to reject or accept pcs he is given, 44, 355  
auditor who can audit an uneducated pc is a jewel, 225, 458  
pc's attention, don't pull over to auditor, 21  
why auditor mustn't force pc, 414  
real auditor's pcs don't overtalk or undertalk but answer auditing question and happily now and then originate, 254  
Repair Programs, new auditors shouldn't do, 93  
rights of auditor, 44, 355  
rudiments of auditor,  
auditors who have PTP of how to get case gain for their pcs, 326  
auditor who goes sad is auditing pcs over his own ARC break, 362  
auditor worried about his pc is working over a problem, 362  
overts and withholds on pcs, 277, 289, 345, 362  
session, auditor is responsible for session, 235, 250, 428  
session, ending session is totally up to , 44, 356  
somatics, auditor doesn't get pc's somatics, 238  
statistic of auditor, 129,147  
supreme test of an auditor, 289, 290  
vision, auditor is expected to see meter, pc and worksheet all at one time, 178, 464  
what is required to get bonuses, 184  
who have no pcs write procurement letters, 184  
working alone, decline of, 366  
Auditor's Code is auditing tool, not just a nice idea, 227; *see also* *Scn 0-8*  
Auditor's Code, out, prevents case gain, 230  
Auditor's Report, 215; *see also* auditor admin  
Awareness Scale; *see* *Scn 0-8*  
Axioms; *see* entry in full index; *Scn 0-8*  
Azimuth meter, 178
- B**
- backlog, don't allow a backlog of pcs, 5  
bad indicator; *see* indicator, bad
- bank; *see* reactive mind  
basic,  
blowdowns indicate a basic has been reached, I  
floating needle always occurs when basic on chain erases, 117  
running somatic permits you to get to a basic, 9  
basics, tech basics are not cancelled by later developments, 100  
BD; *see* blowdown  
Behavior and Physiological Scale; *see* *Scn 0-8*  
being, spiritual being, timeless and deathless, proof that individual is, 27,168  
being, when you add something to the being he gets worse, 257  
birth control pills, 389  
birth, interiorization occurs at birth, that's an engram; exteriorization occurs at death, that's an engram, 28  
birth, running out delivery, 2  
blaming pc, 277  
blow(s), *defn.*, unauthorized departure from an area, usually caused by misunderstood data or overts, 141, 286  
as an effort to exteriorize, 42  
major cause of, 42  
misunderstood words can cause blows, 162, 198, 294, 390  
overts are a primary cause of, 42  
blowdowns indicate a basic has been reached, 1  
blow up of low TA, rule only applies to C/S Series 37R, 272  
body,  
exteriorization proves that individual is not a body but an individual, 27,168  
lives only about 70 years, it puts an awful limit on man, 90  
living in body makes a being vulnerable, 79  
painandbodynerves,110  
pc exterior, handling body, 79  
responds badly to forces, 86  
bonuses, what is required to get auditor ~,184  
books a C/S must know well, 103  
BPC; *see* by-passed charge  
briefing tape is a tape designed for a special and informed audience, 436  
bullbait that uses actual processes or implants should be stamped out hard, 192  
buttons, suppress and invalidate buttons, 50  
by-passed charge, 63  
list goes wrong = BPC = handle or do L4A at once, 46  
lists designed to find by-passed charge and repair faulty auditing action or life situation, 51  
pc antagonistic = BPC = assess proper list (such as L1C) and handle, 46, 359  
reading items not F/Ned leave pc with ~,196  
Repair Program, exact BPC of last session is always first action, 63

## SUBJECT INDEX - 1970/1971

### C

- cans; see E-Meter cans
- case(s); see *also* preclear
- advance of, is amount of charge you get off it, 187
  - complete cases, 131, 276
  - deadliest faults on cases are running same action twice; this drives TAs up through roof, 276
  - difficulties,
    - case does not run well means (a) resistive, (b) errors have been made in auditing, 407
    - case isn't responding normally, C/S must suspect off-line action, 191
    - case not advancing has problems, 58
    - case not handled, 46, 360
    - case running badly, don't go on hoping, get data, 358
    - cases who flinch at remembering anything at all, handling of, 65
    - case trouble, "might be anything" use GF, 388
    - C/Sing towards significance produces non-advancing cases, 77
    - Exam non-F/N cases, errors to look for, 217
    - points that bog a case, 260
    - twelve things that can foul up a case, 218
    - what's really wrong lies in field of mass, energy, space, time, form and location, 84
  - does not know what is wrong with it or it would as-is and wouldn't be wrong, 345
  - dog cases, 206, *defn*, pcs not running well, 205
    - "failed cases" or "dog cases", causes of, 376
  - entrance to case is not on level of technique, but is on level of comm cycle, 239
  - errors, study folder back to where pc ran well and then come forward and you'll find error every time, 278, 358
  - Ethics, case undergoing Ethics actions should not be audited until Ethics matter is cleared up and complete, 31, 96
    - "failed cases" or "dog cases", causes of, 376
  - fast case considered a bad case when it is just a fast case, 406
  - foreign language cases, GF on, 185
  - former therapy case is apt to be the roughest, 449
  - gain and no case gain,
    - auditing above pc's level gives no gain, 85
    - auditing over a W/H and PTP = no case gain, 123
    - cognitions are the milestones of case gain, 230
    - discharged process no longer gives TA and gives case gain, 77
    - drugs prevent any case gain, 319, 327, 425
    - lack of, how to handle, 33
    - lack of training means more trouble for pc in making his gains stably, 60
    - no case gain can be created by lack of comm cycle in an auditor, lack of an action cycle in processes or messing up a program cycle, 262
    - no case gain then it's GF 40X, 388
  - case(s) (*cont*)
    - gain and no case gain (*cont.*)
      - pcs hiding general illness may show up as no case gain, 191
      - pc's itsa on and on and on and on with no gain, cause of, 252
      - pcs who do not hold their gains are PTS, 452
      - rough TRs, rough metering, out code and dis tractive auditor make no case gain, 230
      - tone arm action, amount of, per session is index of gain, 77
    - Grade I, Problems, is usual reason for no case advance, 101
    - handling,
      - case has many things to be handled, not one, 69
      - case must be completed on an action before starting anew one, 261
      - part of handling cases is handle N-O-W, 4
      - to handle case one keeps at it, 5
    - high TA cases; see tone arm, high
    - incomplete cases, 130
    - low TA cases; see tone arm, low
    - major action, don't use to repair a case, 47, 360
    - major action, set up case before starting, 14, 277
    - major processes are done to improve case, 57
    - not responding normally, suspect off-line action, 191
    - off-line actions, 191
    - out-points, case is collection of, 69
    - people talking about their cases, 192
    - points of case address; see *Scn 0-8*
    - programming of cases; see programming
    - reality of case is proportional to amount of charge removed, 450
    - repair,
      - don't use major action to repair, 47, 360
      - how to C/S, 62
      - many cases have to begin processing with a repair, 65
      - worse the condition, lighter the remedy required, 63
    - resistive cases, 101
      - case does not run well means (a) resistive, (b) errors have been made in auditing, 407
      - drugs or alcohol in most instances make a resistive case, 320, 327, 328
      - former therapy, 449
      - handling, 406
      - rundown [GF 40] is an VIII development to handle those who cannot make the grades, 101
      - seven types of resistive cases, 449
        - found in GF 40X, 388
        - person who has been on drugs is one of the "seven types of resistive cases", 319, 327
    - running well, never repair, 48, 362
    - runs on cycles of actions: auditing comm cycle, process cycle, program cycle, 261
    - run well when moderately well programmed, C/Sed and audited, 219

## SUBJECT INDEX - 1970/1971

- case(s) (*cont.*)  
setting up cases, 14, 47, 51, 277  
somatics, case has, equals Manetic level unflat, 70  
State of Case Scale; *see also* Scn 0-8  
tagging cases, 406  
tone arm; *see* tone arm  
unburdening case brings up confront, 110  
case supervising, case supervision, C/S, case supervise;  
*see also* Case Supervisor  
accepting a C/S, 44, 356  
auditor may not C/S in auditing chair while auditing pc, 356  
auditor opinion is not a study of case, 345  
backwards C/Sing, 77  
basic facts of case supervision, 56  
basic tech, use of, 58  
broad shooting C/Ses, 406  
cause and effect in C/Sing, 58  
Chart of Human Evaluation, use of in C/Sing, 85  
chronic somatic, 139  
Class VI (SHSBC) tapes and bulletins are all valid and vital to C/Sing, 103  
cramming,  
anyone that flubs that affects the C/S gets a cramming chit, 377  
if an auditor doesn't grasp a C/S he gets help from Cramming, 183  
I flub, I retrain in Cramming on that point, 153  
C/Singauditor-C/Ses, 205  
C/S instruction must be written, 94  
C/S proving unworkable during session, auditor has right to end off, 44, 356  
data, thorough C/Ses, 187  
how the C/S gets data on case, 388, 405  
lists prepared by C/S, assessed by auditor, 405  
maxim "when in doubt order a 2-way comm", 41  
opinions, C/S does not take opinions as a source of data on pc, 345  
Registars' Advice Form informs C/S what pc wanted and expected, 7  
Dianetic C/Ses, 186  
Dianetic C/S programs the case from Assessment Form, using drugs or medicine first and rest by largest reads first, 340; *see also* Dianetics  
Dianetic C/S 1, 225, 458  
Dianetics is its own field of C/Sing, 190  
don't wander off known tech points, 279  
errors, gross case supervision errors, 97  
"Examiner! Ask pc what auditor did in session", 274

C/S giving a daily auditors' conference, 153  
C/S is really not just Case Supervisor, he is also auditors' handler, 129  
C/S is responsible for auditors' ability to audit, 152  
C/S must insist on good legible handwriting of auditors, 433

## SUBJECT INDEX - 1970/1971

- Case Supervisor(s)(‘s) (*cont.*)  
auditor(s) and C/S (*cont.*)  
    C/S must interne his auditors for each interne-  
        ship missed on way up, 331  
    how to make auditors flubless, 375  
    secret of how LRH as a C/S makes star audi-  
        tors, 284  
    test of C/S in auditor’s eyes, 398  
books a C/S must know well, 103  
case gain, how to handle C/Ses who have PTP of  
    how to get case gain for their pcs, 326  
cramming, if there’s no Cramming, C/S can fully  
    afford to do cramming himself, 161, 461  
declare, it is C/S’s responsibility that a pc or  
    pre-OTissent to declare, 285  
Director of Processing does not have to be a C/S or  
    to know C/Sing, 462  
don’t let others decide what’s to be run, 83  
don’t look for *the* process to handle, use a gradient  
    scale, 89  
expertise, 275  
folder-C/S line, 181  
handling cases on the via of an auditor, 274  
HCO Bs and tapes are stable data that form agree-  
    ment between auditor and C/S, 279  
HGC, two chief seniors, C/S (for tech) and Direc-  
    tor of Processing (for auditors and bodies), 183  
is a training officer of auditors and of other Tech-  
    Qual personnel as well, 375  
lines of C/S and Senior C/S, 182  
mentally tags the easy cases and tough cases, 406  
mental masses, forces, energy are what C/S han-  
    dles, 77  
misunderstood from worksheets, 433  
most successful when he supervises in seclusion,  
    344  
confident he could crack case as auditor,  
    275  
mustn’t tolerate missing materials, 37~i  
opinions, C/S has no political or personnel opin-  
    ions, 344  
org C/S, duty of, 205  
preclear and C/S,  
    C/S is friend of pc, 344  
    C/S is there to make certain that pc makes gains  
        and attains actual abilities of level, 79  
    C/S should watch for Ethics record of pcs who  
        have been C/Sed, 96  
    pc illness must be reported to C/S before new  
        session, 191  
purpose, 76, 79  
Q and A, 75, 82, 92  
quality is raised by C/S study of cases and Qual  
    Sec cramming the C/S, 209  
Qual Sec, Cramming Officer and Interne Super-  
    visor are close technical links with C/S, 377  
responsibility, 152, 228, 375, 411  
retraining is an inevitable part of C/S’s job, 152  
should know exactly what is wrong with a case,  
    405
- Case Supervisor(s)(‘s) (*cont.*)  
supreme test of a C/S, 289  
Tech and Qual terminals and lines, C/S must  
    coordinate, 375  
tech, C/S who knows his tech is able to hold the  
    line on any given action in auditing or C/Sing  
    and not mix up, 289  
tech, why C/S C/Ses for exact tech application and  
    not exclusively for result, 284  
terms, glossary of C/S terms, 98  
time, 88  
tips, 273  
tools of a C/S, 387, 388, 465  
training officer, C/S as a, 375  
troubles, where most of a C/S’s troubles come  
    from, 228, 410  
trying to obtain volume, quality and viability, 375  
who assesses pc to higher levels to solve lower ones  
    is really asking for a wreck, 275  
CCHs, to handle accident proneness, 58  
CCH 5, Location by Contact, commands and how to  
    run, 408  
CCH 6, Body-Room Contact, commands and how to  
    run, 408  
CCH 7, Contact by Duplication, commands and how  
    to run, 409  
CDEI cycle with Lower Scale; *see Scn 0-8*  
chain(s),  
    engram chains go into restimulation on overrun in  
        life, 18  
    erased can be overrun: what happens is that pcs  
        try to cooperate and put something there, 228  
    Full Flow Dianetic chains that did not F/N when  
        originally run, how to handle, 211  
    rehabbing chains, 227  
two types of chains: story or narrative, and feel must be  
    ings, 9  
unflat engram ~ and high TA, 18, 76, 122, 123  
change, no change = Level I is out, 70  
charge, *defn*, electrical impulse on case that activates  
    meter, 50  
    advance of case is amount of charge you get off it,  
        187  
    blows off bank to degree that it’s confronted and  
        this is represented by itsa line, 243  
    level still charged, reliable indicators are TA action  
        and cognitions, 78  
    reality of case is proportional to amount of charge  
        removed, 450  
    shows not only that an area has something in it;  
        it also shows that pc has possible reality on it,  
        50  
    time track and charge; *see Scn 0-8*  
Chart of Attitudes, application of, 148  
Chart of Human Evaluation, 85, 86  
    application of, 148  
checklist, *defn*, list of actions or inspections to ready  
    an activity or machinery or object for use or  
    estimate needful repairs or corrections, 140,  
    286

## SUBJECT INDEX— 1970/1971

- checkout, 447, *defn* action of verifying student's knowledge of an item given on checksheet, 140, 286
- checksheet, 447, *defn*, list of materials, often divided into sections, that give theory and practical steps which, when completed, give one a study completion, 140, 286  
High Crimes concerning checksheets, 80  
material, *defn*, policy letters, bulletins, tapes, mimeo issues, any reference book or any books mentioned, 198  
never delete data from checksheets or assign part of it "background" data, 115  
sequence, 448
- chilled pc almost always has a high TA until he gets warm, 438
- choice, thetan's power of choice, how it has been overthrown, 257
- chopping pc's communication, 245
- chronic high TA; *see* tone arm, high
- chronic somatic; *see* somatic, chronic
- Church of Scientology, Creed of; *see* *Scn 0-8*
- Classification Gradation and Awareness Chart,  
basic program of any case, 56, 57, 99  
Gradation Chart, critical band of, 466  
pc must attain full ability on each level before going on, 56  
tools of auditing are the Grade Chart processes and the numerous correction lists, 387
- inClass VI (SHSBC) tapes and bulletins are all valid and vital to lower grade auditing and C/Sing, 103
- Class VIII,  
actions, 100  
auditing, 73, 101  
Course, what it has been slowed by, 165  
high TA handling, Class VIII Course recommendations to list "What has been overrun" are cancelled, 269  
invalidation can crashstats, 23
- clay demos, how to make, 163, 164
- clay table, 447  
any part of mind or any term in Scientology can be demonstrated on, 163  
art is no object in clay table work, 164  
construction of clay table, 162  
everything is labeled, 163  
mass parts are done by clay; significance or thought parts by label, 163  
thin-edged ring of clay with a large hole in it is usually used to signify a pure significance, 163  
work in training, 162, 163
- Clear, Dianetic, 98
- clear, "one-shot clear" is impossible, 69
- essenClear, Power will not need repair after pc has gone Clear, 143
- coach, definition and purpose, 288
- coaching, E-Meter drill, 10
- Code of a Scientologist; *see* *Scn 0-8*
- Code of Honor; *see* *Scn 0-8*
- coffee shop auditing, 191
- cognition(s), 117  
*defn*, pc origination indicating he has "come to realize"; it's a "What do you know. I " statement, 117  
*defn*, as-is-ing aberration with realization about life, 230  
auditor not in comm with pc means no ~, 241  
chopping off cognitions, effect of, 22, 78  
flattening offaprocess and cognition, 242  
how pc gets, 76  
milestones of case gain, 230  
show that thought is releasing from force, 77  
significance recovered or realized by the pc only shows up as cognitions, 77  
TRs, in presence of rough TRs cognitions do not occur, 230  
waiting for F/N to broaden to cognition, 22  
when they occur, 117
- cold pc sometimes has a falsely high TA, 424
- coma, person in a coma, how to handle, 323
- command, auditor must know when pc has finished answering the command, 248
- command, is pc ready to receive it, 245
- communicate, communication, *defn.*, interchange of ideas between two terminals, 291; *see also* ARC  
ability to precedes ability to handle, 264  
chopping pc's communication, effect of, 245
- cycle(s); *see also* auditing comm cycle  
consists of just cause, distance, effect with  
tention, attention, duplication and under  
standing, 246
- difficulties of auditing are difficulties of the  
communication cycle, 238  
E-Meter drill coaching, flunking out comm  
cycle keeps needle clean, 10  
must exist before technique can exist, 239  
whichmake up one auditingcycle, 244, 246
- formula of, is cause, distance, effect with intention  
and attention and a duplication at effect of  
what emanates from cause, 232
- is a familiarization process based on reach and  
withdraw, 239
- line, process doesn't work until auditor has a  
comm line to pc, 241
- lines depend upon reality and communication and  
affinity and where individual is too demanding  
affinity tends to break down slightly, 240
- lines: itsa maker line, itsa line, what's-it line, 243
- location, to communicate one must be able to  
hold to a location, 264
- Reality and Communication Scale; *see* *Scn 0-8*
- two-way comm,  
auditors must make notation of auditing  
tials in 2-way comm as of senior importance  
to pc's text, 104  
Course Supervisor use, 146, 175, 299  
C/Sing two-way comm, 46, 104, 360, 405  
four main reasons for 2-way comm C/Ses, 40  
reasons for C/S errors in C/Sing 2-way  
comm, 104

## SUBJECT INDEX - 1970/1971

- communicate, communication (*cont.*)  
two-way comm (*cont.*)  
E-Meter, two-way comm done on, 41  
end phenomena, 41,104,105,126  
evaluation in auditing two-way comm is a  
deadly sin, 40  
follows all rules of auditing, 104  
how to get to F/N, 105  
Interiorization Rundown is followed by two-  
way comm session, 36, 52,126, 159, 460  
prepared lists, two-way comming reading items,  
411  
Prepcheck, two-way comm is lighter than, 93  
process of two-waycomm, 176  
questions, improper, 105  
rudiment going out in two-way comm session  
must be put in by auditor, 105  
sessions, mark all reads, 65, 75  
sessions which do not end in F/N, how to  
handle, 105  
subject chosen must be tested for read, 104,105  
subject of major processes, don't use, 105  
use of two-way comm, 65  
worksheets are detailed as to what pc says, 40
- completion, completed, completing, *defn.*, com-  
pleting of a specific course or auditing grade,  
meaning it has been started, worked through  
and has successfully ended with an award in  
Qual, 141, 288  
audited ~ must be paid and have attested with an  
F/N VGIs and written a success story, 371  
student completion must be paid, must have  
passed examination and must have acceptable  
success story, 369  
visual idea of completing actions, 262
- complexity surrounding any subject or action is  
derived from a greater or lesser inability to con-  
front, 266
- Confessional, Exam Report is required after any  
Confessional, 167
- confront(ed)(ing), 264, *defn.*, ability to be there  
comfortably and perceive, 265  
ability to ~ pc and session and parts of session  
permits one to accurately go from A to B, 289  
bullbaited; *see* TR 0 Bullbait  
charge blows off bank to degree that it's con-  
fronted and this is represented by its line, 243  
complexity surrounding any subject or action is  
derived from a greater or lesser inability to con-  
front, 266  
gradient of confronting study, 264, 265  
misunderstands, confusions, omissions, alterations  
of a subject begin with failures or unwiUingness  
to confront, 264  
pc; *see* TR 0  
pc ability to confront force, 79  
Scale of Confront; *see* *Scn 0-8*  
student only fails by not confronting, duplicating,  
absorbing and using the materials before him  
exactly like it says, 237
- confront(ed)(ing) (*cont.*)  
symptoms of having trouble with, 265  
"talent" and "native ability", related to ability to  
confront, 264  
unburdening case brings up confront, 110  
via, confronting on, (using a relay point), 265  
confusion, how to handle confusion, 417  
confusion, misunderstood word exists at the bottom  
of a confusion, 373  
consideration and mechanics; *see* *Scn 0-8*  
Contact Assist, 322  
EP—pain gone, cog, F/N, 322  
interrupting a general course of auditing, 191  
Touch Assists and Contact Assists mandatory  
when any injury occurs, 167  
when possible make persons hold things they were  
holding, if any, while doing, 323  
continue is the reverse action to overrun; continue  
equals survival, 269  
Continue Process, assessing and listing, 282  
controlling a situation, how to, 416  
control pc, cure for auditor who can't, 255  
cope, way to get out of, is to organize, 380  
copperplate longhand, 433  
correction lists; *see* prepared lists, correction lists  
course(s); *see also* training  
containing TRs 04, 6-9 or Admin TRs is a major  
program in itself, 261  
fast courses, 165  
final valuable product of any course, 199  
graduate becomes an auditor by auditing, 234, 331  
how to translate a course, 441  
materials, 198  
misunderstood word tech is the sole course tech  
when course admin is in and materials are avail-  
able, 303  
retread course, illegal to give away, 165  
Scientology course, what it consists of, 198  
students who drift off of courses or who are very  
slow lack somebody to talk to, 175  
Study Tapes, only piece of technology you use on  
a course, 302  
tapes are never played to a group of students, 435  
use of clay table on courses, 163  
what is a course, 198
- Course Administrator, *defn.*, course staff member in  
charge of course materials and records, 140,  
286  
actions of Course Administrator, 199
- Course Supervisor, *defn.*, instructor in charge of a  
course and its students, 140, 286  
actions, 198, 301  
checking students for misunderstands on E-Meter,  
300  
checkout, *defn.*, checkout done by Supervisor of a  
course or his assistants, 140, 286  
Code and stable data; *see* *Scn 0-8*  
dialogue of a Supervisor, 299  
handling of student asking technical questions, 236  
is not an "instructor", 198

## SUBJECT INDEX - 1970/1971

- Course Supervisor (*cont.*)  
is there to get student's confront up on materials  
not to lessen it by "explaining", 236  
is tough, 198  
minimum requirements of Supervisor, 232  
must show that he is interested in progress of his  
students, 146  
skill, what it is, 198  
student doping off, looking upset or blowing,  
Course Supervisor actions, 146  
student is going along well, Course Supervisor does  
not act to correct, 146  
two-way comm, 146,175, 299  
cramming, 183, 207, 282, *defn*, section in Quali-  
fications Division where student is given high  
pressure instruction at his own cost after being  
found slow in study or when failing his exams,  
141, 287  
auditing quality raised by getting in cramming, 209  
auditor goofs, always find and handle, by cram-  
ming,153,206,273,412  
auditor, if an auditor doesn't grasp a C/S he has  
received he gets help from Cramming, 183  
auditor leaving ~ goes through Examiner, 412  
auditor must complete cramming on action before  
doing action again, 379  
auditors, let them complete programs on pcs even  
though going to Cramming, 380  
C/S, anyone that flubs as it affects the C/S in any  
way gets a cramming chit, 377  
C/S does cramming himself, if no Cramming  
Officer, 161, 461  
cycle, compliance reports on cramming cycle  
should have Exam Report attached, 412  
must exist in any org which sells auditing, 233  
must have a library of all materials, 279  
normal procedure even for Class XIIIs, 379  
Section issues okay to audit, 233  
standard Cramming action when correction list  
said to be blank, 464  
tech as good as Cramming Officer can cram, 184  
why it's vital, 207  
critical, auditor finding himself being nattery or criti-  
cal of pcs should get his withholds on pcs  
pulled and overts on them off, 345, 362  
critical pc = W/H = pull W/H, 46, 359  
C/S; *see* case supervising; Case Supervisor  
cycles, complete, 276

## D

- Data Series, sometimes bring about a headache or  
upset in student, handling of, 116  
date to blow, locate to blow, 401, 402  
"dead horse list~", 49  
Dear Alice; *see* TR 1  
death, exteriorization occurs at death, 28,169  
death of relatives, run them out narrative as second-  
aries R3R, 339  
declare completes pc's cycle of action and is a vital  
part of the action, 285  
declare, C/S's responsibility that a pc or pre-OT is  
sent to declare, 285  
declare, multiple declare (declaring 0 to IV to Exami-  
ner all at one time mostly without any mention  
of EP of Grade), 102  
definitions, 447  
aptitude, relation to misunderstood~,294  
by-passed definition, 294  
clay table work on definitions, 162  
DEI to CDEI; *see* *Scientology* 0-8  
delivery (birth), running out, 2  
demonstration kit, *defn*, 287  
dev-T (developed, meaning excessive, traffic), basic  
reason for, 4  
Dianetic(s); *see also* R3R  
auditing on specific situations, 2  
auditors can repair Int RDs, 224  
Axioms of; *see* *Scientology* 0-8  
begin Dianetics with Pc Assessment Sheet, not  
Health Form, 339  
breakthrough came in assessing only somatics,  
sensations, emotions, attitudes, 9  
chains previously flubbed, how to handle, 227  
Clear, 98  
C/Sing, Dianetics is its own field of, 190  
C/S programs case from Assessment Form, using  
drugs or medicine first and rest by largest reads  
first, 340  
C/S 1,225,458  
"Did that incident erase" is not asked now, 53  
don't copy Dianetic lists or worksheets, 359  
Drug RD, Dianetic, 321, 329  
drugs are handled first in Dianetics, 339, 340; *see*  
*also* drugs  
end phenomena, 20, 53, 117  
erasure, 208; *see also* erasure  
flows, one tries to do all flows of item in one  
session, 186  
Full Flow Dianetic action, result of doing, 211  
Full Flow Dianetic chains that did not F/N when  
originally run, how to handle, 211  
Full Flow Dianetics, if pc's TA begins to average  
higher, overrun is occurring, 227  
Full Flow Table, 188, 210  
Int RD and Full Flow Table, 189  
high TA, engram chain not erased in restim, 117  
item doesn't read, pc still has symptoms, use  
suppress and invalidate, 11  
items must never be run twice, 359  
item that doesn't read will produce no chain, no  
basic and pc will jump around track trying but  
just jamming up his bank, 49  
Life Repair before Dianetics, 74  
list(s),  
all Dianetic lists can be carried to an item that  
blows down and F/Ns, 392  
bring together in folder, 359  
errors, 392

## SUBJECT INDEX—1970/1971

- Dianetic(s) (*cont.*)  
list(s) (*cont.*)  
is not a listing action, 49  
null lists in Dianetics, 11  
of somatics, pains, emotions and attitudes can act as a list under meaning of laws of listing and nulling, 392  
overrun = disrelated chain being restimulated, 18  
pain not resolved on Dianetics, 110  
past track, pc who doesn't go past track in Dianetics doesn't recover, 452  
preclear(s), 99  
    has somatics, Dianetic level unflat, 70  
    pattern at Examiner, 123  
    repair of a Dianetic pc, 74  
    should be audited on ~ until no somatics, 99  
    who is unflat on Dianetics will have out lower grades, 59  
prepcheck, never, while doing Dianetics, it mashes up engrams, 228  
programming, 340  
Quadruple Dianetics; *see* Quadruple Dianetics  
session or chain, flubbed, repair within 24 hours, 340  
tone arm, high, at session start, how to handle, 45, 208  
"total-apathy-won't-answer" session upset, probable cause of, 392  
Triples; *see* Triple Dianetics  
upsets, handling of, 228  
Dianetic Assist, EP—pain gone, cog, F/N, 322  
*Dianetics: The Modern Science of Mental Health*  
    printed with hard covers in foreign language is vital, 443  
dictionary, it takes big ~ to define simple words, 383  
Director of Processing, *defn.*, is a director of *processing* of cases, 462  
actions of, 182  
any "feld ARC breaks" are direct reflection on ~, 463  
    HGC, two chief seniors, C/S (for tech) and D of P (for auditors and bodies), 183  
    interviews, 183  
    to get data on case, 405  
job, "to raise OCAs with paid for processi~g and to be sure pc is happier", 462, 463  
responsibilities, 183, 184  
training, 183, 462  
Director of Tech Services (D of T/S) is actually in charge of pcs and all folder files and all board keep-up work, 183  
*DMSMH* in foreign languages vital, 443  
D of P; *see* Director of Processing  
dog cases; *see* cases, dog  
dope off, pc dope off = lack of sleep or BP F/N = check on sleep, or rehab F/N, 46, 359  
dramatizing pc = R6EW unflat, 70  
drug(s),  
    alcohol is included as a drug and receives same treatment in auditing, 319, 327  
    drug(s) (*cont.*)  
        alcohol or drugs make a resistive case, handle first, 320, 328  
        are handled first in Dianetics, 339, 340  
        bomb formula and administration, 426  
        can turn on whole track pictures violently, 320, 328  
        case, a false exteriorization often occurs on an enforced basis and may go into restim, 449  
        case gain, people who have been on drugs do not make case gain until drugs are handled, 319, 327, 425, 427  
        chains are rehabbed and run out by Dianetics, 192  
        current ~ history or connections, handling, 34, 328  
        drying out, 425  
        effects of drugs, 319, 327  
        engrams, 320, 328  
        handling, 319, 327, 339  
            how to get off drugs, 425, 427  
            TRs to get off drugs, 65, 319, 328  
            vitamin therapy, 425, 426  
        illegal drug use, 192  
    medicine is treated like any other drug, 339  
    pc cannot confront doing Solo Grades, reason will be found to be drugs, 466  
    pc who is not making it in auditing should be checked for a drug or alcohol history, 320  
    pc who suddenly relapses onto ~, symptoms of, 192  
    people who have been on drugs sometimes afraid of running engrams, 320, 328  
    resistive case, former drug user is a resistive case, 319, 320, 327, 328  
    takers, some go plowing back into early implants and drug therapies, 450  
    tone arm, drug chain makes high TA if in existence or unflat, 189  
    users get blown out of their heads and bog, TA up, 160  
    withdrawal symptoms, 425  
Drug Rundown, 320, 328  
    Dianetic Drug RD, 321, 329  
dry hands give high TA, 423  
dull, cause of feeling dull when talking to certain people, 252  
duplicating, student only fails by not confronting, ~, absorbing and using materials before him exactly like it says, 237  
Duplicative Question; *see* TR 3  
dynamic, 3rd dynamic is stronger than first ~, 366

## E

- earphones and tape player must be high fidelity, 435  
education, *defn.*, conveyance of ideas, patterns and creations from one person to another for knowing retention and conscious use by second person, 232

## SUBJECT INDEX— 1970/1971

- education (*cont.*)  
affinity, reality and communication together make up understanding and so play their role in~, 232  
importance of misunderstood words, 295; *see also* misunderstood
- Effect Scale, 63; *see Scn 0-8*
- electric shock or former therapy, trouble with, 450
- emergency, how to help in an emergency, 416
- E-Meter; *see also* E-Meter reactions by name  
auditor is expected to see E-Meter, pc and worksheet all at one time, 178
- Azimuthmeter, 178
- can(s), 107  
causing false TA, 423, 438  
Solo cans, 106  
charged, how to keep E-Meter charged, 422
- charge is electrical impulse on case that activates E-Meter, 50
- check, *defn.*, action of checking reaction of student to subject matter, words or other things, isolating blocks to study, interpersonal relations or life, done with E-Meter, 140
- don't use E-Meter distractingly, 230
- drill coaching, 10
- gross auditing errors regarding metering, 177
- insane's harmful acts often don't register, why, 155
- needle action detects not so much significance as where force is, 78
- needle, ARC break needle, 117, 145
- needle, Stage 4 needle, 145
- never feed E-Meter data to pc, 226, 259, 316
- position, 316, 464
- putting pc's attention on ~ violates in session definition, 259
- reads; *see* reads
- reality-spotting by; *see Scn 0-8*
- records what force is being discharged in every slash, fall and blowdown, 77
- sensitivity, how to set correctly, 316
- trimmed improperly gives a false TA position, 421
- two-way comm is done on E-Meter, 41
- used to detect stress, 68
- Emotional Tone Scale; *see* Tone Scale; *Scn 0-8*
- Emotion and Affinity Scale; *see Scn 0-8*
- emotions, Dianetic breakthrough came in assessing only somatics, sensations, ~, attitudes; 9
- end phenomena, 451, *defn.*, those indicators in pc and meter which show that a chain or process is ended, 20  
correct way to check to see if a pc has made an EP, 451  
Dianetic end phenomena, 20 or 53, 117  
feeding the pc the EP of a process or action is illegal and very out-tech, 451  
floating needles and end phenomena, 20  
if you go past EP the F/N will pack up (cease) and TA will rise, 20  
pc attaining EP before all processes run, what to do, 48, 361
- end phenomena (*cont.*)  
pc exteriorizes in session, it is EP for that process or action, 225, 457  
program EP, 261  
proper EP for a process is F/N cognition VGIs, 78  
repair, EP of, 62, 278  
Scientology Grade 0 to IV end phenomena, 21  
TA Handling Rundown, end phenomena of, 270
- engram(s); *see also* R3R  
auditing without attaining EP on engram chains causes high TA, 123  
behavior, 27, 169  
chains go into restimulation on overrun in life, 18  
drugs, people who have been on drugs are some times afraid of running engrams, 320, 328  
erasure; *see* erasure  
prepcheck, never prepcheck while doing Dianetics, it mushes up engrams, 228  
running engrams, always test an item for read before running, 50  
running of a crude sort can be found hundreds, thousands or billions of years ago, 450  
run out force and words drop into insignificance, 76  
unflat chains and high TA, 18, 76, 122, 123
- enrollment, 446
- EP; *see* end phenomena
- erasure(s), erase, erased,  
chains, erased chains can be overrun; what happens is that pcs try to cooperate and put something there, 228  
Dianetic errors preventing erasure, 208  
"Did that incident erase" is not asked now, 53  
F/N always occurs when basic on chain erases, 117  
R3R, when pc originates "It's erased" and TA remains high, do ABCD once more or rehab last chain, 208, 218-19  
TA, high TA cases have been run on something that didn't erase, 28, 169  
thetan has to be at earliest end of incidents to erase them, 212  
you can't rehab erasures with "How many times?", 227
- ethics,  
cases undergoing ~ actions should not be audited until ~ matter is cleared up and complete, 31, 96  
C/S should watch for Ethics record of pcs who have been C/Sed, 96  
interpretation of HCO Bs or PLs is out-ethics, 115  
upstat, C/Ses to make Ethics upstat, 33
- evaluation,  
auditor invalidation and is just plain villainy, 230  
auditor repeating what pc says, 250, 428  
in two-way comm is a deadly sin, 40  
or even chatter after session can upset pc that ended session on F/N VGIs, 138
- evil, man seeks to check his evil impulses by inhibiting his own skill and strength, 156

## SUBJECT INDEX - 1970/1971

### Examiner(s).

- actions of, 181
- assists, pc taken to ~ afterwards, 167,191
- C/S "Examiner! Ask pc what auditor did in session", 274
- Dianetic pc pattern at Examiner, 123
- Exam F/Ns after flubs, 274
- F/N—no F/N at ratio, what it tells, 366, 367
- getting the F/N to Examiner, 122
- high TA at Exam after F/N in session, causes and solutions for, 122
- low TA at Exam, 124
- pc F/Ns at ~, then reports sick, reason for, 218
- pcs who don't F/N at ~, how to handle, 217
- Q & Aing with Exam statement of pc, 82
- session, flubbed session is visible at ~,138
- 24 hour rule, 138,174
- Exam Report(s),
  - causes of contrary Exam Report, 205
  - compliance reports on Cramming cycle should have Exam Report attached, 412
- Form, 193
  - required after any Confessional, 167
  - which routinely have sour notes in them indicate need of Repair Program, 62
- executives or staff members who show signs of obsessive transfer of staff, handling of, 354, 439
- Expanded GF 40 RB, 304; *see also* Green Form
- Expanded Lower Grades; *see* grades
- exterior, exteriorization, 172, 420, *defn.*, act of moving out of body with or without full perception, 27,168, 420
  - auditing after ~, symptoms of, 27, 36,168, 218
  - handling; *see* Interiorization Rundown
  - blow as an effort to exteriorize, 42
  - compulsive, 160
  - drug case, false ~ often occurs on enforced basis and may go into restim, 449
  - high TA and exteriorization, 19, 27, 36,168
  - in session it is EP for that process or action, 225, 457
  - late in incident, it began with interiorization, 28, 170
  - occurs at death, 28,169
  - pc exterior, handling body, 79
  - proves man is a spiritual being, timeless and deathless, 27,168, 420
  - somatics after exteriorization, 42
  - techniques are not now used because person (a) still being aberrated and not Clear, soon returns to his body and (b) when audited thereafter has trouble, 27,168
  - when somebody goes exterior he is liable to key in having gone interior in first place, 28,169
- Exteriorization Rundown, changed to Interiorization Rundown, 459; *see* Interiorization Rundown
- eyesight, 178
  - Rising Scale [process] will sometimes restore fertility or change eyesight, 90
- eyes, what a person does with, shows his tone, 149

### F

- facsimile, drugs can turn on whole track pictures violently, 320
- facsimile, pc's not-is of picture squeezes it into invisibility, 208
- Factors; *see* *Scn 0-8*
- "failed cases" or "dog cases", causes of, 376
- failed posts and duties trace back to misunderstood words, 381
- false auditing reports, handling of auditor, 229, 362
- false TA; *see* tone arm, false
- false, use suppress and ~ to fly ruds, 45, 357
- family insanity, run out narrative secondaries R3R, 340
- fast flow basis, C/Sing on, 205
- fertility, Rising Scale [process] will sometimes restore fertility or change eyesight, 90
- FES; *see* Folder Error Summary
- fever, handling with auditing, 335
- FFD; *see* Dianetics, Full Flow
- firefights, *defn.*, quarrel between auditor and pc, 228
- first aid always precedes an assist, 417
- first dynamic, 3rd dynamic is stronger than, 366
- flattening, *defn.*, to do something until it no longer produces a reaction, 265
  - cognition and flattening of a process, 242
- floating needle(s), 20, 53,122,144, 196, 217, *defn.*, idle uninfluenced movement of needle on dial without any patterns or reactions in it; it moves to right at same speed as it moves to left; it is loose and free, 68
  - abuse and "quickies", 78
  - ARC break needle is floating needle between 2.0 and 3.0 TA position with bad indicators, 117
  - by-passed, why it gives high TA, 18
  - cases that don't F/N at Exams, 217
  - cognition, waiting for F/N to broaden to, 22
  - complaints about, actual problem is auditor distracting pc from cognition by calling attention to himself and meter a moment too soon, 22
  - dope off = lack of sleep or BP F/N = check on sleep, or rehab F/N, 46, 359
  - end phenomena and floating needles, 20, 78, 117
  - if you go past EP the F/N will pack up (cease) and TA will rise, 20
  - erasure and F/N, 117
  - Exam F/Ns after flubs, 274
  - Examiner and floating needles; *see also* Examiner F/N everything, 196, 316
  - frequent errors in F/Ning everything, 197
  - F/Ning auditors, 412
  - getting the F/N to Examiner, 122
  - gradual widening of F/N, 144
  - indicate floating needle, when to, 21,197
  - indications, pcs who resent F/N indications, cause of, 78
  - no F/N at Examiner ratio, what it tells, 367
  - non-F/N cases, 217

## SUBJECT INDEX—1970/1971

- floating needle(s) (*cont.*)  
obtain an F/N before starting next C/S, 260  
pcs “getting an F/N at will” are not in session, 438  
persistent F/N, 144, 145  
reading items not F/Ned leave pc with BPC, 196  
read on an item from ruds or prepared list must be carried to F/N, 196  
R3R, floating needle on, 20  
session that tries to go beyond a big dial-wide drifting floating F/N only distracts pc from his win, 144  
students who study well are said to be F/Ning students, 412  
TA must be between 2 and 3 for a correct F/N, 55, 117, 421  
floating TA, 424  
flow(s), *defn.*, an electronic flow in a direction, 270  
actual electrical flow occurs in response to directional command, 270  
by-passed flows and mass, 210, 212, 213  
clearing flows, 282  
Full Flow Dianetics; *see* Dianetics, Full Flow  
F0 is Flow Zero, self doing something to self, 211  
in doing an Int RD one mustn’t suddenly introduce 4th flow (F Zero), 210  
Quadruple Dianetics and F0; *see* Quadruple Dianetics  
running, 214  
F1 is Flow One, something happening to self, 211  
F2 is Flow Two, doing something to another, 211  
Dianetics F2 command, 43  
perception, lack of, comes from overts and improves when Flow 2 is done, 340  
F3 is Flow Three, others doing things to others, 211  
Dianetics F3 command, 43  
high TAs are caused by two or more flows opposing thus making a mass or ridge, 270  
high TAs, heavy pressure and even illness can come from by-passed flows, 212  
low TAs are caused by overwhelmed by flows, 270  
mass occurs when flows of items are by-passed and then later restimulated by auditing them, 210, 212, 213  
“ridges” and masses come about from a conflict of flows opposing or being pulled back as in withholds, 270  
running previously unrun flows, 1, 213  
unrun, law: when one or more of four flows of an item or grade are left unrun, when used in later processes the earlier unrun ones restimulate and make mass, 212  
flubbed chains, 227  
flubbed sessions, red tagging, 138  
Flub Catch System, 142  
flubs, auditing; *see* auditing errors  
flunk(s), 128, *defn.*, to make a mistake, fail to apply materials learned; opposite of pass, 287  
session grading, when given, 128  
F/N; *see* floating needle  
folder,  
admin, 182; *see also* Auditor Admin Series [IX-I]  
analyzing and reviewing folders, 95  
C/S folder line, 181  
C/S only with all folders to hand, 95  
study ~ to find auditing error, how to, 218, 278  
Word Clearing Method No. 1 can be done with no folder, 315  
Folder Error Summary, 142  
auditor does not let a C/S C/S hopefully; he refuses C/Ses until an FES is done and bug found, 358  
cost of, 142  
credits on auditor’s stat, 147  
necessity for FES must not halt delivery, 142  
results, examples, 206  
who does it, 142  
Folder Page, actions of, 182  
Folder Summary inside front cover must exist and must be kept up, 276, 359  
footplates, 438  
force(s),  
body responds badly to forces, 86  
chronic somatics, almost all, have their root in force, 76  
cognitions show that thought is releasing from force, 77  
E-Meter records what force is being discharged in every slash, fall and blowdown, 77  
engrams, run out the force and the words drop into insignificance, 76  
force-shy thetan, how one becomes a, 86  
made up of time, matter, energy, flows, particles, masses, solids, liquids, gasses, space and locations, 79  
pc ability to confront force, 79  
pc will change in ideas when he changes his relationship to forces, 86  
significance vs. force, 77, 85  
somatics passing through in session are a definite clue to force change, 86  
thetans find counter-forces objectionable, 76  
tone arm action shows that ~ is coming off case, 77  
forcing a pc, 414  
franchise or field might not have divisions but they have all the functions, 153  
franchises may adopt “okay to audit” system, 233  
freedom, feeling of ~ and expansion on a subject is expressed in normal TA and loose needle, 78  
Full Flow Dianetics; *see* Dianetics, Full Flow  
Full Flow Table; *see* Dianetic Full Flow Table
- ### G
- GAEs; *see* auditing, gross auditing errors  
gain; *see* case gain  
GF; *see* Green Form  
glasses, 178

## SUBJECT INDEX— 1970/1971

- "glib" students, 264  
good indicators; *see* indicators, good  
goofed session must be repaired within 24 hours, 138  
goofs, always find and handle auditor goofs by Cramming, 206  
Gradation Chart; *see* Classification Gradation and Awareness Chart  
grade(s), *defn.*, series of processes culminating in an exact ability attained, examined and attested to by pc, 47, 360; *see also* level  
Advance Programs should contain Expanded Lower Grades, Triple, 432  
Class VI (SHSBC) tapes and bulletins are all valid and vital to lower ~ auditing and C/Sing, 103  
phenomena of grades, 21, 78  
Expanded Lower Grades, 98, 432  
flows, any later grade run with more flows than used in earlier actions can throw earlier unflat flows into restim, 212  
harmonic into OT levels, 98  
indicators of completed grade, 78  
major grade process is definitely not enough to make pc make a lower grade, 103  
pc demanding next grade, 83  
pc, grade he can't seem to make is not the ~, 70  
pc may only attest one grade at a time, 80  
pc who is unflat on Dianetics will have out lower grades, 59  
Quickie Grades; *see* Quickie Grades  
repairs of grades not made or failed, 466  
Triple Grades, 54  
violations, 47, 361  
Grade I, Problems, is usual ordinary reason for no case advance, 101  
Grade II Release, 30  
gradient scale, 89, *defn.*, gradual increasing condition of, or a little more of little by little, 265  
C/S, don't look for *the* process to handle, use a gradient scale, 89  
gradient, too steep a study gradient, 293, 294  
gradient, too steep, is most recognizable and most applicable in field of doingness, 294  
Green Form, 31  
assessed Method 5 (once through for reads, then the reads handled), 280, 318  
case trouble, "might be anything" use GF, 388  
fo~eign language cases, GF on, 185  
hidden standard handling, 185  
Method 3 and GF, 318  
misuse of, not handling pc, 4  
overlist, how to handle, 273  
ruds won't fly, assess GF and handle, 45, 46, 357, 360  
sequence of handling, 185  
to F/N, 31, 196  
Green Form 40,  
all reading items on a GF 40 are handled, 35  
assessment methods, 185, 465  
"audited over out ruds" reads on GF 40, handle first, 35  
Green Form 40 (*cont.*)  
Expanded GF 40 RB, 304  
no case gain then it's GF 40X, 388  
OT IV Rundown and Green Form 40, 102  
"out of valence" reads on GF 40, handle last, 35  
problem shows up as an out rud in GF 40 and is simply put in as a rud not as a grade, 101  
remains as a "when all else fails", 102  
resistive case rundown [GF 40] is an VIII development to handle those who cannot make the grades, 101  
seven resistive cases are found in GF 40X, 388  
when to use GF 40, 101  
grinding, caused by failure to ask for earlier begin ending, 208  
gross auditing errors; *see* auditing, gross auditing errors  
group, auditor's advantages of being part of, 366  
guilty, pc makes others guilty = Level IV unflat, 70
- ### H
- handle, handling, *defn.*, finish off, complete, end cycle on, 4  
ability to communicate precedes ability to ~, 264  
service and handling are the same thing, 4  
handwriting, illegible auditor, how to handle, 433  
HAS Specialist Auditing Program, 354, 439  
hatting, basic hatting step, 342  
Havingness Scale; *see* *Sen*  
HC; *see* Hubbard Consultant  
HCO Bs and tapes are stable data that form agreement between auditor and C/S, 279  
HCO Bs or PLs, interpretation of is out-ethics, 115  
headaches and Int Rundown, 401  
Int RD Correction Lists have been done and pc still has headaches, how to handle, 457  
Health Form, do not begin Dianetics with a ~, 339  
Health Form, things to be run before, 340  
HGC,  
course graduation does not give an HGC okay to audit, 234  
dummy run the new HGC line, 184  
fantastic new HGC line, 180, 181  
how to get results in an HGC, 365  
maximum of 600 well done auditing hours, 183  
okay to audit requirements, 233  
quality of HGC, who monitors, 377  
two chief seniors, C/S (for tech) and Director of Processing (for auditors and bodies), 183  
hidden data line, *defn.*, pretense that certain data exists outside of HCO Bs, books and tapes, 378  
technology, decay of tech begins with hidden data lines that are not true, 279  
there is no hidden data line, 115  
trouble can wreck an HGC (and org and field), 378  
hidden standard handling on Green Form, 185  
High Crime, C/S not writing C/S instructions is a High Crime, 94

## SUBJECT INDEX— 1970/1971

- High Crime regarding 24 hour rule, 174  
High Crimes of technical degrades, 80  
higher levels do not solve lower level failures, 275  
high TA; *see* tone arm, high  
"Hold it still", persistent temperature can be brought down by running pc on Objective "Hold it still", howtorun, 335  
HQS Co-Audit, folder admin for, 215  
Hubbard Consultant, *defn.*, 141, 287  
    Outpoint-Pluspoint List procedure, 116, 132  
    Study Stress Analysis No. 1, 2, 3 & 4, 66-67  
    training, 66  
Hubbard Guidance Center; *see* HGC  
Hubbard, L. Ron, secret of how LRH as a C/S makes star auditors, 284  
Human Evaluation Chart; *see* Chart of Human Evaluation  
hypnotism, "psycho" analysis, "psychiatry" and other implant type therapies often key in and jam track, 449
- I**
- ideas, pc will change in ideas when he changes his relationship to forces, 86  
ideas, there is not also misunderstood ideas; there is only misunderstood word which breeds wrong ideas, 373  
identification, Scale of Identification; *see* *Scn 0-8*  
ill, illness,  
    auditing and illness, 2,139  
    by-passed flows can cause illness, 212  
    handling illness or sickness, 89  
    must be reported to C/S before new session, 191  
    pc F/Ns at Exam, then reports sick, reason for, 218  
    pc has felt massy, sometimes even ill, cause of and handling, 213  
    pc is often ill because his ruds in life are out, 364  
    pcs hiding general illness may show up as no case gain, 191  
    pcs with high TAs feel ill and get ill, 124  
    programming errors and delay in repair can cause pc illness, 61  
    run out narrative R3R, 339  
    sessions which are left unrepaired for more than 24 hours occasionally find pc physically ill, 139  
    sick pcs should not be run on PTS Rundown as a standard practice, 453  
    sick person goes into overwhelm easily, 89  
    suicide or illness in the field of study or education, cause of, 293  
in, *defn.*, things which should be there and are or should be done and are, 141, 287  
incomplete cases, 130  
indicators,  
    bad indicator moves in when good indicator moves out, 258  
    F/N carries with it cognitions and VGIs, 117  
    indicators (*cont.*)  
        good indicators in auditors or students are mad with truth, 398  
        good vs. bad pc indicators, 258  
        reliable indicators of completed grade, 78  
Injury Rundown, 335  
insane, insanity, *defn.*, overt or covert but always complex and continuous determination to harm or destroy, 156  
    about 15% to 20% of the human race apparently is insane, 155  
    actions of insane are not "unconscious", 155  
    as cases in normal processing, roller-coaster continually, 155  
    behavior, insane or psychotic, 157, 158  
    E-Meter, why insane's harmful acts often don't register on, 155  
    family insanity, run out narrative secondaries R3R, 340  
    handling of insane, 157; *see also* Expanded Dianetics [in full index]  
    man is basically "good", also manifested in insane, 156  
    nearly always have a fixed emotional tone, 155  
    "omitted time" is a basic insanity, 90  
    product of post duties is destructive but is excused as ignorance or errors, 155  
    psychiatry is making insane people, 113  
    "stop everything" is entrance point of ~, 268  
    "suppressive person" characteristics are those of insane person, 155  
    truly insane do not necessarily act ~ visibly, 155  
    types of insanity are just different symptoms of same cause, 156  
    ways for a C/S to detect insane, 155  
in session; *see* session, in  
integrity is hallmark of Dianetics and Scientology 362  
intelligence decreased with each new year of school why, 383  
intelligence quotient, D of P goes on idea of more auditing when he wants to raise graph or IQ, 462  
intelligence quotient, handling of low IQ test scores 34  
intensives, reason for auditing intensives, 261, 419  
intensive, standard 121k hour intensive programs, 419  
interest, pc no interest = no interest in first place or out ruds = check for interest or put in ruds, 46, 360  
interiorization, exteriorization is late in incident, it began with interiorization, 28,170  
Interiorization Rundown, 27, 36, 42, 52, 125, 159, 168,172,224,271,400,420,429,456,459  
    auditor must know Standard Dianetics, 161  
    auditor requirements, 234, 456  
    to do Int RD correction, 401  
    can be limited to 3-way recall, when, 93  
    can be unnecessary, 400, 459  
    clearing commands, importance of, 172

## SUBJECT INDEX - 1970/1971

- Interiorization Rundown (*cont.*)  
cognition on Int RD, 52  
correct Int RD error as a first action, 224, 456  
Correction List, 429  
correction of Int-Ext is hard since until it is complete other auditing is inadvisable, 160, 460  
C/Sing Int RD, 229, 460  
date to blow—locate to blow procedure, to repair failed Int-Ext RD, 401  
Dianetic auditors can repair Int RDs, 224  
don't overrun EP, 48, 362  
end phenomena, 160, 460  
errors, 172, 224, 400, 456  
essentially a Dianetic, not a Scientology, action, 228  
Exteriorization Rundown changed to Interiorization Rundown, 459  
Flow Zero, one mustn't suddenly introduce 4th flow (F Zero), 210  
Full Flow Table and Int-Ext RD, 189  
HCO Bs covering Int-Ext RD, 159, 459  
headaches and Int Rundown, 401, 457  
is a remedy, 400, 460  
designed to permit pc to be further audited after he has gone exterior, 160, 461  
musts: run in one session; be flubless; follow with 2-way comm, 125  
not meant to be sold or passed off as a method of exteriorizing pc, 160, 461  
on new pc, 458  
out Int RD, handle first of all, 280  
out Int trouble is worse than list trouble is worse than out ruds, 396  
out, you will get a soaring TA, 281  
overrun, 460  
pc goes exterior in auditing, later his TA goes high, *then you* do an Int RD, 400, 460  
repair of Int RD, 457, 460  
roller-coaster can be caused by bad ~ or Int repair, out lists, by-passed charge of other descriptions, 453  
stabilizes exteriorization and makes it possible to audit pc further, 160, 461  
theory of, 213  
to keep from auditing over an out Int RD there is C/S 53, 388  
two-way comm session must follow Int RD, 36, 52, 126, 159, 460  
"went in" and "go in" must read in order to run Int Rundown, 400  
when to do, 400, 459, 460  
why it must be done in one session, 125, 172  
interne(s), *defn.*, an advanced graduate or a recent graduate in professional field who is getting practical experience under supervision of an experienced worker, 331  
program, Cramming Section issues okay to audit after rigorously following essentially interne program, 233  
section in Qual, 332  
internship, *defn.*, serving a period as an interne, or an activity offered by an org by which experience can be gained, 331  
auditors must take ~ after each course, 332  
invalidate, invalidation, *defn.*, a refuting or degrading or discrediting or denying something someone else considers to be a fact, 265  
auditor of pc is just plain villainy, 230  
auditors, invalidation of, 128, 278, 379  
avoid use of "you" to pc, 250, 428  
Class VIII can crash stats by invalidation of junior auditors, 23  
of pc can drive TA low, 423  
past lives, don't invalidate, 192, 452  
pc suppresses or invalidates something, read transfers to suppressor/invalidate, 12  
suppress and invalidate buttons, 11, 50  
IQ; see intelligence quotient  
item(s),  
always test an item for read before Prepchecking or running recall or engrams, 50  
confusions on "reading item", 178  
Dianetic item doesn't read, pc still has symptoms, use suppress and invalidate, 11  
Dianetic items must never be run twice, 359  
Dianetic item that doesn't read will produce no chain, no basic and pc will jump around track trying but just jamming up his bank, 49  
narrative items can give you trouble in R3R, 9  
once having read need not read again to be valid, 177  
reading but not F/Ned leave pc with BPC, 196  
reading item, what it is, 177  
somatics, sensations, emotions, attitudes, R3R, 9  
unreadable items—checking for reads, 45, 49, 357  
when listing items auditor must have an eye on meter, 177  
itsa,  
letting pc itsa, 253  
line—pc's line to the auditor—is a report on what has been as-ised, 243  
maker line—the pc's line to his bank—is invisible, don't cut it, 243  
pcs itsa on and on with no gain, cause of, 252  
what it is, 253, 254  
Ivory Tower rule, 344
- ### K
- know before you go, 405, 407  
knowingness, Scale of Knowingness; see *Scn 0-8*  
knowledge can be conceived to be ideas, patterns and creations and can include any concept or understanding, 232  
Know to Mystery Scale, 404; see also *Scn 0-8*
- ### L
- languages, Dianetics and Scientology in other ~, 443  
leadership test scores, low, handling of, 34

## SUBJECT INDEX— 1970/1971

- leave of absence, *defn.*, authorized period of absence  
from a course granted in writing by Course  
Supervisor and entered in student's study  
folder, 141, 286
- level(s); *see also* grade  
failing to use all processes for is a High Crime, 80  
higher levels do not solve lower level failures, 275  
still charged, reliable indicators are TA action and  
cognitions, 78
- Level I is out, no change, 70
- Level II is out, lots of ARC breaks, 70
- Level IV unflat, preclear makes others guilty, 70
- library, 207, 279, 397
- life exists in presence of understanding, 291
- Life Repair(s), 278  
need of Life Repair before Dianetics, 74
- list(s); *see also* listing and nulling  
can be extended beyond F/N, 278  
correction lists; *see* prepared lists, correction lists  
"dead horse list", 49  
Dianetic lists; *see* Dianetic lists  
errors are corrected by L4, 392  
errors, extreme upsets and deep apathies are al-  
most always, 392  
errors, withholds and list errors can cause high TA,  
281  
F/N everything found on ruds and lists, 197  
goes wrong = BPC = handle or do L4B or any L4  
at once, 46, 360  
Green Form, overlist, how to handle, 273  
isn't null; it is suppressed or invalidated, 11  
LXlists; *see* LXlists  
L1A, do an L1A if pc was not fully satisfied that  
all has been handled, 31  
L1B, 38, 39, 118  
never try to fly ruds or do L1B on a high or low  
TA, 197  
L1C, 203  
bad auditing, previous, can be cured by, 281  
best done Method 3, 280, 318  
handles ARC broken, sad, hopeless or nattery  
pcs, 203  
never C/S to take TA down with ARC break  
rud or L1C, 281  
not used on high or very low TAs to get them  
down or up, 318  
won't handle out lists, 281  
L3B, 227 LX1, LX2, LX3 out of valence lists, 330  
Dianetics and Ext RD Repair List, 220  
done Method 3, 280  
how to use, 227
- L4B,  
assessment method, 280, 318  
list errors are corrected by, 45, 119, 200, 357,  
360, 392  
out list can make ARC brk that can't be  
handled by ARC brk but only by L4B, 273
- LIXHi-LoTAList, 179, 194
- L9S, using L9S [L11], 298
- L9S, 37R is best done as part of L9S [L11], 296
- list(s) (*cont.*)  
L10, 467  
actions, 316  
out list(s), 281  
can make an ARC break that can't be handled  
by ARC break but only by L4B, 273  
handled before ruds, 273  
roller-coaster can be caused by out lists, 453  
prepared lists; *see* prepared lists  
that is getting no item, don't extend, use 14, 49  
trouble, Int RD trouble is worse than list trouble is  
worse than out ruds, 396  
trouble, use List L4 to locate and handle, 45, 357
- listing and nulling; *see also* lists  
ARC breaks, most violent session ARC breaks  
occur because of list errors under meaning of  
listing and nulling, 392  
don't list a pc on a Repair Program, use two-way  
comm, 93  
errors, 49  
handle first if Int isn't out, 280  
L4B—for assessment of all listing errors, 200  
eventual item listed must F/N, 196  
points a C/S must be alert to regarding listing, 392  
question,  
always test a listing question before letting pc  
list, 49  
in clearing a listing question auditor watches  
meter, not necessarily pc and notes any read  
while clearing question, 177  
must read to be listed, 45, 49, 357  
trouble, use a prepared list like L4B to locate  
trouble and handle it, without further C/S  
instructions, 45
- Locational Processing, 418  
as assist, 415
- location, to communicate one must be able to hold to  
a location, 264
- Logics; *see* *Scn 0-8*
- "Look at me. Who am I?" is used in a repair session  
when pc goes too wild to audit, 65
- low TA; *see* tone arm, low
- LRH; *see* Hubbard, L. Ron
- LSD, drugs, particularly LSD, can turn on whole  
track pictures violently, 328
- L (number); *see* lists
- LX list, run each flow chain to an F/N, 196

## M

- major action(s), 467, *defn.*, any, but any, action  
designed to change case or general con-  
siderations or handle continual illness or im-  
prove ability; means a process or even a series  
of processes like 3 flows; it doesn't mean a  
grade; it is any process case hasn't had, 47,  
360  
don't use to repair a case, 360

## SUBJECT INDEX— 1970/1971

- major action(s) (*cont.*)  
pc application for, 14,16  
R6 to OT III, closed band to other ~, 467  
set up case before starting, 14, 46, 360  
what they are, 14  
won't run, suspect it may have been done before, 276
- major grade process is definitely not enough to make pc make a lower grade, 103
- major processes done to improve case, 57
- major processes, don't use to repair a case, 47, 64
- major processes, subject of, keep out of two-way comm, 105
- major step, prepare a case for, 15
- manager, credo of a good and skilled manager; *see Scn 0-8*
- man, nature of, 156
- misundermannerism additives, 256
- mannerism changes in pc, 86
- manual, *defn*, booklet of instruction for a certain object or procedure or practice, 141, 287
- mass(es), massy  
absence of, 293  
auditor + pc as two pole system to as-is ~, 238  
clay table, mass parts are done by clay~ significance or thought parts by label, 163  
mental masses are what C/S handled, 77  
missing flows are still potential mass, 210, 213  
overrun is full of mass and ARC breaks, 268  
pc is continually searching for significance of mass or force, what is it, why is it, 77  
rehab keys out mass, 18  
"ridges" and ~ come about from a conflict of flows opposing or being pulled back as in withholds, 270  
self-auditing is manifestation of being overwhelmed by , etc. and pulling only think out of bank, 85  
significance vs. mass or force, 77  
studying without mass, symptoms of, 293  
thetans, massy, 212, 213  
tone arm records mass, 28,169  
tone arms, high, are caused by two or more flows opposing thus making a mass or ridge, 270
- materials, C/S mustn't tolerate missing ~, 378
- meaning of things plays a secondary role in processing to forces, 76
- relamechanics and consideration; *see Scn 0-8*
- medical care, after ~ people should be audited, 2
- medical treatment, 14
- medicine is treated like any other drug, 339
- medicines can turn on whole track pictures violently, 328
- mental masses; *see* masses, mental
- mental treatment, run out narrative R3R, 339
- meter; *see* E-Meter
- methods of assessment; *see* assessment methods
- methods of Word Clearing; *see* Word Clearing
- misprogramming, 209
- missed beginning of an exteriorization, 28,169
- misunderstood(s); *see also* Word Clearing  
action, 301  
alteration of meaning or action, at bottom of, is misunderstood word, 382  
blow can be caused by misunderstood data or overts, 141,162,198, 286, 294, 390
- C/S misunderstands from worksheets, 433  
definitions, relation to aptitude, 294  
doingness and misunderstood word, 295  
earliest misunderstood word in a subject is a key to later ~ words in that subject, 383  
effects of ~ word, 294,300,301,383  
exists at the bottom of a confusion, 373  
ideas, there is not also ~ ideas; there is only ~ word which breeds, then, huge towering wrong ideas, 373  
post, failed, and duties trace back to stood words, 381  
simple words are misunderstood, 383  
student's stat down, check for ~ word, 302  
Supervisor two-way comm and ~ word, 299  
tech, misunderstood word tech is sole course tech when course admin is in and materials are available, 303
- model performance tapes, 437
- moist hands give low TA, 422
- money, more interesting than delivery of service is self-defeating, 5
- morale of auditor, what it depends on, 380
- motion, Scale of Motion; *see Scn 0-8*
- multiple declare, *defn*, declaring 0 to IV to Examiner all at one time mostly without any mention of EPof grade, 102
- multiple somatic items, when to triple or quad narrative items or multiple somatic items, 211
- muzzled auditing; *see* auditing, muzzled
- mystery, Know to Mystery Scale; *see Scn 0-8*

## N

- narrative,  
chains of excessive length, 9  
items can give you trouble in R3R, 9, 208  
run out narrative R3R: accidents, illness, mental treatment, operations, 339  
run out narrative secondaries R3R: deaths of tives, family insanity, 33940  
somatics vs. narratives, 9  
when to triple or quad narrative items or multiple somatic items, 211
- "native ability" and "talent", related to ability to confront, 264
- natter is "other people's overts"; getting these off does not help the pc; getting pc's off does, 13
- nattery pc has withholds, 13, 58
- needle; *see* E-Meter needle; needle characteristics by name
- nervous system, sympathetic, and pain, 110, 111
- no case gain; *see* case gain and no case gain

## SUBJECT INDEX— 1970/1971

no change = Level I is out, 70  
No-Interference Area, 466  
    exception to No-Interference Area, 466  
no-somatic pc is either high as an angel or being run too high, 86  
not-is, pc's not-is of picture squeezes it into invisibility, 208  
null, list isn't null; it is suppressed or invalidated, 11  
nutrition, vitamin therapy, 425

### O

obnosis, *defn*, observing the obvious, 148, 248  
OCA/APA,

    any low point on left side of graph means pc out of valence, 462

    any low point on right side of graph means pc crazy, 462

    D of P operates by OCAs, 462, 463

    graph drops explained, 330

okay to audit system, 233, 234, 332

    Cramming Section issues okay to audit, 233

    franchises may adopt okay to audit system, 233

"omitted time" is abasicinsanity, 90

one-hand electrode, 106, 422

"one-shot clear" is impossible, 69

Operating Thetan,

    grades harmonic into OT levels, 98

    never order TRs after Solo materials study or before OT III is attested, 466

    OT IV Rundown, purpose and validity of, 102

    OT VI with problems is really just an unflat Grade I, 59

    pre-OT between R6 and OT III, it is possible to repair, so long as you are not trying to handle his whole case but only repairing grade he missed, 466

Operating Thetan Confronting; see TRs, OTTRO operations, 14

    pain from, handled by Dianetics, 110

    run out narrative R3R, 339

organization,

    is being paid to handle pcs, 4

    product of an org is well taught students and thoroughly audited pcs, 81

    results, organize to improve, 366

    routine basis of getting ~uditing into an org, 209

    should be seUsing more training than processing, 368

    success stories, real stat of an org, 88

    wins and stats, 367

organize, way to get out of cope, 380

origination cycle, 247

origination, handling of pc origination, 246

origin or clearing question, to miss seeing read on, is a gross auditing error, 177

OT; *see* Operating Thetan

out, *defn*, things which should be there and aren't or should be done and aren't, 141, 287

out-point list, 133

out-points, case is coUection of, 69

out tech; *see* technology, out

overlist shows up on Green Form, how to handle, 273  
overrepair, 278

overrun(s), 117, *defn*, doing something too long that has engrams connected with it which means an engram chain with too many engrams on it being restimulated by life or auditing, 76

    assessment of flows, 269

    chains, erased chains can be overrun; what happens is that pcs try to cooperate and put something there, 228

    continue is the reverse action to overrun, 269

    C/S Series 37 and C/S Series 37 Addition handling of overrun cancelled, 267; *see* C/S Series 37R [VII-268]

    Dianetic overrun, 18, 117

    flow jams up when run too long on an average human because his mind has "overruns" in it already, 270

    full of mass and ARC breaks, 268

    lists done on overrun by using the in-ARC approach, 269

    pc audited under tension of poor TRs has a hard time and does not F/N sometimes, inviting overrun, 197

    Scientology cycle of key-out, overrun, rehab, 18

    theory of overrun, 242, 268

    tone arms go high on overrun, why, 18, 122, 227

    tone arm, soaring TA = O/R or protest = find which and handle; such an O/R is usually by rehab, 46, 359

    "What has been overrun", list of, don't use, 269

what it is, 270

    what makes a thetan believe something can be ~ is effort to stop or effort to stop him, 268

overrunning, *defn*, accumulating protests and upsets about something until it is just a mass of stops; anyone can do anything forever unless he begins to stop it, 265

overshooting, *defn*, going beyond a completion or completing a completion, 130

overts,

    auditor overts on pcs, 277, 289, 362

    blows, overts are aprimary cause of, 42, 286

    natter is "other people's overts"; getting these off does not help pc; getting pc's off does, 13

    pc nattering has overts, 13

    perception and overts, 289, 340

    withholds and overts keep pc interiorized, 160

overwhelm(ed), 63

    cause of pc overwhelm, 64

    low TA is a symptom of an ~ being, 55, 76, 270

    pc is running badly, he's in an overwhelm, 64

    pc's behavior, mannerisms change if pc is improving; if they drop lower on Human Evaluation Chart pc is in ~, 85

    programming incorrectly can add up to ~, 62

    self-auditing is manifestation of being ~ by masses, etc. al'd pulling only think out of bank, 85

## SUBJECT INDEX— 1970/1971

overwhelm(ed) (*cont.*)  
sick person goes into overwhelm easily, 89  
TR 1, overwhelm, causes low TA, 270  
would indicate need of a Repair and Return, 69, 101  
Oxford Capacity Analysis; *see* OCA/APA

### P

pack, *defn.*, collection of written materials which match a checksheet, 141, 287

pain,

association, 112  
chronic aches and pains, to handle use C/S 54, 388  
human situation containing pain, handle by auditing, 2  
operations, pain from, handled by Dianetics, 110  
sympathetic nervous system pains, 110  
unresolved pains, reasons for, 110

Pan Determinism Scale; *see* Scn ~8

past lives, don't invalidate, 192, 452

past lives, even running them as "imaginary" as in *Science of Survival* advises suddenly breaks through for a stalled Dianetic case, 452

past lives, getting pc to run, 14

pc; *see* preclear

perceptics, list of, 25; *see also* Scn ~8

perception and overts, 289, 340

persistent F/N; *see* floating needle, persistent

physical gains, preclear may have, "without finding out about it", 74

Physiological and Behavior Scale; *see* Scn ~8

pink sheet, *defn.*, 287

plus-point list, 135

points, *defn.*, arbitrary assignment of credit value to a part of study materials, 141, 287

point system, *defn.*, system of assigning and counting up points for studies and drills that give progress of student and measure his speed of study, 141, 287

policy, how to get on ~ with tech organization, 367

post, failed posts and duties trace back to misunderstood words, 381

post, not wanting, cause of and handling, 381

post, poor post stats, how to handle, 33

Post Purpose Clearing, 342

auditor qualifications for ~, 342

C/S Form IR, 394

done after MI in general and M2 on duties and texts of post, 385

hatting, essential part of, is ~, 342

section of Dept 13, Div V, Qual Div, 342

potential trouble source; *see also* roller-coaster handling; *see* PTS Rundown

pcs who do not hold their gains are PTS, 452

when someone is suppressed he becomes a ~, 452

power depends upon ability to hold a location, 264

power of choice, thetan's, how it has been overthrown, 257

Power [process] in SH HGC, okay to audit requirements, 234

Power [process] requires flawless auditing and C/Sing, 229

Power [process] will not need repair after pc has gone Clear, 143

practical, 447, *defn.*, drills which permit student to associate and coordinate theory with actual items and objects to which the theory applies; practical is application of what one knows to what one is being taught to understand, handle or control, 140, 286

preclear(s)'s); *see also* case

ability to as-is or erase in a session is directly proportional to number of good indicators present in session, 258

ability to confront force, 79

antagonistic = BPC = assess proper list (such as LIC) and handle, 46, 359

ARC breaks, high percentage of, occur because of failure to understand pc, 251, 428

ARC broken by TRs 0 to 4 will not read properly on a correction list, 465

attaining end phenomena before all processes run, what to do, 48, 361-62

attention not on his bank, doesn't as-is or cognite, 230

auditing above pc's level gives no gain, 85

auditor actions regarding pc; *see* auditor

backlog of pcs, what is required to handle, 5

bank, auditor plus pc is greater than pc's bank, 230, 366

blaming the pc, don't, 277

cannot attest a grade ability at any point has to have a Repair Program and Return Program, 70  
cannot confront doing Solo Grades, reason will be found to be drugs, 466

Case Supervisor actions regarding pc; *see* case supervising

chilled pc almost always has a high TA until he gets warm, 424, 438

cognitions, how pc gets, 76

complaining routinely, means need of Repair Program, 62; *see also* Repair Program

completions, 371

critical = W/H = pull W/H, 46, 359

data of pc is used to parallel what mind does, 84  
demanding next grade, 83

desire or complaint, no reason or excuse not to actually handle these with auditing, 4

Dianetic pc; *see* Dianetics

doesn't change, means his reality is not being reached, 85

doesn't F/N at Examiner, how to handle, 217

doesn't want auditing can come from bad L&N list or out Int or out ruds, 280, 281

"dog cases", pcs not running well, 205

dope off = lack of sleep or BP F/N = check on sleep, or rehab F/N, 46, 359

dramatizes = R6EW unflat, 70

## SUBJECT INDEX—1970/1971

- preclear(s)'s) (*cont.*)  
exterior, handling body, 79  
exteriorizes in session, handling; see *also* Interiorization Rundown  
it is EP for that process or action, 225, 457  
later his TA goes high, then you do an Int RD, 400, 460  
TA high at Examiner, rehab exteriorization point, 19  
falsifies TA, 438  
folder; see folder  
"getting an F/N at will" is not in session, 438  
grade he can't seem to make is not the grade, 70  
has somatics, Dianetic level unflat, 70  
ill pc; see ill, illness  
in trouble and TA high, what your first suspicions should be, 457  
is generally right when he says he's overwhelmed or upset; he's almost always wrong when he says what overwhelmed him or what BPC was out when simply saying it does not correct the case or produce F/N VGIs, 83  
itsa on and on and on and on with no gain, cause of, 252, 253  
justifying himself and trying to uphold status is not in comm with auditor, 241  
life knocking ruds out faster than they can be audited in, how to handle, 191  
looking inward still, never jolt or interrupt, 21, 22  
makes others guilty = Level IV unflat, 70  
mannerism changes in pc, 85, 86  
massy, pc considers himself mesty or massy so second terminal is required to discharge energy, 238  
may have physical gains "without finding out about it", 74  
must attain full ability on each level of Grade Chart before going on, 56  
nattering, has overts, 13  
nattery pc has withholds, 38  
new preclear, handling, 47  
no interest = no interest in first place or out ruds = check for interest or put in ruds, 46, 360  
no-somatic pc is either high as an angel or being run too high, 86  
no TA (or case gain) = problem = locate problem, 359  
not making it in auditing should be checked for a drug or alcohol history, 320  
OCA/APA, any low point on right side of graph means pc is crazy, 462  
OCA/APA drop after auditing, pc was out of valence, 330  
originates by throwing down cans, that's still an origin, 246  
originations; see TR 4  
out of valence pc, how to handle, 330  
overwhelm, cause of, 64  
past lives, getting pc to run, 14
- preclear(s)'s) (*cont.*)  
past track, pc who doesn't go past track in Dianetics doesn't recover, 452  
Power will not need repak after pc has gone Clear, 143  
procurement of, 184  
program goofed, repak auditor and goofed pc and continue program, 276  
Quickie Grade pc, handling of, 98,131  
reality factor, 74  
repair of a Dianetic pc, 74  
repair, use light handling on pcs who need lots of repair, 93  
rings on pc's hands must be removed as they cause a false rock slam, 342, 424  
roller-coasters despite an F/N at session end must be handled by Tech or Qual within 24 hours, 174  
ruds must be flown when pc has not had a session for some time, 357  
ruds won't fly = some other error = assess GF and handle, 360  
running a temperature, 335  
running badly, he's in an overwhelm, 64  
running on and on and on caused by premature or late-or-never acks, 253  
runningwell, don't throw into repair, 48, 278, 362  
sad = ARC break = locate and handle, itsa earlier itsa, 46, 359  
self-auditing, how to detect and handle, 191  
session went wrong, ask pc what auditor did, 48, 363  
significance, pc search for significance, 77  
steering a pc, 259  
still has somatics, no further items on assessment list read, cause of and handling, 11  
suddenly relapses onto drugs, symptoms of, 192  
suppresses or invalidates something, read transfers to suppress or invalidate, 12  
telling what is wrong, 82  
tends to dive for thought imbedded in force, 79  
tired = no sleep or failed purpose = check which it is and handle, 46, 359  
tone arm; see tone arm  
too wild to audit, 65  
training, lack of, means more trouble for pc in making his gains stably, 60  
unconscious pc, how to audit, 323  
under tension of poor TRs has a hard time and does not F/N sometimes, inviting overrun, 197  
unflat on Dianetics will have out lower grades, 59  
upset pc, assessment method to use, 51  
volunteers some answer to unreading question, how to handle, 317  
whodonotholdthegainsarePTS, 452  
who has trouble needs tracking, 99  
who resent F/N indications, cause of, 78  
Preclear Application Form for any major auditing action, 14, 16  
Preclear Assessment Form, use of, 339, 340

## SUBJECT INDEX— 1970/1971

- pregnant woman, Dianetic auditing on, 2  
Pre-Havingness Scale; *see Scn 0-8*  
Prelogics; *see Scn 0-8*  
premature acknowledgements, effects of, 252, 253  
pre-OT between R6 and OT III, it is possible to repair grade he missed, 466  
pre-OT having a Solo and auditing folder, C/S must look at both before C/Sing, 95  
prepared list(s),  
    assessment of prepared lists, 51, 280; *see also C/S Series 83RA [X-230]*  
        Method 3 assessed can be ended off on a big win, 317  
    combined action of locating and handling using prepared lists, 406  
    correction list(s), 465  
        assessment method, 465; *see also C/S Series 83RA [X-230]*  
        Cramming action when correction list said to be blank, 464  
        designed to find by-passed charge and repair a faulty auditing action or life situation, 51  
        primary tool of a C/S is prepared correction lists, 387, 465  
        TRs and correction lists, 464, 465  
        use of, 51, 464  
    CISing prepared lists for new auditors, 410  
    error in using prepared lists, 51  
    programming from, 280, 405  
    sequence of handling reads on ~, 280, 281  
    two-way comming reading items, 411  
    use of prepared lists, 51, 65  
    you take each read to an F/N, or E/S to F/N, 196  
prepcheck(ing),  
    always test an item for read before Prepchecking or running recall or engrams, 50  
prepcheck an item that doesn't read, 49  
    never prepcheck while doing Dianetics, this mashes up engrams, 228  
    two-way comm is lighter than Prepcheck, 93  
    when Prepcheck uncover~ and handles ARC break to EP, it is EP of that Prepcheck, 35  
present time problem, auditing over a W/H and PTP = no case gain, 123; *see also* problem; rudiments  
pressure, high TAs, heavy pressures and even illness can come from by-passed flows, 212  
pressure, pcs are uncomfortable, feel under pressure, when their TA is high, 169  
problem(s); *see also* present time problem  
    auditor worried about his pc is working over a problem, 362  
    case not advancing has problems, 58, 101  
    Grade II or above has a problem, that means Grade I is out, 101  
    no TA (or case gain) = problem = locate problem, 46, 359  
    OT VI with problems is really just an unflat Grade I, 59  
    shows up as an out rud in GF 40 and is simply put in as a rud not as a grade, 101  
process(es),  
    auditing a process is a simple A to B action, 289  
    auditors must read materials and check out before they do the process, 378  
    bullbait that uses actual processes or implants should be stamped out hard, 192  
    can be short-cut as well as programs, folly of, 90  
    cognition and flattening of a process, 242  
    cycle, 261  
    Dianetic auditing below Power has four definite reactions in pc which show process is ended, 20  
    discharged process no longer gives TA, 77  
    doesn't work until auditor has a comm line to pc, 241  
    don't run an out of ARC process, 268  
    end phenomena of processes, 78  
    extra processes, use *The Book of Case Remedies* and those *Creation of Human Ability* processes not used in standard rundowns, 432  
    failing to use all ~ for level is a High Crime, 80  
    major processes are done to improve case, 57  
    "old" ~ are not cancelled by new ones, 100  
    pc attaining end phenomena before all processes run, what to do, 48, 361  
    will not function in presence of bad TRs, 348  
processing; *see* auditing  
procurement letters, auditors who have no pcs write procurement letters, 184  
program, programming, 56, 58  
    *defn.*, any series of actions designed by C/S to bring about definite results in pc, 47, 360  
    *defn.*, sequence of actions session by session to be undertaken on case by C/S in his directions to auditor or auditors auditing case, 56  
    *defn.*, overall planning for person of courses, audit ing and study he should follow for next ex never tended time period, 141, 287  
    Advance Program; *see* Advance Program  
    A to B action, 289  
    auditors, let them complete programs on pcs even though going to Cramming, 380  
    backwards programming, 387  
    Classification and Gradation Chart and all its processes and steps is basic ~ of any case, 56, 57  
    complete when EP of program is attained, 261  
    correct way to program, 57  
    cross programming, 261  
    cycle, 261  
    data, programming without data is risky, 209  
    Dianetic programming, 340  
    dispersal, 57, 58  
    errors, 61, 206, 209, 387  
    give priority to recent auditing errors or recent life catastrophes, 65  
    goofed, repair auditor and pc and continue ~, 276  
    Grade and Program violations, 47, 361  
    incorrect can add up to overwhelm, 62  
interjected programs, 261  
    length of programs, 87, 186  
    misprogramming and programming, 209

## SUBJECT INDEX— 1970/1971

program, programming (*cont.*)  
necessity, 59  
Preclear Assessment Form, program from, 340  
prepared lists, programming from, 280, 405  
Progress Program; *see* Progress Program  
quality, how to raise, 209  
Repair Program; *see* Repair Program  
Return Program; *see* Advance Program  
short-cut, 90  
"stale dated program" means it is too old to be valid, 356  
TRs are a program, 261  
types of programs, 57  
Progress Program, 98, 186; *see also* Repair Program  
has reached its EP when pc is running well again, 278  
may reach EP before written up program is completed, 261  
protest, auditing pc under protest will cause TA to stayup and no F/N, 208  
protest is frequent reason for high TA, how to handle, 281  
protest, TA soaring = O/R or protest, find which and handle, 46, 359  
psychiatric "cures" are implantings with compulsive ideas, 112  
psychiatric history, handling of, 34  
psychiatrists, 113, 450  
psychiatry and psychoanalysis costs, 113  
"psycho"analysis, hypnotism, "psychiatry" and other implant type therapies often key in and jam track, 449  
psychology, perversion of the term, 383  
psychosis, 155  
misunderstood words and psychosis are only reasons for post failure, 381  
psychoticbehavior, 157, 158  
psychotic is motivated by intent to harm, 157  
PTS; *see* potential trouble source  
PTS Rundown, 452, 453, 454  
commands of PTS Rundown, 454  
end phenomena, 453  
sick pcs should not be run on ~ as standard practice, 453  
valence shifts occur rapidly and frequently in PTS RDs, 453  
when to run, 453  
public lecture tapes, 435, 436  
purpose clearing, 342, 385; *see also*  
Clearing  
person's job or situation in life, 385  
purpose, failed, pc tired = no sleep or failed purpose = check which it is and handle, 46, 359

### Q

Q and A, *defn.*, is incorrect 2-way comm action of wandering off question by feeding pc what pc said as question; Answer is taken as next auditor's Question, 40, 82

Q and A (*cont.*)  
C/S Q and A, 75, 82, 83, 406  
to abruptly C/S everything pc has just said is Q and A; but worse, it can lead to evaluation, 406  
with Exam statement of pc, 82  
with thoughts already in full view and you'll never really ease up bank, 84  
Qs (The Prelogics); *see* *Scientology 0-8*  
Quadruple Dianetics, 188, 210, 212, 226, 324, 459  
already flat Zero Flows are not uncommon, 228  
checklist, 189  
dangers of, 226  
do not audit four flow items until earlier Dianetic items brought into four flows, 210  
errors, 226  
how to C/S a case for Quad Dianetics, 188  
on Clears and OTs, 211  
requirements, 190, 226, 233  
results of Quad Dianetics, 190  
safe course is to use Quad only on new never audited before pcs; those begun on Triples, use then only Triple Flows, 228  
Triple and Quad reruns, 212  
use of Quadruple Dianetics, 188, 210  
when to triple or quad narrative items or multiple somatic items, 211  
Qual, *defn.*, Qualifications Division (Division V of an org) where student is examined, crammed and awarded completions and certificates and where his qualifications are made a permanent record, 141, 287  
Consultant service for pcs and students, 176  
has to have a library, 207  
internes are a section in Qual, 332  
Post Purpose Clearing, section of Dept 13, Div V, Qual Div, 342  
Tech and Qual terminals and lines, C/S must coordinate, 375  
Qual Sec, Cramming Officer and Interne Supervisor are close technical links with C/S, 377  
Qual Sec is responsible for overall tech quality, how he achieves this, 183  
"quickie", cultural inclination to "quickie", 87  
Quickie Grades, 56, 99, 130  
bug behind Quickie Grades, 144, 145  
crashed whole Scientology network, 88  
Lower Grades (also called "Triple Grades"), *defn.*, one F/N for each of three flows or 3 F/Ns per grade, 432  
Post Purpose  
pc who had Quickie Grades, handling of, 98, 131  
"quickies", F/N abuse and "quickies", 78

### R

reach and withdraw, auditing as, 239  
"Reach and Withdraw" in repairs and touching things, 65  
reactive mind,  
all forces in bank contain significance, 77  
auditor plus pc is greater than pc's bank, 230

## SUBJECT INDEX— 1970/1971

- reactive mind (*cont.*)  
banks don't read, only thetans impinged upon by bank read; therefore TR 1 must be addressed to thetan, 10  
common denominators of bank are out of ARC and stop, 269  
picking thoughts out of forces in bank brings a no-change, 85  
straightens out by as-ising its content, 230  
read(s)(ing), 177, *defn*, small falls or falls or long falls or long fall blowdown, 49; *see also* E-Meter  
auditor does not tell pc anything about meter or its reads ever, except to indicate F/N, 259  
auditoreyesightandreads, 178  
auditors who can't get reads, how to handle, 273  
item; *see* item  
listing question, always test listing question for read before letting pc list, 45, 49  
metering reading items, 177  
most stopped read, 270  
non-reading item or question, 45, 49, 178, 357  
pc suppresses or invalidates something, read transfers to suppress or invalidate, 12  
questions must read to be listed, 45, 357  
seen during pc origination or clearing question, failing to mark on list or W/S, is gross auditing error, 178  
shows pc has reality on item, 75  
taken when pc first says it or when question is cleared, 177  
things that don't read won't run, 50, 208  
"tick" or "stop" is not a read, 49  
two-way comm subject chosen must be tested for read, 104, 105  
reality, *defn*, solid objects, the real things of life, 291; *see also* ARC  
charge shows that pc has possible ~ on area, 50  
communication and reality; *see Scn 0-8*  
factor, 74  
never order one that takes pc into future or past, 273  
pc doesn't change, means his ~ is not being reached, 85  
proportional to amount of charge removed, 450  
read, shows pc has reality on item, 75  
reality-spotting by E-Meter; *see Scn 0-8*  
red tagging flubbed sessions, 138  
Registrars' Advice Form, 7  
Registrar that promises instant miracles is cutting Tech Sec's throat and GI as well, 6  
rehab, rehabbed, rehabbing, rehabilitation, chains, 227  
drug chains are ~ and run out by Dianetics 192  
erasures, you can't rehab erasures with "How many times?", 227  
keys out mass, 18  
liability of rehab, 212  
Return Program, rehab of processes on, 74  
run or rehab, 214  
Scientology cycle of key-out, overrun, rehab, 18  
relationships, table of; *see Scn 0-8*  
Remedy DDDA 400A for chronic high TA, 19  
remembering, handling of cases who flinch at ~ any thing at all, 65  
repair, 324, *defn*, patching up past auditing or recent life errors, 46, 360; *see also* Repair Program  
actions, 65  
auditing repair, 51  
blind repair, 143  
C/S, ingenuity is required of C/S only in area of repair, 64  
general repair is harmful when big bug exists, 218  
is undertaken to eradicate errors made in auditing or environment which impede use of major processes, 57  
liability of goofed repair, 92  
"Look at me. Who am I?" is used in repair session when pc goes too wild to audit, 65  
major action, don't use to repair case, 47, 64, 360  
many cases have to begin processing with ~, 65  
mimicry is actually too high for repair, 65  
pc running well, never repair, 48, 278, 362  
pcs who need lots of repair, use light handling, 93  
pc who isn't running well is one you repair, 278  
preparedlistsinrepairs, 65  
program goofed, repair auditor and goofed pc and continue program, 276  
programming errors and delay in repair can cause pc illness, 61  
Tech Div action, 74  
touching things and "Reach and Withdraw" in repairs, 65  
TRs are a fine unlimited repair action, 65  
use Method 3 assessment, 51  
RepairProgram; *see also* ProgressProgram; *repair defn*, eradicates case mishandling by current life or auditing errors, 57  
*defn*, takes case from where it has falsely gotten to on Class Chart and gets off overwhelm with light processes, 69  
dangerous to accept Repair (Progress) Program, if it is old, 356  
difference between ~ and Return Programs, 69  
end phenomena, 62, 276, 278  
errors, 73  
exact BPC of last session is always first action, 63  
Examiner Reports which routinely have sour notes in them indicate need of Repair Program, 62  
first on auditing, then on life, 70  
keep new auditors off, 93  
listing, don't list pc on Repair Program, use two way comm, 93  
must be very light, 61  
on a red sheet, 60, 94  
overwhelm would indicate need of ~ and Return, 101  
pc routinely complaining means need of ~, 62  
repairing a Repair, 92  
Return and Repair Programs, use of, 69, 70  
sample, 62, 72

## SUBJECT INDEX— 1970/1971

- reports, false, 229, 362  
resistance, tone arm actually measures , 28,169  
resistive case; *see* case, resistive  
Responsibility Scale; *see* *Scientology* 0-8  
restimulation,  
    any later grade run with more flows than used in ``  
    earlier actions can throw earlier unflat flows  
    intorestim,212  
    auditor causes restimulation and then pc needs to  
    answer question to get rid of restimulation, 244  
    engram chains go into ~ on overrun in life, 18  
    overrun results in high TA because it throws  
    engram chain into restimulation, 18,122  
result is result and time is just an entered arbitrary,  
    88  
results, do not cripple auditing by leading pcs to  
    expect instant results every time, 6  
retrain, flunk and, 128  
retraining is an inevitable part of C/S's job, 152  
retraining, what it must include, 128  
retread, it is illegal to give retread course away, 165  
Return Program; *see* Advance Program  
review actions are done in Tech as patch-up in Tech,  
    183  
reviewing reviews, 362  
Review, when high TA after Singles send pc to  
    Reviewbefore Triples, 1  
R-factor; *see* reality factor  
"ridges" and masses come about from conflict of  
    flows opposing or being pulled back as in with-  
    holds, 270  
rightness, auditing is action by which wrongnesses can  
    be deleted from case to degree that rightnesses  
    are present in session, 258  
rightness, recognition of rightness of the being, 257  
rights of auditor with relation to C/S, 48, 363  
riot, *defn*, simply a psychosomatic momentary injury  
    or traumatic condition on third dynamic, 416  
Rising Scale [process], there are 18 pairs, each pair  
    should be run to F/N, cog, VGIs, 90  
Rising Scale [process] will sometimes restore fertility  
    or change eyesight, 90  
rock slam, rings on pc's hands give false rock slam,  
    342, 424  
rock slams, why a person who rock slams on Scien-  
    tology or auditors can't audit well, 251  
roll book, *defn.*, master record of course giving  
    student's name, local and permanent address  
    and date of enrollment and departure or com-  
    pletion, 141, 287  
roller-coaster(ed), *defn.*, slump after a gain, 452; *see*  
    *also* potential trouble source  
    can be caused by bad Int RD or Int repair, out  
    lists, by-passed charge of other descriptions, 453  
    cause of roller-coaster is PTS, 452  
    insane, as cases in normal processing they ~ con-  
    tinually, 155  
    only PTS situation that is serious and lasting and  
    can cause roller-coaster comes from having  
    known person before this life, 452  
roller-coaster(ed) (*cont.*)  
    pc who has ~ despite F/N at session end must be  
    handled by Tech or Qual within 24 hours, 174  
Ron; *see* Hubbard, L. Ron  
R/S; *see* rock slam  
rudiments, *defn*, setting case up for session action;  
    includes ARC breaks, PTPs, W/Hs, GF or O/R  
    listing or any prepared list, 46, 360; *see also*  
    ARC break; present time problem  
C/S Series 37R and ruds, 296  
flying ruds added to Temperature Assist, 364  
F/Neverythingfound onruds andlists, 197  
Green Form is done when ruds won't fly, 45, 46,  
    357, 360  
inability to fly ruds, 45, 357  
outlistshandledbefore ruds, 273  
out ruds,  
    "audited over out ruds" reads on GF 40, handle  
    first, 35  
    auditing pc on something else whose ruds are  
    out is a major auditing error, 356  
    C/S omits "Fly a rud" or "Fly ruds" does not  
    justify auditor auditing pc over out ruds,  
    357  
    every out rud you get a read on is run E/S to  
    F/N, 196  
    Int RD trouble is worse than list trouble is  
    worse than out ruds, 396  
    life knocking ruds out faster than they can be  
    audited in, 191  
    list of pc indicators and which rud is out,  
    4546, 359-60  
    nothing else will straighten up and you mustn't  
    order auditors to audit with out ruds, 281  
    pc is often ill because his ruds in life are out,  
    364  
    pc no interest = no interest in first place or out ~  
    = check for interest or put in ruds, 46, 360  
    problem shows up as an out rud in GF 40 and is  
    simply put in as a rud not as a grade, 101  
    two-way comm session, ruds going out must be  
    put in by auditor, 105  
    pc has not had a session for some time, ruds must  
    be flown, 357  
    tone arm high, don't fly ruds, 45,197, 358  
    use suppress and false to fly ~, 45, 357  
rundown, one C/Ses or audits a as itself, not as a  
    botchofseveralactionsrunintoit,289  
rundowns, don't let major be done twice, 359  
R3R; *see also* Dianetics; engram running  
    commands, 211  
    must be precisely given and all commands 1-9  
    A-D are used; it is never shorted "because  
    the pc did it", 189  
floating needle on R3R, 20  
flub, 189  
items, somatics, sensations, emotions, attitudes, 9  
narrative items can give you trouble in R3R, 9  
narrative R3R, use on accidents, illness, mental  
    treatment, operations, 339

## SUBJECT INDEX— 1970/1971

### R3R (*cont.*)

- narrative secondaries, R3R, use on deaths of relatives, family insanity, 33940
- overrun, why it gives high TA, 18
- pc originates "It's erased" and TA remains high, do ABCD once more or rehab last chain, 208, 218-19

### R6,

- pc dramatizes = R6EW unflat, 70
- pre-OT between R6 and OT III, it is possible to repair grade he missed, 466
- to OT III you have a closed band for other major actions, 467

## S

sad, auditor who goes sad is auditing pcs over his own ARC break, 362

sad, LIC handles ARC broken, sad, hopeless or nattery pcs, 203

sad, preclear sad = ARC break = locate and handle, itsa earlier itsa, 46, 359

scheduling, *defn.*, hours of a course or designation of certain times for auditing, 141, 287

Scientologist, Code of; *see Scn 0-8*

Scientology,

- auditing is more delicate than Dianetic auditing, 21

Axioms of; *see Scn ~8*

description of; *see Scn ~8*

Dianetics and ~ in other languages, 443

integrity is hallmark of Dianetics and , 362

"Quickie Grades" crashed whole ~ network, 88

religion, Creed of the Church; *see Scn 0-8*

self-auditing and solo auditing, difference between, 61

self-auditing, how to detect and handle, 191

self-auditing, manifestation of overwhelm, 85

Senior C/S, lines of, 182

sensations, emotions, attitudes, somatics, Dianetic breakthrough came in assessing only, 9

sensitivity of E-Meter, how to set correctly, 316

service and handling are the same thing, 4

session(s),

- auditing itself is a sort of time track, earliest session blows later sessions, 210
- auditor is responsible for session, 235, 250, 428
- challenging people out of session as "having withholds" is illegal, 167
- confront, ability to confront pc and session and parts of session permits one to accurately go from A to B, 289
- ending session is totally up to auditor, 44, 356
- far apart barely keep up with life; ruds must be flown, 357
- flubbed session is visible at Examiner, 138
- Folder Summary for each session, 276
- goofed session must be repaired within 24 hours, 138
- goofed session, repair of, 61

session(s) (*cont.*)

grading, 180

flunk, when given, 128

no mention, *defn.*, 127

very well done, *defn.*, 127, 181

well done, *defn.*, 127, 181

"well done by exam", *defn.*, 181

in session, *defn.*, interested in own case and willing to talk to auditor, 230, 259

pcs "getting an F/N at will" are not in session, 438

more economical if long, 186

org having only 65% of its sessions F/N VGIs at Examiner, what to do, 366

perfect session, 230

priorities, 61

red tagging flubbed sessions, 138

short sessioning has its uses: small children, sick people, psychos, 187

starts of sessions, types of, don't mix them, 274

that tries to go beyond a big dial-wide drifting floating F/N only distracts pc from his win, 144

tone arm high at session start, 45; *see also* tone arm, high

unrepaired for more than 24 hours occasionally find pc physically ill, 139

went wrong, ask pc what auditor did, 48, 363

set-up(s), 51, 277, 467, *defn.*, getting an F/N showing and VGIs before starting any major action, 47, 360

always ~ case fully for next major action, 277

auditing set-up actions, 14

seven types of resistive cases; *see* case, resistive

short programs are for the birds, 87

short sessioning has its uses: small children, sick people, psychos, 187

"Shut your eyes and look at my fingers", assist, 418

sick; *see i~*

"sight" translator is one equally good in two languages who can hear one language and speak translation into other language without hesitation, 441

significance(s),

all forces in bank contain significances, 77

clay table, mass parts are done by clay, significance or thought parts by label, 163

C/Sing towards ~ produces non-advancing cases, 77

force vs. significance, 77, 85

pc search for significance, 77

;covered or realized by the pc only shows up as cognitions, 77

thetan can postulate or say or reason anything; thus there is an infinity of significances, 77

skipped gradient, *defn.*, taking on a higher degree or amount before a lesser degree of it has been handled, 265

sleep, students who go to sleep during study, handling of, 67

small hands and can size, 107

## SUBJECT INDEX - 1970/1971

- Solo,  
  auditing and self-auditing, difference between, 61  
  cans, 106, 109, 422  
  pc cannot confront doing Solo Grades, reason will be found to be drugs, 466  
  sources of failure on Solo, 467  
  TRs and Solo, 341, 466
- somatic(s),  
  after exteriorization, 42  
  auditor doesn't get pc's somatics, 238  
  case has ~ = Dianetic level unflat, 70, 99  
  chronic somatic(s),  
    almost all, have their root in force, 76  
    chronic aches and pains, to handle, there is C/S 54, 388  
    Dianetic handling of, 139  
    Dianetics and Class VI actions can and do handle, 15  
    how to program a pc who has a chronic somatic, 123  
  in injured area, persistent or recurring, answer to, 110  
  narratives vs. somatics, 9  
  no-somatic pc is either high as an angel or being run too high, 86  
  passing through in session are a definite clue to force change, 86  
  pc still has somatics, no further items on assessment list read, cause of and handling, 11  
  running ~ permits you to get to a basic, 9  
  sensations, emotions, attitudes, R3R items, 9  
  source, keep Dianetics and Scientology "on source", 445
- SP; *see* suppressive person
- speed liability and honest results, 87, 90, 91
- spiritual being, timeless and deathless, proof that individual is, 27, 168, 420; *see also* thetan
- spotting tone drill, 149
- squirreling, *defn.*, is careless, incomplete, messed up auditing procedure, 5
- staff members or executives who show signs of obsessive transfer of staff, handling of, 439
- Stage 4 needle (sweep, stick, sweep, stick), 145
- "stale dated program" or a "stale dated C/S" means it is too old to be valid, 356
- standard tech; *see* technology, standard
- starrate checkout, *defn.*, very exact checkout which verifies full and minute knowledge of student of portion of study materials and tests his full understanding of data and ability to apply it, 140
- stat(s),  
  auditor's stat, 129, 147  
  depend on volume and quality of service, 367  
  drops after tape congresses, explanation, 436  
  org wins and stats, 367  
  poor post stats, how to handle, 33  
  student's stat down, check for misunderstood word, 302  
  success stories, real stat of an org, 88
- State of Case Scale; *see* *Scn 0-8*
- steering a pc, 259
- stop,  
  chronically high TAs mean person can still stop things and is trying to do so, 76  
  common denominators of bank are out of ARC and stop, 269  
  effort to stop or effort to stop him makes a thetan believe something can be overrun, 268  
  insanity, "stop everything" is entrance point of insanity, 268  
  "stop" is not a read, 49  
  stress, E-Meter used to detect, 68
- student(s); *see also* training  
  auditing skill of any student remains only as good as he can do his TRs, 348  
  blows, cause of, 162, 198  
  completions, 369  
  consultation, *defn.*, personal handling of student problems or progress by a qualified consultant, 141, 287
- Course Supervisor actions regarding student; *see* Course Supervisor
- course tapes are never played to a group of ~, 435
- difficulties with tape recorded materials, how to handle, 67
- drift off of courses because they lack somebody to talk to, 175
- file system, 447
- F/Ning students, 412
- "glib" students, 264
- grasp of materials, 236
- in trouble, handling of, 175
- learns rapidly, has a high ability to confront that subject, 264
- meter check is action of checking reaction of student to subject matter, words or other things, isolating blocks to study, interpersonal relations or life, 286
- new students asking technical questions, how to handle, 236
- only fails by not confronting, duplicating, absorbing and using the materials before him exactly like it says, 237
- Qual Consultant service for students, 176
- sleeping during study, handling of, 67
- slow, 162, 175, 301, 448
- stat down, check for misunderstood word, 302
- who can't apply, reason for, 264
- study,  
  barriers to study, 293  
  by-passed definition, 293  
  studying without mass, 293  
  too steep a study gradient, 293
- definitions, 140, 286
- gradient of confronting study, 265
- poor study record, how to handle, 33
- rundowns, require C/S okay, 192
- Study Tapes, only piece of technology you use on a course, 302

## SUBJECT INDEX—1970/1971

stupidity is the effect of misunderstood words, 383  
success story, *defn*, statement of benefit or gains or wins made by student or pc or pre-OT to Success Officer, 141, 288  
    real stat of an org, 88  
suicide or illness in the field of study or education, cause of, 293  
Supervisor; *see* Case Supervisor; Course Supervisor  
suppress and invalidate,  
    buttons, 11, 50  
    list isn't null; it is suppressed or invalidated, 11  
    pc suppresses or invalidates something, read transfers to suppress or invalidate, 12  
    ruds, use suppress and false to fly, 45, 357  
suppressed, when someone is suppressed he becomes a potential trouble source, 452  
suppressive person, characteristics classified as those of SP are in fact those of insane person, 155  
suppressive person has to be out of valence to be SP, 330  
supreme test of a C/S or auditor, 289, 290  
survival, continue is the reverse action to overrun;  
    continue equals survival, 269  
sympathetic nervous system pains, 110

### T

TA; *see* tone arm  
tagging cases, 406  
"talent" and "native ability", related to ability to confront, 264  
tape(s),  
    briefing tapes, designed for a special and informed audience, 436  
course notebooks, 447  
    course study tapes, 435  
    course translation to tape, 441  
    how to use, 434  
    model performance tapes, 437  
    player and earphones used must be high fidelity, 435  
    players used must be equipped with a foot pedal start-stop control, 441  
    public lecture tapes, 435  
    raw public tape and film presentations are a must to keep flavor and meaning of Dianetics and Scientology, 436  
    stat drops after tape congresses, explanation, 436  
    student difficulties with tape recorded materials, how to handle, 67  
    teaching a tape course, 446  
    types of tapes, 434  
team activity, auditing is, 365  
Tech Div actions, 74, 183  
Tech Div and Qual Div terminals and lines, C/S must coordinate, 375  
Tech Establishment Officer is concerned with establishing, 377  
technical degrades, 80

technique, basic auditing is called basic auditing because it goes prior to the technique, 239  
technique, communication cycle must exist before technique can exist, 239  
technique is *what* has to be as-ised, and how you go about it, 238  
technology (tech),  
    basics are not cancelled by later developments, 100  
    C/Sing, don't wander off known tech points in, 279  
    decay of tech begins with hidden data lines that are not true, 279  
    done in proper administrative framework, works, 368  
    hierarchy of org, 377  
    out tech, 115  
        Exam non-F/N indicates flagrant out tech in programming and C/Sing and auditing, 217  
    primary failure of new technology, 378  
    Qual Sec is responsible for overall tech quality, how he achieves this, 183  
    Registrar must not give ~ advice to pc, 7  
    results, to improve, you must improve administration, 365  
    savvy, 254  
    standard tech and invalidation, 23  
    standard tech is not a process or a series of processes; it is following the rules of processing, 23  
    technical person must keep up with advances in technology, 378  
    verbal tech, how it comes about, 303  
    will be as good as Cramming Officer can cram, 184  
Tech Page, 181  
Tech Sec is mainly concerned with production, 377  
Tech Services, *defn*, activity which enrolls, routes, schedules, distributes mail of and assists housing of students, 140  
    actions of, 181  
Temperature Assist, flying ruds added to ~, 364  
Temperature Assist, Version A, 335  
Temperature Assist, Version B, 336  
temperature, persistent, can be brought down by running pc on Objective "Hold it still", how to run, 335  
terminal, pc considers himself mesty or massy so second ~ is required to discharge energy, 238  
test scores, low aptitude, IQ and leadership, handling of, 34  
theory, *defn*, data part of course where data as in books, tapes and manuals is given, 140, 286  
thetan(s),  
    can do anything forever, 268  
    can postulate or say or reason anything; thus there is an infinity of significances, 77  
    considering himself mest, liability of, 238  
    effort to stop or effort to stop him makes a thetan believe something can be overrun, 268  
    find counter-forces objectionable, 76  
    force-shy thetan, how one becomes a, 86  
    has to be at earliest end of incidents to erase them, 212

## SUBJECT INDEX— 1970/1971

- thetan(s) (*cont.*)  
incident hungry, 212  
keynote of thetan is order, 417  
living in body makes a being vulnerable, 79  
massy thetans, 212  
natively capable of logical thought, 77  
power of choice, how it has been overthrown, 257  
spiritual being, timeless and deathless, proof that individual is, 27, 168, 420  
when you add something to the being he gets worse, 257
- things done twice, 359
- third dynamic; *see* dynamic, 3rd
- thought(s),  
cognitions show that ~ is releasing from force, 77  
pc tends to dive for ~ imbedded in force, 79  
picking ~ out of forces in bank brings a no-change, 85  
Q and A with thoughts already in full view and you'll never really ease up bank, 84  
thetan is natively capable of logical thought, 77  
"tick" or a "stop" is not a read, 49  
tight shoes can cause high TA, 424
- time,  
auditing ~, it takes as long as it takes, 91  
basis of aberration, 87  
"omitted time" is a basic insanity, 90  
result is result and ~ is just an entered arbitrary, 88  
sense, deterioration of; *see* *Scn 0-8*
- tired pc = no sleep or failed purpose = check which it is and handle, 46, 359
- tone arm(s),  
action (TA) and cognitions are indicators that level is still charged, 78  
action (TA) shows that force is coming off case; amount is index of gain, 77  
auditing a pc under protest will cause the TA to stay up and no F/N, 208  
audit with TA in normal range or repair it so it is in normal range, 197  
deadliest faults on cases are running same action twice; this drives TAs up through the roof, 276  
discharged process no longer gives TA and gives case gain, 77  
drug users get blown out of their heads and bog, TA up, 160  
end phenomena, if you go past EP the F/N will pack up (cease) and TA will rise, 20  
end phenomena of TA Handling Rundown, 270  
false TA, 421, 438  
causes of false TA, 55, 117  
E-Meter discharged gives false TA, 422  
E-Meter improperly trimmed gives false TA, 421  
Solo cans can give false TA, 422  
consequences of false TA, 421  
pcs who falsify TA, 438  
floating needle is valid only between 2.0 and 3.0 TA position on a meter, 117, 421
- tone arm(s) (*cont.*)  
floating TA, 424  
Full Flow Dianetics, if pc's TA begins to average higher, overrun is occurring, 227  
high TA, 18, 27, 76, 168, 179, 194, 213, 267, 268, 282, 337  
ARC breaks and high TA, 274  
arthritic hands give high TA, 423  
assessment, 179, 194, 337  
rules, 282  
Short Hi TA Assessment C/S, 337  
at Exam after F/N at session end, reasons for and handling, 122  
at session start, 45, [Dn~ 208, 358  
handling for Dianetic auditor, Scientology auditor, 45, 208  
breakthrough, 268  
by-passed flows can cause high TA, 212  
can come down by pc destimulating, 122  
cases have been run on something that didn't erase, 28, 169  
cause of, 76, 122, 212, 270, 281, 424  
chronic high TA, *defn*, one which is found high two sessions running (consecutive);  
"high" means around 4.0 or above; but 3.8 can also be called "high" if it occurs at session beginning too often, 19  
means person can still stop things and is trying to do so, 76  
Remedy DDDA 400A for chronic high TA, 19  
cold cans give high TA, 438  
cold pc sometimes has falsely high TA, 424, 438  
Dianetics, high TA at session start, how to handle, 45, 208  
don't fly ruds, 45, 358  
drug chain makes high TA if in existence or unflat, 189  
dry hands give high TA, 423  
exteriorization and high TA, 19, 27, 36, 168, 208, 212, 400, 460  
floating needle by-passed, why it gives high TA, 18  
flows opposing, making a mass or ridge, cause high TA, 270  
handling, Class VIII Course recommendations to list "What has been overrun" are cancelled, 269  
handling of, 18, 19, 45, 208, 213, 268, 337  
illness and high TA, 124  
interiorization is out, get a soaring TA, 281  
Interiorization RD, unrun, unrepaired, causes high TA, 224, 457  
late at night pc's TA may be very high, 424  
list errors and W/Hs can cause high TA, 281  
overrun and high TA, 18, 22, 212, 227  
pc goes exterior in session, TA high at Examiner, rehab exteriorization point, 19; *see also* Interiorization Rundown

## SUBJECT INDEX—1970/1971

- tone arm(s) (*cont.*)  
high TA (*cont.*)  
pc in trouble and TA high, what your first suspicions should be, 457  
pcs are uncomfortable, feel under pressure, when their TA is high, 28,169  
pc slacking grip on cans gives a high TA, 423  
"protest" is a frequent reason for high TA, how to handle, 281  
soaring TA = O/R or protest = find which and handle; such an O/R is usually by rehab, 46, 359  
tight shoes can cause, 424  
unflat engram chains and high TA, 18, 76,122, 123  
when high TA after Singles send pc to Review before Triples, 1
- high TA and low TA,  
assessment, 194  
rules, 282  
auditor qualifications, 271  
breakthrough, 268  
handling, 33, 271; *see also* C/S53RJ [X-165]  
LIC and Method 3 are not used on high or very low TAs to get them down or up, 318  
never try to fly ruds or do LIB on a high or low TA, 197
- low TAs, 55, 76, 268, 270, 272, 282, 283  
assessing, 272, 283  
can blow up to 2.0 + and F/N, 272  
Exam, low TA at, 124  
handling, 55, 270, 272,282,283  
handling rundown [37R], how to assess and list, 272  
invalidation of pc can cause, 124, 423  
moist hands give low TA, 422  
overwhelmed being, low TA is symptom of, 55, 76,124, 230, 270  
pcs with low TAs are more or less in apathy, 124  
TA sinks below 2.0, and auditor's TRs are good, same action will usually bring it up to 2.0 and F/N, 274  
TRs, poor, cause low TA, 55, 270, 423  
measures resistance and mass, 28,169  
never C/S to take TA down with ARC break rud or LIC, 281  
normal TA and loose needle, feeling of freedom and expansion on a subject is expressed in, 78  
no TA (or case gain) = problem = locate problem, 46, 359  
rough auditing easily drives the TA down, 55  
37R TA handling rundown, 269
- tone, chronic tone and social tone, 149  
Tone Scale; *see also* Scn 0-8  
expanded, 404  
how to spot people on, 148,149  
too steep a study gradient, 293  
toothache, 111
- Touch Assist(s), 323  
Contact Assists and ~ are not only legal, they are mandatory when any injury occurs, 167  
Contact Assists and ~ interrupting a general course of auditing, often to no F/N, 191  
EP—pain gone, cog, F/N, 323  
fragment of whole array of "touch", 65  
if right hand is injured you include also left hand, 110
- touching things and "Reach and Withdraw" in repairs, 65
- training, 99; *see also* course; student  
auditors are goofing, what it means regarding ~, 301  
auditor training stages, 152  
clay table work in training, 162  
C/S responsibility for training, 152,161, 375  
lack of, means more trouble for pc in making his gains stably, 60  
not only for professional auditors, 391  
organizations should be selling more training than processing, 368  
pc who has trouble need training, 99  
retraining, what it must include, 128  
student is slow or blows, reason for lies in failure to understand words used in his training, 162  
TRs, why they must be learned early in ~, 348
- training drills or routines; *see* TRs
- transfer of staff, handling of executives or staff members who show signs of obsessive ~, 354, 439
- translated materials an org needs, minimum, 443
- translator, "sight" is one equally good in two languages who can hear one language and speak translation into other language without hesitation, 441
- Triple Dianetics, 43, 54, 210; *see also* Triple Grades  
"earlier" commands, 43  
errors in, 1  
importance of, 157  
okay to audit Dianetics Triples, requirements, 233  
running Triples after running Single flow, 1
- Triple Grades, 54; *see also* Triple Dianetics  
Expanded vs. Triple Grades, 432  
Quad and Triple reruns, 212  
Scientology Triples, 54
- TRs, 348,  
*defn.*, training regimen or routine, often referred to as training drill, TRs are a precise training action putting student through laid out practical steps gradient by gradient to teach student to apply with certainty what he has learned, 288  
*defn.*, training drills, 341  
are a program, 261  
auditing skill of any student remains only as good as he can do his TRs, 253, 348  
cancellation of permissive TRs, 8  
cognitions and TRs, 230  
correction lists and TRs, 464, 465  
correct TRs and application are HCO B 17 April 1961, 8

## SUBJECT INDEX - 1970/1971

### TRs (*cont.*)

Course,  
    how to handle student study of bulletin, 300  
    produces changes up and down and up that are  
        not possible to also audit around, 262  
    public courses on TRs are not "softened", 348  
    rules regarding TR Course, 260  
    special, for people on drugs, 319, 328  
    study definitions for the TR Course, 286  
    what is learned on a TR Course, 390  
don't mix with auditing actions, 260, 261  
drugs, TRs help people get off, 65, 319, 328  
OT TR 0, Operating Thetan Confronting, 348  
pc audited under tension of poor TRs has a hard  
    time and does not F/N sometimes, inviting  
    overrun, 197  
processes will not function in presence of bad TRs,  
    348  
reason for TRs, 226, 348  
repair action, TRs are a fine unlimited, 65  
rough TRs make no case gain, 230  
Solo and Advanced Courses and TRs, 341, 466  
tone arm, low, poor TRs cause, 55, 270, 423  
TR 0 Bullbait, Confronting Bullbaited, 349  
    bullbait that uses actual processes or implants  
        should be stamped out hard, 192  
TR 0, Confronting Preclear, 349  
    exists so an auditor is not ducking session but  
        can sit there relaxed, doing his job, 226  
TR 1, Dear Alice, 350  
    must be done so pc can hear and understand  
        the auditor (without blowing pc's head off  
        either), 226  
    overwhelming, cause low TA, 270  
    reactive mind, banks don't read, only thetans  
        impinged upon by bank; therefore TR 1  
        must be addressed to thetan, 10  
TR 2, Acknowledgements, 351; *see also* acknowl-  
    edgements  
    must be done so that pc gets acknowledged,  
        226  
TR 3, Duplicative Question, 351  
    basically existed so that auditor would continue  
        to give pc commands and not squirrel off or  
        pack up with total silence, 226  
TR 4, Preclear Originations, 352  
    exists so that pc's origins are accepted and not  
        Qed and Aed with or invalidated, 226  
    handling of pc origination, 246  
truth, 285  
    auditing, part of auditing is recognition of fact  
        that truth is present, 258  
    getting well or able depends on establishing , 449  
    good indicators in auditors are made with ~, 398  
twin, *defn.* study partner with whom one is paired,  
    140, 286  
twin checkout, *defn.* when two students are paired  
    they check each other out; this is different than  
    Supervisor checkout, 140  
two-way comm; *see* communication, two-way

## U

unburdening case brings up confront, 110  
unconscious pc, how to audit, 323  
undershooting, *defn.*, leave a cycle incomplete and go  
    off to something else, 130  
understand, understanding; *see also* ARC  
    affinity, reality and communication together make  
        up understanding, 232, 291  
    ARC breaks, high percentage of ARC breaks occur  
        because of failure to understand pc, 251  
    auditor response when he doesn't understand pc,  
        250, 428  
    life exists in presence of ~, in presence, then, of  
        affinity, reality and communication, 291  
unflat engram chains and high TA, 18, 76, 122, 123  
unnecessary repair when pc is running well, 48, 362  
unreadable questions and items, 45, 49, 357; *see also*  
    items  
unresolved pains, 110  
upsets, Dianetic, handling of, 228  
upsets, extreme, are almost always list errors, 392

## V

valence,  
    lists LX1, LX2, LX3, 330  
    out of valence, 330  
        OCA/APA drop after auditing, pc was out of  
            valence, 330  
        OCA/APA with any point on left side of graph  
            in low or undesirable range means pc is out  
            of valence, 462  
        pc who is trying to get off withholds someone  
            else had is making a sort of out-of-valence  
            effort to avoid giving his own withholds, 13  
        reads on GF 40, handle last, 35  
        SP has to be out of valence to be SP, 330  
        shifts occur rapidly and frequently in PTRSDs, 453  
verbal C/S instruction, auditor accepting, is a High  
    Crime, 94  
verbal or written correction that is not in an HCO B  
    or tape, auditor must never take, 363  
verbal tech, how it comes about, 303  
very well dones, session grading, *defn.*, 127, 181  
    C/S, never give a "very well done" on wins only,  
        give them on tech exactness, 284  
VGIs; *see* indicators  
via, confronting on a via (using a relay point), 265  
vision, wide, 178  
vitamin therapy, 425  
volume and quality of service, stats depend on, 367  
volume, quality and viability, C/S is trying to obtain,  
    375

## W

"well done by exam", session grading, *defn.*, 181  
well done, session grading, *defn.*, 127, 181

## SUBJECT INDEX - 1970/1971

- well, getting well or able depends on establishing truth, 449
- "went in" and "go in" must read in order to run Int Rundown, 400
- W/H; *see* withhold
- "What has been overrun", Class VIII Course recommendations to list, are cancelled, 269
- what is a course, 198
- what's-it line—auditor's line to the pc, 243
- whole track pictures, drugs can tum on violently, 320, 328
- win(s),  
    auditing wins are not always fast, total and appreciated volubly, 5  
    auditor wins that a C/S wants are exact tech application, 284  
    big win (F/N dial-wide, cog, VGIs) gives you persistent F/N, 144  
    C/Sing a win is Q and A, 83  
    C/S wins, 461
- letting pc have his win, 144  
    org wins and stats, 367  
    pc win, don't use as item, 75, 82
- withdrawal symptoms, drugs, handling of, 425
- withhold(s), *defn*, something pc did that was an overt act, which pc is withholding and thus keeping secret, 13  
    auditing over a W/H and PTP = no case gain, 123  
    auditors' critical remarks about pc means withholds, 345, 362  
    challenging people out of session as "having withholds" is illegal, 167  
    list errors and withholds can cause high TA, 281  
    lists of withholds required of a staff member without proper sessioning are now illegal, 167  
    nattery pc has withholds, 58  
    other people's, 13  
    pc critical = W/H = pull W/H, 46, 359  
    premature acknowledgement leads to inadvertent withholds, 252  
    "ridges" and masses come about from a conflict of flows opposing or being pulled back as in , 270
- word(s),  
    apparent force of ~ and phrases in engrams, 76  
    misunderstood word; *see* misunderstood  
    simple words, it takes a big dictionary to define simple words, 383  
    test of whether person understands word, 384  
    BreakWord Clearers, qualifications of, 385, 391
- Word Clearing, 292; *see also* misunderstood  
    basic law in, 382  
    Correction List, 333  
        most common C/S error has been to fail to order Word Clearing Correction List, 407  
        unthinkable to do Word Clearing without ever using a WC Corr List, 465  
        use of, 390  
    library, 397  
    Method One, 292, *defn*, full in-session rundown, 385  
        can be done with no folder, 315
- Word Clearing (*cont.*)  
    Method One (*cont.*)  
        EP is a persistent F/N on whole list, 315  
        has yet to foul up any other auditing, 315  
    Method Two, 292, 373, *defn*, metered action of clearing up words in specific materials, 385  
        commands used, 393  
        likely to foul up auditing, 315  
    Method Three, 292, *defn*, looking up words seen and not understood by student or reader, 385  
        person trying to "blow" (leave) and refusing further ~ almost always has a huge misunderstood on some word not yet located, 390  
        program, 385  
        sequence for three types, 385  
        troubles, 390  
        Word Clearers, 386
- worksheet(s) (W/S), 215, 433  
    assists, W/S must be done and pc taken to Examiner afterwards, 191  
    auditor is expected to see meter, pc and W/S all at one time, 178  
    C/S misunderstands from worksheets, 433  
    neverre-copied, 215, 359  
    never try to C/S an illegible worksheet, 96  
    two-way comm worksheets are detailed, 40
- World Federation of Mental Health, 113
- wrongnesses, in auditing we are only trying to find ~ in order to increase rightnesses, 257, 258
- W/S; *see* worksheet
- Wundt, 383

## Z

- Zero Flows, Quad Dianetics, already flat Zero Flows are not uncommon, 228
- Zero Flows, running, 214
- zero rate, *defn*, material which is only checked out on basis of general understanding, 140

## Numerals

- 2-way comm; *see* communication, two-way
- VIII; *see* Class VIII
- 8-C, Axioms of SOP 8-C; *see* *Scn 0-8*
- 24 hour rule, Examiner's, 138
- 37R, C/S Series 37R, High and Low TA through, 268, 282, 283, 296  
    assess 37R slowly, 297  
    best done as part of L9S [L11], 296  
    blow up rule only applies to 37R, 272  
    doesn't all have to be done in one session, 296  
    don'ts, 297  
    end phenomena of, 282, 283  
    flows, 269, 296, 297  
    listing, peculiarities of, 296  
    ruds and 37R, 296  
    steps of 37R, 297  
    TA handling rundown, 269, 272

*Founder of Dianetics and Scientology*

## EDITORS' NOTE

“A chronological study of materials is necessary for the complete training of a truly top grade expert in these lines. He can see how the subject progressed and so is able to see which are the highest levels of development. Not the least advantage in this is the defining of words and terms for each, when originally used, was defined, in most cases, with considerable exactitude, and one is not left with any misunderstandings.”

—L. Ron Hubbard

The first eight volumes of the *Technical Bulletins of Dianetics and Scientology* contain, exclusively, issues written by L. Ron Hubbard, thus providing a chronological time track of the development of Dianetics and Scientology. Volume IX, The Auditing Series, and Volume X, The Case Supervisor Series, contain Board Technical Bulletins that are part of the series. They are LRH data even though compiled or written by another.

So that the time track of the subject may be studied in its entirety, all HCO Bs have been included, excluding only those upper level materials which will be found on courses to which they apply. If an issue has been revised, replaced, or canceled, this has been indicated in the upper right-hand corner along with the page number of the issue which should be referred to.

The points at which Ron gave tape recorded lectures have been indicated as they occurred. Where they were given as part of an event or course, information is given on that event or course on the page in the chronological volumes which corresponds to the date. The symbol “\*\*\*” preceding a tape title means that copies are available from both Publications Organizations. A tape preceded by “\*” means that it will soon be available. No asterisk (\*) means that neither Publications Organization nor Flag has a master copy of that lecture. If you have, or know anyone who has, copies of *these* tapes, please contact the Flag Audio Chief, P.O. Box 23751, Tampa, Florida, 33623, U.S.A. The number in the tape title is a code for the date; example: 5505C07—55 = year, 1955; 05 = month, May; C = copy; 07 = day, 7th; 7 May 1955. The abbreviation tells what group the tape is a part of. For an explanation of the abbreviations see Volume X, page 539.

At the back of this volume is a Subject Index covering only the material in this volume. Use the index to locate the LRH source material in context, don't just get data from the index. This index has been combined with indexes from other volumes to form the Cumulative Index which is in Volume X, starting on page 287.

# TECHNICAL BULLETINS

1972-1976

## CONTENTS

1972

1	Jan.RA	L IX Hi-Lo TA List Revised (revised & reissued 20 Nov. 1974)

# LONG CONTENTS

## **HCO B 1 Jan. 1972 RA L IX HI-LO TA LIST REVISED, 1**

Hi-Lo TA Assessment,

### *Word Clearing Series 30*

## **HCO B 2 Jan. 1972 WCI COMES FIRST, 10**

Don't do Word Clearing Method 2 before Method 1, 10

Word Clearing Method 2 EP, 10

### *C/S Series 69 Addition*

## **HCO B 3 Jan. 1972 C/SING CHECKLIST, 11**

Go back in the folder to where the case was running well and come forward, 11

## **HCO B 7 Jan. 1972 TRAINING AND INTERNING STAFF AUDITORS, 12**

Recruiting staff auditors, 12

Interne Supervisor, 12

Staff auditor trainee programming, 12

Interne Supervisor has authority over auditor trainee, 13

Sending auditors to upper orgs for training, 13

SH or AO program of auditor classification and internships, 13

Interne Supervisor admin, 14

Paid students, 15

Part-time study on next level while auditing is a failure, 15

## **HCO B 14 Jan. 1972 STUDY CORRECTION LIST, 16 [CANCELED]**

## **HCO B 20 Jan. 1972 PTS RD ADDITION, 19**

The only reasons a PTS RD does not work, 19

Remedies for PTS Rundown errors, 19

## **HCO B 3 Feb. 1972 R6EW—OT III NO INTERFERENCE AREA, 20**

Why there is a No Interference Area between R6EW and OT III, 20

Solo auditing set-up, 20

Drug Rundown is a must before Solo, 21

Grade Chart steps before Solo, 21

OCA/APA test, 22

Ideal Solo program, 22

Explanation of sequence of OT III, OT VII, OT IIIIX, 23

Availability of auditing materials, 23

## **HCO B 15 Feb. 1972 FALSE TA ADDITION 2, 24**

Wrong ways to get a pc to read between 2.0 and 3.0 on an E-Meter, 24

Commonest sources of low and high TA, 24

### *C/S Series 74*

## **HCO B 16 Feb. 1972 TALKING THE TA DOWN MODIFIED, 25**

Right way to handle high TA, 25

There is no need to talk a TA down; it is faster to directly locate the reason it is up, 25

## **HCO B 18 Feb. 1972 FALSE TA ADDITION 3, 26**

The honesty of the auditor determines his results, 26

Low TAs, 26

*Word Clearing Series 32R*

**HCO B 22 Feb. 1972 WORD CLEARING METHOD 4, 28 [REVISED]**

Use of Word Clearing Method 4, 28  
Word Clearing Method 4 procedure, 28  
Supervisor's use of Word Clearing Method 4, 29

*C/S Series 71A*

**HCO B 24 Feb. 1972 WORD CLEARING OCAs, 30**

Why question sheets for tests must *not* be word cleared, 30  
Testing musts, 30 Examiner attest check, 30  
Test line is a check on C/S and auditing quality, 31

*Word Clearing Series 15R*

**HCO B 26 Feb. 1972 WORD CLEARING SERIES 15R, 32**

Word clearing any words on any test at any time is a High Crime, 32  
Foreign language persons, 32  
Mis Us on tests, 32

**26 Feb. 1972 LRH MODEL TAPE SESSIONS, 33**

Honest TRs, 33  
Result of poor TRs, 33  
Use of LRH Model Auditing Tapes, 33

**HCO B 29 Feb. 1972R FALSE TA CHECKLIST, 34 [REVISED]**

*Establishment Officer Series 5*

**HCO PL 13 Mar. 1972 PRODUCTION AND ESTABLISHMENT-ORDERS AND PRODUCTS, 37**

People not knowing their products require constant orders, 37  
Hat survey for orders, 37  
Disestablishment, 38  
Hatting for product, 38  
Right direction to hat, 38  
Steps to clear "product", 39  
"Quickie" Product Clearing, 39  
Disagreements Check, 40  
Product Officers, 40

**HCO PL 16 Mar. 1972 WHAT IS A COURSE—HIGH CRIME, 41**

Cause of Supervisor failure, 41  
Course Super's primary tech, 42  
Reason for student queries, 42  
Product of Supervisor, 43

*Establishment Officer Series 11*

**HCO PL 23 Mar. 1972 FULL PRODUCT CLEARING LONG FORM, 44**

TA and Product Clearing, 49

**HCO B 20 Nov. 1971 HAS SPECIALIST AND ESTABLISHMENT OFFICER AUDITING PROGRAM (Revised), 50**

HAS Rundown, 50

**HCO B 27 Mar. 1972R COURSE SUPERVISOR CORRECTION LIST —STUDY CORR LIST 2R, 52**

Course Supervisor Correction Form—additional actions required, 59

**HCO B 27 Mar. 1972RA AUDITOR CORRECTION LIST—AUDITOR RECOVERY —STUDY CORR LIST 3RA, 60**

*Study Series 5*

**HCO B 30 Mar. 1972 PRIMARY CORRECTION RUNDOWN—FIRST  
CRAMMING CORRECTION, 65 [REVISED]**

Cramming a person is a waste of time if he never learned to study, 65  
Primary Correction Rundown, 65  
Auditing interlude, 65  
Study tech section, 66  
Cramming actions, 66

*Expanded Dianetics Series 1*

**HCO B 31 Mar. 1972 EXPANDED DIANETICS SERIES 1, 68 [REVISED]**

Expanded Dianetics vs. Standard Dianetics, 68  
Expanded Dianetics is very specifically adjusted to the pc, 68  
Expanded Dianetics training, 68  
Hubbard Graduate Dianetic Specialist, 69  
Charges for Expanded Dianetics, 69  
Auditor prerequisite for Expanded Dianetics, 69

*Expanded Dianetics Series 3RB*

**HCO B 2 Apr. 1972RB L3 EXD RB—EXPANDED DIANETICS REPAIR LIST, 70**

*Study Series 6*

**HCO B 3 Apr. 1972 PRIMARY RUNDOWN NOTE, 75**

Primary Rundown handling of Study Tapes, 75

**HCO B 4 Apr. 1972 TECH DIV PRIMARY RUNDOWN, 76 [REVISED]**

Primary Rundown actions in HGC are case handling and Word Clearing Method 1, 76  
Primary Rundown in Dept of Training, 76  
Study Tapes and Student Hat, 76  
Primary Rundown product, 77

*Establishment Officer Series 14*

**HCO PL 4 Apr. 1972 ETHICS, 78**

Exchange flows and out-ethics, 78  
Criminality, 78  
Ethics Tech Admin sequence, 78  
Exchange and criminality, 79  
Production, morale and exchange factor, 80  
Exchange by Dynamics, 80  
Conditions by Dynamics, 81

**HCO PL 9 Apr. 1972 CORRECT DANGER CONDITION HANDLING, 82**

Danger Formula, 82  
First Dynamic Danger Formula, 82  
Junior Danger Formula, 82  
Trouble Area Assessment, 83  
Trouble Area Short Form, 84  
Ending a Danger Condition, 84

*C/S Series 75,*

*Solo C/S Series 13*

**HCO B 10 Apr. 1972 PRE-OTS DON'T C/S, 85**

Solo C/Sing line, 85  
Solo auditing admin, 85  
Worst features of a Pre-OT doing his own C/Sing, 86  
Pre-OTs do not C/S their own folders, 86

*Expanded Dianetics Series 1R*

**HCO B 15 Apr. 1972 EXPANDED DIANETICS SERIES 1R, 87**

Expanded Dianetics vs. Standard Dianetics, 87

Expanded Dianetics is very specifically adjusted to the pc, 87  
Expanded Dianetics training, 87  
Hubbard Graduate Dianetic Specialist, 88  
Charges for Expanded Dianetics, 88  
Auditor prerequisite for Expanded Dianetics, 88

**HCO B 16 Apr. 1972 PTS RD CORRECTION LIST, 89**

*C/S Series 76*

**HCO B 17 Apr. 1972 C/SING A PTS RUNDOWN, 91**

The whole point of a PTS Rundown is to make a person not PTS any longer, 91  
PTS results in illness and roller-coaster and is the cause of illness and roller-coaster, 91  
Steps of handling PTS pc, 91  
PTS data, 92  
PTS situations, 92  
End phenomenon of the PTS RD is attained when the person is well and stable, 92

*C/S Series 77*

**HCO B 19 Apr. 1972 "QUICKIE" DEFINED, 93**

Definitions of "quickie", 93  
Examples of quickie actions, 93  
Complete is the reverse of quickie, 93  
Necessity of clearing words in commands, 94  
Remedies for the quickie impulse, 94

*Expanded Dianetics Series 4*

**HCO B 20 Apr. 1972 SUPPRESSED PCS AND PTS TECH, 95**

Characteristics of PTS persons, 95  
Administrative tech of PTS Rundown, 95

*C/S Series 78*

**HCO B 20 Apr. 1972 PRODUCT PURPOSE AND WHY AND WC ERROR CORRECTION, 96**

C/S must be sure all Why finding and Word Clearing papers and worksheets get into pc's folders, 96  
Listing out of session, 96  
Self-auditing, 96  
List error reaction, 97  
Symptoms of out lists, 97  
Alternate wordings for "PTS", 97  
Wrong lists or upset people can occur in an org where untrained people are also using meters, 97

*C/S Series 79, Expanded Dianetics Series 5*

**HCO B 24 Apr. 1972 PTS INTERVIEWS, 98**

PTS Interview questions, 98  
Required actions of PTS Interview, 98

*Study Series 8*

**HCO B 26 Apr. 1972 THE GLIB STUDENT, 99**

Glib student can confront the words and ideas; he cannot confront the physical universe or people around him and so cannot apply, 99  
Handling the glib student, 99

*Executive Series 12*

**HCO PL 3 May 1972 ETHICS AND EXECUTIVES, 100**

Danger Rundown, 3 May PL, 100  
Definition of executive, 100  
Responsibility of executives to handle out-ethics, 100  
Ethics and organization, 100  
Examples of ethics offenses, 101

Technical aspect of out-ethics, 101  
Danger Rundown steps, 102  
Step 1: Inform the person personally he is in Danger Condition, 102  
Step 2: Ethics is gotten in by definition on the person, 102  
Step 3: Ask the person what out-ethics situation he or she is involved in, 103  
Step 4: Have the person work out how the out-ethics situation is a betrayal of the group, 103  
Step 5: First Dynamic Danger Formula, 103  
Step 6: Review the person and his stats and appearance and personal life, 104

### **HCO B 3 May 1972 HAVINGNESS, 105**

Thetan's relation to energy, 105  
Dwindling spiral of the mest universe, 105  
Remedy of havingness, 105

### **HCO B 4 May 1972 SIX BASIC PROCESSES, 107**

Two-way Communication, 107  
Elementary Straightwire, 107  
Opening Procedure of 8-C, 107  
Opening Procedure by Duplication, 108  
Remedy of Havingness, 108  
Spotting Spots, 108  
Training required on the six basic processes, 108  
Precision definition of communication lag, 108  
"Value" of energy, 109  
Duplication, 109  
Opening Procedure by Duplication, 109  
Auditor's willingness to duplicate, 109  
Training and duplication, 110  
Goal of auditor and pc, 110

### **HCO B 5 May 1972R THE REMEDY OF HAVINGNESS, 112**

Thetan cuts down knowingness to create a game, 112  
Know to Mystery Scale described, 112  
Game conditions, 113

### **HCO B 6 May 1972 REMEDY OF HAVINGNESS—THE PROCESS, 115**

Definition of Remedy of Havingness, 115  
Expanded GITA related to Remedy of Havingness, 115  
How to run Remedy of Havingness, 116  
Reason for dropped havingness, 117  
End of Cycle Processing, 118

### **HCO B 7 May 1972 EXPANDED GITA, 120**

Theory of Expanded GITA, 120  
Item list for Expanded GITA, 120  
Present Time Differentiation; Exteriorization by Scenery, 121  
ARC Straight Wire using next-to-last list of *Self Analysis in Scientology*, 121  
Run psychotic cases on Present Time Differentiation, 121

### **HCO B 8 May 1972 THE IMPORTANCE OF HAVINGNESS, 123**

Indicators of dropped havingness, 123  
Repair of Havingness vs. Remedy of Havingness, 124  
Sacrifices and genetic entity, 125  
Chronic somatics, 126

### **HCO B 10 May 1972 ROBOTISM, 127**

Primary human failing is an inability to function as himself or contribute to group achievements, 127  
Robot band of determinism scale, 127  
Mechanism of needing orders, 127  
Perception related to overts and withholds, 128

Overt products, 128  
Slowness, 128  
Group justice, 128  
No real malice in the robot, 128  
False reports, 129  
Robot goes into morale declines easily, 129  
Physical inertia, 129 PTS and robots, 129  
Basic Why for needing orders, being inactive, incompetent and unproductive, 130  
Remedy of robot condition, 130  
End product of robotism handling, 130

***Word Clearing Series 8RB***

**HCO B 30 June 1971 R STANDARD C/S FOR WORD CLEARING IN SESSION  
—METHOD 1, 131**

Word Clearing Method 1 procedure, 132  
Word Clearing Method 1 end phenomena, 132

***Study Series 5R***

**HCO B 30 Mar. 1972R THE PRIMARY CORRECTION RUNDOWN REVISED, 133**

When the Primary Correction Rundown is given, 133  
Primary Correction Rundown checklist, 134

**HCO B 4 Apr. 1972 PRIMARY RUNDOWN (REVISED), 135**

Primary Rundown consists of word clearing and study tech; it makes a student super-literate,  
135  
Keynote of Primary Rundown is honesty, 135  
Primary Rundown steps, 136  
No Interference Zone, 137  
Primary Correction Rundown takes care of people who have trouble on the PRD, 137  
Students who are or have been on drugs need a Drug Rundown before tackling Word Clearing  
Method 1, 137

**HCO B 15 Dec. 1968R L4BR—FOR ASSESSMENT OF ALL LISTING  
ERRORS, 138**

**HCO B 3 June 1972R PTS RUNDOWN, FINAL STEP, 141**

Can't Have Rundown, 141  
SPs are SPs because they deny Hav and enforce unwanted Hav, 141  
PTS RD two-way comm question converted to Listing and Nulling, 142

***Word Clearing Series 36***

**HCO B 9 June 1972 GRAMMAR, 143**

Grammatical words and small words should be looked up in a simple grammar textbook, 143  
Grammar textbooks, 143  
Grammar Course before Word Clearing, 143

**HCO B 10 June 1972 BYPASSED CHARGE, 144**

Mechanism of BPC (By-Passed-Charge), 144

***Data Series 26,***

***Establishment Officer Series 18***

**HCO PL 12 June 1972 LENGTH OF TIME TO EVALUATE, 145**

Assessment for individual Why of evaluator taking a long time to evaluate, 145

***C/S Series 80***

**HCO B 15 June 1972 “DOG PCs”, 147**

Remedy for an auditor with “dog pcs”, 147  
Remedy for a C/S who is agreeing there are “dog pcs”, 147  
Errors behind “dog pcs”, 148

*C/S Series 81R*

**HCO B 16 June 1972R AUDITOR'S RIGHTS MODIFIED, 149**

Major Why of falling hours, incomplete programs and other confusions, 149  
Auditor's right to choose pcs modified, 149 "Dog pcs" are problems in repair, 149  
Stats of C/Ses and auditors, D of P and Dir of Tech Services, 150  
The road to truth is begun with honesty, 150

*Word Clearing Series 37*

**HCO B 19 June 1972 DINKY DICTIONARIES, 151**

Small dictionaries are very often a greater liability than they are a help, 151  
Which are the best dictionaries, 151

*Word Clearing Series 38*

**HCO B 21 June 1972 METHOD 5, 152**

Word Clearing Method 5 is called Material Clearing, 152  
Word Clearing Method 5 procedure, 152

*Word Clearing Series 39*

**HCO B 21 June 1972 METHOD 6, 153**

Word Clearing Method 6 is called Key Word Clearing, 153  
Word Clearing Method 6 procedure, 153  
Post trouble remedied by Word Clearing Method 6, 153

*Word Clearing Series 40*

**HCO B 21 June 1972 METHOD 7, 154**

Word Clearing Method 7 is reading aloud, 154  
Word Clearing Method 7 procedure, 154

*Word Clearing Series 41*

**HCO B 21 June 1972 METHOD 8, 155**

Word Clearing Method 8 is an action used in the Primary Rundown, 155  
Word Clearing Method 8 procedure, 155

**HCO B 20 July 1972 PRIMARY CORRECTION RUNDOWN HANDLING, 157**

Who PCRDs are given to, 157  
The purpose of the PCRd is to get the person through the PRD, 157  
Folder study, 157 Outlists, 157  
Idle student, 158  
Resistive students, 158  
Pre-PCRd steps, 158  
End phenomena of a Primary Correction Rundown, 159

**HCO B 20 July 1972**

**DISTRACTIVE AND ADDITIVE QUESTIONS AND ORDERS, 160**

Auditor distracting pc, 160  
Auditor evaluation, 160  
All auditors talk too much, 160  
Muzzled auditing means stating only the Model Session patter and commands and TRs, 160

*C/S Series 82,*

*Expanded Dianetics Series 6*

**HCO B 10 Aug. 1972 DIANETIC HCO B—INTEREST, 161**

On Drugs and Evil Purposes or Intentions one does not ask the pc if he is interested in  
running the item, 161  
Dianetic "no interest" items, 161

**HCO B 13 Aug. 1972R FAST FLOW TRAINING, 162**

Fast flow student, 162

Fast flow student passes courses by attestation, 162  
Provisional certificate, 162  
Provisional certificates expire after one year if not validated, 162  
Fast flow prerequisites, 163  
Non-PRDs, 163  
Drug cases get Drug RD before Word Clearing Method 1 , 163  
Fast flow student designation, 163

*C/S Series 84*

**HCO B 16 Aug. 1972 FLUBLESS C/SING, 164**

C/S makes sure tech courses are taught well, 164  
C/S makes sure Qual has a Cramming Officer, 164  
C/S standard handling of auditors, 164  
Cramming, retread and retrain, 164  
A falsified auditing report puts the auditor at once at retrain, 164  
OT TR 0 and TR 0 are the keys to good auditing, 164  
Electronic attest, 165

*Word Clearing Series 42*

**HCO B 17 Aug. 1972 METHOD 4 NOTES, 166 [REVISED]**

Break down the materials when doing Word Clearing Method 4, 166  
Word Clearing Method 4 of tapes and books, 166  
Errors in Word Clearing Method 4, 166

*Word Clearing Series 43*

**HCO B 18 Aug. 1972 GRAMMAR DEFINITION, 167**

Grammar is a systematic description of the ways in which words are used in a particular language, 167  
Word classes, 167  
Rules of grammar, 167  
Types of grammars, 168

*C/S Series 85,*

*Expanded Dianetics Series 7*

**HCO B 13 Sept. 1972 CATASTROPHES FROM AND REPAIR OF “NO INTEREST” ITEMS, 169**

Drug Rundown can fail by asking for interest on items, 169  
Don't ask for interest on intentions, evil purposes and drug items, 169 Repair of “no interest” items, 169

*Word Clearing Series 44*

**HCO B 6 Nov. 1972 ILLITERACY AND WORK, 170**

Educating illiterate or semi-literate populations, 170  
Example of educating a primitive culture, 170  
Education mustn't skip gradients in culture or in training, 171

**HCO B 15 Nov. 1972 STUDENTS WHO SUCCEED, 172**

Honesty of a student, 172  
Ethics must be in to get tech in, 172  
Justice and ethics, 172  
Symptoms of students who are withholding, 173  
Pilot courses, 173  
Confessionals on students, 173  
Honest student is the most successful student, 174

*Integrity Processing Series 10R*

**HCO B 13 Dec. 1972R INTEGRITY PROCESSING QUESTIONS MUST BE F/Ned, 175**

Main danger of Integrity Processing is not probing a person's past but failing to do so thoroughly, 175  
Never leave an Integrity Processing question unflat, 175

How to prevent Integrity Processing being left unflat, 175

***Integrity Processing Series 11R***

**HCO B 14 Dec. 1972R GENERALITIES WON'T DO, 176**

Best way to “miss” Integrity Processing question is to let the pc indulge in generalities or “I thought.....”, 176

Handling general withholds and other people’s withholds, 176

How to get withholds off an “irresponsible pc”, 176

“Don’t know” version of withhold pulling, 176

***Integrity Processing Series 12R***

**HCO B 15 Dec. 1972R WITHHOLDS, MISSED AND PARTIAL, 178**

Natterings, upsets, ARC breaks, critical tirades, lost students, ineffective motions are restimulated but missed or partially missed withholds, 178

Knowledge to the average person is only this: a knowledge of his withholds, 178

Wild animal reaction that makes Man a cousin to the beasts, 178

Handling critical, upset, ARC breaky pc, 179

***Integrity Processing Series 13***

**HCO B 16 Dec. 1972 HELP THE PC, 180**

Use of steering in withhold pulling, 180

Pc is always willing to reveal, 180

If pc knew all the answer it wouldn’t read on the E-Meter, 180

***Integrity Processing Series 14***

**HCO B 17 Dec. 1972 HAVINGNESS, 181**

Havingness is the concept of being able to reach; no-havingness is the concept of not being able to reach, 181

Havingness must be run to get the benefit of having pulled most withholds, 181

***Study Series 9***

**HCO B 4 Jan. 1973 CONFRONT, 182**

Definitions of confront, 182

If one can confront he can be aware; if one is aware one can perceive and act, 182

**HCO B 30 Mar. 1973 STEP FOUR—HANDLING ORIGINATIONS, 183**

What is an origination of the preclear, 183

Three steps in handling an origin, 183

**HCO B 5 Apr. 1973 AXIOM 28 AMENDED, 185**

Axiom 28, 185

Formula of communication, 185

**HCO B 7 Apr. 1973R GRADIENTS IN TRs, 186**

How to do TRs, 186

Going over and over TR 0-4, 186

***Cramming Series 10RA***

**HCO B 10 June 1973RA CRAMMING, 188**

Qual does not take orders on what to do to correct, 188

**HCO B 11 July 1973 ASSIST SUMMARY, 189**

Medical examination and treatment and assists, 189

Causes of predisposition, precipitation and prolongation of injury and illness, 189

Physical facts of injuries, illnesses and stresses, 190

Role of assists, 190

Don’t confine handling of injuries to Touch Assist, 190

Actions of ministers, 191

Assist Summary steps, 191  
Drug “five days” rule need not apply to assists, 192  
Assist given over drugs, how to handle later, 192  
Pc illness during grade auditing, 192  
There is no conflict between minister and medical doctor, 192

***Qual Flub Catch Series 4***

**HCO B 21 July 1973 RECOVERING STUDENTS AND PCS, 193**

Five main reasons for student blows, 193  
Reasons for pc blows, 194  
Handling the blown student or pc, 194

**HCO B 29 July 1973 ART, MORE ABOUT, 196**

How good does a work of art have to be to be good, 196  
Art for self-satisfaction vs. audience, 196  
Technique of art, 197  
Art to be good must have technical expertise itself adequate to produce an emotional impact, 198  
What is technical expertise, 198  
“Technical expertise adequate to produce an emotional impact” and “message”, 199  
Art quality and form, 199  
Living itself is an art form, 199

**HCO B 30 July 1973 SCIENTOLOGY, CURRENT STATE OF THE SUBJECT AND MATERIALS, 201**

Extent of Scientology materials, 201

### **HCO B 10 Aug. 1976 R/SES, WHAT THEY MEAN, 440**

The term was taken from a process in the ‘50s, 440  
A “Rockslam” can be caused sometimes by leaving rings on the pc’s fingers or by a short  
circuit in the meter or by the cans (electrodes) touching something like a dress, 440  
One must always report a rockslam in the auditing report, 440  
The rockslam is the most important needle manifestation, 440  
You don’t ever indicate rockslams or theta bops to the pc, 441  
Rocket read, 441  
A rockslam means a hidden evil intention on the subject or question under discussion or  
auditing, 441  
Two things underlie insanity, 441  
One rockslam doesn’t make a psychotic, 442  
When R/Ses most easily turn on, 442  
How you can turn off an R/S and mistakenly think it is handled, 442  
What then DOES HANDLE an R/S?, 443  
Expanded Dianetics handling of R/Ses, 443  
What do you do when you see an R/S, 443

CANCELS  
BTB OF 1 JANUARY 1972R  
SAME TITLE

**LIX HI-LO TA LIST REVISED**

(Cancels earlier list HCO Bs 17 Feb 71  
and 22 Feb 71 and 25 Feb 71 and 3 March 71  
and 13 March 71 and 1 Jan 72.)

This assessment has been developed to detect all the reasons for high and low TA. There is nothing unusual about the processes necessary to handle these points. This is the full list and is used when a C/S Series 53RI has been done and the high or low TA persists.

Interiorization or a flubbed Interiorization R/D that must be run with WENT IN is the usual reason. Listing errors and out rudiments are another reason.

The list is assessed Method 5. Handle the reads in the order given on HCO B 10 June 71, C/S Series 44R. Any reading questions must be carried to F/N by major action or 2-Way Comm. Can be taken to full F/Ning list.

Must be done by an Auditor who can make a list read with Cramming on TR 1 and Cramming on HCO Bs 28 Feb 71 C/S Series 24, 9 June 71 C/S Series 41, 20 Dec 71 C/S Series 72, 15 June 72 C/S Series 80, 15 Oct 73 C/S Series 87, 20 Nov 73 C/S Series 89, 6 Dec 73 C/S Series 90 and BTB 16 June 71R, Issue I (formerly HCO B 16 June 71 R, Issue II).

HI-LO TA ASSESSMENT

- 1A. IS YOUR INT R/D UNFLAT? \_\_\_\_\_  
If the pc has had an Int R/D, do an Int R/D Correction List and handle the reads. (HCO B 29 Oct 71, Revised 14 May 74.) If the pc has never had an Int R/D, then give him a standard Int R/D providing you have checked out on the Int-Ext pack and have drilled the procedure.
- 2A. WAS YOUR INT R/D MESSED UP? \_\_\_\_\_  
Int R/D Correction List.
- 3A. IS YOUR INT R/D OVERRUN? \_\_\_\_\_  
Int R/D Correction List.
- 4A. HAVE YOU BEEN AUDITED OVER EXTERIOR? \_\_\_\_\_  
Int R/D Correction List or Int R/D.
- 5A. ARE YOU TRAPPED? \_\_\_\_\_  
Int R/D Correction List or Int R/D.
- 6A. YOU WENT IN. \_\_\_\_\_  
Int R/D Correction List or Int R/D.
- 7A. GO IN. \_\_\_\_\_  
Int R/D Correction List or Int R/D.

- 8A. ARE YOU OUT AND CAN'T GET IN?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 9A. ARE YOU IN AND CAN'T GET OUT?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 10A. ARE YOU URGENTLY TRYING TO LEAVE?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 11A. DO YOU WANT TO GET OUT?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 12A. WERE YOU KICKED OUT OF SPACES?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 13A. YOU CAN'T GO.  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- \_\_\_\_\_
- 1B. IS THERE A LIST ERROR?  
Do an L4BR on the earliest lists you can find that have not been corrected. Lacking these, do an L4BR in general. You can go over an L4BR several times handling each read to F/N until the whole L4BR gives nothing but F/Ns. \_\_\_\_\_
- 2B. HAS A LIST BEEN OVERLISTED?  
Find out which and handle with an L4BR. \_\_\_\_\_
- 3B. WERE YOU GIVEN A WRONG ITEM?  
L4BR and handle. \_\_\_\_\_
- 4B. ARE YOU UPSET WITH GIVING ITEMS TO THE AUDITOR?  
L4BR and handle. \_\_\_\_\_
- 5B. WERE YOU GIVEN A WRONG INDICATION?  
L4BR and handle. \_\_\_\_\_
- 6B. WERE YOU GIVEN A WRONG WHY?  
L4BR on the Why Finding. Get the correct Why. \_\_\_\_\_
- 7B. HAVE YOU BEEN GIVEN A WRONG PTS ITEM?  
L4BR on that PTS Interview. Watch for earlier out PTS Interviews and if they exist, L4BR the earliest one. Watch for earlier S&Ds and if out, correct the earliest of each kind with an L4BR. \_\_\_\_\_
- 8B. ARE YOU NOT SATISFIED WITH AN ITEM FOUND ON THE LIST?  
L4BR. Correct the List. \_\_\_\_\_
- 9B. HAVE READING ITEMS BEEN LEFT CHARGED UP?  
L4BR and handle if L&N lists otherwise spot them and clean them by taking to F/N. \_\_\_\_\_
- \_\_\_\_\_
- 1C. DO YOU HAVE SOME SORT OF WITHHOLD?  
Pull it (them) E/S to F/N. Use "Who" if discreditable. \_\_\_\_\_
- 2C. ARE YOU WITHHOLDING SOMETHING?  
Get what. 2wc E/S to F/N. Use "Who" if discreditable. \_\_\_\_\_

- 3C. IS ANOTHER WITHHOLDING SOMETHING FROM YOU? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 4C. ARE OTHERS WITHHOLDING SOMETHING FROM OTHERS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 5C. HAS ANOTHER COMMITTED OVERTS ON YOU? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 6C. HAVE YOU COMMITTED ANY OVERTS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 7C. HAVE OTHERS COMMITTED OVERTS ON OTHERS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 8C. ARE YOU NOT-ISING OVERTS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 9C. YOU'RE NOT SAYING? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 10C HAVE YOU COMMITTED CRIMES? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 11C ARE YOU COMMITTING CRIMES IN PT? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 12C ARE YOU PROTESTING? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 13C ARE YOU HIDING? \_\_\_\_\_  
2wc E/S to F/N.
- 14C YOU DON'T LIKE IT. \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 15C ARE THERE UNDISCLOSED PROBLEMS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 16C IS THERE A LIE? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- I 7C ARE THERE CONSIDERATIONS NOT MENTIONED? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 18C DO YOU HAVE OPINIONS YOU DON'T DARE SAY? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 19C ARE YOU HERE FOR UNDISCLOSED REASONS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 20C ARE YOU NOT TELLING YOUR AUDITOR YOUR COG-  
NITIONS? \_\_\_\_\_  
Get what. 2wc E/S to F/N.
- 21C ARE YOU WITHHOLDING YOUR ACTUAL CASE STATE? \_\_\_\_\_  
2wc E/S to F/N.
- 22C ARE YOU UNWILLING TO TALK TO THE AUDITOR? \_\_\_\_\_  
2wc on things he can't say E/S to F/N.

- 23C. ARE THERE DISAGREEMENTS? \_\_\_\_\_  
 Run 2wc E/S to F/N: F1. Tell me about others' disagreements with you. F2. Tell me about your disagreements with others. F3. Tell me about others' disagreements with others.
- 24C HAVE YOU BEEN AUDITED OVER AN ARC BREAK? \_\_\_\_\_  
 PROBLEM? \_\_\_\_\_  
 WITHHOLD? \_\_\_\_\_  
 Indicate it and handle E/S to F/N.
- 25C DO YOU FEEL SAD? \_\_\_\_\_  
 Handle the ARC Break as an ARC Break of Long Duration.
- 26C DO YOU HAVE AN ARC BREAK? \_\_\_\_\_  
 Handle the ARC Break.
- 27C DO YOU FEEL UPSET? \_\_\_\_\_  
 Handle the ARC Break.
- 28C DO YOU FEEL RUSHED? \_\_\_\_\_  
 2wc E/S to F/N.
- 29C DO YOU FEEL TIRED? \_\_\_\_\_  
 2wc E/S to F/N.
- 30C YOU CAN'T GET IT. \_\_\_\_\_  
 Find out what and 2wc E/S to F/N.
- \_\_\_\_\_
- 1D. ARE YOU TAKING OR SMOKING DRUGS? \_\_\_\_\_  
 2wc to F/N. Rehab releases on each "Drug" taken to F/N. If pc has had a Drug R/D, do L3RD on it and handle. Program the pc for a Drug R/D or verification of it if it is incomplete or there are "No Interest" items.
- 2D. DID YOU ONCE TAKE DRUGS? \_\_\_\_\_  
 2wc to F/N. Rehab releases on each drug to F/N. L3RD on Drug R/D if he had one. Program for Drug R/D or verification if incomplete.
- 3D. HAVE YOU TAKEN LSD? \_\_\_\_\_  
 2wc to F/N. Drug Rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 4D. HAVE YOU DRUNK ALCOHOL? \_\_\_\_\_  
 2wc to F/N. Drug/Alcohol Rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 5D. HAVE YOU SMOKED POT? \_\_\_\_\_  
 2wc to F/N. Drug Rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 6D. ARE YOU TAKING MEDICINE? \_\_\_\_\_  
 2wc to F/N. Drug/Medicine Rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 7D. DID YOU ONCE TAKE MEDICINE? \_\_\_\_\_  
 2wc to F/N. Drug/Medicine Rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.

- 1E. IS THERE AN ENGRAM IN RESTIMULATION?  
Find out which and do L3RD and handle per its instructions. \_\_\_\_\_
- 2E. ARE THERE UNFLAT CHAINS?  
Find out what chains and L3RD on each. \_\_\_\_\_
- 3E. DO YOU HAVE A STUCK PICTURE?  
Indicate it. Do an L3RD on it. You can also unstick it by having him recall a time before it and recall a time after it. D/L if necessary. C/S can order Pictures and Masses Remedy Dn done after this list is handled—if necessary. \_\_\_\_\_
- 4E. DO YOU HAVE PICTURES IN RESTIMULATION?  
L3RD and handle. Pictures and Masses Remedy Dn. \_\_\_\_\_
- 5E. DO YOU HAVE MASSES IN RESTIMULATION?  
L3RD and handle. Pictures and Masses Remedy Dn. \_\_\_\_\_
- 6E. HAS THE SAME ENGRAM BEEN RUN TWICE?  
L3RD and handle. \_\_\_\_\_
- 7E. YOU CAN'T SEE ENGRAMS TOO WELL.  
Do L3RD Method 5 and handle. Program for L3RD Rundown if necessary. \_\_\_\_\_
- 8E. IS IT INVISIBLE?  
Spot the invisible field or picture. L3RD on it and handle. \_\_\_\_\_
- 9E. IS IT ALL BLACK?  
Spot the black field or picture. L3RD on it and handle. \_\_\_\_\_
- 10E HAS THERE BEEN A LOSS?  
Do L3RD on it and handle. Run it out R3R Triple if not run out and still not handled. \_\_\_\_\_
- 11E HAVE YOU LOST ANYTHING?  
Do L3RD on it and handle. If not yet run out and still unhandled run R3R Triple. \_\_\_\_\_
- \_\_\_\_\_
- 1F. HAS THE SAME THING BEEN RUN TWICE?  
Clean up any protest and inval and rehab to F/N. \_\_\_\_\_
- 2F. HAS THE SAME ACTION BEEN DONE BY ANOTHER AUDI-  
TOR?  
Clean up any protest and inval and rehab to F/N. \_\_\_\_\_
- \_\_\_\_\_
- 1G. ARE YOU DOING SOMETHING WITH THE MIND BETWEEN  
SESSIONS?  
Find out what it is. If Yoga or Mystic exercises or some such, 2wc E/S to first time done, find out what upset had occurred before that and if TA now down, do L1C on *that* period of pc's life. \_\_\_\_\_
- 2G. ARE YOU INVOLVED IN SOME OTHER PRACTICE?  
Find out what it is. If Yoga or Mystic exercises or some such, 2wc E/S to first time done, L1C on the prior upset or period of pc's life just before that. \_\_\_\_\_

- 1H. ARE THERE WORD CLEARING ERRORS? \_\_\_\_\_  
Do a Word Clearing Correction List, handle all reads.
- 2H. ARE THERE STUDY ERRORS? \_\_\_\_\_  
2wc E/S to F/N and add a Student Rehabilitation List (HCO B 15 Nov 74) or full Study Correction List (BTB 4 Feb 72RC) to the pc's Program.
- 
- 1I. HAVE YOU EVER HAD TROUBLE WITH YOUR TA OR F/Ns? \_\_\_\_\_  
Use HCOBs 24 Oct 71, 12 Nov 71, 18 Feb 72, 29 Feb 72, 23 Nov 73, all on False TA. Then clean up the bypassed charge with 1) Assess for best read a) TA worries b) F/N worries. 2) Then 2wc times he has worried about (item) E/S to F/N. 3) Rehab any overruns due to False TA obscuring F/Ns.
- 2I. HAVE YOU HAD A FALSE TA? Handle as in 1I. \_\_\_\_\_
- 3I. ARE YOU USING THE WRONG SIZED CANS? Handle as in 1I. \_\_\_\_\_
- 4I. DO YOUR HANDS GET TIRED IN AUDITING? Handle as in 1I. \_\_\_\_\_
- 5I. ARE YOUR HANDS DRY? Handle as in 1I. \_\_\_\_\_
- 6I. ARE YOUR FEET DRY? Handle as in 1I. \_\_\_\_\_
- 7I. ARE YOUR HANDS WET? Handle as in 1I. \_\_\_\_\_
- 8I. ARE YOUR FEET WET? Handle as in 1I. \_\_\_\_\_

Check for SP with a PTS Interview or get a full PTS R/D programmed. \_\_\_\_\_
- 2L. ARE YOU PTS?  
PTS Interview or get a full PTS R/D programmed. \_\_\_\_\_
- 3L. ARE YOU CONNECTED TO SOMEONE HOSTILE TO DIA-  
NETICS OR SCIENTOLOGY?  
PTS Interview or get a full PTS R/D programmed. \_\_\_\_\_
- 4L. DO YOU FEEL SUPPRESSED?  
PTS Interview or get a full PTS R/D programmed. \_\_\_\_\_
- 
- 1M. HAS SOMETHING GONE ON TOO LONG?  
Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow if qualified). \_\_\_\_\_
- 2M. YOU WENT ON BY A RELEASE POINT?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 3M. HAS SOMETHING BEEN OVERRUN?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 4M. THE AUDITOR KEPT ON GOING.  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 5M. HAS THERE BEEN ANY OVER-REPAIR?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 6M. ARE YOU PUZZLED ABOUT WHY THE AUDITOR KEEPS ON?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 7M. ARE THERE STOPS?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 
- 1N. HAVE YOU SEPARATED OUT?  
2wc E/S to F/N. Then Triple Expanded Grade Two or L10 on Advance Program. \_\_\_\_\_
- 2N. ARE YOU SOMEBODY ELSE?  
2wc E/S to F/N. Program for LX Lists. \_\_\_\_\_

- 3N. DO YOU THINK SOMETHING ELSE IS WRONG? \_\_\_\_\_  
 2wc to find what. Note BD item. If BD item is covered by one of the other questions on the list, handle per instructions. Otherwise, GF M5 and handle.
- 4N. ARE YOU PHYSICALLY ILL? \_\_\_\_\_  
 2wc to find what. Note BD item. 2wc to F/N and get further C/S instructions for handling if necessary.
- \_\_\_\_\_
10. ARE WE REPAIRING A TA THAT ISN'T HIGH? \_\_\_\_\_  
 Get pc to tell you about it briefly. If correct, then indicate to F/N. Go E/S and indicate it if no F/N on first. If False TA, handle per 1I above.
20. ARE WE REPAIRING A TA THAT ISN'T LOW? \_\_\_\_\_  
 Get pc to tell you about it briefly. If correct, then indicate to F/N. Go E/S and indicate it if no F/N on first. If False TA, handle per 1I above.
30. IS THE METER FAULTY? \_\_\_\_\_  
 Get pc to tell you about it briefly. If correct, then indicate to F/N. Go E/S and indicate it if no F/N on first.
40. IS THERE NOTHING WRONG? \_\_\_\_\_  
 Get pc to tell you about it briefly. If correct, then indicate to F/N. Go E/S and indicate it if no F/N on first.
- \_\_\_\_\_
- 1P. WAS THERE A FALSE EXAM REPORT? \_\_\_\_\_  
 Indicate and 2wc to F/N.
- 2P. HAVE YOU HAD TO WAIT AT THE EXAMINER? \_\_\_\_\_  
 Indicate and 2wc to F/N.
- 3P. HAVE YOU BEEN UPSET BY THE EXAMINER? \_\_\_\_\_  
 Indicate and 2wc to F/N.

