Indicate it was a wrong item and that all other actions connected with it were wrong. If it is from an L&N list or if any question or difficulty, turn the pc over to a Scientology auditor who is classed to do an L4BRA. -----
32. NOT YOUR ITEM?  
Indicate it, E/S to F/N. -----
33. NOT YOUR INCIDENT?  
Indicate it, E/S to F/N. L3RF if any trouble. -----
34. *DID THE PREASSESSMENT ITEM GOTTEN HAVE NO CHARGE ON IT?*  
*Indicate the item was uncharged and should not have been taken up and all items connected with it should not have been run. (Scn handling would include D/L if necessary.)* -----
35. *WAS THERE ANOTHER PREASSESSMENT ITEM THAT SHOULD HAVE READ?*  
*Get what it was and note its read as the pc gives it. Find out if the preassessment item taken up is uncharged. If so handle as above. If not, continue with the action you are on to EP and handle the new item given in its order.* -----
36. *WAS THE ORIGINAL ITEM ALREADY HANDLED?*  
*Indicate that the original item was already handled and that items connected with it should not have been run. (Son handling would include a D/L if necessary.)* -----
37. (OMIT WHEN RUNNING DRUGS)  
WAS THERE NO INTEREST IN RUNNING AN ITEM?  
Indicate it, and that it shouldn't have been run. Scn handling would include D/L if needed. -----
38. WAS THE SAME THING RUN TWICE?  
Indicate it. Spot the first erasure, indicate the overrun. Scn handling would include D/L if needed. -----
39. WAS THERE A WRONG DATE?  
Indicate it. Get the correct date and run the incident (if unflat) and chain to full EP. -----
40. WAS THERE NO DATE FOR THE INCIDENT? -----

- Indicate it. Get the date and run the incident (if unflat) and chain to full EP.
41. WAS IT A FALSE DATE? \_\_\_\_\_  
Indicate it. Get the correct date and run the incident (if unflat) and any chain to full EP.
42. WAS THERE AN INCORRECT DURATION? \_\_\_\_\_  
Indicate it. Get the correct duration and run the incident (if unflat) and any chain to full EP.
43. WAS NO DURATION FOUND FOR THE INCIDENT? \_\_\_\_\_  
Indicate it. Get the duration and run the incident (if unflat) and any chain to full EP.
44. WAS THERE A FALSE DURATION? \_\_\_\_\_  
Indicate it. Get the correct duration and run the incident (if unflat) and any chain to full EP.
45. DID YOU RESENT DURATIONS? \_\_\_\_\_  
Indicate it. E/S to F/N. Run the incident (if unflat) and any chain to full EP.
46. WAS AN EARLIER DIANETIC UPSET RESTIMULATED? \_\_\_\_\_  
Locate what it was, indicate it. Sort out with an L3RF if necessary.
47. WAS AN EARLIER ARC BREAK ON ENGRAMS RESTIMULATED ? \_\_\_\_\_  
Indicate it. Sort it out with an L3RF.
48. WAS THERE AN ARC BREAK IN THE INCIDENT? \_\_\_\_\_  
Indicate it. Run the incident, if unflat, to full EP.
49. WERE YOU PROTESTING? \_\_\_\_\_  
Indicate it, clean it up E/S to F/N.
50. DID THE AUDITOR DEMAND MORE THAN YOU COULD SEE? \_\_\_\_\_  
Indicate it, E/S to F/N. If any difficulty, turn the pc over to a Scientology auditor classed to do an L1C if necessary.
51. DID THE AUDITOR REFUSE TO ACCEPT WHAT YOU WERE SAYING? \_\_\_\_\_  
Indicate it, E/S to F/N. If any difficulty, turn the pc over to a Scientology auditor classed to do an L1C as necessary.
52. WERE YOU PREVENTED FROM RUNNING AN INCIDENT? \_\_\_\_\_  
Indicate it, E/S to F/N. Run the incident (if unflat) to full EP. If any difficulty turn the pc over to a Scientology auditor classed to do an L1C on it.
53. DID THE AUDITOR SIMPLY STOP GIVING COMMANDS? \_\_\_\_\_  
Indicate it. Complete the chain by running the last incident found DEF to full EP.
54. WAS A COGNITION INTERRUPTED? \_\_\_\_\_  
Indicate it.... Get the cognition and any postulate connected with it. (if any difficulty at this point turn pc over to a Scientology auditor for an L1C.) Continue chain if unflat, or indicate the overrun.

55. WAS THERE A POSTULATE THAT WAS NOT EXPRESSED? \_\_\_\_\_  
 Indicate it.... Get the postulate *and indicate the overrun*. (Scn handling would include L1C or D/L if needed.)
56. WERE YOU DISTRACTED WHILE RUNNING AN INCIDENT? \_\_\_\_\_  
 Indicate it, E/S to F/N. Run the incident (if unflat) and any chain to full EP. If any difficulty, turn pc over to a classed Scientology auditor for L1C.
57. WERE YOU AUDITED OVER AN ARC BREAK? \_\_\_\_\_  
 PROBLEM? \_\_\_\_\_  
 WITHHOLD? \_\_\_\_\_  
 Indicate it. If you are trained to do so, handle the out rud. If not, turn the pc over to a Scientology auditor classed to handle out ruds. Do not pull W/Hs before the engram or chain is repaired or it will mush engrams.
58. WERE YOU HELD UP BY THE AUDITOR? \_\_\_\_\_  
 Indicate it, E/S to F/N.
59. WAS AN ITEM SUPPRESSED? \_\_\_\_\_  
 Indicate it. Get the Suppress off E/S to F/N, then run the item and any chain to full EP.
60. WAS AN ITEM INVALIDATED? \_\_\_\_\_  
 Indicate it. Get the Inval off E/S to F/N, then run the item and any chain to full EP.
61. WAS AN ITEM ABANDONED? \_\_\_\_\_  
 Indicate it, get the item back and run the item and any chain to full EP.
62. WAS A CHAIN ABANDONED? \_\_\_\_\_  
 Indicate it, get the chain back and run to full EP.
63. WAS THE ITEM ORIGINALLY MISWORDED? \_\_\_\_\_  
 Indicate it. Get the correct wording and give it to him. Handle to full EP if unflat.
64. WAS THE WORDING OF THE ITEM CHANGED? \_\_\_\_\_  
 Indicate it. Get the correct wording and give it to him. Run it (if unflat) to full EP.
65. WERE YOU RUNNING AN ITEM THAT WAS DIFFERENT THAN THE ONE ASSESSED? \_\_\_\_\_  
 Indicate it. Get the item the pc was actually running, handle to full EP. Then L3RF on the item actually assessed.
66. STUCK PICTURE? \_\_\_\_\_  
 Indicate it. Do an L3RF on it. You can also unstick it by having him recall a time before it and a time after it.
67. ALL BLACK? \_\_\_\_\_  
 Spot the black field or picture. Get the correct duration. If no go, L3RF on it.
68. INVISIBLE? \_\_\_\_\_  
 Spot the invisible field or picture. L3RF on it.
69. CONSTANTLY CHANGING PICTURES? \_\_\_\_\_

Indicate there was a misassessment and a wrong item was taken off the list. Get the correct item and run it, or L3RF on that session.

- 70. WHEN YOU SAID IT WAS ERASED DID IT STILL HAVE A MASS?  
Indicate it. DEF, checking for earlier beginning, run to erasure and full EP. If necessary do an L3RF on it. -----
- 71. WAS THERE A PERSISTENT MASS?  
L3RF on it. -----
- 72. WAS THERE TROUBLE WITH A PRESSURE ITEM OR PRESSURE ON AN ITEM?  
L3RF on it. -----
- 73. DID YOU GO EXTERIOR?  
Indicate it. Handle if you are a Scientology auditor. Turn the pc over to a Scientology auditor for a full Int RD or become a classed Scientology auditor and handle. -----
- 74. WAS YOUR INT RD MESSED UP?  
Indicate it. Handle if you are a Scientology auditor. If not, turn the pc over to a Scientology auditor to get his Int RD straightened out, or get trained as a classed Scientology auditor and handle. -----
- 75. WERE YOU AUDITED OVER DRUGS, MEDICINE OR ALCOHOL?  
Indicate it. L3RF on that time, then verify all chains to ensure they erased. Note for C/S attention to verify if Objectives and all other points of full drug handling have been done. -----
- 76. WAS A PAST DEATH RESTIMULATED?  
Indicate it. If it doesn't blow run it out Narrative Secondary R3RA. -----
- 77. DID YOU ATTAIN SOME STATE AND IT WAS INVALIDATED?  
Indicate it. Return folder to C/S for handling. -----
- 78. DID YOU GO CLEAR AND NOBODY WOULD LET YOU DECLARE?  
Indicate it. Return folder to C/S for handling. -----
- 79. WAS THERE NOTHING WRONG IN THE FIRST PLACE?  
Indicate it. Continue the action you were on. -----
- 80. WAS THIS LIST UNNECESSARY?  
Indicate it. If it doesn't F/N turn the pc over to a Scientology auditor for a rehab or become a Scientology auditor to handle. -----
- 81. HAS THE REAL REASON BEEN MISSED?  
Indicate it. Locate the real reason and handle. -----
- 82. WAS SOMETHING ELSE WRONG?  
Locate what it is and sort it out. -----

HUBBARD COMMUNICATIONS OFFICE

HCO BULLETIN OF 21 APRIL 1971RC  
REVISED 25 JULY 1978

Remimeo  
All Auditors  
Class VIII  
Dn Checksheet  
Int-Ext Checksheet

*(Revisions in this type style)*

*(Ellipsis indicates deletion)*

### C/S Series 36RC

#### DIANETICS

(Applies also to Int-Ext Rundown)  
(Ref HCOB 4 Apr 71RA, C/S Series 32RA,  
and HCOB 5 Apr 71RA, C/S Series 33RA)

#### TRs

TR Zero exists so an auditor is not ducking the session but can sit there relaxed, doing his job.

TR One must be done so the pc can *hear* and understand the auditor (without blowing the pc's head off either).

TR Two must be done so that the pc gets acknowledged. This can be so corrupted that the auditor doesn't ack at all but gives the pc meter reads! Instead of acks! Or keeps saying, "I didn't understand you," etc.

TR Three basically existed so that the auditor would continue to give the pc commands and not squirrel off or pack up with total silence.

TR Four exists so that the pc's origins are accepted and not Qed and Aed with or invalidated.

And, surprise, surprise, TRs are for use in the session itself, not just a drill. They are *how* one runs a session.

*An auditor can miss by calling "F/Ns" with high or low TA. And one never feeds meter data to the pc: "That read," "That didn't read," "That blew down," just must not exist in session patter. "Thank you. That F/Ned," is as far as an auditor goes. And that's the end of the cycle and says so.*

*Erasure can be overlooked by an auditor. In Dianetics this fault is fatal.*

Auditor's Code must be in on all points and particularly invalidation. Pc says, "That's so and so." An auditor who says, "I'm sorry. You are wrong," or any other invalidation is going to wreck a pc's case. A full knowledge of the Auditor's Code and actually applying it saves endless troubles. It is an auditing TOOL, not just a nice idea.

#### REHABBING CHAINS

One rehabs a Dianetic chain that, according to a previous worksheet, erased by saying, "According to session records (flow direction) (item) erased." That's all. One does not say, "Did the chain giving others a headache erase?" One does not run it again to find out. One does not run a single command "to see if it F/Ns again." One can say, "Do you agree that the chain giving another a headache erased?" But the more you ask the pc to look for an erased chain the more messed up things will get. It isn't there. But the auditor by his action can imply it *should* be there or *might* be there. A totally wrong

approach would be “Look around your bank and see if what isn’t there any more isn’t there.”

Dianetics is NOT Scientology. A Dianetic chain is *not* a release. If you try to use Scientology rehab tech on a Dianetic chain, you have had it. It isn’t a “release” (which is a key-out). A Dianetic chain is an erasure. You can’t rehab erasures with “How many times?”, etc.

The test of this is the doing. If you try to use Scn rehab on Dianetic chains, the PC MIGHT TRY TO FIND SOMETHING. This causes him to key-in other unrun or similar items.

It is a dangerous action at best to try to handle old erased chains. The best you can do is to tell the pc what the old W/S said. If no W/S exists leave the already erased flows alone!

### FLUBBED CHAINS

Many times, a Folder Error Summary will give a flubbed chain and then fail to note it was repaired in the next session!

A C/S and auditor would have been pretty irresponsible to just go on auditing past flubbed chains.

The only safe way to handle some previous flubbed chain is to:

- (a) Verify in the folder if it was repaired.
- (b) If still unrepaired assess the L3RE on it and handle according to the L3RE.

### L3RE

Using the new L3RE (HCOB 11 Apr 71 RB) is a Dianetic action.

A Scientology auditor erroneously can try to use it as a two-way comm type of list. If a chain needed one more *DEF*, then two-way comm on it with no *DEF* is not going to complete it.

L3RE has its own directions. Questions not marked with directions are used to indicate the fact. This can amount to two-way comm as the pc chews it over. But L3RE where marked is handled by Dianetics actions. Look over the list and its directions for each question and you will see that some are given directions that are NOT 2WC.

Example: “Earlier beginning” reads. You can’t just say, “The incident had an earlier beginning,” and you can’t say, “Tell me about the earlier beginning.” The pc will go up the wall. There’ll be no *erasure*. You have to use R3M and get him to the earlier beginning and then run it and if it still doesn’t erase, get him to an earlier similar and erase that.

L3RE is a Dianetics list. It is not a Scientology list that is cleared each question to F/N by 2-way comm.

### OVERRUN

Overruns are demonstrated by a rising TA.

If as you seek to get in Full Flow Dianetics (*Ref: HCOB 7 Mar 71R Rev 25 July 78 C/S Series 28RA-1R USE OF QUADRUPLE DIANETICS. HCOB 4 Apr 71-1RA Rev 25 July 78 C/S Series 32RA-1RA USE OF QUAD DIANETICS. HCOB 5 Apr 71 Reissued 13 Jan 75 C/S Series 33R-1 TRIPLE AND QUAD RERUNS (page 380 Tech Vol VIII)*) the pc’s TA begins to average higher, overrun is occurring.

Example: While doing FFD pc's TA has been riding at 2.2 and F/Ns. After a new FFD action it begins to ride at 2.5 and F/Ns. Something is being overrun. Find it and indicate it. And cease to stir the bank up so much! The fault is going over items already run.

In doing a Full Flow Table you often find that the same or similar have been run in the past.

Sometimes you find that a previous attempt to run the item a second or third time has resulted in an ARC break, the reason for which was never detected.

The right action is to note the session date it *was first* run and just tell the pc, "Feeling surprised was run three times. On (first date it was erased) it was erased. When later run it was an overrun." This tends to blow the later charge laid in by trying to run the same item again.

It sounds so strange that erased chains can be overrun. But it is true. What happens is that pcs try to cooperate and put something there.

## FIREFIGHTS

The action of a quarrel between an auditor and a pc is called a firefight.

Restimulating earlier unrun engrams or overrunning chains upsets a pc. The best action, as soon as a pc is disturbed, is to do an L3RE fast and handle what reads the way it should be handled according to the L3RE.

The wrong way is to argue or try to go on.

The pc does NOT know what it is. He just feels awful. He tries to guess. He will ARC Brk or get sad if the auditor continues.

The correct action is an L3RE.

L1C is not of great use in a Dianetic ARC Brk. L3RE is.

If the pc remains ARC broken, try L3RE again, particularly the *whole* L3RE.

A Scientology session would be handled with some other list (L1C, L4BRA, etc.). A Dianetic session, including and especially FFD, is handled with L3RE.

You NEVER prepcheck while doing Dianetics. This mashes up the engrams.

## INTERIORIZATION

ALL these cautions apply as well to an Interiorization-Exteriorization Rundown, when restim occurs one uses an L3RE quickly.

Int-Ext RD is essentially a Dianetic, not a Scientology, action.

## SAFE ACTIONS

A fully genned-in auditor, well crammed, well drilled, well skilled, can be trusted with Dianetics, Dianetic *Quads* and an Int-Ext RD. Auditors not so handled can get pcs into serious trouble with these things.

A safe course is to use *Quads* on new, never audited before pcs.