*Word Clearing Series 30*

**WC1 COMES FIRST**

Don't try to Word Clear Materials by Word Clearing Method 2 before the person has had a Word Clear Method 1.

Actual experience shows that doing WC2 without WC1 restimulates earlier charge on words that have been misunderstood in the past.

When a person has not had Word Clear Method I and tries to do Word Clear Method 2 on materials, it can go very slowly, the student (due to earlier charge on words) can become quite misemotional.

Using Method 3 (going back to find the misunderstood word) is all right. And using common ordinary "Look up, don't go past a misunderstood word" is all right.

**METHOD 2 EP**

The End Phenomena (what occurs at the end) of Word Clearing Method 2 is a continuing F/N on the materials.

When the person is constantly F/Ning on the materials being word cleared Method 2, that is the time to end off. The "EP" has been reached.

When the word clearer forces the student to go on beyond this, the reads gotten are often false or are from protest.

Reads that are false come from cognitions (realizations) on the material. Protest reads come from just plain annoyance with having to go on.

When the EP of 2 is reached on a specific set of materials, the student is then permitted to go on by himself, looking up words he doesn't know or going back to find one that was missed.

A person who enters a new subject or a new branch of a subject should be given WC2 on it. A person who begins a higher level of a subject should be given WC2 on it.

If thereafter there is any bog or failure to understand or apply or pass an exam on the subject, a WC Correction List can be done on it and the bog found and handled.

This EP is *only* valid if the person has had WC Method 1 before the WC Method 2 was begun.

The EP of Method 2 can be many times repeated on different subjects or branches of subjects.

*C/S Series 69 ADDITION*

**C/SING CHECKLIST**

(If a copy of C/S Series 69 is  
posted on the wall, also post this.)

Nothing in this checklist for C/Sing relieves the auditor or C/S from full knowledge of the entire C/S Series. Nothing in the C/S Series is changed by this checklist.

**ADDITION**

No. 10. Add. The time-honored way of seeing what has to be repaired in a Case not running well is:

**GO BACK IN THE FOLDER TO WHERE THE CASE WAS RUNNING WELL AND COME FORWARD.**

The major error or departure is in the very next session after that. The bugs after the high point should be repaired as the fast action to set the case going again.

The repair and handling of bogged cases is the finest skill of a C/S. Really it is why he is there.

To do this he has to know the C/S Series thoroughly, know all the materials of all levels he is C/Sing better than the auditor.

The use of prepared lists, WC Correction List, Green Form, C/S 53, Hi-Lo TA, GF 40 RR, Int-Ext Corr List, LIC and others, including "Have Examiner ask the pc what happened in session" are used to get information and correct as well as folder studies. **KNOW BEFORE YOU GO.**

**TRAINING AND INTERNING STAFF AUDITORS**

First and foremost WHEN YOU START OUT TO TRAIN AN AUDITOR REALLY HONESTLY *DO IT*.

Don't monkey about with it, or half do it, or brush it off. Actually GET IT *DONE*. Get a finished capable able to audit in high volume with high quality AUDITOR.

Each auditor is an individual. You can't train a mass of auditors. You can train individual auditors. This has to be kept in sight despite having a lot of students in a class.

In other words you take this person and push him on through and get the job of training *DONE*.

HCO

To begin a staff auditor trainee is selected because he wants to be an auditor, has a fair study record, has NO serious Ethics history and No psychiatric background. If you violate these points you will not get an auditor and if you select one with an actual insane history you will be violating the Auditor's Code.

HCO Dept I is the recruiting point for auditors. If HCO fails, it's up to the D of P or even the Executive Director to get auditor trainees.

In recruiting staff auditors it is done 1 for 1 with Admin hirings.

Usually already existing staff and Dianetic Course or Academy students are the personnel pools for auditor trainees.

When field auditors are brought into the org who have never done org internships they go this same route, regardless of their class. If already classed, such as VIII, they are simply faster to make into staff auditors.

INTERNE SUPERVISOR

The moment someone is designated as a staff auditor trainee he comes under the Interne Supervisor. He remains under the control of the Interne Supervisor throughout his entire span as long as he is in the org and until he has his final HGC okay to audit for the class of that org.

If the org sends him off for higher classes, he is again under the Interne Supervisor.

The Interne Supervisor is in Qual Division V. In a small org it is combined with Cramming Officer. In a tiny org it is combined with Cramming Officer and Qual Sec. But if this last is done there must also be a word clearer-programmer in Qual.

PROGRAMMED

The moment the trainee comes under the Interne Super he is PROGRAMMED.

The Programming is standard. It is varied only to take account of what the trainee

has already done in the way of Basic Staff Hat, Staff Status, word clearing and formal courses in auditing.

All trainees into an org begin at the bottom regardless of class.

A typical standard program would be:

WC1 .

WC2 earliest materials read or heard.

Staff Status I.

Basic Staff Hat (Vol 0 OEC).

SS II Tech Div.

*Problems Of Work* WC2 star rate and clay demo.

This HCOB.

Interne HCOBs and P/Ls.

Student Hat.

HDC in the Dianetics Course (no auditing required for provisional cert for a staff trainee).

HDC Interne Pack in Interneship for preliminary okay to audit Dianetics.

Dianetic Auditing as an Interne under D of P and/or C/S.

High Hour Flubless Record achieved on Dianetics resulting in final HGC okay to audit Dianetics—a fully validated Dianetic Cert.

Academy 0 to IV study to Provisional Class IV full time on Academy.

0-IV Interne Pack study.

0-IV preliminary HGC okay to audit. Auditing under D of P and/or C/S.

High Hour Flubless Record achieved on 0-IV resulting in final HGC okay to audit and fully validated HGC Class IV.

In a Class IV org the program would be just as above.

#### AUTHORITY

All this time, the trainee's top boss is the Interne Supervisor. This does not diminish the authority of a Course Super over the trainee when he is on a course or the Cramming Officer when he is in Cramming.

When he has his final HGC okay for Dianetics he could be off the Interneship if he were just to go on with Dianetics. But in an org this has its limitations. A C/S has trouble getting a program *done* where an auditor cannot fly ruds or do a correction list so it is best to carry on to Class IV HGC final okay to audit.

#### UPPER ORGS

In a Saint Hill or an Advanced Org the standard program goes right on up as follows.

In a Class IV org where a staff auditor is sent to a higher org, he comes again under his own org Interne Supervisor even though he is gone. It used to be that the Staff Training Officer kept track of students gone to a higher org for training but this has not worked. It is best that the Interne Super carries on and keeps track of him and gets him DONE and back.

Before a trainee is sent at org expense he has to sign a five-year contract beginning the five years *after* he returns. He is liable for full cost personally if contract broken plus penalty charges.

Class V in the SHSBC.

Class VI in the SHSBC.

Class VII SHSBC. His previous org Internship is credited and he goes into Power auditing. If no previous Internship he does the whole trip as above up to this point.

Class V, VI, VII Interne Pack under upper org Interne Super.

Class V, VI, VII Interne auditing under D of P of upper org.

High Hour Flubless auditing resulting in final HGC ok to audit in upper org and validated cert.

Class VIII Course.

Class IX Course.

Class VIII and IX Internship Pack under Interne Super of the Class VIII org.

Class VIII and IX Auditing under D of P of higher org.

High Hour Flubless auditing resulting in an HGC okay to audit and fully validated Class IX certificate.

Special C/S Course including AO lines.

C/S Internship in the higher org.

Flubless C/Sing resulting in an HGC okay to C/S.

Class X Course.

Class X Interne Pack.

Class X Auditing under D of P.

High Hour Flubless Class X auditing resulting in a Class X HGC okay to audit and a fully validated certificate.

Class XI and XII Course.

Class XI and XII Interne Pack.

Class XI and XII Auditing under D of P.

High Hour Flubless Class XI and XII auditing resulting in an HGC okay to audit Class XI and XII and fully validated cert.

Flag Class XII and Solo C/S Course.

Flag Programming and repair of all omissions under Interne Super.

Flubless C/Sing on all lines.

#### HIGHER ORG

Where a trainee for an org goes to a higher org he is under the Interne Super of the higher org to whom the Interne Super of the lower org can write. This line is to speed up such trainees.

## ADMIN

To get such points DONE, accurate admin is vital.

A checklist of all points in the above program is made up with the trainee's name on it and is kept up, with dates by the Interne Supervisor. This is kept in an Auditor Interne File, which files are kept by the Interne Supervisor. Thus at any time he can catch up any fall-off-the-lines and get the trainee going again.

A vertical Auditor Trainee Progress Board is kept by the Interne Supervisor. This has a space under each of the headings, left to right. Boxes along the top, left to right, serve to indicate the exact action the trainee is doing.

The trainee's name is on a tab that is pinned to the space. The name tab is newly dated each time it is moved to the right. Thus the Interne Super can chase up any faltering student.

Various bugs occur—the student is held in the HGC as an auditor because of HGC hours stat. The course gets flabby and 3 weeks becomes 4. Or somebody has illegally put the student on a special project and he's off the course. HCO begins to use the students as a personnel pool, etc, etc. Or the student bogs for lack of cramming or case repair.

The Interne Super's stat is COMPLETIONS of steps on the board. One point for each left to right move of a trainee's name.

Thus the Interne Super has a vested interest in recruiting trainees or his stats will collapse.

## PAID STUDENTS

It is wise to greatly prefer that students pay for their training before being recruited.

Purely for free services have a bad history in orgs.

As this Interneship is ALSO the same Interneship for paying students only a portion should be staff trainees as such. The difference is that the staff trainee must be contracted to the org and must continue on in the HGC.

Only the very best, most ethical fast study trainees should ever be sent to a higher org. The percentage of losses is too high otherwise. It is too hard on the org's income otherwise.

If somebody else just must go to a higher org, let him pay his own way. Don't make your org a subject of freeloading. It hurts your own pay.

## PART TIME

Part-time study, by which an HGC auditor part-time studies the next level while still auditing IS A COMPLETE FAILURE. By actual record they just never make it.

Do the steps fully with full attention on each while it is being done. Don't have the trainee finishing the last one and doing the next one. You'll rarely get a product.

Sharply and efficiently and crisply get each step of the horizontal board full and industriously DONE each in turn.

And you'll make splendid auditors and make them fast.

	HCO B 19 Jan 66	Danger Conditions—Technical Data for Review Auditors

1. Has there been an upset about study? \_\_\_\_\_  
Fly all ruds triple, "In study has there been \_\_\_\_\_?"
2. Has there been a Misunderstood Word? \_\_\_\_\_  
Find it, get it looked up and correct it.
3. Have there been upsets in getting Words Cleared up? \_\_\_\_\_  
WC Corr List and handle.
4. Have there been misunderstood subjects? \_\_\_\_\_  
Give person Word Clear 1 or get the Word Clear 1 already done redone with the missing subjects added to the WC 1 Standard C/S.
5. Have you ever been punished because you wouldn't learn? \_\_\_\_\_  
R3R Narrative Triple.
6. Have you been taught by someone you didn't like or hated? \_\_\_\_\_  
PTS Rundown with an additional S&D in step (a); L&N "Who has tried to teach you that you didn't like?" + L&N "Who have you taught that you didn't like?" Use remaining PTS steps on the names.
7. Have you ever gotten in trouble because you knew something? \_\_\_\_\_  
R3R Triple.
8. Would knowledge make you too powerful? \_\_\_\_\_  
Run (1) "What have you done with knowledge?" (2) "What have you withheld?" Alternate repetitive. (By an upper level auditor, Evil Purpose RD or L9S as case may R/S.)

9. Have you studied the same subject more than once? \_\_\_\_\_  
 "Why did you have to study the same subject more than once?" 2wc  
 E/S to F/N.
10. Have you failed to complete courses you took? \_\_\_\_\_  
 2wc "What courses have you failed to complete?" E/S to F/N.  
 Followed by WC 1 Actions on courses named.
11. Have you continued to study a subject you had already grasped? \_\_\_\_\_  
 Find the point of win. Rehab it. (Upper level auditor, date locate  
 point of win.)
12. Do you try to get out of classrooms or schools? \_\_\_\_\_  
 R3R Triple on FI "Locate a time when you were made to go to  
 school or class." F2 "Locate a time when you made someone go to  
 school or class." F3 "Locate a time when another made others go to  
 school or class." R3R. (Quad would be F0, "Locate a time when  
 you made yourself go to school or class."—F0 not necessary.)
13. Are you trying to do something else with study? \_\_\_\_\_  
 L&N to BD F/N item, "What are you trying to do with study?"  
 (Upper level auditor, date to blow locate to blow item.)
14. Have you pretended to have studied things you hadn't? \_\_\_\_\_  
 2wc E/S to F/N.
15. Have you pretended to have qualifications you did not actually attain? \_\_\_\_\_  
 2wc E/S to F/N.
16. Have you ever lied to a teacher? \_\_\_\_\_  
 2wc E/S to F/N.
17. Have you ever cheated on an exam? \_\_\_\_\_  
 2wc E/S to F/N.
18. Have you ever committed overts on students? \_\_\_\_\_  
 2wc E/S to F/N.
19. Have you ever damaged study materials or books? \_\_\_\_\_  
 2wc E/S to F/N.
20. Have you ever failed to apply what you learned? \_\_\_\_\_  
 2wc E/S to F/N.
21. Have there been upsets in study? \_\_\_\_\_  
 L1C "On study \_\_\_\_\_" each reading item to F/N.

22. Are you trying to solve some Mystery? \_\_\_\_\_  
 L&N "What Mystery are you trying to solve?" to BD F/N item.  
 (Upper level auditor date to blow locate to blow.)
23. Has anyone ever considered that you were stupid? \_\_\_\_\_  
 PTS RD. Step (a) add L&N "Who has considered you stupid or  
 mentally retarded?" L&N "Whom have you considered stupid?"  
 L&N "Whom have others considered stupid?" Then handle as in  
 PTS RD.
24. Do you have bad eyesight or eyestrain? \_\_\_\_\_  
 Effort Processing and Rising Scale. (Upper level auditors, if this  
 persists, L10.)
25. Are you trying to forget something? \_\_\_\_\_  
 L&N "What are you trying to forget?" to BD F/N item. (Upper level  
 auditors then date to blow, locate to blow.)
26. Would someone else win if you did become educated? \_\_\_\_\_  
 2wc to F/N. (In extreme cases showing misemotion on this add to  
 PTS RD (a).)
27. Do you have disagreements in study? \_\_\_\_\_  
 2wc E/S to F/N then "What do you agree with in study?" 2wc E/S to  
 F/N.
28. Do you invalidate yourself in study? \_\_\_\_\_  
 2wc to F/N followed by "What confusion came before that?" 2wc  
 E/S to F/N.
29. There is some other reason not given? \_\_\_\_\_  
 2wc to F/N.
30. There was really nothing wrong with study in the first place? \_\_\_\_\_  
 Indicate to pc.
31. Repairing study was an unnecessary action. \_\_\_\_\_  
 Indicate to pc. Rehab when he felt okay about study.

**PTS RD ADDITION**  
(Refers to PTS RD HCOB 9 Dec 71)

The only reasons a PTS RD does not work are:

C/S Error: 1. Not doing one at all.

C/S Error: 2. Doing one in the middle of another RD.

C/S Error: 3. Doing one without set-up.

C/S Error: 4. The person was not PTS—which is to say was not chronically ill or roller coaster and the items didn't read.

Auditor Error: 5. The RD was badly run auditor-wise. R3R was bad, metering poor, ruds not correctly or fully done.

Auditor & C/S Error: 6. The RD was quickie, only doing step (a) and brushing

C/S Error: 7. Even though the whole RD was done fully, there remained on the case an undetected additional person or thing to which the pc was PTS.

The rules of PTS are

A PERSON WHO ROLLER COASTERS IS ALWAYS PTS.

A PERSON WHO IS CHRONICALLY ILL ALWAYS IS PTS.

A PTS RUNDOWN THAT DOES NOT WORK HAS NOT BEEN DONE AS PER 1 TO 7 ABOVE.

The remedies to the above are

1. Do it.
2. Pgm it in correct sequence.
3. Set the case up properly so it is running well and past errors handled.
4. Establish how well the person holds his gains before Pgming one. If any Q at all, do the RD.
5. Cram the auditor on TRs, Metering, R3R drills and ruds. Do L4B, GF Method 5 Handle, L3B on the pc and redo accordingly.
6. Complete the RD.
7. 2wc "What is your attention on?" to F/N. On PTS RD fly all ruds single; L&N "On the PTS Rundown what being or thing was missed?"; R3R Triple on it; fly all ruds and overts on it triple; if all not very okay now 2wc "What other subject or people might have been overlooked on the PTS RD?" Handle with R3R Triple and Ruds Triple plus overts.

A PTS RD *always* works. If it works with a relapse there is an error in it as in the numbered paras above.

THIS IS VITAL TECH TO THE PC. IT MAKES THE MOST DIFFICULT CASES FLY *IF IT IS DONE RIGHT*.

*IMPORTANT*

**R6EW—OT III NO INTERFERENCE AREA**

*Note:* (The following HCO B is broadly released despite the fact that it contains technical terms and upper level tech programs. A person who is taking this route has a right to know where he should go and where he shouldn't.

The amount of improvement a person can receive is so great that it takes a long series of actions to do it. As for "handling bad mental conditions" this is too simple and is not the business we are in. Just by handling the current upsets, problems, overts and withholds of a person in an hour's session, Scientology can make more *case* advance than was possible in any past century. So there is a vast difference between handling disturbed people and obtaining all the advance of which a person is capable of obtaining.

The data in this HCO B is issued to straighten out a current error being made in routing some cases.)

A long series of tests and many case results have for some time demonstrated that there is a NO INTERFERENCE AREA between R6EW and OT III.

A study of many cases and their results demonstrated conclusively that one does NOT audit Dianetics or Lower Scientology Grades on a pre-clear or pre-OT (Operating Thetan) AFTER he has begun Solo VI (the 1st Solo step) or BEFORE he has reached OT III (a higher Solo step per grade chart).

Upsets of varying degree were found in ALL cases tampered with in the NO INTERFERENCE AREA.

Repair actions to repair errors made by the Solo Auditor are all that can be beneficially audited on a person between R6EW and OT III.

Even the powerful L10, when done between R6EW and OT III will fail. Above and below the No Interference Area L10 is fantastically successful.

Nothing is superior to the Solo Grades.

THEREFORE, it is vital that a case be fully set up before beginning actual Solo Auditing.

For information, the following list, taken from HCO B 8 Jan 72, Issue II, is what constitutes a "set-up".

1. C/S Series 54 (former injuries, illnesses, etc., run out by Dianetics) completed?
2. GF40XRR (Resistive Cases List) assessed? Engrams of it handled?
3. Dianetics Full Flow Table run? To Dn Completion?
4. Full Drug, Alcohol, medicine handling done?
5. Dianetics ran well? To End Phenomena?
6. All Grades run, single, triple or Expanded?
7. Green Form (case repair) items handled?
8. Attained End Phenomena of each grade?

9. Interiorization Rundown done? INT is okay?
10. C/S Series 53 (any abnormal Tone Arm positions) handled?
11. Power to End Phenomena. Single? Triple? Power Plus?
12. Tone Arm Range okay?
13. Power, no illness after?
14. Power, no ethics troubles after?
15. Success stories okay?
16. Director of Processing Interview okay? Pc not wanting something handled?
17. Graph of Oxford Capacity Analysis Personality Test (or American Personality Analysis Test) with no point below middle of graph?
  - A. Pc set up and okay to go to R6EW Solo?
  - B. Pc needs further set-up and repair before Solo?

The above is a checklist used by Solo Course Case Supervisors. (It is NOT the program sequence by which the case is handled. This is given in the Grade Chart.) These are the points checked.

Once onto Solo, whether these points are in or not, that's it, HANDS OFF.

Once on Solo the pc is into the Non Interference Area. He may not have Dianetics or Grades. He may only have the lists and repairs given to Solo Auditors.

Of all these actions a full thorough drug-medicine-alcohol rundown is the most important. People who have been on heavy drugs, pot, etc or who have been alcoholics get things turned on in their banks and sometimes become terrified of them and will not Solo. They are unable to confront their pictures.

The remedy is to have a thorough drug-alcohol-medicine rundown.

The ONLY people who can't Solo are these poor devils who got onto these psychiatric type drugs.

These *can* be handled by a competent drug rundown.

The ideal program appears on the Grade Chart, displayed in most orgs and often sent out.

The chart has many symbols on it. A full glossary of these symbols and terms exists in HCO B 20 Aug 71, Issue II, "Classification and Gradation Chart, Abbreviations Explained", which should be posted alongside the chart.

A fast summary of the steps would be

C/S 54 (handling illnesses, accidents, injuries)

Dianetics

ARC Straightwire

OBJECTIVE Processes

Grades 0-IV

POWER

POWER PLUS.

Into this program can be placed the engram handling GF40RR for resistive cases, past practices, etc.

A Drug Rundown would occur in the area of Dianetics.

An Interiorization-Exteriorization Rundown would be given after the pc exteriorized. This usually occurs early on in processing and has to be handled.

A C/S 53 (for TA misbehavior) could be given anywhere.

The actual program run on the pc varies according to what the Case Supervisor requires, but it follows the Grade Chart.

### TEST

The Oxford Capacity Analysis (OCA) or the American Personality Analysis (APA) is a graph which shows desirable and undesirable characteristics in a case.

The points on the graph are moved up by processing. And Dianetics and Scientology processes below R6EW are very capable of moving these points into desirable range.

Above R6EW, the first Solo step, the graph can change but the person is moving out of the normal range of humanity and the Solo grades are not designed to change a human test graph and in fact these tests do not measure the OT band of abilities.

The test graph should be in normal range before Solo is begun.

Auditing below Solo is quite capable of handling the graph points and bringing them up to desirable range.

### SOLO PROGRAM

The Ideal Solo Program is as follows:

1. Set-up done and all items on the checklist okay.
2. Good training as a Solo Auditor. Can include the Professional Route of Class VI. Or the Social Counselor Course plus Solo. Or (at this time) the Solo Course only. One Solo Audits as well as he is trained and no better.
3. R6EW Solo Auditing to End Phenomena and attest.
4. Clearing Course Solo to CLEAR.
5. Operating Thetan I to attest.
6. Operating Thetan II to attest.
7. Operating Thetan III to attest.
8. Operating Thetan VII (audited by an auditor level) to attest.
9. OT III Expanded to attest.
10. OT IV.
11. OTV.
12. OT VI.
13. OT VIII as released.

After 7 above (OT III) or after 9 above (OT III Expanded) one can run more Dianetics, Expanded Grades, GF40, the famous L10 or do any other case action. One cannot profitably do these actions between Solo R6 and OT III. That's just the way the bank is.

You will note that "OT VII" is apparently out of sequence. It originally went OT III, OT IV, OT V, OT VI, OT VII. Then it was found that there was a level OT III Expanded. So it can go OT III, OT VII, OT III X, OT IV, OT V, OT VI or it can go OT III, OT IV, OT V, OT VI, OT VII, OT III X. One gets the most out of it by taking VII after OT III and then OT IV, OT V and OT VI really bite. Many persons were too nervous of OT III to do it well until a drug rundown and OT VII were done. Others thought OT III was endless and OT VII handled that.

The actual materials of these levels are held under tight security at Advanced Orgs because when they are shown to persons who haven't moved up the grades, they usually cave in. Thus the materials are only available in Advanced Orgs.

#### AVAILABILITY

Auditing at levels below Power is available from field auditors, Franchises and Scientology Orgs.

Power is available at Saint Hill Orgs in LA, Saint Hill UK, and Denmark.

All Solo levels are only available at Advanced Organizations.

A person goes from Field Auditor to Franchise to Scientology Org to a Saint Hill Org to an Advanced Org to obtain auditing of the whole Grade Chart.

Going from Clear back to lower grades—or from an Advanced Org back to a Franchise within the No Interference band—is liable to upset his case as it is being run out of sequence. He could go to a Franchise or a Scientology Org after OT III for Dianetics, Drug Rundown or other actions but not between R6 and OT III.

Processing and the mind is a technical subject. In Dianetics and Scientology, the answers have been found.

Like all technical material, you can't apply it poorly or backwards and expect results.

I try-and very successfully in most cases—to hold the lines straight and keep the materials purely and workably applied.

In the past year alone, fantastic tech advances have been made and are available in terms of refined application within the existing framework of the Grade Chart.

But the fundamentals do not change, the progress of the person up the Grade Chart must be regular and on course. Otherwise he will not receive full benefits.

It is my job to do all I can to make sure that full benefit is received. This is not always easy to do on a rather aberrated planet. But if it weren't so aberrated we wouldn't be here doing something about it. Right?

**FALSE TA ADDITION 2**

Reference: HCO B 24 Oct 71 False TA  
HCO B 12 Nov 71 False TA Addition  
C/S Series 53 HI-LO TA Assessment  
Int Ext Correction List

There is an infinity of wrong ways to get a pc to read between 2.0 and 3.0 on an E-Meter.

One method would be to shoot him. Dead bodies read between 2.0 and 3.0.

Another way is to throw the trim knob off.

Yet another wrong way is to use HAND CREAM to make the TA go lower and call "F/Ns" at 4.0 on an actual read.

An auditor who is not very expert is apt to find strange ways to do things because the usual is beyond his skill.

A GOOD auditor handles low and high TAs with HCO B 24 Oct 71 and Addition 12 Nov 71 and this HCO B "False TA", C/S Series 53 and the Hi-Lo TA Assessment.

The commonest sources of high TA are PROTEST, OVERRUN and out INTERIORIZATION RD and too big or too small cans.

The commonest sources of low TA are overwhelming auditor TRs or wet sweaty hands.

The subject is not open to experimentation. If a pc's TA is low or high and you don't correct it with the usual remedies mentioned above, the pc goes into the soup.

GOOD AUDITORS KNOW THEIR TECH AND USE IT TO REMEDY HIGH AND LOW TAs.

GOOD AUDITORS DO HONEST WORKSHEETS AND HONEST AUDITING.

BE A GOOD AUDITOR.

*C/S Series 74*

**TALKING THE TA DOWN MODIFIED**

The expertise of talking the TA down should be preserved. It is a skill.

But we have had high and low TAs solved for nearly a year and don't have to talk them down anymore as a constant action.

Auditors SHOULD know how to do it, and then use it as a rare action.

The right way to handle a high TA is to:

Do HCO B 24 Oct 71, HCO B 12 Nov 71, HCO B 15 Feb 72, each named FALSE TA if it has not been done by the auditor on the pc.

THEN if TA is high don't talk it down or do unusual solutions, do a C/S Series 53 or a Hi-Lo TA Assessment and handle. The Int-Ext Correction List is done as indicated and so is the Word Clearing Correction List.

As far as a C/S is concerned, when the pc's TA is seen to be high at session start, he should order as follows: "Check as per False TA HCO Bs" then when that is done he orders "C/S Series 53 Assess and return to me". Or "Hi-Lo TA Assessment and return to me". He then rapidly C/Ses the required actions.

He should have a standing order with all his auditors:

IF TA IS HIGH OR LOW  
AT SESSION START DO  
NOT CONTINUE THE  
SESSION BUT SEND FOR  
A C/S.

An auditor should not in fact talk a TA down, we know now, as he may be auditing over an Out Interiorization Rundown, either not done or botched.

It therefore saves time if other auditing is not done when the TA is high.

In general practice it will now be considered standard for an auditor, Dianetic or upper class, to not start a session over a high TA but to call for a C/S.

And where there is no C/S it will be considered standard for an auditor, seeing a high TA, to at once do a C/S 53 Method 5 (assessing it all), and then handling.

THERE ARE EXACT  
REASONS FOR A TA  
BEING HIGH AND  
THESE TODAY ARE  
EASILY HANDLED.

There is no need to talk a TA down. It is faster to directly locate the reason it is up.

Smoothly handling such situations is the mark of an expert.

HCO B 15 Feb 72 False TA Addition 2  
and this one  
HCO B 18 Feb 72 False TA Addition 3

A meter is a meter.

Meters are used to measure water, natural gas, and many other things.

An E meter is used to measure a pc.

If you rig a meter up so as to falsify its reads you get a wrong result.

You could rig up a water meter so it read that twice as much water had flowed and then sit around and wonder all week why the swimming pool never filled up.

The ACCURACY of a meter depends upon its being honestly set up and honestly used.

The HONESTY of the auditor determines his results.

The whole field of psychotherapy was dishonest from the days of witch doctors to psychiatry. Falsified data came from lack of knowledge of the mind. This made its practitioners DISHONEST.

We do not and must not follow that fatal road.

The technology we have WORKS to definite positive predictable results.

Results are obtained if the auditor has honestly studied and understood his materials and honestly applies them.

Falsifying study leads to falsifying meters and this gives bad results on pcs.

HONEST use of the materials and the meter gives an honest result.

One who does not know his materials and who cannot do his drills then thinks he has to make a meter cheat.

HONEST use of the meter by an HONEST auditor is the route to GOOD RESULTS.

LOW TAs

A bad practice has arisen to "beat" the low TA.

This is to have the pc wipe his hands every few minutes to get the TA up above 2.0.

Not only does this distract the pc and yank him out of session, but it is by inference putting his attention on the meter, a thing a good auditor does NOT do in a formal session. The pc's attention must be on his own case in a session, not on the meter or his hands.

An answer to low TA because of wet hands is foot plates.

But the best answer is to get the pc up scale so he doesn't have perspiring hands.

Overwhelming TRs is the commonest reason for low TAs. Not all the hand wiping in the world will cure poor TRs.

Some auditors "spook" (leap off the road like a horse frightened by something blowing along) at the very thought of high or low TAs. This is because they haven't got the TRs to handle a low TA nor the tech to handle a high one.

Making a meter read falsely low with cream or falsely high with talcum powder or wiping hands continually will not handle the pc's CASE.

That is what the auditor is there to do, not make his session look good!

The funniest one I have ever heard was a Solo auditor who had high TA trouble. So he used to fill up a bathtub with scalding water, fill the bathroom full of clouds of steam and then sit in the bath, holding onto his electrodes "Solo auditing".

It gave him a lower TA but it sure didn't give him any case result.

We maybe ought to have a contest as to who can come up with the most comical actual instances of falsifying meter reads.

One "auditor" "solved it" by just calling F/Ns whenever she got tired of the pc regardless of TA position. After a year or more of this she saw the light and put herself in Ethics.

The funny part is that her co-auditor had been doing the same thing on her!

HONEST TA IS THE BEST POLICY.

All Supervisors  
Student's Hat  
HPCSC  
Mini Crse  
Super Crse  
Word Clearing  
Crse  
Est Off Crse  
Dept 13 Personnel

*(Revised 26 March 1972  
Changes in this type style)*

**Word Clearing Series 32R**

**URGENT- IMPORTANT- URGENT**

*Vital for all Supervisors,  
Est-Os, and Cramming Officers*

**WORD CLEARING METHOD 4**

Tech and Admin Cramming Officers, Word Clearers *and Course Supervisors* use Method 4 Word Clearing when fishing for a misunderstood word. E.g. Cramming Officers use it to fish for misunderstood words concerning what the person is being crammed on. Word Clearers use it on Interns when the Intern needs a retrain or retread or even if the Intern is sent to Cramming. Course Supervisors use it in the Classroom *CONTINUOUSLY ON Non-F/N STUDENTS or queries.*

The whole idea is the person requiring the Method 4 Word Clearing has a Cramming Order or is not an F/Ning student because of confusion as a result of a misunderstood word, as per Word Clearing Series 16R or *omitted materials.*

Method 4 fishes for the misunderstood word, finds it, clears it, looks for another in the area until there are no more, *at which point one should get F/N VGIs*, then moves to another area, handles that—eventually the misunderstandings that resulted in the Cramming Order or non-F/N student are handled.

It requires no C/S OK for it to be done. Method 1 is not a prerequisite to Method 4.

E-Meter Drill No. 21 is the E-Meter Drill to be drilled on Method 4. It's the method of fishing for a cognition.

*Requires proper application of TRs and metering. All Supervisors, Est-Os, and Dept 13 personnel to check out on, drill, and **apply** this tech AS IT IS VITAL STUDY TECH.*

**METHOD 4 WORD CLEARING**

1. Give person the cans, state, "I am not auditing you. "

2. Ask while watching the meter:

*"Is there any part of what you're studying you did not fully get?"*

*Trace the read. Use "fishing for a cog" drill (per HCO B 25 June 70, Iss III) if needed.*

*If no read the question may be varied, e.g.*

*"Is there any part of the materials you're studying you disagree with?"*

*or "Is there any part of what you're studying you feel you could not apply?"*

*or "In (material being checked) is there anything you didn't understand?"*

*Let the student tell you **briefly**. Do NOT tell him the data.*

*Verify that his study Pack is complete as the data might have been omitted. Also he might never have read the pack at all.*

*If the data was missing do not go on to Step 3. See that he gets the complete pack and reads it Then repeat Method 4*

*If the person just has not read the materials do not go on to 3 but get him to read the materials. Then repeat Method 4.*

3. *Get what it is then ask:*

*"What **word** was misunderstood just before that?"*

Meter reads, Word Clearer finds the word, never accepting a confusion but finds *the* word giving the read (SF, F, LF, BD), gets it looked up in a dictionary and used in sentences until it can be seen from the sentences that the student now understands the word. This enables Method 4 to be done on a high or low TA as the word found doesn't have to be taken to F/N, just cleared to where it's obvious understanding has been attained on the word. If you did get an F/N on clearing the word, that's fine; now look for another.

4. *Repeat 2 & 3 until the materials are fully cleared up and any and all misunderstands or confusions handled.*
5. *If the action bogs when used in the classroom the student must be sent to Qual for handling and Supervisor to Cramming on TRs and metering and drilling on this procedure.*

*The correct action is a WC CORRECTION LIST DONE ON THE STUDENT AND HANDLED.*

Of course if the above Question F/Ns on asking, there would be no misunderstands on the material being checked, but the person is in Cramming, not an F/Ning student or whatever, so there obviously are misunderstood words to be found and handled.

Look at HCO PL 16 Feb 72 "The Purpose of the Dept of Personnel Enhancement". It says this Dept "reaches and looks for business all over the org and brings it in". So someone with stats down—student or post stats, confusion about what to do, overloaded, can't seem to handle it, how do you do this, etc, etc, are *all* indicators of misunderstood words as the person is saying confusion, confusion. Well, underneath the confusion is a misunderstood word just as Word Clearing 16R says.

Method 4 Word Clearing is what is used in doing and achieving the purpose of the Dept of Personnel Enhancement, HCO PL 16 Feb 72.

One of the ways the Word Clearers in this Dept do the job is using Method 4 Word Clearing.

**METHOD 4 IS USED BY COURSE SUPERVISORS TO HANDLE ALL STUDENT QUERIES ABOUT CONTENTS OF COURSE MATERIALS.**

*The reason students ask questions about "What is meant" is because of omitted pack materials from their checksheet, failure to read what they have OR BECAUSE OF A MISUNDERSTOOD WORD JUST BEFORE THEY GOT CONFUSED.*

*The Super has to know only where the materials are and BE SMART ENOUGH TO DO METHOD 4 INSTEAD OF GIVING THE STUDENT ALTER-ISED ANSWERS THAT STOP SCIENTOLOGY WORKING.*

*Word Clearing, especially Method 4, is how to get in HIGH CRIME HCO PL 7 Feb 1965, Reissued 15 June 70, "KEEPING SCIENTOLOGY WORKING"*

**SUCCESSFUL COURSE SUPERVISION AND SUCCESSFUL CRAMMING REQUIRE THIS ACTION BE FULLY KNOWN AND U - S - E - D.**

**\*\*K \*E \*E \*P\*\***

Qual Personnel

*C/S Series 71A*

**WORD CLEARING OCAs**

An illegal practice has been uncovered in which the words on the Oxford Capacity Analysis, American Personality Analysis and other tests have been word cleared by testers and Directors of Processing.

Example: Pc does an OCA (or any test) that shows a state of case in July. He gets auditing. He takes another test that shows what the auditing did by August. If somewhere along this line a test I/C or D of P word clears him on the test, the test-will change. Entering this variable wipes out any possibility of establishing what the auditing did for the case.

Example: If a child is measured as to height and then fed certain foods to see if he will grow and then someone changes or stretches the tape by which he was measured, you can't find out if the food did any good.

In science this is known as holding a constant.

We don't give a hoot in hell if the pc understands the test or not. The next time he takes it he'll probably have the same misunderstands but he'll have a change of opinion or even have a new cleverness or better memory and the test will change.

Therefore *none* of these things may ever be done:

1. Never tell the pc the right answers to a test.
2. Never tell a pc to look up words on a test he doesn't understand.
3. Never word clear the question sheet for a pc on *any* test.
4. Never answer a pc's question as to what a question means.

**DO THESE THINGS**

- A. Be sure any test person grasps this HCO B fully so he knows what a test is and why we test people.
- B. Never let a person who falsely reports routinely near a test line.
- C. Safeguard test answer sheets from being known or seen by unauthorized personnel.
- D. Use 2nd test and 3rd test question sheets, each different from the 1st one. (Tests are issued this way.)
- E. Give other tests (Aptitude or OTIS etc) to compare with the second or third OCA or APA if it is in doubt to see if the OCA has been "word cleared" or falsified.
- F. Groove in Examiners: Give a meter check on ALL ATTESTS at the Examiner. "Do you have any doubts or reservations concerning attesting to (whatever the attest is) ?" Note any INSTANT read (a latent surge can occur as a protest). This

question is asked before the question asking him if he wants to attest. E.g. "Do you have any doubts or reservations concerning attesting to Word Clearing Method I complete?" No instant read. Then ask the attest question "Would you like to attest to\_\_\_\_\_?"

Never let an Examiner permit any attest or pass to even be asked for if the meter tone arm is high or low or not F/Ning. If an INSTANT read is gotten on the first question above, the Examiner does not ask the second question, and sends the folder back to the C/S.

- G. Require a meter check at Success with the TA position and needle behavior noted on the Success form. Those with high or low TA and/or not F/Ning are not valid success stories. The success person makes the meter check after the story is written, notes it without pc seeing it and smiles and acks. He does not refuse the story as it will ARC Break the pc. But he must call it to the attention of the Dist Sec and Qual Sec that a false attestation and poor result came from Div IV and it must be taken off Div IV's stat.
- H. Both Examiner and Success must know of the False TA HCO Bs so they don't put the pc on wrong cans or use cans when the auditor used footplates.

This safeguards our test line.

The test line is a check on C/S and auditing quality. We are not trying to find out if Dianetics and Scientology work. We *know* that. We are trying to find out by test, Examiner and Success if it is being *properly* taught and *applied* in Div IV and Dept of Pers Enhancement.

HONESTY is a primary requirement on test lines. PR types that falsify to attain status or seem good fellows need not apply for these posts and shouldn't be on them.

THE PC OR STUDENT DEEP DOWN KNOWS WHETHER HE HAS MADE IT OR NOT.

If you or tests tell him he's made it when he hasn't he will get a false opinion of you and doubt you.

If you tell him he hasn't made it when he has he will get a false opinion of you.

He will think you don't know your business and blow.

SANITY is basically HONESTY and TRUTH.

When false data or altered data is entered this is ABERRATION.

So be *honest* and run a *sane* D of P, Examiner, Success and TEST line.

HCO BULLETIN OF 26 FEBRUARY 1972

Remimeo

***Word Clearing Series 15R***

(Cancels HCO B 21 Aug 71, the original  
WC Series 15 by a Testing personnel)

Reference HCO B 19 Dec 71, C/S Series 71,  
"D of P Operates by OCAs"

HCO B 24 Feb 72, C/S Series 71  
Additional

WORD CLEARING ANY WORDS ON ANY TEST AT ANY TIME IS A HIGH  
CRIME.

It suppresses tech results and obscures them.

The whole of HCO B 24 Feb 72, C/S Series 71A, explains fully why one never  
word clears tests or even tells a person being tested to use a dictionary.

FOREIGN LANGUAGE PERSONS

When testing persons who speak a different language than that in which the test is  
written, GET A TRANSLATED TEST INTO THEIR LANGUAGE OR TRANSLATE  
THE TEST WITHOUT ANY WORD CLEARING.

MIS Us ON TESTS

Where a person has a misunderstood word on a test, it usually remains  
misunderstood on the second test. Thus the test remains VALID as nothing has  
changed in it.

If the person's IQ rises during processing he may very well also figure out the  
misunderstood word now on the second test and improve the graph. But that is a valid  
PROCESSING result, not a false one introduced by clearing test words.

SUMMARY

Auditing works when properly done and it does not need a side action of word  
clearing a test to better the graph.

## LRH MODEL AUDITING TAPES

26 February 1972

"These tapes were made to be *used*. They are practical demonstrations of real live TRs.

"Some orgs have their own ideas about TRs, consider TRs as demonstrated in these tapes to be 'old—we don't do it that way any more' and have substituted their own versions such as a rote TR-4 'Thank you I'll repeat the auditing command.' 'Thank you I'll repeat the auditing command.'

"That is NOT TR-4.

"The TRs are exactly as given in HCO B 16 Aug 1971, Issue II, 'Training Drills Modernized' [Vol. VII-348]. PAB 151 'Handling Originations' [Vol. III -370] further amplifies this, clearly points out that TR-4 is NOT a rote command, and gives examples of its correct use. The LRH Model Auditing Tapes *are* models of the *correct* use of TRs. They are not open to interpretation by supervisors. Any opinion that they are the 'old' way of doing TRs and not to be used in modern auditing comes under the heading of Technical Degrade and is an ethics offense.

"Poor TRs throw pcs out of session, cause student blows from courses, bring about ARC Breaks and an inability to handle people and situations in life. TRs are therefore a most vital and basic skill.

"They *can* be mastered but only by an honest study of the TRs HCO B, getting all misunderstood words on the HCO B cleared, listening to the LRH Model Auditing tapes without one's own preconceived ideas of what TRs should sound like and without interpretation by others, and then by a very honest drilling of each TR from Zero on up.

"Only those auditors or students who glossed over TRs 0-3 without mastering them would ever demand or expect a rote command to be substituted for real TR-4.

"It's all in the HCO B and correctly demonstrated in the LRH Model Auditing tapes. So how about getting them read, listened to and applied and watch the resulting upsurge in personnel effectiveness and soaring student and auditing stats!"

**FALSE TA CHECKLIST**

Ref:	HCO B 24 Oct 71	False TA
	HCO B 12 Nov 71	False TA Addition
	HCO B 15 Feb 72	False TA Addition 2
	HCO B 18 Feb 72	False TA Addition 3
	HCO B 24 Jan 73	Examiner and False TA
	HCO B 24 Nov 73	C/S 53RF
	HCO B 23 Nov 73	Dry and Wet Hands Make False TA

The following are the items to be checked by an auditor on any pc. It need only be done once unless the check itself is suspected false, or if conditions of the pc's hands, etc change.

The checklist is kept in the pc folder and is entered on the folder summary as an action done.

The value of operating with correct can size should not be underestimated, the reference HCO Bs state why.

The auditor signs and answers the following points on the checklist, and gets answers from the pc where needed.

-----

R-Factor to pc: "We are going to check the cans and adjust them to get the best accuracy."

1. Is the meter charged fully? \_\_\_\_\_
2. Is the meter trimmed correctly? \_\_\_\_\_
3. Are the leads connected to the meter and cans? \_\_\_\_\_
4. Are the cans rusty? \_\_\_\_\_
5. *Are pc's hands excessively dry requiring vanishing cream?* \_\_\_\_\_
6. *Are the pc's hands excessively wet requiring powder?* \_\_\_\_\_
7. The pc is *NOT* being told continually to wipe his hands? \_\_\_\_\_
8. The pc's grip on the cans is *NOT* being continually checked by the auditor in a way that interrupts the pc? \_\_\_\_\_
9. TA position on large cans?  
Size approx 4 7/8 inches by 2 5/8 inches or 12 1/2 cm by 7 cm \_\_\_\_\_
10. TA position on medium cans?  
Size approx 3 3/4 inches by 2 1/8 inches or 9 cm by 5 cm \_\_\_\_\_
11. TA position on small cans?  
Size approx 2 inches by 1 3/16 inches or 5 cm by 3 cm \_\_\_\_\_
12. Are the cans too large for pc? \_\_\_\_\_

13. Are the cans too small for pc? \_\_\_\_\_
14. Are the cans just right in size? \_\_\_\_\_
15. Are the cans cold? \_\_\_\_\_
16. Are the pc's hands dry or calloused? \_\_\_\_\_
17. Does the pc have arthritic hands? \_\_\_\_\_
18. TA position on foot plates? \_\_\_\_\_  
(Foot plates are used and TA checked on them when the answer to 16 & 17 is affirmative.)
19. *Are the pc's feet calloused or excessively wet or dry?* \_\_\_\_\_
20. Does the pc loosen his grip on the cans? \_\_\_\_\_
21. Check the pc's grip, does he hold the cans correctly? (See E-Meter Drill 5.) \_\_\_\_\_
22. Is the pc hot? \_\_\_\_\_
- 22a. Is the pc well slept? \_\_\_\_\_
23. Is the pc cold? \_\_\_\_\_
- 23a. Is the pc hungry? \_\_\_\_\_
24. Is it too late at night? \_\_\_\_\_
25. Is auditing being done not in the pc's normal *regular* awake hours? \_\_\_\_\_
26. Are there rings on the pc's hands? \_\_\_\_\_
27. Is the pc wearing tight shoes? \_\_\_\_\_
28. Is the pc wearing tight clothes? \_\_\_\_\_
29. *Is it actually chronic High or Low TA case condition?* \_\_\_\_\_
30. *Has the pc gone into despair over his TA?* \_\_\_\_\_

The handling of these points is stated in the reference HCO Bs.

The handling of high or low TA after checking these points is by C/S 53RF, Short Hi-Lo TA Assessment C/S.

The way to be sure of a C/S 53RF or Hi-Lo TA list is by continued assessment and handling of these lists until an F/N on assessment is gotten.

So standard tech handles the high and low TA. The C/S Series gives more data on the subject.

*Establishment Officer Series 5*

**PRODUCTION AND ESTABLISHMENT  
ORDERS AND PRODUCTS**

The situation one often finds in an org, after one has, to some degree, conquered Dev-T, is that PEOPLE REQUIRE ORDERS.

For years I wondered why this was so. Well, I found it.

WHEN PEOPLE DO NOT CLEARLY KNOW WHAT THEIR PRODUCTS ARE THEY REQUIRE CONSTANT ORDERS.

To the Establishment Officer, this reflects most visibly in trying to get Program targets DONE.

Some people have to be ordered and ordered and ordered and threatened and howled at. Then, in a bewildered way, they do a target, sometimes half, sometimes nearly all.

Behind this apparent blankness lies an omitted datum. When they're like that they don't know what their product is or what it adds up to. Or they think it's something else or should be.

That blankness can invite overts.

It is very seldom that malice or resentment or refusal to work lies behind the inaction. People are seldom that way.

They usually just don't understand what's wanted or why.

Because they don't know what a PRODUCT is!

A whole Ad Council of a downstat org was unable even to *define* the word.

They had required orders, orders, orders and even then didn't carry them out.

**HAT SURVEY FOR ORDERS**

A staff member who requires orders may also think that any order is a policy and lasts forever. If you look into hats you will even find casual "close the door" type of orders, given on one occasion to fit one circumstance, are converted over into STANDING (continual) ORDERS that forever keep a certain door closed.

An Est O surveying the hats of a unit may very well find all manner of such oddities.

It is a standard Est O action to survey hats.

In hats you will find despatches giving specific orders or quoted remarks preserved instead of notes on what one has to know to produce a product.

In auditors' hats, directions for *1* specific pc in 1960, never published and from no tape or correct source, held onto like death like it was to be applied to every pc in the world!

A dishwashing hat may have orders in it but not how to wash dishes rapidly and well.

This is all a symptom of a unit or activity that does not know what its products are.

**DISESTABLISHMENT**

Where you find lots of orders kicking around, you will also find disestablishment by by-pass, command channels not held and staff members like to take their orders from anyone but those in authority—any passerby could give them orders.

This is rampant where an executive has not been well on post.

By counting such orders up and seeing who they are from one can determine the unhattedness of staff, their org bd weaknesses and principally their lack of knowledge of their products.

#### HATTING FOR PRODUCT

If an Est O is to hat so as to get the staff member to get his product out, then the Est O has to know how to clear up "products".

Now an Est O is an Establishment Officer? There are product officers. The Product of an Est O is the Establishment. Then what is he doing with Products?

Well, if he doesn't *hat so* staff members get out Products then the org will be a turmoil, unhappy and downstat.

Production is the basis of morale.

Hattedness is a basic of 3rd Dynamic sanity.

But if you don't HAT SO AS TO GET THE STAFF MEMBER YOU ARE HATTING PRODUCING YOU WILL HAT AND HAT AND IT WILL ALL BE IN VAIN. The person won't stay hatted unless he is hatted so as to be able to produce.

The Product Officer should be working to get the products out.

So if you don't hat for the product then the staff member will be tom between two sets of orders, the Est O's and the Product Officer's.

Only when you hat to get product will you get agreement with product officers.

If you are in disagreement with product officers, then the Est O is not hatting to get production.

#### RIGHT WAY TO

There is a right direction to hat. All others are incorrect.

1. CLEAR UP WHAT THE PRODUCT IS FOR THE POST. AND HAT FROM THERE.
2. HAT FROM THE TOP OF THE DIVISION (OR ORG) DOWN.

These are the two right directions.

All other directions are wrong.

These two data are so important that the failure of an Est O can often be traced to violation of them.

You can have a senior Exec going almost livid, resisting being hatted unless you hat by 1st establishing what the *product is*. If PRODUCT is first addressed and cleaned up then you can also hat from the top down.

If this is not done, the staff will not know where they are going or why and you will get silly unusual situations like "A11 right. So you're the Establishment Officer. Well, I give up. The division can have 2 1/2 hours a day Establishment time and then get the hell out of here so some work can be done . . . !" "Man, you got these people all tied up, stats are down! Can't you understand ...."

Well, if you don't *do* one and two above you'll run into the most unusual messes and "solutions" you ever heard of, go sailing off policy and as an Est O wind up at your desk doing Admin instead of getting your job done in the Division. And an Est O who is not on his feet working in the Division is worth very little to anyone.

So see where the basic errors lead and

Hat on Product before doing anything else and

Hat from the top down.

## STEPS TO CLEAR "PRODUCT"

This is a general rundown of the sequence by which *Product is* cleared and re-cleared and re-cleared again.

This can be checklisted for any Exec or staff member and should be with name and date and kept in the person's "Est O file folder" for eventual handing to his new Est O when the person is transferred out of the division or in Personnel Files if he goes elsewhere.

1. Clear the word PRODUCT.
2. Get what the Product or Products of the post should be. Get it or any number of products he has fully fully stated, not brushed off.
3. Clear up the subject of *Exchange*. (See HCO PL 27 Nov 71 Exec Series 3 and HCO PL 3 Dec 71 Exec Series 4.)
4. Exchange of the product Internal in the org. For what valuable?
5. Exchange External of the valuable with another group or public. For what valuable? (Person must come to F/N VGIs on these above actions before proceeding or he goes to an auditor to get his mis Us and out ruds very fully handled.)
6. Does he want the product? Clean this up fully to F/N VGIs or yourself get E/S to F/N or get an auditor to unsnarl this.
7. Can he *get* the products (in 2 above) out? How will he? What's he need to know? Get him fully settled on this point.
8. Will it be in volume? What volume? Is that enough to bother with or will it have to be a greater volume? Or is he being optimistic? What's real? What's viable?
9. What quality is necessary? What would he have to do to attain that? To attain it in volume?
10. Can he get others to want the product or products (as in 2 above)? What would he have to do to do this?
11. How do his products fit into the unit or section or department or division or the org? Get this all traced.
12. Now trace the blocks or barriers he may believe are on this line. Get what HE can do about these.
13. What does he have to have to get his product out? (Alert for unreasonable have to have before he can do blocks.)
14. Now does he feel he can get his product or products out?

Signature of Est O or Clearer.

*NOW* he really can be hatted.

---

## BRUSH-OFF

Quickie handling is a very very bad fault. "Quickie" means a brush-off "lick and a promise" like wiping the windshield on the driver's side when really one would have to work at it to get a whole clean car.

So don't "quickie" Product. If this is poorly done on them there goes the old balloon. Hating won't be possible.

Orders will have to be poured in on this terminal. Dev-T will generate. Overt products will occur, not good ones. And it won't be worthwhile.

## DISAGREEMENT

There can be a lot of disagreement amongst Product Officers and Est Os on what products are to be hammered out.

In such a case, or in any case, one can get a Disagreements Check done in Dept of Personnel Enhancement (who should look up how to do one).

This is a somewhat extreme way to settle an argument and should only be a "when all else fails".

It is best to take the whole product pattern of the org apart with the person, **STARTING FROM THE BIGGEST PRODUCT OF THE ORG AND WORKING BACK TO THE PERSON'S PRODUCT.**

Almost always there will be an outpoint in reasoning.

An Exec who *only* wants GI can be a trial as he is violating EXCHANGE. As an org is paid usually before it delivers, it is easy to get the org in trouble by backlogs or bad repute for non-delivery. An org that has credit payments due it that aren't paid maybe didn't deliver. But Div III may soften up collections for some reason like that and then where would the org be?

Vol 0 of the OEC Course gives an excellent background of how a basic org works. As one goes to higher orgs, lower orgs are depended upon to continue to flow upward to them. (See HCO PL 9 Mar 72, Issue I, Finance Series 11, "Income Flows and Pools".)

A study of Vol 0 OEC and a full understanding of its basic flows and adapting these to higher orgs will unsnarl a lot of odd ideas about Product.

The Est O has to be very clear on these points or he could mis-hat a person.

Usually however this is very obvious.

## PRODUCT OFFICERS

Heads of Orgs and divisions have had to organize so long they get stuck in it.

They will try to order the Est O.

This comes about because they do not know their products or the Est O is not following 1 and 2 above and does not know his own product.

The Product Officer may try to treat the Est O as a sort of "organizing officer" or a "program officer" if

- A. The Est O is not hatting to get production.
- B. The Product Officer is not cleared on Product.

So it comes back to the 1 and 2 first mentioned.

You can look over it now and see that if one is not doing these two things, Dev-T, non-viability and orders will occur.

So where you have Dev-T, down stats and orders flying around you know one thing that will resolve it:

**SOMETHING WILL HAVE TO BE IRONED OUT ABOUT *PRODUCT*.**

When it all looks impossible, go to this point and get to work on 1 & 2.

*HIGH CRIME*

**WHAT IS A COURSE  
HIGH CRIME**

The amendment HCO PL 26 Jan 72 What is a Course PL is CANCELED.

The Original WHAT IS A COURSE PL, HCOPL 16 Mar 71, is restored AS WRITTEN.

The added script line in the 26 Jan 72 revision is canceled as not written by myself and is a false datum.

The incorrect line states *"to be on the ball one should be oneself fully trained on the level one is supervising. It is by far preferable to be a Class VIII with full grasp of Standard Tech."*

This is an alter-is of Study Tech.

Careful investigation has found that WHEN SUPERVISORS FAIL THEY FAIL BECAUSE OF IGNORANCE OF SCN STUDY TECH AND FAILURE TO USE IT.

In Course Supervision it is OUT TECH to fail to know and USE Study Tech.

If an auditor were to say, "I have to know all about minds but I don't have to know anything about TRs, Meters or processes," you would think he was as crazy as a psychiatrist !

He would become so involved with the figure-figure of the patient he WOULD NOT KNOW HOW TO HANDLE HIM.

A Super who does not know or use Study Tech as a tech and does not heavily apply it to get the student through is an OUT TECH Super.

The *real* WHY of any failed or blowing students or students who cannot or do not apply the data is

**WHY: THE COURSE SUPERVISOR DOES NOT KNOW OR USE *STUDY TECH* BUT THINKS HE HAS TO KNOW THE *SUBJECT* TAUGHT SO HE CAN TEACH *IT*.**

Example: A Course Super standing staring at his Class. One half his students not using demo kits, one student listening to a tape and reading an HCO B at the same time but doping off, one third of the students boiling off. Challenged about this states, "But I don't know the materials they are studying."

If a railway engineer were to say, "I have to know all the tech of building a railroad and not how to run this train," you'd think he was batty.

If a housewife said, "I can't run my house because I have never taken a course on how to run my husband's business," you'd think she was crazy.

A Course Super who does not respect, know and USE Study Tech on his students is guilty of practicing OUT TECH.

If an auditor did not know how to start and stop a session, how to read a meter, his TRs, his processes or handle a session he would have nothing but failed preclears.

IN THE SAME FRAME OF REFERENCE, A COURSE SUPER WHO DOES NOT KNOW HOW TO START AND STOP A STUDENT, CLEAR WORDS, ENFORCE DEMOS AND DOES NOT GET STUDY TECH APPLIED CONTINUALLY WILL HAVE FAILED STUDENTS.

A Course Super's primary tech is Study Tech and its application to a student. If he can keep that student on the rails and F/Nng and rapidly covering his materials he is doing the WHOLE JOB OF SUPERVISING.

It is therefore a High Crime for a person to Supervise a Course who does not know, apply and continually use his Study Tech on every individual student.

It is also a HIGH CRIME for a Director of Training or a Tech Sec or an Est O to have anyone supervising without FULL USE OF STUDY TECH.

Just as it's a HIGH CRIME to continue to use HGC auditors who smash up pcs through non-use of Auditing Tech, it is a HIGH CRIME to continue to use Course Supervisors who do not know that Study Tech exists, that it is a tech and that it is the "tools of his trade" and who does not use it and thus smashes up students.

The society knows *nothing* about Study Tech. It thinks a teacher "teaches the subject and must know the subject!" Thus it alter-ises the subject, almost never makes a competent person and routine school teaching is looked upon by Industry as a huge failure. All manner of unusual solutions are in progress in every country to remedy this inability of students to learn.

WE MUST NOT CONTINUE TO INHERIT THE IDIOCY THAT A TEACHER ONLY HAS TO KNOW THE SUBJECT AND KNOW NOTHING ABOUT STUDY TECH.

It is *Study Tech* that gets the student of *any* subject through.

The thing that breaks the Super down is ignorance of just ONE point:

A STUDENT WITH A MISUNDERSTOOD WORD WILL POUR OUT A TORRENT OF QUERIES ABOUT THE SUBJECT!

The Super is a complete ignorant fool if he answers one of these questions. The Super's knowledge of the subject is not what is needed! If the Super knew and practiced Misunderstood Word tech he'd know that student has misunderstood words and he would find and handle. HE WOULD NOT ANSWER OR EVEN TRY TO ANSWER THOSE QUERIES. It would do NO good if he did. This query-happy student has passed by a Mis-U word !

Such a student can get misemotional. He is upset. He thinks data is being denied him. He wants to blow.

What kind of a Super is it that doesn't grab a meter and find the word? An SP? Or What?

Just like an "auditor" is not an auditor who lets pcs blow without handling so is a Super no Super at all who cannot handle a student with Study Tech.

So let's knock off the wog world inheritance and get on the ball and REALIZE STUDY TECH IS THE TECH A SUPER KNOWS AND USES.

Just because a Super was himself mistaught by old Mrs. Zilch in the third grade— who knew arithmetic but not how to teach a subject—is no reason he has to go on laying an egg in a Scientology classroom.

A Course Super is a technician, a specialist in Study Tech.

And just to help it out, IT IS A HIGH CRIME TO FAIL TO USE STUDY TECH IN A CLASSROOM.

Any time a student blows or later fails to be able to apply his data, the Super who taught him will be Comm Eved for OUT TECH.

We must have no blows and no failures.

The product of a Super is a Graduate from his course who knows and can successfully apply the subject that was taught.

This is his true stat. Points measure only quantity. The record of the individual student measures quality. The Exchange value of the student after a course (not his fee) measures viability.

It may be a crazy planet. Course Supers don't have to teach crazy courses where Study Tech is not used.

WHAT IS A COURSE is answered by one where the elements of the original HCO PL 16 Mar 71 are in use AND:

Where Study Tech is in full and continual application to every student in that course!

*Establishment Officer Series 11*

**FULL PRODUCT CLEARING  
LONG FORM**

(Reference HCO P/L 13 Mar 72  
Est O Series No. 5)

**MUST BE DONE ON AN EST O  
BEFORE HE DOES IT ON STAFF.**

If you ask some people what their product is, you usually get a DOINGNESS.

There are three conditions of existence. They are BE, DO and HAVE.

All products fall under HAVE.

The oddities you will get instead of a proper product are many.

Thus it is possible to "clear products" without any real result.

**PRODUCT CLEARING FORM**

_____	_____
Org	Person's Name
	_____
	Date
	_____
	Post

The 14 Points of Est O Series 5 are done in this fashion, with a meter used to check words.

**STEP ONE**

**DO NOT TAKE FOR GRANTED THAT THE PERSON KNOWS WHAT "PRODUCT" MEANS. GET IT AND EVERY WORD IN THE DEFINITION LOOKED UP.**

- (a) Clear the Word PRODUCT. Dictionaries give a variety of definitions. Make sure you get a useable definition that the person understands AND WHICH HE UNDERSTANDS ALL THE WORDS IN. He can be hung up on "that" or "is" in the definition itself believe it or not.
- (b) Have the person USE the word PRODUCT 10 times in sentences of his own invention and use it correctly each time.
- (c) Now clear up BE, DO, HAVE, the Conditions of Existence. People often think a BE is a product or a DO. It is always something someone can HAVE.

Clear the words BE, DO, HAVE by dictionary, especially HAVE.

- (d) Write these on a sheet of paper

BE

DO

HAVE.

Tell the person to name a product out in the world (a car, a book, a cured dog, etc).

Put an arrow into the word DO if he gives you a "do", into BE if he

gives you a "be" instead of a HAVE.

Mark HAVE with an arrow each time he gives a right HAVE product.

When he can *rapidly* name a product that is something that one can HAVE, without a comm lag, go on to next step.

- (e) Clear up this question on a meter Method 4 (see HCO B 22 Feb 72, Word Clearing Series 32, "Word Clearing Method 4"):

"Have I used any word so far you did not understand?"

Get it clean.

- (f) Now give the person a copy of HCO P/L 29 October 70 Org Series 10.

Have him read the policy letter.

- (g) Clear by Method 4 Word Clearing this question:

"Are there any words in the policy letter you did not understand?"

Get it cleaned up. If there were any, have him reread the policy letter until he says he has it.

- (h) Drill the pc on Products 1, 2, 3 and 4.

Write:

Product 1	Product 2
Product 3	Product 4

on a sheet of paper.

Let him retain and consult the HCO P/L 29 Oct 70 Org Series 10.

Put the point of your pen on one of the products (Product 1 or 2 or 3 or 4) and say, "Name a Product 1." "Name a Product 3." "Name a Product 4." "Name a Product 2." Do this until pc has it.

Now take the P/L away from him and repeat the drill.

When your Product 1, etc is all blacked up with ball-point spots *and* the person is quick at it, thank him. Tell him he has it and go on to next step.

## STEP TWO

- (a) Look up the hat and org board of the post of the person being product cleared and get some idea of what the post's product would have to be to fit in with the rest of the scene. It won't necessarily be in former hat write-ups. What the post produces must be worked out. Write down what it possibly may be.
- (b) Get the person to tell you what his post *produces*. Have him work the wording around until it is totally satisfactory to him and is not incorrect by Step 2 (a).

Be *very* careful indeed that you don't get a wrong product or you could throw the whole line-up of the org out.

Beware of "a high stat" or "a bonus" or "GI" as these are items received in Exchange, not the person's produced product.

Once more resort to	BE
	DO
	HAVE

to be sure he is not giving a doingness. And point this out until he actually has a HAVE.

Write down the product on the worksheet.

- (c) Ask if there are any more products to the post. If the person is wearing several hats, he would have a product for each hat. List each hat and get the product of each hat written after it.
- (d) Now take the principal product of the post and see if it is really three products of different degrees or kinds. (Example: an auditor has [A] A well pc [one who has been gotten over a psychosomatic illness] [B] A person who is physically active and well and will continue to be well, and [C] A being with greatly increased abilities. A Super has [A] A trained student, [B] A Course graduate, [C] A person who successfully applies the skills taught.) (Note: The above are rough wordings.)

The A, B, C you will notice fit roughly into (A) BE, (B) DO, (C) HAVE.  
If the person has trouble with this, write BE, DO, HAVE on the worksheet.

- (e) Find out if the person has had these confused one with another or if he is trying for A when his product was C, or any other mix-up.

See if he has to first get a BE, then a DO to finally achieve a HAVE. When he has all this straight he should cognite on what product he is going for on his post, with VGIs.

- (f) Tell the person that's it for the step and verify the products with a Product Officer. (Be sure it's a Product Officer who has had his Product Clearing. If this is THE Product Officer of the org, see if it compares to the Valuable Final Products of an Org [see HCO P/L 8 Nov 73RA, revised 9 Mar 74, "The VFPs and GDSs of the Divisions of an Org" ].) If the products are not all right check the person on a Meter for Mis Us and do steps 1 and 2 again. If okay, proceed to Step 3.

### STEP THREE

- (a) Give the person HCO P/L 27 Nov 71, Executive Series No. 3 and HCO P/L 3 Dec 71 Executive Series 4. Have him read them.
- (b) Return and do Method 4 on the P/Ls and clean up any Misunderstood Word. If these are found and looked up and used, then have the person read the P/Ls again.
- (c) Now that the person has it, exchange objects with him. Have him now explain exchange until he sees clearly what it is.

### STEP FOUR

- (a) Now write his product on the left-hand side of your worksheet and draw an arrow from it to the right:

His Product ----->  
And one to the left below it <-----

Have him tell you what, *internally* in the org, he could get in *exchange* for producing his product and getting it out.

Have him clear up why he might not get that.

- (b) Have him look at a worksheet picture:

	Overt Act----->	Injury
	Injury <-----	Overt Act
SELF	No Product----->	OTHERS
	Nothing <-----	Nothing

as a cycle. Be sure he grasps that.

- (c) Have him look at a worksheet picture:  
Overt Product -----> Upset  
Upset <----- Overt

And have him grasp that cycle.

- (d) Now have *him* draw various such cycles having to do with the products he has been getting out. Such as:

Bad product -----> Dissatisfied

Bad feelings <----- Ethics

But using various versions of products.

Do this until he has it untangled and feels good.

- (e) Have him write down his product on the left, arrow to the right, what comes back on the right and what occurs on the left.

If he has this now, tell him that's fine.

#### STEP FIVE

(All in Big Clay Demos)

- (a) Have him work out what theft is in terms of Exchange, and arrows.
- (b) Have him show how his product contributes to the org's product.
- (c) Have him work out how the org's product as relates to his division is then exchanged with society outside the org and Scn and what society exchanges back to the org.
- (d) Have him work out how his product contributes to org's product outward and outside the org and Scn and then from the society outside back to the org and org back to him.

This may have more than two vias each way.

- (e) Have him work out the combined staff products into an org product and then out into the society and then the exchange back into the org and to CLOs and upper management and to org staff.
- (f) When the Demos are all okay and BIG tell him that's fine and go on to next step.

#### STEP SIX

(Metered)

- (a) Find out if person wants his *product*? (not the Exchange).

If not find out who might suppress it? and E/S times.

Who might invalidate it? and earlier times.

2wc it to F/N Cog VGIs.

- (b) Establish now if the person wants his product.

(If bogs turn over to a C/S and auditor for ruds and completion.)

#### STEP SEVEN

(Metered)

- (a) Can the person get his product out?

- (b) Handle by 2wc E/S to F/N.

#### STEP EIGHT

(Metered)

- (a) What will his product be in volume?

Is that enough to bother about or will it have to be in greater volume?

What would be viable as to volume?

Clean up RUSHED or Failures.

To F/N Cog VGIs.

STEP NINE

(Metered)

- (a) What quality would be necessary?

Get various degrees of quality stated.

What would he have to do to attain that quality?

What volume could he attain?

What would he have to do to attain that?

To F/N Cog VGIs.

STEP TEN

(Metered)

- (a) Can he get others to want the products he put out?

What would he have to do to attain this?

STEP ELEVEN

(In BIG Clay)

(This is a progressive Clay Demo  
added to at each step!)

- (a) How does his product or products fit into the framework of his section? Requires he work out the section product if his is not it. Then fit his to it.
- (b) How does his product fit into the Department? Requires he work out the Department's product and fit his to it if his is not the Dept's product.
- (c) How does his product fit into the Division's products? He will have to work out the Div's product or consult HCO P/L 8 Nov 73FA revised 9 Mar 74, "*The VFPs and GDSs of the Divisions of an Org*".
- (d) How does the Division's Product exchange with the Public? And for what?
- (e) What happens to the org on this exchange?

STEP TWELVE

(In Big Clay)

- (a) What blocks might he encounter in getting out his product?
- (b) What can HE do about these?

STEP THIRTEEN

(2 wc)

- (a) What does he have to have to get his product out? (Beware of too much have before he can do. Get him to cut it back so he is more causative.)

STEP FOURTEEN

(Written by Pc)

- (a) What is his product on the 1st Dynamic—self?

How does it fit in with what he is doing?

- (b) What is his product on the 2nd Dynamic—family and sex?  
How does it fit in with what he is doing?
- (c) What is his product on the 3rd Dynamic—Groups?  
How does it fit in with what he is doing?
- (d) What is his product on the 4th Dynamic—Mankind?  
How does it fit in with what he is doing?
- (e) What is his product on the 5th Dynamic—animal and vegetable kingdom?  
How does it fit in with what he is doing?
- (f) What is his product on the 6th Dynamic—the Universe of Matter, Energy, Space and Time?  
How does it fit in with what he is doing?
- (g) What is his product on the 7th Dynamic—beings as spirits—thetans?  
How does it fit in with what he is doing?
- (h) What is his product on the 8th Dynamic—God or the Infinite or religion?  
How does it fit in with what he is doing?
- (i) What is his post Product?
- (j) Can he get it out now?

#### Est O or Product Clearer

Note this long form has to be run on leading executives and eventually on all staff. The short form in Est O Series 5, 14 points, series as a rapid action. Where there is any hang-up on the short form, send the person to an auditor. Where there is a hang-up on the long form, send the person to an auditor. The auditing action is to fly ruds on the RD and assess any key words the pc is upset about and do an 18 button prepcheck *carrying* each prepcheck button to F/N.

#### TA

Where the TA is already high do not attempt the short or long form.

Where the person turns on a rockslam check for rings on the hands. If so, remove rings. Note if R/S continues.

In either case the person should be programmed for TA trouble with C/S 53RRR and handled, and then given a GF40RR Method 3 (F/Ning each Question that reads) and then running the engrams with drugs run first.

Product Clearing is best done after Word Clearing No. 1 is successfully done.

An Est O who can use a meter and Method 4 WCing and knows Clay Demoing can do it.

HCO Bulletins are planned to be issued on this RD to handle it on rough ones or repair it as needed in the hands of an expert auditor.

**HAS SPECIALIST AND ESTABLISHMENT OFFICER  
AUDITING PROGRAM (Revised)**

(Reference HCO PL 20 Aug 71,  
Issue I, "HAS TROUBLES")

*(This Program has been revised to  
improve results and stability.)*

The HAS (HCO Area Secretary), any HCO Executive Secretary, HCO Cope Officer, HCO Org Officer, Tech Establishment Officer, any HAS Deputy OR any Executive or Divisional Head or staff member who shows a tendency to transfer or unstabilize staff members or who fails to hat others, must be processed especially in order to be totally stable on post.

The HAS and Establishment Officers are peculiarly subject to efforts to unstabilize them. These require the Program to be done in any case whether stable or not.

Executives or staff members who show signs of obsessive transfer of the staff or org are also greatly benefited.

The HAS Specialist Rundown consists of processes which increase the ability to hold a position.

THE RUNDOWN MAY ONLY BE DONE WHEN NO EXISTING AUDITING PROGRAM IS ONLY PARTIALLY DONE. COMPLETE THE EXISTING CYCLE FIRST.

*HAS RUNDOWN*

**COURSE SUPERVISOR CORRECTION LIST**  
**STUDY CORR LIST 2R**

(Reference LRH ED 174 INT)

The Supervisor Correction List is designed to help locate the individual reasons a supervisor has for not fully applying the study tech in supervision.

The list is normally done in Qual but may also be done by a D/T on his supervisors. It merely assists a D/T or Qual Personnel in finding why the supervisor is not using study tech.

The *list* is assessed Method *Five* and handled as indicated. A second bracket in the handling shows the further actions to be done after the list has been F/Ned on all reading items.

NAME: \_\_\_\_\_ DATE: \_\_\_\_\_

AUDITOR: \_\_\_\_\_

0. DID YOU GO THROUGH *EACH* STUDY TAPE ONCE *CLEARING EVERY DEFINITION OF EACH WORD AND THEN LISTEN TO IT FOR UNDERSTANDING* AND A THIRD TIME IF THERE WERE ANY MISUNDERSTOOD WORDS ON THE SECOND AND DID YOU DO THE SAME ON THE STUDENT HAT?  
(2wc E/S to F/N.) (Pgm for PRD or PRD retread.)
00. DO YOU HAVE A REASON YOU ARE NOT USING THE STUDY TECH?  
(L&N "What reason do you have for not using study tech?") (Pgm for PRD retread or PRD after Cramming on the Why.)
000. HAS A WRONG WHY BEEN FOUND FOR YOUR NOT USING STUDY TECH?  
(L4BR and handle. Find the right Why.) (Pgm for PRD retread or PRD after Cramming on the Why.)
0000. HAVE YOU DONE ALL THESE THINGS ALREADY AND STILL HAVE TROUBLE WITH STUDY?  
(Do Student Rehabilitation List HCO B 15 Nov 74.)
00000. HASN'T A WORD CLEARING CORRECTION LIST BEEN DONE?  
(Get it done.)
1. DO YOU HAVE AN ARC BREAK ON COURSE?  
(Find what, ARCU CDEINR E/S to F/N.)
2. DO YOU HAVE PROBLEMS WITH SUPERVISION?  
(2wc E/S to F/N.)

3. DO YOU HAVE OVERTS ON STUDENTS?  
(Get them, E/S to F/N.)
4. DO YOU HAVE OVERTS ON STUDY?  
(Get them, E/S to F/N.)
5. ARE YOU SUPERVISING OVER WITHHOLDS?  
(Pull them, E/S to F/N.)
6. ARE YOU AFRAID OF BEING FOUND OUT?  
(2wc E/S to F/N.)
7. *DID YOU FALSIFY YOUR STATS?*  
(2wc E/S to F/N) (Get them corrected.)
8. HAVE YOU NEVER DONE A SUPERVISOR'S COURSE?  
(Get the W/H off to F/N.) (Get person onto supervisor course.)
9. HAVE YOU NEVER STUDIED THE STUDY TECH?  
(Get the W/H off to F/N.) (Get it studied.)
10. HAVE YOU NEVER LISTENED TO THE STUDY TAPES?  
(Get the W/H off to F/N.) (Get them studied.)
11. DO YOU HAVE MISUNDERSTOODS ON THE STUDY MATERIALS?  
(Method 4 word clear.) (And retread.)
12. DON'T YOU KNOW HOW TO SUPERVISE?  
(Find out what areas he doesn't know. WC Method 4.) (And retread. )
13. *DOING OTHER WORK IN CLASS TIME?*  
(Get the W/H off E/S to F/N.)
14. ARE YOU AFRAID OF CONSEQUENCES?  
(2wc E/S to F/N.)
15. ARE YOU AFRAID OF TEACHING THEM WRONG?  
(2wc E/S to F/N.)
16. HAS THE STUDY TECH NOT WORKED ON YOU?  
(Find what didn't work, correct it to F/N and a win.)
17. DON'T YOU KNOW IF THE SUPERVISOR TECH WORKS?  
(Find misunderstands and handle.)
18. DO YOU THINK YOU *SHOULD* KNOW THE *MATERIALS INSTEAD OF STUDY TECH?*  
(2wc E/S considerations to F/N.) (Find what study tech he didn't understand, word clear Method 4.)
19. ARE YOU UNABLE TO REFER STUDENTS TO THEIR MATERIALS?  
(Find why and handle. E.g. no materials, materials out of order, thinks he has to know the materials instead of the study tech.)
20. *ARE YOU GIVING VERBAL TECH?*  
(Get off the W/H E/S to F/N. Find out why he felt he had to do it and clean it up.) (Forbid it and make it an Ethics offense.)

21. *ARE YOU INTERPRETING BULLETINS?*  
(Get off the W/H E/S to F/M Find out why he felt he had to do it and clean it up.) (Forbid it and make it an Ethics offense.)
22. *DO YOU FAIL TO MAKE MATERIALS AVAILABLE?*  
(2wc E/S to F/N.) (Pgm for Vital Info R/D.)
23. *DON'T YOU HAVE THE COURSE MATERIALS?*  
(Find out what he could do about that, 2wc to F/N.)
24. *DON'T YOU KNOW HOW TO GET THE MATERIALS?*  
(2wc E/S to F/N.) (Hat on relevant materials.)
25. *DON'T KNOW WORD CLEARING TECH?*  
(Get the W/H off to F/N.) (Find out if ever studied it in the first place. If not get it studied, if so clean up misunderstands.)
26. *NEVER USING M9?*  
(2wc E/S to F/N.)
27. *CAN'T USE A METER?*  
(Get the W/H off to F/N.) (Cram and drill on metering.)
28. *USING NO STUDY LISTS?*  
(2wc E/S to F/M)
29. *AFRAID OF DOING IT WRONG?*  
(2wc E/S to F/N.)
30. *TRs NOT GOOD ENOUGH?*  
(2wc E/S to F/N.) (Method 4 TRs HCO B, TRs including Admin TRs.)
31. *INTERRUPTING STUDENTS WHO ARE F/Ning.*  
(2wc E/S to F/N 3-way Help/3-way Failed Help.)
32. *CAN'T CONFRONT STUDENTS?*  
(2wc E/S to F/N.) (2 hrs confronting full classroom of students. )
33. *CAN'T CONFRONT A CLASSROOM?*  
(2wc E/S to F/N.) (2 hrs confronting classroom, reach and withdraw from a classroom.)
34. *DON'T LIKE PEOPLE?*  
(O/W on people.)
35. *DON'T LIKE STUDENTS?*  
(O/W on students.)
36. *USING DURESS ON STUDENTS?*  
(2wc E/S to F/M Find Why by L&N)
37. *HAD LOSSES ON HELPING STUDENTS?*  
(3-way Help, 3-way Failed Help.)
38. *DON'T BELIEVE STUDENTS CAN BE HELPED?*  
(2wc E/S to F/N.)
39. *CONSIDER IT IS WRONG TO CONTROL STUDENTS?*  
(2wc E/S to F/N.) (Objective processes especially SCS.)

40. *3RD PARTYING STUDENTS?*  
(Handle as an overt E/S to F/N)
41. OVERWHELMED BY LOTS OF STUDENTS?  
(2wc E/S to F/N.) (2 hrs confront on classroom full of students. )
42. AFRAID THAT IF STUDENTS GRADUATED WOULD HAVE NO MORE STUDENTS?  
(2wc E/S to F/N.)
43. AFRAID STUDENTS WILL KNOW MORE THAN YOU DO?  
(2wc E/S to F/N.)
44. DON'T FEEL THE SUBJECT BEING SUPERVISED IS IMPORTANT?  
(2wc E/S to F/N.)
45. *NEGLECTING STUDENTS WHO ARE BOGGED?*  
(2wc to find out why. Handle the out rud or confusion to F/N )
46. *THINKING CERTAIN STUDENTS ARE DOG STUDENTS AND SO NOT HELPING?*  
(Triple Ruds and Overts on students. 3 May PL if he hasn't had one. WC M4 on super materials.)
47. HAVE OUTNESSES IN OWN STUDY?  
(Student Rehabilitation List.)
48. HAVE MISUNDERSTOODS ON STUDY TECH?  
(Method 4.) (And retread.)
49. HAVE MISUNDERSTOODS ON SUPERVISOR MATERIALS?  
(Method 4.) (And retread.)
50. DON'T KNOW THE PRODUCT OF A SUPERVISOR?  
(Product R/D.)
51. WORKING FOR SOME OTHER PRODUCT?  
(2wc E/S to F/N.)
52. DON'T KNOW THE PRODUCT OF THE COURSE?  
(Product R/D.)
53. DON'T KNOW HOW TO TELL WHEN THE PRODUCT IS ATTAINED?  
(Product R/D.)
54. WORD CLEARING TECH DIDN'T WORK ON YOU?  
(Word Clearing Correction List.)
55. DO YOU HAVE SOME OTHER IDEAS ON WHAT A SUPERVISOR SHOULD DO?  
(2wc E/S to F/N.)
56. WOULD YOU HAVE TO BE SOMEONE ELSE IN ORDER TO SUPERVISE?  
(L&N Who else would you have to be to supervise?)
57. DO YOU HAVE FIXED IDEAS ON HOW TO SUPERVISE?  
(2wc E/S to F/N.)

58. SHOULD YOU REALLY BE DOING SOMETHING ELSE?  
(2wc E/S to F/N.)
59. DO YOU HAVE DISAGREEMENTS WITH THE STUDY TECH?  
(Method 4 Word Clearing Tech.)
60. DO YOU HAVE DISAGREEMENTS WITH COURSE SUPERVISOR POLICY?  
(2wc *disagreements with* course supervisor policy. 2wc *agreements with* course supervisor policy.)
61. ARE YOU TRYING TO BE SOMETHING ELSE?  
(2wc E/S to F/N.)
62. DON'T YOU REALLY WANT TO BE A SUPERVISOR?  
(2wc E/S to F/N.)
63. ARE YOU ON STAFF TO GET YOUR CASE HANDLED?  
(2wc E/S to F/N.)
64. SHOULDN'T YOU BE HERE?  
(2wc E/S to F/N.)
65. ARE YOU PHYSICALLY UNWELL?  
(Find what wrong, 2wc E/S to F/N.) (Medical, etc.)
66. DO YOU GET UPSET BY STUDENT MISEMOTION?  
(2wc E/S to F/N.) (Also TRs.)
67. DO YOU CONSIDER STUDENTS HAVE TO BE FORCED TO STUDY?  
(2wc E/S considerations to F/N.)
68. HAVE YOU HAD LOSSES AS A SUPERVISOR?  
(Find what supervisor couldn't handle, Method 4 word clear relevant materials.)
69. DO YOU LACK PATIENCE?  
(2wc E/S to F/N.)
70. DO YOU CONSIDER STUDENT'S ABILITY IS NATIVE AND CANNOT BE REGULATED BY STUDY TECH?  
(2wc E/S considerations to F/N.)
71. DON'T YOU KNOW HOW TO HANDLE STUDENTS' QUESTIONS?  
(Method 4 WC Series 32R.) (And drill.)
72. ARE YOU SUPERVISING FOR SOME OTHER PURPOSE?  
(*L&N What purpose do you have for supervising? R3R Triple if an E. Purp.* )
73. CAN'T TELL WHEN STUDENT IS BOGGED OR NOT F/Ning?  
(2wc E/S to F/N.) (TRs and obnosis drills and Tone Scale drills. )
74. CAN'T FIND WHY STUDENTS BOG?  
(Method 4.) (And restudy study tapes, demo each reason for student bog with supervisor handling, drill.)

75. SOMEBODY SAID YOU DON'T KNOW HOW TO SUPERVISE?  
(*PTS Interview. Inval and Eval.*)
76. HAVE YOU ENCOUNTERED A SUPPRESSIVE STUDENT?  
(*PTS Interview.*)
77. IS SOMEBODY PREVENTING YOU FROM SUPERVISING?  
(*L&N Who is preventing you from supervising? Triple Ruds and Overts on the terminal.*)
78. DO YOU HAVE TOO MANY STUDENTS TO SUPERVISE FULLY?  
(2wc E/S to F/N.) (Also handle with Est-O if true.)
79. ARE YOU DOUBLE HATTED WITH ANOTHER POST?  
(2wc E/S to F/N.) (Also handle with *Tech O/O.*)
80. *ARE YOU GETTING* CROSS ORDERS?  
(2wc E/S to F/N.) (Handle with *Tech O/O* if true.)
81. ARE YOU EXPERIMENTING WITH STUDY METHODS?  
(2wc E/S to F/N.)
82. ARE SOME STUDENTS NOT WORTH SUPERVISING?  
(2wc E/S to F/N.)
83. DOES IT GIVE YOU MORE STATUS IF YOU ANSWER THE STUDENTS' QUESTIONS?  
(2wc E/S to F/N.)
84. ARE YOU TRYING TO BE IMPORTANT?  
(2wc E/S to F/N.)
85. ARE YOU TRYING TO BE INTERESTING?  
(2wc E/S to F/N.)
86. *ARE YOU BEING TOLD TO DO* SOMETHING ELSE?  
(2wc E/S to F/N.) (Also hatting actions.)
87. ARE YOU TOO TIRED TO SUPERVISE?  
(Find out why. 2wc E/S to F/N.) (Get person to get enough sleep.)
88. DON'T YOU BELIEVE THE STUDENT WILL MAKE IT?  
(2wc E/S considerations to F/N.)
89. ARE SOME STUDENTS BOUND TO FAIL ANYWAY?  
(2wc E/S considerations to F/N.)
90. IS IT AN OVERT TO MAKE SOMEBODY MORE KNOWLEDGEABLE?  
(2wc E/S to F/N.) (*Pgm for Vital Info R/D.*)
91. WOULD IT MAKE YOU LESS POWERFUL IF OTHERS KNEW MORE?  
(How? 2wc E/S to F/N.) (*Pgm for Ex Dn.*)
92. DOES THE STUDY TECH CONFLICT WITH WHAT YOU ALREADY KNOW ABOUT TEACHING?  
(Find out what other ideas person has about teaching E/S to F/N. *Student Rehab List on his early studies.* )
93. DO YOU NOT UNDERSTAND THE USE OF DEMOS?  
(Word clear demo materials.) (Then get it used to a win.)

94. ARE YOU NOT REALLY RESPONSIBLE FOR THE COMPETENCE OF THE STUDENT AFTER HE GRADUATES?  
(Product R/D.)
95. ARE YOU REALLY TRYING TO TEACH SOMETHING ELSE?  
(2wc E/S to F/N.)
96. HAVE YOU NOT REALLY STARTED ON POST?  
(2wc E/S to F/N.) (Get person instant hatted and onto post.)
97. ARE YOU LEAVING POST? (2wc E/S to F/N.)
98. ARE YOU ON DRUGS? (Find what—rehab.)
99. ARE YOU BEING AGREEABLE TO THE STUDENTS?  
(2wc E/S to F/N.)
100. ARE YOU TRYING TO BE POPULAR?  
(2wc E/S to F/N.)
101. ARE YOU TRYING TO MAKE YOURSELF RIGHT?  
(2wc E/S to F/N.)
102. ARE YOU TRYING TO PROVE THAT STUDENTS DON'T KNOW?  
(2wc E/S to F/N.)
103. ARE YOU WORKING FOR A STATISTIC RATHER THAN FOR A PRODUCT?  
(2wc E/S to F/N.)
104. HAVE YOU NOT STUDIED NEW ISSUES ON COURSE SUPERVISION?  
(Get the W/H off to F/N.) (Get checked out on all neglected issues.) (Get Qual high crime policy in.)
105. DON'T YOU HAVE ANY SUPERVISOR MATERIALS TO REFER TO?  
(2wc E/S to F/N.) (Handle through D of T.)
106. MATERIALS WERE MISSING FROM COURSE SUPERVISOR COURSE?  
(2wc E/S to F/N.) (Find what was missing and get it-studied.)
107. HAVE YOU BEEN CONFRONTED WITH SITUATIONS NOT COVERED BY STUDY TECH?  
(Find out what situations, Method 4 word clear tech on relevant materials as something was missed.)
108. IS THERE SOME OTHER REASON YOU CAN'T APPLY STUDY TECH?  
(Find out what. *Student Rehab List if not done.* ) (Word clear and drill relevant materials.)

Handle each reading item to F/N as noted. Then fill in attached form for further actions to be done.

Qual Secs

*Study Series 5*

*IMPORTANT*

*Dept of Personnel Enhancement*

**PRIMARY CORRECTION RUNDOWN  
FIRST CRAMMING CORRECTION**

As it is obviously a waste of Cramming time to cram an auditor, student or staff member who has not known how to study (see LRH ED 174 Int 29 Mar 72 for data on this), it is vital that HIS FIRST CRAMMING ACTION is done in the Dept of Personnel Enhancement.

This department must be staffed and set up to do (a) Programming, (b) Word Clearing No. 1, (c) Word Clearing No. 2, (d) Word Clearing No. 4, (e) Word Clearing Correction Lists, (f) Int Ext Correction Lists, (g) Tape Word Clearing with footpedal operated tape players, (h) Good quality Study Tape sets, (i) Student Packs, (j) Demo Kits, (k) Clay table large size, (l) Product Clearing, (m) Post Purpose Clearing, (n) Product and Student Corrections.

All the staff of this Dept MUST do this complete rundown rapidly on themselves. Otherwise their actions will be flabby as they probably will not be able to grasp their own special rundowns unless this program has been followed by themselves. BUT THIS ACTION MAY NOT BE USED TO PREVENT ACTIVE PRODUCTION BY D OF PE staff on doing this Rundown.

**PRIMARY CORRECTION RUNDOWN**

1. Case repair to handle high or low TAs or upsets. THIS STEP IS NOT DONE IF THE TA IS USUALLY BETWEEN 2 and 3 in auditing.

This would consist of a C/S 53RRR and handle, a GF Method 5 and handle, a GF40RR Method 3 and handle, plus any special actions to complete an incomplete auditing cycle or repair it.

At this stage any auditing should be done only on thoroughly cleared commands (each word no matter how small) and assessment lists should be done only after clearing each word on the prepared list (but not spoken as a full question).

2. WORD CLEARING NUMBER 1 to full EP, using the WC Correction List at any sign of somatics or bad Exam report after a word clearing session.
3. FIND THE WHY he did not use the Study Tech in the first place. There will be an individual WHY. (See Data Series P/Ls.) It is seldom only Misunderstood words. (See LRH ED 174 Int for some examples.) Handle this WHY. It may require processing.

**AUDITING INTERLUDE**

4. The WHY is HANDLED in auditing sessions as indicated. May require objective processes or hidden standards. The Handling of the Why is directly related to the WHY that was found.

5. THE STUDY CORRECTION LIST is handled. This is HCO B 4 Feb 72 (revising HCO B 14 Jan 72). This prepared list is assessed Method 5 (all lines assessed) and then the reads are handled from the best to the least. THE END PRODUCT AT THIS STAGE IS A PERSON WHOSE CASE AND PAST ARE NOT IN THE ROAD OF HIS STUDYING.

#### STUDY TECH SECTION

6. STUDY TAPES. (a) One time through picking up and looking up every word even faintly in doubt of or when not understanding, going back to find the word that was missed. (b) Then going through the Study Tapes for content with Method 4 at the End of each tape. If it reads on any misunderstood clear it up, then replay the tape. In this way get the Study Tapes fully known without Misunderstood ideas or words. (c) Check M4 at the end of this action and if there is any misunderstood idea or query of any kind then handle it per M4 and have the person do all the tapes again. The End product of this action is fully known Study Tapes with F/N VGIs.
7. STUDENT HAT. (a) Have the person go through each P/L or HCO B in the Student Hat with this cycle: Each time a misunderstood word is found even in the middle of the page, do the whole P/L again. Complete the whole hat in this way. (b) Then go through the whole hat again starrate checked out and using Demo Kit. At each point where a new misunderstood idea or word turns up do the whole P/L. If any misunderstands show up on this second run through, the whole Hat must be done again. (c) Have the student do a BIG proper Clay Demo of some study materials. (d) Check if the student can now use a Demo Kit while he is doing his own studies and get any WHY he cannot and Handle. The End product here is a STUDENT WHO CAN AND WILL USE STUDY TECH IN STUDYING AND WHO WILL STUDY AND STUDY PROPERLY.
8. Verify the WHY found in 3 above and see if it is all okay now. If not find new WHY and rehandle.
9. WORD CLEAR 2 first Dianetic or Scientology materials ever heard or read. (a) Find which it was. (b) WC2 it.
10. Find what queries and questions the person has about Admin or Tech. Do WC M4 on each one.
11. Send the person to Cramming to get the specific Cramming order, Tech or Admin, carried out.
12. Report the Course Super and D of T who "trained him" to the Ethics Officer for action.

-----

It is obviously senseless to Cram someone (and proven by actual experience) whose Study Tech is out and whose misunderstood words and omitted study will not let him retain anything anyway. He will just go on goofing. That has been amply proven.

Cramming can assess a Student Correction List HCO B 27 Mar 72, Issue I, or a Supervisor Correction List HCO B 27 Mar 72, Issue II, or an Auditor Correction List HCO B 27 Mar 72, Issue III, or a C/S Correction List HCO B 27 Mar 72, Issue IV, or an Executive Correction List HCO B 27 Mar 72, Issue V, and these will catch any Personnel Enhancement flub and other classroom reasons.

Things found on such lists should be reported to the Ethics Officer for handling.

Qual is after all the CORRECTION DIVISION. And correction usually cannot be accomplished without Ethics back-up.

At first glance this is a lot to do for a student or staff member. BUT IF IT IS NOT DONE YOU DO NOT HAVE A STUDENT OR A STAFF MEMBER.

Students and staff members must be charged for all this, the staff member usually on just a debit invoice but which comes due and owing on his departure, the student for cash through the Registrar. Do not fail to make these charges as you are rewarding a downstat who should have done it right in the first place and who didn't.

So don't run up a big Dept of Pers Enhancement Payroll that is never used to get the exchange.

Also DO NOT BACKLOG or you can tie up a whole org and keep its stats in the basement BY NOT RAPIDLY DOING THESE ACTIONS TO TOTAL END PRODUCT.

If you don't get the End Product all the work is wasted.

The Commonest Error in word clearing or auditing is a FAILURE TO USE CORRECTION LISTS. WC Corr List, WC Series 35, has been the most needed and most neglected list in orgs.

-----

As Study Tech is the material which tells HOW to study, the technique of study is not applied to IT. Thus it becomes unknown easily and goes out very easily.

Without it, I assure you, an org will get nowhere.

Thus this action of the Dept of PE is a vital action and done well it will keep the org alive.

BE SURE TO DO THIS WELL AND GET A CASH EXCHANGE FOR THIS VITAL SERVICE!

HCO BULLETIN OF 31 MARCH 1972

*Expanded Dianetics Series 1*

EXPANDED DIANETICS is that branch of Dianetics which uses Dianetics in special ways for specific purposes.

It is not HSDC Dianetics. Its position on the Grade Chart would be regulated by the use to which it is put. It could be below Standard Dianetics, just above Standard Dianetics or above OT III in the OT Scales.

It uses Dianetics to change an Oxford Capacity Analysis (or an American Personality Analysis) and is run directly against these analysis graphs and the "Science of Survival Hubbard Chart of Human Evaluation".

EXPANDED DIANETICS IS NOT THE SAME AS STANDARD DIANETICS.

The HSDC is qualified to run Standard Dianetics. He is not authorized to run EXPANDED DIANETICS without special training.

DO NOT MIX EXPANDED DIANETICS INTO STANDARD DIANETICS.

It often happens that one technology's skills are mingled with another's. The result is that neither then work.

Standard Dianetics will go right on producing results.

The main difference between these two branches is that Standard Dianetics is very general in application. Expanded Dianetics is very specifically adjusted to the pc.

Some pcs, particularly heavy drug cases, or who have been given injurious psychiatric treatment or who are physically disabled or who are chronically ill or who have had trouble running engrams (to name a few) require a specially adapted technology.

A very good Dianetic or Dianetic and Class IV auditor preferably HSDC & Class VI can be specially trained to run Dianetics against the OCA or the Chart of Human Evaluation.

STUDY

(Subject to Change)

This training would consist of:

1. HSDC
2. STANDARD DIANETIC INTERNE HGC OK TO AUDIT
3. PRIMARY RD HCOB 30 Mar 72
4. Social Counselor Cse or Ruds Flying or Class IV
5. Full Word Clearer Rating
6. FESing

7. Programming
8. Expanded Dianetic Tapes and HCOBs
9. C/S Folder Study
10. Active Auditing on the skills taught
11. C/Sing Expanded Dianetics.

#### CERTIFICATE

The Certificate would be HUBBARD GRADUATE DIANETIC SPECIALIST.

The Certificate Level is above Standard Dianetics HSDC and if the person is a Class IV is just above Class IV.

It would be greatly preferable if the person were an HSDC and a Class IV as word clearing and rudiments would be easier to learn but Class IV is not required at this time.

#### CHARGES

Hours of Expanded Dianetics, because of the skills required, should be at least half again or double as much as Standard Dianetic Auditing.

The cost of the Course would be the same as the HSDC Course and additional to it plus Intern fees.

#### PREREQUISITE

HSDC and Dianetic Internship minimum with a successful period of Standard Dianetic Auditing as an auditor. Optimum is also a Class IV or VI.

Case gain as a Dianetic pc.

#### DEVELOPMENT

This Course is under development as this is written and neither the Course nor Expanded Dianetic Auditing may be sold by an org unless it has an Expanded Dianetic Specialist, to be specific, an HGDS.

WHEN RELEASED THE COURSE WILL BE TAUGHT IN CENTRAL ORGS (LONDON, WASHINGTON, LOS ANGELES, JOHANNESBURG, DENMARK AND SYDNEY AND SHs). IT IS THE SPECIAL COURSE THE CONTINENTAL CENTRAL ORG TEACHES.

The HCOBs relating to Expanded Dianetics will be released as a part of this series so that orgs will have them when it comes time for them to acquire the tapes and teach this course.

In the meanwhile these orgs should be making HSDCs and Class IVs.

PERSONS NOT TRAINED ON IT MAY NOT RUN IT OR USE IT REGARDLESS OF CLASS.

To repeat, Expanded Dianetics does *not* replace Standard Dianetics or any other Class and is itself and is used for its own specific purposes on special cases.

*I M P O R T A N T*

*Expanded Dianetics Series 3RB*

**L3 EXD RB**

**EXPANDED DIANETICS REPAIR LIST**

This list includes the most frequent Exp Dianetic & R3R errors.

A high or low TA and a bogged case can result from failures to erase a chain of incidents.

DO NOT ATTEMPT TO REPAIR A CHAIN OR ENGRAM WITHOUT USING THIS LIST as it can have different or several errors.

REMEMBER TO CLEAR EACH WORD ON THIS LIST. IF A QUESTION READS AND THE PC SAYS HE DOESN'T UNDERSTAND IT, CLEAR IT AND REASSESS (don't explain it and take it as it read on a misunderstood not on a fact).

RUNNING PCS ON EXP DIANETICS WITHOUT A FULL AND COMPLETE DN C/S I INDOCTRINATION IS A FOOLISH ACTION.

TAKE ANY READ FOUND TO F/N BY FULL REPAIR OF IT PER THE INSTRUCTIONS.

1. There was an Earlier Similar incident. \_\_\_\_\_  
Indicate it, flatten the chain.
2. There was no Earlier Similar incident. \_\_\_\_\_  
Indicate it. Determine if the chain is flat or if the last incident needs to be run through again. Complete the chain to F/N by indication or D/L if needed, or by flattening it.
3. There was an earlier beginning. \_\_\_\_\_  
Indicate it. Handle with R3R and complete the chain.
4. There was no earlier beginning. \_\_\_\_\_  
Indicate it. Complete the chain with R3R ABCD on last incident if unflat.
5. An F/N was indicated too soon. \_\_\_\_\_  
Indicate it. Flatten the last incident.
6. An F/N was indicated too late. \_\_\_\_\_  
Indicate it. Spot the flat point, indicate the overrun, D/L if necessary.

7. An F/N was not indicated at all. \_\_\_\_\_  
Indicate it. Spot the flat point, indicate the overrun, D/L if necessary.
8. There was no charge on an item in the first place. \_\_\_\_\_  
Indicate it, and that it shouldn't have been run, D/L if necessary.
9. Jumped chains. \_\_\_\_\_  
Indicate it. Reorient to the original chain, spot flat point and indicate the overrun, D/L if necessary, or flatten the chain.
10. Flubbed commands. \_\_\_\_\_  
Indicate it, E/S to F/N.
11. Didn't have a command. \_\_\_\_\_  
Indicate it, E/S to F/N.
12. Misunderstood on the command. \_\_\_\_\_  
Find it and clear it.
13. Incident should be run through one more time. \_\_\_\_\_  
Indicate it. ABCD on the incident, flatten the chain.
14. Too late on the chain. \_\_\_\_\_  
Indicate it. Get the Earlier Similar incident and complete the chain with R3R.
- 14A Wrong Flow. \_\_\_\_\_  
Indicate it. Run it the way pc feels it should be run.
15. Incident gone more solid. \_\_\_\_\_  
Indicate it. Check for earlier incident or earlier beginning and complete the chain.
16. Stopped running an incident that was erasing. \_\_\_\_\_  
Indicate it. ABCD on the incident and erase it.
17. Went past basic on a chain. \_\_\_\_\_  
Indicate it, D/L if necessary.
18. An earlier misrun incident restimulated. \_\_\_\_\_  
Indicate it. Find out what it was and do an L-3RD on it.
19. Two or more incidents got confused. \_\_\_\_\_  
Indicate it, sort it out with an L-3RD on it.
20. An implant was restimulated. \_\_\_\_\_  
Indicate it, if no joy do an L-3RD on the time of the restimulation.
21. The incident was really an implant. \_\_\_\_\_  
Indicate it, D/L if necessary or L-3RD on it.

22. Wrong Item. \_\_\_\_\_  
 Indicate it was a wrong item and that all other actions connected with it were wrong. If it is from an L&N list or if any question or difficulty, L-4BR.
- 22A It was really your attitudes to it that should have been run. \_\_\_\_\_  
 Indicate it. List the attitudes, R3R triple and exhaust the list.
- 22B It was really the emotions connected with it that should have been run \_\_\_\_\_  
 Indicate it. List the emotions, R3R triple and exhaust the list.
- 22C It was really your intentions that should have been run. \_\_\_\_\_  
 Indicate it. List the intentions, R3R triple and exhaust the list.
23. Not your item. \_\_\_\_\_  
 Indicate it, E/S to F/N.
24. Not your incident. \_\_\_\_\_  
 Indicate it, E/S to F/N. L-3RD if any trouble.
25. Same thing run twice. \_\_\_\_\_  
 Indicate it. Spot the first flat point, indicate the overrun, D/L if necessary, or run out the session.
26. There was a wrong date. \_\_\_\_\_  
 Indicate it. Get the correct date and flatten the incident if unflat.
27. There was no date for the incident. \_\_\_\_\_  
 Indicate it. Get the date and flatten the incident if unflat.
28. It was a false date. \_\_\_\_\_  
 Indicate it. Get the correct date and flatten the incident if unflat.
29. There was an incorrect duration. \_\_\_\_\_  
 Indicate it. Get the correct duration and flatten the incident if unflat.
30. No duration was found for the incident. \_\_\_\_\_  
 Indicate it. Get the duration and flatten the incident if unflat.
31. There was a false duration. \_\_\_\_\_  
 Indicate it. Get the correct duration and flatten the incident if unflat.
32. An earlier Dianetic upset was restimulated. \_\_\_\_\_  
 Locate what it was, indicate it. Sort it out with an L-3RD if necessary.
33. An earlier ARC Break on engrams was restimulated. \_\_\_\_\_  
 Indicate it. Sort it out with an L-3RD, ARCU CDEINR or an L-1C as applicable, or run out the session.
34. There was an ARC Break in the incident. \_\_\_\_\_  
 Indicate it. Flatten the incident if unflat. ARCU CDEINR at that time if necessary.

- 34A Destructive impulse been missed. \_\_\_\_\_  
 Get it. It should BD F/N. If this turns into a listing action complete the list to BD F/N item.
35. You were protesting. \_\_\_\_\_  
 Indicate it, clean it up E/S to F/N.
36. Auditor demanded more than you could see. \_\_\_\_\_  
 Indicate it, E/S to F/N. L-1C if necessary, or run out the session.
37. Auditor refused to accept what you were saying. \_\_\_\_\_  
 Indicate it, E/S to F/N. L-1C if necessary, or run out the session.
38. You were prevented from running an incident. \_\_\_\_\_  
 Indicate it, E/S to F/N. Flatten the incident if unflat. L-1C if necessary, or run out the session.
39. You were distracted while running an incident. \_\_\_\_\_  
 Indicate it, E/S to F/N. Flatten the incident if unflat. L-1C if necessary, or run out the session.
40. Audited over an ARC Brk \_\_\_\_\_  
 Problem \_\_\_\_\_  
 Withhold \_\_\_\_\_  
 Indicate it and handle the out rud. Do not pull W/Hs before the engram or chain is repaired or it will mush engrams.
41. An item was suppressed. \_\_\_\_\_  
 Indicate it. Get the suppress off E/S to F/N, then run or flatten the item.
42. An item was invalidated. \_\_\_\_\_  
 Indicate it. Get the inval off E/S to F/N, then run or flatten the item.
43. An item was abandoned. \_\_\_\_\_  
 Indicate it, get the item back and run or flatten it.
44. The wording of the item was changed. \_\_\_\_\_  
 Indicate it. Get the correct wording and give it to him. Flatten it if unflat.
45. Stuck picture. \_\_\_\_\_  
 Indicate it. Do an L-3RD on it. You can also unstick it by having him recall a time before it and recall a time after it. D/L if necessary.
46. All black. \_\_\_\_\_  
 Spot the black field or picture. Get the correct duration. If no go, L3RD on it.
47. Invisible. \_\_\_\_\_  
 Spot the invisible field or picture. L-3RD on it.

48. Constantly changing pictures. \_\_\_\_\_  
Indicate there was a misassessment and a wrong item was taken off the list. Get the correct item and run it, or L-3RD on that session.
49. There was a persistent mass. \_\_\_\_\_  
L3RD on it, or D/L.
50. There was trouble with a pressure item or pressure on an item. \_\_\_\_\_  
L-3RD on it, or D/L.
51. You went exterior. \_\_\_\_\_  
Indicate it, D/L if necessary or rehab. If TA high as a result of this do an Int RD Correction List or send to the C/S if pc hasn't had Int RD.
52. Your Int RD was messed up. \_\_\_\_\_  
Indicate it, Int RD Corr List if TA high. If TA OK, 2wc "going into things" or clear up any misunderstands on Int, Ext, etc.
53. Audited over Drugs or Medicine. \_\_\_\_\_  
Indicate it. L3RD on that time, then verify all chains to ensure they erased.
54. A past death restimulated. \_\_\_\_\_  
Indicate it, if it doesn't blow run it out.
55. There was nothing wrong in the first place. \_\_\_\_\_  
Indicate it. Continue the action you were on.
56. The real reason was missed. \_\_\_\_\_  
Indicate it. Locate the real reason and handle or do a GF.
57. Something else wrong. \_\_\_\_\_  
Locate what it is and sort it out or do a GF M5 and handle.

HCO BULLETIN OF 3 APRIL 1972

Remimeo

*Study Series 6*

**PRIMARY RUNDOWN NOTE**

Reference HCO B 30 Mar 72  
LRH ED 174 Int

In going through the Study Tapes the first time, the student looks up every word.

On this first time he does not study for the sense of what is being said. He only listens to *words*.

In this and in Method 4 word clearing, when being checked he is asked "What is the definition of (word)?" He is NOT asked "Do you know the meaning of (word)?" To this he could answer "Yes" and believe he did. But when asked for the definition that he must then give, it is a different story entirely.

This is also the right way to handle *any* defining of words. M2, M4. As well as Methods I & 3.

Never let the student be unsure. Make him look it up.

You will find that it is the simple word, "as", "such", "from", that really bogs reading, not technical terms.

In the Study Tapes there are some photographic terms. Any photo dictionary can give these. Almost any camera store has such dictionaries.

SECOND TIME

The second time through the Study Tapes the student listens for the sense of the sentences.

---

It is very revealing to do the Primary Rundown in this fashion.

Some students are actually getting meaning out of something heard or read for the first time in their lives.

---

No wonder schoolchildren, by test, get more stupid each additional year of school. This has been established by actual test, that they do. Each year they just have a higher mountain of misunderstood words!

The Primary Rundown done HONESTLY is quite an adventure in opening up one's Communication Channels with life!

HUBBARD COMMUNICATIONS OFFICE  
Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 4 APRIL 1972

Remimeo

**TECH DIV PRIMARY RUNDOWN**

The Primary Correction Rundown in HCO B 30 March 72 is the rundown given in the Department of Personnel Enhancement in the Qualifications Division.

The PRIMARY RUNDOWN is given in the Tech Division as NORMAL DIVISIONAL ACTIVITY.

PRIMARY RUNDOWN HGC

1. The student is given any needful case handling or repair if his TA is high or low in accordance with his state of case.

This is only done if the person's meter is such as to make word clearing difficult or if the person is in obvious need of case handling.

Aside from TA, "obvious need of case handling" includes a bad OCA or APA, Drugs and PTS.

If the Student has been on drugs he must be given a Drug Rundown.

If he is PTS he must be handled in Ethics and given a PTS Rundown.

If the student is ill he should be handled by Dianetics.

An R/Sing person should be handled by Expanded Dianetics.

2. WORD CLEARING METHOD 1 is done by normal word clearing procedures in the HGC either as part of his normal auditing or as a student checksheet.

This is carried to an F/Ning list on the final assessment.

The Word Clearing Correction List is used at the slightest sign of trouble.

The student must have F/N throughout on the final full assessment of the WC Corr List if used *and* the final full WC Method I list *and* an F/N VGIs at the examiner for this step to be considered complete.

DEPT OF TRAINING

The student is now qualified to enter training.

3. STUDY TAPES AND STUDENT HAT. The student's first training step may be either the Study Tapes (or authorized transcript or translated tape but not notes) or the Student Hat. It will be found that course facilities may be better employed where a student is allowed to do either as the first step, so long as he does both one after the other.

(a) The Study Tapes are played first for the words themselves. One may not just play the tape and list the words and then look them up. This is an exact action. The only variation of this will come when a full list of these words is issued in alphabetical order. *Each is* looked up the first time it appears on the tape. The word is USED in several sentences. A grammar such as "English Made Simple" should be to hand. Good BIG dictionaries should be to hand. And a photographic dictionary or glossary.

The tape is *then* played through. A Method 4 check is made. If there is any read that is a true read (not a false surge) on the question, "Was anything not fully understood?" the word is hunted down and defined. And *then* the whole tape has to be done again.

In this way, reel by reel (or chapter by chapter when transcribed), the Study Tapes are done.

An M4 Meter check is made on the whole tape series.

The person is sent to the Student Examiner.

If there is a flunk of the exam the student goes to Cramming.

(b) The Student Hat is done like the Study Tapes.

Each item (P/L, HCO B etc) in it is read through once, looking up each word the first time it appears and using it in sentences.

At the end of each item the student is checked with Method 4 as on the tapes.

And if he misses one word he does the whole item again.

In this way he goes through the whole hat.

Now he reads the whole hat for sense.

Each time an ACTION is called for in an item (demo or clay demo) he must do that item correctly.

He now reads the whole hat through using a Demo Kit continually as he goes along.

He is again given an M4 check and if there is no read he goes to the Student Examiner.

If he fails, he goes to Cramming.

If he passes he may do the Study Tapes if he has not done them or he having passed those is a product.

**THE PRODUCT AT THIS POINT IS A STUDENT WHO KNOWS HOW TO STUDY AND WILL BE ABLE TO USE WHAT HE STUDIES.**

This concludes the Primary Rundown as given in the Tech Division.

The Tech Division does not repair the student.

He can be ordered to Cramming however for the single action of a Word Clearing Correction List in case errors in Method 4 or Method 3 have been made or the student has gone beyond the metering ability of a supervisor.

Qual at its option in such cases may order a full Primary Correction Rundown but must give a Word Clearing Correction List first before determining this.

*Establishment Officer Series 14*

**ETHICS**

The normal level of an unhatted Dev-T non-producing org is out ethics.

The reason you see so many heavy ethics actions occurring—or situations where heavy ethics actions should occur if they aren't—in such an org is that it has its EXCHANGE flows messed up.

It is important to know this fact as this factor alone can sometimes be employed to handle persons in the area whose ethics are out.

**CRIMINALITY**

Unless we want to go on living in a far nowhere some of the facts of scenes have to be confronted.

An inability to confront evil leads people into disregarding it or discounting it or not seeing it at all.

Reversely, there can be a type of person who, like an old-time preacher, sees nothing but evil in everything and, possibly looking into his own heart for a model, believes all men are evil.

Man, however (as you can read in HCO B 28 Nov 70, C/S Series 22, "Psychosis"), is basically good. When going upon some evil course he attempts to restrain himself and caves himself in.

The Chart of Human Evaluation in *Science of Survival* was right enough. And such people also can be found by the Oxford Capacity Analysis where the graph is low and well below a center line on the right.

This sort of thing can be handled of course by auditing but the Est O does not depend on that to handle his staff's problems.

Criminal actions proceed from such people *unless checked* by more duress from without not to do an evil act than they themselves have pressure from within to do it.

Criminality is in most instances restrained by just such an imbalance of pressures.

If you have no ethics presence in an org, then criminality shows its head.

Such people lie rather than be made to confront. They false report—they even use "PR" which means Public Relations to cover up—and in our slang talk "PR" means putting up a lot of false reports to serve as a smoke screen for idleness or bad actions.

Unless you get Ethics in, you will never get Tech in. If you can't get Tech in you won't get Admin in.

So the lack of Ethics permits the criminal impulse to go unchecked.

Yes, it could be handled with Tech. But to get money you have to have Admin in.

Unless there is Ethics and ways to get it in, no matter how distasteful it may seem, you will never get Tech and Admin in.

Of course there is always the element of possible injustice. But this is provided against. (See HCO PL 24 Feb 72, "Injustice".)

When Ethics is being applied by criminal hands (as happens in some governments) it can get pretty grim.

But even then Ethics serves as a restraint to just outright slaughter.

Omitting to handle criminality can make one as guilty of the resulting crimes as if one committed them! So criminality as a factor has to be handled.

It is standardly handled by the basic Ethics P/Ls and the Ethics Officer system.

#### EXCHANGE

The unhatted unproducing staff member, who is not really a criminal or psychotic, can be made to go criminal.

This joins him to the Criminal ranks.

The Ethics system also applies to him.

However there is something an Est O can do about it that is truly Est O tech.

This lies in the field of EXCHANGE.

If you recall your Product Clearing, you will see that exchange is something for something.

Criminal exchange is nothing from the criminal for something from another.

Whether theft or threat or fraud is used, the criminal think is to get something without putting out anything. That is obvious.

A staff member can be coaxed into this kind of thinking by

PERMITTING HIM TO RECEIVE WITHOUT HIS CONTRIBUTING.

This unlocks, by the way, an age-old riddle of the philosophers as to “what is right or wrong”.

HONESTY is the road to SANITY. You can prove that and do prove it every time you make somebody well by “pulling his withholds”. The insane are just one seething mass of overt acts and withholds. And they are very physically sick people.

When you let somebody be dishonest you are setting him up to become physically ill and unhappy.

Traditional Sea Org Ethics labeled Non-Compliance as Liability and a False Report as Doubt. And it's true enough.

When you let a person give nothing for something you are factually encouraging crime.

Don't be surprised that welfare districts are full of robbery and murder. People there give nothing for something.

When *exchange is* out the whole social balance goes out.

Every full scholarship ever given by an org wound up in a messy scene.

When you hire a professional pc who just sits around making do-less motions while people audit him and contribute to him DO NOT BE SURPRISED IF HE GETS SICKER AND SICKER.

He is contributing nothing in return and winds up in overwhelm!

Similarly if you actively prevented someone from contributing in return you could also make him ARC Broken and sick.

It is EXCHANGE which maintains the inflow and outflow that gives a person space around him and keeps the bank off of him.

There are numbers of ways these flows of Exchange can be unbalanced.

It does not go same out as comes in. Equal amounts are no factor. Who can measure good will or friendship? Who can actually calculate the value of saving a being from death in each lifetime? Who can measure the reward of pride in doing a job well or praise?

For all these things are of different values to different people.

In the material world the person whose Exchange Factor is out may think he “makes money”. Only a government or a counterfeiter “makes money”. One has to produce something to *Exchange* for money.

Right there the Exchange Factor is out.

If he gives nothing in return for what he gets the money does not belong to him.

In product clearing many people it was found that some considered their food, clothing, bed and allowance were not theirs because they produced. They were theirs “just by being there”. This funny “logic” covered up the fact that these people produced little or nothing on post. Yet they were the first to howl when not getting expensive (to the org) auditing or courses or tech!

Thus such a person, not hatted or made to produce, will get ill.

It is interesting that when a person becomes productive his morale improves.

Reversely it should be rather plain to you that a person who doesn’t produce becomes mentally or physically ill. For his *exchange* factor is out.

So when you reward a downstat you not only deprive upstats, you also cave the downstat in!

I don’t think Welfare States have anything else in mind!

The riots of the ancient city of Rome were caused by these factors. There they gave away corn and games to a populace that eventually became so savage it could only enjoy torture and gruesome death in the arena!

A lot of this exchange imbalance comes from child psychology where the child is not contributing anything and is not permitted to contribute.

It is this which first overwhelms him with feelings of obligation to his parents and then bursts out as total revolt in his teens.

Children who are permitted to contribute (not as a cute thing to do but actually) make non-contributing children of the same age look like raving maniacs! It is the cruel sadism of modern times to destroy the next generation this way. Don’t think it isn’t intended. I have examined the OCAs of parents who do it!

So if a person is brought up this life with the exchange all awry, the Est O has his hands full sometimes!

He is dealing with trained-in criminality!

#### WHAT HE CAN DO

The remedy is rather simple.

First one has to know all about EXCHANGE as covered in the Product Clearing policy letters.

Then he has to specially clear this up with people who do not produce.

He should get them to work on it as it relates to **ALL THEIR DYNAMICS IN RELATIONSHIP TO EVERY OTHER DYNAMIC.**

That means he has to clear up the definitions of dynamics with *care* and then have the person draw a big chart (of his own) and say what he gives the 1st Dynamic and what it gives him. Then what he gives the second dynamic and what it gives him. And so on up the dynamics.

Now, have him consider “his own second dynamic”. What does his second dynamic give his first dynamic? What does his second dynamic give the second dynamic and what does it give him?

And so on until you have a network of these exchange arrows, each both ways.

Somewhere along the way, if your TRs are good and you have his attention and he is willing to talk to you he will have quite a cognition!

That, if it's a big one is the End Phenomena of it.

And don't be surprised if you see a person now and then change his physical face shape!

#### CONDITIONS BY DYNAMICS

An Ethics type "action" can be done by giving the person the conditions formulas (pages 189, 237, 245, 247, 249 of Vol 0, Basic Staff Hat. HCO PL 14 Mar 68—page 247—gives one the table.)

Method 4 the person on the Table of Conditions and pick up any other misunderstandings.

Have the person study the *formula* of each of these Conditions in the table so that he knows what they are and what the formulas are.

When he has all this now with no misunderstood words you must clear up the words related to his dynamics I to 8 and what they are.

Now you're ready for the billion dollar question.

Ask him what is his condition on the first dynamic. Have him study the formulas. Don't buy any glib PR.

Don't evaluate or invalidate. When he's completely sure of what his condition really is on the first dynamic he will cognitively.

Now take up the second dynamic by its parts—sex, family, children. Get a Condition for each.

Similarly go on up each one of the dynamics until you have a condition for each one.

Now begin with the first dynamic again. Continue to work this way.

You will be amazed to find he will come out of false high down to low and back up again *on each dynamic*.

Somewhere along the line he will start to change markedly.

When you have a person in continual heavy ethics or who is out-ethics (Ethics bait, we say) and who is floundering around, you can do an S & D on him and quite often save his future for him.

When you have such a person you do this one first before you do the Exchange by Dynamics.

In other words, you use this on "Ethics bait" and then when he's come out of such, you do Exchange by Dynamics on him.

#### SUMMARY

When all looks black, and you are getting false reports, and the things said done were not done and what was really being done were overt products and despite all your work, the stats just *won't* go up, you still have three answers:

1. GET IN ETHICS ON THE ORG.
2. GET EXCHANGE DONE ON INDIVIDUALS.
3. GET IN CONDITIONS BY DYNAMICS ON THE ETHICS BAIT.

And after that keep a strong just Division 1 Dept 3.

You'll be amazed!

HCO POLICY LETTER OF 9 APRIL 1972

Remimeo

ETHICS

(Cancels HCO P/L of 7 Feb 70  
"Danger Condition 2nd Formula")

**CORRECT DANGER CONDITION  
HANDLING**

When the correct formula for handling a Danger Condition is not done, an org or activity or person cannot easily get above that condition thereafter.

When we had the 2nd Danger Formula apparently it was applied but the real Danger Formula wasn't. This made some orgs and people remain in or below Danger and made it very hard for them to get above that state.

A prolonged state of emergency or threats to viability or survival or a prolonged single-handling will not improve unless the actual Danger Formula is applied.

DANGER FORMULA

The original formula follows:

1. By-pass (ignore the junior or juniors normally in charge of the activity and handle it personally).
2. Handle the situation and any danger in it.
3. Assign the area where it had to be handled a Danger Condition.
4. Handle the personnel by Ethics Investigation and Comm Ev.
5. Reorganize the activity so that the situation does not repeat.
6. Recommend any firm policy that will hereafter detect and/or prevent the condition from recurring.

The senior executive present acts and acts according to the formula above.

A Danger Condition is normally assigned when:

1. An emergency condition has continued too long.
2. A statistic plunges downward very steeply.
3. A senior executive suddenly finds himself or herself wearing the hat of the activity because it is in trouble.

FIRST DYNAMIC FORMULA

The formula is converted for the 1st dynamic to

- 1st 1. By-pass habits or normal routines.
- 1st 2. Handle the situation and any Danger in it.
- 1st 3. Assign self a Danger Condition.
- 1st 4. Get in your own *personal ethics* by finding what you are doing that is out-ethics and use self-discipline to correct it and get honest and straight.
- 1st 5. Reorganize your life so that the dangerous situation is not continually happening to you.
- 1st 6. Formulate and adopt firm policy that will hereafter detect and prevent the same situation from continuing to occur.

JUNIOR DANGER FORMULA

Where a Danger Condition is assigned to a junior, request that he or she or the entire activity write up his or her overts and withholds and any known out-ethics situation and turn them in at a

certain stated time on a basis that the penalty for them will be lessened but if discovered later after the deadline it will be doubled.

This done, require that the junior and the staff that had to be by-passed and whose work had to be done for them or continually corrected, each one write up and fully execute the FIRST DYNAMIC DANGER FORMULA for himself personally and turn it in.

### ASSESSMENT

If the necessity to by-pass continues or if an area or person did not comply, use a meter and assess or get assessed the following questionnaire.

### THE TROUBLE AREA QUESTIONNAIRE

Person's Name	Post	Date
---------------	------	------

To be done on the person by one who can correctly operate a meter.

The list is done by telling the person you are about to ask him some questions on a meter and then just assess this list for reads.

Mark each read properly.

- (a) Are you doing anything dishonest? \_\_\_\_\_
- (b) Are you more interested in something else than your job? \_\_\_\_\_
- (c) Are you falsely reporting about anything? \_\_\_\_\_
- d) Are you doing something harmful? \_\_\_\_\_
- e) Are you doing little or nothing of value? \_\_\_\_\_
- f) Are you pretending? \_\_\_\_\_
- g) Are you in disagreement with something? \_\_\_\_\_
- h) Do you have overts? \_\_\_\_\_
- i) Are you withholding something? \_\_\_\_\_
- j) Do you know of some out-ethics around you? \_\_\_\_\_
- k) Don't you know what your post product is? \_\_\_\_\_
- l) Are the products of others around you unknown to you? \_\_\_\_\_
- m) Do you have things about your post you don't understand? \_\_\_\_\_
- n) Do you have words on your post you don't understand? \_\_\_\_\_
- o) Don't you know grammar? \_\_\_\_\_
- p) Is there some reason you are not quite on post? \_\_\_\_\_
- q) Is someone giving you orders you don't understand? \_\_\_\_\_
- r) Are you getting orders from too many places? \_\_\_\_\_
- s) Don't you have a post? \_\_\_\_\_
- t) Don't you know what your post is? \_\_\_\_\_
- u) Have you really not read your hat? \_\_\_\_\_
- v) Are you here for some other reason than you say? \_\_\_\_\_
- w) Were you planning to leave? \_\_\_\_\_
- x) Is your post temporary? \_\_\_\_\_
- y) What about your post purpose? \_\_\_\_\_
- z) Are you in any way misemotional or upset about your post? \_\_\_\_\_
- aa) Are you actually doing fine? \_\_\_\_\_

When this has been assessed on a meter one then takes the largest read or TA blowdown and handles it.

This is done by writing the question letter and the person's answers.

Each question that read is given two-way communication until each question that read has attained a floating needle.

The form used and the worksheets are placed in the person's folder so that other handling can be programmed and done as needed.

\_\_\_\_\_  
Operator's Name

Probable WHY \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

### WHY

The above questionnaire can also be used to *help* find a WHY (it will not directly find one as the Why has to be rephrased for each individual). A WHY should always be found for individuals in a Danger Condition.

### TROUBLE AREA SHORT FORM

Person's Name	Post	Date
---------------	------	------

A short form can be done on someone who is an "old hand" and knows the tune.

- |        |                             |       |
|--------|-----------------------------|-------|
| SF 1.  | Out-Ethics?                 | _____ |
| SF 2.  | Overts?                     | _____ |
| SF 3.  | Withholds?                  | _____ |
| SF 4.  | Disagreements?              | _____ |
| SF 5.  | False Reports?              | _____ |
| SF 6.  | Product Unknown?            | _____ |
| SF 7.  | Products of others Unknown? | _____ |
| SF 8.  | Post purpose?               | _____ |
| SF 9.  | Situations not understood?  | _____ |
| SF 10. | Misunderstood words?        | _____ |
| SF 11. | Misunderstood grammar?      | _____ |
| SF 12. | Wrong WHY?                  | _____ |
| SF 13. | Omitted materials?          | _____ |
| SF 14. | Misemotional?               | _____ |
| SF 15. | False passes?               | _____ |
| SF 16. | Invalidation?               | _____ |
| SF 17. | Wrong Orders?               | _____ |
| SF 18. | Not understood?             | _____ |
| SF 19. | No situation?               | _____ |
| SF 20. | Doing fine really?          | _____ |

(Handling is the same as in the long form.)

Probable WHY \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

\_\_\_\_\_  
Operator

ENDING A DANGER CONDITION When production has again increased the Danger Condition should be formally ended and an Emergency Condition assigned and its formula should be followed.

HUBBARD COMMUNICATIONS OFFICE  
Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 10 APRIL 1972

A/Courses

(Cancels HCO B 31 July 71 Issue II  
Corrected "Solo C/Sing")

*URGENT*

*C/S Series 75*

*Solo C/S Series 13*

**PREOTS DON'T C/S**

HCO B 31 July 71 Issue II Corrected required PreOTs to C/S their folders for the next session.

I did not write this HCO B.

Research has proven that a Solo PreOT who is required by any C/S to write a C/S for his next session can be put into that next session action.

This C/Sing for himself his own next session violates the "continued session rule" wherein an auditor does not "finish" a session by telling the pc "the process will be continued in the next session".

This puts the pc into continued sessions and in Solo *can* put the PreOT from Solo auditing to self auditing. There is a vast difference between the two. Solo auditing occurs in session with a meter. Self auditing is out of session wondering and chewing on bank.

A Solo PreOT must NOT self audit.

He ends the session he has done when he ends session on his worksheet.

He then goes to Examiner and gets his exam. The Examiner sends the completed Exam form to Solo Admin who puts it in the folder.

The Solo C/S, then, from his study of the folder, does the next C/S for the PreOT in proper C/S form. This is a diagonal 2 green stripes on the left-hand corner of the sheet, the PreOT's name and date in black. The C/S itself is in black pen.

The PreOT takes this C/S and does it in his next session.

In rare instances when the PreOT is going really well, the C/S permits him to do several sessions. The C/S can tell from Exam forms that all is well. This MUST carry a notice "Come in at once to the D of P if you cease to audit or run into trouble. Do this C/S in the next several sessions. Come in for a new C/S the moment you feel this C/S is complete and are ready for a new C/S."

When no Exam forms come in the Solo D of P chases the pc up.

If a Solo Exam form is bad the *Examiner* must mark it "Urgent Attn Solo C/S." IN RED.

Solo Admin must alert the D of P who chases up the pc.

Tab is kept on ALL Solo pcs on lines by the D of P and if one falls off lines the

fact must be visible to the Solo D of P who keeps a board on sessions with all PreOTs' names on it !

The above is the correct C/Sing line.

The worst features of a PreOT doing his own C/Sing are:

1. He is not a trained C/S.
2. Sudden ideas pop up he wants to handle instead of going on and he gets into an offline action when he should keep going.
3. A PreOT can "rabbit" (run away from the bank) by proposing a C/S that does not make him confront it.
4. And Last but far from least, a "C/S" by a PreOT is an invitation to the Solo Case Supervisor to Q and A with it. (Q and A means to just repeat whatever another says as a lazy way out.)

---

Pc + Auditor is greater than bank.

In Solo Auditing

C/S + PreOT is greater than bank.

---

PreOTs do NOT C/S their own folders!

---

THE PREOT *DOES* KEEP UP HIS SESSION SUMMARY EACH SESSION.

(Revised issue of  
HCOB 31 Mar 72)

***Expanded Dianetics Series IR***

EXPANDED DIANETICS is that branch of Dianetics which uses Dianetics in special ways for specific purposes.

It is not HSDC Dianetics. Its position on the Grade and Class Chart would be just above Class IV. Its proper number is Class IVA.

It uses Dianetics to change an Oxford Capacity Analysis (or an American Personality Analysis) and is run directly against these analysis graphs and the "Science of Survival Hubbard Chart of Human Evaluation".

EXPANDED DIANETICS IS NOT THE SAME AS STANDARD DIANETICS AS IT REQUIRES SPECIAL TRAINING AND ADVANCED SKILLS.

The HSDC is qualified to run Standard Dianetics. He is not authorized to run EXPANDED DIANETICS without special training.

DO NOT MIX EXPANDED DIANETICS INTO STANDARD DIANETICS.

It often happens that one technology's skills are mingled with another's. The result is that neither then work.

Standard Dianetics will go right on producing results.

The main difference between these two branches is that Standard Dianetics is very general in application. Expanded Dianetics is very specifically adjusted to the pc.

Some pcs, particularly heavy drug cases, or who have been given injurious psychiatric treatment or who are physically disabled or who are chronically ill or who have had trouble running engrams (to name a few) require a specially adapted technology.

A very good Dianetic and Class IV auditor (preferably HSDC & Class VI) can be specially trained to run Dianetics against the OCA or the Chart of Human Evaluation and handle other items of great value to a pc.

STUDY

(Subject to Change)

This training would consist of

1. HSDC
2. STANDARD DIANETIC INTERNE HGC OK TO AUDIT
3. Class 0-IV Academy (or Class VI)
4. PRIMARY CORRECTION RD HCOB 30 Mar 72 if Primary RD not done

5. Full Word Clearer Rating
6. FESing
7. Expanded Dianetic Tapes and HCOBs
8. Programming
9. C/S Folder Study
10. Active Auditing on the skills taught
11. C/Sing Expanded Dianetics.

#### CERTIFICATE

The Certificate would be HUBBARD GRADUATE DIANETIC SPECIALIST.

The Certificate Level is just above Class IV.

Class IV is required. A Class VI SHSBC may be substituted for Class IV.

#### CHARGES

Hours of Expanded Dianetics, because of the skills required, should be at least half again or double as much as Standard Dianetic Auditing or Lower Grade Auditing.

The cost of the Course would be the same as the HSDC Course and additional to it plus Intern fees.

#### PREREQUISITE

HSDC and Dianetic Internship minimum with a successful period of Standard Dianetic Auditing as an auditor and is Class IV or VI.

Case gain as a Dianetic pc, and all Lower Grades Triple.

#### DEVELOPMENT

Neither the Course nor Expanded Dianetic Auditing may be sold by an org unless the org has an Expanded Dianetic Specialist, to be specific, an HGDS.

WHEN RELEASED THE COURSE WILL BE TAUGHT IN CENTRAL ORGS (LONDON, WASHINGTON, LOS ANGELES, JOHANNESBURG, DENMARK AND SYDNEY) AND SHs. *IT IS THE SPECIAL COURSE THE CONTINENTAL CENTRAL ORG TEACHES.*

The HCOBs relating to Expanded Dianetics will be released as a part of this series so that orgs will have them when it comes time for them to acquire the tapes and teach this course.

In the meanwhile these orgs should be making HSDCs and Class IVs.

PERSONS NOT TRAINED ON IT MAY NOT RUN IT OR USE IT REGARDLESS OF CLASS.

To repeat, Expanded Dianetics does *not* replace Standard Dianetics or any other Class and is itself and is used for its own specific purposes on special cases.

**PTS RD CORRECTION LIST**

(Reference HCO B 17 Apr 72,  
"C/Sing the PTS Rundown",  
C/S Series 76)

This Correction List is assessed and handled after a PTS Rundown has been done on the pc. It also serves as a checklist of expected actions with the Rundown.

The handlings are given below the assessing statements in each instance.

The list is Always Done Method 5 (All assessed then handled).

1. You have been physically ill after auditing.  
(If this happened after a PTS RD the RD is not complete.  
2wc to F/N then find what was incomplete.) \_\_\_\_\_
2. You lost the gains achieved in auditing.  
(Same as 1 above.) \_\_\_\_\_
3. You are still in communication with a person or group that does  
not like Scientology.  
(Have HCO handle per P/L 5 Apr 72 or if HCO does not act handle  
with D of P or Tech Sec.) \_\_\_\_\_
4. You know someone who disagrees with what you are doing.  
(See 3 above.) \_\_\_\_\_
5. You handled the whole situation completely.  
(If reads, 2wc to F/N.) \_\_\_\_\_
6. You only said it was handled.  
(2wc to F/N, give pc P/L 23 Dec 65 and P/L 5 Apr 72 and  
Method 4 WC them and report it to the D of P for further handling.) \_\_\_\_\_
7. You don't understand the situation.  
(See 6 above.) \_\_\_\_\_
8. You don't believe there is a situation.  
(2wc to F/N and probably handling as 6 above. It could be there  
is no situation now.) \_\_\_\_\_
9. You didn't want to handle it and protested.  
(2wc to F/N. See 6 above.) \_\_\_\_\_
10. It can't be handled anyway.  
(2wc to F/N and see 6 above.) \_\_\_\_\_
11. There was something wrong with the auditing or auditor.  
(Find what and do L1C, L3B or L4B as indicated.) \_\_\_\_\_
12. There was earlier bad auditing.  
(Wasn't set up. Repair Pgm.) \_\_\_\_\_
13. You were given the PTS Rundown in the middle of another  
incomplete rundown.  
(2wc to F/N. Complete the incomplete RD then verify the PTS RD.) \_\_\_\_\_
14. You weren't PTS in the first place.  
(Find out if the pc was connected to SPs or an SP group in actual  
fact. Possibly still is but misinterpreting "PTS". If so do 6.) \_\_\_\_\_

15. The feelings about the people you were audited on are still there.  
(2wc to F/N. L1C, L4B, L3B as indicated. Complete the RD.)
16. The PTS Rundown was not complete.  
(2wc to F/N. Sort out Case on PTS RD Addition HCO B 20 Jan 72.) -----
17. You still feel PTS.  
(See 16.) -----
18. You still can't hold onto your auditing gains.  
(See 16.) -----
19. You were ill after the RD.  
(See 16.) -----
20. You feel more upset than ever.  
(See 16.) -----
21. There is still an additional person that wasn't detected.  
(See 16.) -----
22. You were told to attest but were still PTS.  
(See 16.) -----
23. You decided you were PTS when you weren't.  
(2wc to F/N. Handle as indicated by Data pc gives.) -----
24. You said a person was suppressive who really wasn't.  
(See 23.) -----
25. There is a situation that has not been disclosed.  
(2wc to F/N. Get full data. C/S accordingly.) -----
26. There were lies told.  
(See 25.) -----
27. You don't agree about all this.  
(See 25.) -----
28. Your condition was really caused by something else.  
(See 25.) -----
29. There were misunderstood words.  
(See 25.) -----
30. Everything was all right in the first place.  
(See 25.) -----
31. There were list errors.  
(L4B.) -----
32. There were engram errors.  
(L3B.) -----
33. There were auditor errors.  
(L1C.) -----
34. You now feel okay.  
(2wc to F/N.) -----

**C/SING A PTS RUNDOWN**

References: HCO B 9 Dec 71    PTS Rundown  
              HCO B 20 Jan 72    PTS Rundown Addition  
              HCO B 13 Feb 72    PTS RD Additional  
                                  Issue II            LRH Data  
              HCO PL 5 Apr 72    PTS Type A Handling  
              HCO B 16 Apr 72    PTS Correction List  
              HCO B 17 Apr 72    C/S Series 76  
                                  C/Sing a PTS RD (this HCO B)  
Any subsequent issues.

The whole point of a PTS Rundown is to make a person *not PTS any longer*.

The point is not to just run some processes. It is to have a person all right now.

To really understand this rundown, one would have to know what PTS is in the first place and why one was doing the rundown.

This would apply to the auditor as well as the C/S.

PTS means POTENTIAL TROUBLE SOURCE. It means someone connected to a person or group opposed to Scientology.

It is a TECHNICAL thing.

It results in illness and rollercoaster and IS the CAUSE of illness and rollercoaster.

When you do a PTS RD on a pc CORRECTLY he or she should no longer be ill or rollercoaster.

**BUT THIS INCLUDES THE PERSON HANDLING HIS PTS CONDITION IN THE REAL UNIVERSE NOT IN JUST HIS BANK.**

An auditor and C/S must see that the person is:

- (a) Handled properly in HCO or by the D of P if HCO isn't there so that the person handles the PTS Connection itself. (See HCO PL 5 April 72, "PTS TYPE A HANDLING".)
- (b) Do the RD correctly (see reference HCO Bs above).
- (c) D of P Interview the person AFTER the RD is "complete" to be sure the person is now all right (not PTS).
- (d) Watch the person's folder for any new signs of illness and rollercoaster and if these occur find out what was missed by assessing PTS RD CORRECTION LIST. (See HCO B 16 April 72.)
- (e) Handling the PTS RD CORR LIST.
- (f) Re-interviewing to be sure the person is all right now.

## DATA

Anyone handling or auditing or C/Sing PTS cases should have done the PACK "PTS, SP TECH" Pack I & Pack 2 which are based on HCO PL 31 May 71 which is the CHECKSHEET for available tech and policy on this subject.

To this checksheet (HCO PL 31 May 71) must be added these issues:

HCO B 9 Dec 71 PTS Rundown  
HCO B 20 Jan 72 PTS Rundown Addition  
HCO B 13 Feb 72 PTS RD Additional  
Issue II LRH Data  
HCO PL 5 Apr 72 PTS Type A Handling  
HCO B 16 Apr 72 PTS Correction List  
HCO B 17 Apr 72 C/S Series 76  
C/Sing a PTS RD (this HCO B)

Any subsequent issues.

## PTS SITUATIONS

The hardest thing to get across about a PTS situation is that it IS the reason for continued illness and rollercoaster (loss of gains).

The condition *does* exist. It is in fact common.

We *do* have the auditing tech to handle now.

The material has to be applied correctly just like any other material.

The reason we do the rundown is not to do some sessions or sell some auditing or just explain why the person is like that. We do the rundown so the person will no longer be PTS.

The (EP) *End Phenomenon of the PTS RD is attained when the person is well and stable.*

As a C/S you MUST put a YELLOW TAB marked PTS on a PTS PC Folder that stays on until the person is NO LONGER PTS.

If you do NOT do this there will be about 25% of your pcs or more that YOU WILL BE IN CONTINUAL TROUBLE WITH! Because you will be C/Sing auditing for a person who is PTS, will be ill, will rollercoaster because the person has NOT been handled to EP on being PTS.

These people, by the way, will tell you, "Oh, I'm not PTS." "But your father is suing the org." "Oh yes, I know, but it doesn't bother me. Besides my illness is from something I ate last year. And I rollercoaster because I don't like the Examiner. But I'm not PTS." The mystery is solved when you find they haven't a clue what the letters mean or what the condition is, so give them a copy of HCO PL 5 Apr 72 and let them read it. If they still want to know more give them HCO PL 23 Dec 65. (Remembering it has to be Word Cleared Method 4 or he won't have a clue even if he reads it.)

We are on no campaign to rid the world of suppressives when we are handling a PTS pc. But facts are facts and tech is tech.

In handling a PTS person as a C/S you are on a borderline of policy violation unless you make the person do what it says in HCO PL 5 April 72 first. That handles the situation itself. Then you can handle the person with the PTS Rundown.

It is a great rundown. Like any other it has a standard way of going about it.

*C/S Series 77*

**“QUICKIE” DEFINED**

The reason an auditor can say he doesn't “quickie a rundown” (and none ever say they do) is because he has no definition for the word QUICKIE.

The word has been used to designate rundowns that were not completely and fully done.

It is not a slang word.

In the dictionary you will find “*Quickie* also quicky: something done or made in a hurry. Also: a hurriedly planned and executed program (as of studies).”

What happens in auditing, for instance, is a “Grade Zero Expanded” is “done” by just doing a single flow to its first F/N.

That is obviously “quickie”.

A more subtle one is to do a “PTS Rundown” with no Ethics action to begin and no check for stability, holding gain and not ill a week or two after the RD. Only if both these actions were done would one have a “Complete PTS Rundown” as it would give a PRODUCT = A PC no longer PTS.

So what makes a Quickie “completion” quickie?

Is it length of time? Not necessarily.

Is it fewness of processes? Not necessarily as Power can be done quickie simply by not hanging on for the EP and only going to F/N.

To define COMPLETE gives us the reverse of Quickie.

“COMPLETE: To make whole, entire or perfect; end after satisfying all demands or requirements. “ A Completion is “the act or action of completing, becoming complete or making complete”.

So “completing” something is not a loose term. It means an exact thing. “End after satisfying all demands or requirements” does not mean “doing as little as possible” or “doing what one can call complete without being detected”.

Anything that does not fully satisfy all requirements is QUICKIE.

So “quickie” really means “omitting actions for whatever reason that would satisfy all demands or requirements and doing something less than could be achieved”.

In short a quickie is not doing all the steps and actions that could be done to make a perfect whole.

Standard auditing actions required for ages that auditors cleared each word of each command. Yet when they went quickie they dropped this. When this was dropped, GAINS ON 75% OF ALL PCS LESSEned OR VANISHED. We are right

now achieving spectacular wins on pcs just by clearing up commands and words on all lists. We are finding that these pcs did not recover and NEVER BEFORE HAD BEEN IN SESSION even though previously “audited” hundreds of hours.

By omitting an essential action of clearing commands, processing did not work because the pc never understood the auditing commands!

So quickie action did not save any time, did it? It wasted hundreds of hours!

Quickie Programs are those which omit essential steps like Vital lists or 2wcs to get data. FESs for past errors are often omitted.

To slow down the torrent of quickie actions on clearing commands HCO P/L 4 Apr 72 Issue III “Ethics and Study Tech” has Clause 4 “An auditor failing to clear each and every word of every command or list used may be summoned before a Court of Ethics. The charge is OUT TECH.”

Ethics has to enter in after Quickie Tech has gotten in. Because quickie tech is a symptom of out ethics. HCO P/L 3 April 72 (Est O Series 13) “Doing Work” and HCO P/L 4 Apr 72 (Est O Series 14) “Ethics” are vital know-how where a C/S is faced with Quickie actions—or flubby ones that will not cure.

Essential Quickie Tech is simply *dishonest*. Auditors who do it have their own Ethics out in some way.

To be sure their confront is down.

There are numerous remedies for the quickie impulse. The above mentioned Policy Letters and plain simple TR 0 are standard remedies. TR 0 properly done and completed itself usually cures it.

Quickie study in ‘67 and ‘68 almost destroyed auditing quality. LRH ED 174 Int which really pushes in Study Tech will achieve the primary reason for quickie—the auditor didn’t understand the words himself.

Wherever Quickie tendencies or false stats (the quickest quickie possible) show up, the above P/Ls had better be gotten into full use fast.

HCO BULLETIN OF 20 APRIL 1972

Remimeo

***Expanded Dianetics Series 4***

*(Adds C/S Series 76 to HGDS checksheet)*

**SUPPRESSED PCS AND PTS TECH**

(PTS means Potential Trouble Source which itself means a person connected to a Suppressive Person.)

As the Dianetic Specialist (HGDS) is often called upon to handle pcs who are not well, it is vital that he knows all about and can use "PTS Tech".

All sick persons are PTS.

All pcs who rollercoaster (regularly lose gains) are PTS.

Suppressive persons are themselves PTS to themselves.

If a Dianetic Specialist does not know this, have reality upon it and use it, he will have losses on pcs he need not have.

There is considerable *Administrative* Tech connected with this subject of PTS and there is a special Rundown which handles PTS people.

They get handled *if* the auditor knows his PTS tech, if he audits well and if he uses both the auditing and Administrative Tech to handle.

The Administrative Tech requires an interview, usually by the Director of Processing or Ethics Officer and the person is required to handle the PTS situation itself *before* being audited. A check for stability is also made after being audited on the PTS Rundown.

For this reason, HCO B 17 April 72 and all the checksheet of HCO P/L 31 May 71 must be fully known to the Dianetic Specialist.

HCO B 17 April 72 is also C/S Series 76 so as to be sure that Case Supervisors handle the Admin and C/Sing correctly.

*C/S Series 78*

**PRODUCT PURPOSE AND WHY AND  
WC ERROR CORRECTION**

Where untrained Auditors are finding Whys for a Danger Formula, or post purposes or post products as called for in the Est O System you will get a certain amount of error and case disturbance. Such upsets also come from word clearing by incompetent persons.

The C/S should look for these especially when such campaigns are in progress. He should suspect them as a possibility when a case bogs.

A C/S must be sure all such papers and worksheets get into pc's folders.

A common repair action is to

1. Do an assessment for type of charge.
2. Handle the charge found by the assessment done.
3. Fly all the reading items found on such assessments by 2wc or direct handling.
4. Suspect LISTING ERRORS on any Why or purpose or product found even though no list exists and reconstruct the list and L4B and handle it.
5. Handle word clearing of *any* type in or out of session with a Word Clear Correction List done in session by an Auditor.
6. When word clearing is too heavy on the pc or doesn't clean up suspect he has been thrown into implants which are mostly words or the words in some engram. As Implants are actually just engrams, handle it with an L3B.

LISTING

Any item found out of session or by a non-auditor is suspect of being a Listing and Nulling (L&N) error even though no list was made.

TODAY A CORRECT L&N ITEM MUST BD AND F/N.

So treat such items as you would list errors and try to reconstruct the list and either confirm the item or locate the real item (may have been invalidated and suppressed) or extend the list and get the real item.

The real item will BD F/N.

One can establish what the situation is with a post purpose, a Why or a product or any other such item by doing an L4B.

SELF AUDITING

The commonest reason for self auditing is a wrong or unfound L&N item.

People can go around and self list or self audit trying to get at the right Why or product or purpose after an error has been made.

## REACTION

NOTHING PRODUCES AS MUCH CASE UPSET AS A WRONG LIST ITEM OR A WRONG LIST.

Even, rarely, a DIANETIC LIST can produce wrong list reactions. Ask the pc for his somatics and he blows up or goes into apathy. Or blows. Or attacks the auditor.

ALL of the more violent or bad reactions on the part of the pc come from out lists.

Nothing else produces such a sharp deterioration in a case or even illness.

## OUT LISTS

Therefore when one gets a sharp change in a case (like lowered tone, violence, blows, “determination to go on in spite of the supervisor”, long notes from pcs, self C/Sing, etc, etc, the C/S SUSPECTS AN OUT LIST.

This outness can occur in regular sessions even when the item was said to BD F/N.

It can occur in “Coffee shop” (out of session auditing of someone), or by Est Os or poorly trained or untrained staff members or even in life.

## PTS

When such actions as finding items by non-auditors are done on PTS people the situation can be bad, so one also suspects the person to be PTS to *someone* or *something*.

“PTS” does not communicate well in an assessment question so one says, “Someone or something is hostile to you” and “You are connected to someone or something that doesn’t agree with Dianetics or Scientology.”

## REPAIRS

The main things to know when doing such repairs are (a) that such situations as wrong lists or upset people can occur in an org where untrained people are also using meters and (b) THAT IT IS UP TO THE C/S TO SUSPECT DETECT AND GET THEM HANDLED IN REGULAR SESSION.

Do not ignore the possible bad influence.

As the good outweighs the bad in such cases, it is not a correct answer to forbid such actions.

It is a correct answer to require all such actions and worksheets become part of the folder.

One can also persuade the D of T or Qual to gen in the people doing such actions. And do not ignore the effect such actions can have on cases and do not neglect to include them in C/Ses before going on with the regular program.

They can all be repaired.

*Expanded Dianetics Series 5*

**PTS INTERVIEWS**

(Reference HCO B 17 April 72, C/S Series 76)

Interviews to discover a PTS condition are done on a meter with all reads marked.

The Interview asks (a) about persons who are hostile or antagonistic to the pc, (b) about groups that are anti-Scientology, (c) about people who have harmed the pc, (d) about *things* that the pc thinks are suppressive to the pc, (e) about locations that are suppressive to the pc and about *past* life things and beings suppressive to the pc.

In doing the Interview the Interviewer must realize that a sick person *is* PTS. There are no sick people who are not PTS to someone or a group or something somewhere.

A somewhat suppressive pc will find the good hats suppressive. This does not relieve his condition. He is PTS to SP people, groups, things or locations, no matter how SP he is.

He can have been audited by someone he knew in an earlier life and who goofed the session. A few auditors have since been declared. Not because they goofed but because they *were* SP.

However, some PTS pc will make trouble for good people because that is what PTS means (Potential Trouble Source). So do not buy all the good people he is PTS to.

Further, when you do get the person or group or thing or location the PTS person will F/N VGI and begin to get well.

The PTS condition is actually a *problem* and a mystery and a withdrawal so it is sometimes hard to find and has to be specially processed (3 S&Ds) to locate it.

Usually it is quite visible.

Don't have a sick, rollercoaster pc appear for Interview and then say "not PTS". It's a false report. It only means the Interviewer did not find it.

The pc sometimes begins to list in such an Interview and such an Interview where a wrong item is found has to be audited to complete the list or find the right item. (See C/S Series 78, HCO B 20 Apr 72, Issue II.)

So Interview worksheets are VITAL.

The Interview should end on an F/N.

The Interview is followed by the Ethics action of HCO PL 5 April 72 or other Ethics actions such as handling or disconnection and posting as called for in policy.

An Interviewer has to use good TRs and operate his meter properly and know 2-way comm and PTS tech.

Some Interviewers are extremely successful.

Such Interviews and handling count as auditing hours.

When properly done, plus good auditing on the PTS RD, well people result.

*Study Series 8*

**THE GLIB STUDENT**

The Glib Student can confront the words and ideas.

He cannot confront the physical universe or people around him and so cannot apply.

He does not *see* Mest or people.

The reason for this is that he is below non-existence on one or more dynamics and so cannot align with the others.

As a spirit or being in a body he has no past or future and so is just a social machine.

Getting him up the dynamics by conditions by “Conditions by Dynamics”, HCO PL 4 April 72 (Establishment Officer Series 14), fourth page, having him do general confronting and do TR Courses the Hard Way and having him run on the Objective Processes cures this condition. It takes a lot of work, a lot of auditing but it *can be cured*.

Unless it is fully handled he will never *see* enough more than the paper and words to be more than a glib student who cannot apply.

HCO POLICY LETTER OF 3 MAY 1972

Remimeo  
Executive  
Hats

*IMPORTANT*

*Executive Series 12*

**ETHICS AND EXECUTIVES**

Any person holding an Executive Post (head of Department or above) is deemed an EXECUTIVE.

Evaluation has revealed that the breakdown in many orgs is a failure on the part of Executives to wear their Ethics and Justice hats.

It has been found that below Administrative Whys there is usually an Ethics situation as well which unhandled, causes the Administrative Why not to function or raise stats.

In an area which is downstat, it is the duty of an Executive to investigate and find any out-ethics situation and get it corrected.

Ethics is a personal thing in relation to a group. Unethical people are those who do not have Ethics in on themselves personally.

It is the responsibility of the Executive to see to it that persons under his control and in his area *get their personal ethics in and keep them in*.

Dishonesty, false reports, an out-ethics personal life, should be looked for and by persuasion, should be corrected.

When an Executive sees such things he or she must do all he can to get the person to get his own Ethics in.

When an area is downstat the Executive must at once suspect an out-ethics scene with one or more of the personnel and must investigate and persuade the person to be more honest and ethical and correct the out-ethics condition found.

If this does not correct and if the person or area remains downstat, the Executive must declare the person or area in Danger and apply HCO PL 9 Apr 72 "CORRECT DANGER CONDITION HANDLING".

The situation, if it does not correct, thereafter becomes a matter of full group justice with Courts and Comm Evs. Persons whose Ethics have remained out must be replaced.

The seniors of an Executive are bound to enforce this policy and to use it on any Executives whose personal ethics are out and who fail to apply it. It will be found that those who do not apply this policy letter have themselves certain dishonesties or out-ethics situations.

**IT IS VITAL TO ANY ORGANIZATION, TO BE STRONG AND EFFECTIVE, TO BE ETHICAL.**

**THE MOST IMPORTANT ZONE OF ETHICAL CONDUCT IN AN ORGANIZATION IS AT OR NEAR THE TOP.**

Ethical failure at the top or just below it can destroy an organization and make it downstat.

Historical examples are many.

THEREFORE IT IS POLICY THAT AN EXECUTIVE MUST KEEP ETHICS IN ON HIMSELF AND THOSE BELOW HIM OR BE DISCIPLINED OR COMM EVED AND REMOVED FROM ANY POST OF AUTHORITY AND SOMEONE FOUND WHO IS HIMSELF ETHICAL AND CAN KEEP ETHICS IN ON THOSE UNDER HIS AUTHORITY.

The Charge in any such case for a staff member or Executive is FAILURE TO UPHOLD OR SET AN EXAMPLE OF HIGH ETHICAL STANDARDS.

Such offenses are composed of:

1. DISHONESTY.
2. Use of false statements to cover up a situation.
3. Representing a scene to be different than it actually is to cover up crimes and escape discipline.
4. Irregular 2D connections and practices.
5. Drug or alcoholic addiction.
6. Encouraging out-ethics.
7. Condoning or failing to effectively handle an out-ethics situation in self or others as an In Charge, Officer or Executive.

#### TECHNICAL

People with out-ethics withholds cannot see. This is proven by the brilliant return of perception of the environment in people audited effectively and at length on such processes.

Such people also seek to place a false environment there and actually see a false environment.

People whose Ethics are low will enturbulate and upset a group as they are seeking to justify their harmful acts against the group. And this leads to more harmful acts.

Out-ethics people go rapidly into Treason against the group.

A person whose Ethics have been out over a long period goes "out of valence". They are "not themselves".

Happiness is only attained by those who are HONEST with themselves and others.

A group prospers only when each member in it has his own personal ethics in.

Even in a PTS (Potential Trouble Source) person there must have been out-ethics conduct toward the suppressive personality he or she is connected with for the person to have become PTS in the first place.

People who are physically ill are PTS *and are out-ethics* toward the person or thing they are PTS to!

Thus a group to be happy and well, and for the group to prosper and endure, its individual members must have their own Ethics in.

It is up to the Executive or Officer to see that this is the case and to DO the actions necessary to make it come about and the group an Ethical group.

**Exec or Officer's Steps  
for Getting In Ethics  
on a Staff Member**

STEP ONE

Inform the person personally he is in Danger Condition by reason of acts or omissions, downstats, false reports or absence or 2D or whatever the circumstances are.

He is in fact IN danger because somebody is going to act sooner or later to hit him.

He may be involved already in some other assignment of Condition.

But this is between you and him.

HE IS IN DANGER BECAUSE YOU ARE HAVING TO BY-PASS HIM TO GET HIS ETHICS IN, A THING HE SHOULD DO HIMSELF.

If he cooperates and completes this rundown and it comes out all right you will help him.

If he doesn't cooperate you will have to use group justice procedures.

This is his chance to get Ethics in on himself with your help before he really crashes.

When he accepts this fact, Step 1 is done. Go to Step 2.

STEP 2

Ethics is gotten in by definition on the person.

GET IN THE DEFINITIONS FULLY UNDERSTOOD.

The following words must be Method 4 Word Cleared on all the words and the words in their definitions on the person being handled.

“ETHICS: The study of the general nature of morals (morals [plural] [noun]: *The principles of right and wrong conduct*) and the specific moral choices to be made by the individual in his relationship with others.

“The rules or standards governing the conduct of the members of a profession.”

“JUSTICE: 1. Moral rightness; equity. 2. Honor; fairness. 3. Good reason. 4. Fair handling; due reward or treatment. 5. *The administration and procedure of the law.*”

“FALSE: Contrary to fact or truth; without grounds; incorrect. Without meaning or sincerity; deceiving. Not keeping faith. Treacherous. Resembling and being identified as a similar or related entity.”

“DISHONEST: Disposed to lie, cheat, defraud or deceive.”

“PRETENSE: A false reason or excuse. A mere show without reality.”

“BETRAY: To be disloyal or faithless to.”

“OUT-ETHICS: An action or situation in which an individual is involved contrary to the ideals and best interests of his group. An act or situation or relationship contrary to the ethics standards, codes or ideals of the group or other members of the group. An act of omission or commission by an individual that could or has reduced the general effectiveness of a group or its other members. An individual act of omission or commission which impedes the general well-being of a group or impedes it in achieving its goals.”

Do not go to Step 3 of this until all the above words are cleared by Method 4 Word Clearing.

### STEP 3

Ask the person what out-ethics situation he or she is involved in.

It may take the person some time to think of it or he may suppress it and be afraid to say it for fear of consequences. Reassure him that you are only trying to help him.

He may have brought it up in a session but did not apply it as out-ethics. Coax him through this.

If his conduct and actions are poor or downstat, he for sure will be able to come up with an out-ethics personal scene.

Sometimes the person is secretly PTS and is connected to a suppressive or antagonistic person or group or thing. In such an instance he will rollercoaster as a case or on post or have accidents or be ill frequently. (See PTS tech for material on this and for future handling. Checksheet HCO PL 9 April 72 [Revised] "Correct Danger Condition Handling", but go on handling with these steps.)

Sometimes the person just uses PR (brags it up and won't come clean). In this case, an auditing session is required.

If the person gets involved in self listing get him audited on HCO B 20 Apr 72, C/S Series 78, which gives the auditing session procedure. A person can become very upset over a wrong item. It is easily repaired but it must be repaired if this happens.

By your own 2wc or whatever means or repair get this Step 3 to a clearcut out-ethics situation, clearly stated. Do not forget to go on with this eventually if there is a delay in completing it. GIs will be in if correct.

### STEP 4

Have the person work out how the out-ethics situation in which he or she is involved would be a betrayal of the group or make them false to the group or its ideals.

Do not make the person guilty. Just get them to see it themselves.

When they have seen this clearly and have cognited on it completely go to next step.

### STEP 5

The person is now ready to apply the FIRST DYNAMIC DANGER FORMULA to himself.

Give him this formula and explain it to him.

### FIRST DYNAMIC FORMULA

The formula is converted for the 1st dynamic to:

- 1st 1. By-pass habits or normal routines.
- 1st 2. Handle the situation and any danger in it.
- 1st 3. Assign self a danger condition.
- 1st 4. Get in your own *personal ethics* by finding what you are doing that is out ethics and use self-discipline to correct it and get honest and straight.

1st 5. Reorganize your life so that the dangerous situation is not continually happening to you.

1st 6. Formulate and adopt firm policy that will hereafter detect and prevent the same situation from continuing to occur.

Now usually the person is already involved in another *group* situation of downstats or overt products or bad appearance or low conditions, Courts, Comm Evs for something.

It does not matter what other condition he was in. From you he is in *Danger*.

So 1st 1 and 1st 2 above apply to the *group* situation he finds himself in.

He has to assign *himself* a Danger Condition as he recognizes now he has been in danger from himself.

1st 4 has been begun by this rundown.

It is up to him or her to finish off 1st 4 by applying the material in Steps 2 and 3. He or she has to use self-discipline to correct his own out-ethics scene and get it honest and straight, with himself and the group.

1st 5 is obvious. If he doesn't, he will just crash again.

1st 6. In formulating and adopting firm policy he must be sure it aligns with the group endeavor.

When he has worked all this out AND DEMONSTRATED IT IN LIFE, he has completed the personal danger rundown.

He can then assign himself Emergency and follow the Emergency Formula (HCO PL 23 Sept 67, Pg 189-190 Vol 0 OEC, "Emergency").

## STEP 6

Review the person and his stats and appearance and personal life.

Satisfy yourself that the steps above and the out-ethics found were all of it. That no wrong item has been found. That the person is not PTS.

Handle what you find. But if you find that the person did not improve and gave it all a brush-off, you must now take the group's point of view and administer group justice.

Your protection of the person is at end because he had his chance and is apparently one of those people who depend on others to keep his Ethics in for him and can't keep them in himself. So use group justice procedures thereafter.

If the person made it and didn't fall on his head and is moving on up now AS SHOWN BY HONEST STATS AND CONDITION OF HIS POST, you have had a nice win and things will go much much better.

And that's a win for everybody.

## HAVINGNESS

(Previously issued as PAB No. 23 on 2 April 1954  
through Hubbard Communications Office,  
163 Holland Park Avenue, London W.11)

Starvation for energy is the keynote of any case which maintains facsimiles in restimulation.

The thetan who holds facsimiles to the body has chosen to have the energy *in spite of* the perceptions and significances in it. He is attempting to have the energy and not have the aberrative quality of it. Thus he is posed the problem of trying to reject the thought and accept the energy and thus he cannot do either.

In Dianetics we gave him the energy by processing out the significances (perception) in it.

When well exteriorized a thetan may have his energy so far reduced that he becomes unhappy. Having him create and snap in anchor points upon himself (not the body) will remedy this unhappiness.

Matched terminalling, admiration processing and any other process which reduces energy, at length "starve" the thetan for energy.

All these conditions are remedied by remedying the "havingness" of the thetan.

As we saw in Acceptance Level Processing (PAB 15) only certain energy forms may be acceptable to the thetan. This is regulated by the screens he has erected against things. By setting up a resistance to certain energies, he creates an eventual appetite for them. He sets up screens to resist the form and the screen becomes plus for the form on the far side and negative for the form on the near side. As the screen caves in upon him (by being pounded by the unwanted form) it eventually causes an appetite (vacuum) for the form. Thus he actually starves for a form he once detested. This is the dwindling spiral of the Mest Universe. The thetan believes he has to have the form to survive.

The remedy of havingness is necessary for all cases at and below Step IV of SOP 8.

An auditor remedies havingness by "starting an avalanche", by making the preclear begin an automatic inflow of acceptable things, then graduates the preclear rapidly to avalanches of stars, planets, heavy masses and spaces.

It is density and mass which count, not specific items.

Degradation begins when the thetan is interiorized into unwanted mass. It is completed when, having developed an appetite for heavy mass, he is exteriorized from it.

In this lifetime the downfall of any thetan began with his loss of some heavy mass. The heaviness of the mass *was* the value of the mass. For instance, an auditor wishing to trace the feeling of degradation in a preclear would look for a time when the preclear lost or was removed from a massive object. The auditor then has the preclear

mock up the object and change its quality better or worse until it “snaps in” automatically on the preclear. Then the auditor has the preclear mock up enough of the object to create an avalanche. The preclear must then add more and more to the inflow, then add planets, stars and black stars until the preclear can comfortably throw several dense objects away in mock-up. A reverse (outflowing) avalanche is then begun and run.

Outflowing and inflowing avalanches are run on the preclear until his “hunger” is satiated.

Numerous facsimiles may appear. The auditor continues with the dense masses in avalanches, not the facsimiles. The facsimile will “blow”.

This process, run for four or five hours, will create a Book 1 Mest Clear.

Perceptions are turned on by running “acceptable” smells, lights and sounds in avalanches. Masses are more important than perceptions.

## SIX BASIC PROCESSES

(Previously issued as PAB No. 42 on 24 December  
1954 through Hubbard Communications Office,  
163 Holland Park Avenue, London W.11)

There are six basic processes today in Dianetics and Scientology. Before we consider these processes, let us first consider the essential difference between Dianetics and Scientology. What we are doing could be called, more succinctly, "an understanding of life." Under this heading, we could call anything a science or an art and we could bring in many subdivisions.

Other subdivisions which enter into this represent the difference between a study of life in general and a study of man in particular. Scientology could be called a study of life; Dianetics could be called a study of man. The first four dynamics are devoted to Dianetics. If you read again *Dianetics: The Modern Science of Mental Health*, you will discover that it treats of the first four dynamics. If you examine the first shadows of what we now call Scientology, it treats all of the eight dynamics. In view of the fact that both Dianetics and Scientology operate in the field of man, it should be readily seen that the basic processes of Dianetics or Scientology as they apply to man would be the same. Just because we have used two different words is no reason man has changed. Thus we have our six basic processes and thus we discover that Dianetics and Scientology, up to the point of stable exteriorization, operate in exactly the same field with exactly the same tools. It is only after man is sufficiently exteriorized to become a spirit that we depart from the field of Dianetics; for here, considering man as a spirit, we must enter the field of religion. Thus we have our additional subdivision. Dianetics is a science which applies to man, a living organism; and Scientology is a religion.

The six basic processes are as follows:

1. Two-way Communication
2. Elementary Straightwire
3. Opening Procedure of 8-C
4. Opening Procedure by Duplication
5. Remediating Havingness
6. Spotting Spots in Space.

An additional breakdown of these sections demonstrates that these processes subdivide into some highly important techniques. An additional process is as follows:

1. Two-way Communication includes communication lag, scarcity of problems, the Code of a Scientologist, the Axioms of Dianetics.
2. Elementary Straightwire includes the Auditor's Code, *Self Analysis*, Memory and Mass and their relationship, under which we get past life loss of memory and what we generally call "next-to-the-last list of *Self Analysis*."

3. Opening Procedure of 8-C includes pan-determinism, orders, defenses and the theory and material pertinent to present time.
4. Opening Procedure by Duplication includes the communication formula, general theory of ARC and “it must-mustn’t happen again.”
5. The Remedy of Havingness includes the scale of substitutes, the hide-to-curiosity scale, Expanded Gita, mock-ups and engrams, overt acts and motivators, flows and terminals, the fact that two things can’t occupy the same space if one is to have a universe, significances and problems and, in particular, the scarcity of problems.
6. Spotting Spots includes “space, the theory of,” disinterest, importance, as-isness and the conditions of existence and separateness.

Appended to these subjects is one of equal importance in that it is the prediction of human beings. This is included, and could be called part seven of these basics. *Science of Survival*, with its dissertations on the Theta-MEST theory, ARC, and the Chart of Human Evaluation, is, indeed, a study of the prediction of homo sapiens.

It has been discovered in the field of training that an auditor has to be thoroughly versed in these seven items. He must be able to be expert in processing people using the six processes, and his understanding must be increased to the seventh item as included in the book *Science of Survival*.

How thoroughly does one have to cover any one of these subjects in order to render an auditor conversant with it? It has been found in the Phoenix Certification Course that even auditors who have studied this material before coming to the course had to be rehearsed on it a minimum of *eight times* and had to be carefully supervised through each one of these at least eight times, had to audit at least ten or fifteen hours on each process under supervision, and had to have each one of these processes run on him expertly for many hours before he finally was able to practice them with such skill that he produced uniform results. This is in spite of the fact that these particular processes are simple. Indeed, they are so simple that an auditor has a tendency to look at them and use them as though they were also pliable. Their simplicity is residual in the fact that they are the exact processes necessary to produce the exact results of Dianetics and Scientology.

It has been found that the simplicity of these processes was the stumbling block in their use. One instance in one HCA unit: a class went through for five weeks without entirely grasping the theory and practice of communication lag. Amongst this class was an auditor-student who was so expert at giving indirect, yet seemingly direct, answers that he had actually evaded the understanding of his fellow students. This person had yet to give a precisely direct reply to a question asked him. An instructor sat down with this student and for forty-five minutes asked him the same simple question. At the end of that time the student gave at last a direct reply, and this reply was the first time in the course when he had answered a question straight. A precision definition of communication lag is “the length of time, whether verbal or silent, intervening between the auditor’s asking of a specific question and the specific and precise answer of that question by the preclear.” It would not matter then whether the preclear continued to talk about something else than the question, or simply remained silent, this would still be communication lag. The class had not entirely grasped this fact in that they assumed that an indirect or an almost answer was sufficient. Rapidly in the next two auditing periods the case of the student broke, simply because his auditor now understood exactly what this person was doing with auditing questions and now demanded precise answers to questions, at the same time retaining ARC with his preclear.

The processes of Dianetics, as one can see, stress bringing a preclear into present time. In the old days we did this by running engrams, running locks and unsticking the preclear in general from various incidents in the past. Now we approach the problem far more directly. The Opening Procedure of 8-C is putting the preclear into contact with what is present time. The Remedy of Havingness will actually give the preclear

enough energy masses to permit his starved condition to let go of the energy masses he is holding to him. The energy masses he is holding to him are commonly engrams with significance and content which make him very unhappy, but not as unhappy as he thinks he would be if he no longer had this energy. The motto of an individual seems to be “Any energy, even with content as vicious as an engram, is better than little or no energy.”

Here, with this list of processes, we have before us the basic training for the Dianeticist and Scientologist. These processes have now remained stable for some eight months. In spite of all the attention and tests they have received, little or no improvement has occurred in the actual form of the processes, and the processes and the commands have remained steady and stable.

In view of the fact that the thetan exterior is described fully in the second chapter of *Dianetics: The Modern Science of Mental Health*, and in view of the fact that we have now with the command “Be three feet back of your head” the “one-shot clear,” and in view of the fact that the instructor in London with his Advanced Clinical Course [1st London ACC] only three weeks deep had exteriorized successfully all of his students, we see we do not have any real problems in terms of processing or processes today. We can do it. An auditor *who is well trained* can achieve results with these basic processes which in any other age would be called miracles.

There are people around who desperately need it as a process who believe and who would have you believe that the Opening Procedure by Duplication techniques are the most vicious things ever invented. Compare this with the fact that these people also feel bound to go out and crusade amongst their fellow men to teach them how bad Dianetics and Scientology are. These two facts combined should tell you something concerning duplication. The very thought of duplication is so hideous to some people that they are utterly unwilling to face the slightest chance that they might be brought in to a willingness to duplicate. These people have had things happen to them which are bad enough to make these people postulate that certain things mustn't happen again. Duplication means that things must happen again and the process of duplication itself balances out and makes a person easy about his past.

In the process of running Opening Procedure by Duplication hypnotism very often comes off of the bank. Here we have an example of un hypnotizing. The process of hypnotism is a monotony and a central fixation on some one object. Opening Procedure by Duplication, using two objects and using an alert and aware procedure, contacting and examining these two objects alternately, tends to unfix a person from points in the past. Naturally, this begins to run out hypnotism. A person run for only 15 or 20 minutes on Opening Procedure by Duplication might very well feel himself getting more and more hypnotized; by the time he has been run 45 minutes or an hour, this sensation has worn away and the person is far more alert than he was at the beginning of the session. It is quite common to run Opening Procedure by Duplication for several hours, and Intensive Procedure as given at headquarters of the HASI is run precisely as given and taught upon preclears for a minimum of five hours before the HASI is content to release a preclear as in good condition. If the preclear cannot duplicate, his arrival at a state of good condition will simply be a signal for him to have a “no duplicate” fixation on feeling good. Thus the auditor would have brought him up to a level of feeling well and immediately afterwards the individual, being able to have things happen only once, would then have to feel bad. Here again is the problem of exteriorization which results soon afterwards in re-interiorization: the person has exteriorized, he has the fixation that something must happen only once, and thus he will go back into the body and will not come out again. This is all under the heading of duplication. Opening Procedure by Duplication wakes up the preclear, puts his body back into balance and gives him a brighter outlook in general and makes him fear the past much less than before it has been run on him. He is far better able to control his body and his environment than previously and remarks that incidents have far less effect upon him than before. This does not look very much like hypnotism, now, does it?

With these processes a trained auditor—and we emphasize *trained*—is able to get the results which are called for and described in all the earlier books on Dianetics and Scientology. The reason one did not see these results more often was that the auditor himself could not duplicate the auditing commands, and thus anything and everything was being run but a minimum of result was taking place. I was running one preclear one day who was a very old-timer and who had been run many, many hours on the techniques contained in *Dianetics. The Modern Science of Mental Health*. I was running him on processes which ran out all of his earlier auditing. He broke down under this processing and began to curse, saying, “If only once—if only just once—I had been permitted to run a second time through an engram by my auditor; if only just once I had been able to run the secondary once more! But no! I was never given the chance to go through the engram a second time.” Now those of you who know the techniques of Book One know definitely they call for a continuous running through, over and over, of the same incident so as to de-intensify it. This is the sort of complicated duplication which the preclear was asked to do which resolved at once his ability to duplicate and the fact that it mustn’t happen again. Thus when auditors failed to return people through engrams and secondaries, for a second, fourth, fifth, or even tenth time if necessary, it then became impossible for these early techniques to work.

In training it is very difficult to relay the theory and processes to people who are not very alert and who cannot duplicate. One can say straight to a class that such-and so is observably true, and the class will immediately agree that something is observably true, but immediately after leaving the classroom, will believe in themselves that an entirely different statement had been made than the one they agreed with. They will then agree with this different statement and all sorts of oddities in the form of theory and techniques become circulated.

In the next *Professional Auditor’s Bulletin* I am going to give you a rather thorough rundown on two-way communication and on the bulletins subsequent to that I am going to give you, for the first time, in written form, a considerable dissertation on these processes and the exact auditing commands and the results to be looked for.

But there is one thing I am probably not going to cover again, and this is an odd fact which has shown up in our training experience here and in my handling of a great many auditors. This has to do with the case of the auditor in particular. I could write an entire series of PABs on this subject, but I am sure this statement will be enough. The case of an auditor, one who is skilled in the processes of Dianetics and Scientology, and the case of a preclear, one who has just walked in off the street without further knowledge, are entirely different cases, as both Dianeticists and Scientologists know. At one time the cases of Scientologists and Dianeticists were considered so much with horror on the part of other Scientologists and Dianeticists that one audited a fellow practitioner with considerable reluctance. Dianeticists and Scientologists were renowned to be tough cases.

I have found now what made them tough cases. The preclear has an entirely different goal from the auditor. The preclear is there to get well: the auditor is there to make the preclear well.

When we consider this further, we see that the ability of the auditor to control minds and mental reactions is dependent upon his getting results in preclears. The preclear’s results simply stem from the preclear’s gained ability to control his own mind and its reactions. Thus, of course, we have entirely different values.

An auditor who does not consistently get good results is going to have his own case cave in on him. The only way an auditor can keep his case up is to get continuous and predictably excellent results upon preclears. Thus an auditor, to have his case in good order, would have to be in good order as an auditor; he would have to be able to get results upon those he processed. In view of the fact that he could get results upon other human beings, he could then, of course, know continuously that he could control human reactions and mental reactions; and so, with this confidence and this control, be completely unworried about his own case and be able to do actually anything he wished with his own mental machinery.

The case of the auditor actually depends upon his successes in auditing. Thus in the Certification Course in Phoenix we stress today only the skill of an individual to audit, and we discover consequently that, as the auditor gets results upon his fellow student and as he gets results on outside preclears, his own belief in his ability to handle the human mind soars to such an extent that as a case he ceases to be in the concern category. He of course is audited and without being audited he would not know the results which would happen in a preclear, but his actual case gains depend on his gains on preclears.

Now with today's techniques we can guarantee those results on preclears. We can demonstrate to any auditor that he can make anybody well, if the person is even vaguely breathing, simply by using with skill and understanding, as trained, the above six processes and the seventh, which is actually an understanding. Here is the problem of the auditor's case resolved. The way to have one's case in excellent condition is to have continuing confidence in one's ability to get results on preclears. In the Certification Courses in Phoenix and London we work solely in the direction of giving an auditor confidence in his ability to handle the aberrations of others and we discover that with this gained confidence the fear of his own behavior vanishes; and thus an auditor becomes a very, very capable clear.

### THE REMEDY OF HAVINGNESS

(Previously issued as PAB No. 49 on 1 April 1955  
through Hubbard Communications Office,  
163 Holland Park Avenue, London W.11)

*(Addition in this type style on next page.  
Note that this also corrects Page 20 of the  
"Level 1 PABs" booklet.)*

There is a great deal of upper-echelon theory connected with the Remedy of Havingness as a process, for here we are dealing with energy and the reasons and operations of a thetan in regard to it.

Just why a thetan should get himself so completely snarled up in energy might be an entire mystery to anyone who did not realize that a thetan has to cut down his knowingness and his total presence in order to have a game. The awareness of awareness unit builds space to cut down knowingness. Space makes it necessary, then, to look at something in order to know about it. The next thing a thetan does to cut down his knowingness is to create energy and to pass it to other thetans and to bring in the energy of other thetans so as to get a duration and a time span. If the thetan is successful and obtains a game in this wise, he continues on with this modus operandi of having a game, and when he does not have a game he simply cuts his knowingness down once more. Of course, he reaches a point eventually where he does not get a game simply by cutting down his knowingness, and eventually assumes a fairly fixed, stupid, aspect. He is below the level of having games, but because he has cut down his knowingness he does not know, now, that he is below the level of having games and thinks that all that is necessary to get another game is to further cut down his knowingness. He is by this time obsessively dramatizing the lowering of knowingness.

When one speaks of knowingness, one should realize that one is speaking of an embracive thing. Everything on the Know to Mystery Scale is simply a greater condensation or reduction of knowingness. At first one simply knows. Then he makes some space and some energy, and so now he has knowingness in terms of looking. By changing the position of the particles of energy thus created, and by exchanging particles with others, extant or self-created, the thetan cuts down his knowingness further, and gets time, and so gets emotion and sensation. When these become solid, he has effort particles and masses. Now, he could cut down his knowingness further by refusing to use emotion and effort, but by thinking about them thus introducing new VIAs into his line of knowingness. And, when he no longer knows entirely by thinking, he ceases to create knowingness and begins to eat, and from eating he drops into the ready-made sensation of sex instead of knowing what happens in the future. And from here he drops down into postulated mystery as something one cannot possibly know about. In other words, one gets a continued reduction of knowingness in order to have games. The greatest chess player in the world has no game, since he can predict that he will win and predict everything that opponents will do, so he will simply demonstrate how to play chess. Sooner or later, he will announce that he is "burned out" or has lost his knack for playing chess, and will go off into some other field where he *can* have a game. The field he will choose will be a less wisdom-demanding field than playing chess. A boxer, such as some of the very great ones of the past, will reduce his timing, which is to say his knowingness of arrival, to a point where he can at least put on a good exhibition, and from this they will further reduce their knowingness, and then not noticing how far they have gone, get themselves thoroughly and consistently beaten. There will be a period, however, when they are fairly evenly matched against their opponents.

To understand this with any thoroughness, one would have to recognize the intention back of all communication. Creation, Survival, and Destruction is knowingness. When somebody talks to you his intention is to continue in a parity where he can have an interchange of communication, which is to say a game. He takes knowingness from you, and gives knowingness to you, with one form of communication or another. Two soldiers fighting and shooting at each other are using a bullet to make the other man know. What is there to know in this situation? That one is dead, of course, and for the victor, that one has won.

It is dangerous, alike, to a thetan, to have too many wins or too many losses. Give him too many wins, and he will correct in the direction of reducing his knowingness as represented by his dexterity, his prediction, his activity. Give him too many losses and he will seek another game, even to the point where he will die and pick up another body. Because the decision is on the basis of knowingness, the decision is always downward. One does not decide upward toward greater knowingness, actually, unless one has the full and complete intention of winning in a new game. If one discovers that there are no wins or losses either to be found in this new game, *one will reduce one's own knowingness, even to the point of forgetting all of his knowledge concerning it, in order to ensure a game.*

As there is not an infinity of games in progress, one is apt, as he comes down seventy-four trillion years of track, to play out the available games and to put them in the category of "it must not happen again." One then becomes bored. One is only bored when there is no game possible, from his viewpoint. Actually, all he has to do is become enthusiastic about the game on his own consideration and he will begin to know more about it again.

A thetan considers that some form or mass is necessary in order to have a game. He gets into the belief that he cannot create new masses, and so he begins to hold on to old masses, and here, whether he is exteriorized or in a body, we find him holding on hard to old facsimiles, old significances, old decisions, rather than taking on new decisions.

The Remedy of Havingness directly addresses the problems of giving the thetan something "to play with." When he discovers that he can have new masses, he will begin to let go of old masses. It is an easily observed phenomenon while having a preclear Remedy Havingness, that old engrams go into restimulation, go into restimulation and run out, that they show up in front of his face and suddenly explode or disappear. The Remedy of Havingness actively does run out engrams.

This process is used from boredom up to conservatism for its best results.

This process is done by asking the preclear to mock up something and pull it in, or mock up something and throw it away. When a thetan is exteriorized, if you want to see him get very unhappy, make him change space until he begins to lose all the energy he is holding on to, and then fail to remedy his havingness. The thetan will become convinced that he is only a thought, and is therefore, by his standards, unable to have a game. Tell him to mock up eight anchor points in the form of the corners of a cube around him and pull them in upon himself. Ask him to do it several more times, and he immediately brightens up and becomes very happy. Why is this? You have reassured him that he can have a game.

The cutting down of knowingness and the Remedy of Havingness have opposite vectors. The Remedy of Havingness will knock out old energy masses the thetan is holding on to, or that the body is holding on to, which tell the thetan he is stupid. The supplanting of these by new energy masses which do not have the postulate of cutdown knowingness in them of course makes the thetan brighter.

When you find a theory detached from a process and not demonstrating itself in a process, there must be something wrong with the theory. Similarly, if what I say here about condensed knowingness being all other things, and the cut-down of knowingness, were not demonstrated in the process of Remedy of Havingness, then we would have to get ourselves a new theory. However, this is demonstrated very definitely. Those people who cannot remedy havingness, wherever they are on the tone scale, can be

brought to a point where they will remedy havingness simply by asking them what they wouldn't mind knowing. The consideration of what they are willing to know then begins to rise.

If you only could see a Black Five operate you would see that his barriers are all erected toward knowing something. Of course he is very afraid of being told something bad, and so doesn't want to be told anything at all, and when the auditor gives him a command he never receives the command as given, but does something else. He has a block up against knowingness to such a degree that he will eventually permit himself to be pressed into complete inactive stupidity. What are those black screens for? Basically to keep him from knowing. Knowing what? Then one will have to look closely at the definition of a datum. A datum is an invention which has become agreed upon and so solidified. In other words, a datum is to some degree a solidity, even if it is merely a symbol. To get into this state it has to be agreed upon. When it is thoroughly agreed upon it becomes, then, a truth. It is not at all a truth. It is an invention. What made it sure or what made it real was the fact that it was agreed upon. This opens the doors further to other processes.

In order to get the preclear in good condition we would have to put him into some kind of a condition so that he could create. The first thing he is liable to be able to create in auditing is a lie. The word "lie" is simply "invention with a bad connotation." Society gives invention that connotation because of its anxiety to have a game and to agree, and so be able to communicate with one another.

Thus society frowns upon the invention of facts, yet the preclear's sanity and continued happiness absolutely depend upon his ability to create new facts. The technique which remedies this is included in "The Creation of Sanity," number R2—29: "Start lying." One can vary this auditing command with "Tell me some lies about your past," and then keep the preclear at it long enough so that the preclear is able to come out of the complete blur which will follow on the heels of his taking over the function of and running of his memory machines. The invention of data is a step immediately toward the remedy of havingness. Simply asking the preclear what he wouldn't mind knowing, what he wouldn't mind having other people knowing about him will bring him into a condition where he can mock up and remedy havingness.

The Remedy of Havingness is the companion process to Spotting Spots, which will be taken up in the next PAB. The Remedy of Havingness, simply as a process by itself, if worked up to by getting the preclear willing to know things, and willing for other people to know things, and run thoroughly so that whole avalanches of masses can pour into him or pour out of him, will actually run out an entire engram bank, and thus is an extremely valuable process.

It has been reported by several auditors that exteriorization was accomplished on preclears by making them remedy havingness and do nothing else for eight or ten hours.

The auditing commands for the Remedy of Havingness are: "Mock up something," "Pull it in," until the preclear is doing this easily. Then, "Mock up something," "Throw it away," until the preclear can do this easily. The significance of the object may be added by the auditor with "Pull in an ideal body," or some such thing, but the actual fact is that the actual significance does nothing for the preclear. It is the mass which counts. The auditor can have the preclear pull things in two at a time, six at a time. He can have the preclear mock up something, copy it a dozen times, one time after another, then pull in the whole mass, but the real reason he is doing this with the preclear should never drop from sight. The auditor is remedying havingness in order to give the preclear enough mass to permit him to discard old masses which he is holding on to and doesn't know anything about.

## REMEDY OF HAVINGNESS—THE PROCESS

(Previously issued as PAB No. 50,15 April 1955)

“When in doubt, remedy havingness.”

This is a motto which can well be followed by an auditor doing any process on any preclear.

But, if there is a process which one should do with any other process, then that process should be understood thoroughly, for if done incorrectly it would be likely to produce confusion into all the other processes of Dianetics and Scientology.

Therefore, in the first place, let us examine with rigor the name of this process. It is REMEDY OF HAVINGNESS. By “remedy” one means the correction of any aberrated condition. By “havingness” one means mass or objects. The process could also be called “Remedy of Un-Havingness.” It could also be called “Remedy of Acceptingness.” It could also be called “Remedy of Rejectingness.”

To those people who are deficient in havingness, the process is liable to mean that the auditor should increase the havingness of the preclear. Such an auditor with this misunderstanding would have the preclear put up large masses and push them into his body or himself. The auditor would neglect having the preclear throw away objects and masses.

If the auditor misunderstood the process and simply assumed that it had something to do with havingness, and if his own havingness were too great, he would be likely to specialize on all preclears by having the preclear throw things away.

Actually, the auditor should have the preclear push things into himself and his body and throw things away from himself and his body until the preclear can do both with equal ease. When this has been accomplished the preclear’s havingness has been “remedied .”

What, then, does a Remedy of Havingness mean? It means the remedy of a preclear’s native ability to acquire things at will and reject them at will. Amongst the havingnesses which would require remedy would be an obsessive inflow of money, sexual objects, troubles, somatics, and difficulties in general. Whenever one of these appeared in the preclear’s environment it would have a tendency to inflow on the preclear. The reverse difficulty would be an obsessive outflow, whereby the preclear threw away or wasted anything which he had, such as money, clothes, cars, or living quarters. When the process “Remedy of Havingness” has been done thoroughly and completely, the preclear should be able to reject or accept, at his own discretion, anything in his environment as well as anything in his engram bank.

The earliest use of this process is to be found in GITA, which is to say “Give and Take Processing,” one of the early SOPs which became an SOP-8 “Expanded GITA.” In Issue 16-G of the *Journal of Scientology* we have a long list of key items. The preclear was asked to waste, accept, and desire these items at will. This was the Desire-Enforcement-Inhibit Scale, or the DEI Scale. This process is the immediate ancestor of the Remedy of Havingness. Indeed, one could do far worse than to take the DEI Expanded GITA list as given in Issue 16-G, and in the form of mock-ups use it as such upon the preclear, or more modernly employ it directly on the Remedy of Havingness on these objects.

If one were to employ such a list in the Remedy of Havingness, one would, of course, have to employ gradient scales. The use of the gradient scale has never been discarded, and the concept and principle of doing things by gradient scales is inherent in auditing itself, for one starts with a process which the preclear can do, and gives him some wins, and on a gradual scale gives him larger and larger wins until he is cleared. Similarly, in remedying havingness, the preclear must be started at the lowest end of the scale and advanced on up to the higher end of the scale. Quantity is one of the methods of doing this. At first one can ask a preclear to mock up one of an item and shove it into his body or throw it away, and then go, finally, when he is doing that well, to two items, three, four, five, and six, all the same, but a greater quantity of the item. An even lower gradient on this scale would be to simply get the idea that something was there, and to progress on forward with the idea into the actual mass. An expert auditor working with this from the idea on through to the object would discover that he had no preclears who could not mock up.

He would have the preclear get the idea out in front of him of a ball, and get the idea of the ball being thrown away; get the idea of a ball up in front of him and get the idea of a ball coming in; he would then, when the preclear could do this excellently well, move forward into the actual mock-up of a ball. The mock-up would get better and better as the process progressed, until at last the preclear could mock up and throw away or push into his body at will, a ball. He would be able to see this ball, even feel its texture and its weight.

Now, Exteriorization by Remedy of Havingness is a newer process than the old Remedy of Havingness. It is accomplished by having the preclear SHOVE or PUSH things into his body. One no longer has the preclear PULL things into his body. Simply by having the preclear mock up things and shove them into his body, mock up things and throw them away, mock up things and shove them into his body, mock up things and throw them away, a preclear who has already been run on the earlier steps of the six basic processes will, at this stage, exteriorize quite neatly after as little as fifteen or twenty minutes of the process. If he does not, then the earlier processes have been skimmed and the preclear was really not ready for a full, forthright remedy of havingness.

Even when doing Route 1, the preclear is told to push things into himself. This will rather take his flitter away for a moment, for he is there being one viewpoint, and in order to push something into himself he has to be a second viewpoint. In view of the fact that a thetan gets in trouble by being only one viewpoint, this remedies the viewpoint scarcity of the thetan, and he pushes himself up into two viewpoints with great rapidity. Thus we are doing duplication of the thetan at the same time that we are remedying havingness, so one even has the thetan shove things into himself, rather than pull things into himself.

In short, one never has anyone pull things into his body any more. One has a person push things into his body. One has him, for instance, mock up a planet, and push it into the body; mock up a planet and throw it away; mock up a planet and push it into his body; mock up a planet and throw it away; mock up a planet and push it into his body, and then one says, "Where are you pushing it in from?" The preclear says, "Out here in front of the body." The auditor simply goes on doing the process and very shortly the preclear will, if the earlier steps have been done well—the Six Basic Processes below Remedy of Havingness, exteriorize neatly and will be ready for Route 1.

One would omit, in such an instance, running Spotting Spots as such, for Change of Space Processing and Communication Processing have a great deal to do with spotting spots already.

If you were to do Remedy of Havingness forthrightly and all-out, and you were to accept this as the only process we had, we would work with its cousin process, R2-63 as given in *The Creation of Human Ability*, "Accept-Reject." One would ask the preclear for things he could accept, one after the other, until the communication lag was flat, and then would ask the preclear for things he could reject, one after the other,

until the communication lag was flat on that. One would then move into the Expanded GITA list and would have the preclear mock up and shove into his body (if interiorized) or into himself (if exteriorized) the various items on the Expanded GITA list as given in Issue 16-G of the *Journal of Scientology*. This would be a long process, and not entirely successful on all counts, but would nevertheless be a very effective and efficient process from the standpoint of gains. One would certainly get the preclear over a very large number of aberrations and would do a great deal for him. However, this is not the advised way of handling this process, for the process itself is not an end-all. Aberrations can be handled much more easily by communication processing.

The exact use and commands of Remedy of Havingness in ordinary and routine auditing are simple and effective. One has been asking a preclear a great many questions which “as-ised” large masses of energy. One, in handling Change of Space or interiorization and exteriorization into objects while the preclear is exteriorized, has been “burning up” a great deal of energy. Any time the preclear begins to feel dopey or “boil off” he has either run too long on a flow in one direction, in which case reverse the flow, or he has simply reduced his havingness down to a point where he feels tired or sleepy. Without waiting for this manifestation to occur the good auditor simply in the course of Straight Wire or Description Processing, or many other processes, such as those contained in Route 1, remedies havingness. Having achieved something like a momentarily flat communication lag on a process, the auditor says to the preclear, “Mock up a mass out in front of you.” When the preclear has done this, the auditor says, “Shove it into your body.” When the preclear has done so, the auditor says, “Mock up another mass out in front of you.” And when the preclear has done so, the auditor says, “Throw it away.” That, as given, is for preclears who are interiorized. It is simply repeated over and over. The mass is not specified. It can be almost anything, and in fact it does not much matter what type of significance the mass has. Any mass is better than no mass, according to the thetan.

If the preclear is exteriorized, the auditor already starts him on the Remedy of Havingness in the Route 1 step where the preclear is asked to copy what he is looking at (R1—5). When one is doing R1—5, one must be very careful to obey the gradient scale principle behind Remedy of Havingness. One would not make the preclear make twenty copies and then push them all into himself or the body. One would make the preclear make two or three copies and push them in one at a time until the preclear could remedy his havingness with ease.

The auditor would then have the preclear “Mock up a mass and shove it into yourself,” and then “Mock up a mass and throw it away,” and do this back and forth until the preclear could do this easily and well, at which time the auditor would tell the preclear, “Mock up two masses and shove them into yourself,” and then “Mock up two masses and throw them away,” until finally the auditor has the preclear mock up eight masses as though they were the corners of a cube around the preclear and “Shove them into yourself,” and then “Mock up eight masses and throw them away.”

One must remember that in spite of the fact that he cannot duplicate mass actually as himself, having no space or mass, natively, the motto of the thetan is “anything is better than nothing.” When you tear up a lot of facsimiles for a thetan and throw them away, he becomes very unhappy unless you have him reconstruct those facsimiles or remedy the mass he has lost accordingly. When you are having a thetan go into and out of MEST universe masses, a certain amount of energy is burned up, and after the thetan has been run for a short time on this step (R1—9 in *The Creation of Human Ability*), *you* must be particularly careful to remedy his havingness with eight masses shoved into himself and eight masses thrown away several times. A thetan who has been run a great deal without Remedy of Havingness comes to what is to him a horrible thought: “I am just a concept,” and will sag in tone. He does not come to this state as long as havingness is consistently remedied.

It may be, as one looks at Scientology, that one has come to the opinion, watching Remedy of Havingness work, that all there is to anything is the Remedy of Havingness, that it is all based on the Remedy of Havingness. If one has a preclear shove enough havingness into his body he will exteriorize in most cases. If one

remedies enough havingness while the thetan is chasing around the universe, as in the Grand Tour, the thetan will discover and as-is a great many communication lines which otherwise might be very detrimental. However, it is not true that havingness is the entire key to the human mind. Havingness is the “gimmick” or “weenie” for which the game is played, and having something is very much like winning.

Above havingness there is doingness, and above doingness there is beingness, and above beingness there is communicatingness, and above communicatingness there is knowingness, and above knowingness there is postulatingness, and so we see we have a long way to go above havingness in order to get to the top activity of a thetan, which is making postulates, or unmaking them.

One could, of course, rationalize each and every action of the thetan with regard to havingness. One could even extend havingness to space, although it normally refers to objects. One could do all manner of interesting things with havingness. One could get as specific and as significant as one likes, or as un-significant as one likes, and still find Remedy of Havingness working, but we do not have here in Remedy of Havingness the total clue, the total key. But we do have a process and an item which must not be overlooked in auditing.

In the Six Basic Processes the Remedy of Havingness comes after the Opening Procedure by Duplication as a process, itself, but remember that Remedy of Havingness is done and can be done at any time during any of the processes as long as the preclear is even vaguely in communication with the auditor. It does not matter how vague the mass is that the preclear is using to remedy his havingness. Here is a place where certainty is not necessary. An unreal, vague, or flimsy mass, if this is all the preclear can get, will still remedy his havingness.

A case comes to mind out of the Advanced Clinical Course where a student was unwilling, after his second day, to continue his studies. He did not believe that he could stand the “hammer and pound,” as he put it, of the terrifically intense schedule. I took him into my office, asked him what he was doing in life, and he replied to me that he was a machinist. Also, it seemed to turn out that he had had something to do with a ship which had sunk under him, although his recollection of this was very unclear. I asked him what kind of a machine he had customarily run, and he told me. Then I had him mock up this machine, and remedy his havingness with it. Then I had him mock up the ship and remedy his havingness with that, just as given above. I did this for about fifteen minutes, and enough change occurred in his case to entirely return his confidence in his ability to stand up to the course and to audit. Yet the mock-ups he was getting were so thin that he could barely vaguely discern them at all.

Mock-ups get unreal because the thetan is not-ising existence. He is trying to destroy masses by saying that they do not exist, that they are not real. He is so bent upon this system of destruction that he is making everything unreal or black. One of the cures for this is End of Cycle Processing run in the following fashion:

One has the preclear mock himself up dead (no matter how unreal this mock-up is), then have the mock-up waste away to bone, and have the bones waste away to dust, and then have the preclear shove the dust into himself or, alternately, throw it away. One once more has the preclear mock himself up dead, have the mock-up waste away to bone, have the bones waste away to dust, and then have the preclear remedy his havingness with the dust. One continues this for two or three hours with the preclear if one really wishes the case to make a change. Where a preclear is getting no reality on mock-ups or blackness, he is most commonly stuck in that ParaScientological thing, that thing horribly abhorred by psychologists who have become Dianeticists, or by people who are just plain scared: a past death. If you wanted to convince somebody that past deaths exist, you would run End of Cycle Processing on them. This is a cousin process to the Remedy of Havingness. One could go a very long distance with this process and have the preclear mock up his mother dead, have her waste away to bones, and remedy havingness with the dust, or do this with the dust, or do this with the father or brothers, or grandparents, with a considerable change in the case.

This End of Cycle Processing, by the way, is a very fine process. It has been with us about a year and it has been successful whenever used. It has a tendency to fall into disuse because it has not until now had an exact place on the Six Basic Processes. But End of Cycle is actually an additional process to the Remedy of Havingness and is an effective way of remedying havingness. Do you remember in the old days the Dianetics “corpse case” who would lie upon the couch with his arms crossed neatly, all ready for a lily, and would always audit in this fashion? The solution to this corpse case is End of Cycle Processing, as given here. The preclear is so fixed in a death that he is trying to make everything unreal, and the only real thing, to him, would be the unreality of death.

### EXPANDED GITA

(Previously issued in the *Journal of Scientology*,  
Issue 16-G, published by Hubbard Association of  
Scientologists, Philadelphia, June 1953)

(This is an extension of Give and Take processing.) Test preclear to see if he can get a mock-up he can see, no matter how vague. Then have him WASTE, ACCEPT UNDER DURESS, DESIRE and finally Be Able to *take* or *leave alone* each of the items listed below. He does this with mock-ups or ideas. He must do the sequence of *waste—etc.* in the order given here for each item. He wastes it by having it at remote distances in places where it will do no good, being used or done or observed by something which cannot appreciate it. When he is able to waste it in vast quantities the auditor then has him accept it in mock-up form until he no longer is antagonistic to having to accept it even when it is unpleasant and great force is applied to make him take it. Again, with mock-ups, he must be able to bring himself to desire it even in its worst form; then, by mock-ups of it in its most desirable form he must come to be able to leave it entirely alone or take it in its worst form without caring. EXPANDED GITA remedies contra-survival abundance and scarcity. It will be found that before one can accept a very scarce (to him) thing, he has to give it away. A person with a milk allergy must be able to give away, in mock-up, enormous quantities of milk, wasting it, before he can accept any himself. The items in this list are compounded of several years of isolating what factors were more important to minds than others. The list lacks very few of the very important items, if any. Additions to or subtractions from this list should not be attempted. *Viewpoint*, *Work* and *Pain* should be heavily and often stressed and given priority.

*Waste, Have Forced Upon, Desire, Be Able to Give or Take*, in that order, each of the following: (Order of items here is random.) *Viewpoint, Work, Pain, Beauty, Motion, Engrams, Ugliness, Logic, Pictures, Confinement, Money, Parents, Blackness, Police, Light, Explosions, Bodies, Degradation, Male Bodies, Female Bodies, Babies, Children Male, Children Female, Strange and Peculiar Bodies, Dead Bodies, Affinity (Love), Agreement, Beautiful Bodies, People, Attention, Admiration, Force, Energy, Lightning, Unconsciousness, Problems, Antagonism, Reverence, Fear, Objects, Time, Eating Human Bodies, Sound, Grief, Beautiful Sadness, Hidden Influences, Hidden Communications, Doubts, Faces, Dimension Points, Anger, Apathy, Ideas, Enthusiasm, Disagreement, Hate, Sex, Reward, Eating Parents, Eaten by Mother, Eaten by Father, Eating Men, Eaten by Men, Eating Women, Eaten by Women, Start, Broken Communications, Written Communications, Stillness, Exhaustion, Women Stopping Motion, Men Stopping Motion, Changing Motion Women, Changing Motion Men, Changing Motion Babies, Changing Motion Children, Starting Motion Men, Starting Motion Women, Starting Motion Children, Starting Motion Objects, Starting Motion Self, Omens, Wickedness, Forgiveness, Play, Games, Sound, Machinery, Touch, Traffic, Stolen Goods, Stolen Pictures, Homes, Blasphemy, Caves, Medicine, Glass, Mirrors, Pride, Musical Instruments, Dirty Words, Space, Wild Animals, Pets, Birds, Air, Water, Food, Milk, Garbage, Gases, Excreta, Rooms, Beds, Punishment, Boredom, Confusion, Soldiers, Executioners, Doctors, Judges, Psychiatrists, Alcoholic Liquor, Drugs, Masturbation, Rewards, Heat, Cold, Forbidden Things, God, The Devil, Spirits, Bacteria, Glory, Dependence, Responsibility, Wrongness, Rightness, Insanity, Sanity, Faith, Christ, Death, Rank, Poverty, Maps, Irresponsibility, Greetings, Farewells, Credit, Loneliness, Jewels, Teeth, Genitalia, Complications, Help, Pretense, Truth, Lies, Assurance, Contempt, Predictability, Unpredictability, Vacuums, White Clouds, Black Clouds, Unattainables, Hidden Things, Worry, Revenge, Textbooks, Kisses, The Past, The Future, The*

*Present, Arms, Stomachs, Bowels, Mouths, Cigarettes, Smoke, Urine, Vomit, Convulsions, Saliva, Flowers, Semen, Blackboards, Fireworks, Toys, Vehicles, Dolls, Audiences, Doors, Walls, Weapons, Blood, Ambitions, Illusions, Betrayal, Ridicule, Hope, Happiness, Mothers, Fathers, Grandparents, Suns, Planets, Moons, Sensation, Looking, Incidents, Waiting, Silence, Talking, Knowing, Not Knowing, Doubts, Fac One, Remembering, Forgetting, Auditing, Minds, Fame, Power, Accidents, Illnesses, Approval, Tiredness, Faces, Acting, Drama, Costumes, Sleep, Holding Things Apart, Holding Things Together, Destroying Things, Sending Things Away, Making Things Go Fast, Making Things Appear, Making Things Vanish, Convictions, Stability, Changing People, Silent Men, Silent Women, Silent Children, Symbols of Weakness, Symbols of Force, Disabilities, Education, Languages, Bestiality, Homosexuality, Invisible Bodies, Invisible Acts, Invisible Scenes, Accepting Things Back, Games, Rules, Players, Restimulation, Sexual Restimulation, Space Reduction, Size Reduction, Entertainment, Cheerfulness, Freedom for Others to Talk, Act, Feel Pain, Be Sad, Thetans, Personalities, Cruelty, Organizations. TRY FIRST: Healthy Bodies, Strong Bodies, Good Perception, Good Recall.*

WARNING: Should your preclear become unstable or upset doing this process take him to STEP VI. Then return to this list.

COMMENT: The mind is sufficiently complicated that it can be expected to have computations on almost all the above. Thus there is no single clearing button and search for it is at the dictate of a circuit, the mechanism of circuits being to search for something hidden. Thus, your preclear may begin to compute and philosophize and seek to find the “button” that will release all this. All this releases all the buttons so tell him to relax and go on with the process every time he starts to compute.

NOTE: Running the above will bring to the surface without further attention the “computation on the case” and the service facsimile. Do not audit these. Run EXPANDED GITA.

STEP V — PRESENT TIME DIFFERENTIATION. EXTERIORIZATION BY SCENERY. Have preclear, with his body’s eyes, study and see the difference between similar real objects such as the two legs of a chair, the spaces between the back, two cigarettes, two trees, two girls. He must see and study the objects. It is not enough to remember the objects. The definition of a CASE V is “no mock-ups, only blackness.” Have him continue this process until he is alert. Use liberally and often.

Then exteriorize by having the preclear close his eyes and move actual places on Earth under him, preferably places he has not been. Have him bring these up to him. Find two similar things in the scene and observe the difference between them. Move him over oceans and cities until he is certain that he is exteriorized.

Then, preferably while exteriorized, have him do STEP I.

This case has to know before he can be. His viewpoint is in the past. Give him present time viewpoints until he is a STEP I by the methods given for STEP V.

(COMMENT: PRESENT TIME DIFFERENTIATION is a very good general technique and resolves chronic somatics and improves tone.)

Assume other people’s viewpoints as a drill—not what they think about things, but as they look at things in the material universe. Attempt to be in the location of a leaf, blade of grass, car headlamp, etc., and view the universe.

STEP VI—A-R-C STRAIGHT WIRE using next-to-last list of *Self Analysis in Scientology* which asks preclear to recall something really real to him, etc. Then use the lists in *Self Analysis*. This level is the neurotic. It is identified by the preclear having mockups which will not persist or which won’t go away. Use also PRESENT TIME DIFFERENTIATION. Then go to STEP IV. At any drop in tone, return case to STEP VI.

STEP VII—PSYCHOTIC CASES. (Whether in or out of body.) The psychotic appears to be in such desperate straits that the auditor often errs in thinking desperate measures are necessary. Use the lightest possible methods. Give case space and freedom where possible. Have psychotic *imitate* (not mock up) various things. Have him do PRESENT TIME DIFFERENTIATION. Get him to tell the difference between things by actual touch. Have him locate, differentiate and touch things that are really real to him (real objects or items). If inaccessible, mimic him with own body, whatever he does, until he comes into communication. Have him locate corners of the room and hold them without thinking. As soon as his communication is up go to STEP VI, but be very sure he changes any mock-up around until he knows it is a mock-up, that it exists, and that he himself made it. Do not run engrams. He is psychotic because viewpoints in present time are so scarce that he has gone into the past for viewpoints which at least he knew existed. By PRESENT TIME DIFFERENTIATION, by tactile on objects, restore his idea of an abundance of viewpoint in present time. If he has been given electric shock, do not process it or any other brutality. Work him for very brief periods, for his attention span is short. *Always* work psychotics with another auditor or a companion present.

*NOTE: All steps for all cases. If in doubt as to condition of case, test with STEP VI.*

NOTE: An operating thetan must also be able to manufacture particles of admiration and force in abundance.

## THE IMPORTANCE OF HAVINGNESS

(Previously issued as PAB No. 72, 21 February 1956)

A careful study of staff auditors' reports reveals that the only advances worthy of the name of Scientology occur when the auditor repairs or remedies havingness on the preclear. Without the repair and remedy of havingness no real gains become apparent. A preclear will not progress when his havingness is impaired.

What are the symptoms of loss of havingness? Running any as-ising techniques the preclear may become anaten, slightly nervous, agitated, want a cigarette, or seem to break out of the session in some fashion. In either case, he is "down on havingness." In other words he has burned up, used up, or as-ised, too much of his physical body energy in the auditing itself. In view of the fact that every subjective technique puts a sort of hole in the middle of the electronic mass surrounding a preclear, parts of that mass then begin to cave in on the preclear. Thus running an as-ising technique on a preclear beyond the ability of the preclear to sustain the consequent loss of havingness will bring on in the preclear many new engrams which he did not have before. A technique which as-ises energy, if used without a repair or remedy of havingness, will bring about a worsening of the case of a preclear.

Now exactly what is happening is very simple. A preclear starts to go anaten and the auditor keeps on running the process. He hasn't realized that he ought to interrupt a process at any time if the preclear demonstrates a loss of havingness. Anaten is such a demonstration of loss of havingness. All right, another example: the preclear becomes agitated or upset; he reaches for a cigarette; he begins to twitch; his foot begins to wobble; he begins to talk excitedly; he begins to cough while being audited. All of these things demonstrate a loss of havingness. These same conditions, by the way, can result from the preclear believing that the auditor has broken the Auditor's Code in some fashion or has overcome his power of choice. Both a repair and remedy of havingness are immediately indicated on the observation of anaten or agitation on the part of the preclear. In addition the auditor should carefully go over the session itself to find out, if anywhere, the preclear believed his power of choice was being overcome, or if the preclear believed the Auditor's Code had been broken. You understand that the auditor didn't necessarily have to overcome the preclear's power of choice or break the Auditor's Code in order that the preclear should believe that this has happened. However, this could be overlooked entirely if the auditor had been careful enough to repair or remedy the havingness of the preclear.

The slightest drop of alertness on the part of the preclear, or the slightest agitation or somatic, should immediately indicate to the auditor that havingness has dropped and must be immediately repaired or remedied. A great deal of time can be spent on the subject of repair and remedy of havingness, and it is time spent with great benefit. It is better to "waste" time spent repairing and remedying havingness than to blunder on through. Now there is another thing I have noticed with regard to this. Auditors are running these days toward cognition. Very well, if they expect a preclear to cognite they should not expect him to pull in a bank upon himself. If an auditor runs a very obvious process which should bring the preclear toward cognition, runs it several auditing commands and then stops and repairs and remedies the preclear's havingness, and then after that asks him the same auditing question two more times, he will discover that he has blown a cognition into view. In other words you could remedy the havingness of a preclear while his mind was on one particular subject and bring a cognition into existence.

This becomes particularly important today, since a few months ago I discovered that you could remedy the havingness of anybody, and I mean just that!! You can remedy anybody's havingness and you can turn on mock-ups on anybody. The fact that the preclear who has a black field can be caused to mock up blacknesses or invisibilities and shove them into his body brings us into an era of being able to make anybody turn on mock-ups. Getting the preclear to postulate that the mocked up blackness is bad for the body will cause that blackness to snap into the body. By getting the preclear to postulate that the invisible mass he has mocked up is bad for the body it will snap into the body. Of course, after this has been done a few times, the consideration of the preclear will change. Then perhaps the blackness or invisibility will only snap in when the preclear postulates that it is good for the body. He may also have a residue left. It is very important to get rid of these repair and remedy of havingness residues. By various postulates such as that the residue is a threat to the body, it is good for the body, it is bad for the body, the residue too will snap in.

Let's differentiate at once here the difference between a repair of havingness and a remedy of havingness. We used to call repair of havingness "giving him some havingness." It needs a better technical term. Therefore let us call this "Repair of Havingness." It means having the preclear mock up anything he can mock up, and in any way it can be done get him to shove (never pull) that mock-up into the body, and by similar means to get rid of the residue which went along with the mock-up. That is a repair of havingness. *It is a one-way flow; it is an inflow.*

Now a remedy of havingness is getting him to mock up and shove into the body enough masses to bring him to a point where he can eventually throw one away. In other words repair of havingness is simply having him mock up things and having him shove them into the body, and a remedy of havingness is having him mock up and shove in *and* throw away the same type of mock-up. Remedy of havingness is always a superior operation to a repair of havingness. Repair of havingness is a very crude stop-gap, but can be used any time. However, a preclear who is working well, and on whom havingness can be remedied, should, at all times, have his havingness remedied, not repaired. In other words any type of mock-up should be both shoved into the body and mocked up and thrown away. This should be done in considerable quantity until the preclear is quite relaxed about that particular type of mock-up. One does this, remember, every time the attention of the preclear drops, or he becomes agitated.

There is one other little point connected with this which is quite important, and that is, auditors very often audit a preclear into an area of time when the preclear exteriorized. This, on a preclear who does not exteriorize easily, brings on a considerable grief and sadness. The way to get rid of this is, of course, to remedy the preclear's havingness or only repair it, and to ask the preclear to *recall times when he was not exteriorized*. This will bring up at once times when he did exteriorize and where fear of exteriorization was built up considerably.

I have noticed another special condition regarding this exteriorization phenomena which is quite important. A preclear will occasionally repair and remedy havingness up to a point where the body disappears for him. He doesn't quite know where to put the mass he has mocked up since he cannot find the body. This is particularly true of preclears who have a very low threshold on havingness. An auditor would be stupid indeed to simply plow along beyond that point where the preclear has already said that he couldn't find any body to push any havingness into. The moment the preclear does that the auditor should suspect that the preclear has gotten into an exteriorization type incident. It is not, however, necessary that he immediately flounder around and try to find this incident as recommended in the paragraphs just above. He can also repair and remedy havingness in this fashion, and it is very important to know this. Although it is disastrous for a preclear to be asked "What could your body have?" since he will simply strip the bank of various old facsimiles, it is a very, very good repair of havingness to ask a preclear "*What is there around this room (area) which your body could have?*" and then have him pick out specific objects in the environment which he says the body could have. If he does this he will come up the gradient scale of havingness, and his havingness will be repaired immediately or directly on the Sixth Dynamic. With a preclear who cannot get mock-ups and where the auditor has either

been too clumsy to get the preclear's mock-ups turned on or it really was impossible, more or less, the preclear's havingness can be repaired by having him do this process. So this is a very, very important process, and one that ought to go down in red letters.

This whole subject of repair and remedy of havingness and its effect upon auditing, and the fact that it has not been stressed at all in training, being up there at Level Six in the old Basic Processes, brings us to SLP Issue 8. The entirety of Level One in SLP 8 will be devoted to the repair and remedy of havingness.

In SLP Issue 7 we have a great many phenomena associated with the remedy of the body's havingness. The reason for their position is to bring about an adjustment of the condition of the body before one goes on to other and more complicated ways of processing. Now, in Issue 8, all of these various things will be retained, but they will be paralleled with a complete remedy of havingness and that particular level of SLP will be gone over. In actual experience it is better to remedy the havingness of a preclear, no matter where he is on the tone scale, and no matter by what process, than to run any significant process. Further, if a preclear cannot at least repair his havingness, to run Waterloo Station is to invite disaster, because in this particular process of Level 2 he is liable to get himself into a "down havingness" situation and of course will not be able to not-know anything. He may be chewing up too much energy while trying to not-know. Thus we would have the failures which have occasionally occurred in Waterloo Station. They were simply havingness failures, not a failure of Waterloo Station. Further there has been a new command suggested for Waterloo Station: "*What would you be willing to not-know about that person?*" This seems to be a better command, at least for the British Isles.

We also take care of the vacuums and separatenesses and everything else with repair or remedy of havingness and running it in with certain other things, such as problems, etc. When we discover by two-way communication a weak universe, we could then ask the individual preclear, "*Invent a problem that person (weak universe) could be to you.*" Then, watching him very carefully, and repairing his havingness on the subject of that person's possessions, get a very rapid separation of universes. I have noticed that the weak universe came about when the person elected by the preclear to be a weak universe first began to put mest anchor points around the preclear. In other words, valuable presents.

I am as pleased as can be to get a finger on this point and I know well that if East, West, North and South would begin to repair and remedy havingness and stop specializing in significances without repair or remedy of havingness, we are going to start shooting people up to the top of these Scientometric graphs. We can't help it.

Let me call your attention specifically to the old phenomena of the emotional scale and the engram. We found out that when one engram was keyed in, it fixed the emotional tone of the individual. Then we had him run this and as he converted the engram to usable havingness, we found that his tone rose. We discover on these Scientometric charts that the "unhappy" section does not move if we don't change the mass of the preclear.

## SACRIFICES

The latest news from the research front has to do with the fact that the GE demands and requires and has to have, evidently, sacrifices. The GE does not run on an overt act-motivator sequence, which makes one suspect he is not a thetan. A GE runs exclusively on being sacrificed to. If you have the preclear mock up sacrifices to the GE, you will find these become very readily assimilated.

On a lower level the body accepts motivators; as soon as it is through this motivator band, it accepts sacrifices and finally comes up to a point where it will accept live bodies. When one considers that eating is entirely a matter of absorbing death, one sees this death hunger in processing by running Sacrifices. A person who has had bad legs should have a sacrifice of legs run on him and so forth. This is astonishing material. It is almost unbelievable that the GE will not be sacrificed to anything, but will

only be sacrificed to, and this phenomenon that the GE is thereby demanding death tells us at once that the atomic bomb will be used and that there are people in the world who will actually crave this sacrifice of cities and even nations.

Aside from being a fantastically workable process, more of which anon, this matter of sacrifices tells us at once a great deal about the future. There will be no moral restraint where the atomic bomb is concerned. For about the highest level in some areas of the world, as to case, is “operating GE.” This tells us, too, why soldiers will go to war. This explains a great deal of conduct.

The GE evidently operates on the postulate that as long as anything else is alive it can't live. However, it is becoming more and more doubtful that there is any more life in the body than the thetan puts there, and that the body is a single machine operating on some implanted postulates contained in the energy masses which are activated by the thetan somewhat on the order of the old “pole” theta trap. Many of these considerations can be changed around rather easily. Nothing changes them quite so fast as these sacrifice processes.

In mocking up sacrifices the auditor should use all the skills of creative processing and ensure that the preclear is actually mocking up and is not dragging in old facsimiles from the bank and restimulating genetic line incidents. This can be obviated by having the persons in the mock-ups dressed in modern clothing; mocking up the incident as happening tomorrow; altering the mock-up in some manner, such as turning the face green or something of this nature. Any reasonable way in which you can ensure that you are dealing with mock-ups and not past track facsimiles.

This gives auditors another tool with which to handle chronic somatics.

There is another process which has a great deal of workability with chronic somatics. I know that some months ago and earlier than that it seemed rather fatal to us to continue to fixate the preclear's attention on the chronic somatic. But that is not a problem with us right now. It ceased to be a problem the moment I invented an auditing command exactly as follows: “*Invent a problem that (leg, arm, nose, eye, body) could be to you.*” Running this command, which is in itself a sort of remedy of havingness, and repairing and remedying the havingness of the preclear as we go, we will discover that practically any and all phenomena associated with the service facsimile will come away and clear up, and the limb, nose or eye will get well. This can be used as a word of warning: **ONLY ON ACTUAL TERMINALS.** Never use this command, and I mean **NEVER**, on actual conditions. Never ask him to invent problems lameness could be to him. Never ask him what problem blindness could be to him. Lameness and blindness are conditions. We want to know what problems *legs* or *eyes* can be to him, since legs and eyes are terminals. In running this command we reduce havingness too rapidly whenever we are stressing conditions. Therefore we run it only on terminals. In running it use only terminals. Handled in this way we do have the answer as of this moment, to chronic somatics. With these processes in SLP and the adequate repair and remedy of havingness we can push our preclears right up through the top.

### ROBOTISM

(Reference HCOB 28 Nov 1970, C/S Series 22,  
"Psychosis" . )

A technical advance has been made in relation to the inactivity, slowness or incompetence of human beings.

This discovery proceeds from a two and a half year intense study of aberration as it affects the ability to function as a group member.

The ideal group member is capable of working causatively in full cooperation with his fellows in the achievement of group goals and the realization of his own happiness.

The *primary* human failing is an inability to function as himself or contribute to group achievements.

Wars, political upsets, organizational duress, growing crime rates, increasingly heavy "justice", growing demands for excessive welfare, economic failure and other age long and repeating conditions find a common denominator in the inability of human beings to coordinate.

The current political answer, in vogue in this century and growing, is totalitarianism where the state orders the whole life of the individual. The production figures of such states are very low and their crimes against the individual are numerous.

A discovery therefore of what this factor is, that makes the humanoid the victim of oppression, would be a valuable one.

The opening lines of *Dianetics: The Modern Science of Mental Health* comment on Man's lack of an answer for himself.

The group needs such an answer in order to survive and for its individual members to be happy.

### SCALE

### NEEDING ORDERS

The exact mechanism of needing orders is to be found as an outgrowth of the mental condition outlined in HCOB 28 Nov 1970, "Psychosis".

The individual with an evil purpose has to withhold himself because he may do destructive things.

When he fails to withhold himself he commits overt acts on his fellows or other dynamics and occasionally loses control and does so.

This of course makes him quite inactive.

To overcome this he refuses any responsibility for his own actions.

Any motion he makes must be on the responsibility of others.

He operates then only when given orders.

Thus he *must* have orders to operate.

Therefore one could term such a person a *robot*. And the malady could be called *robotism*.

#### PERCEPTION

Studies of perception undertaken since HCOB 28 Nov 70 reveal that sight, hearing and other channels of awareness *decrease* in proportion to the number of overt acts—and therefore withholds—which the person has committed on the whole track.

By relieving these sight has been remarkably brightened.

Therefore a person who is withholding himself from committing overt acts because of his own undesired purposes has very poor perception.

He does not *see* the environment around him.

Thus, combined with his unwillingness to act on his own initiative, there is a blindness to the environment.

#### OVERT PRODUCTS

(see P/L 14 Nov 70, Org Series 14)

Since he does not act upon orders he is taking responsibility for, he executes orders without fully understanding them.

Further he executes them in an environment he does not see.

Thus when forced to produce he will produce overt products. These are called so because they are not in actual fact useful products but something no one wants and are overt acts in themselves—such as inedible biscuits or a “repair” that is just further breakage.

#### SLOWNESS

The person is slow because he is moving on other-determinism, is carefully withholding himself and cannot see anyway.

Thus he feels lost, confused or unsafe and cannot move positively.

Because he produces overt products he gets slapped around or goes unthanked and so begins a decline.

He cannot move swiftly and if he does has accidents. So he teaches himself to be careful and cautious.

#### JUSTICE

Group justice is of some use but all it really does is make the person withhold himself even harder and while a necessary restraint, nevertheless does not itself bring a lasting improvement.

Threats and “heads on a pike” (meaning examples of discipline) do however jar the person into giving his attention and channeling his actions into a more desirable path from the group viewpoint.

Justice is necessary in a society of such people but it is not a remedy for improvement.

#### MALICE

Despite the viciousness of the truly insane, there is little or no real malice in the robot.

The truly insane cannot control or withhold their evil purposes and dramatize them at least covertly.

The insane are not always visible. But they are visible enough. And they *are* malicious.

The robot on the other hand does control his evil impulses to a great extent.

He is not malicious.

His danger mainly stems from the incompetent things he does, the time of others he consumes, the waste of time and material and the brakes he puts on the general group endeavor.

He does not do all these things intentionally. He does not really know he is doing them.

He looks in wounded surprise at the wrath he generates when he breaks things, wrecks programs and gets in the way. He does not know he is doing these things. For he cannot see that he is. He may go along for some time doing (slowly wasteful) well and then carelessly smashes the exact thing that wrecks the whole activity.

People suppose he cunningly intended to do so. He seldom does.

He winds up even more convinced he can't be trusted and that he should withhold harder!

#### FALSE REPORTS

The robot gives many false reports. Unable to *see*, how can he know what is true?

He seeks to fend off wrath and attract good will by "PR" (public relations boasts) without realizing he is giving false reports.

#### MORALE

The robot goes into morale declines easily. Since production is the basis of morale, and since he does not really produce much, left to his own devices, his morale sags heavily.

#### PHYSICAL INERTIA

The body is a physical object. It is not the being himself.

As a body has mass it tends to remain motionless unless moved and tends to keep going in a certain direction unless steered.

As he is not really running his body, the robot has to be moved when not moving or diverted if moving on a wrong course.

Thus anyone with one or more of such beings around him tends to get exhausted with shoving them into motion or halting them when they go wrong.

Exhaustion only occurs when one does not understand the robot.

It is the exasperation that exhausts one.

With understanding one is not exasperated because he *can* handle the situation. But only if he knows what it is.

#### PTS

Potential Trouble Sources are not necessarily robots.

A PTS person generally is withholding himself from a Suppressive Person or group or thing.

Toward that SP person or group or thing he is a robot! He takes orders from them if only in opposites.

His overts on the SP person make him blind and non-self-determined.

### BASIC WHY

The basic reason behind persons who cannot function, are slow or inactive or incompetent and who do not produce is

WITHHOLDING SELF FROM DOING DESTRUCTIVE THINGS, AND THUS UNWILLING TO TAKE RESPONSIBILITY AND THEREFORE NEEDING ORDERS.

The exact wording of this WHY must be done by the individual himself after examining and grasping this principle.

If one writes this principle down on the top of a sheet and then asks the person to word it exactly as it applies to himself one will attain the individual why for inaction and incompetence. It will produce GIs and F/N at the Examiner.

### PROCESSING

Physical work in the physical universe, general confronting, reach and withdraw; and Objective Processes go far in remedying this condition.

Touch assists regularly and correctly given to proper End Phenomena will handle illnesses of such persons.

Word Clearing is vital tech to open the person's comm lines, wipe out earlier misunderstandings and increase his understanding.

PTS tech will handle the person's robotism toward SP individuals, groups or things. To this and the PTS Rundown can be added the WHY above as it relates to the things or beings found as suppressive as a last step.

The why above can be used in Danger Formula work such as HCO P/L 9 April 72, Correct Danger Formula, and HCO P/L 3 May 72, "Ethics and Executives". Other individual whys can exist in these instances.

### EXPANDED DIANETICS

The miracle of well done perfectly executed Expanded Dianetics eradicates both insanity and robotism. Drug handling and other actions may be necessary.

### END PRODUCT

The end product when one has fully handled robotism is not a person who cannot follow orders or who operates solely on his own.

Totalitarian states fear any relief of the condition as they foolishly actively promote and hope for such beings. But this is only a deficiency in their own causes and their lack of experience with fully self-determined beings. Yet education, advertising and amusements have been designed only for robots. Even religions existed to suppress "Man's Evil Nature".

Lacking any examples or understanding many have feared to free the robot to his own control and think even with horror on it.

But you see, beings are NOT basically robots. They are miserable when they are.

Basically they prosper only when they are self-determined and can be pandetermined to help in the prosperity of all.

Add items dealing with this specific Pc's life.

\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_

3. Ask the Question, "Is there any word on this list you didn't understand?" Clear it. Then do Step 5 on it before going on. (Do not reassess this list because there was a list word not understood.)

4. Take the remaining reading items from the best read on down and with E/S pull each one to F/N. Get each word you find to F/N. There can be many F/Ns per subject End off with a win on the subject.

5. "In the subject of \_\_\_\_\_ what word has been misunderstood?"

He MUST look them up, so have a good dictionary handy. Do not accept "I know the meaning" if the subject or word reads. CLEAR "GRAMMAR" or grammatical words out of a simple book of grammar, not a dictionary.

It isn't an earlier time he misunderstood that word. It's an earlier word in that subject and it can be an earlier subject.

Considerations about it and other questions are not touched.

Overts, W/Hs, etc are neglected. They are not done on the subject of the word. They are done in the session ruds.

Just do the process and it will eventually F/N on each chain.

6. When all reads on the first assessment are handled to F/N, REASSESS the whole list. Do not take off the list items already handled.

7. Repeat Step 4.

8. Repeat Step 5.

9. Repeat Step 6, etc.

10. IN CASE OF ANY BOG OR SOMATIC USE THE WORD CLEARING CORRECTION LIST TO CORRECT THE BOG.

11. A persistent F/N should be attained on assessing the whole list as the End Phenomena of the Word Clearing sessions.

WHAT IT IS

The Primary Correction Rundown is a rundown given

- (a) To a person who fails the Primary Rundown because of High or Low TA or Study Troubles.
- (b) To every Course Supervisor regardless of his TA.
- (c) To persons whose literacy level is not adequate to do the Primary Rundown.
- (d) To persons on drugs or who have been on drugs.
- (e) To auditors who go too often to Cramming.
- (f) Auditors whose auditing errors show up later on pcs.
- (g) Staff members who are not able to maintain stats.
- (h) Staff members who get into Ethics trouble.
- (i) Students with low study stats.
- (j) Blown students.
- (k) Members of the public who wish to purchase a "Study Rundown" but who are not going to be auditors and who are not on major Courses (HSDC, Academy Class IV, or above).

The Rundown consists of Ethics orientation on the first dynamic, Potential Trouble Source from connections with hostile elements, drug handling, case handling, the why of not using Study Tech or study, the Study Correction List and handling, Method 7, a review of Grammar, and then back to a Primary RD consisting of Method I Word Clearing, Method 8 on Study Tapes and Student Hat.

The Primary Correction Rundown is actually a checklist where each one of these is done.

This checklist is kept in his pc folder on the inside of the left front cover and marked off.

Student's Name	Date Begun	Org
1.	C/S 53RC (HCO B 31 Dec 71 Revised to 16 May 72). Assess and Handle fully. DECLARED AT EXAMINER.	
2.	HCO PL 3 May 72 with 2 lists Listing & Nulling on steps 3 and 4 of the PL. By an auditor. May require the repair of past Whys found by C/S 78. DECLARED AT EXAMINER.	
3.	PTS Check by Auditor. Is he connected to anyone hostile to Dianetics or Scientology? Handle by PL 5 Apr 72. (It isn't necessary he leave to handle. A letter will do.) More extensive action can be done later when he gets a full PTS RD. Such persons can also be run as a Problem. DECLARED AT EXAMINER.	
4.	Drug Handling. HCO B 25 Oct 71, The Special Drug Rundown. DECLARED AT EXAMINER.	
5.	Case Handling. Pgm by C/S to cover obvious outnesses, GF Method 5, GF 40XR and other actions needful. (If chronically ill or has a psychotic history should be run on Expanded Dianetics if available, if not by objective processes and Dianetics.) (Can also be run on Triple or Expanded Grades.) DECLARED AT EXAMINER.	
6.	The Why of not Studying if never studied before in an org or not using Study Tech. Done as a BD F/N Item. DECLARED AT EXAMINER.	
7.	The Study Correction List HCO B 4 Feb 72. Assess Method 5 with good TRs, good Impingement, good metering. Handle in full. If PTS shows up again do full PTS RD. Handle to a full F/Ning list on final assessment. DECLARED AT EXAMINER.	
8.	Method 7 HCO B 21 June 72 Issue III. Done by a Word Clearer. DECLARED AT EXAMINER.	
9.	Review of Grammar by a Word Clearer M4 with student studying between checks by himself and reporting daily. Use a simple grammar such as that developed for foreign language students. Do not use an American dictionary and an English Grammar or vice versa, either both American or both English. Must check out clean on Method 4 and know about grammar. DECLARED AT EXAMINER.	
10.	Method 1 Word Clearing HCO B 30 June 71 Revised to 11 May 72, Word Clearing Series 8RB. All the misunderstood background words of all words on the list must be cleared. The list must F/N. DECLARED AT EXAMINER.	
11.	Method 8, HCO B 21 June 72 Issue IV, Study Tapes. DECLARED AT EXAMINER.	
12.	Method 8, Student Hat. DECLARED AT EXAMINER.	

WITH A FINAL CHECKOUT AT EXAMINER THE PERSON MAY BE DECLARED SUPER-LITERATE.

This is the whole of the Primary Correction Rundown.

	HCO PL 19 Mar 72 Issue III	Word Clearing Series 34 HIGH CRIME POLICY AND WORD CLEARING
	HCO B 3 Apr 72	Study Series 6 PRIMARY RUNDOWN NOTE

To know about the importance of the Primary Rundown read LRH ED 178 Int.

The Primary Rundown consists of word clearing and Study Tech. It makes a student SUPER-LITERATE.

The Primary Rundown is given in the TECH DIVISION (Div IV, Dept 11).

(The TECH DIV may also give that portion of the Primary *Correction* Rundown which calls for Method 1 and Method 8 of the Primary Correction Rundown which is described in HCO B 30 March 72 Revised 30 May 72.)

**SIMPLICITY**

The Primary Rundown is very simple in its steps. Do NOT add things onto it. Do not do something else.

**HONESTY**

The keynote of the Rundown is Honesty. The whole rundown can be wasted and the student fail and the End Phenomena missed if the student goes dishonest or he is just pushed for student points by the Supervisor.

If done dishonestly the whole future study career of the student will be not only more difficult but may fail entirely.

Honesty means don't skip, don't brush it off, don't say it was done when it wasn't.

Later checks of auditing or administrative failures contain checks of the Primary Rundown errors and honesty. The whole rundown would have to be done again.

#### STEPS

1. Verify if student's Tone Arm on a meter is usually between position 2 and 3. If so he may proceed. If not he at once is sent to the Primary *Correction* Rundown as his case needs repair or handling before he can do the Rundown as mental mass will get in his way and he may get upset. This step is checked by the Supervisor.

(The Primary Correction Rundown is covered by HCO B 30 March 72 REVISED 30 May 72. It consists of auditing and study correction actions.)

2. If the Tone Arm is usually between 2 and 3 on the meter dial the person is made into a Word Clear using Method 1 Word Clearing. (HCO B 30 June 71 Revised Issue II, Revised 9 Aug 71, Revised 11 May 72, WORD CLEARING SERIES 8RB.) This is done in the HGC or Dept 13 of Qual or may be done in a student Co-Audit. Failure to do this step or do it well will make Study Tech difficult. A good job on this Method One will give back a person's education and send his Intelligence Quotient up. It is not a quickie action. The person doing Word Clearing Method 1 on a person is doing an *auditing action*. It has to be done well to achieve the final result of becoming a Word Clear.

If any errors are made or the person does not F/N at the Examiner (where he goes after each session for a meter check), HCO B 21 July 71 Revised (Revised 9 Aug 71, 31 Mar 72), WORD CLEARING SERIES 35, the Word Clearing Correction List, is used. It can be used as often as there are upsets.

This step should be done before the next step is begun as it makes the next step so much easier.

HCO P/L 19 Mar 72 Issue III, Word Clearing Series 34, HIGH CRIME POLICY, also applies.

3. If in doing Method 1 the person was found to be *very* deficient in Grammar and vocabulary, even though Method One was finished but took a very long time or couldn't be finished due to case, the person is sent to Dept 13 for the Primary Correction Rundown.

4. If the person did all right on Method 1, he is now put on Study Tapes. This is NOT just listening to Study Tapes, heaven forbid. This is HCO B 21 June 72 Issue IV, Word Clearing Series 41, METHOD 8.

This is a long and careful cycle.

It is completed in full.

It consists of looking up every new word on the tape in a grammar or large dictionary and then listening to the tape.

The full directions are given in HCO B 21 June 72 Issue IV, Word Clearing Series 41, Method 8.

5. The Student Hat is now done Method 8.

This completes the Primary Rundown.

If correctly done, the person will achieve the condition of Super-Literacy. This is fully described in LRH ED 178 International of 30 May 72.

#### COURSE SUPERVISOR

It is up to the Course Supervisor to hold this line in. His students will not prosper if their study is begun without a Primary Rundown.

It is a high crime to omit this vital step.

## NO INTERFERENCE ZONE

Persons who are on Solo Auditing between R6EW and OT III may not be put on a Primary Rundown or a Primary Correction Rundown. See HCO B 16 Apr 72 Issue II.

They may not be given Method 1 Word Clearing. They may only be Method 4ed on Solo Instruction Materials.

**BUT THEY MAY NOT BE DEBARRED FROM STUDY.**

To all but those in the No Interference Area THE PRIMARY RUNDOWN IS THE REQUIRED FIRST STEP TO ALL STUDY.

When on or after OT III, such persons must now do the Primary Rundown before any continuance of study. It now becomes *Mandatory*.

## CORRECTION RD

The Primary Correction Rundown takes care of people who have trouble on the Primary Rundown.

But do not lightly order the person to the Primary Correction RD. If they can get through the Primary Rundown with a bit of Supervisor time, let them go on through.

But if they are nattery or upset or desperate even when given help, it is the Primary Correction Rundown which will handle.

Do not just get rid of a Class to Qual.

## DRUGS

Students who are or have been on Drugs need a Drug Rundown before tackling Method 1. Drugs fog up a student and prevent gains. And he loses the gains he gets.

The answer is a full Drug Rundown. (See HCO B 25 Oct 71, "The Special Drug Rundown".) This will end off the drugs and let him live way above any plane he thought drugs put him on.

We handle drug cases so easily it is foolish not to take this obvious step. The reason he went on drugs or alcohol also comes off.

Then he can study and retain what he learns.

## OPEN DOOR

The Primary Rundown is the open door to brilliance.

Super-Literacy is a new state for Man, existing in the past only in a few, accidentally, who became the geniuses and great names of the race.

HCO BULLETIN OF 15 DECEMBER 1968 *REVISED*

(Amends HCO Bulletin of 9 January 1968 List L4A)  
(ITEM 6 CORRECTED 12 FEBRUARY 1969)

Remimeo

(Amended 8 August 1970)  
(Amended 18 March 1971 )  
(Revised 2 June 72)

**L4BR**

**FOR ASSESSMENT OF ALL LISTING ERRORS**

*ASSESS THE WHOLE LIST (METHOD 5) THEN TAKE Biggest reads or BDs and handle.  
Then clean up the list.*

PC'S NAME \_\_\_\_\_ DATE \_\_\_\_\_

AUDITOR \_\_\_\_\_

1. DID YOU FAIL TO ANSWER THE LISTING QUESTION?  
(If it reads, find out what question, clear the question noting whether it reads, if so, list it, find the item and give it to the pc.)
2. WAS THE LIST UNNECESSARY?  
(If it reads, indicate BPC and indicate that it was an unnecessary action.)
  - 2A. DID THE QUESTION HAVE NO CHARGE ON IT?  
(Indicate.)
  - 2B. WERE YOU ASHAMED TO CAUSE AN UPSET?  
(L 1 C after list corrected. )
  - 2C. WERE YOU AMAZED TO REACT THAT WAY?  
(Same as 2B. )
  - 2D. THE QUESTION HAD ALREADY BEEN LISTED BEFORE.  
(Indicate rehab.)
  - 2E. YOU HAD NO INTEREST IN THE QUESTION?  
(Indicate that the auditor missed that it didn't read.)
3. WAS THE ACTION DONE UNDER PROTEST?  
(If it reads, handle by itsa earlier similar itsa.)
4. IS A LIST INCOMPLETE?  
(If reads, find out what list and complete it, give the pc his item.)
5. HAS A LIST BEEN LISTED TOO LONG?  
(If so, find what list and get the item off from it by nulling with suppress, the nulling question being: "On \_\_\_\_ has anything been suppressed?", for each item on the overlong list. Give the pc his item.)
6. HAVE WE TAKEN THE WRONG ITEM OFF A LIST?  
(If this reads, put in Suppress and Invalidated on the list and null as in 5. above and find the right item and give to the pc.)
7. HAS A RIGHT ITEM BEEN DENIED YOU?  
(If this reads, find out what it was and clean it up with Suppress and Invalidate and give it to the pc.)

8. HAS AN ITEM BEEN PUSHED OFF ON YOU YOU DIDN'T WANT?  
(If so, find it and get in Suppress and Invalidate on it and tell pc it wasn't his item and continue the original action to find the correct item.)
9. HAD AN ITEM NOT BEEN GIVEN YOU?  
(If reads, handle as in 7.)
10. HAVE YOU INVALIDATED A CORRECT ITEM FOUND?  
(If so, rehab the item and find out why the pc invalidated it or if somebody else did it, clean it up and give it to pc again.)
11. *HAVE YOU THOUGHT OF ITEMS THAT YOU DID NOT PUT ON THE LIST?*  
(If so, add them to the correct list. Renuall the whole list and give the pc the item. )
12. HAVE YOU BEEN LISTING TO YOURSELF OUT OF SESSION?  
(If so, find out what question and try to write a list from recall and get an item and give it to the pc.)
13. HAVE YOU BEEN GIVEN SOMEBODY ELSE'S ITEM?  
(If so, indicate to the pc this was not his item. Don't TRY to find whose it was. )
14. HAS YOUR ITEM BEEN GIVEN TO SOMEONE ELSE?  
(If so, find if possible what item it was and give it to the pc. Don't try to identify the "somebody else".)
- 14A. *WERE EARLIER LISTING ERRORS RESTIMULATED?*  
(Indicate and correct earlier lists then check the current)
- 14B. *HAD THIS LIST ALREADY BEEN HANDLED?*  
(Indicate. )
15. HAS A RELEASE POINT BEEN BY-PASSED ON LISTING?  
(If so, indicate the overrun to the pc, rehab back.)
16. HAS A RELEASE POINT BEEN BY-PASSED ON THE QUESTION ONLY?  
(If so, indicate the overrun to the pc and rehab back.)
17. HAVE YOU GONE EXTERIOR WHILE LISTING?  
(If so, rehab. If Ext Rundown not given, note for C/S.)
18. HAS IT BEEN AN OVERT TO PUT AN ITEM ON A LIST?  
(If so, find out what item and why.)
19. HAVE YOU WITHHELD AN ITEM FROM A LIST?  
(If so, get it and add it to the list if that list available. If not put item in the report. )
20. HAS A WITHHOLD BEEN MISSED?  
(If so, get it, if discreditable ask "Who nearly found out?")
21. HAS AN ITEM BEEN BY-PASSED?  
(Locate which one.)
22. WAS A LISTING QUESTION MEANINGLESS?  
(If so, find out which one and indicate to the pc.)
23. HAS AN ITEM BEEN ABANDONED?  
(If so, locate it and get it back for the pc and give it to him.)
24. HAS AN ITEM BEEN PROTESTED?  
(If so, locate it and get the protest button in on it.)
25. HAS AN ITEM BEEN ASSERTED?  
(If so, locate it and get in the assert button on it.)
26. HAS AN ITEM BEEN SUGGESTED TO YOU BY ANOTHER?  
(If so, get it named and the protest and refusal off.)
27. HAS AN ITEM BEEN VOLUNTEERED BY YOU AND NOT ACCEPTED?  
(If so, get off the charge and give it to the pc, or if he then changes his mind on it, go on with the listing operation.)
28. HAS THE ITEM ALREADY BEEN GIVEN?  
(If so, get it back and give it again.)

29. HAS AN ITEM BEEN FOUND PREVIOUSLY?  
(If so, find what it was again and give it to pc once more.)
30. HAS AN ITEM NOT BEEN UNDERSTOOD?  
(If so, work it over with buttons until pc understands it or accepts or rejects it and go on with listing.)
- 30A. *WAS THE LISTING QUESTION NOT UNDERSTOOD?*  
(Get defined and check for read. It may be unreading. If so, indicate that an uncharged question was listed because it read on a misunderstood.)
- 30B. *WAS A WORD IN THE QUESTION NOT UNDERSTOOD?*  
(Same as 30A.)
31. WAS AN ITEM DIFFERENT WHEN SAID BY THE AUDITOR?  
(If so, find out what the item was and give it to the pc correctly.)
- 31A. *DID THE AUDITOR SUGGEST ITEMS TO YOU THAT WERE NOT YOURS?*  
(Indicate as illegal to do so. Correct the list removing these.)
32. WAS NULLING CARRIED ON PAST THE FOUND ITEM?  
(If so, go back to it and get in Suppress and Protest.)
33. HAS AN ITEM BEEN FORCED ON YOU?  
(If so, get off the reject and suppress and get the listing action completed to the right item if possible.)
34. HAS AN ITEM BEEN EVALUATED?  
(If so, get off the disagreement and protest.)
35. HAD EARLIER LISTING BEEN RESTIMULATED?  
(If so, locate when and indicate the by-passed charge.)
36. HAS AN EARLIER WRONG ITEM BEEN RESTIMULATED?  
(If so, find when and indicate the by-passed charge.)
37. HAS AN EARLIER ARC BREAK BEEN RESTIMULATED?  
(If so, locate and indicate the fact by itsa earlier similar itsa.)
38. *DO YOU HAVE AN ARC BREAK BECAUSE OF BEING MADE TO DO THIS?*  
(If so, indicate it to the pc, check the question if reads. Get earlier similar itsa.)
39. HAS THE LIST CORRECTION BEEN OVERRUN?  
(If so, rehab.)
- 39A. *WAS THE LIST DONE WHILE YOU ALREADY HAD AN ARC BRK, PTP, OR W/H?*
- 39B. *COULDN'T YOU UNDERSTAND WHAT WAS BEING DONE?*
- 39C. *COULDN'T YOU UNDERSTAND THE AUDITOR?*
- 39D. *DIDN'T THE AUDITOR ACKNOWLEDGE YOU?*
40. IS THERE SOME OTHER KIND OF BY-PASSED CHARGE?  
(If so, find what and indicate it to pc.)
41. WAS THERE NOTHING WRONG IN THE FIRST PLACE?  
(If so, indicate it to pc.)
42. HAS THE UPSET BEEN HANDLED?  
(If so, indicate it to the pc.)
43. HAS A LIST PROCESS BEEN OVERRUN?  
(If so, find which one and rehab.)

HCO BULLETIN OF 3 JUNE 1972R

REVISED 15 OCTOBER 1974

Remimeo  
Class IV

(Cancels BTB 24 March 1973R,  
"PTS RD Errors".)

**PTS RUNDOWN, FINAL STEP**

The following is *an additional step to the PTS Rundown* developed by me and tested at Flag. This step is run after each terminal *is* run, *to prevent by-passing charge.*

THE STEPS ARE:

1. Select the terminal already run in R3 R *and Ruds.*
2. Clear "can't have", "couldn't have" as DENIAL OF SOMETHING TO SOMEONE ELSE. Clear "enforced have" as MAKING SOMEONE ACCEPT WHAT THEY DIDN'T WANT. Have pc get the idea of these with an example or two.
3. Run on the SP items "can't have/enforced have" as motivator repetitive, then overt repetitive, the flow three terminal to others, others to terminal (four flows of two commands each).
4. After EACH item is handled with the four flows, Objective Havingness should be run. *Then the next PTS RD item is taken up, run R3R and Ruds then can't have/enforced have.*

THE COMMANDS:

FLOW ONE: 1. What can't have did (terminal) run on you?  
2. What did (terminal) force on you you didn't want?

FLOW TWO: 1. What can't have did you run on (terminal)?  
2. What did you try to force on (terminal) that he (she, it) didn't want?

FLOW THREE: 1. What can't have did (terminal) run on others?  
2. What did (terminal) force on others they didn't want?

FLOW THREE (A): 1. What can't have did others run on (terminal)?  
2. What did others try to force on (terminal) that he (she, it) didn't want?

—OBJECTIVE HAVINGNESS—

THEORY

The theory is that SPs are SPs because they deny Hav and enforce unwanted Hav. They also deny *do* and enforce unwanted *do*. They also deny *be* and enforce unwanted *be*. This is why we have never before been able to run subjective Hav. It collided with SPs, Overts, and Withholds on them.

A very full Rundown then would be to start with *don't be, must be*; go on to *don't do, must do*; end up with *can't have, enforced have*. (Not to be run at this time.) Hav alone should handle without resorting to be or do.

END OFF AT ONCE AND BEGIN OBJECTIVE HAVINGNESS IF THE TA SOARS OR THE PC CAVES IN. If this does not handle, then do a C/S 53RH at once and handle.

*PTS RD NOTES*

*With the issue of HCO B 17 Mar 74, "TWC, Using Wrong Questions", it becomes necessary to convert the PTS RD 2wcs for items into L&N questions. Example: Who have you known this lifetime who has troubled or worried you? L&N to BD F/N item.*

*Avoid listing the same question twice. The L&N for places and planets should be restricted to planets only on VA pcs and an L4BR used at the first sign of trouble.*

*Additional PTS RD items can be obtained from past PTS Interviews. Done by L&N the RD is very powerful and direct The pc must be well set up for it*

*Word Clearing Series 36*

**GRAMMAR**

In all word clearing all Grammatical Words and small words SHOULD BE LOOKED UP IN A SIMPLE GRAMMAR TEXTBOOK.

Very few dictionaries have full definitions for such words AND THEY HAVE NO EXAMPLES.

Words like “a” “the” “and” are really parts of language construction and are more complex than they at first appear.

A Word Clearing Auditor should have a simple grammar book to hand as well as dictionaries.

The best Grammar textbooks are those compiled for persons foreign to a language, like immigrants. These do not contain the supposition that the student is already an English professor.

Lots of EXAMPLES is the real test of a good grammar.

When doing the Study Tapes or Student Hat lack of a simple grammar textbook can really throw the student off. .

Those “simple” words can be the huge rocks that stand on the highway to becoming a WORD CLEAR.

So a Grammar is needed.

If a student is VERY deficient (lacking) in grammar it is best to make him do a whole simple grammar text first before he begins to get into just words. The words won't hang together for him.

It takes less time to do a short textbook in Grammar than it does to struggle with grammar all the way through.

Grammar can look like a ghastly subject until one really looks at it. Then it's easy.

**BYPASSED CHARGE**

The mechanism of BPC (By-Passed Charge) must be known to an auditor otherwise he won't know what he's "Indicating".

When one gets a lock, a lower earlier incident restimulates, THAT IS BPC. It isn't the auditor by-passing it. One handled later charge that restimmed earlier charge. THAT IS *BPC* (Tech of '62), and that is all that the term means.

TIME TRACK

Auditor touches on A, and B goes into restim out of pc's consciousness. This causes an irritated, ARC Breaky, upset feeling. The pc reacts very badly. He has been hit by a mystery. There is no apparent reason (to him) why he feels this way. This is what Bypassed Charge means. "Earlier Charge Restimmed and not seen" would be another name for it.

One handles it by noting the fact that it happened. One tells the pc an earlier incident went into restimulation. This usually cools it off.

*Data Series 26*

*Establishment Officer Series 18*

**LENGTH OF TIME TO EVALUATE**

It will be found that long times required to do an Evaluation can be traced each time to AN INDIVIDUAL WHY FOR EACH EVALUATOR.

These, however, can be summarized into the following classes of Whys:

This list is assessed by a Scientology Auditor on a Meter. The handling directions given in each case are designations for auditing actions as done by a Scientology Auditor and are given in the symbols he would use.

1. Misunderstood Words. \_\_\_\_\_  
Handled with Word Clearing (Method 1 and Method 4 of the Word Clearing Series.)
2. Inability to Study and an inability to learn the materials. \_\_\_\_\_  
(Handled by a Study Correction List HCO B 4 Feb 72.)
3. Outpoints in own thinking. \_\_\_\_\_  
(Handled by what is called an HC [Hubbard Consultant] List HCO B 28 August 70.)
4. Personal out-Ethics. \_\_\_\_\_  
(Use P/L 3 May 72 by an auditor. Has two Listing and Nulling type lists.)
5. Doing something else. \_\_\_\_\_  
(2-way communication on P/L 3 May 72 or reorganization.)
6. Impatient or bored with reading. \_\_\_\_\_  
(Achieve Super-Literacy. LRH Executive Directive 178 International. )
7. Doesn't know how to read statistics so doesn't know where to begin. \_\_\_\_\_  
(Learn to read stats from Management by Stat P/Ls.)
8. Doesn't know the scene. \_\_\_\_\_  
(Achieve familiarity by direct observation.)
9. Reads on and on as doesn't know how to handle and is stalling. \_\_\_\_\_  
(Get drilled on actual handling and become Super-Literate.)

10. Afraid to take responsibility for the consequences if wrong. \_\_\_\_\_  
(HCO B 10 May 72, "Robotism". Apply it.)
11. Falsely reporting. \_\_\_\_\_  
(Pull all withholds and harmful acts on the subject.)
12. Assumes the Why before starting. \_\_\_\_\_  
(Level IV Service Facsimile Triple Auditing.)
13. Feels stupid about it. \_\_\_\_\_  
(Get IQ raised by general processing.)
14. Has other intentions. \_\_\_\_\_  
(Audit on L9S or Expanded Dianetics.)
15. Has other reasons not covered in above. \_\_\_\_\_  
(Listing and Nulling to Blowdown F/N Item on the list.)
16. Has withholds about it. \_\_\_\_\_  
(Get them off.)
17. Has had wrong reasons found. \_\_\_\_\_  
(C/S Series 78.)
18. Not interested in success. \_\_\_\_\_  
(P/L 3 May 72 and follow as in 14 above.)
19. Some other reason. \_\_\_\_\_  
(Find it by 2-way comm.)
20. No trouble in the first place. \_\_\_\_\_  
(Indicate it to person.)

When this list is assessed one can easily spot Why the person is having trouble with the Data Series or applying it. When these reasons are handled, one can then get the series restudied and word cleared and restudied and it will be found that Evaluations are much easier to do and much more rapidly done.

Cramming

IMPORTANT

*C/S Series 80*

**“DOG PCs”**

AN AUDITOR WHO CANNOT AUDIT, WHOSE TRs ARE OUT, WHOSE METERING IS BAD AND WHO NEVER KEEPS THE CODE ALWAYS SAYS HIS PCs ARE DOGS.

When you find an auditor on this route, the remedy is:

1. Show him this HCO B and explain to him that an auditor is not likely to get any real results when he is so out of ARC with pcs.
2. P/L 3 May 72, 2 lists L & N by an auditor.
3. Get off his overts and omissions on pcs and pull his w/hs.
4. Check out his meter position so that he can see needle, paper and pc all in the same look without eye shift and drill him to do so.
5. Educate his left thumb so that he corrects a TA on BDs and catches the F/N and doesn't leave the needle stuck to the right of the dial while the pc F/Ns and corrects only after the F/N has been O/R.
6. Make him do an Electronic attest and get his TRs up to where the pc has a chance to be in session.
7. WC M4 him on his materials so he isn't swimming in misunderstands.
8. Tell him there are no dog pcs now and get busy and help them out.

WHOLE HGC

An entire HGC can go bad this way. Shortly afterwards it will disintegrate and you will have few or no auditors left.

Some auditor who is covering up his overts, false bonuses or false stats begins it and it becomes “fashionable” to call various pcs dogs. Then other auditors, finding this an easy way to justify not trying hard, follow suit.

Next thing you have no HGC.

C/S ERROR

A C/S can err by being too critical of auditors. Or worse he can err by agreeing about what dogs the pcs are. If he does HE HAS NOT REALIZED THAT HIS C/S EFFORTS ARE BEING WASTED BY THE AUDITOR'S OVERTS, FALSE REPORTS, METERING, CODE AND TR FLUBS.

The way to handle this in the C/S is:

1. 3 May 72 P/L.

2. M4 on the C/S Series.
3. Require he listen to and okay ok to audit tapes.
4. Get him to come down on critical auditors with the above cramming action.

Suddenly this C/S will begin to get wins.

#### CASES

Every “dog pc” investigated traced to incompetent programming, C/Sing, out TRs, bad metering, Code breaks and bad lists.

By forcing an auditor to cool off his opinions and properly handle the pc, each one of these “dog pcs” has begun to fly.

HCO BULLETIN OF 16 JUNE 1972R  
REVISED 27 FEBRUARY 1975

Remimeo

*C/S Series 81R*

*(Revisions in this type style on next page  
to make D of P and D of Ts stats very clear)*

**AUDITOR'S RIGHTS MODIFIED**

It occasionally (rarely) happens that an HGC's line stops and programs do not get finished and pcs go unaudited or sent to Ethics or Cramming instead of getting their programs completed.

It also happens that a D of P becomes incapable of getting auditors to audit per the schedule he writes.

12<sup>1</sup>/<sub>2</sub> hour intensives drop out. Auditing falls back to the bit and piece game.

The C/S finds all his work in programming wasted as the programs stale date or just get abandoned.

Hours fall. Lines tangle. Tech Services cannot get assignments done.

THE MAJOR WHY OF THIS AND MANY SUCH CONFUSIONS CAN BE TRACED TO AN ABUSE OF "AUDITORS' RIGHTS" IN PICKING AND CHOOSING PCS ON THE GROUNDS OF "FEELING THEY CANNOT HELP THE PC".

This "right" is also abused by auditors seeking pcs who F/N easily at the Examiner.

See HCO B 15 June 72, C/S Series 80, "Dog Pcs".

The refusal to audit is in fact an admission, in most cases, of a feared inability to audit.

Therefore, an auditor may only refuse to audit a pc if a direct personal relationship exists such as husband and wife or some friend's wife or familial relationship.

An auditor advising others about this or that "dog case" or seeking to exclude pcs from auditing by abusing his "right to choose pcs" is SUBJECT TO COMM EV AND SUSPENSION OF CERTIFICATES UNTIL RETREADED.

For the real why of it is his inability to handle TRs, meter, use the Code or apply Tech.

Nearly every "Dog Pc" has out lists or incomplete chains or is not being run on what needs to be handled. In other words they are simply problems in repair which modern tech handles easily. The drug case who is audited on grades but has had no drug rundown is an example of misprogramming.

The C/S can get many loses and the whole HGC go into a bedlam where you have auditors refusing to audit. Their reasons given are false. The real reasons involve fast F/Ns and bonuses or out TRs, metering, Code breaks and tech.

The D of P has a right, and so does Tech Services, to assign pcs to such and such auditors in the sequence listed without a lot of pick and choose by the auditors.

A C/S has a right to get his programs completed.

12<sup>1</sup>/<sub>2</sub> hour intensive plans blow up where auditors choose their own pcs.

### STATS

The stats of C/Ses and auditors may only be HOURS AUDITED with FES and admin hours separately noted.

The D of P's *stat may only be fully completed cases.*

When the stats are this way the C/S can get his programs done without worry.

The D of P can get cases completed.

The D of Tech Services has only completed *cases and course completions-for a stat.*

### HONESTY

Sanity is truth.

Truth is sanity.

The road to truth is begun with honesty.

There was the story of the "man who sold his soul for a mess of pottage" (soup). We could parallel this with the Auditor who sold his case gain for a mess of false stats.

An honest clean job and an honest clean line are the milestones of the road to truth.

*Word Clearing Series 37*

**DINKY DICTIONARIES**

(Dinky: Small, insignificant.)

In learning the meaning of words small dictionaries are very often a greater liability than they are a help.

The meanings they give are often circular: Like "CAT: An Animal." "ANIMAL: A Cat." They do not give enough meaning to escape the circle.

The meanings given are often inadequate to get a real concept of the word.

The words are too few and even common words are often missing.

HUGE dictionaries can also be confusing as the words they use to define are often too big or too rare and make one chase through 20 new words to get the meaning of the original.

The best dictionaries are the very large child's dictionaries like THE WORLD BOOK DICTIONARY (A Thomdike-Bamhart Dictionary published exclusively for Field Enterprises Educational Corporation, Merchandise Mart Plaza, Chicago, Illinois 60654 or Doubleday and Company. Thomdike-Barnhart has a whole series of dictionaries of which this is a special one. Field Enterprises has offices in Chicago, London, Rome, Sydney, Toronto. The World Book Dictionary is in two volumes, each 28 1/2 cm [11 1/4 inches] by 22 cm [8 5/8 inches] by 5.8 cm [2 1/4 inches], so it is no small dictionary!) (Also it defines Dianetics correctly and isn't determined on a course of propaganda to re-educate the public unlike Merriam Webster's dictionaries.)

Little pocket book dictionaries may have their uses for traveling and reading newspapers, but they *do* get people in trouble. I have seen people find a word in them and then look around in total confusion. For the dinky dictionary did not give the full meaning or the second meaning they really needed.

So the dinky dictionary may fit in your pocket but not in your mind.

*Word Clearing Series 38*

**METHOD 5**

Method 5 Word Clearing is a System wherein the word clearer feeds words to the person and has him define each. It is called Material Clearing. Those the person cannot define must be looked up.

This method may be done without a meter. It can also be done with a meter.

The reason the Method is needed is because the person often does not know that he does not know. Therefore Method 4 has its limitations as the meter does not always read.

The actions are very precise.

The word clearer asks "What is the definition of \_\_\_\_\_?" The person gives it. If there is any doubt whatever of it, or if the person is the least bit hesitant, the word is looked up in a proper dictionary.

This method is the method used to clear words or auditing commands or auditing lists.

Remimeo

*Word Clearing Series 39*

**METHOD 6**

Method 6 Word Clearing is called KEY WORD CLEARING.

It is used on posts and specific subjects.

It is a heavier form than Method 5.

Method 6 is used without a meter.

Where a person is new on post or new to a subject or where there has just been a goof, an error or an Ethics action, these steps are done in the following manner.

1. The Word Clearer makes a list of the KEY (or most important) words relating to the person's duties or post or the new subject.

This is made up as a list. The Word Clearer looks up each word in the dictionary and writes down the definitions.

The list may have as few as three words or as many as twenty or thirty.

(Example: A bank clerk's key words would be "bank" "clerk" "money" "cash" "drafts" "teller" "accounts" "customer" etc.)

(Example: There has just been a goof resulting in an upset. The goof centered around "radio" "repairs" "operation" "operator" "electronics" etc.)

2. The Word Clearer, without showing the person the definitions, asks him to define each word.

3. The Word Clearer checks the definition on his list for *general* correctness— not word for word but meaning.

4. Any slow or hesitancy or misdefinition is met with having the person look the word up and look up any word in the definition the person does not have a grasp of.

5. One completes his list.

6. By then the person has been jarred into looking further by the above actions. The Word Clearer asks "What other word relating to your post (or subject or error) didn't you understand?"

7. Each one mentioned is now defined by looking it up.

8. The person can now be Method 4ed relating to his post to be sure all is clean and there are no upsets.

Note: Where the person has just had an accident or ethics action it may be necessary to delay the action until the person is calmer or not so upset as the action can be a heavy distraction if the person is hurt or frightened and will not be successful.

IT WILL BE FOUND THAT LAZINESS, INACTIVITY, SLOWNESS AND ERRORS ON A POST OR IN USING A SUBJECT TRACE TO MISUNDERSTOOD KEY WORDS.

THE REMEDY IS WC METHOD 6.

*Word Clearing Series 40*

**METHOD 7**

Whenever one is working with children or foreign language persons or semiliterates Method 7 READING ALOUD is used.

In this method the person is made to read *aloud* to find out what he is doing.

It is a very simple method. It is done without a meter.

It is used on such persons before other methods in order to get the person untangled.

If a person does not seem to be progressing by studying silently, one has him read aloud.

Another copy of the same text must also be followed by the Word Clearer as the person reads.

Startling things can be observed.

The person may omit the word "is" whenever it occurs. The person doesn't read it. He may have some strange meaning for it like "Israel" (actual occurrence).

He may omit "didn't" each time it occurs and the reason traced to not knowing what the apostrophe is (actual occurrence).

He may call one word quite another word such as "stop" for "happen" or "green" for "mean".

He may hesitate over certain words.

The procedure is

1. Have him read aloud.
2. Note each omission or word change or hesitation or frown as he reads and take it up at once.
3. Correct it by looking it up for him or explaining it to him.
4. Have him go on reading, noting the next omission, word change or hesitation or frown.
5. Repeat steps 2 to 4.

By doing this a person can be brought up to literacy.

His next actions would be learning how to use a dictionary and look up words.

Then a simple grammar.

A very backward student can be boosted up to literacy by this method.

Remimeo

*Word Clearing Series 41*

**METHOD 8**

(If a student has trouble with this Method he should do Method 7 first. Method One should also be done.)

Method 8 is an action used in the "Primary Rundown" where one is studying Study Tech or where one is seeking a full grasp of a subject. Its End Product is SUPER-LITERACY.

The steps are these:

Usually an alphabetical list of every word or term in the text of a paper, a chapter or a recorded tape is available or provided.

1. The person looks up each word on the alphabetical list and uses each in sentences until he has the meaning conceptually.

The words are looked up in a big dictionary.

The grammatical words or small words are looked up in a simple grammar. If the person has too much trouble with grammar he should do the whole simple grammar text before going on.

Any technical terms not in the dictionary are looked up in a technical dictionary or glossary or in bulletins on the materials, i.e. a photographic dictionary.

This is not done for the whole subject, it is done for a paper or a chapter or one tape of a series.

2. One then reads or listens to the paper, chapter or tape for its sense or general meaning.

3. Method 4 is then done on the person to find any misunderstandings.

4. These are cleared up per Method 4 procedure.

5. The person reads or listens to the material again.

6. The person is again checked for any misunderstandings.

7. If there are any misunderstandings the person again does steps 4 & 5.

8. When the material is fully heard or understood as per above steps and checks, end off on that paper, chapter, tape and go on to the next one.

9. An alphabetical list is made or exists for the next paper, chapter or tape. Steps 1 to 8 are done on it.

10. Each succeeding paper or chapter or tape is done with steps 1 to 8.

When *all* the material has been done in this way, the person will be fully able to apply all the material.

Usually Method 8 is reserved for the Scientology Study Tapes which contain how to study and the Student Hat.

It can also be used to master a major subject.

IT WILL BE FOUND THAT METHOD 8 (or Method 2 or 3 or 4 or 6) ARE VERY LENGTHY AND HARD TO DO UNLESS ONE HAS FIRST HAD A METHOD ONE WORD CLEARING.

A Word Clearing Correction List is used on Method 8 whenever a student bogs heavily. This list will, when assessed on a meter properly, locate the errors and they can be corrected.

When used on the Study Tech itself and Student Hat, Method 8 HONESTLY DONE makes a person SUPER-LITERATE. It is like hearing and seeing and reading for the first time!

Reading a text or instruction or book is comfortable. One has it in conceptual form. One can APPLY the material learned.

It is a new state.

## PRIMARY CORRECTION RUNDOWN HANDLING

(Refers to HCO B 30 March 72, Revised 30 May 72,  
"Primary Correction Rundown")

Students who struggle with the Primary Rundown (HCO B 4 Apr 72, Revised 30 May 72) are given the PRIMARY CORRECTION RUNDOWN.

Steps 1 to 9 of the PCRDR (per HCO B 30 March 72, Revised 30 May 72) are paid for by the pc quite in addition to his Primary Rundown.

IF available auditors exist on Course of a proper class *and* the pc is a student then these steps I to 9 PCRDR may be done on a co-audit basis. BUT IF NOT WELL DONE OR MESSED UP OR DELAYED MUST BE DONE BY A PROFESSIONAL AUDITOR AT THE STUDENT'S OWN EXPENSE.

A STAFF MEMBER stalled on the Primary Rundown is put through the PCRDR in *Qual* or *Qual and HGC* for different steps.

Qualifications is the *Correction* Division. PCRDR is a *Correction* action. There should be word clearers in *Qual*. And these as Class IIIs should be competent to do steps I to 9 of the PCRDR.

The object of a PCRDR is not to stall the person and keep him off the PRD.

*The purpose of the PCRDR is to get the person through the PRD.*

Where people have been put off the PRD for any reason and are not industriously going through the PCRDR IT IS UP TO QUAL TO MAKE SURE THEY *DO* GET THROUGH PCRDR AND PRD.

Orgs that off load pcs or students on the thinnest excuses or *Qual* Divisions that will not service and speed the lines have to be watched as the discovery of trouble on the PRD can be used to simply halt the student or pc. Instead of picking up the ball, a *Qual* has been known to just send students back to class without handling or put students to "doing their hats" or other nonsense.

*The idea is to complete somebody on what they are supposed to complete.*

## FOLDER STUDY

If you study the person's folder, particularly a staff member's, you will probably find that several of the steps 1 to 9 have already been done.

These are checked off as done on the PCRDR checklist.

Any org that is worthy of the name has folder summaries in the inside left-hand cover of the current folder. It is very easy to locate what have been done.

## OUT LISTS

It is not at all rare to find that various “whys have been found” but that the person is not doing well. This is a case of WRONG ITEMS and is handled by C/S Series 78. Thus steps I, 2, 3 and 6 of the PCRCD may consist mainly of *correcting* botched up lists.

## IDLE STUDENT

The problem of putting someone off the PRD onto the PCRCD is that he is now “idle as a student”. He cannot go forward on his studies as he has not done his PRD.

In fact going on studying without the PRD is a waste of time as it’s mainly misunderstood, glib and won’t be applied. It is actually *faster* to do a PRD (or a PCRCD) and then study than it is to study without the PRD or PCRCD. And it is certainly far more effective.

The thing to do is to get the student who is assigned to the PCRCD *through* the PCRCD.

As noted above he may have several points already done. And the rest can be done easily and fast.

## RESISTIVE STUDENTS

There are situations where you have students or even executives who will not even go to study.

These are of course people who need the PCRCD worst.

But how to get them available even for that?

In the case of a senior executive who will not study you can get a disarrangement of the study lines as they won’t push and will even impede study—for instance by not making staff go to study time or preventing them from going. Also policy and HCO Bs fall out or are not enforced and form of org is not held since reading and study are similar actions so standard actions are not known.

Naturally such a thing has to be handled very fast.

Because cooperation from such a student is VERY limited, time to do a whole PCRCD is not possible.

## PRE-PCRCD

There is a PRE-PCRCD action that handles this.

It has 2 steps.

- A. Assess Method 5 C/S 53RC. Take the LFBD item and INDICATE it to the person. Don’t handle it or the rest of 53RC. Just Indicate it to the pc. He will usually agree and cognite. The TA will come down further and the needle will float. That’s it.
- B. Now take the Study Correction List. Assess it Method 5. Pick out the biggest LFBD you got. Indicate it to the pc. He will cognite, the TA will drop down and an F/N will occur. That’s it.
- C. Put these 2 sheets in his pc folder for full handling of all reads by his auditor and add them to the pc’s auditing program sheet inside the left front cover of the pc’s folder.

The result will often be magical. The person will become more agreeable about study or the Primary Correction Rundown.

Of course they should now get a Primary Correction Rundown of which C/S 53RC is the first step anyway.

This Pre-PCRD gets them started. And it only takes a little while.

The End Phenomena of a Primary Correction Rundown is “Can he now quickly and easily do the Primary Rundown?” If yes, and if it works out in practice that he can, that’s it. Let him onto the Primary RD. But if he bogs, back to the PCRD.

#### MORAL

The moral of this HCO B is get them through the Primary Rundown. If they can’t or don’t go, do the PCRD. And if they’re shunted to the PCRD get it DONE. And get them to the real EP which is SUPER LITERACY. The moral is, get them *through*. Don’t idle about. Get it DONE.

Then they will whizz along on fast flow study and you’ve got COMPLETIONS.

## **DISTRACTIVE AND ADDITIVE QUESTIONS AND ORDERS**

Recently there have come up many instances of auditors asking odd non-process questions while “doing a process” and giving odd orders.

Example: While running a process an auditor *also* kept asking, “Is your attention on something else?”

This is of course a daffy thing to do. The auditor’s TRs or metering go out. Then the auditor badgers the pc with strange irrelevant questions. These are *distractions*, nothing more nor less. Not all the silly questions in the world substitute for lack of TRs and proper metering. A question about “What else are you doing?” does not substitute for having by-passed an F/N or running an uncharged item.

Giving Orders that are not part of any process is very bad.

Example: Auditor has missed a read, by-passed an F/N and goofing it generally. Pc gets dull, disinterested. Auditor says, “Come back into the room!”

Evaluation fits into this set of bad tricks. Like, “You are really OT you know. You just think you’re aberrated.” Or “You better tell the Examiner you are really Clear.” Or “You are in pretty bad shape unless you can see the whole building.” These of course are suppressive Evaluations.

In 1950 there was a general observation. ALL AUDITORS TALK TOO MUCH.

As we seem to be in a period of additive questions and comments, the observation can be made again.

MUZZLED auditing means stating only the model session patter and Commands and TRs. It ALWAYS gets the best results.

Do NOT add a lot of questions or orders to a session to cover up goofs in standard tech.

Standard Tech works. Use it and it only.

HCO BULLETIN OF 10 AUGUST 1972

(Amended & Reissued 28 March 1974  
—only change is Series No.)

Remimeo

*Expanded Dianetics Series 6*

*C/S Series 82*

**DIANETIC HCO B**

**INTEREST**

On two certain subjects the “Interest?” question is omitted from Dianetic R3R patter.

On *drugs* and when running Evil Purposes or Intentions one does NOT ask the pc if he is interested in running the item.

The requirement on both drug items and intentions is that the item *read* on the meter (suppress and inval can be used) and has not been run by R3R previously.

*Many* pcs, it has now been found, have replied “No, no interest” on a drug item, the item has not been run and the pc then continued to have trouble with drugs.

Checking back pcs who returned to drugs after auditing showed “drug rundowns” that were so brief as to be nothing. One pc who had been on LSD for years had only a 1 hour quickie drug rundown. Later this person relapsed.

Tracing this, in each case the “Interest?” question had been used and the pc had replied “No interest” BUT MEANT “I’M NO LONGER INTERESTED IN DRUGS.”

So Drug items that have read are run R3R without asking for interest. The command is simply omitted.

In Expanded Dianetics the same thing has occurred in running Evil Purposes or Intentions. The Auditor asked the pc if he was interested in running the item and the pc said “No” and so it went untouched. But the pc had it confused with interest in doing the purpose and missed running it and then fell on his head later. Tracing the case back it was found that R/Ses and such had not been run due to the pc saying “No Interest”.

Nothing bad will happen if the item is run.

**C/S RESPONSIBILITY**

The C/S must keep telling his auditors, on drugs or Expanded Dianetics, “Omit asking for interest on R3R on these (drug) (intentions). Run them if they read on the meter.”

**REPAIR**

In repairing cases it is good sense to check this point on drugs and intentions to see if they were neglected in R3R due to “no interest”.

If so, then have them run and the case will suddenly do well.

### FAST FLOW TRAINING

References: LRH ED 178 INT of 30 May 72      SUPER-LITERACY  
HCO B 4 Apr 72 Revised 30 May 72      PRIMARY RUNDOWN REVISED  
HCO B 30 Mar 72 Revised 30 May 72      PRIMARY CORRECTION RUNDOWN  
HCO B 20 July 72 Issue I      PCRD HANDLING  
HCO B 15 July 71 Issue III      C/S Series 48R DRUG HANDLING  
HCO B 25 Oct 71 Issue II (as revised)      THE SPECIAL DRUG RUNDOWN

So that there is NO question about what is meant by FAST FLOW TRAINING:

ANY STUDENT WHO HONESTLY COMPLETES THE PRIMARY RUNDOWN OR PRIMARY CORRECTION RUNDOWN IS THEREAFTER DESIGNATED A "FAST FLOW STUDENT".

The Fast Flow Student passes courses by attestation at Certs and Awards to the effect that he (a) has enrolled properly on the course, (b) has paid for the course, (c) has studied and understands the materials, (d) has done the drills, (e) can produce the result required in the materials.

The student is given a PROVISIONAL CERTIFICATE. This looks like any other certificate but is not gold sealed and has *Provisional* plainly on it.

In the case of an Auditor, an Internship or formal auditing experience is required. When actual honest evidence is presented to C&A that he has demonstrated that he can produce flubless results his Certificate is VALIDATED with a gold seal and is a permanent certificate.

In Administrative Courses or course of any kind not having to do with auditing, the same procedure is followed and a PROVISIONAL CERTIFICATE is issued by C&A.

The person must now demonstrate that he can apply the materials studied by producing an honest, actual statistic in the materials studied. He presents this evidence to C&A and receives a VALIDATION gold seal on his Certificate.

Provisional Certificates EXPIRE after one year if not Validated.

The Fast Flow Student studies within his knowledge of study tech. He is assisted by Supervisors. Any Word Clearing action needed can be done on him. He can be sent to Qual and Crammed. He can be starrated and made to clay demo by the Supervisor.

He does not however have to have a twin, he does not automatically starrate starrate items, he does not have to have an examination.

The Fast Flow System makes for very rapid training. This becomes possible due to the development of the Primary Rundown and Primary Correction Rundown.

## PREREQUISITES

*Primary Rundown or Primary Correction Rundown are required for Levels O to I V or above and for FEBC. They are not required for HSDC or the many other courses below these levels.*

## NON PRDs

*Those students who have not had a Primary Rundown or Primary Correction Rundown must starrate, clay demo, twin and go through the materials as many times as required, using the entirety of the Student Hat.*

It is *much* faster to do the PRD or PCRd first.

## DRUG CASES

Where a drug case cannot be gotten through Method One Word Clearing due to case, it is usual to give him the Drug Rundown first as per HCO B of 25 Oct 71 Issue II, "The Special Drug RD".

The short co-audit version is contained in HCO B 15 July 71 Issue III, C/S Series 48R.

Where for any reason the person cannot get the Drug Rundown HE MAY BE ENROLLED ON THE DIANETICS COURSE, BECOME A DIANETIC AUDITOR and obtain the Drug Rundown through CO-AUDIT on Course.

The Dianetic Course in this instance is done with the full Student Hat requirements.

## DESIGNATION

The FAST FLOW STUDENT should be given a blue lapel award and wear it in Class. It should say FFS on it in black letters.

This gives the green light to rapid and effective completion of courses for the SUPER-LITERATE.

*C/S Series 84*

**FLUBLESS C/SING**

A C/S cannot C/S flublessly while he has ANY Auditors flubbing.

The *standard* procedure is

1. The C/S makes sure Tech Courses are taught okay and raises hell until they are.
2. C/S makes sure Qual has a Cramming Officer and crams him until he gets flubless Cramming and can Supervise TRs, do WCing Method 7, Method 6, Method 4, can correct metering and has packs to hand for reference.
3. The C/S follows a *very* standard handling of auditors:
  - A. 1 error of any kind—instruct by reference to HCO B.
  - B. A second error of any kind—send to Cramming and get the Auditor crammed at once, without any loss of auditing time but before the Auditor is allowed to audit further. (This is 2 hours, not 2 days!)
  - C. A third error of any kind—RETREAD, wherein the Auditor's weak areas are located and the Auditor has to M7, M6, M4 and restudy the materials of that area. This takes the Auditor back to Step A.

A retread under a good Super takes 4 or 5 days.

Now if the Auditor again errs he goes to Step A.

If he goes the route again he hits RETRAIN and is retrained fully like any other student. His PRD is done or verified and he goes through the course starting with basic books. This puts the Auditor back to A.

But if he now lands at RETRAIN again he is given a full and complete RETRAIN from his earliest contacts with the subject.

It is highly unlikely he will flub further but if he does, he should not be on auditing at all.

**FALSE REPORTS**

A falsified Auditing report puts the Auditor at once at retrain as he is not sufficiently aware of the potentials of the subject to know he *can* get results and does not have to be dishonest.

**TR 0**

OT Zero and TR 0 are the keys to good auditing.

2 C/Ses were found in orgs who “wouldn't let the Auditors do TR 0 because of their cases”. Both orgs had horrible stats and bad results and ARC Broken fields.

OT Zero and TR 0 are a *routine* action for Auditors. They do TRs in spare time, not because they are being Crammed, just to get professional.

*Every* Cramming Order includes TRs, especially Zero, to also be done on the auditor's own time.

*This* gets the Auditor up to really Confronting. His errors come mainly from an inability to confront (and from faulty metering or misunderstands or out ethics).

OT Zero and TR 0 are the keys to flubless auditing.

## ELECTRONIC ATTEST

Auditors using LRH tapes and electronic attest (and with OT Zero, TR 0, metering, and Mis Us cleaned up and Ethics in) become very spectacular auditors in terms of results.

Results bring *pride*.

Auditors who get results are happy auditors. And the above is how, the standard how, to get them to get results.

## EASY C/SING

Only if he spends some of his time TRAINING, as above, can a C/S ever get down to really C/Sing cases and getting programmes DONE.

## SUMMARY

The above is the way I C/S and handle Auditors *as a C/S*.

I long since found that the flubby Auditors were the ones who consumed the C/S time. The ratio is 2<sup>1</sup>/<sub>2</sub> hours to 6<sup>1</sup>/<sub>2</sub> hours wherein it only takes me 2<sup>1</sup>/<sub>2</sub> hours to C/S piles of folders when I have the auditors auditing honestly and flublessly and it takes me 6<sup>1</sup>/<sub>2</sub> hours when I have some flubbers.

It is neither kind nor decent to let Auditors lose. Only when I (or MSH) have not been doing the C/Sing has auditing gone wrong in any area where I was.

This is traced directly to the drop-out of the above actions. So it is the above actions which give standard results and any C/S who omits them (to be a good fellow, or “these are my friends”) is an Auditor killer.

Auditors sometimes achieve a high status and are “above being crammed”. Well watch it, watch it because they will fall on their heads with a crash.

An auditor is not unlike a race horse. He needs a lot of care and handling. And he needs his periodic drills and exercises or he goes sloppy. Like a race horse, a good auditor is very, very valuable. And all good auditors are made by C/Ses!

The proof is that even the best go bad when they no longer have a tight C/S rein. Experience has taught that. The exceptions are very, very few and you don’t have any of them.

It takes me about 3 or 4 weeks to get an auditor through his course and doing a good flubless job. The majority of Scientologists want to be auditors. So you have Auditor scarcity? That’s a laugh.

It’s the C/S! The Course Super, the Cramming Officer.

And it’s done just exactly as above.

Given the materials, there is *no other answer*. So stop dreaming of hiring or getting perfect Auditors.

The ones you have are fine. Get more.

And do the above! ! !

The auditors must not blame the pc (nor must you), the C/S must not blame the auditor. It’s you, the Course Super and the Cramming Officer. And mainly you the C/S.

You can and must build a corps of good auditors.

Or you’ll never make it as a C/S.

And listen, if you don’t make it as a C/S, where’s the world?

Remimeo

*Word Clearing Series 42*

**METHOD 4 NOTES**

Too generalized a question in using Method 4 defeats its use and can restimulate a person badly.

Example: "Is there anything in *college* you didn't understand?" That of course is just plain ridiculous as a question. "Have you ever heard anything you didn't understand?" would be similarly silly.

**BREAK DOWN THE MATERIALS**

When doing Method 4 you have to break down the materials (put them into small separate units) in order to ask questions.

Example: We have Papers 1 & 2, both on the same subject. The wrong question for Method 4 would be "Is there anything in Papers 1 & 2 you didn't understand?" and not even give him the papers to see! The right way to do it would be to take Paper 1 and break it down into its obvious sections, give the person Paper 1 and let him look at it. Point to its 1st section and say, "Is there anything you didn't understand in this section?" while watching the meter. Then point to next section, do the same. Finish Paper 1. Then go to Paper 2 and do it the same.

A person has to know what he's being asked about and has to be thinking of it when asked the question.

**TAPES**

Just as it would be ridiculous to ask "Have you ever misunderstood anything you ever read?", it would be silly to ask, "Did you ever have a misunderstood on Tape?"

The right way is to take *the* tape and put it on a machine and play a bit of it. And ask, "Is there anything in the first section of this tape you didn't understand?" while watching the meter. Then high speed the tape forward to another area and do the same. Thus the tape is covered.

This can also be done from any tape notes, section by section.

**BOOKS**

Books are done chapter by chapter.

**QUICKIE M4**

Method 4 is defeated utterly by

1. Bad metering
2. Too general a question
3. Not having the material to hand
4. Not getting the person's attention on parts of the material.

Quickie M4 misses. It sets the person up for a lose in his studying.

And we want him to actually succeed in his study, don't we?

*Word Clearing Series 43*

**GRAMMAR DEFINITION**

The following definition of Grammar was taken from the *Dictionary of Contemporary American Usage* by Bergen and Cornelia Evans, published by Random House, New York, in 1957. (It is not a complete Dictionary and would require another larger dictionary for full word clearing. But it gives American usage's of words and phrases, which could be important as Dianetics and Scientology are written in American English.)

It was sent to me by an SHSBC Student who found its definition of Grammar was very helpful to other students.

This definition also tells you why some college or school texts are so ghastly hard to read--they are not in standard English. It also tells you why, in 1950, the head of the English Department in an American University hailed *Dianetics: The Modern Science of Mental Health* as marking a new era of scientific writing. One reason is that it was written by a writer, not a professor. The other was that it was written in the English that was in use.

But read the definition:

*GRAMMAR*

GRAMMAR is a systematic description of the ways in which words are used in a particular language. The grammarian groups words that behave similarly into classes and then draws up rules stating how each class of words behaves. What classes are set up and how the rules are phrased is a matter of convenience. A grammarian is free to classify his material in any way that seems reasonable to him. But he is never free to say that certain forms of speech are unacceptable merely because there is no place for them in the system he has designed.

**THE CLASSES**

Most grammarians are interested in a number of languages. As a rule they set up classes that are useful in handling many languages but that may have very little meaning for a particular language. For example, the distinction between the dative *him* and the accusative *him is* important in the Indo-European languages generally. But in a grammar designed solely to teach English, this distinction does not have to be made. Similarly, there is an etymological or historical difference between the English gerund in *-ing* and the participle in *-ing*. But it is sometimes impossible to say whether a given word is a gerund or a participle; for example, in *journeys end in lovers meeting*. For this reason, some grammarians prefer to handle these forms together under one name, such as "participle" or "*-ing*".

The familiar terms of classical grammar are defined in this dictionary for the convenience of persons who need to use these concepts. But a much simpler classification, based on the structure of present-day English, is employed in all the discussions of usage.

**THE RULES**

In order to say how words are used, the grammarian must examine large quantities of spoken and written English. He will find some constructions used so

consistently that the exceptions have to be classed as errors. But he will also find competing, and even contradictory, constructions, which appear too often to be called mistakes. He must then see whether one of these expressions is used by one kind of person and not by another or in one kind of situation and not in another. If he can find no difference of this sort he accepts the two constructions as interchangeable. In this way he assembles a body of information on how English words are used that may also show differences, such as those between one locality and another, or between spoken and written English, or between literary and illiterate speech. Studies of this kind are called “scientific” or “descriptive” grammars. This is a relatively new approach to the problems of language and the information brought to light in this way is sometimes surprising.

The first English grammarians, writing in the seventeenth and eighteenth centuries, did not attempt to describe the English of their day. On the contrary, they were attempting to “improve” English and they demanded Latin constructions which were not characteristic of English. They objected to the expression *I am mistaken*, because if translated into Latin this would mean *I am misunderstood*. They claimed that *unloose* must mean *tie*, because *un* is a Latin negative. They objected to the “double negative” which was good Old English, and also good Greek, but not good Latin.

These eighteenth century rules of prescriptive grammar have been repeated in school books for two hundred years. They are the rules for a curious, Latinized English that has never been spoken and is seldom used in literature, but that is now highly respected in some places, principally in scientific writing. It should be recognized that these rules were not designed to “preserve” English, or keep it “pure”. They were designed to create a language which would be “better” simply because it was more like Latin. Dryden, writing in the seventeenth century, said: “I am often put to a stand in considering whether what I write be the idiom of the tongue or false grammar and nonsense, couched beneath that specious name of Anglicanism, and have no other way to clear my doubts but by translating my English into Latin and thereby trying what sense the words will bear in a more stable language.” One result of this double translation was that Dryden went through his earlier works and rewrote all the sentences that had originally ended in a preposition or adverb. A generation later, Swift complained that the English of his day “offends against every part of grammar”. Certainly this is blaming the foot because it doesn’t fit the shoe!

Because some people would like to write the language of the textbooks, the entries in this dictionary not only tell what standing a given construction has in current English but also explain how the rules of the prescriptive grammarian would apply, wherever the rules and standard practice differ. But in such cases the rules are never simple, and the person who has to use this type of English may feel that it would be easier to follow Dryden’s example and write in Latin first.

## THIS BOOK

The grammar entries in this book are designed for persons who speak standard English but who may be confused about certain isolated points. The entries are arranged so that the answer to a particular problem can be found in the least possible time. But anyone who wishes to make a systematic study of English grammar, using this book, can do so by starting with the entry *parts of speech* and following the references to more and more detailed discussions of each concept.

**CATASTROPHES FROM AND REPAIR OF  
“NO INTEREST” ITEMS**

I have done a review of several failed cases which blew or went bad after auditing.

THE COMMON FACTOR IN EVERY ONE WAS *CASE BY-PASSED DUE TO “NO INTEREST”*.

The auditor finds a reading drug item or an evil purpose and proposes to run R3R on it. The auditor asks if the pc is interested in running it. The pc says, “No.” The auditor does not run it. BANG, we have a BY-PASSED CASE.

The pc will blow or go sour or not recover.

One of these cases was unchanged after “a drug rundown”. He had a pair of eyes that looked like blank discs. Check of folder showed all major drug items “not run due to no interest”. The solution was to recover the lists, run the items that had read R3R triple and complete the case.

Another one blew. His folder was examined. Every evil purpose had been left unrun! Of the items from the “Wants Handled Rundown” the intentions were mislisted. The drug rundown failed due to “no interest”.

Each flubbed case I am finding has had his drug items and evil purposes left unrun on R3R due to “no interest”.

So DON'T ASK FOR INTEREST ON INTENTIONS, EVIL PURPOSES AND DRUG ITEMS.

IF THEY READ, RUN THEM!

**REPAIR**

1. On any stumbling case that has had a “drug rundown” or Expanded Dianetics get the Folder FESed to see if reading items were left unrun on R3R Triple. List them chronologically, early to late.
2. Get the case back, with an R factor of “Incomplete”.
3. Run every one of those unrun drug items, intentions and Evil Purposes.
4. If the items don't now read, then get in Suppress and Invalidate on them.
5. If the case bogs do L3RD Method 5 and Handle on that chain only.
6. Go on with the action and complete it.

**ILLITERACY AND WORK**

I have been engaged in a study of applications of tech to illiteracy and illiterate or semi-literate populations and found some simple levels of approach.

I investigated U.S. AID educational efforts and data to find out why they failed. For instance, in one project, the U.S. spent over one million dollars to educate 105 persons from an “underdeveloped” country of low literacy and surveyed it later to find that none of the data taught was in use and that *no* progress had been made by the person or the country as a result.

Using their data and my own personal investigation in the same country, I evaluated the situation and found they had *not* consulted the existing scene before or during the program. Their training was for a sophisticated environment.

The country of the program is just emerging from a nomadic level civilization into agricultural and the agriculture done is extremely primitive, erodes whole plains with non-contour plowing and doesn't even know about irrigation.

To these people they taught the highly complex technology of the electronic age!

The people went back home, found no computers whatever, listened to the goats and sat down and did nothing.

U.S. AID had no explanation for this. But give them credit—the students liked the U.S. and U.S. AID *did* honestly survey and admit the failure, a rare humility.

From this point I did a local study and found that instead of computers these people needed—guess what?

TR 2! Acknowledgement. (Training Drill No. 2, How to Acknowledge a Communication.)

This primitive area had never heard of TR 2!

“Good”, “fine”, “thank you” were unknown in all their work culture.

Before they saw *any* need of *any* technology, they had first to see that there was any reason to get any work done at all!

Further, their cultural pattern contained dishonesty as a virtue! This is antipathetic to basic morale no matter *what* the culture and so they were in a cultural attitude or pattern which kept them sad, depressed and miserable! So they *couldn't* work.

The program, then, had to (a) recover honesty to increase morale, (b) introduce acknowledgement for accomplishment, (c) establish the possibility that one *could* work, (d) introduce statistics so that something existed that could be acknowledged and (e) establish bonuses for statistics so that acknowledgement could be real and stay that way.

These items are all very elementary and simple portions of our basic technology:

(a) Security checking, (b) TRs especially 2, (c) *Problems of Work* Course using tape and *Word Clearing*, (d) Statistical policies and tech, (e) Bonus policies.

So in U.S. AID Programs there was a skipped gradient *in culture* (nomad-agrarian skipped to electronic-nuclear) and a skipped gradient in training—Why learn when there is no reason to work? So why be literate? Or study?

Any sophisticated technical layout would break down in the hands of these people—and does.

But this program would lift them up. Then they would have some reason to study.

Factually, one cannot just sail into a culture blind and bash around with no data. It is *costly* and it accomplishes very little.

A basic knowledge of Man is essential to any improvement in any area of the human race.

Issue II

### STUDENTS WHO SUCCEED

Over the past year I have done considerable research, observation, pilots and more research on the subject of making successful students.

We have of course excellent study technology which is far in advance of anything Man has had. It has been developed over a period of 22 years.

Sometimes the student is very slow.

Sometimes he ends off study due to non application.

Sometimes the study tech is not used. When this happens of course the tech "didn't work" because it was not used.

I have run enough pilots now in order to handle this.

### HONESTY

In policy there has long been written the natural sequence of ethics, tech and administration.

When administration is out, it is necessary to get in tech. When tech is out it is necessary to get in ethics.

In other words, ethics must be in to get tech in.

ETHICS is a personal thing. By definition, the word means:

"The study of the general nature of morals and of the specific moral choices to be made by the *individual* in his relationship with others." (American Heritage Dictionary)

When one is ethical or "has his ethics in" it is by his own determination and is done by himself.

JUSTICE is the action of the group against the individual when he has failed to get his own ethics in.

In the culture in which we live, justice is so savage and often so unreasonable that it tends to inhibit the individual from confessing minor misdemeanors and Crimes.

This aberrates him because it prevents him from getting off his withholds.

This leads to bad health, bad eyesight, deafness and other things as can be proven in auditing results.

IT ALSO LEADS TO OUT COMMUNICATION.

AND IT INHIBITS THE INDIVIDUAL FROM REACHING OUT WITH WHAT HE HAS LEARNED AND APPLYING IT.

The slow student, the glib student, the student who cannot apply are all *students who are withholding*.

This is true of any Course and any materials and has always been true but no one ever worked it out since they had no real command of the subject of the mind before Dianetics and Scientology.

The culture itself encourages dishonesty and therefore has not been able to solve fully the problem of study.

Only an honest student really reads, really does what he is supposed to do and really applies.

## PILOTS

There were several pilot Courses to find this material.

The one which finally proved it was a Course of about 12 students.

They were very slow. They were unable to apply the materials during an apprenticeship.

It was then found *none* of them had done an honest Primary Rundown. They had “know bested” their way through it, cheating, and had falsely attested.

Then further investigation showed *each* one of them had come to the Course with his Ethics badly out.

A Confessional was then done on each of them and they were restarted to again do a full Primary Rundown, Student Hat and the materials.

Only then did they succeed in their application of what was studied.

This was also true of their Supervisors, each one of whom had done his Supervisor’s Course with his Ethics out. So one should not blame the students only!

A Case Supervisor in training could not Case Supervise well. It was found he had not even read the case history section sample programs because “he already knew” yet attested he had. Prior to all this his Ethics were out.

When his withholds were handled he could then supervise cases and did well.

## CONFESSIONALS

The technology of Confessionals has been upgraded enormously in the last year.

With this vast improvement it becomes possible to remove the barriers and counter-intention to getting his Ethics in and studying in an ethical fashion and being able to *reach* with the materials studied and so apply them.

If any student, beginning in a school or on a Course, is given a standard Confessional before beginning serious study, he will proceed *much* more rapidly, will study honestly, will apply study materials and, if actual study tech is used, will become a successful student of that subject and will be able to apply what he learns.

Study tech used by itself will succeed somehow in a large number of cases. But when it is preceded by a well done and thorough Confessional its results are more thorough and far more rapid.

When I was first working on evaluations of study in 1971 the “dishonesty factor” appeared as a very general Why. But it was not worked with at that time as there seemed no easy way to handle it.

By improving the technology of Confessionals on another entirely different research channel, the problem of the student also became clear.

Only the honest student is a good student and a credit to his class and the subject and himself.

The only reservation then is that the Confessional itself has to be done competently and honestly. But honest Confessionals breed honest Confessional auditors and this can be closely supervised as an expert action.

This opens the road to improvement and wider success in the already winning and successful subject of Study Tech.

Man is not happy unless he is honest. White, black, red or brown, this is true of all times and all races. And it is true of all students in all schools.

The honest student is the most successful student.

And the technology of the Confessional can make him so, rapidly and easily.

**INTEGRITY PROCESSING QUESTIONS**

**MUST BE F/Ned**

The main danger of Integrity Processing is not probing a person's past but failing to do so thoroughly.

When you leave an Integrity Processing question "live" and go on to the next one, you set up a nasty situation that will have repercussions. The person may not immediately react. But the least that will happen is that he will be more difficult to audit in the future, and will go out of session more easily. More violently, a pc who has had an Integrity Processing question left unflat may leave the session and do himself or Scientology considerable mischief.

About the most unkind thing you could do to a person would be to leave an Integrity Processing question unflat and go on to the next one. Or to fail to obtain an F/N on withholds in the rudiments and go on with the session.

One girl, being audited, was left unflat on a withhold question. The Auditor blithely went on to the next question. The girl went out after session, and told everyone she knew the most vicious lies she could create about the immoral conduct of Scientologists. She wrote a stack of letters to people she knew out of town, telling gruesome tales of sexual orgies. An alert Scientologist heard the rumors, rapidly traced them back, got hold of the girl, sat her down and checked auditing and found the unflat withhold question. The withhold? Sexual misdemeanors. Once that was pulled, the girl hastily raced about correcting all her previous efforts to discredit.

A man had been a stalled case for about a year. He was violent to audit. The special question was finally asked, "What withhold question was left unflat on you?" It was found and *handled*. After that his case progressed again.

The mechanisms of this are many. The reactions of the pc are many. The summation of it is, when an Integrity Processing question is left unflat on a pc and thereafter ignored, the consequences are numerous.

**THE REMEDY**

The prevention of Integrity Processing being left unflat is easily accomplished:

1. Develop excellent TRs and Basic Auditing.
2. Know the E-Meter.
3. Work only with an approved E-Meter.
4. Know the various bulletins on Integrity Processing.
5. Get off your own withholds so that you won't avoid those in others.
6. Apply correct Integrity Processing procedure and handle each reading question to an honest F/N on that question.

*Integrity Processing Series 11R*

**GENERALITIES WON'T DO**

The most efficient way to upset a pc is to leave an Integrity Processing question unflat. This is remedied by taking each reading question to an F/N on the question.

The best way to “miss” an Integrity Processing question is to let the pc indulge in generalities or “I thought ....”

A withhold given as “Oh, I got mad at them lots of times,” should be pulled down to when and where and the first time “you got mad” and finally, “What did you do to them just before that?” Then earlier similar if no F/N.

The pc who withholds somebody else’s withholds and gives them as answers is a card. But he isn’t helped when the auditor lets him do it.

Situation: You ask the pc for a withhold about Joe. The pc who says, “I heard that Joe . . . ,” should be asked right there, “What have you done to Joe? You. Just you.” And it turns out he stole Joe’s last blonde. But if the auditor had let this pc go on and on about how the pc had heard how Joe was this or that, the session would have gone on and on and the Tone Arm up and up.

We have pcs who use “withholds” to spread all manner of lies. We ask this pc, “Have you ever done anything to the Org?” The pc says, “Well, I’m withholding that I heard . . . ,” or the pc says, “Well, I thought some bitter thoughts about the Org.” Or the pc says, “I was critical of the Org when . . . ,” and we don’t sail in and get **WHAT THE PC DID**, we can comfortably stretch a 5-minute item to a session or two.

If the pc “heard” and the pc “thought” and the pc “said” in answer to an Integrity Processing question, the pc’s reactive bank is really saying, “I’ve got a crashing big withhold and if I can keep on fooling around by giving critical thoughts, rumours, and what others did, you’ll never get it.” And if he gets away with it, the auditor has missed a withhold question.

We only want to know what the pc did, when he did it, what was the first time he did it and what he did just before that, and we’ll nail it every time.

---

**THE IRRESPONSIBLE PC**

If you want to get withholds off an “irresponsible pc” you sometimes can’t ask what the pc did or withheld and get a meter reaction.

This problem has bugged us for some time; I finally got very bright and realized that no matter whether the pc thought it was a crime or not, he or she *will* answer up on “don’t know” versions as follows:

Situation: “What have you done to your husband?” Pc’s answer, “Nothing bad.” E-Meter reaction, nul. Now we know this pc, through our noticing she is critical of her husband, has overts on him. But she can take no responsibility for her own acts.

But she *can* take responsibility for his *not knowing*. She is making certain of that.

So we ask, “What have you done that your husband doesn’t know about?”

And it takes an hour for her to spill it all, the quantity is so great. For the question releases the floodgates. The Meter bangs around.

And with these withholds off, her responsibility comes up and she *can* take responsibility on the items.

This applies to any zone or area or terminal of Integrity Processing.

Situation: We are getting a lot of “I thought”, “I heard”, “They said”, “They did” in answer to a question. We take the terminal or terminals involved and put them in this blank:

“What have you done that \_\_\_\_\_(doesn’t) (don’t) know about?”

And we can get the major overts that lay under the blanket of “How bad everyone is but me.”

---

This prevents you missing an Integrity Processing question. It’s a bad crime to do so. This will shorten the labour involved in getting every question flat.

And if your pc is withholdy you can insert this “Have I missed an Integrity Processing question on you?” while doing the processing.

Always clear up what was missed.

A pc can be very upset by reason of a missed Integrity Processing question. Keep them going up, not down.

*Integrity Processing Series 12R*

**WITHHOLDS, MISSED  
AND PARTIAL**

I don't know exactly how to get this across to you except to ask you to be brave, squint up your eyes and plunge.

I don't appeal to reason. Only to faith at the moment. When you have a reality on this, nothing will shake it and you'll no longer fail cases or fail in life. But, at the moment, it may not seem reasonable. So just try it, do it well and day will dawn at last.

What are these natterings, upsets, ARC Breaks, critical tirades, lost *students*, ineffective motions? *They are restimulated but missed or partially missed withholds.* If I could just teach you that and get you to get a good reality on that in your own auditing, your activities would become smooth beyond belief.

It is true that ARC Breaks, present time problems and withholds all keep a session from occurring. And we must watch them and clear them.

But behind all these is another button, applicable to each, which resolves each one. And that button is the restimulated but missed or partially missed withhold.

---

Life itself has imposed this button on us.

If you know about people or are supposed to know about people, *then* these people expect, unreasonably, that you know them through and through.

Real knowledge to the average person is only this: a knowledge of his or her withholds! That, horribly enough, is the high tide of knowledge for the man in the street. If you know his withholds, if you know his crimes and acts, then you are *smart*. If you know his future you are moderately wise. And so we are persuaded toward mind reading and fortune telling.

All wisdom has this trap for those who would be wise.

Egocentric man believes all wisdom is wound up in knowing his misdemeanors.

IF any wise man represents himself as wise and fails to discover what a person has done, that person goes into an antagonism or other misemotion toward the wise man. So they hang those who restimulate and yet who do not find out about their withholds.

This is an incredible piece of craziness. But it is observably true.

This is the WILD ANIMAL REACTION that makes Man a cousin to the beasts.

A good auditor can understand this. A bad one will stay afraid of it and won't use

---

“Have I missed a withhold on you?” can be used in Integrity Processing if the preclear gets upset or critical during session.

---

Any ARC Broken pc should be asked, “What withhold have I missed on you?” Or, “What have I failed to find out about you?” Or, “What should I have known about you?”

---

An Integrity Processing Specialist who cannot read a meter is dangerous because he or she will miss withholds and the pc may become very upset.

---

Use this as a stable datum: If the person is upset, somebody failed to find out what that person was sure they would find out.

---

A missed withhold is a should have known.

---

The only reason anyone has ever left Scientology is because people failed to find out about them.

---

This is valuable data. Get a reality on it.

#### **HELP THE PC**

In general, when getting rudiments in or getting off missed withholds or invalidations, help the pc by guiding his attention against the needle.

This is quite simple. The auditor asks the question, the needle instantly reacts, the pc (as he or she usually does) looks puzzled if the auditor says "It reacts." The pc thinks it over. As he or she is thinking, the auditor will see the same reaction on the needle. Softly the auditor says "That" or "There" or "What's that you're looking at?" As the pc knows what he or she is looking at that instant, the thing can be dug up.

This is auditor co-operation, not triumph.

Most often the pc does not know what it is that reacts as only unknowns react. Therefore an auditor's "There" when the needle twitches again, before the pc has answered, co-ordinates with whatever the pc is looking at and thus it can be spotted and revealed by the pc. This is only done when the pc comm lags for a few seconds.

Remember, the pc is always willing to reveal. He or she doesn't know What to reveal. Therein lies the difficulty. Pcs get driven out of session when asked to reveal something yet do not know *what* to reveal.

By the auditor's saying "There" or "What's that?" quietly each time the needle reacts newly, the pc is led to discover what should be revealed.

Auditors and pcs get into a games condition in Integrity Processing and rudiments only when the auditor refuses this help to the pc.

New auditors routinely believe that in Integrity Processing the pc *knows* the answer and won't give it. This is an error. If the pc knew all the answer, it wouldn't react on the meter.

Old-timers have found out that only if they steer by repeated meter reaction, giving the pc "There" or "What's that?" *can* the pc answer up on most rudiments questions, missed withholds and so on.

But don't use steering to harass the pc, or cut his comm, or draw attention to the auditor.

This is the only use of reads other than instant reads on the E-Meter.

Help the pc. He *doesn't* know. Otherwise the needle would never react.

**HAVINGNESS**

All valences are circuits are valences.

Circuits key out with knowingness.

This is the final definition of havingness.

*Havingness is the concept of being able to reach. No-havingness is the concept of not being able to reach.*

A withhold makes one feel he or she cannot reach. Therefore withholds are what cut havingness down and made runs on havingness attain unstable gains. In the presence of withholds havingness sags.

As soon as a withhold is pulled, ability to reach is *potentially* restored but the pc often does not discover this. It requires that havingness be run to get the benefit of having pulled most withholds.

Therefore havingness may be run in conjunction with Integrity Processing but may NOT be used to hide or obscure the fact of failure to F/N an Integrity Form question.

**CONFRONT**

There are several choices in English on the meaning of “confront”. These include the right one: To face without flinching or avoiding. An example in a sentence: “The test of a free society is its capacity to confront rather than evade the vital questions of Choice.”

There is another meaning “To stand facing or opposing, especially in challenge, defiance or accusation.”

English is a pretty limited language in many ways. I imagine the thought of facing something (which is what the word came from and originally meant way back “front” being “face”) was so horrifying to the types who write dictionaries they knew it would be bad!

In essence it is an action of being able to face.

If one cannot, if he avoids, then he is not AWARE.

Awareness is the ability to perceive the existence of. In the dictionary it also fails to confront that and says “Awareness: the quality or state of being aware.” And Aware means: “marked by realization, perception or knowledge.”

So these chaps couldn’t confront and so conceived awareness to be figure-figure.

We are moving out of the range of language when we want to say:

“He could stand up to things and wasn’t always shrinking back into himself and avoiding, so he could be fully conscious of the real universe and others around him.”

And that’s what Confront means.

If one can confront he can be aware.

If he is aware he can perceive and act.

If he can’t confront he will not be aware of things and will be withdrawn and not perceiving. Thus he is unaware of things around him.

That’s the tech of it.

## STEP FOUR—HANDLING ORIGINATIONS

Edited and taken from  
PROFESSIONAL AUDITOR'S BULLETIN NO. 151  
1 January 1959

What do we mean by an origin of the preclear? He volunteers something all on his own; and do you know that is a very good index of case—whether the person volunteers anything on his own? An old-time auditor used this as a case index. He said, "This fellow isn't getting any better. He hasn't offered up anything yet." You see, he didn't originate—he didn't originate a communication.

So remember that the preclear is as well as he can originate a communication. That means he can stand at Cause on the communication formula. And that is a desirable point for him to reach.

But how about in the walk-away world—the world that is ambulant and moving around and spinning quietly, or noisily, as the case may be? Do you ever have to handle an origin in it? Well, I dare say that every argument you have ever got into was because you did not handle an origin. Every time you have ever got into trouble with anybody, you can trace it back along the line you didn't handle. If a person walks in and says, "Whee! I've just passed with the highest mark in the whole school," and you say, "I'm awfully hungry, shouldn't we go out and eat?"—you'll find yourself in a fight. He feels ignored. He originated a communication to have you prove to him that he was there and he was solid. Most little kiddies get frantic about their parents when their parents don't handle their originations properly. Handling an origination merely tells the person, "All right, I heard it, you're there." You might say it is a form of acknowledgment, but it's not; it is the communication formula in reverse. But the auditor is still in control if he handles the origin—otherwise, the communication formula goes out of his control and he is at effect point, no longer at cause point. An auditor continues at cause point.

So let's look this over. The handling of an origin has a great deal of use and, until recently, it was the least pat step in Scientology. How did you handle an origin? And we finally found out. I finally had a cognition myself. I tried for a long time to communicate this to people and they still blundered on it occasionally. And I finally found out something that did seem to communicate.

There are three steps in handling an origin. Here is the setup: The preclear is sitting in the chair and the auditor is sitting across from the preclear, and the auditor is saying, "Do fish swim?" or "Do birds fly?" and the preclear says, "Yes." Here is the factor, now, entering: "Do fish swim?" The preclear doesn't answer *Do fish swim*, the preclear says, "You know—your dress is on fire," or "I'm eight feet back of my head," or "Is it true that all cats weigh 1.8 kilograms?" You see, wog-wog—where did this come from? Well, although it is usually circuitry or something like that at work when it's that far off beam, it is, nevertheless, an origin. How do you handle it? Well, you don't want the preclear to go out of session, and he would if you handled it wrongly, so (1) you answer it; (2) you maintain ARC (you don't spend any time at it, but you just maintain ARC); and (3) you get the preclear back on the process. One, two, three. And if you spend too much time in (2), you'll be doing wrong.

What is an origin? All right, he says, “I’m eight feet back of my head.” It’s an origin; what are you supposed to do with it? Well, you’re supposed to answer it. In this particular case, you would say to him something in the order of, “You are?” (You mean something like, “I’ve heard the communication—it’s made an effect on me.”) Now, in maintaining ARC you can skimp that second one if you handle the third one expertly enough. The least important one is the second one, but the most deadly thing you can do is utterly to neglect the second one of maintaining ARC. That’s deadly. But you can skip it if you really punch it into the third one, which is to say, get him back into session. So he says, “I’m eight feet back of my head,” and you say, “YOU ARE???” (What he said really hit, you know.) He’s kind of wog-wog about this—he’s not sure what this is all about. You say, “You are?” and the fellow says, “Yes.”

“Well!” you say. “What did I say that made that happen?”

“Oh, you said ‘Do birds fly?’ and I thought of myself as a bird and I guess that’s the way it is, but I am eight feet back of my head.”

“Well, that’s pretty routine,” you say—reassure him, maintain the ARC. “Now, what was that auditing question?”

“Oh, you asked me ‘Do birds fly?’ “

And you say, “That’s right. Do birds fly?”

Back in session, you see.

You can’t do this: You can’t put it into a can and put a label on it and say “This is how you do it always,” because it’s always something peculiar; but you can say these three steps are followed.

I will give you another example. You say, “Do birds fly?” and he says, “I have a blinding headache.”

“You do?” you say. “Is it bothering you (that’s the ARC) too much to carry on with the session (and you’ve reached number three at once)?”

“Oh no—it’s pretty bad though.”

“Well, let’s go on with this, shall we?” you say. “Maybe it’ll do something with it (maintaining ARC).”

He says, “Well, all right,” and you’re right back onto it again: “Do birds fly?”

One of the trickiest of these is “What in my question reminded you of that?” The fellow says, “Well, so and so,” and he explains it to you and you say, “Well, good. Do birds fly?” and you’re right back in session again.

Three parts, and—that is the important thing—you have to learn how to handle these things.

**AXIOM 28 AMENDED**

AXIOM 28.

COMMUNICATION IS THE CONSIDERATION AND ACTION OF IMPELLING AN IMPULSE OR PARTICLE FROM SOURCE-POINT ACROSS A DISTANCE TO RECEIPT-POINT, WITH THE INTENTION OF BRINGING INTO BEING AT THE RECEIPT-POINT A DUPLICATION AND UNDERSTANDING OF THAT WHICH EMANATED FROM THE SOURCE-POINT.

The formula of Communication is: Cause, Distance, Effect, with Intention, Attention and Duplication WITH UNDERSTANDING.

The component parts of Communication are Consideration, Intention, Attention, Cause, Source-point, Distance, Effect, Receipt-point, Duplication, Understanding, the Velocity of the impulse or particle, Nothingness or Somethingness. A non-communication consists of Barriers. Barriers consist of Space, Interpositions (such as walls and screens of fast-moving particles), and Time. A communication by definition, does not need to be two-way.

When a communication is returned, the formula is repeated, with the receipt-point now becoming a source-point and the former source-point now becoming a receipt-point.

**GRADIENTS IN TRs**

(Taken from LRH Tape of 30 June 1961,  
“Training on TRs—Talk on Auditing”)

Time after time you’re going to find somebody in an Organization trying to teach the TRs this way: Go on to TR 0 and stick there.

Eight months later he’ll still be doing the TR 0.

You’re going to find that consistently, because the element of ENDURE enters into it. That is improper.

Here is the way you do the TRs. You’ll find it *very* valuable.

You do TR 0, flunking only TR 0. You go on to TR 1. The guy didn’t pass TR 0. He just got accustomed to it a little bit.

You do TR 1, flunking only TR 1. Don’t flunk anything else.

TR 2, flunking only TR 2.

TR 3, flunking only TR 3.

TR 4, flunking only TR 4.

Now come back to TR 0. Get the guy better at TR 0.

Then go through it again, flunking only the TR he is on. *It’s kind of like running the CCHs—they get a little bit of a win at it and you go on to the next one.*

About the third run through or maybe the fifth run through, according to your judgement, you *start TR 0 and you insist that it’s pretty good; and* you should really start cuffing him around. Flunk only the one he’s on but start cuffing him around hard. Give him the business. Give him things he can’t possibly confront. Try to shake him up.

Now—start in TR 0 and give him the works. TR 1 and give him the works. TR 2—3—4. Flunk only the TR that he’s on, but give him the works. Don’t give him a chance.

Run through the TRs that way a couple of times, flunking only the TR that he’s on, giving him the works, pushing his buttons. Give him something to confront for sure.

And then start the business of TR 0, mess him up, TR 1, mess him up—and flunk TR 1 AND TR 0.

TR 2, mess him up, flunk TR 2, TR 1, TR 0.

Get him on TR 3, messing him up and flunking TR 3, TR 2, TR 1, TR 0.

Get him on TR 4, messing him up and flunking TR 4, TR 3, TR 2, TR 1, TR 0.

Thereafter in running the TRs *always* give him the works. Flunk everything in that battery of TRs.

If you do that, you shorten considerably the time it takes to learn the TRs.

In other words, you approach this with a gradient scale.

We did learn about gradient scales many years ago and we should continue to apply that knowledge.

Let them get used to each TR.

You'll find out they progress much faster if you do it that way.

*Cramming Series 10RA*

**CRAMMING**

The datum that “Qual does not take orders” solves the Admin Cramming dilemma of the staff member crammed four times on the Dev-T Pack.

It is up to Qual to handle, fully and totally. This means, not following the exact order, but finding the real Why on the person and handling it at once.

Qual’s function is correction. By policy Qual does not take orders on What to do to correct.

Where an exec wants certain material covered, that’s okay. Cover it. But find the WHY! And on a repeat order, realize it was a wrong Why and really work it over.

Several staff have been crammed several times on the Dev-T Pack. Means Qual takes orders.

The PRODUCT of Qual Admin Cramming is a functioning producing staff member who can produce on post.

Injuries, operations, delivery of babies, severe illnesses and periods of intense emotional shock all deserve to be handled with thorough and complete assists.

Medical examination and diagnosis should be sought where needed, and where treatment is routinely successful, medical treatment should be obtained. As an assist can at times cover up an actual injury or broken bone, no chances should be taken, especially if the condition does not easily respond. In other words where something is merely thought to be a slight sprain, to be on the safe side an X-ray should be obtained, particularly if it does not at once respond. An assist is not a substitute for medical treatment but is complementary to it. It is even doubtful if full healing can be accomplished by medical treatment alone and it is certain that an assist greatly speeds recovery. In short, one should realize that physical healing does not take into account the being and the repercussion on the spiritual beingness of the person.

Injury and illness are **PREDISPOSED** by the spiritual state of the person. They are **PRECIPITATED** by the being himself as a manifestation of his current spiritual condition. And they are **PROLONGED** by any failure to fully handle the spiritual factors associated with them.

The causes of **PREDISPOSITION**, **PRECIPITATION** and **PROLONGATION** are basically the following:

1. Postulates.
2. Engrams.
3. Secondaries.
4. ARC Breaks with the environment, situations, others or the body part.
5. Problems.
6. Overt Acts.
7. Withholds.
8. Out of communicationness.

The purely physical facts of injuries, illnesses and stresses are themselves incapacitating and do themselves often require physical analysis and treatment by a doctor or nutritionist. These could be briefly catalogued as:

- A. Physical damage to structure.
- B. Disease of a pathological nature.
- C. Inadequacies of structure.
- D. Excessive structure.
- E. Nutritional errors.
- F. Nutritional inadequacies.
- G. Vitamin and bio-compound excesses.
- H. Vitamin and bio-compound deficiencies.
- I. Mineral excesses.
- J. Mineral deficiencies.
- K. Structural malfunction.
- L. Erroneous examination.
- M. Erroneous diagnosis.
- N. Erroneous structural treatment.
- O. Erroneous medication.

There is another group which belongs to both the spiritual and physical divisions. These are:

- i. Allergies.
- ii. Addictions.
- iii. Habits.
- iv. Neglect.
- v. Decay.

Any of these things in any of the three groups can be a cause of non-optimum personal existence.

We are not discussing here the full handling of any of these groups or what optimum state can be attained or maintained. But it should be obvious that there is a level below which life is not very tolerable. How well a person can be or how efficient or how active is another subject entirely.

Certainly life is not very tolerable to a person who has been injured or ill, to a woman who has just delivered a baby, to a person who has just suffered a heavy emotional shock. And there is no reason a person should remain in such a low state, particularly for weeks, months or years when he or she, could be remarkably ASSISTED to recover in hours, days or weeks.

It is in fact a sort of practised cruelty to insist by neglect that a person continue on in such a state when one can learn and practise and obtain relief for such a person.

We are mainly concerned with the first group, 1-8. The group is not listed in the order that it is done but in the order that it has influence upon the being.

The idea has grown that one handles injuries with touch assists only. This is true for someone who as an auditor has only a smattering of Scientology. It is true for someone in such pain or state of case (which would have to be pretty bad) that he cannot respond to actual auditing.

But a Scientologist really has no business "having only a smattering" of auditing skills that could save his or the lives of others. And the case is very rare who cannot experience proper auditing.

The actual cause of not handling such conditions is, then, to be found as iv. NEGLECT. And where there is Neglect, v. DECAY is very likely to follow.

One does not have to be a medical doctor to take someone to a medical doctor. And one does not have to be a medical doctor to observe that medical treatment may not be helping the patient. And one does not have to be a medical doctor to handle things caused spiritually by the being himself.

Just as there are two sides to healing—the spiritual and the structural or physical, there are also two states that can be spiritually attained. The first of these states might be classified as “humanly tolerable”. Assists come under this heading. The second is spiritually improved. Grade auditing comes under this second heading.

Any minister (and this has been true as long as there has been a subject called religion) is bound to relieve his fellow being of anguish. There are many ways a minister can do this.

An assist is not engaging in healing. It is certainly not engaging in treatment. What it is doing is ASSISTING THE INDIVIDUAL TO HEAL HIMSELF OR BE HEALED BY ANOTHER AGENCY BY REMOVING HIS REASONS FOR PRECIPITATING, AND PROLONGING HIS CONDITION AND LESSENING HIS PREDISPOSITION TO FURTHER INJURE HIMSELF OR REMAIN IN AN INTOLERABLE CONDITION.

This is entirely outside the field of “healing” as envisioned by the medical doctor and by actual records of results is very, very far beyond the capability of psychology, psychiatry and “mental treatment” as practised by them.

In short, the assist is strictly and entirely in the field of the spirit and is the traditional province of religion.

A minister should realize the power which lies in his hands and his potential skills when trained. He has this to give in the presence of suffering: he can make life tolerable. He can also shorten a term of recovery and may even make recovery possible when it might not be otherwise.

When a minister confronts someone who has been injured or ill, operated upon or who has suffered a grave emotional shock, he should be equipped to do and should do the following:

A CONTACT ASSIST where possible and where indicated until the person has reestablished his communication with the physical universe site. To FN.

A TOUCH ASSIST until the person has reestablished communication with the physical part or parts affected. To FN.