Those begun on *Quads* use then only *Quad* flows.

## C/S RESPONSIBILITY

Any trouble a C/S is running into comes from the factors of TRs, metering, Code and incomplete or false auditors' reports.

If when I am C/Sing I ever find an auditor has omitted key session actions or has falsified a report, I order that auditor not to Cramming but a full retrain *of the Hubbard New Era Dianetics Course* right on up.

A C/S does not see these points. He can get the pc asked what the auditor is doing or did. He can get sessions monitored. This helps him fill this gap in his data.

It's what isn't in the auditor's report that is often the trouble. Auditors omit what they said, omit the firefight, omit session alter-is in their worksheets.

All this sticks the C/S's neck out for the axe of failure.

So particularly in FFD, Int-Ext and other such actions, a C/S has to act to obtain confidence in the auditor's TRs, metering, Code use and accurate worksheets.

## RISK

In FFD, Int-Ext RD and Power, experience has proven that if the auditor is not top grade, if the C/S is not alert, we put a pc at risk.

The USUAL is what keeps the pc safe.

A thorough study of his case, looking for obvious bugs (such as Int-Ext RD done twice, the case a druggie but drug engrams never run, Int done but its 2WC flubbed, to name a few serious ones), sending auditors to Cramming for the slightest flub, insisting on standard TRs USED IN SESSION, good metering, use of the Code, accurate and complete worksheets, use of standard tech, all guarantee the safety and progress of the pc.

## INTRODUCING FFD

FFD (like the Int-Ext RD) requires flawless C/Sing and auditing or the case goes wrong.

When these actions were introduced they showed up any flaws in case studying, TRs, metering, Code and worksheets.

There are two ways to handle. (a) Cancel FFD and Int-Ext as actions. Obviously that is going backwards and is impossible. (b) Begin and continue a serious, effective campaign in the org to (1) Train auditors better, (2) Cram expertly on every flub, (3) Raise quality of TRs and metering.

As you can see, my approach is to improve quality of training, cramming and delivery.

Please help me out in getting this in.

HCO BULLETIN OF 26 APRIL 1971  
Issue II

ALL AD COURSES  
Include this and HCOB  
26 Apr 71 Issue I in  
Solo Course Packs and  
on Checksheets.

**SOLO COGNITIONS**

In HCOB 26 April 1971 Issue I, the definitions and conditions in an audited session are described.

The definition of in session also applies to Solo auditing.

If the Solo auditor is so all-thumbs with his papers, meters, platens that they distract him from his own bank he is not likely to as-is or cognite.

Recently, on Flag, we have taken failed OT IIIs and put them back through a full heavy retrain on R6EW and then pushed them back up the line with good success.

When a Solo auditor is also a rabbit (runs from everything including his bank) he has no chance to overcome it if he is all thumbs with his tools.

Requiring arduous, perfect drills on Solo metering and auditing actions at R6EW level should occur *before* the pc sees any materials. He must first and foremost be a Solo auditor, familiar with his meters and papers to such a degree that they do not in any way distract him.

Only then can you add a bank to the scene.

A poor Solo auditor does not cognite as his attention is on the tools not his bank.

Where the Solo auditor fails, he has not learned his tools. The remedy is to make him learn them.

The bridge between OT II and III is sometimes a hard one. It may be that an HDC Course is vital before the pre-OT can make this bridge.

The Solo auditor who “attests” rather than confront his bank probably never learned to use his auditing tools in the first place. Then, adding the bank as something to confront results in confusion.

Cognitions in Solo auditing depend upon the ability to use the tools of auditing so well, they serve no distraction in Solo session.

HCO BULLETIN OF 9 JUNE 1971 RA  
Issue I

Remimeo

REVISED 25 NOVEMBER 1976  
RE-REVISED 28 MARCH 1977  
(*Re-Revised to correct typographical error on p. 147 in  
"High TA & ARC Brks" section. No other changes.*)  
(*Revision in this type style*)

*C/S Series 41RA*

**C/S TIPS**

LISTS

*Always C/S to correct lists first when lists are out or suspected to be out.*

Don't do ARC Brks first in a case of out lists as an out list can make an ARC break that can't be handled by ARC Brk but only an L4BR.

On a GF when lists show up or overlists you should handle that (first action in handling the GF) but also you must order an "L4BR Method 5 and handle." Method 5 is the once through for assessment.

NO READ AUDITORS

When auditors can get no reads on things you get their:

- (a) TRs checked to see if they can even be heard.
- (b) Their metering checked for meter position on auditing table, can they see meter, pc and write without shifting eyes?

And can they see pc's hands on the cans?

And was the meter turned on and charged and can an auditor work the tone arm smoothly with his thumb?

- (c) Does the auditor discount reads gotten on clearing commands? (They are the reads.)
- (d) Can the auditor read out a list and see the meter reads as a coordinated action?

CRAMMING

Send auditors to Cramming on all flubs, insist they GO to Cramming, insist Cramming calls them in and crams them and insist on a carbon copy of the fact that cramming has been done.

*All the hard work of C/Sing comes in when auditors are flubby.*

It takes weeks to make an auditor after he has had a course and it's only done by cram—cram—cram.

R-FACTORS

Never order an R-Factor that takes pc into future or past as he then won't be in session. Example: C/Ses "R-Factor we are setting you up for Dianetics." Promptly the pc is up ahead not in *this* session.

### MIXING STARTS

There are many ways to start a session. Don't mix them.

It's "2WC what do you have your attention on?"

"Fly a rud if no F/N."

"Fly all ruds."

"2WC the TA down."

"Fly a rud or GF + 40 Method 5 and handle."

It's not a mixture of frantic efforts to get a TA down.

If the auditor can't on what the C/S says THE AUDITOR ENDS OFF.

Interiorization is undone or out, there may be list errors, there may be overruns, but for sure it's a case for FOLDER STUDY, not for an auditor C/Sing in the chair.

### HIGH TA & ARC BRKS

Train your auditors NEVER TRY TO GET A TA DOWN FROM ABOVE 3.0 ON ARC BREAKS.

### LOW TA QUITTS

Some auditors see a TA sink below 2.0 and then won't continue the 2WC or process to get the TA back up.

"The TA sank so I quit" is a common auditor note.

Compare this: "The TA rose above 3.0 so I quit."

See? Doesn't make sense.

If a TA sinks below 2.0—and the auditor's TRs are good—the same action will usually bring it up to 2.0 and F/N.

Come down hard on auditors who do this.

Get their TRs checked, make them continue.

### EXAM F/Ns AFTER FLUBS

Pcs whose TAs are high in session or low in session get F/N at the exams put the finger on the auditor. They are protesting or being overwhelmed.

Always C/S "Examiner! Ask pc what auditor did in session."

Then you know it's the auditor or the case. The pc will say the auditor was okay. So it's case. But usually *when cases are puzzles* there's weird things going on with TRs.

Also the auditor may be noisy or laugh hard or is boisterous and being “interesting.”

#### C/S VIA

The C/S is handling cases on the via of an auditor.

If the auditor is *perfect* the C/S can handle the work out of the case. If the auditor is not perfect in TRs, metering, Code, reports and doing the C/S then the C/S is solving a factor unknown to him, not the pc’s case.

So, be a perfect C/S. Demand perfect auditing. Cases fly.

#### HIGHER LEVELS

A C/S who assesses a pc to higher levels to solve lower ones is really asking for a wreck.

It’s always the earlier actions that are out.

Trying to cheat a case up to Grade II when he won’t run on Grade I is like trying to run the whole Grade Chart to cure a cold.

A pc can always be solved in or below where he is.

“Oh, we’ll put him up a grade and cure his high TA” is like “He can’t pass kindergarten so we’ll enroll him in college.”

#### C/S EXPERTISE

A C/S has to know his auditing materials, HCOBs and texts MUCH better than an auditor.

If a C/S is not being successful, get a retread on VI and VIII materials.

A C/S also must be confident HE could crack the case as an auditor.

When a C/S is shaky on his materials then the world of auditing looks very unstable.

The tech is very exact, very effective. If any errors existed in it they’ve been corrected.

So the variables are the knowledge of the C/S, his discipline and demands of auditors and the actions of the auditor.

If THESE are stable then the cases that come along are easy as can be.

The successful C/S knows his materials. If he wants to be even more successful he keeps his study up.

Then he is steady and calm for he is totally certain.

IMPORTANT

**STEPS TO SPEED  
STUDENT PRODUCT FLOW**

(For Supervisors and Tech Product Officers—  
an LRH Despatch to Flag D of T)

If you consider each student who is tearing along successfully as an F/Ning student, you would check anything that slowed the F/N.

Using dope-off as the detection of misunderstandings is running at a below F/N level.

So if you consider that each student who is not 5.0 during study *has* a misunderstood WORD (not phrase or idea or concept) you could drive up velocity. Like auditing by slowed F/N instead of TA rise.

An estimation of tone level of the current students shows them at about + or 2.5. A very tight meter.

This could be remedied.

If I had this problem and a group of students at 2.5 I might approach it this way:

Put a meter on the desk. Use “I am not auditing you” so not to in-session them and start with the faster students. I would check “In your study have you encountered any word you did not fully understand?” If I got a read I’d send them to make up a list from the first P/L or tape and LOOK THEM UP and USE THEM IN SENTENCES and take the next one. Any real BIs, I’d send directly to a Word Clearing session.

I’d work on them until all their language was ironed out. Then I’d push this back to a first few days action on the new ones—when I had the old ones handled.

Now possibly this is in to some degree.

5,235 (points per week) is of course high. There are however lows that take it down. By eliminating these as slows, this average would rise.

These are not orders. They are organization steps to speed product flow—which can be done without shattering stops such as “all students to TRs.”

Quality would rise as well as speed.

RE-REVISED 20 SEPTEMBER 1978

*(Revisions in this type style)*

***C/S Series 49RB***

**ASSISTS**

There are three types of assists.

They are:

1. Contact Assist
2. Touch Assist
3. Dianetic Assist

They are quite different from each other.

They are VERY effective when properly done.

*Clears, OTs and Dianetic Clears may be run on NED for OTs, Contact Assists and Touch Assists. It is forbidden, however, to run Dianetics on anyone who is Clear or above. (Ref: HCOB 12 Sept 78 DIANETICS FORBIDDEN ON CLEARS AND OTs.)*

*A preclear with a severe injury or illness can be run on all three and SHOULD BE.*

If the handling is very soon after injury, burns do not blister, breaks heal in days, bruises vanish.

But to obtain such results it is necessary that the C/S and auditor or auditor alone know and RESPECT the assist tech. It is too often a toss-off, only one kind being done and then not to EP.

Every assist must end with an F/N (at Examiner or checked on a meter).

**CONTACT ASSIST**

Done off meter at the physical mest universe location of the injury. EP—pain gone. Cog. F/N.

See BTB 9 Oct 67R, ASSISTS FOR INJURIES.

**DIANETIC ASSIST**

Done in session on the meter. EP pain gone. Cog. F/N.

#### TOUCH ASSIST

Done off the meter by an auditor on the pc's body. EP pain gone. Cog. F/N.

See HCOBs:

2 Apr 69 RADIANETIC ASSISTS  
23 Jul 73RA ASSISTS  
and:  
BTB 7 Apr 72R TOUCH ASSISTS, CORRECT ONES  
BTB 9 Oct 67R ASSISTS FOR INJURIES

#### UNCONSCIOUS PC

An unconscious pc can be audited off a meter by taking his hand and having him touch nearby things like pillow, floor, etc. or body without hurting an injured part.

A person in a coma for months can be brought around by doing this daily.

One tells them a hand signal like, "Press my hand twice for 'Yes,' once for 'No,'" and can get through to them, asking questions and getting "Yes" and "No" hand responses. They usually respond with this, if faintly, even while unconscious.

When one has the person conscious again one can do the assists.

FIRST AID RULES APPLY TO INJURED PERSONS.

IN MAKING THEM TOUCH SOMETHING THAT WAS MOVING, STOP IT FIRST.

IN MAKING THEM TOUCH THINGS THAT WERE HOT, COOL THEM FIRST.

WHEN POSSIBLE MAKE THEM HOLD THE THINGS THEY WERE HOLDING, IF ANY, WHILE DOING A CONTACT ASSIST.

IF AFTER A TOUCH OR CONTACT ASSIST THEY DON'T F/N WHEN TAKEN TO OR GIVEN AN EXAM, CHECK FOR O/R AND IF NO F/N TAKE THEM AWAY AND COMPLETE THE ASSIST.

DIANETIC ASSISTS CAN BE RUN QUAD.

This is important tech. It saves pain and lives. Know it and use it.

**OUT OF VALENCE**

(OCA Graph)

*Note: This Bulletin has been revised to include the reference on  
NEW ERA DIANETICS SERIES tech regarding valence handling.*

On OCA graphs (the plotted test score of a pc) you find sometimes a case that read high on the graph will drop and read lower after auditing.

This is caused by the fact that the person was OUT OF VALENCE in the first place. Social machinery was what the first registered. Now after auditing the graph expresses something closer to the actual being even though it dropped.

We have known about this since '57 or '58 but I do not think it was fully written up. Further, we now know MORE about it.

If you look into suppressive person tech you will find an SP *has* to be out of valence to be SP. He does not know that he is because he is himself in a non-self valence. He is "somebody else" and is denying that he himself exists, which is to say denying himself as a self.

Now this doesn't mean all persons whose graphs dropped were active SPs. But it *does* mean they weren't being themselves.

After some auditing they became themselves somewhat and this self isn't the social cheery self the first graph said.

But the dropped graph is nearer truth.

Now, how to get the graph UP again?

The person with the dropped graph is closer to being himself but is not yet fully restored, not yet fully into his "own valence."

While Class XI would handle this a bit differently, Class VIII Rundown already has an answer. The Class VIII out of valence lists LX1, LX2 and LX3 and the recall, secondary and engram *Quad* for each assessed item from these lists is a way to handle.

*Additionally we now have a NEW ERA DIANETICS process specifically designed to getting a pc into valence. Ref: HCOB 20 June 1978, New Era Dianetics Series 15, IDENTITY RUNDOWN. It is not done out of sequence in the Dianetic Rundown as a hit and miss patch-up.*

Completing any cycle the pc is on is of course fundamental....

The fact is that the pc is emerging more and more and becoming himself and then he himself begins to gain.

The graph that dives will come back up if general processing is done.

The pc will keep saying he is "more there." And it is true.

(Revises and replaces HCOB  
15 Mar 71 of same title.)  
(Revisions in this type style)  
(Ellipsis indicates deletion)

### ASSISTS

For a pc being run on a Touch Assist for handling something around the head (for example: teeth), go further even to the toes as the area extends through the nerve channel to the whole body. Right—left and also whole body. A head somatic also sticks in the spine.

### ASSIST EP

All assists are run to cognition and should F/N VGI at the Examiner.

### INJURY RUNDOWN

On an injury, after the *Contact Assist*, a *Touch Assist* and then an *LIC on the injured member* could be done.... Dianetic actions would follow as necessary. *This would include handling the injury fully as a narrative item and then fully handling all somatics connected with it, per New Era Dianetics Series tech. (Ref: HCOB 28 July 71R Revised 25 June 78 New Era Dianetics Series 8, DIANETICS, BEGINNING A PC ON, HCOB 18 June 78 New Era Dianetics Series 4, ASSESSMENT AND HOW TO GET THE ITEM and HCOB 11 July 73RA Revised 15 July 78, ASSIST SUMMARY.)*

### PC RUNNING A TEMPERATURE

#### COMMANDS CORRECTED FROM EARLIER ISSUE

A persistent temperature can be brought down by running the pc on Objective “Hold it still.”

This *can* be run on a two command basis.

### VERSION A

For a pc running a temperature too ill for regular auditing, he should be given antibiotics and an assist type boost, not a major action like Dianetics.

This version would be run if the pc *is far* too ill to get up. The pc is run on a meter to cog F/N VGIs.

1. 2 command Repetitive Process alternate commands:
  - a. Look around here and find something.
  - b. Hold it still (until pc can or feels he can).

Then (a) again.

Then (b) again, etc.

This will drop a fever.

2. 2WC How do you feel? Have you felt like this before? Earlier similar to F/N VGIs.