HANDLE ANY ARC BREAK that might have existed at the time a) with the environment, b) with another, c) with others, d) with himself, e) with the body part or the body, and f) with any failure to recover at once. Each to FN.

HANDLE ANY PROBLEM the person may have had a) at the time of illness or injury, b) subsequently due to his or her condition. Each to FN.

HANDLE ANY OVERT ACT the person may feel he or she committed a) to self, b) to the body, c) to another, and d) to others. Each to FN.

HANDLE ANY WITHHOLD a) the person might have had at the time, b) any subsequent withhold, and c) any having to withhold the body from work or others or the environment due to being physically unable to approach it.

HANDLE ANY SECONDARY, which is to say emotional reactions, before, during or after the situation. This must be run from the first intimation something was wrong or going to happen or being told something had happened. This is by chain to FN. And then Flow 2 to FN and then Flow 3 to FN.

HANDLE ANY ENGRAM of actual physical duress. Run Flow 1 by chain to FN. Then Flow 2 to FN. Then Flow 3 to FN. It is understood here that Flow One was the physical incident itself, not necessarily something done to the person but as something that happened to him or her.

POSTULATE TWO-WAY COMM. This is two-way comm on the subject of “any decision to be hurt” or some such wording. This is done only if the person has not

already discovered that he had decisions connected to the incident. It is carried to FN. One must be careful not to invalidate the person.

Where a person is injured, given a contact or touch assist and then medical examination and treatment, he is given the remainder as soon as he is able to be audited. The drug "five days" does not need to apply. But where the person has been given an assist over drugs, one must later come back to the case when he is off drugs and run the drug part out or at least make sure that nothing was submerged by the drugs. It is not uncommon for a person to be oblivious of certain parts of a treatment or operation at the time of initial auditing, only to have a missing piece of the incident pop up days, months or even years later. THIS is the reason injuries or operations occasionally seem to persist despite a full assist: a piece of it was left unhandled due to a drugged condition during the operation; such bits may come off unexpectedly in routine auditing on some other apparently disrelated chain.

It can happen that a person is in the midst of some grade auditing at the time of an injury or illness or receiving an emotional shock. The question arises as to whether or not to disrupt the grade auditing to handle the situation. It is a difficult question. But certainly the person cannot go on with grade auditing while upset or ill. The usual answer is to give a full assist and repair the case to bridge it back into the grade auditing. The question however may be complicated in that some error in the grade auditing is also sitting there, not to cause the illness or accident but to complicate the assist. This question is handled fully only by study of the case by a competent Case Supervisor. The point is not to let the person go on suffering while time is consumed making a decision.

### SUMMARY

Religion exists in no small part to handle the upsets and anguish of life. These include spiritual duress by reason of physical conditions.

Ministers long before the Apostles had as a part of their duties the ministering to the spiritual anguish of their people. They have concentrated upon spiritual uplift and betterment. But where physical suffering impeded this course, they have acted. To devote themselves only to the alleviation of physical duress is of course to attest that the physical body is more important than the spiritual beingness of the person which, of course, it is not. But physical anguish can so distract a being that he deserts any aspirations of betterment and begins to seek some cessation of his suffering. The specialty of the medical doctor is the curing of physical disease or non-optimum physical conditions. In some instances he can do so. It is no invasion of his province to assist the patient to greater healing potential. And ills that are solely spiritual in nature are not medical.

The "psych-iatrist" and "psych-ologist" on the other hand took their very names from religion since "psyche" means soul. They, by actual statistics, are not as successful as priests in relieving mental anguish. But they modernly seek to do so by using drugs or hypnotism or physical means. They damage more than they help.

The minister has a responsibility to his people and those about him to relieve suffering. He has many ways to do this. He is quite successful in doing so and he does not need or use drugs or hypnotism or shock or surgery or violence. Until his people are at a level where they have no need of physical things, he has as a duty preventing their spiritual or physical decay by relieving where he can their suffering.

His primary method of doing so is the ASSIST.

As the knowledge of how to do them exists and as the skill is easily acquired, he actually has no right to neglect those for whose well-being he is responsible, as only then can he lead them to higher levels of spiritual attainment.

**RECOVERING STUDENTS  
AND PCS**

ARC Brk Regs and Tours Personnel (as well as Ethics Officers) collide with students and pcs who have blown (run away from) the org.

The recovery of these and getting them back on the line is of great interest to such personnel.

In the first place, they muddy up a field. In the second place EVERY ONE OF THEM CAN BE GOTTEN BACK IN.

If you leave them about they spoil prospects.

And there's nothing more startling to their friends than to have these people who have been nattering around suddenly turn up (repaired) saying, "OK it's all fine now. They're great guys."

Because Tech *does* work, this is not hard to do. Down deep they know that we do have the answer. It's an apparent refusal to apply it to them they're concerned about.

Poor offbeat Supervision, poorly trained auditors, lack of cramming in an org get in your way. So you have a deep interest that tech, in both Courses and Auditing, is straight.

**STUDENTS**

Students who doped in Class, nattered or got upset have been known to blow (leave hurriedly).

But also, students who are interrupted too often when F/Ning may also blow! On a "w/h of nothingness".

These points-"not helped by the Super" and "interfered with too much"-must BOTH be checked on getting blown students back.

ARC Brk Registrars and Tours people run into these blown students. They must know how to handle.

There are 5 main blow reasons:

1. Misunderstood words (or no materials).
2. No help or WC Method 4 from the Supers (or no Super).
3. Interference from the Supers that stopped them from getting on.

4. Personal out-Ethics resulting in a w/h.
5. Simply booted off for reasons best known to God or Registrars (like suddenly saying “You must now buy Method 1” etc, thus violating the “deliver what we promise” rule).

The interference and boot-off reasons are the ones you’d least suspect. Both generate a lot of H, E & R (Human Emotion and Reaction).

The reasons most pcs blow are

1. Out lists
2. No auditing
3. Invalidation of case or gains
4. Told they’d attained it and hadn’t.

Of these the out list (meaning overlist or wrong items) produces the most fantastic HE&R. Needs repair with an “L4B”.

No auditing includes being sent to Ethics or Cramming (on Solo) or just stalled. Remedy is to deliver what’s promised.

Invalidation of case or gains includes being made to go on past a win. This acts as an invalidation. Some pcs who made it are hung up from then on out because no one asked them to declare it. Remedy is to get it declared.

When told they had attained it and hadn’t they feel cut off from all further help. Remedy is to repair it by getting off the suppress and finish up the job in the org.

TO HANDLE ANY OF THIS YOU MUST REALIZE THAT TECH *DOES* WORK IN BOTH STUDY AND AUDITING.

The most *gross* errors have to exist before it doesn’t work.

Auditors *can* be trained to audit and *can* audit. But some SP in an org gets some out tech order in force like “Auditors mustn’t do TR 0 in Cramming as it stirs up their cases” (which is a complete lie and which was just found as NY’s reason for poor tech and down stats).

## ACTION

When handling the blown student or pc you can assess the above points on a meter. Or just know them by heart and rattle them off and you’ll get the real reason right now.

The object is to put the student or pc back on the rails.

The above points are all valid.

A very fast way to handling auditing outnesses is to give a FREE AUDITING CHECK using HCO B 31 Dec 71, Revised 16 May 72, C/S Series 53RC. To it one adds “No Auditing” at the end under L. One has a good auditor (who has good TRs and who knows how to read a meter well) assess it on the blown or upset pc.

One or more of these items will give a Long Fall Blowdown. You indicate this to the pc. You don’t handle it. You just say, “The reason you were upset was (whatever read).” The pc should suddenly magically feel better.

DON'T try to Audit it further on a FREE CHECK. Tell the pc to go to the org to get everything handled now.

Route the assessed sheet "To the PC FOLDER OF (pc's name). PUT IN FOLDER FOR FIRST AUDITING ACTION," and sign it.

The above checklists can be done on students by discussion. Don't use the C/S 53RC and the pc checklist both as the pc checklist above is on the C/S 53RC.

The difference is C/S 53RC has to be done by an auditor. The other list can be done in 2 way comm socially.

In phoning people and running into ARC Broken pcs or students the two short checklists can be used.

Sea Org Missions have successfully used another approach. They say they're there to handle the org and make it a safe place. The response is very gratifying.

THE PUBLIC HATES LIKE HELL TO BE DENIED DIANETICS AND SCIENTOLOGY .

After all you're just handing them their future happiness on a silver platter.

Don't just avoid such people. And don't bother to listen to the natter. The above actions are the reasons.

Puts you right on top of the situation.

That's where Tours and ARC Brk Regs and auditors should be.

I recall one old fellow who blew an org staff (SH), hated everybody. Stayed away for years. A student auditor ran into him socially, grabbed a meter and put in Level III (Change and ARC Break) on him. And bang there he was writing to me about how great it all was!

Bad Supervision or untrained or careless auditors or flubbing Admin personnel make a lot of trouble for us. But the vast majority of org staffs are very fine. So don't get down on the org. Get the flubbers unpopular. And get back those who have been flubbed. There are no dog pcs or bad students.

## ETHICS ACTION

Whenever you find one of these you should make a brief report. One copy goes to the Ethics Officer of the org, as a knowledge report. The other goes to FLUB CATCH CONTROL TRAINING AND SERVICES FLAG.

You have to give the when and the who and the what.

Then the org itself and Flag can come down on the outness and correct it.

## SUMMARY

Just knowing these points there are no blown students or pcs you can't get back or get signed up again.

*Art Series 2*

**ART, MORE ABOUT**

Ref: HCO B 30 Aug AD15, ART

How good does a professional work of art have to be? This would include painting, music, photography, poetry, any of the arts whether fine or otherwise. It would also include presenting oneself as an art form as well as one's products.

Yes, how GOOD does such a work of art have to be?

Ah, you say, but that is an imponderable, a thing that can't be answered. Verily, you say, you have just asked a question for which there are no answers except the sneers and applause of critics. Indeed, this is why we have art critics! For who can tell how good good is. Who knows?

I have a surprise for you. There IS an answer.

As you know, I searched for many years, as a sort of minor counterpoint to what I was hardwork doing, to dredge up some of the materials which might constitute the basis of art. Art was the most uncodified and most opinionated subject on the planet after men's ideas about women and women's ideas about men and Man's ideas of Man. Art was anyone's guess. Masterpieces have gone unapplauded, positive freaks have gained raves.

So how good does a work of art have to be to be good?

The painter will point out all the tiny technical details known only to painters, the musician will put a score through the Alto horn and explain about valve clicks and lip, the poet will talk about meter types, the actor will explain how the position and wave of one hand per the instructions of one school can transform a clod into an actor. And so it goes, art by art, bit by bit.

But all these people will be discussing the special intricacies and holy mysteries of technique, the tiny things only the initiate of that art would recognize. They are talking about technique. They are not really answering how *good* a work of art has to be.

Works of art are viewed by people. They are heard by people. They are felt by people. They are not just the fodder of a close-knit group of initiates. They are the soul food of all people.

One is at liberty of course to challenge that wide purpose of art. Some professors who don't want rivals tell their students "Art is for self-satisfaction" "It is a hobby." In other words, don't display or exhibit, kid, or you'll be competition! The world today is full of that figure-figure. But as none of this self-satisfaction art meets a definition of art wider than self for the sake of self, the professional is not interested in it.

In any artistic production, what does one have as an audience? People. Not, heaven forbid, critics. But people. Not experts in that line of art. But people.

That old Chinese poet who, after he wrote a poem, went down out of his traditional garret and read it to the flower-selling old lady on the corner had the right idea. If she understood it and thought it was great, he published. If she didn't he put it in the bamboo trash can. Not remarkably, his poems have come down the centuries awesomely praised.

Well, one could answer this now by just saying that art should communicate to people high and low. But that really doesn't get the sweating professional anywhere as a guide in actually putting together a piece of work and it doesn't give him a yardstick whereby he can say "That is that!" "I've done it." And go out with confidence that he has.

What is technique? What is its value? Where does it fit? What is perfectionism? Where does one stop scraping off the paint and erasing notes and say "That is that"?

For there is a point. Some artists don't ever find it. The Impressionists practically spun in as a group trying to develop a new way of viewing and communicating it. They made it-or some of them did like Monet. But many of them never knew where to stop and they didn't make it. They couldn't answer the question "How good does a piece of art work have to be to be good?"

In this time of century, there are many communication lines for works of art. Because a few works of art can be shown so easily to so many there may even be fewer artists. The competition is very keen and even dagger sharp. To be good one has to be very good. But in what way and how?

Well, when I used to buy breakfasts for Greenwich Village artists (which they ate hungrily, only stopping between bites to deplore my commercialism and bastardizing my talents for the gold that bought their breakfasts) I used to ask this question and needless to say I received an appalling variety of responses. They avalanched me with technique or lack of it, they vaguely dwelt on inherent talent, they rushed me around to galleries to show me Picasso or to a board fence covered with abstracts. But none of them told me how good a song had to be to be a song.

So I wondered about this. And a clue came when the late Hubert Mathieu, a dear friend, stamped with youth on the Left Bank of the Seine and painting dowagers at the Beaux Arts in middle age, said to me "To do any of these modern, abstract, cubist things, you have to first be able to paint!" And he enlarged the theme while I plied him in the midnight hush of Manhattan with iced sherry and he finished up the First Lady of Nantucket's somewhat swollen ball gown. Matty could PAINT. Finally he dashed me off an abstract to show me how somebody who couldn't paint would do it and how it *could* be done.

I got his point. To really make one of these too modern things come off, you first had to be able to paint. So I said well, hell, there's Gertrude Stein and Thomas Mann and ink splatterers like those. Let's see if it really is an art form. So I sharpened up my electric typewriter and dashed off the last chapters of a novel in way far out acid prose and put THE END at the bottom and shipped it off to an editor who promptly pushed several large loaves down the telephone wire and had me to lunch and unlike his normal blase self said, "I really got a big bang (this was decades ago, other years, other slang) out of the way that story wound up! You really put it over the plate." And it sent his circulation rating up. And this was very odd because you see the first chapters were straight since they'd been written before Matty got thirsty for sherry and called me to come over and the last chapters were an impressionistic stream of consciousness that Mann himself would have called "an advanced rather adventurous over-Finneganized departure from the ultra school."

So just to see how far this sort of thing could go, for a short while I shifted around amongst various prose periods just to see what was going on. That they sold didn't prove too much because I never had any trouble with that. But that they were understood at all was surprising to me for their prose types (ranging from Shakespeare to Beowulf) were at wild variance with anything currently being published.

So I showed them to Matty the next time he had a ball gown to do or three chins to paint out and was thirsty. And he looked them over and he said, "Well, you proved my point. There's no mystery to it. Basically you're a trained writer! It shows through."

And now we are getting somewhere, not just with me and my adventures and long dead yesterdays.

As time rolled on, this is what I began to see: The fellow technician in an art hears and sees the small technical points. The artist himself is engrossed in the exact application of certain exact actions which produce, when done, his canvas, his score, his novel, his performance.

The successful artist does these small things so well that he also then has attention and skill left to get out his message, he is not still fiddling about with the cerulean blue and the semiquaver. He has these zeroed in. He can repeat them and repeat them as technical actions. No ulcers. Strictly routine.

And here we have three surrealist paintings. And they each have their own message. And the public wanders by and they only look with awe on one. And why is this one different than the other two? Is it a different message? No. Is it more popular? That's too vague.

If you look at or listen to any work of art, there is only one thing the casual audience responds to en masse, and if this has it then you too will see it as a work of art. If it doesn't have it, you won't.

So what is it?

**TECHNICAL EXPERTISE ITSELF ADEQUATE TO PRODUCE AN EMOTIONAL IMPACT.**

And that is how good a work of art has to be to be good.

If you look this over from various sides, you will see that the general spectator is generally unaware of technique. That is the zone of art's creators.

Were you to watch a crowd watching a magician, you would find one common denominator eliciting uniform response. If he is a good magician he is a smooth showman. He isn't showing them how he does his tricks. He is showing them a flawless flowing performance. This alone is providing the carrier wave that takes the substance of his actions to his audience. Though a far cry from fine art, perhaps, yet there is art in the way he does things. If he is good, the audience is seeing first of all, before anything else, the TECHNICAL EXPERTISE of his performance. They are also watching him do things they know they can't do. And they are watching the outcome of his presentations. He is a good magician if he gives a technically flawless performance just in terms of scenes and motions which provide the channel for what he is presenting.

Not to compare Bach with a magician (though you could), all great pieces of art have this one factor in common. First of all, before one looks at the faces on the canvas or hears the meaning of the song, there is the TECHNICAL EXPERTISE there adequate to produce an emotional impact. Before one adds message or meaning, there is this TECHNICAL EXPERTISE.

TECHNICAL EXPERTISE is composed of all the little and large bits of technique known to the skilled painter, musician, actor, any artist. He adds these things together in his basic presentation. He knows what he is doing. And how to do it. And then to this he adds his message.

All old masters were in there nailing canvas on frames as apprentices or grinding up the lapis lazuli or cleaning paintbrushes before they arrived at the Metropolitan.

But how many paintbrushes do you have to clean? Enough to know that clean paintbrushes make clean color. How many clarinet reeds do you have to replace? Enough to know which types will hit high C.

Back of every artist there is technique. You see them groping, finding, discarding, fooling about. What are they hunting for? A new blue? No, just a constant of blue that is an adequate quality.

And you see somebody who can really paint still stumbling about looking for technique—a total overrun.

Someplace one says, “That’s the TECHNICAL EXPERTISE adequate to produce an emotional impact.” And that’s it. Now he CAN. So he devotes himself to messages.

If you get this tangled up or backwards, the art does not have a good chance of being good. If one bats out messages without a TECHNICALLY EXPERT carrier wave of art, the first standard of the many spectators seems to be violated.

The nice trick is to be a technician and retain one’s fire. Then one can whip out the masterpieces like chain lightning. And all the great artists seem to have managed that. And when they forked off onto a new trail they mastered the technique and *then* erupted with great works.

It is a remarkable thing about expertise. Do you know that some artists get by on “Technical expertise adequate to produce an emotional impact” alone with no messages? They might not suspect that. But it is true.

So the “expertise adequate” is important enough to be itself art. It is never great art. But it produces an emotional impact just from quality alone.

And how masterly an expertise? Not very masterly. Merely adequate. How adequate is adequate? Well, people have been known to criticize a story because there were typographical errors in the typing. And stories by the non-adept often go pages before anyone appears or anything happens. And scores have been known to be considered dull simply because they were inexpertly chorded or clashed. And a handsome actor has been known not to have made it because he never knew what to do with his arms, for all his fiery thunderings of the Bard’s words.

Any art demands a certain expertise. When this is basically sound, magic! Almost anyone will look at it and say Ah! For quality alone has an emotional impact. That it is cubist or dissonant or blank verse has very little bearing on it; the type of the art form is no limitation to audience attention generally when it has, underlying it and expressed in it, the expertise adequate to produce an emotional impact.

The message is what the audience thinks it sees or hears. The significance of the play, the towering clouds of sound in the symphony, the scatter-batter of the current pop group, are what the audience thinks it is perceiving and what they will describe, usually, or which they think they admire. If it comes to them with a basic expertise itself able to produce an emotional impact they will think it is great. And it will be great.

The artist is thought of as enthroned in some special heaven where all is clean and there is no sweat, eyes half closed in the thrall of inspiration. Well maybe he is sometimes. But every one I’ve seen had ink in his hair or a towel handy to mop his brow or a throat spray in his hand to ease the voice strain of having said his lines twenty-two times to the wall or the cat. I mean the great ones. The others were loafing and hoping and talking about the producer or the unfair art gallery proprietor.

The great ones always worked to achieve the technical quality necessary. When they had it they knew they had it. How did they know? Because it was technically correct.

Living itself is an art form. One puts up a mock-up. It doesn’t happen by accident. One has to know how to wash his nylon shirts and girls have to know what mascara runs and that too many candy bars spoil the silhouette, quite in addition to the pancreas.

Some people are themselves a work of art because they have mastered the small practical techniques of living that give them a quality adequate to produce an emotional impact even before anyone knows their name or what they do.

Even a beard and baggy pants require a certain art if they are to be the expertise adequate to produce an emotional impact.

And some products produce a bad misemotional impact without fully being viewed. And by this reverse logic, of which you can think of many examples such as a dirty room, you can then see that there might be an opposite expertise, all by itself, adequate to produce a strong but *desirable* emotional impact.

That is how good a work of art has to be. Once one is capable of executing that technical expertise for that art form he can pour on the message. Unless the professional form is there first, the message will not transmit.

A lot of artists are overstraining to obtain a quality far above that necessary to produce an emotional impact. And many more are trying to machine gun messages at the world without any expertise at all to form the vital carrier wave.

So how good does a piece of art have to be?

HCO BULLETIN OF 30 JULY 1973

BPI

**SCIENTOLOGY, CURRENT STATE OF THE  
SUBJECT AND MATERIALS**

There is a possibility that some Scientologists have not realized the extent of technical materials which exist in Dianetics and Scientology on the subject of the spirit, mind and life.

For instance, there are about 25,000,000 words on tape in archives which provide the consecutive path of discovery.

When placed chronologically with books, HCOBs, HCO PLs and other issues this gives a nearly complete record of all discoveries and applications in these subjects.

The total numbers of words or even the number of tapes and issues to date have not been reliably calculated.

From time to time various efforts have been made to transcribe and issue all the materials. The task should be done, especially before the decay of magnetic tape, some of which was of poor quality, eradicates the material. But proper and safe equipment and trustworthy technicians who would not turn out an overt product have been lacking. A project of assembly in the 1960s was balked by inadequate record pressing material available in the society around us. A more strenuous and reliable effort should be made to place these archives into a more durable form than magnetic tape.

More or less complete sets of all materials exist in many places on the planet to safeguard against destruction.

It is from this tremendous archives that study packs and other materials are made up. These and their checksheets are very numerous and available.

A chronological study of materials is necessary for the complete training of a truly top grade expert in these lines. He can see how the subject progressed and so is able to see which are the highest levels of development. Not the least advantage in this is the defining of words and terms, for each, when originally used, was defined, in most cases, with considerable exactitude, and one is not left with any misunderstandings. It is for this reason that the Saint Hill Briefing Course checksheet should consist only of the chronological materials, studied in chronological order, excepting only the Study Tapes (Primary Rundown) which should be done first if not previously done properly.

An enormous amount of this material does exist in issuable form. While not strictly technical, HCO PLs, almost all of them, now exist in books grouped by subjects and I think will soon exist in chronological form also. It is projected that this be done with HCOBs, but these of course should be only in chronological and complete order and the points where books and tapes were part of this track should be indicated. Transcriptions and edited versions of tapes (which do not however rearrange meaning or alter data) exist for a great many tapes and it is projected that these shall also be the subject of a future issue. For instance, the "Philadelphia Lectures" have recently been transcribed and could easily be edited into volumes for issue and should be, due to their popularity.

The subject of Scientology is to some degree developed in reverse order. The task was to undercut the current level of Man and this was the general target. Therefore one finds the higher levels publicly spoken of most frequently in the earlier books and tapes (between '51 and '55). In seeking full application to others and attainment for them of their potentials it was necessary to codify the materials and develop processes for them.

Any difficulties people were having with going Clear were handled in the mid '60s and OT levels as they exist in Advanced Orgs were completed by '68. There are perhaps 15 levels above OT VII fully developed but existing only in unissued note form, pending more people's full attainment of OT VI & VII.

In the early '70s the bottom was found with the discoveries of exactly what psychosis was and the development of processes to handle it. This was outside the scope of organizations at the time and is not in general use; but it did finalize the task of undercutting low enough to include all spiritual and mental materials, then, within the subject of Scientology, in a state of applicability.

Many people believe that Scientology materials contain mainly processes. They think of Scientology as processing. This is a very narrow view. It is understandable enough as processing is the way out for them. But this neglects the more considerable materials which deal with basics and fundamentals; processes are only one use of these.

Other people, having gotten their smallest toe damp as an HAS then wander off to other fields looking for answers, whereas had they taken Dianetics or Scientology Grade training, to say nothing of the Saint Hill Briefing Course, they would have found more fundamentals than exist in all other subjects combined, a fact which any advanced student of Scientology can confirm.

Still others think that the "newest" is of course the most advanced and are looking for new "processes" to be issued or new materials; whereas the process to resolve their case was most likely issued in earlier years. An amusing instance of this is one whole continental area where an exact set of principles was isolated and exact processes released that handle that exact national type; yet, waiting for something new because they did not know the old, they were found earlier this year to be ignoring this rundown even on new preclears and of course were having a hard time of it for those ARE the basic processes for that continent, for those people DO have that barrier.

For quite a while I have had the "hat of finder of lost tech". Whole sections of knowledge drop out of view, whole arrays of processes (and administrative principles) go out of use and preclears there and the organization of the area sag; but recovery is swift the moment the "lost" knowledge is pulled out of their own file cabinets and restored .

Further, people in organizations are quite often at high case levels. They have already experienced the bridging knowledge which connects the subject to the man in the street. It is not new to THEM. They sometimes err in believing it is not new to the world. Thus gaps are permitted to exist. The solution is to recover the "lost" tech.

But it is also true that many in organizations work very hard to keep the knowledge bridge in. And do well in accomplishing it.

Within the same civilization, many other subjects than Scientology exist. Many of these other subjects are in a very primitive state while pretending a very advanced position. Psychiatry and Psychology are a pair of these. Their pretenses, inhumanities and even cruelties muddy up the field of the spirit and mind. Because they produce negative or even damaging results and because they were "authority" before Scientology began to guide the field toward saner and more civilized levels, Scientology's task of handling the public is made far more difficult than if the public had not been so harmed and made suspicious of the field of the mind. Yet the most mind-wrenching problems Psychiatry and Psychology practitioners think they have (they have not confronted the real ones) give way before the lowest most pedestrian levels of Scientology. There is an amusing story of a Scientologist who attended a social meeting of Psychiatrists and Psychologists and listened to them for a while as they moaned about their patients and their own cases and then, being compassionate, began to explain to them in a sort of technical baby talk the nature and resolution of these "vast" "unsolvable" "problems". As he took no offense at their ignorant arrogance which first greeted him and as he did seem to have a grasp of their troubles, they kept him up until four AM going over their "problems" in detail and gave him more and more absorbed attention and began to cognite. They were very tame and very respectful when he left, certain they had heard the guru of all time: and this is amusing because he was not a trained auditor in any sense of the word and had only read a few Scientology books! Yet to them he was their dean as a professional by comparative and sensible knowledge.

Many Scientologists have had similar experiences. In the field of Scientology Admin tech a staff member who had not had an Org Exec Course but had been hatted in HCO went home for a vacation. His father who, like some fathers, was certain his son was stupid, permitted him, with misgivings, to reorganize the administration of his medical clinic along Scientology lines. The son trained the small staff for only a week, lines began to whizz, patients began to get handled, records went straight, income rose and the father became absolutely convinced that his son was the brightest organizational genius in the country; yet in the org they had considered he had a long way to go to be a good Ethics Officer! Gives you some comparative idea of where the lowest rudimentary levels of Scientology sit in relation to current technologies.

Above such small bits of fringe information the bulk of Scientology knowledge towers into mountains. It is accessible, in the main, to those who seek it. The only barriers are usually their own lack of command of their own language and the misconceptions of study ground into them from kindergarten on. Means of solving these are also available and are daily applied to countless newcomers over the world.

The actual barrier in the society is a failure to practice truth. Living lives of white lies, they find it difficult to grasp that truth actually exists. This can hang on as a habit during the first studies of a student and he can defeat himself utterly by continuing a dishonesty in his study—skipping this, not doing that. For Scientology is the road to truth and he who would follow it must take true steps.

Some, seeing out of their own ambitious eyes and as jealous of any imagined rival as any ferocious boy friend, seek to assert that Scientology is interested in healing. This is something like saying that a Cadillac engineer is interested only in window polish. For when you begin to handle the causative force in Man he often also gets well. The “proofs” of supposing Scientology is a healing activity are abundant enough if one sees the recovery lists in any org. But they were not processed to heal them, only to free them. A recent example of this occurred when a preclear broke her ankle and was given medical treatment. Naturally the org was anxious to get on with her program of processing and the ankle injury was in the way. After weeks in medical hands with the ankle getting worse, the engram of the injury was run out, the ankle got well and the person was again being routinely processed a few days later. The auditor could be said to have been engaged in healing. All he was doing was getting a body difficulty out of his road so he could get on with it.

Recently, having found bottom on the mind and spirit some years ago, I have been looking into physical nutrition and biochemistry. These latter levels lie below the spirit and mind and could be loosely considered to be an undercut as they do impede spiritual gain.

Many people are mainly fixated on the body and living as they do in an intensely materialistic society, they are caught between being a body in the work-a-day world and achieving spiritual freedom. This is of course paradoxical. The game of being a body is the only game they have in their eyes. Thus if something is wrong with their body they manifest having heavy problems and they are anxious at the thought of losing a body: in other words they have a hidden standard of body health as their measure of spiritual attainment which, though illogical, is where they are and what they are doing.

Scientology has long pursued the firm policy of sending the sick to the medical doctor. There is no place they can send the insane as to send them to psychiatry would be to condemn them to horror, and so orgs do not usually handle them at all as they are not equipt to do so even when technically able.

But the sick have been another matter. The gentlemanly thing to do was to give the doctor his due and trust that he would respect the courtesy. Instead, anxious for a total monopoly of health which he is quite incapable of delivering especially in the USA, he seeks to eradicate all fancied rivals. Thus this policy will one day come to an end. It is quite legal to heal by spiritual means and even part of the law of most states and countries and, indeed, was the sole province of religion for thousands of years before the medical doctor came along. But this is no reason why Scientology would make any effort to replace the medical doctor since he has considerable value in the mechanics of bones and structural matters. The only place he falls down is in handling general illnesses, especially of a chronic nature.

Medicine has been overtaken in healing by nutritionists and biochemists. They still seek to exclude these skills from their knowledge and experience. Indeed, when demanding \$46,000,000 to research heart disease from a not always bright Congress in the U.S., medicine was contradicted by no less than the head of Health, Education and Welfare who stated that their “research” as planned did not include biochemistry, a rather strange omission since this is the most result-filled field. It goes without mention that the demand also excluded nutritional research. Many individual doctors are prone to attack any patients they find “on vitamins” or who timidly mention Vitamin E. And one is struck with the fact that heart disease is the largest income source, I believe, of the doctor.

Thus there is a blindness in medical circles to the most productive and curative practices in the field of illness and thus, policy or not, organizations will soon have to bend to public demand and route the bill to doctors only when they have broken bones or need surgery to get the bullets or steering wheels out, and all others to the nutritionist who DOES use all the modern developments in food, vitamins, minerals and advanced biochemistry and use them intelligently.

An estimation of this latter field was therefore in order and I have for some time now been engaged in an evaluation of it and a study of it.

What I have found is that the field lacks coordination of its knowledge, not just from nutritionist to nutritionist but in the works of the same person. A tremendous amount of material has been brought forth in the last three decades. It is in a state of near chaos.

Liquefied grass and other dietary fads have become confused into the sober routine subject of nutrition. Food fadism and nutritional knowledge are interlocked in the public mind to such a degree that some unscrupulous fellow who knows better could advise people to eat only tree bark and they accommodatingly would. For instance there are books and books and books out currently, by M.D.s and others who should have done their homework, inveighing against “cholesterol”: This is a biochemical composition of animal oils and fats. They say it gets into the arteries and causes strokes and heart attacks. Well, that is all very well. But did you also know that every glandular secretion in the body, the secretions which keep one young and functioning are ALL made by the glands from cholesterol? If people do not take in cholesterol bearing foods they, by simple logic, could be seen to rapidly age and die. What’s wanted is the knowledge of how to keep cholesterol controlled not how to take everyone off cholesterol. One would think the American Medical Association owned shares in undertaking parlors.

A coordination of actual knowledge in these fields of nutrition and biochemistry is what is lacking. Apparently researchers are clever enough to isolate materials but are not wise enough to coordinate them fact against fact into an intelligible subject.

While examining this scene I have found that nutrition and biochemistry ARE the leaders, however. The subjects are actually arts and in a rather primitive state. But illnesses still puzzling medicine are in many cases quite old hat to the nutritionist.

If one wanted further proof, medical organizations, especially in the US, are fighting nutrition with their usual violence where their pocket book is threatened— black propaganda, government seizure orders and all the routine mechanisms medicine has employed in its history to “safeguard” its interests are in full play against the health food store and the vitamin counter. That is enough to prove the point that nutrition is the leader in our contemporary times where physical health body treatment is concerned.

While the medical doctor and his psychiatry branch flood out the useless and destructive “tranquilizers”, the nutritionist hands out a couple tablets of magnesium which actually cool a person off beautifully and far more effectively without the physical damage carried by the tranquilizer.

The medical doctor and his psychiatry branch gave the world its greatest wave of drug addiction. Their friend the German-oriented psychologist, with his man-is-animal teaching of the young and destruction of orthodox religion, has given the world its greatest period of crime. They are on their way out even though they are fighting a dirty and violent rearguard action. So why bet on losers? They won’t make it.

Nutrition's star is rising into a blazing sun in the field of physical treatment of the body. It is also wise enough to know and repeatedly state that spiritual and mental stress MUST be handled before too much result can be obtained, which is perfectly true.

Thus I have going at this particular time a project of codification and coordination of what is known in the fields of nutrition and biochemistry, not to be wiser than they, but to get some order into this field so that its potential can be more fully realized.

This work is almost incidental to Scientology research. I am completing something I started in 1945, which was a survey of biochemistry potentials in order to decide a direction of research: did the mind monitor structure or structure, as medicine thought, monitor the mind? The former was in 1945 found to be the true case to an overwhelming degree.

But at the same time, when people are so body fixated that they have problems of a physical nature too intense to admit of any other consideration, bringing them true power and freedom becomes difficult unless one pays some attention to where their attention is fixated.

Malnutrition, deficiencies in vitamins and minerals, chronic illnesses and unhealing wounds are all needlessly distracting but they are nevertheless distracting.

There apparently exist easy ways to handle these things. There is no sense in processing someone for a hundred hours only to find his only interest is curing his headache and to discover that he has a headache because he is allergic to bread and eats bread nearly as his sole diet! Or to find that the overweight fellow is just getting processed to get his body thin and after scores of hours discover he is living on candy bars and has been diabetic for years! Not when you can simply take the former off bread and wheat and give the latter some trivalent chromium and protein and put a guard on the candy store. Make no mistake—one CAN process over the top of these things and even handle, for the spirit and mind dominate them. But why? It's far easier to parallel the mind and get the distraction handled so one can THEN get to why he got that way in the first place if he is still interested, though well. One can do things the hard way or the easy way.

So nutrition and biochemistry are vital subjects and, due to medical influence, very badly neglected subjects even in the presence of positive and even vital value.

My current review of these is in the nature of an assist to processing. As such, of course, they have to embrace the factors of predisposition to, precipitation and prolongation of physical illness.

It has already been established, prior to present records, while I was working with the general field of life in 1945, and has been confirmed by contemporary researchers in nutrition and biochemistry that Stress is the basic cause in physical illness. Thus, such nutritional research cannot supplant the handling of stress. Further, conditions can exist where nutrition and biochemistry cannot work at all until stress is relieved by processing. Therefore, in lower stages of handling there is a band where thought and physical beingness tend to merge. In this lower zone, assist type processing and nutritional or biochemical aids seem to be simultaneously necessary. In such instances one must alternate them or co-apply them.

There are also a few deficiencies which produce manifestations quite similar in appearance to insanity.

Where the illness or injury is acute and severe immediate physical attention is mandatory and can be assisted only by the lightest possible address to the mental factors, perhaps as light as simply being comforting or gentle. In a case such as a person in a long continued coma, where nutrition is intravenous, processing is still possible by gently causing the person's hand to make repeated contact on command with a pillow or the bed. Thus it can be seen, processing can reach a long way down.

Above all this physical level material of course, the subject has been for a long time wrapped up. Persons continuing to play the body game limit themselves in various ways and by the nature of life and this civilization have their ups and downs even when well processed. If they have attained a relatively high state as a bodied person they can however be rehabilitated, usually simply by running out their overt acts and withholds and restoring their exterior perception: they are, however, despite their continued physical beingness, quite capable of easily assuming their full potentials: they usually prefer to go

on with the game by imposing limitations, for instance to continue using their eyes. One rarely sees them do the stunts and tricks of the Indian fakir even where they can since they have risen above exhibitionism or the need to overwhelm or prove things and they are of course continuing to play the game of human being, since that is the main game they have available around them.

There is undoubtedly a considerable amount of neating up that I could do, including making all materials more readily available, seeing to the compilation of a very extensive dictionary of terms, filling in incidental gaps where material may not have been fully recorded. These are difficulties of a minor nature compared to the research in making the result attainable.

It has been difficult working in a confused and, yes, even primitive society that is starved for workable knowledge in the humanities. The very condition that made it vital to seek out and release the material also made it difficult to do the job in the first place.

Scientology now has more than enough data and technology to handle even the broad problems in the humanities. The main task now is getting it fully used, and along this line there are hundreds of thousands working every day around the world.

Scientology is the fastest growing Religion on the planet by actual surveys and statements by sociologists. And this is the more remarkable as in this period orthodox Religions have shrunk before the materialistic onslaught of our times.

The materials of Scientology are the result of forty-three years of search, coordination and application to millions. The organizations of Scientology have been building and expanding for nineteen years (despite the fears and hates and jealousies of this civilization) on five continents and making it all the way, thanks to the magnificent people of Scientology.

We are very rich in materials, in results and in the potential future. Through our hardest times we have endured. Into our brightest times we are expanding.

These materials contain the full basics of the only game in the universe where everyone wins, the game of triumphant life itself.

### PEP

I've been doing some research lately. That's mostly what I have been doing. And while this is not the main line of research I thought I might mention it in passing.

Something like four centuries ago Man's diet began to undergo a radical change. What he ate before that was European, Asian. Whole grain barley, various proteins, various wheats and other foods were not necessarily abundant but they made up a radically different diet than modern Man consumes.

With the discovery of the New World, for the first time there was an abundance of SUGAR. Up until then sugar came from a few scarce plants and beehives and was far too expensive for any broad general consumption. But the wealth of the West Indies was not really gold. It was the product of the sugar cane: BROWN AND WHITE SUGAR.

Also the Americas gave the world many new plants such as maize (the African's "mealy meal"), the potato and other carbohydrates and today a startlingly large amount of the European and African diet consists of plants first found in America. Almost all these foods are mainly carbohydrate, which is to say, low on protein.

Thus Man's diet changed. And the changes were in the direction of abundant Sugar and Carbohydrate and away from a high protein diet.

And with this change, it could be said, there went Man's pep.

Sugar is a deceptive thing. It appears to give one energy. But it does so by bypassing the body's production of its own sugar. Alcohol is also deceptive. It apparently by-passes the ability to make sugar which is why it messes up the liver. In other words sugar in abundance by-passed the basic energy producing mechanisms of the body.

Straight sugar makes the stomach and digestive processes alkaline. This is the opposite to acid. Food needs acid to digest. Therefore, as just *one* part of all this scene, when one doesn't eat protein and digest his food he winds up in a state of malnutrition—a general breakdown of body functions due to lack of adequate nourishment.

Sugar, that is supposed "to produce energy" does so only at the expense of physical health for sugar does not build up a body, it only burns it up.

The result of a heavy intake of sugar and carbohydrates is to feel tired all the time—no pep. A diet of candy bars and cokes may appear to put energy there but eventually no body is left to burn it!

Well, today they start little babies out on sugar and carbohydrate as an "all right diet". No protein. The result is these fat babies you see ballooning in their perambulators. They are starting life with two-and-a-half strikes on them. The rest of the third strike is added by cokes and candy bars. And there goes the old ball game. You get a civilization that is tired, no endurance.

The degeneration can be reversed if one knocks off the cokes and candy bars and sugar in the coffee and tea and begins to concentrate on an intake of a good percentage of protein. After a few weeks or months, one starts to feel peppy. The old body has begun to build itself back.

If one is going to run a car, he has to feed it the right fuel and oil. If one is going to run a body it has to be fed the right food and that has to include protein.

We have seen aboard a lot of diet fads. That's what they were. "Eat liquefied carrots and you will fly." "Chomp only Vitamin X and you will soar." Well, bad diets like that give dieting a bad name like "crazy". We've had food cranks around who only ate hazelnuts or Chinese herbs. Well, that's a different subject entirely than what I'm talking about. I think those diets shouldn't even be wished off on the birds.

All I'm talking about is eating your chow instead of living off candy bars, cokes and milk and sugared coffee.

By eating your hamburger and vegetables and leaving alone the candy bars and cokes, you will begin to build up a head of steam. It takes far longer for actual food to build up into energy than it does sugar.

Most of the bodies around got started off on a sugar-carbohydrate baby formula and got to believing that if something tasted sweet it was good. Well, cocaine probably tastes great too, but it won't build up a body and the pep it imparts is very false indeed as it does so by ripping the body apart.

Man's diet changed over the last four centuries. And he's now got a lot of welfare and sick populations. And he sure pushes the stuff which got him into that condition—sugar and carbohydrates.

America got even for being discovered and raped. She gave the world hordes of new carbohydrates and principally she gave the world abundant raw sugar. An interesting revenge.

PTS Pack

**PTS HANDLING**

(PTS = Potential Trouble Source)

There are two stable data which anyone has to have, understand and KNOW ARE TRUE in order to obtain results in handling the person connected to suppressives.

These data are:

1. That all illness in greater or lesser degree and all foul-ups stem directly and only from a PTS condition.
2. That getting rid of the condition requires three basic actions: A. Discover. B. Handle or disconnect.

Persons called upon to handle PTS people can do so very easily, far more easily than they believe. Their basic stumbling block is thinking that there are exceptions or that there is other tech or that the two above data have modifiers or are not sweeping. The moment a person who is trying to handle PTSs gets persuaded there are other conditions or reasons or tech, he is at once lost and will lose the game and not obtain results. And this is very too bad because it is not difficult and the results are there to be obtained.

To turn someone who may be PTS over to an auditor just to have him mechanically audited may not be enough. In the first place this person may not have a clue what is meant by PTS and may be missing all manner of technical data on life and may be so overwhelmed by a suppressive person or group that he is quite incoherent. Thus just mechanically doing a process may miss the whole show as it misses the person's understanding of why it is being done.

A PTS person is rarely psychotic. But all psychotics are PTS if only to themselves. A PTS person may be in a state of deficiency or pathology which prevents a ready recovery, but at the same time he will not fully recover unless the PTS condition is also handled. For he became prone to deficiency or pathological illness because he was PTS. And unless the condition is relieved, no matter what medication or nutrition he may be given, he might not recover and certainly will not recover permanently. This seems to indicate that there are "other illnesses or reasons for illness besides being PTS". To be sure there are deficiencies and illnesses just as there are accidents and injuries. But strangely enough the person himself precipitates them because being PTS predisposes him to them. In a more garbled way, the medicos and nutritionists are always talking about "stress" causing illness. Lacking full tech they yet have an inkling that this is so because they see it is somehow true. They cannot handle it. Yet they recognize it, and they state that it is a senior situation to various illnesses and accidents. Well, we have the tech of this in more ways than one.

What is this thing called "stress"? It is more than the medico defines it—he usually says it comes from operational or physical shock and in this he has too limited a view.

A person under stress is actually under a suppression on one or more dynamics.

If that suppression is located and the person handles or disconnects, the condition diminishes. If he also has all the engrams and ARC Breaks, problems, overts and

withholds audited out triple flow and if ALL such areas of suppression are thus handled, the person would recover from anything caused by “stress”.

Usually the person has insufficient understanding of life or any dynamic to grasp his own situation. He is confused. He believes all his illnesses are true because they occur in such heavy books!

At some time he was predisposed to illness or accidents. When a serious suppression then occurred he suffered a precipitation or occurrence of the accident or illness, and then with repeated similar suppressions on the same chain, the illness or tendency to accidents became prolonged or chronic.

To say then that a person is PTS to his current environment would be very limited as a diagnosis. If he continues to do or be something to which the suppressive person or group objected he may become or continue to be ill or have accidents.

Actually the problem of PTS is not very complicated. Once you have grasped the two data first given, the rest of it becomes simply an analysis of how they apply to this particular person. A PTS person can be markedly helped in three ways: (a) gaining an understanding of the tech of the condition (b) discovering to what or to whom he is PTS (c) handling or disconnecting.

Someone with the wish or duty to find and handle PTSs has an additional prior step: He must know how to recognize a PTS and how to handle them when recognized. Thus it is rather a waste of time to engage in this hunt unless one has been checked out on all the material on suppressives and PTSs and grasps it without misunderstandings. In other words the first step of the person is to get a grasp of the subject and its tech. This is not difficult to do; it may be a bit more difficult to learn to run an E-Meter and considerably more difficult to learn how to list for items, but there again this is possible and is much easier than trying to grope around guessing.

With this step done, a person has no real trouble recognizing PTS people and can have success in handling them which is very gratifying and rewarding. Let us consider the easiest level of approach:

i) Give the person the simpler HCO Bs on the subject and let him study them so that he knows the elements like “PTS” and “Suppressive”. He may just cognite right there and be much better. It has happened.

ii) Have him discuss the illness or accident or condition, without much prodding or probing, that he thinks now may be the result of suppression. He will usually tell you it is right here and now or was a short time ago and will be all set to explain it (without any relief) as stemming from his current environment or a recent one. If you let it go at that he would simply be a bit unhappy and not get well as he is discussing usually a late lock that has a lot of earlier material below it.

iii) Ask when he recalls first having that illness or having such accidents. He will at once begin to roll this back and realize that it has happened before. You don’t have to be auditing him as he is all too willing to talk about this in a most informal manner. He will get back to some early this-lifetime point usually.

iv) Now ask him *who* it was. He will usually tell you promptly. And, as you are not really auditing him and he isn’t going backtrack and you are not trying to do more than key him out, you don’t probe any further.

v) You will usually find that he has named a person to whom he is still connected! So you ask him whether he wants to handle or disconnect. Now as the sparks will really fly in his life if he dramatically disconnects and if he can’t see how he can, you persuade him to begin to handle on a gradient scale. This may consist of imposing some slight discipline on him such as requiring him to actually answer his mail or write the person a pleasant good roads good weather note or to realistically look at how he estranged them. In short what is required in the handling is a low gradient.

All you are trying to do is MOVE THE PTS PERSON FROM EFFECT OVER TO SLIGHT GENTLE CAUSE.

vi) Check with the person again, if he is handling, and coach him along, always at a gentle good roads and good weather level and no H E and R (Human Emotion and Reaction) if you please.

That is a simple handling. You can get complexities such as a person being PTS to an unknown person in his immediate vicinity that he may have to find before he can handle or disconnect. You can find people who can't remember more than a few years back. You can find anything you can find in a case. But simple handling ends when it looks pretty complex. And that's when you call in the auditor.

But this simple handling will get you quite a few stars in your crown. You will be amazed to find that while some of them don't instantly recover, medication, vitamins, minerals will now work when before they wouldn't. You may also get some instant recoveries but realize that if they don't you have not failed.

The auditor can do "3 S&Ds" after this with much more effect as he isn't working with a completely uninformed person.

"3 S&Ds" only fail because of wrong items or because the auditor did not then put in triple rudiments on the items and then audit them out as engrams triple flow.

A being is rather complex. He may have a lot of sources of suppression. And it may take a lot of very light auditing to get him up to where he can do work on suppressives since these were, after all, the source of his overwhelm. And what he did to THEM might be more important than what they did to HIM but unless you unburden HIM he may not get around to realizing that.

You can run into a person who can only be handled by Expanded Dianetics.

But you have made an entrance and you have stirred things up and gotten him more aware and just that way you will find he is more at cause.

His illness or proneness to accidents may not be slight. You may succeed only to the point where he now has a chance, by nutrition, vitamins, minerals, medication, treatment, and above all, auditing, of getting well. Unless you jogged this condition, he had no chance at all: for becoming PTS is the first thing that happened to him on the subject of illness or accidents.

Further, if the person has had a lot of auditing and yet isn't progressing too well, your simple handling may all of a sudden cause him to line up his case.

So do not underestimate what you or an auditor can do for a PTS. And don't sell PTS tech short or neglect it. And don't continue to transfer or push off or even worse tolerate PTS conditions in people.

You CAN do something about it.

And so can they.

# MISSION INTO TIME

L. Ron Hubbard

Published

September 1972

The central text of **Mission Into Time** (originally published in 1968 in abridged form in a limited edition entitled *(A Test of Whole Track Recall)*) is edited from a lecture given by L. Ron Hubbard to members of the Sea Organization and students of the Advanced Organization aboard a Sea Organization vessel. It is a report on missions sent out to Sardinia, Sicily and Carthage to see if specific evidence could be found to substantiate L. Ron Hubbard's recall of incidents in his own past, centuries ago, which occurred in these areas that he had not revisited previously in the current lifetime. Maps, color photographs and diagrams enhance his account, as do the historical background sketches of the areas inspected.

The book begins with perhaps the best biography of L. Ron Hubbard in print. It includes his explorations and expeditions in the physical universe in this century on planet earth, as well as his explorations into the realm of the mind.

In an essay on Whole Track Ron relates how whole track incidents began to appear during Dianetic engram running as early as 1950, and how he, assisted by Mary Sue Hubbard, rolled up his sleeves and started to investigate the whole track in 1951. He says:

"For every one individual, existence consists of the physical universe and everything that is in it at this exact, present-time instant, and the track which consists of everything that has been. And that is the total is-ness as far as this thing called reality is concerned."

Ron goes on to show how it is that "unless we admit the evidence before us that one has lived more than one life, we don't Clear anyone or make them feel better. To make an O.T., one has to be willing to look at the time track. Unless you pay attention to only one lifetime as a fallacy and audit past lives and whole track, you make minimal gains."

Although this is excellent data for all Scientologists, new or advanced, it can also be understood by newcomers, as all terms used in it are defined in the excellent glossary. As a whole it demonstrates rather forcefully that, as L. Ron Hubbard has said, "The weird idea is that one only lives but once."

*C/S Series 87*

### NULLING AND F/Ning PREPARED LISTS

A prepared list is one which is issued in an HCOB and is used to correct cases. There are many of these. Notable amongst them is C/S 53 and its corrections.

It is customary for the auditor to be required to F/N such a list. This means on calling it that the whole list item by item is to F/N.

Now and then you get the extreme oddity of a list selected to exactly remedy the case not reading but not F/Ning.

Of course this might happen if the list did not apply to the case (such as an OT prepared list being used on a Grade IV, heaven forbid). In the case of lists to correct listing, and in particular the C/S 53 series, it is nearly impossible for this situation to occur.

A C/S will very often see that the auditor has assessed the list on the pc, has gotten no reads, and the list did not F/N.

A "reasonable" C/S (heaven forbid) lets this go by.

Yet he has before him first-class evidence that the auditor

1. Has out-TRs in general,
2. Has no impingement whatever with TR-1,
3. Is placing his meter in the wrong position in the auditing session so that he cannot see it, the pc and his worksheet,
4. That the auditor's eyesight is bad.

One or more of these conditions certainly exist.

To do nothing about it is to ask for catastrophe after catastrophe with pcs and to have one's confidence in one's own C/Sing deteriorate badly.

An amazing number of auditors cannot make a prepared list read for one of the above reasons.

Putting in suppress, invalidation or misunderstood words on the list will either get a read or the list will F/N.

The moral of this is that prepared lists that do not read F/N. When prepared lists that do not read do not F/N or when the auditor cannot get a prepared list to F/N, serious auditing errors are present which will defeat a C/S.

In the interest of obtaining results and being merciful on pcs, the wise C/S never lets this situation go by without finding what it is all about.

EFFECTIVE AFTER 1st Thursday in  
February 1974

**PC COMPLETIONS—SECOND REVISION**

This second revised issue cancels all earlier and any local org or continental issues assigning Paid Completion Points.

To maintain uniformity any right of orgs or continental areas to assign completion points is revoked. Orgs may request additions or amendments when required but such become effective only when officially issued by Flag.

For statistical purposes an audited completion must be PAID and have attested with an F/N VGIs and written a success story for the action. This does NOT mean that you would interrupt an auditing rundown to send the pc to Examiner and attest and success on each step of a rundown where completion points are awarded for separate steps (e.g. Drug RD is one attest when full RD completed. One *then* counts total points for the 3 sections of the RD).

Any quickie or incompetent completion falsifies the statistic and is subject to fine or penalty.

Changes below are in *this type style*.

The completions list follows:

1. Interiorization Rundown - 1.
2. Life Repair—1.
3. Student Rescue Intensive—1.
4. Progress Pgm—1.
5. Hubbard Consultant (HC) List (Data Series)—1.
6. Word Clearing Method One—2.
7. C/S Series 54. (Pc Assessment Form and handling)—2.
8. Drugs, Medicine, Alcohol Class VIII Remedy (3 way recall, secondaries, engrams)- 1.
9. Pains, Somatics, Emotions each reading drug *fully handled by R3R Triple 1*. (E.g. 5 drugs fully handled = 5 points. Count this way to conform with majority interpretation.)
10. Prior Assmt to Drugs—1.
11. Dianetics Completion—5.

12. ARC Str Wire Triple Exp—3 (no credit singles).
13. Each Expanded Grade—5 (no credit single or triple).
14. HCO B 24 July 69—1.
15. *Touch and Dianetic Assists to fully handle injury or postoperative or post-birth, etc—2.*
16. Auditing repair—1/2.
17. GF Method 5 handled if not part of a repair—1/2.
18. GF 40 Expanded fully handled, lists and engrams, by itself whether part of another program or not—3.
19. C/S Series 53 handled to F/N on all items (F/Ning assessment) whether part of another program or not—1.
- 19a. Full *false TA RD successfully resolved—2.*
20. L3B Rundown—2.
21. PTS Rundown (full rundown)—2.
- 21a. Introspection Rundown—2.
22. Study Correction List fully handled - 2.
23. Int Rundown Correction List fully handled - 1/2.
24. Word Clearing Correction List fully handled—1/2.
25. Objective Processes (full battery *to get pc off or handle Drugs before Drug RD*)—3.
26. *Each Expanded Dianetics separate RD—1.*
- 26a. *Expanded Dianetics Rundown fully completed (in addition to single points for each part)—5.*
27. Incidental Rundowns such as Money Process *if contained in an LRH HCO B —1/2.*
28. 12 1/2 Hour Intensive—5 points for each completed within the week.

PENALTY: 1 point loss for every percent below 90% F/N VGIs Examiner for the previous day. Example: 75% only F/N VGIs = 15 point loss.

GAIN: Add one point for every percent above 90% F/N VGIs at Examiner.

For every 9 points made 1 point may be added for staff auditing providing it is actually delivered.

Items such as L-IC and L-4B are part of the session or action in which they are used, or part of an auditing repair pgm, and are covered by the points for those actions.

Student Co-auditing: There are no points calculated or used for student co-auditing completions (except only as stated in the Student Completions HCO B) or for free public completions done by students or public as these can be part of student completion requirements.

## SH

29. Power Set-up GF + 40 Method 5 and Handle—2.
30. POWER Single—5.
31. POWER TRIPLE—15.
32. Complete Your Case items as per regular auditing as above. *Added Bonus for Case flying and fully handled—5.*

## AO

33. Set-up for Solo or other advanced level: as per regular auditing above.
- 33a. *Case truly flying and ready for R6EW auditing. Added Bonus—5.*
- 33b. *Successful Case Consultation—1.*
34. R6EW Solo Auditing Completion—5.
35. Clearing Course Solo Auditing Completion—10.
36. OT I Solo Auditing Completion—5.
37. OT II Solo Auditing Completion—5.
38. OT III Solo Auditing Completion—10.
39. OT III Exp Solo Auditing Completion—5.
40. OT IV Audited Section Completion—5.  
Solo Aud Section Completion—5.
41. OT V Solo Auditing Completion 5.
42. OT VI Solo Auditing Completion—5.
43. OT VII Audited Section Completion - 5.  
Solo Aud Section Completion—3.
44. OT VIII Points to be assigned when released.

## PENALTIES ALL ORG PENALTIES

45. *For every pc in the area who is refunded after auditing (after this HCO B is in effect). MINUS 25.*
46. *(Excepting AOs.) For every pc in the area who does not buy and pay for further auditing to complete the grade or cycle he is on (after this HCO B is in effect). MINUS 10.*
47. *For every pc who is backlogged more than one week. MINUS 5.*

## SH PENALTIES

48. *For every pc who does not go on to Power after cleanup and case handling (after this HCO B is in effect). MINUS 10.*

49. *Every pc who does not successfully complete his Power including Va within three months after being enrolled on any part of it (after date of this HCO B). MINUS 25.*
50. *Any pc found to have been run on Power more than once. MINUS 10.*
51. *Any Grade Va who has not enrolled on the R6EW Course within 3 months. Retroactive to start of org and subtracted each week. MINUS 1.*

#### AO PENALTIES

52. *“Nothing found” and no progress on any R6EW, Clear or OT Grade. (Means Drug RD was unflat and Pre-OT not properly set up but put on CC or OT Grades or both.) (Effective after date of this HCO B.) MINUS 25.*
53. *Every R6EW, Clear or Pre-OT in AO’s zone or area who has not signed up for next grade within 3 months of finishing his last one up to OT VI (effective FROM DATE OF FOUNDING OF ORG AND SUBTRACTED EACH WEEK). MINUS 1.*
54. *Every Solo Student who does not audit for one week while assigned auditing on R6EW, Clear or on a Grade. (Effective from date of this HCO B.) MINUS 10.*
55. *Any R6EW, Clear or Pre-OT who leaves while on the next grade which is incomplete. (Effective from date of this HCO B.) MINUS 5.*
56. *Solo Auditor backlogged more than 24 hours for a Case Consultation or Review. (Effective from date of this HCO B.) MINUS 5.*
57. *Any evidence of an R6EW, Clear or Pre-OT being evaluated for by giving him the EP, being invalidated on his gains or assigned unjust Ethics penalty by another student or staff member. (Effective from date of this HCO B.) MINUS 50.*
58. *Any AO student now on SOLO Auditing who is found not to be able to fully operate a meter, run engrams or who has errors traceable to False TA HCO B not being applied. (Effective from date of this HCO B.) MINUS 25.*

Points for any omitted or added rundowns will have points issued on request by Training and Services Aide.

**PRECLEAR DECLARE? PROCEDURE**

(Reference: HCO PL 30 May 70, "Cutatives"  
HCO PL 10 May 70, "Single Declare"  
HCO B 24 Feb 72, C/S Series 71 A,  
"Word Clearing OCAs".)

In order to ensure the results of Scientology, it is vital that Examiner Declare? procedure is known and invariably applied.

1. Pc Examiner checks the folder to ensure that all processes run to EP correctly with NO Out Tech uncorrected.
2. When folder passed as OK, get Qual I and I to call Tech Services for the pc to be sent to the Pc Examiner.
3. Pc Examiner shows pc a written statement of the Ability Attained from the Grade Chart or HCO B for that particular Grade or completion and has the pc read it.
4. Ask pc: "Do you have any doubts or reservations concerning attesting to (whatever the attest is)?" If the Examiner gets an instant read on the question, he does not ask the attest question, and sends the folder back to the C/S.
5. If no instant read, ask the attest question, "Would you like to attest to ....."
6. If pc F/N VGIs on the Declare, indicate the F/N and end off the cycle.

*Note.* The presence of any Bad Indicators, or no F/N, or high or low TA or read on the "Doubts" question is the immediate signal to end off the action smoothly and quickly.

Absolute honesty must be maintained by a Pc Examiner on every cycle handled. Remember: The integrity of Scientology and the hope for Beings in this Universe is entrusted to Examinations.

**FEAR OF PEOPLE LIST—R**

*TO BE DONE ONLY BY AUDITORS WHOSE EYESIGHT, METER POSITION AND TR 1 HAVE BEEN CHECKED OUT AND WHO CAN THEREFORE MAKE A LIST READ ON A PC, SEE THE READ AND MARK IT.*

This action is primarily for use in Qual to handle timid tech staff who back off from handling thetans or people or pcs or psychos or individuals. It may also be used on public and as part of Integrity Processing.

ASSESSMENT LISTS

TERMINALS LIST

EMOTIONS LIST

People	_____	Blaming (item assessed)	_____
Thetans	_____	Failures with	_____
Pcs	_____	Apathetic about	_____
Psychos	_____	Neglect of	_____
Individuals	_____	Hopelessness regarding	_____
Others	_____	Propitiation toward	_____
Girls	_____	Terrified of	_____
Women	_____	Desperation about	_____
Men	_____	Fear of	_____
Boys	_____	Afraid of creating a bad	
Children	_____	effect on	_____
Addicts	_____	Afraid of consequences	
PTSES	_____	Regarding	_____
Older People	_____	Fear of invalidation by	_____
Seniors	_____	Fear of doing something	
Important People	_____	wrong with	_____
		Fear of being found out	
		by	_____
		Fear of failure with	_____
		Afraid to take responsibility	
		for	_____
		Anxious about	_____
		Pretense concerning	_____
		Unwilling to help	_____
		Contempt for	_____
		Anger at	_____
		Hatred of	_____
		Suppressing	_____

## HANDLING STEPS

1. *Assess the TERMINALS LIST.*
2. *Using best reading item from the TERMINALS LIST assess the EMOTIONS LIST. (Example: If “Girls” gave best read on TERMINALS LIST, then assess EMOTIONS LIST using “Girls”—“Blaming Girls \_” “Failures with Girls” etc.)*
3. *Take best reading item from EMOTIONS LIST assessment. Run item R3-R triple to F/N Cog VGIs and erasure.*
4. *Proceed to handle (R3-R) each reading item from EMOTIONS LIST assessment in descending order of reads (largest to smallest read).*
5. *Repeat 2 to 4 with each reading item from the original TERMINALS assessment.*
6. *When all reading items from both assessments handled, reassess the TERMINALS LIST and repeat steps 2 to 5 on any items now reading.*
7. This may be continued to an F/Ning Terminals List but somewhere along the line pc should have major cognition with wide F/N and statement to the effect that he no longer has any fear or back-off from people, thetans, pcs, psychos, or individuals. End off at such a point.
8. Note that the charge on a terminal could be blown on R3-R on major reading item from the Emotions List. In such a case the other reading items from the emotions assessment would F/N when taken up. This would be most likely to occur if “Fear of . . .” is run to good cog and then further reading “Fear” or “Afraid of” items are attempted.
9. Should the person R/S on assessment or handling just continue the action through to EP in the usual way but circle the R/S, note in front of folder and on Auditor Report for later handling.
10. Whether done in Qual or Tech the assessment sheets, worksheets and auditor report sheets must go into the pc folder and be recorded on the summary sheet.

EP of the action is thetans or people or pcs or psychos or individuals, etc solved and the person gotten off of any irrational back-off. We are in the thetan and people business after all.

**Reissued from**  
**21st ADVANCED CLINICAL COURSE**  
**TRAINING DRILLS**

*NAME:* Anti-Q and A TR.

*COMMANDS:* Basically, "Put that (object) on my knee." (A book, piece of paper, ashtray, etc can be used for object.)

*POSITION.* Student and Coach sitting facing each other at a comfortable distance and one at which the Coach can reach the Student's knee with ease.

*PURPOSE:*

- (a) To train Student in getting a Pc to carry out a command using formal communication NOT Tone 40.
- (b) To enable the Student to maintain his TRs while giving commands.
- (c) To train the Student to not get upset with a Pc under formal auditing.

*MECHANICS:* Coach selects small object (book, ashtray, etc) and holds it in his hand.

*TRAINING STRESS:* Student is to get the Coach to place the object that he has in his hand on the knee of the Student. The Student may vary his commands as long as he maintains the Basic Intention (not Tone 40) to get the Coach to place the object on the Student's knee. The Student is not allowed to use any physical enforcement, only verbal commands. The Coach should try and get the Student to Q and A. He may say anything he wishes to try and get him off the track of getting the command executed. The Student may say what he wishes in order to get the command done, as long as it *directly* applies in getting the Coach to place the object on the Student's knee.

The Coach flunks for:

- (a) Any communication not directly concerned with getting the command executed.
- (b) Previous TR.
- (c) Any upsetness demonstrated by Student.

*C/S Series 89*

**F/N WHAT YOU ASK OR PROGRAM**

Ref: HCO B 23 Dec 72 Integrity Processing Series 20  
HCO B 21 Nov 73 The Cure of Q and A

When an Auditor asks one question but F/Ns something else it is simply a version of QandA.

Example: AUDITOR: Do you have a problem? PC: (ramble-ramble) I was thinking of last night's dinner. AUDITOR: That F/Ns.

Every few folders you pick up, if you can find examples of this:

The Auditor is not trained not to Q and A.

He is NOT getting answers to his questions.

When the Auditor starts something (such as a question or process) he MUST F/N what he started EVEN THOUGH HE DID SOMETHING ELSE DURING IT AND GOT AN F/N ON SOMETHING ELSE. HE MUST F/N THE ORIGINAL ACTION.

The result can be:

- (a) Missed W/H phenomena.
- (b) High or low TA an hour after the pc "F/Ned at Examiner".
- (c) A stalled case.
- (d) An undone program.
- (e) An unhandled pc.
- (f) Continual need for repair programs.

To get this disease out of an HGC requires that Auditors go through an Anti-Q and A handling.

**C/S Q AND A**

C/Ses can also Q and A. They simply handle whatever the pc originates to the Examiner or Auditor, over and over and on and on.

The result is:

- A. Incomplete Programs.
- B. Tripled or quadrupled C/S effort as the case never seems to get solved.
- C. Loads of repair programs.

Yet a C/S who does it will never look for it as THE primary error being committed.

The remedy is to have the C/S do an Anti-Q and A program.

### THE CURE OF Q AND A MAN'S DEADLIEST DISEASE

Q and A is a dreadful malady which has to be cured before an Auditor (or an Administrator) can get results.

#### THE DISEASE OF Q AND A

Auditor: Spot that wall. Pc: My neck hurts. Auditor: Has it been hurting long? Pc: Ever since I was in the Army. Auditor: Are you in the Army now? Pc: No but my father is. Auditor: Have you been in comm with your father lately? Pc: I miss him. Auditor: That F/Ned, end of process. The Auditor has failed to note that he *never* got the pc to spot the wall or that he has run the pc all over the track flattening nothing, restimulating the pc.

#### A DEADLY BACTERIA

When an Auditor asks a Question and F/Ns something else he can mess a pc up badly.

Auditor: Do you have a withhold? That reads. Pc: It's just a 2D perversion. What I was really thinking about was my raise I got today. Auditor: That F/Ns. Pc (later in session): You run a lousy org here. Charge too much .... Auditor in mystery, caves in. THAT IS SIMPLY Q AND A IN ANOTHER COAT.

#### ADMINISTRATIVE DELIRIUM

When an Administrator Qs and As it puts him straight down the org board and into a spin.

LRH Comm: You have a target here to move the file cases. Staff Member: I didn't understand some of the words. LRH Comm: Here's a word clearing order for Qual. (Next day.) LRH Comm: Did you go to the word clearer? Staff Member: I'm on Medical Lines now. LRH Comm: How long have you been ill? Staff Member: Since the Ethics Officer was mean to me. LRH Comm: I'll go see about your ethics folder ....

And there goes the old soccer game. NO TARGET DONE BECAUSE THE EXECUTIVE COULD NOT HANDLE Q AND A.

#### C/S Q AND A

Case Supervisors (blush for the thought) are often guilty of Q and A and infect their area with its bacteria.

Pc to Examiner: I have a cold. C/S: Run spot spots to cure his cold. Pc to Auditor: It's really I'm PTS to my Aunt. C/S: Do PTS RD on Aunt. Pc to Examiner: It's really my foot. C/S: Do touch assist on foot ....

What C/S ever got a pc's program done that way?

Where you find undone programs in folders you find goofing Auditors and Q and A type Case Supervisors.

## FUMIGATION

There are definite cures for this dreadful and disgraceful malady. It must be handled as it results in a breaking out of bogged cases and blows, high and low TAs and very red faces when the Paid Completions Stat is counted.

The Cure is pretty violent and very few have courage enough to go through with it as their confront at the beginning is too low, what with their no-interest items left in restim on their drug rundowns or no TRs to begin with or no Supervisor when they took the Course.

The direct result of all this is a symptom known as “patty-cake”. This is a child game of clapping hands and putting palms together and has meant since 1950 Dianetics NOT HANDLING CASES. The signs of patty-cake are a weak slouching posture, bags under the eyes, a bowed spine and hangdog pathetic eyes. The respiration is quick and panicky, the palms sweat and. one starts at pins dropping in the next room.

However for those sturdy souls who want to Clear a planet and who really want to handle things they can prop themselves up in bed and somehow get through this program:

1. This HCOB starrate. \_\_\_\_\_
2. HCOB 24 May 62 “Q and A” starrate. \_\_\_\_\_
3. HCOB 13 Dec 61 “Varying Sec Check Questions”. \_\_\_\_\_
4. HCOB 22 Feb 62 “Withholds, Missed and Partial”. \_\_\_\_\_
5. HCOB 29 Mar 63 “Summary of Security Checking”. \_\_\_\_\_
6. HCOB 7 Apr 64 “All Levels—Q and A”. \_\_\_\_\_
7. TRs the Hard Way. \_\_\_\_\_
8. Upper Indoc a Rough Way. \_\_\_\_\_
9. Handling the Auditor’s, C/S’s or Administrator’s Not Done or No Interest item Drug RD. \_\_\_\_\_
10. 35 hours Op Pro by Dup in Co-Audit receiving and giving. \_\_\_\_\_
11. HCOB 29 July 63 “Saint Hill Special Briefing Course Training Drills”, Section “Q and A Drill”. \_\_\_\_\_
12. HCOB 20 Nov 73 Issue I Anti-Q and A Drill. \_\_\_\_\_
13. HCOB 20 Nov 73 Issue II “F/N What You Ask or Program”. \_\_\_\_\_
14. A final end result demonstrated that the person CAN SEE SITUATIONS AND HANDLE THEM. \_\_\_\_\_

For, of course, the reason the person Qs and As is that he can’t confront or see the existing scene and so can’t handle it.

Q and A is the DISEASE OF DODGING LIFE.

When such a person tries to get a question or program done and the other person says or does something else, the Q and A goes into a sort of overwhelm or cave-in and just rides along at effect.

PEOPLE WHO GET THINGS DONE ARE AT *CAUSE*. When they are not, they Q and A.

Thus it IS a kind of illness. Chronic Overwhelm. It is NOT cured by drugs or electric shocks or brain operations.

It is cured by making oneself strong enough in confront and handle to live!

## DRY AND WET HANDS

### MAKE FALSE TA

A couple of years ago some auditors were solving high TA problems by putting hand cream on the pc's hands when they were calloused and talcum powder on a pc's hands when they were too wet. Since no research had been done they were censured.

Research has now been done on this matter of dry and wet hands.

Apparently when a person has taken certain medicines or chemicals, or uses detergent soaps or is in contact with certain chemicals (such as those in some furniture polishes) the ordinary skin oils vanish. These oils are needed to make an electrical contact with the cans.

When these oils are absent, there is no adequate electrical contact and the "TA is High".

When a person is deficient in certain minerals or vitamins such as magnesium or B complex, his hands can be excessively wet.

Either of these two conditions in hands or *feet* can produce an incorrect TA position.

The dry condition produces a false high TA.

The overly wet condition produces a false low TA.

The TA depends on normally moist hands. This does not mean the meter works on "sweat". It does mean the meter works only when there is a correct electrical contact.

Too much and too greasy hand cream could produce too low a TA.

Too much powder or drier could produce too high a TA.

Therefore one must not go to extremes.

### DRY HANDS

The excessively "dry" hand is seen as shiny or polished looking. It feels very dry.

The correct treatment is to use a "vanishing cream" (obtainable from any cosmetics store) not a greasy hand cream.

The "vanishing cream" is so called because it rubs all the way into the skin and leaves no excess grease.

This restores normal electrical contact.

There are many such creams. It makes no difference which is used so long as it vanishes into the skin.

It is doubtful if it would have to be applied more than once—at session start—as it lasts for a long while.

This would apply to some footplate cases as well (whose hands are defective or too heavily calloused).

If a cream leaves smears on a can, it is too heavily applied or too little absorbed.

Vanishing type cream is usually smeared on, rubbed in and can then be thoroughly wiped off. The hands (or feet) will usually produce, then, a normal TA and meter response.

#### WET HANDS

Anti-perspirants can be applied to too wet hands. There are many brands of these, often a powder or spray.

It can be wiped off after application and should work for two or three hours.

It can be applied to hands or feet (for footplates).

If the TA then goes too high, use vanishing cream on top of it.

#### SUMMARY

While much work could be done still, the above is enough for a practical result.

#### WARNING

Hi TAs and Lo TAs do not widely F/N. If you are getting wide persistent F/N with the TA too high (above 3) or too low (below 2) you have a pc whose hands are too dry or too wet. Using this HCO B should correct it and in future sessions you should continue the remedy on *that* pc.

NOTHING in this HCO B excuses the misreading or falsifying of a TA. Get the TA in normal range with this HCO B before you start calling processes ended.

C/S 53 RF and the False TA Checklist HCO B 29 Feb 1 972R, Revised 23 Nov 73, are your tools for handling too high and too low TAs.

The only other conditions I know of that make an auditor mess up a pc's TA are:

- (a) A discharged meter (registers high).
- (b) An incorrectly set meter by trim button.
- (c) A "fleeting F/N" where the pc F/Ns so briefly the auditor misses it and overruns.
- (d) Bad TRs.
- (e) Unflat processes.
- (f) Overrun processes.
- (g) Heavy drugs or medicines.

False TA often comes to light when the auditor runs out of reasons it is high or low and it dawns on him that he is dealing with false TA. In the latter case he should know all MATERIALS ON THIS SUBJECT OF FALSE TA (given on HCO B 29 Feb 1972R, Revised 23 Nov 73, as references) AND REMEDY THE FALSE TA SITUATION AND THEN RESUME NORMAL AUDITING. He must not go on calling high or low TA F/Ns just by assuming the TA is false.

Given a contact the meter always tells the truth.

**SHORT HI-LO TA ASSESSMENT C/S**

This is the basic prepared list used by Auditors to get a TA up or down into normal range. A GF Method 5 may also be used after TA is in normal range to get pc's case handled better.

PC Name \_\_\_\_\_ Date \_\_\_\_\_

1. Assess pc Method 5 on this sheet. (Go down the list calling off the items to the pc, watching the meter. Mark any Tick, SF, F, LF, LFBD [to what TA], speeded rise or Blow Up.) *NOTE: A C/S 53RF should be reassessed and all reads handled until it F/Ns on assessment.*

2. Use only the small falls or falls or BDs. The rises will however show where mass lies.
  - A. If A or any of the A Group, and the pc has *had* an Int RD, do an Int RD Correction List, and handle the reads. (HCOB 29 Oct 71 Amended 31 Dec 71.)  
  
If *pc has never had an Int RD*, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.
  - B. If any of these read, do an L4B on the earliest lists you can find that have not been corrected. Lacking these do an L4B in general. You can go over an L4B several times handling each read to F/N until the whole L4B gives nothing but F/Ns.
  - C. If any of these, handle with 2wc and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 17 F/Ns. On overts and withholds, get what, and E/S to F/N. On out ruds, find which rud and handle. (See GF40RR HCOB 30 June 71 Revised 13 Jan 72.) Feel sad, handle the ARC Break. (Feel sad = ARC Brk of long duration.)
  - D. Rehab releases on each "drug" taken to F/N. Complete the Drug RD per C/S Series 48R after handling all reads on this assessment. If pc has had a Drug RD, do L3B on it, and handle.
  - E. If any of these, do L3B and handle according to what is stated to do on L3B.
  - F. Clean up any protest and inval and rehab to F/N.
  - G. Find out what it is. If Yoga or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do L1C on *that* period of pc's life.
  - H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If Study errors, 2wc E/S to F/N, and add a Study Correction List to the pc's program.
  - I. False TA is wrong cans. Use HCOBs 24 Oct 71, 12 Nov 71, 15 Feb 72, 18 Feb 72, 29 Feb 72, *HCOB 23 Nov 73*, all on False TA. Then clean up the bypassed charge with ( 1 ) Assess for best read (a) TA worries (b) F/N worries. (2) Then 2wc times he was worried about (item) E/S to F/N. (3) Rehab a time he felt really keyed out to F/N.
  - J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. These items are all 2wc E/S to F/N. Auditors who made them need Cramming badly or retreat.
  - K. Can't have or Hav. Find correct Havingness process and remedy.
  - L. PTS or Suppressed. Check for SP or get a full PTS RD.
  - M. Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow if qualified).
  - N. 2wc to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2wc to F/N and get further C/S instructions for handling if necessary.
  - O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate if no F/N on first. If false TA handle per I above.

General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.

### THE REASON FOR Q AND A

Q and A means "Question and Answer".

When the term Q and A is used it means one did NOT get an answer to his question. It also means not getting compliance with an order but accepting something else.

Example: Auditor: Do birds fly? Pc: I don't like birds. Auditor: What don't you like about birds? FLUNK. It's a Q and A. The right reply would be an answer to the question asked and the right action would be to get the original question answered. TR 4 (handling origins) can apply here. The moment TR 4 is violated (Ack and return the pc to original Question) and the original unanswered question is not again asked the Auditor just drifts along with the pc. Things get restimulated, nothing gets really handled or run.

In Administration the same thing can happen. The executive gives an order, the junior says or does something else, the executive does not simply TR 4 it and get the original order done, and the result is chaos.

Executive: Phone Mr. Schultz and tell him our printing order will be there this afternoon. Junior: I don't know his number. Executive: Don't you have a phone book? Junior: The phone company didn't send one this year as our bill was overdue. Executive (the fool) goes to Accounts to see what about the phone bill. Mr. Schultz never gets his call. The printing order arrives but Mr. Schultz doesn't know it ....

Example: Executive: Do target 21 now. Junior: I don't have any issue files. Executive: What happened to them? Junior: Mimeo goofed. Executive: I'll go see Mimeo ....

### DISPERSAL

Q and A is simply *Postulate Aberration*.

Aberration is non-straight line by definition.

A sick thetan who is all caved in can't direct a postulate *at* anything. When he tries, he lets it wobble around and go elsewhere.

The difference between a Degraded Being and an OT is simply that the DB can't put out a postulate or intention in a direct line or way and make it hold good.

The insane are a great example of this. They are insane because they have evil intentions. But they can't even make these stick. They may *intend* to burn down the house but they usually wind up watering the rug or do some other non sequitur thing. It's not that they don't mess things up. The whole point here is that they can't even properly destroy what they intend to destroy. Even their evil intentions wobble, poor things.

But not all people who Q and A are insane.

When a person is running at *effect* he Qs and As.

He is confronted by life, he does not confront it.

He is usually a bit blind to things as his ability to look AT is turned back on him by his lack of beam power. Thus he gives the appearance of being unaware.

His emotional feeling is overwhelm.

His mental state is confusion.

He starts for B, winds up at—A.

Other not too well intentioned people can play tricks on a Qer and Aer. When they don't want to answer or comply they artfully bring about a Q and A.

Example: Bosco does not want to staple the mimeo issue. He knows his senior Qs and As. So we get this. Senior: Staple that issue with the big stapler. Bosco: I hurt my thumb. Q and A Senior: Have you been to see the Medical Officer? Bosco: He wouldn't look at it. Q and A Senior: I'll go have a word with him. (Departs.) Bosco gets back to reading "Jesse James Rides Again" humming softly to himself. For HIS trouble is, he Qs and As with the Mest Universe!

### BODY Q AND A

Some people Q and A with their bodies. The body is, after all, composed of Mest. It follows the laws of Mest.

One of these laws is Newton's first law of motion: INERTIA. This is the tendency of a Mest object to remain motionless until acted upon by an exterior force. Or to continue in a line of motion until acted upon by an exterior force.

Well, the main force around that is continually acting on a human body is a thetan, the being himself.

The body will remain at rest (since it is a Mest Object) until acted upon by the thetan that is supposed to be running it.

If that being is an aberrated non-straight line being THE BODY REACTS ON HIM MORE THAN HE REACTS ON THE BODY. Thus he remains motionless or very slow. When the body is in unwanted motion, the being does not deter the motion as the body is acting upon him far more than he is reacting on the body.

As a result, one of the manifestations is Q and A. He wants to pick up a piece of paper. The body inertia has to be overcome to do so. So he does not reach for the paper, he just leaves the hand where it is. This would be no action at all. If he then weakly forces the motion, he finds himself picking up something else like a paper clip, decides he wants that anyway and settles for it. Now he has to invent why he has a paper clip in his hand. His original intention never gets executed.

Some people on medical lines are just there not because of actual illness but because they are just Qing and Aing with their body.

People also Q and A with themselves. They want to stop drinking and can't. They want to stop or change something about themselves or their body and then disperse off onto something else.

Freud read all sorts of dire and awful things into simple Q and A. He invented intentions the person must have that made him "sublimate". All Freud succeeded in doing was making the person introspective looking for wrong whys.

The right why was simple—the person could not go in a straight line to an

objective and/or could not cease to do something he was compulsively doing.

The very word ABERRATION contains the idea of this—no straight line but a bent one.

THE CURE FOR THIS SORT OF THING (Q and A with a body) IS OBJECTIVE PROCESSES.

And a very willing and bright thetan CAN simply recognize it for what it is—not enough push!

And instead of going to the MO for a slight ache, he just pushes on through.

As the ache is a recoil of body Q and A in a lot of cases, the ache itself goes away as soon as one simply pushes through.

Painters and artists buy the idea they are benefited by aberration. “Be glad you are neurotic” was a trick being played by the late and unlamented psychiatrists on artists.

One paints because he can push into execution what he visualizes. The best painters were the least aberrated.

Greenwich Village or Left Bank artists, when they *don't* paint, never suspect it's because they just can't overcome hand inertia to push a paint brush!

People live Q and A lives. They never become what they desire to be because they Q and A with life about it.

Schopenhauer, the German philosopher of doom, even had a dirty crack about being able to *do* things: “Stubbornness is the will taking the place of the intellect.” By this, one is “intellectual” if he Qs and As.

#### SUMMARY

People who can't get things done are simply Qing and Aing with people and life.

People who CAN get things done just don't Q and A.

All great truths are simple.

This is a major one.

*C/S Series 90*

**THE PRIMARY FAILURE**

References: HCO B 28 Feb 1971, C/S Series 24,  
"Metering Reading Items", and  
HCO B 15 Oct 1973, C/S Series 87,  
"Nulling and F/Ning Prepared Lists".

A C/S who cannot get a result on his pcs will find the most usual biggest improvement by getting the offending Auditors' ASSESSING handled.

We used to say that "the Auditor's TRs were out" as the most fundamental reason for no results.

This is not specific enough.

**THE MOST COMMON REASON FOR FAILED SESSIONS IS THE INABILITY OF THE AUDITOR TO GET READS ON LISTS.**

Time after time I have checked this back as the real reason.

It became evident when one could take almost any "null" (no read) list in a pc's folder, give it and the pc to an Auditor who COULD assess and get nice reads on it with consequent gain.

Example: Pc has a high TA. C/S orders a C/S 53RF. List is null. Pc goes on having a high TA. C/S gets inventive, case crashes. Another C/S and another Auditor takes the *same* pc and the same list, gets good reads, handles. Case flies again.

What was wrong was:

- (a) The Auditor's TR 1 was terrible.
- (b) The Auditor couldn't meter.

**REMEDY**

One takes the above two reference HCO Bs and gets their points fully checked on the flunking Auditor.

The C/S gets the Auditor's TR 1 corrected. In doing the latter one may find a why for the out TR 1 like a notion one must be soft-spoken to stay in ARC or the Auditor is imitating some other Auditor whose TR 1 is faulty.

**QUAL CRAMMING**

It can happen that these actions are reported done in Qual and the Auditor still flubs.

In this case the C/S has to straighten out Qual Cramming by doing the above reference HCO Bs on the Cramming Officer and getting the Cramming Officer's TR I ideas unscrewed and straight.

## REQUIREMENTS

It takes correct metering and IMPINGEMENT to make a list read.

If the auditor does not have these, then drug lists, Dianetic lists, correction lists will all go for nothing.

As the prepared list is the C/S's main tool for discovery and correction an auditor failure to get a list to respond or note it then defeats the C/S completely.

## SUMMARY

THE ERROR OF AN AUDITOR BEING UNABLE TO GET A LIST TO READ ON A METER IS A PRIMARY CAUSE OF C/S FAILURE.

To win, correct it!

**THE CONTINUOUS MISSED W/H  
AND CONTINUOUS OVERT  
WITH DATA ON DEGRADED BEINGS  
AND FALSE PTS CONDITIONS**

Reference: (1) Tape List and HCO B List of Level II,  
Page 4 HCO P/L 26.1.72, Issue VI, concerning Withholds and Overts.  
(2) "Admin Know-How—Alter-Is and Degraded Beings", HCO B 22 Mar 67.

There are two *special* cases of withholds and overts. They do not occur in all cases by a long ways. But they do occur on a few cases. These are CONTINUOUS MISSED WITHHOLDS and CONTINUOUS OVERTS.

This is not quite the same as "The Continuing Overt Act" HCO B 29 September 65. In that type the person is repeating overt acts against something usually named.

**THE CONTINUOUS MISSED W/H**

A Continuous Missed Withhold occurs when a person feels some way and anyone who sees him misses it.

Example: A doctor feels very unconfident of his skill. Every patient who sees him misses the fact that he is not confident. This reacts as a missed withhold.

It is of course based upon some bad incident that destroyed his confidence (usually of an engramic intensity).

But as the person actively withholds this, then those seeing him miss the withhold.

This could work in thousands of variations. A woman feels continuous disdain for her child but withholds it. The child therefore continuously misses a withhold. All the phenomena of the missed w/h would continuously react against the child.

Probably all dishonest social conduct brings about a Continuous Missed Withhold. The politician who hates people, the minister who no longer believes in God, the mechanic who privately believes he is a jinx on machinery, these all then set up the phenomena of missed withholds on themselves and can dramatize it in their conduct.

**THE CONTINUOUS OVERT**

A person who believes he is harmful to others may also believe that many of his common ordinary actions are harmful.

He may feel he is committing a Continuous Overt on others.

Example: A clothing model believes she is committing a fraud on older women by displaying clothing to them in which they will look poorly. In her estimation this is a Continuous Overt Act. Of course all older women miss it on her.

Appearance, just being alive, can be considered by some as an overt.

Missed withhold phenomena will result.

## DEGRADED BEINGS

The Continuous Withhold and Continuous Overt are probably a basis of feeling degraded.

Degraded Beings, as described in “Admin Know-How—Alter-Is and Degraded Beings”, HCO B 22 Mar 67, are that way at least in part because they have some Continuous Missed Withhold or a fancied Continuous Overt Act.

This makes them feel degraded and act that way.

## HANDLING

One can add to any program a check for a Continuous Missed Withhold or Continuous Overt as an additional version of rudiments.

A master question, which could be broken down into three lists which would have to be done by the laws of L&N, would be, “When anyone looks at you what feeling (action, attitude) of yours do they miss?” Then, “When was it missed?” “Who missed it?” and “What did he do that made you believe it had been missed?”

Another approach, less dangerous in that lists aren’t made, would be:

For Continuous Missed Withhold the question could be, “Is there some way you feel that others don’t realize?” And with 2wc uncover it. Then ask, “Who misses this?” with answer, followed by, “When has someone missed it?” with E/S to an earlier time. Followed by, “What did he (or she) do that made you think he (or she) knew?” This will key it out and can change behavior.

For Continuous Overt Act it would be, “Is there something you do that others do not know about?” With 2wc to cover it and get what it is. Then ask, “Who has not found out about it?” with an answer. And then, “When did someone almost find out?” “What did he (or she) do that made you think he (or she) knew?”

Each of the above questions should be F/Ned.

## MOTION

People who have Continuous Withholds or Overts tend to be very slow, flabby and impositive. They have to be very careful. And they make mistakes. Slowness or robotness are keys to the presence of Continuous Missed Withholds or Overts.

## PTS

Quite often a case is FALSELY LABELED PTS when in fact it is really a matter of Continuous Missed Withholds and Continuous Overts.

When a “PTS” person does not respond to PTS handling easily then you know you are dealing with Continuous Missed Withholds and/or Continuous Overts.

## SUMMARY

These conditions are not present in all cases. When they are you have a Degraded Being. When a “PTS” person does not respond to PTS handling, try Continuous Missed Withholds and Continuous Overts. You can prevent blows, handle much HE and R and change character in this way.

**ASSIST SUMMARY  
ADDITION**

TO LIST OF REFERENCES ADD:

HCO B 11 July 73 ASSIST SUMMARY  
HCO B 6 Jan 74 ASSIST SUMMARY ADDITION  
ANY TAPE OR MATERIALS ON "PRIOR CONFUSION"  
ANY TAPE OR MATERIALS ON "POSTULATES AND INJURIES"  
(1952 Autumn, London Lectures, etc)  
HCO Bs ON MISTAKES BEING MADE IN PRESENCE OF  
SUPPRESSION, 1968.

ADD TO PAGE 4 OF HCO B 11 July 73 after POSTULATE TWO-WAY  
COMM:

**PRIOR CONFUSION:** Fixed ideas follow a period of confusion. This is also true of engrams that hang up as physical injury. Slow recovery after an engram has been run can be caused by the Prior Confusion mechanism. The engram of accident or injury can be a stable item in a confusion. By 2-way comm see if a confusion existed prior to the accident, injury or illness. If so, it may be 2wced earlier similar to F/N.

**MYSTERY POINT:** Often there is some part of an incident which is mysterious to a preclear. The engram itself may hang up on a mystery. A thetan could be called a "mystery sandwich" in that he tends to stick in on mysteries. 2wc any mysterious aspect of the incident. 2wc it earlier similar to F/N Cog VGIs.

**SUPPRESSIVE PRESENCE:** Mistakes or accidents or injuries occur in the presence of suppression. One wants to know if any such suppressive influence or factor existed just prior to the incident being handled. This could be the area it occurred in or persons the preclear had just spoken to. 2wc any suppressive or invalidative presence that may have caused a mistake to be made or the accident to occur. 2wc E/S to F/N Cog VGIs.

**AGREEMENT:** Get any agreement the person may have had in or with the incident. There is usually a point where the person agrees with some part of the scene. If this point is found it will tend to unpin the pc from going on agreeing to be sick or injured.

**PROTEST:** 2wc any protest in the incident.

**PREDICTION:** The person is usually concerned about his recovery. Undue worry about it can extend the effects into the future. 2wc (a) how long he/she expects to take to recover. (b) Get the person to tell you any predictions others have made about it. 2wc it to an F/N Cog VGIs. Note—avoid getting the person to predict it as a very long time by getting him to talk about that further.

**LOSSES:** A person who has just experienced a loss may become ill. This is particularly true of colds. 2wc anything the pc may have lost to F/N.

**PRESENT TIME:** An injured or sick person is out of present time. Thus running HAVINGNESS in every assist session is vital. This not only remedies havingness but also brings the preclear to present time.

**HIGH OR LO TA:** A C/S 53 RF should be used to get the TA under control during assists if it cannot be gotten down. It must be done by an auditor who knows how to meter and can get reads.

**ILLNESS FOLLOWING AUDITING:** It can occur that a pc gets ill after being audited where the “auditing” is out tech. When this occurs or is suspected, a Green Form should be assessed only by an auditor who can meter and whose TR 1 gets reads. The GF reads are then handled. Out Interiorization, bad lists, missed w/hs, ARC Breaks and incomplete or flubbed engrams are the commonest errors.

**BEFORE-AFTER:** Where an injured or ill pc is so stuck that he has a fixed picture that does not move, one can jar it loose by asking him to recall a time before the incident and then asking him to recall a time after it. This will “jar the engram loose” and change the stuck point.

**UNCONSCIOUSNESS:** A pc can be audited even if in a coma. The processes are objective, not significance processes. One process is to use his hand to reach and withdraw from an object such as a pillow or blanket. One makes the hand do it while giving the commands. One can even arrange a “signal system” where the pc is in a coma and cannot talk by holding his hand and telling him to squeeze one’s hand once for yes, twice for no. It is astonishing that the pc will often respond and he can be questioned this way.

**TEMPERATURE ASSISTS:** There is an HCO B on how to do assists that bring down the temperature. Holding objects still repetitively is the basic process.

Quite often an injury or illness will miraculously clear up before one has run all the steps possible. If this is the case one should end off any further assist.

All auditing of injured or ill people must be kept fairly light. Errors in TRs (such as a bad TR 4), errors in tech rebound on them very heavily. An ill or injured person can easily be audited into a mess if the processes are too heavy for him to handle and if the auditor is goofing. Very exact in-tech, good TRs, good metering sessions are all that should be tolerated in assists.

An auditor has it in his power to make pcs recover spectacularly. That power is in direct proportion to his flawlessness as an auditor. Only the most exact and proper tech will produce the desired result.

If you truly want to help your fellows, that exact skill and those results are very well worth having.

## THE TECHNICAL BREAKTHROUGH OF 1973!

### THE INTROSPECTION RD

(Steps of list 1 to 17  
are subject to possible correction.)

I have made a technical breakthrough which possibly ranks with the major discoveries of the Twentieth Century. It is certainly the greatest advancement of 1973 and is now being released after a final wrap-up of research. It is called the Introspection Rundown.

The purpose of the Introspection RD is to locate and correct those things which cause a person to fixate his attention *inwardly*, on himself or his bank. This RD extroverts the person so that he can see his environment and therefore handle and control it.

### RESEARCH

In 1970 the actual cause of PSYCHOSIS was isolated (as given in HCO B C/S Series 22, "Psychosis", 28 November 1970). In the ensuing years this has been proven beyond doubt to be totally correct.

But what is a *psychotic break*?

Man has never been able to solve the psychotic break. In fact, human beings are actually afraid of a person in a psychotic break and in desperation turn to psychiatry to handle.

Psychiatry, desperate in its turn, without effective tech, resorts to barbarities such as heavy drugs, ice picks, electric and insulin shock which half kill the person and only suppress him. The fact remains there has never been a cure for the psychotic break *until now*.

The key is WHAT CAUSED THE PERSON TO INTROSPECT *BEFORE* THE PSYCHOTIC BREAK.

The breakthrough was made on a person who, after a series of wrong indications, went into a full-blown psychotic break—violence, destruction and all.

The psychiatrist at this point would have sharpened up his ice pick, filled his syringes with the most powerful (and deadly) drugs he could find and turned up the volts. His "handling" would have been a final destruction of the individual.

What *was* done was an auditor went into the room, sat the person down and corrected the last severe point of wrong indication. Subsequent times of wrong indication in his life were cleared up, the person came out of the psychotic break and into p.t.

THIS MEANS THE LAST REASON TO HAVE PSYCHIATRY AROUND IS GONE.

The psychotic break, the last of the "unsolvable" conditions that can trap a person, has been solved.

And it's quite simple, really.

## THEORY

Def. INTROSPECTION: “(L. from *introspicere*, to look within) a looking into one’s own mind, feelings, reactions, etc; observation and analysis of oneself.” *Webster’s New World Dictionary*.

Def. INTROVERSION: “(from *intro-* + L. *vertere*, to turn) 2.... a tendency to direct one’s interest upon oneself rather than upon external objects or events.” *Webster’s New World Dictionary*.

The essence of the Introspection RD is looking for and correcting all those things which CAUSED the person to look inward worriedly and wrestle with the mystery of some incorrectly designated error. The result is continual inward looking or self auditing without relief or end.

In a normal person this becomes a diminished activity, unhappiness or illness. In an *R/Ser* this becomes insanity and a psychotic break occurs at the last severe point of wrong indication.

## AUDITOR TRAINING

Auditors selected to do this RD must have recently done a HARD TRs Course and the Anti-Q&A materials.

They *must* be able to recognize a ROCK SLAM, which is a particular E-Meter phenomenon. They must be Class IV Expanded Dianetics auditors of proven skill on routine cases. They must not themselves be R/Sers. (The last requisite is waived in a self-salvage co-audit group where all R/S.)

They need *flawless* TRs, no Q&A. This Rundown is very simple but cannot be flubbed, as that will compound the errors and cause further introspection in the pc. It is better not to deliver this RD than to flub *any* part of it. C/Ses take note. It is an Ethics Offense to attempt this Rundown without the auditor having done the prerequisite training and a further offense for an auditor to flub on it.

## STEPS OF THE RD

(On a normal person do Steps 000, 0000, 00000 and 000000.)

- O. On a person in a psychotic break isolate the person wholly with all attendants *completely* muzzled (no speech).
- 00. Give Vitamins (B Complex, including niacinamide) and minerals (calcium and magnesium) to build the person up.
- 000. Locate by study or research of the person’s case *or* via associates or 2-way comm the latest point of introversion which will be just at the beginning of the current psychotic break.
- 0000. Indicate the substance of it to the person to release the By-Passed Charge.
- 00000. Indicate and handle the point of introversion and its chain. (Indication by itself can be a separate step before auditing.)
- 000000. Continue the RD as below.
  - 1. Verify/correct all L&N lists if not already done correctly.
  - 2. Verify/correct all Why Finding, 3 May PLs, PTS Interviews, etc. (See C/S Series 78.)

3. Word Clear the definitions of “Introspection”, “Introversion” and “Extroversion”.
4. Trace back the chain of being told his purposes were incorrect. To F/N Cog VGIs.
5. Trace back the chain of being “told” he had purposes that he didn’t actually have. To F/N Cog VGIs.
6. Trace back the chain of being asked for things that didn’t exist. To F/N Cog VGIs.
7. Trace back the chain of someone saying W/Hs existed that didn’t. To F/N Cog VGIs.
8. Trace back the chain of not having his withholds accepted. To F/N Cog VGIs.
9. Trace back the chain of someone accusing him of something he hadn’t done. To F/N Cog VGIs.
10. Trace back the chain of accusing *himself* of things he hadn’t done. To F/N Cog VGIs.
11. Trace back the chain of being heavily invalidated for something he didn’t do. To F/N Cog VGIs.
12. Trace back the chain of being validated for something he knew was wrong. To F/N Cog VGIs.
13. Trace back the chain of being told he was PTS when he wasn’t. To F/N Cog VGIs.
14. Trace back the chain of being interrogated for no reason. To F/N Cog VGIs.
15. Trace back the chain of being told he was someone he wasn’t. To F/N Cog VGIs.
16. Trace back the chain of not having his actual identity believed. To F/N Cog VGIs.
17. Objective Havingness to F/N.

At any time after Step 2 Objective Havingness should be done at session end. If one of the chains in Steps 3-15 turns out to be false the pc will introvert further. In such a case indicate the fact of it having been unnecessary and get an F/N. Then run Objective Havingness. If the TA goes high (or low) and won’t come into range, assess a C/S 53RF and handle.

In the case of a pc in a psychotic break, the C/S would have to locate the last severe wrong indication, indicate the fact to the pc and get it corrected (as with a wrong item) as the first action.

### EXTROVERSION

Def. EXTROVERSION: “. . . Means nothing more than being able to look outward....” “An extroverted personality is one who is capable of looking around the environment....” “A person who is capable of looking at the world around him and seeing it quite real and quite bright is of course in a state of extroversion.” (*Problems of Work.*)

The end phenomena of the Introspection RD is the person extroverted, no longer looking inward worriedly in a continuous self-audit without end.

The EP on a person in a psychotic break is the end of the psychotic break.

The RD is very simple and its results are magical in effectiveness. Flubs can wreck it so don't permit them.

You have in your hands the tool to take over mental therapy in full. You need not fear the insane or the psychotic break any longer.

Here also is the cure for the continual self-auditing pc who is dug into his bank. It works on all pcs in fact with rave results.

Do it flawlessly and we all win.

THIS PLANET IS OURS.

## DIANETICS

### R3R COMMANDS

#### HAVE BACKGROUND DATA

A Cramming action has just uncovered that at least some Dianetic Auditors do not know the reason for each R3R command and, not knowing why the commands exist, miss on cases.

A Cramming Officer or Supervisor can achieve a remarkable result by making an Auditor get the *why* of each R3R Dianetic command from the original materials.

The following development and use of this Cramming technique by Mike Maurer follows:

#### “CASE HISTORY”

“George Baillie, a Flag Interne, working on his Dianetics OK to Audit, was ordered to study the 1963 Dn HCO Bs (“Time Track and Engram Running by Chains” Bulletins, Bulletins 1 and 2). He read the HCO Bs but had not studied them vigorously enough and for *application*.

“As Interne Supervisor I worked with him covering these HCO Bs and *Original Thesis*. During the course of this action many confusions (primarily roteness) were handled. Among them were things like ‘What is the purpose of Step 6 of R3R, “What do you see?” ‘ He had previously thought it was to ‘orient’ the Pc to the incident or some such, but basically it came down to the fact he had never worked out the purpose of the command as related to the mechanics of the bank and time track. After some working he finally got the fact that Command 4 (duration) is to turn on the visio and that before moving the Pc through the incident one would have to know the Pc had visio so he could move through. Conversely, if the picture was not ‘turned on’ then the duration would have to be corrected. Another was the Step 3 Command (Move to that incident) on which the Interne thought that by repeating the auditing command when the Pc ‘couldn’t get there’ you would handle the time track. This of course is failure to handle an origination and failure to handle time for the Pc. He finally realized that obviously the Pc didn’t have the correct date in the first place and it is the Auditor’s action to find and get the correct date and thus move the somatic strip to that incident.

“Each command of R3R was taken up and its purpose demo’d out against the basic definitions and mechanics of the time track. One other of the things discovered by this Interne was that Command Nine (What happened?) has a purpose of running out the Locks created in PT, in session, by virtue of the fact that you’re reminding the Pc of Secondaries and Engrams right there! (This is of course covered in *Original Thesis*.)

“Probably the most stunning and revealing thing covered was the fact that in *Original Thesis* Chapter ‘Exhaustion of Engrams’, para 3, it says, ‘The principle of recounting is very simple. The preclear is merely told to go back to the beginning and to tell it all over again. He does this many times. As he does it the engram should lift in tone on each recounting. It may lose some of its data and gain other. If the Preclear is recounting in the same words time after time, it is certain that he is playing a memory record of what he has told you before. He must then be sent immediately back to the actual engram and the somatics of it restimulated. He will then be found to somewhat vary his story. He must be returned to the consciousness of somatics continually until these are fully developed, begin to lighten and are then gone.’ This of course totally

invalidates the use of a completely rote system and requires an understanding of what is happening to the Pc, bank, etc.

“Needless to say, this Interne went through many changes, now feels in comm with his Pcs and not ‘stuck’ to some rote procedure which truly inhibits the real gains to be gotten from Dianetics Engram Running. As evidence to this action and its resultant gains in the Interne’s ability to audit, the following is a brief description of a case he audited today *applying* 1963 engram running and *Original Thesis* to these cases.

“Case has run many hours of Dianetics with a hidden standard to do with his hand. Has been trying since earliest Dianetic sessions to get this handled. The somatic had been addressed by many different wordings and many chains but had never blown, yet chains had apparently gone to EP. The Auditor was C/Sed to find the actual somatic and run it out. It was found in session that the somatic had been run out to ‘EP’ so an L3B was done. From the L3B the Auditor found it was one incident in restim and proceeded to flatten the somatic chain connected with it. During this the Auditor on occasion had to correct three dates and two durations, but the spectacular part was Pc began on Steps 9 and D to say the same thing regarding incident each time. This being indicative of Pc running a memory record, Auditor moves Pc to the *actual Engram*, somatics intensify and then blow (for the first time), Pc exterior with VVGIs. Exam result is quite spectacular.

“All the above serves to once again validate the results of the Dianetics materials when they are applied in full.”

REVISED 28 JANUARY 1974

*(Changes in this type style)*

*I M P O R T A N T*

**L3RC**

**DIANETICS AND EXT RD REPAIR LIST**

(Revises L3B)

This list includes the most frequent Dianetic errors. Use up to Question 28 as the usual use. Then if the situation does not solve, use the rest of the list.

A high or low TA and a bogged case can result from failures to erase a chain of incidents.

DO NOT ATTEMPT TO REPAIR A CHAIN OR ENGRAM WITHOUT USING THIS LIST as it can have different or several errors.

REMEMBER THAT YOUR PC MAY NOT BE SUFFICIENTLY TRAINED TO UNDERSTAND ALL THESE QUESTIONS: IF ONE READS AND HE SAYS HE DOESN'T UNDERSTAND IT, CLEAR IT AND REASSESS (don't explain it and take it as it read on a misunderstood not on a fact).

RUNNING PCS ON DIANETICS WITHOUT A FULL AND COMPLETE DN C/S 1 INDOCTRINATION IS A FOOLISH ACTION.

TAKE ANY READ FOUND TO F/N BY INDICATION OR FULL REPAIR OF IT.

1. The Item or symptom being run had no charge on it. \_\_\_\_\_  
Indicate it was a false read, spot when it was run, where it was run and get an F/N.
2. The same incident or pictures were run before. \_\_\_\_\_  
Indicate that an overrun has occurred. If no F/N spot when, spot where and get an F/N.
3. A session was started on a new item while an old one was not erased. \_\_\_\_\_  
TA would have been high on an old item or the Interiorization Rundown and the auditor went on anyway with a new item. Find what the old item was and repair it with a new assessment on the earlier chain. Indicate fact to the pc.
4. The item being run described just one incident. (Narrative Item.) \_\_\_\_\_  
Find the somatics, emotions, attitudes of the incident and run them as chains as per Standard Dianetics.
5. The incident had an earlier beginning. \_\_\_\_\_  
Move the pc to the earlier beginning and proceed as per Standard Dianetics R3R.
- 5a. *There was an earlier misrun incident restimulated.* \_\_\_\_\_  
*This would be an incident that was never resolved (erased) and to handle it: Find out what it was and do an L3RC on it*
6. There were earlier incidents stirred up and not erased. \_\_\_\_\_

Find what chain or item and run it to completion by R3R. This condition sometimes leaves pc with the ARC Brk effect of by-passed charge and is a basic example of by-passed charge.

7. Stirred up earlier unrun incidents. (Same as 6.) \_\_\_\_\_
8. When running one item went into another instead and ran a different set of pictures.  
Jumped chain. \_\_\_\_\_
9. When you said it was erased it still had a mass.  
Auditor does ABCD again on the item one or two more times to get BD F/N. If TA goes up ask for earlier beginning or earlier similar on same incident to F/N. \_\_\_\_\_
10. You were protesting.  
Find out what was being protested and handle it. \_\_\_\_\_
11. You were still taking drugs or medicine that had not worn off. \_\_\_\_\_
12. You had a misunderstood on the commands.  
Clear them up. \_\_\_\_\_
13. You had a misunderstood on what you were supposed to be doing.  
Clear it up, get it done right. \_\_\_\_\_
14. A wrong item was given.  
This could also be a listing error. If not sure what it is, shift to L4BR. Otherwise find it and indicate it as a wrong item and that all other actions connected with it were wrong. You can also date the session in which it occurred. And you can also find earlier similar wrong items. \_\_\_\_\_
15. Has an earlier Dianetic upset been restimulated?  
Find the earlier one and straighten it out. Also it can go back 2 or 3 more earlier mix-ups. Straighten out as you go back. Then always check for "any earlier Dianetic upset" if you get no F/N. \_\_\_\_\_
16. There was an Incorrect date.  
Correct it. \_\_\_\_\_
17. There was an Incorrect duration.  
Correct it. \_\_\_\_\_
18. There was a false date.  
Find the real date despite the false date in the incident. \_\_\_\_\_
19. There was a false duration.  
Find the real duration despite the false duration in the incident. \_\_\_\_\_
20. Is there a stuck picture?  
Do 1—19 again on the picture and handle. \_\_\_\_\_
21. Is there a persistent mass?  
(Handle as in 24.) \_\_\_\_\_
22. Was this or an earlier action unnecessary? \_\_\_\_\_
23. Was there nothing wrong in the first place? \_\_\_\_\_
24. Did you have trouble with a pressure item or with pressure on an item?  
Date it *exactly* by meter and find out *where* it occurred in the universe. If done exactly right, it will blow up and vanish and F/N. If this doesn't work, do this list 1 down to 24 on it and correct it to F/N. \_\_\_\_\_
25. Did you move out of your head earlier in auditing?  
Do Ext RD. (Ref. HCO B 16 Dec 71, C/S Series 35R.) \_\_\_\_\_
26. Was your Exteriorization Rundown messed up? \_\_\_\_\_

Check folder on each flow and on the 2wc next day to be sure each flow was run to erasure and the 2wc to F/N. Remember that an auditor report can be a false report, and if you can't find the error in the folder, then do 1 to 24 on each flow. DO NOT AUDIT A PC FURTHER UNTIL THE EXT RD IS TOTALLY CORRECTED. IF YOU DO THE TA WILL RISE, WON'T COME DOWN AND PC WILL BE UPSET OR ILL.

IN CHOOSING WHICH OF THESE READING ITEMS TO HANDLE, ALWAYS HANDLE EXT RD ITEMS *FIRST*. THEN HANDLE THE REST.

DO NOT CONTINUE AUDITING A PC WHOSE EXT RD WAS MESSED UP AND NOT CORRECTED.

ANY ERROR REMAINING ON AN EXT RD IS DEADLY.

- 27. Were you being asked things you couldn't answer? \_\_\_\_\_
- 28. Did the auditor refuse to accept what you were saying? \_\_\_\_\_  
Get this and earlier similar instances until you get an F/N VGIs.

FROM HERE ON ASSESS FURTHER ONLY IF PC TA OR UPSET REMAIN UNHANDLED.

IF ANY OF THE FOLLOWING READ, INDICATE IT, GET AN F/N OR GET AN EARLIER SIMILAR UNTIL IT F/Ns.

- 29. Has an item read under protest? \_\_\_\_\_
- 30. Was there no interest in running item? \_\_\_\_\_
- 31. Was there no charge on item in the first place? \_\_\_\_\_
- 32. Has an item been misworded? \_\_\_\_\_
- 33. Were you more interested in running another item? \_\_\_\_\_
- 34. Was the item suppressed? \_\_\_\_\_
- 35. Was the item invalidated? \_\_\_\_\_
- 36. Was more than you could see demanded? \_\_\_\_\_
- 37. Were 2 or more engrams found on the same date? \_\_\_\_\_
- 38. Did you skid into another incident? \_\_\_\_\_
- 39. Did you move to another chain? \_\_\_\_\_
- 40. Did you change the item while running it? \_\_\_\_\_
- 41. Were you running an item different from that assessed? \_\_\_\_\_
- 42. Was an Implant restimulated? \_\_\_\_\_
- 43. Were earlier errors on engrams restimulated? \_\_\_\_\_
- 44. Was important data by-passed? \_\_\_\_\_
- 45. Was an incident skipped? \_\_\_\_\_
- 46. Did 2 or more incidents get confused? \_\_\_\_\_
- 47. Has a withhold been missed? \_\_\_\_\_
- 48. Has an incident been left too heavily charged? \_\_\_\_\_
- 49. Has a chain been abandoned? \_\_\_\_\_
- 50. Has an incident been abandoned? \_\_\_\_\_
- 51. Were you prevented from running an incident? \_\_\_\_\_
- 52. Were processes changed on you? \_\_\_\_\_

53. Has basic on a chain been by-passed? \_\_\_\_\_
54. Has an erasure been denied you? \_\_\_\_\_
55. After it was erased did you have to put it back to erase it? \_\_\_\_\_
56. Were you running copies of the original after it had gone? \_\_\_\_\_
57. Have you gone past erasure into another chain? \_\_\_\_\_
58. Have several different chains been pulled in? \_\_\_\_\_
59. Has a cognition been chopped? \_\_\_\_\_
60. Has an F/N been indicated too soon? \_\_\_\_\_
61. Has the somatic gone but picture still there? \_\_\_\_\_
62. Should a basic be run through one more time? \_\_\_\_\_
63. Have you been held up by the auditor? \_\_\_\_\_
64. Were you distracted in session? \_\_\_\_\_
- 65.+ Did you go exterior in an incident? \_\_\_\_\_
66. Was an incident overrun? \_\_\_\_\_
- 67.+ Did you go exterior in session? \_\_\_\_\_
- 68.\* Have you not wanted to go earlier than this life? \_\_\_\_\_
69. Has it been all black? \_\_\_\_\_
70. Was it all invisible? \_\_\_\_\_
71. Was the incident really a false or implanted occurrence? \_\_\_\_\_
- 72.\* Have you had constantly changing pictures? \_\_\_\_\_
73. Have you never had any pictures? \_\_\_\_\_
74. Are you having to put it there to run it?  
Get Earlier Similar times to F/N VGIs. \_\_\_\_\_
75. Are incidents being overrun? \_\_\_\_\_
76. Has some major auditing action been done twice? \_\_\_\_\_
77. Has there been an unnecessary action? \_\_\_\_\_
78. Was there nothing wrong in the first place? \_\_\_\_\_
79. Was the real reason missed? \_\_\_\_\_
80. Was something else wrong?  
(Do a Green Form.) \_\_\_\_\_

*NOTE:*

+ If questions 65 or 67 read and the pc has not had Interiorization Rundown and the associated 2-way comm, the auditor ends off and sends folder to C/S so it can be C/Sed for Ext RD.

\* If questions 68 or 72 read, after indicating BPC, the auditor would end off and return folder to C/S.

*WARNING:*

Do not use any Prepcheck-type buttons during engram running or add overts to this list as they will "mush" engrams.

## THE TECHNICAL BREAKTHROUGH OF 1973!

### THE INTROSPECTION RD

(Changes HCO B 23 Jan 1974,  
“The Introspection RD”.)

I have made a technical breakthrough which possibly ranks with the major discoveries of the Twentieth Century. It is certainly the greatest advancement of 1973 and is now being released after a final wrap-up of research. It is called the Introspection Rundown.

The purpose of the Introspection RD is to locate and correct those things which cause a person to fixate his attention *inwardly*, on himself or his bank. This RD extroverts the person so that he can see his environment and therefore handle and control it.

### RESEARCH

In 1970 the actual cause of PSYCHOSIS was isolated (as given in HCO B C/S Series 22, “Psychosis”, 28 November 1970). In the ensuing years this has been proven beyond doubt to be totally correct.

But what is a *psychotic break*?

Man has never been able to solve the psychotic break. In fact, human beings are actually afraid of a person in a psychotic break and in desperation turn to psychiatry to handle.

Psychiatry, desperate in its turn, without effective tech, resorts to barbarities such as heavy drugs, ice picks, electric and insulin shock which half kill the person and only suppress him. The fact remains there has never been a cure for the psychotic break *until now*.

The key is WHAT CAUSED THE PERSON TO INTROSPECT *BEFORE* THE PSYCHOTIC BREAK.

The breakthrough was made on a person who, after a series of wrong indications, went into a full-blown psychotic break—violence, destruction and all.

The psychiatrist at this point would have sharpened up his ice pick, filled his syringes with the most powerful (and deadly) drugs he could find and turned up the volts. His “handling” would have been a final destruction of the individual.

What *was* done was an auditor went into the room, sat the person down and corrected the last severe point of wrong indication. Subsequent times of wrong indication in his life were cleared up, the person came out of the psychotic break and into p.t.

THIS MEANS THE LAST REASON TO HAVE PSYCHIATRY AROUND IS GONE.

The psychotic break, the last of the “unsolvable” conditions that can trap a person, has been solved.

And it’s quite simple, really.

## THEORY

Def. INTROSPECTION: "(L. from *introspicere*, to look within) a looking into one's own mind, feelings, reactions, etc.; observation and analysis of oneself." *Webster's New World Dictionary*.

Def. INTROVERSION: "(from *intro-* + L. *vertere*, to turn) 2.... a tendency to direct one's interest upon oneself rather than upon external objects or events." *Webster's New World Dictionary*.

The essence of the Introspection RD is looking for and correcting all those things which CAUSED the person to look inward worriedly and wrestle with the mystery of some incorrectly designated error. The result is continual inward looking or self auditing without relief or end.

In a normal person this becomes a diminished activity, unhappiness or illness. In *an R/Ser* this becomes insanity and a psychotic break occurs at the last severe point of wrong indication.

*The pc who originates to the Examiner about his case or writes notes to the C/S or auditor is introverted and should have this RD.*

## AUDITOR TRAINING

Auditors selected to do this RD must have recently done a HARD TRs Course and the Anti-Q&A materials.

They *must* be able to recognize a ROCK SLAM, which is a particular E-Meter phenomenon. They must be Class IV Expanded Dianetics auditors of proven skill on routine cases. They must not themselves be R/Sers. (The last requisite is waived in a self salvage co-audit group where all R/S.)

They need *flawless* TRs, no Q&A. This Rundown is very simple but cannot be flubbed, as that -will compound the errors and cause further introspection in the pc. It is better not to deliver this RD than to flub *any* part of it. C/Ses take note. It is an Ethics Offense to attempt this Rundown without the auditor having done the prerequisite training and a further offense for an auditor to flub on it.

\* \* \*

## STEPS OF THE RD

(Steps O and 00 are for a person  
in a psychotic break, not a  
normal person.)

Put this checklist on inside front cover of folder as a pgm.

- O. On a person in a psychotic break isolate the person wholly with all attendants *completely* muzzled (no speech). \_\_\_\_\_
- 00. Give Vitamins (B Complex, including niacinamide) and minerals (calcium and magnesium) to build the person up. \_\_\_\_\_
- 1. Locate by study or research of the person's case or via associates or 2 way comm the last severe point of introversion just prior to the current psychotic break or illness. There may be several severe points of introversion, prior or subsequent to the one that triggered the break or illness. These points are identified by their upsetting or worrisome effect on the pc. Each is noted down for handling. \_\_\_\_\_
- 2. On each point, indicate the substance of it as a point of introversion to release the By-Passed Charge. Each should BD and F/N. First point indicated to F/N. \_\_\_\_\_

- 2B. Second point indicated to F/N. \_\_\_\_\_
- 2C. Third point indicated to F/N.  
In the case of an out-list, the fact of a wrong item would be indicated and the list corrected by the Laws of L&N. \_\_\_\_\_
- 3. Get the wording of each point stated by the pc as an item (i.e. "What would you call such an incident?") and its read and handle by 2wc each flow E/Sim to F/N. First point 2wc'd F-1230 to F/N. \_\_\_\_\_
- 3A. Second point 2wc'd F-1230 to F/N. \_\_\_\_\_
- 3B. Third point 2wc'd F-1230 to F/N. \_\_\_\_\_
- 4. Verify/Correct all L&N lists. \_\_\_\_\_
- 5. Verify/Correct all Why "lists", PTS Interviews, 3 May PLs per C/S Series 78. \_\_\_\_\_
- 6. R3R Quad item found in No. 3. ("Locate an incident where\_\_\_\_\_.") \_\_\_\_\_
- 6A. L&N for the Intention behind the *subject* in No. 3. Verify Q for read before listing. \_\_\_\_\_
- 6B. R3R Quad the Intention. \_\_\_\_\_
- 6C. R3R Quad, L&N Intention & R3R Quad any other items found (No. 3A, 3B, etc). \_\_\_\_\_
- 7. Clear the words "Introversion", "Introspection", "Extroversion". \_\_\_\_\_
- 8. ARC BREAKS HANDLING. \_\_\_\_\_
- 8A. 2wc Has another ARC Broken you? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8B. 2wc Have you ARC Broken another? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8C. 2wc Have others ARC Broken anyone else? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8D. 2wc Have you ARC Broken yourself? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8E. 2wc Has anyone ever made you feel you had an ARC Break when you didn't? E/S to F/N. \_\_\_\_\_
- 8F. 2wc Have you ever made anyone else feel he had an ARC Break when he didn't? E/S to F/N. \_\_\_\_\_
- 8G. 2wc Have others ever made anyone else feel he had an ARC Break when he didn't? E/S to F/N. \_\_\_\_\_
- 8H. 2wc Have you ever made yourself feel you had an ARC Break when you didn't? E/S to F/N. \_\_\_\_\_
- 8I. R3R Quad the item. \_\_\_\_\_
- 8J. L&N for the Intention behind "the forcing of upsets on people who don't have them." \_\_\_\_\_
- 8K. R3R Quad the Intention, in No. 8J. \_\_\_\_\_
- 9. WITHHOLDS HANDLING. \_\_\_\_\_

- 9A. 2wc Are you withholding something from anyone? E/Sim to F/N. \_\_\_\_\_
- 9B. 2wc Is anyone else withholding something from you? E/Sim to F/N. \_\_\_\_\_
- 9C. 2wc Are others withholding something from anyone else? E/Sim to F/N. \_\_\_\_\_
- 9D. 2wc Are you withholding something from yourself? E/Sim to F/N. \_\_\_\_\_
- 9E. 2wc Has anyone demanded W/Hs you didn't have? E/Sim to F/N. \_\_\_\_\_
- 9F. 2wc Have you demanded withholds of anyone else they didn't have? E/Sim to F/N. \_\_\_\_\_
- 9G. 2wc Have others demanded withholds of anyone else they didn't have? E/Sim to F/N. \_\_\_\_\_
- 9H. 2wc Have you demanded W/Hs from yourself that you didn't have? E/Sim to F/N. \_\_\_\_\_
- 9I. R3R Quad "demanded non-existent W/Hs from ."
- 9J. L&N, Clear Q thoroughly and verify for read first, what purpose would be behind "the demanding of non-existent W/Hs from others"?
- 9K. R3R Quad the item in No. 9J. \_\_\_\_\_
10. PROBLEMS HANDLING. \_\_\_\_\_
- 10A 2wc Has another given you a problem? E/Sim to F/N. \_\_\_\_\_
- 10B 2wc Have you given another a problem? E/Sim to F/N. \_\_\_\_\_
- 10C 2wc Have others given a problem to anyone else? E/Sim to F/N. \_\_\_\_\_
- 10D. 2wc Have you given yourself a problem? E/Sim to F/N. \_\_\_\_\_
- 10E. 2wc Has anyone ever made you feel you had a problem when you didn't? E/Sim to F/N. \_\_\_\_\_
- 10F. 2wc Have you ever made anyone else feel he had a problem when he didn't? E/Sim to F/N. \_\_\_\_\_
- 10G. 2wc Have others ever made anyone else feel he had a problem when he didn't? E/Sim to F/N. \_\_\_\_\_
- 10H 2wc Have you ever made yourself feel you had a problem when you didn't? E/Sim to F/N. \_\_\_\_\_
- 10I R3R Quad the item. \_\_\_\_\_
- 10J L&N for the Intention behind "the giving of problems to people that don't belong to them." \_\_\_\_\_
- 10K R3R Quad the Intention, in No. 10J. \_\_\_\_\_
11. OVERTS HANDLING. \_\_\_\_\_
- 11A 2wc Has anyone else committed overt acts on you? E/Sim to F/N. \_\_\_\_\_
- 11B 2wc Have you committed overt acts on anyone else? Get what, E/Sim to F/N. \_\_\_\_\_
- 11C 2wc Have others committed overt acts on anyone else? E/Sim to F/N. \_\_\_\_\_

- 11D 2wc Have you committed any overts on yourself? E/Sim to F/N. \_\_\_\_\_
- 11L 2wc Has anyone ever accused you of something you didn't do?  
E/Sim to F/N. \_\_\_\_\_
- 11F 2wc Have you ever accused anyone else of something he didn't  
do? E/Sim to F/N. \_\_\_\_\_
- 11G 2wc Have others ever accused anyone else of something he  
didn't do? E/Sim to F/N. \_\_\_\_\_
- 11H 2wc Have you ever accused yourself of something you didn't do?  
E/Sim to F/N. \_\_\_\_\_
- 11I R3R Quad the item. \_\_\_\_\_
- 11J L&N for the Intention behind "the accusing of someone of non-  
existent overts." \_\_\_\_\_
- 11K R3 R Quad the Intention, in No. 11J. \_\_\_\_\_
- 12 NOT SAYING. \_\_\_\_\_
- 12A 2wc Are you not saying something about someone else or  
something? Get what, E/Sim to F/N. \_\_\_\_\_
- 12B 2wc Is anyone not saying something about you? E/Sim to F/N. \_\_\_\_\_
- 12C 2wc Are others not saying something about anyone else? E/Sim  
to F/N. \_\_\_\_\_
- 12D 2wc Are you not saying something about yourself? E/Sim to F/N. \_\_\_\_\_
- 12E 2wc Has anyone not accepted your W/Hs? E/Sim to F/N. \_\_\_\_\_
- 12F 2wc Have you not accepted someone else's W/Hs? E/Sim to F/N. \_\_\_\_\_
- 12G 2wc Have others not accepted anyone else's W/Hs? E/Sim to F/N. \_\_\_\_\_
- 12H 2wc Have you not accepted your own W/Hs? E/Sim to F/N. \_\_\_\_\_
- 12I R3R Quad "W/Hs weren't accepted." \_\_\_\_\_
- 12J L&N Intention behind "the rejecting of others' W/Hs." \_\_\_\_\_
- 12K R3R Quad the Intention, in No. 12J. \_\_\_\_\_
13. FALSE INCIDENTS HANDLING. \_\_\_\_\_
- 13A. 2wc Has anyone ever asked you for things that didn't exist?  
E/S to F/N. \_\_\_\_\_
- 13B. 2wc Have you ever asked anyone else for things that didn't  
exist? E/S to F/N. \_\_\_\_\_
- 13C 2wc Have others ever asked anyone else for things that didn't  
exist? E/S to F/N. \_\_\_\_\_
- 13D 2wc Have you ever asked yourself for things that didn't exist?  
E/S to F/N. \_\_\_\_\_
- 13E R3R Quad the item. \_\_\_\_\_
- 13F L&N for the Intention behind "the demanding of false incidents  
from others." \_\_\_\_\_
- 13G R3R Quad the Intention, in No. 13F. \_\_\_\_\_

- 14 PTS HANDLING. \_\_\_\_\_
- 14A 2wc Has anyone given you a false assignment that you were being done in? E/S to F/N. \_\_\_\_\_
- 14B 2wc Have you given anyone a false assignment that he was being done in? E/S to F/N. \_\_\_\_\_
- 14C 2wc Have others given anyone else a false assignment that they were being done in? E/Sim to F/N. \_\_\_\_\_
- 14D 2wc Have you given yourself a false assignment that you were being done in? E/S to F/N. \_\_\_\_\_
- 14E R3R Quad the item. \_\_\_\_\_
- 14F L&N for the Intention behind “giving others a false assignment that they were being done in.” \_\_\_\_\_
- 14G R3R Quad the Intention, in No. 14F. \_\_\_\_\_
- 14H 2wc Has anyone been doing you in? E/S to F/N. \_\_\_\_\_
- 14I 2wc Have you been doing anyone else in? E/S to F/N. \_\_\_\_\_
- 14J 2wc Have others been doing anyone else in? E/S to F/N. \_\_\_\_\_
- 14K 2wc Have you been doing yourself in? E/S to F/N. \_\_\_\_\_
- 15 FALSE INTERROGATION HANDLING. \_\_\_\_\_
- 15A 2wc Has anyone ever interrogated you for no reason? E/S to F/N. \_\_\_\_\_
- 15B 2wc Have you ever interrogated anyone else for no reason? E/S to F/N. \_\_\_\_\_
- 15C 2wc Have others ever interrogated anyone else for no reason? E/S to F/N. \_\_\_\_\_
- 15D 2wc Have you ever had yourself interrogated for no reason? E/S to F/N. \_\_\_\_\_
- 15E R3R Quad the item. \_\_\_\_\_
- 15F L&N for the Intention behind “the false interrogating of others.” \_\_\_\_\_
- 15G R3R Quad the Intention, in No. 15F. \_\_\_\_\_
- 16 FALSE INVALIDATION HANDLING. \_\_\_\_\_
- 16A 2wc Has anyone ever heavily invalidated you unjustly? E/S to F/N. \_\_\_\_\_
- 16B 2wc Have you ever heavily invalidated anyone else unjustly? E/S to F/N. \_\_\_\_\_
- 16C 2wc Have others ever heavily invalidated anyone else unjustly? E/S to F/N. \_\_\_\_\_
- 16D 2wc Have you ever heavily invalidated yourself unjustly? E/S to F/N. \_\_\_\_\_
- 16E R3R Quad the item. \_\_\_\_\_
- 16F L&N for the Intention behind “the unjust invalidating of others.” \_\_\_\_\_
- 16G R3R Quad the Intention, in No. 16F. \_\_\_\_\_

- 17 FALSE VALIDATION HANDLING. \_\_\_\_\_
- 17A 2wc Has another ever validated you for something he knew was wrong? E/S to F/N. \_\_\_\_\_
- 17B 2wc Have you ever validated anyone else for something you knew was wrong? E/S to F/N. \_\_\_\_\_
- 17C 2wc Have others ever validated anyone else for something they knew was wrong? E/S to F/N. \_\_\_\_\_
- 17D 2wc Have you ever validated yourself for something you knew was wrong? E/S to F/N. \_\_\_\_\_
- 17E R3R Quad the item. \_\_\_\_\_
- 17F L&N for the Intention behind “the false validating of others.” \_\_\_\_\_
- 17G R3R Quad the Intention, in No. 17F. \_\_\_\_\_
18. “HIT” FOR NO REASON. \_\_\_\_\_

- 21 OBJECTIVE HAVINGNESS. \_\_\_\_\_

An HC List could be added here if the pc's "think" is still weird.

*NOTE: ITEMS THAT DON'T READ WON'T RUN. DON'T RUN OR LIST Q's THAT DON'T READ OR YOU'LL REINTROVERT THE PC.*

Frequent D of P Interview is vital whenever the case looks like it is not rapidly progressing. Also a quick assessment may be needed as a separate action to isolate possible charged areas of introspection.

At any time after Step 2, Objective Havingness should be done at session end. If one of the items in Steps 3-20 turns out to be false the pc will introvert further. In such a case indicate the fact of it having been unnecessary and get an F/N. Then run Objective Havingness. If the TA goes high (or low) and won't come into range, assess a C/S 53RF and handle.

In the case of a pc in a psychotic break, the C/S would have to locate the last severe wrong indication, indicate the fact to the pc and get it corrected (as with a wrong item) as the first action.

### EXTROVERSION

Def. EXTROVERSION: ". . . Means nothing more than being able to look outward...." "An extroverted personality is one who is capable of looking around the environment ...." "A person who is capable of looking at the world around him and seeing it quite real and quite bright is of course in a state of extroversion." (*Problems Of Work.*)

The end phenomena of the Introspection RD is the person extroverted, no longer looking inward worriedly in a continuous self-audit without end.

The EP on a person in a psychotic break is the end of the psychotic break.

The RD is *very* simple and its results are magical in effectiveness. Flubs can wreck it so don't permit them.

You have in your hands the tool to take over mental therapy in full. You need not fear the insane or the psychotic break any longer.

Here also is the cure for the continual self-auditing pc who is dug into his bank. It works on all pcs in fact with rave results.

Do it flawlessly and we all win.

THIS PLANET IS OURS.

*Expanded Dianetics Series 20*

**SERVICE FACSIMILE THEORY  
AND EXPANDED DIANETICS**

As a re-study of Service Facsimiles the following theory is released as background.

Note that this is background data for Class IV but is in actual practice used on Expanded Dianetics.

This sheds some light on Evil Purposes.

And a new approach comes to light for use in Expanded Dianetics.

**NONE OF THIS ALTERS CLASS IV and NONE OF IT CANCELS OR  
CHANGES CLASS IV OR EARLIER DATA.**

AN OUTLINED NEW XDN RD

Service Facs By Dynamics and sections thereof.

How to be right on the \_\_\_\_ Dynamic Triple. (The exact Question needs to be worked out for various pcs.)

All L&N and therefore very dicey.

The theory is that a thetan even when pressed or suppressed to the absolute limit of near extinction will still try, even when “cooperating”, to some way be right.

A thetan cannot die. His only out is to try to stop something as he himself cannot stop living.

This gives rise to fixed ideas as he is trying to stop—therefore the ideas hold in time and continue.

His efforts to be right continue to stop *him* in a reverse flow.

This is true because he is already at near total effect. He also becomes the effect of his own fixed idea efforts to handle.

Just as a man being crushed by a house-size rock will still put his hands out to fend it off, so will a thetan continue to fend off his believed oppressions by stopping them.

Insistence on rightness is a last refuge of beingness. Thus one gets some very aberrated ones.

These he uses in situations where he thinks he might be found wrong.

These are called “Service Facsimiles”. “Service” because they “serve” him. “Facsimiles” because they are in mental image picture form. They explain his disabilities as well.

The facsimile part is actually a self-installed disability that “explains” how he is not responsible for not being able to cope. So he is not wrong for not coping.

Part of the “package” is to be right by making wrong.

The service facsimile is therefore a picture containing an explanation of self condition and also a fixed method of making others wrong.

A real handling would have to include:

- A. What disability he uses to explain how he is not responsible for not fully coping with life or given situations.
- B. A fixed postulate he uses to further assert that in actual fact he is still right.
- C. The computation as contained in B to make others wrong so as to be right.

Handling therefore would include:

- a. The disability R3 R Triple.
- b. L&N for a fixed postulate on each dynamic he uses to be right.
- c. A realization he is using this to make others wrong so he can be right.

All these conditions would have to be handled to fully handle a Service Fac to full EP.

*C/S Series 91*

**MUTUAL OUT RUDS**

It has been known for many many years that the phenomenon of “Mutual Out Ruds” existed.

This means TWO OR MORE PEOPLE WHO MUTUALLY HAVE RUDS OUT ON THE WIDER GROUP OR OTHER DYNAMICS AND DO NOT GET THEM IN.

Example: A husband-wife co-audit team never run O/Ws on the rest of the family because both of them have similar overts and so consider it usual.

Example: Prisoners engaged in co-auditing (as in Narconon) may have similar overts, withholds, ARC Brks and/or problems with the rest of society and so do not think of handling them as out-ruds.

Example: Two top class auditors co-auditing, have similar overts on the junior auditors and the org and so never think to get them in.

**THIS CAN STALL CASES!**

A C/S has to take this factor into account wherever he has a possibility of its occurring.

In one instance mutual out ruds went so far as four auditors, co-auditing, agreeing never to put their overts down on W/Ses “so they would not lose reputation”. Needless to say all four eventually blew.

If the C/S had done a *routine* check for mutual out ruds, this whole scene would have been prevented and four beings would not have ruined each other.

**IN ANY SITUATION WHERE A SMALL PORTION OF A LARGER GROUP IS ENGAGED IN CO-AUDIT THE C/S MUST CHECK ROUTINELY FOR MUTUAL OUT RUDS.**

This could even apply to an org or vessel which was separate from the rest of society around it: its members could develop mutual out ruds from the rest of society and cases could fail on this point.

**Be alert to MUTUAL OUT RUD SITUATIONS AND HANDLE BY GETTING THEM IN ON THE *REST* OF THE SURROUNDING PEOPLE OR SOCIETY.**

**INTROSPECTION RD  
ADDITIONAL ACTIONS**

**RESPONSIBILITY STEP**

An additional step to the rundown has been found necessary, especially in the case of a psychotic. This is the Responsibility Step. It consists of doing ARC Brks LD Triple, 2wc Recent Actions taking up the best reading overt and running Responsibility on it (i.e. What about\_\_\_\_\_could you be responsible for?). If no major increase in responsibility take up another reading overt and run Responsibility on that. Do this until there is a *significant* increase in responsibility. Follow this with running all E. Purps brought up during the Introspection steps of the RD. If the pc was found to R/S during the RD the C/S would order the R/Sing statements culled and assessed and those with good reads handled by L&N "What intention is connected with (statement)?" then R3R Quad. Additionally the C/S would note areas of low responsibility and order O/W run on those areas.

**PROGRAMMING DATA**

In the case of a psycho it is necessary to tailor the Introspection RD steps to the pc, instead of following it as a rote sequence at the risk of running unreading items on the pc. On any pc this is deadly. In a psycho it is pure dynamite.

To do this the C/S would order the subjects of the RD steps assessed, then handled in order of large reads. The Auditor's TR- 1 and metering must be such that he can make a meter read. The RD could be made to fail on this point by missing hot subjects.

**THE CLEARED CANNIBAL FACTOR**

When you clear a cannibal what do you have? Experientially you have a cannibal. His experiential track is such that he's been a cannibal for ages. That's how he's handled life and people around him, that's what he knows how to do. This person is unaware of his responsibilities to other dynamics and is unfamiliar with proper behavior and responsible actions towards others. In the case of an SP, he has been busy destroying others for so long that when he's somewhat cleaned up on this he does not know what else to do or how to act. It's rather pathetic, actually.

**ISOLATION**

In a person in a psychotic break, it is necessary to isolate them for them to destimulate and to protect them and others from possible damage. While in isolation the person receives the Introspection RD done flawlessly on a short-session basis, gradually winning and gaining confidence. Between sessions the muzzled rule is in force. No one speaks to the person or in his hearing.

There comes a point where the C/S must decide to release the person from isolation. To do this the C/S *must* know that the person can take responsibility for his actions as regards others, as well as toward himself.

### C/S ACTION— CLEARED CANNIBAL STEP

The C/S's action is a direct comm line to the person by notes. The person is provided with paper and pen to reply. The C/S must determine the person's responsibility level. Example: "Dear Joe. What can you guarantee me if you are let out of isolation?" If the person's reply shows continued irresponsibility toward other dynamics or fixation on one dynamic to the exclusion of others damaged the C/S must inform the person of his continued isolation and why. Example: "Dear Joe. I'm sorry but no go on coming out of isolation yet. Your actions threatened the survival of hundreds of people indirectly and 6 families directly by burning down their houses. You are unaware of the effects this could have had and still only concerned about your own welfare. You must hate the human race quite a bit."

The C/S has drawn a conclusion based on the information he has and lets the person know where he stands. He does *not* reintrovert the pc by asking him, "Why did you burn down those houses?" He draws an accurate conclusion and indicates it.

This will elicit a protest from the person and bring about an *involvement* in the dynamics concerned. It also serves to bring about an awareness of consequences. Example: "But. . . but. . . I never meant to threaten others' survival. I just wanted to burn down the houses because I like fires. Gosh. . . I didn't mean it. I don't hate the human race. . . Oh! I really *don't* hate the human race." Cognition.

The person's auditing is continued between these exchanges. The Auditor may have to clean up some ARC Breaks as the protest is coming off. Skillfully done, that's all the Auditor should have to clean up, except maybe some more O/Ws. When it is obvious the person is out of his psychosis and up to the responsibility of living with others his isolation is ended.

### SUMMARY

Handling the C/Sing and auditing on this RD requires a *real* understanding of Dianetics and Expanded Dianetics basics and the utmost precision of application. Its results are nothing short of miraculous. I hope this will be of further assistance to you.

**INTROSPECTION RD  
SECOND ADDITION  
INFORMATION TO C/SES  
FIXATED ATTENTION**

Ref. *Creation of Human Ability*  
R2-39 and R2-23

Sometimes the C/S runs into the case whose attention is solidly fixed on something. When attention is fixed we have an unawareness of other things than the object of fixation and a lessening of Self-Determinism to a point of Other Determinism. Example: The pc is always bringing up cars. He has trouble with cars, has ARC Breaks about cars, W/Hs about cars, commits overts on cars. It worries him all the time, is a constant problem.

The fixated attention case appears not to as-is and is usually stuck on the track in the “quiet” portion of an incident. Ahead of it and behind it is extreme randomness. This is not easily confronted so is not-ised. The solution is to get the pc to exercise his attention putting it here and there.

**INTROVERSION AND ATTENTION**

The pc whose attention is fixated manifests it in several ways. He will be continuously introverted on the area, will bring it up often in session but it doesn't seem to blow. It also shows up in correspondence to the C/S, frequent originations at Examiner, a fixed vague stare, all evidence of introversion. The pc may not originate it.

**ANATOMY AND REMEDY**

This fixation shows up as a problem but it is usually a Hidden Standard, a special problem the pc thinks must be resolved before auditing can be seen to have worked. Hence the NCG (no case gain) aspect. It is always an old problem of long duration.

The remedy basically involves getting the terminal connected with the area of fixation located and having the pc put his attention on the terminal and take his attention off the terminal.

**THE PROCESS**

*STEP 1*—Determine exactly what the pc has attention fixed on, by folder inspection or 2wc for a BD F/N item.

*STEP 2*—Get the area translated into a terminal. This will read well and have a high degree of pc interest.

*STEP 3*—Fit the terminal in the commands: “Put your attention on terminal.” “Take your attention off terminal.” Clear and run it alternate repetitive to the EP of pc's attention no longer fixed on the. area, F/N Cog VGIs. This is called Attention Subjective Repetitive.

*STEP 4*—Select two objects. Best are a red pen and a blue pen. Two bowling pins will also do. Place them three to four feet apart at a distance of three to four feet from the pc. Place them on white paper for visibility.

*STEP 5*—Name the objects and fit them in the commands: “Put your attention on the red pen.” “Put your attention on the blue pen.” Clear the commands and run them alternate repetitive to the EP of pc in control of his attention, F/N Cog VGIs. This is called Attention Objective Repetitive.

*ALTERNATE STEP 5*—Name the objects and fit them in the following commands: “Decide to put your attention on the red pen. Tell me when you’ve done so.” “Put your attention on it.” Then “Decide to put your attention on the blue pen. Tell me when you’ve done so.” “Put your attention on it.” Run this alternate repetitive until the pc is doing the decision step each time, then you can drop out the “Tell me when you’ve done so.” Run it to the EP of pc in control of his attention, F/N Cog VGIs. This is called Attention Objective Decision Repetitive.

*NOTE:* With both these objective attention processes the pc may swear you are hypnotizing him or something. The process actually runs out hypnotism. The pc will come through a band of Robotism and come out the other end IN CONTROL OF HIS OWN ATTENTION.

#### VITAL PROCESS DATA

It would never be okay to run Attention *Subjective* Repetitive on a *significance* (a no mass thing). It must be run on a terminal. This is a ONE-SHOT PROCESS, depending for its effectiveness on the correctness of the first item selected.

This item is usually unmistakable in a truly fixated case.

#### PROGRAMMING

Attention Subjective and Objective Repetitive fits in sequence on the Introspection RD between Steps 6C and 7.

If the *terminal* connected with the area of fixed attention could not be located then the area could not be addressed with Attention Subjective Repetitive, but in some other manner. It is unlikely that no terminal could be found on a truly fixated attention case.

#### ISOLATION

When a person is released from isolation after terminated handling of a psychotic break it is usual to welcome them back and restore any lost ARC for them from the group, if needed, with an announcement in the OODs.

The person would be interviewed as to whether he wanted to stay or go and what his intentions were.

Formal notification would be made that the person was back in good graces and he would be allowed to make up for any damage done, but *not* forced to do so. In the case of a crew member, it would be expected he would be assigned to the DPF or RPF where there was one, and told to make good.

#### ADDITIONAL CLEARED CANNIBAL STEP

There is an additional tool for use by the C/S in raising the pc’s responsibility. The C/S sends to the pc HCO B 21 Jan AD10 “Justification” with a note asking the pc to please read the HCO B then tell the C/S if it has any application.

This would be done as the first of the series of C/S notes and pc replies on the Cleared Cannibal Step.

If the C/S receives any “rant and rave” in reply he would order it Dated and Located as the pc would be answering out of an incident.

Regardless, the Justification HCO B would have to be followed by O/Ws as the pc has W/Hs there to be restimmed and not running out the O/Ws could cause the TA to skyrocket.

### C/SING ON PSYCHOS

C/Sing and auditing psychos is a very precise and even touchy business. There must be no mistakes and you cannot be heavy-handed on them. They are at the lowest point on the Effect Scale and therefore delicate at best and easily overwhelmed.

It is also policy that a C/S takes it easy on auditors handling psychos. They are very hard to audit and difficult to control. So don't berate the auditor. If they get any kind of a result three cheers.

### INTEGRITY

It has always been a rule that actions of one RD are not mixed in with another action or used randomly outside of the RD.

Recently I found that a technique from the Introspection RD was used to indicate by-passed charge or something when handling ruds. This is very wrong. This happened in the field as an isolated instance but is worth mentioning.

The integrity of any RD must be maintained or its effectiveness is reduced. When parts of a RD are used at random by a C/S it actually starts the pc on a RD that is left incomplete.

So don't extract bits of this RD and use them on other actions. You would do yourself and the pc a disservice.

**L3RD**

**DIANETICS AND INT RD REPAIR LIST**

This list includes the most frequent Dianetic errors.

A high or low TA and a bogged case can result from failures to erase a chain of incidents.

DO NOT ATTEMPT TO REPAIR A CHAIN OR ENGRAM WITHOUT USING THIS LIST as it can have different or several errors.

REMEMBER TO CLEAR EACH WORD ON THIS LIST. IF A QUESTION READS AND THE PC SAYS HE DOESN'T UNDERSTAND IT, CLEAR IT AND REASSESS (don't explain it and take it as it read on a misunderstood not on a fact).

RUNNING PCS ON DIANETICS WITHOUT A FULL AND COMPLETE DN C/S 1 INDOCTRINATION IS A FOOLISH ACTION.

TAKE ANY READ FOUND TO F/N BY FULL REPAIR OF IT PER THE INSTRUCTIONS.

1. There was an Earlier Similar incident. \_\_\_\_\_  
Indicate it, flatten the chain.
2. There was no Earlier Similar incident. \_\_\_\_\_  
Indicate it. Determine if the chain is flat or if the last incident needs to be run through again. Complete the chain to F/N by indication or D/L if needed, or by flattening it.
3. There was an earlier beginning. \_\_\_\_\_  
Indicate it. Handle with R3R and complete the chain.
4. There was no earlier beginning. \_\_\_\_\_  
Indicate it. Complete the chain with R3R ABCD on last incident if unflat.
5. An F/N was indicated too soon. \_\_\_\_\_  
Indicate it. Flatten the last incident.
6. An F/N was indicated too late. \_\_\_\_\_  
Indicate it. Spot the flat point, indicate the overrun, D/L if necessary.
7. An F/N was not indicated at all. \_\_\_\_\_  
Indicate it. Spot the flat point, indicate the overrun, D/L if necessary.
8. There was no charge on an item in the first place. \_\_\_\_\_  
Indicate it, and that it shouldn't have been run, D/L if necessary.

9. Jumped chains.  
Indicate it. Reorient to the original chain, spot flat point and indicate the overrun, D/L if necessary, or flatten the chain. -----
10. Flubbed commands.  
Indicate it, E/S to F/N. -----
11. Didn't have a command.  
Indicate it, E/S to F/N. -----
12. Misunderstood on the command.  
Find it and clear it. -----
13. Incident should be run through one more time.  
Indicate it. ABCD on the incident, flatten the chain. -----
14. Too late on the chain.  
Indicate it. Get the Earlier Similar incident and complete the chain with R3R. -----
15. Incident gone more solid.  
Indicate it. Check for earlier incident or earlier beginning and complete the chain. -----
16. Stopped running an incident that was erasing.  
Indicate it. ABCD on the incident and erase it. -----
17. Went past basic on a chain.  
Indicate it, D/L if necessary. -----
18. An earlier misrun incident restimulated.  
Indicate it. Find out what it was and do an L-3RD on it. -----
19. Two or more incidents got confused.  
Indicate it, sort it out with an L-3RD on it. -----
20. An implant was restimulated.  
Indicate it, if no joy do an L-3RD on the time of the restimulation. -----
21. The incident was really an implant.  
Indicate it, D/L if necessary or L-3RD on it. -----
22. Wrong Item.  
Indicate it was a wrong item and that all other actions connected with it were wrong. If it is from an L&N list or if any question or difficulty, L-4BR. -----
23. Not your item.  
Indicate it, E/S to F/N. -----
24. Not your incident.  
Indicate it, E/S to F/N. L-3RD if any trouble. -----
25. Same thing run twice.  
Indicate it. Spot the first flat point, indicate the overrun, D/L if necessary. -----
26. There was a wrong date.  
Indicate it. Get the correct date and flatten the incident if unflat. -----

27. There was no date for the incident. \_\_\_\_\_  
Indicate it. Get the date and flatten the incident if unflat.
28. It was a false date. \_\_\_\_\_  
Indicate it. Get the correct date and flatten the incident if unflat.
29. There was an incorrect duration. \_\_\_\_\_  
Indicate it. Get the correct duration and flatten the incident if unflat.
30. No duration was found for the incident. \_\_\_\_\_  
Indicate it. Get the duration and flatten the incident if unflat.
31. There was a false duration. \_\_\_\_\_  
Indicate it. Get the correct duration and flatten the incident if unflat.
32. An earlier Dianetic upset was restimulated. \_\_\_\_\_  
Locate what it was, indicate it. Sort it out with an L-3RD if necessary.
33. An earlier ARC Break on engrams was restimulated. \_\_\_\_\_  
Indicate it. Sort it out with an L-3RD, ARCU CDEINR or an L-1C as applicable.
34. There was an ARC Break in the incident. \_\_\_\_\_  
Indicate it. Flatten the incident if unflat. ARCU CDEINR at that time if necessary.
35. You were protesting. \_\_\_\_\_  
Indicate it, clean it up E/S to F/N.
36. Auditor demanded more than you could see. \_\_\_\_\_  
Indicate it, E/S to F/N. L-1C if necessary.
37. Auditor refused to accept what you were saying. \_\_\_\_\_  
Indicate it, E/S to F/N. L-1C if necessary.
38. You were prevented from running an incident. \_\_\_\_\_  
Indicate it, E/S to F/N. Flatten the incident if unflat. L-1C if necessary.
39. You were distracted while running an incident. \_\_\_\_\_  
Indicate it, E/S to F/N. Flatten the incident if unflat. L-1C if necessary.
40. Audited over an ARC Brk \_\_\_\_\_  
Problem \_\_\_\_\_  
Withhold. \_\_\_\_\_  
Indicate it and handle the out rud. Do not pull W/Hs before the engram or chain is repaired or it will mush engrams.
41. An item was suppressed. \_\_\_\_\_  
Indicate it. Get the suppress off E/S to F/N, then run or flatten the item.
42. An item was invalidated. \_\_\_\_\_  
Indicate it. Get the inval off E/S to F/N, then run or flatten the item.
43. An item was abandoned. \_\_\_\_\_  
Indicate it, get the item back and run or flatten it.

44. The wording of the item was changed. \_\_\_\_\_  
Indicate it. Get the correct wording and give it to him. Flatten it if unflat.
45. Stuck picture. \_\_\_\_\_  
Indicate it. Do an L3-RD on it. You can also unstick it by having him recall a time before it and recall a time after it. D/L if necessary.
46. All black. \_\_\_\_\_  
Spot the black field or picture. Get the correct duration. If no go, L-3RD on it.
47. Invisible. \_\_\_\_\_  
Spot the invisible field or picture. L-3RD on it.
48. Constantly changing pictures. \_\_\_\_\_  
Indicate there was a misassessment and a wrong item was taken off the list. Get the correct item and run it, or L-3RD on that session.
49. There was a persistent mass. \_\_\_\_\_  
L-3RD on it, or D/L.
50. There was trouble with a pressure item or pressure on an item. \_\_\_\_\_  
L-3RD on it, or D/L.
51. You went exterior. \_\_\_\_\_  
Indicate it, D/L if necessary or rehab. If TA high as a result of this do an Int RD Correction List or send to the C/S if pc hasn't had Int RD.
52. Your Int RD was messed up. \_\_\_\_\_  
Indicate it, Int RD Corr List if TA high. If TA OK, 2wc "going into things" or clear up any misunderstands on Int, Ext, etc.
53. Audited over Drugs or Medicine. \_\_\_\_\_  
Indicate it. L-3RD on that time, then verify all chains to ensure they erased.
54. A past death restimulated. \_\_\_\_\_  
Indicate it, if it doesn't blow run it out.
55. There was nothing wrong in the first place. \_\_\_\_\_  
Indicate it. Continue the action you were on.
56. The real reason was missed. \_\_\_\_\_  
Indicate it. Locate the real reason and handle or do a GF.
57. Something else wrong. \_\_\_\_\_  
Locate what it is and sort it out or do a GF M5 and handle.

# **Organization Executive Course Books & The Management Series**

**by L. Ron Hubbard**

The simultaneous release by L. Ron Hubbard of the eight volumes of the Organization Executive Course and the additional volume of the Management Series may well go down as a landmark in the still unwritten history of our age.

Earlier, this vast body of material had been available only to Scientology staff members. But in December 1973 L. Ron Hubbard lifted any restrictions on the general sale of these books.

These materials cover L. Ron Hubbard's comprehensive research and application in the field of personal and group organization, revealing the basic laws and principles which determine the survival of any activity or undertaking.

This body of data ranks in importance with Scientology's auditing technology which L. Ron Hubbard also researched and developed.

These writings were originally published as HCO Policy Letters for the guidance of Scientology staff members. Their application by Scientology staff has enabled Scientology to expand at a phenomenal rate and become recognized as the fastest growing religion on the planet.

The enormous publishing task of collecting these writings by L. Ron Hubbard (issued mainly as Policy Letters from 1950 to 1969, with some later materials) and publishing them as volumes was begun in 1969. In 1970 Volume O was published and in the succeeding years the remaining volumes were issued. In addition to the Basic Staff Volume, there is a volume for each division of the seven division Organizing Board. The final volume, the Executive Division Volume, was issued in March 1974, followed by simultaneous publishing in the United States of all volumes. There will also be supplementary volumes issued to follow L. Ron Hubbard's ever continuing developments in the technology of organizing and producing.

Eight hardbound large format volumes, 4,032 pages plus Management Series 544 pages. Separate 360 page Subject (title) Index. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark; or Church of Scientology Publications Organization U.S., 2723 West Temple Street, Los Angeles, California, 90026, U.S.A.

## **TWC CHECKSHEETS**

### **TWC, USING WRONG QUESTIONS**

Two Way Comm is not an art. It is a science which has exact rules.

Foremost in the rules is:

**DON'T USE A LISTING QUESTION IN TWO WAY COMM.**

By a "listing question" is meant any question which directly or indirectly calls for items in the pc's answer.

Use of "who", "what", "which" instantly turns a TWC into a listing question.

Listing questions are governed by the rules of Listing and Nulling.

If you use a listing question accidentally in TWC you can get the same bad reactions from a pc that you would get on a wrongly done list.

The reason for pc upsets in TWC is hidden as it is not apparently a listing process, rarely gets the correction a bad list would get.

Asking "who" or "what" or "which" during a TWC after the main question can also turn it into a Listing and Nulling process.

TWC questions **MUST** be limited to feelings, reactions, significances. They must **NEVER** ask for terminals or locations.

**EXAMPLE:** "Who upset you?" in TWC causes the pc to give items. This is a LIST. "What are you upset about?" does the same thing. "Which town were you happiest in?" is also a LISTING question NOT a TWC question. Any of these results in the pc giving items. They are not then nulled or correctly indicated. The pc can get **VERY** upset just as he would with a wrong list. Yet the session is not a "listing session" so never gets corrected.

**EXAMPLE:** "How are you doing lately?" is an example of a correct TWC question. It gets off charge and gets no list items. "Are you better these days than you used to be?" "How have you been since the last session?"

"What happened" is different than "What illness", "What person", "What town" which are listing questions.

### **REPAIR**

When other things fail to locate the upset of a pc look into TWC processes in the folder and treat them as L&N processes where the pc has answered with items. The relief is magical.

**E-METERS**  
**SENSITIVITY ERRORS**

An auditor must set the Sensitivity of an E-Meter exactly right for *each* pc.

The setting is different for almost every pc.

**TOO LOW**

Too low a Sensitivity on some pcs (like Sens 5-32) will obscure reads and make them look like ticks. It will obscure an F/N. Whereas a Sens 16-128 will show reads and F/Ns.

A pc can be hindered by the auditor not setting the Sensitivity high enough to show reads and F/Ns. Items are missed as well as F/Ns.

**TOO HIGH**

When auditing a flying pc or a Clear or OT the auditor who sets the Sensitivity too high gets weird impressions of the case.

“Latent reads” on such a case are common. They aren’t latent at all. What happens is that the F/N is more than a dial wide at high Sensitivity and a started F/N looks like a read as its sweep is stopped by the pin on the right of the dial.

In this way uncharged items are taken up, the case is slowed, overrun and general upsets requiring repairs occur.

On one hand electrode an OT VII sometimes has a 3h dial wide F/N at Sens 5-32.

This would mean a 3/4 dial F/N at Sens 2-32 with two cans.

A Clear sometimes has a floating TA at Sens 32-32 instead of an F/N. He would have to be run at Sens 3-32 two cans to keep him on a dial or detect F/Ns.

This is a *very* important matter as the auditor will miss F/Ns, think beginning F/Ns are reads and as the Pre-OT is off the dial, miss reads.

Thus uncharged areas are run and charged ones are missed.

The result is very chaotic to repair.

Some lower level pcs also have a need for lower Sensitivity settings.

**SUMMARY**

Sometimes an easy pc looks very difficult just because of wrong Sensitivity settings.

Set the Sensitivity for the pc for a half dial F/N maximum or minimum.

Don’t get repairs.

Get wins.

AO Auditors  
Class VIII

**END PHENOMENA**

(Ref: HCO B 20 Feb 1970,  
"Floating Needles and End Phenomena")

Different types of auditing call for different handlings of End Phenomena.

End Phenomena will also vary depending on what you're running.

The definition of END PHENOMENA is "those indicators in the pc and meter which show that a chain or process is ended". Misapplication of this definition can result in underrun and overrun processes or actions and the pc snarled up with BPC.

TYPES OF EPs

In Power Processing the auditor waits for a *specific* EP and does not indicate an F/N until he has gotten the specific EP for the process. To miss on this in Power is disastrous, thus Power auditors are drilled and drilled on the handling of Power EPs.

In Dianetics, the EP of a chain is erasure, accompanied by an F/N, cognition and good indicators. You wouldn't necessarily expect rave indicators on a pc in the middle of an assist, under emotional or physical stress until the full assist was completed though. What you would expect is the chain blown with an F/N. Those two things themselves are good indicators. The cognition could simply be "the chain blew".

In Scientology, End Phenomena vary with what you're auditing. An ARC Broken pc on an L-1C will peel off charge and come uptone gradually as each reading line is handled. Sometimes it comes in a spectacular huge cog and VVGIs and dial F/N, but that's usually after charge has been taken off on a gradient. What's expected is an F/N as that charge being handled moves off.

In Ruds it's the same idea. When you've got your F/N and that charge has moved off, indicate it. Don't push the pc on and on for some "EP". You've got it.

Now a major grade process will run to F/N, Cog, VGIs and release. You'll have an ability regained. But that's a *grade* process on a set up flying pc.

F/N ABUSE

Mistakenly applying the Power EP rule to Ruds will have the pc messed up by overrun. It invalidates the pc's wins and keys the charge back in. The pc will start thinking he hasn't blown the charge and can't do anything about it.

In 1970 I had to write the HCO B "F/Ns and End Phenomena" to cure auditors of chopping pc EPs on major actions by indicating F/Ns too soon. This is one type of F/N abuse which has largely been handled.

That bulletin and Power EP handling have been in some instances misapplied in the direction of overrun. "The pc isn't getting EP on these chains as there's no cognition, just 'it erased'," is one example. Obviously the C/S didn't understand the definition of cognition or what an EP is. Another example is the pc spots what it is and F/Ns and the auditor carries on, expecting an "EP".

## OTs and EPs

An OT is particularly subject to F/N abuse as he can blow things quite rapidly. If the auditor misses the F/N due to too high a sensitivity setting or doesn't call it as he's waiting for an "EP", overrun occurs. It invalidates an OT's ability to as-is and causes severe upsets.

This error can also stem from auditor speed. The auditor, used to auditing lower level pcs or never trained to audit OTs, can't keep up with the OT and misses his F/Ns or reads.

Thus overruns occur and charged areas are bypassed.

This could account for those cases who were flying then fell on their heads with the same problems that blew back again.

## REMEDY

The remedy of this problem begins with thoroughly clearing all terms connected with EPs. This is basically Word Clearing Method 6, Key Words.

The next action is to get my HCO Bs on the subject of EPs and also related metering HCO Bs fully understood and startrated. This would be followed by clay demos of various EPs of processes and actions showing the mechanics of the bank and what happens with the pc and meter.

TRs and meter drills on spotting F/Ns would follow, including any needed obnosis drills and correction of meter position so that the auditor could see the pc, meter and his admin at a glance.

Then, the auditor would be gradiently drilled on handling the pc, meter and admin at increasing rates of speed including recognizing and indicating EPs when they occurred. When the auditor could do all of this smoothly at the high rate of speed of an OT blowing things by inspection without fumbling, the last action would be bullbaited drills like TRs 103 and 104, on a gradient to a level of competence whereby the auditor could handle anything that came up at speed and do so smoothly.

Then you'd really have an OT auditor. And that's what you'll have to do to make them.

## SUMMARY

Overrun and underrun alike mess up cases.

Both stem from an auditor inability to recognize and handle different types of EPs and inexpertness in handling the tools of auditing at speed.

Don't overrun pcs and have to repair them.

Let the pc have his wins.

HCO BULLETIN OF 4 APRIL 1971 RA  
REVISED 24 MARCH 1974

Remimeo

*C/S Series 32RA*

**USE OF DIANETICS**

(Revised per HCO B 15 July 1971, Issue I,  
“Quads Cancelled”—Revisions *in this type style.*)

It is mandatory important urgent that one does not audit *three* flow items until one has brought *all* earlier Dianetic Items into *three* flows.

**TRIPLE**

On a case where only Flow One (Single) has been run, you don't suddenly run a Triple (F1, F2, F3) such as on the LX Class VIII lists until one has run the earliest Dn item ever run (or that can be found) on Dn Triple and then on forward on Triple up to the LX.

**REASON**

Auditing additional flows while earlier items remain Single restimulates the missing flows and stacks them up as mass. They can make a pc uncomfortable until run.

All the missing flows (that were not run) are still potential mass.

This mass restimulates like something too late on the chain when a flow not run on earlier items is run on later items.

Auditing itself is a sort of time track. The earliest session blows the later sessions.

**FULL FLOW TABLE**

Before running *Triple* Dianetics one makes a table of earlier items run. Like this:

*full Flow Table*

<i>Date</i>	<i>Item</i>	<i>Flow Previously Run</i>	<i>Must Run</i>
2/3/62	Guf Shoulder	F 1	F 2, 3
3/3/67	Gowin Foot	F 1	F 2, 3
30/4/67	Chowin Chump	F 1	F 2, 3
29/9/68	LX Anger	F 1, 2, 3	
	LX Peeved	F 1, 2, 3	
4/10/69	Feeling Numb	F 1, 2, 3	
5/9/70	EXT RD	F 1, 2, 3	
9/10/70	Feeling of Goof	F 1, 2, 3	
10/10/71	Dn Assist on Head	F 1	F 2, 3

**FLOWS**

F 1 is FLOW ONE, something happening to self.

F 2 is FLOW TWO, doing something to another.

F 3 is FLOW THREE, others doing things to others.

F 0 *as run in the Introspection RD is* FLOW ZERO, self doing something to self.

## R3R COMMANDS

Standard R3R Commands are used on *Triple Dianetics*.

They are the subject of another HCO B.

The Zero Command *for the Introspection RD*, however, is very easy being “Locate an incident of (loss or emotion) (pain and unconsciousness) when you caused yourself to have a(an) (item)” with the other commands of R3R as usual.

## NARRATIVE

The question will come up, do we Triple Narrative items or Multiple somatic items.

The test is, did the flows already run F/N when they were originally run. If they did, include them. If they didn't run exclude them.

This does not mean you omit everything that didn't run.

## REPAIR

While auditing this FULL FLOW DIANETICS you will find various chains that did not F/N when originally run.

These are included and should be concluded to F/N. This means one has to find out if they by-passed the F/N, went too early, jumped the chain, etc. Usually an *L3RD* assessed on that faulty action will give the answer. It is easy to make these old flubbed chains F/N unless you work at it too hard. Usually the reason they didn't is visible on the old worksheet. The auditor forgot to ask for Earlier Beginning or by-passed the F/N or jumped the chain or tried to run it twice forgetting he'd run it before. Corny errors.

## RESULT

The result of doing a FULL FLOW DIANETIC ACTION on a case is quite spectacular. The shadowy remains of somatics blow, mass blows and the pc comes up shining.

## OFFERING FFD

Offering the public Full Flow Dianetics must include the cost of C/S work since it is sometimes lengthy. It is best to sell the action at a flat price that's more than adequate to cover the auditing as well as the hours of FESing and FF table making as the time can be quite long.

The auditing can be remarkably brief. The greatest amount of time is usually spent on the C/Sing and table making.

A C/S must liaise with the Dissem Sec and Treasury Sec on selling it or he'll find the org is losing money doing the C/Sing and tables.

A nice big fat flat price, not by hours, is best.

## OT WARNING

When doing *Triple Dianetics* on Clears and OTs (and a very few others) it may be found that many chains are now missing or are just copies of the original. Don't be disturbed. Pc says they're gone now they're gone. Just F/N the fact and carry on with the next flow or item.

HCO BULLETIN OF 28 MARCH 1974

Remimeo  
Ex Dn C/Ses

*Expanded Dianetics Series 21*

Ref: Ex Dn Tape Lectures and Case Histories.

**EXPANDED DIANETICS  
DEVELOPMENTS SINCE  
THE ORIGINAL LECTURES**

Since the original lectures on Expanded Dianetics and Case Histories were released several HCO Bs were issued under my name which I did not authorize. These have been cancelled.

I thought I'd better cover the developments since the original materials and clear up any questions or conflicts that may have arisen over the unauthorized HCO Bs.

**EXPANDED DIANETICS PROGRAMMING**

Expanded Dianetics programming is not rote but each programme is laid out for that individual pc taking him from his current state to a shiny product.

The programme is worked out from data gotten by FES, OCA, Chart of Human Evaluation and D of P Interviews.

The product of an Ex Dn complete pc is visible by OCA, Chart of Human Evaluation, and pc satisfaction in having handled what he wanted handled.

Endless Ex Dn to no product occurs only when the C/S violates the basics of Ex Dn programming as covered in my tape lectures and the Case Histories, when the pc is run on actions that he doesn't need and aren't reading or when the pc was not set up for Ex Dn in the first place.

**EXPANDED DIANETICS SET-UPS**

Usually a C/S Series 53RF and a list correction are needed set-up actions if they haven't been done. A thorough C/S-1 and full word clearing are vital.

A Drug RD must be done or completed before Ex Dn is done or it will fail. This includes Objectives. You can't do Ex Dn until Drugs are all handled.

**TROUBLE ON ENGRAMS**

The pc who cannot run engrams has misunderstands on the commands and terms of R3R and Dianetics, or it's drugs. The pc *will* be able to run drugs because that's what he's stuck in. He'll run those automatically as long as you've done the necessary Word Clearing.

Pcs who won't go backtrack are druggies or in recent shock of having died. This is handled by a thorough Drug RD and if necessary the usual Dianetic backtrack remedies As and Es double-assessed. Ss and Ps could be checked as well.

## LATER EX DN RUNDOWNS

*Class VIII C/S-6* list is useful in running out past bad auditing. It is fully covered on Tape 1. Other Class VIII lists are not used as you won't get anywhere running AEIs from a significance.

*Intentions* in AEI Treble Assessments are run in order of read. Interest is not checked. As intentions exist on all 3 flows you could list for the intentions on the other 2 flows after you have listed the intentions connected with and run them R3R Triple. You can only list and run intentions connected with a terminal or mass or somatic never a significance.

The R3R commands are: *F-1* "Locate an incident of another causing you to have the intention \_\_\_\_\_." *F-2* "Locate an incident of you causing another to have the intention \_\_\_\_\_." *F-3* "Locate an incident of others causing others to have the intention \_\_\_\_\_."

Good Intentions are never run. Never. The cure for a pc who is run on a good intention is a C/S Series 53RF. The cure for the auditor is to fully define the words: good, worthy, positive, pro-survival, evil, bad, unworthy, negative and contra-survival. Then have him re-study the related materials. If it recurs, get him audited on a 3 May PL and Ex Dn.

*R3R all E. Purps* culled from the folder is done as a first action in Ex Dn. Subsequent E. Purps brought up in sessions are noted and R3R'd later on in the programme before any PTS RD is done.

These E. Purps have to be verified as to wording and checked for read before running, but not interest.

Considerable charge can be bypassed if E. Purps are missed so this action is thoroughly done.

*R/S Handling*, also called the Responsibility RD, is done as OCA right-hand side handling. A list of all R/Sing statements is made then each taken up. The idea is an R/S will occur in connection with a *terminal* which will read when checked, and that's what you want to run. The R/Sing statement itself will often mention a terminal. If not the auditor can do a brief TWC to find out the terminal connected with the statement.

Once the terminal is obtained the auditor lists (L & N) for the E. Purp F-1, 2 & 3 R3R Triple on each after it's listed.

If no terminal can be found the auditor would have to L & N for the intention of someone who would (R/S statement).

*The Wants Handled Rundown* is shown in Cases B, C and F. The important points of the RD are to run it as a "wants to get rid of", *not* a "wants to achieve" and to complete each thing the pc wants handled before going on.

Handling of each thing the pc wants handled is dictated by what the "thing" is. A somatic is run R3R Triple. The intention connected with it can also be run. An intention is run R3R Triple. If it's a terminal, L & N for the intention connected with it and run it. You can also L & N and run the intentions on the other 2 flows. If it's a condition L & N W/W would have it then list for and run that terminal's intention. If it's a doingness L & N for the intention of someone who would do that and run it.

Additional handling could be done such as PSEAs double-assessed R3R Triple, handling it as a problem by finding and running out the prior confusion or tracing it back to the earlier problem it is a solution to and running that R3R Triple. Difficulties on this RD stem from not getting *the* thing the pc really wants handled which will read very well and run like a bomb, or errors in the L & N or R3R *or out* ethics holding the condition in place.

*The Multiple-Flow E. Purp Rundown* is a very high-powered action which must be precisely done. Its use is covered in C/S Series 22 and Case C. It consists of F-1: L & N "What Evil Impulse have others had toward you?" R3R Triple. F-2: L & N "What Evil Impulse have you had toward others?" R3R Triple. F-3: L & N "What Evil Impulse have others had toward others?" R3R Triple.

#### SUMMARY

An Ex Dn programme is designed for an individual. C/Sing and auditing are done to achieve a product.

When you're paralleling the mind the meter will be reading like mad, the pc will be wildly interested and the results will follow big and fast.

With this broad change in Ex Dn I recommend that you re-listen to the Ex Dn tapes, review *DMSMH* and *The Original Thesis* as well as the '63 Time Track and R3R materials and re-study the Case Histories working out why each C/S and pgm was done. Better yet do a thorough Ex Dn C/S Course.

I'm counting on you to really apply these materials and expect to see lots of good results.

HCO BULLETIN OF 17 DECEMBER 1971R

Remimeo  
Int RD  
Checksheet

(HCO B 2 December 1970 Revised)  
(Revised 30 March 1974)

*C/S Series 23RA*

**INTERIORIZATION SUMMARY**

(Revised and updated to include 1971 Int HCO Bs)

*All changes are in this type style.*

**INTERIORIZATION CAN BE BADLY MISRUN.**

The following HCO Bs cover Interiorization Rundowns.

HCO B 5 Mar 1971	“Exteriorization and High TA”
HCO B 11 Apr 1970	“Auditing Past Exterior”
HCO B 6 May 1970	“Blows—Auditing Past Exterior”
HCO B 30 May 1970	“Interiorization Intensive—2-Way Comm”
HCO B 20 Aug 1970	“Exteriorization Rundown Musts”
HCO B 24 Sept 1971	“Urgent—Interiorization Rundown”
HCO B 29 Oct 1971	“Int Rundown Correction List Revised”
HCO B 16 Dec 1971	C/S Series 35R (Revised) “Interiorization Errors”
HCO B 17 Dec 1971R	C/S Series 23RA (this HCO B)

The examination of Interiorization Rundowns done in the field discloses that some auditors engaged in running it have not been fully checked out on it. HCO PL 26 Aug 1965 gives the correct way to do a starrate check-out. Clay demos must also be correctly done. These are covered in HCO B 11 Oct 1967 and HCO B 30 Oct 1970. These HCO Bs on Int Rundown, Starrates and Clay Demos plus HCO PL 20 July 1970, Issue III, 2-WC as below, make the necessary pack for checking out an auditor before letting him near an Int Rundown. And all Interiorization materials as above **MUST BE CHECKED OUT STARRATE AND IN CLAY** before a C/S permits one of his auditors to run it on a pc.

**QUADS CANCELLED**

*“The disadvantages of Quad Dianetics outweigh any advantages in actual practice.*

*“Flow Zero is therefore cancelled as part of Dianetics and Lower Grades. “(LRH HCO B 15 July 71, “Quads Cancelled”).”*

**UNNECESSARY**

“The words ‘went in’ and ‘go in’ **MUST** be said to the pc and *cleared* on the meter. If there is needle action, one runs an Int RD as per the Int Rundown *Pack*.”

“If there aren’t any reads one does **NOT** do an Int Rundown on the pc as it is unnecessary and classifies as ‘running an unreading item’.”

“When this test is omitted you get an unnecessary Int RD being done on a pc.

“This will eventually have to be repaired.”

**“FLUBBED R3R**

“When the auditor does not do flubless auditing errors occur in the auditing itself. These will hang up an Int RD.”

## “OVERRUN

“It *usually* happens that an Int RD is overrun. It goes flat on Secondary F2, let us say. The auditor keeps on going past the win.

“This will hang up the Rundown.

“One of the ways an overrun occurs is the pc goes exterior during it. Yet the auditor keeps on.

“Another way is pc has a big Cog, big win. Auditor keeps going on with the RD.”  
—LRH (HCO B 24 Sept 71, “*Urgent—Interiorization Rundown*”)

## REPAIR OF INT

“If even years after an Int RD the pc has a high TA or a low TA, then Int trouble is at once suspected and the original Int RD and any repair of it is suspected and must *be handled*. “—LRH (From the LRH original HCO B C/S Series 35R, Revised 16 Dec 71, “*Interiorization Errors*”) (Handle it by HCO B 29 Oct 71, “Int Rundown Correction List Revised”.)

## TWO-WAY COMM

There is a two-way comm step that follows a day or so after an Interiorization Rundown .

An auditor doing this step, preferably the same auditor, **MUST BE CHECKED OUT ON TWO-WAY COMM.**

No C/S should permit any auditor to do any 2-way comm until the auditor has been checked out on HCO PL 20 July 1970, Issue III, “Two-Way Comm Checksheet”. One can obtain these tapes easily from Pubs (as the Sea Org has recently forced in this line and quality and delivery). Pending such tapes one can certainly get the rest of the materials on the checksheet done by the auditor and let him do 2-way comm while being very watchful as a C/S.

## C/SING INT

The correcting of an Interiorization Rundown is far harder than making sure that auditors can do the usual in the first place.

Nearly all a C/S’s hard work comes from auditors not well trained on courses (indifferent courses) and failing to check auditors out well on the materials *before* permitting them to deliver a new rundown.

The correction of Int is hard since until it is complete, other auditing is inadvisable. One, however, gets the Int Rundown done.

## “INT IS A REMEDY

“The Int RD is not understood as a REMEDY. It is not something you do on all pcs.

“Pc goes Exterior in auditing.

“Later his TA goes high.

“*Then you* do an Int RD.

“You test Int for read as above. If it BDs you do an Int RD.

“You just don’t do one because a pc goes exterior.

“One reason unnecessary Int RDs get done is that the Registrar sells one. That makes the Reg a C/S. So the C/S and auditor run it.

“Maybe it wasn’t needed.

“So if it wasn’t needed it will eventually have to be repaired.”—LRH (*HCO B 2 Sept 71, “Urgent—Interiorization Rundown”*) (Repair with an Int RD Correction List Revised, HCO B 29 Oct 1971.)

The Interiorization Rundown is a REMEDY designed to permit the pc to be further audited after he has gone exterior.

The Int Rundown is NOT meant to be sold or passed off as a method of exteriorizing a pc. This is very important.

It is general auditing on usual Dianetics and Scientology actions that brings about Exteriorization.

When the pc goes or is found to be exterior one then orders the Interiorization Rundown. Otherwise the TA will misbehave.

The rundown is a REMEDY USED AFTER EXTERIORIZATION HAS OCCURRED BY REASON OF GENERAL AUDITING.

Anxiety to get exterior will prompt a pc to buy and a Registrar to sell an Interiorization Rundown. It is in effect just more auditing as far as the Registrar is concerned. When a pc has gone exterior the Registrar can insist on his buying enough hours for the remedy.

The Int Rundown stabilizes the exteriorization and makes it possible to audit the pc further.

#### DISABILITY

If an auditor can’t smoothly audit a rundown as simple as an Int Rundown, then he is exposed as being unable to run Standard Dianetics and should be cleared of his misunderstandings and overts and retrained.

The only real trouble one gets into on an Int Rundown stems from the inability of the auditor to run a smooth, good TRed R3R session. Pcs are not hard to run on it.

#### C/S WINS

A C/S cannot win at all if he is continually having to make up for flubby auditing by the auditor.

Therefore the C/S must be very sure his auditors are fully checked out on things they are to run before running them.

If there is no Qual Staff Training Officer or no Cramming, a C/S can fully afford to do the training and cramming himself. Otherwise he will lose far more than that time in C/Sing for auditors not checked out.

By the skill of his auditors you know the C/S. Not by his unusual solutions after flubs.

The Int Rundown is too easy to do to have any trouble—the trouble comes when the auditors are not checked out beforehand, starrate and in clay on new things they are to run.

*C/S Series 53RG*

**SHORT HI-LO TA ASSESSMENT C/S**

This is the basic prepared list used by Auditors to get a TA up or down into normal range. A GF Method 5 may also be used after TA is in normal range to get pc's case handled better.

PC Name \_\_\_\_\_ Date \_\_\_\_\_

1. Assess pc Method 5 on this sheet. (Go down the list calling off the items to the pc, watching the meter. Mark any Tick, SF, F, LF, LFBD [to what TA], speeded rise or Blow Up.) *NOTE: A C/S 53RG should be reassessed and all reads handled. until it F/Ns on assessment.*

2. Use only the small falls or falls or BDs. The rises will however show where mass lies.
- A. If A or any of the A Group, and the pc has *had* an Int RD, do an Int RD Correction List, and handle the reads. (HCO B 29 Oct 71 Amended 31 Dec 71.)  
  
If *pc has never had an Int RD*, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.
- B. If any of these read, do an L4B on the earliest lists you can find that have not been corrected. Lacking these do an L4B in general. You can go over an L4B several times handling each read to F/N until the whole L4B gives nothing but F/Ns.
- C. If any of these, handle with 2wc and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 18 F/Ns. On overts and withholds, get what, and E/S to F/N. On out ruds, find which rud and handle. (See GF40RR HCOB 30 June 71, Revised 13 Jan 72.) Feel sad, handle the ARC Break. (Feel sad = ARC Brk of long duration.)
- D. Rehab releases on each "drug" taken to F/N. Complete the Drug RD per C/S Series 48R after handling all reads on this assessment. If pc has had a Drug RD, do L3B on it, and handle.
- E. If any of these, do L3B and handle according to what is stated to do on L3B.
- F. Clean up any protest and inval and rehab to F/N.
- G. Find out what it is. If Yoga or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do L1C on *that* period of pc's life.
- H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If Study errors, 2wc E/S to F/N, and add a Study Correction List to the pc's program.
1. False TA is wrong cans. Use HCO Bs 24 Oct 71, 12 Nov 71, 15 Feb 72, 18 Feb 72, 29 Feb 72, HCO B 23 Nov 73, all on False TA. Then clean up the bypassed charge with ( 1 ) Assess for best read (a) TA worries (b) F/N worries. (2) Then 2wc times he was worried about (item) E/S to F/N. (3) Rehab a time he felt really keyed out to F/N.
- J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. These items are all 2wc E/S to F/N. Auditors who made them need Cramming badly or retreat.
- K. Can't have or Hav. Find correct Havingness process and remedy.
- L. PTS or Suppressed. Check for SP or get a full PTS RD.
- M. Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow if qualified).
- N. 2wc to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2wc to F/N and get further C/S instructions for handling if necessary.
- O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate if no F/N on first. If false TA handle per I above.

*General.* Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.

**USE OF DIANETICS**

Revised per HCO B 15 July 71, Issue I, "Quads Cancelled"  
(Revisions in this type style)

Where a case has only been run on single flow Dianetics (Flow 1 ) one goes back to the first Dianetic item ever run of which record can be found and does F1, F2, F3 in that order.

To C/S a case for *Triple* Dianetics it is best to first lay out a Scientology repair, making sure the case is flying, then list out the items already run on Single and Triple. Then get them run so that all *three* flows are complete on each item in sequence from first to last.

This includes any LX items, former practice, drugs or any other engram running. These, like Dianetic items, are listed in their correct sequence of former running.

Then the missing flows are run.

A rehab step of the flows already run is not necessary. This rehab of a flow already run to EP is usually used only when there is question about its having gone to F/N Cog VGIs. In C/Sing for *Triples* one COMPLETES any flow of an item found that did not F/N. This is indicated on the Item list.

**DOING THE LIST**

The Item list is done by the auditor in his admin time for well done time credits.

All former Dianetic items ever run are listed and what flows have been run on them and to what end phenomena.

Example:	Engram List	
3 Sept 69	Sadness (exact wording that was used)	F1
4 Sept 69	A Bored Feeling	F1 Bogged
6 Sept 69	An Apathetic Outlook	F1 Bogged
6 Nov 69	LX Agonized	F1 F2 F3
7 Nov 69	Former Therapy	F1 F2 F3 F2 Bogged
9 Nov 69	Earlier Practices	F1 Bogged
10 Nov 69	A Horrible Sadness	F1 Bogged
5 July 70	Int RD	F1 F2 F3 F3 Bogged
6 July 71	An Awful Pressure	F1 Bogged

Such a list is then handled from the earliest forward by:

- (a) Completing the bogged flow and
- (b) Completing the missing flow.

## INT-EXT RD

This is handled in its proper sequence on the list if the TA is not high or very low.

If the TA on the pc is currently high, Int is handled before any other action is done and all *three* flows are run on it.

A drug chain also makes a high TA if in existence or unflat.

## FLUBS

If any auditor has a poor record of getting Dianetic Results, of bogged flows, etc, he needs an HDC Retread. His drills and TRs are out or he is committing Gross Auditing Errors.

Dianetics gives remarkable results only when flawlessly done.

The commands must be precisely given and all commands 1-9 A-D are used. It is NEVER shorted "because the pc did it".

C/Sing

It should be realized Dianetics is its own field of C/Sing. This remains the same in *Triple* Dianetics.

## RESULTS

*Triple* Dianetics, including the rerun actions, produces some very startling new

Well done Dianetics always has produced fine results.

*Triple* Dianetics almost doubles the gain.

## REMEDIES

Any and all Dianetic Remedies and general technology remain in full use. They are not changed at all. Only *Triple* Flows *are* added in each case.

Good Luck.

**TRIPLE RERUNS**

(Revised per HCO B 15 July 71 Issue I  
“Quads Cancelled”—Revisions *in this type style.*)

LAW: WHEN ONE OR MORE OF THE *THREE* FLOWS OF AN ITEM OR GRADE ARE LEFT UNRUN, WHEN USED IN LATER PROCESSES THE EARLIER UNRUN ONES RESTIMULATE AND MAKE MASS.

This tells you that high TAs, heavy pressures and even illness can come from by-passed flows.

BY-PASSED FLOWS

Example: Dianetic singles have been run on 7 items. Now the auditor begins to run new items Triple without running Triple on the already run items. The result will be 7 unrun Flow 2s and 7 unrun Flow 3s. These will restimulate and form mass and by-passed charge.

Example: Now let us say that Dianetics was all run Single and Grades were run Triple. This will restimulate the Dn chains F2 and F3.

ANY LATER GRADE RUN WITH MORE FLOWS THAN USED IN EARLIER ACTIONS CAN THROW THE EARLIER UNFLAT FLOWS INTO RESTIM, PILE UP MASS GIVING HIGH TA AND BPC GIVING ARC BREAKS.

REPAIR

The more the condition is *repaired* by L1C, L4BR, etc, etc the *worse* the Mass gets.

SOURCE OF HIGH TA

Thus High TAs have three principal sources:

- (1) Overruns
- (2) Auditing Past Exterior
- (3) Earlier Unrun flows restimulated by those flows used in later actions.

There are other minor ones such as Drug Background, illness, etc as per Hi-Lo TA Assessment.

REHABS

One must NOT recklessly or continuously rehab a past major action. This causes overrun. The thetan is placed at the *end* of the incidents not yet in restimulation or run and the bank gets more solid.

MASSY THETANS

The whole trick of this universe is contained in thetans copying or picturing incidents and then getting stuck in the later portion of them.

“Incidents” is the keynote. A Thetan is incident hungry.

This is what traps him.

For some reason he has to be at the earliest end of incidents to erase them. The later he is in incidents and the later he is on the track the more solid he is.

This also applies to the “auditing time track”.

By omitting things like flows on the auditing time track, the thetan thus becomes massy.

The whole theory of the Exteriorization Remedy is based on having gone out (later) *after* he went in (earlier). So Exteriorizing can stick him. (People buy the Ext RD to Exteriorize but the remedy is only done to permit further auditing. They Ext of course when the bank is handled.)

When flows of items are by-passed and then later restimulated by auditing them, mass occurs.

#### GETTING IN ALL FLOWS

When doing additional flows on earlier items or processes one must *also* check or rehab those flows marked as run to F/N in worksheets.

This again will leave unflat flows and BPC unless it is done.

And if it is overdone it will raise the TA by overrun.

So if one had a case that had Single Dianetics and was later run on Triple for new items (but the Singles not done into Triple) one would have to RUN FIRST the missing unrun flow or flows and then *check* the first Single F1 for flatness, then check other previously run flows.

The rule is run the previously unrun one or ones first to get charge off, then verify or run the ones listed as run already.

Then one would do the same for the next item. Run the previously unrun flow or flows and then verify or run those listed as already run to be sure they F/N.

*All* items, in chronological sequence, and *all* processes, would have to be run *Triple*.

IT WOULD BE A WASTE OF TIME NOW TO RUN IN ONLY *SINGLES*.

So all C/Ses and Auditing actions are “Rehab or Run F1, F2, F3” when getting in all flows on things run to date.

#### HIGH TA

When you are sure an EXT RD has been done correctly and its 2wc went F/N and the TA later goes high, you check the EXT RD. That is the most usual reason. This simple action is amazingly subject to flubs.

If the TA goes high later you can do a Hi-Lo TA Assessment and handle.

If the TA is still high or low, you had better check the state of flows. Were more flows run on later actions than were run on earlier actions?

If so, your pc has felt massy, sometimes even ill.

The right action is to get in all flows from the beginning. Bring *all* his auditing up to *Triple*.

(If his folder is not available, he has kind of had it. I know of no way, at this writing, to recover lost Dn items but will have to work something out.)

#### NOT IN TROUBLE

If the pc is not in trouble, his best bet is to get on up the grades to Expanded OT III.

## IN TROUBLE

If he *is* messy and is having trouble the best bet is to:

- (1) Be totally sure of his Int RD
- (2) Check O/Rs particularly of a major grade twice or by-passed F/Ns, locate and indicate them
- (3) FES, list the items and grades and do a Full Flow action from the beginning of his auditing, raising them all to Triple.

## RUNNING ZERO FLOWS (As run in the Introspection RD)

The Zero Flow in Dianetics is a bit strange. It can be done by full R3R BUT it often depends on the decision the pc made and may F/N very suddenly. It is easily overrun and can be very fast.

A pc can be gotten into trouble on Zero Flows if the auditor is slow and is not alert to his meter and misses the F/N and gives R3R commands after the flow has blown.

## REHAB OR RUN

The auditor getting in *Triple* Flows can also ARC Brk the pc by failing to verify if the previously run flows are flat. All the auditor wants is to see them F/N on the command. If they don't he runs them.

Sometimes when he has "run them" again he finds they are being overrun or run twice and has to rehab them by finding this out. The pc sometimes doesn't know until he actually starts to run them. Then he finds they are already run. The clue to this is a climbing TA. If the TA goes up, get off that flow and rehab it.

Example: Pc at first thinks "Pain in shoulder" F2 was never run. Starts to run it. TA goes up. Auditor must pull him off of it by finding out if it is being run twice and rehab it to F/N.

The moral in all these reruns is don't firefight, keep an L1C List and an L3RD List handy and use them.

## RESULTS

The results of straightening up the Int-Ext RD, rehabbing O/Rs and putting in ALL FLOWS on a pc are fantastic.

Getting an All Flows Rundown done correctly gives one all the latent gain the pc has been begging for.

So send to Cramming all C/Ses and auditors who flub.

Program it right.

C/S it right.

Audit it right.

(Ref HCO B 4 Apr 71 RA, C/S Series 32RA,  
and HCO B 5 Apr 71RA, C/S Series 33RA.)

**TRs**

TR Zero exists so an auditor is not ducking the session but can sit there relaxed, doing his job.

TR One must be done so the pc can *hear* and understand the auditor (without blowing the pc's head off either).

TR Two must be done so that the pc gets acknowledged. This can be so corrupted that the auditor doesn't ack at all but gives the pc meter reads! Instead of acks! Or keeps saying, “I didn't understand you,” etc.

TR Three basically existed so that the auditor would continue to give the pc commands and not squirrel off or pack up with total silence.

TR Four exists so that the pc's origins are accepted and not Qed and Aed with or invalidated.

And, surprise, surprise, TRs are for use in the session itself, not just a drill. They are *how* one runs a session.

Metering can miss every F/N or give “F/Ns” with high or low TA. And one *never* feeds meter data to the pc: “That read,” “That didn't read,” “That blew down,” just must not exist in session patter. “Thank you. That F/Ned,” is as far as an auditor goes. And that's the end of the cycle and says so.

Floating needles can be overlooked by an auditor. In Dianetics this fault *is fatal*.

Auditor's Code must be in on all points and particularly Invalidation. Pc says, “That's so and so.” An auditor who says, “I'm sorry. You are wrong,” or any other invalidation is going to wreck a pc's case. A full knowledge of the Auditor's Code and actually applying it saves endless troubles. It is an auditing TOOL, not just a nice idea.

**REHABBING CHAINS**

One rehabs a Dianetic Chain that, according to a previous worksheet, erased by saying, “According to session records (flow direction) (item) erased.” That's all. One does not say, “Did the chain giving others a headache erase?” One does not run it again to find out. One does not run a single command “to see if it F/Ns again”. One can say, “Do you agree that the chain giving another a headache erased?” But the more you ask the pc to look for an erased chain the more messed up things will get. It isn't there. But

the auditor by his action can imply it *should* be there or *might* be there. A totally wrong approach would be “Look around your bank and see if what isn’t there any more isn’t there.”

Dianetics is NOT Scientology. A Dianetic Chain is *not* a release. If you try to use Scientology rehab tech on a Dianetic Chain, you have had it. It isn’t a “release” (which is a key-out). A Dianetic Chain is an erasure. You can’t rehab erasures with “How many times?”, etc.

The test of this is the doing. If you try to use Scn rehab on Dianetic Chains, the PC MIGHT TRY TO FIND SOMETHING. This causes him to key in other unrun or similar items.

It is a dangerous action at best to try to handle old erased chains. The best you can do is to tell the pc what the old W/S said. If no W/S exists leave the already erased flows alone!

### FLUBBED CHAINS

Many times, a Folder Error Summary will give a flubbed chain and then fail to note it was repaired in the next session!

A C/S and auditor would have been pretty irresponsible to just go on auditing past flubbed chains.

The only safe way to handle some previous flubbed chain is to:

- (a) Verify in the folder if it was repaired.
- (b) If still unrepaired assess the *L3RD* on it and handle according to the *L3RD*.

### *L3RD*

Using the new *L3RD* (HCO B 11 Apr 71 RA) is a Dianetic action.

A Scientology auditor erroneously can try to use it as a two-way comm type of list. If a chain needed one more ABCD, then two-way comm on it with no ABCD is not going to complete it.

*L3RD* has its own directions. Questions not marked with directions are used to indicate the fact. This can amount to two-way comm as the pc chews it over. But *L3RD* where marked is handled by Dianetics actions. Look over the list and its directions for each question and you will see that some are given directions that are NOT 2wc.

Example: “Earlier beginning” reads. You can’t just say, “The incident had an earlier beginning,” and you can’t say, “Tell me about the earlier beginning.” The pc will go up the wall. There’ll be no F/N. You have to use R3R and get him to the earlier beginning and then run it and if it still doesn’t erase, get him to an Earlier Similar and erase that.

*L3RD* is a Dianetics List. It is not a Scientology List that is cleared each question to F/N by 2-way comm.

### OVERRUN

Overruns are demonstrated by a rising TA.

If as you seek to get in Full Flow Dianetics the pc’s TA begins to average higher, overrun is occurring.

Example: While doing FFD pc’s TA has been riding at 2.2 and F/Ns. After a new FFD action it begins to ride at 2.5 and F/Ns. Something is being overrun. Find it and indicate it. And cease to stir the bank up so much! The fault is going over items already run.

In doing a Full Flow Table you often find that the same or similar have been run in the past. Sometimes you find that a previous attempt to run the item a second or third time has resulted in an ARC Break, the reason for which was never detected.

The right action is to note the session date it *was first* run and just tell the pc, "Feeling Surprised was run three times. On (first date it was erased) it was erased. When later run it was an overrun." This tends to blow the later charge laid in by trying to run the same item again.

It sounds so strange that erased chains can be overrun. But it is true. What happens is that pcs try to cooperate and put something there.

### FIREFIGHTS

The action of a quarrel between an auditor and a pc is called a firefight.

Restimulating earlier unrun engrams or overrunning chains upsets a pc. The best action, as soon as a pc is disturbed, is to do an *L3RD* fast and handle what reads the way it should be handled according to the *L3RD*.

The wrong way is to argue or try to go on.

The pc does NOT know what it is. He just feels awful. He tries to guess. He will ARC Brk or get sad if the auditor continues.

The correct action is an *L3RD*.

L1C is not of great use in a Dianetic ARC Brk. *L3RD* is.

If the pc remains ARC Broken, try *L3RD* again, particularly the *whole L3RD*.

A Scientology session would be handled with some other list (*L1C*, *L4BR*, etc). A Dianetic session, including and especially FFD, is handled with *L3RD*.

You NEVER prepcheck while doing Dianetics. This mashes up the engrams.

### INTERIORIZATION

ALL these cautions apply as well to an Interiorization-Exteriorization Rundown when restim occurs one uses an *L3RD* quickly.

Int-Ext RD is essentially a Dianetic, not a Scientology, action.

### SAFE ACTIONS

A fully genned-in auditor, well crammed, well drilled, well skilled, can be trusted with Dianetics, Dianetic *Triples* and an Int-Ext RD. Auditors not so handled can get pcs into serious trouble with these things.

A safe course is to use *Triples* on new, never audited before pcs. Those begun on Triples, use then only Triple flows.

Another safe way is to use FFD only on OT IIIs or OT IVs and done only by fully qualified FFD auditors who are also OT III.

The safest course is to require special drilling and cramming on auditors who are already known for their results by actual success story stats and call FFD and Int-Ext RD a skilled specialty.

### C/S RESPONSIBILITY

Any trouble a C/S is running into comes from the factors of TRs, metering, Code and incomplete or false auditors' reports.

If when I am C/Sing I ever find an auditor has omitted key session actions or has falsified a report, I order that auditor not to Cramming but a full retrain HDC right on up.

A C/S does not see these points. He can get the pc asked what the auditor is doing or did. He can get sessions monitored. This helps him fill this gap in his data.

It's what isn't in the auditor's report that is often the trouble. Auditors omit what they said, omit the firefight, omit session alter-is in their worksheets.

All this sticks the C/S's neck out for the axe of failure.

So particularly in FFD, Int-Ext and other such actions, a C/S has to act to obtain confidence in the auditor's TRs, metering, Code use and accurate worksheets.

### RISK

In FFD, Int-Ext RD and Power, experience has proven that if the auditor is not top grade, if the C/S is not alert, we put a pc at risk.

The USUAL is what keeps the pc safe.

A thorough study of his case, looking for obvious bugs (such as Int-Ext RD done twice, the case a druggie but drug engrams never run, Int done but its 2wc flubbed, to name a few serious ones), sending auditors to Cramming for the slightest flub, insisting on standard TRs USED IN SESSION, good metering, use of the Code, accurate and complete worksheets, use of standard tech, all guarantee the safety and progress of the pc.

### INTRODUCING FFD

FFD (like the Int-Ext RD) requires flawless C/Sing and auditing or the case goes wrong.

When these actions were introduced they showed up any flaws in case studying, TRs, metering, Code and worksheets.

There are two ways to handle. (a) Cancel FFD and Int-Ext as actions. Obviously that is going backwards and is impossible. (b) Begin and continue a serious, effective campaign in the org to (1) Train auditors better, (2) Cram expertly on every flub, (3) Raise quality of TRs and metering.

As you can see, my approach is to improve quality of training, cramming and delivery.

Please help me out in getting this in.

**STAGE MANNERS**

An actor, performer or musician should have a good command of what is called "Stage Manners".

While it is not possible here to give a full text on the subject, these basics should suffice.

1. The performer purpose is basically Communication.
  - (a) To Communicate one must have R (Reality)—which is to say one must be visible.
  - (b) To Communicate one must have R that there is an audience there to be Communicated to.
  - (c) A degree of Affinity with or for the audience must be physically expressed. (One cannot treat an audience with contempt, for instance.) (A perpetual smile is not a must, a respectful look, a friendly look does as well.)

If you look over the above ABCs you will see that the general basic of Stage Manners is the ARC Triangle. From this almost anything else can be derived.

However, there are some traditional rules.

- I. You *accept* applause. This is the contribution of the audience. You do not cut it off. You acknowledge it with bows or other physical actions. But you *accept* it. You don't dodge it.
- II. You never turn your back on the audience. (An exception is an actor in play stage situations.) You turn in such a way as to turn facing the audience. You do not turn the other way around and so give them your back.
- III. Never express embarrassment or stage fright even when you feel it. Force yourself into a physical appearance and expression of poise.
- IV. If you goof, ride right over it. Do not break off, call attention to it or look helpless or foolish. Just ride right over it and go on.
- V. If you do not know what to do with your hands or feet, don't do anything with them. Avoid twisting your feet or legs or hands or arms around. Don't fiddle with things. Be positive in motion.
- VI. During breaks or silent periods remember you are still on stage and Stage Manners still apply.
- VII. Always appear to be in control of the place and the audience.

VIII. Never let your poise be shattered by a sudden surprise. Ride over it and handle.

IX. A performer DOMINATES an audience:

- (a) By his comm,
- (b) By his art,
- (c) By his technical perfection,
- (d) By his Stage Manners.

None of this means that one cannot clown, joke, act superior or even seem austere. these are the arts of presence. But even in doing these, Stage Manners are observed .

If as a small child one was always cautioned about his manners and resented it one should get a clear idea of what manners are:

In a culture manners are the lubrication that ease the frictions of social contacts.

On the stage, Stage Manners are the means of smoothing the problems of interchange between audience and performer.

The hallmark of the professional performer, next to his art and expertise, is flawless Stage Manners.

Stand before a full-length mirror. (Or use Video Tape.) Assume the postures of your act. Accept applause gracefully. Bow gracefully. Smile pleasantly. Laugh. Be dignified. Demonstrate poise. Assume the posture needed for a non-applauding audience. Ride out boos. Demand more applause. Do the postures to end your performance after applause. Accept a standing ovation. Deplore not being able to give an encore. Appear at the start for a first part of a performance. Assume the postures and poise needed on stage during a one minute break between numbers. Accept a plaque. Accept flowers. Ride over a bad goof. Be respectful to the audience. Kid the audience out of it. Do each one of the IX rules. AND ALL WITHOUT SAYING A WORD. Do it with physical motions or lack of them.

When you can do all these things and look right to yourself and feel easy about them you will have and be confident of your Stage Manners.

Ex Dn Spclsts

**INTROSPECTION RD—THIRD ADDITION**

Adds to HCO B 23 Jan 74R  
Revised 10 Feb 74  
Checklist

**ADDITIONAL INTROSPECTION RD STEPS**

The Introspection RD has as its dominant flow, Flow 0. This follows from basic O/W theory where the person goes down the dwindling spiral to a point where he can only restrain himself and do himself in.

The following steps must be added to the checklist to fully handle this in the pc. Otherwise future efforts to help him will be blocked by his own efforts to succumb.

14L. Check “doing yourself in” and “doing others in” for read and R3R Quad the best read.

14M. L&N for the intention behind it.

14N. R3R Quad the intention.

14O. Repeat the steps above on the second one if it is also reading.

Also add the following to the RD after the E. Purps have been run R3R:

1. 2wc “Have you ever wanted to succumb?” to F/N.
2. If so, R3R Quad.
3. If so, L&N for the intention behind “wanting to succumb”.
4. R3R Quad.
5. 2wc “Have you ever attempted to commit suicide?” to F/N.
6. If so, R3R Quad.
7. If so, L&N for the intention behind the effort to commit suicide.
8. R3R Quad.
9. 2wc “Is there some other way you were doing yourself in that’s been missed?” to F/N. Note all reading items.
10. If so, R3R Quad the BD or best reading item.
11. If so, L&N for the intention behind it.
12. R3R Quad.
13. Repeat 10, 11 and 12 on other hot reads.

This would be followed by a D of P Interview and attest unless some adjustment actions were needed; these would be R3R any new E. Purps or new R/S handling, a C/S 53RG or ruds or 2wc or HC List.

### CAUTION

Do not run unreading items, miss reads or run wrong items as it will wind the pc up in the soup.

A common error on R3Ring E. Purps culled from the W/Ses has shown up that C/Ses must be alert for. This is taking up infinitive phrases like “to go to the store” that appear to be E. Purps but in actual fact are statements of future *actions or conditions*, not intentions.

*Example:* Pc says, “I was doing fine then Joe came along and caused me to cave in.” “To cave in” is *not* an E. Purp as stated. It wasn’t the pc’s intention. Not valid.

*Example:* Pc says, “I was trying to hold on to the rope and he forced me to fall off the cliff.” “To fall off the cliff” was *not* the pc’s intention but a statement of an action. Not valid.

*Example:* Pc says, “I wanted to make them wrong and got sick.” “To make them wrong” was the intention, is valid and runnable.

Have you got the idea? If there is any question in your mind, clear the word “intention”, then go over a grammar text and sort out what an infinitive and infinitive phrase are and how they’re used.

You’ll save the pc and yourself a lot of difficulty if you do this.

Ex Dn C/Ses

*Expanded Dianetics Series 22*

**EXPANDED DIANETICS REQUISITES**

The recent review of Expanded Dianetics has shown that Ex Dn can be made to fail if the pc is improperly set up for it.

The following checklist is for use by C/Ses to ensure full set-ups for Ex Dn have been done.

Attach to the inside left cover of the folder.

- 
1. Pc has done a full set of TRs 0-4 and 6-9. \_\_\_\_\_
  2. Pc has had a full battery of Objective Processes run to full EP. \_\_\_\_\_
  3. Pc has been given a thorough C/S 1 and is grooved in. \_\_\_\_\_
  4. Pc has completed (very) Drug RD which is FLAT.  
No no-interest but reading items remain unrun.  
No medicine, drug or stimulant left unrun. \_\_\_\_\_
  5. Pc successful at Dianetic Engram running. Can run Dn easily. \_\_\_\_\_
  6. Pc has had Word Clearing Method I run very flat to F/N list. \_\_\_\_\_
  7. Pc has been Word Cleared Method 5 on the L-3ExDRB  
and R3R words. \_\_\_\_\_
  8. Pc has had any high or low TA handled with a C/S 53RG. \_\_\_\_\_
  9. Pc is not in the Non-Interference area. \_\_\_\_\_
  10. Pc has had any messed up L&N and Why lists corrected. \_\_\_\_\_
  11. Pc has not been left in the middle of a major action or RD to  
start Ex Dn. \_\_\_\_\_
- 

Only if you make sure each of these points is fully in will the pc fly on Ex Dn.

*Art Series 4*

**RHYTHM**

**RHYTHM:** Any kind of movement characterized by the regular recurrence of strong and weak elements. *Rhythm* denotes the regular patterned flow, the ebb and rise of sounds and movement in speech, music, writing, dance and in other physical activities. *Meter* basically means *measure* and applies to a system or pattern of measured recurrence of length, beat or numbers in poetry or music.

**TYPES OF MUSIC  
RHYTHM**

There are SIX distinct types of rhythm in music. These are:

**REGULAR:** Meaning the evenly accented (stressed) beat.

**SYNCOATED:** The placing of upbeats along with downbeats at regular or irregular intervals.

**STOPPED:** In a stopped rhythm there are regular distinct halts to the flow of melody, but all the beats are there, they are simply regularly halted for an interval. (The term comes from choreography as in tap dancing where the dancer taps fill the stops. )

**ACCENTED:** Where one or more beats in a measure received a stronger stress (beat) or accent. Accent in a rhythm can be done by volume, duration, pitch or tone quality (timbre).

**OMITTED BEAT:** The regular omission of one or more beats in measures. Time may have to be counted over two or more measures in order to regularly omit. (Soul, Motown. )

**ADDED BEAT:** Additional strong or, generally, weak beats are added to the rhythm in a consistent or inconsistent manner. (Bongos, Congas, etc.)

**USAGE**

Any and all rhythms are made up of the six basics above. One, two or more can be employed in complex patterns.

**REPETITION**

Rhythm is rhythm because of repetition (recurrence).

**RAPPORT**

**RAPPORT:** Relationship, especially, one of mutual trust or affinity.

An audience in rapport is different than an audience of spectators.

An audience in rapport **PARTICIPATES** in small or large ways with the performer or the artist or work of art, often by vocal or body motion.

Such participation is achieved by:

1. Reliance on the even recurrence of the rhythm.
2. Ability to predict it will recur.
3. Formation of agreement by such reliable prediction.
4. Permitting the audience to fill gaps or significances. Regular omission of a beat or step or full explanation causes the audience to fill it for themselves and brings about physical or mental participation.

## RHYTHM

All life is a repeating pulse and ebb and surge of motion.

Life becomes difficult when rhythmic prediction cannot occur. Anxiety sets in. It is a relief to participate in predictable rhythm in an art form. It is safe and reassuring. If the rhythm is exciting it is also exciting. Therefore participation in predictable rhythm is pleasure and even joy.

## IMPINGEMENT

When one changes rhythm within a single work one “makes wrong” because the person has predicted the rhythm but the prediction is not met. Thus he is wrong. If the rhythm recurs, the person is made right.

A new rhythm attracts attention. If it is agreed with and recurs it gets participation.

## ART FORMS

The above materials, while written from the viewpoint of music, apply to any art form.

Even prose has a rhythm.

Not all rhythms are pleasant or acceptable.

Many ways exist to utilize these observations on rhythm—i.e. one can begin an unwanted rhythm, using the audience objection to impinge and then turn it into a wanted rhythm.

As life itself is going through time and as time is recurrence, some rhythms are too dull to attain any attention.

Rhythm, used in art forms, must therefore slow or speed or change the expected rhythms of ordinary life in order to command attention.

Rhythm can sooth, lull, excite, arouse to any point of the emotional tone scale.

A rhythm one half to one tone below the usual rhythm in life will depress or degrade an audience.

A rhythm one half to one tone above the usual rhythm will dominate and interest.

Rhythm and its expression is the basic key to all art forms.

**UNHANDLED DRUGS AND ETHICS**

Several recent cases have come to light where the person was permitted to go on upper grades, Expanded Dianetics, Power and even OT Levels whose drugs had not been handled.

In each case there was no or poor case gain, organizational upsets and wasted auditing.

THEREFORE IT BECOMES FIRM POLICY THAT ANY REGISTRAR, C/S, D OF P OR AUDITOR WHO PERMITS A PERSON WITH UNHANDLED OR PARTIALLY HANDLED DRUGS TO BE AUDITED ON ANYTHING BUT A FULL AND COMPLETE DRUG RUNDOWN INCLUDING NO INTEREST ITEMS WILL BE SUBJECT TO COMM EV WITH A MINIMUM PENALTY OF TREASON AND A MAXIMUM PENALTY OF EXPULSION.

Tech must not be made to fail because of overt, covert or ignorant misapplication of tech.

It is fully established that a chief cause of failure in cases is unhandled or only partially handled drugs including medical drugs, treatments and alcohol. This is a barrier to case gain and in this society at this time, the major barrier.

Where drugs have not been handled or only partially have been handled, the NO INTERFERENCE ZONE RULE is waived.

Dept 13  
Personnel

(Revised 26 March 1972  
and 8 July 1974  
*Changes in this type style. )*

***Word Clearing Series 32RA***

URGENT—IMPORTANT—URGENT

*Vital for all Supervisors,  
Est-Os, and Cramming Officers.*

**WORD CLEARING METHOD 4**

Tech and Admin Cramming Officers, Word Clearers and Course Supervisors use Method 4 Word Clearing when fishing for a misunderstood word. E.g. Cramming Officers use it to fish for misunderstood words concerning what the person is being crammed on. Word Clearers use it on Interns when the Intern needs a retrain or reread or even if the Intern is sent to Cramming. Course Supervisors use it in the classroom CONTINUOUSLY ON NON-F/N STUDENTS or queries.

The whole idea is the person requiring the Method 4 Word Clearing has a Cramming Order or is not an F/Ning student because of confusion as a result of a misunderstood word, as per Word Clearing Series 1 6R or omitted materials.

Method 4 fishes for the misunderstood word, finds it, clears it *to F/N*, looks for another in the area until there are no more *with an F/N* VGIs, then moves to another area, handles that—eventually *all* the misunderstands that resulted in the Cramming Order or non-F/N student are handled.

It requires no C/S OK for it to be done. Method 1 is not a prerequisite to Method 4.

E-Meter Drill No. 21 is the E-Meter Drill to be drilled on Method 4. It's the method of fishing for a cognition.

Requires proper application of TRs and metering. All Supervisors, Est-Os, and Dept 13 personnel to check out on, drill, and *apply* this tech AS IT IS VITAL STUDY TECH.

**METHOD 4 WORD CLEARING**

1. Give person the cans, state, "I am not auditing you."

2. Ask while watching the meter:

"Is there any part of what you're studying you did not fully get?"

Trace the read. Use "fishing for a cog" drill (per HCO B 25 June 70, Issue III) if needed .

If no read the question may be varied, e.g.

"Is there any part of the materials you're studying you disagree with?"

or "Is there any part of what you're studying you feel you could not apply?"

or "In (material being checked) is there anything you didn't understand?"

Let the student tell you *briefly*. Do NOT tell him the data.

Verify that his study pack is complete as the data might have been omitted. Also he might never have read the pack at all.

If the data was missing do not go on to Step 3. See that he gets the complete pack and reads it. Then repeat Method 4.

If the person just has not read the materials do not go on to 3 but get him to read the materials. Then repeat Method 4.

3. Get what it is then ask:

“What *word* was misunderstood just before that?”

Meter reads, Word Clearer finds the word, never accepting a confusion but finds *the* word giving the read (SF, F., BD), gets it looked up in a dictionary and used in sentences until it can be seen from the sentences that the student now understands the word *and the word F/Ns. All the tools of Study Tech and Word Clearing are at the Word Clearer’s disposal to take the word to F/N. The Word Clearer does not stop at one misunderstood but makes sure all are cleared.*

4. Repeat 2 & 3 until the materials are fully cleared up and any and all misunderstands or confusions handled.
5. If the action bogs when used in the classroom the student must be sent to Qual for handling and Supervisor to Cramming on TRs and metering and drilling on this procedure.

The correct action is a W/C CORRECTION LIST DONE ON THE STUDENT AND HANDLED.

Of course if the above question F/Ns on asking, there would be no misunderstands on the material being checked, but the person is in Cramming, not an F/Ning student or whatever, so there obviously are misunderstood words to be found and handled.

Look at HCOPL 16 Feb 72, “The Purpose of the Dept of Personnel Enhancement”. It says this Dept “reaches and looks for business all over the org and brings it in”. So someone with stats down—student or post stats, confusion about what to do, overloaded, can’t seem to handle it, how do you do this, etc, etc, are *all* indicators of misunderstood words as the person is saying confusion, confusion. Well, underneath the confusion is a misunderstood word just as Word Clearing 1 6R says.

Method 4 Word Clearing is what is used in doing and achieving the purpose of the Dept of Personnel Enhancement, HCO PL 16 Feb 72.

One of the ways the Word Clearers in this Dept do the job is using Method 4 Word Clearing.

METHOD 4 IS USED BY COURSE SUPERVISORS TO HANDLE ALL STUDENT QUERIES ABOUT CONTENTS OF COURSE MATERIALS.

The reason students ask questions about “What is meant” is because of omitted pack materials from their checksheet, failure to read what they have OR BECAUSE OF A MISUNDERSTOOD WORD JUST BEFORE THEY GOT CONFUSED.

The Super has to know only where the materials are and BE SMART ENOUGH TO DO METHOD 4 INSTEAD OF GIVING THE STUDENT ALTER-ISED ANSWERS THAT STOP SCIENTOLOGY WORKING.

Word Clearing, especially Method 4, is how to get in HIGH CRIME HCO PL 7 Feb 1965, Reissued 15 June 70, “KEEPING SCIENTOLOGY WORKING”.

SUCCESSFUL COURSE SUPERVISION AND SUCCESSFUL CRAMMING REQUIRE THIS ACTION BE FULLY KNOWN AND U—S—E—D.

*Word Clearing Series 53R*  
(Revisions in this type style)

**CLEAR TO F/N**

(Word Clearing Series 32R has been corrected  
as 32RA to require the F/Ning of all words  
and forbids W/Cing on a high TA.)

Do NOT try to Word Clear a person *Method 1, 2 or 4* whose TA is high at session start. Use standard auditing procedures by an Auditor of the required class to get the TA down to normal range. (Usually a C/S Series 53RG and handling.)

If the TA is high at start of session one of course cannot F/N a TA on Word Clearing *when* it is high for some other reason.

ALWAYS F/N a word being cleared *on the meter*. It may happen there is a chain and the word has to be earlier similar. But even then, when the *chain is* F/Ned, the words on the chain that didn't F/N must F/N.

Example: A chemical *type* word reading. Doesn't F/N. E/S it on E/S words, comes down to a lecture in school. The Mis-U word there F/Ns. Now check the words touched while going E/S. Usually they just F/N.

Do NOT do a lot of words to "Clean" and say the person has been "Word Cleared". Cases are messed up because the Word Clearing may be over out rudiments or even out lists or out Int.

A Word Clearing worksheet must show truthfully all words F/Ned.

**RED TAB**

Where a pc has been Word Cleared *on the meter* without F/Ning or with or to a high or low TA, THE WHOLE FOLDER MUST BE RED TABBED.

W/Cing worksheets must go into the pc's folder, just as why finding and touch assists and other auditing actions must be put in the folder.

A pc red tabbed because of Word Clearing must be repaired within 24 hours, as in the case of any other red tab.

---

Stalled cases have been traced to Word Clearing errors. Repair of these will get them going again.

***C/S Series 92R***

*(Revisions in this type style)*

**WORD CLEARING ERRORS**

*(Applies to Methods 1, 2, 4 and 5  
done on a meter.)*

The attention of the C/S is called to the revised Word Clearing Series 32RA which requires words be F/Ned and to HCO B 8 July 74 of the Word Clearing Series which requires word clearing errors be RED TABBED and that all Word Clearing worksheets be placed in folders.

Case troubles have occasionally been traced to *metered* W/Cing over a High TA or failure to F/N words.

This is a hidden area from the C/S unless W/C worksheets are included in folders and the RED TAB system for non-F/N at conclusion is used. Only in this way is a C/S able to get all the data.

Correction of W/C errors is done by a Word Clearing Correction List.

High TA or Low TA at start of a W/C session is usually handled by C/S 53RG.

All "non-session" worksheets such as why finding, contact or touch assists and Word Clearing should go into the pc's folder.

*None of this can be used as an excuse not to word clear somebody. Make a C/S handle that TA fast and Red Tab the folder until handling occurs. Then do the Word Clearing.*

Remimeo  
(Translate to  
European  
Languages)

(Revision in this type style)

(Reissued 24 October 1974  
as a Tape Course Series)

***Word Clearing Series 42R***

***Tape Course Series 10***

**METHOD 4 NOTES**

Too generalized a question in using Method 4 defeats its use and can restimulate a person badly.

Example: "Is there anything in *college* you didn't understand?" That of course is just plain ridiculous as a question. "Have you ever heard anything you didn't understand?" would be similarly silly.

**BREAK DOWN THE MATERIALS**

When doing Method 4 you have to break down the materials (put them into small separate units) in order to ask questions.

Example: We have Papers 1 & 2, both on the same subject. The wrong question for Method 4 would be "Is there anything in Papers 1 & 2 you didn't understand?" and not even give him the papers to see! The right way to do it would be to take Paper 1 and break it down into its obvious sections, give the person Paper 1 and let him look at it. Point to its 1st section and say, "Is there anything you didn't understand in this section?" while watching the meter. Then point to next section, do the same. Finish Paper 1. Then go to Paper 2 and do it the same.

A person has to know what he's being asked about and has to be thinking of it when asked the question.

**TAPES**

Just as it would be ridiculous to ask, "Have you ever misunderstood anything you ever read?", it would be silly to ask, "Did you ever have a misunderstood on Tape?"

The right way is to take *the* tape and put it on a machine and play a bit of it. And ask, "Is there anything in the first section of this tape you didn't understand?" while watching the meter. Then high speed the tape forward to another area and do the same. Thus the tape is covered.

This can also be done from any tape notes, section by section.

**BOOKS**

Books are done chapter by chapter.

## QUICKIE M4

Method 4 is defeated utterly by:

1. Bad metering,
2. Too general a question,
3. Not having the material to hand,
4. Not getting the person's attention on parts of the material,
5. *Not taking each word found to F/N.*

Quickie M4 misses. It sets the person up for a loss in his studying.

And we want him to actually succeed in his study, don't we?

*Expanded Dianetics Series 23*  
(Ref. XDn Series 9)

**XDN CASE B**

Further data on XDn Series 9.

On further data the failure of this case was due to:

1. PTS to friend of wife who was violently invalidative. He roller coastered = PTS. The PTS scene should have been handled prior to auditing but was not known or suspected at the time.
2. This case had been a drug addict and was married to a drug addict who had been a prostitute and who persuaded him back on drugs. The drug rundown "no interest items" should have been run and he should have been cleaned up on drugs before beginning XDn. It has been proven out time and again that when a very full and complete drug rundown is not done, pcs do not succeed with any other type of auditing including Expanded Dianetics.

**FURTHER NOTES**

Further research has shown that headaches are almost invariably an Exteriorization-Interiorization problem. This research case should have had his Ext-Int handled fully.

-----  
These items added to the research program, before any others, would have brought success:

- i. Handle Ext-Int by repair or rundown.
- ii. Handle any out lists L4B.
- iii. Handle PTS Situation fully and rapidly.
- iv. Complete Drug RD by culling all "no interest items" and running them.

Further repair of this case would include the above but would add:

- v. Do an L4B on intentions lists to be sure no lists are out and repair.
- vi. Do R3R on all reading evil intentions whether pc interested or not.

**SUMMARY**

Data gained from running this Case B has been of great assistance in handling other cases since the faults found were not repeated.

Hundreds, probably thousands of cases are now winning on XDn with permanent gain. This is due to using fully the developed tech with full skill.

|---|--|

2. Use only the small falls or falls or BDs. The rises will however show where mass lies.

A. If A or any of the A Group, and the pc has *had* an Int RD, do an Int RD Correction List, and handle the reads. (HCO B 29 Oct 71 R, Revised 14 May 74.)

If the pc *has never had an Int RD*, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.

B. If any of these read, do an L4BR on the earliest lists you can find that have not been corrected. Lacking these do an L4BR in general. You can go over an L4BR several times handling each read to F/N until the whole L4BR gives nothing but F/Ns. *Handle a Wrong Why or Wrong Indication or Wrong PTS Item per C/S Series 78.*

C. If any of these, handle with 2wc and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 18 F/Ns. On overts and withholds, get what, and E/S to F/N. On out ruds, find which rud and handle. (See GF40RR, HCO B 30 June 71, Revised 13 Jan 72.) Feel sad, handle the ARC Break. (Feel sad = ARC Brk of long duration.)

D. Rehab releases on each "drug" taken to F/N. Complete the Drug RD per C/S Series 48R after handling all reads on this assessment. If pc has had a Drug RD, do *L3RD* on it, and handle.

E. If any of these, do *L3RD* and handle according to what is stated to do on *L3RD*.

F. Clean up any protest and inval and rehab to F/N.

- G. Find out what it is. If -Yoga or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do L1 C on *that* period of pc's life.
- H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If Study errors, 2wc E/S to F/N, and add a Study Correction List to the pc's program.
- I. False TA is wrong cans. Use HCO Bs 24 Oct 71, 12 Nov 71R, 15 Feb 72, 18 Feb 72, 29 Feb 72R, 23 Nov 73, all on False TA. Then clean up the bypassed charge with (1) Assess for best read (a) TA worries, (b) F/N worries. (2) Then 2wc times he was worried about (item) E/S to F/N. (3) *Rehab any overruns due to False TA obscuring F/Ns.*
- J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. *An F/N can be obscured and mistaken for a read if Sensitivity too high.* These items are all 2wc E/S to F/N. Auditors who made them need Cramming badly or retread.
- K. Can't have or Hav. Find correct Havingness process and remedy.
- L. PTS or Suppressed. Check for SP or get a full PTS RD.
- M. Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow, if qualified).
- N. 2wc to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2wc to F/N and get further C/S instructions for handling if necessary.
- O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate it if no F/N on first. If False TA handle per I above.

General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.

*URGENT*

*C/S Series 93*

**NEW GRADE CHART**

The "NEW" thing to do is the Grade Chart. Everything you are doing should contribute to getting the pc up the Bridge. THIS is the Bridge.

There is a new Grade Chart being prepared which has some changes in it, based on recent discoveries. It is urgent that you know of these in advance.

**DRUG RUNDOWN**

The effects of an omitted or incomplete Drug RD are severe enough to deny a person any lasting case gain.

This is covered in HCO B 31 May 74, "Unhandled Drugs and Ethics". Some orgs have taken this HCO B so literally however, that they have taken pcs off Adv Cses Grades, refused to do Assists on ill pcs and some showed pcs the HCO B and invaled their gains.

This was not the intention of the HCO B. The C/S Series remain valid.

The Drug RD belongs on the Grade Chart after Life Repair. A Drug RD cannot be done over out ruds and a Life Repair may be necessary to get in a pc's ruds.

Life Repair is not a prerequisite for the Drug RD, however, and if done is not to be dragged out intensive after intensive. In some cases a pc could not complete Life Repair without a Drug RD.

Following the Drug RD is ARC S/W, then the rest of Dianetics to completion.

**EXPANDED DIANETICS**

Ex Dn by the way belongs after Grade IV Expanded.

Some pcs R/S and have Evil Purposes to do others in. But no Grade 0 or Grade I or Grade II. What others? Martians?

"Got to secretly do everybody in" probably applies to Apeville some long date ago and he's never come up to PT.

The answer is to bring the pc up the Grade Chart to Expanded Grade IV *then* do his Ex Dn.

The prerequisites for Ex Dn are covered on HCO B 23 April 74, Ex Dn Series 22, "Expanded Dianetics Requisites". Add to that Expanded Grades up to IV and you have it.

**GRADE II**

Some orgs specialize in Grade II, especially on org staff. The pc is always getting Integrity Processing or his O/Ws pulled on so and so.

If you look on the Grade Chart you will find Withholds and Overts are Grade *TWO*.

Below Grade *TWO* lies Grade I (Problems) and Grade Zero (Communications). And below that is Dianetics and at the bottom end of Dianetics is the Drug Handling.

Now how do you expect a fellow who has unhandled drugs (or omitted drug items because of "no interest") to even know (no Grade 0) that other people are around or that (Grade I) he is caved in with problems he's never cognited on?

And he's supposed to have enough responsibility to answer up on Grade II? With real overts and withholds?

This does not mean you must never Sec Check. It does mean that Sec Checks are no substitute for auditing or guarantee of innocence.

Grades are Grades and the Grade Chart sequence is correct.

#### SOLO SET-UPS

Set-ups for Solo are fully covered on HCO B 8 Jan 72R, Revised 8 July 74, Solo C/S Series 11 R.

This will be included as part of Solo on the Grade Chart as it is a vital step.

Pcs won't make it on Solo if they aren't set up.

#### FULL LIST

Here's the full list of Grades showing where the various RDs now offered fit.

GROUP PROCESSING—Not mandatory or a prerequisite.

LIFE REPAIR—As needed but not prerequisite for Drug RD. To get ruds in on Life.

DRUG RD, means:

TRs 0-4, 6-9—Mandatory for a Druggie currently on Drugs, FLAT.

Full C/S-1—Where not done. To fully educate pc.

Objectives—Full battery to full EPs per basic books and early HCO Bs on them.

Class VIII Drug Handling—List and rehab all drugs, 3 way Recalls, Secondaries and Engrams of Taking and Giving Drugs.

AESPs on each reading Drug—Listed separately and handled with R3R, each drug to full F/N assessment of Drug List.

“No Interest” Drug Items—All reading ones run where they exist.

Prior Assessment—AESPs listed separately and run R3R, prior to first drug or alcohol taken.

ARC S/W EXPANDED.

DIANETICS, means:

C/S 54—Complete handling of Pc Assessment Form begun with Drug RD.

Health Form—Fully handled to full F/N Assessment.

EXPANDED GRADE 0—As issued.

EXPANDED GRADE I—As issued.

EXPANDED GRADE II—As issued, including Integrity Processing.

EXPANDED GRADE III—As issued.

EXPANDED GRADE IV—As issued.

EX DN—Not mandatory except where pc is a low OCA, an R/Ser (2%, chronically ill or psycho. Means:

Set-ups—Per HCO B 23 April 74, Ex Dn Series 22.

Introspection RD—Where pc ill, introverted or in a psychotic break.

R3R all E. Purps.

OCA Left-hand Side Handling—As issued.

OCA Right-hand Side Handling—As issued, with PTS RD as necessary.

POWER PROCESSING GRADES V & VA—Only prerequisites are Drug RD and Grade IV.

SOLO GRADE VI, means:

Solo Set-ups—Done at SH or AO per Solo C/S Series 11 R.

Solo Auditor's Course.

Solo Audit Grade VI materials.

#### CLEARING COURSE

OT I

OT II

OT III

OT VII PROCESSES

OT III EXPANDED

OT IV

OT V

OT VI

FULL OT VII VERIFICATION

OT VIII—When issued.

#### PROGRAMMING

The C/S Series, especially the early HCO Bs, numbers 1-13R, fully cover the use of the Grade Chart in programming.

#### THE GRADE CHART IS THE BASIC PROGRAMME OF A PC.

This datum has been neglected in some orgs, who have specialized in the new RDs developed since '71.

With refinement of repair and corrective actions and the release of new RDs, some may have forgotten that repair is only done to get off the overwhelm so that you can put the pc back on the Grade Chart.

#### SUMMARY

I thought I'd better fill you in on these changes and how the new Grade Chart lines up.

Make full use of this Chart with C/S Series programming tech in and your pcs will fly.

Here's to lots of case gain and rave success stories.

*Word Clearing Series 54*

**SUPERLITERACY AND THE CLEARED WORD**

SUPER—Superiority in size, quality, number or degree.

LITERACY—The ability to read and write.

Almost everyone these days is able to read and write. This was not true a century ago but, with modern stress on education, it is true today.

But is this enough today?

It is an instruction book world. The civilization in which we live is highly technical.

Education today goes into the twenties.

That's a third of one's life.

And what happens when one leaves school?

Can he *do* what he studied?

Does he *have* all his education or did it get left behind?

*Literacy is not enough.*

Today's schools and today's world require a new ability—the ability to look at a page without any strain and absorb what it says and then apply it right now without any stress at all.

And is that possible?

Am I talking about speed reading?

No. That is just being able to read rapidly. It does not improve the *comfort of* reading and it does not improve the ability to apply.

What is really needed is the ability to COMFORTABLY and QUICKLY take data from a page and be able at once to APPLY it.

Anyone who could do that would be SUPER-LITERATE.

What happens?

The average person-literate—is able to read words and mentally record words.  
Like this:

When he writes he writes:

In his mind words are "understood" as other words like this:

When one is Super-Literate, this is what happens:

Therefore as he is dealing in *concepts* (ideas or understandings) this can happen:

And he thinks in concepts to which he can fit words easily and so can write clearly.

In other words, when one is Super-Literate, one reads not words but understandings. And so one can act.

### CONCEPTS

The idea of grasping word meanings conceptually is something new to the field of Linguistics. The endless Semantic circles pursued by Korzybski and company (see Data Series 1, "The Anatomy of Thought") never really led to the realization that a word and its meanings are embodied in the basic *concept* or *idea* symbolized by that word.

That conceptualization of meanings is foreign to dictionary writers and "experts" is evidenced by the fact that definitions are so subject to alter-is and change with the passage of time.

For example, modern definitions of the word “understand” are found to be largely inadequate. A really full and meaningful definition of it could only be found in a First Edition of *Webster’s Dictionary of Synonyms, 1942*:

“*Understand*. To have a clear and true idea or conception, or full and exact knowledge, of something. In general it may be said that *understand* refers to the result of a mental process or processes (a clear and exact idea or notion, or full knowledge). *Understand* implies the power to receive and register a clear and true impression.”

#### CLEARED WORDS

Operating within a society steeped in misunderstood words and mis-definitions, Study Tech is subject to arbitraries. Thus, a *CLEARED WORD* is defined as follows:

A WORD WHICH HAS BEEN CLEARED TO THE POINT OF FULL CONCEPTUAL UNDERSTANDING.

In Metered Word Clearing this translates as:

F/N, VGIs.

There are many ways and combinations to achieve this EP. Using the word in sentences until the meaning is grasped conceptually is the most common. Diagrams, demos, clay, in fact the entire body of Study Tech and its methods are applicable.

These are vital tools. For use. Protect them and KEEP SCIENTOLOGY WORKING.

*URGENT—IMPORTANT*

*C/S Series 94*

**REDUCTION OF REFUNDS  
C/Ses AND OVERLOAD**

When a C/S is overloaded, he is a potential cause of OUT TECH.

He may try to make up time by not reading worksheets of Auditors, by failing to do Folder Error Summaries, by not taking time to write Cramming Orders and neglecting other C/S duties.

Recent evaluation has shown that OVERLOADED C/Ses CAN BE THE REASON FOR A HUGE REFUND RATIO IN THE ORG'S GI-CGI.

Any non-tech person such as the Ethics Officer can tell at once when a C/S is either not working or overloaded. THE HANDWRITING IN THE WORKSHEETS CAN'T BE READ, WORDS ARE NOT CLARIFIED IN RED, NO FESes ARE SEEN IN FOLDERS AND NO CRAMMING ORDERS EXIST TO MAKE AUDITORS DO HANDWRITING DRILLS TO WRITE FAST AND WELL.

Proper C/S posting was piloted by me on Flag years ago. The existing technical executives failed to export it to orgs.

The irreducible minimum C/S postings are:

SENIOR C/S who handles bugged cases and very upper level actions and keeps the other C/Ses functioning well. He is the highest classed C/S in the org. He is responsible for proper handling and results on all cases. (This is a hat I usually wore in an area.)

EXPANDED DIANETIC C/S who does only Expanded Dianetics.

GRADE C/S who C/Ses Grade pcs.

DIANETIC C/S or C/Ses who handle all routine C/Sing of Dianetics including Drug Rundowns.

There are several other C/S posts. In AOs additionally there are Solo C/Ses. In Saint Hills there are Power (Class VII) C/Ses.

As an org expands it can have additional *types* of C/Ses. Some of these are:

REVIEW C/S who reviews tech case failures, taking this load off the Senior C/S.

STAFF CASES C/S who C/Ses for audited staff.

STUDENT AUDITING C/S who C/Ses student sessions.

AO REVIEW C/S who C/Ses for fast review on Adv Cse Students.

CO-AUDIT C/S where a Co-Audit exists separate from HGC lines.

## WHAT IS OVERLOAD?

When a C/S can't read every worksheet and study and program *every* case he has, due to time, he is overloaded.

### WASTED C/Ses

To get a Class VI or even a Class IV to C/S lower action folders is a waste of C/Ses since it is easy to *train* Dianetic C/Ses.

### SUMMARY

*TRAIN* AND POST enough C/Ses and watch the GI go up and refunds go down.

It is not enough just to get Auditors and more and more Auditors.

**DON'T OVERLOAD C/Ses. GET MORE OF THEM!**

HCO BULLETIN OF 26 SEPTEMBER 1974

Remimeo

*IMPORTANT*

**HANDLING FLUBBED PCS**

In 1970 when auditing by intensives was reimplemanted it became clear that Tech repaired any flubs on pcs and did not send them to Qual.

Tech did its own repair.

Now, with the emphasis on Qual correcting Auditors and C/Ses it is very important that this rule is followed.

**TECH CORRECTS ITS OWN FLUBBED PCS. IT DOES NOT SEND THEM TO QUAL.**

Qual must not get into the HGC business. Tech is there to deliver the technology. Qual is there to safeguard the technology by correcting the personnel who flub delivering it and get *them* to deliver it correctly. Qual does not correct the pcs.

**TECH ACTION**

The routine Tech action when a pc is flubbed or Red Tagged is for the Auditor to take the pc back in at once and repair any error with the correction list for that action.

Example: Auditor doing an L&N. Pc Red Tags after session. Auditor takes the pc right back in and does an L4BR and corrects the list.

Example: Auditor doing Ruds. Pc Red Tags with a high TA. Auditor takes the pc back in straight away, assesses a C/S 53 and handles.

If the Auditor can't handle he sends the folder to the Tech C/S who studies the folder, finds the bug and gets it handled fast.

The maximum wait is 24 hours. A red-hot Tech Division handles the same day.

**QUAL ACTION**

Qual crams the Auditors and C/Ses and Supervisors. The Qual Sec makes sure that the Cramming orders are done and that the flubs are corrected.

**But, QUAL DOES NOT CORRECT THE PC. TECH DOES.**

**SUMMARY**

When Quals get into the HGC or Academy business and start delivering the courses or intensives, the Tech goes out the window **BECAUSE THEN THERE IS NO QUAL**. Qual corrects the *Auditors* and *C/Ses* and *Supervisors*.

Tech corrects its own flubbed pcs.

Tech Div Hats (HCO Pol Ltr of 16 Dec 1968 and  
SHSBC Students 7 Sept 1969 Amended and Reissued)  
ARC Break Auditor Amended 8 August 1970

Revised 17 September 1974  
Revised 29 September 1974

**GREEN FORM**

*BEFORE ANY AUDITOR IS PERMITTED TO DO A GF OR ANY PREPARED LIST HE MUST BE ABLE TO MAKE LISTS READ WITH CRAMMING ON TR 1 AND CRAMMING ON HCO Bs 28 FEB 71 (C/S SERIES 24), 9 JUNE 71, ISSUE I (C/S SERIES 41), 20 DEC 71 (C/S SERIES 72), 15 JUNE 72 (C/S SERIES 80), 15 OCT 73 (C/S SERIES 87), 20 NOV 73 (C/S SERIES 89), 6 DEC 73 (C/S SERIES 90), AND BTB 16 JUNE 71R, ISSUE I (FORMERLY HCO B 16 JUNE 71R, ISSUE III).*

In HGC the Green Form is done on the order of the Case Supervisor *to detect reasons for case trouble. If the TA is high or low use C/S 53RH instead.* It is assessed Method 5 and handled. The new Auditor's Code is observed on every line. If the line reads and the pc or pre-OT protests it, has no answers, seems ARC Broken by the read or resigned or starts to explain how the thing has been run before, check for false read. Use False and Suppress as per BTB 18 Nov 68R.

On Environment ARC Break the Remedy B—Environment, BTB 14 Aug 68R, is a limited process. S&D is also a limited process, only one F/N available on W, one F/N on S, one F/N on U. They are only done on C/S instructions.

Do not audit a pc or pre-OT who has not had sufficient food or rest or who has taken aspirin or drugs; check this before session. If he or she has had insufficient food or rest, send the pc home to have this handled. Indicate the by-passed charge of the incomplete cycle of action of the session on both Questions 2 and 3.

The Green Form should be run to F/N VGIs with all reads taken to F/N. It can be done Method 3 and taken to a good win, F/N VGIs. *If done M3 it must not be run past the first F/N.*

*IMPORTANT*

**THE VITAL INFORMATION RUNDOWN  
THE TECHNICAL BREAKTHROUGH OF 1974**

Recent intensive investigation into blocks on tech, dissemination and communication lines uncovered an aberration which is quite widespread and especially common in society.

Simply stated I found that WHERE VITAL INFORMATION WAS NOT BEING RELAYED OR WAS HIDDEN OR FALSIFIED, THE PEOPLE RESPONSIBLE WERE DRAMATIZING WITHHOLDS.

You can see this in newspapers, government policies, the medical profession, psychiatry, economics and especially education.

I have for years tried to get to the bottom of why people will not teach people. It is the single greatest fault in existing culture in my opinion.

The answer that fits all cases is a failure to relay information, brief, instruct, train or supervise stemming from a general past and current OVERT OF WITHHOLDING VITAL INFORMATION. This gives a dramatization in daily conduct of failing to relay information, brief, instruct, train or supervise.

And underlying that is the intentional impulse to do so overtly or covertly in a mistaken attempt to forward their own first dynamic.

**RESEARCH**

The primary outpost that led to this conclusion is the premium given to silence in philosophy and the approval accorded the silent by the population whereas such people are in fact quite deadly and useless.

It is a generalized dramatization in this society. This would be what made the society favor the "strong silent type" as a sort of ideal.

All this in a highly technical society is hazardous. A good example is the current fuel crisis over a supposed scarcity of petroleum fuels for highly inefficient internal combustion engines while answers in the form of new fuels and engines are hidden away in vaults by the vested interests.

**ORGS**

In our organizations this is deadly. It blocks our tech lines in the Academy and Qual as well as the HGC. It cuts our dissem lines to public via books, promo, regging, lectures, use of C/F and Addresso and FSMs. It cuts our comm lines and denies data to higher management.

It winds up in no application of the tech and no results for the public.

That makes this rundown mandatory for top execs including Flag Reps and LRH Comms, *all* Tech and Qual staff and Dissem, Distrib and HCO Dept 2.

## PECULIARITY

This mechanism is a peculiar one with its own special twist.

Earlier rundowns did not hit this particular type of overt. It isn't very visible and doesn't occur in rundowns like L10.

It is not simple withholding information. It is (or once was) the intentional overt of withholding VITAL information. It would be a very long chain and would influence general conduct. A bordering chain is withholding information under torture.

Probably an A=A=A sets in which then totally prohibits some (too many) people from imparting important data, thus they can't teach, amongst other things. It has to be fully run out, engrams and all.

## THE RUNDOWN

Where staff are concerned, the necessity of delivering this RD reduces the prerequisites for it to the Drug RD only. It could be done if necessary where the Drug RD was not yet complete but would have to be verified after completion of the Drug RD.

Otherwise and for public, this RD belongs on Ex Dn as OCA right-hand side handling. It would probably fit best before the Multiple E. Purp RD and the Responsibility RD.

## VITAL INFO RD

1. Clear and assess:

VITAL DATA \_\_\_\_\_  
THE TRUTH \_\_\_\_\_  
VITAL INFORMATION \_\_\_\_\_  
KNOWLEDGE \_\_\_\_\_

Choose the best read as the item.

2. a) L&N "What would happen if you communicated \_\_\_\_\_?"  
b) R3R Quad
3. a) L&N "What problem have you had with \_\_\_\_\_?"  
b) R3R Quad
4. a) Clear and assess:  
Withholding (item) under duress. \_\_\_\_\_  
Withholding (item) under torture. \_\_\_\_\_  
Withholding (item) to protect someone. \_\_\_\_\_  
b) R3R Quad
5. a) Clear all words plus fully clear each outpoint with examples and demos so it's understood.  
b) Assess:  
Omitted (item). \_\_\_\_\_  
Altered the sequence of (item). \_\_\_\_\_  
Dropped time out of (item). \_\_\_\_\_  
Added falsehoods to (item). \_\_\_\_\_  
Altered the importance of (item). \_\_\_\_\_  
Used (item) to wrong tgt. \_\_\_\_\_  
Assigned the wrong source for (item). \_\_\_\_\_

Made (item) a contrary fact. \_\_\_\_\_  
 Added time to the relay of (item). \_\_\_\_\_  
 Added inapplicable data to (item). \_\_\_\_\_  
 Incorrectly included other data with (item). \_\_\_\_\_  
 Complicated (item). \_\_\_\_\_  
 Suppressed (item). \_\_\_\_\_

In order of reads:

c) R3R Quad

Locate a time when another \_\_\_\_\_to/for/from (pick which) you.

Locate a time when you\_\_\_\_\_to/for/from another.

Locate a time when another\_\_\_\_\_to/for/from another.

d) L&N “What would be the intention of someone who\_\_\_\_\_?”

e) R3R Quad the intention.

6. a) Assess: Concerning (item) has there been a break in

Affinity \_\_\_\_\_  
 Reality \_\_\_\_\_  
 Communication \_\_\_\_\_  
 Understanding \_\_\_\_\_

b) R3R Quad the largest read.

c) Reassess ARCU and handle to F/Ning assessment.

7. a) Clear all words, especially *assumption* and *justify* and *withholding* (in the broad sense).

b) L&N “What assumption would justify withholding (item) ?”

c) R3R Quad the computation.

8. R3R Quad all E. Purps that came up during the RD.

9. R3R Quad all computations that came up during the RD.

### SUMMARY

The importance of this RD for Tech and Qual staff and sensitive posts cannot be over-emphasized.

Although it will be quite popular with the public it is basically designed for staff on these lines.

The auditors delivering it should themselves have had it. They must have flawless TRs, be able to make a meter read and must drill the RD in Qual before attempting to deliver it.

This RD is very powerful. Don’t miss on it with careless delivery. Get it done flawlessly as directed and you will have a resurge on delivery and dissemination lines and open the door to A GOLDEN ERA OF AUDITING QUALITY AND RESULTS FOR PUBLIC AND STAFF.

**PTS RUNDOWN**

**CASES**

One remaining problem in cases was "PTS phenomena".

P.T.S. means Potential Trouble Source. When someone is suppressed he becomes a Potential Trouble Source.

There are numerous HCO Bs and PLs on this subject. All of them are true observations and predictions.

The cause of ROLLERCOASTER is PTS. Rollercoaster means a slump after a gain. Pcs who do not hold their gains are PTS.

S and Ds (for Search and Discovery) was the earlier approach. These are still valid and "3 S&Ds" as a rundown is used in the PTS Rundown without change.

Now with the PTS Rundown, the handling of this common and all too frequent case condition can be handled.

**WHO DOES IT**

Hopefully it can be done by Class IVs who are also HDCs, HGC Okays to Audits.

For an Auditor who is not HDC Class IV Okay to Audit HGC by competent Internship to attempt a PTS Rundown would be very risky for the pc as it needs exact listing, exact TRs, exact metering, exact Code keeping and very honest auditing and competent C/Sing.

**DEVELOPMENT**

Earlier discovery and development of the PTS theory is extensively covered.

The recent wrap-up came about through my OT research in November 1971.

The principal breakthrough was realizing one should NOT invalidate having known certain people before.

This is similar to the past life discovery in 1950. Some people thinking this was "unpopular" frowned on it. Some others were only famous characters so flagrantly that past lives were easily invalidated. But people who don't go past track in Dianetics don't recover. Even running them as "imaginary" as in *Science of Survival* advices suddenly breaks through for a stalled Dianetic Case.

In this same way with young men and girls using "I knew you when you were" for 2D advantage tended to invalidate having known certain individuals before this life.

But now it turns out that the ONLY PTS situation that is serious and lasting and can cause a rollercoaster comes from having known the person *before* this life.

Possibly in the last life or earlier lives one knew persons before *that* life too. This however shows up in the 3 S&Ds.

## BREAKDOWN

There are only four points of breakdown of the PTS Rundown.

1. Improperly audited. Auditor not able to always do a correct list, TRs out, metering out, poor R3R, just plain untrained or not totally familiar with this Rundown.
2. Pc not completely set up. Like: Has TA trouble but no C/S 53 done, is a no change case but no GF 40R done, old auditing not repaired by a GF and proper programming or no C/S 54 or too tired or too ill for the R3 R.
3. The Rundown not fully and completely done, but chopped or left incomplete (pc will still rollercoaster).
4. People who “can’t run engrams”—which means a druggie who hasn’t had a full Drug Rundown.

There is nothing especially tricky about the auditing of the PTS Rundown except that all auditing should be of flubless quality and when the PTS RD is flubbed by bad lists or poor R3R or out TRs or poor metering it really IS a mess. The RD is so powerful that errors in C/Sing and auditing it are especially rough.

Currently sick pcs should not be run on the PTS Rundown as a standard practice. It IS what they need BUT you can easily overwhelm a sick pc with engram running.

The time to run a PTS RD is when the pc is set up and when it is noted the pc rollercoasters, not when he collapses with a temperature.

Rollercoaster can also be caused by a bad Interiorization RD or Int repair, out lists, bypassed charge of other descriptions. These should be gotten rid of before a PTS RD is attempted.

## BEHAVIOR OF RD

Valence shifts occur rapidly and frequently in PTS RDs and should be noted on the worksheet.

The R3R can sometimes be a bit of a long haul on a basic incident. Be sure with an L3B. But get an erasure of basic no matter how hard you have to work at it. In the PTS RD incidents can “develop”. Missing pieces can appear. A whole new slant can occur on the subject when one goes to F2 after finishing F1.

Chronic somatics are likely to appear and be handled on this Rundown. And case conditions not previously remedied by other means can be remedied by this Rundown.

## END PHENOMENA

There is a point where the pc is absolutely sure he knew the person before this life. This is NOT the EP.

A pc can exteriorize on this RD. That is NOT the EP (but requires an Int RD if none has been done before *and the TA goes high, or its correction*).

THE EP IS A PC WHO IS GETTING AND KEEPING CASE GAINS AND NEVER AGAIN ROLLERCOASTERS.

## PARTS

There are four parts to the RD.

(a) Present and past S&Ds. Collect them up, handle each valid item with R3R Triple, ARC Brk, PTP, W/H and Overts each Triple. If no S&Ds exist do “3 S&Ds” and R3R and Ruds as above. If no folder, get the pc to tell you any past S&D items. *Follow Ruds with Can’t Have/Enforced Hav per HCO B 3 June 72R.*

(b) *L&N Who have you* known this lifetime who has troubled or worried you? Includes father, mother, wife or wives (husband), brothers, sisters, aunts, uncles,

grandparents, lovers. *Take the BD F/N item.* Ask if the pc has known person before this life. If read, R3R Triple, Ruds & Overts Triple.

(c) *L&N Who have you been after this life? Take the BD F/N item.* Ask if known before. *If it so reads, R3R Triple, Ruds & Overts Triple, Can't Have/Enforced Hav.*

(d) *L&N What planets have you known before this lifetime? To BD F/N item.* R3R Triple, Ruds & Overts Triple, *Can't Have/Enforced Hav.*

That is the extent of the Rundown.

## FLAWS

You cannot use Flow 1 as any old direction to or from pc. To do this fouls it up. *Flow 1 is to the pc.*

Flow 2 is pc to the person (or place).

Flow 3 is the person (or place) to others.

If you did Fl R3R as "Locate a time you knew\_\_\_\_" you might get to the pc, pc to the person or the person to others. You would not get a clean motivator Fl. This would leave the PTS chain partially run.

This is also true of the ruds.

## RE-DOs

If the pc does *not* recover, then reasons for failure 1 to 4 above should be checked into.

Then the lists and R3R should be handled with L4B and L3B.

Then an overlooked item or person or place should be scouted for and handled. There is no question of the validity of the Rundown. It might have missed. "True love" might have been passed over as unlikely but such obsessive attraction is always based on having known (and probably done in) the other person.

Then the true EP will be attained where it only appeared to be before.

## THE COMMANDS

See 3 S&Ds HCO Bs 13 January 1968 "S&Ds", 19 Jan 68, 16 Aug 69, 14 Jan 68, 28 Nov 67, 10 Nov 67, 9 Nov 67.

The commands and actions of doing 3 S&Ds are DRILL TR 4000-9 & TR 4000-10 3 S&Ds. HCO B 9 Oct 71, Issue VI.

The following R3R commands are used in every case. Put the person or place in the blank:

- F1. Locate a time when\_\_\_\_\_ did something to you. R3R.
- F2. Locate a time when you did something to\_\_\_\_\_. R3R.
- F3. Locate a time when\_\_\_\_\_did something to others. R3R.

## RUDS

- 1. Did\_\_\_\_\_ARC Brk you? ARCU CDEINR. E/S to F/N.
- 2. Did you ARC Brk\_\_\_\_\_? ARCU CDEINR. E/S to F/N.
- 3. Did\_\_\_\_\_ARC Brk others? ARCU CDEINR. E/S to F/N.

ALWAYS DO A FRESH ARCU CDEINR ON EACH E/S.

4. Did \_\_\_\_\_ give you a problem? E/S to F/N.
5. Did you give \_\_\_\_\_ a problem? E/S to F/N.
6. Did \_\_\_\_\_ give others problems? E/S to F/N.
  
7. Did you withhold anything from \_\_\_\_\_? E/S to F/N.
8. Did \_\_\_\_\_ withhold anything from you? E/S to F/N.
9. Did \_\_\_\_\_ withhold anything from others? E/S to F/N.
10. Did \_\_\_\_\_ commit an overt (harmful act) on you? E/S to F/N.
11. Did you commit an overt (harmful act) on \_\_\_\_\_? E/S to F/N.
12. Did \_\_\_\_\_ commit an overt on others? E/S to F/N.

HUBBARD COMMUNICATIONS OFFICE  
Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 15 OCTOBER 1974

Remimeo  
Cramming  
Officers

*IMPORTANT*

*Cramming Series 14*

**CRAMMING OVER OUT RUDS**

A Cramming Officer can fail in his efforts to correct a flubbing staff member if he tries to cram over out ruds.

Cramming done over an ARC Break, like Auditing, will result in the person getting worse, more out of comm or misemotional. Cramming a person over a problem or W/H will produce no change so no correction will occur.

Out ruds are easy to spot. The person with an ARC Break, won't talk or is misemotional or antagonistic. A problem produces fixated attention that prevents Cramming from finding the actual area of difficulty. Natter and 1.1 remarks means a withhold.

Recently a musician being crammed kept bringing up a dispatch that he was in mystery about concerning the group. Every time it was mentioned it read or BDed yet the Cramming Officer continued "Cramming" him and never handled it. So no product.

I sat the musician down, told him he was crammed over a problem, the mystery about the dispatch, cleaned it up by getting the dispatch and letting him go over it, made sure the problem was handled then found the area of misunderstood and traced it back to an early age and the Why fell right out.

And I got the Cramming Officer crammed by the Senior C/S and found her Why too.

So the moral of the story is DON'T CRAM OVER OUT RUDS.

It is too costly in lost production and flaps.

**CRAMMING OFFICER FLUBS**

When the Cramming Officer flubs you must get him crammed fast because he will repeat the error on others and there goes your results.

In such cases, get him crammed immediately by the Qual Sec or Senior C/S. If it is the Qual Sec who has flubbed, then he is crammed either by the Senior C/S or the Keeper of Tech.

**INCOMPLETE HANDLING**

It is often not enough just to correct a Why and do no further handling in Cramming. Most Cramming Cycles reveal a broader area of situation which must also be handled.

An example is the Auditor who flubs on an L4BR and during the Cramming reveals he never really listened to the key SHSBC L&N tapes.

The Cramming Officer who does not also program the Auditor for a review of those tapes would not have fully corrected that Auditor. You could accurately predict future L&N flubs and pc upsets.

A subsequent program such as the one above would count as an additional Cramming Cycle for the Cramming Officer, or a Retread if lengthy and would count as additional points.

Therefore the maxim of Cramming is:

HANDLE THE HELL OUT OF IT.

Honest correction must be fully and completely done for the sake of the public and the org as well as the staff member.

#### SUMMARY

Cramming success depends on not Cramming over out ruds and on fully handling all areas of confusion or weakness.

Follow these operating rules and you will enjoy rave results and real correction.

And your org stats will soar.

HCO POLICY LETTER OF 19 OCTOBER 1974

Remimeo

*URGENT*

**THE DRAMATIZATION OF WITHHOLDS  
ON VITAL INFORMATION LINES**

I have recently unearthed a widespread aberration that underlies the withhold or obstruction of vital information and wanted to warn you to be on the lookout for it.

It is, simply stated, DRAMATIZATION OF WITHHOLDS.

This is not just the person with withholds, this is the person who DRAMATIZES withholds by preventing the relay, exposure or free distribution of vital information.

To DRAMATIZE means to act under the influence of past incidents as dictated by those incidents in the bank. The guy is replaying something now that happened in the past, out of its time and context and out of his control. A person dramatizing withholds would be acting out withholding information now, when the actual withholds or incidents of withholding are in the past.

**VITAL INFORMATION**

Vital information is vital because survival depends on it. Examples include: HCO Bs, HCO PLs, books, tapes, course checksheets and packs, hats, OEC Volumes, LRH EDs and FOs and other issues, Flag programs and EDs, stats, weekly reports, compliance reports, situation reports, CSWs, evals, even dispatches that contain important information that must be known.

Also, an org requires other vital data like accurate C/F and Addresso's, up-to-date files, broad, hard-sell promotion and magazines, accurate accounts files and records, monthly statements, tech data that gives pc and student results, Word Clearing and Cramming results, a Qual Library, broad public dissemination and promotion to name a few.

Data that is VITAL must be relayed, must be made known without alteris or barriers. You can't survive without it.

**THE DRAMATIZATION**

There are probably as many different ways to dramatize withholds as there are people who do it. You should know of the main ones I've come across lately.

First is a failure to relay. This can be simply not routing on a mail pack or dispatch, not sending out the org's letters or mailings, backlogging Mimeo so new issues don't get seen, having poor tape recorders in the Academy or simply refusing to train or process public and staff.

A deadly one is losing tech personnel or not recruiting them. That way nobody is there to relay the Tech to the students and pcs. A few orgs are very busy doing that one.

Never making the Auditors and C/Ses and Supervisors do their daily TRs, High Crimes and training is another one. It denies the tech people data they need and also denies Standard Tech to the public especially in terms of results on pcs.

Not Hatting or Cramming staff is another one. So is falsifying stats, not promoting, failure to sell training, not calling paid up public in for service, not reporting what is happening in the org.

When you see this happening WATCH OUT. Someone is dramatizing withholds and withholding vital information.

The worst example of course would be not to have an org there at all.

### AN ORG'S MAIN PRODUCT

The main product of an org is Knowledge, and the results obtained with it.

Any post in an org contributes to this product. It is the most valuable product we have to exchange with the public.

Knowledge and its results are what public and staff want. It is valuable because without it there can be no survival.

### REMEDY

The Vital Information Rundown HCO B 6 Oct 74 is the remedy for the dramatization of withholds.

Train your Auditors on it thoroughly and get it delivered where you are having this problem.

If you don't have any Auditors to deliver it or no one to train them you have already been hit by this dramatization.

Your only hope is to get an Auditor and train him and get it delivered.

**YOUR IMMEDIATE ACTION IS TO OPEN UP YOUR VITAL INFORMATION LINES NOW.**

### SUMMARY

Look over your org and see if this mechanism has affected your operation.

Don't tolerate it. Expose it and relay the vital information.

**DON'T PERMIT THE DRAMATIZATION OF WITHHOLDS TO BLOCK THE FLOW OF VITAL INFORMATION.**

Your survival depends on it.

### CASES

One remaining problem in cases was “PTS phenomena”.

P.T.S. means Potential Trouble Source. When someone is suppressed he becomes a Potential Trouble Source.

There are numerous HCO Bs and PLs on this subject. All of them are true observations and predictions.

The cause of ROLLERCOASTER is PTS. Rollercoaster means a slump after a gain. Pcs who do not hold their gains are PTS.

S and Ds (for Search and Discovery) was the earlier approach. These are still valid and “3 S&Ds” as a rundown is used in the PTS Rundown without change.

Now with the PTS Rundown, the handling of this common and all too frequent case condition can be handled.

### WHO DOES IT

Hopefully it can be done by Class IVs who are also HDCs, HGC Okays to Audits.

For an Auditor who is not HDC Class IV Okay to Audit HGC by competent internship to attempt a PTS Rundown would be very risky for the pc as it needs exact listing, exact TRs, exact metering, exact Code keeping and very honest auditing and competent C/Sing.

### DEVELOPMENT

Earlier discovery and development of the PTS theory is extensively covered.

The recent wrap-up came about through my OT research in November 1971.

The principal breakthrough was realizing one should NOT invalidate having known certain people before.

This is similar to the past life discovery in 1950. Some people thinking this was “unpopular” frowned on it. Some others were only famous characters so flagrantly that past lives were easily invalidated. But people who don’t go past track in Dianetics don’t recover. Even running them as “imaginary” as in *Science of Survival* advices suddenly breaks through for a stalled Dianetic Case.

In this same way with young men and girls using “I knew you when you were “ for 2D advantage tended to invalidate having known certain individuals before this life.

But now it turns out that the ONLY PTS situation that is serious and lasting and can cause a rollercoaster comes from having known the person *before* this life.

Possibly in the last life or earlier lives one knew persons before *that* life too. This however shows up in the 3 S&Ds.

### BREAKDOWN

There are only four points of breakdown of the PTS Rundown.

1. Improperly audited. Auditor not able to always do a correct list, TRs out, metering out, poor R3R, just plain untrained or not totally familiar with this Rundown.
2. Pc not completely set up. Like: Has TA trouble but no C/S 53 done, is a no change case but no GF 40R done, old auditing not repaired by a GF and proper programming or no C/S 54 or too tired or too ill for the R3R.
3. The Rundown not fully and completely done, but chopped or left incomplete (pc will still rollercoaster).
4. People who “can’t run engrams”—which means a druggie who hasn’t had a full Drug Rundown.

There is nothing especially tricky about the auditing of the PTS Rundown except that all auditing should be of flubless quality and when the PTS RD is flubbed by bad lists or poor R3R or out TRs or poor metering it really IS a mess. The RD is so powerful that errors in C/Sing and auditing it are especially rough.

Currently sick pcs should not be run on the PTS Rundown as a standard practice. It IS what they need BUT you can easily overwhelm a sick pc with engram running.

The time to run a PTS RD is when the pc is set up and when it is noted the pc rollercoasters, not when he collapses with a temperature.

Rollercoaster can also be caused by a bad Interiorization RD or Int repair, out lists, bypassed charge of other descriptions. These should be gotten rid of before a PTS RD is attempted.

With HCO B C/S Series 93, “New Grade Chart”, the PTS RD is done as part of Ex Dn after a full Drug RD and Exp Grade IV.

### BEHAVIOR OF RD

Valence shifts occur rapidly and frequently in PTS RDs and should be noted on the worksheet.

The R3R can sometimes be a bit of a long haul on a basic incident. Be sure with an L3RD. But get an erasure of basic no matter how hard you have to work at it. In the PTS RD incidents can “develop”. Missing pieces can appear. A whole new slant can occur on the subject when one goes to F2 after finishing F1.

Chronic somatics are likely to appear and be handled on this Rundown. And case conditions not previously remedied by other means can be remedied by this Rundown.

#### END PHENOMENA

There is a point where the pc is absolutely sure he knew the person before this life. This is NOT the EP.

A pc can exteriorize on this RD. That is NOT the EP (but requires an Int RD if none has been done before and the TA goes high, or its correction).

THE EP IS A PC WHO IS GETTING AND KEEPING CASE GAINS AND NEVER AGAIN ROLLERCOASTERS.

#### FLOWS

You cannot use Flow 1 as any old direction to or from pc. To do this fouls it up. *Flow 1 is to the pc.*

Flow 2 is pc to the person (or place).

Flow 3 is the person (or place) to others.

If you did FI R3R as “Locate a time you knew\_\_\_\_\_” you might get to the pc, pc to the person or the person to others. You would not get a clean motivator FI. This would leave the PTS chain partially run.

This is also true of the ruds.

#### RE-DOs

If the pc does *not* recover, then reasons for failure 1 to 4 above should be checked into.

Then the lists and R3R should be handled with L4BR and L3RD.

Then an overlooked item or person or place should be scouted for and handled. There is no question of the validity of the Rundown. It might have missed. “True love” might have been passed over as unlikely but such obsessive attraction is always based on having known (and probably done in) the other person.

Then the true EP will be attained where it only appeared to be before.

## THE RUNDOWN

### A. *PAST S&Ds:*

1. Collect up past S&D items (which should have already been verified on set-ups) or get the pc to tell you them if no folder.
2. On the earliest one ask if known before. If it so reads handle per steps 3-6. If not, pick next item and repeat this check for validity.
3. R3R Triple the item using these commands:
  - F1 Locate a time when \_\_\_\_\_did something to you. R3 R.
  - F2 Locate a time when you did something to\_\_\_\_\_ R3R.
  - F3 Locate a time when\_\_\_\_\_did something to others. R3 R.
4. Triple Ruds and Overts on the item using these commands:
  - (a) Did\_\_\_\_\_ARC Brk you? ARCU CDEINR. E/S to F/N.
  - (b) Did you ARC Brk\_\_\_\_\_? ARCU CDEINR. E/S to F/N.
  - (c) Did\_\_\_\_\_ARC Brk others? ARCU CDEINR.

ALWAYS DO A FRESH ARCU CDEINR ON EACH E/S.

  - (d) Did\_\_\_\_\_give you a problem? E/S to F/N.
  - (e) Did you give\_\_\_\_\_a problem? E/S to F/N.
  - (f) Did\_\_\_\_\_give others problems? E/S to F/N.
  - (g) Did you withhold anything from \_\_\_\_\_? E/S to F/N.
  - (h) Did\_\_\_\_\_withhold anything from you? E/S to F/N.
  - (i) Did\_\_\_\_\_withhold anything from others? E/S to F/N.
  - (j) Did\_\_\_\_\_commit an overt (harmful act) on you? E/S to F/N.
  - (k) Did you commit an overt (harmful act) on\_\_\_\_\_? E/S to F/N.
  - (l) Did\_\_\_\_\_commit an overt on others? E/S to F/N.
5. Run “Can’t Hav/Enforced Hav” with these steps:
  - (a) Clear “can’t have”, “couldn’t have” as DENIAL OF SOMETHING TO SOMEONE ELSE. Clear “enforced have” as MAKING SOMEONE ACCEPT WHAT THEY DIDN’T WANT. Have pc get the idea of these with an example or two.
  - (b) Run on the SP items “can’t have/enforced have” as motivator repetitive, then overt repetitive, the flow three terminal to others, others to terminal (four flows of two commands each).
  - (c) After EACH item is handled with the four flows, Objective Havingness should be run.

THE COMMANDS:

- F1 1. What can't have did (terminal) run on you?  
2. What did (terminal) force on you you didn't want?
- F2 1. What can't have did you run on (terminal)?  
2. What did you try to force on (terminal) that he (she, it) didn't want?
- F3 1. What can't have did (terminal) run on others?  
2. What did (terminal) force on others they didn't want?
- F3A 1. What can't have did others run on (terminal)?  
2. What did others try to force on (terminal) that he (she, it) didn't want?

—OBJECTIVE HAVINGNESS—

6. Handle all past S&D items per above steps.

B. *PAST PTS INTERVIEWS:*

7. Collect up all past PTS Interview items (which should have already been verified with C/S Series 78 on set-ups).
8. Check known before on earliest one. If it so reads handle as below.
9. R3R Triple the item.
10. Triple Ruds and Overts on the item.
11. Can't Hav/Enforced Hav on the item followed by Objective Hav.
12. Repeat steps 8-11 on all valid past PTS Interview items.

C. *NEW S&Ds (3 S&Ds):*

13. Do 3 S&Ds per HCO B 16 Aug 69, "Handling Illness in Scientology", assessment and 3 L&Ns.
14. Check the first item for known before, handle if it so reads.
15. R3R Triple the item.
16. Triple Ruds and Overts on the item.
17. Can't Hav/Enforced Hav on the item, followed by Objective Hav.
18. Repeat steps 14-17 on the other 2 items if valid.

D. *TROUBLED/WORRIED:*

19. L&N Who have you known this lifetime who has troubled or worried you? to BD F/N item. (Usually includes father, mother, wife or wives, husband, brothers, sisters, aunts, uncles, grandparents, lovers.)
20. Check item for known before, if it so reads:
21. R3R Triple.

22. Triple Ruds and Overts.
23. Can't Hav/Enforced Hav followed by Objective Hav.

*E. BEEN AFTER:*

24. L&N Who have you been after this life? to BD F/N item.
25. Check known before and if it reads:
26. R3R Triple.
27. Triple Ruds and Overts.
28. Can't Hav/Enforced Hav plus Objective Hav.

*F. PLANETS:*

29. L&N What planets have you known before this lifetime? to BD F/N item.
30. R3R Triple.
31. Triple Ruds and Overts.
32. Can't Hav/Enforced Hav plus Objective Hav.
33. D of P Interview the person AFTER the RD is "complete" to be sure the person is now all right (not PTS).

### REPAIR

Auditor errors during the RD are handled with L4BR, L3RD, GF Method 5 and handle, C/S 53 if necessary.

A really big snarl-up on the RD that won't clear up is handled with HCO B 16 Apr 72, "PTS RD Correction List".

If pc gets ill or rollercoasters after the RD is complete the PTS RD Correction List HCO B 16 Apr 72 is done and whatever was missed is cleared up.

### SUMMARY

The PTS RD as revised is very direct and powerful. The L&N blows each aspect apart. Don't miss on it with auditor flubs. Get it drilled thoroughly before it is delivered.

**ROCK SLAMS AND ROCK SLAMMERS**

A lot of controversy has shown up this year on the subject of R/Ses and R/Sers. I thought I'd better write an issue on the subject to clarify it. The research on this was actually done years ago.

R/Ses

An R/S or Rock Slam is defined as a crazy irregular slashing motion of the needle. It can be as narrow as one inch or more than a full dial in width, but it's crazy! It slams back and forth. It is actually quite startling to see one. IT IS VERY DIFFERENT FROM OTHER METER PHENOMENA.

Recently Auditors arriving on Flag were found not to know what an R/S was but were calling Dirty Needles, Dirty Reads, Rocket Reads, even Ticks as R/Ses. That comes from never having been trained on what an R/S is and never having seen one. R/SES ARE UNIQUE IN APPEARANCE.

Actually this is quite a serious matter because pcs get labelled as R/Sers and get run on Evil Purposes connected with this "R/S" that isn't one. You can really foul up a pc that way, believe me.

A real R/S also has a crazy meter. It doesn't read then it does. This happens because the meter reads just below a pc's reality. If the pc has no reality on the subject, then the meter won't read.

So you get a faulty meter. It doesn't read on what it should, then it reads, then it doesn't.

**ROCK SLAMMERS**

In a group of 400, the actual percentage of R/Sers is low. It's about 8 in 400, or 2-2<sup>1</sup>/<sub>2</sub>%. Those figures should seem familiar. They are the same percentage for SPs. And that gives you a clue to the identification of an R/Ser.

Where requirements for Scn or SO Orgs have been established for R/Ses they apply to the 2-2<sup>1</sup>/<sub>2</sub>% of real R/Sers as these are also considered security risks for staff purposes.

These people can of course be salvaged as pcs using Expanded Dianetics. Letting them on staff could be disastrous, however.

**CHECKLIST**

To assist you in the identification of R/Sers I have done a complete checklist of characteristics and their references.

This checklist is to be used whenever a C/S is called upon to inspect a folder to determine whether a person is an R/Ser.

1. The R/Ses reported are actual R/Ses and not some other read or broken meter leads, a dusty or worn TA or Trim "pot", or cans in contact with metal such as rings, bracelets, etc.

Ref: *E-Meter Essentials; The Book of E-Meter Drills; The Book Introducing the E-Meter*; HCO B 8 Nov 62, "Somatics—How to Tell Terminals and Opposition Terminals", pp. 2 & 4; HCO B 6 Dec 62, "R2-10, R2-12, 3GAXX"; BTB 14 Jan 63, "Rings Causing 'Rock Slams' "; HCO B False TA Series 24 Oct 71, 12 Nov 71R, 15 Feb 72, 18 Feb 72, 29 Feb 72R, 23 Nov 73.

2. R/Ses have to do with Scientology or one or more areas of the old Scientology List One found in *The Book of E-Meter Drills*.

Ref: *The Book of E-Meter Drills*; HCO B 5 Dec 62, "2-12, 3GAXX, 3-21 and Routine 2-10 Modern Assessment"; HCO B 23 Nov 62, "Urgent—Routine Two-Twelve"; HCO B 12 Sept 62, "Security Checks Again".

3. Pc is Slow or No Case Gain. Also is in a chronically nattery or critical state.

Ref: HCO B 23 Nov 62, "Routine Two-Twelve"; HCO B 5 Dec 62, "2-12, 3GAXX, 3-21 and Routine 2-10 Modern Assessment"; HCO B 6 Dec 62, "R2-10, R2-12, 3GAXX"; HCO B 28 Nov 70, C/S Series 22, "Psychosis"; BPL 31 May 71RA, PTS/SP Checksheet and mat'ls.

4. Pc chronically ill or who acts most "PTS". This can be suppressed and hidden from view, however.

Ref: HCOPL 15 Nov 70R, "HCO and Confessionals"; HCOB 28 Nov 70, C/S Series 22, "Psychosis"; PTS/SP Pack.

5. Pc's product is consistently an overt act and his activities destructive to others.

Ref: HCOPL 14 Nov 70, Org Series 14, "The Product as an Overt Act"; PTS/SP Pack; *HCO Manual of Justice*.

6. Pc's behavior or condition or OCA classifies as psychotic.

Ref: HCO B Ex Dn Series and tapes; HCO B 28 Nov 70.

Where the answers to this checklist are yes you have an R/Ser. HCO handles and Qual programs them for rehabilitation.

#### PCs WHO R/S

Pcs who R/S are given Ex Dn. This does not change even though the pc is not an R/Ser. See HCO B C/S Series 93.

Where a pc R/Ses he will have Evil Purposes and be on a succumb as a result. R/Ses indicate an area of psychosis which will ruin the pc's life if allowed to go unhandled.

#### SUMMARY

This HCO B in no way changes Ex Dn as a requirement for R/Ses or makes it ok not to handle them.

Staff concerned must be able to identify an R/Ser which is different from someone with an R/S.

I thought you should have this data and hope it clears up any remaining confusion in the area.

**THE TECHNICAL BREAKTHROUGH OF 1973!**

**THE INTROSPECTION RD**

(Changes HCO B 23 Jan 1974,  
“The Introspection RD”.)

I have made a technical breakthrough which possibly ranks with the major discoveries of the Twentieth Century. It is certainly the greatest advancement of 1973 and is now being released after a final wrap-up of research. It is called the Introspection Rundown.

The purpose of the Introspection RD is to locate and correct those things which cause a person to fixate his attention *inwardly*, on himself or his bank. This RD extroverts the person so that he can see his environment and therefore handle and control it.

RESEARCH

In 1970 the actual cause of PSYCHOSIS was isolated (as given in HCO B C/S Series 22, “Psychosis”, 28 November 1970). In the ensuing years this has been proven beyond doubt to be totally correct.

But what is a *psychotic break*?

Man has never been able to solve the psychotic break. In fact, human beings are actually afraid of a person in a psychotic break and in desperation turn to psychiatry to handle.

Psychiatry, desperate in its turn, without effective tech, resorts to barbarities such as heavy drugs, ice picks, electric and insulin shock which half kill the person and only suppress him. The fact remains there has never been a cure for the psychotic break *until now*.

The key is WHAT CAUSED THE PERSON TO INTROSPECT *BEFORE* THE PSYCHOTIC BREAK.

The breakthrough was made on a person who, after a series of wrong indications, went into a full-blown psychotic break—violence, destruction and all.

The psychiatrist at this point would have sharpened up his ice pick, filled his syringes with the most powerful (and deadly) drugs he could find and turned up the volts. His “handling” would have been a final destruction of the individual.

What *was* done was an auditor went into the room, sat the person down and corrected the last severe point of wrong indication. Subsequent times of wrong indication in his life were cleared up, the person came out of the psychotic break and into p.t.

THIS MEANS THE LAST REASON TO HAVE PSYCHIATRY AROUND IS GONE.

The psychotic break, the last of the “unsolvable” conditions that can trap a person, has been solved.

And it’s quite simple, really.

THEORY

Def. INTROSPECTION: “(L. from *introspicere*, to look within) a looking into one’s own mind, feelings, reactions, etc.; observation and analysis of oneself.” *Webster’s New World Dictionary*.

Def. INTROVERSION: “(from *intro-* + L. *vertere*, to turn) 2.... a tendency to direct one’s interest upon oneself rather than upon external objects or events.” *Webster’s New World Dictionary*.

The essence of the Introspection RD is looking for and correcting all those things which CAUSED the person to look inward worriedly and wrestle with the mystery of some incorrectly designated error. The result is continual inward looking or self auditing without relief or end.

In a normal person this becomes a diminished activity, unhappiness or illness. In *an R/Ser* this becomes insanity and a psychotic break occurs at the last severe point of wrong indication.

The pc who originates to the Examiner about his case or writes notes to the C/S or auditor is introverted and should have this RD.

### AUDITOR TRAINING

Auditors selected to do this RD must have recently done a HARD TRs Course and the Anti-Q&A materials.

They *must* be able to recognize a ROCK SLAM, which is a particular E-Meter phenomenon. They must be Class IV Expanded Dianetics auditors of proven skill on routine cases. They must not themselves be R/Sers. (The last requisite is waived in a self-salvage co-audit group where all R/S.)

They need *flawless* TRs, no Q&A. This Rundown is very simple but cannot be flubbed, as that will compound the errors and cause further introspection in the pc. It is better not to deliver this RD than to flub *any* part of it. C/Ses take note. It is an Ethics Offense to attempt this Rundown without the auditor having done the prerequisite training and a further offense for an auditor to flub on it.

### STEPS OF THE RD (Steps 0 and 00 are for a person in a psychotic break, not a normal person.)

Put this checklist on inside front cover of folder as a pgm.

- 0. On a person in a psychotic break isolate the person wholly with all attendants *completely* muzzled (no speech). \_\_\_\_\_
- 00. Give Vitamins (B complex, including niacinamide) and minerals (calcium and magnesium) to build the person up. \_\_\_\_\_

\* \* \*

- 1. Locate by study or research of the person’s case *or* via associates or 2-way comm the last severe point of introversion just prior to the current psychotic break or illness. There may be several severe points of introversion, prior or subsequent to the one that triggered the break or illness. These points are identified by their upsetting or worrisome effect on the pc. Each is noted down for handling. \_\_\_\_\_
- 2. On each point, indicate the substance of it as a point of introversion to release the By-Passed Charge. Each should BD and F/N. First point indicated to F/N. \_\_\_\_\_
- 2B. Second point indicated to F/N. \_\_\_\_\_
- 2C. Third point indicated to F/N. \_\_\_\_\_

In the case of an out-list, the fact of a wrong item would be indicated and the list corrected by the Laws of L&N.

- 3. Get the wording of each point stated by the pc as an item (i.e., “What would you call such an incident?”) and its read and handle by 2wc each flow E/Sim to F/N. First point 2wc’d F-1 230 to F/N. \_\_\_\_\_
- 3A. Second point 2wc’d F-1230 to F/N. \_\_\_\_\_

- 3B. Third point 2wc'd F-1230 to F/N. \_\_\_\_\_
- 4. Verify/Correct all L&N lists. \_\_\_\_\_
- 5. Verify/Correct all Why "lists", PTS Interviews, 3 May PLs per C/S Series 78. \_\_\_\_\_
- 6. R3R Quad item found in No. 3. ("Locate an incident where.....") \_\_\_\_\_
- 6A. L&N for the Intention behind the *subject* in No. 3. Verify Q for read before listing. \_\_\_\_\_
- 6B. R3R Quad the Intention. \_\_\_\_\_
- 6C. R3R Quad, L&N Intention & R3R Quad any other items found (No. 3A, 3B, etc.). \_\_\_\_\_
- 7. Clear the words "Introversion", "Introspection", "Extroversion". \_\_\_\_\_
- 8. ARC BREAKS HANDLING. \_\_\_\_\_
- 8A. 2wc Has another ARC Broken you? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8B. 2wc Have you ARC Broken another? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8C. 2wc Have others ARC Broken anyone else? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8D. 2wc Have you ARC Broken yourself? ARCU CDEINR E/S to F/N. \_\_\_\_\_
- 8E. 2wc Has anyone ever made you feel you had an ARC Break when you didn't? E/S to F/N. \_\_\_\_\_
- 8F. 2wc Have you ever made anyone else feel he had an ARC Break when he didn't? E/S to F/N. \_\_\_\_\_
- 8G. 2wc Have others ever made anyone else feel he had an ARC Break when he didn't? E/S to F/N. \_\_\_\_\_
- 8H. 2wc Have you ever made yourself feel you had an ARC Break when you didn't? E/S to F/N. \_\_\_\_\_
- 8I. R3R Quad the item. \_\_\_\_\_
- 8J. L&N for the Intention behind "the forcing of upsets on people who don't have them". \_\_\_\_\_
- 8K. R3R Quad the Intention, in No. 8J. \_\_\_\_\_
- 9. WITHHOLDS HANDLING. \_\_\_\_\_
- 9A. 2wc Are you withholding something from anyone? E/Sim to F/N. \_\_\_\_\_
- 9B. 2wc Is anyone else withholding something from you? E/Sim to F/N. \_\_\_\_\_
- 9C. 2wc Are others withholding something from anyone else? E/Sim to F/N. \_\_\_\_\_
- 9D. 2wc Are you withholding something from yourself? E/Sim to F/N. \_\_\_\_\_
- 9E. 2wc Has anyone demanded W/Hs you didn't have? E/Sim to F/N. \_\_\_\_\_
- 9F. 2wc Have you demanded withholds of anyone else they didn't have? E/Sim to F/N. \_\_\_\_\_
- 9G. 2wc Have others demanded withholds of anyone else they didn't have? E/Sim to F/N. \_\_\_\_\_

- 9H. 2wc Have you demanded W/Hs from yourself that you didn't have?  
E/Sim to F/N. \_\_\_\_\_
- 9I. R3R Quad "demanded non-existent W/Hs from .....". \_\_\_\_\_
- 9J. L&N, Clear Q thoroughly and verify for read first, what  
purpose would be behind "the demanding of non-existent  
W/Hs from others"? \_\_\_\_\_
- 9K. R3R Quad the item in No. 9J. \_\_\_\_\_
10. PROBLEMS HANDLING. \_\_\_\_\_
- 10A. 2wc Has another given you a problem? E/Sim to F/N. \_\_\_\_\_
- 10B. 2wc Have you given another a problem? E/Sim to F/N. \_\_\_\_\_
- 10C. 2wc Have others given a problem to anyone else? E/Sim to F/N. \_\_\_\_\_
- 10D. 2wc Have you given yourself a problem? E/Sim to F/N. \_\_\_\_\_
- 10E. 2wc Has anyone ever made you feel you had a problem when  
you didn't? E/Sim to F/N. \_\_\_\_\_
- 10F. 2wc Have you ever made anyone else feel he had a problem when  
he didn't? E/Sim to F/N. \_\_\_\_\_
- 10G. 2wc Have others ever made anyone else feel he had a problem  
when he didn't? E/Sim to F/N. \_\_\_\_\_
- 10H. 2wc Have you ever made yourself feel you had a problem when  
you didn't? E/Sim to F/N. \_\_\_\_\_
- 10I. R3R Quad the item. \_\_\_\_\_
- 10J. L&N for the Intention behind "the giving of problems to people  
that don't belong to them". \_\_\_\_\_
- 10K. R3R Quad the Intention, in No. 10J. \_\_\_\_\_
11. OVERTS HANDLING. \_\_\_\_\_
- 11A. 2wc Has anyone else committed overts on you? E/Sim to F/N. \_\_\_\_\_
- 11B. 2wc Have you committed overts on anyone else? Get what, E/Sim  
to F/N. \_\_\_\_\_
- 11C. 2wc Have others committed overts on anyone else? E/Sim to F/N. \_\_\_\_\_
- 11D. 2wc Have you committed any overts on yourself? E/Sim to F/N. \_\_\_\_\_
- 11E. 2wc Has anyone ever accused you of something you didn't do?  
E/Sim to F/N. \_\_\_\_\_
- 11F. 2wc Have you ever accused anyone else of something he didn't do?  
E/Sim to F/N. \_\_\_\_\_
- 11G. 2wc Have others ever accused anyone else of something he didn't  
do? E/Sim to F/N. \_\_\_\_\_
- 11H. 2wc Have you ever accused yourself of something you didn't do?  
E/Sim to F/N. \_\_\_\_\_
- 11I. R3R Quad the item. \_\_\_\_\_
- 11J. L&N for the Intention behind "the accusing of someone of non-  
existent overts". \_\_\_\_\_

- 11K. R3R Quad the Intention, in No. 11J. \_\_\_\_\_
12. NOT SAYING. \_\_\_\_\_
- 12A. 2wc Are you not saying something about someone else or something? Get what, E/Sim to F/N. \_\_\_\_\_
- 12B. 2wc Is anyone not saying something about you? E/Sim to F/N. \_\_\_\_\_

- 16F. L&N for the Intention behind “the unjust invalidating of others” \_\_\_\_\_
- 16G. R3R Quad the Intention, in No. 16F. \_\_\_\_\_
17. FALSE VALIDATION HANDLING. \_\_\_\_\_
- 17A. 2wc Has another ever validated you for something you *didn't deserve*? E/S to F/N. \_\_\_\_\_
- 17B. 2wc Have you ever validated anyone else for something *he didn't deserve*? E/S to F/N. \_\_\_\_\_
- 17C. 2wc Have others ever validated anyone else for something *they didn't deserve*? E/S to F/N. \_\_\_\_\_
- 17D. 2wc Have you ever validated yourself for something you *didn't deserve*? E/S to F/N. \_\_\_\_\_
- 17E. R3R Quad the item. \_\_\_\_\_
- 17F. L&N for the Intention behind “the false validating of others”. \_\_\_\_\_
- 17G. R3R Quad the Intention, in No. 17F. \_\_\_\_\_
18. “HIT” FOR NO REASON. \_\_\_\_\_

- 18A. 2wc Has anyone “hit” you too hard for no reason? E/S to F/N. \_\_\_\_\_
- 18B. 2wc Have you “hit” anyone else too hard for no reason? E/S to F/N. \_\_\_\_\_
- 18C. 2wc Have others “hit” anyone else too hard for no reason? E/S to F/N. \_\_\_\_\_
- 18D. 2wc Have you gotten yourself “hit” too hard for no reason? E/S to F/N. \_\_\_\_\_
- 18E. R3R Quad the item. \_\_\_\_\_
- 18F. L&N for the Intention behind “the ‘hitting’ of others unfairly”. \_\_\_\_\_
- 18G. R3R Quad the Intention, in No. 18F. \_\_\_\_\_
- 19. INVALIDATED BEINGNESS HANDLING. \_\_\_\_\_
- 19A. 2wc Has anyone ever challenged or questioned who you were?  
E/S to F/N. \_\_\_\_\_
- 19B. 2wc Have you ever challenged or questioned anyone else’s identity?  
E/S to F/N. \_\_\_\_\_
- 19C. 2wc Have others ever challenged or questioned anyone else’s identity?  
E/S to F/N. \_\_\_\_\_
- 19D. 2wc Have you ever challenged or questioned your identity?  
E/S to F/N. \_\_\_\_\_
- 19E. R3R Quad the item. \_\_\_\_\_
- 19F. L&N for the Intention behind “the invalidating of others’ identity”. \_\_\_\_\_
- 19G. R3R Quad the Intention, in No. 19F. \_\_\_\_\_
- 20. INVALIDATED INTENTIONS HANDLING. \_\_\_\_\_
- 20A. 2wc Has anyone ever challenged or questioned your intentions? E/S  
to F/N. \_\_\_\_\_
- 20B. 2wc Have you ever challenged or questioned anyone else’s intentions?  
E/S to F/N. \_\_\_\_\_
- 20C. 2wc Have others ever challenged or questioned anyone else’s intentions?  
E/S to F/N. \_\_\_\_\_
- 20D. 2wc Have you ever challenged or questioned your own intentions?  
E/S to F/N. \_\_\_\_\_
- 20E. R3R Quad “misinterpreted intentions”. \_\_\_\_\_
- 20F. L&N for the Intention behind “the invalidating of the intentions of  
others”. \_\_\_\_\_
- 20G. R3R Quad the Intention, in No. 20F. \_\_\_\_\_
- 21. OBJECTIVE HAVINGNESS. \_\_\_\_\_

An HC List could be added here if the pc’s “think” is still weird.

**NOTE: ITEMS THAT DON’T READ WON’T RUN. DON’T RUN OR LIST Q’s THAT DON’T READ OR YOU’LL REINTROVERT THE PC.**

Frequent D of P Interview is vital whenever the case looks like it is not rapidly progressing. Also a quick assessment may be needed as a separate action to isolate possible charged areas of introspection.

At any time after Step 2 Objective Havingness should be done at session end. If one of the items in Steps 3-20 turns out to be false the pc will introvert further. In such a case indicate the fact of it

having been unnecessary and get an F/N. Then run Objective Havingness. If the TA goes high (or low) and won't come into range, assess a C/S 53RH and handle.

In the case of a pc in a psychotic break, the C/S would have to locate the last severe wrong indication, indicate the fact to the pc and get it corrected (as with a wrong item) as the first action.

## EXTROVERSION

Def. EXTROVERSION: “. . . Means nothing more than being able to look outward ....” “An extroverted personality is one who is capable of looking around the environment ....” “A person who is capable of looking at the world around him and seeing it quite real and quite bright is of course in a state of extroversion.” (*Problems of Work.*)

The end phenomena of the Introspection RD is the person extroverted, no longer looking inward worriedly in a continuous self-audit without end.

The EP on a person in a psychotic break is the end of the psychotic break.

The RD is *very* simple and its results are magical in effectiveness. Flubs can wreck it so don't permit them.

You have in your hands the tool to take over mental therapy in full. You need not fear the insane or the psychotic break any longer.

Here also is the cure for the continual self-auditing pc who is dug into his bank. It works on all pcs in fact with rave results.

Do it flawlessly and we all win.

THIS PLANET IS OURS.

### **DRUGS, MORE ABOUT**

Reference: HCO B of 28 August 1968,  
Issue II, "Drugs".

### **WITHDRAWAL SYMPTOMS**

The most wretched part of coming off hard drugs is the reaction called "withdrawal symptoms". People go into convulsions.

These are so severe that the addict becomes very afraid of them and so remains on drugs. The reaction can also produce death.

In the reference HCO Bulletin above, B1 is mentioned as a means of easing convulsions.

Actually, practice since 1968 has shown that "Objective TRs", a Scientology process described in detail in HCO Bs 11 June 1957, "Training and CCH Processes", 15 July 1971, C/S Series 48R, "Drug Handling" and BTB 25 Oct 1971R, Issue II, "The Special Drug Rundown", handle withdrawal symptoms when properly used. Great success has been achieved with them.

There is another supplementary way of handling withdrawal symptoms. This does not replace "Objective TRs" and at this writing is theoretical, being in a research phase. But so terrible can be withdrawal symptoms and so lacking in success has the medical and psychiatric field been, that the data should be released.

Muscular spasms are caused by lack of Calcium.

Nervous reactions are diminished by Magnesium.

Calcium does not go into solution in the body and is not utilized unless it is in an acid.

Magnesium is alkaline.

Working on this in 1973, for other uses than drug reactions, I found the means of getting Calcium into solution in the body, along with Magnesium so that the results of both could be achieved.

This was the "Cal-Mag Formula".

### **CAL-MAG FORMULA**

1. Put one level tablespoon of Calcium Gluconate in a normal sized glass.
2. Add  $\frac{1}{2}$  level teaspoon of Magnesium Carbonate.
3. Add I tablespoon of cider vinegar (at least 5% acidity).
4. Stir it well.

5. Add  $\frac{1}{2}$  glass of boiling water and stir until all the powder is dissolved and the liquid is clear. (If this doesn't occur it could be from poor grade or old Magnesium Carbonate.)
6. Fill the remainder of glass with lukewarm or cold water and cover.

They will stay good for 2 days.

It can be made wrongly so that it does not dissolve. Variations from the above produce an unsuccessful mix that can taste pretty horrible.

Anything from 1 to 3 glasses of this a day, with or after meals, REPLACES ANY TRANQUILIZER. It does not produce the drugged effects of tranquilizers (which are quite deadly).

The application to handle muscular spasms and tics is now quite well established.

Using this to combat withdrawal symptoms is experimental.

The theory is that withdrawal symptoms are muscular spasms.

The matter should be given tests where persons suffering from withdrawal symptoms are available.

This does not supplant "Objective TRs". These work.

But it may be that "Cal-Mag" would assist those suffering where no competent auditing is available.

As Calcium and Magnesium are minerals, not drugs, they form no barrier to auditing.

*C/S Series 53RI*

**SHORT HI-LO TA ASSESSMENT C/S**

This is the basic prepared list used by Auditors to get a TA up or down into normal range. A GF Method 5 may also be used after TA is in normal range to get pc's case handled better.

\_\_\_\_\_ PC Name \_\_\_\_\_ Date

1. Assess pc Method 5 on this sheet. (Go down the list calling off the items to the pc, watching the meter. Mark any Tick, SF, F., LFBD [to what TA], speeded rise or Blow Up.) *NOTE: A C/S 53RH should be reassessed and all reads handled until it F/Ns on assessment.*

2. Use only the small falls or falls or BDs. The rises will however show where mass lies.
- A. If A or any of the A Group, and the pc has *had* an Int RD, do an Int RD Correction List, and handle the reads. (HCO B 29 Oct 71R, Revised 14 May 74.)  
  
If the pc *has never had an Int RD*, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.
- B. If any of these read, do an L4BR on the earliest lists you can find that have not been corrected. Lacking these do an L4BR in general. You can go over an L4BR several times handling each read to F/N until the whole L4BR gives nothing but F/Ns. Handle a Wrong Why or Wrong Indication or Wrong PTS Item per C/S Series 78.
- C. If any of these, handle with 2wc and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 18 F/Ns. On overts and withholds, get what, and E/S to F/N. On out ruds, find which rud and handle. (See GF40RR HCO B 30 June 71, Revised 13 Jan 72.) Feel sad, handle the ARC Break. (Feel sad = ARC Brk of long duration.)
- D. Rehab releases on each "drug" taken to F/N. Complete the Drug RD per C/S Series 48R after handling all reads on this assessment. If pc has had a Drug RD, do L3RD on it, and handle.
- E. If any of these, do L3RD and handle according to what is stated to do on L3RD.
- F. Clean up any protest and inval and rehab to F/N.

- G. Find out what it is. If Yogi or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do L1C on *that* period of pc's life.
- H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If Study errors, 2wc E/S to F/N, and add a Study Correction List to the pc's program.
- I. False TA is wrong cans. Use HCO Bs 24 Oct 71, 12 Nov 71R, 15 Feb 72, 18 Feb 72, 29 Feb 72R, 23 Nov 73, all on False TA. Then clean up the bypassed charge with (I) Assess for best read (a) TA worries, (b) F/N worries. (2) Then 2wc times he was worried about (item) E/S to F/N. (3) Rehab any overruns due to False TA obscuring F/Ns.
- J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. An F/N can be obscured and mistaken for a read if Sensitivity too high. These items are all 2wc E/S to F/N. Auditors who made them need Cramming badly or retread.
- K. Can't have or Hav. Find correct Havingness process and remedy.
- L. PTS or Suppressed. Check for SP or get a full PTS RD.
- M. Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow, if qualified).
- N. 2wc to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2wc to F/N and get further C/S instructions for handling if necessary.
- O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate it if no F/N on first. If false TA handle per I above.
- P. *INDICATE and 2wc to F/N.*

General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.

Refers to HCO PL 15 Nov 74,  
"CFs, ARC Breaks in"

### STUDENT REHABILITATION LIST

TO BE DONE ONLY BY AN AUDITOR WHO  
CAN MAKE PREPARED LISTS READ.

This list is for use by ARC Brk Regs and Auditors, Tours personnel, Tech and Qual when recovering blown Students or fixing up blowy Students or Students in trouble or Students who failed in practice.

By "blown Students" we mean Students who have left the org incomplete on their course, Students who have ceased their studies and are in the org, Students who have not gone on to their next service, staff who do not attend or have stopped going to study for any reason or Auditors in the field who have failed in practice.

### ASSESSMENT

This list can be assessed Method 3 or Method 5 depending on the severity of the upset.

The EP is a Student who is no longer upset or blowy and ready to return to his service or course and does.

1. THERE WERE MISUNDERSTOOD WORDS. \_\_\_\_\_  
(Find and clear them, *each* to F/N.)
2. NO HELP OR WORD CLEARING FROM THE SUPERVISOR. \_\_\_\_\_  
(2wc which, if Wd Clg find out where he was having trouble and use WC M4 to clear it up. Take to F/N.)
3. INTERFERENCE FROM THE SUPERVISOR THAT STOPPED \_\_\_\_\_  
YOU FROM GETTING ON.  
(2wc E/S to F/N. Clean up any protest.)
4. PERSONAL OUT ETHICS RESULTING IN A W/H. \_\_\_\_\_  
(2wc what, handle as a W/H.)
5. SIMPLY BOOTED OFF FOR REASONS BEST KNOWN TO \_\_\_\_\_  
GOD OR REGISTRARS.  
(2wc E/S to F/N.)
6. DISPUTE OVER FEES. \_\_\_\_\_  
(2wc E/S to F/N.)
7. YOU WERE GIVEN A WRONG WHY. \_\_\_\_\_  
(L4BR and handle.)
8. TOLD YOU WERE PTS AND YOU WEREN'T. \_\_\_\_\_  
(Indicate it. 2wc E/S to F/N. L4BR if any trouble.)
9. DIDN'T FULLY CLEAR EACH WORD. \_\_\_\_\_  
(2wc E/S to F/N. Clear any Mis-U words.)

10. HAVING TO CLEAR WORDS YOU ALREADY UNDERSTOOD. \_\_\_\_\_  
(2wc E/S to F/N.)
11. ARC BRKS ON COURSE. \_\_\_\_\_  
(ARCU CDEINR E/S to F/N. Watch out for MWHs.)
12. PROBLEMS ON COURSE. \_\_\_\_\_  
(2wc E/S to F/N.)
13. ON COURSE FOR SOME OTHER REASON THAN YOU \_\_\_\_\_  
STATED.  
(2wc what, E/S to F/N.)
14. SCN DOWNGRADED TO YOU. \_\_\_\_\_  
(2wc for details, find out who, PTS Interview if necessary.)
15. SCN PEOPLE LIED ABOUT TO YOU. \_\_\_\_\_  
(2wc E/S to F/N. Find out who. PTS Interview if necessary.)
16. OUT 2D. \_\_\_\_\_  
(2wc E/S to F/N. Handle as a W/H.)
17. DIDN'T PAY FOR THE COURSE OR SOME SERVICE. \_\_\_\_\_  
(2wc E/S to F/N. Handle as a W/H.)
18. SOMEONE KEPT AFTER YOU FOR MONEY. \_\_\_\_\_  
(2wc E/S to F/N.)
19. THERE WAS A FALSE ATTESTATION. \_\_\_\_\_  
(2wc E/S to F/N. Handle as a W/H.)
20. FALSE EXAM. \_\_\_\_\_  
(2wc E/S to F/N. Handle as a W/H.)
21. COULDN'T APPLY THE MATERIALS. \_\_\_\_\_  
(2wc E/S to F/N.)
22. COULDN'T MASTER A METER. \_\_\_\_\_  
(2wc, find out what he didn't understand about it and clear it up  
to F/N.)
23. NOBODY TO AUDIT. \_\_\_\_\_  
(2wc E/S to F/N.)
24. PREVENTED FROM AUDITING. \_\_\_\_\_  
(2wc E/S to F/N.)
25. YOU WERE CONFUSED. \_\_\_\_\_  
(2wc and clear it up to F/N.)
26. THINGS YOU DIDN'T UNDERSTAND. \_\_\_\_\_  
(2wc what, clear it up to F/N.)
27. YOU HAD DISAGREEMENTS. \_\_\_\_\_  
(Find out what, find the Mis-U words and clear to F/N.)
28. AN EARLIER SIMILAR SUBJECT WAS MISUNDERSTOOD. \_\_\_\_\_  
(2wc what subject, find out what word in it was Mis-U and clear it  
up. Clear each word to F/N.)
29. EARLIER FAILED COURSES. \_\_\_\_\_  
(2wc E/S to F/N.)
30. DIDN'T USE WORD CLEARING. \_\_\_\_\_  
(2wc E/S to F/N. Clear any words to F/N where he should have.)

31. NO METHOD 1 WORD CLEARING.  
(2wc E/S to F/N.) \_\_\_\_\_
32. INTERRUPTIONS.  
(2wc E/S to F/N.) \_\_\_\_\_
33. PREVENTED FROM STUDYING.  
(2wc E/S to F/N.) \_\_\_\_\_
34. ADDED TO YOUR CHECKSHEET.  
(2wc E/S to F/N.) \_\_\_\_\_
35. MISSING MATERIALS.  
(2wc E/S to F/N.) \_\_\_\_\_
36. NO MATERIALS.  
(2wc E/S to F/N.) \_\_\_\_\_
37. NO DICTIONARY.  
(2wc E/S to F/N.) \_\_\_\_\_
38. TECH TERMS YOU DIDN'T GET.  
(Find out what. Clear to F/N.) \_\_\_\_\_
39. COULDN'T FIND THE MATERIALS.  
(2wc E/S to F/N.) \_\_\_\_\_
40. TAPE PLAYERS NOT AVAILABLE.  
(2wc E/S to F/N.) \_\_\_\_\_
41. COULDN'T GET A METER.  
(2wc E/S to F/N.) \_\_\_\_\_
42. FORCED TO HAVE A TWIN. (2wc E/S to F/N.) \_\_\_\_\_
43. BAD COACHING. (2wc E/S to F/N.) \_\_\_\_\_
44. NO PRACTICAL. (2wc E/S to F/N.) \_\_\_\_\_
45. NO SUPERVISOR. (2wc E/S to F/N.) \_\_\_\_\_
46. NO PLACE TO STUDY. (2wc E/S to F/N.) \_\_\_\_\_
47. STUDIED UNDER DURESS. (2wc E/S to F/N.) \_\_\_\_\_
48. UNREAL QUOTAS SET. (2wc E/S to F/N.) \_\_\_\_\_
49. MADE TO DO TRs TOO OFTEN. (2wc E/S to F/N.) \_\_\_\_\_
50. SUPERVISOR OR SOMEONE GAVE VERBAL TECH OR  
INTERPRETED MATERIALS.  
(2wc E/S to F/N.) \_\_\_\_\_
51. LOTS OF ADVICE NOT IN HCO Bs OR TAPES.  
(2wc E/S to F/N.) \_\_\_\_\_
52. YOU WERE ON THE WRONG COURSE.  
(2wc E/S to F/N.) \_\_\_\_\_
53. SOMEONE MAD AT YOU ON COURSE.

HCO BULLETIN OF 4 AUGUST 1971R  
REVISED 26 NOVEMBER 1974

Remimeo  
Dept 13  
Qual Div  
Qual Bu

### POST PURPOSE CLEARING

(This HCO B is the basic action of the  
Post Purpose Clearing Unit of Div V,  
Qual Div, or by Auditors as a technology.)

An essential part of HATTING as done in HCO is to get the person's POST PURPOSE CLEARED by an auditor.

### INSTANT PURPOSE CLEARING

HCO usually tells the person what the purpose of the post is and certainly the staff member's seniors would.

This action is not metered and goes along with instant hatting. It is not done by an auditor.

"George, the purpose of your post is to\_\_\_\_\_. Any questions?" Questions are answered and clarified.

Giving the person on the post the purpose is a basic hatting step.

### FULL POST PURPOSE CLEARING

This requires an auditor, an E-Meter, and is done in session.

Usually this is done after mini-hatting and after some experience with the post. It is NOT done in this full fashion before the person has any knowledge of the post. It can also be done during or at the end of full hatting.

But the sooner it is done after mini-hatting and some weeks' experience on the post the more successful it will be.

### AUDITOR QUALIFICATIONS

The auditor doing Post Purpose Clearing must be expert with:

1. TRs
2. Metering
3. Code
4. 2-Way Comm
5. Flying Rudiments
6. L&N.

## ADMIN

A Post Purpose Clearing is given full worksheet and report handling and person goes to Examiner.

A record of the session is kept with others done in the PPC RECORD BOOK with especially noted *any Rock Slam*.

## PC

The pc must not be in an Ethics cycle, must be rested, not hungry and not ill or on drugs or medication.

ANY RINGS ON THE PC'S HANDS MUST BE REMOVED AS THEY CAUSE A FALSE ROCK SLAM.

## HAT FOLDER

Staff Member must bring hat folder to the PPC session so if there is any confusion on purposes in it they can be cleared from the hat folder.

## CASE FOLDER

Case folder of the pc must also be collected and examined before session. This is repeated in the Rundown so it won't be missed.

## POST PURPOSE CLEARING STEPS

- PPC 1 — Get the staff member's folder. Verify that he is not in the middle of some processes, repair or Major Grade. If so, don't touch. Get C/S OK.
- PPC 2 — Fly a rud or do a C/S 53RI if TA high or low. Note that it WAS high on the session worksheet. If the TA does not come down refer the case to Staff C/S and do not proceed. Case would need Folder Error Summary and a Hi-Lo TA List IX.
- PPC 3 — 2wc about person's post. Be alert to problems or w/hs and if these seem to be there do E/S to F/N on Problems and/or E/S to F/N on w/hs.
- PPC 4 — 2wc "What do you think is your post?" to F/N. If pc can't tell you resort to his hat and clear up confusions to F/N.
- PPC 5 — 2wc "Tell me about opportunities you would have on your post." This is carried to F/N. If no F/N treat it as a w/h and ask if there's anything pc isn't telling you. Carry any w/h to F/N. Then check the question again and get the F/N back by 2wc or E/S to F/N. (If you start to clear w/hs in the middle of the Q then the w/hs will F/N but the Q hasn't yet so must be F/Ned also. Overts may come up as well as w/hs and if so F/N them by E/S.) Pc should finish this step with F/N, Cog and GIs.
- PPC 6 — 2wc "How does your job align (compare) with what you incline (would like) to do?" Get any conflicts into view if not clean. Go E/S to F/N if there is conflict. If no F/N despite Itsa on conflict ask for overts or withholds and carry this to F/N. Check Q again to be sure it F/Ns.
- PPC 7 — Go over hat mat'ls covering pc's post purpose. Ask him how does it seem. Get an F/N or clear any confusions up to F/N.
- PPC 8 — L&N, "What do you think is the purpose of your post?" to BD F/N item.

PPC 9 — 2wc “How does this purpose tie in with the purpose of your Division?” Clean this up if there’s doubt. Use folders or OEC books. Be sure it’s cleaned up to F/N.

PPC 10— 2wc “How does this purpose tie in with the purpose of the org?” Clean this up to F/N.

PPC 11— (Using PPC 8 purpose) “Then *is* (quote it) the purpose of your post?” Get a revision so it’s really it or accept it. Say, when it’s decided, “Then (quote) is the purpose of your post.”

PPC 12— 2wc “If your post was not done what would happen to the org?” Clean this up to F/N.

PPC 13— 2wc “How do you feel about accomplishing your post purpose?” Clean this up to F/N.

PPC 14— Thank pc and send to Examiner.

Complete worksheet.

Enter results in log.

Put the session report in pc’s folder.

---

Send a report to the E/O AND TO FLAG if the person Rock Slams and note it in the folder for pgming to include Ex Dn.

If you can get no satisfactory F/Ns and Cogs and VGIs or if Exam report is bad, DIRECT THE FACT TO THE ATTENTION OF THE HAS AND THE C/O AND THE CASE SUPER FOR IMMEDIATE CORRECTION. The Remedy is L4BR on the whole RD, L1C, C/S 53RI and do the clearing again.

---

Post Purpose Clearing counts as a completion for the Dept on an F/N at Examiner’s.

**TR 0—NOTES ON BLINKING**

WHO is doing the confronting? Are you a body? Or a thetan?

Students are trying to do an offshoot called *Blinkless TR 0*. There is no such thing. Sitting with any attention on the body just isn't confront—you aren't doing the drill right.

If your body blinks then OK—but if you are making it blink BY HAVING ATTENTION ON THE EYES then your TR 0 is out.

If the Supervisor came over and said, “Flunk, you blinked,” I wouldn't Q&A but continue doing TR 0 instead, because I didn't do it.

Excessive blinking shows the thetan is in his eyes. That's not TR 0.

Nervous muscles can be cured with Calcium-Magnesium.

The body should not interfere with your confront. Just don't use any part of it.

Cancels

HCO B 10 July 1964, Reissued 5 December 1974  
as Integrity Processing Series 6R

HCO B 10 July 1964, "Overts—Order of  
Effectiveness in Processing" remains  
as originally issued.

Cancels BTB 9 Dec 72,  
"Why Overts Work"

***Integrity Processing Series 6RA***

**EFFECTIVENESS OF OVERTS IN PROCESSING**

(The data in this Bulletin has been taken  
from HCO B 10 July 1964. It is useful in  
Integrity Processing.)

**ARC BREAKS**

The commonest cause of failure in running overt acts is "cleaning cleans" whether or not one is using a meter. The pc who really has more to tell doesn't ARC Break when the Auditor continues to ask for one but may snarl and eventually give it up.

On the other hand leaving an overt touched on the case and calling it clean *will* cause a *future* ARC Break with the Auditor.

"Have you told all?" prevents cleaning a clean. On the unmetered pc one can see the pc brighten up. On the meter you get a nice fall if it's true that all is told.

"Have I not found out about something?" prevents leaving an overt undisclosed. On the unmetered pc the reaction is a sly flinch. On a metered pc it gives a read.

A pc's *protest* against a question will also be visible in an unmetered pc in a reeling sort of exasperation which eventually becomes a howl of pure bafflement at why the Auditor won't accept the answer that that's all. On a meter, protest of a question falls on being asked for: "Is this question being protested?"

There is no real excuse for ARC Breaking a pc by:

1. Demanding more than is there or
2. Leaving an overt undisclosed that will later make the pc upset with the Auditor.

**WHY OVERTS WORK**

Overts give the highest gain in raising cause level because they are the biggest reason why a person restrains himself and withholds self from action.

Man is basically good. But the reactive mind tends to force him into evil actions. These evil actions are instinctively regretted and the individual tries to refrain from doing *anything* at all. The "best" remedy, the individual thinks, is to withhold. "If I commit evil actions, then my best guarantee for not committing is to do *nothing* whatever." Thus we have the "*lazy*", inactive person.

Others who try to make an individual guilty for committing evil actions only increase this tendency to laziness.

Punishment is supposed to bring about inaction. And it does. In some unexpected ways.

However, there is also an inversion (a turnabout) where the individual sinks *below* recognition of *any* action. The individual in such a state cannot conceive of *any* action and therefore cannot withhold action. And thus we have the criminal who can't act really but can only re-act and is without any self direction. This is why punishment does not cure criminality but in actual fact creates it; the individual is driven below withholding or any recognition of any action. A thief's hands stole the jewel, the thief was merely an innocent spectator to the action of his own hands. Criminals are very sick people physically.

So there is a level below withholding that an Auditor should be alert to in some pcs, for these "have no withholds" and "have done nothing". All of which, seen through *their* eyes, is true. They are merely saying "I cannot restrain myself" and "I have not willed myself to do what I have done".

The road out for such a case is the same as that for any other case. It is just longer. The processes for levels above hold also for such cases. But don't be anxious to see a *sudden* return of responsibility, for the first owned "done" that this person *knows* he or she has done may be "ate breakfast". Don't disdain such answers in Level II particularly. Rather, in such people, seek such answers.

There is another type of case in all this, just one more to end the list. This is the case who never runs O/W but "seeks the explanation of what I did that made it all happen to me".

This person easily goes into past lives for answers. Their reaction to a question about what they've done is to try to find out what they did that earned all those motivators. That, of course, isn't running the process and the Auditor should be alert for it and stop it when it happens.

This type of case goes into its extreme on guilt. It dreams up overts to explain why. After most big murders the police routinely have a dozen or two people come around and confess. You see, if they had done the murder, this would explain why they feel guilty. As a terror stomach is pretty awful grim to live with, one is apt to seek any explanation for it if it will only explain it.

On such cases the same approach as given works, but one should be *very* careful not to let the pc get off overts the pc didn't commit.

Such a pc (recognizable by the ease they dive into the extreme past) when being audited off a meter gets more and more frantic and wilder and wilder in overts reported. They should get calmer under processing of course, but the false overts make them frantic and hectic in a session. On a meter one simply checks for "Have you told me anything beyond what really has occurred?" Or "Have you told me any untruths?"

The observation and meter guides given in this section are used during a session when they apply but not systematically such as after every pc answer. These observations and meter guides are used always at the end of every session on the pcs to whom they apply.

Ex Dn C/Ses

*Expanded Dianetics Series 22R*

**EXPANDED DIANETICS  
REQUISITES**

The recent review of Expanded Dianetics has shown that Ex Dn can be made to fail if the pc is improperly set up for it.

The following checklist is for use by C/Ses to ensure full set-ups for Ex Dn have been done.

Attach to the inside left cover of the folder.

1. Pc has done a full set of TRs 0-4 and 6-9. \_\_\_\_\_
2. Pc has had a full battery of Objective Processes run to full EP. \_\_\_\_\_
3. Pc has been given a thorough C/S 1 and is grooved in. \_\_\_\_\_
4. Pc has completed (very) Drug RD which is FLAT. No no interest but reading items remain unrun. No medicine, drug or stimulant left unrun. \_\_\_\_\_
5. Pc successful at Dianetic Engram running. Can run Dn easily. \_\_\_\_\_
6. Pc has had Word Clearing Method 1 run very flat to F/N list. \_\_\_\_\_
7. Pc has been Word Cleared Method 5 on the L-3ExDRB and R3R words. \_\_\_\_\_
8. Pc has had any high or low TA handled with a C/S 53RI. \_\_\_\_\_
9. Pc is not in the Non-Interference area. \_\_\_\_\_
10. Pc has had any messed-up L & N and Why lists corrected. \_\_\_\_\_
11. Pc has not been left in the middle of a major action or RD to start Ex Dn. \_\_\_\_\_
12. *Pc is getting Ex Dn after Dn, after Exp Gr 4 or after OT3. These are the **only** points Ex Dn is run on a case.* \_\_\_\_\_

Only if you make sure each of these points is fully in will the pc fly on Ex Dn.

Cancels HCO B 15 July 1971, Issue I,  
C/S Series 28R, 32R, 33R, 36R—  
“Quads Cancelled”

**QUADS REINSTATED**

With the release of the Introspection RD and the Vital Info RD and recent HCO Bs such as the revised GF 40 Expanded it is vital that the original Quad Dianetics materials be made fully available to you.

am therefore re-issuing them as: C/S Series 28RA-1, “Use of Quadruple Dianetics”, 32RA-1, “Use of Quad Dianetics”, 33RA-1, “Triple and Quad ReRuns” and 36RB-1, “Quadruple Dianetics, Dangers of”.

These HCO Bs are fully valid and must be Word Cleared, starrated, done in clay and drilled by any HDC, CI IV HDC or Ex Dn Specialist before they are permitted to audit Quad Dn.

**QUAD RULES**

There are two rules that must be observed in running Quad Dianetics:

ONCE A PC HAS BEEN QUAD HE IS QUAD THEREAFTER.

WHEN CATCHING UP UNRUN FLOW ZEROS ONLY RUN THOSE THAT READ.

Running unreading Flow 0s when putting in missing F0s, as in a Quad pc who was switched to Triples then was having his unrun F0s run, is the reason for overrun manifestations and BPC.

**NEW PCs**

New pcs may be started on Quad Dianetics and if so must remain Quad thereafter.

Old pcs run Triple, let them remain Triple unless you have to do the Introspection RD or some Quad RD. If so, put in the reading unrun F0s before attempting a new RD Quad.

There are probably quite a few pcs run on Quads from 1971 who have since been run Triple. These pcs should be called in and have their reading unrun F0s run.

Don't now create a further backlog by mixing up process flows on current pcs.

DO IT RIGHT, TRIPLE OR QUAD.

C/Ses

*C/S Series 28RA-1*

### USE OF QUADRUPLE DIANETICS

With the introduction of QUADRUPLE DIANETICS the problems of how to C/S it arise.

This rule is followed:

IN ALL BUT HCO B 24 July 69 DIANETIC ASSISTS WHERE IT CAN BE USED AT ONCE, THE FOURTH FLOW—O—MUST BE RUN ON ALL ITEMS FORWARD FROM THE FIRST DIANETIC ITEM EVER RUN ON THE CASE *IF THE PC IS QUAD AND THE FLOW O READS.*

Where a case has already had Flows 2 and 3 run on Singles, one goes back and runs Flow 0 on those items *if it reads.*

Where a case has only been run on Single Flow Dianetics (Flow 1) one goes back to the first Dianetic Item ever run of which record can be found and does F 2, F 3, F 0 in that order *checking the command for read before running it, and then verifying the F 1.*

To C/S a case for Quad Dianetics it is best to first lay out a Scientology repair, making sure the case is flying, then list out the items already run on Single and Triple. Then get them run so that all four flows are complete on each item in sequence from first to last.

This includes any LX items, former practice, drugs or any other engram running. These, like Dianetic items, are listed in their correct sequence of former running.

Then the missing flows are run *if they read.*

A rehab step of the flows already run is not necessary. This rehab of a flow already run to EP is usually used only when there is question about its having gone to F/N Cog VGIs.

In C/Sing for Quadruple one COMPLETES any flow of an item found that did not F/N. This is indicated on the item list.

### DOING THE LIST

The item list is done by the Auditor in his admin time for well done time credits.

All former Dianetic items ever run are listed and what flows have been run on them and to what end phenomena.

Example:

#### Engram List

3 Sept 69	Sadness (exact wording that was used)	F 1
4 Sept 69	A Bored Feeling	F 1 Bogged
6 Sept 69	An Apathetic Outlook	F 1 Bogged
6 Nov 69	LX Agonized	F 1 F 2 F 3
7 Nov 69	Former Therapy	F 1 F 2 F 3
		F 2 Bogged
9 Nov 69	Earlier Practices	F 1 Bogged

10 Nov 69	A Horrible Sadness	F 1 Bogged
5 July 70	Int RD	F 1 F 2 F 3
		F 3 Bogged
6 July 71	An Awful Pressure	F 1 Bogged

Such a list is then handled from the earliest forward by:

- (a) Completing the bogged flow and
- (b) Completing the missing flow, *if it reads*.

#### INT-EXT RD

This is handled in its proper sequence on the list if the TA is not high or very low.

If the TA on the pc is currently high, Int is handled before any other action is done and all four flows are run on it *with the understanding that a pc run Triple on Int must have the Flow 0 checked for read before running it*.

A drug chain also makes a high TA if in existence or unflat.

#### AUDITOR CHECKOUT

BEFORE RUNNING ANY DIANETICS QUADRUPLE EVER Y AUDITOR HDC, VI, VII, VIII AND C/Ses MUST BE CHECKED OUT THOROUGHLY ON THE QUAD DIANETICS CHECKLIST:

THERE IS A PACK ON THIS SUBJECT AVAILABLE FROM FLAG.

#### FLUBS

If any Auditor has a poor record of getting Dianetics Results, of bogged flows, etc, he needs an HDC Retread. His drills and TRs are out or he is committing Gross Auditing Errors.

Dianetics gives remarkable results only when flawlessly done.

The commands must be precisely given and *all* commands 1-9 A-D are used. It is NEVER shorted "because the pc did it".

THUS ANY HDC TO AUDIT QUAD DIANETICS MUST:

- (A) HAVE A RECORD OF GOOD FLUBLESS DIANETIC AUDITING or
- (B) MUST HAVE A RETREAD UNDER A COMPETENT SUPERVISOR and
- (C) MUST BE STARRATED (for true, not just checked) ON THE ABOVE CHECKSHEET OR THE FULL QUAD PACK.

## C/Sing

Quad Dianetics, with the above, otherwise C/Ses the same as general DIANETICS.

It should be realized Dianetics is its own field of C/Sing. This remains the same in Quad Dianetics.

## PROMOTION

Quad Dianetics should be promoted only when you have Dianetic Auditors, the Auditors checked out and okayed to audit as above and when you CAN DELIVER.

IVs or VIs should be available to do the Progress Pgms and steps.

## UPPER LEVELS

When the IVs VIs VIIs VIIIs or IXs are checked out as above, they should use Quad Dianetics to handle any and all Engram steps called for in general auditing.

That they are upper level Auditors does not make it less necessary to do the above.

## RESULTS

Quad Dianetics, including the rerun actions, produces some very startling new gains.

Well done Dianetics always has produced fine results.

Quad Dianetics almost doubles the gain.

## REMEDIES

Any and all Dianetic Remedies and general technology remain in full use. They are not changed at all. Only the zero flow is added in each case.

Good Luck.

HCO BULLETIN OF 4 APRIL 1971-1R  
ADDITION OF 13 JANUARY 1975  
REVISED 22 FEBRUARY 1975

Remimeo

*(Cancels HCO B 4 Apr 71, Reissued 13 Jan 75, same title.  
Does NOT cancel HCO B 4 Apr 71RA, Rev. 24 Mar 74,  
C/S Series 32RA, which is still valid.)*

*(Changes in this type style)*

**C/S Series 32RA-1R**

**USE OF QUAD DIANETICS**

With the introduction of Quadruple Dianetics it is mandatory important urgent that one does not audit four flow items until one has brought *all* earlier Dianetic items into four flows.

**TRIPLE**

This also applies to Triple Dianetics. On a case where only Flow One (Single) has been run, you don't suddenly run a Triple (F1, F2, F3) such as on the LX Class VIII Lists until one has run the earliest Dn item ever run (or that can be found) on Dn Triple and then on forward on Triple up to the LX.

**QUAD**

However, one would now not bother to run only Triples forward. He would locate the earliest Single or Triple (if no Single Flow) item and run it Quadruple by now running the missing flows. In the case of a pc run Triple, Flow 0 is checked for read before running it.

**INT RD**

In doing an INTERIORIZATION RUNDOWN one mustn't suddenly introduce the 4th flow (F Zero).

If the case has only had Triples in Dianetics one mustn't suddenly introduce a Flow *Zero* on INT. The case should be done on Triple Flow INT.

THEN all earlier Dn items in sequence run are:

- (a) Listed from W/S or Folder Summaries.
- (b) Brought up to current by running in all the missing flows of Quad.
- (c) The INT RD fourth flow is audited in when one gets to it IF IT READS.

**REASON**

Auditing additional flows while earlier items remain Single or Triple restimulates the missing flows and stacks them up as mass. They can make a pc uncomfortable until run.

All the missing flows (that were not run) are still potential mass.

This mass restimulates like something too late on the chain when a flow not run on earlier items is run on later items.

Auditing itself is a sort of time track. The earliest session blows the later sessions.

### FULL FLOW TABLE

Before running Quad Dianetics one makes a table of earlier items run. Like this:

#### *FULL FLOW TABLE*

<i>Date</i>	<i>Item</i>	<i>Flow Previously Run</i>	<i>Must Run</i>
2.3.62	Guf Shoulder	F1	F2, 3, 0
3.3.67	Gow in Foot	F1	F2, 3, 0
30.4.67	Chow in Chump	F1	F2, 3, 0
29.9.68	LX Anger	F1, 2, 3	F0
	LX Peeved	F1, 2, 3	F0
4.10.69	Feeling Numb	F1, 2, 3	F0
5. 9.70	Int RD	F1, 2, 3	F0
9.10.70	Feeling of Goof	F1, 2, 3	F0
10.10.71	Dn Assist on Head	F1	F2, 3, 0

### FLAWS

F1 is FLOW ONE, something happening to self.

F2 is FLOW TWO, doing something to another.

F3 is FLOW THREE, others doing things to others.

F0 is FLOW ZERO, self doing something to self.

### R3R COMMANDS

Standard R3R Commands are used on Quad Dianetics.

They are the subject of another HCO B.

The Zero Command however is very easy being "Locate an incident of (loss or emotion) (pain and unconsciousness) when you caused yourself to have a(an) (item)" with the other commands of R3R as usual.

### NARRATIVE

The question will come up, do we Triple or Quad Narrative items or Multiple somatic items.

The test is, did the flows already run F/N when they were originally run. If they did, include them. If they didn't run exclude them.

This does not mean you omit everything that didn't run.

## REPAIR

While auditing this FULL FLOW DIANETICS you will find various chains that did not F/N when originally run.

These are included and should be concluded to F/N. This means one has to find out if they by-passed the F/N, went too early, jumped the chain, etc. Usually an L3RD assessed on that faulty action will give the answer. It is easy to make these old flubbed chains F/N unless you work at it too hard. Usually the reason they didn't is visible on the old worksheet. The auditor forgot to ask for Earlier Beginning or by-passed the F/N or jumped the chain or tried to run it twice forgetting he'd run it before. Corny errors.

## RESULT

The result of doing a FULL FLOW DIANETIC ACTION on a case is quite spectacular. The shadowy remains of somatics blow, mass blows and the pc comes up shining.

## OFFERING FFD

*Offering the public Full Flow Dianetics must include the cost of FESing, FF table making, and C/S work since it is sometimes lengthy. The auditing can be remarkably brief. The greatest amount of time is usually spent on the C/Sing and the table making.*

*FFD is offered to the public in intensives as per HCO B 31 May 1971R, C/S Series 39R, "Standard 12 1/2 Hour Intensive Programs". Admin time spent on C/Sing, FESing and FF table making should be deducted from the Intensive Hours purchased by the pc. This must be made known to the public when purchasing the service.*

*When offering FFD it should be called Quadruple Dianetics—4 times more powerful than previous auditing.*

*A C/S must liaise with the Dissem Sec and Treasury Sec on selling it or he'll find the org is losing money doing the C/Sing and tables.*

## OT WARNING

When doing Quadruple Dianetics on Clears and OTs (and a very few others) it may be found that many chains are now missing or are just copies of the original. Don't be disturbed. Pc says they're gone now they're gone. Just F/N the fact and carry on with the next flow or item.

*C/S Series 33RA-1*

**TRIPLE AND QUAD RERUNS**

LAW: WHEN ONE OR MORE OF THE FOUR FLOWS OF AN ITEM OR GRADE ARE LEFT UNRUN, WHEN USED IN LATER PROCESSES THE EARLIER UNRUN ONES RESTIMULATE AND MAKE MASS.