VERSION A is NOT very lasting. It is for very ill pcs and very high temperatures.

#### VERSION B

This is true Objective “Hold it still” and is very lasting.

It is done on a pc who can, even with effort, walk around a room.

It is done OFF the meter to cog, GIs. The pc then should at once be put on the meter and will be found to have an F/N. If no F/N on the meter the process is either (a) unflat or (b) overrun. If unflat it is continued, flattened off the meter and the same meter test follows. If overrun the release point is rehabbed.

VERSION B commands are:

- (a) Look around here and find something.
- (b) Walk over to it.
- (c) With your hands, hold it still.

The three commands are given in (a) (b) (c) sequence one after the other, the pc executing each command and being acknowledged until the pc has a cognition and GIs. He is then checked on the meter.

A thermometer can be used to check temperature after the meter check for F/N. The temperature will be found to have subsided.

Both A and B versions can be used on the same pc.

Let us say on Monday, A Version is used. Then on Tuesday if temperature has gone back up but pc is better B Version is then used.

The temperature process is most effective on a low order persistent fever that goes on and on for days and even weeks. In such cases Version B would be used and the temperature would come down and stay down very nicely.

*C/S Series 54RA*

*New Era Dianetics Series 8R*

## DIANETICS, BEGINNING A PC ON

Make Dianetics work fully in our modern culture.

DO NOT BEGIN DIANETICS WITH A HEALTH FORM ANY LONGER.

BEGIN DIANETICS WITH THE *ORIGINAL ASSESSMENT SHEET* HCOB 24 JUNE 1978R. THIS IS VITAL.

### DRUGS OR ALCOHOL

IF YOU GET ANY TA ACTION OR READS ON DRUGS OR ALCOHOL EVEN IF THE PC SAYS "NO" IT IS THE FIRST DIANETIC ACTION TO HANDLE THESE AS COVERED ON HCOB 15 JULY BRA, III, NEW ERA DIANETICS SERIES 9R, DRUG HANDLING.

If the pc is currently on drugs, *it may be necessary to put him through Objective Processes and a Hard TRs Course to get him off drugs. Doing this will avoid the painful withdrawal symptoms particularly present in coming off heroin or psychiatric drugs. The usual sequence of Drug Rundown steps is given in HCOB 22 Jun 78R New Era Dianetics Series 2R Full Pa Program Outline and HCOB 15 Jul BRA, Issue III, New Era Dianetics Series 9R Drug Handling.*

The pc in many cases won't be able to run any engrams at all unless you run out drugs, alcohol or medicines first. They will run these and these alone until the engrams are gone.

People who "can't run engrams" are usually drug cases.

### MEDICINE

If Medicine Part E of the Original Assessment Sheet reads then handle it per C/S Series 48RB, as it reacts like any other drug, but pcs sometimes don't think of medicine as drugs. They are.

### LOSSES AND DEATHS

If Losses (of position, possessions, pets, etc.) reads or if Deaths of relatives, etc. read on Parts F and G check for interest and run them out Narrative Secondaries R3RA Quad.

### UPSETS

If Upsets read and the pc is interested in running it out, handle it with R3RA Narrative Quad. They can also be handled with regular preassessment, etc., as in New Era Dianetics Series 4R.

### DANGERS

If Part I reads and the pc is interested run the Danger out R3RA Narrative Quad. They can also be handled with regular preassessment, etc., as in New Era Dianetics Series 4R.

### ILLNESSES, ACCIDENTS, OPERATIONS

Parts J, K, L, M, N are handled if reading by checking interest with the pc and running out the illness, operation, accident or undesired physical condition R3RA Quad Narrative.

Preassess these items if needed to take to a full and complete handling with R3RA Quad.

#### FAMILY INSANITY

If Section P reads, run the loss out R3RA Secondaries Quad. This can be preassessed if needed.

#### PERCEPTION DIFFICULTIES

Lack of perception (sight, hearing, etc.) comes from overts and improves when Flow 2 is done on any R3RA chain.

Having found the complaint regarding perception (which can include lack of feeling, lack of emotion) you would treat it as an original item and would preassess the condition and then handle it with R3RA Quad, like any other original item. See New Era Dianetics Series 4R on handling original items.

#### COMPULSIONS, REPRESSIONS, FEARS

If any compulsions, repressions or fears read in Part AA treat them as original items just as given in New Era Dianetics Series 4R.

#### PREVIOUS DIANETIC OR SCIENTOLOGY PROCESSING

If the pc has charge on his previous processing, the auditing can be run out R3RA Narrative Quad, first checking interest with the pc. Earlier beginning and earlier similar are used.

#### LOOK ON YOURSELF AS SOMEONE ELSE

If Section FF reads, the pc should be given the Identity Rundown when he reaches the correct step on his New Era Dianetics program.

#### FORMER PRACTICE

If Section GG reads, Former Practices, treat any former practice as an original item and handle per New Era Dianetics Series 4R.

#### PROBLEMS YOU'RE TRYING TO SOLVE WITH PROCESSING

If this section reads and the pc is interested, treat the problem as an original item per New Era Dianetics Series 4R.

#### DONE SOMETHING HARMFUL TO DIANETICS, DIANETICISTS, SCIENTOLOGY, SCIENTOLOGISTS, ORGANIZATIONS

If this reads, check interest and treat it as an original item per New Era Dianetics Series 4R.

#### REPAIR

REPAIR BY L3RF ANY FLUBBED DIANETIC SESSION OR CHAIN WITHIN 24 HOURS. Do not let it go unrepaired.

HCO BULLETIN OF 16 AUGUST 1971R

Issue II

REVISED 5 JULY 1978

Remimeo  
Courses  
Checksheets

*(Revisions in this type style)*

**TRAINING DRILLS REMODERNIZED**

(Revises 17 APRIL 1961.

This HCOB cancels the following:

Original HCOB 17 April 1961 TRAINING DRILLS MODERNIZED  
Revised HCOB 5 Jan 71 TRAINING DRILLS MODERNIZED  
Revised HCOB 21 June 71 TRAINING DRILLS MODERNIZED Issue III  
HCOB 25 May 71 THE TR COURSE

This HCOB is to replace all other issues  
of TRs 0-4 in all packs and checksheets.)

Due to the following factors, I have modernized TRs 0 to 4.

1. The auditing skill of any student remains only as good as he can do his TRs.
2. Flubs in TRs are the basis of all confusion in subsequent efforts to audit.
3. If the TRs are not well learned early in Scientology training courses, THE BALANCE OF THE COURSE WILL FAIL AND SUPERVISORS AT UPPER LEVELS WILL BE TEACHING NOT THEIR SUBJECTS BUT TRs.
4. Almost all confusions on meter, Model Sessions and Scientology or Dianetic processes stem directly from inability to do the TRs.
5. A student who has not mastered his TRs will not master anything further.
6. Scientology or Dianetic processes will not function in the presence of bad TRs. The preclear is already being overwhelmed by process velocity and cannot bear up to TR flubs without ARC breaks.

Academies were tough on TRs up to 1958 and have since tended to soften. Comm Courses are not a tea party.

These TRs given here should be put in use at once in all auditor training, in Academy and HGC and in the future should never be relaxed.

Public courses on TRs are NOT “softened” because they are for the public. Absolutely no standards are lowered. THE PUBLIC ARE GIVEN REAL TRs— ROUGH, TOUGH AND HARD. To do otherwise is to lose 90% of the results. There is nothing pale and patty-cake about TRs.

THIS HCOB MEANS WHAT IT SAYS. IT DOES NOT MEAN SOMETHING ELSE. IT DOES NOT IMPLY ANOTHER MEANING. IT IS NOT OPEN TO INTERPRETATION FROM ANOTHER SOURCE.

THESE TRs ARE DONE EXACTLY PER THIS HCOB WITHOUT ADDED ACTIONS OR CHANGE.

**NUMBER: OT TR 0 1971**

*NAME:* Operating Thetan Confronting.

*COMMANDS:* None.

*POSITION:* Student and coach sit facing each other with eyes closed, a comfortable distance apart—about three feet.

*PURPOSE:* To train student to be there comfortably and confront another person. The idea is to get the student able to BE there comfortably in a position three feet in front of another person, to BE there and not do anything else but BE there.

*TRAINING STRESS:* Student and coach sit facing each other with eyes closed. There is no conversation. This is a silent drill. There is *NO* twitching, moving, confronting with a body part, “system” or vias used to confront or anything else added to BE there. One will usually see blackness or an area of the room when one’s eyes are closed. BE THERE, COMFORTABLY AND CONFRONT.

When a student can BE there comfortably and confront and has reached a *major stable win*. the drill is passed.

*HISTORY:* Developed by L. Ron Hubbard in June 71 to give an additional gradient to confronting and eliminate students confronting with their eyes, blinking, etc. Revised by L. Ron Hubbard in August 1971 after research discoveries on TRs.

### **NUMBER: TR 0 CONFRONTING REVISED 1961**

*NAME:* Confronting Preclear.

*COMMANDS:* None.

*POSITION:* Student and coach sit facing each other a comfortable distance apart— about three feet.

*PURPOSE:* To train student to confront a preclear with auditing only or with nothing. The whole idea is to get the student able to be there comfortably in a position three feet in front of a preclear. to BE there and not do anything else but BE there.

*TRAINING STRESS:* Have student and coach sit facing each other, neither making any conversation or effort to be interesting. Have them sit and look at each other and say and do nothing for some hours. Student must not speak, blink, fidget, giggle or be embarrassed or anaten. It will be found the student tends to confront WITH a body part, rather than just confront, or to use a system of confronting rather than just BE there. The drill is misnamed if confronting means to DO something to the pc. The whole action is to accustom an auditor to BEING THERE three feet in front of a preclear without apologizing or moving or being startled or embarrassed or defending self. Confronting with a body part can cause somatics in that body part being used to confront. The solution is just to confront and BE there. Student passes when he can just BE there and confront and he has reached a *major stable win*.

*HISTORY:* Developed by L. Ron Hubbard in Washington in March 1957 to train students to confront preclears in the absence of social tricks or conversation and to overcome obsessive compulsions to be “interesting.” Revised by L. Ron Hubbard April 1961 on finding that SOP Goals required for its success a much higher level of technical skill than earlier processes. Revised by L. Ron Hubbard in August 1971 after research discoveries on TRs.

### **NUMBER: TR 0 BULLBAIT REVISED 1961**

*NAME:* Confronting Bullbaited.

*COMMANDS:* Coach: “Start” “That’s it” “Flunk . “

*POSITION:* Student and coach sit facing each other a comfortable distance apart— about three feet.

*PURPOSE:* To train student to confront a preclear with auditing or with nothing. The whole idea is to get the student able to BE there comfortably in a position three feet in front of the preclear without being thrown off, distracted or reacting in any way to what the preclear says or does.

*TRAINING STRESS:* After the student has passed TR 0 and he can just BE there comfortably, “Bullbaiting” can begin. Anything added to BEING THERE is sharply flunked by the coach. Twitches, blinks, sighs, fidgets, anything except just being there is promptly flunked, with the reason why.

*PATTER:* Student coughs. Coach: “Flunk! You coughed. Start.” This is the whole of the coach’s patter as a coach.

*PATTER AS A CONFRONTED SUBJECT:* The coach may say anything or do anything except leave the chair. The student’s “buttons” can be found and tromped on hard. Any words not coaching words may receive *no* response from the student. If the student responds, the coach is instantly a coach (see patter above). Student passes when he can BE there comfortably without being thrown off or distracted or react in any way to anything the coach says or does and has reached a *major stable win*.

*HISTORY:* Developed by L. Ron Hubbard in Washington in March 1957 to train students to confront preclears in the absence of social tricks or conversation and to overcome obsessive compulsions to be “interesting.” Revised by L. Ron Hubbard April 1961 on finding that SOP Goals required for its success a much higher level of technical skill than earlier processes. Revised by L. Ron Hubbard in August 1971 after research discoveries on TRs.

### **NUMBER: TR 1 REVISED 1961**

*NAME:* Dear Alice.

*PURPOSE:* To train the student to deliver a command newly and in a new unit of time to a preclear without flinching or trying to overwhelm or using a via.

*COMMANDS:* A phrase (with the “he said’s” omitted) is picked out of the book *Alice in Wonderland* and read to the coach. It is repeated until the coach is satisfied it arrived where he is.

*POSITION:* Student and coach are seated facing each other a comfortable distance apart.

*TRAINING STRESS:* The command goes from the book to the student and, as his own, to the coach. It must not go from book to coach. It must sound natural not artificial. Diction and elocution have no part in it. Loudness may have.

The coach must have received the command (or question) clearly and have understood it before he says “Good.”

*PATTER:* The coach says “Start,” says “Good” without a new start if the command is received or says “Flunk” if the command is not received. “Start” is not used again. “That’s it” is used to terminate for a discussion or to end the activity. If session is terminated for a discussion, coach must say “Start” again before it resumes.

This drill is passed only when the student can put across a command naturally, without strain or artificiality or elocutionary bobs and gestures, and when the student can do it easily and relaxedly.

*HISTORY:* Developed by L. Ron Hubbard in London, April 1956, to teach the communication formula to new students. Revised by L. Ron Hubbard 1961 to increase auditing ability.

### **NUMBER: TR 2 REVISED 1978**

*NAME:* Acknowledgements.

*PURPOSE:* To teach the student that an acknowledgement is a method of controlling preclear communication and that an acknowledgement is a full stop. *The student must UNDERSTAND and APPROPRIATELY acknowledge the comm and in such a way that it does not continue the comm.*

*COMMANDS:* The coach reads lines from *Alice in Wonderland* omitting the “he said’s” and the student thoroughly acknowledges them. *The student says “Good,” “Fine,” “Okay,” “I heard that,” ANYTHING only so long as it is appropriate to the pc’s comm—*

*in such a way as actually to convince the person who is sitting there as the preclear that he has heard it. The coach repeats any line he feels was not truly acknowledged.*

**POSITION:** Student and coach are seated facing each other at a comfortable distance apart.

**TRAINING STRESS:** Teach student to acknowledge exactly what was said so preclear knows it was heard. Ask student from time to time what *was* said. Curb over and under acknowledgement. Let student do anything at first to get acknowledgement across, then even him out. Teach him that an acknowledgement is a stop, not beginning of a new cycle of communication or an encouragement to the preclear to go on *and that an acknowledgement must be appropriate for the pays comm. The student must be broken of the habit of robotically using "Good," "Thank you" as the only acks.*

To teach further that one can fail to get an acknowledgement across or can fail to stop a pc with an acknowledgement or can take a pc's head off with an acknowledgement.

**PATTER:** The coach says "Start," reads a line and says "Flunk" every time the coach feels there has been an improper acknowledgement. The coach repeats the same line each time the coach says "Flunk." "That's it" may be used to terminate for discussion or terminate the session. "Start" must be used to begin a new coaching after a "That's it."

**HISTORY:** Developed by L. Ron Hubbard in London in April 1956 to teach new students that an acknowledgement ends a communication cycle and a period of time, that a new command begins a new period of time. Revised 1961 *and again in 1978* by L. Ron Hubbard.

### **NUMBER: TR2 1/2 1978**

**NAME:** *Half Acks.*

**PURPOSE:** *To teach the student that a half acknowledgement is a method of encouraging a pc to communicate.*

**COMMANDS:** *The coach reads lines from "Alice in Wonderland" omitting "he saids" and the student half asks the coach. The coach repeats any line he feels was not half asked.*

**POSITION:** *The student and coach are seated facing each other at a comfortable distance apart.*

**TRAINING STRESS:** *Teach student that a half acknowledgement is an encouragement to the pa to CONTINUE talking. Curb over-acknowledgement that stops a pc from talking. Teach him further that a half ask is a way of keeping a pc talking by giving the pc the feeling that he is being heard.*

**PATTER:** *The coach says "Start," reads a line and says "Flunk" every time the coach feels there has been an improper half ask. The coach repeats the same line each time the coach says "Flunk." "That's it" may be used to terminate for discussion or terminate the session. If the session is terminated for discussion, the coach must say "Start" again before it resumes.*

**HISTORY:** *Developed by L. Ron Hubbard in July 1978 to train auditors in how to get a pa to continue talking as in R3RA.*

### **NUMBER: TR 3 REVISED 1961**

**NAME:** Duplicative Question.

**PURPOSE:** To teach a student to duplicate without variation an auditing question, each time newly, in its own unit of time, not as a blur with other questions, and to acknowledge it. To teach that one never asks a second question until he has received an answer to the one asked.

**COMMANDS:** "Do fish swim?" or "Do birds fly?"

*POSITION:* Student and coach seated a comfortable distance apart.

*TRAINING STRESS:* One question and student acknowledgement of its answer in one unit of time which is then finished. To keep student from straying into variations of command. Even though the same question is asked, it is asked as though it had never occurred to anyone before.

The student must learn to give a command and receive an answer and to acknowledge it in one unit of time.

The student is flunked if he or she fails to get an answer to the question asked, if he or she fails to repeat the exact questions, if he or she Q and As with excursions taken by the coach.

*PATTER:* The coach uses “Start” and “That’s it,” as in earlier TRs. The coach is not bound after starting to answer the student’s question but may comm lag or give a commenting type answer to throw the student off. Often the coach should answer. Somewhat less often the coach attempts to pull the student into a Q and A or upset the student. Example:

Student: “Do fish swim?”  
Coach: “Yes”  
Student: “Good”  
Student: “Do fish swim?”  
Coach: “Aren’t you hungry?”  
Student: “Yes”  
Coach: “Flunk.”

When the question is not answered, the student must say, gently, “I’ll repeat the auditing question,” and do so until he gets an answer. Anything except commands, acknowledgement and as needed, the repeat statement is flunked. Unnecessary use of the repeat statement is flunked. A poor command is flunked. A poor acknowledgement is flunked. A Q and A is flunked (as in example). Student misemotion or confusion is flunked. Student failure to utter the next command without a long comm lag is flunked. A choppy or premature acknowledgement is flunked. Lack of an acknowledgement (or with a distinct comm lag) is flunked. Any words from the coach except an answer to the question, “Start,” “Flunk,” “Good” or “That’s it” should have no influence on the student except to get him to give a repeat statement and the command again. By repeat statement is meant, “I’ll repeat the auditing command.”

“Start,” “Flunk,” “Good” and “That’s it” may not be used to fluster or trap the student. Any other statement under the sun may be. The coach may try to leave his chair in this TR. If he succeeds it is a flunk. The coach should not use introverted statements such as “I just had a cognition.” ‘Coach divertive’ statements should all concern the student, and should be designed to throw the student off and cause the student to lose session control or track of what the student is doing. The student’s job is to keep a session going in spite of anything, using only command, the repeat statement or the acknowledgement. The student may use his or her hands to prevent a ‘blow’ (leaving) of the coach. If the student does anything else than the above, it is a flunk and the coach must say so.

*HISTORY:* Developed by L. Ron Hubbard in London in April 1956, to overcome variations and sudden changes in sessions. Revised 1961 by L. Ron Hubbard. The old TR has a comm bridge as part of its training but this is now part of and is taught in Model Session and is no longer needed at this level. Auditors have been frail in getting their questions answered. This TR was redesigned to improve that frailty.

#### **NUMBER: TR 4 REVISED 1961**

*NAME:* Preclear Originations.

*PURPOSE:* To teach the student not to be tongue-tied or startled or thrown off session by originations of preclear and to maintain ARC with preclear throughout an origination.

*COMMANDS:* The student runs “Do fish swim?” or “Do birds fly?” on coach. Coach answers but now and then makes startling comments from a prepared list given by supervisor. Student must handle originations to satisfaction of coach.

*POSITION:* Student and coach sit facing each other at a comfortable distance apart.

*TRAINING STRESS:* The student is taught to hear origination and do three things. 1. Understand it; 2. Acknowledge it; and 3. Return preclear to session. If the coach feels abruptness or too much time consumed or lack of comprehension, he corrects the student into better handling.

*PATTER:* All originations concern the coach, his ideas, reactions or difficulties, none concern the auditor. Otherwise the patter is the same as in earlier TRs. The student's patter is governed by: 1. Clarifying and understanding the origin. 2. Acknowledging the origin. 3. Giving the repeat statement "I'll repeat the auditing command," and then giving it. Anything else is a flunk.

The auditor must be taught to prevent ARC breaks and differentiate between a vital problem that concerns the pc and a mere effort to blow session. (TR 3 Revised.) Flunks are given if the student does more than 1. Understand; 2. Acknowledge; 3. Return pc to session.

Coach may throw in remarks personal to student as on TR 3. Student's failure to differentiate between these (by trying to handle them) and coach's remarks about self as "pc" is a flunk.

Student's failure to persist is always a flunk in any TR but here more so. Coach should not always read from list to originate, and not always look at student when about to comment. By originate is meant a statement or remark referring to the state of the coach or fancied case. By comment is meant a statement or remark aimed only at student or room. Originations are handled, comments are disregarded by the student.

*HISTORY:* Developed by L. Ron Hubbard in London in April 1956, to teach auditors to stay in session when preclear dives out. Revised by L. Ron Hubbard in 1961 to teach an auditor more about handling origins and preventing ARC breaks.

As TR 5 is also part of the CCHs it can be disregarded in the Comm Course TRs despite its appearance on earlier lists for students and staff auditors.

#### TRAINING NOTE

It is better to go through these TRs several times getting tougher each time than to hang on one TR forever or to be so tough at start student goes into a decline.

HCO BULLETIN OF 8 SEPTEMBER 1971R  
REVISED 20 MAY 1975

Class VIII Only  
Class VIII C/Ses  
Class VIII Auditors  
Class VIII Checksheets  
HSST Course

*(Note: This is a revised issue for Class VIII  
& HSST Courses. The Power and Upper Level  
C/Ses will be issued as additions for Class  
VII & Solo C/S Courses.)*

**CASE SUPERVISOR ACTIONS**

*This is the revised issue of the Class VIII HCOB Case Supervisor Actions. Several C/Ses have been brought up to date from the original C/S Booklet of 10 Dec 68.*

The following are basic Case Supervisor actions.

It is to be noted Symptoms are double lettered (AA, BB) and the Directions to Auditors are numbered (1, 2, 3). When more than one Direction applies to a Symptom, a letter is added (1A, 1B).

In the future if a related Symptom is added, it will go to a triple letter for the same Class (BBB, JJJ).

In the future, for a triple letter, a Direction will be numbered as hundreds, (BBB 200, BBB 200 A).

Thus we have a system which can expand and be refined which can be charted and *boxed*.

A chart can be drawn up of Symptoms. This chart gives the numbers for Directions. To save himself from writing, the Case Supervisor can get the slips run off separately in quantity.

These slips can be packaged in envelopes. Or go into a covered wooden box with 80/100 pigeon holes. The door closes over the holes, the chart is on the inside of the door, the whole thing can be padlocked. The pattern is that of a flag locker in which signal flags are kept. Each pigeon hole is numbered.

The C/S then simply looks on his chart, deals out of the C/S locker a number of slips, staples them, puts on auditor and pc, uses a time/date stamp and he is very much in business.

The C/S does not issue the Symptoms in folders. Only the directions.

His comments to the auditor can be made on a blank sheet stapled in front of the separate slips.

He then has his locker, he has his independent copy of this HCOB for separate reference. He will have his chart.

His only real problem is how to keep himself supplied with slips of Directions. It is probably best to cut these all of a piece on mimeo stencils and get them run off in batches.

Standard grades are not part of this set-up as it is understood that the auditor knows these. Directions to do standard grades are written on the blank sheet.

Good Luck.

## INDEX

### CLASS VIII

NAME	SYMPTOM NO.	DIRECTION NO.	PIGEON HOLE
Rudiments, Light use	AA	1	1
Rudiments, Fly all	BB	2	2

---

CASE SUPERVISOR AA  
CLASS VIII

Rudiments, light use of

Symptoms

Pc in session easily.  
Gets case gains.

---

CASE SUPERVISOR 1  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly the ruds to F/N.

Run the rudiments, ARC break, PTP and/or M/W/H to the first F/N. Use Suppress and False if pc edgy about ruds. Do not fly any ruds if pc has F/N at sess start.

---

CASE SUPERVISOR BB  
CLASS VIII

Rudiments, fly all

Symptoms

- Pc or pre-OT not in session.
  - Tends to take over session.
  - Hard to handle in session.
  - Ends sessions with bad indicators.
- 

CASE SUPERVISOR 2  
CLASS VIII

To the Auditor

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly each rudiment to floating needle.

- ARC Brk
- Present time problem
- Missed withholds.

Use Suppress on a "clean" read.

Use False read (Has anyone said you had a \_\_\_\_\_ when you didn't.)

---

CASE SUPERVISOR CC  
CLASS VIII

Rudiments or Green Form

Symptom

- Case not audited for some time.
- 

CASE SUPERVISOR 3  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly a rud or do GF, Method No. 3.

(If there is no F/N on rudiments, then do a Green Form omitting the standard ARC Brk, PTP and M/W/H which have just been done anyway.)

Use itsa earlier itsa. *No* lists.

---

CASE SUPERVISOR CCC  
CLASS VIII

Green Form

Symptom

- Pc requesting review.
  - Pc has not been audited for some time.
-

CASE SUPERVISOR 300  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Assess GF+40 once through, marking lengths of reads.
  2. Return folder to C/S (who should also have the FES info on the case available to do a proper C/S.)
- 

CASE SUPERVISOR CCC  
CLASS VIII

Green Form

Symptom  
All Black reads.

---

CASE SUPERVISOR 300A  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. List what it was to an item or date it.  
Running it is too heavy a Green Form action.
- 

CASE SUPERVISOR CCC  
CLASS VIII

Green Form

Symptom  
Misunderstood Case Condition reads.

---

CASE SUPERVISOR 300B  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Handle Misunderstood Case Condition if it reads.  
Get in Suppress and Invalidated.  
Do a Remedy B on "Who or what haven't you understood about (your case)," test if it's "Case or Cases," do a Remedy B on the question that reads.
  2. Verify and rehab all grades and sections (if Clear omit Power).
  3. Return folder to C/S for further action if (2) hangs up and doesn't go.
- 

CASE SUPERVISOR DD  
CLASS VIII

Rudiments, high TA on

Symptom  
TA goes up high when rudiments used.

---

CASE SUPERVISOR 4  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. *Per C/S Series 1, Auditors Rights, check Protest or Overrun. If TA remains high, the trained auditor is to do a C/S 53 and handle.*
- 

CASE SUPERVISOR DDD  
CLASS VIII

High TA, chronic

Symptom

TA is at 3.5 or above.

---

CASE SUPERVISOR 400  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. *Assess Short Hi-Lo TA List (C/S Ser 53) and handle to F/Ning list.*

(NOTE: Also handle any errors found in FES which the pc may not be aware of, like processes run twice etc.)

---

CASE SUPERVISOR DDD  
CLASS VIII

Out rudiments

Symptoms

Audited over ARC breaks of long duration and M/W/H.

Too many GF, Remedy Bs and S&Ds.

Pc was OK now reported in grief after too much over-correction and errors.

He's had too many repairs that were badly done.

---

CASE SUPERVISOR 400A  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly each rud to F/N. Be alert for ARC breaks of long duration. Chase back to basic.
2. Assess:   Auditing  
              Treatment  
              Healing  
              Scientology  
              Sessions  
              Auditors  
              Reviews  
              Correction
3. Prepcheck each item that reads, *in order of size of read.*
4. Back to C/S (for a C/S based on what was found in FES.)

CASE SUPERVISOR EE  
CLASS VIII

Complaints about F/Ns

Symptom

Pc or pre-OT claims he F/Ns too easily or too quickly when he has not had any gains.

---

CASE SUPERVISOR 5  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Check for cut communications (itsa E/S itsa to F/N).
  2. Prepcheck floating needles "On floating needles \_\_\_\_\_" to F/N.  
Be sure to clear the command well with a green pc.
- 

CASE SUPERVISOR FF  
CLASS VIII

Previous bad auditing

Symptoms

Pc reluctant, has aches or pains.

---

CASE SUPERVISOR 6  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Assess:   Auditors  
              Auditing  
              Scientology  
              Dianetics  
              Engrams  
              Secondaries  
              Locks  
              Reviews  
              Sessions  
              Cases  
              Case gain  
              Results
  2. Prepcheck result.  
Beware on the assessment pc doesn't "get an item" just because he doesn't understand it. If so, clear item and reassess.
- 

CASE SUPERVISOR GG  
CLASS VIII

Nattery or critical pc

Symptoms

Pc is highly critical.  
Natters.

---

CASE SUPERVISOR 7  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Prepcheck "Withholds?" "On withholds has \_\_\_\_\_."  
Clear command well.
  2. Pull withholds, E/S.
- 

CASE SUPERVISOR HH  
CLASS VIII

Crossed rudiments

Symptoms

Pc or pre-OT answers PTPs with ARC breaks, ARC breaks with PTPs, missed W/Hs with PTPs, etc.

---

CASE SUPERVISOR 8  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Clear each rudiment thoroughly with preclear before running it and fly each rud to F/N.
- 

CASE SUPERVISOR HHH  
CLASS VIII

Rudiments

Symptoms

Pc or pre-OT shows signs of protesting in session. Lots of False assertions by auditors.

---

CASE SUPERVISOR 800  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Get in ruds with Suppress and False with prefix "In auditing has there been an/a \_\_\_\_\_ " ARC break, problem, withhold (not missed W/H). If the pc or pre-OT can't think of it, after he looks for it, you test False read with various questions. "Who said you had an/a \_\_\_\_\_ reading when you didn't have one." or "Has anyone asked for answers you didn't have." or "Has somebody pulled \_\_\_\_\_ that had been pulled before." etc.
- 

CASE SUPERVISOR HHH  
CLASS VIII

PTP

Symptom

Preclear has repeating PTP.

CASE SUPERVISOR 800B  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Pick up ARC breaks. ARCU CDEINR, itsa earlier similar itsa to F/N.
  2. Handle PTPs. *If it reads well, itsa earlier similar itsa to F/N.* Make a Remedy B out of the PTP if it requires handling in any way but mild itsa. Use the PTP she says it is in the question. "In your past who or what was similar to\_\_\_\_\_." Make it make sense. *Handle per the laws of L&N.*
- 

CASE SUPERVISOR II  
CLASS VIII

Bad session last time

Symptoms

From folder pc was mishandled.  
Wound up at the Examiner caved in.

---

CASE SUPERVISOR 9  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

NOTE: Study the folder to find and correct *the* error.

If out ruds:

1. Run ruds with the questions:  
  
In your last session did you have an ARC break?  
In your last session did you have a problem?  
In your last session did you have a withhold?
  2. If no F/N yet, do L1C "In your last session\_\_\_\_\_."
- 

CASE SUPERVISOR III  
CLASS VIII

Incomplete actions

Symptoms

Pc either overrun or underrun as session did not end on F/N.

---

CASE SUPERVISOR 900  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. C/S is to handle as per C/S Ser 34 "Non-F/N Cases."
-

CASE SUPERVISOR III  
CLASS VIII

Rock slam

Symptoms

R/S on M/W/H. Hard to clean.

---

CASE SUPERVISOR 900A  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Prepcheck missed withholds.  
"On missed withholds has anything been \_\_\_\_\_."
  2. Pull overts. (Be sure to get the *crime* back of the R/S. Use method of magnifying or exaggerating the overts if needed. )
- 

CASE SUPERVISOR III  
CLASS VIII

Rock slam

Symptoms

Pc or pre-OT, R/S at Examiner.

A R/S, the pc came out of session *which* means the F/N was an ARC break needle or false report. A rock slam can be caused by either a crime or an invalidation. It can cool on invalidation but would come back as a crime.

---

CASE SUPERVISOR 900B  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Clean up invalidation of last session.
  2. Handle any continuous PT overts on Scientology and see if it continues to read as invalidation or as a real read. If it is even vaguely hard to clean, the correct action is to list.
  3. "What are you trying to prevent." List & null to one reading item.
- 

CASE SUPERVISOR III  
CLASS VIII

Assist

Symptoms

Ruds overrun.

By Examiner statement still had a PTP after the last session.

Delicate pc.