This tells you that high TAs, heavy pressures and even illness can come from by-passed flows.

**BY-PASSED FLOWS**

Example: Dianetic Singles have been run on 7 items. Now the Auditor begins to run new items Triple without running Triple on the already run items. The result will be 7 unrun Flow 2s and 7 unrun Flow 3s. These will restimulate and form mass and by-passed charge.

Example: Now let us say all 7 previous items have been run Triple. And the Auditor now runs a new item Quadruple. This leaves 7 unrun Zero chains. These can restimulate and form mass and by-passed charge.

Example: Now let us say that Dianetics was all run Single and Grades were run Triple. This will restimulate the Dn chains F2 and F3.

Example: Let us say that Dianetics and Scientology Grades were all run Triple. An *Interiorization* Rundown is now run Quad. This will throw all Dianetic and Scientology unrun Flow Zeros into restimulation and give by-passed charge.

ANY LATER GRADE RUN WITH MORE FLOWS THAN USED IN EARLIER ACTIONS CAN THROW THE EARLIER UNFLAT FLOWS INTO RESTIM, PILE UP MASS GIVING HIGH TA AND BPC GIVING ARC BREAKS.

**REPAIR**

The more the condition is *repaired* by L1C, L4BR, etc, etc, the *worse* the Mass gets.

**SOURCE OF HIGH TA**

Thus High TAs have three principal sources:

1. Overruns
2. Auditing Past Exterior
3. Earlier Unrun Flows restimulated by those flows used in later actions.

There are other minor ones such as Drug Background, illness, etc, as per Hi-Lo TA Assessment.

**REHABS**

One must NOT recklessly or continuously rehab a past major action. This causes overrun. The thetan is placed at the *end* of the incidents not yet in restimulation or run and the bank gets more solid.

**MASSY THETANS**

The whole trick of this universe is contained in thetans copying or picturing incidents and then getting stuck in the later portion of them.

“Incidents” is the keynote. A thetan is incident hungry.

This is what traps him.

For some reason he has to be at the earliest end of incidents to erase them. The later he is in incidents and the later he is on the track the more solid he is.

This also applies to the “auditing time track”.

By omitting things like flows on the auditing time track, the thetan thus becomes massy.

The whole theory of the *Interiorization* Remedy is based on having gone out (later) *after* he went in (earlier). So Exteriorizing can stick him. (People buy the *Int* RD to Exteriorize but the remedy is only done to permit further auditing. They Ext of course when the bank is handled.)

When flows of items are by-passed and then later restimulated by auditing them, mass occurs.

### GETTING IN ALL FLOWS

When doing additional flows on earlier items or processes one must *also* check or rehab those flows marked as run to F/N in worksheets.

This again will leave unflat flows and BPC unless it is done.

And if it is overdone it will raise the TA by overrun.

So if one had a case that had Single Dianetics and was later run on Triple for new items (but the Singles not done into Triple) one would have to RUN FIRST the missing unrun flow or flows *if they read* and then *check* the first Single F1 for flatness, then check other previously run flows.

The rule is run the previously unrun one or ones first *if they read* to get charge off, then verify or run the ones listed as run already.

Then one would do the same for the next item. Run the previously unrun flow or flows *if they read* and then verify or run those listed as already run to be sure they F/N.

All items, in chronological sequence, and all processes, would have to be run Quad.

IT WOULD BE A WASTE OF TIME NOW TO RUN IN ONLY TRIPLES.

Whether you have the Quad commands or not they are easy to figure out as you are only missing the Zero Flow, self to self.

So all C/Ses and auditing actions are “Rehab or Run F1, F2, F3, F0 *if they read*” when getting in all flows on things run to date.

### HIGH TA

When you are sure an *Int* RD has been done correctly and its 2wc went F/N and the TA later goes high, you check the *Int* RD. That is the most usual reason. This simple action is amazingly subject to flubs.

If the TA goes high later you can do a *C/S Series 53* or a Hi-Lo TA Assessment and handle.

If the TA is still high or low, you had better check the state of flows. Were more flows run on later actions than were run on earlier actions?

If so, your pc has felt massy, sometimes even ill.

The right action is to get in all flows from the beginning. And do it Quad. Bring *all* his auditing up to Quad.

(If his folder is not available, he has kind of had it. I know of no way, at this writing, to recover lost Dn items but will have to work something out.)

## NOT IN TROUBLE

If the pc is not in trouble, his best bet is to get on up the grades to Expanded OT III.

## IN TROUBLE

If he *is* messy and is having trouble the best bet is to:

1. Be totally sure of his Int RD.
2. Check O/Rs particularly of a major grade twice or by-passed F/Ns, locate and indicate them.
3. FES, list the items and grades and do a Full Flow action from the beginning of his auditing, raising them all to Quadruple.

## RUNNING ZERO FLOWS

The Zero Flow in Dianetics is a bit strange. It can be done by full R3R BUT it often depends on the decision the pc made and may F/N very suddenly. It is easily overrun and can be very fast.

A pc can be gotten into trouble on Zero Flows if the Auditor is slow and is not alert to his meter and misses the F/N and gives R3R commands after the flow has blown.

## REHAB OR RUN

The Auditor getting in Zero Flows can also ARC Brk the pc by failing to verify if the previously run flows are flat. All the Auditor wants is to see them F/N on the command. If they don't he runs them.

Sometimes when he has "run them" again he finds they are being overrun or run twice and has to rehab them by finding this out. The pc sometimes doesn't know until he actually starts to run them. Then he finds they are already run. The clue to this is a climbing TA. If the TA goes up, get off that flow and rehab it.

Example: Pc at first thinks "Pain in shoulder" F2 was never run. Starts to run it. TA goes up. Auditor must pull him off of it by finding out if it is being run twice and rehab it to F/N.

The moral in all these reruns is don't firefight, keep an L1C List and an L3RD List handy and use them.

## RESULTS

The results of straightening up the Int-Ext RD, rehabbing O/Rs and putting in ALL FLOWS on a pc are fantastic.

Getting an All Flows Rundown done correctly gives one all the latent gain the pc has been begging for.

So send to Cramming all C/Ses and Auditors who flub.

Program it right.

C/S it right.

Audit it right.

All Auditors  
Class VIII  
Dn Chksh  
Int-Ext Chksh

ADDITION OF 13 JANUARY 1975  
REVISED 22 FEBRUARY 1975

*(Cancels HCO B 21 Apr 71, Reissued 13 Jan 75, same title.  
Does not cancel HCO B 21 Apr 71RB, Reissued 21 Sept 74,  
C/S Series 36RB, which is still valid. )*

***C/S Series 36RB-1R***

**QUADRUPLE DIANETICS  
DANGERS OF**

(Applies also to Int-Ext Rundown)

(Ref HCO B 4 Apr 71-1R, Addition of 13 Jan 75, Revised 22 Feb 75,  
C/S Series 32RA-1R, and HCO B 5 Apr 71, Reissued 13 Jan 75, C/S Series 33RA-1)

In observing Quad Dianetics in the hands of Scientology Auditors not specially briefed or who had additives and figure-figure on how to move a case already run on Singles and Triples into Full Flow,

***INVARIABLY THEY OVERRAN.***

This makes getting Quad Dianetics in on a case dangerous unless the Auditor has the hang of it.

The flagrant (and I do mean flagrant) errors found consisted of (a) not being able to run precise Standard Dianetics in the first place; (b) re-running already erased chains "to find if they were flat"; (c) Out TRs to a wild extent; (d) refusing utterly to accept pc's data; (e) faulty metering; (f) complete ignorance of the Auditor's Code, notably committing the crime of Invalidating the pc; (g) running unreading Flows when catching a pc up to Quad.

**REQUIREMENTS**

Anyone essaying to run Quad Dianetics **MUST BE CRAMMED** on his R3R, the use of L3RD, all data on Quad Dianetics (as per references above and including HCO B 27 Mar 71, "Dianetic Erasure"), his basic TRs, his metering and the Auditor's Code, and this HCO B.

**TRs**

TR Zero exists so an Auditor is not ducking the session but can sit there relaxed, doing his job.

TR One must be done so the pc can *hear* and understand the Auditor (without blowing the pc's head off either).

TR Two must be done so that the pc gets acknowledged. This can be so corrupted that the Auditor doesn't ack at all but gives the pc meter reads! Instead of acks! Or keeps saying, "I didn't understand you," etc.

TR Three basically existed so that the Auditor would continue to give the pc commands and not squirrel off or pack up with total silence.

TR Four exists so that the pc's origins are accepted and not Qed and Aed with or invalidated.

And, surprise, surprise, TRs are for use in the session itself, not just a drill. They are *how* one runs a session.

Metering can miss every F/N or give “F/Ns” with high or low TA. And one *never* feeds meter data to the pc: “That read,” “That didn’t read,” “That blew down,” just must not exist in session patter. “Thank you. That F/Ned,” is as far as an Auditor goes. And that’s the end of the cycle and says so.

Floating needles can be overlooked by an Auditor. In Quad Dianetics this fault is *fatal*.

Auditor’s Code must be in on all points and particularly Invalidation. Pc says, “That’s so and so.” An Auditor who says, “I’m sorry. You are wrong,” or any other invalidation is going to wreck a pc’s case. A full knowledge of the Auditor’s Code and actually applying it saves endless troubles. It is an auditing TOOL, not just a nice idea.

## REHABBING CHAINS

One rehabs a Dianetic Chain that, according to a previous worksheet, erased by saying, “According to session records (flow direction) (item) erased.” That’s all. One does not say, “Did the chain giving others a headache erase?” One does not run it again to find out. One does not run a single command “to see if it F/Ns again”. One can say, “Do you agree that the chain giving another a headache erased?” But the more you ask a pc to look for an erased chain the more messed up things will get. It isn’t there. But the Auditor by his action can imply it *should* be there or *might* be there. A totally wrong approach would be, “Look around your bank and see if what isn’t there anymore isn’t there.”

Dianetics is NOT Scientology. A Dianetic Chain is *not* a release. If you try to use Scientology rehab tech on a Dianetic Chain, you have had it. It isn’t a “release” (which is a key-out). A Dianetic Chain is an erasure. You can’t rehab erasures with “How many times?”, etc.

The test of this is the doing. If you try to use Scn rehab on Dianetic Chains, the PC MIGHT TRY TO FIND SOMETHING. This causes him to key in other unrun or similar items.

It is a dangerous action at best to try to handle old erased chains. The best you can do is to tell the pc what the old W/S said. If no W/S exists leave the already erased flows alone!

## FLUBBED CHAINS

Many times, a Folder Error Summary will give a flubbed chain and then fail to note it was repaired in the next session!

A C/S and Auditor would have been pretty irresponsible to just go on auditing past flubbed chains.

The only safe way to handle some previous flubbed chain is to:

- (a) Verify in the folder if it was repaired.
- (b) *If still unrepaired assess L3RD on it and handle according to the L3RD.*

## L3 RD

Using the new L3RD (HCO B 11 Apr 71 RA) is a Dianetic action.

A Scientology Auditor erroneously can try to use it as a 2-way comm type of list. If a chain needed one more ABCD, then 2-way comm on it with no ABCD is not going to complete it.

L3RD has its own directions. Questions not marked with directions are used to indicate the fact. This can amount to 2-way comm as the pc chews it over. But L3RD where marked is handled by Dianetics actions. Look over the list and its directions for each question and you will see that some are given directions that are NOT 2wc.

Example: "Earlier beginning" reads. You can't just say, "The incident had an earlier beginning," and you can't say, "Tell me about the earlier beginning." The pc will go up the wall. There'll be no F/N. You have to use R3R and get him to the earlier beginning and then run it and if it still doesn't erase, get him to an Earlier Similar and erase that.

L3RD is a Dianetics List. It is not a Scientology List that is cleared each question to F/N by 2-way comm.

## OVERRUN

Overruns are demonstrated by a rising TA.

If as you seek to get in Full Flow Dianetics the pc's TA begins to average higher, overrun is occurring.

Example: While doing FFD pc's TA has been riding at 2.2 and F/Ns. After a new FFD action it begins to ride at 2.5 and F/Ns. Something is being overrun. Find it and indicate it. And cease to stir the bank up so much! The fault is going over items already run.

*Already flat zero flows are not uncommon.* The zero flattened on the original Triple. Thus getting in that zero flow again is an overrun.

In doing a Full Flow Table you often find that the same or similar have been run in the past. Sometimes you find that a previous attempt to run the item a second or third time has resulted in an ARC Break, the reason for which was never detected.

The right action is to note the session date it was *first* run and just tell the pc, "Feeling Surprised was run three times. On (first date it was erased) it was erased. When later run it was an overrun." This tends to blow the later charge laid in by trying to run the same item again.

It sounds so strange that erased chains can be overrun. But it is true. What happens is that pcs try to cooperate and put something there.

## FIREFIGHTS

The action of a quarrel between an Auditor and a pc is called a firefight.

Restimulating earlier unrun engrams or overrunning chains upsets a pc. The best action, as soon as a pc is disturbed, is to do an L3RD fast and handle what reads the way it should be handled according to the L3RD.

The wrong way is to argue or try to go on.

The pc does NOT know what it is. He just feels awful. He tries to guess. He will ARC Brk or get sad if the Auditor continues.

The correct action is an L3RD.

L1C is not of great use in a Dianetic ARC Brk. L3RD is.

If the pc remains ARC Broken, try L3RD again Method 5.

A Scientology session would be handled with some other list (L1C, L4B, etc). A Dianetic session, including and especially FFD, is handled with L3RD.

You NEVER prepcheck while doing Dianetics. This mushes up the engrams.

### INTERIORIZATION

ALL these cautions apply as well to an Interiorization-Exteriorization Rundown, when restim occurs one uses an L3RD quickly.

Int-Ext RD is essentially a Dianetic, not a Scientology action.

### SAFE ACTIONS

A fully genned in Auditor, well crammed, well drilled, well skilled, can be trusted with Dianetics, Dianetic Quads and an Int-Ext RD. Auditors not so handled can get pcs into serious trouble with these things.

A safe course is to use Quad only on new never audited before pcs. Those begun on Triples, use then only Triple flows.

Another safe way is to use FFD only on OT IIIs or OT IVs and done only by fully qualified FFD Auditors who are also OT III.

The safest course is to require special drilling and cramming on Auditors who are already known for their results by actual success story stats and call FFD and Int-Ext RD a skilled specialty.

### C/S RESPONSIBILITY

Any trouble a C/S is running into comes from the factors of TRs, metering, Code and incomplete or false Auditor's reports.

If when I am C/Sing I ever find an Auditor has omitted key session actions or has falsified a report, I order that Auditor not to Cramming but a full retrain HDC right on up.

A C/S does not see these points. He can get the pc asked what the Auditor is doing or did. He can get sessions monitored. This helps him fill this gap in his data.

It's what isn't in the Auditor's report that is often the trouble. Auditors omit what they said, omit the firefight, omit session alter-is in their worksheets.

All this sticks the C/S's neck out for the axe of failure.

So particularly in FFD, Int-Ext and other such actions, a C/S has to act to obtain confidence in the Auditor's TRs, Metering, Code Use and accurate Worksheets.

### RISK

In FFD, Int-Ext RD and Power, experience has proven that if the Auditor is not top grade, if the C/S is not alert, we put a pc at risk.

The USUAL is what keeps the pc safe.

A thorough study of his case, looking for obvious bugs (such as Int-Ext RD done twice, the case a druggie but Drug engrams never run, Int done but its 2wc flubbed, FFD grossly overrun, to name a few serious ones), sending Auditors to Cramming for the slightest flub, insisting on standard TRs USED IN SESSION, good metering, use of the Code, accurate and complete worksheets, use of standard tech, all guarantee the safety and progress of the pc.

### INTRODUCING FFD

FFD (like the Int-Ext RD) requires flawless C/Sing and auditing or the case goes wrong.

When these actions were introduced they showed up any flaws in case studying, TRs, Metering, Code and Worksheets.

There are two ways to handle. (a) Cancel FFD and Int-Ext as actions. Obviously that is going backwards and is impossible. (b) Begin and continue a serious, effective campaign in the org to (1) Train Auditors better, (2) Cram expertly on every flub, (3) Raise quality of TRs and metering.

As you can see, my approach is to improve quality of training, cramming and delivery.

Please help me out in getting this in.

HCO BULLETIN OF 16 JANUARY 1975

Remimeo  
Dn & Ex Dn C/Ses  
IV and VI C/Ses  
Class VIII C/S

**PAST LIFE REMEDIE**

There are many remedies and considerable tech developed over the years on the subject of pcs unable to go earlier than this life. There was no full coverage bulletin which gave the full story on this.

The earliest was getting the pc to locate and run imaginary incidents. This is fully covered in *Science of Survival*, especially Book Two, Chapter Nine, "Imaginary Incidents". The auditor clears the idea of imaginary incidents and running them, then persuades the pc to run them without forcing him.

Delusion tends to run off but the real incidents move into view as well. These imaginary incidents can be run R3R narrative or done as part of R3R procedure and running usual items and somatics. It can be incorporated into the AESPs run on the Past Life Remedy as part of the action of grooving in the pc.

One of the early Dianetic Remedies was simply "What Attitudes would make one unwilling to go Earlier than this life?" R3R Triple exhaust the list then do Emotions Sensations and Pains separately.

Where the pc is afraid of going earlier or seeing the pictures, AESPs that would make you not want to look at earlier lives can be listed separately and run.

Often the pc won't go backtrack because he's a druggie.

What has happened here is that he restimulated past lives with drugs, got into frightening pictures that he didn't understand and now backs off from ANY bank content except drugs. That is handled with a full Drug R/D, including a full battery of Objectives and all reading items run including "no interest" items. The standard approach on any pc is to get a full Drug R/D done first.

Another reason could be the pc is in recent shock of having died. Such a case is overburdened and is destimulated with general auditing and then gets a Past Life Remedy if he hasn't gone backtrack. You could even do a Prior Assessment to this life.

The subject of invalidation of past lives and people talking about them out of session or claiming to be famous people invalidates past lives for a pc and is actually related to suppression and PTS phenomena. If you suspect this you could ask "Has anyone been talking to you about past lives or famous people?" From this question possible suppression in the environment can be located and used in a PTS R/D, HCO B 9 Dec 71R, Revised 21 Oct 74.

**CHILDREN**

Children are usually very burdened cases and can be hard to C/S on Dianetics as it hits this life only which will leave the pc wide open to key-in and at the age of 20 be found all keyed in "with all grades run".

I find they are jammed into fiction stories, education, books and movies and run these like Engrams. These children speak of "remembering" all the time. They say they can't go backtrack "because they don't remember". They don't seem to take it from pictures. Contrary to psychology theories and popular belief I find children in very

rough case shape, nervous, frightened, griefy, etc. They get stuck in the books and movies they see.

I have handled this in various ways. The easiest way to unburden cases is by Objectives (contact processes) and Recall (ARC S/W, Self Analysis). That is a general approach. You can list for mental image pictures pc has seen in life in movies or books then get the AESPs of the best reading one and R3R triple or quad. Unwanted feelings, attitudes, emotions, sensations and pains as a child can also be listed and run to unburden the case.

A direct approach is to ask "What book or movie were you particularly interested in?" You'll usually find that the person had a stuck picture on it. Then ask "Did you ever have anything to do with that sort of thing?" Then they go into it because you're asking for an E/S. You could then run out the earlier incident R3R triple or quad and you'd be away.

Where the pc is stuck in upsetting incidents from movies or books you can list for "Bad incidents you've seen or read about", take the best reading one and R3R its reading AESPs. Be sure to accept stories, TV, movies or books as these are fully valid to run.

### REVIEW

A Scientology Review action that can be done is to assess Auditors Auditing Past Lives Dianetics Scientology Time Preclears and Erasure. Then prepcheck in order of reads, reassess and prepcheck. This is a valuable action to do before ARC S/W triple and often by itself will handle those unable to go past track.

A further Scientology approach would be to assess the Past, Memory Pictures, Past Lives and prepcheck in order of reads. Then L & N "Who or what would have no future?" then L & N "Who or what would it have been awful to have been?" These items can be checked and used in a PTS R/D or can have their intentions listed and run as part of Ex Dn handling.

### SUMMARY

The technology on past lives is important for a C/S to know, especially the Dianetics C/S.

The subject usually resolves with a Drug R/D and general auditing but when it doesn't you have these remedies to use.

Use them well.

# HYMN OF ASIA

## An Eastern Poem

by  
**L. Ron Hubbard**

**Published  
January 1975**

“Man has long dreamed of solving the riddle of his own existence and achieving personal freedom. This has been the great hope of Man through the millennia of his histories—both East and West.

“Now at last, in the 1046 lines of the poem *Hymn of Asia*, is the statement that this hope has been achieved—You can be free.

“This moving hymn was written for a Buddhist Convention in about 1955 or ‘56, coincident with the celebrations in the Buddhist world of the 2,500th year of the Buddhist era. Later typed copies of this magnificent work, many in altered versions, were widely circulated from hand to hand in various countries of the world. The public demand for its publication grew enormous.

“Then in late 1973 its author directed its publication and subsequently personally supervised the collaboration of a talented artist, designer and calligrapher in the final preparation of the book. Here we have a beautiful edition which presents the fully correct original text of the poem, one surely destined to become a major document of Man’s spiritual history.

“*Hymn of Asia* concerns the fulfillment of a prophecy made 2,500 years ago by Siddhartha Gautama, better known as Buddha, the founder of the religion known in the West as Buddhism.”

(—Introduction to *Hymn of Asia*)

HCO BULLETIN OF 23 JANUARY 1975

Remimeo  
Class VIIIs  
Class VIII

**THE PURPOSE OF CLASS VIII**

The purpose of the Class VIII Course is to train an Auditor up to be able to deliver 100% Standard Tech and turn him into a zealot in pushing in Standard Tech in the field.

This has been the purpose of Class VIII since its inception.

Its materials are fully valid. The original checksheet has been restored. It is a tough and demanding course. It is not Fast Flow but 3 times through with starrates and exams.

**THE ORIGINAL CLASS VIII COURSE HAS RETURNED.**

Training of Auditors as Class VIIIs to forward Standard Tech is absolutely vital today. It is not "old" or "background". Its materials cannot be found on any other course. They are only available on the Class VIII Course.

A real Class VIII Auditor cannot be compared with a Class IV or VI. A Class VIII is a flawless, flubless, smooth as silk specialist in Standard Tech. He can handle any case with ease. He is a dedicated advocate for Standard Tech. He pushes in Standard Tech in his area and sets an example by his own flawless performance.

**STANDARD TECH**

The way a Class VIII gets in Standard Tech is by *encouraging* lower classed Auditors to use the materials of Standard Tech and apply them.

A Class VIII must beware of invalidating lower classed Auditors and make sure he doesn't fall into that trap. Invalidation never works and is in fact destructive. Under invalidation an Auditor will cease to audit well, will goof and back off from auditing entirely.

To get in Standard Tech, always encourage lower level Auditors to apply standard materials, tapes, HCO Bs and books. Help them to do so. Direct them to the references. See they get crammed, not invalidated. After all, they are willing to help, or they wouldn't be Auditors.

**SUMMARY**

Class VIII is the standard by which other auditing is judged. Class VIII gives the certainty and precision of 100% Standard Tech. Class VIIIs get in Standard Tech by encouraging lower level Auditors to apply standard materials, never by invalidation.

Every Auditor should one day make it to Class VIII. No org can afford to be without at least one Class VIII. These are the Custodians of Standard Tech.

**AN OBJECTIVE RUNDOWN**

*(Note: The original issue from which this HCO B was taken was not titled "Objectives" but "Intensive Processes for Use in Operation Clear and Operation Staff Clear". The original was unsigned. It was a Confidential staff only issue. When converted to an HCO B, the title was changed erroneously to "Objectives". A corrected list of Objectives is therefore published below. Additionally, the original issue omitted two or three key objective processes and put recall [subjective] processes in their place, thus messing up ARC Straight Wire.)*

**OBJECTIVE:** (Dictionary Definition) "Of or having to do with a material object as distinguished from a mental concept, idea or belief." Means here and now objects in PT. As opposed to "Subjective".

**SUBJECTIVE:** (Dictionary Definition 2nd meaning) "Proceeding from or taking place in an individual's mind."

Look around or physical contact processes are obviously "Objective". Recall, think, remember or return on the time track processes are obviously "Subjective".

Pcs who have been on drugs obviously have to be run on Objective, not Subjective, processes.

Anyone can be brought more into present time with Objective processes.

Objectives are vital in assists and other areas of processing.

Here is a list of workable Objective processes:

0. "Look at me who am I?"
1. CCH 0
2. CCH 1
3. CCH 2
4. CCH 3
5. CCH 4
6. CCH 1 to 4 repeat as indicated.
7. Locational ("Look at that object") can be used as indicated, to end sessions or even to bridge from one process to another.
8. The following three must be run 1 command each consecutively over and over:
  - (a) "Look around here and find something really real to you."
  - (b) "Look around here and find something you could go into communication with."

- (c) “Look around here and find something you would really like.”
9. The following three are run several times for the 1st, fewer for the 2nd, fewer for the 3rd. And then repeated (Trio).
- (a) “Look around here and tell me what you could have.”
- (b) “Look around here and tell me what you would permit to remain in place.”
- (c) “Look around here and tell me with what you could dispense.”
10. Op Pro by Dup to Exterior.

(If pc exteriorizes a Dn C/S 1 and an Interiorization RD [flawless] should follow.)

The first 10 steps above could be called an Objective Rundown.

Note that this does *not* include *many* other Objective processes, many versions of havingness.

But the above would accomplish a great deal for the pc IF DONE CORRECTLY WITH FLAWLESS TRs!

And it would accomplish the general intent of the 1957 RD.

All Students

**MUTTER TR**

NAME: Mutter TR.

PURPOSE: To perfect muzzled auditing comm cycle.

COMMANDS: "Do fish swim?" "Do birds fly?"

POSITION: Student and coach sit facing each other a comfortable distance apart.

TRAINING STRESS:

1. Coach has student give command.
2. Coach mutters an unintelligible answer at different times.
3. Student acknowledges.
4. Coach flunks if student does *anything* else but acknowledge.

(*Note.* This is the *entirety* of this Drill. It is not to be confused with any other Training Drill. )

*Note.* The whole trick in TR 2 and TR 4 is that it means one understands that the pc has said something or has answered. There is no demand the auditor understand the *meaning* in the pc's answer in muzzled auditing. In the above drill the coach just mutters or nods and looks wise instead of saying anything comprehensible. The only kind of auditing where you *must* grab the actual sense of the answer is in listing or in looking for something that will blowdown or trying to find out what the pc thinks is wrong. If the pc *has* said something he wants the auditor to really grasp, let him explain and of course, if the pc insists, grasp it. But this is rare and happens only when the pc is already ARC Broken. Otherwise the above is the right way to do it.

# DIANETICS TODAY

by  
**L. Ron Hubbard**

**Published March 1975**

Here, on the twenty-fifth anniversary of the First Book, *Dianetics: The Modern Science of Mental Health*, is what might be called the Third Book of Dianetics—Dianetics Today.

The Second Book, *Dianetics '55!*, took all the problems presented by *Dianetics: The Modern Science of Mental Health* and brought them up to 1 January 1955 and handled them, using Two-Way Communication, ARC and the Six Basic Processes and leading into Route One of *The Creation of Human Ability*. Dianetics 1950 techniques handled the problem of the reactive mind by reducing its constituent engrams, locks and secondaries until it could be handled by the existing analytical mind. *Dianetics '55!* handled the same problem by increasing the ability of the thetan (or, you could say, analytical mind) to the point where he could be separated from his reactive mind and body; and then, using Scientology's Intensive Procedure, processing him until he was capable of handling with great ease any quantity of aberration in the reactive mind.

With the advent of the Gradation Chart in the mid-60's and Scientology Levels, all processing techniques fell into place in a smooth gradient from aberrated homo sapiens, through homo novis and on through Clear and up the OT Grades.

In *Dianetics Today* we have "Standard Dianetics"—a space-age Dianetics: simple and dependably effective on all cases as done by all Hubbard Standard Dianetic Auditors.

This book contains ALL the essentials of Dianetic Auditing in large, easy-to-read print easy to understand with the use of its excellent glossary.

1098 pages, illustrated, 33 LRH personally C/Sed sessions, Dianetic Axioms, bibliography, Dianetic Tape list, abbreviations list, glossary, index. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark; or Church of Scientology Publications Organization U.S., 2723 West Temple Street, Los Angeles, California, 90026, U.S.A.

**EXT AND ENDING SESSION**

When a pc exteriorizes on a good win in session or if the pc has a big win, usually followed by a persistent F/N, the usual action is to end session.

When ending session in these circumstances the Auditor must not do any other action, but smoothly end session.

This includes asking Say or Ask, running Havingness or anything other than smoothly ending session.

*Cramming Series 15*

**METER USE IN QUAL**

All Cramming actions done in Qual must be done on a meter. This means metered Why Finding, checks for misunderstands, scouting for areas of uncertainty, completion of clay demos and word clearing.

Neglect of the full use of the meter has led to half done, ineffective and often repeat Cramming cycles as the person's why or M/U was never found in the first place. Even worse, a wrong why can act as a wrong list item which brings about case chaos.

Every Cramming Officer must know and use all his tools. This includes metering.

The meter reveals all.

Use it.

2. Use only the small falls or falls or BDs. The rises will however show where mass lies.

A. If A or any of the A Group, and the pc has *had* an Int RD, do an Int RD Correction List, and handle the reads. (HCO B 29 Oct 71 R, Revised 14 May 74.)

If the pc *has never had an Int RD*, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.

B. If any of these read, do an L4BR on the earliest lists you can find that have not been corrected. Lacking these do an L4BR in general. You can go over an L4BR several times handling each read to F/N until the whole L4BR gives nothing but F/Ns. Handle a Wrong Why or Wrong Indication or Wrong PTS Item per C/S Series 78.

C. If any of these, handle with 2wc and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 20 F/Ns. On overts and withholds, get what, and E/S to F/N. On out ruds, find which rud and handle. (See GF40RB, HCOB 30 June 71R, Revised I Dec 74.) Feel sad, handle the ARC Break. (Feel sad = ARC Brk of long duration.)

D. Rehab releases on each "drug" taken to F/N. Complete the Drug RD per C/S Series 48R after handling all reads on this assessment. If pc has had a Drug RD, do L3RD on it, and handle.

E. If any of these, do L3RD and handle according to what is stated to do on L3RD.

F. Clean up any protest and inval and rehab to F/N.

- G. Find out what it is. If Yoga or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do LIC on *that* period of pc's life.
- H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If Study errors, 2wc E/S to F/N, and add a Study Correction List to the pc's program.
- I. False TA is wrong cans. Use HCO Bs 24 Oct 71, 12 Nov 71R, 15 Feb 72, 18 Feb 72, 29 Feb 72R, 23 Nov 73, all on False TA. Then clean up the bypassed charge with (1) Assess for best read (a) TA worries, (b) F/N worries. (2) Then 2wc times he was worried about (item) E/S to F/N. (3) Rehab any overruns due to False TA obscuring F/Ns.
- J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. An F/N can be obscured and mistaken for a read if Sensitivity too high. These items are all 2wc E/S to F/N. Auditors who made them need Cramming badly or retread.
- K. Can't have or Hav. Find correct Havingness process and remedy.
- L. PTS or Suppressed. Check for SP or get a full PTS RD.
- M. Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow, if qualified).
- N. 2wc to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2wc to F/N and get further C/S instructions for handling if necessary.
- O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate it if no F/N on first. If False TA handle per I above.
- P. Indicate and 2wc to F/N.

General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.

## **DIET, THEORY OF A NATURAL DIET**

Food, lack of it, incorrect planning or consumption of it or substitution or alteration of it can vastly affect health.

Man is not a primary converter of natural energy or masses but depends upon other converters for a primary conversion in most cases. (Except for Vitamin D and one or two other items Man, for instance, does not convert sunlight to energy, but, eating algae which does so convert, is able to obtain and use the energy.)

No real study of or search for the natural diet of Man has ever been made or attempted. Studies are made of diets from the viewpoint of how to correct illnesses or maintain health but not what the basic food of the human body would be. Scarcities, availabilities, what can be grown and preserved, the ease of growing, climatic and soil and water conditions, and how to make a profit are factors which have established diet instead of "What does the human body require?"

The human body is a complex biological carbon-oxygen engine, running at an operating temperature of 37° Centigrade and, being biological, has the ability to establish and repair itself. To its food requirements then are added the elements required to build as well as to run the body.

Almost all mammals live about 6 times their period of growth. Man lives only 3.33 times his growth period. As other mammals than Man are under the same or greater stress but are usually uniform in diet while healthy it can be assumed that Man has departed from his natural diet.

Some guesses have been made as to natural diet by an examination of teeth but this would not be an adequate approach.

The resolution of Man's natural diet as opposed to what he is eating might do a very great deal to improving racial health.

Man's mass efforts towards diet are targeted for quantity and profit. Efforts to establish quality are often resisted by various special interests in the mistaken idea that further knowledge of diet might reduce quantity and profit. However it could be that new food discoveries would vastly increase both production quantity potential and profit.

No simple basis for research and discovery of the natural diet exists in known statement form. The necessary first steps to the discovery of Man's correct diet would be:

- (a) The statement of a possibility that one might have existed or did exist.
- (b) A formula for search and possible discovery of it.

This HCO B has made (a) above.

The following would be a formula for its discovery.

**OVERWEIGHT:** Residual elements of food, substances or gases which are not totally eliminated or utilized by the body after ingestion.

UNDERWEIGHT OR DEBILITY: Inadequate or lacking foods, substances or gases which are needed for the activity, maintenance or repair of the body.

By listing all foods, substances or gases which are *stored* by the body, one would obtain a list of things ingested, part of which were not utilized or necessary. Simple recording of those items which put on unwanted weight would be a part of this action. The examination of overweight persons and their diets would give another section of it. Further examination of cadavers that had been overweight would round out the list. Which of these were the result of body conversion of what food would be noted.

A study and listing of all deficiency diseases and malnutrition causes as contained in *The Textbook of Medicine*, Beeson and McDermott, pages 1139-1201 and in other papers and texts would give a list of items vital to the activity, maintenance and repair of the body.

The items in the overweight and debility lists could then be compared.

One would then have, as a result, the elements of a natural diet.

A search for foods which contained *only* the elements which were *used* and *vital* could be undertaken.

The result would be the elements of a possible natural diet.

An examination of the ease of production and supply of such foods could then result in a practical natural diet.

Zonal application in specific areas might require the repetition of the formula to take in racial or climatic or production variables.

#### SUMMARY

It is said at this time that 80% of Americans are overweight. Their activity and intelligence are failing. The populations of many countries are starving or suffering malnutrition.

The wild animals, fish and fowl are ceasing to be a world source of food supply. There is no reason to go on killing off all life on the planet simply because no one knows, beyond opinion or taste, what Man's natural food was or could be.

Fads and hobbies should not be the sole source of data on this subject.

The problem could be intelligently solved and should be if we are still to have a populated planet.

Probably the planet could support billions more than it does. Most of it is wasteland.

A system pushed by David Rockefeller and others to solve it by killing off populations through sterilizing and euthanasia is simply impractical, stupid and useless suppression.

It would be a far better line to work out Man's natural diet.

**ANTI-BIOTICS,  
ADMINISTERING OF**

(This Cancels FO 2313 "Antibiotics,  
Further Data" and Revises FO 2186.)

(Note: This data is given for information alone and is not intended to prescribe or otherwise treat an individual. All prescriptions and treatments should be done in due accordance with the medical laws of any country in which a person seeks treatment.)

There are several "anti-biotics". These are moulds or chemical compounds which cause bacteria, germs, to be unable to reproduce themselves (hits their 2D) while not destroying the cells of the body. At least that is one of the leading theories of why they work. "Anti-biotic" means *anti* = against, *biotic* = living beings (such as bacteria). So it's against bugs.

Disease is said to be caused by germs or virus. Germs are microscopic cells which breed and have a bad effect on body cells and fluids. Virus is a germ that is too small to be seen in a microscope. Thus there are germ infections and virus infections.

Usually one type of germ equals one disease, i.e. typhoid fever. However, an illness can be a compound of several types of germs but this is not usual.

Virus diseases respond very badly to most anti-biotics. In fact, in the presence of penicillin, a virus sort of suspends action without any real temperature change while the penicillin is present and gets busy again when the penicillin is gone.

The effect of most anti-biotics on virus is zero. Some claims are made for some against virus. Measles is a virus illness.

So anti-biotics are mainly effective against germs. Venereal disease, pneumonia, wound infections and a long parade of diseases can be cured by anti-biotics.

When illness is accompanied by temperature, anti-biotics is usually the first thought.

Anti-biotics can however be GROSSLY MISADMINISTERED and in fact usually are even in hospitals.

The trick is to get the temperature subnormal with anti-biotics within the blood leveling period. Blood leveling means when the anti-biotic has gotten into the blood and is actually holding the infection (stopping the bacteria's "2D" from continuing). More of the same anti-biotic is given approx 2 hours prior to blood leveling time. This then brings the temperature right on down to subnormal; continue the anti-biotic so that it keeps the temperature subnormal until it just can't keep it subnormal any more and it comes up to normal. It will be found that the patient is now well and not likely to relapse. If blood leveling time is reached (the time is always stated on the instructions and contraindications write-up) and the temperature continues to rise, you have not used the correct anti-biotic and must at this point change to another kind of anti-biotic.

Each anti-biotic has its own blood leveling time: Penicillin is 24 hours, Gephhaloridine is 8 hours, Streptomycin is 6 hours, etc.

Before administering anti-biotics you must ensure that you know exactly what toxicity it is (toxic or poisonous quality the anti-biotic has to the patient). For example Streptomycin can cause pregnant mothers to give birth to children who have impaired hearing. Renal (kidneys; having to do with them) damage can be caused by certain anti-biotics if the person has too much of a certain kind of anti-biotic. Therefore, prior to administering any kind of anti-biotic ensure that you know the patient's full medical history, as well as knowing exactly what the toxicity of the anti-biotic is so that you do not damage the patient.

If not enough anti-biotic is given or if it is the wrong kind for that disease the temperature will not be heavily affected or at best sinks to normal without going subnormal. This condition can go on and on and on and the patient relapses.

Also if anti-biotics are given too briefly the temperature goes to subnormal, the anti-biotic ceases to be given, the patient feels better, then probably relapses—gets ill all over again.

The above important three error situations are:

NOT ENOUGH  
WRONG KIND  
STOPPED TOO SOON.

To these can be added:

GIVEN TOO IRREGULARLY.

This last is almost always present when you give the patient the bottle. This is a common medical error. The patients aren't doctors, seldom take the medicine correctly and often not at all. Anti-biotics should be handed out and seen taken.

Where there is a large number ill, the times can be standardized for the group. For instance all get it at 3:00 to 3:30, 9:00 to 9:30, etc. Or even 3 hourly can be done this way.

One takes the temperature before giving the pill. (A glass of water or a cigarette before temperature taking gives a false report.) Also in this way one can increase or decrease the dose depending on what the temperature was.

In very sick cases one has to watch the temperature more closely. In this way *every* time the temperature *starts* to rise from the subnormal where you are holding it, you immediately dose the patient.

An anti-biotic all by itself cannot depress temperature. It's the reaction of the disease and body that's doing that.

## TEMPERATURE

98.6°F or 37°C is normal. A thermometer can be a bit off (.1 or .2 high or low) and temperature can vary a bit for "normal" one person to the next.

Rising temperature (above normal) is a reaction to a disease. Lowered temperature (below normal) is a reaction to a disease being handled by the body or the anti-biotic plus the body.

100°F or 37.8°C is well above normal and is a sick temperature. 104°F or 40.5°C is dangerously (possible die) high.

97°F or 36.2°C is very satisfactorily subnormal.

Temperature rise is probably a body mechanism to bum up a disease, possibly not. But a slight temperature, a few tenths high, can make a person feel really bad. Then when it gets up higher they feel drifty and with it very high go delirious.

A subnormal temperature doesn't much affect how one feels.

“Chills” come with high temperature.

### ADMINISTERING DOSES

The general rule when administering anti-biotics is:

1. One gives anti-biotics until the temperature comes down past normal to subnormal and comes up to normal again with anti-biotics.

After blood leveling time of the first anti-biotic the temperature should break (go normal or below), the person going into a sweat. If it doesn't, then it's either not enough anti-biotic or the wrong kind.

2. After dosage if the temperature just came down a bit from where it was, that type of anti-biotic probably will handle the illness but *enough has not been given*. Increase the amount being given.

If after blood leveling time from the first anti-biotic the temperature did not go lower or even rose, it's the wrong *anti-biotic*. You change off to another and start all over again.

### TAKING EFFECT

The blood leveling period of an anti-biotic is always stated on the write-up of the anti-biotic (in the box accompanying the anti-biotic). The second administration is usually given 2 hours prior to the blood leveling period. Thus if the blood leveling period is 8 hours the second dose is given 6 hours after the first dose. Take the temperature before the dose and within the next 2 hours take the temperature again and you will know whether the anti-biotic is working as the temperature should now be leveling and/or falling.

If the temperature has not leveled or dropped at this period change the antibiotic. When giving anti-biotics FO 2187 “Medical Charts” must be followed. If you don't have a medical chart you don't know and can't see how the anti-biotic is working.

### PAST MALADMINISTRATION

If a person in the past has been treated wrongly with anti-biotics, i.e. got taken off as soon as temperature reached normal and was not continued as by rule 1 or 2, the germ remains dormant and *the area may reinfect at a later date*.

If more anti-biotics are then administered the temperature will go subnormal and then to normal with the anti-biotic.

In other words, the cycle will complete. At this point the germ has been killed.

### SESSIONS

Before any session, a heavy dose of vitamins should be given, if the person is on anti-biotics.

## KEY PROCEDURE

When the temperature goes subnormal keep it subnormal until it just won't stay down with the person still taking the anti-biotic. The patient will then be well.

The faster you can get the temperature subnormal the better.

## SIDE EFFECTS

Anti-biotics have side effects, often very bad.

A patient can be allergic to a certain anti-biotic, meaning he goes red, gets hives, has bad reactions in varying degrees of severity. If so get him on another anti-biotic now.

You can test for allergy by scratching the skin and putting a dab of anti-biotic on it (not the sugar or protective covering) on a Band-Aid. After a while if the person is allergic to it the area will get red and puffy. This is not usually done unless you are being super cautious.

The Chloro\_\_\_ and Aureo\_\_\_ families can affect the sense of balance and early preparations destroyed the sense of balance forever.

All oral anti-biotics sooner or later give the patient a stomach ache and indigestion. So they should be taken with milk or after a meal, never with just water.

The *longer* you keep them on an anti-biotic the harder it is on the patient's system.

The operating rule is *give enough of the right kind to get a fast cure.*

If you started on the wrong kind get them on the right kind the moment you detect the error.

## DISEASE CYCLES

Diseases have their own cycles of action and time periods if not given anti-biotics. Some run for days, some for weeks, some for a lifetime. Gonorrhea for instance lasts a year in a man, five years in a woman. Syphilis has its own cure, not an anti-biotic, which is "Ehrlich's Magic Bullet", nearsphenamine, Preparation 606, which is a one-shot cure if done right and only kills 1 out of 10,000. Syphilis untreated is a lifetime cycle and drives one crazy, the condition being known as " paresis". Perhaps modern anti-biotics will include it as curative.

Pneumonia runs about 6 weeks on its own if the patient lives.

These disease cycles do not hold true when anti-biotics are used. They take as long to cure as it takes to slam the temperature to subnormal and hold it there until it can't be held any longer. 24 to 36 hours is the new cycle for lighter illnesses treated with *properly* dosed *correct* anti-biotics.

More serious diseases require longer but mostly because the areas they infect have poorer blood circulation (such as bone infections).

## SULFA DRUGS

The oldest anti-biotics are the sulfa drugs. These are white tablets usually. Enterovioform for stomach illness is a sulfa drug. They have a very heavy side effect of dizziness and sometimes delusion (spiders on the wall).

Sulfathiazole is usually now used as a powder to pour in open wounds and it and its brother sulfas are the only ones that can be used “topically” which means as a surface treatment (as different from internal).

They follow when taken internally all the rules of anti-biotic administration.

“Gerontal”, a trade name for a water-soluble sulfa, is excellent in kidney infections if the rules of anti-biotics are followed. It needs large quantities.

You can fall back on sulfa when all else fails.

Sulfas are chemical compounds.

## PENICILLIN

Penicillin is the first of the anti-biotics made from mould (as in mouldy bread, etc.).

It is the USUAL anti-biotic.

It is growing less effective due to diseases getting used to it and medical misadministration of it.

A disease treated with an anti-biotic which is not cured, when communicated to another body becomes able in the new body to resist treatment. Thus new anti-biotics are continually searched for.

However, penicillin is the basic, usual, anti-biotic to use.

ORAL penicillin is not only WORTHLESS but dangerous in that it has never cured anything yet. Taking it by mouth doesn't work and I don't know why companies sell it. Stomach juices kill it.

Penicillin has to be SHOT with a needle. *Procaine* penicillin in 1 cc or 2 cc amounts, shot into the buttocks with the person lying down on his face (muscles relaxed), lasts for 24 hours when a 2nd shot is given. Other types of penicillin can also work this way. *Ordinary* penicillin however has to be shot every 3 hours! Read the literature carefully.

There is a 2nd type, “G”, for people allergic to the first type (2 types so one can be used if somebody is allergic to the other). If somebody is allergic to it, it's pretty awful.

If a shot of 24 or 36 hour penicillin hasn't worked in 8 hours to reduce the temperature at least somewhat use some other anti-biotic at once.

Penicillin is no good even when shot for stomach or bowel complaints like dysentery. It is excellent for other types of bacterial infection. It is usually no good for virus infections.

## OTHER ANTI-BIOTICS

Chloro\_\_\_\_Aureo\_\_\_\_Strepto\_\_\_\_ compounds are offered under a variety of trade names. The blank fills “mycin” or “mycetin”. Kemacetin or some such spelling is a company trade name for Chloro\_\_\_\_. Chlorofin is almost the same thing.

Read the literature for the strength of each tablet or shot and what it is good for. You can puzzle this out even in a foreign language.

Follow the literature.

If one doesn't work, another will. Chloro or Aureo\_\_\_handles dysentery, stomach and bowel upsets, some viruses and a lot of other things.

## VITAMINS

B1 should be given when giving anti-biotics or the patient gets depressed as all the B1 gets eaten up by anti-biotics, just as alcohol or sleeping pills eat up B1. 100 mg of B1 a day is an absolute minimum for a person taking anti-biotics.

B2 is vital to give anyone with stomach and bowel complaints whether he is on anti-biotics or not.

Vitamin C is excellent for helping colds and infections. 250 mg is the usual dose a couple times a day. It's much like fruit in that fruit contains a lot of it. If anyone's teeth or gums get sore push in lots of Vitamin C.

So B 1 and C are usual along with anti-biotics. B1, C and B2 are vital to help clear up stomach and bowel complaints along with anti-biotics.

## INTESTINAL BACTERIA

Natural intestinal bacteria are vital to digest and handle food. These all get killed off by oral anti-biotics and must be replaced.

Yoghurt is the usual remedy and one should eat it for several days, a portion a day after getting well with anti-biotics.

The clever French put these exact bacteria in glass vials for daily dosage. This does the same thing even better than yoghurt. It is called "Biolactyl".

*Note:* Under medical supervision, LRH has been handling anti-biotics as a ship captain for a long time and has done as well independent biological research. Some of the data (the use of subnormal temperatures) is not known to the medical profession but was discovered by Ron in 1952 when he had to discover it to save an important person's life after two relapses from doctors using older methods. It has since been proven out by many quick successes using anti-biotics on ships.

A person treating someone on anti-biotics must go over this HCO B very carefully as it is very condensed, very precise and means exactly what it says. When this data is not known some get into long illnesses which are needless.

A person treating another with anti-biotics has to know many other things but the above is very vital.

All Div 5 personnel and anyone who will administer anti-biotics must \*-rate M9 M4 in Qual on this HCO B. Medical charts (see FO 2187 "Medical Charts") must be made up so that, in case of any fever, the person will be treated standardly to a speedy recovery.

Cramming Officers  
Auditors

**OUT BASICS AND HOW TO  
GET THEM IN**

In C/Sing lately I have had spectacular case wins just using *basics*. Like getting the Pc in session, F/Ning what was asked not something else, false TA correction, false reads on W/Hs, catching a forcing of the Pc's attention onto the meter and his TA, etc, etc.

Just fundamental auditing. And it has sent bogged cases soaring.

Here is a list of the out basics caught which can and did cause "bogs". Noted with these outnesses are the HCO Bs and BTBs which if known, understood and applied will correct the outness.

Get flubbing Auditors and C/Ses word cleared, starrate checked out and drilled on the materials appropriate to the out basic found in his or her auditing or C/Sing.

1. Auditing preclears in a bad and noisy environment (Auditor doesn't know he is responsible for the session environment).

---

I am catching C/Ses for real big actions on top of these corny out basics. Errors in Tech are OUT BASICS.

You don’t have to figure figure on Cloud 89 on what’s wrong when the Pc simply hasn’t picked up the cans!

I bet a lot of cases would go like a shot on just basics!

**VANISHING CREAM AND FALSE TA**

Ref:	HCO B	24 Oct 71	"False TA"
	HCO B	12 Nov 71R	"False TA Addition"
	HCO B	15 Feb 72	"False TA Addition 2"
	HCO B	18 Feb 72	"False TA Addition 3"
	HCO B	29 Feb 72RA	"False TA Checklist"
	HCO B	23 Nov 73R	"Dry and Wet Hands Make False TA"

After further and more extensive tests vanishing creams have proven unsuitable as a solution to dry hands.

In some cases vanishing creams have actually dried out pcs' hands and caused a false high TA.

Vaseline Intensive Care Lotion has proven very workable when applied to a pc's hands, rubbed in and any excess wiped off.

Another cream called Locorten was also found workable but it contains cortisone which burns the eyes if you rub them with your hands. Further tests are underway on Locorten without cortisone but these are not yet complete.

Another hand cream formula was found 90% effective upon test and is somewhat similar to the Locorten formula without cortisone. Its formula is:

75 grams	Emulsified Cetomacrolis Wax (80% cetostearyl alcohol and 20% cetomacrol 1000)
100 grams	Cetyl Alcohol
20 grams	Sorbitol Solution 70%
1 gram	Sorbic Acid up to
500 grams	water

You could have this cream made up by any pharmacist.

**A NOTE ON FOOTPLATES**

Footplates generally give a wrong TA position and obscure F/Ns and reads.

They are not recommended except as a last resort where the pc cannot use cans.

**FALSE TA HANDLING**

It has never been OK to call a pc's attention to his hands or TA or meter during a session. Therefore when handling a false TA get the TA in range with hand cream or can size or grip *before* session.

Don't check for hand cream or can grip or change cans during the session except as directed on correction lists such as a C/S Series 53RJ under false TA.

Otherwise it throws the pc out of session and puts his attention on his TA.

Use the session for auditing.

## DRY AND WET HANDS

### MAKE FALSE TA

A couple of years ago some auditors were solving high TA problems by putting hand cream on the pc's hands when they were calloused and talcum powder on a pc's hands when they were too wet. Since no research had been done they were censured.

Research has now been done on this matter of dry and wet hands.

Apparently when a person has taken certain medicines or chemicals, or uses detergent soaps or is in contact with certain chemicals (such as those in some furniture polishes) the ordinary skin oils vanish. These oils are needed to make an electrical contact with the cans.

When these oils are absent, there is no adequate electrical contact and the "TA is High".

When a person is deficient in certain minerals or vitamins such as magnesium or B Complex, his hands can be excessively wet.

Either of these two conditions in hands or *feet* can produce an incorrect TA position.

The dry condition produces a false high TA.

The overly wet condition produces a false low TA.

The TA depends on normally moist hands. This does not mean the meter works on "sweat". It does mean the meter works only when there is a correct electrical contact.

Too much and too greasy hand cream could produce too low a TA.

*Vanishing creams don't work as they are found to actually dry out the skin after repeated application and so produce a falsely high TA.*

Too much powder or drier could produce too high a TA.

Therefore one must not go to extremes.

### DRY HANDS

The excessively "dry" hand is seen as shiny or polished looking. It feels very dry.

The correct treatment is to use a *hand cream such as Vaseline Intensive Care Lotion* (obtainable from any cosmetics store) not a greasy hand cream or *vanishing cream*.

*A good hand cream* rubs all the way into the skin and leaves no excess grease.

This restores normal electrical contact.

*Such a hand cream would only* have to be applied *once per session*—at session start—as it lasts for a long while. *Hand cream is never applied during session.*

This would apply to some footplate cases as well (whose hands are defective or too heavily calloused).

If a cream leaves smears on a can, it is too heavily applied or too little absorbed.

*Hand* cream is usually smeared on, rubbed in and can then be thoroughly wiped off. The hands (or feet) will usually produce, then, a normal TA and meter response.

#### WET HANDS

Anti-perspirants can be applied to too wet hands. There are many brands of these, often a powder or spray.

It can be wiped off after application and should work for two or three hours.

It can be applied to hands or feet (for footplates).

If the TA then goes too high, use *hand* cream on top of it.

#### SUMMARY

While much work could be done still, the above is enough for a practical result.

#### WARNING

Hi TAs and Lo TAs do not widely F/N. If you are getting wide persistent F/N with the TA too high (above 3) or too low (below 2) you have a pc whose hands are too dry or too wet. Using this HCO B should correct it and in future sessions you should continue the remedy on *that pc*.

NOTHING in this HCO B excuses the misreading or falsifying of a TA. Get the TA in normal range with this HCO B before you start calling processes ended.

C/S 53RJ and the False TA checklist HCO B 29 Feb 1972RA, Revised 23 Apr 75, are your tools for handling too high and too low TAs.

The only other conditions I know of that make an auditor mess up a pc's TA are:

- (a) A discharged meter (registers high).
- (b) An incorrectly set meter by trim button.
- (c) A "fleeting F/N" where the pc F/Ns so briefly the auditor misses it and overruns.
- (d) Bad TRs.
- (e) Unflat processes.
- (f) Overrun processes.
- (g) Heavy drugs or medicines.

False TA often comes to light when the auditor runs out of reasons it is high or low and it dawns on him that he is dealing with false TA. In the latter case he should know all MATERIALS ON THIS SUBJECT OF FALSE TA (given on HCO B 29 Feb 1972RA, Revised 23 Apr 75, as references) AND REMEDY THE FALSE TA SITUATION AND THEN RESUME NORMAL AUDITING. He must not go on calling high or low TA F/Ns just by assuming the TA is false.

Given a contact the meter always tells the truth.

HCO B 23 Nov 73 Dry and Wet Hands  
Make False TA

The following are the items to be checked by an auditor on any pc. It need only be done once unless the check itself is suspected false, or if conditions of the pc's hands, etc change.

The checklist is kept in the pc folder and is entered on the folder summary as an action done.

The value of operating with correct can size should not be underestimated, the reference HCO Bs state why.

The auditor signs and answers the following points on the checklist, and gets answers from the pc where needed.

-----

R-Factor to pc: "We are going to check the cans and adjust them to get the best accuracy."

1. Is the meter charged fully? \_\_\_\_\_
2. Is the meter trimmed correctly? \_\_\_\_\_
3. Are the leads connected to the meter and cans? \_\_\_\_\_
4. Are the cans rusty? \_\_\_\_\_
5. Are pc's hands excessively dry requiring *hand* cream? \_\_\_\_\_
6. Are the pc's hands excessively wet requiring powder? \_\_\_\_\_
7. The pc is *NOT* being told continually to wipe his hands? \_\_\_\_\_
8. The pc's grip on the cans is *NOT* being continually checked by the auditor in a way that interrupts the pc? \_\_\_\_\_
9. TA position on large cans?  
Size approx 4 7/8 inches by 2 5/8 inches or 12 1/2 cm by 7 cm \_\_\_\_\_
10. TA position on medium cans?  
Size approx 3 3/4 inches by 2 1/8 inches or 9 cm by 5 cm \_\_\_\_\_
11. TA position on small cans?  
Size approx 2 inches by 1 3/16 inches or 5 cm by 3 cm \_\_\_\_\_
12. Are the cans too large for pc? \_\_\_\_\_
13. Are the cans too small for pc? \_\_\_\_\_
14. Are the cans just right in size? \_\_\_\_\_

15. Are the cans cold? \_\_\_\_\_
16. Are the pc's hands dry or calloused? \_\_\_\_\_
17. Does the pc have arthritic hands? \_\_\_\_\_
18. TA position on foot plates? \_\_\_\_\_  
 (Foot plates are used and TA checked on them when the answer to 16 & 17 is affirmative.)
19. Are the pc's feet calloused or excessively wet or dry? \_\_\_\_\_
20. Does the pc loosen his grip on the cans? \_\_\_\_\_
21. Check the pc's grip, does he hold the cans correctly? (See E-Meter Drill 5.) \_\_\_\_\_
22. Is the pc hot? \_\_\_\_\_
- 22A Is the pc well slept? \_\_\_\_\_
23. Is the pc cold? \_\_\_\_\_
- 23A Is the pc hungry? \_\_\_\_\_
24. Is it too late at night? \_\_\_\_\_
25. Is auditing being done not in the pc's normal *regular* awake hours? \_\_\_\_\_
26. Are there rings on the pc's hands? \_\_\_\_\_
27. Is the pc wearing tight shoes? \_\_\_\_\_
28. Is the pc wearing tight clothes? \_\_\_\_\_
29. Is it actually chronic High or Low TA case condition? \_\_\_\_\_
30. Has the pc gone into despair over his TA? \_\_\_\_\_

The handling of these points is stated in the reference HCO Bs.

The handling of high or low TA after checking these points is by C/S 53RJ, Short Hi-Lo TA Assessment C/S.

The way to be sure of a C/S 53RJ or Hi-Lo TA list is by continued assessment and handling of these lists until an F/N on assessment is gotten.

So standard tech handles the high and low TA. The C/S Series gives more data on the subject.

HCO POLICY LETTER OF 7 APRIL 1961RA  
*REVISED 30 MAY 1975*

Remimeo

**JOHANNESBURG CONFSSIONAL LIST**  
**—REVISED**

(Revised to exclude “represent” questions which were L&N type actions and could cause upset in the event of a wrong item. If a *pc lists* to a question the rules of L&N apply.)

This is the Johannesburg *Confessional List* further amplified by myself. This is the roughest *Confessional List* in Scientology. We will call it the “*Jo’burg Confessional*”. It does not necessarily replace other *Confessional Lists* but it is probably the most thorough one we have now.

In reprinting this form use legal (foolscap) length and double-space everything except directions.

It must be done by a *person* qualified *per HCO PL 13 November 1974*, “*HCO May Do Confessional Lists*”. Every reading item must be F/Ned.

*JOBURG CONFSSIONAL LIST*  
*HCO Confessional Form 2*

Name of Person \_\_\_\_\_ Date \_\_\_\_\_

Name of Auditor/HCO Terminal \_\_\_\_\_

**DIRECTIONS.** Attempt to clear any fall observed. Mark any fall observed or any meter reaction change elicited by the question. Then write what it cleared on. Mark largely if the fall could not be cleared since this constitutes a failure to pass. Only fail somebody if there is no needle motion of any kind even with sensitivity at 16 on any question. If they are failing because it is hard to clear a question, work very thoroughly on it in an effort to clear it. In all cases complete the test.

If an important question fails to clear even after *Auditor/HCO Terminal* has worked very hard to get it off, the test is flunked.

The following statement should be read or quoted to the person *receiving the Confessional List*:

“We are about to begin a *Confessional*. We are not moralists. We are able to change people. We are not here to condemn them. While we cannot guarantee you that matters revealed in this *list* will be held forever secret, we can promise you faithfully that no part of it nor any answer you make here will be given to the Police or the State. No Scientologist will ever bear witness against you in Court by reason of answers to this *Confessional*. This *Confessional* is exclusively for Scientology purposes. The only ways you can fail this *Confessional* are to refuse to take the test, to fail to answer its questions truthfully or if you are here knowingly to injure Scientology. The only penalty attached to failure of this *Confessional* is our refusal to employ you or issue you a certificate, and this will only happen if we find you are trying knowingly to injure Scientology. You can pass this test by (1) agreeing to take it, (2) answering each question truthfully and (3) not being a member of a subversive group seeking to injure Scientology.”

The first questions are nul questions to determine your reaction pattern.

We will now begin:

*Lie Reaction:*

- A. Are you sitting in a chair?
- B. Are you on the Moon?
- C. Are all cats black?
- D. Am I an ostrich?
- E. Is this Earth?
- F. Have you ever drunk water?
- G. Are you holding up a tree?
- H. Am I an elephant?
- I. Are you a table?
- J. Is this a *Confessional List*?

- 
- 1. Have you ever lived or worked under an assumed name?
  - 2. Have you given me your right name?
  - 3. Are you here for a different purpose than you say?
  - 4. Have you ever stolen anything?
  - 5. Have you ever forged someone else's signature?
  - 6. Have you ever blackmailed anybody?
  - 7. Have you ever been blackmailed?
  - 8. Have you ever smuggled anything?
  - 9. Have you ever been in prison?
  - 10. Have you ever indulged in drunkenness?
  - 11. Have you ever done any reckless driving?
  - 12. Have you ever burglarized any place?
  - 13. Have you ever embezzled money?
  - 14. Have you ever assaulted anyone?
  - 15. Have you ever been in jail?
  - 16. Have you ever told lies in court?
  - 17. Have you ever had anything to do with Pornography?
  - 18. Have you ever committed Arson?
  - 19. Have you ever been a Drug Addict?
  - 20. Have you ever peddled Dope?
  - 21. Have you had any dealings with stolen goods?
  - 22. Do you have a Police Record?
  - 23. Have you ever raped anyone?
  - 24. Have you ever been involved in an abortion?
  - 25. Have you assisted in any abortion?
  - 26. Have you ever committed adultery?
  - 27. Have you ever practiced Homosexuality?
  - 28. Have you ever had intercourse with a member of your family?
  - 29. Have you ever been sexually unfaithful?
  - 30. Have you ever practiced Sodomy?
  - 31. Have you ever consistently made a practice of sexual perversion?
  - 32. Have you ever slept with a member of a race of another color?
  - 33. Have you ever committed culpable homicide?
  - 34. Have you ever bombed anything?
  - 35. Have you ever murdered anyone?
  - 36. Have you ever kidnapped anyone?
  - 37. Have you ever done any illicit Diamond buying?
  - 38. Have you ever betrayed anyone for money?
  - 39. Have you ever threatened anyone with a firearm?
  - 40. Have you been in illegal possession of firearms?
  - 41. Have you ever been paid for giving evidence?
  - 42. Have you ever destroyed something belonging to someone else?
  - 43. Have you ever been a spy for an Organization?

44. Have you ever had anything to do with Communism or been a Communist?
45. Have you ever been a newspaper reporter?
46. Have you ever had intercourse while under the influence of drugs?
47. Have you ever had intercourse while under the influence of alcohol?
48. Have you ever used drugs or alcohol to procure sex?
- 48a. *Have you ever used blackmail to procure sex?*
49. Have you ever ill-treated children?
50. Have you ever taken money for giving anyone sexual intercourse?
51. Have you ever had any connection with a brothel?
52. Have you ever had anything to do with a baby farm?
53. Have you ever been a spy for the Police?
54. Are you afraid of the Police?
55. Have you ever done anything you are afraid the Police may find out?
56. Have you ever falsified the books in any firm you worked for?
57. Have you ever done anything your Mother would be ashamed to find out?
58. How could you help yourself generally?
59. *Have you committed any overts against yourself?*
60. How could you help your family?
61. *Have you committed any overts against your family?*
62. How do you feel about sex?
63. *Have you committed any overts against the org?*
- 63a. *Have you committed any overts against others?*
- 63b. *Have you committed any overts against a group?*
64. How could you help the org?
- 64a. *How could you help others?*
- 64b. *How could you help a group?*
65. How could you help mankind?
66. Have you ever controlled people?
67. How do you feel about being controlled?
68. *Have you committed any overts against mankind?*
69. How could you help animals and plants?
70. *Have you committed any overts against animals and plants?*
71. How could you help material things?
72. *Have you committed any overts against matter?*
- 72a. *Have you committed any overts against energy?*
- 72b. *Have you committed any overts against space?*
- 72c. *Have you committed any overts against time?*
73. How could you help Spirits?
74. *Have you committed any overts against Spirits?*
75. How could you help God or Infinity?
76. *Have you committed any overts against God?*
- 76a. *Have you committed any overts against Infinity?*
77. What is Communism?
78. Do you feel Communism has some good points?
79. Have you ever been a member of the Communist Party?
80. Have you ever been a member of any group with similar ideals as the Communist Party?
81. Do you know any Communist personally?
82. Have you ever injured Dianetics or Scientology?
83. Have you ever committed any overts on a Scientology Organization?
84. Have you ever stolen anything from a Scientology Org?
85. Do you have any overts on LRH?
86. Have you ever had unkind thoughts about LRH?
87. Do you have any overts on Mary Sue?
88. Have you ever had any unkind thoughts about Mary Sue?
89. Have you ever injured any Scientologists?
90. Have you ever had any unkind thoughts about Scientologists?
91. Have you ever betrayed Scientology?
92. Do you know of any secret plans against Scientology?
93. Have you ever taken money to injure Scientology?
94. Have you ever used Dianetics or Scientology to force sex upon someone?
95. Do you know of any plans to injure a Scientology Organization?

96. Are you upset about this *Confessional List*?

# DIANETICS AND SCIENTOLOGY TECHNICAL DICTIONARY

by L. Ron Hubbard

**Published  
June 1975**

The Dianetics and Scientology Technical Dictionary is a vital necessity to all Scientologists.

It contains over 3,000 Dianetic and Scientology words and 7,000 definitions taken from the 1950-1975 writings and lectures of L. Ron Hubbard, with the exact source given for each definition so that you can refer to source if you want more elaboration on the subject.

Every book, tape and bulletin ever published, millions of written and spoken words, were combed for Dianetic and Scientology words and definitions and then checked and rechecked.

“The student who is not completely conversant with these exact words as contained in this dictionary will find himself drowsing over his bulletins and utterly appalled when he tries to obtain results which are not forthcoming due to his lack of understanding of some small word.”

L. Ron Hubbard—Introduction to the *Technical Dictionary*.

In addition to giving an understanding of the vocabulary of the subject and clearing up misunderstood words and abbreviations in connection with Dianetics and Scientology, there is a further major use for this dictionary. The student requiring information about any area of Dianetics or Scientology need only look up the words connected with that area and he will be provided with references to appropriate material for further study of that area.

Here is a wealth of knowledge all by itself! Things are defined that Man searched for for 50,000 years.

592 pages, illustrated, hardcover with dust jacket. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark; or Church of Scientology Publications Organization U.S., 2723 West Temple Street, Los Angeles, California, 90026, U.S.A.

### TECHNICAL QUERIES

Over the years we have had a great deal of experience with “Technical Queries”.

Many new trainee Auditors have come to Flag. A certain percentage of these were very happy to be there because now their “technical queries” could be “answered”. And so my lines would carry their queries and of course an investigation would ensue to find why an org Class IV or VII would have technical queries.

**IT WAS FOUND IN ALL CASES THAT THE PERSON WITH THE TECHNICAL QUERY HAD MISUNDERSTOOD WORDS OR HAD NEVER READ THE MATERIALS OR LISTENED TO THE REQUIRED TAPES.**

The misunderstood words were things like “Scientology”, “Auditor”, “HCO”, “tone arm”—things the person was encountering continually in his work.

EVERY one of these “technical queries” was already fully covered in the materials but the person had never bothered to clean up his Mis-U's or, occasionally, read the basic materials available to him.

It was further found that **IT WAS ABSOLUTELY FATAL TO TRY TO ANSWER THESE QUERIES OR EXPLAIN THEM.** The explanation given would just dive in under the misunderstood words or absence of study and the person would just have more bewildered queries.

So it became the very firm rule on my lines that when technical queries were received the person was at once metered properly to locate the Mis-U words and get them defined or the false report that he or she had studied the materials at all.

When “technical queries” were handled this way and **ONLY** when they are handled this way, the result was F/N VVVVVGIs. Any explanation brought only BIs.

So the rule is very, very firm.

**ALWAYS ANSWER A TECHNICAL QUERY BY REFERRAL TO MATERIALS AND A CRAMMING ORDER TO FIND THE MIS-U WORDS.**

The Auditor who is not handled this way will go on failing.

Further, **VERBAL** tech explanations or letters which explain things enter a false data line into the scene and drives tech further out. Such actions create a squirrel scene. So:

**NEVER EXPLAIN VERBALLY OR ON PAPER IN ANSWERING A TECHNICAL QUERY.** Only refer to materials and issue cramming orders to find the Mis-U's or the unstudied materials.

Probably the reason why Flag trained Auditors and Auditors who have been working on my C/S lines produce such phenomenal results is that the above two rules are fully enforced wherever I am working.

And it is true—the best Auditors in the world have been made by applying these rules.

And now that you have the Tech Dictionary it is especially easy.

So DON'T do an Auditor or Student in by explaining the answers to technical queries. Apply these rules and make them come through on the original materials.

To do anything else is a severe disservice.

These are the basic rules of keeping tech in.

*C/S Series 95*

**“FAILED” CASES**

There are no failed cases. There are only failed C/Ses and Auditors.

In a recent test; this was proven conclusively. A number of no-case-gain, slow-case-gain, sickie and “failed cases” were rounded up. Using well trained Flag Auditors and the most basic of lists, every one of these cases was soon flying.

At another time, lists which had been “nulled” by a group of trainee Auditors were then taken over, on the same pcs, same lists, and renulled by Class Xs. Over half the reading items had been missed by the trainees—they simply couldn’t make the list read on the pcs. Yet the lists were as alive as skyrockets. The pcs, under the trainee Auditors, had accumulated all manner of by-passed charge by having reading items ignored. And in some cases, having non-reading items given attention.

To a trainee, all this seems incredible and mysterious. He does not realize how very bad his metering can be, how faint and fainting his TR 1. He has numerous tricks which defeat him—such as keeping his sensitivity on 32 for a pc who only requires sensitivity 1, whereas the Auditor misses all his F/Ns as he can’t keep the needle at set. He doesn’t put his meter so he can see pc, paper and meter dial all in the same scope of vision and misses the reads. His Auditor presence is so poor and his attitude so unprofessional that the pc isn’t really in session. His own introversion prevents him from really observing the pc’s tone or reaction.

All these faults can be cured and HAVE to be before an Auditor can call himself a real Auditor. Short of that he is just a fooling-about dilettante. And he has “failed pcs”.

It takes hard sweating work to get good enough to be a real Auditor. It takes hours and hours and hours of TRs the hard way. It takes a high degree of honesty that includes never faking and going by misunderstands in his materials, always being honest in his auditing reports, constant practice with his metering, drills with the tone scale and a large degree of self-discipline.

It isn’t “talent” that makes the good Auditor. It is practice and more practice until he himself knows first that he didn’t know and then knows that he really knows.

The source of out tech is only laziness and dishonesty. Someone who is afraid of work thinks he can PR the C/S and the pc, fumble his way through and succeed out of fakery. That route is failure. And it ends in “failed cases”. Don’t be a psychologist or psychiatrist. That was their route.

In the hands of a thoroughly trained and drilled Auditor, Scientology works and works splendidly.

There are no dog cases, no “ncgs”, no failed cases.

But there are “Auditors” who don’t study and drill hard enough to become real Auditors. And there are C/Ses who don’t know their business and who don’t keep up their study and are too lazy to FES or read sessions or cram their Auditors.

There are an awful lot of excellent Auditors and many very fine C/Ses. But in some local areas, where verbal tech gets going and ethics is out, the quality sags. And there you have ncgs and slow pcs and “failed cases”.

Want to know how lazy your C/Ses and Auditors are? How many ncgs and failed cases do you have around? If you have *any* at all, tech in your area is out.

A C/S 53RJ taken to F/Ning list and a GF40X taken to an F/Ning list will cure any ncg or failed case. BUT it has to be done by an Auditor who has sweated it out doing the checksheets of Qual required to make a list read.

So do not send to find the real who when cases bog or “fail”. Don’t blame and repair cases. Repair the Auditors and C/Ses.

It not only can be done. It is easier to do it than wrestle around with an “ARC Broken field”.

And it not only can be done, it MUST be done.

ALL AUDITORS

**PTS RUNDOWN AND VITAL INFO RD  
POSITION CORRECTED**

It has just come to my attention that HCOB 9 December 1971RA and HCOB 6 October 1974, which were written by then CS-4, restricted. PTS handling and Vital Info RD to Expanded Dianetics which is a false position.

The PTS Checksheet is Board Policy Letter 31 May 1971RB. That checksheet MUST be studied and passed by ALL staff concerned with PTS handling whether in HCO or in Div 4 or Div 5. In short, THAT is the actual position on the grade chart or in classes of the PTS Rundown.

When listing has to be done to handle a PTS person or to find a why or who, on PTS RDs or anything else, it is dangerous for anyone but a Class IV who has been interned to do it. THAT is a matter of who can do listing. It is NOT a matter of where the pc is on the grade chart.

**YOU HAVE TO HANDLE THOSE WHO ARE PTS AS PTSes BEFORE YOU CAN AUDIT THEM SUCCESSFULLY.**

**ANYONE HANDLING PTS PEOPLE MUST HAVE PASSED AND BEEN CERTIFIED ON THE PTS CHECKSHEET, BPL 31 May 1971RB.**

The errors put in these two HCOBs have caused orgs and the field to fill up with PTSes which went unhandled. You cannot audit a PTS person on anything but what handles PTSness.

The HCOBs are being reissued as HCOB 9 December 1971RB and HCOB 6 October 1974R to correct the error of placing PTS RD in Expanded Dianetics where it does not belong and placing the Vital Info RD in Expanded Dianetics.

A mission that worked more than a year correcting HCOBs that were marked as written by me but weren't and reissuing as Board Technical Bulletins missed these. They otherwise did well. The person who wrote the originals found them and called it to attention as an error.

**PLEASE CORRECT THIS IN ALL PACKS.**

## CASES

One remaining problem in cases was "PTS phenomena."

P.T.S. means Potential Trouble Source. When someone is suppressed he becomes a Potential Trouble Source.

There are numerous HCOBs and PLs on this subject. All of them are true observations and predictions.

The cause of ROLLERCOASTER is PTS. Rollercoaster means a slump after a gain. Pcs who do not hold their gains are PTS.

S and Ds (for Search and Discovery) was the earlier approach. These are still valid and "3 S&Ds" as a rundown is used in the PTS Rundown without change.

Now with the PTS Rundown, the handling of this common and all too frequent case condition can be handled.

## WHO DOES IT

Hopefully it can be done by Class IVs who are also HDCs, HGC Okay to Audits.

For an Auditor who is not HDC Class IV Okay to Audit HGC by competent internship to attempt a PTS Rundown would be very risky for the pc as it needs exact listing, exact TRs, exact metering, exact Code keeping and very honest auditing and competent C/Sing.

## DEVELOPMENT

Earlier discovery and development of the PTS theory is extensively covered.

The recent wrap up came about through my OT research in November 1971.

The principle breakthrough was realizing one should NOT invalidate having known certain people before.

This is similar to the past life discovery in 1950. Some people thinking this was “unpopular” frowned on it. Some others were only famous characters so flagrantly that past lives were easily invalidated. But people who don’t go past track in Dianetics don’t recover. Even running them as “imaginary” as in *Science of Survival* advices suddenly breaks through for a stalled Dianetic Case.

In this same way with young men and girls using “I knew you when you were “ for 2D advantage tended to invalidate having known certain individuals before this life.

But now it turns out that the ONLY PTS situation that is serious and lasting and can cause a rollercoaster comes from having known the person *before* this life.

Possibly in the last life or earlier lives one knew persons before *that* life too. This however shows up in the 3 S&Ds.

### BREAKDOWN

There are only four points of breakdown of the PTS Rundown.

1. Improperly audited. Auditor not able to always do a correct list, TRs out, metering out, poor R3R, just plain untrained or not totally familiar with this Rundown.
2. Pc not completely set up. Like: Has TA trouble but no C/S 53 done, is a no change case but no GF 40R done, old auditing not repaired by a GF and proper programming or no C/S 54 or too tired or too ill for the R3R.
3. The Rundown not fully and completely done, but chopped or left incomplete (pc will still rollercoaster).
4. People who “can’t run engrams”—which means a druggie who hasn’t had a full Drug Rundown.

There is nothing especially tricky about the auditing of the PTS Rundown except that all auditing should be of flubless quality and when the PTS RD is flubbed by bad lists or poor R3R or out TRs or poor metering it really IS a mess. The RD is so powerful that errors in C/Sing and auditing it are especially rough.

Currently sick pcs should not be run on the PTS Rundown as a standard practice. It IS what they need BUT you can easily overwhelm a sick pc with engram running.

The time to run a PTS RD is when the pc is set up and when it is noted the pc rollercoasters, not when he collapses with a temperature.

Rollercoaster can also be caused by a bad Interiorization RD or Int repair, out lists, bypassed charge of other descriptions. These should be gotten rid of before a PTS RD is attempted.

*The prerequisites for a PTS RD are covered in 2 and 4 above. /t is not restricted to Ex Dn but is a separate RD developed before Ex Dn.*

### BEHAVIOR OF RD

Valence shifts occur rapidly and frequently in PTS RDs and should be noted on the worksheet.

The R3R can sometimes be a bit of a long haul on a basic incident. Be sure with an L3RD. But get an erasure of basic no matter how hard you have to work at it. In the

PTS RD incidents can “develop.” Missing pieces can appear. A whole new slant can occur on the subject when one goes to F2 after finishing F1.

Chronic somatics are likely to appear and be handled on this Rundown. And case conditions not previously remedied by other means can be remedied by this Rundown.

#### END PHENOMENA

There is a point where the pc is absolutely sure he knew the person before this life. This is NOT the EP.

A pc can exteriorize on this RD. That is NOT the EP (but requires an Int RD if none has been done before and the TA goes high, or its correction).

THE EP IS A PC WHO IS GETTING AND KEEPING CASE GAINS AND NEVER AGAIN ROLLERCOASTERS.

#### FLOWS

You cannot use Flow 1 as any old direction to or from pc. To do this fouls it up. *Flow 1 is to the pc.*

Flow 2 is pc to the person (or place).

Flow 3 is the person (or place) to others.

If you did F1 R3R as “Locate a time you knew      “ you might get to the pc, pc to the person or the person to others. You would not get a clean motivator F1. This would leave the PTS chain partially run.

This is also true of the ruds.

#### RE-DOs

If the pc does *not* recover, then reasons for failure 1 to 4 above should be checked

Then the lists and R3R should be handled with L4BR and L3RD.

Then an overlooked item or person or place should be scouted for and handled. There is no question of the validity of the Rundown. It might have missed. “True love” might have been passed over as unlikely but such obsessive attraction is always based on having known (and probably done in) the other person.

Then the true EP will be attained where it only appeared to be before.

## THE RUNDOWN

### A. PAST S&Ds:

1. Collect up past S&D items (which should have already been verified on set-ups) or get the pc to tell you them if no folder.
2. On the earliest one ask if known before. If it so reads handle per steps 3-6. If not, pick next item and repeat this check for validity.
3. R3R Triple/quad the item using these commands:
  - F1. Locate a time when \_\_\_\_\_ did something to you. R3R.
  - F2. Locate a time when you did something to \_\_\_\_\_. R3R.
  - F3. Locate a time when \_\_\_\_\_ did something to others. R3R.
  - F0. *Locate a time when you did something to yourself because of \_\_\_\_\_.* R3R.
4. Triple/Quad Ruds and Overts on the item using these commands:
  - (a) Did \_\_\_\_\_ ARC Break you? ARCU CDEINR. E/S to F/N.
  - (b) Did you ARC Break \_\_\_\_\_? ARCU CDEINR. E/S to F/N.
  - (c) Did \_\_\_\_\_ ARC Break others? ARCU CDEINR.
  - (d) *Did YOU ARC Break with yourself because of \_\_\_\_\_? ARCU CDEINR.*

ALWAYS DO A FRESH ARCU CDEINR ON EACH E/S.

- (e) Did \_\_\_\_\_ give you a problem? E/S to F/N.
- (f) Did you give \_\_\_\_\_ a problem? E/S to F/N.
- (g) Did \_\_\_\_\_ give others problems? E/S to F/N.
- (h) *Did you give yourself problems because of \_\_\_\_\_? E/S to F/N.*  
-----
- (i) Did you withhold anything from \_\_\_\_\_? E/S to F/N.
- (j) Did \_\_\_\_\_ withhold anything from you? E/S to F/N.
- (k) Did \_\_\_\_\_ withhold anything from others? E/S to F/N.
- (l) *Did you withhold anything from yourself because of \_\_\_\_\_? E/S to F/N.*  
-----
- (m) Did \_\_\_\_\_ commit an overt (harmful act) on you? E/S to F/N.
- (n) Did you commit an overt (harmful act) on \_\_\_\_\_? E/S to F/N.
- (o) Did \_\_\_\_\_ commit an overt on others? E/S to F/N.

(p) *Did you commit an overt on yourself because of \_\_\_\_\_? E/S to F/N.*

5. Run “Can’t Hav/Enforced Hav” with these steps:
  - (a) Clear “Can’t have”, “couldn’t have” as DENIAL OF SOMETHING TO SOMEONE ELSE. Clear “enforced have” as MAKING SOMEONE ACCEPT WHAT THEY DIDN’T WANT. Have pc get the idea of these with an example or two.
  - (b) Run on the SP items “can’t have/enforced have” as motivator repetitive, then overt repetitive, the flow three terminal to others, others to terminal, (four flows of two commands each, or *five if pc Quad*).
  - (c) After EACH item is handled with the four flows, Objective Havingness should be run.

THE COMMANDS:

- F1.
  1. What can’t have did (terminal) run on you?
  2. What did (terminal) force on you you didn’t want?
- F2.
  1. What can’t have did you run on (terminal)?
  2. What did you try to force on (terminal) that he (she, it) didn’t want?
- F3.
  1. What can’t have did (terminal) run on others?
  2. What did (terminal) force on others they didn’t want?
- F3A
  1. What can’t have did others run on (terminal)?
  2. What did others try to force on (terminal) that he (she, it) didn’t want?
- F0.
  1. *What Can’t Have did you run on yourself because of \_\_\_\_\_?*
  2. *What did you try to force on yourself because of \_\_\_\_\_ that you didn’t want?*

—OBJECTIVE HAVINGNESS—

6. Handle all past S&D items per above steps.

B. *PAST PTS INTERVIEWS:*

7. Collect up all past PTS Interview items (which should have already been verified with C/S Series 78 on set-ups).
8. Check known before on earliest one. If it so reads handle as below.
9. R3R Triple/Quad the item.
10. Triple/Quad Ruds and Overts on the item.
11. Can’t Hav/Enforced Hav on the item followed by Objective Hav.
12. Repeat steps 8-11 on all valid past PTS Interview items.

C. *NEW S&Ds (3 S&Ds):*

13. Do 3 S&Ds per HCOB 16 Aug 69 Handling Illness in Scientology, assessment and L&Ns.
14. Check the first item for known before, handle if it so reads.
15. R3R Triple/Quad the item.
16. Triple/Quad Ruds and Overts on the item.
17. Can't Hav/Enforced Hav on the item, followed by Objective Hav.
18. Repeat steps 14-17 on the other items if valid.

D. *TROUBLED/WORRIED:*

19. L&N Who have you known this lifetime who has troubled or worried you? to B/D F/N item. (Usually includes father, mother, wife or wives, husband, brothers, sisters, aunts, uncles, grandparents, lovers.)
20. Check item for known before, if it so reads:
21. R3R Triple/Quad.
22. Triple/Quad Ruds and Overts.
23. Can't Hav/Enforced Hav followed by Objective Hav.

E. *BEEN AFTER:*

24. L&N Who have you been after this life? to BD F/N item.
25. Check known before and if it reads:
26. R3R Triple/Quad.
27. Triple/Quad Ruds & Overts.
28. Can't Hav/Enforced Hav plus Objective Hav.

F. *PLANETS:*

29. L&N What planets have you known before this lifetime? to BD F/N item.
30. R3R Triple/Quad.
31. Triple/Quad Ruds and Overts.
32. Can't Hav/Enforced Hav plus Objective Hav.

-----

33. D of P Interview the person AFTER the RD is "complete" to be sure the person is now all right (not PTS).

-----

REPAIR

Auditor errors during the RD are handled with L4BR, L3RD, GF Method 5 and handle, C/S 53 if necessary.

A really big snarl up on the RD that won't clear up is handled with HCOB 16 Apr 72 PTS RD Correction List.

If pc gets ill or rollercoasters after the RD is complete the PTS RD Correction List HCOB 16 Apr 72 is done and whatever was missed is cleared up.

#### SUMMARY

The PTS RD as revised is very direct and powerful. The L&N blows each aspect apart. Don't miss on it with auditor flubs. Get it drilled thoroughly before it is delivered.

**THE VITAL INFORMATION RUNDOWN  
THE TECHNICAL BREAKTHROUGH OF 1974**

Recent intensive investigation into blocks on tech, dissemination and communication lines uncovered an aberration which is quite widespread and especially common in society.

Simply stated I found that WHERE VITAL INFORMATION WAS NOT BEING RELAYED OR WAS HIDDEN OR FALSIFIED, THE PEOPLE RESPONSIBLE WERE DRAMATIZING WITHHOLDS.

You can see this is newspapers, government policies, the medical profession, psychiatry, economics and especially education.

I have for years tried to get to the bottom of why people will not teach people. It is the single greatest fault in existing culture in my opinion.

The answer that fits all cases is a failure to relay information, brief, instruct, train or supervise stemming from a general past and current OVERT OF WITHHOLDING VITAL INFORMATION. This gives a dramatization in daily conduct of failing to relay information, brief, instruct, train or supervise.

And underlying that is the intentional impulse to do so overtly or covertly in a mistaken attempt to forward their own first dynamic.

RESEARCH

The primary outpoint that led to this conclusion is the premium given to silence in philosophy and the approval accorded the silent by the population whereas such people are in fact quite deadly and useless.

It is a generalized dramatization in this society. This would be what made the society favor the "strong silent type" as a sort of ideal.

All this in a highly technical society is hazardous. A good example is the current fuel crisis over a supposed scarcity of petroleum fuels for highly inefficient internal combustion engines while answers in the form of new fuels and engines are hidden away in vaults by the vested interests.

ORGS

In our organizations this is deadly. It blocks our tech lines in the Academy and Qual as well as the HGC. It cuts our dissem lines to public via books, promo, regging, lectures, use of C/F and Addresso and FSMs. It cuts our comm lines and denies data to higher management.

It winds up in no application of the tech and no results for the public.

That makes this rundown mandatory for top execs including Flag Reps and LRH Comms, *all* Tech and Qual staff and Dissem, Distrib and HCO Dept 2.

### PECULIARITY

This mechanism is a peculiar one with its own special twist.

Earlier rundowns did not hit this particular type of overt. It isn't very visible and doesn't occur in rundowns like L-10.

It is not simple withholding information. It is (or once was) the intentional overt of withholding VITAL information. It would be a very long chain and would influence general conduct. A bordering chain is withholding information under torture.

Probably an A = A = A sets in which then totally prohibits some (too many) people from imparting important data, thus they can't teach, amongst other things. It has to be fully run out, engrams and all.

### THE RUNDOWN

Where staff are concerned, the necessity of delivering this RD reduces the prerequisites for it to the Drug RD only. It could be done if necessary where the Drug RD was not yet complete but would have to be verified after completion of the Drug RD. *The prerequisite for public is Drug RD.*

### VITAL INFO RD

1. Clear and assess:

VITAL DATA

THE TRUTH

VITAL INFORMATION

KNOWLEDGE

Choose the best read as the item.

2. (a) L&N "What would happen if you communicated\_\_\_\_\_?"  
(b) R3R Quad.
3. (a) L&N "What problem have you had with\_\_\_\_\_?"  
(b) R3R Quad.
4. (a) Clear and assess:  
Withholding (item) under duress.  
Withholding (item) under torture.  
Withholding (item) to protect someone.  
(b) R3R Quad.
5. (a) Clear all words plus fully clear each outpost with examples and demos so it's understood.

(b) Assess:

Omitted (item) .  
Altered the sequence of (item)  
Dropped time out of (item)  
Added falsehoods to (item)  
Altered the importance of (item)  
Used (item) to wrong tgt.  
Assigned the wrong source for (item)  
Made (item) a contrary fact.  
Added time to the relay of (item)  
Added inapplicable data to (item)  
Incorrectly included other data with (item)  
Complicated (item) .  
Suppressed (item) .

In order of reads:

(c) R3R Quad

Locate a time when another\_\_\_\_\_ to/for/from (pick which) you.  
Locate a time when you\_\_\_\_\_to/for/from another.  
Locate a time when another\_\_\_\_\_to/for/from another.

(d) L&N “What would be the intention of someone who\_\_\_\_\_?”

(e) R3R Quad the intention.

6. (a) Assess:

Concerning (item) has there been a break in Affinity  
Reality  
Communication  
Understanding

(b) R3R Quad the largest read.

(c) Reassess ARCU and handle to F/Ning assessment.

7. (a) Clear all words, especially *assumption* and *justify* and *withholding* (in the broad sense).

(b) L&N “What assumption would justify withholding (item) ?”

(c) R3R Quad the computation.

8. R3R Quad all E. Purps that came up during the RD.

9. R3R Quad all computations that came up during the RD.

## SUMMARY

The importance of this RD for Tech and Qual staff and sensitive posts cannot be over-emphasized.

Although it will be quite popular with the public it is basically designed for staff on these lines.

The auditors delivering it should themselves have had it. They must have flawless TRs, be able to make a meter read and must drill the RD in Qual before attempting to deliver it.

This RD is very powerful. Don't miss on it with careless delivery. Get it done flawlessly as directed and you will have a resurge on delivery and dissemination lines and open the door to A GOLDEN ERA OF AUDITING QUALITY AND RESULTS FOR PUBLIC AND STAFF.

HCO BULLETIN OF 10 AUGUST 1976

Remimeo  
All Sec Checkers  
All HCO Personnel  
All Meter Operators

**R/Ses, WHAT THEY MEAN**

(INTEGRITY PROCESSING CHECKSHEETS)  
(PTS PROCESSING CHECKSHEETS)  
(EXPANDED DIANETICS CHECKSHEETS)  
(METER OPERATION CHECKSHEETS)  
(VARIOUS RUNDOWN CHECKSHEETS)

The violent left right ragged motion of the needle which sometimes occurs on a pc's meter is called "A Rockslam" or "R/S." The term was taken from a process in the 50s which sought to locate "A rock" on the pc's early timetrack; the "slam" is a description of the needle violence, meaning it "slams" back and forth. For a time all left right motions of the needle were considered and called "Rockslams" until it was found that a *smooth* left right flow was a symptom of release or key out and this became the "Floating Needle." There is yet another left right motion of the needle called the "Theta Bop." This occurs when the person has or is trying to exteriorize. "Theta" is the symbol for the person as a spirit or goodness; "bop" is an electronic term for a slight hitch in the sweep of a needle. A "Theta Bop" hitches evenly at each end of the sweep left and right and is very even in the middle of the sweep.

Neither the "Floating Needle" nor the "Theta Bop" can be confused with a "Rockslam." The difference of the Rockslam is uneven, ragged agitation left and right; even the distances traveled left and right are likely to be different in each swing from the last.

A "Rockslam" can be caused sometimes by leaving rings on the pc's fingers or by a short circuit in the meter or by the cans (electrodes) touching something like a dress. These are the mechanical considerations and must be ruled out before the pc can be considered to have "Rockslammed." If the pc is not wearing rings and if the meter needle is calm with the lead unplugged, if the lead is okay, and if the pc is not jiggling the ends of the cans against his clothes, then the pc's Rockslam is caused by the pc's bank.

One has to be very careful about the correctness of the pc actually having Rockslammed while on the meter that it was actually observed, that it was not mechanically caused as above. One puts the R/S down on the worksheet and also gives exactly what was asked. And also that the mechanical points were checked without distracting the pc.

ONE MUST ALWAYS REPORT A ROCKSLAM IN THE AUDITING REPORT, NOTE IT WITH SESSION DATE AND PAGE INSIDE THE LEFT COVER OF THE PC'S FOLDER AND REPORT IT TO ETHICS INCLUDING THE QUESTION OR SUBJECT WHICH ROCKSLAMMED, PHRASED EXACTLY.

Why? Because the Rockslam is the most important needle manifestation! It gives the clue to the pc's case.

In 1970 I began a full-scale research project into the subject of insanity and its relationship to cases and case gains and suppression. It was only then that the full significance of the Rockslam was unearthed. This research developed into what is now

called EXPANDED DIANETICS, a series of special processes and actions with their drills and training which permits the auditor to handle a specific case type. This was, by the way, Man's first system of positive detection and handling of psychosis and the first full understanding of what psychosis is.

While this bulletin is not in any way a two minute course in or a substitute for full training in Expanded Dianetics, any auditor who audits, sec checks, or handles people on a meter has to know what a Rockslam is and how it behaves and what he should do about it.

The first thing is to be able to recognize one and to quickly with the scan of the eye and unplug of the meter cord (without any distraction of or notice by the pc) make the checks for a mechanical Rockslam as given above.

You can make a meter "Rockslam" with no pc or cord connected to it by (a) turning it on; (b) put the sensitivity at perhaps 2; (c) put the needle at "set"; (d) rapidly, very rapidly, move the TA back and forth maybe a quarter of an inch and do it unevenly. *That*, if you did it very fast and unevenly, would be something that resembled a Rockslam. But no matter how fast you made your fingers move, a real R/S is a trifle faster. If you do that you will see what an R/S looks like. The needle in this experiment is not made to hit the sides of the meter.

Now if you take the same setup and smoothly slowly move the tone arm back and forth about 2 times a second without any roughness and the same distance right and left, you will have a Floating Needle. Note it very well as this comes at a time of release and is the thing a good auditor hopes to see and gives him the end-off signal for a process. It has to be well known as you NEVER bypass one in a session and to do so makes an uncomfortable pc. (The pc will often cognite—and get a realization about himself or life at this point and one does not stop him from doing this.) This is the thing you indicate to the pc. You don't ever indicate Rockslams or Theta Bops. When you see it and, without stopping or interrupting the pc's cognition, you always say, "Your needle is floating."

Now the Theta Bop can also be shown to yourself by you. Set up the meter as above. Only this time, you smoothly swing it to the right and give it a tiny twitch in the same direction. Then you smoothly, at once, swing it to the left and give it a tiny twitch in the same direction. Then do it to the right. And so on. This is a Theta Bop. It is different than a Floating Needle only in that it hitches at each end of the swing. So learn to recognize it.

There is a vicious smooth right direction slash that occurs when a pc hits a certain area of the bank that is called a "Rocket Read" and there is of course the small fall, long fall (which both go to the right and indicate a charged question or reaction) and there is the gradual rise to the left. But these do not repeat back and forth which is the characteristic of the Rockslam, Floating Needle and Theta Bop.

All right, so we know exactly what it looks like when we talk about a ROCKSLAM as a read of the meter. We know how it can be mechanically caused. And we know what we have to record and report when it is seen.

But exactly *what* does a Rockslam mean with regards to the pc?

If you don't know this you can miss on the pc, on the case, on the org and humanity.

**A ROCKSLAM MEANS A HIDDEN EVIL INTENTION ON THE SUBJECT OR QUESTION UNDER DISCUSSION OR AUDITING.**

Two things underlie insanity, or to be more specific, there are two causes and conditions both of which have been lumped together by man and called insanity. He could not of course define it as he didn't know what caused it.

The first of these two things does not concern us overly much here and is the subject of a separate checksheet training and is called PTS or Potential Trouble Source handling. A “PTS” is a person who has been or is connected with somebody who has evil intentions. A PTS can feel uncomfortable in life or be neurotic or go insane because of the actions upon him of a person with evil intentions. Most of the people in institutions are probable PTSes.

The second of these two things is insanity caused to the individual himself (let alone others) by hidden evil intentions.

The extent of these intentions and what the person will do (and hide) in order to carry them out is quite shocking. These people are covert or overt criminals and many of them are insane—meaning beyond all rationality in their acts. Because their evil intentions are hidden and because they are often very plausible such individuals are what make “behavior so mysterious” and “man looks so evil when you see what mankind does” and all sorts of fallacies.

It is this last type, the chronic, heavy Rockslammer, which Expanded Dianetics handles.

One Rockslam doesn’t make a psychotic. Or a total menace to everyone. But it does mean there could be more and it might in rare cases mean you have, seeing enough of these R/Ses, a very dangerous person on your hands and in your vicinity. And that person must be handled by Expanded Dianetics.

You won’t see a great many Rockslams in auditing people so you could be totally thrown off by surprise when you see one. And mess it all up because you are surprised. So know what it is and don’t get all quivery and make mistakes and blow your confront. Just carry on.

If you don’t note the EXACT question that was asked and the EXACTLY worded statement the pc made when the R/S was seen, you can muck it up for the Expanded Dianetics guys. They won’t be able to get it turned back on again easily and will lose a lot of time. So you have to be sure your auditing report is accurate, that the R/S is written BIG on the column and circled and, no matter what else you do in the session, you have to get it recorded in the left front cover of the folder giving the date and page of the session and you have to report it to Ethics. And also you don’t third party the pc and give him a bad time in the session because of it.

Now R/Ses most easily turn on during Sec Checks or Integrity Processing or when pulling withholds or trying to investigate something. So the people who see these most often are those engaged in that activity and not routine auditing (when they can also but more rarely turn on). Further the most likely person to collide with “needing to be sec checked” is an R/Ser, which again increases the numbers of R/Ses seen in these activities compared to routine auditing. But a very heavy R/Ser will also turn them on in routine auditing.

It is the exact *point* of the R/S in the session, the exact question that was asked and the exact subject or phrase where the R/S turned on that are important. And these are very important as then the person can be fully handled with a full Expanded Dianetics rundown by a qualified Expanded Dianetics Specialist. When, of course, the person gets to that point on his grade chart. (The grade chart points are after Dianetics (like Drug RDs etc) but before Grades, after Grades but before Power, after Power but before Solo, and after OT III or after any single grade above OT III. These are the only points where Expanded Dianetics can be delivered and the R/S fully and completely handled.)

Now here is how you can turn off an R/S and mistakenly think it is handled:

1. The overt-motivator sequence has two sides. One is what the person has done (overt) and what is done to the person (motivator). You can ask, when the person R/Ses on something, if anyone has ever INVALIDATED him on that subject or

action. He will find some and the R/S will turn off AND WON'T EVEN BE FAINTLY HANDLED BUT ONLY SUBMERGED. One can believe he had "handled" the R/S. Not true. He has just turned it off and maybe made it harder to find next time. One can ask what the person has done TO the subject mentioned and while this may unburden the case and make the person a bit better, the R/S is NOT handled, only turned off or submerged. It's almost as if there are so many overts and motivators on this subject or in this area that the push-pull of it makes the needle go wild (R/S). And indeed, this may be the energy cause, in the bank, of the needle reaction.

But neither overt nor motivator handles an R/S finally because the CAUSE of the R/S is an INTENTION to harm and it isn't all that likely the basic intention will be reached.

2. Another apparent way the R/S can get "handled" and isn't is to take the R/Ser earlier-similar on the subject of the R/S. The R/S will probably cease, go "clean." But in actual fact it is still there, hidden.
3. The third way an R/S can be falsely "handled" is to direct the person's attention to something else. If, when this is done, the exact subject of the R/S is not noted by the auditor, it will be difficult to find it again when the person goes into Expanded Dianetic auditing.
4. Yet another, and probably the last way to falsely "handle" an R/S is to abuse the person about his conduct or behavior or the R/S, or to "educate" him to do better, or to "modify" his behavior with shocks or surgery or other tortures like the psychiatrists do. In other words one can seek to suppress the R/S in numerous ways. Maybe the R/S won't occur (being too overburdened now) but it is still there, buried very deep and possibly beyond reach now.

So if you understand the above four points you will see that although you can ease off the R/S, you have not handled it. It has merely gone out of sight.

All right, what then DOES HANDLE an R/S?

I warned you that this isn't a two minute course on Expanded Dianetics and it isn't. An R/S is HANDLED by a fully qualified Expanded Dianetics auditor delivering full Expanded Dianetics to the person at that point on the grade chart where Expanded Dianetics is supposed to be delivered. If anyone thinks it can be done effectively any other way or if he C/Ses it to be done and the auditor is stupid enough to try to do that C/S, then it's Committees of Evidence and Suspended Certificates all around.

With that warning, and only with that warning, I can briefly state what has to be done with the case. This is not what YOU do if you are not delivering full Expanded Dianetics at the right point on the grade chart. It is a brief statement so that you can understand what lies under that R/S.

The pc with an R/S on any given subject and who R/Ses while discussing that or related subjects HAS AN EVIL INTENTION TOWARD THE SUBJECT DISCUSSED OR SOME CLOSELY RELATED SUBJECT. The pc intends that subject or area of life nothing but calculating, covert, underhanded HARM which will be at all times carefully hidden from that subject.

Thus, the Expanded Dianetics Specialist, in handling that case (at the proper point on the grade chart) has to be able to locate each and every subject and question and R/S in that person's folder as noted by Sec Checkers and previous auditors or cramming officers or why finders. He has to have the complete list of R/S subjects. If they are noted as to session date and page and if all sec checking papers and cramming papers are in that person's folder, then the Expanded Dianetics Specialist can do a full and complete job. Otherwise he has to do a lot of other time wasting actions to get the R/Ses found and turned on again.

What the Expanded Dianetics Specialist actually does is locate EXACTLY the actual evil intention for every R/S on the case and handle each one to total conclusion. When he is finished, if he has done his job well, the person's behavior will be magically improved and as to his social presence, menace and conduct, well that will be toward survival.

When you see an R/S, if you are not an Expanded Dianetic Specialist doing Expanded Dianetics at the correct point on the grade chart, you don't say, "Hey, you've got an evil intention!" and you don't ask "Say, what's that evil intention?" or do corny things like that because you'll get the pc self listing, you may get a wrong item, you won't know what to do with it and you're just likely to get the auditing room wrapped around your neck right there.

No, you quietly note it, make sure it isn't a mechanical fault, write it big on the worksheet, write down everything the pc is saying swiftly, note what question you were asking and let the pc talk and ack him and go on with what you are doing with the pc at the time. And after session you note it in the left-hand cover of the folder and send a report to Ethics.

And some day, when he's done his Drug Rundown or gotten to one of the points on the grade chart where a full XDn can be done, why then it will be handled. And a good C/S will program or tip the case for that to be done.

So that's the know-how you have to know about R/Ses to really help the guy and the society and your group.

We're not in the business of curing psychos. The governments at this writing pay the psychiatrists billions a year to torture and kill because of R/Ses they don't know anything about. The crime in the society out there is caused by people who R/S. Stalin, Hitler, Napoleon and Caesar were probably the most loaded R/Sers of all time unless it was Jack the Ripper or your local friendly psychiatrist.

So know what you are seeing when you see it and know what to do about it. And don't kid yourself. Or vilify or mow down people who R/S; we're not in that business.

And the Expanded Dianetic Specialist *and* the pc someday will love you dearly for knowing your job and doing it right.

## **DELIVERY REPAIR LISTS**

THERE'S NOTHING WRONG WITH YOUR CF, YOUR PC, YOUR STUDENT, STAFF MEMBER OR YOUR OWN DELIVERY THAT A PREPARED LIST WON'T HANDLE.

“ARC Broken CFs,” blown students, demanded refunds, low success stories, withdrawn auditors, ineffective staffs are pretty silly problems to have these days.

Many years ago I developed a system called “Prepared Lists.”

These isolated the trouble the pc was having in auditing without taxing anyone's imagination and sending the auditor into a figure-figure on the pc.

These prepared lists were assessed on an E-Meter. One took up the biggest read first and then cleaned up all other reads.

Time has gone on. The system of prepared lists has been expanded to include not only pcs but students and staff.

It may have gone overlooked that such lists now include anything that could happen to a pc or student. In other words, prepared lists have become very thorough.

### **WHO CAN USE**

The only reason ever found for prepared lists not working was an auditor's weak TR 1 and inability to read a meter.

Even this difficulty has been handled by “Qual Okay to Audit” Checksheets.

Before an auditor should be let near a prepared list he should be put through at least six “Okay to Audit” short Checksheets in Qual.

Qual is *not fast* flow. Things done in Qual are Method 4 Word Cleared and starrated, with all demos and drills. *Only* if this is done can you have some certainty that a prepared list will read on the pc and that the pc or student will get handled.

These Qual “Okay to Audit” Checksheets are done AFTER a student has been trained and classed as an auditor. The “Okay to Audit” is for auditing in an org whether staff or interne.

The checksheets are:

- (1) Board Policy Letter 14 Nov 74R Issue I  
QUAL OKAY TO OPERATE AN E-METER
- (2) Board Policy Letter 14 Nov 74 Issue II  
QUAL OK NO. 2R, QUAL OK TO ASSESS PREPARED LISTS
- (3) Board Policy Letter 14 Nov 74 Issue III  
QUAL OK NO. 3, QUAL OK TO AUDIT LISTING AND NULLING
- (4) Board Policy Letter 14 Nov 74 Issue IV  
QUAL OK NO. 4, QUAL OK TO CORRECT LISTING AND NULLING
- (5) Board Policy Letter 8 Nov 71RB  
QUAL OK NO. 5R, *INTERNSHIPS* ELECTRONIC ATTESTATION  
FORM
- (6) Board Policy Letter 20 July 70R Issue III Revised 25 Nov 74  
TWO WAY COMM CHECKSHEET

Only when these have been thoroughly and honestly studied, drilled and done should an auditor be permitted to assess prepared lists on pcs and students.

It takes standard auditor training to handle the points found reading on a list.

#### CASE SUPERVISING

A C/S who is trained as a C/S must know what lists to use. And he must see to it that his auditors are trained via the above checklists. Otherwise the lists just won't read and the C/S, the pc and the org are left up the creek!

LOTS of "lists that didn't read" are found in folders. I used to make a practice of just having them nulled again by an auditor whose metering and TRs were good and **THEY READ AND THE CASE RESOLVED.**

#### PC LISTS

1. HCO BULLETIN 24 NOVEMBER 1973RB, C/S SERIES 53RJ" SHORT HI-LO TA ASSESSMENT C/S." This is a famous list. It solved the long long problem of high and low TAs and really solved it. Unfortunately it has a name of being done for high and low TAs. In truth it practically handles the whole repair of any difficult case today! One assesses it Method 5. One handles the reads from the top down. It can also be reassessed several times until it F/Ns on a whole M5 assessment. It is quite remarkable what it will do for a case that has been running badly or is bogged, quite in addition to handling high and low TAs!

2. HCO BULLETIN 1 JANUARY 1972RA, "LIX HI-LO TA REVISED." This is the same list as C/S 53RJ above. It has been brought up to date. It gives the *whole question* for each subject as in C/S 53RJ and the same handling. It is easier to use on a pc whose attention wanders or who is not very familiar with terms.

3. HCO BULLETIN 29 OCTOBER 1971R, "INT RUNDOWN CORRECTION LIST REVISED." As Interiorization-Exteriorization problems (when they exist) have to be handled before any other thing is handled, an auditor sometimes assesses another list and then finds himself doing this list, "Int" appears on many other lists and when it reads one does this list. One has to go back and complete the original list of course. "Int" problems cause high TA, headaches and general upset. I've begun to think after seeing a lot of headache cases that maybe only Int-Ext problems cause headaches! Instead of repairing Int, sometimes auditors will run it again and again. Also Int can go flat to Cog VVGIs on an early flow, even a recall flow. Then if one insists on finishing the Int RD, one has trouble and I mean trouble. So this is a valuable list.

4. HCO BULLETIN 15 DECEMBER 1968R, "L4BR" "FOR ASSESSMENT OF ALL LISTING ERRORS." An out list (meaning one done by Listing and Nulling, not a prepared list) can raise more concentrated hell with a pc than any other single auditing error. The amount of misemotion or illness which a wrong list generates has to be seen to be believed. When a pc is ill after a session or up to 3 days after, always suspect that a listing action done on the pc had an error in it. It MUST be corrected. The *prepared* list L4BR corrects lists of the Listing and Nulling variety. It can be run on old lists, current lists, general listing. There has been no reason to revise this since 2 June 1972. It really works!

5. HCO BULLETIN 19 MARCH 1971, "LIST 1-C." This is the updated version of the earliest list ever compiled. It is used during sessions at the auditor's discretion and in other ways. It also prevents some pc from insisting "it's an ARC Brk" (which never clears) when it's really a withhold, a common error. It can also be addressed to life. Usually when a session blows up, an L1C is used fast rather than just sit and ack!

6. HCO BULLETIN 11 APRIL 1971RA, L3RD "DIANETICS AND INT RD REPAIR LIST." This is the key list of Dianetic Auditing and is the Dianetic standby in case of trouble. As the Int RD is also Dianetics, while doing it, one uses L3RD for trouble.

7. HCO BULLETIN 2 APRIL 1972RB ISSUE II, EXPANDED DIANETICS SERIES 3 RB, "L3 EXD RB." This is the prepared list for Expanded Dianetics.

8. HCO BULLETIN 29 FEBRUARY 1972R, "FALSE TA CHECKLIST." This was a very important discovery about TAs. One uses this when another list indicates a False TA or one is suspected. Auditors have been known to get so desperate about a pc's TA that they falsified worksheets. This (and C/S 53RJ) make that totally needless. I've seen this change a case from despair to VVVVGIs!

9. HCO BULLETIN 16 APRIL 1972, "PTS RD CORRECTION LIST." It also gives the expected actions of a PTS Rundown. Doing PTS Rundowns without this prepared list handy can be risky.

10. HCO POLICY LETTER 7 APRIL 1970RA, "GREEN FORM." This was the earliest Qual Saint Hill weapon (26 June 65) for case cracking. It is modernized up to 29 Sept 74 in the above issue. *Used for general case clean-up particularly on an out rud type pc or when ruds won't fly. It is not used to handle high or low TA.*

11. HCO BULLETIN 30 JUNE 1971R, "EXPANDED GF 40RB." Called "GF 40X" This is the "7 resistive type cases" at the end of the Green Form expanded out. This is how you get those "earlier practices" and other case stoppers. This done well gives a lot of extensive work in Dianetics. It's lengthy but really pays off. *If you were to do a C/S 53RJ Method 5, all handled, and to an F/Ning list and then do a GF 40XRB, all handled, reassessed to an F/Ning list you would "crack" most cases to a point where they ran well.*

12. BOARD TECHNICAL BULLETIN 28 MAY 1974R, "FULL ASSIST CHECKLIST FOR INJURY AND ILLNESS." While you don't put the pc on the cans for this one, you mark it as to the state the pc is in and it says what you do for illness and injury. This one, done correctly, is how the minister runs the medico out of business.

#### STUDENT LISTS

13. HCO BULLETIN 15 NOVEMBER 1973R, "FEAR OF PEOPLE LIST—R." This is for the handling of timid tech staff who back off from handling rough pcs.

14. HCO BULLETIN 15 NOVEMBER 1974, "STUDENT REHABILITATION LIST." This is the one that gets a bogged student sailing, gets a blown student back, gets an auditor back auditing. It even cures the revolutionary student! This is the master list for students—even students in grammar schools and colleges! A real winner.

15. *BOARD TECHNICAL BULLETIN 27 MARCH 1972R* ISSUE I, "STUDENT CORRECTION LIST, STUDY CORR LIST- I ." A list for correcting students on course.

#### STAFF LISTS

16. *HCO BULLETIN 27 MARCH 1972R* ISSUE II, "COURSE SUPERVISOR CORRECTION LIST, STUDY CORR LIST 2R." This is to get the Course Supervisor going well.

17. *HCO BULLETIN 27 MARCH 1972RA* ISSUE III, "AUDITOR CORRECTION LIST, STUDY CORR LIST 3." This one corrects Auditors who are having a rough time.

18. *BOARD TECHNICAL BULLETIN 27 MARCH 1972RA* ISSUE IV, "CASE SUPERVISOR CORRECTION LIST, STUDY CORR LIST 4." This one corrects Case Supervisors, gets them back on the rails.

19. *BOARD TECHNICAL BULLETIN 27 MARCH 1972RC* ISSUE V, "EXECUTIVE CORRECTION LIST, STUDY CORR LIST 5." This prepared list locates an executive's troubles and indicates handling.

20. *BOARD TECHNICAL BULLETIN 4 FEBRUARY 1972RD*, "STUDY SERIES 7." A real long workout for a person who won't study or who is having real trouble on a course. Goes after it in depth. Can be used as a second list to Student Rehab list above or by itself.

21. *HCO BULLETIN 21 JULY 1971RD*, WORD CLEARING SERIES 35RD, "WORD CLEARING CORRECTION LIST REVISED." Usually written "WCCL." This is the famous list that goes with Method 1 Word Clearing or with any Word Clearing bog. Also corrects high and low TA WHEN it occurs in a Word Clearing session. This is the Word Clearer's friendly friend.

22. *HCO POLICY LETTER 9 APRIL 1972*, "ETHICS, CORRECT DANGER CONDITION HANDLING." Locates the trouble area that got him into a Danger Condition. Goes with the famous "3 May P/L" HCO PL 3 May 1972.

23. *HCO POLICY LETTER 13 MARCH 1972*, "ESTABLISHMENT OFFICER SERIES NO. 5." An invaluable text and list for PRODUCT CLEARING. It's a list of what you do to clear products. From it a prepared list can be made.

24. *HCO POLICY LETTER 23 MARCH 1972*, ESTABLISHMENT OFFICER SERIES 11, "FULL PRODUCT CLEARING LONG FORM."

25. *HCO POLICY LETTER 12 JUNE 1972*, DATA SERIES 26, ESTO SERIES 18. A list you assess to locate trouble an evaluator might be having. Also for slow evaluators or slow students on a Data Series Course.

26. *HCO BULLETIN 28 AUGUST 1970RA*, "HC OUT-POINT—PLUS-POINT LISTS RA." This is a prepared list that locates the outpoints in a person's own thinking. When people can't seem to evaluate (or think brightly) this list will do wonders. Some Data Series Course students make no progress at all until they are assessed on this list and handled.

27. *HCO BULLETIN 2 DECEMBER 1974*, "DYNAMIC SORT OUT ASSESSMENT." (Revised from BTB 4 Dec 71 Issue II, Replacing HCOB 4 Dec 71 Issue II R-1C Assessment by Dynamics.) This gets those dynamics that are charged and handles them. Increases social personality and even can shift valences.

#### WORD LISTS

#### FOR PREPARED LISTS

Nearly every prepared list has all its words on a separate sheet, ready for word clearing on the pc. All the words on a list are cleared on a pc without repeating the same word or asking the list question. Such lists are issued for auditor convenience.

A list of these word lists is being issued as HCOB I Dec 74 so that you can match them to the prepared lists in this *Bulletin*.

#### OTHER LISTS

There is a whole package of processing, mainly by prepared lists, in Integrity Processing, issued as its own series and now being reissued.

There are great Solo Lists for Solo Repair used on Advance Courses.

And from time to time when a need for prepared list is found new ones will be issued on different subjects.

One can REPAIR a pc or student or staff member. One can also FORWARD a case into new areas with other prepared lists.

#### MIMEO

Some orgs backlog their mimeos.

The AVAILABILITY of lists to auditors is something which should NOT be neglected. It is highly uneconomical as one loses re-signs and students and staff when prepared lists are in non-existence in an org or even short supply.

Tech is the atomic fuel an org runs on.

KEEP PREPARED LISTS IN SUPPLY FOR USE.

#### TRANSLATED ISSUES

In non-English speaking orgs lists must be very carefully translated and mimeoed for use. In such orgs, more than any others, great care must be taken to have and use lists as they keep tech straight where it tends to go hearsay and verbal.

-----

So, that's quite an array of prepared lists, isn't it?

If they are not in full use in your org don't wonder about your Delivery Stats Why. Or your org and CF problems. It's a lack of full use of this tech.

Hidden in these prepared lists is a wealth of tech that explodes into wins for your org, your CF, your pcs and students.

**AUDITING REPORTS, FALSIFYING OF**

Probably the most covert and vicious crime in auditing is falsifying an auditing report.

At first glance, to someone who is trying to PR himself as an auditor or to escape consequences of session goofs, this might not seem to be the huge crime that it is.

When an auditing report is falsified, means of repairing the pc are denied, out tech and a need for re-study or re-drilling of materials is covered up, out tech is spread about and the repute of the org and Scientology are at risk.

There are many ways of falsifying an auditing report. Chief amongst them is omission of vital data in the report. Another is faking the things run or the pc's actions or reactions.

To the person doing this it may seem that he has covered up his incompetence but in actual fact it is eventually detected.

A twice declared person recently messed up the cases of several VIPs by simply omitting some of their disagreements with what was being done.

Three SPs, now declared, some years ago had a mutual understanding that they would not put down each other's withholdings. These three also falsified auditing reports to the effect that they had run certain things on pcs "and there was nothing on them," when in fact they either had not run them or there was reaction which they did not put into the report. They messed up about a dozen people before they were caught and it took many, many hours of careful C/Sing and auditing to salvage those cases (and it also took about two years). They made several hundred serious enemies for themselves and today I doubt any Scientologist would even speak to them and their names are remembered with scathing contempt.

It is not only easy to detect a falsified auditing report, it is also inevitable that it will be detected.

The person whose auditing reports have been falsified is easy to spot in folders and records. The auditor marks "VGIs, F/N" and the examiner notes by-passed charge and Bad Indicators. An auditor seeking to prevent this being detected has been known to take the examiner report from the folder but that there is no examiner report would be the first thing a C/S would notice. Examiner reports have been forged and exchanged with the actual one but this too is very visible.

Lack of a proper success story points directly to out tech and if it is not visible in the folder then that folder contains falsified auditing reports.

The pc in the midst of his auditing, refuses to re-sign for more. An inspection of folder either finds the out tech in the auditing reports or it doesn't. If the Folder Error Summary finds no out tech, the next thing that is looked for is falsified auditing reports and this is extended to looking at the other cases this auditor has handled to see if there is any similarity of reaction.

A D of P interview with the pc will reveal falsified auditing reports. It will contain data that does not appear in the auditing reports. The first thing suspect is the auditing reports.

Basically, correct tech applied by a competent auditor who has been trained and interned, works and works every time. When it "doesn't work," a C/S begins to look for the real scene. There are many ways he can ascertain the actual scene. Amongst these are outside-the-door session taping, monitors, interviews, lack of success stories, failures to declare, failures to re-sign, examiner reports at variance with the session reports, personal check up into the case and many others.

The only thing which temporarily misleads a C/S is a falsified auditing report. But in all our experience with these, the detection of such reports is inevitable even if it occurs a long time afterwards.

The person who would falsify an auditing report is usually found to be a suppressive with abundant R/Ses and evil intentions who never should have been trained in the first place.

Therefore, the penalty for knowingly falsifying an auditing report in order to make oneself seem more competent than one is or to hide departures from the C/S or to omit vital data necessary to C/Sing, resulting in upsets to a case and time spent in investigation by seniors, is actionable by a Committee of Evidence and if the matter is proven beyond reasonable doubt, a cancellation of all certificates and awards, a declare and an expulsion order are mandatory.

Should the person perpetrating the falsification of auditing reports run away (blow) before action can be taken, the result is the same and is enforceable even if the person is not present.

A green auditor may look upon the offense as slight. If he is too untrained to realize that proper application of tech works every time and that improper application is a gross overt act, he may not realize the seriousness of his action. This however cannot be pleaded as a defense. It is not a light thing to end the hopes and close the door on a pc just because one is trying to cover up his blunders. The blundering auditor can be repaired by cramming and retraining. But only if it is known how he has blundered. That in itself is nowhere near as serious as hiding the fact.

Honesty is the road to truth.

**AUDITING FOLDERS,  
OMISSIONS IN COMPLETENESS**

(Ref: HCO PL 26 OCT 76 Issue I  
HCO B 26 OCT 76)

Omissions from folders and complete loss of folders is a very serious matter.

A Case Supervisor, as well as a Folder Error Summary Auditor and the Auditor himself can be impeded greatly by folder omissions. Loss of folders entirely is a much greater catastrophe.

While cases and even folders can be reconstructed and eventually handled (at enormous trouble and time to the pc and technical people) this does not minimize the offense.

Usually Folder Pages are regarded too lightly as a post and are subject to much transfer even when posted. The Director of Tech Services is often far too lax in posting a Folder Archives I/C even as a double hat. Space restrictions often impede the careful preservation of folders in orgs. But all these posts and spaces are vital to a smooth delivery of auditing and should not be lightly looked upon.

The commonest (and most senseless) omissions from folders are:

1. **WORD CLEARING WORKSHEETS.** These are done in Academies or training or Interne areas as well as the HGC and it is often an omitted action to forward them to the person's pc folder. Often the lines to do so are unknown or completely missing. Yet *every* metered word clearing action should not only be the subject of a worksheet but also must be included in the person's pc folder in date order. Word clearer can fail to F/N a chain or even fail to clear a word as a chain when it doesn't F/N. Such goofs can mess up cases and leave a C/S perplexed as to how the pc was running well one day and badly the next—yet there is no word clearing worksheet there, so the fact of ANOTHER AUDITOR on the case is hidden.

2. **QUAL WHY FINDING ACTIONS.** As why finding also includes listing, possibly the most vicious omission is the failure to include Why Finding worksheets in the person's folder or even do a worksheet on it. Yet at least one org has been temporarily wrecked by indiscriminate "why finding" in Qual that resulted in wrong items and wrong lists and messed up the cases of whole staffs. This poor why finding has led at times to why finding becoming a restricted or forbidden practice. Qual worksheets of why finding **MUST** be included in the person's folder along with any list made which itself must include the question asked.

3. **HCO WHY FINDING.** These actions must also be the subject of worksheets and must also be included in the person's folder.

4. ALL SEC CHECKS AND INTEGRITY PROCESS LISTS AND ACTIONS. It doesn't matter who or what is doing the sec check, the resulting action is NOT the property of the department or branch or person doing the sec checking. A full worksheet must be made and ALL such actions done MUST be included in the routine pc folder of the person.

As it is very vital that a pc's folder be COMPLETE as well as exist, hereinafter the loss of a pc's folders and the failure to make worksheets and include them in the person's pc folder shall be actionable by a Committee of Evidence, to be convened by the Senior C/S of an org, and applies to any person or Auditor whether staff, mission or field.

## SUBJECT INDEX—1972/1975

### auditing (*cont.*)

LRH Model Auditing Tapes, 33  
mass occurs when flows of items are by-passed and then later restimulated by auditing them, 381  
misunderstood on basic words, auditing pc over, 410  
muzzled, means stating only Model Session patter and commands and TRs, 160  
outnesses, fast way to handle, is to give free auditing check, 194  
pc doesn't want auditing, handling of, 412  
pc out of session, auditing over, 410  
pc~s introduction to auditing; *see also Dn Today*  
psychos, 264  
running out past bad auditing, 276  
Scientology isn't just processing, that's only one use of fundamentals, 202  
self-auditing, commonest reason for, 96  
self-auditing, cure for, 242, 256, 353  
Solo auditing,  
admin, 85  
C/S + pre-OT is greater than bank, 86  
difference between Solo auditing and self-auditing, 85, 86  
Grade Chart steps before, [1972], 21  
ideal Solo program, 22  
set-up, 20, 312  
test line is check on auditing quality, 31  
time track, auditing itself is a sort of, earliest session blows later sessions, 274, 378

auditor(s)('s),  
ability as auditor related to his case, 110  
*see Auditor Admin Series [IX-1 ]*  
all auditors talk too much, 160  
ARC break in session, auditor not handling, remedy of, 409  
assess, auditor who can't assess lists, results of, 426  
assessment weaknesses, remedy of, 233  
auditing pc who is out of session, handling of, 410  
basics, auditor out basics, 409  
become an auditor; *see Dn Today*  
case of auditor depends upon his skill in auditing, 110  
Case Supervisor actions regarding auditor; *see case supervising*  
classification and internships, program of, [1972], 13  
Class VIII handling of lower level auditors, 391  
Correction List—auditor recovery, 60  
C/Sing in chair, handling of, 411  
C/S rein, even best auditors go bad when they no longer have a tight, 165  
distracting pc, 160  
“dog pcs”, remedy for auditor with, 147  
duplicate, auditor willingness to, 109  
end phenomena, remedy of auditor errors in handling, 273

### auditor(s)('s) (*cont.*)

environment, auditor is responsible for session, 409  
errors come from inability to confront, faulty metering, misunderstands or out-ethics, 164  
evaluation, 160  
exterior and good win, auditor carrying on past and asking “say or ask”, handling of, 410  
falsifying report, how to handle, 292, 386  
firefight is quarrel between auditor and pc, 291, 385  
flub or red tag, auditor action, 320  
F/Ning something else than question asked, is Q and A, 222, 223  
handling of, 410  
games condition, auditors and pcs get into, only when auditor refuses help to pc, 180  
goal of auditor and pc, 110  
hand cream, applying during session is wrong, handling of, 411  
handwriting, poor, illegible worksheets, 412  
honesty of, determines his results, 26  
is an individual; you can train individual auditors not a mass of auditors, 12  
lists, auditor who can't get reads on, consequences and remedy of, 233, 234  
misunderstood on basic words, auditing pc over, handling of, 410  
needs his periodic drills and exercises or he goes sloppy, 165  
orders, auditor giving orders that are not part of any process is very bad, 160  
OT TR Zero and TR 0 are routine action for audi admin; tors, 164  
outnesses causing a null prepared list, 213  
overrunning due to false TA, handling of, 411  
pc, auditor calling pc's attention to meter or TA or his hands in session, handling of, 410  
pcs, auditor's right to choose modified, 149  
pc + auditor is greater than bank, 86  
practice, it isn't “talent” that makes good auditor; it is practice, 426  
Q and A, 222, 223  
questions, asking odd non-process questions while “doing a process”, 160  
recruiting staff auditors, 12  
refusing to audit is in fact an admission, in most cases, of feared inability to audit, 149  
results, auditor who doesn't consistently get, is going to have his own case cave in on him, 110  
rights; *see also Dn Today*  
speed, error can also stem from, 273  
staff auditor requirements, 12  
staff auditor trainee programming, 12  
stat of, 150  
test of, 427  
tone arm and auditor; *see tone arm*  
trainees come under Interne Supervisor, 12, 13  
trainees, personnel pools for, 12  
training, sending auditors to upper orgs for, 13

## SUBJECT INDEX—1972/1975

- auditor(s)('s) (*cont.*)  
TRs and auditors; *see* TRs  
two-way comm, auditor doing without C/S, handling of, 411  
understanding of pc's answer, 395  
upper level auditors, 376  
what it takes to make a real auditor, 426  
who cannot audit, whose TRs are out, whose metering is bad and who never keeps the Code always says his pcs are dogs, 147  
Auditor's Code is an auditing tool, not just a nice idea, 289, 384  
avalanches, outflowing and inflowing, 106  
awareness, *defn.*, ability to perceive existence of, 182  
if one can confront he can be aware; if he is aware he can perceive and act, 182  
awareness of awareness unit; *see* thetan  
Axioms, Dianetic; *see* *Dn Today*  
Axiom 28, amended, 185
- B**
- backtrack, pcs who won't go, reasons and remedies for, 276, 388, 389  
bacteria, intestinal, 408  
balance, Chloro- and Aureo- families of antibiotics can affect sense of balance, 406  
bank; *see* reactive mind  
basics, list of out basics and references to correct them, 409  
BD; *see* blowdown  
been after, PTS RD step, 343  
beingness, 118  
beingness, insistence on rightness is last refuge of beingness, 257  
beings basically prosper only when they are self-determined and can be pan-determined to help in prosperity of all, 130  
betray, *defn.*, to be disloyal or faithless to, 102  
betrayal, Danger RD step, person to work out how out-ethics situation is betrayal of group, 103  
biochemistry and nutrition, 204, 205  
lie below spirit and mind and could be loosely considered to be undercut as they do impede spiritual gain, 203  
may not work at all until stress is relieved by processing, 206  
"Biolactyl", dosage of intestinal bacteria, 408  
black field, 124  
blackfive, 114  
blackness, Case V is no mock-ups, blackness only, 121  
black screens, purpose of, 114  
blinking, TR 0 notes on, 369  
blood leveling time and antibiotics, 403  
blow(s),  
five main reasons for student blows, 193  
handling blown student or pc, 193, 194  
reasons for pc blows, 179, 194  
blowdown, listing and nulling item must BD and F/N, 96  
body,  
*defn.*, physical object, it is not the being himself, 129  
*defn.*, a complex biological carbon-oxygen engine, running at an operating temperature of 37° Centigrade and, being biological, has ability to establish and repair itself, 401  
and TR 0, 369  
body fixation, 203  
havingness, relation to body; *see* havingness  
life in, thetan puts it there, 126  
malnutrition is general breakdown of body functions due to lack of adequate nourishment, 207  
nutrition is in field of physical treatment of body, 205  
overweight is residual elements of food, substances or gases which are not totally eliminated or utilized by body after ingestion, 401  
Q and A, 231  
cure for, is objective processes, 232  
robot's inertia of body, 129  
sugar in abundance by-passes basic energy producing mechanisms of body, 207  
underweight or debility is inadequate or lacking foods, substances or gases which are needed for activity, maintenance or repair of body, 402  
"boil off" or dopey pc, cause and remedy of, 117  
books, Word Clearing Method 4 of, 166, 305  
boredom and game conditions, 113  
BPC; *see* by-passed charge  
Buddha; *see* *Hymn of Asia*  
by-passed charge,  
*defn.*, earlier charge restimmed and not seen, 144  
*defn.*, one handled later charge that restimmed earlier charge, 144  
prepared lists, missing items on, leaves by-passed charge on pc, 426  
roller-coaster can also be caused by, 339  
by-passed flows; *see* flows, by-passed
- C**
- calcium, muscular spasms are caused by lack of, 354  
Cal-Mag, formula and effect of, 354, 355, 369  
cannibal, cleared cannibal step, 260, 261, 263  
Can't Have Rundown, 141  
carbohydrates, result of heavy intake of, is to feel tired all the time, 207  
case(s); *see also* preclear  
auditor's ability as auditor related to his case, 110  
black five, 114  
bogged case, 11  
Case V, *defn.*, no mock-ups, only blackness, 121  
children are usually very burdened cases, 388  
"corpse case", solution to, 119  
dog case; *see* preclear, dog

## SUBJECT INDEX—1972/1975

- case(s) (*cont.*)
- drug case having trouble with Method 1 Word Clearing, handling of, 163
  - energy, starvation for, is keynote of any case which maintains facsimiles in restimulation, 105
  - “failed cases”, prepared lists clear up, 426
  - “failed” cases, there are no failed cases; there are only failed C/Ses and auditors, 426
  - failure in, chief cause is unhandled or only partially handled drugs, 300
  - fixated attention case, 262
  - gains, drugs fog up student and prevent gains, 137, 311
  - gains, pcs who do not hold, are PTS, 330, 338
  - how to get information on, 11
  - mutual out ruds can stall cases, 259
  - no case gain or failed case, handling of, 427
  - OCA/APA characteristics in, 22
  - repair; *see* repair
  - roller-coaster is a slump after a case gain, 330, 338
  - trouble and Word Clearing, 304
  - unburdening, 389
  - upset: wrong list item or wrong list, 97
- case supervising, case supervision, C/S, case supervise; *see also* Case Supervisor
- auditor C/Sing in chair, handling of, 411
  - auditor falsifying report, how to handle, 292, 386
  - auditors, even best go bad when they no longer have a tight C/S rein, 165
  - auditors handling psychos, C/S takes it easy on, 264
  - auditors, standard handling of, 164
  - cases, how C/S gets information on, 11
  - checklist, 11
  - Class VIII C/S-6 list, 276
  - co-audit, C/S must check routinely for mutual out ruds in, 259
  - C/S can err by being too critical of auditors or worse, by agreeing about what dogs the pcs are, 147
  - Dianetics is its own field of C/Sing, 285
  - FES, failing to call for, when C/S doesn't know after a failed rundown, 413
  - Ivory Tower; *see Dn Today*
  - must be sure all Why finding and Word Clearing papers and worksheets get into pc's folders, 96
  - must put a yellow tab marked PTS on PTS pc folder, 92
  - pc in psychotic break, handling, 353
  - pc's demands for next grade despite all contrary indicators, C/S agreeing with, handling of, 412
  - prepared list is C/S's main tool for discovery and correction, 234
  - primary cause of C/S failure, 234
  - Quadruple Dianetics, how to C/S case for, 374, 376
- case supervising, case supervision, C/S (*cont.*)
- repair and handling of bogged cases is finest skill of, 11
  - repairing pc instead of auditor, handling of, 412
  - sessions, personally C/Sed by LRH; *see Dn Today*
  - Triple Dianetics, how to C/S case for, 284
- Case Supervisor; *see also* case supervising
- auditors, flubby, are ones who consumed C/S time, 164, 165
  - Cramming, C/S has to straighten out, 164, 233
  - Cramming, if there is no, C/S can fully afford to do cramming himself, 281
  - D of P, C/S not using, to get data after failed session, handling of, 412
  - makes sure tech courses are taught well, 164
  - overloaded, results of and how to detect, 318, 319
  - postings, 318
  - Q and A, 222, 223
  - remedy for C/S who is agreeing there are “dog pcs”, 147
  - stat of, 150
  - test of, 427
  - to get results on pcs must handle auditor's ability to get reads on lists, 233
  - trouble, what it comes from, 292, 386
  - trying to fix “no EP” on one rundown by trying to run another rundown, handling of, 413
  - types of C/Ses, 318
  - worksheets, C/S not reading, handling of, 413
- cause, overts give highest gain in raising cause level, why, 370
- cause, people who get things done are at cause; when they are not, they Q and A, 225
- chain(s),
- can be overrun, how, 385
  - Dianetic chain, how to rehab, 289, 384
  - Dianetic chains previously flubbed, how to handle, 290, 384
  - Dianetic chains run a second or third time, how to handle and indicate to pc, 291
  - Dianetic EP, cognition could simply be “the chain blew”, 272
  - Dianetics, EP of chain is erasure, accompanied by F/N, cognition and good indicators, 272
  - Word Clearing a chain of words, all must F/N, 303
- charge, by-passed; *see* by-passed charge
- children,
- ascases, 388
  - must be permitted to contribute, 80
  - originations of, 183
  - Streptomycin can cause pregnant mothers to give birth to children who have impaired hearing, 404
  - unburdening, 389
- cholesterol, role of in body, 204
- chronic somatic; *see* somatic, chronic
- circuits, all valences are circuits are valences, 181
  - circuits key out with knowingness, 181
- Classification Gradation and Awareness Chart, 311,

## SUBJECT INDEX—1972/1975

- Class VIII,  
  Course, 391  
  C/S-6 list, 276  
  how a Class VIII gets in standard tech, 391  
cleaning cleans, how to prevent, 370  
cleared cannibal, 260, 261, 263  
cleared word, *defn*, word which has been cleared to  
  point of full conceptual understanding, 317  
clearing words in commands, necessity of, 93  
clear words to F/N, 303; *see also* Word Clearing  
co-audit, C/S must check routinely for mutual out  
  ruds in, 259  
cognition and havingness, 123  
cognition, method of fishing for, 301  
cognition of Dianetic EP could simply be “the chain  
  blew”, 272  
colds, loss can cause, 237  
colds, Vitamin C is excellent for helping, 407  
coma, auditing a person in, 206, 238  
commands, auditor must clear each and every word  
  of, 93, 94  
Committee of Evidence, when to use, 100  
communicatingness, 118  
communication, *defn*, consideration and action of  
  impelling an impulse or particle from source-  
  point across a distance to receipt-point, with  
  intention of bringing into being at receipt-point  
  a duplication and understanding of that which  
  emanated from source-point [Axiom 28], 185  
component parts of, 185  
formula of: cause, distance, effect, with intention,  
  attention and duplication with understanding,  
  185  
lag, *defn*, length of time, whether verbal or silent,  
  intervening between auditor’s asking of a speci-  
  fic question and specific and precise answer of  
  that question by pc, 108  
magic of; *see Dianetics Today*  
pc is as well as he can originate a ,1 83  
performer purpose is basically ~, 293  
two-way communication, 107  
  auditor doing without a C/S, 411  
  don’t use a listing question in, why, 270  
  Interiorization RD, 2-way comm step after, 280  
  pc upset, look into two-way comm processes in  
  folder and treat them as L&N processes  
  where pc has answered with items, 270  
  questions must be limited to feelings, reactions,  
  significances, never ask for terminals or loca-  
  tions, 270  
complete, *defn*, to make whole, entire or perfect;  
  end after satisfying all demands or require-  
  ments; act or action of completing, becoming  
  complete or making complete, 93  
completion, pc completion points, 214  
completion, what makes it quickie, 93  
concept symbolized by word, 316  
conceptualization of meanings, 316  
conceptual understanding of word, 317  
Conditions by Dynamics, 81  
Confessional List, Johannesburg, 419  
Confessionals on students, 173  
confidential, why OT materials are ~, 23  
confront, 182  
  *defn*, to face without flinching or avoiding, 182  
  *defn*, to stand facing or opposing, especially in  
  challenge, defiance or accusation, 182  
  auditor errors come mainly from an inability to  
  164  
  body and TR 0, 369  
  effect, person at effect is confronted by life, he  
  does not confront it, 231  
  glib student, what he can confront, 99  
  if one can confront he can be aware; if he is aware  
  he can perceive and act, 182  
  Q and A and confront, 224  
confusion, fixed ideas follow a period of, 237  
confusion, underneath is a misunderstood word, 29  
Contact Assist, 191  
continuous missed withhold; *see* missed withhold,  
  continuous  
continuous overt; *see* overt, continuous  
“corpse case”~, solution to, 119  
correction lists; *see* prepared lists, correction lists  
correction, Qual’s function is, 188  
correction usually cannot be accomplished without  
  Ethics back-up, 66  
course(s); *see also* training  
  fast flow student passes ~ by attestation, 1 62  
  supervision, it is out tech to fail to know and use  
  study tech, 41  
Course Supervisor(‘s),  
  Correction List, 52  
  failure, cause of, 41  
  has to know study tech, not necessarily subject  
  taught, 41  
  primary tech, 42  
  product of Supervisor, 43  
  student queries, handling of, 42, 302  
  use of Word Clearing Method 4, 29, 302  
cramming, 188  
  actions, 66  
  done in Qual must be done on a meter, 397  
  can assess correction lists, 66  
  Case Supervisor has to straighten out Qual cram-  
  ming, 233  
  if there is no Cramming, a C/S can fully afford to  
  do cramming himself, 281  
  it is obviously senseless to cram someone whose  
  study tech is out, 66  
  maxim of: handle the hell out of it, 335  
  most cramming cycles reveal a broader area of  
  situation which must also be handled, 334  
  order always includes TRs, 164  
  over out ruds, 334  
  Primary Correction Rundown (revised), 65  
  retread and retrain, 164  
  success, what it depends on, 335  
Cramming Of ficer, C/S makes sure Qual has one, 164  
Crime, High; *see* High Crime

## SUBJECT INDEX—1972/1975

crime, when you let a person give nothing for something you are factually encouraging crime, 79  
criminal(s), criminality, 78

## SUBJECT INDEX—1972/1975

- erase, erased, erasure(s) (*cont.*)  
  thetan has to be at earliest end of incidents to  
    erase them, 286, 381  
  you can't rehab erasures with "How many  
    times?", 290, 384
- Est O and HAS Specialist Auditing Program (revised),  
  50
- Est Os and Product Officers, disagreement amongst,  
  40
- Est O, standard ~ action to survey hats, 37
- ethical, ethic(s), 78  
  *defn.*, study of general nature of morals (morals  
    [plural] [noun]: principles of right and wrong  
    conduct) and specific moral choices to be made  
    by individual in his relationship with others;  
    rules or standards governing conduct of mem-  
    bers of a profession, 102  
  *defn.*, study of general nature of morals and of  
    specific moral choices to be made by *individual*  
    in his relationship with others, 172  
  actions, reason for many heavy, 78  
  acts of out-ethics person in a group, 101
- most important zone of, in an organiza-  
  tion is at or near the top, 100  
  correction usually cannot be accomplished with-  
    out Ethics back-up, 66  
  criminality checked by ethics presence, 78  
  determination, when one is ethical it is by own  
    determination, 172  
  executives and ethics, 100, 101, 102  
  justice and ethics, 172  
  must be in to get tech in, 172  
  non-compliance as Liability, and false report as  
    Doubt, 79  
  offenses, examples of, 101  
  organization and ethics, 100  
  out-ethics, *defn.*, an action or situation in which  
    an individual is involved contrary to ideals  
    and best interests of his group; an act or  
    situation or relationship contrary to ethics  
    standards, codes or ideals of the group or  
    other members of group; an act of omission  
    or commission by an individual that could or  
    has reduced the general effectiveness of a  
    group or its other members; an individual act  
    of omission or commission which impedes  
    the general well-being of a group or impedes  
    it in achieving its goals, 102  
  auditing errors can come from, 164  
  exchange flows and out-ethics, 78  
  executives, responsibility of, to handle out-  
    ethics, 100  
  handling steps (Danger RD), 102  
  ill, people who are ill are PTS and are out-ethics  
    toward the person or thing they are PTS to,  
    101
- people, out-ethics people go rapidly into Trea-  
  son against the group, 101  
  perception is affected by out-ethics, 101  
  quickie tech is a symptom of out-ethics, 94
- ethical, ethic(s) (*cont.*)  
  out-ethics (*cont.*)  
    valence, person whose ethics have been out over  
      a long period goes "out of valence", 101  
  personal ethics, 100  
  situation lies below administrative Whys, 100  
  tech admin sequence, 78
- evaluate, length of time to, 145
- evaluation, auditor evaluation, 160
- evil,  
  inability to confront evil, result of, 78  
  insane are insane because they have evil intentions,  
    230  
  man attempts to restrain himself from evil actions  
    and caves in, 78  
  purposes, 277  
  Expanded Dianetics running of, don't ask-for  
    interest, 161  
  have to be verified as to wording and checked  
    for read before running, but not interest,  
    277  
  individual with, has to withhold himself be conduct,  
    cause he may do destructive things, 127  
  insane cannot control or withhold evil purposes  
    and dramatize them at least covertly, 128  
  rock slams, where a pc R/Ses he will have evil  
    purposes, 345  
  Rundown, Multiple-Flow, 277  
  R3R all Ev Purps cuUed from folder is done as  
    first action in Ex Dn, 277  
  R3Ring Ev Purps, common error on, 296  
  reactive mind tends to force man into evil actions,  
    370
- Examiner attest check, 30
- Examiner declare? procedure, 218
- exchange, *defn.*, something for something, 79  
  criminality and exchange, 79  
  Dynamics, Exchange by, procedure, 80  
  flows and out-ethics, 78  
  maintains inflow and outflow that gives a person  
    space around him and keeps the bank off of  
    him, 79  
  out, illness and overwhelm can result from, 79  
  production, morale and exchange factor, 80
- executive('s), *defn.*, any person holding an executive  
  post (head of Department or above), 100  
  assignment of Danger condition, 100  
  ethics and executives; *see* ethics  
  study, executives who will not, handling of, 158  
  tendency to transfer or who fails to hat others,  
    how to handle, 50
- existence, mock-ups get unreal because thetan is not  
  ising existence, remedy for, 118
- Expanded Dianetics, 276, 311; *see also* Ex Dn Series  
  [IX-125]  
  *defn.*, that branch of Dianetics which uses Dia-  
    netics in special ways for specific purposes, 68,  
    87  
  after Grade IV Expanded, 311  
  auditor prerequisite for, 69, 88

## SUBJECT INDEX—1972/1975

- Expanded Dianetics (*cont.*)  
charges for, 69, 88  
Drug Rundown is a must before, 307  
evil purposes, R3R all, is done as first action, 277  
is specifically adjusted to pc, 68, 87  
OCA right-hand side handling, Vital Info RD  
belongs on, 328  
pcs who RIS are given Ex Dn, 76, 345  
programming, 276  
Repair List, 70  
requisites, 297, 372  
running of evil purposes or intentions, don't ask  
for interest, 161  
service facsimile theory and, 257  
set-ups, 276  
checklist, 297, 372  
Standard Dn vs. Ex Dn, 68, 69, 87  
training, 68, 87  
uses Dianetics to change OCA/APA, 68, 87  
who needs it, 68, 87
- Expanded Gita, 115,120
- exterior, exteriorized, exteriorization,  
Int RD, you just don't do one because pc goes  
exterior, 280, 281  
pc exteriorizes on a good win, how to end session  
when, 397, 410  
pc goes exterior in auditing, later his TA goes high,  
*then you* do an Int RD, 280  
pc misemotion about, how to handle, 124  
Present Time Differentiation; Exteriorization by  
Scenery [process], 121  
Remedy of Havingness [process], exteriorization  
by, 116  
theory of Exteriorization Remedy, 287
- Exteriorization Rundown; *see* Interiorization Run-  
down
- extroversion, *defn.*, being able to look outward;  
extroverted personality is one who is capable of  
looking around the environment; person who is  
capable of looking at world around him and  
seeing it quite real and quite bright is of course  
in a state of extroversion, 241, 256, 353
- F**
- "failed" cases, 426  
false, *defn.*, contrary to fact or truth; without  
grounds; incorrect; without meaning or sincerity;  
deceiving; not keeping faith; treacherous;  
resembling and being identified as a similar or  
related entity, 102  
false auditor's reports; *see* auditor, falsifying report  
false PTS, 236  
false reads on W/Hs and asking for some W/Hs more  
than once will ARC break the pc, 409  
false reports, 129  
means Doubt, 79  
robot gives many, 129  
false TA; *see* tone arm, false
- fast flow training, 162, 163  
Fear of People List, 219, 220  
FES; *see* Folder Error Summary  
FFD, Full Flow Dianetics; *see* Dianetics, Full Flow  
FFT, Full Flow Table; *see* Dianetics, Full Flow  
field, black, 124  
firefight, *defn.*, quarrel between auditor and pc, 291,  
385  
First Dynamic Danger Formula, 82  
fixated attention case, anatomy and remedy of, 262  
floating needle, F/N(s)(ed)(ing),  
auditor must F/N the original action, 222, 223,  
410  
false TA and F/N, 227, 416  
footplates obscure F/Ns and reads, 414  
Integrity Processing questions must be F/Ned, 175  
listing and nulling item must BD and F/N, 96  
OT is particularly subject to F/N abuse as he can  
blow things quite rapidly, 273  
persistent F/N and ending session, 397  
Power can be done quickie simply by not hanging  
on for EP and only going to F/N, 93  
prepared list either reads or F/Ns, 213  
students who are interrupted too often when  
F/Ning may also blow, on a "withhold of  
nothingness", 193  
what you ask or program, 222  
wide persistent with TA too high or low means  
false TA, 227, 416  
Word Clearing, all words must be F/Ned, 303, 304  
Zero Flow in Dianetics may F/N very suddenly,  
288, 382
- flow(s),  
additional, when doing additional flows one must  
also check or rehab flows run to F/N, 287, 381  
auditing additional flows while earlier items  
remain Single or Triple restimulates missing  
flows and stacks them up as mass, 377  
auditor's lack of knowledge of flows, doing F0s on  
a Triple pc, handling of, 410  
by-passed flows and mass, 286, 380  
by-passed, high TAs, heavy pressures and even ill-  
ness can come from by-passed flows, 286, 380  
Dianetic remedies and Triple Flows, 285  
Full Flow Dianetics; *see* Dianetics, Full Flow  
getting in all flows, 287, 288, 381  
mass occurs when flows of items are by-passed and  
then later restimulated by auditing them, 287,  
381  
missing flows are still potential mass, 274, 377  
old pcs run Triple, let them remain Triple unless  
you have to do Int RD or some Quad RD, 373  
run previously unrun one or ones first to get  
charge off, then verify or run ones listed as run  
already, 287, 381  
safe course is to use Triples (Quad only) on new,  
never audited before pcs; those begun on  
Triples, use then only Triple Flows, 291, (386)  
TA, high TA and Quad Flows, 381  
TA, high TA and Triple Flows, 287

## SUBJECT INDEX—1972/1975

- flow(s) (*cont.*)  
Triple reruns, 286  
and Quad reruns, 380  
tripling earlier Dianetics, 274, 377  
unrun, law: when one or more of the three flows of an item or grade are left unrun, when used in later processes the earlier unrun ones restimulate and make mass, 286, 380  
when to triple or quad narrative items or multiple somatic items, 275, 378
- Flow 0, *defn.*, self doing something to self, 274, 378  
auditor doing F0s on a Triple pc, handling of, 410  
command, 378  
getting in Zero Flows—rehab or run, 382  
in Dianetics, may F/N very suddenly, 288, 382  
Int RD, one mustn't suddenly introduce 4th flow (F Zero), 377  
Introspection RD has as its dominant flow, 295  
Quad Dianetics, unrun F0 is checked for read before running, 374  
Quad Dianetics, when catching up unrun Flow Zeros only run those that read, 373  
running Zero Flows, 288, 382  
Triple pc, doing F0s on, 410
- Flow 1, *defn.*, something happening to self, 274, 378  
Flow 2, *defn.*, doing something to another, 274, 378  
Flow 3, *defn.*, others doing things to others, 274, 378
- folder(s),  
study, 157  
Why finding worksheets must go into pc folder, 96, 303  
Word Clearing worksheets must be placed in pc folders, 96, 304
- Folder Error Summary (FES), counts on C/S's and auditor's stat, 150  
Folder Error Summary, C/S failing to call for an FES when he doesn't know after a failed rundown, handling of, 413
- food; *see* nutrition  
footplates, 27, 414

good vs. evil, 78, 370  
Grade Chart, basic program of pc, 311, 313  
grades, full list of grades showing where various RDs fit, 312  
Grade II, 311  
gradient scales is inherent in auditing itself, 116  
gradients, education mustn't skip, 171  
grammar(s), 143, *defn.*, a systematic description of the ways in which words are used in a particular language, 167  
Course before Word Clearing, 143  
rules of, 167  
textbooks, 143  
types of grammars, 168  
grammatical words and smallwordsshouldbe looked up in a simple grammar textbook, 143  
Green Form, 238, 321  
group justice, 128  
action of group against individual when he has failed to get his own ethics in, 172  
with Courts and Comm Evs, 100  
group prospers only when each member in it has his own personal ethics in, 101  
guilty, making an individual guilty for committing evil actions only increases tendency to laziness, 370
- ### H
- hand(s),  
anti-perspirants applied to too wet hands, 227, 416  
auditor applying hand cream during a session is wrong, handling of, 411, 415  
auditor must not call a pc's attention to hands during a session, 410, 414  
rings on pc's hands must be removed, 364  
tone arm depends on normally moist hands, 226, 415  
tone arm low, don't get pc to wipe hands every minute, 27  
tone arm low, wet sweaty hands can cause, 24  
vanishing cream, why one doesn't use, 414  
handwriting, handling auditor having poor ~, 412  
happiness is only attained by those who are honest with themselves and others, 101  
happiness, pc's sanity and happiness absolutely depend upon his ability to create new facts, 114  
HAS Rundown, 50  
hat(s), hatting,  
basic of 3rd dynamic sanity, hattedness is, 38  
essential part of, is Post Purpose Clearing, 363  
failing to hat others, how to handle, 50  
for product, 38  
survey for orders, 37

## SUBJECT INDEX—1972/1975

- have, Can't Have Rundown, 141  
havingness, 105,123,181  
  *defn*, mass or objects, 115  
  *defn*, the "gimmick" or "weenie" for which the game is played, 118  
  *defn*, is the concept of being able to reach;  
    no-havingness is the concept of not being able to reach, 181  
  anaten is demonstration of loss of havingness, 123  
  cognition and havingness, 123  
  indicators of dropped havingness, 123  
  knowingness, cutting down knowingness and  
    Remedy of Havingness have opposite vectors, 113  
  must be run to get the benefit of having pulled  
    most withholds, 181  
  process, 124  
  reason for dropped havingness, 117  
  Remedy of Havingness, 105,108,112,115  
    *defn.*, remedy of a pc's native ability to acquire things at will and reject them at will, 115  
    *defn*, getting pc to mock up and shove into the body enough masses to bring him to a point where he can eventually throw one away, 124  
    *defn*, having him mock up and shove in *and* throw away the same type of mock-up;  
      Remedy of Havingness is always a superior operation to a Repair of Havingness, 124  
    body disappears while remedying havingness,  
      how to handle, 124  
    commands for, 114  
    End of Cycle Processing is a cousin process to  
      Remedy of Havingness, 118  
    Expanded Gita related to Remedy of Havingness, 115  
    Exteriorization by Remedy of Havingness [process], 116  
    have pc *shove* or *push* things into his body,  
      never pull, 116  
    how to run Remedy of Havingness, 116  
    is done and can be done at any time during any  
      of the Six Basic Processes as long as pc is  
      even vaguely in communication with auditor, 118  
    process, 115  
    Waterloo Station [process], difficulties with,  
      due to pc inability to remedy havingness, 125  
    what it addresses, 113  
    will actually give pc enough energy masses to  
      permit his starved condition to let go of  
      energy masses he is holding to him, 108  
  Repair of Havingness, *defn*, having pc mock up  
    anything he can mock up, and in any way it  
    can be done get him to shove (never pull)  
    that mock-up into the body, and by similar  
    means to get rid of the residue which went  
    along with mock-up, 124  
  is a one-way flow; it is an inflow, 124
- havingness (*cont.*)  
  Repair of Havingness vs. Remedy of Havingness,  
    124  
  rudiments and havingness; *see Dn Today*  
  SPs are SPs because they deny hav and enforce  
    unwanted hav, 141  
  subjective havingness, difficulty with running, 141  
  unhappiness, relation to reduced energy (havingness), 105  
  withholds cut havingness down, 181  
HCO Dept 1 is recruiting point for auditors, 12  
headache and Int-Ext, 307  
healing, Scientology's relation to, 191, 203  
health, food can vastly affect, 401  
H E & R, *defn*, human emotion and reaction, 194  
  out list produces most fantastic H E & R, 194  
hearing, Streptomycin can cause pregnant mothers to  
  give birth to children who have impaired ~, 404  
help, auditors and pcs get into a game condition only  
  when auditor refuses help to pc, 180  
hidden standard, *defn.*, special problem pc thinks  
  must be resolved before auditing can be seen to  
  have worked, 262  
  fixated attention shows up as a problem but is  
  usually a hidden standard, 262  
High Crime, course, 41  
High Crimes, study tech, 42  
High Crime, word clearing words on test is, 32  
highTA; see tone arm, high  
Hi-Lo TA Assessment, 1  
honest, honesty,  
  auditor, honesty of, determines his results, 26  
  happiness is only attained by those who are, 101  
  is road to sanity, 79  
  most successful student is ~ student, 1 72, 1 74  
  road to truth is begun with honesty, 150  
  sanity is basically honesty and truth, 31  
Hubbard Graduate Dianetic Specialist, 69, 88  
Hubbard, L. Ron, hat of finder of lost tech worn by,  
  202  
Hubbard, L. Ron, personally C/Sed sessions; *see Dianetics Today*  
hypnotism, *defn.*, a monotony and a central fixation  
  on some one object, 109  
  Opening Procedure by Duplication runs out, 109

## I

- ideas, fixed ideas follow a period of confusion, 237  
ideas, words symbolize ideas, 316  
ill, illness(es); *see also* injury  
  assist illness only by lightest possible address to  
    mental factors, 206, 238  
  cause of illness, 209  
  deserve to be handled with thorough and complete  
    assists, 189  
  exchange, ~ can result from out exchange, 79

## SUBJECT INDEX—1972/1975

- ill, illness(es) (*cont.*)  
flows, illness can come from by-passed flows, 286, 287, 380, 381  
healing, two sides to, spiritual and structural or physical, 189, 191  
loss, person who has just experienced a loss may become ill, 237  
pc illness during grade auditing, 192  
pcs should not be run on PTS RD as a standard practice, 331, 339  
person who doesn't produce becomes mentally or physically ill, 80  
physical ailments can resist spiritual improvement, 205  
physical facts of injuries, ~ and stresses, 190  
predisposition, precipitation and prolongation of illness, 189, 210  
PTS,  
all sick persons are, 95, 209  
becoming PTS is first thing that happened to person on subject of illness or accidents, 211  
people who are ill are PTS and are out-ethics toward person or thing they are PTS to, 101  
person who is chronically ill always is PTS, 19  
results in illness and roller-coaster and is the cause of illness and roller-coaster, 91, 92  
Q and A and illness, 224, 225, 232  
stress is basic cause in physical illness, 206  
student is ill, handled by Dianetics, 76  
temperature, when illness is accompanied by, antibiotics is usually the first thought, 403  
illiteracy and work, 170  
imaginary incidents as past life remedy, 330, 339, 388  
impingement needed to make a list read, 234  
implants, when Word Clearing too heavy or doesn't clear up, suspect implants, handling of, 96  
inactivity, how it comes about, 1 27, 1 30, 370, 37 1  
incident(s),  
pc stuck in upsetting incidents from movies or books, how to handle, 389  
thetan has to be at earliest end of incidents to erase them, 286, 381  
thetan is incident hungry, 286, 381  
incompetent, basic Why for being, 130  
indication, wrong, can cause a psychotic break, 239, 241, 249, 346, 353  
inertia, physical, and robotism, 129  
infections, germ and virus infections, 403  
infections, Vitamin C is excellent for helping colds and ~, 407  
inflow, repair of havingness is, 124  
information; *see* datum; knowledge  
information, vital; *see* vital information  
injured, injury, injuries; *see also* illness  
acute and severe, assist only by lightest possible address to mental factors, 206  
auditing of injured people, keep light, 238  
causes of predisposition, precipitation and prolongation of, 189  
don't confine handling to touch assist, 190  
injured, injury, injuries (*cont.*)  
occur in presence of suppression, 237  
person is out of present time, 237  
physical facts of, 190  
insane are insane because they have evil intentions; but they can't even make these stick, 230  
insane, truly insane cannot control or withhold their evil purposes and dramatize them, 128  
Integrity Processing,  
generalities, best way to "miss" Integrity Processing question is to let pc indulge in, 176  
"Have I missed a withhold on you?" can be used if pc gets upset or critical, 179  
how to prevent ~ being left unflat, 175  
new auditors routinely believe that in ~ pc knows answer and won't give it; this is an error, 180  
pc withhold, insert "Have I missed an Integrity Processing question on you?", 177  
questions must be F/Ned, 175  
specialist who cannot read a meter is dangerous, why, 179  
intention, communication and, 185  
intentions,  
don't ask for interest on intentions before running the item, 161, 169  
good, are never run, 277  
in AEI Treble Assessments, 277  
you can only list and run connected with terminal or mass or somatic, never significance, 277  
interest,  
Dianetic "no interest" items, 161, 169  
drug items that have read are run R3R without asking for interest, 161, 169  
Expanded Dianetics running of evil purposes or intentions, don't ask for interest, 161  
repair of "no interest" items, 169  
Interiorization Remedy, theory of, 38 1  
Interiorization Rundown, 291  
and the 4th flow, 373, 377, 386  
auditor auditing pc over Int-Ext misunderstands, handling of, 410  
C/Sing Int RD, 280  
disability of auditor in running Int RD, 281  
end phenomena, 280  
Full Flow Table and , 285, 375  
HCO Bs covering, 279  
headache and ~, 307  
is a remedy, 280  
is essentially a Dianetic, not a Scientology, action, 291, 386  
out, source of high TA, 24  
overrun, it usually happens that an ~ is, 280  
pc goes exterior in auditing, later his TA goes high, *then you do an Int RD*, 280  
purpose of, 281, 381  
repair of Int RD, 280  
L3RD—Dianetics and Int RD Repair List, 265  
requires flawless auditing and C/Sing, 292, 386  
roller-coaster can also be caused by a bad , 339  
two-way comm step follows a day or so after, 280

## SUBJECT INDEX—1972/1975

Interiorization Rundown (*cont.*)  
unnecessary, when is Int RD unnecessary, 279  
when to run, 279, 280  
internships, 12  
Interviews, PTS, 98  
intestinal bacteria, 408  
Int RD; *see* Interiorization Rundown  
introspection, *defn.*, (L. from *introspicere*, to look within) a looking into one's own mind, feelings, reactions, etc.; observation and analysis of oneself, 240, 250, 347  
Introspection Rundown, 239, 249, 260, 262, 346  
auditor requirements for, 240, 250, 347  
caution, 296  
dominant flow is Flow 0, 295  
end phenomena of, 241, 256, 353  
essence of, 240, 250, 347  
fixated attention, 262  
Flow Zero command for, 275  
programming ~ to fit the pc, 260  
steps of, 240, 250, 260, 295, 347  
theory of, 240, 250, 347  
introversion, *defn.*, (from *intro* + L. *vertere*, to turn) a tendency to direct one's interest upon oneself rather than upon external objects or events, 240, 250, 347  
attention and introversion, 262  
evidence of, 262  
invalidate, invalidating, invalidation,  
button on lists, 213  
past lives, don't invalidate, 330, 338  
pc being made to go on past a win acts as, 194  
remedy for invalidation of past lives, 388  
"Invent a problem that person (weak universe) could be to you" [process], 125  
IP; *see* Integrity Processing  
"irresponsible pc", how to get withholds off, 176  
isolation of person in psychotic break, 260  
item(s),  
found out of session or by a non-auditor is suspect of being a listing and nulling error even though no list was made, 96  
list, nothing produces as much case upset as a wrong list item or a wrong list, 97  
"Whys have been found" but person is not doing well; this is case of wrong item, 157

## J

Johannesburg Confessional List, 419  
justice,  
*defn.*, 1. moral rightness, equity; 2. honor, fairness; 3. good reason; 4. fair handling, due reward or treatment; 5. administration and procedure of law, 102  
*defn.* action of group against individual when he has failed to get his own ethics in, 172  
causing withholds, results of, 172  
executive's Ethics and Justice hats, 100

justice (*cont.*)  
group justice, 100, 128  
savage justice aberrates because it prevents getting off withholds, 172

## K

Key Word Clearing; *see* Word Clearing Method 6  
knowingness, 118  
awareness of awareness unit builds space to cut down knowingness, 112  
circuits key out with knowingness, 181  
cutting down of knowingness and Remedy of Havingness have opposite vectors, 113  
thetan cuts down ~ to create a game, 112, 113  
knowledge; *see also* datum; vital information  
basic knowledge of man is essential to any improvement in any area of human race, 171  
organization, main product of, is knowledge and results obtained with it, 337  
Scientists and public, knowledge bridge must be in, 202  
to the average person is only this: a knowledge of hisorherwithholds, 178  
Know to Mystery Scale described, 112

## L

L&N; *see* listing and nulling  
latent reads, caused by too high sensitivity, 271  
laziness and dishonesty, source of out tech, 426  
lazy and inactive, how a person becomes, 370  
liability, non-compliance as Liability, 79  
life in body, thetan puts it there, 126  
life is a repeating pulse and ebb and surge of motion, 299  
Life Repair is not a prerequisite for Drug RD, 311  
list (s); *see also* listing and nulling  
auditor failure to get a list to respond or note it then defeats C/S completely, 234  
auditor must clear each and every word on, 94  
auditors who can't assess lists, results of, 426  
case upset, wrong list item or a wrong list, 97  
correction lists; *see* prepared lists, correction lists  
Dianetic list can produce wrong list reactions, 97  
failed sessions, most common reason for, is in ability of auditor to get reads on lists, 233  
if a pc lists to a question the rules of L&N apply, 419  
it takes correct metering and impingement to make a list read, 234  
no-case-gain, slow-case-gain, sickie and "failed cases", handled by basic lists, 426  
out lists, 157  
all of more violent or bad reactions on part of pc come from, 97  
(meaning overlist or wrong items) produces most fantastic H E & R, 194

## SUBJECT INDEX—1972/1975

- list(s) (*cont.*)  
out lists (*cont.*)  
roller-coaster can also be caused by, 339  
symptoms of out lists, 97  
listing questions used accidentally in two-way comm can give out list symptoms, 270  
prepared lists; *see* prepared lists  
remedy for an auditor who can't get reads on lists, 233, 234  
wrong lists or upset people, what can cause, 97  
listing; *see* listing and nulling  
listing and nulling,  
auditor must grab the actual sense of answer, 395  
errors, L4BR, 138  
item must BD and F/N, 96  
listing out of session, cause of, 96  
listing question, don't use in two-way comm, why, 270  
listing questions governed by rules of ~, 270  
pc upset, look into two-way comm processes in folder and treat them as L&N processes where pc has answered with items, 270  
PTS Rundown, L&N for places and planets should be restricted to planets only on VA pcs and an L4BR used at first sign of trouble, 142  
PTS Rundown two-way comm question converted to ~, 142  
reconstructing the list, 96  
self-auditing, commonest reason for, is a wrong or unfound L&N item, 96  
Why finding, purpose or product, suspect listing errors when repairing, 96  
literacy, *defn.*, ability to read and write, 314  
locations, PTS to, 98  
loss, person who has just experienced a loss may become ill, 237  
low TA; *see* tone arm, low  
LRH Model Auditing Tapes, use of, 33  
Lying, pc's sanity and continued happiness absolutely depend upon his ability to create new facts, 114  
Lying, Routine 2—29: "Start Lying", 114  
L3 EXD RB—Expanded Dianetics Repair List, 70  
L3RC—Dianetics and Ext RD Repair List, 245  
L3RD—Dianetics and Int RD Repair List, 265  
L3RD, how to use, 290, 384  
L4BR—for assessment of all listing errors, 138  
L4BR is used at first sign of trouble on L&N, 142  
L IX Hi-Lo TA List revised, 1  
L10 prerequisites, 392  
L10, when done between R6EW and OT III, will fail, 20
- M**
- magnesium, nervous reactions are diminished by, 354, 369  
malnutrition, *defn.*, general breakdown of body functions due to lack of adequate nourishment, 207  
man is basically good, but reactive mind tends to force him into evil actions, 78, 370  
mass(es), massy,  
are more important than perceptions, 106  
degradation begins when thetan is interiorized into unwanted mass, 105  
flows, missing flows are still potential mass, 274, 286, 287, 377, 380, 381  
havingness is mass or objects, 115  
Havingness, Remedy of, what it is, 124  
preclear has felt massy, sometimes even ill, cause of, 287, 381, 382  
thetan's loss of mass, 105  
thetans, massy, 286, 380  
Material Clearing, Word Clearing Method 5, 152  
meanings, conceptualization of, 316  
medical doctor(s),  
minister and medical doctor, no conflict between, 192  
Scientology sends sick to medical doctor, 203  
medical examination and treatment and assists, 189  
mest, thetan creates mest to have a game, 112  
mest universe, dwindling spiral of, 105  
meter; *see* E-Meter  
methods of Word Clearing; *see* Word Clearing Method 4; *see* Word Clearing Method 4  
mind monitors structure, 205  
minister, actions and tools of, 191  
missed withhold(s); *see also* rudiments  
ARC broken pc, how to ask for ~, 179  
continuous missed withhold, 235, 236  
is often falsely labeled PTS, 236  
Integrity Processing and , 179  
is a should have known, 179  
natterings, upsets, ARC breaks, critical tirades, lost students, ineffective motions are restimulated but missed or partially ~, 178  
mistakes or accidents or injuries occur in presence of suppression, 237  
misunderstood word(s); *see also* Word Clearing auditing pc over, references to handle, 410  
confusion, underneath confusion is a ~, 29  
person with technical query has ~, how to handle, 424  
student with, will pour out a torrent of queries, 42  
tests, misunderstands on, 32  
use Method 4 Word Clearing when fishing for, 301  
morale,  
production is basis of ~, 38, 80, 129  
production, morale and exchange factor, 80  
robot goes into morale declines easily, 1 29  
morals, *defn.*, principles of right and wrong conduct, 102; *see also* ethics  
motions, ineffective, are restimulated but missed or partially missed withholds, 178  
motion slowness, 236  
motivators, persons looking for overt to explain ~, 371

## SUBJECT INDEX—1972/1975

Multiple-Flow E. Purp Rundown, 277  
muscles, nervous muscles can be cured with calcium-magnesium, 369  
muscular spasms are caused by lack of calcium, 354  
musician and stage manners, 293  
music, six distinct types of rhythm, 298  
Mutter TR, 395  
mutual out ruds, 259  
muzzled auditing; *see* auditing, muzzled  
M/W/H; *see* missed withhold  
mystery, Know to Mystery Scale described, 112  
mystery, thetan could be called a “mystery sandwich” in that he tends to stick in on mysteries, 237  
M4; *see* Word Clearing Method 4

### N

narrative, when to triple narrative items or multiple somatic items, 275, 378  
natterings means there are missed withholds, 178  
needle; *see* EMeter; needle characteristics by name  
nervous reactions are diminished by magnesium, 354  
no-case-gain, slow-case-gain, sickie and “failed cases”, handled by basic lists, 426; *see also* case gain  
no game conditions, 112  
No Interference Area, R6EW—OT III, 20  
non-compliance as Liability, and false report as Doubt, in Ethics, 79  
nulling and F/Ning prepared lists, 213  
null prepared list, auditor outnesses causing, 213  
nutrition, 203, 401, 407

### O

objective, *defn.*, of or having to do with a material object as distinguished from a mental concept, idea or belief; means here and now objects in PT as opposed to “subjective”, 393  
objective processes, anyone can be brought more into present time with, 393  
objective processes, cure for Q and A with body, 232  
objective processes vs. subjective processes, 393  
objective rundown, 393  
OCA/APA,  
  does not measure OT band of abilities, 22  
  Ex Dn uses Dianetics to change ~, 68, 87, 328  
  is a graph which shows desirable and undesirable characteristics in a case, 22  
Opening Procedure by Duplication, effects of, 108, 109  
Opening Procedure of 8-C, 107, 108  
Operating Thetan,  
  band of abilities, OCA/APA does not measure, 22  
  behavior, 206  
  degraded being and OT, difference between, 230  
  Dianetics, when doing Triple on Clears and OTs, chains may be missing or just copies, 275

Operating Thetan (*cont.*)  
  EPs, OTs and, 273  
  is particularly subject to F/N abuse as he can blow things quite rapidly, 273  
  levels, there are perhaps 15 levels above OTVII fully developed, 202  
  materials, why they are confidential, 23  
  OT III, OT VII, OT IIIIX, explanation of sequence of, 23  
  R6EW—OT III No Interference Area, 20  
operations handled with assists, 189  
oral penicillin is worthless, it has to be shot with a needle, 407  
orders, auditor giving ~ that are not part of any process is very bad, 160  
orders, basic Why for needing, 37, 127, 130  
organization and ethics, 78, 100; *see also* ethics

overts on SP person make him blind and non-self determined, 129  
pcs who do not hold their gains are PTS, 95, 330, 338  
phenomena, 330, 338  
psychotic, relation of PTS person to, 209  
robots and PTS, 129  
robot toward SP person or group or thing, 129  
roller-coaster, cause of, is PTS, 19, 92, 330, 338  
situation, only PTS situation that is serious and lasting and can cause a roller-coaster comes from having known the person before this life, 330, 339  
suppressive persons are themselves PTS to themselves, 95  
  to someone or something, 97  
  to SP people, groups, things or locations, 98  
  when someone is suppressed he becomes a ~, 330, 338  
  when you do get person or group or thing or location PTS person will F/N VGI and begin to get well, 98  
  withholding himself from a suppressive person or group or thing, 129  
Power,  
  auditor waits for specific EP, 272  
  can be done quickie simply by not hanging on for EP and only going to F/N, 93  
  is available at Saint Hill Orgs, 23  
  requires flawless auditing and C/Sing, 292, 386

## SUBJECT INDEX—1972/1975

- “PR”, *defn.*, putting up a lot of false reports to serve as a smoke screen for idleness or bad actions, 78
- PRD; *see* Primary Rundown
- preclear(s)('s); *see also* case
- ARC broken pc should be asked “What withhold have I missed on you?” or “What have I failed to find out about you?” or “What should I have known about you?”, 179
  - attention fixated, manifestations of, 262
  - attention must be on his own case in session, not on meter or his hands, 27
  - attention on chronic somatic, how to handle, 126
  - auditor actions regarding pc; *see* auditor
  - bank, pc + auditor is greater than bank, 86
  - being made to go on past a win acts as invalidation, 194
  - blows, reasons for, 193, 194
  - Case Supervisor actions regarding pc; *see* case supervising
  - completions, 214
  - critical, upset, ARC breaky pc, handling, 179
  - doesn't want auditing, handling of, 412
  - “dog pcs”, 147
    - are problems in repair, 149
    - cause of, 149
    - errors behind “dog pcs”, 148
    - HGC, whole HGC getting “dog pcs”, 147
  - do not hold their gains are PTS, 330, 338; *see also* potential trouble source
  - dopey or “boil off”, cause and remedy of, 117
  - engrams, pc cannot run, reasons for, 276
  - exteriorization, handling; *see* Interiorization Rundown
  - exteriorization, pc misemotion about, how to handle, 124
  - exteriorizes on good win, how to end session, 397
  - flubbed pcs, handling, 320
  - folder; *see* folder
  - goal of pc, 110
  - Grade Chart is basic program of pc, 313
  - illness; *see* illness
  - in psychotic break, C/S would have to locate last severe wrong indication, indicate fact to pc, and get it corrected as first action, 241, 256, 353
  - in recent shock of having died won't go backtrack, 388
  - in trouble and not in trouble, 287, 382
  - is always willing to reveal, 180
  - is as well as he can originate a communication, 183
  - Iying, pc's sanity and continued happiness absolutely depend upon his ability to create new facts, 114
  - massy, sometimes even ill, cause of, 287, 381
  - new pcs, auditing, 291, 373; *see also* Dn Today
  - out lists, all of more violent or bad reactions on part of pc come from, 97
  - past lives,
    - pc who dives into past lives when asked for overts, 371
    - preclear(s)('s) (*cont.*)
    - past lives (*cont.*)
      - pc who doesn't go past lives in Dianetics doesn't recover, 330, 339
      - pc who won't go backtrack, reasons for, 276, 388
      - Scientology Review action to make pc go back track, 389
    - protest against a question, how it is demonstrated, 370
    - red tabbed must be repaired within 24 hours, 303
    - responsibility, raising pc's, 263
    - rock slams indicate an area of psychosis which will ruin pc's life if allowed to go unhandled, handling, 345
    - self-auditing pc, cure for, 242, 256, 353
    - sick pcs should not be run on PTS RD as standard practice, 331, 339; *see also* illness
    - stuck in upsetting incidents from movies or books, how to handle, 389
    - suppressed pcs and PTS tech, 95; *see also* potential trouble source
    - upset, look into two-way comm processes in folder and treat them as L&N processes where pc has answered with items, 270
    - withholds, pc giving another's, 176
    - withholdy on IP, insert “Have I missed an Integrity Processing question on you?”, 177
  - pre disposition, precipitation and prolongation of illness, 210
  - pregnant, Streptomycin can cause pregnant mothers to give birth to children who have impaired hearing, 404
  - pre-OT, C/S plus pre-OT is greater than bank, 86
  - pre-OT must not self-audit, 85
  - pre-OTs do not C/S their own folders, 86
  - prepared list(s), *defn.*, is one which is issued in an HCO B and is used to correct cases, 213
    - auditor outnesses causing a null, 213
    - clear up “failed cases”, 426
    - correction list(s),
      - Auditor Correction List, 60
      - Course Supervisor Correction List, 52
      - Cramming can assess correction lists, 66
      - pc is flubbed or red tagged, auditor takes pc back in at once and repairs any error with correction list for that action, 320
      - PTS RD Correction List, 89
      - Study Correction List, 16
      - Word Clearing Correction List, 304
      - Word Clearing or auditing, commonest error in, is failure to use correction lists, 67
    - C/S's main tool for discovery and correction, 234
    - F/Ning, *defn.*, on calling it whole list item by item is to F/N, 213
    - missing items on, leaves BPC on pc, 426
    - not reading but not F/Ning, 213
    - use of suppress and invalidate buttons and misunderstood word tech on prepared list, 213
    - word clearing lists for prepared lists, 366

## SUBJECT INDEX—1972/1975

- prepcheck, never prepcheck while doing Dianetics, this mashes up engrams, 291, 385
- present time, anyone can be brought more into present time with objective processes, 393
- Present Time Differentiation; Exteriorization by Scenery [process], 121
- run psychotic cases on, 121
- present time, Opening Procedure of 8-C is putting pc into contact with what is present time, 108
- present time problems, ARC breaks and withholds all keep a session from occurring, 178; *see also* problem; rudiments
- pressures, high TAs, heavy pressures and even illness can come from by-passed flows, 286, 380
- pretense, *def-*, false reason or excuse; a mere show without reality, 102
- Primary Correction Rundown, 65, 133, 157; *see also* Primary Rundown
- checklist, 134
- end phenomena of a ~, 159
- handling, 157
- pre-PCRD steps, 158
- purpose of the PCRD is to get the person through the PRD, 137, 157
- when the PCRD is given, 133
- Primary Rundown, 135; *see also* Primary Correction Rundown
- actions in HGC are case handling and Word Clearing Method 1, 76
- consists of Word Clearing and study tech; it makes a student super-literate, 135
- handling of Study Tapes, 75
- keynote of Primary Rundown is honesty, 135
- PRDs, 163
- product, 77, 135
- super-literacy is end product of PRD, 155
- steps, 136
- Tech Div Primary Rundown, 76, 135
- use of Word Clearing Method 4, 77
- Word Clearing Method 8 is an action used in the Primary Rundown, 155
- primitive culture, example of educating a ~, 170
- prior confusion, 237
- problem; *see also* present time problems
- fixated attention shows up as a problem but is usually a hidden standard, 262
- hidden standard is special problem pc thinks must be resolved before auditing can be seen to have worked, 262
- “Invent a problem that person (weak universe) could be to you” [process], 125
- PTS condition is actually a problem and a mystery and withdrawal, 98
- process, auditors asking odd non-process questions while “doing a process” and giving odd orders is very bad, 160
- processes, energy reducing processes at length “starve” thetan for energy, 105
- processing; *see* auditing
- produce, one has to produce to have, 80
- produce, person who doesn’t produce becomes mentally or physically ill, 80
- product, *defn.*, always something someone can have, 44
- hat on product before doing anything else, 38
- orders and products, 37
- org’s main product, 337
- overt products, 128
- people not knowing their products require constant orders, 37
- Product Clearing, correction, 96
- Full Product Clearing Long Form, 44
- “quickie” Product Clearing, 39
- steps of, 39
- TA and Product Clearing, 49
- production is the basis of morale, 38, 80
- production, morale and exchange factor, 80, 129
- Product Officers, 40
- program, programming, F/N what you ask or program, 222
- Grade Chart is basic program of pc, 313
- Introspection Rundown to fit the pc, 260
- major Why of falling hours, incomplete programs and other confusions, 149
- protein, sugar vs., 207
- protest, pc’s protest against a question, how it is demonstrated, 24, 370
- protest reads come from just plain annoyance with having to go on, 10
- provisional certificate expires after one year if not validated, 162
- psychiatry and psychology, primitive though pretend non-being advanced, 202
- psychos, C/Sing and auditing psychos, 264
- psychosis, rock slams indicate an area of which will ruin pc’s life if allowed to go unhandled, 345
- psychotic(s), are PTS if only to themselves, 209
- break, isolation of person in, 260, 263
- pc in, C/S would have to locate last severe wrong indication, indicate the fact to pc and get it corrected as first action, 241, 256, 353
- what it is, 239, 249, 346
- wrong indication can cause, 239, 249, 346
- relation of PTS person to psychotic, 209
- run psychotic cases on Present Time Differentiation, 121
- PT; *see* present time
- PTP; *see* present time problem
- PTS; *see* potential trouble source
- PTS Rundown, 19, 89, 91, 95, 98, 141, 209, 330, 338; *see also* potential trouble source
- administrative tech of PTS Rundown, 95
- commands of PTS Rundown, 332, 340
- Correction List, 89
- C/Sing a PTS Rundown, 91
- end phenomena, 331, 340
- attained when person is well and stable, 92

## SUBJECT INDEX—1972/1975

PTS Rundown (*cont.*)  
end phenomena (*cont.*)  
    whole point of a PTS Rundown is to make a  
    person not PTS any longer, 91  
flows of PTS Rundown, 332, 340  
L&N for places and planets should be restricted to  
    planets only on VA pcs and an L4BR used at  
    first sign of trouble, 142  
points of breakdown of the ~, 331, 339  
PTS must be handled in Ethics and given a ~, 76  
reasons a PTS RD does not work, 19  
references, 340  
repair of ~, 19, 340, 343  
sick pcs should not be run on PTS RD as standard  
    practice, 331, 339  
steps, 141, 331, 340  
that does not work has not been done correctly,  
    19  
two-way comm question converted to L&N, 142  
valence shifts occur rapidly and frequently in PTS  
    RDs, 331, 339  
when to run, 339  
who does PTS Rundown, 330, 338  
Why of robotism can be added to ~, 130  
punishment, why it doesn't cure criminality, 371  
Purpose Clearing, instant, 363

## Q

Q and A, 223, 230  
*defn.*, one did not get an answer to his question;  
    not getting compliance with an order but ac-  
    cepting something else, 230  
*defn.*, Q and A is simply postulate aberration, 230  
administrator Q and A, 223  
auditor Q and A, 222, 223  
body Q and A, 231  
    cure for, is objective processes, 232  
cause and Q and A, 225  
C/S Q and A, 222, 223  
cure of Q and A, 223, 224, 225, 232  
effect and Q and A, 231  
illness and Q and A, 232  
is a kind of illness; chronic overwhelm; handling  
    of, 224, 225  
reason for Q and A, 224, 230  
state of person who Qs and As, 231  
TR4 exists so that pc's origins are accepted and  
    not Qed and Aed with or invalidated, 289, 383  
Quad and Triple reruns, 380  
Quad Flows and high TA, 381  
Quadruple Dianetics,  
    auditor errors in running Quad Dianetics, 383  
    auditor requirements for ~, 375, 383, 386  
    cancelled, 279  
Clears and OTs, Quadruple Dianetics on, 379  
C/Sing Quad Dianetics, 374, 376  
narrative items or multiple somatic items, when to  
    triple or quad, 378

Quadruple Dianetics (*cont.*)  
    pcs, new and old, rules about Triple and Quad,  
    373  
    quadrupling earlier Dianetic items, 377  
    reinstated, 373  
    unrun F0 is checked for read before running, 373,  
    374  
    use of Quadruple Dianetics, 374, 377  
    who to run on, 373  
Qual('s),  
    Admin, product of, 188  
    C/S has to straighten out Qual cramming, 233  
    C/S makes sure Qual has a Cramming Officer, 164  
    does not take orders on *what* to do to correct, 188  
    function is correction, 188  
    pcs, Qual does not correct pcs, Tech does, 320  
    Tech and Qual actions, 320  
queries, technical queries, 42, 424  
"quickie", 93  
*defn.*, brush-off "lick and a promise", 39  
*defn.*, not doing all steps and actions that could be  
    done to make a perfect whole, 93  
*defn.*, omitting actions for whatever reason that  
    would satisfy all demands or requirements and  
    doing something less than could be achieved, 93  
*defn.*, something done or made in a hurry; a hur-  
    riedly planned and executed program (as of  
    studies), 93

## R

rapport, *defn.*, relationship, especially, one of mutual  
    trust or affinity, 298  
    audience in rapport participates, 298  
RD; *see* rundown  
reach, havingness is concept of being able to ~, 181  
reactive mind,  
    dramatize is to act under influence of past inci-  
    dents as dictated by those incidents in bank,  
    336  
    exchange maintains inflow and outflow that gives  
    a person space around him and keeps the bank  
    off of him, 79  
    man is basically good, but reactive mind tends to  
    force him into evil actions, 370  
    pc + auditor is greater than bank, 86  
    Solo auditing: C/S + pre-OT is greater than bank,  
    86  
read(s); *see also* E-Meter  
    latent reads, caused by too high sensitivity, 271  
    prepared list either reads or F/Ns, 213  
    protest reads come from just plain annoyance with  
    having to go on, 10  
    remedy for an auditor who can't get reads on lists,  
    233  
    requirements for making a list read, 234  
    wrong ways to get a pc to read between 2.0 and  
    3.0 on an E-Meter, 24  
reading aloud is Word Clearing Method 7, 154

## SUBJECT INDEX—1972/1975

- receipt-point, 185  
recruiting staff auditors, 12  
red tab; *see* red tag  
red tag, red tagged,  
    handling, 320  
    pc is flubbed or ~, auditor takes pc back in at  
        once and repairs any error with correction list  
        for that action, 320  
    pc ~ must be repaired within 24 hours, 303  
    Word Clearing errors are red tabbed, 303, 304  
refund, overloaded C/Ses can be reason for huge  
    refund ratio in org's GI-CGI, 318  
rehab(s), rehabbing,  
    chains, 289, 384  
    erasures, you can't rehab erasures with "How  
        many times?", 290, 384  
    flows, when doing additional, one must also check  
        or rehab flows run to F/N, 287, 288, 381, 382  
    liability of rehabs, 286, 380  
religion, role of, 192  
religion, why Scientologyis, 107  
remedy, remedies, *defn.*, correction of any aberrated  
    condition, 115  
    Interiorization Rundown is a remedy, 280, 281  
Remedy of Havingness; *see* havingness, Remedy of  
repaired, pc red tabbed must be ~ within 24 hours, 303  
repairing the pc instead of the auditor, 412  
Repair of Havingness; *see* havingness, Repair of  
    repair of "no interest" items, 169  
repetition, rhythm is rhythm because of ~, 298  
    false, 129  
resistive students, 158  
Responsibility Rundown, 277  
responsible, responsibility,  
    raising pc's, 263  
    refusal to take ~ for actions, 127  
    service facsimile, facsimile part is actually a self-  
        installed disability that "explains" how he is  
        not responsible for not being able to cope; so  
        he is not wrong for not coping, 258  
    step, Expanded Dianetics, 260  
restimulation, starvation for energy is keynote of case  
    which maintains facsimiles in ~, 105  
retread and retrain, 164  
reveal, pc is always willing to reveal, 180  
rhythm, 298, *defn.*, any kind of movement character-  
    ized by regular recurrence of strong and weak  
    elements, 298  
rightness, insistence on rightness is a last refuge of  
    beingness, 257  
rings on pc's hands cause a false rock slam, 364  
road to truth is begun with honesty, 150  
robotism, 127  
    key to presence of continuous M/W/Hs and/or  
        overts, 236  
rock slam(s), *defn.*, crazy irregular slashing motion of  
    needle; it can be as narrow as one inch or more  
    than a full dial in width, but it's crazy; it slams  
    back and forth; it is actually quite startling to  
    see one, 344  
rock slam(s) (*cont.*)  
    handling, also called the Responsibility RD, 277  
    indicate an area of psychosis which will ruin pc's  
        life if allowed to go unhandled, 345  
    pcs who R/S are given Ex Dn, 76, 345  
    real R/S also has a crazy meter, 344  
    rings on pc's hands cause a false ~, 364  
    where a pc R/Ses he will have evil purposes and be  
        on a succumb as a result, 345  
rock slammer(s), 344  
    are considered security risks for staff purposes,  
        344  
    checklist to assist identification of ~, 344  
    is different from someone with a rock slam, 345  
roller-coaster, *defn.*, a slump after a gain, 330, 338;  
    *see also* potential trouble source  
    can also be caused by a bad Int RD or Int repair,  
        out lists, BPC of other descriptions, 339  
    cause of, is PTS, 91, 92, 330, 338  
    only PTS situation that is serious and lasting and  
        can cause a roller-coaster comes from having  
        known the person before this life, 330, 339  
    pcs who roller-coaster (regularly lose gains) are  
        PTS, 95  
    person who roller-coasters is always PTS, 19  
Ron; *see* Hubbard, L. Ron  
Route 1—5, 117  
Route 2—29: "Start Iying", 114  
R/S; *see* rock slam  
rudiment(s) (ruds); *see also* ARC break; missed withreports,  
    hold; present time problem  
    ARC breaks, PTPs and withholds all keep a session  
        from occurring, 178  
    end phenomena, 272  
    mutual out ruds, *defn.*, two or more people who  
        mutually have ruds out on wider group or  
        other dynamics and do not get them in, 259  
    can stall cases, 259  
    C/S checks for mutual out ruds, 259  
    handling of mutual out ruds, 259  
    out ruds, don't cram over out ruds, 334  
rundowns, integrity of, 264  
R (number); *see* Routine (number), except R3R and  
    R6 [below]  
R3R; *see also* Dianetics; engrams  
    commands, 378  
        background data of, 243  
    drug items and Ev Purps that have read are run  
        R3R without asking for interest, 161  
    evil purposes, common error on R3Ring, 296  
    evil purposes, R3R all Ev Purps culled from folder  
        is done as first action in Ex Dn, 277  
    flubs, 285, 375  
    imaginary incidents can be run R3R, 388  
    inadequacy of a completely rote system, 244  
    procedure; *see also* *Dianetics Today*  
        R6EW—OT III No Interference Area, 20

## SUBJECT INDEX—1972/1975

### S

- S&Ds; *see* Search and Discovery
- sanity,  
basically honesty and truth, 31  
hattedness is basic of 3rd dynamic ~, 38  
honesty is road to sanity, 79  
pc's ~ and continued happiness absolutely depend upon his ability to create new facts, 114
- Scientists and public, knowledge bridge must be in, 202
- Scientology('s),  
current state of the subject and materials, 201  
development of Scientology, 201, 202  
Dianetics and ~, essential difference between, 107  
isn't just processing, that's only one use of fundamentals, 202  
medical doctors and Scientology, 203, 204  
relation to healing, 203  
road to truth; he who would follow it must take true steps, 203  
uses of Scientology, 202  
why Scientology is a religion, 107
- Search and Discovery (S&D),  
errors, 211  
new S&Ds (3 S&Ds), PTS RD step, 342  
past S&Ds, PTS RD step, 340
- Self Analysis in Scientology*, ARC Straight Wire using next-to last list of, 121
- self-audit; *see* auditing, self
- self-determined, beings basically prosper only when they are self-determined, 130
- self-determined, PTS's overts on SP make him blind and non-self-determined, 129
- self-determinism, fixed attention results in unawareness of other things than object of fixation and lessening of ~ to a point of other-determinism, 262
- self-listing, cause of, 96
- sensitivity, E-Meter, errors, 271
- service facsimile, *defn*, picture containing an explanation of self condition and also a fixed method of making others wrong, 258  
by Dynamics, Ex Dn RD, 257  
facsimile part is actually a self-installed disability that "explains" how he is not responsible for not being able to cope; so he is not wrong for not coping, 258  
handling, 258
- session(s),  
antibiotics, person on antibiotics is given vitamins before session, 405  
ARC breaks, PTPs and withholds all keep a session from occurring, 178  
ARC break that comes up in session must be handled, 409  
auditing itself is a sort of time track, earliest session blows later sessions, 274
- session(s) (*cont.*)  
auditor is responsible for ~ environment, 409  
exteriorization and ending session, 397  
failed sessions, most common reason for, is inability of auditor to get reads on lists, 233  
false TA must be handled before, 411, 414  
listing out of session, 96  
LRH model tape sessions, 33  
pc out of session, 410  
pc's attention must be on his own case in session, not on meter or his hands, 27  
TR 0 exists so auditor is not ducking ~ but can sit there relaxed, doing his job, 289, 383
- Short Hi-Lo TA Assessment C/S, 228, 282, 308, 356, 398
- SHSBC checksheet should consist only of chronological materials, studied in chronological order, 201
- sick; *see ill*
- significance, Attention Subjective Repetitive, never run on significance, 263
- significance, you can only list and run intentions connected with terminal or mass or somatic never significance, 277
- slowness, 128  
robotness or slowness are keys to presence of continuous missed withholds or overts, 236
- society, actual barrier in society is failure to practice truth, 203
- Solo auditing; *see* auditing, Solo
- somatic(s),  
chronic somatic, pc attention on chronic somatic, how to handle, 126  
chronic somatics, remedy, 121  
multiple, when to triple or quad narrative items or multiple somatic items, 275, 378
- SP; *see* suppressive person
- space, exchange maintains inflow and outflow that gives a person space around him and keeps bank off of him, 79
- space, thetan, awareness of awareness unit, builds space to cut down knowingness, 112
- spectators, audience in rapport is different than audience of spectators, 298
- spirit; *see* thetan
- spiritual state of person predisposes injury and illness, 189
- stage manners, 293
- Standard Dianetics; *see* Dianetics
- stats of C/Ses and auditors, D of P and Dir of Tech Services, 150
- steering pc, 180
- stomach and bowel complaints, handling of, 407, 408
- Straightwire, ARC; *see* ARC Straight Wire
- Straightwire, Elementary; *see* Elementary Straight wire
- Streptomycin can cause pregnant mothers to give birth to children who have impaired hearing, 404

## SUBJECT INDEX—1972/1975

- stress(es),  
  is basic cause in physical illness, 206  
  nutrition and biochemistry may not work at all  
  until stress is relieved by processing, 206  
  person under stress is actually under a suppression  
  on one or more dynamics, 209
- structure, mind monitors, 205
- stuck point, handling, 238
- student(s); *see also* training  
  blows, reasons for, 193  
  interrupted too often when F/Ning may also  
  blow, on a “w/h of nothingness”, 193  
  restimulated but missed or partially missed  
  withholds, 178
- Confessionals on students, 173
- drugs fog up a student and prevent gains, 137; *see also* drugs
- fast flow student, 162,163  
  passes courses by attestation, 162
- glib student can confront the words and ideas; he  
  cannot confront the physical universe or  
  people around him and so cannot apply, 99
- handling of students or even executives who will  
  not even go to study, 158
- honesty of a student, 172,174
- idle student, 158
- paying students, 15
- queries, handling of student queries by Course  
  Supervisor, 29, 42, 302, 424
- questions about “What is meant”, reason for, 29,  
  42, 302, 424
- real Why of failed students, 41
- recovering students and pcs, 193
- resistive students, 158
- symptoms of students who are withholding, 173
- who succeed, 172
- Student Hat and Study Tapes, 76, 77
- Student Rehabilitation List, 359
- study,  
  Correction List, 16
- cramming a person is a waste of time if he never  
  learned to study, 65
- part-time study on next level while auditing is a  
  failure, 15
- students or even executives who will not even go  
  to study, handling of, 158
- Tapes, Primary Rundown handling of, 75, 76
- tech,  
    course supervision, it is out tech to fail to know  
    and use study tech, 41
- Course Supervisor is a specialist in, 43
- cramming, it is obviously senseless to cram  
    someone whose study tech is out, 66
- High Crimes, 42
- Primary Rundown and, 135
- Supervisor has to know study tech, not neces-  
    sarily subject taught, 41, 42
- subjective, *defn*, proceeding from or taking place in  
  an individual’s mind, 393
- objective vs. subjective processes, 393
- Success, meter check at, 31
- succumb, where a pc R/Ses he will have evil purposes  
  and be on a succumb as a result, 345
- sugar, result of heavy intake of, 207
- sugar vs. protein, 207
- sulfa drugs, 406
- super, *defn*, superiority in size, quality, number or  
  degree, 314
- super-literacy, super-literate, 314  
  end product of Primary Rundown, 135, 155
- Supervisor; *see* Case Supervisor; Course Supervisor
- suppress and invalidate, use of on prepared lists, 213
- suppressed, suppression; *see also* potential trouble  
  source  
    mistakes or accidents or injuries occur in presence  
    of, 237
- pcs and PTS tech, 95
- person under stress is actually under a suppression  
    on one or more dynamics, 209
- PTS, when someone is ~ he becomes, 330, 338
- PTS who finds the “good hats” suppressive, 98
- suppressive person(s),  
  are SPs because they deny hav and enforce un  
  wanted hav, 141
- are themselves PTS to themselves, 95
- cleared, situation of, 260
- syphilis, effects of and cure, 406

## T

- TA; *see* tone arm
- tapes, LRH Model Auditing, 33
- tapes, Study Tapes, 75, 76, 77
- tapes, WordClearingMethod4Of, 166,305
- teachers, “teaching” vs. using study tech, 42
- Tech Div corrects its own flubbed pcs; it does not  
  send them to Qual, 320
- technical, technology (tech),  
  aspects of out-ethics, 101
- ethics must be in to get tech in, 172
- ethics, tech, admin sequence, 78,172
- hat of finder of lost tech worn by Ron, 202
- out tech,  
    course supervision, it is out tech to fail to know  
    and use study tech, 41
- C/S overloaded is a potential cause of, 318
- source of, is only laziness and dishonesty, 426
- queries, cause of, and handling, 424
- quickie tech is a symptom of out-ethics, 94
- standard tech, how a Class VIII gets in, 391
- study; *see* study tech
- verbal tech explanations, result of, 424
- teeth or gums get sore, push in lots of Vitamin C,  
  407
- temperature,  
  Assists, 238
- bringing down, with antibiotics, 403, 404, 405
- illness, when accompanied by temperature, anti-  
  biotics is usually the first thought, 403

## SUBJECT INDEX—1972/1975

- test line is a check on C/S and auditing quality, 31  
tests, why question sheets for tests must *not* be word cleared, 30, 32
- thetan(s)('s),  
cannot die; his only out is to try to stop something as he himself cannot stop living, 257  
copying or picturing incidents and then getting stuck in later portion of them, 286, 380  
could be called a “mystery sandwich” in that he tends to stick in on mysteries, 237  
creates nest to have a game, 112  
cuts down knowingness to create a game, 112  
degradation begins when thetan is interiorized into unwanted mass, 105  
efforts to be right continue to stop him in a reverse flow, 257  
energy reducing processes at length “starve” thetan for energy, 105  
gets in trouble by being only one viewpoint, 116  
has to be at earliest end of incidents to erase them, 286, 381  
is incident hungry, 286, 381  
life in body, thetan puts it there, 126  
mass, loss of, 105  
massy thetans, 286, 380  
relation to energy, 105  
right, thetan even when pressed or suppressed to absolute limit of near extinction will still try, even when “cooperating”, to some way be right, 257  
viewpoint scarcity of thetan, remedy of, 116
- third dynamic; *see* dynamic, 3rd
- tone arm (TA),  
auditor calling pc’s attention to, handling of, 410, 414  
conditions that make an auditor mess up a pc’s TA, 227, 416  
depends on normally moist hands, 226, 415  
false TA, 24, 26, 34, 226, 414  
auditing pc over false TA, handling of, 409  
auditor not getting false TA handled before session, handling of, 411  
auditor overrunning due to false TA, handling of, 411  
checklist, 34, 417  
dry and wet hands make false TA, 226, 415  
E-Meter trim knob thrown off gives false TA, 24  
F/N wide persistent with TA too high or low means false TA, 227, 416  
footplates generally give a wrong TA position, 414  
hand cream and false TA, 226, 414  
handling of, 41 1, 414  
high TA caused by dry hands, remedy of, 226, 415  
low TA, dry condition of hands or feet produces, 226, 415  
must be handled before session, 414  
vanishing cream, why one doesn’t use, 414
- tone arm (TA) (*cont.*)  
footplates generally give wrong TA position and obscure F/Ns and reads, 414  
high TA,  
and low TAs do not widely F/N, 227, 416  
assessment (L IX) to detect reasons for, 1  
being high, there are exact reasons for, 25  
can come from by-passed flows, 286, 380  
commonest sources of, 24  
C/S 53, 228, 282, 308, 356, 398  
if C/S 53 done and TA still high, 1  
handling, 25, 287, 381  
pc goes exterior in auditing, later his TA goes high, *then you* do an Int RD, 280  
Quad Flows and high TA, 381  
source of high TA, 24, 286, 380  
talking the TA down, 25  
Triple Flows and high TA, 287  
Hi-Lo TA Assessment (C/S 53), 228, 282, 308, 356, 398  
low TAs, 26  
answer to low TA because of wet hands is foot plates, 27  
commonest sources of, 24, 27  
don’t get pc to wipe hands every minute, 27  
false, overly wet condition of hands or feet produces, 226, 415  
L IX Hi-Lo TA List revised, 1  
overruns are demonstrated by a rising TA, 290, 385  
Product Clearing and TA, 49  
talking the TA down, 25  
Word Clearing, high or low TA at start of W/C session, how to handle, 304  
Word Clearing red tab with high or low TA, 303  
Word Clearing, TA must be in normal range to start Word Clearing on meter, 303, 304
- Touch Assist, 191  
don’t confine handling of injuries to, 190
- training; *see also* course; drills; student; TRs  
duplication and training, 110  
education mustn’t skip gradients, 171  
fast flow training, 162  
part-time study on next level while auditing is a failure, 15  
Scientology training gives more fundamentals than exist in all other subjects combined, 202  
sending auditors to upper orgs for training, 13  
skill and training of a Class VIII auditor, 391  
staff auditors, 12  
value of training; *see also Dianetics Today*
- training drills or routines; *see* TRs  
tranquilizer, Cal-Mag replaces any, 355  
transfer, tendency to, how to handle, 50  
Treason, out-ethics people go rapidly into, 101  
Treble Assessments, AEI, intentions in, 277  
trim, E-Meter trim knob thrown off gives false TA, 24  
Triple Flows; *see* Dianetics, Full Flow; flows  
Trouble Area Assessment, 83  
Trouble Area Short Form, 84

## SUBJECT INDEX—1972/1975

- troubled/worried, PTS RD step, 342
- TRs,
- Anti-Q and A TR, 221
  - cramming order, every cramming order includes ~, 164
  - C/S trouble comes from factors of, 292, 386
  - gradients in TRs, 186
  - honest TRs, 33
  - LRH Model Auditing Tapes are models of correct use of, 33
  - Mutter TR, ~purpose, commands, position and training stress of, 395
  - overwhelming TRs is commonest reason for low TAs, 27
  - reason for TRs, 289, 383
  - result of poor TRs, 33
  - TR 0,
    - “auditors mustn’t do TR 0 in Cramming as it stirs up their cases” is a complete lie, 194
    - blinkless TR 0, there is no such thing, 369
    - exists so an auditor is not ducking session but can sit there relaxed, doing his job, 289, 383
    - going over and over TR 04, 186
    - OT TR0 and TR0 are a routine action for auditors, 164
  - TR 1 ,
    - Case Supervisor gets auditor’s TR 1 corrected, 233
    - must be done so pc can hear and understand auditor (without blowing pc’s head off either), 289, 383
  - TR 2
    - must be done so that pc gets acknowledged, 289, 383
    - note on TR 2 and TR 4, 395
  - TR 3 basically exists so that auditor will continue to give pc commands and not squirrel off or pack up with total silence, 289, 383
  - TR 4; *see also* originations
    - exists so that pc’s origins are accepted and not Qed and Aed with or invalidated, 289,
    - how to do, 183, 184
    - note on TR 2 and TR 4, 395
    - three steps in handling an origin, 183
  - truth,
    - actual barrier in society is failure to practice truth, 203
    - datum and truth, 114
    - road to truth is begun with honesty, 150
    - sanity is basically honesty and truth, 31
    - Scientology is road to truth and he who would follow it must take true steps, 203
  - two-way comm; *see* communication, two-way
- U**
- underrun, cause of overrun and, 273
- understand, understanding, understood,  
*defn.*, to have a clear and true idea or conception, or full and exact knowledge, of something; in general it may be said that understand refers to result of a mental process or processes (a clear and exact idea or notion, or full knowledge); understand implies power to receive and register a clear and true impression, 317
- cleared word is a word which has been cleared to point of full conceptual understanding, 317
- communication and, 185
- superliterate, when one is superliterate one reads not words but understandings, and so one can act, 316
- underweight or debility, *defn.*, inadequate or lacking foods, substances or gases which are needed for activity, maintenance or repair of body, 402
- unhappiness, relation to reduced energy (havingness), 105
- unproductive, basic Why for being, 130
- unrun flows; *see flows*, unrun
- upset pc, handling of, 179
- upsets and missed withholds, 178
- upstats, when you reward a downstat you not only deprive ~, you also cave the downstat in, 80
- V**
- valence, person whose ethics have been out over a - long period goes “out of valence”, 101
- valences, all valences are circuits are valences, 181
- valence shifts occur rapidly and frequently in PTS RDs, 331, 339
- vanishing cream, unsuitable as solution to dry hands, 414
- verbal tech explanations, result of, 424
- virus, effect of most antibiotics on virus is zero, 403
- vital information, 327, 336
  - auditor not writing down ~ in worksheets, hand ling of, 412
  - dramatization of withholds on vital information lines, 336
- Vital Information Rundown, 328, 337
  - Expanded Dianetics OCA right-hand side handling, Vital Info RD belongs on, 328
- vitamins, antibiotics and, 405, 407, 408
- W**
- Wants Handled Rundown, 277
- Waterloo Station [process], difficulties with, due to pc inability to remedy havingness, 125
- W/C; *see* Word Clearing
- welfare states, why they get lots of criminals, 79
- W/H; *see* withhold
- what is a course—High Crime, 41
- whole track recall; *see Mission Into Time*

## SUBJECT INDEX—1972/1975

- Why(s),  
administrative Whys, below, there is usually an Ethics situation, 100  
evaluation, long times to do, handling of, 145  
finding W/Ses must go into pc folder, 96, 303  
found, correction of, suspect listing errors, 96  
self-listing for, 96  
“Whys have been found” but person is not doing well; this is case of wrong items, 157
- win, how to end session when pc exteriorizes on a good win, 397, 410  
win, pc being made to go on past a win acts as invalidation, 194  
withdrawal symptoms of drugs, how to handle, 354; *see also drugs*
- withhold(s), withholding,  
continuous missed withhold, 235  
dramatization of withholds, 336  
evil purpose, individual with, has to ~ himself because he may do destructive things, 127  
false reads on ~ and asking for some ~ more than once will ARC break pc, 409  
general, handling general withholds and other people’s withholds, 176  
Havingness must be run to get the benefit of having pulled ~, 181  
“irresponsible pc”, how to get ~ off, 176  
keep session from occurring, 178  
level below withholding, some pcs “have no withholds” and “have done nothing”, 371  
missed and partial, 178  
out-ethics ~, people with, cannot see, 101  
overts are biggest reason why person restrains himself and withholds self from action, 370  
pc giving another’s, 176  
perception decreases in proportion to number of, 128  
PTS person is withholding himself, 129  
pulling, “don’t know” version of, 176  
pulling, use of steering, 180  
savage justice aberrates because it prevents getting off withholds, 172  
symptoms of students who are withholding, 173  
vital information, 327, 328  
“withhold of nothingness”, students who are interrupted too often when F/Ning may blow on a ~, 193
- word(s),  
auditor must clear each and every word of every command or list used, 93, 94  
classes, 167  
cleared words, defn., 317  
glib student can confront words but cannot apply, 99  
grammar is a systematic description of the ways in which words are used in a particular language, 167  
meanings are embodied in basic concept or idea symbolized by that word, 316  
misunderstood; *see* misunderstood word
- word(s) (*cont.*)  
Primary Rundown, student looks up every , 75  
superliterate, when one is, one reads not words but understandings, and so one can act, 316
- Word Clearing; *see also* misunderstood case trouble and Word Clearing, 304  
chain of words, all must F/N, 303  
correction, 96  
errors, 304  
are red tabbed, 304  
commonest is failure to use correction lists, 67  
correction is done by Word Clearing Correction List, 96, 304  
F/N, always F/N a word being cleared on meter, 303, 304  
Grammar Course before Word Clearing, 143  
grammatical words and small words should be looked up in a simple grammar textbook, 143  
lists for prepared lists, 366
- Method 1 ,  
comes first, 10  
done by normal Word Clearing procedures in HGC, 76  
drug case who cannot be gotten through, how to handle, 137, 163  
end phenomena, 76, 132  
procedure, 132
- Method 1, 2 or 4, don’t use on person whose TA is high at session start, 303
- Method 2, don’t do before Method 1, 10
- Method 2 EP, 10  
can be many times repeated on different subjects or branches of subjects, 10  
protest reads, 10
- Method 3, use of, 10
- Method 4, 28, 301  
books, Method 4 of, 166, 305  
break down the materials when doing, 166  
E-Meter Drill 21 to be drilled for use on, 28, 301  
errors in Word Clearing Method 4, 166  
limitations, 152  
Method 1 is not a prerequisite, 28, 301  
misunderstood word, use M4 when fishing for, 301  
Primary Rundown, use of, 77  
procedure, 28, 301  
questions to use, 75, 77, 305  
requires no C/S OK for it to be done, 28, 301  
Supervisor’s use of, 29, 302  
tapes, Method 4 of, 166, 305  
too heavy on pc or doesn’t clean up, suspect implants, 96
- Method 5, Material Clearing, 152  
Method 6, Key Word Clearing, 153  
post trouble remedied by, 153  
Method 7, Reading Aloud, 154  
Method 8, 155  
used in the Primary Rundown, 155
- OAs, word clearing OAs is forbidden, 30

## SUBJECT INDEX—1972/1975

### Word Clearing (cont.)

Primary Rundown consists of ~ and study tech,  
135  
red tabs, 303  
TA trouble at start of , handling of, 303, 304  
tests at any time is a High Crime, 32  
worksheet must show truthfully all words F/Ned,  
303  
worksheets must be placed in folders, 303, 304  
work and illiteracy, 170  
worksheet(s) (W/S); *see also* Auditor Admin Series  
[IX-1]  
C/S not reading ~ or missing corny errors and not  
correcting auditor, handling of, 413  
illegible worksheets, handling of, 412  
Why finding ~ must go into pc folder, 96, 303  
Word Clearing worksheet must show truthfully all  
words F/Ned, 303  
Word Clearing worksheets must go into pc's folder,  
96, 303, 304

### X

XDn; *see* Expanded Dianetics

### Y

yellow, Case Supervisor must put a yellow tab  
marked PTS on a PTS pc folder, 92

### Z

Zero Flow; *see* Flow 0

### Numerals

3 May PL, Danger Rundown, 100  
VA pcs, PTS Rundown, L&N for places and planets,  
how to do, 142

---

*I will not always be here on guard.  
The stars twinkle in the Milky Way  
And the wind sighs for songs  
Across the empty fields of a planet  
A Galaxy away.*

*You won't always be here.  
But before you go,  
Whisper this to your sons  
And their sons —  
"The work was free.  
Keep it so."*

## EDITOR'S NOTE

With Technical Volume XI, L. Ron Hubbard is giving Scientologists everywhere one of their most precious possessions—his remarkable technical achievements of the last two years. 1977-1978 have been spectacular years of Dianetics and Scientology discoveries, filled with numerous breakthroughs made by him.

Volume XI continues from where Volume VIII ended with bulletins issued through July 1976. Preceding these latest issues from August 1976 through September 20, 1978 contained herein, there are presented 35 issues (dated 1959 onward) that were not included in the earlier Technical Volumes but which can be published now. These bulletins are listed at the start of the Chronological Contents on page xvi.

As in the original Technical Volumes, if an issue has been revised, replaced, or cancelled, this has been indicated in the upper right-hand corner along with the page number of the issue which should be referred to.

The Chronological Contents shows at what point on the time track each issue in this volume was released, and the Long Contents gives you a breakdown of the subject content of each separate HCOB or issue.

In the Subject Index at the back of this volume, main entries appear in boldface type to make it easy to find any subject.

If the title of a bulletin is known but not the date of issue, the Alphabetical List of Titles may be consulted to locate the issue fast.

Lastly, the Cancellations and Revisions lists show you which issues in previous Technical Volumes have been cancelled or revised by issues presented in this present Volume XI.

The Editor

		Cancellations and Revisions	568

# CHRONOLOGICAL CONTENTS

The Chronological Contents is a full contents list showing the chronology of the issues in this volume. It lists the issues under the date when each was last revised or reissued. If the issue has never been revised or reissued then it is simply listed under its original issue date. Persons who wish to study the HCOBs in chronological sequence will find the Chronological Contents especially useful.

Note that the first 35 issues listed (from 1959 up to and including 21 June 1975) are from the time period covered by earlier Technical Volumes. You may wish to note this in the correct places in your Technical Volume set in order to maintain the chronology.

## 1959

20	May	Know to Mystery Straight Wire for Extreme Cases	1
----	-----	---	---

## 1964

10	Mar.	Basic Auditing—Non-Reading Meters—Meter Flinch	31
----	------	--	----

## 1966

12	Oct.	Examinations (HCO PL)	32
----	------	-----------------------	----

## 1968

23	Aug.	Arbitraries	33
23	Aug.	Workability of Tech	34
26	Aug.	The Class VIII Course	35
10	Sept.	Case Supervisor—Admin in Auditing	36
10	Sept.	Flunks	37
10	Sept.	“Standard” Tech Data	38
11	Sept.	C/S Instructions	40
15	Sept.	Pc Looking or Continually Feeling Tired	41
15	Sept.	The First Thing I Learned About Teaching a Class VIII Auditor	41
16	Sept.	End Phenomena	42
20	Sept.	Valence Shifter (amendment of 10 Sept. 1968)	39
22	Sept.	Rehabs	43
23	Sept.	Violation of the Laws of Listing and Nulling	44
26	Sept.	The Study of the “Well Done” LRH C/S Folder	44
4	Oct.	Advance Courses	46
4	Oct.	Pre-OTs	46
5	Oct.	ARC Break Needle	47
29	Oct.	List Correction (amendment of 29 Sept. 1968)	45
1	Nov.	Overt-Motivator Definitions	49
5	Dec.	Unresolving Cases	50

## 1969

21	July	One-Hand Electrodes	93
21	Dec.	Solo Auditing and R6EW	112

## CHRONOLOGICAL CONTENTS

### 1970

27	Feb.	Group Engram Process	114
11	Mar.	Important Note on Group Engram Intensive	115
15	Mar.	Double Folder Danger	115
11	Sept.	Solo Assists	127

### 1971

26	Apr.	Solo Cognitions	145
----	------	-----------------	-----

### 1972

19	Mar.	C/Sing or Auditing Without Folder Study (HCO PL)	202
----	------	--	-----

### 1973

16	Nov.	Study Tech & Post (HCO PL)	221
----	------	----------------------------	-----

### 1975

20	May	Case Supervisor Actions (revision of 8 Sept. 1971)	163
21	June	Ethics and Study Tech (HCO PL) (revision of 4 Apr. 1972)	203

# LONG CONTENTS

## **HCO B 20 May 1959 KNOW TO MYSTERY STRAIGHT WIRE FOR EXTREME CASES, 1**

Know to Mystery Scale expanded, 1

## **HCO B 3 May 1962R ARC BREAKS—MISSED WITHHOLDS, 2**

All ARC breaks stem from missed withholds, 2  
Picking up missed withholds keeps pc in session, 2  
Pc manifestations cured by asking for missed withholds, 3  
Missed withhold commands, 4

## **HCO B 28 June 1962R DIRTY NEEDLES—HOW TO SMOOTH OUT NEEDLES, 6**

Reasons for dirty needles, 6

## **HCO B 12 Sept. 1962R SECURITY CHECKS AGAIN, 8**

Security Check by rock slam, 8

## **HCO B 8 Nov. 1962R SOMATICS—HOW TO TELL TERMINALS AND OPPOSITION TERMINALS, 10**

Definitions of important terms, 10  
Testing for the character of an item, 12  
Ways of asking for terminal and opposition terminal, 12  
Using Tiger Drill buttons, 12  
The line plot, 13

## **HCO B 30 Dec. 1962R ROUTINES 2-12 & 2-10—CASE ERRORS—POINTS OF GREATEST IMPORTANCE, 14**

Auditing errors, 14  
The errors of Routine Two, 15  
Auditor responsibility, 16  
Duration of process, 16  
No auditing, 16  
Failure to save records, 17  
Failing to find R/Ses on List One, 17  
Representing an R/Sing item, 18  
Oppose RIs, 18  
Incomplete lists, 19  
Wrong way oppose, test for, 20  
Lists that won't complete, 20  
Long long lists, 21  
Case remedy, 23

## **HCO B 8 June 1963R THE TIME TRACK AND ENGRAM RUNNING BY CHAINS—BULLETIN 2—HANDLING THE TIME TRACK, 25**

Reasons why some cannot run engrams on pcs, 25  
Three ways to move a time track, 25  
Charge and the time track, 27  
State of Case Scale, 27  
Charge, 28  
Auditing theory of charge erasure, 29

## **HCO B 10 Mar. 1964 BASIC AUDITING—NON-READING METERS—METER FLINCH, 31**

Reasons a pc does not read on a meter, 31  
Invalidation read of a GPM, 32  
Pc who is consistently flinching, 32

**HCO PL 12 Oct. 1966 EXAMINATIONS, 32**

Students are not to discuss examinations with other students, 32  
Line for student complaints concerning an examination, 32

**HCO B 23 Aug. 1968 ARBITRARIES, 33**

Effect of entering any arbitrary into any line, 33  
What you know when the needle on an E-Meter read, 33  
Standard tech has absolutely no arbitraries, 33

**HCO B 23 Aug. 1968 WORKABILITY OF TECH, 34**

Quality of technology, 34  
Percentage of successes using standard tech actions, 34

**HCO B 26 Aug. 1968 THE CLASS VIII COURSE, 35**

What the Class VIII Course will teach, 35  
What the course will include, 35

**HCO B 10 Sept. 1968 CASE SUPERVISOR—ADMIN IN AUDITING, 36**

Case Supervisor being presented with lousy admin, 36  
No report gets liability, 36  
Case Supervisor does not see the pc, 36  
Case Supervisor does not talk to the auditor, 36

**HCO B 10 Sept. 1968 FLUNKS, 37**

Most common goofs made by auditors, 37

**HCO B 10 Sept. 1968 “STANDARD” TECH DATA, 38**

Green Form is done by handling every read, 38  
Random auditing should not be done, 38  
Ruds and reads, 38 False reads in ruds, 38

**HCO B 10 Sept. 1968 VALENCE SHIFTER, 39**

List question, 39  
“Detached” lower grade case, 39

**HCO B 11 Sept. 1968 C/S INSTRUCTIONS, 40**

Standard action for an old-timer, 40  
Standard one-time action for a Section III OT, 40

**HCO B 15 Sept. 1968 PC LOOKING OR CONTINUALLY FEELING TIRED, 41**

M/W/H gives a nattery critical aspect, 41  
Handling a pc who feels tired, 41

**HCO B 15 Sept. 1968 THE FIRST THING I LEARNED ABOUT TEACHING A  
CLASS VIII AUDITOR, 41**

Auditor who thinks he can fly before he can even creep, 41

**HCO B 16 Sept. 1968 END PHENOMENA, 42**

Phenomena of pc occurs after phenomena of meter, 42  
Precise instant to tell the pc it's an F/N, 42  
Cutting the pc's comm, 42

**HCO B 22 Sept. 1968 REHABS, 43**

Rehabbing no longer used processes, 43  
Count the number of times released, 43

**HCO B 23 Sept. 1968 VIOLATION OF THE LAWS OF LISTING AND NULLING, 44**

Rudiments are usually not necessary in correcting a list, 44  
How to correct a list, 44  
Four basic reasons for a wrong list, 44

**HCO B 26 Sept. 1968 THE STUDY OF THE “WELL DONE” LRH C/S FOLDER, 44**

Difference between making auditors and not making auditors, 44

**HCO B 29 Sept. 1968 LIST CORRECTION, 45**

Questions for correcting a recently done list, 45

**HCO B 4 Oct. 1968 ADVANCE COURSES, 46**

Issuing an Advance Course to anyone requires C/S OK, 46  
Running Advance Courses on people with out ruds, 46

**HCO B 4 Oct. 1968 PRE-OTS, 46**

Putting in Suppress and false reads on each rud, 46

**HCO B 5 Oct. 1968 ARC BREAK NEEDLE, 47**

F/N with bad indicators is an ARC break needle, 47  
Real F/N has one or more GIs, 47

**HCO B 21 Oct. 1968R FLOATING NEEDLE, 48**

Floating needle defined, 48  
Indicating floating needle, 48  
ARC break needle, 48

**HCO B 1 Nov. 1968 OVERT-MOTIVATOR DEFINITIONS, 49**

Definitions of overt, motivator and overt of omission, 49  
False motivators, 49  
False overts, 49  
Cases that go into imaginary cause, 49

**HCO B 5 Dec. 1968 UNRESOLVING CASES, 50**

Mechanism of PTS, 50  
Why the PTS case does not respond to processing, 50

**HCO B 15 Dec. 1968RA L4BRA—FOR ASSESSMENT OF ALL LISTING ERRORS, 51**

**HCO B 2 Apr. 1969RA DIANETIC ASSISTS, 55**

Medical treatment of “insanity,” 55  
Touch Assist, 55  
Contact Assist, 55  
Auditing Assist, 55  
Handling of illness, 56  
Physically sick persons divide into two classes, 56  
Dianetic auditing speeds up healing from illness or injury, 57  
First research on Dianetics, 57

**HCO B 17 Apr. 1969R DIANETIC CASE SUPERVISION, 58**

Dianetics is done differently than Scientology, 58  
Keep Dianetics to Dianetics, 58

**HCO B 23 Apr. 1969RA DIANETICS—BASIC DEFINITIONS, 59**

Erasure, lock, secondary and engram defined, 59  
Cause of psychosomatic ills, 59  
Somatic and misemotion defined, 60  
Pc who is ill needs Dianetics, 60  
Run what is offered, don't force the pc, 60  
Time track, pleasure moment, black field and invisible field defined, 61  
Key-out vs. erasure, 61  
EP of a chain and calling F/Ns in Dianetics, 62  
Multiple illness, 62  
Chain, automatic bank, basic, unburdening, basic basic, valence and ally defined, 62  
What assess means in Dianetics, 63

**HCO B 24 Apr. 1969RA DIANETIC USE, 64**

Illegal to cure illness, 64  
Dianetics used for pastoral counseling is completely legal, 64  
Correct procedure for ill pcs wanting auditing, 65  
Examples of use of Dianetics, 65  
Dianetics and Scientology, 66

**HCO B 24 Apr. 1969R DIANETIC RESULTS, 68**

Dianetics vs. Scientology, 68  
Dianetic results are a well body and a being happy with it, 68  
Scientology results are a free, powerful and immortal being, 68

**HCO B 26 Apr. 1969R SOMATICS, 69**

Chains are held together by one similar awareness, 69  
Never assess medical terms or symptoms, 69  
Landing the real engram every time using preassessment procedure, 70

**HCO B 28 Apr. 1969R HIGH TA IN DIANETICS, 71**

High TA in Dianetics means an engram too late on the chain to erase is in restimulation, 71  
TA behavior on engram chains, 71

**HCO B 7 May 1969R FLOATING NEEDLE, 72**

Floating needle defined, 72  
Indicating floating needle, 72

**HCO B 8 May 1969 IMPORTANT STUDY DATA, 73**

Number of times over the materials equals certainty and results, 73

**HCO B 8 May 1969R TEACHING THE DIANETICS COURSE, 74**

Principles of teaching Dianetics auditors, 74

**HCO B 9 May 1969RA CASE SUPERVISING NEW ERA DIANETICS FOLDERS, 75**

R3RA exactly followed gives uniform results, 75  
Dianetic auditor requirements, 75  
Dianetic errors, 76

**HCO B 11 May 1969R METER TRIM CHECK, 77**

Meter trim check procedure, 77

**HCO B 18 May 1969R ERASURE, 78**

Erase a picture, not only the somatic, 78  
What erasure depends on, 78

**HCO B 23 May 1969R AUDITING OUT SESSIONS—NARRATIVE VERSUS SOMATIC CHAINS, 79**

Running a session out using Narrative R3RA, 79

**HCO B 28 May 1969RA HOW NOT TO ERASE, 80**

Grinding in Dianetics, 80

Forcing the pc to go earlier than basic on the chain, 80

Basic facts concerning erasure, 80

Asking “solid or erasing,” 80

Blowing an engram by inspection, 81

There’s no substitution for actually understanding what’s going on, 81

Earlier beginning, 81

**HCO B 28 June 1969RA C/S—HOW TO CASE SUPERVISE DIANETICS FOLDERS, 82**

Four possible actions for a New Era Dianetics C/S to take, 82

Two types of cases, 83

Dianetic “oddity” case, 83

Roller-coaster after Dianetic auditing, 84

Sick pcs are sent directly to a medico, 84

Handling the “insane” pc, 84

C/S procedure on a New Era Dianetics folder, 84

Auditing result is the result of a team, 85

**HCO B 17 July 1969RB NEW ERA DIANETICS COMMAND TRAINING DRILLS, 86**

TR 100: Preassessment Procedure on a Doll, 87

TR 100-A: Preassessing a Doll Coached, 87

TR 101: R3RA to a Wall, 88

TR 102: Auditing a Doll, 88

TR 103: Auditing on a Doll Coached, 89

TR 104: R3RA Coached and Bullbaited, 89

**HCO B 19 July 1969RA DIANETICS AND ILLNESS, 91**

Dianetics forbidden on Clears and OTs, 91

Illnesses can be physical; if so medical action is the first action, 91

Illness is a composite somatic, 92

Handling a continual or recurring illness, 92

**HCO B 21 July 1969 ONE-HAND ELECTRODES, 93**

One-hand electrode hides floating needles, 93

**HCO B 22 July 1969R AUDITING SPEED, 94**

Failed sessions caused by lack of speed, 94

Fast pcs require fast auditors, 94

**HCO B 24 July 1969R SERIOUSLY ILL PCS, 95**

Medical examination, 95

Medical care, 95

Dianetic auditing, 95

**HCO B 2 Aug. 1969R “LX” LISTS, 96**

The three “LX” Lists, 96

End phenomena, 96

Use of lists, 97

**HCO B 3 Aug. 1969R LX2—EMOTIONAL ASSESSMENT LIST, 98**

**HCO B 9 Aug. 1969R LX1 (CONDITIONS), 99**

**HCO B 9 Aug. 1969RA CASE FOLDER ANALYSIS, NEW ERA  
DIANETICS, 100**

The nine things that can go wrong in a New Era Dianetics session, 100  
Pc repair, 101  
Out ruds, 101  
Handling of physically ill pcs, 102  
Special cases, 102  
Original Assessment Form, 102  
Pcs who go exterior in Dianetics, 103

**HCO B 17 Oct. 1969RA DRUGS, ASPIRIN AND TRANQUILIZERS, 104**

Actions of aspirin and other pain depressants, 104  
Drugs make auditing very difficult, 105  
Cycle of drug restimulation of pictures, 105  
Drugs chemically inhibit the creation of mental image pictures but inhibit as well the erasure,  
105  
Drug taker applying for auditing, 105  
What a full drug handling program includes, 106

**HCO B 5 Nov. 1969R LX3 (ATTITUDES), 107**

**HCO B 15 Nov. 1969R CASE SUPERVISION—AUDITING AND RESULTS, 108**

New Era Dianetics results, 108  
Major errors of New Era Dianetics, 108  
New Era Dianetics auditing is so simple that it demonstrates cleanly whether the person can  
audit or not, 108  
Value of being a proven Dianetic auditor, 108

**HCO B 23 Nov. 1969RB STUDENT RESCUE INTENSIVE, 110**

Student Rescue Intensive steps, 110  
Dianetic Student Rescue Intensive steps, 111  
Promoting Student Rescue Intensives, 111  
When a Student Rescue Intensive is run, 111

**HCO B 21 Dec. 1969 SOLO AUDITING AND R6EW, 112**

Troubles on Solo courses, 112  
Solo Course R6EW requisites, 113

**HCO B 27 Feb. 1970 GROUP ENGRAM PROCESS, 114**

Steps of Group Engram Process, 114

**HCO B 11 Mar. 1970 IMPORTANT NOTE ON GROUP ENGRAM  
INTENSIVE, 115**

Complete an auditing cycle once begun, 115

**HCO B 15 Mar. 1970 DOUBLE FOLDER DANGER, 115**

Solo and auditing folder must be to hand when C/Sing, 115  
C/S only with all folders to hand, 115

***C/S Series 12RA***

**HCO B 25 June 1970RA GLOSSARY OF C/S TERMS, 116**

Recovery Program, 116  
Progress Program, 116  
Advance Program, 116  
Expanded Lower Grades, 116  
Dianetic Clear, 117  
Classification Chart, 117  
Quickie Grades, 117  
Dianetic pcs, 117

*C/S Series 13RA*

**HCO B 30 June 1970RA VIII ACTIONS, 118**

“Old” processes are not cancelled by new ones, 118  
Basics are not cancelled by later developments, 118  
VIII auditing, 119  
Resistive cases, 119  
When to use GF 40, 120  
Purpose and validity of OT IV Rundown, 120  
Case Supervisor actions, 121

**HCO B 15 July 1970R UNRESOLVED PAINS, 122**

Two reasons for pain not resolved on Dianetics, 122  
The answer to a persistent or recurring somatic, 122  
Toothache, 123

*C/S Series 15R*

**HCO B 16 Aug. 1970R GETTING THE F/N TO EXAMINER, 124**

Unflat engram chains and high TA, 124  
Causes and solutions for high TA at Exam after F/N in session, 124  
How to program a pc who has a chronic somatic, 125  
Dianetic pc pattern at Examiner, 125  
High TA and illness, 126  
Low TA and exams, 126

**HCO B 11 Sept. 1970 SOLO ASSISTS, 127**

Actions a Solo auditor may not do, 127  
Progress and advance actions may not be done Solo, 127

*C/S Series 18R*

**HCO B 11 Sept. 1970R CHRONIC SOMATIC, DIANETIC HANDLING OF, 127**

Dianetic handling of chronic somatic is given in C/S Series 15, 127

*C/S Series 29R*

**HCO B 8 Mar. 1971R CASE ACTIONS, OFF LINE, 128**

Life knocking ruds out faster than they can be audited in, 128  
Pc physically ill before next session, 128  
Self-auditing, 128  
Coffee shop auditing, 128  
Touch and Contact Assists interrupting a general course of auditing, often to no F/N, 128  
Study rundowns, 129  
Illegal patch-ups, 129  
People talking about their cases, 129  
Advanced Course material insecurity, 129  
Illegal drug use, 129

**HCO B 27 Mar. 1971RA DIANETIC ERASURE, 130**

Dianetic errors that prevent erasure, 130  
Running a non-reading item, 130  
How to handle high TA at session start, 130  
Running a narrative item, 130  
Handling a pc who has exteriorized but hasn't had an Interiorization RD, 130  
Failing to ask for DEF again when the pc says “It's erased” but TA is still high, 130  
Not asking for an earlier incident, 130  
Auditing a pc under protest will cause the TA to stay up and no F/N and erasure, 131  
Ending off a chain or engram at the first sight of an F/N, 131

*C/S Series 33RA-1*

**HCO B 5 Apr. 1971 TRIPLE AND QUAD RERUNS, 132**

Bypassed flows and mass, 132  
The source of high TA, 132

Liability of rehabs, 132  
Massy thetans, 132  
Getting in all flows, 133  
High TA, 133  
Pc not in trouble, 133  
Pc in trouble, 134  
Running Zero Flows, 134  
Getting in Zero Flows—rehab or run, 134  
Results of All Flows Rundown, 134

**HCO B 11 Apr. 1971RC L3RF—DIANETICS AND INT RD REPAIR LIST, 135**

***C/S Series 36RC***

**HCO B 21 Apr. 1971RC DIANETICS, 141**

Why the TRs exist, 141  
TRs are for use in the session itself, 141  
How to rehab a Dianetic chain, 141  
Handling flubbed chains, 142  
Using the new L3RE, 142  
Erased chains can be overrun, 143  
Firefights between auditor and pc, 143  
Use Quads on new, never audited before pcs, 143  
C/S responsibility, 144  
Putting a pc at risk, 144  
Introducing Full Flow Dianetics, 144

**HCO B 26 Apr. 1971 SOLO COGNITIONS, 145**

What cognitions in Solo auditing depend upon, 145

***C/S Series 41RA***

**HCO B 9 June 1971RA C/S TIPS, 146**

Out lists handled before ruds, 146  
No read auditors, 146  
Cramming on flubs, 146  
Correct use of R-Factors, 147  
Mixing starts of sessions, 147  
High TA and ARC breaks, 147  
Low TA quits, 147  
Exam F/Ns after flubs, 147  
C/S is handling cases on the via of an auditor, 148  
Higher levels do not solve lower level failures, 148  
C/S expertise, 148

***Word Clearing Series ERA***

**HCO B 29 June 1971RA STEPS TO SPEED STUDENT PRODUCT FLOW, 149**

Supervising at a below F/N level, 149  
Steps for handling non-F/Ning students, 149

***C/S Series 49RB***

**HCO B 5 July 1971RB ASSISTS, 150**

Three types of assists, 150  
Contact Assist, 150  
Dianetic Assist, 150  
Touch Assist, 151  
How to audit an unconscious pc, 151  
Assist rules, 151

***C/S Series 51R***

**HCO B 17 July 1971R OUT OF VALENCE, 152**

OCA/APA graph drops explained, 152  
How to handle an out of valence pc, 152

**HCO B 23 Jub 1971R ASSISTS, 153**

Assist EP, 153  
Injury Rundown, 153  
Pc running a temperature, 153  
Temperature Assist: Version A, 153  
Temperature Assist: Version B. 154

*C/S Series 54RA*

**New Era Dianetics Series 8R**

**HCO B 28 July 1971RA DIANETICS, BEGINNING A PC ON, 155**

Begin Dianetics with the Original Assessment Sheet, 155  
What Dianetics handles and how to handle it with Dianetics, 155

**HCO B 16 Aug. 1971R TRAINING DRILLS REMODERNIZED, 157**

Importance of TRs, 157  
OT TR 0: Operating Thetan Confronting, 157  
TR 0: Confronting Preclear, 158  
TR 0: Bullbait, Confronting Bullbaited, 158  
TR 1: Dear Alice, 159  
TR 2: Acknowledgements, 159  
TR 2t/2: Half Acks, 160  
TR3: Duplicative Questions, 160  
TR 4: Preclear Originations, 162

**HCOB 8 Sept. 1971R CASE SUPERVISOR ACTIONS, 163**

Class VIII Case Supervisor actions, 163

*C/S Series 59R*

**HCOB 14 Sept. 1971R DIANETIC LIST ERRORS, 192**

Dianetic list of somatics, pains, emotions, and attitudes can act as a list under the meaning of the Laws of Listing and Nulling, 192  
List errors are corrected by L4BRA, 192  
Points a C/S must be alert to regarding listing, 192

**HCO B 25 Sept. 1971RB TONE SCALE IN FULL, 193**

Tone Scale expanded, 193  
Know to Mystery Scale, 193

**HCO B 24 Oct. 1971R FALSE TA, 194**

Consequences of false TA, 194  
E-Meter improperly trimmed gives a false TA position, 194  
E-Meter discharged gives false TA, 195  
One-hand electrode, 195  
Moist hands give low TA, 195  
Dry hands give high TA, 196  
Arthritic hands give high TA, 196  
Slack grip, 196  
Can size, 196  
Cold pc, 196  
Late at night a pc's TA may be very high, 197  
Rings on the pc's hands must always be removed, 197  
Floating TA, 197  
Rusty corroded cans, 197  
Tight shoes, 197

**HCO B 12 Nov. 1971RA FALSE TA ADDITION, 198**

Cold cans, 198  
Footplates, 198  
Pcs who falsify TA, 198

**HCO B 15 Feb. 1972R FALSE TA ADDITION 2, 199**

Wrong ways to get a pc to read between 2.0 and 3.0 on an E-Meter, 199  
Commonest sources of low and high TA, 199

**HCO B 18 Feb. 1972R FALSE TA ADDITION 3, 200**

The honesty of the auditor determines his results, 200  
Low TAs, 200

**HCO PL 19 Mar. 1972 C/SING OR AUDITING WITHOUT FOLDER STUDY, 202**

C/S and auditor penalties, 202  
Payment of bonuses to C/Ses and auditors, 202

**HCO PL 4 Apr. 1972R ETHICS AND STUDY TECH, 203**

Basic Why of the majority of cases of post non-performance, 203  
Ethics actions for violations of study tech and Word Clearing tech, 203  
Axiom 28 (amended), 204

Issues by others that alter-ised tech, 274  
List of incorrect procedures or data found to have been issued, 274  
When OT VIII will be released, 287

**HCO B 26 Jan. 1977 FOOTPLATES USE FORBIDDEN, 288**

Use of footplates is forbidden, 288  
Issues that cover how to handle a false TA, 288

**HCO B 27 Jan. 1977 AUDITOR RECOVERY, 289**

HCO B 27 Jan. 1977 Auditor Recovery is cancelled, 289

**HCO B 30 Jan. 1977 FALSE TA DATA, 290**

List of references on false TA handling, 290

*C/S Series 100*

**HCO B 5 Feb. 1977 JOKERS AND DEGRADERS, 291**

People who do not understand something occasionally make fun of it, 291  
Categories jokers or degraders fall into, 291  
The joker is advertising his symptoms, 292

**HCO B 17 Feb. 1977R COURSE NECESSITIES, 293**

List of materials added to checksheets, 293

**HCO B 24 Feb. 1977 EXPANDED DIANETICS CASES, 294**

One does fully and completely complete Expanded Dianetics cases, 294

**HCO B 1 Mar. 1977 CANCELLATION OF INTEGRITY PROCESSING  
HCOBs, 295**

List of cancelled Integrity Processing HCOBs, 295

**HCO B 1 Mar. 1977 CONFSSIONAL FORMS, 296**

Never subtract anything from a Confessional, 296  
Writing up an additional list, 296

**HCO B 1 Mar. 1977 FORMULATING CONFSSIONAL QUESTIONS, 297**

What withholds add up to, 297  
Straightening out somebody on a moral code, 297  
Formula for making up a Confessional, 298

Rule for finding a fruitful area for a Confessional, 299

**HCO B 1 Mar. 1977 A VALID CONFESSIONAL, 300**

Reissue of a circa 1965 Confessional, 300

**HCO B 8 Mar. 1977R POWER CHECKLIST, 302**

C/S checklist on folders of preclears onto Power, 302

Grade Chart points for giving Ex Dn, 303

Expanded Grades is not a requisite for Power, 303

*Expanded Dianetics Series 25*

**HCO B 16 Mar. 1977 THE GAMBLER, 304**

An obsessive gambler is a psychotic, 304

Life isn't real to a psychotic gambler, 304

**HCO B 27 Mar. 1977 PROGRAMMING OF EXPANDED DIANETICS, 305**

Expanded Dianetics audits the pc at cause, 305

PTS handling and Expanded Dianetics, 305

Expanded Dianetics should be a fully completed cycle of action and not bit and piece, 305

**HCO B 5 Apr. 1977 EXPANDED GRADES, 307**

When Expanded Grades can be done, 307

A typical and ideal program for a pc, 307

Expanded Grades is not a requisite for Power but Quad Grades are, 307

**HCO B 11 Apr. 1977 LIST ERRORS—CORRECTION OF, 308**

Verifying a list, 308

Nulling a list, 308

Reconstructing a list, 308

Self-listing, 308

List correction blow-up, 308

Lists not reading, 309

Use of L4BRA, 309

Handling an L4BRA, 309

Do it right, 309

**HCO B 17 Apr. 1977 RECURRING WITHHOLDS AND OVERTS, 310**

Definition of recurring withhold or overt, 310

Handling recurring withholds and overts, 310

**HCO B 7 May 1977 LONG DURATION SEC CHECKING, 311**

The person giving off very shallow overts, 311

The soft-spoken quiet "inoffensive" person, 311

**HCO B 9 May 1977 FOREWORD OF EXPANDED DIANETICS COURSE, 312**

Types of cases Expanded Dianetics handles, 312

Corrections to Expanded Dianetics, 312

DMSMH and Expanded Dianetics, 312

*Expanded Dianetics Series 29*

**HCO B 9 May 1977 PSYCHOSIS, MORE ABOUT, 313**

Below all psychotic conduct lies an evil purpose, 313

A true psychotic can be brilliant or stupid, 313

Man is basically good, 313

15% to 25% of living human beings are psychotic, 314

**HCO B 31 May 1977 LSD—YEARS AFTER THEY HAVE "COME OFF OF"  
LSD, 315**

Characteristics of persons who have been on LSD, 315  
The LSD apparently stays in the system, 315  
Dealing with an LSD case, 315

**HCO B 14 June 1977 PAID COMPLETIONS SIMPLIFIED, 316**

Points for a major training service, 316  
Points for a major processing service, 316  
Points for minor (Division 6) services, 317  
Bonus points, 317  
Points for package sales, 317  
Penalties, 317  
Verification of paid comps and bonus computations, 318

**HCO B 26 Sept. 1977 ART AND COMMUNICATION, 319**

Two-way communication and art, 319  
True art always elicits a contribution from those who view or hear or experience it, 319  
Innovation and originality, 319  
Invalidative criticism, 320  
Constructive criticism, 320  
“Authorities” and art, 320

**HCO B 4 Dec. 1977 CHECKLIST FOR SETTING UP SESSIONS AND AN E-METER, 322**

**HCO B 6 Feb. 1978R LSD AND THE SWEAT PROGRAM, 324**

Who is an LSD case, 324  
Theory of the Sweat Program, 324  
Vitamins and minerals, 325  
Diet, 325  
Exercise, 325  
The Sweat Program steps, 325  
Results of the Sweat Program, 326

**HCO B 6 Feb. 1978R-1 LSD AND THE SWEAT PROGRAM—ADDITION, 327**

Auditing of the pc while on the LSD Sweat Program, 327  
Lack of a Sweat Program doesn't stop other auditing actions, 327  
Sweat Program can also be done before a DRD, 327

**HCO B 26 Feb. 1978 INTERNESHIPS VS. COURSES, 328**

Courses and internships are two separate and distinct activities, 328  
Fast courses, 328  
Fast internships, 328  
Internships are not used to teach the course again, 328  
Preventing internships from becoming a long haul, 329

**HCO PL 10 Mar. 1978 HGC PC APPLICATION FORM, 330**

**HCO B 18 Mar. 1978 POSTULATES AND ENGRAMS, 332**  
*[CANCELLED]*

What a full Dianetic EP consists of, 332  
Asking the pc if he postulated anything in the basic incident, 332

**HCO B 19 Mar. 1978 QUICKIE OBJECTIVES, 333**

Tendency to quickie Objectives, 333  
The only valid handling of Objectives, 333  
Handling auditors who quickie Objectives, 333

***Word Clearing Series 59R***

**HCO B 23 Mar. 1978R WORD CLEARING DEFINITIONS, 334**

What you clear when clearing a definition of a word, 334

You want the definition which applies to the text you have been reading, 334  
Definition of a cleared word, 334

*Word Clearing Series 58*

**HCO B 27 Mar. 1978 ETHICS PENALTY FOR WORD CLEARERS, 335**

The reason Word Clearers cease to be Word Clearers, 335  
The reason Word Clearing drops out in orgy 335  
Penalty for a Word Clearer accumulating misunderstood words, 335

**HCO B 3 Apr. 1978 TR DEBUG ASSESSMENT, 336**

List to find the cause of a student's bog on doing TRs, 336

**HCO B 8 Apr. 1978 AN F/N IS A READ, 338**

[CANCELLED]

When an F/N is a read, 338  
You can get four F/Ns off the same item, 338  
An F/Ning assessment does not mean that the assessment is now all reading, 338

**HCO B 30 Apr. 1978 THE SWEAT PROGRAM FURTHER DATA, 339**

Overweight, underweight and normal weight people, 339  
Handling if a person is having trips during the program, 339  
The best type of shoes to use for jogging, 340  
Calcium and magnesium supplements can be taken, 340  
Green vegetables are okay during the program, 340  
Predigested protein is not the only protein that need be taken, 340  
Salt and potassium, 340  
Doing this program gradiently is very important, 341  
Program oddity, 341  
EP of the Sweat Program, 341

*Cramming Series 17*

**HCO B 1 May 1978 TECH QUALITY, 342**

Cramming should exist in every org, 342  
TRs and metering will go a long ways to improve tech quality, 342

**HCO B 26 May 1978 DIANETICS: URGENT COMMAND CHANGE, 343**

Dianetics is being run using the wrong commands, 343  
Moving through the incident, 343  
Returning the pc to the incident, 343  
Getting the postulates in the basic incident, 343  
Narrative handling of incidents, 344  
Emphasis on the proper running of Dianetics, 344

*Cramming Series 18R*

**HCO B 2 June 1978R CRAMMING REPAIR ASSESSMENT LIST, 345**

History of the Cramming Repair List, 345  
Theory and use of the Cramming Repair List, 345  
Assessment questions, 346

**HCO B 15 June 1978 URGENT IMPORTANT, 349**

The key to Expanded Dianetics, 349  
Getting down to the basic evil purposes of the case, 349

**HCO B 18 June 1978 ROUTINE 3-R COMMAND CHANGE, 349**

Flow One, Step One command change, 349

*New Era Dianetics Series 4R*

**HCO B 18 June 1978R ASSESSMENT AND HOW TO GET THE ITEM, 350**

The New Era Dianetics original assessment items, 350  
Original item, 350  
Preassessment, 350  
Listing for running items, 351  
Preassessment steps, 352  
Preassessment item, 352  
Running item, 353  
Finding the next running item, 353  
Commands for the Original Assessment Sheet, 353  
Handling somatics, 353  
Handling narratives, 354  
Running narratives, 354  
Narrative assessment commands, 354  
Assessing by asking the question as a question, 355

(Cancels bulletins of March 31, 1959, and April 17, 1959)

**KNOW TO MYSTERY STRAIGHT WIRE FOR EXTREME CASES**

The Know to Mystery Scale expanded:

Not Know  
Know  
Look  
Emotion  
Effort  
Think  
Symbols  
Eat  
Sex  
Mystery  
Wait  
Unconsciousness

To assess a case on the lower rungs of processing, ask pc, against an E-Meter, what terminal could represent each of above, select that terminal (object or person, never a condition) which changes needle action most and run Overt-Withhold Straight Wire on it.

the definition of dirty needle.  
Revision in this type style.)*

**ARC BREAKS**

**MISSED WITHHOLDS**

(HOW TO USE THIS BULLETIN:

WHEN AN AUDITOR OR STUDENT HAS TROUBLE WITH AN "ARC BREAKY PC" OR NO GAIN, OR WHEN AN AUDITOR IS FOUND TO BE USING FREAK CONTROL METHODS OR PROCESSES TO "KEEP A PC IN SESSION," THE HCO SEC, D OF T OR D OF P SHOULD JUST HAND A COPY OF THIS BULLETIN TO THE AUDITOR AND MAKE HIM OR HER STUDY IT AND TAKE AN HCO EXAM ON IT.)

After some months of careful observation and tests, I can state conclusively that:

ALL ARC BREAKS STEM FROM MISSED WITHHOLDS.

This is vital technology, vital to the auditor and to anyone who wants to live.

Conversely:

THERE ARE NO ARC BREAKS WHEN MISSED WITHHOLDS HAVE BEEN CLEANED UP.

By WITHHOLD is meant AN UNDISCLOSED CONTRA-SURVIVAL ACT.

By MISSED WITHHOLD is meant AN UNDISCLOSED CONTRA-SURVIVAL ACT WHICH HAS BEEN RESTIMULATED BY ANOTHER BUT NOT DISCLOSED.

This is FAR more important in an auditing session than most auditors have yet realized. Even when some auditors are told about this and shown it they still seem to miss its importance and fail to use it. Instead they continue to use strange methods of controlling the pc and oddball processes on ARC breaks.

This is so bad that one auditor let a pc die rather than pick up the missed withholds! So allergy to picking up missed withholds can be so great that an auditor has been known to fail utterly rather than do so. Only constant hammering can drive this point home. When it is driven home, only then can auditing begin to happen across the world; the datum is that important.

An auditing session is 50% technology and 50% application. I am responsible for the technology. The auditor is wholly responsible for the application. Only when an auditor realizes this can he or she begin to obtain uniformly marvellous results everywhere.

No auditor now needs "something else," some odd mechanism to keep pcs in session.

PICKING UP MISSED WITHHOLDS KEEPS PCS IN SESSION.

There is *no* need for a rough, angry ARC breaky session. If there is one it is *not* the fault of the pc. It is the fault of the auditor. The auditor has failed to pick up missed withholds.

As of now it is not the pc that sets the tone of the session. It is the auditor. And the auditor who has a difficult session (providing he or she has used standard technology,

Model Session, and can run an E-Meter), has one only because he or she failed to ask for missed withholds.

What is called a dirty needle (*an erratic agitation of the needle—not limited in size—which is ragged, jerky, ticking, not sweeping and tends to be persistent*) is caused by missed withholds, not withholds.

Technology today is so powerful that it must be flawlessly applied. One does his CCHs in excellent 2-way comm with the pc. One has his TRs, Model Session and E-Meter operation completely perfect. And one follows exact technology. And one keeps the missed withholds picked up.

There is an exact and precise auditor action and response for every auditing situation, and for every case. We are not today beset by variable approaches. The less variable the auditor's actions and responses, the greater gain in the pc. It is terribly precise. There is no room for flubs.

Further, every pc action has an exact auditor response. And each of these has its own drill by which it can be learned.

Auditing today is not an art, either in technology or procedure. It is an exact science. This removes Scientology from every one of the past practices of the mind.

Medicine advanced only to the degree that its responses by the practitioner were standardized and the practitioner had a professional attitude toward the public.

Scientology is far ahead of that today.

What a joy it is to a preclear to receive a completely standard session. To receive a textbook session. And what gains the pc makes! And how easy it is on the auditor!

It isn't how interesting or clever the auditor is that makes the session. It's how standard the auditor is. Therein lies pc confidence.

Part of that standard technology is asking for missed withholds any time the pc starts to give any trouble. This is, to a pc, a totally acceptable control factor. And it totally smooths the session.

You have *no* need for and must not use any ARC break process. Just ask for missed withholds.

Here are some of the manifestations cured by asking for missed withholds.

1. Pc failing to make progress.
2. Pc critical of or angry at auditor.
3. Pc refusing to talk to auditor.
4. Pc attempting to leave session.
5. Pc not desirous of being audited (or anybody not desirous of being audited).
6. Pc boiling off.
7. Pc exhausted.
8. Pc feeling foggy at session end.
9. Dropped havingness.
10. Pc telling others the auditor is no good.
11. Pc demanding redress of wrongs.
12. Pc critical of organizations or people of Scientology.
13. People critical of Scientology.
14. Lack of auditing results.
15. Dissemination failures.

Now I think you will agree that in the above list we have every ill we suffer from in the activities of auditing.

Now PLEASE believe me when I tell you there is ONE CURE for the lot and ONLY that one. There are no other cures.

The cure is contained in the simple question or its variations “*Have I missed a withhold on you*”

#### THE COMMANDS

In case of any of the conditions 1 to 15 above ask the pc one of the following commands and CLEAN THE NEEDLE OF ALL INSTANT READ. Ask the exact question you asked the first time as a final test. The needle must be clean of all instant reaction before you can go on to anything else. It helps the pc if each time the needle twitches, the auditor says, “That” or “There” quietly but only to help the pc see what is twitching. One doesn’t interrupt the pc if he or she is already giving it. This prompting is the *only* use of latent reads in Scientology—to *help* the pc spot what reacted in the first place.

The commonest questions:

“In this session, have I missed a withhold on you?”

“In this session have I failed to find out something?”

“In this session is there something I don’t know about you?”

The best beginning rudiments withhold question:

“Since the last session is there something you have done that I don’t know about?”

Prepcheck Zero Questions follow:

“Has somebody failed to find out about you who should have?”

“Has anyone ever failed to find out something about you?”

“Is there something I failed to find out about you?”

“Have you ever successfully hidden something from an auditor?”

“Have you ever done something somebody failed to discover?”

“Have you ever evaded discovery in this lifetime?”

“Have you ever hidden successfully?”

“Has anyone ever failed to locate you?”

(These Zeros do not produce “What” questions until the auditor has located a specific overt.)

When Prepchecking, when running any process but the CCHs, if any one of the auditing circumstances in 1 to 15 above occurs, ask for missed withholds. Before leaving any chain of overts in Prepchecking, or during Prepchecking, ask frequently for missed withholds, “Have I missed any withhold on you?” or as above.

Do not conclude intensives on any process without cleaning up missed withholds.

Asking for missed withholds does not upset the dictum of using no O/W processes in rudiments.

Most missed withholds clean up at once on two-way comm *providing* the auditor doesn’t ask leading questions about what the pc is saying. Two-way comm consists of asking for what the meter showed, acknowledging what the pc said and checking the meter again with the missed withhold question. If pc says, “I was mad at my wife,” as an answer, just

ack and check the meter with the missed withhold question. Don't say, "What was she doing?"

In cleaning missed withholds do not use the Prepcheck system unless you are Prepchecking. And even in Prepchecking, if the Zero is not a missed withhold question and you are only checking for missed withholds amid other activities, do it simply as above, by two-way comm, not by the Prepcheck system.

To get auditing into a state of perfection, to get clearing general, all we have to do is:

1. Know our basics (Axioms, scales, codes, the fundamental theory about the thetan and the mind);
2. Know our practical (TRs, Model Session, E-Meter, CCHs, Prepchecking and clearing routines).

In actual fact this is not much to ask. For the return is smooth results and a far, far better world. An HPA/HCA can learn the data in 1 above and all but clearing routines in the material in 2. An HPA/HCA should know these things to perfection. They are not hard to learn. Additives and interpretations are hard to get around. Not the actual data and performance.

---

Knowing these things, one also needs to know that all one has to do is clean the E-Meter of missed withholds to make any pc sit up and get audited smoothly, and all is as happy as a summer dream.

---

We are making all our own trouble. Our trouble is lack of precise application of Scientology. We fail to apply it in our lives or sessions and try something bizarre and then we fail too. And with our TRs, Model Session and meters we are most of all failing to pick up and clean up MISSED WITHHOLDS.

---

We don't have to clean up all the withholds if we keep the missed withholds cleaned up.

Give a new auditor the order to clean up "missed withholds" and he or she invariably will start asking the pc for withholds. *That's* a mistake. You ask the pc for *missed withholds*. Why stir up new ones to be missed when you haven't cleaned up those *already missed*? Instead of putting out the fire we pour on gunpowder. Why find more you can *then* miss when you haven't found those that *have been* missed.

Don't be so confounded *reasonable* about the pc's complaints. Sure, they may all be true BUT he's complaining only because *withholds* have been *missed*. Only then does the pc complain bitterly.

---

Whatever else you learn, learn and understand this please. Your auditing future hangs on it. The fate of Scientology hangs on it. Ask for missed withholds when sessions go wrong. Get the missed withholds when life goes wrong. Pick up the missed withholds when staffs go wrong. Only then can we win and grow. We're waiting for you to become technically perfect with TRs, Model Session and the E-Meter, to be able to do CCHs and Prepchecking and clearing techniques, *and* to learn to spot and pick up missed withholds.

If pcs, organizations and even Scientology vanish from Man's view it will be because you did not learn and use these things.

## **DIRTY NEEDLES**

### **How to Smooth Out Needles**

Quite often a pc is found whose needle is jerky, random, gives many prior and latent reads and goes into small scratchy patterns....

Such a needle is hard to read—and such a pc is a long way out of session a lot of the time.

An auditor, seeing such a needle, and faced with the task of reading the instant read through all these prior and latents and scratchy patterns, tends to think in terms of heroic measures. It is “obvious” that this pc has W/Hs, missed W/Hs, overts and secrets to end all reactive banks and that the thing one ought to do is pick each one of these random needle reactions up as soon as possible. *BUT* when you try to do this you find the needle gets even *more* confused. It reads something all the time!

An extreme case of a dirty, random needle is not solved by any “fish and fumble” or heroic measures.

The pc’s needle reacts that way because of *no confidence*, which induces a sort of auto-control in session which induces a dirty needle. *Ability to predict equals confidence*.

The thing to do is give this pc about 3 sessions of rudiments and havingness—just Model Session severely with no Q and A or added chitchat. The sessions should be each one about one hour long.

All one does is do Model Session, getting the rudiments in carefully exactly by the textbook. Use Model Session, HCO Bulletin 23 June 1962. Use instant reads only as per HCO Bulletin 25th May 1962. And avoid *any Q* and *A* as per HCO Bulletin 24 May 1962, *section on “Double Questioning.”*

Use middle rudiments somewhere during the havingness session.

By doing this perfect, predictable textbook auditing session three times on the pc, most of these prior and latent reads will drop out and the needle will look much cleaner. Why? Because the pc is off auto or in session.

You can *make* a pc’s needle get dirty and react to many odd thoughts by the pc by doing the following:

1. Try to clean off prior reads and avoid instant reads in getting ruds in (going against HCO Bulletin 25 May 1962).
2. Use a scruffy and ragged session pattern (going against HCO Bulletin 23 June 1962).
3. Double question any rudiments question (as per HCO Bulletin 24 May 1962).

The pc’s needle, even if very clean at the start and loose, will tighten up, develop patterns and dirt if an auditor fails to use a textbook session. This includes raw meat

that never heard of a textbook session. Raw meat particularly requires a severely textbook session. Don't think because they're new they won't know. And too much coffee shop type auditing can rough a needle.

A pc who has become unwilling to be audited is best cured by three textbook flawless sessions of havingness as above. Don't plunge for what is *wrong*. Just establish a standard of excellence the pc can predict. And up will come the pc's confidence.

After the three sessions you can prepcheck or fish and fumble and get things really clean. And providing you *continue* to use a textbook session, the pc will get better and better.

If a pc still has a dirty needle with many prior reads after an auditor has audited that pc three sessions, then we can conclude that that auditor:

1. Is not using HCO Bulletin 25 May 1962 in reading a meter,
2. Is not handling questions as per HCO Bulletin 24 May 1962, and
3. Is not using Model Session HCO Bulletin 23 June 1962.

There *are* no difficult pcs now. There are only auditors who do not give textbook sessions.

HCO BULLETIN OF 12 SEPTEMBER AD12R  
REVISED 5 SEPTEMBER 1978

*Remimeo*

*(Revisions in this type style)  
(Only revision is the correction of the definition of a  
Rock Slam, and Dirty Needle)*

## SECURITY CHECKS AGAIN

With the advent of Dynamic Assessment a new method of Security Checking, far better than any previous Security Checking, has emerged.

Nothing in this bulletin of course detracts in any way from the value of missed withholds, pulling missed withholds or handling missed withholds on preclears or other persons in the organization.

If the following questions are asked of a person on a meter it can be at once established whether or not this person will inadvertently, covertly, or unknowingly attempt to ruin, wreck, stop and otherwise interfere with an organization, Scientology, or an auditor. The questions are as follows:

Consider committing overt against Scientology. Consider committing overt against Ron. Consider committing overt against the organization. Consider committing overt against me (the auditor).

It will be found that such a person has a goal which the person considers to be impossible to achieve so long as any one of the above four exist, therefore destructive actions will at all times be manifested no matter how "constructive" they appear.

The rock slam produced *must be decisive*. By rock slam is meant the crazy, irregular, left-right slashing motion of the needle on the E-Meter dial. R/Ses repeat left and right slashes unevenly and savagely, faster than the eye easily follows. The needle is frantic. The width of an R/S depends largely on sensitivity setting. It goes from one-fourth inch to whole dial. But it slams back and forth.

The action which should be taken if this condition is found to exist is to suspend the person or otherwise put the person away from communication lines until such time as the person's dynamic, item, and goal are found. Sometimes it is almost enough merely to find the item, as the foolishness of the conclusion that Scientology stands immediately and directly in their road will appear to the preclear at that time.

By "A goal which is an overt against Scientology" is meant something which the pc considers to be a goal which is an overt against. When you finally see such goals appear they will not be apparent to the auditor as overt. However, the pc so interprets them. For instance a pc may have a fixed idea against any spiritual activity, interpreting it as a harsh activity which forbids dancing, and the pc may have a goal to dance. However the person's item lying above the goal to dance will be found to be a spiritual group and this of course would make Scientology appear to the person to be highly antipathetic to the goal to dance.

I cannot too strongly urge the fact that when the above occurs no possible good will result until the dynamic, item, and goal are found. Therefore this should be expedited. All care should be taken not to punish the person unduly, but to carry on because often the person is unaware of the destructiveness of his or her own actions.

In a marriage, if the husband were to place the wife on an E-Meter and ask the question "Consider committing overt against me" and find a wide rock slam imme

diately results, he will be then in total possession of what has been wrong with his marriage. Similarly, a wife finding this manifestation on a husband would also be informed.

The remedy in such a case is not to sack somebody, to shoot somebody, to divorce somebody or take some drastic final action, because we now have all the answer we need to resolve this and it will be found that as soon as the person's goal has been found the condition of hostility will cease.

The rock slam produced must be at sensitivity 16 on the meter. If a dirty needle occurs it is necessary to pull the person's missed withholds because these obviously exist. This should not be neglected. By dirty needle is meant *an erratic agitation of the needle which is ragged, jerky, ticking, not sweeping, and tends to be persistent. It is not limited in size.*

This is the new security programme. Any person responsible for maintaining security in an organization or a home should perform the above tests and take the remedial action.

I cannot too strongly urge that while this is absolute, or near as it can be, and positive in its diagnosis, it is not permanent because we can now clear, and clearing consists of doing away with the rock slam and not the offending person.

## SOMATICS

### HOW TO TELL TERMINALS AND OPPOSITION TERMINALS

It is important that a clearing auditor be able to distinguish pain from sensation, terminals from opposition terminals, and to have the data at the level of instant knowledge. To understand it less is to invite serious errors in clearing. Failure to sort terminals from opposition terminals can confuse the pc or even degrade the case. All a pc's somatics, deformities and distortions proceed from terminals, opposition terminals and combination terminals. Thus they are of vast importance to the pc and the auditor.

#### DEFINITIONS

**SOMATICS** = This is a general word for uncomfortable physical perceptions coming from the reactive mind. Its genus is early Dianetics and it is a general, common package word, used by Scientologists to denote "pain" or "sensation" with no difference made between them. To understand the source of these feelings, one should have a knowledge of engrams, ridges and other parts of the reactive bank. To the Scientologist anything is a SOMATIC if it emanates from the various parts of the reactive mind and produces an awareness of reactivity. Symbol SOM.

**PAIN** = Pain is composed of heat, cold, electrical, and the combined effect of sharp hurting. If one stuck a fork in his arm, he would experience pain. When one uses PAIN in connection with clearing one means awareness of heat, cold, electrical or hurting stemming from the reactive mind. A, cording to experiments done at Harvard, if one were to make a grid with heated tubes going vertical and chilled tubes going horizontal and were to place a small current of electricity through the lot, the device, touched to a body, would produce the feeling of PAIN. It need not be composed of anything very hot or cold or of any high voltage to produce a very intense feeling of pain. Therefore what we call PAIN is itself, heat, cold and electrical. If a pc experiences one or more of these from his reactive mind, we say he is experiencing PAIN.

"Electrical" is the bridge between sensation and PAIN and is difficult to classify as either PAIN or sensation when it exists alone. Symbol PN.

**SENSATION** = All other uncomfortable perceptions stemming from the reactive mind are called SENSATION. These are basically "pressure," "motion," "dizziness," "sexual sensation," and "emotion and misemotion." There are others, definite in themselves but definable in these five general categories. If one took the fork in the pain definition above and pressed it against the arm, that would be "pressure." "Motion" is just that, a feeling of being in motion when one is not. "Motion" includes the "winds of space," a feeling of being blown upon, especially from in front of the face. "Dizziness" is a feeling of disorientation and includes a spinniness, as well as an out-of-balance feeling. "Sexual sensation" means any feeling, pleasant or unpleasant, commonly experienced during sexual restimulation or action. "Emotion and misemotion" include all levels of the complete Tone Scale except "pain"; emotion and misemotion are closely allied to "motion," being only a finer particle action. A bank solidity is a form of "pressure," and when the sensation of increasing solidity of masses in the mind occurs, we say "the bank is beefing up." All these are classified as SENSATION. Symbol SEN.

**TERMINAL** = An item or identity the pc has actually *been* sometime in the past (or present) is called a TERMINAL. It is "the pc's own valence" at that time. In the Goals Problem Mass (the black masses of the reactive mind) those identities which, when contacted, produce *pain*, tell us at once that they are TERMINALS. The person could feel

pain only as himself (thetan plus body) and therefore identities he has been produce *pain* when their mental residues (black masses) are recontacted in processing. Symbol TERM.

OPPOSITION TERMINAL = An item or identity the pc has actually opposed (fought, been an enemy of) sometime in the past (or present) is called an OPPOSITION TERMINAL. As the person identified himself as *not it* he could experience from it only sensation. An OPPOSITION TERMINAL, when its mental residues (black masses) are recontacted in processing, produces only *sensation*, never pain. Symbol OPPTERM.

COMBINED TERMINAL = An item or identity the pc has both been and opposed produces therefore both pain and sensation when it is “late on the track,” which is to say, after the fact of many terminals and opposition terminals. The combination terminal is the closure between terminal and opposition terminal lines which possesses attributes of both and the clarity of neither. It signifies a period toward the end of a game. It is found most commonly when the pc’s case is only **shallowly entered**. They exist on all cases but are fewer than terminals and opposition terminals. Symbol COTERM.

ITEM = Any terminal, opposition terminal, combination terminal, significance or idea (but not a doingness, which is called “a level”) appearing on a list derived from the pc. Symbol It.

RELIABLE ITEM = Any item that rock slams well on being found and at session end and which was the last item still in after assessing the list. Can be a terminal, an opposition terminal, a combination terminal or a significance, provided only that it was *the* item found on a list and rock slammed. Symbol RI.

ROCK SLAM = *The crazy, irregular, left-right slashing motion of the needle on the E-Meter dial. R/Ses repeat left and right slashes unevenly and savagely, faster than the eye easily follows. The needle is frantic. The width of an R/S depends largely on sensitivity setting. It goes from one-fourth inch to whole dial. But it slams back and forth.*

A rock slam is the response of an E-Meter to the conflict between terminals and opposition terminals. It indicates a fight, an effort to individuate, an extreme games condition which in the absence of auditing would seek unsuccessfully to separate while attacking. *A rock slam means a hidden evil intention on the subject or question under auditing or discussion.*

As the pc’s attention is guided to the items involved the games condition activates and is expressed on the meter as a ragged, frantic response. The wider the response the more recognizable (to the pc) is the reality of the games condition and the violence of the conflict.

The rock slam channel is that hypothetical course between a series of pairs consisting of terminals and opposition terminals.

If the conflict is too great for the pc’s reality no rock slam results. Later in auditing as the pc’s confronting rises, items which did not react earlier in auditing now begin to be real and so express themselves on a meter as a rock slam. The pc with the lowest reality level is the hardest to attain a rock slam on, but in contradiction a pc who has the least control over himself in certain zones of life has the largest rock slams.

The rock slam vanishes under Suppression and activates on **Invalidate or Withhold** or on other Prehav Levels.

This is the most difficult needle response to find or attain or preserve. And it is the most valuable in clearing.

*All* rock slams result from a pair of items in opposition, one of which is a terminal, the other being an opposition terminal.

It can exist in present time where the pc is the terminal and what the pc is faced with is the opposition terminal. Symbol R/S.

INSTANT ROCK SLAM = That rock slam which begins at the end of the major thought of any item. Symbol IRS. (*Valid R/Ses are not always instant reads. An R/S can read prior or latently.*)

DIRTY NEEDLE = An erratic agitation of the needle *which is ragged, jerky, ticking, not sweeping*, and tends to be persistent. /t is not limited in size. Symbol DN.

DIRTY READ = An instant agitation of the needle in response to a major thought. It is ragged, jerky, ticking, not sweeping, and is not limited in size. Unlike the dirty needle, it does not persist. Symbol DR.

### TESTING

The method of testing for the character of an item whether term, oppterm or coterm is extremely simple.

If the item, when said to the pc in any way, turns on PAIN in the pc's body it is a TERMINAL.

If the item, when said to the pc in any way, turns on SENSATION around or in the pc's body it is an OPPOSITION TERMINAL.

If the item, when said to the pc in any way, turns on both PAIN and SENSATION in or around the pc's body it is a COMBINATION TERMINAL.

### WAYS OF ASKING

The rule is, "Give the terminal cause, the opposition terminal effect in any listing, working or use."

The simplest form is, of course, just chanting the item at the pc a few times. This is not always workable.

The simplest but not always workable form is:

For a terminal—"Would a \_\_\_\_\_ commit overts."

For an opposition terminal—"Consider committing overts against \_\_\_\_\_."  
Using PH Level.

Instead of "Committing Overts" the Prehav Level by which the reliable item was found is normally used:

For a terminal—"Would a \_\_\_\_\_ (item) \_\_\_\_\_ (PH Level)" or  
"Consider a \_\_\_\_\_ (item) \_\_\_\_\_ ing (PH Level)."

For an opposition terminal—"Consider \_\_\_\_\_ ing (PH Level) a \_\_\_\_\_ (item) ."

### USING TD BUTTONS

The above sentences may also be used, or their rough approximation, with a Tiger Drill or Prepcheck button, and if a rock slam is present, it may develop.

-----

No matter what method is being used in saying the item being tested to find out if it is a terminal, opposition terminal or combination terminal, the rules of sensation and pain apply. Sensation means oppterm. Pain means terminal.

-----

It is important to know if an item is a term, oppterm or coterm, as its character as one of the three determines the listing question.

The same rule for testing applies in listing. If it is a terminal, it (Prehav Level). If it is an opposition terminal it is (Prehav Leveled).

Example: For a terminal, A Waterbuck, Prehav Level Snort. Proper listing question: "Who or what would a waterbuck snort at?"

Example: For an oppterm, A Tiger, Prehav Level Snort. "Who or what would snort at a tiger?"

Of course the reverse can be listed but is rarely necessary except to get a longer list when the pc stalls.

### THE LINE PLOT

A line plot must be made up for any pc for his 3GAXX or the Listing the Goal steps of Routine 3-21 (steps 6, 7, 8, 9, 10 and 11 of 21 steps).

This consists of a heavy blue 13" (foolscap or legal) sheet of paper, kept in the pc's folder and kept up to date every time a reliable item (or even last item in) is found.

On this line plot one column, the left-hand one, is reserved for oppterm. The right-hand column is reserved for terms and lines indicate whenever terms or oppterm are derived from each other.

A reliable item is designated as such on this line plot with the symbol RI. Non-reliable items are not designated.

The date each line plot item was found is added after the item so it can be found again in the Auditor's Reports without a scramble.

The full behaviour and character of any item found is written into the Auditor's Report of that session in which it was found. The width of the instant rock slam in inches, whether the slam turned on every time the item was read, what wording turned it on, and whether it would still R/S by session end are all made part of the Auditor's Report.

-----

About 20% or 25% of the cases that appear for clearing can have reliable items found on them at once by exploring the words "Scientology," "A Scientology Organization," "An auditor," "Me (the auditor)," "Ron," or the head of the local Scientology organization by name. These are considered to be oppterm by any pc whose realization of his goal would be interfered with, he or she feels, by Scientology. It does not matter what wording (see above) turns on the R/S so long as it can be consistently turned on for a bit. If it is at first only a dirty read, it is Tiger Drilled to try to make it rock slam. Only in this peculiar instance is the person called a rock slammer or is considered a security risk. Everyone alive R/Ses on something. In any event, if items such as those in this paragraph turn on a rock slam, they are put on the line plot as reliable items and used in handling the case.

The above material is in actual fact a partial anatomy of the Goals Problems Mass, its identification in auditing and the behaviour of an E-Meter towards it.

As it has never before been viewed by any practice, mental science or religion, it has to have special terminology.

The terminology has been stably in use for quite some time in Scientology. I have made the definitions more precise in this HCO Bulletin.

Anyone working in clearing should have this HCO Bulletin data at his instant call without referral to the HCO Bulletin.

With very few additions, this is the track one walks in clearing and going Clear.

Know it.

HCO BULLETIN OF 30 DECEMBER AD12R  
REVISED 5 SEPTEMBER 1978

*Remimeo*

*(Revisions in this type style)  
(Revised to correct the definition of Dirty Needle)*

URGENT

IMPORTANT

**ROUTINES 2-12 & 2-10**

**CASE ERRORS**

**POINTS OF GREATEST IMPORTANCE**

The errors in doing Routine 2-10 and Routine 2-12 are divided into two broad divisions:

- (a) Those of auditing itself;
- (b) Those deriving from errors in doing the exact skills of Routines 2-10 and 2-12.

**AUDITING ERRORS**

This bulletin touches only briefly on the errors of (a) auditing errors. These consist of sloppy form, bad TRs, inability to read a meter, Auditor Code breaks, Q and A-ing, missing missed W/Hs, doing bad mid ruds or Tiger Drilling and using auditing form to hold up results.

One remedies bad auditing (as different from bad 2-10 or 2-12) by following this prescription:

The poorer the auditor, the more a supervisor or instructor takes away from him the tools of auditing. In short, if an auditor makes bad auditing errors, one simplifies the auditing to prevent the errors. Don't let him or her do 2-12. Make such an auditor use only 2-10. Then, as the auditor's skill in basic auditing improves, the more he or she can be trusted with 2-12.

Do NOT let an auditor who can't do any kind of a job of basic auditing do 2-12. Let such an auditor do only 2-10. And then as that auditor's case improves on 2-10 or 2-12, and as training drills are passed, let the auditor graduate up to 2-12.

Remember this: 2-12 works all by itself with *no* auditing niceties. And it can be prevented from working (but only to some degree) by bad auditing form or intention.

Strip off Model Session, mid ruds, Tiger Drilling, and *two-way* comm, demand it be run muzzled, muzzled, muzzled, use the meter only to find rock slams, and modern Routine 2 works like a dream, a dream, a dream even for an auditor whose auditing skill is terrible.

Let a Q and A artist clean cleans on a meter, muck up the mid ruds, yap at the pc, and Routine 2 *won't* work because it never gets done.

So the training stress and the *use* stress of Routine 2 *is just* on Routine 2, its rules and how it's done, and when the auditor has case gains and wins, auditing form is then entered upon.

The backwards way is to insist on a good hard study of form before training on Routine 2. Always hammer Routine 2 home first and get it *done*, not fooled with by the Mixed-up Kid from Mid Rud Gulch.

Your main trouble will come from not teaching Routine 2 hard just as itself before entering upon the niceties of auditing. You have to show the wild man it's a house before you teach him to serve French Pastry a la Partie.

Of course nothing in this HCO Bulletin should be used to degrade the value of good auditing form.

Good metering, a smooth command of the TRs, a grip on the basics and a fine knowledge of fundamentals are *vital* in an auditor.

You can't get all there is to get out of Routine 2-12 with rough auditing.

Auditing skill is not just something to acquire. It's the only thing that gets real auditing done. And good auditors are scarce and I appreciate them. I've had my share of rough auditing and I know the diamonds and gold of a smooth, flawless auditor.

But Routine 2, at the time of this writing, and for always in some area of the world as we expand, will be handled with rough auditor skill. Therefore, for the purposes of this HCO Bulletin, we will consider the auditing skill to be rough and show what Routines 2-10 and 2-12 can do in unpolished hands.

And never fear, when their cases are better and the training can be stepped up, they'll become polished, never fear. And appreciate being so. It's my brag I can get a pc out of anything with just auditing skill. That makes me pretty brave as an auditor. But this "Bring on your lions" attitude is born out of auditing skills, taught, not "native." I use the same pattern and patter as you do if you audit textbook. But I don't clean cleans often or miss reads ever and I don't Q and A. You can audit just as well as I can with practice and study. Why do I know this? Well, auditing is not my main forte, not even close to my appointments and goals.

We're probably all rock slammers somewhere on List One and this is Man pulling himself out of the mud indeed.

So don't run down pure auditing skill. It's more precious than anything in this universe.

But you can acquire it as you do Routine 2 and after.

Meanwhile don't overrate the power of Routine 2 to work with rough auditing so long as the Routine 2 is done right.

## THE ERRORS OF ROUTINE 2

Routine 2 (by which is meant 2-10 & 2-12) has its own rules and these must be learned first and learned well.

Routine 2 today is a powerful process. And if it can straighten up a pc so fast, it can also cave him in fast. However such cave-ins, while dramatic, are very easy to remedy even though they must be remedied with accuracy. (The remedies are all contained in this HCO Bulletin.)

Remember, in doing Routine 2, the primary pc upset is from badly done Routine 2, not badly done auditing. To repair a car don't look for paint scratches when somebody has removed the engine. Auditing form is paint scratches. The removed engine is flubbed Routine 2.

Routine 2 must be taught hard, not just as a version of auditing but as itself. It is its own technical package and it doesn't even infringe on the basics of auditing.

## AUDITOR RESPONSIBILITY

Routine 2 has several hills to climb. One of them is auditor responsibility. This process has the peculiarity of handing all responsibility for case gain or worsening to the auditor.

You will hear people who haven't a clue on Routine 2 crying about bad pcs, bad D of P-ing, bad Ron and blaming everyone but themselves. Investigate and you'll find only an auditor flub on Routine 2.

All Routine 2 auditor flubs consist of:

- (a) Not knowing Routine 2.
- (b) Not doing Routine 2.

There are no other Routine 2 auditor flubs.

*In Routine 2 all gain or lack of gain is assignable directly and only to the auditor.*

Frightening isn't it?

But encouraging too. For it puts the auditor at cause, wholly and completely, over the pc's case. You might have known that would happen with the first all-case fast gain process.

## DURATION OF PROCESS

Routine 2 is here to stay. You've been used to the changing face of processing.

That discouraged learning any process very well and setting up to get it done by one and all. Well, Routine 2 is here to stay. It isn't going to change. You can invest a great amount of time and effort on learning it.

It's here to stay because where it doesn't get results, the auditor didn't know it or didn't do it, and we can always remedy that.

It only produces mediocre or worsening results when it either isn't known or isn't done.

Further, it is quite easy to do.

And it produces fast, stable results. very startling to even raw meat. There is more miracle in 50 hours of well done Routine 2 than in the entire history of the Church .

Further it has to be done on every case before a goal can easily or reliably be found, or even if found, before it can be run.

So there it is. Learn it.

## NO AUDITING

The first and greatest error of Routine 2 is no auditing.

Yes, the auditor may be sitting there like a one-man band, busy as free beer at the boiler works and yet not be auditing Routine 2.

Example: Eat up two-thirds of every session with needless beginning, middle and end rudiments.

Example: Spend two hours Prepchecking the mid ruds and then find the reason the needle is dirty is an incomplete list.

Example: Spend three sessions full of general O/W trying to calm an ARC breaky pc when in actual fact the auditor has been opposing an item off an incomplete list.

It's not just audit the pc in front of you. That's vital enough. But audit the pc in front of you with *correct* Routine 2.

Auditors have been known to spend hours, days, running old processes to get the pc "up to running 2-12" when five minutes of 2-12 would have had the pc sailing.

NO AUDITING means "While seeming to deliver auditing, actually get nothing done." It's the greatest crime in Routine 2 or Routine 3. NO AUDITING can be reduced to the finest art. Doing a wrong list, re-doing a dead horse, these aren't no auditing. Auditing may have been wasted or may be slow, but it's still auditing. No, NO AUDITING means going through endless, useless motions, perhaps in top form, perhaps perfectly, none of which are calculated to advance the pc's case one inch. Doing havingness every half page, endlessly Tiger Drilling, doing mid ruds just because it's "good form," all these and a thousand more add up to NO AUDITING. Absolute essentials, bare bone, and bounteous correct 2- 12 are *AUDITING*.

Mid ruds, Tiger Drilling are necessary to good auditing but using them an inch beyond necessity is NO AUDITING.

#### FAILURE TO SAVE RECORDS

Almost the only way to completely bar the door on the pc is to lose his case folder or fail to put all lists and reports in it.

Every sheet of every list must have on it the pc's name, date of the list and the question from which the list comes.

This is the biggest MUST in Routine 2: Preserve the records and make them identifiable and usable.

#### FAILING TO FIND R/SES ON LIST ONE

Failing to find and utilize an R/S on List One is the most common (but not the most destructive to the pc's health) error in Routine 2.

Example: Auditor has three dead horses. Abandons case. Another auditor assesses List One, Tiger Drills the R/Ses out, represents a tick. Gets another dead horse. Abandons case. Pc now known as a "tough pc." A third auditor gets cunning, looks over the original assessment, sees "auditor" R/Sed once long ago. It doesn't now, having been Tiger Drilled to death. Opposes it. Gets a beautiful R/Sing list. Case starts to fly.

This error has been done over, and over and over *and is the source of all* dead horses.

**RULE:** Oppose every R/S found on List One or IA or a "PT consists of" list. Oppose them even when they only R/Sed on Tiger Drill buttons. Take the R/Sing item most intimate to the actual session as the first one to use. If in further doubt take the R/Sing item closest to the session the pc is interested in.

List One, 1A or “PT consists of” lists do not have to be RIs to be opposed. They are locks on RIs. They only need to briefly R/S, or to have been seen to R/S at some time, to be opposed. If they R/Sed at any time they *must* be opposed according to whether they are terms or oppters.

I have seen a case fail to give more than dead horses until somebody recalled that on a Sec Check test a year before the case had R/Sed on “Scientology Orgs” (now not even a tick). When that was opposed, a dial wide R/S turned on for 55 consecutive pages of items, a high record.

One remedy is to Tiger Drill “On List One ,” but it isn’t infallible.

### REPRESENTING AN R/Sing ITEM

One of the three most destructive actions to the pc is *representing an R/Sing item*. (The other two are opposing an R/Sing item taken from an incomplete list, both included below.)

Representing an R/Sing item puts a terrible strain on the pc’s attention. The list may even R/S, probably will. But the opposing item, now hidden, wreaks havoc on the pc all the time its companion is being listed on a represent list. A real calm pc can turn into a screamer if an R/Sing item is listed with a represent list, whether it has been opposed or not.

(Note: This is contrary to a 3GAXX action which could be done only because a detested person wasn’t a vital oppterm. It should not be done even in 3GAXX.)

RULE: Only do opposition lists on R/Sing items. Never represent them.

### OPPOSE RIs

Always oppose an RI and continue to oppose RIs until you get a satisfactory package. Never leave a BYPASSED item.

To do so is destructive to the preclear. This is not the greatest source of destructiveness and not every RI bypassed will ruin the preclear. But once out of three times the pc will be upset.

Example: “Scientology” R/Ses. A reliable item “a slavemaster” is found on the opposition list. It is not then itself opposed. Pc is upset by presence of a hidden item that opposes “a slavemaster.” Pc stays upset until “a slavemaster” is opposed and its RI companion item “a freedom fighter” is found. “Slavery” shows up on the “Opp Scientology” list as the thing that actually fronted up to “Scientology” when the whole thing was packaged.

RULE: When a First List R/Sing item is opposed and an RI is found, then Routine 2 steps are incomplete until the found RI is itself opposed.

It goes represent—oppose—oppose or Oppose, Oppose.

It will be seen that First List R/Sing items are usually locks into PT on actual RIs. It will also be seen that the rock slams on the First List, the first opposing RI and the RI that opposes that all match. They have the same width and speed and pattern. They seldom all R/S at the same time but in sequence of when first found.

RULE: All items found must be completely packaged.

RULE: All R/Ses in a package must match in character and vanish when fully packaged.

Leaving a bypassed item is also possible because of incomplete lists. (See below.)

## INCOMPLETE LISTS

If, after nulling, you have several rock slamming items remaining, your list is *always* incomplete.

Bonus packages vanish as soon as spotted. They occur once in a while. They can be ignored in this rule:

**RULE:** If you find more than one R/S in *nulling* a list that list is incomplete and must be completed.

Example: “Prclear (pn)” once R/Sed so it is opposed. The “Who or what would a prclear oppose” list is listed and a dozen R/Ses were seen on listing (OK so far). The list tested without reaction on the question. The auditor starts to null the list. *Some* of the items that R/Sed while being listed, R/S now on nulling. List is nulled down to 3 (!) R/Sing items. Auditor chooses one. It R/Ses nicely. This is “a control device (sen).” Auditor now lists “Who or what would oppose a control device?” List R/Ses well. However, masses tend to close in on pc. Havingness drops. Pc possibly ARC breaky. Auditor continues on listing. And on. And on. Finally gets to nulling. Very hard job. Pc cutting up. Auditor tries to pull missed withholds. After much blood auditor finds four R/Sing items left on list, chooses “a wild man” and tries to package. Pc glum. Very little cognition. *TWO* items have been bypassed. How? Auditing supervisor sees that several items on the “Who or what would a pc oppose” list R/Sed on nulling. Assumes rightly list was incomplete. Directs it to be completed. Pc smiles brightly and with a suddenly clean needle lists 80 more items (several of which R/S on listing). Masses fall away from pc again. No ARC breaks. This time only one item R/Sed on nulling. “A controller (sen).” (Only new list is nulled of course. You never re-null in 2-12.) R/S has mysteriously (and correctly) vanished off every other R/Sing item on that list. The list “Who or what would oppose a control device?” is wholly scrubbed, being wrong. The auditor now lists “Who or what would oppose a controller?” The pc happily lists 2Q0 items (many R/Sing). The needle goes clean. The auditor starts nulling. Finds he has two items on the first three pages that R/S. Has learned his lesson and, leaving off nulling for the moment, gets pc to add 50 items. Auditor goes on nulling. Nulls down to one R/Sing item, “an insane idiot.” The R/S on “a prclear,” “a controller” and “an insane idiot” all matched when seen each in turn (but “a prclear” doesn’t R/S any more). Pc cogniting like mad. Very happy. Masses all moved off and havingness up.

**RULE:** If in nulling more than one R/S is seen on list, that list is incomplete and must be completed.

There are no exceptions to this rule. Bonus packages blow off on a completed list.

Also, to clarify, keep in mind this rule:

**RULE:** If a list does not R/S now and then or at least once when being listed, it will become a dead horse.

That some list items R/Sed when the pc said them during listing is natural.

If, with Suppress clean, more than one of them R/Ses during nulling, that list is incomplete.

Also, in passing, don’t finish nulling a list before adding to it as a general practice. Add to it when the pc’s needle is dirty or when you see more than one R/S on it during nulling. The pc ARC breaks if you keep completing the nulling of the existing list and then adding.

## WRONG WAY OPPOSE

Pcs are not always right when telling you it's a terminal (pn) or oppterm (sen). They even sometimes lie to try to save their face (to keep from looking bad in an auditor's eyes or the world, or to seem even more villainous than they are).

The only real test of a right way oppose is whether or not the list lists easily with IMPROVED SKIN TONE in the pc and improved cheerfulness, and if it produces *one* R/Sing item that packages later.

If you just can't tell which way to oppose, oppose both ways and then decide on pc's appearance which way was right and continue it.

Wrong way opposition is not usual. Usually the pc tells the truth and all is well. But when a list is listed wrong way to on opposition it's long, horrible and deadly.

The pc goes faintly grey, green yellow or blackish, looks worse, and the list gets endless. A wrong way list will R/S. So it's only pc appearance that tells the story. Routine 2 is beneficial. Pcs that are listed with right way opposition look brighter, younger, with a more translucent skin tone. You won't make a mistake if you can tell the difference between a young boy and an old man, it's that distinct. (Remember, a pc will also look worse as above if you took an item from an incomplete list or committed any of the other R2 errors in this HCO Bulletin.)

## LISTS THAT WON'T COMPLETE

The only reasons a list will not complete are:

- (a) Wrong Source
- (b) Wrong Way To Oppose.

In either case there is something wrong with the source of the list.

That a list is listing R/Ses is no guarantee of rightness of source. A wrong way to list will R/S. Some lists taken from a wrong source cycle R/S, DR, clean needle, R/S, DR, clean needle.

Wrong sources are:

1. A First List item is opposed that didn't ever R/S.
2. An "RI" grabbed off an incomplete list that must be completed,
3. An item that was a terminal being opposed as though it were an oppterm and vice versa,
4. On a represent list, the item being represented actually was an R/Sing item,
5. On a represent list the item being represented was badly chosen and of no interest to the pc.

There are no other wrong sources and thus no other R2 way to get a list that won't complete. But when you *do* get a list that won't complete, be very careful to look over the above 5 reasons and pick out the right one. You may have to complete an earlier list first and scrub the one you're on.

Incompleting lists are usually abandoned without further patch-up.

How long is an incomplete list? How long is a piece of string?

## LONG LONG LISTS

Don't ever be afraid to have a long list, only be afraid of short ones. But when a list is running up toward thousands, something is wrong.

Endless lists stem basically from wrong source as above or from the auditor's failure to understand what indicates a complete list.

If, on close study of the case folder and pc, Routine 2 errors seem to be absent—the source is right and not something taken from another list itself incomplete, if the oppose is right way to, then look for the following:

- (a) Pc is not answering auditing question or
- (b) Pc has *decided* something was his item and is representing it or is otherwise operating on a *decision*.

The remedies are to get *Decide* in well and to make sure, without upsetting him, that the pc is answering the auditing question.

And if that is all OK, then it's just a long list, so complete it.

RULE: A list is complete when it can be nulled and when it produces just one RI that R/Ses on Tiger Drilling and stays in.

A list can be nulled only when a needle is *clean* (except in 2-10).

The definition of a CLEAN NEEDLE is one which flows, producing no pattern or erratic motions of the smallest kind with the auditor sitting looking at it and doing nothing. A CLEAN NEEDLE is not just something that doesn't react to a particular question. It's a lovely slow flow, usually a rise, most beautifully expressed on a Mark V at 64 sensitivity.

A list has to be listed until this needle flow is observed (with no mid ruds put in). But ruds or no ruds, a CLEAN NEEDLE always appears when a list is complete.

A DIRTY NEEDLE is an erratic agitation of the needle which is ragged, jerky, ticking, not sweeping, and tends to be persistent. It is not limited in size.

There are the *auditing* methods of converting a dirty needle to a clean needle, both as defined above. These are all the skills of auditing used with big mid rud buttons.

Now entirely and distinctly separate from *auditing* skills for cleaning a needle, there are the Routine 2 methods for converting a dirty needle to a clean needle.

Usually both *auditing* and *Routine 2* methods are used to clean a needle so that one can null, the former briefly, the latter abundantly.

However, do not overlook the demonstrable fact that Routine 2 methods for cleaning a needle are *very* beneficial and lasting in results, whereas purely *auditing* methods (like mid ruds) have value only for the moment and, even though auditing methods are desirable in this operation, when the Routine 2 is in error, the clean needle is really impossible to achieve longer than seconds with *auditing* methods.

The obvious solution to cleaning a needle is to first have *Routine 2* as perfect as possible (the errors outlined in this HCO Bulletin uncommitted or being rapidly corrected) and *then* use auditing methods.

Try it in reverse (auditing methods first and then using corrections of Routine 2) and you will not only fail to get a needle clean longer than seconds, you may also waste the better part of an intensive trying to do it.

So spend *hours* straightening up Routine 2 errors and doing it right and brief minutes with auditing methods when necessary.

And don't revile a pc for having a dirty needle. It's the auditor who dirties it up with incorrect or inaccurate Routine 2, not the pc,

Now a clean needle is vital in order to null a list. Don't *ever* try to null a list with the needle dirty. If the Routine 2 is right, the needle will clean up with two minutes' work of big mid ruds. If Routine 2 errors (wrong list source, list incomplete, wrong way oppose, etc. as per this HCO Bulletin) exist and Routine 2 is being done wrong, then two hours' worth of big mid ruds will not clean a dirty needle.

Any of the Routine 2 errors taken up in this HCO Bulletin will create a dirty needle and keep it dirty and leave the auditor sweating over mid ruds and the pc going mad trying to answer the questions. Yes, the mid ruds are out. But why? Because one or more serious Routine 2 errors as described in this HCO Bulletin are present.

So see the light. If you sweat on mid ruds as an auditor, curse them as a pc or see a co-auditor dripping exasperation over mid ruds and the needle won't stay clean, look at the Routine 2, *not* the difficulty with mid ruds. Look for the errors here described. Check them off on the case, one by one, and don't even be satisfied that it's only "no auditing." Check all the errors off, section by section. You'll be startled.

So in general, difficult mid ruds and dirty needle indicate wrong Routine 2, not bad auditing. Somebody has flubbed the Routine 2 before the *auditing* was flubbed. Once the Routine 2 is in error, auditing becomes impossible.

This gives no excuse for bad metering, cleaning cleans, trying to look like an auditor but ignoring results. Auditing errors do exist. And can be serious, but a pc running on right Routine 2 would forgive the Pope for having a forked tail. You almost can't muddy up a pc running on right Routine 2.

Here's a trick. Don't try to null a list until you've seen a clean flowing needle for a *lot* of items, maybe 50. Then get in fast mid ruds on the list and do it without cleaning any cleans. Then start nulling. If the needle dirties up after 30-40 items, skip mid ruds, just show the pc the page and have him spot any big thoughts he had on it. Then immediately get back to nulling. If the needle is dirty still, resume listing until it's clean. Just do those actions and (given error-free Routine 2 as per this HCO Bulletin) you'll have a smooth, smooth happy time of it in nulling.

Do anything you don't *have to* do in auditing Routine 2 and you're in trouble in the auditing department. Bang out almost total Routine 2 and you're in clover. Give 1/10th of the session over to goals, mid ruds and other auditing actions and 9/10ths of the session to pure Routine 2 actions and you'll really win. And that 1/10th includes any mid ruds on the list as well. Give half the session to auditing and half to Routine 2 and you'll be in continuous trouble.

The righter the Routine 2, the less auditing you'll have to do.

So how long is a list? Can you null it with a needle that requires only a pc inspection of a page to keep it clean? Are all but one of the R/Ses that happened in auditing dead when you nulled? Are your pages long streams of Xs? Did you have to use Suppress only once per page (fast check) to keep it clean?

Wells that's a complete list. If it gave you an RI. Just one.

So how long is a list?

But if all the above is true and a pc's lists are still very long, another thing can be wrong.

That wrongness usually is the pc's confronting ability being driven down by auditor unfrontability. (But also can be caused by a wrong RI or other errors gone before it as covered in this HCO Bulletin.)

The auditor Qs and As, yap, yaps, nags the pc, blames, gets in endless mid ruds, cleans cleans, misses reads or does something else.

The length of an auditor's pc's lists is to some degree proportional to the rough auditing or no auditing done by the auditor. (And also by a failure to use mid ruds and TD in the right places when necessary.)

We have known since '55 that rough auditing reduces havingness. Here's why: Rough auditing lowers the pc's ability to confront in the session. The pc's havingness is proportional to his ability to confront in the session. If a pc's havingness by can squeeze test is lower at session end than at beginning on Routine 2, then there's something wrong with the auditing or with the way Routine 2 is being applied (one of the above Routine 2 errors is being made).

The remedy for the bad auditing is to make the auditor only acknowledge anything and everything the pc says or put it on the list. Tear out all rudiments, Tiger Drills, two-way comm, and forbid any chance to comment or act on an origin by the pc, and get only Routine 2 done.

The remedy for Routine 2 errors (and the errors themselves) are given above in this HCO Bulletin.

## CONCLUSION

Routine 2 does not have an endless parade of DO-NOTS. They are basically just those above.

Simple, really.

And I've not seen one session on Routine 2 that was going really wrong, go wrong on auditing errors alone. Routine 2 sessions go wrong on bad Routine 2. The auditing form and meter errors start to pile up after Routine 2 has been balled up. One or more of the above Routine 2 errors has been done and overlooked.

The reason why Routine 2 errors are more deadly than purely auditing errors is that Routine 2 is handling the pc by batches of lifetimes. All the stress and gore and agony of generations exist on the lists of any one package. An auditing error can be gross and get by unless it is sitting on a Routine 2 error. Then the tiniest auditing flub can produce a reaction like an earthquake. The charge is all coming from Routine 2 mishandling and is evident on the surface only by the auditing error.

## CASE REMEDY

Routine 2 case patch-up is elementary, done with a knowledge of the above errors. Just find out which one of the above sections is being violated. And get it done. The error will only be one of the above to cause case non-progress or worsening.

The sections are given in order of importance.

I will shortly work up a series of actual case history case repairs. So save the records and you save all.

## SUMMARY

Routine 2-10 and 2-12 are their own technology and must be learned as such.

Routine 2 errors are more shaking to a case than errors in form and meter (except where the auditor can't even see a rock slam!) and where a case is not winning on

Routine 2 auditing it is the Routine 2 that must be reviewed—and fast. The elements to be reviewed are all listed above by sections in order of importance. Of course many other smaller fantastic errors can be done and will be invented but they will be junior in value to those listed above and will be reported when found.

Routine 2 will be with us a long, long time and it is worth learning well. It takes the toughest case apart and is the *only* process that can start the actual clearing of 80% or more of all cases.

I have done or reviewed thousands of hours of auditing in forming and organizing and testing Routine 2.

It is the most gratifying (and sometimes hair-raising) auditing I have ever done or viewed. You can't oversell Routine 2. You just can't. For it is the first gateway to light, life and liberty for all Mankind at last.

*(Revision in this type style page 25,  
paragraph .)*

(Reissued 21 March 1978 to correct a typo in paragraph 7, page 29.)

**THE TIME TRACK  
AND  
ENGRAM RUNNING BY CHAINS  
BULLETIN 2  
HANDLING THE TIME TRACK**

Although finding and curtailing the development of the time track at genus is not improbable, the *ability* of the preclear to attain it early on is questionable without reducing the charge on the existing track. Therefore, any system which reduces the charged condition of the time track without reducing but increasing the awareness and decisionability of the preclear is valid processing. Any system which seeks to handle the charge but reduces the preclear's awareness and decisionability is not valid processing but is degrading.

According to early axioms, the single source of aberration is time. Therefore any system which further confuses or overwhelms the preclear's sense of time will not be beneficial.

Thus the first task of the student of engram running is to master the handling of time on the preclear's time track. It must be handled without question, uncertainty or confusion.

Failing to handle the time in the pc's time track with confidence, certainty and without error will result in grouping or denying the time track to the pc.

The prime source of ARC break in engram running sessions is bypassing charge by time mishandling by the auditor. As a subhead under this, taking and trying to run incidents which are not basic on a chain constitute an error in time and react on the pc like bypassed RIs or GPMs.

An ARC break-less session requires gentle accurate time scouting, the selection of the earliest timed incident available and the accurate time handling of the incident as it is run.

There are only a few reasons why some cannot run engrams on pcs. These are:

1. Q and A with the pain and unconsciousness of incidents;
2. Failing to handle the time track of the pc for the pc;
3. Failure to understand and handle time.

2 and 3 are much the same. However, there are three ways to move a time track about:

- (a) By Significance (the moment something was considered);

- (b) By Location (the moment the pc was located somewhere);
- (c) By Time alone (the date or years before an event or years ago).

You will see all three have time in common. “The moment when you thought\_\_\_\_\_” “The moment you were on the cliff “ “Two years before you put your foot on the bottom step of the scaffold” are all dependent on time. Each designates an instant on the time track of which there can be no mistake by either auditor or pc.

The whole handling of the time track can be done by any one of these three methods, Significance, Location, Time.

Therefore all projectionist work is done by the Time of Significance, the Time of Location or Time alone.

The track responds. Those auditors who have trouble cannot grasp the totality and accuracy and speed of that response. The idiotic and wonderful precision of the time track defeats the sloppy and careless. They wonder if it went. They question the pc’s being there. They fumble about until they destroy their command over the time track.

“Go to 47,983,678,283,736 years 2 months, 4 days 1 hour and six minutes ago.” Well, a clear statement of it, unfumbled, will cause just that to happen. The tiniest quiver of doubt, a fumble over the millions and nothing happens.

Fumbled dating gets no dates. One must date boldly with no throat catches or hesitations. “More than 40,000? Less than 40,000?” Get it the first read. Don’t go on peering myopically at the meter asking the same question the rest of the session. Accurate, bold, rapid. Those are the watchwords of dating and time track handling.

In moving a time track about, move only the track. Don’t mix it and also move the pc. You can say “Move to .” You don’t have to say (but you can) “The somatic strip will move to .” But never say “You will move to .” And this also applies to present time. The pc won’t come to present time. He’s here. But the time track will move to the date of present time unless the pc is really stuck. In getting a pc to present time (unimportant in modern engram running) say “Move to (date month and year of PT).”

In *scouting you* always use *To*. “Move To .” In *running* an engram or whatever, you always use **THROUGH**. “Move through the incident .”

If an auditor hasn’t a ruddy clue about the time track and its composition, he or she won’t ever be able to run engrams. So, obviously, the first thing to teach and have passed in engram running is time track composition. When the auditor learns that, he or she will be able to run engrams. If the auditor does not know the subject of the time track well, then he or she can’t be taught to run engrams, for no rote commands that cover all cases can exist. You **couldn’t teach the handling of a motion picture projector** by rote commands if the operator had never imagined the existence of film. An auditor sitting there thinking the pc is doing this or that and being in a general fuddle about it will soon have film all over the floor and wrapped about his ears. His plea for a rote command will just tangle up more film so long as he doesn’t know it is film and that *he*, not the preclear, is handling it.

If an auditor can learn this, he will *then* be able to learn to run those small parts of the time track called engrams. If an auditor can’t run a pc through some pleasant time track flawlessly, he or she sure can’t run a pc through the living lightning parts of that track called engrams.

An auditor who cannot handle the time track smoothly can scarcely call himself an auditor as that’s all there is to audit besides postulates, no matter what process you are using, no matter what process you invent and even if you tried what is laughingly called a “biochemical approach” to the mind. There’s only a time track for the bios to affect.

There's a thetan, there's a time track. The thetan gets caught in the time track. The job of the auditor is to free the thetan by digging him out of his time track. So if you can't handle what you're digging a thetan out of, you're going to have an awful lot of landslides and a lot of auditing loses for both you and preclears.

Invent games, devices, charts and training aids galore and teach with them and you'll have auditors who can handle the time track and run engrams.

### CHARGE AND THE TIME TRACK

Charge, the stored quantities of energy in the time track, is the sole thing that is being relieved or removed by the auditor from the time track.

When this charge is present in huge amounts the time track overwhelms the pc and the pc is thrust below observation of the actual track.

This is the State of Case Scale. (All levels given are major levels. Minor levels exist between them.)

Level (1)	NO TRACK	— No charge
Level (2)	FULL VISIBLE TIME TRACK	— Some charge
Level (3)	SPORADIC VISIBILITY OF TRACK	— Some heavily charged areas.
Level (4)	INVISIBLE TRACK (Black or Invisible Field.)	— Very heavily charged areas exist.
Level (5)	DUB-IN	— Some areas of track so heavily charged pc is below consciousness in them.
Level (6)	DUB-IN OF DUB-IN	— Many areas of track so heavily charged, the dub-in is submerged.
Level (7)	ONLY AWARE OF OWN EVALUATIONS	— Track too heavily charged to be viewed at all.
Level (8)	UNAWARE	— Pc dull, often in a coma.

On this new scale the very good, easy to run cases are at Level (3). Skilled engram running can handle down to Level (4). Engram running is useless from Level (4) down. Level (4) is questionable.

Level (1) is of course an OT. Level (2) is the clearest Clear anybody ever heard of. Level (3) can run engrams. Level (4) can run early track engrams if the running is skilled. (Level (4) includes the Black V case.) Level (5) has to be run on general ARC processes. Level (6) has to be run carefully on special ARC processes with lots of havingness. Level (7) responds to the CCHs. Level (8) responds only to reach and withdraw CCHs.

Pre-Dianetic and Pre-Scientology mental studies were observations from Level (7) which considered Levels (5) and (6) and (8) the only states of case and oddly enough overlooked Level (7) entirely, all states of case were considered either neurotic or insane, with sanity either slightly glimpsed or decried.

In actuality on some portion of every time track in every case you will find each of the levels except (1) momentarily expressed. The above scale is devoted to *chronic* case level and is useful in programming a case. But any case for brief moments or

longer will hit these levels in being processed. This is the temporary case level found only in sessions on chronically higher level cases when they go through a tough bit.

Thus engram running can be seen to be limited to higher level cases. Other processing, notably modern ARC processes, moves the case up to engram running.

Now what makes these levels of case?

It is entirely *charge*. The more heavily charged the case, the lower it falls on the above scale. It is charge that prevents the pc from confronting the time track and submerges the time track from view.

Charge is stored energy or stored or recreatable potentials of energy.

The E-Meter registers charge. A very high or low tone arm, a sticky or dirty needle, all are registrations of this charge. The “chronic meter of a case” is an index of chronic charge. The fluctuations of a meter during a session are registering relative charge in different portions of the pc’s time track.

More valuably the meter registers *released* charge. You can see it blowing on the meter. The disintegrating RR, the blowing down of the TA, the heavy falls, the loosening needle all show charge being released.

The meter registers charge found and then charge released. It registers charge found but not yet released by the needle getting tight, by DN, by a climbing TA or a TA going far below the clear read. Then as this cleans up, the charge is seen to “blow.”

Charge that is restimulated but not released causes the case to “charge up,” in that charge already on the time track is triggered but is not yet viewed by the pc. The whole cycle of restimulated charge that is then blown gives us the action of auditing. When *PRIOR* charge is restimulated but not located so that it can be blown, we get “ARC breaks.”

The State of Case, the chronic level, as given on the above scale, is the totality of charge on the case. Level (1) has no charge on it. Level (8) is total charge. The day to day condition of a case, its temper, reaction to things, brightness, depends upon two factors, (a) the totality of charge on the case and (b) the amount of charge in restimulation. Thus a case being processed varies in tone by (a) the totality of charge remaining on the case (b) the amount of charge in restimulation and © the amount of charge blown by processing.

Charge is held in place by the basic on a chain. When only later than basic incidents are run charge can be restimulated and then bottled up again with a very small amount blown. This is known as “grinding out” an incident. An engram is getting run, but as it is not basic on a chain, no adequate amount of charge is being released.

Later than basic incidents are run either (a) to uncover more basic (earlier) incidents or (b) to clean up the chain after basic has been found and erased.

No full erasure of incidents later than basic is possible, but charge can be removed from them *providing they are not ground out* but only run lightly a time or two and then an earlier incident on the chain found and similarly run. When *the* basic is found *it is* erased by *many* passes over it. Basic is the only one which can be run many times. The later the incident is (the further from basic) the more lightly it is run .

There is no difference in the technology required to run a basic or a later incident. It is only the number of times THROUGH that differs. Basic is run through many times. A somewhat later engram is run through a couple of times. An engram very late on the chain is gone through once. Otherwise all engrams whether basic or not are run exactly the same.

Engrams are run to release charge from a ease. Charge is not released to cure the body or to cure anything physical and the meter cures nothing. Charge is released entirely to return to a thetan his causation over the time track, to restore his power of choice, and to free him of his most intimate trap, his own time track. You cannot have decent, honest or capable beings as long as they are trapped and overwhelmed. While this philosophy may be contrary to the intentions of a slavemaster or a degrader it is nevertheless demonstrably true. The universe is not itself a trap capable only of degradation. But beings exist who, beaten and overwhelmed themselves, can utilize this universe to degrade others.

The mission of engram running is to free the charge which has accumulated in a being and so restore that being to appreciated life.

All eases, sooner or later, have to be run on engrams, no matter what else has to be done. For it is in engrams that the bulk of the charge on the time track lies. And it is therefore those parts of the time track called engrams which overwhelm the thetan. These contain pain and unconsciousness and are therefore the record of moments when a thetan was most at effect and least at cause. In these moments then the thetan is least able to confront or to be causative.

The engram also contains moments when it was necessary to have moved and most degrading to have held a position in space.

And the engram contains the heaviest ARC break with a thetan's environment and other beings.

And all these things add up to charge, an impulse to withdraw from that which can't be withdrawn from or to approach that which can't be approached, and this, like a two pole battery, generates current. This constantly generated current is chronic charge. The principal actions are:

- (a) When the attention of the thetan is directed broadly in the direction of such a track record the current increases.
- (b) When the attention is more closely (but not forcefully) and accurately directed, the current is discharged.
- (c) When the basic on the chain is found and erased, that which composes the poles themselves is erased and later incidents eased, for no further generation is possible by that chain and it becomes incapable of producing further charge to be restimulated. The above are the actions which occur during auditing. If these actions do not occur despite auditing, then there is no case betterment, so it is the auditor's responsibility to make sure they do occur.

As the time track is created by an involuntary response of the thetan, it is and exists as a real thing, composed of space, matter, energy, time and significance. On a Level (8) Case the time track is completely submerged by charge even down to a total unawareness of thought itself. At Level (7) awareness of the track is confined by extant charge to opinions about it. At Level (6) charge on the track is such that pictures of pictures of the track are gratuitously furnished, causing delusive copies of inaccurate copies of the track. At Level (5) charge is sufficient to cause only inaccurate copies of the track to be viewable. At Level (4) charge is sufficient to obscure the track. At Level (3) charge is sufficient to wipe out portions of the track. At Level (2) there is only enough charge to maintain the existence of the track. At Level (1) there is no charge and no track to create it. All charge from Level (1) and up into higher states that is generated *is knowingly generated* by the thetan, whose ability to hold locations in space and poles apart results in charge as needful.

This would degenerate again as he put such matters on automatic or began once more to make a time track, but these actions alone are not capable of aberrating a thetan until he encounters further violent degradation and entrapment in the form of implants.

Aberration itself must be calculated to occur. The existence of a time track only makes it possible for it to occur and be retained.

Thus a thetan's first real mistake is to consider his own pictures and their recorded events important, and his second mistake is in not obliterating entrapment activities in such a way as not to become entrapped or aberrated in doing so, all of which can be done and should be.

Engram running is a step necessary to get at the more fundamental causes of a time track and handle them.

So it is a skill which must be done and done *well*.

HCO BULLETIN OF MARCH 10, 1964

Class VI Students  
Central Orgs  
for info

SCIENTOLOGY VI

**BASIC AUDITING**  
**NON-READING METERS**  
**METER FLINCH**

There are various reasons a pc does not read on a meter. Amongst these are:

- 1) ARC broken (where only the ARC break's bypassed charge will read)
- 2) Antipathy to meter
- 3) Antipathy to auditor
- 4) Antipathy to something in the session environment
- 5) Suppress button out (but Suppress itself will read)
- 6) Invalidate button out (but Invalidate will read)
- 7) Meter somewhere not connected to pc
- 8) Meter battery flat
- 9) Auditor on the wrong track (probably the commonest source of a dead looking meter that won't RR or fall hard)
- 10) Meter locked up on a wrong goal (happens mostly on running items in a wrong goal)
- 11) Overlisting a goal or item list
- 12) Getting into a GPM in an earlier series.

But of all the reasons the one least suspected is (13) pc flinch.

After a pc has been knocked around with creaks or pain by actual GPMs, the pc decides a lot of things like "go easy on it" and "just sit here" and "keep away from it" and even "I can't take it." And bang, no checkout reads.

"Are you flinching" is a question that will RR on a flat meter if the pc is. Don't overuse it. Usually you're just on a wrong track.

You may even waste time with a new Prepcheck on the meter only to find your first Prepcheck on it is flat. The truth is, the pc is rabbiting.

Don't blame the pc too much. The pain can be horrible from GPMs.

But remember this—the *only* things that turn on pain are:

(a) Invalidating or suppressing a RIGHT GOAL. A wrong goal can have its but tons out a mile and just make the pc a little dizzy. Only a RIGHT goal can make the pc HURT or turn on a chronic-looking somatic.

(b) A RIGHT goal in the wrong series, which is to say a *skip* of GPMs.

Only (a) and (b) can make the pc hurt.

So if the pc hurts ask (a) or (b). If it's (a) get the Suppress, Invalidate buttons in fast. If (b) get the right goal series, or find what's skipped.

(a) and (b) can be in combination.

And *then* get off any of the considerations a pc may have had about not going near GPMs and you'll avoid future flinch.

The Invalidation read of a GPM can be dated and the invalidated GPM can be looked up or otherwise relocated. Only right goals handled wrong hurt and only this makes a pc flinch.

By the way, if the pain of a suppressed or invalidated GPM doesn't vanish when the buttons are put in, then there's another right goal suppressed or invalidated also! Or maybe more!

A pc who is consistently flinching needs the subjects of goals, etc., cleaned up.

### EXAMINATIONS

A student must not discuss any examination with anyone outside the Qualifications Division. To give examination information to other students in order to assist them shows a misguided understanding of help. A student should pass an examination on the basis that he does know and can apply the data, not on the basis that he knows and can pass the examination. Only by being able to know and apply the data can a student be an accomplished auditor at any level.

Therefore, students are not to discuss examinations with other students for whatever reason.

Further, students who fail examinations or any question thereon are not to discuss such failure or reasons for such with anyone other than the personnel of the Qualifications Division. This regulation includes not only other students, but Course Supervisors. Data as to examination failures is supplied from the Qualifications Division to the Technical Division, and a student, not knowing the data sufficiently well, can cause Dev-T by reporting false data to a Course Supervisor as to why the examination was failed.

Any student who feels that he has been incorrectly failed on an examination can report the matter to Ethics. This is the proper line for any complaint the student may have concerning an examination, if such still seems incorrect after taking it up with the Qualifications Division.

**ARBITRARIES**

Any arbitrary entered into any line is a way to stop that line.

An auditor doing a job of auditing suddenly enters an arbitrary such as “The pc now has a grief charge so he must have a withhold as I’ve just cleaned up ARC breaks.” Or any such wild think. This arbitrary would stop that pc’s case right now.

You get all there is to know about tech from HCOBs, tapes, books.

This is all.

Here’s one—when the needle on an E-Meter read in the response to an auditor’s question, all you know is that the needle on the E-Meter read. That’s all you know. Now in the next few seconds you will prove out, as to whether the read was to the question or to something else like a protest. To assume anything else in regard to meter reads is an arbitrary and will close up that pc with a bang.

That’s the data. Knock off all the arbitraries NOW.

Punch in hard standard tech. Standard tech is that tech which has absolutely no arbitraries.

### WORKABILITY OF TECH

The quality of technology is to the degree it increases percentages of cures it obtains within the framework of the society in which it operates. 22 1/2% will change for the better or "get well" on sugar pills. 33% will make it regardless of how the tech is applied. The percentages from these on up are determined by the formula.

Early Dianetics with a raw book auditor run well over 50%.

Then into Scientology shot the percentages up to 97%, 3% here being those heavily PTS and so on. Even these are being handled with standard tech eventually.

These percentages are all inclusive of all possible tech errors because we do get the percentages finally.

This then shows that Scientology technology, when applied by standard tech action, will give a fantastic percentage of successes to the auditor who does only standard tech actions.

The older practices have a very hard time showing 10% even though 22 1/2% recover on sugar pills.

The quality of Scientology technology is in the percentages, provable and observable.

The workability of Scientology can be shown. Do so. Older practices can't.

Class VIII

**THE CLASS VIII COURSE**

The Class VIII Course will teach the entire subject of Scientology in its *exact* standard practical applications from ARC Straightwire to OTs.

The course will be exactly taught as per HCOBs, tapes, books.

The course will include—

Qs Logics—Prelogics, Axioms  
Auditor's Code  
Code of a Scientologist  
F/N data  
TRs  
E-Meter Essentials  
Book of Case Remedies  
All about the E-Meter  
Case supervision  
Review folders  
How to run ARC Straightwire  
How to run locks on secondaries  
How to run secondaries  
How to run locks on engrams  
How to run engrams  
How to run Level 0 and process of that level  
How to run Level 1, PTPs  
How to run Level 2, O/Ws, M/W/H, Sec Check  
Listing and nulling data—S & D, L4A, Rem A & B  
Level 3, ARC breaks, L-1  
Level 4, hidden standards  
Power, Level 5  
Level 6  
Clear  
OT I  
OT II  
OT III  
OT IV  
OT V  
OT VI  
OT VII  
OT VIII.

How to handle exact data of the levels will be taught and data necessary to the level, as not doing standard actions are all that hang a case up, no matter what level a case is from—Straightwire to OT VIII.

**CASE SUPERVISOR**  
**ADMIN IN AUDITING**

A Case Supervisor cannot do a decent job of C/S when he is presented with lousy admin such as—no Auditor Report Forms, not handling Gr Form reads as they occur, not writing in F/Ns, not making a ring around the item found, not indicating where a list was extended. Also illegible writing, failure to go over a report when done and make obscure words plain in print is a NO REPORT and gets liability.

When you run into a snag you can't handle, DON'T start inventing tech and doing something else other than the C/S instructions.

End off the session and send it to the Case Supervisor.

It is, I am told, the wild fashion in Quals and HGCs around the world that if one hits a snag, the auditor rushes out and asks the D of P who gives him an unusual solution without even looking at a folder. If I catch or hear of anyone doing that, it's the Deep 6.

The CORRECT action and the ONLY correct action is to end the session and get folder and session paper to a Case Supervisor, who (1) does not see the pc and (2) does not talk to the auditor.

Case Super is folder *ONLY*. Then there's a chance of standard tech.

### FLUNKS

These are the most common goofs found made by auditors in case supervising over a hundred folders.

- (1) Pc audited with no instructions from C/S.
- (2) Audited on squirrel process.
- (3) False Auditor Report—FLUNK FLUNK.
- (4) Audited past F/N.
- (5) Auditing a pc while on medication.
- (6) Auditing a pc while ill.
- (7) Leaving pc with a problem.
- (8) Auditing a pc on no sleep.
- (9) Nulling an L1 to largest read.
- (10) Not giving pc his item.
- (11) Not tracing an ARC break, M/W/H or PTP down to basic when it doesn't blow.
- (12) Not handling reading GF items as they occur.
- (13) Failure to use ruds on even (;F when TA rises between session before starting major action of session.
- (14) Not following C/S instructions.
- (15) Taking frequent breaks.

**“STANDARD” TECH DATA**

“Standard” in *standard* tech auditing is a precise activity, done with good TRs, exact grade processes and exact actions.

A Green Form is done by *handling* every read, not by “uhuh” or nulling it, or doing it after the GF is all done.

Observe the Auditor’s Code in every line and do the usual and solve the case.

Standard action in handling Green Form ARC Brks PTP and M/W/H (a) Itsa (b) If not cleared on Itsa get the basic on the chain. All GF and L and ruds follow this rule. A process is not used except ARC break ARCU CDEI.

Always do a list like L1, L4 or GF, etc., by handling each read as it’s found.

Random auditing on pcs and pre-OTs should not be done. Knock off these arbitrary “Somebody else thinks he needs a\_\_\_\_\_.” This is evaluative and a break of the Auditor’s Code. Pcs can be stopped by over-repairs they just need to get on with it.

Do standard GF and remedy actions and let pc or pre-OT get on with the next cycle of section or grade.

It’s the grade processes and OT levels that improve cases. The process the pc should be on is always the next grade.

If TA rises between sessions. get it down with ruds and if that doesn’t get it down, a Green Form. This is a standing order. TAs that won’t come down with routine rudiments come down with GF.

True of *ALL* rehabbing actions is you don’t rehab on a high TA at session start. Only when it is just then overrun. Then you rehab it back to F/N.

In ruds, *all you know when you see a read is that the meter read* and the question you asked. The meter read is not uniformly what you asked and can be a protest or a REPEATING FALSE READ. Usually one goes right along auditing but when pc shows any *sign* of protest or bafflement on a rud read, you routinely trace it for an earlier false read, find and clean it.

If an R/S won’t clean up on a pc, clean up “Have you ever been accused of things you haven’t done” as a process as the R/S may be from invalidation. Can also clean up protest.

R/S on a child may be:

- (A) Don’t tell. Somebody told him not to.
- (B) Crime.
- (C) Accusation—said you did something you didn’t do.

You set up a case with F/N before you undertake major new actions. Always set up a case to be run. End off an action at F/N.

It’s not safe to begin a session without an ARC Br check when there’s been a time between sessions.

With pcs in sad effect, you should always check ARC break of long duration.

You treble time in session every time you take any *breaks*. To economize in auditing time (session time) you should cut out breaks as they get the pc in trouble when he's out of the room, then you have to clean it up and so time is lost.

No TA on a Sec Check means pc tends to be out of valence. *Anybody* has a few. TA goes high and low when a pc is going into and to PT from a heavy past life.

Never tell a pc he will have another session in session as it continues the session and doesn't end it. An old old old rule.

You never let pc off cans in standard tech.

A persistent item that doesn't blow is usually a wrong item. Other symptoms could proceed from a wrong item.

A Prepcheck in nearly every case turns on and uncovers old ARC breaks. In doing a Prepcheck be alert for BIs, and ask ARC Br question.

### VALENCE SHIFTER

The list question, "What valence (identity) would be safe" is based on tech theory and is used for pre-OTs with high OT sections that do not change non-optimum behaviour.

It is also (rarely) used on a lower grade case who is "detached" which is to say chronically out of valence to the point of no case gain.

It is very dynamite—be exact in listing it.

**C/S INSTRUCTIONS**

Standard action for an old-timer who has been run on thousands of hours on all types of processes:

- (1) Do GF.
- (2) Do an S & D
- (3) List "What has been overrun," handling and indicating each item as it reads.
- (4) Rehab all grades, Sub-Zeroes, 0-14 (omit Power).
- (5) Rehab R6EW, Clearing Course, OT I, OT II.
- (6) Prepcheck III. Watch for ARC breaks during Prepcheck and handle as they arise.
- (7) Rehab IV, V and VI if done.
- (8) Do a Valence Shifter.

A standard one-time action for a Section III OT:

- (1) Get in ruds so TA is in decent range (2 to 3). If TA doesn't come down and F/N on ruds, do a GF.
- (2) Rehab or run ARC Straightwire to IV (omit Power *always* after Clear).
- (3) Rehab F/Ns R6EW, Clear, OT I, OT II.
- (4) Prepcheck Section III.

Pc looking or continually feeling tired = blunted purpose, evaluation and in-validation .

M/W/H gives a nattery critical aspect, not "Pc looks tired" as one auditor thought.

Pc feels tired. Do a purpose list as follows:

What purpose has been blunted? (You can also use "abandoned" if it reads better.)  
Find an item. If no F/N, Prepcheck it to F/N.

Class VIII

The first thing I learned about teaching a Class VIII auditor is he thinks he can fly before he can even creep.

Such is the power of standard tech, it can go to his head as an auditor and as a Case Supervisor before he learns even the barest essentials.

### END PHENOMENA

An auditor must be able to relate all of the end phenomena of a process to an F/N in clay. This must be compared also to a cycle of action.

The object of the exercise is to tell when not to and when to cut a preclear's comm with regard to an F/N.

Phenomena of pc occurs after phenomena of meter.

Skill to be learnt by the Class VIII auditor is the precise instant to tell the pc it's an F/N.

Criticism of auditor's TRs actually stemmed from the auditor's inability to see when a cycle of action is complete and cut the pc's comm off at precisely the right instant so it doesn't cut the pc's cycle of action and so it doesn't turn off the F/N.

If the pc's comm is cut wrong the pc tries to conclude it to everyone they meet and so overruns the process, that is why pcs don't come back into session with an F/N.

This is a vitally important datum because it has slown cases down to total recovery when violated.

This has been an unforeseen factor in C/S of Class VIII auditing.