---

CASE SUPERVISOR 900C  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Indicate to the pc overrun and bypassed F/Ns.
  2. Assesses GF Method 5.
  3. Return folder back to C/S.
- 

CASE SUPERVISOR JJ  
CLASS VIII

Lists, errors in

Symptoms

- Listing trouble.
- Pc nattery.
- Ethics trouble after being listed on an S&D.
- Rem B or Prevent. Ill after being listed on something.
- Heavy session ARC breaks without explanation.

Actions

- (1) *Recent list.*
  - (2) *Old lists.*
  - (3) *The earlier list (recent) not available.*
  - (4) *Old earlier lists not available.*
- 

CASE SUPERVISOR 10A  
INSTRUCTION TO THE AUDITOR

Lists

(1)

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

Recent possible incorrect list.

- (1) Find the list, do L4B, Method 5, on it.
- 

CASE SUPERVISOR 10B  
CLASS VIII

Lists

(2)

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

Lots of earlier lists available.

1. Find the earliest S&D. Do L4B to correct item by the Laws of Listing and Nulling HCOB 1 August 68. Give it to the pc as his first S&D item. Correct no further.
  2. Find the earliest Remedy B. Do L4B to correct item as in (1).
  3. Find the earliest list ever done on the case, do L4B as in (1).
-

CASE SUPERVISOR 10C  
CLASS VIII

Lists  
(3)

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

Old earlier lists not available.

1. Assess review, auditors, auditing, lists, old lists, list items.
2. Do L4B with "On (item found in (1) " Method 5). Handle each item as it reads with itsa and indicate the BPC.

*Or as an alternate C/S do the following:*

1. *L4B on every list pc can recall (Method 5).*
- 

CASE SUPERVISOR 10D  
INSTRUCTIONS TO THE AUDITOR

Lists  
(4)

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

The earlier list (recent) not available.

1. Do L4B "On that list (specify)\_\_\_\_\_" (Method 5).
- 

CASE SUPERVISOR 100E  
CLASS VIII

Lists  
(5)

List item didn't F/N in the matter of listing and nulling.

1. Do L4B on that list (specify), Method 5.
- 

CASE SUPERVISOR 100H  
INSTRUCTIONS TO THE AUDITOR

Lists  
(6)

List error, 3 SPs found on one list.  
Difficulty on the job.

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Find and correct this incomplete list. Renuell to one reading item.
  2. Do L4B, Method 5.
-

CASE SUPERVISOR 100J  
INSTRUCTIONS TO THE AUDITOR

Lists  
(7)

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

A persistent item that doesn't blow. Wrong item.

1. Find which list it came from.
  2. Correct the list by L4B, Method 5.
- 

CASE SUPERVISOR KK

Alcohol

Symptoms

- Delusions.
- Can't leave alcohol alone.
- Dishonesty.
- Physical deterioration.
- Deception.
- Religious fixations.
- Sexual perversions or promiscuity.

Alcohol produces its effect by rapidly burning up the B1 vitamin and foods in the body. This pulls a thetan in to the resulting low area.

---

CASE SUPERVISOR 11  
INSTRUCTIONS TO THE AUDITOR

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

- Give pc B1 before session.
1. Fly ruds or GF to F/N.
  2. Rehab any and all releases through drinking. Get number of times by counting.
  3. 3 Way or *Quad* Recall:
    - F1. Recall *another giving you* alcohol.
    - F2. Recall giving alcohol to another.
    - F3. Recall another giving alcohol to another or others.
    - F0. Recall giving yourself alcohol.
  4. 3 Way or *Quad* Engrams:
    - F1. Locate an incident containing pain and unconsciousness of *another giving you* alcohol.
    - F2. Locate an incident containing pain and unconsciousness of you giving alcohol to another or others.
    - F3. Locate an incident containing pain and unconsciousness of another giving alcohol to another or others.
    - F0. Locate an incident containing pain and unconsciousness of giving yourself alcohol.
- 

CASE SUPERVISOR LL

Drugs

Symptoms

Registers on the meter as having taken drugs.

High TA.

Seems unauditible on ARC Straightwire or above or hangs up in doing grades.

Talks randomly.

Compares Scientology sessions to former drug trips.

Looking for the same euphoria from a Scn session as received during drug trips.

Dub-in engram.

Drugs, and also bio-chemical substances used in "treatment" or in tranquilizing the person produce delusion. This is done by making a reduced creation in the body so that the thetan is dragged into heavily creating. Makes a + and -.

If a person is heavily the effect of something, then he has done it as an overt.

A preclear who has recently been on drugs should not be audited until off them for 6 weeks.

B1 vitamin in heavy dosage has been known to alleviate the no-create body drag and so stop the obsessive create thetan drag.

Auditing someone during a drug delusion state heavily hangs up a case and must not be done. Vitamins are not drugs.

Drugs include a long category of substances and even some poisons.

Anything that produced a release of a thetan from the body can be rehabbed.

---

CASE SUPERVISOR 12  
INSTRUCTIONS TO THE AUDITOR

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

*The Class VIII Drug Rundown:*

1. Fly rud or GF to F/N by itsa earlier itsa, no lists.
2. Rehab former releases for each type of drug taken, get number of times released on each. (Each should F/N.)
3. 3 Way or *Quad* Recall:
  - F1. Recall *another giving you* drugs.
  - F2. Recall giving drugs to another.
  - F3. Recall another giving drugs to another or others.
  - F0. Recall giving yourself drugs.
4. 3 Way or *Quad* Secondaries:
  - F1. Locate an incident containing loss or emotion of another giving you drugs.
  - F2. Locate an incident containing loss or emotion of you giving drugs to another or others.
  - F3. Locate an incident containing loss or emotion of another giving drugs to another or others.
  - F0. Locate an incident containing loss or emotion of giving yourself drugs.
5. 3 Way or *Quad* Engrams:
  - F1. Locate an incident containing pain and unconsciousness of *another giving you* drugs.
  - F2. Locate an incident containing pain and unconsciousness of you giving drugs to another or others.
  - F3. Locate an incident containing pain and unconsciousness of another giving drugs to another or others.
  - F0. Locate an incident containing pain and unconsciousness of giving yourself drugs.

RUN THE ENGRAMS PRECISELY BY THE BOOK.

---

CASE SUPERVISOR MM  
CLASS VIII

Tiredness

Symptoms

Tired continually.  
Sleeps too much.

Tiredness is technically BLUNTED PURPOSE.

The most effective way to handle this is by the overt-motivator engram.

---

CASE SUPERVISOR 13  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

Tiredness:

- F1. Find and run an engram or chain of the pc's purpose being blunted to F/N.
  - F2. Find and run an engram or chain of blunting the purpose of another or others to F/N.
  - F3. Find and run an engram or chain of another blunting the purpose of another or others.
  - F0. Find and run an engram of the pc blunting his own purpose. (If a Quad pc.)
- 

CASE SUPERVISOR NN  
CLASS VIII

Exteriorization, bypassed

Symptoms

Pc or pre-OT went exterior and the auditor kept on auditing when he should have stopped right there, pc went back in or got upset about it.

---

CASE SUPERVISOR 14  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

Int RD if the pc hasn't had any yet. If he has, then:

- 1. Date/Locate the point of exteriorization.
  - 2. Acknowledge pc's release in last session. NOTE: If pc is still upset, the Int RD needs to be repaired.
- 

CASE SUPERVISOR OO  
CLASS VIII

F/Ns bypassed in session

Symptoms

Auditor went by F/Ns on the same subject. TA was low, pc cognited. TA then went up on same subject.

---

CASE SUPERVISOR 15  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Rehab the F/N by asking "On the process (described) how many times were you released?"
  2. Indicate the overrun.
- 

CASE SUPERVISOR PP  
CLASS VIII

F/N packed up

Symptoms

Case has ceased to F/N.

---

CASE SUPERVISOR 16  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Handle as per C/S Ser 34 "NON F/N CASES."
- 

CASE SUPERVISOR QQ  
CLASS VIII

Exteriorization, case cannot

Symptoms

Case doesn't exteriorize at a level it should.

---

CASE SUPERVISOR 17  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Assess: Exteriorization  
Death  
Release  
Fear  
Havingness  
Nothing  
Going off  
Responsibility  
Dizziness.
  2. Prepcheck what assessed out.
-

CASE SUPERVISOR QQQ  
CLASS VIII

Exteriorization

Symptoms

Bypassed in this or former session.

---

CASE SUPERVISOR 170  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. C/S inspects the folder and orders an Interiorization Rundown.
- 

CASE SUPERVISOR RR  
CLASS VIII

Money, has troubles with

Symptoms

Cannot buy training or processing.

Has money troubles.

Wastes money.

---

CASE SUPERVISOR 18  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

LM 1

1. Assess: Beggarized  
Pauperized  
Poor  
Rich  
Broke  
Money  
Power  
Buying  
Poverty  
Capital  
Accounts  
Embezzlement  
Waste
  2. Prepcheck the items that read *in order of size of read*.
- 

CASE SUPERVISOR SS  
CLASS VIII

Solid, bank gone solid

Symptoms

Engrams, masses feel too solid to pc.

---

CASE SUPERVISOR 19  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. L3B, Method 3, and handle. (Also can be done by Dn auditor.)
  2. Then on to Dianetic C/S to handle any pictures and masses.
- 

CASE SUPERVISOR TT  
CLASS VIII

Process split by a break

Symptoms

A break was taken or a session ended without a major action completed. OR TA went up the moment the session was resumed or the process in next session was started again.

---

CASE SUPERVISOR 20  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Check to see if the process went release out of session.  
If so, rehab the F/N.  
If no F/N to be had then run ruds "Between sessions\_\_\_\_\_" to F/N and finish the process.  
*If TA high, do not do rods. Instead assess Short Hi-Lo TA List (C/S Ser 53) and handle.*
- 

CASE SUPERVISOR UU  
CLASS VIII

Gains invalidated

Symptoms

Pc roller-coasters after an apparently good session.

---

CASE SUPERVISOR 21  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Check for invalidation "Since last session has anything been invalidated."  
If no F/N run "Since last session has anything been suppressed."  
If no F/N do Green Form. No lists. Itsa earlier itsa only.
- 

CASE SUPERVISOR VV  
CLASS VIII

Resistive case

(Can be used more than once so long as same item does not get used again after being handled.)

Symptoms

Thick review folder  
Roller-coasters  
Complains  
Blows courses or orgs  
Long sessions  
Hard to get F/Ns  
Doesn't want auditing  
Makes trouble for auditors  
Does not respond to auditing.

---

CASE SUPERVISOR 22  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

Assess 7 cases  
Separate RUDS & GRADES  
Do not state "Resistive Cases" but "Special Cases," HCOB 23/9/68 Issue II.

- (a) Does not want auditing
- (b) Pretending training or grades not attained
- (c) Has not had auditing
- (d) Seeking the same thrill attained from drugs
- (e) Has taken drugs
- (f) Former therapy before Scientology
- (g) Has been part of earlier practices
- (h) Out of valence
- (i) Continuously committing overts in Scientology
- (j) Audited with prior grades out
- (k) Audited with rudiments out  
ARC Brk\_\_\_\_\_ PTPs\_\_\_\_\_ Withholds\_\_\_\_\_ Ovt\_\_\_\_\_
- (l) Has an engram exactly matching PT dangers
- (m) Seriously physically ill

*OR assess list of HCOB 30 June 71R "Expanded GF 40RB" Method 5 and fully handle per the list instructions.*

*The following C/Ses are included here to be referred to in using HCOB 30 June 71R "Expanded GF 40RB."*

---

RESISTIVE CASES 22A

- (a) Discuss, in session start why he or she doesn't want auditing and identify the cause, as it arises, ARC Brk, PTP or missed W/H and handle.

Don't fail to pull the M/W/H if pc natters. Don't call it an ARC break.

---

RESISTIVE CASES 22B

- (b) *3 Way or Quad Recall*
  - F1. *Recall another pretending to you.*
  - F2. *Recall you pretending to another.*
  - F3. *Recall another pretending to another or others.*
  - F0. *Recall pretending to yourself.*
  - F1. *Locate an incident containing pain and unconsciousness of another pretending to you.*
  - F2. *Locate an incident containing pain and unconsciousness of you pretending to another.*
  - F3. *Locate an incident containing pain and unconsciousness of another pretending to another or others.*
  - F0. *Locate an incident containing pain and unconsciousness of you pretending to yourself.*

RESISTIVE CASE 22C

- (c) List and null who or what would prevent auditing? To one item.
- 

RESISTIVE CASE 220D OR E

(d) or (e)

1. Rehab drugs. Get how many times released for each type of drug to F/N.
2. 3 Way or *Quad* Recall
  - F1. Recall *another giving you drugs*.
  - F2. Recall giving drugs to another.
  - F3. Recall another giving drugs to another or others.
  - F0. Recall giving yourself drugs.
3. 3 Way or *Quad* Secondaries per C/S 12 Commands.
4. 3 Way or *Quad* Engrams, R3R
  - F1. Locate an incident containing pain and unconsciousness of *another giving you drugs*.
  - F2. Locate an incident containing pain and unconsciousness of you giving drugs to another.
  - F3. Locate an incident containing pain and unconsciousness of another giving drugs to another or others.
  - F0. Locate an incident containing pain and unconsciousness of giving yourself drugs.

Run engrams by the book. Then to Dn auditor for Dn Drug Rundown.

---

RESISTIVE CASES 220E (1)

Drugs

*Symptoms*

Registers on the meter as having taken drugs.  
No F/N on having taken drugs.  
Has overts on drugs if won't rehab.

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Get in ruds with attention to missed withholds and overts. Look for R/S, clean to basic.
  2. Rehab any and all drugs.
- 

RESISTIVE CASES 220F

- (f) 3 Way or *Quad* Recall
- F1. Recall *another giving a former therapy to you*.
  - F2. Recall giving *a former therapy* to another.
  - F3. Recall another giving *a former therapy* to another or others.
  - F0. Recall giving *a former therapy to yourself*.
- 3 Way or *Quad* Engrams, R3R, by the book.
- F1. Locate an incident containing pain and unconsciousness of *another giving a former therapy to you*.
  - F2. Locate an incident containing pain and unconsciousness of you giving therapy to another.
  - F3. Locate an incident containing pain and unconsciousness of another giving therapy to another or others.

F0. *Locate an incident containing pain and unconsciousness of you giving a former therapy to yourself.*

---

#### RESISTIVE CASES 220G

(g) 3 Way or Quad Recall

- F1. Recall *another forcing* an earlier practice *on you*.
- F2. Recall you forcing an earlier practice on another.
- F3. Recall another forcing an earlier practice on another or others.
- F0. Recall forcing an earlier practice on yourself.

3 Way Engrams, R3R, by the book.

- F1. Locate an incident containing pain and unconsciousness of *another forcing* an earlier practice *on you*.
  - F2. Locate an incident containing pain and unconsciousness of you forcing an earlier practice on another.
  - F3. Locate an incident containing pain and unconsciousness of another forcing an earlier practice on another or others.
  - F0. *Locate an incident containing pain and unconsciousness of you forcing an earlier practice on yourself.*
- 

#### RESISTIVE CASE 220H

OUT OF VALENCE (*For Section K of Expanded GF 40RB.*)

1. Assess LX3.
2. Handle all significantly reading items *in order of read* by 3 Way or Quad Recall, 3 Way or Quad Engrams on each item.
3. Continue as above with LX2 then LX1. End off when pc has a marked change in valence.

If no valence change on LX lists then continue with 3 Way or Quad Recall, 3 Way or Quad Engrams on being someone else per 4 and 5 below.

4. 3 Way or Quad Recall each leg to F/N.
    - F1. Recall *another causing you to be someone else*.
    - F2. Recall you *causing another to be someone else*.
    - F3. Recall another *causing another or others to be someone else*.
    - F0. Recall *causing yourself to be someone e/se*.
  5. 3 Way or Quad Engrams
    - F1. Locate an incident containing pain and unconsciousness of *another causing you to be someone e/se*. R3R to erasure and F/N.
    - F2. Locate an incident containing pain and unconsciousness of you *causing another to be someone else*. R3R to erasure and F/N.
    - F3. Locate an incident containing pain and unconsciousness of another *causing another or others to be someone else*. R3R to erasure and F/N.
    - F0. *Locate an incident containing pain and unconsciousness of you causing yourself to be someone else.*
- 

#### C/S 220H (1)

3 Way or Quad Recall

- F1. "Recall *another causing you to take the attitude of (LX3 item)*."
- F2. "Recall you *causing another to take the attitude of (LX3 item)*."
- F3. "Recall another *causing another or others to take the attitude of (LX3 item)*."
- F0. "Recall *causing yourself to take the attitude of (LX3 item)*."