### REHABS

Old no longer used processes such as "3GXX" "R2-12" have to be added to C/S ordered rehabs, particularly if the pc talks of them which means they were overrun.,

All these early ones were overrun. Clear (meaning Release) was lost in 1950, recovered in about '58, lost again until my C/Sing of the first Power noted the phenomena of overrun.

Overrun was therefore the order of the day. But these processes did bring about genuine releases.

It is best to *count* the number of times released on each process and rehab each different one.

HCO BULLETIN OF 23 SEPTEMBER 1968

Class VIII

**VIOLATION OF THE LAWS OF LISTING AND NULLING**

Rudiments (ARC Bks, PTPs, M/W/Hs) are usually not necessary in correcting a list as a wrong list usually *is* the ARC Bk and PTP.

To correct a list ask the pc or pre-OT

- (1) "Is it an incomplete list?" If it is, extend it and find the item.
- (2) "Was it the first item on the list?" If so, indicate item to pc or pre-OT.
- (3) "Was it an unnecessary action?" (dead horse). If so, indicate it.
- (4) "Had you not answered the listing question?" If so, re-clear question and if it reads list it.

The 4 basic reasons for a wrong list are here

- (1) It was the first item.
- (2) It is not a complete list.
- (3) The question didn't read (which causes a dead horse).
- (4) The pc didn't answer the question.

**LIST CORRECTION**  
(Only valid for a list recently done)

1. Was it the first item on the list?
2. Was list incomplete?
3. Was the item bypassed?
4. Was the item suppressed?
5. Was the item invalidated?
6. Was the question meaningless?
7. Was the list overlisted?
8. Were items thought of that weren't put down?
9. Was it listed out of session?
10. Was the item different when said by the auditor?
11. Was the item not given to you?
12. Was the action unnecessary?
13. Was a Release point bypassed, on the question only?
14. Was a Release point bypassed on listing?

**ADVANCE COURSES**

YOU MUST NEVER ISSUE AN ADVANCE COURSE TO ANYONE WITHOUT CASE SUPERVISOR OKAY.

These pre-OTs are often in Review, often not ready and ALWAYS must be okayed by the C/S both to have it and then after study, to fly the ruds.

To not do this means you're running Advance Courses on people with OUT RUDS. You'll wreck cases this way!

### ARC BRK NEEDLE

An ARC Brk needle (and a Stage 4 “float”) are EASILY DETECTED.

An “F/N” with *bad* indicators is an ARC Brk needle. These can include propitiation.

A Class VIII must know the Bad Indicator List and know that when these accompany an “F/N” it is an ARC Brk needle.

When this happens, one checks for SESSION ARC BREAKS, then for MISSED ARC BREAK, then for falsely called ARC Brks or suppressed ARC Brks. If this doesn't clean it, then ask for an ARC Brk long duration.

What has happened is that the pc has gone into a secondary or an engram.

It is not a job for rudiments to run it. It is only to be keyed-out.

It is a Q and A to date and run a secondary in rudiments because of an ARC Brk needle. The auditor is to key it out by session or life. Itsa and earlier similar incident with itsa, each ARC break with ARCU CDEI.

The C/S can have it run as a secondary. It will be TOO HEAVY to run if it is not keyed-out first. It is handled by key-out in rudiments.

It is quite usual that a pc has just mentioned grief when the ARC: Br needle turns on. Or some gloomy idea. A real F/N means the pc is out the top, an ARC Br needle means he's out the bottom. He ceases to mock up, through grief.

It is a very serious thing for a pc to get audited over an ARC Br needle. It must be spotted and handled (keyed-out) when it occurs.

It occurs most often with a TA below 2.0.

A real F/N has one or more GIs.

REVISED 9 JULY 1977

Remimeo

*Corrected & Reissued 15 July 1977  
to correct typo, para 3.*  
(Deletes reference to needle "R/Sing" before an F/N.)

### FLOATING NEEDLE

Floating needles (F/Ns) are the end phenomena for any process or action with the pc on two cans. It is one of the most important rediscoveries made in years. It was known but lost by auditors.

It is the idle uninfluenced movement of the needle on the dial without any patterns or reactions in it. It can be as small as 1" or as large as dial wide. It does not fall or drop to the right of the dial. It moves to the left at the same speed as it moves to the right. It is observed on a Mark V E-Meter calibrated with the TA between 2.0 and 3.0 with GIs in on the pc. It can occur after a cognition blowdown of the TA or just moves into floating. The pc may or may not voice the cognition.

It, by the nature of the E-Meter reading below the awareness of the thetan, occurs just before the pc is aware of it. So to give a "That's it" on the occurrence of the F/N can prevent the pc from getting the cognition.

A "floating needle" occurring above 3.0 or below 2.0 on a calibrated Mark V E-Meter with the pc on 2 cans is an ARC broken needle. Watch for the pc's indicators. An ARC broken needle can occur between 2.0 and 3.0 where bad indicators are apparent.

Pcs and pre-OTs OFTEN signal an F/N with a "POP" to the left and the needle can actually even describe a pattern much like a rock slam. Meters with lighter movements do "pop" to the left.

One does not sit and study and be sure of an "F/N." It swings or pops, he lets the pc cognite and then indicates the F/N to the pc preventing overrun.

When one OVERRUNS an F/N or misses one, the TA will start to climb. The thing to do is briefly rehabilitate it (rehab it) by indicating it has been bypassed and so regains it.

The F/N does not last very long in releasing. The thing to do is end the process off NOW. Don't give another command.

It coincides with other "end phenomena" of processes but is senior to them.

An F/N can be in normal range and still be an ARC break needle. The thing which determines a real F/N is good indicators. Bad indicators always accompany an ARC break needle.

On an ARC break needle, check for an ARC break. If the TA then climbs, it was a real F/N so you rehab it quickly.

A one-hand electrode sometimes obscures an F/N and gives false TA. If used, use higher sensitivity and get the TA from 2 cans when needed.

**OVERT-MOTIVATOR  
DEFINITIONS**

These are problems in FLOWS.

They exist with or without intention.

One can add “intentional” or “unintentional” to the definitions.

An OVERT—An act by the person or individual leading to the injury, reduction or degradation of another, others or their beingness, persons, possessions, associations or dynamics.

A MOTIVATOR is an act received by the person or individual causing injury, reduction or degradation of his beingness, person, associations or dynamics.

An overt of omission—a failure to act resulting in the injury, reduction or degradation of another or others or their beingness, persons, possessions or dynamics.

A motivator is called a “motivator” because it tends to prompt an overt. It gives a person a motive or reason or justification for an overt.

When a person commits an overt or overt of omission with no motivator he tends to believe or pretends that he has received a motivator which does not in fact exist. This is a FALSE MOTIVATOR.

Beings suffering from this are said to have “motivator hunger” and are often aggrieved over nothing.

Cases which “cave in hard” suffer from false motivators and resolve on being asked for overts done for no reason.

Cases which do not resolve on actual motivators have overts that have to be handled.

There is also the case with FALSE OVERTS. The person has been hit hard for no reason. So they dream up reasons they were hit.

Cases that go into imaginary cause (imagining they do or cause things bad or good) are suffering from false overt . They resolve on “When were you hit (punished, hurt, etc.) for no reason?”

### UNRESOLVING CASES

The mechanism of PTS is environmental menace that keeps something continually keyed-in. This can be a constant recurring somatic or continual, recurring pressure or a mass. The menace in the environment is NOT imaginary in such extreme cases.

The action can be taken to key it out. But if the environmental menace is actual and persists it will just key-in again. This gives recurring pressure unrelieved by usual processing.

In this event one can compare the environmental menace (by finding it, listing, 2-way comm etc.) and one will then find the incident or incidents being keyed-in are *exactly* similar in all respects or are thought so. These can be run out as secondaries or engrams.

Theoretically an environmental continual overt would do the same thing. In which case the secondary or engram would match it. This is in fact the only engrams that will run and erase on a PTS case.

Personal roller-coaster has this as its source.

The person does not see or associate the two.

This is why the PTS case does not respond to processing and gives a way for it to respond. This is also why the sick and insane do not respond. It is the same mechanism.

(Revisions in this type style)

**L4BRA**

**FOR ASSESSMENT OF ALL LISTING ERRORS**

ASSESS THE WHOLE LIST (METHOD 5) THEN TAKE biggest reads or BDs and handle. Then clean up the list.

PC'S NAME \_\_\_\_\_ DATE \_\_\_\_\_

AUDITOR \_\_\_\_\_

0. *WAS IT THE FIRST ITEM ON THE LIST?*  
(Indicate and give pc his item.)
1. DID YOU FAIL TO ANSWER THE LISTING QUESTION?  
(If it reads, find out what question, clear the question noting whether it reads, if so, list it, find the item and give it to the pc.)
2. WAS THE LIST UNNECESSARY?  
(If it reads, indicate BPC and indicate that it was an unnecessary action.)
- 2A. DID THE QUESTION HAVE NO CHARGE ON IT?  
( Indicate. )
- 2B. WERE YOU ASHAMED TO CAUSE AN UPSET?  
(LIC after list corrected.)
- 2C. WERE YOU AMAZED TO REACT THAT WAY?  
(Same as 2B.)
- 2D. THE QUESTION HAD ALREADY BEEN LISTED BEFORE.  
(Indicate, rehab.)
- 2E. YOU HAD NO INTEREST IN THE QUESTION?  
(Indicate that the auditor missed that it didn't read.)
3. WAS THE ACTION DONE UNDER PROTEST?  
(If it reads, handle by itsa earlier similar itsa.)
4. IS A LIST INCOMPLETE?  
(If reads, find out what list and complete it, give the pc his item.)
5. HAS A LIST BEEN LISTED TOO LONG?  
(If so, find what list and get the item from it by nulling with Suppress, the nulling question being: "On has anything been suppressed?" for each item on the overlong list. Give the pc his item.)
6. *HAS THE WRONG ITEM BEEN TAKEN OFF A LIST?*  
(If this reads, put in Suppress and Invalidated on the list and null as in 5 above and find the right item and give to the pc.)

7. HAS A RIGHT ITEM BEEN DENIED YOU?  
(If this reads, find out what it was and clean it up with Suppress and Invalidate and give it to the pc.)
8. HAS AN ITEM BEEN PUSHED OFF ON YOU YOU DIDN'T WANT?  
(If so, find it and get in Suppress and Invalidate on it and tell pc it wasn't his item and continue the original action to find the correct item.)
9. HAD AN ITEM NOT BEEN GIVEN YOU?  
(if reads, handle as in 7.)
10. HAVE YOU INVALIDATED A CORRECT ITEM FOUND?  
(If so, rehab the item and find out why the pc invalidated it or if somebody else did it, clean it up and give it to pc again.)
11. HAVE YOU THOUGHT OF ITEMS THAT YOU DID NOT PUT ON THE LIST?  
(If so, add them to the correct list. Renuall the whole list and give the pc the item.)
12. HAVE YOU BEEN LISTING TO YOURSELF OUT OF SESSION?  
(If so, find out what question and try to write a list from recall and get an item and give it to the pc.)
13. HAVE YOU BEEN GIVEN SOMEBODY ELSE'S ITEM?  
(If so, indicate to the pc this was not his item. Don't try to find whose it was.)
14. HAS YOUR ITEM BEEN GIVEN TO SOMEONE ELSE?  
(If so, find if possible what item it was and give it to the pc. Don't try to identify the "somebody else.")
- 14A. WERE EARLIER LISTING ERRORS RESTIMULATED?  
(Indicate and correct earlier lists then check the current.)
- 14B. HAD THIS LIST ALREADY BEEN HANDLED?  
(Indicate.)
15. HAS A RELEASE POINT BEEN BYPASSED ON LISTING?  
(If so, indicate the overrun to the pc, rehab back.)
16. HAS A RELEASE POINT BEEN BYPASSED ON THE QUESTION ONLY?  
(If so, indicate the overrun to the pc and rehab back.)
17. HAVE YOU GONE EXTERIOR WHILE LISTING?  
(If so, rehab. If Ext Rundown not given, note for C/S.)
18. HAS IT BEEN AN OVERT TO PUT AN ITEM ON A LIST?  
(If so, find out what item and why.)
19. HAVE YOU WITHHELD AN ITEM FROM A LIST?  
(If so, get it and add it to the list if that list available. If not put item in the report.)
20. HAS A WITHHOLD BEEN MISSED?  
(If so, get it, if discreditable ask "Who nearly found out?")
21. HAS AN ITEM BEEN BYPASSED?  
(Locate which one.)
22. WAS A LISTING QUESTION MEANINGLESS?  
(If so, find out which one and indicate to the pc.)
23. HAS AN ITEM BEEN ABANDONED?  
(If so, locate it and get it back for the pc and give it to him.)

24. HAS AN ITEM BEEN PROTESTED?  
(If so, locate it and get the Protest button in on it.)
25. HAS AN ITEM BEEN ASSERTED?  
(If so, locate it and get in the Assert button on it.)
26. HAS AN ITEM BEEN SUGGESTED TO YOU BY ANOTHER?  
(If so, get it named and the Protest and Refusal off.)
27. HAS AN ITEM BEEN VOLUNTEERED BY YOU AND NOT ACCEPTED?  
(If so, get off the charge and give it to the pc, or if he then changes his mind on it, go on with the listing operation.)
28. HAS THE ITEM ALREADY BEEN GIVEN?  
(If so, get it back and give it again.)
29. HAS AN ITEM BEEN FOUND PREVIOUSLY?  
(If so, find what it was again and give it to the pc once more.)
30. HAS AN ITEM NOT BEEN UNDERSTOOD?  
(If so, work it over with buttons until pc understands it or accepts or rejects it and go on with listing.)
- 30A. WAS THE LISTING QUESTION NOT UNDERSTOOD?  
(Get defined and check for read. It may be unreading. If so, indicate that an uncharged question was listed because it read on a misunderstood.)
- 30B. WAS A WORD IN THE QUESTION NOT UNDERSTOOD?  
(Same as 30A.)
31. WAS AN ITEM DIFFERENT WHEN SAID BY THE AUDITOR?  
(If so, find out what the item was and give it to the pc correctly.)
- 31A. DID THE AUDITOR SUGGEST ITEMS TO YOU THAT WERE NOT YOURS?  
(Indicate as illegal to do so. Correct the list removing these.)
32. WAS NULLING CARRIED ON PAST THE FOUND ITEM?  
(If so, go back to it and get in Suppress and Protest.)
33. HAS AN ITEM BEEN FORCED ON YOU?  
(If so, get off the Reject and Suppress and get the listing action completed to the right item if possible.)
34. HAS AN ITEM BEEN EVALUATED?  
(If so, get off the Disagreement and Protest.)
35. HAD EARLIER LISTING BEEN RESTIMULATED?  
(If so, locate when and indicate the bypassed charge. *Find and correct the earlier out list.* )
36. HAS AN EARLIER WRONG ITEM BEEN RESTIMULATED?  
(If so, find when and indicate the bypassed charge. *Find and correct the earlier out list.*)
37. HAS AN EARLIER ARC BREAK BEEN RESTIMULATED?  
(If so, locate and indicate the fact by itsa earlier similar itsa.)
38. DO YOU HAVE AN ARC BREAK BECAUSE OF BEING MADE TO DO THIS?  
(If so, indicate it to the pc. *Handle the ARC break. Correct the list if it's a list ARC break.*)

39. HAS THE LIST CORRECTION BEEN OVERRUN?  
(If so, rehab.)
- 39A. WAS THE LIST DONE WHILE YOU ALREADY HAD AN ARC BRK, PTP  
OR W/H?
- 39B. COULDN'T YOU UNDERSTAND WHAT WAS BEING DONE?
- 39C. COULDN'T YOU UNDERSTAND THE AUDITOR?
- 39D. DIDN'T THE AUDITOR ACKNOWLEDGE YOU?
40. IS THERE SOME OTHER KIND OF BYPASSED CHARGE?  
(If so, find what and indicate it to pc.)
41. WAS THERE NOTHING WRONG IN THE FIRST PLACE?  
(If so, indicate it to pc.)
42. HAS THE UPSET BEEN HANDLED?  
(If so, indicate it to the pc.)
43. HAS A LIST PROCESS BEEN OVERRUN?  
(If so, find which one and rehab.)

**DIANETIC ASSISTS**

(Include in Medical Series)  
The Use of Dianetics to the Medical Doctor

There is everything to be said for correct medical treatment in the handling of the sick and insane.

“Insanity” is most often the suppressed agony of actual physical illness and injury.

To “treat” this agony with shock and “brain operations” is a Nuremberg type offense and is indictable as mayhem or manslaughter.

The medical treatment of “insanity” requires sure awareness by the patient of his whereabouts and present time. These are usually quite unbearable so he has sunk into the past to escape the agony of the present.

The TOUCH ASSIST given to such injured persons permits healing to occur by restoring the person to the present and his whereabouts to some degree.

Healing after medical treatment might not occur rapidly if the “insane” or chronically ill person remains in the past, unable to confront the present.

Thus the Touch Assist speeds and often permits healing after medical treatment and sometimes in minor injuries and illness permits the doctor to accomplish healing without further treatment.

There is the TOUCH ASSIST, the CONTACT ASSIST and the AUDITING ASSIST.

The Touch Assist done as described elsewhere brings the patient’s attention to injured or affected body areas. When attention is withdrawn from them, so is circulation, nerve flows and energy which for one thing limits nutrition to the area and for another prevents the drain of waste products. Some ancient healers attributed remarkable flows and qualities to the “laying on of hands.” Probably the workable element in this was simply heightening awareness of the affected area and restoring the physical communication factors.

The CONTACT ASSIST is remarkable when it can be done. The patient is taken to the area where the injury occurred and makes the injured member gently contact it several times. A sudden pain will fly off and the injury if minor lessens or vanishes. This is again a physical communication factor. The body member seems to have withdrawn from that exact spot in the physical universe.

The restoration of awareness is often necessary before healing can occur.

The prolongation of a chronic injury occurs in the absence of physical communication with the affected area or with the location of the spot of injury in the physical universe.

The AUDITING ASSIST is done by a trained auditor using an E-Meter.

It consists of “running out” the physically painful experience the person has just undergone, accident, illness, operation or emotional shock. This erases the “psychic trauma” and speeds healing to a remarkable degree if done properly.

In addition to assists there is Dianetic auditing of an acutely ill person which handles the current and past illnesses and injuries by erasing the “physical trauma.”

The last is a skilled activity. Practitioners who have the idea such things do not have causes will of course fail to locate the causes.

A sickness can be composed, let us say, of a headache, a nausea, apathy and weariness.

Such a sickness may be bizarre, without medical reason.

By first getting the patient to find and say what shock occurred when the sickness began, getting when, and getting it recounted, the “illness” will lessen, the emotional state will alter—called a “release of affect.”

By then, finding an earlier similar instance and getting that one dated and recounted a further release of affect may occur.

If the good indicators, smiles, etc. do not occur in the patient, one again asks for an earlier incident, dates it and gets it recounted.

*Physically sick persons divide into two classes: “acutely ill” and “chronically ill.” A person who is acutely ill is temporarily or momentarily ill and a person who is chronically ill is simply ill all the time.*

You do not run heavy engram processes on an acutely ill pa. You do Touch Assists and get a Scientology auditor to deliver processes given in C/S Series 9, HCOB 21 June 1970, fourth section “Sick Pcs,” Tech Bulletin Volume VII, page 89.

You try not to run heavy engram chains on acutely ill pa as they are physically not up to it, cannot stand sessions long enough to get anywhere with a chain and usually all that happens is, the pa feels spinny and left in a restimmed condition. You can run Touch Assists and light Objective Processes.

On a chronically ill pa you can begin exactly as you would with an acutely ill pa, with the difference that when he improves you can run out the physically painful experience the person has just undergone with Narrative R3RA. After this you can proceed with regular New Era Dianetics.

Needless to say all this requires a skilled auditor but the skill can be acquired in a Dianetic training course.

The important thing is not to tell the patient what caused it, but to let him tell you. Otherwise the symptom suppresses.

The approach in any of these assists is quiet, gentle, permissive, never forcing the patient, speaking only the words required to do the process.

The temporarily insane by reason of emotional shock, where no medical illness exists, should be permitted rest and should then be handled by an assist as above or normal Dianetic auditing. Most often, rest and no further harassment result in a return to sanity in a short time such as a few days, but not in a terror atmosphere such as a psychiatric asylum where the patient is in the risk of being hurt or killed. Electric shock prolongs the condition and brain surgery is of course not treatment but murder as at best it deprives the person of his coordination and at worst shortens his life. The occasional and rare brain tumor is of course an exception but this is a medical not a psychiatric matter, no matter what manifestations the person exhibits.

Most medically ill people do exhibit symptoms of mental derangement at some stage of their illness.

The acceleration of healing of medical illness or injury such as broken bones or the after effects of delivery or operations can be accomplished by the Dianetic auditing of the resulting trauma soon after full medical treatment or attention. The improvement factor is about 1/3 the normal time of recovery by some thousands of test cases.

Such auditing is done by a usual Dianetic procedure.

In addition to the above assists there is regular Dianetic auditing which handles chronic discomforts and prevents future illness as well as improving the state of well-being of a person.

The mechanisms of the mind revealed in Dianetics are of great use to the field of medicine.

They are easy and quick to apply.

About one month's training is all that is necessary to acquaint an otherwise educated and intelligent person with the fundamentals and skills necessary to assists.

Considerably more time of course is necessary to train a skilled Scientology auditor, but this is not the subject of this paper.

There is no conflict of interest between any healing profession and Dianetics. Dianetic materials and papers are fully available.

There is a conflict between Dianetics and political practices such as psychiatry since electric shock, brain operations and general degradation of the person may prevent the patient's recovery by Dianetics.

As answers exist now for insanity there is no reason to continue medieval or Fascist solutions to the problem of the psychosomatically ill or the insane and we are doing everything in our power against fantastic opposition to end the torture and killing of the insane regardless of the politically "desirable" ends envisioned by some groups.

Dianetics, like any other true treatment, like aspirin or penicillin, was originally designed to handle the apparent basic cause of psychosomatic illness. The first research was intended to help allied prisoners of war degraded by the Japanese and Chinese prison camps and who after V-J day were transferred to Oak Knoll Naval Hospital. Later, in 1954, in a much more advanced state of development, Dianetics was successfully employed to eradicate the results of allied prisoners of the Korean War who had been subjected to Russian brainwashing. The subject has been improved, made easier to teach and apply and its results bettered continually over a total period of 29 years. It was in 1969... fully updated as Standard Dianetics. *In 1978 it has again been upgraded as New Era Dianetics.* It is very successful and is in very broad use over the world.

Dianetic Auditors

*(Revisions in this type style)*  
*(Ellipsis indicates deletion)*

**DIANETIC CASE SUPERVISION**

Dianetics is done differently than Scientology in that its auditors are trained up to *New Era Dianetics Graduate* only. Therefore they do not have various skills you will find in a Scientology auditor. Even when they become a Scientology auditor, Dianetics is still done as Dianetics.

*Therefore knowledge and skill above and beyond the training level of the New Era Dianetics Course is not to be expected of the New Era Dianetics auditor.*

There are also things in Book One we no longer use such as Repeater Technique, looking for phrases to explain conditions.

We use Dianetics as it was re-worked in the early 60s and as currently being presented *in the New Era Dianetics Series*.

If it isn't on the checksheet of the Dianetics Course, then we don't demand it.

We do demand some skill with a meter and what a floating needle is.

If a Dianetic pc gets in trouble we send him to *a Scientology auditor* for a review. In this review, all Scientology skills (but no grades) can be done.

In review he can get in his rudiments, etc.

It is very worthy of note that in reviewing Dianetics or in doing Dianetic auditing **ONE CAN RUN OUT BAD SESSIONS AS AN AUDITOR OR PC BY USING R3RA ON AUDITING SESSIONS OR THERAPY.**

If we keep Dianetics to Dianetics we will again achieve the miracles of which it is capable.

Dianetics has been refined greatly. But it is all there on the checksheets now. There is no hidden data line.

It is far less complex today than it was in 1953, for instance, and much more effective. But it is still Dianetics. It is a technology that runs and erases locks, secondaries and engrams and their chains.

It should be case supervised and done with that fully in mind.

*A New Era Dianetics auditor is a New Era Dianetics auditor.* He can do what he can do.

And it's marvellous.

**DIANETICS**  
**BASIC DEFINITIONS**

ERASURE is the action of erasing, rubbing out, locks, secondaries or engrams. *It occurs when the postulate made during the basic incident on the chain is gotten off.*

A LOCK is a mental image picture of an incident where one was knowingly or unknowingly reminded of a secondary or engram. It does not itself contain a blow or a burn or impact and is not any major cause of misemotion. It does not contain unconsciousness. It may contain a feeling of pain or illness, etc., but is not itself the source of it. Example: one sees a cake, feels sick. This is a lock on an engram of being made sick by eating cake. The picture of seeing a cake and feeling sick is a lock on (is locked to) the incident (unseen at the moment) of getting sick eating cake. When one finds a lock it can be run like any other mental image picture.

A SECONDARY is a mental image picture of a moment of severe and shocking loss or threat of loss which contains misemotion such as anger, fear, grief, apathy or "deathfulness." It is a mental image recording of a time of severe mental stress. It may contain unconsciousness. When it is restimulated by a similar but lighter experience another mental image picture is recorded which becomes a lock on the secondary and serves to keep the secondary alive. A secondary is called a secondary because it itself depends upon an earlier engram with similar data but real pain, etc.

AN ENGRAM is a mental image picture which is a recording of a time of physical pain and unconsciousness. It must by definition have impact or injury as part of its content.

It is of the very greatest importance that a Dianetic auditor really grasp what these things are. Otherwise he won't know what he is doing or to what.

Now because he isn't seeing his preclear's pictures an auditor can become very careless about them and not handle them correctly.

If an auditor doesn't really know what these things are (erasure, locks, secondaries, engrams) he cannot of course hope to handle them for the preclear.

The basic Dianetic errors are just not knowing what these are and that they are there to be handled and that these and these alone cause psychosomatic ills.

Once one has a full grip on these definitions he can then and only then hope to do anything with them for the preclear.

If the auditor is going to handle the aches, pains, unwanted sensations and psychosomatic illnesses of the preclear, it requires that he fully grasp these basic definitions.

Literally millions of complications can stem from the simple fact that a preclear records experiences in mental image pictures and that these thereafter can affect HIS BODY adversely.

Once one really understands that mental image pictures are *all* there is in the preclear's "mind" one has understood the total of aberration. There is NOT something else there. No "id," no "ego." There are only mental image pictures.

These, if you use the exact procedures of Dianetics, can be found and erased.

When the unwanted locks, secondaries and engrams are erased the preclear will be rid of the physical disabilities of which he complains and will be well physically.

SOMATIC—means essentially body sensation, illness or pain or discomfort. "Soma" means body. Hence PSYCHO SOMATIC or pains stemming from the mind.

MISEMOTION—anything that is unpleasant emotion such as antagonism, anger, fear, grief, apathy or a death feeling.

This is the entire breadth of Dianetics today.

In Scientology we deal with the thetan, the being who is the individual and who handles and lives in the body. This is beyond the scope of today's Dianetics.

If a preclear is well physically made so by Dianetics and any required physical medication or nutrition, he can then embark on Scientology, the increase of his abilities and spiritual freedom.

If a preclear who is being audited or has been audited on Scientology grades becomes ill one DOES NOT TRY TO MAKE HIM WELL BY GIVING HIM NEW HIGHER GRADES. That has been an error of great magnitude. Instead ONE REVERTS TO DIANETIC AUDITING until the pc is well and only then continues with Scientology.

This is correct procedure because it works.

People "come into Scientology" to cure their headaches. Somebody starts them off on grade auditing, several grades later they still have their headache. It is a continual present time problem to them and the auditor. It sometimes vanishes during grade processing. This gives an unfortunate win.

The right thing to have done was give the person DIANETIC AUDITING, until he or she no longer had headaches and then begin to audit the person on grades so as to put them well above ever again getting headaches.

Continual headaches come from mental image pictures retained by the pc of having a head crushed or shot off or hit. That is an *engram*. It actually had to happen. It is NOT imaginary or delusion. The proof is that when the auditor finally erases the engram the recording of the injury is gone and the headaches will not again occur.

The preclear often is unable to confront the actual engram at once. He offers one a LOCK, a time when he had a headache. One "runs" this lock (one always runs whatever is offered, you don't force the pc) and finds after putting the preclear through it a couple of times that IT IS GETTING MORE SOLID or it simply isn't erasing. One finds an earlier recording. This possibly turns out to be a secondary. The pc had a moment of loss and cried and also had a headache.

This secondary may or may not erase. If it does one leaves it of course as finished. But if it *goes more solid (shown by TA rising at the end of a run through the incident—or if the pa says it is going more solid)* one then asks for an earlier *incident*.

One probably would then get the actual *engram*, a recording of a time when the head was actually injured. The *auditor runs this through and as soon as he has completed a run through the incident and discovered (from the rising TA or the pc) that the incident is going more solid, he asks for an earlier incident.*

This one erases.

When it erases the whole chain of headaches ALSO erases.

And that is the end of the pc's headaches period.

One then inquires after other somatics or sensations and handles them the same way.

It is all done by using the technique called R3RA without variation.

Since these recordings contain mainly other-determinedness (pictures of others doing things) the auditor always has more control over the preclear's mental image pictures than the preclear does. Thus the pictures do what the auditor says. This point too must be grasped by an auditor or he will be waiting on the preclear to act or move in time.

The TIME TRACK is the consecutive record of mental image pictures which accumulates through the preclear's life or lives. It is very exactly dated.

PLEASURE MOMENTS are mental image pictures containing pleasure sensations. They respond to R3RA. One seldom addresses them unless the preclear is fixated on some type of "pleasure" to a point where it has become highly aberrated.

BLACK FIELD is just some part of a mental image picture where the preclear is looking at blackness. It is part of some lock, secondary or engram. In Scientology it can occur (rarely) when the pc is exterior, looking at something black. It responds to R3RA.

INVISIBLE FIELD is just a part of some lock, secondary or engram that is "invisible." It like a black field responds to R3RA.

PRESSURE SOMATIC is, in Dianetics, considered to be a symptom in a lock, secondary or engram, simply part of the content.

Whatever, the symptom pain sensation, whatever, it is from either the body directly (such as a broken bone, a gallstone or immediate physical cause) or is part of the content of a mental image picture—lock, secondary or engram.

The Dianetic auditor does not audit ideas or think. He is handling mental recordings. Ideas are in them. Ideas come out of them. But *think* is no longer part of Dianetics.

In Dianetics we handle locks, secondaries and engrams.

KEY-IN is the action of recording a lock on a secondary or engram.

KEY-OUT is an action of the engram or secondary dropping away without being erased.

DIANETIC F/Ns ARE *HANDLED DIFFERENTLY* THAN SCIENTOLOGY F/Ns.

*An F/N seen by the auditor in running R3RA is not called until the full Dianetic EP is reached.*

*An auditor running R3RA is not looking for F/Ns. He is looking for the postulate which is sitting at the bottom of the chain he is running.*

The EP of a Dianetic chain is always always always the postulate coming off. The postulate is what holds the chain in its place. Release the postulate and the chain blows. That's it.

The auditor must recognize the postulate when the pa gives it, note the VGIs, call the F/N and end off auditing that chain.

An F/N seen as the incident is erasing is not called.

The pa does not have to state that the incident has erased. Once he has given up the postulate the erasure has occurred. The auditor will see an F/N and VGIs. Now the F/N is called. F/Ns are not indicated until the EP of postulate off, F/N and VGIs is reached.

It's the postulate—not the F/N that we are going for in New Era Dianetics.

**MULTIPLE ILLNESS**—means the preclear is physically uncomfortable or ill from several engrams of different types all restimulated. One runs one somatic chain at a time, running each new symptom that is assessed or stated by the preclear.

**CHAIN** means a series of recordings of similar experiences. A chain has engrams, secondaries and locks. Example—head injury chain in the sequence encountered by an auditor and run by R3RA—sporting goods display window seeing it (lock), losing a bat (secondary), hit in the head with a bat (engram). The engram is the earliest date, the secondary a later date, the lock the most recent.

By using somatics to trace back (meaning discomforts, complaints, sensations, aches, pains) and by staying on the chain of only one somatic (i.e. headaches) you get back down the single chain without dispersing all over the place into different chains. Thus one runs the chain of one particular somatic or discomfort or complaint down to key-out or erasure before doing the next somatic or discomfort or complaint.

**AUTOMATIC BANK**—when a pc gets picture after picture after picture all out of control. This occurs when one isn't following an assessed somatic or complaint or has chosen the wrong one or one which the pc is not ready to confront or by overwhelming the pc with rough TRs or going very non-standard. Some pcs turn up in their first session with automatic banks. The thing to do is carefully assess the physical complaint for longest or best read and gently handle *that* chain well.

**BASIC**—this is the **FIRST** experience recorded in mental image pictures of the **TYPE** of pain, sensation, discomfort, etc. Every chain has its basic. It is a **PECULIARITY** and a **FACT** that when one gets down to the basic on a chain (a) *the postulate made at the time of the incident comes off* and (b) the whole chain vanishes for good. Basic is simply earliest.

**UNBURDENING**—as a basic is not at once available on any chain one usually *unburdens* it by running later engrams, secondaries and locks. The act of unburdening would be digging off the top to get at the bottom as in moving sand. As you run off later incidents, the ability of the preclear to confront it also increases and basic is easy to run when finally contacted.

**BASIC BASIC**—this belongs in Scientology. It is wholly beyond the scope of Dianetics. It means the most basic basic of all basics and results in clearing. It is found on the Clearing Course. If contacted or run before the pc was brought up through the Scientology grades, he wouldn't be able to handle it anyway as experience has shown. So this is part of Scientology, not Dianetics.

**VALENCE** is the form and identity of the preclear or another, the beingness.

**ALLY**—a person from whom one had sympathy and was dependent upon.

**ASSESS** in Dianetics means choose, from a list or statements, which item or thing has the longest read or the pc's interest. The longest read will also have the pc's interest oddly enough.

If you know these definitions **COLD** so you don't have to mutter them or memo

rize them but just KNOW them, you will really get results with Dianetics.

The biggest failure in training auditors was their faulty grasp of what they were addressing and their additive think.

The discoveries of Dianetics were basic and vital and opened a wide new un-explored frontier.

These words were assigned to things arbitrarily. They had to be. Man had not had any notion of these things before so they had no names and had to be assigned names.

The names were chosen because they didn't also mean something else in another field of science.

The terms are therefore IMPORTANT and what they mean and the things they name must be grasped before success can attend any auditing.

Any failures of Dianetic auditors were not the failures of Dianetics. The persons attempting to audit others didn't KNOW what these *things* were, essentially the lock, the secondary, the engram, erasure and key-out.

So these are essential to any training or use of Dianetics.

and HCOB 11 Jul 73RB ASSIST SUMMARY  
Rev. 15.7.78  
Re-Rev. 21 Sep 78

Why Dianetics fell out of use had nothing to do with its workability. It has worked and well since 1950.

In some areas, mainly the U.S., it was illegal to heal or cure anything. There was even a law in California giving 25 illnesses that were against the law to cure. The "Better" Business Bureau in the U.S. even issues pamphlets that state that "You can always tell a fake healer because he says he can cure something."

Why a civilization would make it illegal to cure illness can only be explained by some vested interest making more money out of people being sick than getting people well.

There existed a continual threat to anyone who helped their fellows.

The ability of Scientology to bring about spiritual freedom therefore received the concentration of effort by organizations.

Lately public opinion has turned heavily against these suppressive groups and the public discovery that illegal seizure, torture and murder was the hidden activity of political psychiatric groups has lost these people their support.

It was overlooked that spiritual *healing* of the body has not been illegal and that Dianetics used for pastoral counseling is completely legal.

It is a sobering thought that the only effective technology of psychosomatic healing—Dianetics—could be suppressed out of full usage.

One is handling the effect of the spirit on the body. Therefore even Dianetics is spiritual healing and as such is far from illegal.

Man should not be kept ill just to let a few have a monopoly.

In almost all other countries than the U.S. there is no restriction on healing despite monopolistic efforts to make one.

Another reason Dianetics was for some time out of use was that it was believed it had been superseded by Scientology which it never was in fact. Dianetics can be done with no reference whatever to Scientology or its techniques.

People who have given up through illness are also prone to want to leave. Instead of confronting their illness it is easier to try to get away from it. Thus such people are in a hurry to be free and prefer Scientology. But if they have a sick body, it is a present time problem and inhibits attaining the spiritual freedom they seek.

The *correct* procedure is to make them well wherever possible with medical treatment and to handle their psychosomatic illnesses with Dianetics and then, before any further abuses by life can occur, to raise their ability and secure their freedom with Scientology. This is the correct use of Dianetics. It is the remedy for psychosomatic illness.

The basic use of Dianetics is to make a well body and to augment physical treatment.

Any injurious experience can be erased by Dianetics. It is very easy to use and if one wants people well and happy it should be used at every occasion.

A person has an operation. This should be followed soon after by Touch Assists and other handlings from the Full Assist Checklist 28 May 1974RA revised 11 July 1978, including erasure of the engram of the experience by Narrative R3RA Quad. The engrams and secondaries related to the incident can then be run using preassessment procedure and R3RA Quad. The healing time will be greatly speeded and often healing will occur where a relapse might have followed.

A woman has a child. The engram of delivery should be run out soon after. The result of doing so is very spectacular. There is no "postpartum psychosis" or dislike of the child and no permanent injury to the mother. It is in fact best to audit the mother both before and after the delivery, which gives one fast relatively painless childbirth and quick recovery.

Recovery from disease under treatment is speeded by Dianetic auditing.

Where the incident of the break is, with any chain, run out, a broken limb will heal (by X-ray evidence) in two instead of six weeks.

Some patients who are not responding to medical treatment who are then given as little as a Touch Assist will *then* be found responsive to the medical treatment. An auditor giving the person a Dianetic session will more or less ensure that the medical treatment will now work.

A person who is accident prone when audited usually loses this unwanted characteristic.

Many "insane" recover from their symptoms when given proper medical treatment, rest, no harassment and then good mild Dianetic processing. They become and remain normal people without relapse.

Chronic, which is to say, long-term illnesses cease when audited by Dianetics and then medical treatment, which was earlier ineffective.

Whole classes of "mentally retarded" children have been made more normal by teachers in London County Council schools using relatively unskilled Dianetics.

Tiredness, unwanted sensations, bizarre pains and aches, bad hearing or sight also routinely respond to Dianetic processing.

The sickness and death rate of persons who are part of Dianetic groups is only a small fraction of that of other groups.

Pilots audited with Dianetics, by a test involving a whole squadron, went without a single even minor accident for the following year.

Scientists audited with Dianetics have greatly improved intelligence. Dianetics raises IQ as a side product to usual auditing, at a rate of about one point of IQ per hour of processing.

Withered limbs, skin blotches and rashes and even blindness and deafness have all responded to Dianetics.

Possibly the point which counted most against Dianetics in the early attacks on it was that it did a vast array of things. The truth was, it actually did them. When you have the answer to the human mind as in Dianetics of course anything caused by the mind can be remedied.

It is very much easier to train a Dianetic auditor than a Scientology auditor. It requires only about a month to make a Dianetic auditor who is sufficiently conversant with the subject to get results. This too was used against Dianetics as the psychiatrist of that day claimed he himself needed twelve years of study to do psychiatry. Of course when the public found out that the product of these twelve years of study was killing the “insane” and increasing their number the argument became silly.

The spectacular personal gains which were available in Scientology were so great they tended to obscure the very real use and value of Dianetics.

Further, a Scientology executive trained and processed beyond the need of body help tended to forget that much of the public out there first had to be helped out of their physical misery before they could attempt anything like personal gain.

You use Dianetics much the way you would use any remedy.

When a fellow is burned you audit out the burn.

When a woman loses a loved one you audit out the loss.

When a young man can't finish his schooling you audit out his unhappy school experiences.

Dianetics is for USE. There is not a lot of admin about it. It isn't something you use after bowing down three times to Chicago. You just USE it.

A Dianetic auditor who sees someone sick and who doesn't get him treatment and then audit him is just not humane.

Woman going to have a baby—get out the meter and audit her into shape for it. When she's had it, run out the delivery.

Fellow burns his hand, break out the meter.

Dianetics is the answer to human suffering. USE it.

Ideas build up which halt the use of Dianetics, such as “Once you have a floating needle on engrams you don't run them anymore.” That's silly. *The Dianetic end phenomena is postulate off, F/N and VGIs. This means that the chain has blown. That full EP can then be called the end of that chain. BUT not the end of Dianetics on the case. (Ref: HCOB 16 Sep 78 POSTULATE OFF EQUALS ERASURE.)*

I am not trying to make anyone wrong by reintroducing the real use of Dianetics. I myself had not realized how separate and vital it was as a technology until recently.

I was engaged for many years researching and completing Scientology. I had not noticed and had not said that Dianetics must be preserved and used in all cases of

psychosomatic illness or in physical suffering.

Yet, during all this time when I had to handle illness, I did not use Scientology. I used good old Dianetics.

Now I have refined it and made a better statement of it and made it easier to use and I trust it will be used for what it was intended and that Scientology grades will be relieved of the burden of attempting to heal physical illness, a use for which it was never designed.

Scientology is a vital practice in itself. It places a person *above* any further illness or suffering. But he has to be made well first.

People will ask, "Deafness? Now what special process is needed in curing deafness....?"

This is one of the modern refinements of Dianetics. One runs whatever is assessed on the preclear. with preclear interest. He doesn't decide to cure somebody of deafness. He handles the illness or disability the pc offers up that reads on the meter and has pc interest. Maybe it will be deafness.

You have one single body of tech covering all cases and that is now New Era Dianetics and the steps of HCOB 22 June 1978R, New Era Dianetics Series 2R, NEW ERA DIANETICS FULL PC PROGRAM OUTLINE. The whole of the person's complaints should eventually vanish if you just keep on going with the Full Pc Program Outline applying New Era Dianetics standardly and fully completing each part of the program.

Having gotten the pc well by medical care and Dianetic auditing, *then* start out with Scientology. If he gets sick again before many grades, revert to Dianetics, handle it and then when he is well, resume Scientology where you left off.

*Never* run a Scientology grade to make a pc well or cure something. It's a misapplication.

By *using* Dianetics as readily as you use shoes you can make and keep people well. You don't worry about overruns, rudiments or anything else. You just use R3RA even to correct ARC breaks and PTPs and bad auditing.

By then correctly using Scientology we can make the person a far better being.

We have had Standard Dianetics for some time. We now have even further improved Dianetic technology with the New Era Dianetics Series.

We have developed Scientology STANDARD TECH.

Both are now valid as themselves.

They do not cross.

Dianetics for the body.

Scientology for the spirit.

USE BOTH.

**DIANETIC RESULTS**

Every once in a while you get a Scientology result while running Dianetics. Also, sometimes you get a Dianetic result while auditing Scientology.

This tends to keep the two distinctly different subjects confused with each other.

A preclear, after Dianetic auditing, tells the Examiner he is exterior and feeling fantastically bright. This is a Scientology result.

Sometimes a Scientology preclear after attaining a grade will state that it has healed his terror stomach. This is a Dianetic result.

There is nothing whatever wrong with this except that it gives an auditor an invitation to confuse the subjects and think they are the same.

The clue is CONSISTENCY.

Dianetics only rarely exteriorizes a preclear.

Scientology only occasionally handles a terror stomach. In fact a person whose terror stomach wasn't handled by Dianetics and its R3RA can go all the way to OT VI sometimes with it. He doesn't get rid of the terror stomach and he doesn't (since he had a present time problem all the way) make OT VI either.

If it is a body pain, sensation, somatic, illness, disability, the subject to use is Dianetics.

If it is a gain in ability and beingness that is the purpose, the subject to use is Scientology.

After many years of handling cases this emerged as a very factual fact. Dianetics is Dianetics, Scientology is Scientology. If you mix them they attain limited results.

This is so true that when you use all the prohibitives and never nevers of Scientology in doing Dianetics, Dianetics also fails.

See these two subjects as clearly separate. They each have their own case supervision orders. You don't use Scientology case supervision orders in case supervising Dianetics. And you don't use the Dianetic rules on Scientology.

One addresses the body, the other the thetan. They both go by their own rules.

*There is also NEW ERA DIANETICS the rules of which are rigidly adhered to, so Dianetics is not a Scientology downgrade either.*

Dianetic results are a well body and a being happy with it.

Scientology results are a free, powerful and immortal being.

They can and do achieve their proper end results but only when used properly, separately and as themselves.

## SOMATICS

*Note: This Bulletin has been revised to align with  
New Era Dianetics Series tech. See:*

<i>HCOB 24 June 78</i>	<i>New Era Dianetics Series 5 ORIGINAL ASSESSMENT SHEET</i>
<i>HCOB 18 June 78</i>	<i>New Era Dianetics Series 4 ASSESSMENT AND HOW TO GET THE ITEM</i>
<i>HCOB 26 June 78 Issue II</i>	<i>New Era Dianetics Series 6 ROUTINE 3RA, ENGRAM RUNNING BY CHAINS</i>

All chains are held together by one similar AWARENESS. That is a new discovery. Chains are not held together by narratives or personnel or locations. They are held together by AWARENESSES. Thus *when running R3RA (not Narrative R3RA)* we ASK FOR AND FOLLOW DOWN ONLY AWARENESSES CONTAINED IN THE PREASSESSMENT LIST....

*There are a thousand different descriptive words that could add up to an awareness. Pains, aches, dizziness, sadness, these are all awarenesses. Awareness, pleasant or unpleasant, of a thetan plus body is what we are trying to run in Dianetics.*

This brings to light a further discovery. One never assesses medical terms or symptoms.

An engram contains pain and unconsciousness. All right. Then its basic would be a physical duress not a symptom resulting from that duress.

Example: The pc says "headache." You assess headache, you try to run "headaches" and all you ever get is times a pc had a headache. Well, the headache is a symptom caused by a head *injury*. The engram must have contained a shot in the head or a crushed skull or some actual injury. The word "headache" would describe only how the head feels later when the engram occasionally goes into restimulation.

So you would get only locks and secondaries to audit and only by chance and an alteration by the pc of the command to find an earlier headache would you ever get to an engram in which the head was crushed or injured. "Headache" is the *result* of a head injury, and it doesn't describe the injury which, in engram form, is now giving the pc headaches.

Take the medical term arthritis. You could ask for arthritis and get only visits to the doctor or times in a wheel chair. The physical injury contained in the engram causing the arthritis is not described.

Alcoholism would present the same problem. If the pc listed and the auditor assessed "alcoholism" we would only get times when he was drunk, not the engram causing the symptom which might contain "Feeling very dry."

*Therefore we have the preassessment procedure of New Era Dianetics. After getting from the pa the original item (the drug, alcohol, condition, illness, etc.) to be handled, we preassess to get the AWARENESSES connected to it.*

... *And* we will land the real engram every time, not only its locks or secondaries. (It is quite all right to run locks and secondaries as it is necessary to unburden the chain and increase the pc's confront, but chains always end up in a basic engram at the bottom and if you don't get and erase that then the chain will key in again.)

In asking for list items one puts down only what the pc says. That's an invariable rule. But when the pc says some... symptom like "headache" or medical term like "arthritis" the auditor writes it down; *if it reads and has pa interest he first runs it Narrative to full EP (Narrative R3RA Quad); THEN he does a preassessment on arthritis to get all the somatics connected with the item.*

Example: Pc says... complaint is "SINUSITIS." The auditor writes it down, *and if it has read and pc is interested he runs it Narrative R3RA Quad. He then does a preassessment on it, lists from the preassessment item found and ends up with a running item "A burning sensation in the nose," and runs it R3RA Quad to full EP. Sinusitis can of course be preassessed many times and the items run.*

If the auditor took and assessed only "SINUSITIS" and then asked for incidents of sinusitis he would get only locks and secondaries—times when the engram was in restimulation. And he would rarely get the real basic and engram that causes the symptom.

This discovery opens the door to swift "cures." But one is obviously not treating SINUSITIS. He is looking for an incident in which there was a "burning sensation in the nose." And after a few locks and upper engrams he'd find and run the real injury in which the nose was burned.

## HIGH TA IN DIANETICS

In Scientology a high TA is always an overrun.

In Dianetics it means AN ENGRAM TOO LATE ON THE CHAIN TO ERASE IS IN RESTIMULATION.

A Scientology auditor “rehab” overruns.

A Dianetic auditor cures high TA by finding what engram (lock or secondary) is in restimulation (active). This will show up as a PAIN, SENSATION, MISEMOTION OR OTHER PRESENT TIME FEELING the pc has. In short, just by finding the somatic by list and assessing for longest read and running R3RA you can cure a high TA.

You handle a TA that goes up during a session by completing the chain exactly as in R3RA.

The same action you do for R3RA *also* cures the high TA.

*By running a pa on an incident late on the chain without going earlier you drive the TA high.*

*By ending off before the pc has given the postulate he made at the time of the incident (hence not getting a complete erasure), you can leave the picture partially there and capable of affecting the pc.*

There can be an infinity of wrong ways but only one right way and the right way is R3RA by the book.

A high TA (4 or above) is simply the E-Meter’s reaction to increased mass. Mental image pictures have mass. The mass has what is called resistance to electricity. The E-Meter measures electrical resistance. Mass resists electricity. Thus in the presence of mental mass as contained in mental image pictures, the tone arm of the E-Meter rises.

When you restimulate an engram, the E-Meter current flow has more trouble getting through the pc and the TA rises.

When the engram (or lock or secondary) is “keyed-out” (moved away) the TA comes down and the meter needle will float.

If you find a long chain with many engrams on it and run a late engram the TA goes up. As you go earlier, and eventually find basic, the TA comes down and when you *get the postulate and* erase the basic engram the TA will come down to between 2 and 3 and the needle will float.

Old disproved theory pre-Dianetics was that the E-Meter reacted to sweat on the hands but of course a person would have to sweat and “unsweat” to make the meter behave as it does. And the idea of “unsweating” would be ridiculous. Palms of the hand do not go wet—dry with enough rapidity to account for meter reaction up and down.

When you run several engrams through once or several somatic chains without erasing any you pile up too much mass and the TA will go high and stick.

Even if nothing is done to repair this the pc will destimulate (the pictures will drop away) in from 3 to 10 days.

It is a very poor show of auditing to do R3RA other than exactly by the book. It is very easy to do it exactly right. The drill is simple. If done exactly right the result is good and invariable.

Issue V  
REVISED 15 JULY 1977

(Revision of HCO Bulletin of 21 October 1968R.  
For use on Dianetic Course only.)

*(Deletes reference to needle "R/Sing" before an F/N.)*

### FLOATING NEEDLE

A floating needle is the idle uninfluenced movement of the needle on the dial without any patterns or reactions in it. It can be as small as 1" or as large as dial wide. It does not fall or drop to the right of the dial. It moves to the left at the same speed as it moves to the right. It is observed on a Mark V E-Meter calibrated with the TA between 2.0 and 3.0 with GIs in on the pc. It can occur after a cognition blowdown of the TA or just moves into floating. The pc may or may not voice the cognition.

It, by the nature of the E-Meter reading below the awareness of the thetan occurs just before the pc is aware of it. So to give a "That's it" on the occurrence of the F/N can prevent *the pa* from getting the cognition.

Pcs and pre-OTs OFTEN signal an F/N with a "POP" to the left and the needle can actually even describe a pattern much like a rock slam. Meters with lighter movement do "pop" to the left.

One does not sit and study and be sure of an "F/N." It swings or pops, he lets the pc cognite and then indicates the F/N to the pc preventing overrun.

A one-hand electrode sometimes obscures an F/N and gives false TA. If used, use higher sensitivity and get the TA from 2 cans when needed.

Dianetics Course

## TEACHING THE DIANETICS COURSE

As the teaching of basic data restimulates confusions which are then dramatized by throwing the course off line, the teaching of the Dianetics Course as follows is hugely vital.

The teaching of Dianetics auditors is laid down on these simple principles.

1. The data on tapes and bulletins is studied without alter-is, interpretation or addition by the student, fellow student, instructor or supervisor.
2. Well done and other folders are studied by the individual student.
3. No lecturing or additional interpretation or evaluation by supervisors.
4. The student audits only when he has completely passed on 1. and 2. above. He must not audit before he has completed his checksheet *once* through.
5. Things the student is weak on are done in clay.
6. The student is sent to Cramming at his own expense for bad auditing goofs. He may also be taken off auditing and made to do his checksheet again.
7. Any student question is answered by referring to the HCOB, folder or tape or by explaining it is beyond the scope of Dianetic auditing.
8. A rigid invariable schedule is precisely adhered to.
9. Checksheets and tapes and folders are gone through in the sequence laid down by the checksheet and not randomly out of sequence.

If this is made difficult then the programme must be cut back to the bare bones of the original above.

The teaching of standard tech must also be standard. Therefore the above **MUST** be adhered to completely.

## CASE SUPERVISING

### NEW ERA DIANETICS FOLDERS

All a Case Supervisor looks for in Dianetics folders to advise the next action is departure from exact New Era Dianetics procedure.

It is a very easy job providing the Case Supervisor knows his New Era Dianetics exactly and completely.

Any time there is the most minute or flagrant departure from exact assessment or exact R3RA, there will be a breakdown of the results.

It is quite a tribute to the tech that this is true. And it is true. Doing *C/Sing* recently on a very great many Dianetic cases audited by relatively untrained auditors the following emerged in letters ten feet high.

1. Where the auditor followed the exact procedure without deviation the results were uniformly excellent.
2. Where the auditor deviated from the exact procedure the results were poor or bad.

There are many, many ways an auditor can deviate from exact procedure.

There is only one exact procedure.

As a result of doing this C/S work, I would, if I were doing Dianetic C/Sing, refuse to let an auditor audit until he could attest with absolute certainty to each point of the Student Attest on the Hubbard New Era Dianetics Course Checksheet. This would save nearly all work required of a Case Supervisor.

When the auditor is in a fumbly state regarding the procedure and has not drilled it until he could do it with the house caving in, the preclear does not get good results. That is really all there is to it.

If the auditor simply observes the Auditor's Code, handles TRs and the meter fairly well and does the assessments and R3RA exactly as laid out, the results will be found to be astonishingly good, even miraculous.

---

To correct a bad session the normal action of the C/S is to order the offbeat actions done correctly.

## EXAMPLE

- A. Auditor assessed by interest only, not by read and the session bogged down. C/S action—reassess by longest read.
- B. Medical terms were put on the running item list; one was chosen and case bogged. C/S action, order such be taken off list and proper preassessment procedure applied to it to get *running* items.
- C. A basic was found and auditor told it was erasing but sent pc earlier but pc could find nothing so left it. C/S orders the last incident found fully erased.
- D. Auditor tells pc he won't run it because it "isn't an engram." C/S action, order auditor to retrain on Auditor's Code and do Invalidation and Evaluation in clay. Orders pc to a Scientology *auditor*, Green Form.
- E. Pc very nattery to auditor. C/S orders pc to Scientology *auditor*, "and be sure to pull all withholds."
- F. C/S finds his orders to complete a chain left undone with a high TA were not done—folder mislaid or pc not routed. Pc has become ill. Order the pc to medical treatment and the chain completed and the auditor to Ethics.

You see how it is. Each time the auditor violated normal simple procedure, the C/S orders that the normal simple procedure be completed either by first giving pc a Scientology Green Form and then completing the New Era Dianetics action or, omitting GF (when pc not out rud), just getting the real standard action done.

This is really all there is to case supervising New Era Dianetics case folders. The more you try to do something else than the above the further the case will go wrong.

The Hubbard New Era Dianetics auditor does not have to know how to do Green Forms or rudiments. When they have to be done you get a Scientology auditor to do them.

It is a serious error to mix up Dianetics and Scientology.

The potential errors of out ruds and all the rest are present of course in any New Era Dianetics session, but do not usually happen when exact New Era Dianetics procedure is used. When they do happen you send the pc to a Scientology auditor.

This is case supervision, New Era Dianetics. It has been fully worked out by my case supervising a great many Dianetic sessions to launch this new view of Dianetics. And the above is what I found.

It drives home also the necessity of training New Era Dianetics auditors as precision technologists and the risk of letting people audit before they are fully grooved in on exactly what's done in a New Era Dianetics session.

### METER TRIM CHECK

E-Meters can go out of trim during a session because of temperature changes.

Thus even if the meter is properly calibrated and reads at 2.0 with a 5,000 ohm resistor across the leads and 3.0 with 12,500 ohms, by the end of the session a pc can be apparently reading below 2.0 because the meter is off trim.

The following meter procedure is therefore to be followed AT THE END OF EACH SESSION (AFTER GIVING "*END OF SESSION.*"):

1. DON'T MOVE THE TRIM KNOB
2. PULL OUT THE JACK PLUG
3. MOVE THE TA UNTIL THE NEEDLE IS ON 'SET' AT THE SENSITIVITY YOU WERE USING IN THE SESSION
4. RECORD THE TA POSITION AT THE BOTTOM OF THE AUDITOR'S REPORT FORM AS:

"Trim check - TA =...."

5. IF YOUR METER IS KNOWN TO BE OUT OF CALIBRATION (as in para 2 above) RECORD ALSO: "Calibration error - on meter = 2.0 actual" at the bottom of the form.

ENGRAM RUNNING BY CHAINS.)*

### ERASURE

Now and then a pc does not understand that he is supposed to be erasing a PICTURE and only goes far enough to erase the somatic. Auditor says, "Is it erasing?" Pc can't feel somatic so he says, "It's gone." Auditor puzzled by no *full end phenomena* but buys it.

What you want to know as an auditor is "Is the *picture* erasing?" You can use that line to check, but not habitually.

Erasure depends... on the pc getting to the BEGINNING of the incident. Sometimes the pc keeps starting a bit late in the incident and so does not get an erasure.

If you assess an item like "Dizziness after an operation" and try to run it the pc will bog utterly as the whole operation precedes the somatic called for and not only won't erase but also won't show as a picture. (*Ref: HCOB 20 Jul 78 New Era Dianetics Series 18 AFTER THE FACT ITEMS*)

**AUDITING OUT SESSIONS  
NARRATIVE VERSUS SOMATIC CHAINS**

(Ref: *New Era Dianetics Series Bulletins.*)

Now and then it is necessary to audit out the last session or an auditing session.

One does this by *using Narrative R3RA...* wording when asking the pc to go earlier. One asks for an EARLIER SIMILAR INCIDENT. "Is there an earlier similar incident?" A session, when audited, does not always erase. Instead it has become part of a chain. Therefore one has to run *Narrative R3RA* on it and get an earlier similar incident.

The chain may go back vast amounts of time.

Whereas the pc may only have been in Scientology 3 days, before Scientology there were other types of "sessions" such as psychoanalysis. And before that, in Rome and Greece, dream therapy in which one was "visited by a god." And before that—well, the chain can have a very far back basic. One does not of course suggest ever what the earlier incident may be. There is no telling what the pc may confuse with a session.

If one asked the pc to "locate an earlier incident with a similar feeling" one would be on another chain entirely. Hence one asks, simply, "Is there an earlier similar incident?" when running a session out.

Running a session out has the liability that one is running a NARRATIVE CHAIN, a similar *experience* rather than a similar somatic.

One of the major 1969 breakthroughs was that chains are held together mainly by somatics. The body condition or somatic is what keeps the chain in association.

One *does* of course run "narrative incidents" by which one means similar EXPERIENCES. (See HCOB 25 June 78, *New Era Dianetics Series 8, DIANETICS, BEGINNING A PC ON.*) "Locate an earlier time your mother spanked you." "Locate an earlier wreck." These will run and *erase but they must be done properly. This is by running the incident over and over to erasure, asking after each run through for earlier beginning, and only going earlier similar if it starts to grind badly.* Running only narrative incidents is what made early Dianetics run up such fabulous numbers of hours in processing.

*The commands for running narrative incidents and further data on running narratives are to be found in HCOB 26 June 1978 Issue II, New Era Dianetics Series 6, ROUTINE 3RA ENGRAM RUNNING BY CHAINS.*

Somatic chains go quickly to basic and are the important chains.

Thus when we erase a chain of sessions we sometimes run into a very long *session*. Sometimes the TA goes up to 4 or 5 (particularly if the auditor grinds). Using a wrong go-earlier command is a primary reason for trouble.

Usually if you ask simply for an earlier *beginning* or an earlier similar incident the pc goes back to something that will erase and *it* blows.

But remember, asking for similar types of *experience* can... *get* very long and *erasure* may not occur for some time.

*Running out sessions can be a worthwhile action...* but the best thing to do is goof no assessments or sessions in the first place.

### HOW NOT TO ERASE

(Reference: New Era Dianetics Series Bulletins and  
*HCOB 16 Sept 1978, POSTULATE OFF  
EQUALS ERASURE*)

There are two extremes a Dianetic student can go to on the subject of erasure.

- A. He can grind and grind and grind (DEF, DEF, DEF, DEF, on and on) with the TA going up, up, up and never once tell the pc to go earlier.
- B. He can watch the TA come down to between 2 and 3 and go loose on the last incident run, ask the pc "erase or solid," get a noncommittal answer and send the pc earlier. He can keep sending the pc earlier and earlier on another chain without ever noticing he's finished the first chain.

These are the two extreme cases. In Case A it is OBVIOUS from TA rise that the chain has an earlier incident or the incident being run has an earlier beginning. In Case B it is obvious from the TA that the chain erased.

In A the student is preventing the pc from going earlier when he should.

In B the student is forcing the pc to go earlier when he shouldn't.

In both cases the student hasn't a clue of what an engram chain is.

It is marvelous how students demand "the exact phrase" to use as an effort to avoid having to really understand what they are doing in auditing.

If a student hasn't a clue about what he is doing then a thousand goofy outnesses will keep cropping up, each one requiring (a supervisor thinks) a special instruction. After a while you get a course text weighing one ton, and all because the student didn't grab the basic definitions in the first place.

*A student who will do either A or B above has not grasped the most basic facts concerning erasure.*

1. *An engram chain is held in place by the basic for that chain and the postulate made at the time of that incident.*
2. *The basic is the FIRST TIME.*
3. *The clue to erasure is unburdening down to the first time and getting the postulate made at the time of the incident.*
4. *That all picture chains are there because the first time and the postulate made at that time are there.*

*The student assumes one ALWAYS asks "solid or erasing." Or that one always does only what the pa says. Or some such consideration.*

I would damned well never ask "solid or erasing" if I saw the TA start to climb. I would know the TA measured mental mass and that it was accumulating and wouldn't erase. I would immediately send the pa earlier as soon as he had completed his pass through the incident.

*Honest, it's awful easy.*

*A very odd outness a student will encounter when he is so dedicated to the exact words is the fast pc who erases before he can tell about it. Along about No. 3 of R3RA the TA blows down and the needle F/Ns.*

*A student who knew his business by understanding would ask, "Did it erase?" of course. The pc would say, "It vanished," and VGIs would come in.*

*A fast running pc on a light chain can occasionally blow an engram by inspection. If it was basic for that chain, one would be committing the crime described in B above. The pc is likely to go into another chain or a heavy protest.*

*So you see, there's no substitution for actually understanding what's going on.*

There's the pc, there's the bank, there's the meter needle, there's the meter tone arm and there's the auditor, there's the procedure, there's the report. That's all the parts there are to a session.

When one *understands* each one, one can audit. When one doesn't understand some part of any of the above, he will require unusual solutions.

Anything truly powerful is truly simple.

So a student who goofs is being complex and hasn't understood something about one of the major parts named above.

I just saw a goofed-up session that went like this:

Pc: It (the engram) happened every day for three days.

*Auditor:* DEF.

Flunk. The auditor was so deficient in knowing about chains and first time that he didn't tell the pc to go to the first day's engram but let the poor pc flounder in day 3! And so the chain did not erase and the pc hung up in it.

If the rule of first time is really understood, one would realize a lot of things, even that the pc was beginning an incident halfway through it and hadn't begun to run the beginning of it so of course, no erasure. If this happened on basic" There's *no earlier incident*" (TA high).

"Is there an earlier beginning to this incident?"

"Hey, yes there is."

"Go to the new beginning of that incident and tell me when you are there."

Yoicks, an erasure!

This is no invitation to depart from procedure. It's an invitation to see procedure as an *action*, very precise, capable of being understood and done, not a rote chant.

I'm *sure* some students are ex-medicine men who did their spells with exactly worded chants. It's time they understood the brew in the pot!

That's the procedure—not do the commands rhyme!

**HOW TO CASE SUPERVISE  
DIANETICS FOLDERS**

It is very easy to case supervise a New Era Dianetics folder and pcs being handled by New Era Dianetics.

The full program to follow is covered in New Era Dianetics Series 2R HCOB 22 June 78R, NEW ERA DIANETICS FULL PC PROGRAM OUTLINE. One just follows it!

There is *very* little to New Era Dianetics C/S work.

The Case Supervisor **MUST** be a Hubbard New Era Dianetics Graduate. There is no substitute for that. One who isn't would hopelessly snarl up real New Era Dianetics auditors or students aspiring to that cert.

The New Era Dianetics C/S should really be a New Era Dianetics Graduate *and* a Class VIII. Even so he has to keep these techs completely separate.

One **NEVER** asks a New Era Dianetics auditor in a Dianetic session to do anything except New Era Dianetics. There are *no* other actions.

The C/S, in correcting an auditor should do it positively and refer to the Dianetic HCOB. Negative criticism I have found, undermines auditors. One can as easily say the same thing in a positive way. Instead of "You broke the Auditor's Code" one can as easily say "Pcs must be rested before session. See Auditor's Code."

One **NEVER** gets inventive in doing a New Era Dianetics C/S. It is all very straightforward.

The C/S point of view in New Era Dianetics C/Sing is that one is trying to get New Era Dianetics done. One isn't, in New Era Dianetics C/Sing, torturously laboring to solve some difficult case.

Therefore there are only four possible actions for a New Era Dianetics C/S to take:

- A. THE CASE THAT MAKES GAINS IS GIVEN MORE NEW ERA DIANETICS.
- B. THE CASE THAT HAS HAD ALL POSSIBLE NEW ERA DIANETICS GAIN (and that is considerable) IS SENT ON TO SCIENTOLOGY.
- C. THE CASE THAT MAKES NO GAIN DUE TO CASE "ODDITY" IS SENT TO A SCIENTOLOGY AUDITOR.
- D. THE SESSION THAT IS NON-STANDARD IN AUDITING REQUIRES THE PC BE SENT TO A SCIENTOLOGY AUDITOR.

It is the fantastic fact that the pc will ONLY get Dianetic wins when receiving standard New Era Dianetics. Non-standardness only once in a hundred will give a case gain and that is a fluke. The Case Supervisor must have good subjective and objective reality on this fact. *He* must therefore be the ultimate in dictatorial martinet precision in requiring *standard* auditing and assigning standard C/Ses.

There are two types of cases only that come up.

1. The case as in A above who just goes on getting wins.
2. The case (who in life is usually chronically ill even if “up and about”) that requires a C/S to play adept Scientology auditing against New Era Dianetics auditing. Such a case is “solved” by now being sent to a Scientology auditor, now being sent to Dianetics, back and forth.

In D above, the pc who gets a non-standard session and is bogged at the Examiner’s is simply given a Scientology Green Form to F/N. He/she is then returned to New Era Dianetics auditing. This is a very usual, easy action.

In C above, the “oddity” case is easily recognizable in the folder. The oddity consists mainly of getting New Era Dianetics auditing, getting sick. Or in getting auditing but not being able to follow good standard commands.

Such a case also has a history of being ill. This case also can’t make any real headway in study and messes up pcs as an auditor and can’t seem to do standard auditing.

This C case, at first glance, seems to be hopelessly difficult and invites many to squirrel.

The case is more prevalent than one would think. It runs as high as 50°70 of voluntary pcs.

It could run much higher in the wog world. One spots the case ONLY BY THE CASE’S REACTION TO GOOD New Era Dianetics auditing, not by any opinion or test.

But this case isn’t any real challenge to the C/S or Scientology auditor.

Underlying all this illness and inability to concentrate or study or audit or hold case gains there is a heavily burdened chain that makes things seem very different than they are.

There is no trick to resolving the C case.

The C/S, having seen that the person roller-coasters after New Era Dianetics auditing, or can’t study or can’t audit, orders the person to a Scientology session for:

“GF to F/N. “Assess ExGF 40RD and handle.”

The Scientology auditor in Review does this. ExGF 40RD is the “7 Resistive Cases.”

Then the C/S sends the pc back to New Era Dianetics auditing for routine assessments and R3RA.

It is a saddening event to a C/S when the Scientology auditor lets him down. So an accomplished Class VIII on that spot is worth his weight in blessings. Lucky is the C/S who has a fine Class VIII. When he doesn’t have he orders only one action done between C/Ses and watches like a hawk. Reviewing reviews is a horrible waste of time, even though it has to be done when necessary.

This C type pc will now sail along for awhile in New Era Dianetics. But don't be amazed to have the pc roller-coaster *again*.

When the C type pc does you simply order again a Scientology session and GF to F/N and ExGF 40 RD and handle. And it will all come out differently this time. And then the pc is sent back for more New Era Dianetics.

This is what is meant by interplaying New Era Dianetics with Scientology reviews for a C type case.

You will just be *amazed* at the eventual result in the pc. Really a cracked case, man!

Very sick pcs are sent directly to a medico of course. And New Era Dianetics auditing is given along with medical treatment to get the pc off stuck points. This is all covered in HCOBs on medical uses of Dianetics and includes Touch Assists.

The "insane" pc is given absolute rest, a secure environment and any needful medical treatment (but never shock or surgery of the brain or nerves, of course, since that's only depersonalization treatment).

When in better physical health the "insane" pc is given just routine New Era Dianetics. But the sessions must be flubless and thoroughly within the Auditor's Code as the "insane" can't stand up to any goofs or overwhelm.

These "insane" pcs are most often simple cases of medically ill people—gallstones, malnutrition, deficiencies in certain vitamins, broken backs—the usual.

To undertake to *audit* an "insane" pc to sanity without complete attention to the above paragraphs is adventurous in our experience. But with these things given attention, the "insane" pc often responds amazingly. But do not be surprised to find that the "insane" pc turns into a C type as he comes up the scale.

The main trouble with the "insane" is that too many people around them are completely devoted to making them even more insane and they almost never respond to any treatment, medical or Dianetic, while kept in their same environment associating with the same people.

Also we could say that "Hell hath no fury to match that of a cured psychotic's associates." Usually the real crazy one is an associate, not the "insane" one.

#### C/S PROCEDURE

In doing a C/S on a New Era Dianetics folder, I usually inspect the following in the following order:

1. The Examiner's Report to see if the pc thought it was okay and if the Examiner's TA, needle and indicator observation is all right.
2. The pre-session C/S to see what was previously ordered done.
3. The session to see if the C/S was done.
4. The 1, 2, 3, 4, 5, 6, 7, 8, 9 sequence and A-EYE to see if it is standard. I seldom read text if the session was okay at Examiner's unless the session did not go well.
5. The F/N,... postulate and GIs or VGIs (*erasure* of the chain) and GIs at session end.

If all that is okay I give it a "well done."

If it isn't all okay I look for the 1, 2, 3 etc. that was not followed by an ABC but by a new 1, 2, 3, 4 etc. instead.

I try to find where the session went off standard and point out the standard actions that should have been done.

If the pc came out of it okay, I order more New Era Dianetics auditing.

If the pc didn't, I send the pc to a Scientology auditor.

If it had lots of DEFs and ground to a high TA session end I check to see if the auditor asked for an earlier beginning.

If the Dianetics folder is getting fat and the session was unsuccessful I look for a possible C type pc and handle accordingly.

If the pc is reported ill, I order medical, an assist and treat the pc thereafter as a C type.

The *value* of a C/S, whether New Era Dianetics or Scientology, depends on his unflinching adherence to standard actions.

A C/S that dreams things up to try to "solve a case" by squirrel processes is worse than no Case Supervisor at all.

The gain of cases depends on the standard, unswerving adherence to New Era Dianetics, to C/Sing in complete standardness and a Scientology auditor who really is a flawless standard tech man.

The result is the result of a TEAM. To that team one also adds the admin team of the rest of the group doing *their* jobs.

Given all that, one can straighten up whole population areas and activities and get the job done on the goal lines of well and happy human beings and a well and happy society both with greatly increased survival potential.

C/Sing is a happy job itself. And blessed is a C/S who has good standard New Era Dianetics auditors and good Scientology auditors on his lines and a good New Era Dianetics Course Supervisor making new good New Era Dianetics auditors and a good AO somewhere making good new VIIIs, all backed with orgs whose staffs know their Org Exec Course and policy.

The C/S's job only becomes unhappy and impossible when the auditors are non-standard or the admin people never heard of lines or policy and he himself departs from the straight and narrow of New Era Dianetics and standard tech.

The purpose of New Era Dianetics can be accomplished smoothly and easily only if the above are taken into account.

These C/S data are as thoroughly researched in practical application of tech itself and are derived from hard won practical experience.

**NEW ERA DIANETICS COMMAND TRAINING DRILLS**

Upon a recent investigation it was found that the Dianetic Training Drills (101, 102, 103 & 104) as originally developed by me in 1969 had been dropped from use on the Dianetics Course.

Therefore, these drills are reissued here for full use, and the following list of HCOBs and BTBs is hereby cancelled.

BTB 10 DECEMBER 1974 ISSUE VI CANCELLATION OF BULLETINS 1969 cancels BTB 17 July 1969 Dianetic Command Training Drills 101 & 102, it also cancels BTB 21 August 1969 TR 104 Note—these cancellations are correct.

Additionally the following BTBs are now cancelled:

BTB 17 July 1969R Revised 19 Feb 1974, Reissued 3 December 1976 cancels & revises HCO BULLETIN OF 17 JULY 1969 Dianetic Command Training Drills 101 & 102.

BTB 20 May 1970 (Issued 28 March 1974 as BTB) cancels HCO BULLETIN OF 20 MAY 1970 (cancels HCOB 21 Aug 1969 and 15 Jan 1970 and 31 March 1970).

NOTE: HCOB 20 May 1970 “103, 104 RUNDOWN” remains cancelled.

HCOB 21 Aug 1969 “TR 104 NOTE” remains cancelled.

HCOB 15 Jan 1970 Issue III “TR 104” remains cancelled.

HCOB 31 March 1970 “URGENT - DIANETIC TR NOTE” *is not cancelled*. This HCOB was issued by myself.

TRs 101, 102, 103 & 104

The most common errors being made by student auditors are forgetting the commands during session and misusing command sequence or procedure or doing odd things because they get nervous. The following drills are added to the New Era Dianetics Course to handle this. The drills must be thoroughly done.

TR 100 AND TR 100-A

Preassessment is a vital step of the New Era Dianetics procedure.

The benefits available from New Era Dianetics require that the auditor be able to do faultless preassessments of original items from New Era Dianetics assessment sheets and rundowns.

TR 100 and TR 100-A are made part of the New Era Dianetics Course to ensure that the student can apply the preassessment procedure in... *TR 104* and in his auditing.

## **TR 100:**

- NAME:** Preassessment Procedure On A Doll
- COMMANDS:** All commands of the procedure per New Era Dianetics Series 4, "Assessment and How to Get The Item," and New Era Dianetics Series 4-1, "The Preassessment List."
- POSITION:** Student seated at a table with E-Meter and the Preassessment List. In the chair opposite the student is a doll, occupying the position of the pc.
- PURPOSE:** To familiarize the student with the delivery and use of the Preassessment List.
- TRAINING STRESS:** This drill is not coached. The student sets up the E-Meter and Preassessment List exactly as in a session. He starts the assessment and delivers a complete preassessment on the doll, keeping full admin and using all standard procedures of NED Series 4 to get items for running.
- Student uses nonsense terms or harmless ones for the original item. He then delivers a preassessment on that.
- Student then selects the preassessment item from the Preassessment List and asks:
- "What \_\_\_\_\_(preassessment item) are connected with (the original item)?"
- The drill is passed when the student can do the drill flawlessly with good assessment TRs, correct procedure and commands, without comm lags or confusion, and can maintain proper assessment admin.

## **TR 100-A**

- NAME:** Preassessing A Doll Coached
- COMMANDS:** Same as TR 100
- POSITION:** Same as TR 100, with coach holding the E-Meter cans, and seated beside the student. Coach provides nonsense and harmless items for the student and squeezes the can to simulate E-Meter reads.
- PURPOSE:** To train the student to deliver and use the preassessment procedure.
- TRAINING STRESS:** Coach provides a list of original items as from one of the New Era Dianetics rundowns or assessment sheets. The student must choose the best reading original item and deliver the Preassessment List to the doll on that item. All reads on the preassessment must be correctly noted and marked. Student must then select out the correct preassessment item to list for a running item and ask the correct question.
- As the coach gives running items the student must get these down accurately with their reads. Then he must select which he would run on R3RA Quad and in what order.
- The student must reassess and extend the list of running items and use Suppress and Invalidate buttons as needed until the list is exhausted.

The student must then reassess the Preassessment List, find the next preassessment item and handle.

Flunks are given for any out TRs on the doll, any incorrectly marked reads, any missed or altered item given and any incorrect selection of an item.

Stress is on the student's ability to make a distinction between an item which requires a preassessment and one that does not. Student must not try to run drugs, medicines, medical terms or multiple somatics.

Drill is passed when the student can do the full preassessment procedure with good TRs, proper commands, without comm lags or confusions, can maintain proper assessment admin.

## **TR 101**

NAME: R3RA To A Wall

COMMANDS: R3RA commands including earlier incident and earlier similar commands.

Included in this drilling are the handling of bouncers, checking for erasure, and checking for postulate command actions, as well as are the handling of narrative incident commands.

POSITION: Student seated facing a wall.

PURPOSE: To get the student able to give all R3RA commands accurately, in correct order without hesitation or having to think what the next command should be.

TRAINING STRESS: This drill is not coached. The student sits facing a wall with a copy of the R3RA bulletin in his lap. The student gives the commands, in order, to the wall maintaining good TR 0 and TR 1. When the student falters or is uncertain of the next command he re-reads the commands from the bulletin then continues to give the commands to the wall. When the student can confidently give *all* the possible R3RA commands accurately without any slightest comm lag, he has passed this drill.

## **TR 102**

NAME: Auditing A Doll

COMMANDS: All R3RA commands and New Era Dianetics *procedures except* pre-assessment procedure.

POSITION: Student seated at a table with E-Meter and Auditor Report sheets. In the chair opposite the student is a doll occupying the position of the pc.

PURPOSE: To familiarize the student with the materials of auditing and coordinate and apply the commands and procedures of New Era Dianetics in an auditing session.

TRAINING STRESS: This drill is not coached. The student sets up the E-Meter and work sheets exactly as in a session. He starts the session and runs a complete New Era Dianetics session on the doll keeping full session admin and using all standard procedures of New Era Dianetics.

This drill is passed when the student can do the drill flawlessly with good TRs 0-4, correct procedure and commands, without comm lags or confusion and can maintain proper session admin, including worksheets, Auditor's Report Form and Summary Report.

All the R3RA commands used in TR 101 are again used here. Admin must communicate adequately which command is being used.

### **TR 103**

- NAME:** Auditing On A Doll Coached
- COMMANDS:** All R3RA commands, situations and procedures of New Era Dianetics except the preassessment procedure.
- POSITION:** Same as in TR 102 except that a coach sits beside student calling out command numbers and situations and the student following them and keeping admin and his meter.
- PURPOSE:** To give the student total certainty in the use of R3RA commands despite any distraction.
- TRAINING STRESS:** Coach calls for commands at random by stating the letter or number of the command or the situation by saying "solid," "erasing" "solid but nothing earlier." The student addresses the right command or action to the doll, handles meter and admin. The coach also uses pc responses such as "That's all," "I can't find one," etc. These are called for in quick succession and in any order. Coach starts in on a gradient gradually getting the drill faster and becoming sharper on flunks for any comm lags, uncertainties, groping for commands or breaks in TR 0-4. If the student becomes too confused the coach has probably proceeded with too steep a gradient and given the student too many losses. In such instances have the student go through the commands in proper sequence a few times and then continue with random commands building up the drill on a gradient. The use of the correct command (including those for handling bouncers, checking for erasure, and checking for postulates, as well as correct narrative procedure) is required at the appropriate point.

### **TR 104**

- NAME:** R3RA Coached And Bullbaited
- COMMANDS:** All R3RA commands and procedures.
- POSITION:** As for auditing on a doll (TR 102) with coach seated beside student and a bullbaiter as "pc" across from the student instead of a doll.
- PURPOSE:** To train the student to deliver a standard session with correct commands and procedure and without session additives of any kind despite distractions.
- TRAINING STRESS:** The drill is the same as for auditing on a doll except that the "pc" coach bullbaites the student auditor during the session in an attempt to throw the student off session while the second coach calls the numbers as on TR 103. Flunks are given for any improper commands, procedure, comm lags, breaks in TRs or improper session admin. The second coach does the "Start," the flunking or "That's it." If the student is not making the grade he is returned to the earlier TR that is out. This drill is coached tough and only passed when the student is totally competent, exact and correct in all com

mands, procedures, auditing actions and session admin with excellent TRs and no slightest variation from or additives to New Era Dianetics.

Coach ensures the student has total certainty on the application of all R3RA commands and sequences including handling bouncers, checking for erasure, checking for postulates, and handling narrative incidents.

Preassessment procedure must also be correctly applied exactly as in a session.

These drills were developed by me in July 1969 when it was found that all failed sessions resulted from non-standard auditing, the main goofs being auditors' failure to give the next command, forgetting the commands in session or giving a wrong command.

New drills were added and existing drills were revised to include drilling for the utilization of the discoveries of New Era Dianetics in 1978.

## DIANETICS AND ILLNESS

*IMPORTANT NOTE: It is now forbidden to run Clears, OTs or Dianetic Clears on Dianetic Auditing Assists, secondaries, engrams or narrative incidents. The only permitted Dianetic actions are Contact Assists and Touch Assists. Clears and OTs may now receive New Era Dianetics for OTs at AOs and Flag. (Ref: BTB 17 Sept 78 BREAKTHROUGH and HCOB 12 Sept 78 DIANETICS FORBIDDEN ON CLEARS AND OTs.)*

Although mention of this is made elsewhere in the Dianetics Course, the facts about ILLNESS do not seem, in practice, to reach the Case Supervisors or Dianetic auditors.

The idea that one can always get rid of an illness by auditing ONE chain to basic is false. Man dreams about “one shot” cures to a point where he could be accused of being impotent!

Here is an example: A preclear “has always wanted to get his bronchitis handled.” In Dianetics a list is made for chest or lung pains or sensations. *One* is chosen and erased. The “bronchitis” is now better or even absent for a few days. Then we have the preclear back again saying “It didn’t cure my bronchitis.”

Enough cases are handled successfully by running *one* chain on a somatic that people get stuck in the win.

Here is another example: The pc says he has migraine headaches. The auditor assesses a “head pain” quite correctly and then runs out the chain. The migraine does not occur for a week after. Then here’s the pc again saying “I’ve still got a headache.”

All this is invalidative of the tech and the auditing. A registrar or Public Division hearing this tends to lose faith in the powers of the tech.

The FACT is that the illness was not properly handled or C/Sed or audited.

In the first place a pc trying to get cured of bronchitis or migraine—or any one of a dozen other illnesses—should be sent for a medical examination. How do you know the bronchitis isn’t tuberculosis? Or the migraine headache isn’t a fractured skull?

A “continual side pain” may be a gallstone.

In short, something which continually hurts or disables may be structural or physical.

So, when you omit the first action (medical) in handling an illness, you set up an auditor for a possible failure.

Many of these things can be cured medically without too much heroic action.

If it is medical and can be cured medically without destructive consequences, then it should be.

Also it should be audited. This lets the medical treatment work. Many “incurable” illnesses become curable medically when they are also audited.

The second thing that gets overlooked is that AN ILLNESS IS A COMPOSITE (composed of many) SOMATIC.

The correct auditing action on “bronchitis” or “chest trouble” or “migraine headache” or any other continual worrisome illness is to be found on:

HCOB 28 Jul 71RA	New Era Dianetics Series 8R
C/S Series 54RA	DIANETICS, BEGINNING A PC ON
HCOB 18 Jun 78R	New Era Dianetics Series 4R
	ASSESSMENT AND HOW TO GET THE ITEM
HCOB 26 Jun 78RA II	New Era Dianetics Series 6RA
	ROUTINE 3RA, ENGRAM RUNNING BY CHAINS

This includes running the item by narrative incident, and then using preassessment full procedure to find all the somatics, sensations, feelings, emotions or even attitudes in the area affected, getting exact feelings from these—as “running items” and running their chains to full Dianetic EP.

It takes more than one chain of engrams to build up an ill area.

Having found and run the “deflated feeling” of bronchitis, which was the first best read, the C/S should order and the auditor find and run the NEXT somatic, sensation, feeling, emotion or attitude in *that* area.

It is sometimes necessary to add to the list *for that area* of the body.

Seeing a continual or recurring illness on the Original Assessment Sheet (or subsequent assessments of it), the C/S and auditor should dig out of that area every somatic, sensation, feeling, emotion, attitude, etc. that can be made to read, using the preassessment procedure. And run those chains, each one to basic and erasure. (See New Era Dianetics Series.)

THAT is the way you handle any illness, whether continual or temporary.

The maxim is that IT TAKES MORE THAN ONE CHAIN OF ENGRAMS TO MAKE A BODY ILL.

Continual reassessing and adding to general lists will get there eventually providing it is done long enough. But this general approach will find a certain number of pcs saying to registrars, Public Officers and friends, “I’ve still got my.”

It is in fact a false report. They didn’t still have all of it. It is one chain less and therefore better.

But auditing gives gains by *deletion*. A pc does not suffer from what has been erased. He suffers only from that which has not yet been handled. With New Era Dianetics tech you handle all the chains that are making the body ill.

Some persons tried years ago to get their trouble handled, somebody or some practice failed and after that they don’t mention it at all. They don’t support the technology anymore either.

So, in handling illness, give the handling of the structural disease side of it to the medical doctor, and thoroughly handle *all* the mental side of it with auditing and everyone wins.

Any registrar or Public Division personnel colliding with “My lumbosis was not handled” should call this HCOB to the attention of the person, the Case Supervisor and the auditors.

Only then can you have 100% tech.

IMPORTANT

**AUDITING SPEED**

Almost any failure you have ever had with an auditor or in auditing came from auditor comm lags or errors.

This is a vital datum. It came to light from applying the rule—ask the pc what the auditor did after any failed session and get it corrected in the auditor.

SPEED is the main factor behind the mystery of a failed session.

The better an auditor knows his TRs, his processes, his meter and admin the faster he can operate.

If you train auditors only up to slow, comm laggy handling of a session you will get a lot of mysteriously “failed sessions,” ending with the TA high and the pc very low!

A somewhat slow auditor auditing a new pc may be fast enough to get away with it.

Put him on a person whose Dianetics is finished and some grades in, he begins to have a few “case failures.”

The remedy is to speed the auditor up with TRs 101, 102, 103, 104.

In assigning auditors you only dare assign fast ones to *fast pcs*.

For 19 years this hidden speed factor has lain behind the vast majority of our “failed sessions.” As it never appeared on the session reports (except as excessive admin for which the pc must have had to wait) anyone doing D of P work or C/S work was in mystery and tended to get desperate and even squirrel (change and invent processes).

The only other source of failure was the physically ill aspect. This has just been verified in a series of over one hundred cases. Dianetics combined with Scientology reviews progressed splendidly on all but about seven and these who were then physically examined thoroughly were found to have serious and current physical illness.

Speed and accuracy then is the stress of all training and the lack of it is the source of all auditing failures on pcs who are not severely ill.

Even the latter respond once their purely physical illness is properly handled.

**SERIOUSLY ILL PCS**

In Green Form No. 40 there is an item:

“Seriously *Physically* Ill.”

This is handled as follows:

1. Medical Examination
2. Medical Care
3. *Auditing composed of the following:*

*Touch Assists, a Contact Assist, two-way comm, ruds on the incident, ruds before the incident, Dianetic Assist, life ruds, two-way comm on suppression, 3 S&Ds, assessment for area of illness, Prepcheck on area, ruds on area, hello and OK with the affected area, reach and withdraw from area, two-way comm, recall on persons similarly ill, location of the postulate that caused it with itsa earlier itsa, Prepcheck on the body or its part, more ruds, assessment of failed purposes, two-way comm on the sickness.*

*That's not a program. It's just a list of a LOT of things to do. It would not greatly matter what order they were done in but lighter actions should be the earlier.*

As a pc who is ill is easily made an effect, the auditing sessions should be smoothly done and each session relatively short....

The remaining items on the GF 40 are then handled.

If “Seriously Physically Ill” is not *THE* GF 40 item, it is still handled but in its turn doing the above... actions.

*(Class VIII tapes contain much data on Out of Valence handling. This Bulletin, formerly Class VIII distribution, has been revised to present a procedure whereby Snr Class IV and VI auditors can do LX Lists and Out of Valence handling on their pus. This revision in no way revises Class VIII data.)*

### “LX” LISTS

There are now three “LX” Lists:

LX3—Attitudes

LX2—Emotions

LX1—Conditions.

Originally they were called “X” because they were experimental.

They still are to some extent so the X is retained.

These serve to isolate REASONS A BEING IS CHARGED UP TO SUCH an extent that he is OUT OF VALENCE.

When a person is out of valence he does not easily as-is his bank.

These lists are assessed *Method 5*.

*The best reading item (and then subsequently reading items) are taken up and run by:*

3-Way or Quad Recalls

3 Way or Quad Engrams R3RA...

### END PHENOMENA

We now have a new discovery. I have found that a person who is out of valence experiences, when run on LX1 lists (and now the others above, LX2 and LX3) and 220H, a remarkable valence shift if he is run on enough items.

In one fashion or another he comments on this in session.

This is the end phenomena of Out of Valence processes (the LX items and 220H).

It is *always* attained if enough items are run.

Quite ordinary cases are out of valence. If their folder gets too fat you can assume they are out of valence.

Perverts, suppressives and critical, snide, ruthless, arrogant or contemptuous personalities are always out of valence.

A person who is in treason on the 1st dynamic is always out of valence.

So whether GF No. 40 (h) OUT OF VALENCE reads or not, if the folder is fat, you play safe and assess and run LX items until the person has the Valence cognition.

Without being coached, a person who is out of valence always has the cognition if he is run on enough items and 220H.

## USE OF LISTS

*One begins with LX3. He assesses it Method 5 and takes the item that read best, handles it, then the item that read next best, and so on down the list.*

*If no EP, LX2 is taken up and handled in the same manner, then LX1. 220H is the last step of Out of Valence handling if the EP has not yet been reached.*

Today you can assume safely that anyone out of valence can be put in valence quietly and efficiently with LX items and 220H if he is audited and if the auditing is standard.

This is quite a worthwhile development as it resolves the heavily overcharged case.

A symptom of a heavily charged case is F/Ning too quickly to be processed well.

Using these lists on a pc is not a critical action. Even (and especially) children are too overcharged to be easily audited.

**CASE FOLDER ANALYSIS,  
NEW ERA DIANETICS**

There are only nine things that can go wrong in a New Era Dianetics session.

These are the only reasons chains do not erase and the session does not complete with very good indicators.

The first eight come under the head of auditing skill or knowledge.

They are listed in order of frequency:

1. Auditor comm lag (lack of speed in giving commands).
2. Flubbed commands in which the commands are used incorrectly.
3. TRs out, either being inaudible or overwhelming or TR 4 not handled.
4. Auditor additives.
5. Failure to call for an earlier beginning *of the incident* when *the pa can find no earlier incident—results in grinding and high TA.*
6. Failure to call for an earlier incident when *there is one.*
7. Demanding pc goes earlier when the last incident was basic, making pc jump into another chain.
8. Misassessment. (Selecting a narrative item and running it by regular R3RA instead of by Narrative R3RA. Or choosing a multiple item or an after the fact item to run. Or taking an item that doesn't read or in which the pc has no interest.)
9. Pc has out rudiments.

Note that the first four are BEYOND THE VIEW OF THE CASE SUPERVISOR.

The largest number of session failures come under these first four. Therefore it is routine for the Case Supervisor to have the pc asked what the auditor did. It is usually surprising. It will be one of the first four listed above. It requires a retrain.

The next four are also auditor flubs but are detectable if the Case Supervisor reads the worksheets of the session.

Therefore the Case Supervisor must know 5, 6, 7 and 8 above very well indeed and be able to look for them. In all of these the TA goes high or very low and the session ends up as a bust.

You can easily see 5. The pc is still on the same chain but begins to grind DEF DEF DEF DEF, the TA goes way up or down below 2 and the auditor command

“H.” “Is there an earlier beginning to this incident?” is spectacularly absent. So the C/S tells the next auditor to get the earlier beginning of the same incident and run the incident from its earlier beginning, then go earlier as necessary to complete the chain. It will eventually go to *EP* with an *F/N* and *the* postulate coming off and VGI's obtained.

6 is very easy for the C/S to spot. The pc has been given DEF DEF DEF DEF DEF, etc. *and* has been asked for an earlier beginning to the same incident but hasn't been asked for an earlier incident. So the C/S tells the next auditor to get an earlier incident.

7 is also easy for a C/S to detect from the worksheet of that session. Before the pc jumped to another chain by being forced to go earlier below basic, the TA was dropping and the incident was erasing, but the auditor failed to ask, after each run through the incident, “Has it erased?” The pc may have even given up a postulate, but the auditor missed the *EP* and pushed the pc earlier. Also the pc protested or had trouble when the auditor tried to go “earlier than basic” and also may mention another somatic.

In 8, misassessment, you can tell just by looking at the item that it is multiple such as “A burning pain in my hair and a feeling of tension on my hand”; that it is narrative “getting my feet wet” (where's the feeling in that??); or after the fact of the engram “dizziness after a car wreck.” A real classic would be “A stomach ache when I was thrown from a horse.” The C/S hardly has to look at the end of the session to know it will be no erasure, high or low TA and bad indicators at the Examiner.

As auditors who do these last four things have their *metering* or basic definitions madly out (such as “I never did understand what a somatic was”) and as in the first four the approach to the pc, TRs and additives need ironing out, the C/S sends the auditor for retrain.

From the C/S point of view (and fact) the technology applied gets uniform good results. Thus the C/S *never gets reasonable*.

The auditor will on retrain settle down. 100% sessions will occur regularly when he really can audit.

## PC REPAIR

The commonest C/S for a pc after a *Dianetic* session that ends with a high TA or below 2 TA and/or bad indicators at Examiner is “*L3RF Method 5 and Handle.*” *If the L3RF, properly assessed and handled doesn't resolve it, “To a Scientology auditor for a GF to F/N. Assess auditors, auditing, Dianetics, Scientology, sessions, reviews, gains (or whatever you care to add), Prepcheck.”*

## OUT RUDS

In number 9, we get several manifestations. The pc has a good looking session yet complains to the Examiner. That is to say VGI's F/N cog at session end, but sour grapes ten minutes later at the Examiner's.

A pc who gets sad at session end and is or has been sad a long time and is sad and moping or despondent is, of course, suffering from an ARC Brk and is being audited over one and probably has had it for long duration. The proper C/S action is “To a Scientology auditor for a GF to F/N. Check ARC Brk Long Duration (LD).” This last is done with itsa earlier itsa and ARCU CDEINR by the auditor.

The pc who is being audited over a PTP won't be making any gains. They quickly evaporate. The C/S orders “To a Scientology auditor for a GF to F/N. Check problems and being audited over problems.”

When a pc is a bit nasty to the auditor or Examiner, he is of course being audited over withholds. The C/S is “To a Scientology auditor for a GF to F/N. Then check and pull all withholds and check if the pc has been audited over withholds.”

### PHYSICALLY ILL PCs

When a pc is ill or has a history of illness you get him/her medical attention and apply HCOB 24 July 69R, SERIOUSLY ILL PCs.

When a pc gets ill after auditing but the sessions look alright, you can be pretty sure that the pc is being audited over out ruds so a C/S orders “To a Scientology auditor for a GF to F/N. Assess GF 40 and handle any out ruds found in that assessment first.”

### SPECIAL CASES

There may be some special versions of out ruds but they are all one variety or another of out rud.

The pc himself can generate out ruds by lying to his New Era Dianetics auditor. It still shows up as out ruds, withholds.

One pc (out of a hundred) said uniformly that “it was getting more solid” to escape each incident, got himself into a jump chain situation continually and became very ill indeed. This also operated as a withhold in session. It was not detectable in the worksheets except that the pc became ill. It came out while flying ruds in a review session.

But generally pcs don’t act up in sessions if the auditing is straightforward and many get better even when audited over all kinds of out ruds.

When a C/S begins to be mystified concerning some pc, why betterment isn’t occurring—why the pc’s manifestations and remarks never change—or the pc becomes ill, then only three things need to be done. And all three should be ordered by the C/S.

1. Medical exam and any treatment.
2. Review to straighten up all out ruds.
3. New Era Dianetics auditing, using both Narrative R3RA Quad and full Preassessment procedure on troubled areas.

### ORIGINAL ASSESSMENT FORM

There is one other flub a bit maddening to a C/S.

When the C/S says “Assess existing lists or add” and the auditor says no items, it is quite often an auditor flub, a special kind of 8 above—misassessment.

One green auditor took 3 pcs in a row and could find no item, concluding that each of the 3 pcs were done with Dianetics! It turned out that the auditor’s TR I was so bad the pcs couldn’t hear her!

Another auditor didn’t have his meter plugged in and another one was found never to have done any meter drills.

Aside from getting the pc asked what the auditor did, which also should be done when it’s obvious there should have been an item and wasn’t, the C/S should order “Do a new Original Assessment Form” when the old list F/Ns or draws a blank even when properly assessed.

The pc can also be sent to the Examiner to be asked if there is anything not handled. The pc may give an area of interest. If there is one, but it hasn't read, the C/S should send the pc to a Scientology auditor for GF to F/N and probably a GF 40RD Expanded and handle. Then one can get the area asked about in Review and Suppress and Protest put in on it and back to Dianetics.

## EXTERIOR

Some pcs go exterior and the auditor may have missed it and continued auditing over it. Auditing past exterior can drive the TA high (or low) and the pc may become very upset and/or ill.

C/S for an L3RF to be done to determine if the pc has gone exterior. If so . . . and the pc has never had an Int RD the C/S would order an Interiorization Rundown. The Int Rundown stabilizes the exteriorization and makes it possible to audit the pc further.

Additionally, the pc could have had an Int RD that was messed up. This would . . . be determined by an L3RF and if found the C/S would be for an Int RD Correction List.... (If *Int had been done and previously corrected, the C/S would order an End of Endless Int Repair RD (HCOB 24 Sep 78) after first having the pays folders FESed to ensure there were no unhandled Int errors present.*) The Int RD and its correction must be turned over to a trained Scientology auditor.

*When any Int actions, the Int RD, Int RD Correction or the End of Endless Int Repair RD, as needed, has been successfully completed, put the pc back on Dianetics.*

I have personally C/Sed a vast number of Dianetic sessions and the above is all I had to do or know to keep them all going well.

If you look for tricky processes in Dianetics to "solve" some case, you will make a bad error as a C/S. They all come under the above data.

Good luck.

**DRUGS,  
ASPIRIN AND TRANQUILIZERS**

(Note: This Bulletin has been revised to align with New Era Dianetics Series Bulletins, in particular HCOB 15 July 71RA 111, Rev. 27 June 78 *Re-rev.* 19 Sept 78, C/S Series 48RA, New Era Dianetics Series 9R, DRUG HANDLING.)

I have just made a real breakthrough on the action of pain-killers (known as aspirin, tranquilizers, hypnotics, soporifics).

It has never been known in chemistry or medicine exactly how or why these things worked. Such compositions are derived by accidental discoveries that "such and so depresses pain."

The effects of existing compounds are not uniform in result and often have very bad side effects.

As the *reason* they worked was unknown very little advance has been made in biochemistry. If the reason they worked were known and accepted possibly chemists could develop some actual ones which had minimal side effects.

We will leave the fact that this could be the medical biochemical discovery of the century and let the Nobel Prizes continue to go to the inventors of nose drops and new ways to kill and simply ourselves use it. Biochemical tech is not up to the point at this time that it can utilize it.

Pain or discomfort of a psychosomatic nature comes from mental image pictures. These are created by the thetan or living beings and impinge or press against the body.

By actual clinical test, the actions of aspirin and other pain depressants are to:

- A. INHIBIT THE ABILITY OF THE THETAN TO CREATE MENTAL IMAGE PICTURES and also
- B. TO IMPEDE THE ELECTRICAL CONDUCTIVITY OF NERVE CHANNELS.

Both of these facts have a vital effect on processing.

If you process someone who has lately been on drugs, including aspirin, you will not be able to run out the Dianetic engram chains properly because they are not being fully created.

If you process someone immediately after taking aspirin for instance, you probably will not be able to find or assess the somatics that need to be run out to handle the condition. For the next day after taking the aspirin or drug the mental image pictures may not be fully available.

In the case of chronic drug taking, the drugs must be wholly worn off and out of the system and the engrams of drug taking must be run out in their entirety, triple or quad flow. If this is not done, auditing will be trying to handle chains that aren't being fully created by the thetan.

In the case of auditing someone who has taken drugs— aspirin, etc.— within the last few hours or two or three days, the chains of engrams definitely will be found not fully created and therefore not available.

This would all be fine except for three things:

1. Auditing under these conditions is very difficult. The TA may be high and will not come down. One gets “erasures” at TA 4.0 with an “F/N.” Auditing errors become easy to make. The bank (chains) is jammed.
2. The thetan is rendered STUPID, blank, forgetful, delusive, irresponsible. A thetan gets into a “wooden” sort of state, unfeeling, insensitive, unable and definitely not trustworthy, a menace to his fellows actually.
3. When the drugs wear off or start to wear off the ability to create starts to return and **TURNS ON SOMATICS MUCH HARDER**. One of the answers a person has for this is **MORE** drugs. To say nothing of heroin, there are, you know, aspirin addicts. The compulsion stems from a desire to get rid of the somatics and unwanted sensations again. There is also something of dramatization of the engrams already gotten from earlier drug taking. The being gets more and more wooden, requiring more and more quantity and more frequent use.

Sexually it is common for someone on drugs to be very stimulated at first. This is the “procreate before death” impulse as drugs are a poison. But after the original sexual “kicks” the stimulation of sexual sensation becomes harder and harder to achieve. The effort to achieve it becomes obsessive while it itself is less and less satisfying.

The cycle of drug restimulation of pictures (or creation in general) can be at first to increase creation and then eventually to inhibit it totally.

If one were working on this biochemically the least harmful pain depressant would be one that inhibited the creation of mental image pictures with minimal resulting “woodenness” or stupidity and which was body soluble so that it passed rapidly out of the nerves and system. There are no such biochemical preparations at this time.

These tests and experiments tend to prove that the majority of pain and discomfort does come from mental image pictures and that these are immediately created.

Erasure of a mental image picture by standard Dianetic processing removes the compulsion to create it.

Drugs chemically inhibit the creation but inhibit as well the erasure. When the drug has worn off the picture audited while it was in force can return.

The E-Meter tone arm under drugs or on a drug case can go very high—TA 4.0 TA 5.0. It can also be dropped to “dead thetan” (a false Clear read).

Auditing a person on drugs can obtain an “erasure” and “F/N” at TA 4.0. But the erasure is only apparent and must be “rehabbed” (verified or redone) when the person is off drugs.

Any habitual drug taker, applying for auditing while still on drugs is handled per New Era Dianetics Series 2 *R* **NEW ERA DIANETICS FULL PC PROGRAM OUTLINE** and New Era Dianetics Series 9*R* **DRUG HANDLING**.

A full drug handling program as the very first action would be done on the case. *(This includes Objective Processes, Sweat Out Program if LSD or Angel Dust have been taken, Hard TRs Course, Narrative R3RA running of each reading drug, medicine or alcohol, the preassessment of each reading drug, medicine or alcohol, and the prior assessment, followed by additional Objective Processes.)*

TRs and Objective processing will ease the withdrawal symptoms of the habitual drug user. (This includes alcohol.) Even though drug handling steps are in progress, do not consider the drug has worn off until 6 weeks have passed.

A person who has taken aspirin or other drugs within the past 24 hours or the past week should be given a week to “dry out” before more auditing is given.

*Auditing assists can and should be given whenever needed despite the pcs having taken drugs. The erasure of any engram chains run would then be verified after the drug has worn off. (This can be up to 6 weeks for certain drugs and medications such as anesthetics.)*

No alcohol may be consumed within 24 hours before an auditing session and where alcohol consumption has been excessive, the drying out period would be extended to several days or a week.

It is not fatal to audit over drugs. It is just difficult, the results may not be lasting and need to be verified afterwards.

Chronic drug takers who have not had drugs specifically handled may go back to drugs after auditing as they were too drugged during auditing to get rid of what was bothering them and which drove them to drugs.

With the enemies of various countries using widespread drug addiction as a defeatist mechanism, with pain-killers so easily available and so ineffective, drugs is a serious auditing problem.

It can be handled. But when aspirin, that innocent seeming pain-killer, can produce havoc in auditing if not detected, the subject needs care and knowledge.

The above data will keep the auditor clear of the pitfalls of this hazard.

To paraphrase an old quote, we used to have iron men and wooden ships. We now have a drug society and wooden citizens.

I’ve been studying this for over a year and a half and have made the breakthrough.

Drug companies would be advised to do better research.

And auditors are advised to ask any pc, “Have you been taking any drugs or aspirin ?”

The medical aspect is an understandable wish to handle pain. Doctors should press for better drugs to do this that do not have such lamentable side effects. The formula of least harmfulness is above.

IMPORTANT AND URGENT

**CASE SUPERVISION  
AUDITING AND RESULTS**

The whole “secret” of producing high case gain and total results with *New Era Dianetics* and Scientology auditing lies in the following:

*NEW ERA DIANETICS RESULTS*

When an auditor can produce exact auditing on *New Era Dianetics* you know he can audit.

*New Era Dianetics* is a very simple, precise procedure. The *major* errors are:

- (a) misassessment (inability to use a meter usually but out TRs can do it)
- (b) taking narrative *items* and running them *as somatic chains*
- (c) forcing a pc toward “earlier incident” when it required “earlier beginning” making the pc jump chains
- (d) fumbling commands
- (e) out TRs.

An auditor’s poor TRs and corny errors such as above will prevent *New Era Dianetics* results.

But the *New Era Dianetics* auditing is so simple THAT IT DEMONSTRATES CLEANLY WHETHER THE *PERSON* CAN AUDIT OR NOT.

This is not true of Scientology auditing particularly VI, VII and VIII. Here the procedure is more complex. The errors of the auditor are obscured in the possibility of a wrong C/S or a complex pc. Thus whether the auditor can audit or not, just as an auditor, is obscured.

Thus, with the auditor as a variable factor, the tech can look variable.

Therefore you can lay down this rule as truth and it will be truth until the end of time:

If a IV, V, VI, VII or VIII cannot produce invariably excellent results his basic auditing is deficient but obscured by the complexity of material.

Therefore it is vital that an auditor be a proven result-getting *New Era Dianetics* auditor before any result can be expected of him in his/her Scientology auditing.

We have now had several dark mysteries cleared up on this subject with many examples. For instance *in 1969 when Standard Dianetics was introduced* one auditor who had been thought a competent VI and had been “auditing” for years was found to be getting too many failed pcs; he was trained up as a Standard Dianetic auditor and on his first sessions it was found that he could not produce Standard Dianetic results; he was vigorously groomed on his TRs which were wildly out and always had been and made to do the very exact businesslike procedure of Standard Dianetics. He then got excellent Standard Dianetic results session after session on his pc and could be designated as a very good Dianetic auditor. He was briefly retreaded on his Scientology materials and at once could get terrific results with upper level Scientology.

From this we can state without any fear of contradiction by your future experience that:

An VIII who is not a proven . . . Dianetic auditor as well is not dependable as an auditor no matter who trained him.

The practice of loosely certifying *HNEDAs* without total proof that they get excellent uniform session results on Dianetic pcs can foul up the whole field and jeopardize the entire auditing future of the student. To certify a *New Era Dianetics auditor* who doesn't get provenly excellent . . . Dianetic results is an act of treason against all that person's future pcs and all the rest of us.

If tech is “out” in an area it will be because some of the auditors, whatever their class, are not capable of delivering simple Dianetic sessions, regardless of the level at which they are auditing. And out tech will be compounded if the Case Supervisor is not *also* an excellent *New Era Dianetics auditor* for he won't know the errors for which to look.

When you can really dig this and know it and get it in practice the bulk of out tech and “failed pcs” in an area will vanish.

I know it is sometimes hard to achieve a simplicity as simple as *New Era Dianetics* but when it is done, tech worries from there on up are over.

REVISED 3 AUGUST 1978  
RE-REVISED 4 SEPTEMBER 1978

*(Revisions in this type style)*

(This Bulletin has been revised to align with New Era Dianetics tech. The *Dianetic* Student Rescue Intensive is given in HCOB 2 July 1978 New Era Dianetics Series 11, DIANETIC STUDENT RESCUE INTENSIVE.

There are, additionally, Scientology steps to the Student Rescue Intensive, which can be done by a trained Scientology auditor. These steps are contained herein, to give you additional Student Rescue Intensive steps you can do on your pc if you are a Class III or above Scientology auditor AND a New Era Dianetics auditor.)

### STUDENT RESCUE INTENSIVE

In working with a student, a supervisor found that engrams and secondaries gather around the subject of study and developed some material on it which I tested and redeveloped.

He said:

“The subject of study has been abound with ‘authorities’ and boobytraps forever and a day, but until Ron researched this field of human endeavour and published his findings on tapes, HCOBs and Policy Letters, nobody has EVER made any progress toward the resolution of study itself as a problem.

“In this very day and age we find physical punishments of students the rule rather than the exception, and even the use of instruments like canes, sticks, shoes and such like articles in order to ‘teach’ a student (create ‘ARC’) is accepted as normal practice.

“The phenomena of secondaries and engrams resulting thereof, which inhibit study are not known about or completely ignored, and often handled by a further duress.

“And many a once bright keen young student throws in his study in despair and goes to the nearest oculist for even stronger lenses in his glasses to help his ruined eyesight.

“THE SUBJECT, THE VERY IDEA OF STUDY ITSELF HAS BECOME TRAUMATIC, IT IS AN AREA OF LOSSES AND PHYSICAL PAINS.”

The Class VIII C/S can be audited by a Class III who is also a New Era Dianetics auditor.

1. Fly a rud to F/N.
2. Do Remedy A on Dianetics or Scientology. (Omit if student has had one.)

3. Do Remedy B. (Omit if student has had one.)

(Ref: *Book of Case Remedies*  
HCOB 9 Nov 67 Review Auditor's Book of Case Remedies  
Revision of Remedy A, Remedy B and S and Ds)

4. Assess:

Being Trained	Education
Being Educated	Schools
Study	Teachers
Learning	Enforcement
Stress	Misunderstoods

5. Prepcheck best reading item.

This completes the Scientology steps of the Student Rescue Intensive.

#### DIANETIC STUDENT RESCUE INTENSIVE

6. Take the item found in 4 above and do a preassessment on it.
7. Find the running item, using standard preassessment procedure. (Ref: HCOB 18 Jun 78 New Era Dianetics Series 4 ASSESSMENT AND HOW TO GET THE ITEM.)
8. Run out the item you have found in *Step 7*, R3RA Quad (or Triple if pc is not yet Quaded).
9. Repeat the preassessment on the original item found in *Step 4* and repeat Steps 7 and 8 on that item.
10. Continue reassessing the Preassessment List on the original item and running out R3RA Quad the best reading running item until there are no further reads on the preassessment of that original item.

The intensive should be concluded when the pc is now happy about study.

#### PROMOTING STUDENT RESCUE INTENSIVES

Any org or course has on it some slow students or students who easily dope off while attempting to study, or students who become upset by study or try to blow.

A registrar should periodically obtain a list of these and see that they are sold a Student Rescue Intensive.

A Student Rescue Intensive is not run until the pc has been completed up to Action Eleven of the New Era Dianetics Full Pc Program Outline (HCOB 22 Jun 78 New Era Dianetics Series 2) as it would interrupt his program because drugs, if he has taken any, are a probable contributory cause to being unable to study. Also the Student Rescue Intensive is not a substitute for proper Word Clearing of Dianetic, Scientology and earlier courses and training. It does, however, make the latter much more effective.

**SOLO AUDITING AND R6EW**

(Cancels Base Order No. 9 which removed HDC  
as a prerequisite of R6EW Solo)

The problems of a person on Solo not knowing how to audit gives us a great deal of trouble in AOs as well as SHs.

The R6EW checksheet has been several times revised and at one time incorrectly has included all kinds of implants to study. Also, the materials to be audited have in the past erroneously been issued as part of the R6EW study pack.

In all such Solo courses the person is *not* issued what he will eventually audit on until he has completed the study pack. He then attests or is examined and having passed, he is given a review session to, mainly, fly his ruds. He is then issued the auditing materials and gets on with his Solo. Where this sequence is violated trouble occurs.

We have also had people glance at the materials to be audited, pick out something that strikes their interest and then go and attest leaving an out grade.

The troubles on Solo courses are

1. Has no real training as an auditor.
2. Is given unnecessary or unhelpful materials to study.
3. Is issued the auditing materials he will Solo audit before he attests to the study materials.
4. Wasn't ready for the grade and will use it to cure an ARC break or ingrown eyelids, these not having been handled in earlier auditing.
5. Doesn't actually audit the Solo materials but attests leaving an out grade.

The above are, by experience, a general rundown of the problems having to do with *all* Solo grades.

They begin with R6EW. When this is out they have trouble from there on.

The *essence* of this course is that one is trying to make a SOLO auditor, not a person who can audit others.

In 1969 I ordered the HDC *materials* to go on the R6EW checksheet. Someone re-interpreted this as "The Dianetics Course is a requisite for R6EW Solo" which is wild.

People enrolling on this course are going the SOLO route. There are 2 routes, called the SOLO and the PROFESSIONAL.

Solo auditors must have meter lessons and other theory so they know about mental image pictures. They must also do actual Solo sessions well BEFORE GOING NEAR THE MATERIALS OF THE GRADE.

Thus the Solo Course R6EW breaks down into these requisites:

1. The person as a case to have had all grades up to the level including Dianetics Triples, any other Scn auditing like Class VI auditors use, Scientology Triples, Acceleration and POWER. If the student hasn't got all these he'll never make it as a CASE on Solo. Thus (1) is GET GRADES DONE BELOW R6EW.
2. The Solo student must be trained on the meter, about the time track, mental image pictures and any other theory needful without
  - (a) trying to teach him a full Academy Course or
  - (b) denying him vital data needed in Solo.

He must for instance be able to fly his ruds. So (2) is GET THEORY IN AND ADEQUATELY LEARNED.

3. The student must be able to do Solo auditing drills which would begin with drills such as the E-Meter book drills done Solo. These include keeping the admin properly. So (3) is PRACTICAL SOLO DRILLS.

4. The student needs to do actual auditing Solo which help him and his case. These would include running a light lock, cleaning up an ARC break, handling a PTP, doing a clean up on overts (rather than W/Hs). Such sessions would have to go to a Supervisor, each one, for C/Sing. When he can actually handle himself Solo, he is then and only then finished with his training. IF HE STILL CAN'T SOLO AUDIT, REQUIRE A FULL HDC COURSE BE TAKEN. So (4) is PROVE HE CAN SOLO AUDIT.

5. The student is now issued his auditing materials for the grade. These MUST NOT BE INCLUDED IN THE STUDY PACK AS HE WILL SELF-AUDIT ON THEM AND NOT GET TRAINED. So (5) is ONLY ISSUE THE GRADE MATERIAL WHEN ALL STUDY IS COMPLETE.

6. When the auditing is done, or session by session as C/S is available, and the student is seen to have actually done it by folder he is permitted to attest. So (6) is DON'T PERMIT ATTESTATION WITHOUT CONFIRMATION OF ACTUAL AUDITING.

The checksheets and actions of R6EW (and any other Solo course or grade) must be in keeping with these stipulations or there will be no adequate result from Solo grades.

### GROUP ENGRAM PROCESS

A group is composed of individuals. If they have a group engram it only has force because of basics on that subject in their banks. Thus, if they are cleaned up on the general subject, the general group engram should blow off and disappear.

This, therefore, is done on every member of the group.

LISTING, NULLING and TRS MUST BE FLAWLESS.

- (1) Do the Info Sheet provided below.
- (2) Fly a rud to F/N. If TA high get it down by listing "What has been overrun?" to a BD item and rehab it to F/N.
- (3) List by laws of listing and nulling but be sure to get a BD item, which F/Ns, the question "What is the greatest overt you have ever committed on the whole track?" The list may be rather long.
- (4) Now run (despite F/N) "What ARC break occurred just before that?" Use ARCU and CDEI. Desist on this step at the first F/N cog VGIs.
- (5) Now list, "What is the most unwanted change experienced by this or another org?" By L & N to a BD item and F/N.
- (6) "What ARC break was connected with that?"
- (7) Now list the question by L & N "What purpose has failed?" This should be to a BD item. It will F/N and the pc cognite and GIs.
- (8) "What ARC break was connected with that?" ARCU CDEI to F/N VGIs.

Note to auditor—if you can't get it to F/N prepcheck it but if correct items all above lists really should F/N.

Info Sheet

Org Name \_\_\_\_\_  
Name of Member (Print) \_\_\_\_\_  
Level or Grade of case \_\_\_\_\_  
TA at Start \_\_\_\_\_ Needle behavior \_\_\_\_\_  
General attitude to auditor \_\_\_\_\_

The session should be rapid and deft. Do not however overwhelm by chopping comm. Follow "End Phenomena and F/N" data as per recent HCOB 20 February 70. This is particularly important in the "Greatest Overt" process as pc gets introverted in listing.

In doing this on group members who are being called in, it is important to inform them "This is not a Sec Check. It is a new process being run to help the org." This can be posted on the board. Do NOT tell them you are running a group engram as they will become enturbulated, self-list, etc.

Any pc who is sick a day or two afterward has had a wrong item given him or her.

On members of the group not previously audited by anyone, Tech Services for the operation should do the Info Sheet using a meter for TA and needle state and not put the person through to actual session but info the D of T to get the person audited on Dianetics.

**IMPORTANT NOTE ON GROUP  
ENGRAM INTENSIVE**

A pc who is on a specific cycle of auditing should never have it interrupted to do another cycle. This is an invariable rule. Complete an auditing cycle once begun.

Example: Pc in the middle of having flows 2 and 3 run on Dianetics, given a Group Engram Intensive before Dn Triples completed. The Group Engram Intensive tends to collide with the cycle already in progress and the TA goes high at Examiner.

There are certain basic rules that make standard tech, standard tech. One of them is complete an auditing cycle before beginning another.

Doing "whole org" auditing actions can collide with this unless it is watched.

**DOUBLE FOLDER DANGER**

When a pre-OT has a Solo and an auditing folder, both, there is a great danger if the Case Supervisor does not look at BOTH before C/Sing.

There has been an instance of a pre-OT running strange C/Ses on himself. Another ran C/Ses out of other folders on himself. In both cases the consequences were hard to repair when finally found.

In another case in the Solo folder the pre-OT had gone exterior with full perception. But the non-Solo auditing folder was being C/Sed. The TA shot up for 2 months without any C/S except myself calling for *all* folders.

Pre-OTs unfortunately run on a Solo folder and an audited folder. Unless both are to hand when C/Sing wild errors can be made by the C/S.

There *is also* the case of a person having two audited folders, being C/Sed at the same time. This is an admin error.

The firm rule is C/S ONLY WITH ALL FOLDERS TO HAND.

The embarrassing situation where one can't get a folder from another org or field auditor or where the old folder is lost has to be made up for somehow. It mustn't halt auditing totally.

RECOVERY PROGRAM: The pack of

LRH EDs	100 Int	10 May 70	Lower Grades Upgraded
	102 Int	20 May 70	The Ideal Org
	103 Int	21 May 70	Fast Flow Grades Cancelled
	104 Int	2 Jun 70	Auditing Sales and Delivery Pgm No. 1
	106 Int	3 Jun 70	What Was Wrong
	107 Int	3 Jun 70	Orders to Divisions for Immediate Compliance
	10 SH	6 Jun 70	SH Pcs
	108 Int	11 Jun 70	Auditing Mystery Solved
	101 Int	21 Jun 70	Popular Names of Developments

comprising the program to recover full use and results of EXPANDED LOWER GRADES.

PROGRESS PROGRAM:

What is called a "Repair Program" on the first issue of the C/S Series HCOB just being issued is renamed a PROGRESS PROGRAM. It has been found that case gain which has not been earlier achieved can be consolidated by a PROGRESS PROGRAM. It takes 25 hours, can be done by a Class I or above as long as it is C/Sed by an VIII who has Narrated on the new C/S Series. This is quite a technical development in itself. It is the answer to a pc who had "Quickie Grades" and didn't actually reach full abilities in earlier Scientology auditing. It is followed by an Advance Program which follows below.

ADVANCE PROGRAM:

This is what was called a "Return Program" in the C/S Series. The name is being changed from "Return" to "Advance" as more appropriate. It gets the pc really up to where he should be. It may take 50 hours or more.

EXPANDED LOWER GRADES:

Pcs won't like being told they "have to have their lower grades rerun." Actually that's not a factual statement anyway. The lower grades harmonic into the OT Levels. They can be run again with full 1950-1960 to 1970 processes as given on the SH courses all through the 1960s. These are now regrouped and sorted out and are called EXPANDED LOWER GRADES. *See also HCOB 5 April 77, Expanded Grades and*

*HCOB 22 June 78R, New Era Dianetics Series 2R, NED Full Pc Program Outline. There are no Dianetic or Scientology single or "Quickie" lower grades anymore.*

#### DIANETIC CLEAR:

*The state of C/ear can be achieved on Dianetics.*

*It is not however attained by feeding people cognitions; Clears are made through auditing.*

*The state of Dianetic C/ear means the pa has erased his Dianetic case or mental image pictures.*

*The discovery that a Dianetic C/ear must not be run on engrams, R3RA or any version of R3R, results in an expansion of the Non-Interference Zone.*

*After Dianetic C/ear, you can run Grades O-IV. You do not run the pc on the R3RA section of the new Service Fac handling, however. He can be given Touch or Contact Assists (as can Clears and OTs), but not a Dianetic Auditing Assist nor any Dianetic auditing.*

*A Dianetic C/ear is not run on Power, R6EW or the Clearing Course, but goes directly onto OT I (after doing the Solo Auditor Course).*

#### CLASSIFICATION CHART:

This chart "Classification and Gradation Chart" has been reissued many times. All issues are more or less valid. To save print, the process run column appears in "Processes Taught" on the auditor side of the chart. All these processes and more are used in Expanded Lower Grades. The chart is *valid*.

#### QUICKIE GRADES:

Persons were too demanding to be done quickly. On many cases these grades as given were valid but a large number of cases needed Expanded Lower Grades. 20 minutes from Grade 0 to IV and 5 minutes Power was far more than many could stand up to. These need a PROGRESS PGM and an ADVANCE PGM. This is true of persons at VA or R6EW or on CC or OT Levels. All these who haven't fully made it need a PROGRESS PGM and an ADVANCE PGM "to pick up all the latent gain they missed."

#### DIANETIC PCS:

Dianetic pcs should be audited on *New Era* Dianetics until no somatics, then go up through *Quad* or *Expanded* Lower Grades to Power, R6EW, Clearing Course and OT Levels.

#### TRAINING:

Any pc who has trouble needs training and the amount of time required in Expanded Lower Grades and so on makes it cheaper to be trained.

### VIII ACTIONS

(GF 40, IV Rundown, VIII Case Supervision.)

Inevitably, when any new approach or process is released, some will instantly assume that all “older” (actually more *basic*) data has been cancelled. There is no statement to that effect. It is not guessed that this will be assumed and so we *could* lose an entire subject.

We did in fact lose Dianetics for a decade and all but lost Scientology in the following ten years.

A subject can be reorganized and made more workable. That was done in 1969 for Dianetics. BUT IT HAD NEVER BEEN UNWORKABLE!

The 1969 Dianetics reorganization *refined* the 1962-63 discoveries of R-3-R. A better *communication* was made to the user and the preclear.

Amazingly, the reissue of Dianetics as Standard Dianetics caused about a dozen people (even in high places unfortunately) to at once assume that Dianetics wiped out any need for Power, Scientology clearing or anything else! Even an unauthorized Policy Letter, (not signed by me) and an HCOB (also not signed by me) gave this impression. They were of course cancelled the instant they were discovered to have been sent out.

This idea that the “old” is always cancelled by anything “new” has its root in the idea that a later order cancels earlier orders, which is true. But orders are one thing and tech basics another.

What if, in the science of physics, a book by Professor Glumph came out, omitting the three laws of motion and gravity. It is assumed then that Newton’s laws are no longer valid. Because they are *old*. (Newton lived between 1642 and 1727.) So some young student engineer is baffled because bridges have *weight* and can’t work out gravity or motion! And he and his fellows begin to build without knowing these laws and there goes the whole of engineering and the culture itself!

This is no fantasy. As a college student in upper math I was utterly baffled by “calculus.” I couldn’t find out what it was for. Then I discovered it had been developed by Sir Isaac Newton, examined the basics and got the idea. My college text omitted *all* the basic explanations and even the authorship of the subject! Calculus today is really not enough used because it isn’t understood.

Anyway, here’s the main surprise: Until 1970 the whole of Scientology was never in use in processing! Students had ridden along with the research line up into the OT sections, discarding the ladder behind them. For nearly 3 years an increasing proportion of preclears were not actually making it. The gradient to get them onto the Bridge had been neglected as “old” when in fact they were not “old” but BASIC.

The amazement of auditors (and their delight) when the HCOB on Auditors Rights (C/S Series No. 1) was released indicated that they had become “process oriented” with all the WHY gone.

## VIII AUDITING

The 1968 VIII standardization aimed actually at good TRs, auditing presence, and basics in auditor performance. VIII auditing was developed to handle the Or band.

It is entirely valid. Its only omission was detailed actions now developed as to how to handle a pc or pre-OT who had been pulled up the line and had fallen on his head.

Out grades was spotted and discussed in detail in VIII auditing.

Giving lower grades fast was the only error. It was not realized in 1968 that end phenomena of lower grades was not being required.

The re-release of the entire band of Academy and Saint Hill materials in 1970 is a re-emphasis on the *validity* and *necessity* of using it ALL on pcs! And in understanding the mind and life! And all this is quite welcome and very successful. Not noticed is that this whole band was never before presented for full *use* on *all* pcs. As I say 19501969 auditors had been riding with the “newest and latest” because it was “popular.” Only a few wise old-timers continued to use the most basic actions.

But just as VIII auditing was an unauthorized signal to suppress all that had been known before, so now, with the full release for use of Expanded Lower Grades, a few began to say that VIII auditing was now “old”!

One assumes then that some like to be able to say that something is now “old.” Has a superior sort of ring to it, I guess. Anyway we’d better disregard this tendency to retire basics. It is more amusing than otherwise. So let’s get on with the job.

## RESISTIVE CASES

The RESISTIVE CASE Rundown is an VIII development TO HANDLE THOSE WHO CANNOT MAKE THE GRADES.

It was put into the Green Form as GF 40 so as to preserve it.

To it could now be added “Overwhelmed.” This would indicate need of Repair (Progress) and Return (Advance) Programs. But many other indicators exist already.

*So when* do you use a GF 40?

Let us say the pc has been run on Grade Zero. And at the Examiner cannot or does not attest.

One would first look for simple auditing errors in recent sessions. These would get reviewed and corrected.

One would then look for lower actions than Grade Zero that had been missed.

If it still seemed hard to figure out, one would use a GF 40, Resistive Cases.

In essence, if one adds “Overwhelm” to the GF 40 list you have on it all the reasons a pc won’t advance IF he has been run on all processes up to that point.

Overwhelm would indicate need of a Repair and Return.

Grade I, Problems, is the usual ordinary reason for no case advance.

Problems shows up as an out rud in GF 40 and is simply put in as a rud not as a grade.

But if a Grade II or above has a problem??? That means Grade I is out.

GF 40 remains even more plainly as a “When all else fails.”

It is used that way.

When a pc doesn't attest, and all has been done for him otherwise, you use a GF 40.

This was its proper use in the first place.

All such materials except rapid or Quickie Grades are valid.

And (joke) these remarks on GF 40 Resistive Cases does not wipe out “Repair and Return Programs.”

#### IV RUNDOWN

The so-called IV Rundown as taught on the VIII Course is of course quite valid.

Originally developed to catch cases that had somehow gotten up to OT III and were falling on their heads, it is a collection of actions. It salvaged many cases.

The missing datum was that in recent times these cases were falsely reported to have had their lower grades. THEY, the cases themselves, said they had “had lower grades.” This made a mystery. The fact is, with multiple declare (declaring 0 to IV to the Examiner all at one time mostly without any mention of end phenomena of the grade) these cases were OUT GRADE in the extreme.

The IV Rundown was an effort to catch it all up to make a real OT.

“Out Grades” didn't read as it didn't mean anything to the pc and besides “they'd all been rehabbed a dozen times anyway.” But nobody mentioned never having attained any end phenomena and the Class Chart was never really gotten IN IN IN in the first place.

You will find many pcs have had various parts of the “IV Rundown” run earlier.

For awhile it was the fashion to use the IV Rundown or a part of it on any balky case at any level.

At OT IV (which was an audited step and none of it really confidential) the C/S simply ordered run whatever was left of it not already run.

Somewhere on the case all of the IV Rundown still should be run. But of course that would now be on a Return (Advance) Program and well up the line.

If Repair-Return doesn't get a grade made this is the time to do a IV Rundown. On (3) Valence Shifter - LX1, LX2, LX3 lists can be done in triple, recall, secondary, engram.

Earlier Practices, Former Therapy can also be triple, recall, secondary, engram.

This is on Page 28 (not 23) of the original VIII Case Supervisor Manual and part of it is also now GF 40.

If a case really needs this he won't be making a lower grade really so the GF 40 or its slightly wider OT IV Rundown can be used.

To both, “Overwhelmed by auditing” should be added in any future issue to indicate a needed repair action.

## CASE SUPERVISOR ACTIONS

HCOB 10 Dec 1968 "Case Supervisor Actions" Confidential, VIIIs only, is still valid. It remains confidential as it mentions some OT phenomena that would spin a Grade VA. However, some VIII C/S is going to be told that "Expanded Lower Grades changes all that." It doesn't.

Listen: In the next to last paragraph of the cover page of this manual (HCOB 10 Dec 68) it says:

"Standard grades are not part of this set-up AS IT IS UNDERSTOOD THAT THE AUDITOR KNOWS THESE. Directions to do standard grades are written on a blank sheet." (I have added the block letters for emphasis here.)

At the time this was written I had not discovered that lower grades were gone out of use and I let be published Triple Grades which seemed to condense all lower grades. The major process or major grade process *may not be* enough to make a pc make a lower grade. I am sorry I gave any support at all to such an idea by not examining the whole scene when it began to show up. *I did* find it and *did* correct it however when auditing statistics over the world showed the fault. (28 hours was the total weekly delivery of orgs!!)

If you add the dozens and dozens of lower grade processes as given in Expanded Lower Grades to the VIII C/S HCOB of 10 Dec 68 and included this C/S Series and its *new* development of Repair (Progress) and Return (Advance) Programs you would have the whole package of C/Sing.

So the VIII actions are *all* valid.

Auditor classes below VIII have this C/S Series. The AO C/S Course adds in the VIII actions as well.

Any C/S who does not know well *The Original Thesis, Dianetics: The Evolution of a Science, Dianetics: The Modern Science of Mental Health, Scientology 8-80 and Scientology 8-8008* will go badly astray. It is vital to know these books and others in this area, to know *what* one is trying to handle.

Class VI (SHSBC) tapes and bulletins are all valid and vital to lower grade auditing and C/Sing.

I trust this gives the C/S some idea of what is still "in."

It all is.

### UNRESOLVED PAINS

It occasionally happens that a pc's certain pain does not resolve on Dianetics.

There are two reasons for this:

#### 1. NOT ENOUGH AUDITING ON ENOUGH CHAINS.

Sooner or later the exact small piece of an engram "already run" shows up on another chain later.

Example: Pain in an area of an operation occurs now and then again weeks, months or years after the operation has been run out as an engram. Sooner or later just on general auditing the missing bit of the operation shows up, blows. Voila! Pain gone forever.

This is peculiar especially to abdominal operations like an appendectomy. The operation was run out. The scar stays puffy. The pc is occasionally ill from it. Pc's conclusion is that Dianetics hasn't worked on it. More auditing on other somatics (just general Dianetics) is given. One day the remaining bit of the operation, hidden from view, apparently erased, shows up, blows. Pc now fine.

A reason for this is "overburden" in that the incident was too charged in one place to be confronted. As the whole case is unburdened, confront comes up. The piece that was missing (and giving the pain) blows.

There is no way of forcing it. In fact it would be fatal to try.

The other reason for it is that the missing bit causing the pain is a different somatic like "a chest compression." This bit of the operation had another basic than the one run.

The answer to a persistent or recurring somatic in an injured area is always more Dianetic auditing.... *Persistent, chronic and recurring somatics are handled fully with New Era Dianetics Series tech.*

#### 2. SYMPATHETIC NERVOUS SYSTEM PAINS.

There are two sides to the body. As you learn in Touch Assists, if the right hand is injured you include also the left hand.

Body nerves conduct pain. The two sides of the body interlock. Pain gets stopped in the nerves.

If the right elbow is hurt the LEFT elbow will have echoed the pain.

Example, you find a pc with a pain in the left elbow. You try to audit a left elbow chain. It doesn't fully resolve.

If you ran injuries to the RIGHT elbow, suddenly there's a somatic going through the left elbow! It gets well.

This is the sympathetic nervous system. The right ear, injured, also gets echoes with a somatic in the left ear. You audit the right ear only. Pc comes up with a sore left ear!

You can actually direct a pc's attention to it (non-standard but a research technique) and he can find where the uninjured ear echoed the injured ear.

Where you can't fully repair a crippled left leg, don't be surprised to find it was the *right* leg that was hurt.

You audit the *left* leg somatic in vain. If you do, start auditing somatics in the OPPOSITE SIDE OF THE BODY.

## TOOTHACHE

The mystery of toothache is resolved in both 1 and 2 above, especially 2.

The pain is concentrated on the left upper molar. You audit it in vain. Toothache persists.

Look at the pc's mouth. Has the RIGHT upper molar ever been pulled or injured? Yes. That's how the *left* molar began to decay. The right upper molar was pulled. The pain (especially under the pain-killer on the right side only) backed up and stopped on the opposite side. Eventually the left upper molar, under that stress, a year or ten later, caves in and aches.

Mysterious as it wasn't injured. Mysterious as the opposite molar is long gone, doesn't hurt anymore.

When a toothache does not resolve in auditing, audit the opposite tooth on the other side. You can actually do it by count of teeth.

It's sort of auditing a no somatic.

Pc in misery with right upper molar. No pain on left side. Audit an injury he had on the left side (it will read on the meter also). Voila! The toothache that wouldn't go away eases up!

The fellow who has the exact opposite teeth pulled (upper right wisdom, upper left wisdom) is in for it as there is a constant cross-play. Makes the mouth odd and pressury. Both sides are reacting to the other side!

Dentists often note the strange pressure, "bursting feelings," a patient has when a tooth "needs pulling." This is the stress in the nerves from an injury which occurred on the opposite side!

An auditor can audit a right side tooth in vain unless he knows enough to audit THE OTHER SIDE.

For a pc with a toothache, on the *right* side, you can list for feelings on the *left* side of the mouth and get "numbness," "no feeling," etc. Audit *that* list and suddenly magically the toothache on the opposite side not being audited eases up.

*Full preassessment of the troubled area and R3RA Quad is used when the tooth trouble persists.*

As toothaches sometimes give a Dianetic auditor a failure, he should know about the sympathetic factor as above. The failure becomes a success.

***C/S Series 15R***

**GETTING THE F/N TO EXAMINER**

(High, Low TAs and Chronic Somatics)

*(Note: This Bulletin has been revised to include references to the New Era Dianetics Series tech.)*

If after an F/N session end the pc's TA goes up, as at the Examiner's in an org. the pc is afflicted with unflat engram chains.

All high TAs depend on unflat or restimulated engram chains.

TAs go high on overrun because the overrun restimulates engram chains not yet run.

Engram (or secondary or lock) chains can be keyed-out. This does not mean they stay out. In a few minutes or hours or days or years they can key back in.

A pc will also de-stimulate in from 3 to 10 days usually. This means he "settles out." Thus a pc can be overrun into new engram chains (by life or an auditor), TA goes up, 3 to 10 days later the TA comes down.

When a pc is audited to F/N VGIs and then a few minutes later has a high TA the usual reasons are:

1. Has had his comm chopped or full Dianetic or Scientology end phenomena not reached or
2. Has been run on an unreading item or subject or
3. Is overwhelmed or
4. Has a lot of engrams keying in or
5. Has been run in the past without full erasure of engrams or attaining end phenomena.
6. Lists badly done or other misauditing cause a pc to feel bad and key-in chains also.
7. A pc can be audited when too tired or too late at night.

The solution to any of these is easy—on (1) always see that the pc attains full EP, particularly on engram chains. On (2) make auditors check for read even in two-way comm subjects, list questions or Dianetic items before running them. On (3) see also (2) and get the pc a proper Progress (Repair) Program. On (4) repair or isolate pc so his PT isn't so ferocious looking (meaning Repair (Progress) Pgm him well or let him change his environment and then audit him) or (5) look into his folder to see who

audited him on so many chains when, with no real erasure or EP. (6) You use repair lists (like *L4BRA*, *L1C*, etc.) and other usual action. On (7) you make the pc get some rest and if he can't, make him go for a walk away until he is tired and *then* walk back and get some sleep.

All these really add up to keyed-in or unflat engram chains. Whether the pc can handle them depends on repair and the usual.

Of all these the past auditing without attaining EP on engram chains (whether done in Dianetics or Scientology) is a usual reason for a much audited pc to have a high TA.

The answers to any high TA that won't come down and to any pc who continually arrives at Examiner after an F/N VGI session end with his TA UP are:

- A. Faulty auditing not letting pc go to full Dn EP when running engrams.
- B. A false Auditing Report (PR type report meaning promoting instead of auditing).
- C. Too many engram chains in past restim by life or auditing.
- D. *False TA or inoperable meter.*

*It is usual to do a PICTURE AND MASSES REMEDY to find and handle restimulated engram chains which are causing the TA to be high. This is done after the pc has had a Drug Rundown as unhandled drugs can also cause a TA to be high (see HCOB 24 July 78 DIANETIC REMEDIES).*

#### CHRONIC SOMATIC

A pc who has a *chronic somatic* would get programmed like this:

- 1. Repair (Progress) Pgm *as necessary* until pc feeling better.
- 2. *Original Assessment Sheet, with its full handling per New Era Dianetics Series 2, FULL PC PROGRAM OUTLINE and New Era Dianetics Series 8, DIANETICS, BEGINNING A PC ON.*
- 3. *Continue with the New Era Dianetics Full Pc Program, taking each step to full completion.*

IF the Dianetic auditing is standard and to Dianetic EP (*erasure, F/N, cognition, postulate if not included in the cognition, VGIs*) you will see this pattern at the Examiner . . .

First few sessions

TA 4.0 or more at Exam. Doubtful GIs.

Next few

TA 3.75 and blowing down to 3.25 at Exam. GIs.

Next few

TA 3.75 BD to F/N at Exam. GIs to VGIs.

Next two or three

TA 3.5 BD to F/N at Exams. VGIs.

Finally

TA 2.5 F/N VGIs at the Examiner.

That's what you would expect to see if the auditing was standard, if the case was straightened out of past flubs in the repair step. Errors such as running unreading items or firefights caused by out TRs or false auditing reports or Dn EP not reached at session end or pc needing ruds put in at session starts would prevent this pattern from happening at the Examiner's. So if the pattern doesn't happen you know the auditing is goofy or something is out which had better be found. One pc for instance had a huge W/H of having a disease and was audited over it for 2 years = auditing over a W/H and PTP = no case gain. Silly pc. But also a very dull C/S not to alert to some outness there and find it. Another pc had a high TA and the fault was just that she never got any auditing at all! So they kept operating on her! Somebody didn't know Dianetics and auditing was for USE.

### HIGH TA AND ILLNESS

Pcs with high TAs feel ill and get ill.

No use to elaborate on that. It's just a fact and is THE fact about pcs who get ill. So maybe you see why this HCOB is important!

### LOW TA AT EXAM

Pcs with low TAs are more or less in apathy.

If it F/N VGIs at session end and is low at Exam (like 1.9) (OR if it went low in session and didn't F/N), then the pc is:

- (a) overwhelmed and needs auditing and Life Repair
- (b) can have been run on a flat or unreading item that invalidated his former win.

Example: Pc listed on an unreading list few sessions later worrying about it and coming to Exam with low TA. Repair is the answer. Low TA pcs need a Life Repair also.

*The NEW ERA DIANETICS SERIES tech, fully and correctly applied, will handle all aspects of the chronic somatic. See HCOB 22 June 78, New Era Dianetics Series 2, FULL PC PROGRAM OUTLINE.*

**SOLO ASSISTS**

It is absolutely forbidden to assign 2-way comm actions as "Solo."

Example: An out-point list, an assessment list, listing for items, 2WC on case etc.

PROGRESS AND ADVANCE ACTIONS may not be assigned by a Solo C/S to be done Solo.

A Solo auditor may not do these actions.

Dianetics R3R may not be attempted in Solo auditing.

The reasons for this are too obvious to be given stress.

I have never seen a Solo auditor do anything but louse himself up on these actions. Here and there somebody might have gotten away with it. But I have seen too many cases loused up this way to condone it as anything but squirrel Solo.

A Solo auditor can fly ruds and engage in a BPC L1 or L7 WHILE AUDITING PROPER SOLO ACTIONS, and he can of course do the standard Solo actions for the grade.

But doing L7, L1B etc. as general REPAIR actions is for the dicky birds.

There ARE NO *SOLO* REPAIR OR PROGRESS OR RETURN OR ADVANCE PROGRAMS .

***C/S Series 29R***

**CASE ACTIONS, OFF LINE**

A C/S can be plagued by off-line case actions of which he is not informed.

The existence of these can wreck his carefully laid out programs and make a case appear incomprehensible.

Thus it is up to a C/S to suspect and find these where a case isn't responding normally in auditing.

1. LIFE KNOCKING RUDS OUT FASTER THAN THEY CAN BE AUDITED IN.

Schedule sessions closer together and give very long sessions so life hasn't a chance to interfere. Can go as far as requiring person via the D of P to stay in a hotel away from the area of enturbulation or not associate until case is audited up high enough.

Shows up most drastically in Interiorization intensives where no ruds can be run unless the RD is complete. Thus Int has to be done in one session, with the 2WC IntExt the next day.

2. PC PHYSICALLY ILL BEFORE NEXT SESSION AND AUDITING OF A MAJOR ACTION BEING DONE ON A SICK PC WHO SHOULD HAVE ANOTHER C/S ENTIRELY.

Happens when delayed or late new Exam Reports don't get into folder before C/Sing it. Ginger up exam routing.

Happens when auditors are not alert to the pc's illness and audit anyway. Make auditors not audit and report at once sick pcs.

Pcs hiding general illness may show up as no case gain. Answer is to get a full medical exam.

3. SELF-AUDITING.

Detected by no lasting gain. Hi-Lo TA Assessment will show it up.

Two-way comm on when they began to self-audit (usually auditor scarcity or some introverting shock).

4. COFFEE SHOP AUDITING.

Meterless fool around, often by students, stirring up cases.

Forbid it in an area.

5. TOUCH AND CONTACT ASSISTS INTERRUPTING A GENERAL COURSE OF AUDITING, OFTEN TO NO F/N.

Make all such assists be done on a worksheet and make it mandatory to take the pc to an Examiner afterwards.

W/S and Exam Rpt then appear in folder.

The C/S can then get in the other actions (ruds, S & D, HCOB 24 July 69R) on the injured pc.

#### 6. STUDY RUNDOWNS.

An illegal and offbeat line can occur when auditing out misunderstands in study or “Management Word Rundown” or such occurs in the middle of a general auditing program.

Require that C/S okay is required.

Get such done at the START of courses and BEFORE a major auditing cycle is begun. Enforce this hard as the other answer that will be taken will be to do it at the end of the cycle and wreck major auditing program results.

#### 7. ILLEGAL PATCH-UPS.

Sometimes all through an intensive there is another auditor unknown to the C/S who 2WCs the pc or audits the pc who is complaining to him or her.

Shows up in the Hi-Lo TA Assessment.

Forbid it.

#### 8. PEOPLE TALKING ABOUT THEIR CASES.

Past life reality is often badly hurt by people who talk about being Napoleon, Caesar and God. This makes “past lives” an unreal subject by bad comparison.

Restimulative material is sometimes used to “push someone’s buttons.”

Bullbait that uses actual processes or implants should be stamped out hard.

#### 9. ADVANCED COURSE MATERIAL INSECURITY.

I have seen several cases wrecked by careless storage of Ad Course materials where lower levels could get at them.

One notable case was a suppressive who got hold of Ad Course materials and chanted them at his wife to drive her insane. She recovered eventually. He didn’t.

When a C/S gets a whiff of upper level materials on a lower level pc worksheet he should make an ethics matter of it and get it traced.

#### 10. ILLEGAL DRUG USE.

A pc who suddenly relapses onto drugs or who has a long drug history can cause a case to look very very odd. The TA flies up. The case, running okay, suddenly ceases to run.

Addicts can come off it if given full *drug handling per New Era Dianetics Series 9 DRUG HANDLING.*

RE-REVISED 21 SEPTEMBER 1978

*(Revisions in this type style)*  
*(Ellipses indicate deletions)*

### DIANETIC ERASURE

There are several corny stunts that can occur in Dianetics, any of which will add up to no erasure.

1. Trying to run an item that didn't read on being given or when being called. As the chain is not charged it will be hard if not impossible to run. *Instant F/N and BD* items are of course the very best and almost always erase very easily.
2. Starting a new session with a new item with the TA way way up. To play it safe in Dianetic auditing (it can be handled in Scientology) the Dianetic auditor who starts a session and a new action at the same time with the TA high is very foolish. It may not be high on what the auditor is now newly trying to run. The correct action is not to start the session. Just end off with no auditing done.

The pc is ill or is having trouble in life. If you were running a chain in the last session and continue it in the next, disregard the high TA. A way to get around this is get some new items from the high TA pc and take one that blows down well and you can probably bring it off. Safest is don't audit a high TA pc unless to repair an unflat chain (or to run *Interiorization RD*). This rule is variable. But you should know it is risky to audit a new item taken from an earlier list when the pc comes into session with a high TA as it may not be high on what you are about to run and so you may get no F/N and erasure. The only remedy is to get new items and choose a BD one (or to turn the pc over to a Scientology auditor to assess a Hi-Lo TA list and handle).

3. Narratives are too often just run through once or twice and abandoned. This leaves the incident still charged and affecting the pc. (A narrative item describes only one possible incident, i.e. "dropping an ironing board on my foot" = no chain.) A narrative needs to be run and run and run on that one incident. You run the *incident* narrative to erasure and only go earlier similar if it starts to grind very badly. You run the *incident* to EP.
4. Running a pc who has exteriorized in auditing on something other than an *Interiorization RD* will produce a high TA and no F/N and erasure in the session. After *Int RD* has been run anything can be run.
5. Probably the WORST blunder is failing to ask for DEF again when the pc says, "It's erased" but the TA is still high. This is really a corny error. TA 4.9.

Pc says, "It's erased! All blank now," and the auditor fails to ask DEF once more. There is a moment when the pc's NOT-IS of the picture squeezes it into invisibility. The mass of it is still there. It takes just one or two more passes through to get the BD, F/N, *postulate* and *VGIs* (*which is the erasure*). It's up to the auditor not to let the pc go without that additional DEF, *which will then bring the BD, F/N, postulate off and VGIs*.

*This error is more common than one would think.*

6. Of course, not asking for an earlier incident mentioning the same item will also cause a grind and no erasure. When the item isn't also mentioned in the command the pc can jump chains. And if the earlier beginning is not asked for at all *on basic, when there is one, or on narratives*, of course there will be no erasure.
7. Auditing a pc under protest will cause the TA to stay up and no F/N and erasure.
8. Ending off a chain or engram at the first sight of an F/N and then wondering why . . . no postulate came off.

The skilled Dianetic auditor knows these things cold and does not make these errors. Thus he gets his end of session erasure and F/N regularly and gets F/N at the Examiner as well when the case has had a few sessions.

C/Ses

HCO BULLETIN OF 5 APRIL 1971  
REISSUED 13 JANUARY 1975  
REISSUED 6 NOVEMBER 1976

*C/S Series 33RA-1*

**TRIPLE AND QUAD RERUNS**

LAW: WHEN ONE OR MORE OF THE FOUR FLOWS OF AN ITEM OR GRADE ARE LEFT UNRUN, WHEN USED IN LATER PROCESSES THE EARLIER UNRUN ONES RESTIMULATE AND MAKE MASS.

This tells you that high TAs, heavy pressures and even illness can come from bypassed flows.

**BYPASSED FLOWS**

Example: Dianetic Singles have been run on 7 items. Now the auditor begins to run new items Triple without running Triple on the already run items. The result will be 7 unrun Flow 2s and 7 unrun Flow 3s. These will restimulate and form mass and bypassed charge.

Example: Now let us say all 7 previous items have been run Triple. And the auditor now runs a new item Quadruple. This leaves 7 unrun Zero chains. These can restimulate and form mass and bypassed charge.

Example: Now let us say that Dianetics was all run Single and grades were run Triple. This will restimulate the Dn chains F2 and F3.

Example: Let us say that Dianetics and Scientology grades were all run Triple. An *Interiorization* Rundown is now run Quad. This will throw all Dianetic and Scientology unrun Flow Zeros into restimulation and give bypassed charge.

ANY LATER GRADE RUN WITH MORE FLOWS THAN USED IN EARLIER ACTIONS CAN THROW THE EARLIER UNFLAT FLOWS INTO RESTIM, PILE UP MASS GIVING HIGH TA AND BPC GIVING ARC BREAKS.

**REPAIR**

The more the condition is *repaired* by L1C, L4BR etc. etc., the *worse* the mass gets.

**SOURCE OF HIGH TA**

Thus high TAs have three principal sources:

- (1) Overruns
- (2) Auditing past exterior
- (3) Earlier unrun flows restimulated by those flows used in later actions.

There are other minor ones such as drug background, illness etc. as per Hi-Lo TA Assessment.

**REHABS**

One must NOT recklessly or continuously rehab a past major action. This causes overrun. The thetan is placed at the *end* of the incidents not yet in restimulation or run and the bank gets more solid.

**MASSY THETANS**

The whole trick of this universe is contained in thetans copying or picturing incidents and then getting stuck in the later portion of them.

“Incidents” is the keynote. A thetan is incident hungry.

This is what traps him.

For some reason he has to be at the earliest end of incidents to erase them. The later he is in incidents and the later he is on the track the more solid he is.

This also applies to the "auditing time track."

By omitting things like flows on the auditing time track, the thetan thus becomes massy.

The whole theory of the *Interiorization* Remedy is based on having gone out (later) *after* he went in (earlier). So exteriorizing can stick him. (People buy the *Int* RD to exteriorize but the remedy is only done to permit further auditing. They Ext of course when the bank is handled.)

When flows of items are bypassed and then later restimulated by auditing them, mass occurs.

#### GETTING IN ALL FLOWS

When doing additional flows on earlier items or processes one must *also* check or rehab those flows marked as run to F/N in worksheets.

This again will leave unflat flows and BPC unless it is (lone).

And if it is overdone it will raise the TA by overrun.

So if one had a case that had Single Dianetics and was later run on Triple for new items (but the Singles not done into Triple) one would have to RUN FIRST the missing unrun flow or flows if *they read* and then *check* the first Single F1 for flatness, then check other previously run flows.

The rule is run the previously unrun one or ones first if *they read* to get charge off, then verify or run the ones listed as run already.

Then one would do the same for the next item. Run the previously unrun flow or flows if *they read* and then verify or run those listed as already run to be sure they F/N.

All items, in chronological sequence, and all processes, would have to be run Quad.

IT WOULD BE A WASTE OF TIME NOW TO RUN IN ONLY TRIPLES.

Whether you have the Quad commands or not they are easy to figure out as you are only missing the Zero flow, self to self.

So all C/Ses and auditing actions are "Rehab or Run F1, F2, F3, F0 if *they read*" when getting in all flows on things run to date.

#### HIGH TA

When you are sure an *Int* RD has been done correctly and its 2WC went F/N and the TA later goes high, you check the *Int* RD. That is the most usual reason. This simple action is amazingly subject to flubs.

If the TA goes high later you can do a *C/S Series 53* or a Hi-Lo TA Assessment and handle.

If the TA is still high or low, you had better check the state of flows. Were more flows run on later actions than were run on earlier actions?

If so, your pc has felt massy, sometimes even ill.

The right action is to get in all flows from the beginning. And do it Quad. Bring *all* his auditing up to Quad.

(If his folder is not available, he has kind of had it. I know of no way, at this writing, to recover lost Dn items but will have to work something out.)

#### NOT IN TROUBLE

If the pc is not in trouble, his best bet is to get on up the grades to Expanded OT III.

## IN TROUBLE

If he is massy and is having trouble the best bet is to:

- (1) Be totally sure of his Int RD.
- (2) Check O/Rs particularly of a major grade twice or bypassed F/Ns, locate and indicate them.
- (3) FES, list the items and grades and do a Full Flow action from the beginning of his auditing, raising them all to Quadruple.

## RUNNING ZERO FLOWS

The Zero flow in Dianetics is a bit strange. It can be done by full R3R BUT it often depends on the decision the pc made and may F/N very suddenly. It is easily overrun and can be very fast.

A pc can be gotten into trouble on Zero flows if the auditor is slow and is not alert to his meter and misses the F/N and gives R3R commands after the flow has blown .

REHAB OR RUN

The auditor getting in Zero flows can also ARC Brk the pc by failing to verify if the previously run flows are flat. All the auditor wants is to see them F/N on the command. If they don't he runs them.

Sometimes when he has "run them" again he finds they are being overrun or run twice and has to rehab them by finding this out. The pc sometimes doesn't know until he actually starts to run them. Then he finds they are already run. The clue to this is a climbing TA. If the TA goes up, get off that flow and rehab it.

Example: Pc at first thinks "Pain in shoulder" F2 was never run. Starts to run it. TA goes up. Auditor must pull him off of it by finding out if it is being run twice and rehab it to F/N.

The moral in all these reruns is don't firefight, keep an L1C List and an L3RD List handy and use them.

## RESULTS

The results of straightening up the Int-Ext RD, rehabbing O/Rs and putting in ALL FLOWS on a pc are fantastic.

Getting an All Flows Rundown done correctly gives one all the latent gain the pc has been begging for.

So send to Cramming all C/Ses and auditors who flub.

Program it right.

C/S it right.

Audit it right.

**DIANETICS AND INT RD REPAIR LIST**

This list includes the most frequent Dianetic errors.

A high or low TA and a bogged case can result from failures to erase a chain of incidents.

DO NOT ATTEMPT TO REPAIR A CHAIN OR ENGRAM WITHOUT USING THIS LIST as it can have different or several errors.

REMEMBER TO CLEAR EACH WORD ON THIS LIST. IF A QUESTION READS AND THE PC SAYS HE DOESN'T UNDERSTAND IT, CLEAR IT AND REASSESS (don't explain it and take it as it read on a misunderstood not on a fact).

RUNNING PCS ON DIANETICS WITHOUT A FULL AND COMPLETE DN CS-1 INDOCTRINATION IS A FOOLISH ACTION.

TAKE ANY READ FOUND TO F/N BY FULL REPAIR OF IT PER THE INSTRUCTIONS .

1. WAS THERE AN EARLIER SIMILAR INCIDENT? \_\_\_\_\_  
Indicate it. Run the chain to full EP.
2. WAS THERE NO EARLIER SIMILAR INCIDENT? \_\_\_\_\_  
Indicate it. Determine if the chain erased or if the last incident needs to be run through again. Complete the chain to full EP by indication or by running it to full EP. Scn handling would include Date/Locate if needed.
3. WAS THERE AN EARLIER BEGINNING? \_\_\_\_\_  
Indicate it. Handle with R3RA and complete the chain to full EP.
4. WAS THERE NO EARLIER BEGINNING? \_\_\_\_\_  
Indicate it. Complete the chain to full EP R3RA DEF on last incident if unflat.
5. WAS AN F/N INDICATED TOO SOON? \_\_\_\_\_  
Indicate it. Run the last incident (or chain) to full EP.
6. DID THE AUDITOR STOP JUST BECAUSE THERE WAS AN F/N? \_\_\_\_\_  
Indicate it. Complete the chain to full EP using commands DEF on the last incident run.
7. WAS AN F/N INDICATED TOO LATE? \_\_\_\_\_  
Indicate it. *Get off the postulate made at the time of the incident.* Indicate the overrun.(Scn handling would include D/L if needed.) . . . Then, if the pc jumped to another chain, get last incident pc ran on the jumped-to chain and do an L3RF on it.
8. *WAS THE POSTULATE BYPASSED?* \_\_\_\_\_  
*Indicate. Get the postulate. Indicate that the chain was overrun. (Scn handling would include a D/L if necessary.) If pc jumped chains, handle as above.*

9. **HAS THE INCIDENT ERASED?** \_\_\_\_\_  
*Indicate. Get the postulate made at the time of the incident. Indicate the overrun. (If any difficulty, Scn handling would include a D/L.)*
10. **WAS AN F/N NOT INDICATED AT ALL?** \_\_\_\_\_  
*Indicate. Get off the postulate if not already given. Indicate the overrun. (D/L by Scn auditor if necessary.) If jumped chains, handle as in 7.*
11. **WAS THERE NO CHARGE ON THE ITEM IN THE FIRST PLACE?** \_\_\_\_\_  
*Indicate it, and that it shouldn't have been run. Scn handling would include D/L if necessary.*
12. **DID YOU JUMP CHAINS?** \_\_\_\_\_  
*Indicate it. Reorient to the original chain. Find out if it erased and get the postulate if not previously given. Indicate the overrun, or run the chain to full EP. Then locate last incident pc ran on the chain he jumped to. As this has now been restimulated but not run, do an L3RF on it. Scn handling would include D/L if necessary.*
13. **DID YOU JUMP FLOWS?** \_\_\_\_\_  
*Indicate it. Reorient to the original chain and take it to full EP using commands DEF. If necessary and the pc is still upset about the other flow, do an L3RF on it.*
14. **WERE THERE FLUBBED COMMANDS?** \_\_\_\_\_  
*Indicate it, E/S to F/N.*
15. **DID THE AUDITOR GOOF ON A SEQUENCE OF COMMANDS?** \_\_\_\_\_  
*Indicate it, E/S to F/N.*
16. **DID YOU NOT HAVE A COMMAND?** \_\_\_\_\_  
*Indicate it, E/S to F/N.*
17. **DID YOU HAVE A MISUNDERSTOOD ON THE COMMAND?** \_\_\_\_\_  
*Find it and clear it.*
18. **SHOULD THE INCIDENT BE RUN THROUGH ONE MORE TIME?** \_\_\_\_\_  
*Indicate it. R3RA DEF on the incident, run chain to full EP.*
19. **TOO LATE ON THE CHAIN?** \_\_\_\_\_  
*Indicate it. Get the earlier similar incident and complete the chain with R3RA to full EP.*
20. **WAS A CHAIN NOT COMPLETED?** \_\_\_\_\_  
*Indicate it. DEF on the incident, run chain to full EP.*
21. **INCIDENT GONE MORE SOLID?** \_\_\_\_\_  
*Indicate it. Check for earlier incident or earlier beginning and complete the chain to full EP.*
22. **WAS AN INCIDENT SKIPPED?** \_\_\_\_\_  
*Indicate it. Find out what it was, run it and complete the chain to full EP.*
23. **WAS AN INCIDENT LEFT TOO HEAVILY CHARGED?** \_\_\_\_\_  
*Indicate it. Find out what it was, run it *through again*. Complete the chain to full EP.*
24. **DID YOU SAY SOMETHING WAS ERASED JUST BECAUSE YOU WERE TIRED OF RUNNING IT?** \_\_\_\_\_  
*Indicate it. Complete the chain to full EP with R3RA DEF on the last incident run.*
25. **STOPPED RUNNING AN INCIDENT THAT WAS ERASING?** \_\_\_\_\_  
*Indicate it. DEF on the incident and erase it. Get full EP.*

26. WENT PAST BASIC ON A CHAIN?  
Indicate it. Get full EP. Then, if pc jumped to another chain, get last incident pc ran on the jumped-to chain and do an L3RF on it. Scn handling would include D/L if necessary. -----
27. WAS AN EARLIER MISRUN INCIDENT RESTIMULATED?  
Indicate it. Find out what it was and do an L3RF on it. -----
28. DID TWO OR MORE INCIDENTS GET CONFUSED?  
Indicate it, sort it out with an L3RF on it. -----
29. WAS AN IMPLANT RESTIMULATED?  
Indicate it. If no joy do an L3RF on the time of the restimulation. -----
30. WAS THE INCIDENT REALLY AN IMPLANT?  
Indicate it. If necessary do an L3RF on it. Scn handling would include D/L if needed. -----
31. WRONG ITEM?