3 Way or Quad Engrams (Standard R3R)

- F1. "Locate an incident of *another causing you to take the attitude of (LX3 item)*."

- F2. "Locate an incident of your causing another to take the attitude of (LX3 item)."
- F3. "Locate an incident of another causing another or others to take the attitude of (LX3 item)."
- F0. "Locate an incident of you causing yourself to take the attitude of (LX3 item)."

C/S 220H (2)  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly a rudiment to F/N.
2. Assess LX2 (or use existing list if previously assessed. *Handle in order of read.* )

3 Way or *Quad* Recall

- F1. "Recall *another causing you to feel* (LX2 item)."
- F2. "Recall you causing another (to feel) (LX2 item)."
- F3. "Recall another causing another or *others* (to feel) (LX2 item)."
- F0. "Recall causing yourself to feel (LX2 item)."

3 Way or *Quad* Secondaries

- F1. "Locate an incident of *another causing you to feel* (LX2 item)."
- F2. "Locate an incident of you causing another (to feel) (LX2 item)."
- F3. "Locate an incident of another causing another or *others* (to feel) (LX2 item)."
- F0. "Locate an incident of you causing yourself to feel (LX2 item)."

CASE SUPERVISOR 220H (3)  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly rudiments to F/N.
2. Assess LX1 (omit any item handled earlier)—*run 3 Way or Quad Recall and Engrams.*
  - F1. Run "Recall *another causing you to be* (LX1 item)."
  - F2. Run "Recall you *causing another to be* (LX1 item)."
  - F3. Run "Recall another *causing another to be* (LX1 item)."
  - F0. "Recall causing yourself to be (LX1 item)."
  - F1. Find and run an engram of "*another causing you to be* (LX1 item)."
  - F2. Find and run an engram of "*you* (LX1 item)*ing somebody or something.*"
  - F3. Find and run an engram of "*another* (LX1 item)*ing another.*"
  - F0. *Find and run an engram of "you causing yourself* (LX1 item)."

RESISTIVE CASES 220H (4)

LX1 assessed to grief or loss.

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly ruds to F/N, check for any protest.
2. Run "Recall grief" to F/N.
3. Find and run a secondary or chain of grief and loss to pc or pre-OT.
4. Find and run overt secondary or chain of causing grief and loss.

5. Find and run a secondary or chain of another causing grief and loss to another.
  6. *Find and run a secondary or chain of you causing yourself grief and loss.*
- 

#### RESISTIVE CASES 22I

##### *CONTINUOUS OVERTS.*

List and null “What are you trying to prevent” by the laws of listing and nulling to one item.

If 2 or more read on 1st nulling, extend the list until only 1 reads when all are called.

---

#### RESISTIVE CASES 22J

##### *AUDITED WITH PRIOR GRADES OUT.*

Check sub-zeros, grades up to IV and run those not previously run.

---

#### RESISTIVE CASES 22K

##### *AUDITED WITH RUDIMENTS OUT.*

Run each to F/N: In auditing have you had an ARC break.  
(Itsa, earlier itsa, ARCU CDEI.)

In auditing have you had a problem?  
(Itsa earlier itsa.)

In auditing have you had a withhold?  
(Itsa earlier itsa and WHO nearly found out?)

---

#### RESISTIVE CASES 220K (1)

##### *AUDITED WITH RUDIMENTS OUT.*

Run each to F/N:

1. In auditing have you been audited with an/a \_\_\_\_\_ ARC Brk, PTP, withhold.  
On ARC Brk use ARCU CDEINR itsa earlier similar itsa to F/N.  
On PTP handle with itsa earlier similar itsa to F/N.  
On withholds, who nearly found out, itsa earlier similar itsa to F/N.
  2. Then “Have you audited someone over an “ ARC Brk, PTP, withhold, each to F/N.
- 

#### RESISTIVE CASES 220K (2)

##### *AUDITED WITH RUDIMENTS OUT.*

Assessed to ARC breaks

1. Prepcheck ARC breaks.
  2. If no good indicators at end trace back breaks by ARCU CDEINR.  
Itsa earlier similar itsa.
- 

#### RESISTIVE CASES 22L

Engram matching PT dangers  
(Please use LRH C/S YYY, C/S 250C, “Environmental Menace”)

RESISTIVE CASES 22M

*SERIOUSLY PHYSICALLY ILL.*

Get a competent medical analysis. When well or if no improvement, find and audit any engrams or chain to F/N, *R3R Triple or Quad*. (Ruds do not have to be flown.) (Be careful in auditing a person running a fever, audit lightly. Do not force them into anything.)

RESISTIVE CASES 220M (1)

Had been physically ill.  
Protesting the item.

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly ruds to F/N, check protest on illness item. If so, handle protest fully, (itsa earlier similar itsa). If item still reads, find and run an illness engram chain to F/N.

You can't run a recall process on illness or engrams. It is too much. If it doesn't read on illness reassess and send back to C/S.

CASE SUPERVISOR YYY  
CLASS VIII

S & D WSU

Symptoms  
Reads on Green Form as PTS.  
Been ill.

CASE SUPERVISOR 250  
INSTRUCTIONS TO THE AUDITOR

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. *PTS interview per C/S Series 79 or HCOB 10 Aug 73.*
2. 3 S & Ds, if *necessary*.

CASE SUPERVISOR YYY  
CLASS VIII

Flubbed S & D.

Symptoms  
Singular item has been represented.

CASE SUPERVISOR 250A  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Renuell the list, not the represent list. Indicate the item to the pc. Indicate error of represent. Handle any PTPs and missed withholds.
2. Then get on with the grade or section.

CASE SUPERVISOR YYY  
CLASS VIII

Illness

Symptoms

- Pc PTS.
  - Unskilled L&N auditor.
  - Pc has had S & D.
  - WSU in the past which were correct. (S & Ds being a limited process.)
- 

CASE SUPERVISOR 250B  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly a rud.
  2. Assess: Difficulties  
Being suppressed  
Attacks  
Enemies  
Suppressing  
Incomplete cycles  
Unmocking  
Defense  
Protest  
Make nothing of  
Withdrawing from
  3. Prepcheck *each reading item in order of size of read* to F/N. Being careful to handle any ARC breaks.
- 

CASE SUPERVISOR YYY  
CLASS VIII

Environmental menace

Symptoms

Pc or pre-OT PTS

---

CASE SUPERVISOR 250C  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Fly each rud to F/N.
2. Find the environmental menace to the pc just by discussion. It's the obvious one. It is a *situation* that is wanted, *not* an item.
3. Find an engram containing a situation that exactly matches the *PT situation* found in 2.
4. Run subject of engram three ways or *quad*.
  - F1. "Locate an engram that matches PT dangers."  
(Use as command 1, then 2, 3, 4, etc.) R3R.
  - F2. "A time when you gave another such an engram." R3R.
  - F3. "A time when *another* gave *another* or *others* such an engram." R3R.
  - F0. *A time when you gave yourself such an engram.*" R3R.

CASE SUPERVISOR ZZZ  
CLASS VIII

Assists

Symptoms

Had a severe injury.

---

CASE SUPERVISOR 260  
CLASS VIII

Handle as per HCOB 23 July 71—"Assists," Section "Injury Rundown."

1. Touch Assist.
2. Contact Assist.
3. LIC on the injured member.
4. Then R3R on the injury incident.

Usual Dianetic actions would follow as necessary.

---

CASE SUPERVISOR ZZZ  
CLASS VIII

Unwarranted Sec Checks

Symptoms

No Green Form done to indicate pc should have a Joburg.  
Run past many free needles.

---

CASE SUPERVISOR 260D  
CLASS VIII

Pc or pre-OT: \_\_\_\_\_ Date: \_\_\_\_\_

Auditor: \_\_\_\_\_ Time: \_\_\_\_\_

1. Do a Prepcheck on Joburg or Sec Checks, whichever reads.
  2. Clean up this evaluation and needless action and indicate to the pc or pre-OT it was needless.
  3. L1R.
  4. Pc or pre-OT to next grade or action.
-

**C/S Series 59R**

**DIANETIC LIST ERRORS**

It *can* happen that a Dianetic list of somatics, pains, emotions and attitudes can act as a list under the meaning of the Laws of Listing and Nulling as per HCOB I August 68.

The most violent session ARC Brks occur because of list errors under the meaning of listing and nulling. Other session ARC Brks even under withholds are not as violent as those occurring because of listing errors.

Therefore when a violent or even a “total-apathy-won’t-answer” session upset has occurred in Dianetics, one must suspect that the preclear is reacting under the laws of listing and nulling and that he conceives such an error to have been made.

The repair action is to assess the prepared list which corrects listing errors. This is L4BRA—HCOB 15 Dec 68 amended to 18 March 71.

It is used “On Dianetics lists” as the start of each of its questions when employed for this purpose.

When a pc has not done well on Dianetics and when no other reason can be found the C/S should suspect some listing error and order an L4BRA to be done “On Dianetic lists “ at the start of each question.

Each read obtained on the list is carried earlier similar to F/N as per HCOB 14 Mar 71 “F/N Everything” or, preferably the list is found in the folder and properly handled in accordance with what read on L4BRA.

Dianetic lists can be carried to an item that blows down and F/Ns.

*This does not mean the item found is now wholly clean. Even though it F/Ned it will in most cases need to be run on secondaries and/or engrams (R3RA Quad) to erasure and full Dianetic end phenomena. (Ref: New Era Dianetics Series 1 through 18.)*

A C/S must be alert to the fact that:

- (a) Extreme upsets and deep apathies are almost always list errors.
- (b) That a Dianetic list can be conceived to be a formal list and can behave that way.
- (c) L4BRA is the correction list used in such cases.
- (d) *Laws of Listing and Nulling HCOB 1 August 1968 can sometimes apply to Dianetic lists.*

Very few Dianetic lists behave this way but when they do they must be handled as above.

### FALSE TA

Some pcs have a *very* difficult time in auditing due solely to can (electrode) out-nesses.

Some auditors have heavy losses because they do not realize the troubles that can come from electrodes and thus remedy them.

### TA USE

The TA must be between 2 and 3 for a correct F/N.

When the TA is reading falsely a pc can be butchered.

Example: Auditor talking the TA down. It gets to "3.1" by his meter. So he gets the pc to talk a bit more to get the TA between 2 and 3 and F/N. The TA suddenly rises to 3.8.

Pc and auditor go desperate. What has happened is that the TA was a false read. It was really reading 2.9 and F/Ning but for reasons given below it read "3.1." Thus the auditor overran the F/N and by keeping on invalidated the release, pulled the pc's attention out of session and demanded more than the pc had to give.

Example: Auditor two-way communicating with pc to get the TA up from "1.8." The TA suddenly sinks to 1.6, pc goes into apathy.

What happened was a missed F/N. For reasons covered below the TA at 1.8 was false and was really at 2.1 and F/Ning.

Example: Pc being asked for an earlier similar incident because TA is at "4.0." Pc can't get one, gets desperate, TA goes to 5.0.

For reasons given below the TA was at 3.0 but was reading falsely at "4.0."

Some cases get upset at the very idea of F/N when these mistakes are made.

More than one case has missed all his wins for a year because of a false TA.

So it is very important to know how a false TA comes about and how to avoid it.

*A properly set up meter with cans (electrodes) fitted to a pc who is holding them properly IS AL WA YS CORRECT.*

However, totally false tone arm readings can exist and *an auditor must know how these come about.*

### TRIM

A meter can be improperly trimmed (not set at 2.0 with the trim knob) and can give a false TA position.

Further, when a meter is not left on a minute or two before trimming, it can drift in the session and give a slightly false TA.

The trim can be quietly checked in mid-session by snapping out the jack where the cord goes into the box and putting the TA on 2, seeing if the needle is now on SET. If

not, the trim knob can be moved to adjust it. The jack is quietly slipped back in. All without distracting the pc.

### DISCHARGED

A cadmium cell meter discharges very suddenly when it does go flat.

In mid-session the meter can run out of battery. The TA will cease to act well and may go very false.

The remedy is to keep a meter charged at least one hour for every 10 of auditing for 240 AC volt charging current, or 2 hours for every 10 of auditing on a 110 AC volt charging current.

A meter lasts much longer than this in practice but the above is very safe.

Before each session snap the knob over to TEST. The needle should hit *hard* on the right side of the face. It can even bounce. This guarantees lots of charge in the battery and no chance of a meter going flat in session.

If the needle doesn't snap to the right hard or if it doesn't quite get there on TEST, then that meter will go flat in mid-session and give false TA and no reads or TA on hot subjects.

### ONE-HAND ELECTRODE

A single hand electrode with two terminals separated by a rubber works. BUT it *always* gives a falsely high TA.

A Solo auditor who does not know this can get a release point and go half mad wondering why he is F/Ning at 4.0!

The answer is to make a "single hand" electrode out of two small cans (about 3 3/4 inches by 2 1/8 inches or 9 1/2 cm by 5 1/2 cm) (or even smaller for a very small handed pc). Glue a thin circle of foam rubber solidly to the bottom of one can so it reaches out slightly around the bottom. (Don't glue it up the sides.)

Put the alligator jaw clips one to each can. Now put the can bottoms together and hold them in one hand. Mark the TA (1)—meaning one hand (such as 3.75 (1) ). Now take the cans one in each hand and mark the TA (2)—meaning two hands (such as 3.0 (2) ).

Audit with them in one hand. Keep your worksheets with (1) marks (such as 3.5 (1) ). Check at start and middle and end by taking a can in each hand and putting down the 2 can read (such as 2.5 (2) ).

It is too much trouble to totally change cans and the distraction can change the TA read.

This two small can arrangement is not quite accurate. It gives a *lower TA than big cans*. But the difference is slight. It can scare you with a 1.9 when trim is 2.0 and real TA is 2.0. If this happens check with big cans.

(As an added tip a Solo auditor usually keeps the back of his hand on his leg while Solo auditing. The small 7 1/2 volt current gives a tingle to the leg that is distracting when one's hand is moist. Put a piece of foam rubber in a plastic sack. Lay the sack on the leg, put your hand on this pad. It insulates the area and is very comfortable. )

### MOIST HANDS

When a pc's hands sweat a lot you will get a low TA.

Contrary to 19th century superstition the meter does not work on sweat. Very sweaty hands as found on nervous persons gives a false TA. It goes low.

*Many* "low TA cases" are just sweaty hand cases.

Paper handkerchiefs (Kleenex) are a standard item for an auditing room—for grief charges and burning eyes, etc. These should be available.

If the TA is low, check if the pc's hands are wet. If so have him wipe them and get a new read. It is usually found that the 1.6 was really 2.0. Or the 1.6 was really 1.8 and the trim was  $1.8 = 2.0$ .

Have the pc wipe hands, check and correct trim before you bypass all a "low TAs" F/Ns!

TAs can go low. Invalidation of the pc, lousy TRs can drive one low. If so the TA comes back up on repair.

But don't brand a case a low TA case until you make sure his hands are dried and the meter trimmed.

Also, very small cans or cans too small for the pc can give a slightly low reading.

#### DRY HANDS

Some pcs have extremely dry hands, usually from industrial chemicals such as chlorine in dishwasher or skin scale.

This can give a wildly high TA.

The pc can be worried to death with high TA repairs when in fact he just doesn't have contact with the electrode.

A quick test is have the pc put the cans under his armpits and you'll see if it's his calloused or chemically dried out hands.

#### ARTHRITIC HANDS

A rare pc is so crippled with arthritis that he doesn't make contact fully with the cans.

This gives a high TA.

*Use wide wrist straps and you'll get a right read.*

#### SLACK GRIP

Sometimes a rare pc lets his hands go slack on the cans, particularly if they are the wrong size cans, too big.

This gives a mysterious "high TA." It is false. The TA will come down only to 3.2 and F/N and of course an overrun then really gives a high TA. And the pc goes a bit frantic and begins to believe things don't erase or release.

Keep the pc's hands in sight. Check the pc's grip. Get smaller cans.

#### CAN SIZE

The most common fault is wrong can size.

For a normal or large handed pc the can size is about  $4 \frac{7}{8}$ ths inches by  $2 \frac{5}{8}$ ths inches or  $12 \frac{1}{2}$  cm by 7 cm. This can *be* altered as big as  $4 \frac{1}{2}$  inches by 3 inches diameter or 11 cm by 8 cm. This is standard.

This can is too large for people with small hands. These should use a can  $3 \frac{3}{4}$  inches by  $2 \frac{1}{8}$ th inches or 9 cm by 5 cm diameter or thereabouts.

A small child would be lost even with that can. So a small 35 mm film can could be used. This is 2 inches long by  $1 \frac{3}{16}$ ths diameter or 5 cm by 3 cm. This works but watch it as these cans are aluminum. They do work but test for true read with a slightly larger can and then trim to adjust for the aluminum if any different.

Cans of course should be STEEL with a thin tin plating. Regular soup cans.

Can size to match the pc avoids slack can grip or tiring the hands into going slack, giving the auditor 3.2 F/Ns and trouble.

#### COLD PC

A pc who is too cold sometimes has a falsely high TA.

Wrap him in a blanket or get a warmer auditing room.

The auditing environment is the responsibility of the auditor.

#### LATE AT NIGHT

Between 2 and 3 AM or late at night a pc's TA may be very high. The time depends on when he sleeps usually.

This TA will be found normal in regular hours.

#### RINGS

Rings on the pc's hands must always be removed. They don't influence TA but they give a false rock slam.

#### FLOATING TA

Many an auditor before now has gone a bit mad trying to handle a floating TA. They are not very common and are startling.

What happens is the pc is so released the needle can't be gotten onto the dial. The needle is swinging wider than the meter dial both ways from center and appears to lay first on one side then the other. The TA can't be moved fast enough to keep the extreme floating needle on the dial.

This gives a false TA of sorts as it can't be read.

Some auditors seeing it for the first time have even sent the pc out of the room so they could "adjust" the meter or get another one!

Thus the very highest state of release can be invalidated as where is the TA?

#### RUSTY CORRODED CANS

You'd think soup was very expensive the way some auditors hold onto old cans.

Corroded cans can falsify TA. Get new ones now and then.

#### TIGHT SHOES

And then there was the vain lady who wore shoes too small for her feet.

She removed them every session. The session went well each time.

Then she put on her agonizing shoes and went to the Examiner and the C/Ses and auditors all went mad trying to find out why every exam had a high TA.

Tight shoes.

The E-Meter is accurate. It is a lovely instrument.

You have to fit the pc to it.

Good luck.

REVISED 26 JANUARY 1977  
*(Revisions in this type style)*

Remimeo  
E-Meter Books  
Studies  
Checksheets

**FALSE TA ADDITION**

(Refers and adds to HCOB 24 Oct 1971R  
"False TA.")

**COLD CANS**

Regardless of can size, cold E-Meter electrodes tend to give a much higher tone arm reading particularly on some pcs.

Until the cans warm up, the reading is generally false and is false in the direction of high.

A chilled pc almost always has a high TA until he or she gets warm. Just throwing a coat over the pc's shoulders can bring down a TA in a cool room. But some pcs are "cool blooded" and the shock of ice cold cans can drive the TA up and it takes a while to drift down.

This has a great effect on examinations where the cans are used very briefly.

A practice which gets around this is for the auditor or Examiner to hold the cans briefly until they are warm and then give them to the pc. A variation is for the auditor or Examiner to put the cans under his armpits while setting up. This warms them.

There are probably many other ways to warm up cans to body temperature.

**FOOTPLATES**

*Tests show that footplates do not read on the meter. The use of footplates is thereby cancelled.*

**PCs WHO FALSIFY**

Some pcs (rare) take mistaken pride in being able to push the TA up by straining or tensing.

By just moving into the body the TA can be sent up by an otherwise exterior pc.

Some pcs also take a road out by "getting an F/N at will." They have various tricks that do this, the main one being to "think of something else" and get an F/N.

Any of these (rare) pcs are manifesting out-of-sessionness. They aren't in session.

The definition of in session is "interested in own case and willing to talk to the auditor." Remedy that and they cease such tricks.

Usually they aren't being run on what they are interested in or have comm blocks or withholds or no confidence. They are easy to detect and easy to handle.

**FALSE TA ADDITION 2**

Ref: HCOB 24 Oct 71R FALSE TA  
HCOB 12 Nov 71RA FALSE TA  
C/S Series 53 HI-LO TA ASSESSMENT  
INT-EXT CORRECTION LIST

There is an infinity of wrong ways to get a pc to read between 2.0 and 3.0 on an E-Meter.

One method would be to shoot him. Dead bodies read between 2.0 and 3.0.

Another way is to throw the trim knob off.

Yet another wrong way is to use HAND CREAM to make the TA go lower and call "F/Ns" at 4.0 on an actual read.

An auditor who is not very expert is apt to find strange ways to do things because the usual is beyond his skill.

A GOOD auditor handles low and high TAs with HCOB 24 Oct 71R and Addition 12 Nov 71RA and this HCOB "False TA," C/S Series 53 and the Hi-Lo TA Assessment.

The commonest sources of high TA are PROTEST, OVERTS and out INTERIORIZATION RD and too big or too small cans.

The commonest sources of low TA are overwhelming auditor TRs or wet sweaty hands.

The subject is not open to experimentation. If a pc's TA is low or high and you don't correct it with the usual remedies mentioned above, the pc goes into the soup.

**GOOD AUDITORS KNOW THEIR TECH AND USE IT TO REMEDY HIGH AND LOW TAs.**

**GOOD AUDITORS DO HONEST WORKSHEETS AND HONEST AUDITING.**

**BE A GOOD AUDITOR.**

**FALSE TA ADDITION 3**

(There are now four False TA HCOBs including this one.  
These were issued as more data was uncovered:

HCOB 24 Oct 71R	FALSE TA
HCOB 12 Nov 71RA	FALSE TA ADDITION
HCOB15 Feb 72R	FALSE TA ADDITION 2
and this one	
HCOB18 Feb 72R	FALSE TA ADDITION 3.)

A meter is a meter.

Meters are used to measure water, natural gas, and many other things.

An E meter is used to measure a pc.

If you rig a meter up so as to falsify its reads you get a wrong result.

You could rig up a water meter so it read that twice as much water had flowed and then sit around and wonder all week why the swimming pool never filled up.

The ACCURACY of a meter depends upon its being honestly set up and honestly used.

The HONESTY of the auditor determines his results.

The whole field of psychotherapy was dishonest from the days of witch doctors to psychiatry. Falsified data came from lack of knowledge of the mind. This made its practitioners DISHONEST.

We do not and must not follow that fatal road.

The technology we have WORKS to definite positive predictable results.

Results are obtained if the auditor has honestly studied and understood his materials and honestly applies them.

Falsifying study leads to falsifying meters and this gives bad results on pcs.

HONEST use of the materials and the meter gives an honest result.

One who does not know his materials and who cannot do his drills then thinks he has to make a meter cheat.

HONEST use of the meter by an HONEST auditor is the route to GOOD RESULTS .

LOW TAs

A bad practice has arisen to "beat" the low TA.

This is to have the pc wipe his hands every few minutes to get the TA up above 2.0.

Not only does this distract the pc and yank him out of session, but it is by inference putting his attention on the meter, a thing a good auditor does NOT do in a formal session. The pc's attention must be on his own case in a session, not on the meter or his hands.

But the best answer is to get the pc up scale so he doesn't have perspiring hands.

Overwhelming TRs is the commonest reason for low TAs. Not all the hand wiping in the world will cure poor TRs.

Some auditors "spook" (leap off the road like a horse frightened by something blowing along) at the very thought of high or low TAs. This is because they haven't got the TRs to handle a low TA nor the tech to handle a high one.

Making a meter read falsely low with cream or falsely high with talcum powder or wiping hands continually will not handle the pc's CASE.

That is what the auditor is there to do, not make his session look good!

The funniest one I have ever heard was a Solo auditor who had high TA trouble. So he used to fill up a bathtub with scalding water, fill the bathroom full of clouds of steam and then sit in the bath, holding onto his electrodes "Solo auditing."

It gave him a lower TA but it sure didn't give him any case result.

We maybe ought to have a contest as to who can come up with the most comical actual instances of falsifying meter reads.

One "auditor" "solved it" by just calling F/Ns whenever she got tired of the pc regardless of TA position. After a year or more of this she saw the light and put herself in Ethics.

The funny part is that her co-auditor had been doing the same thing on her!

**HONEST TA IS THE BEST POLICY.**

HCO POLICY LETTER OF 19 MARCH 1972

Remimeo  
Ethics

**C/SING OR AUDITING WITHOUT  
FOLDER STUDY**

A two weeks loss of pay *and* a suspension of certs is a penalty for any C/S or auditor who acts on a case

- (1) Without an up-to-date FS
- (2) Without an FES done on auditing, and:
- (3) Without a preliminary study of the folder before C/Sing or auditing
- (4) Who C/Ses for or delivers Quickie auditing of any level for "completion"
- (5) Who does not work for the product of a fully and utterly completed pc on that grade
- (6) Who falsifies a statistic or a worksheet.

FES Units must exist to FES folders for C/Ses.

WE MUST END ALL QUICKIE TENDENCIES IN C/Ses AND AUDITORS.

Failure to *complete* the pc totally and utterly on any level can cost us our friends.

Bonuses may only be paid to C/Ses and auditors on 25 CHAIR HOURS OR MORE A WEEK PLUS A LESSER BONUS FOR ADMIN TIME, NOT VALID WITHOUT THE CHAIR HOURS.

NO bonuses of any kind may be paid henceforth to C/Ses or auditors for "completions" as these lead to Quickie actions which then reduce the power inherent in auditing.

Auditing can perform miracles. But only in HONEST HANDS.

A Comm Ev may be requested and must be given in the event of false accusation.

HCO POLICY LETTER OF 4 APRIL 1972R  
Issue III

Remimeo  
Student Hat  
Staff Hats

REVISED 21 JUNE 1975

*(Revision in this type style)*

IMPORTANT

**ETHICS AND STUDY TECH**

(Cancels the issue revised 7 April 72.)

The basic WHY of the majority of cases of post nonperformance of a staff member and OUT TECH in an org stems from misunderstood words.

The primary point that has to be gotten in is study tech.

This is also our bridge to society.

Yet study tech is the tech that includes misunderstood word tech.

Thus if study tech is not in, people on staffs see nothing wrong with hearing or reading orders containing words they do not understand and have no urge to look them up. Further they often feel they do know words that they in fact do not know.

When this situation exists it is next to impossible to get study tech and Word Clearing tech in. For, the orders seeking to get in study tech may contain words the person does not understand. Thus he doesn't really comply with the orders and study tech does not get in. Thus the ability to hear or read and understand continues to be missing.

Therefore these ethics actions become part of standard ethics.

1. A PERSON MAY BE SUMMONED TO A COURT OF ETHICS OR EXECUTIVE COURT OF ETHICS IF IT BE FOUND THAT HE HAS GONE PAST A WORD HE DOES NOT UNDERSTAND WHEN RECEIVING, HEARING OR READING AN ORDER, HCOB, POLICY LETTER OR TAPE, ANY AND ALL LRH WRITTEN OR PRINTED MATERIALS INCLUDING BOOKS, PABS, DESPATCHES, TELEXES AND MIMEO ISSUES WHICH RESULTED IN A FAILURE TO DO DUTIES OF HIS POST WITHOUT HIS AT ONCE MAKING AN EFFECTIVE EFFORT TO CLEAR THE WORDS ON HIMSELF, WHETHER HE KNEW HE WAS MISSING THEM OR NOT AS THE SOURCE OF HIS INACTION OR DAMAGING ACTIONS.

The charge is NEGLECTING TO CLARIFY WORDS NOT UNDERSTOOD.

2. A STAFF MEMBER WHO DOES NOT USE STUDY TECH OR GET IT KNOWN WHILE STUDYING OR INSTRUCTING MAY BE SUMMONED TO A COURT OF ETHICS OR AN EXECUTIVE COURT OF ETHICS.

The charge is FAILURE TO EMPLOY STUDY TECH.

3. A STUDENT ALTER-ISING OR MISADVISING OTHERS ON THE USE OF STUDY TECH MAY BE SUMMONED BEFORE A COURT OF ETHICS.

The charge is ADVOCATING A MISUSE OR NEGLECT OF PROPER STUDY TECH.

4. AN AUDITOR FAILING TO CLEAR EACH AND EVERY WORD OF EVERY COMMAND OR LIST USED MAY BE SUMMONED BEFORE A COURT OF ETHICS.

The charge is OUT TECH.

5. ANY PUBLIC DIVISION PERSON, STAFF MEMBER OR SCIENTOLOGIST FOUND USING TERMS, CIRCUMSTANCES OR DATA ON RAW PUBLIC IN PUBLIC LECTURES OR PROMOTION OR IN PR BEYOND THE PUBLIC ABILITY TO GRASP WITHOUT STRESSING STUDY TECH OR AT ONCE TAKING EFFECTIVE MEASURES TO CLARIFY OR RELEASING MATERIALS BROADLY TO A WRONG PUBLIC MAY BE SUMMONED TO A COURT OF ETHICS IF ANY FLAP OR UPSET RESULTS.

The charge is FAILURE TO APPLY STUDY TECH IN DISSEMINATION.

#### SUPPRESSIVE

Furthermore, as study tech is our primary bridge to society and the basic prevention of out tech and out admin, if any offense as above found guilty in a Court of Ethics is REPEATED and the person has had two such Courts on this offense the person may be summoned before a Committee of Evidence on a charge of COMMITTING AN ACT OR OMISSION UNDERTAKEN TO KNOWINGLY SUPPRESS, REDUCE OR IMPEDE SCIENTOLOGY OR SCIENTOLOGISTS and if found guilty beyond reasonable doubt may be declared a SUPPRESSIVE PERSON and expelled with full penalties.

#### AXIOM 28

Failures to teach, or use study tech or alterations of study tech are actually offenses against AXIOM 28 as it is applied internally in an org on admin and tech and from the org to society.

Study tech including its technology of Word Clearing is in fact the technology of Axiom 28.

The Axiom (amended) follows:

AXIOM 28. COMMUNICATION IS THE CONSIDERATION AND ACTION OF IMPELLING AN IMPULSE OR PARTICLE FROM SOURCE-POINT ACROSS A DISTANCE TO RECEIPT-POINT, WITH THE INTENTION OF BRINGING INTO BEING AT THE RECEIPT-POINT A DUPLICATION AND UNDERSTANDING OF THAT WHICH EMANATED FROM THE SOURCE-POINT.

The formula of Communication is: Cause, Distance, Effect with Intention, Attention and Duplication WITH UNDERSTANDING.

The component parts of Communication are Consideration, Intention, Attention, Cause, Source-point, Distance, Effect, Receipt-point, Duplication, Understanding, the Velocity of the impulse or particle, Nothingness or Somethingness. A non-communication consists of Barriers. Barriers consist of Space, Interpositions (such as walls and screens of fast-moving particles), and Time. A communication by definition, does not need to be two-way. When a communication is returned, the formula is repeated, with the receipt-point now becoming a source-point and the former source-point now becoming a receipt-point.

## EXECUTIVE DIRECTIVE

LRH ED 176 INT

24 April 1972

To: C/O, ED  
Tech Sec

*Reissued*  
11 April 1977  
*Cancels all other*  
*versions of LRH ED 176*

Subject: AUDITOR RECOVERY

*(Reissued as statistically by far the most  
successful version of LRH ED 176 ever issued.  
This is the original LRH version of the ED.)*

Reference: LRH ED 174 INT STUDY AND TECH BREAKTHROUGH  
HCO PL 9 April 72 CORRECT DANGER CONDITION  
HCOB 30 Mar 72 PRIMARY CORRECTION RUNDOWN  
HCOB 20 Apr 72 C/S Series 78 PRODUCT PURPOSE AND  
WHY AND WC ERROR CORRECTION

SITUATION: It quite often happens that an org has an auditor that stops producing or doesn't produce or blows or ceases to audit.

Investigation has revealed that the auditor situation is similar to that of students who blow for lack of study tech.

Each auditor who lets down has a WHY and has misunderstood words or has not really checked out on his current tech. Thus they foul up, let down or blow.

As orgs sometimes find it hard to get auditors, the situation can be very hard on the C/O or ED and Tech Sec unless it is handled.

STATS: Well Done Auditing Hour stats very low in some orgs and backlogs in many.

WHY: Auditors can ease off or cease auditing for individual WHYs for each auditor.

IDEAL SCENE: All auditors auditing more than their minimum and happily on post.

HANDLING:

1. Compile three lists of auditors (a) who have left but are still in area or (b) who want to leave the org or (c) who are not getting out their hours.

HAS. \_\_\_\_\_

2. M4 and study the Data Series so as to know what a WHY is, and the above references. Dir of Pers Enhancement (or Qual Sec or as designated or done by the C/O or ED). \_\_\_\_\_

3. Call in auditors on lists (b) and (c) whether on tech posts or admin. Assess both Trouble Area Lists in the P/L 9 April 72 Issue III. Fly *each* read with 2-way comm and earlier similar and keep a worksheet of the auditor's answers. Find the WHY of the letdown in auditing. If not directly apparent from answers given, and is not obvious (such as PTS or missed words or no study tech or has not read materials or other very apparent reasons) then you can list to a BD F/N item the question "What reason do you have for not auditing?" The BD F/N item will be their Why. Write it below the Trouble Area Assessment in the space provided.

DIR OF PERS E OR  
THE C/O OR ED  
DESIGNATED PERSON. \_\_\_\_\_

4. See that action is done to remedy the WHY, whatever it was. It will be the 1st Dynamic Danger Formula of that P/L completed.

HAS. \_\_\_\_\_

5. Do the same with list (a) in 1 above.

SAME PERSON WHO  
DID 3 ABOVE. \_\_\_\_\_

6. See that they apply 1st Dynamic formula.

HAS. \_\_\_\_\_

7. Try to get some of list (a) to join the org staff.

HAS. \_\_\_\_\_

8. Get all org auditors and supervisors through the Primary Correction Rundown HCOB 30 Mar 72, allowing for those steps already done previously on LRH ED 174 INT or lists (b) and (c).

QUAL SEC. \_\_\_\_\_

9. Correct any wrong Whys found using C/S Series 78 HCOB 20 April 72 by correct C/Sing and handling.

ORG C/S. \_\_\_\_\_

Completely aside from remedying any out tech you may have, and the personal benefit the auditors will receive, this should solve any auditor scarcity problem.

It is a very effective program.

HCO POLICY LETTER OF 3 MAY 1972R  
REVISED 18 December 1977

Remimeo  
Executive Hats

*(Revision in this type style)*

IMPORTANT  
*Executive Series 12*  
**ETHICS AND EXECUTIVES**

Any person holding an executive post (head of department or above) is deemed an EXECUTIVE.

Evaluation has revealed that the breakdown in many orgs is a failure on the part of executives to wear their ethics and justice hats.

It has been found that below administrative Whys there is usually an ethics situation as well which unhandled, causes the administrative Why not to function or raise stats.

In an area which is downstat, it is the duty of an executive to investigate and find any out-ethics situation and get it corrected.

Ethics is a personal thing in relation to a group. Unethical people are those who do not have ethics in on themselves personally.

It is the responsibility of the executive to see to it that persons under his control and in his area *get their personal ethics in and keep them in.*

Dishonesty, false reports, an out-ethics personal life, should be looked for and by persuasion, should be corrected.

When an executive sees such things he or she must do all he can to get the person to get his own ethics in.

When an area is downstat the executive must at once suspect an out-ethics scene with one or more of the personnel and must investigate and persuade the person to be more honest and ethical and correct the out-ethics condition found.

If this does not correct and if the person or area remains downstat, the executive must declare the person or area in Danger and apply HCO PL 9 Apr 72 "CORRECT DANGER CONDITION HANDLING."

The situation, if it does not correct, thereafter becomes a matter of full group justice with Courts and Comm Evs. Persons whose ethics have remained out must be replaced.

The seniors of an executive are bound to enforce this policy and to use it on any executives whose personal ethics are out and who fail to apply it. It will be found that those who do not apply this policy letter have themselves certain dishonesties or out-ethics situations.

**IT IS VITAL TO ANY ORGANIZATION, TO BE STRONG AND EFFECTIVE, TO BE ETHICAL.**

**THE MOST IMPORTANT ZONE OF ETHICAL CONDUCT IN AN ORGANIZATION IS AT OR NEAR THE TOP.**

Ethical failure at the top or just below it can destroy an organization and make it downstat.

Historical examples are many.

THEREFORE IT IS POLICY THAT AN EXECUTIVE MUST KEEP ETHICS IN ON HIMSELF AND THOSE BELOW HIM OR BE DISCIPLINED OR COMM EVED AND REMOVED FROM ANY POST OF AUTHORITY AND SOMEONE FOUND WHO IS HIMSELF ETHICAL AND CAN KEEP ETHICS IN ON THOSE UNDER HIS AUTHORITY.

The charge in any such case for a staff member or executive is FAILURE TO UPHOLD OR SET AN EXAMPLE OF HIGH ETHICAL STANDARDS.

Such offenses are composed of

1. DISHONESTY.
2. Use of false statements to cover up a situation.
3. Representing a scene to be different than it actually is to cover up crimes and escape discipline.
4. Irregular 2D connections and practices.
5. Drug or alcoholic addiction.
6. Encouraging out-ethics.
7. Condoning or failing to effectively handle an out-ethics situation in self or others as an in-charge, officer or executive.

#### TECHNICAL

People with out-ethics withholds cannot see. This is proven by the brilliant return of perception of the environment in people audited effectively and at length on such processes.

Such people also seek to place a false environment there and actually see a false environment.

People whose ethics are low will enturbulate and upset a group as they are seeking to justify their harmful acts against the group. And this leads to more harmful acts.

Out-ethics people go rapidly into Treason against the group.

A person whose ethics have been out over a long period goes “out of valence.” They are “not themselves.”

Happiness is only attained by those who are HONEST with themselves and others.

A group prospers only when each member in it has his own personal ethics in.

Even in a PTS (Potential Trouble Source) person there must have been outethics conduct toward the suppressive personality he or she is connected with for the person to have become PTS in the first place.

People who are physically ill are PTS *and are out-ethics* toward the person or thing they are PTS to!

Thus a group to be happy and well, and for the group to prosper and endure, its individual members must have their own ethics in.

It is up to the executive or officer to see that this is the case and to DO the actions necessary to make it come about and the group an ethical group.

EXEC OR OFFICERS STEPS  
FOR GETTING IN ETHICS  
ON A STAFF MEMBER  
STEP ONE

Inform the person personally he is in Danger Condition by reason of acts or omissions, downstate false reports or absence or 2D or whatever the circumstances are.

He is in fact IN danger because somebody is going to act sooner or later to hit him.

He may be involved already in some other assignment of condition.

But this is between you and him.

HE IS IN DANGER BECAUSE YOU ARE HAVING TO BYPASS HIM TO GET HIS ETHICS IN, A THING HE SHOULD DO HIMSELF.

If he cooperates and completes this rundown and it comes out all right you will help him.

If he doesn't cooperate you will have to use group justice procedures.

This is his chance to get ethics in on himself with your help before he really crashes.

When he accepts this fact, Step 1 is done. Go to Step 2.

STEP 2

Ethics is gotten in by definition on the person.

GET IN THE DEFINITIONS FULLY UNDERSTOOD.

The following words must be Method 4 Word Cleared on all the words and the words in their definitions on the person being handled.

“ETHICS: The study of the general nature of morals (morals (plural) (noun): *The principles of right and wrong conduct*) and the specific moral choices to be made by the individual in his relationship with others.”

“The rules or standards governing the conduct of the members of a profession.”

“JUSTICE: 1. Moral rightness; equity. 2. Honor, Fairness. 3. Good reason. 4. Fair handling: due reward or treatment. 5. *The administration and procedure of the law.*”

“FALSE: Contrary to fact or truth; without grounds; incorrect. Without meaning or sincerity; deceiving. Not keeping faith. Treacherous. Resembling and being identified as a similar or related entity.”

“DISHONEST: Disposed to lie, cheat, defraud or deceive.”

“PRETENSE: A false reason or excuse. A mere show without reality.”

“BETRAY: To be disloyal or faithless to.”

“OUT-ETHICS: An action or situation in which an individual is involved contrary to the ideals and best interests of his group. An act or situation or relationship contrary to the ethics standards, codes or ideals of the group or other members of the group. An act of omission or commission by an individual that could or has reduced the general effectiveness of a group or its other members. An individual act of omission or commission which impedes the general well-being of a group or impedes it in achieving its goals.”

Do not go to Step 3 of this until all the above words are cleared by Method 4 Word Clearing.

### STEP 3

Ask the person what out-ethics situation he or she is involved in.

It may take the person some time to think of it or he may suppress it and be afraid to say it for fear of consequences. Reassure him that you are only trying to help him.

He may have brought it up in a session but did not apply it as out-ethics. Coax him through this.

If his conduct and actions are poor or downstat, he for sure will be able to come up with an out-ethics personal scene.

Sometimes the person is secretly PTS and is connected to a suppressive or antagonistic person or group or thing. In such an instance he will roller-coaster as a case or on post or have accidents or be ill frequently. (See PTS tech for material on this and for future handling. Checksheet *BPL 31 May 1971RF Issue IV PTS AND SP DETECTION, ROUTING AND HANDLING CHECKSHEET*, but go on handling with these steps.)

Sometimes the person just uses PR (brags it up and won't come clean). In this case, an auditing session is required.

If the person gets involved in self-listing get him audited on HCOB 20 Apr 72, C/S Series 78, which gives the auditing session procedure. A person can become very upset over a wrong item. It is easily repaired but it must be repaired if this happens.

By your own 2WC or whatever means or repair get this Step 3 to a clear-cut out-ethics situation, clearly stated. Do not forget to go on with this eventually if there is a delay in completing it. GIs will be in if correct.

### STEP 4

Have the person work out how the out-ethics situation in which he or she is involved would be a betrayal of the group or make them false to the group or its ideals.

Do not make the person guilty. Just get them to see it themselves.

When they have seen this clearly and have cognited on it completely go to next step.

### STEP 5

The person is now ready to apply the FIRST DYNAMIC DANGER FORMULA to himself.

Give him this formula and explain it to him.

## FIRST DYNAMIC FORMULA

The formula is converted for the first dynamic to

- 1st 1. Bypass habits or normal routines.
- 1st 2. Handle the situation and any danger in it.
- 1st 3. Assign self a Danger Condition.
- 1st 4. Get in your own personal ethics by finding what you are doing that is out-ethics and use self-discipline to correct it and get honest and straight.
- 1st 5. Reorganize your life so that the dangerous situation is not continually happening to you.
- 1st 6. Formulate and adopt firm policy that will hereafter detect and prevent the same situation from continuing to occur.

Now usually the person is already involved in another *group* situation of down-stats or overt products or bad appearance or low conditions, Courts, Comm Evs for something.

It does not matter what other condition he was in. From you he is in *Danger*.

So 1st 1. and 1st 2. above apply to the *group* situation he finds himself in.

He has to assign *himself* a Danger Condition as he recognizes now he has been in danger from himself.

1st 4. has been begun by this rundown.

It is up to him or her to finish off 1st 4. by applying the material in steps 2 and 3. He or she has to use self-discipline to correct his own out-ethics scene and get it honest and straight, with himself and the group.

1st 5. is obvious. If he doesn't, he will just crash again.

1st 6. In formulating and adopting firm policy he must be sure it aligns with the group endeavor.

When he has worked all this out AND DEMONSTRATED IT IN LIFE, he has completed the personal danger rundown.

He can then assign himself Emergency and follow the Emergency Formula (HCO PL 23 Sep 67, Pg 189-190 Vol 0 OEC "Emergency").

## STEP 6

Review the person and his stats and appearance and personal life.

Satisfy yourself that the steps above and the out-ethics found were all of it. That no wrong item has been found. That the person is not PTS.

Handle what you find. But if you find that the person did not improve and gave it all a brush-off, you must now take the group's point of view and administer group justice.

Your protection of the person is at end because he had his chance and is apparently one of those people who depend on others to keep his ethics in for him and can't keep them in himself. So use group justice procedures thereafter.

If the person made it and didn't fall on his head and is moving on up now AS SHOWN BY HONEST STATS AND CONDITION OF HIS POST, you have had a nice win and things will go much much better.

And that's a win for everybody.

HCO BULLETIN OF 16 JUNE 1972RA  
REVISED 27 FEBRUARY 1975  
RE-REVISED 7 DECEMBER 1976

*(Revision in this type sty/e)*

*C/S Series 81RA*

**AUDITOR'S RIGHTS MODIFIED**

It occasionally (rarely) happens that an HGC's line stops and programs do not get finished and pcs go unaudited or sent to Ethics or Cramming instead of getting their programs completed.

It also happens that a D of P becomes incapable of getting auditors to audit per the schedule he writes.

12 1/2 hour intensives drop out. Auditing falls back to the bit and piece game.

The C/S finds all his work in programming wasted as the programs staledate or just get abandoned.

Hours fall. Lines tangle. Tech Services cannot get assignments done.

THE MAJOR WHY OF THIS AND MANY SUCH CONFUSIONS CAN BE TRACED TO AN ABUSE OF "AUDITOR'S RIGHTS" IN PICKING AND CHOOSING PCS ON THE GROUNDS OF "FEELING THEY CANNOT HELP THE PC."

This "right" is also abused by auditors seeking pcs who F/N easily at the Examiner.

See HCOB 15 June 72 C/S Series 80, "Dog Pcs."

The refusal to audit is in fact an admission, in most cases, of a feared inability to audit.

Therefore, an auditor may only refuse to audit a pc if a direct personal relationship exists such as husband and wife or some friend's wife or familial relationship.

An auditor advising others about this or that "dog case" or seeking to exclude pcs from auditing by abusing his "right to choose pcs" is SUBJECT TO COMM EV AND SUSPENSION OF CERTIFICATES UNTIL RETREADED.

For the real Why of it is his inability to handle TRs, meter, use the Code or apply tech.

Nearly every "Dog Pc" has out lists or incomplete chains or is not being run on what needs to be handled. In other words they are simply problems in repair which modern tech handles easily. The drug case who is audited on grades but has had no Drug Rundown is an example of misprogramming.

The C/S can get many loses and the whole HGC go into a bedlam where you have auditors refusing to audit. Their reasons given are false. The real reasons involve fast F/Ns and bonuses or out TRs, metering, Code breaks and tech.

The D of P has a right, and so does Tech Services, to assign pcs to such and such auditors in the sequence listed without a lot of pick and choose by the auditors.

A C/S has a right to get his programs completed.

12 1/2 hour intensive plans blow up where auditors choose their own pcs.

### STATS

*The stats of auditors may only be HOURS AUDITED with FES and admin hours separately noted.*

*The D of P has a dual stat. The stats are: (a) Pcs Completed or out of hours routed to Dept. 6. Penalty: If one pa not routed to the Reg. the D of P loses stats for the day. If found that D of P is encouraging small or inadequate Tech Estimates so that the pc frequently runs out of hours, the D of P forfeits his stats for the day. (b) WDAHs is the second D of P stat.*

*When the stats are this way the C/S can get his programs done without worry.*

*The D of P can get cases completed.*

*The D of Tech Services has the stat of Completed Intensives and Completed Courses. Definition: The Completed Intensives stat is a 12 1/2 hour intensive completed within a period of one week. If an Ex Dn, Introspection RD, L-Rundown, Power (or any other processing which is delivered at other than regular rate) is fully completed and attested in the middle of a 12 1/2 hour intensive, that last intensive may be counted as one on the stat for that week.*

### HONESTY

Sanity is truth.

Truth is sanity.

The road to truth is begun with honesty.

There was the story of the “man who sold his soul for a mess of pottage” (soup). We could parallel this with the auditor who sold his case gain for a mess of false stats.

An honest clean job and an honest clean line are the milestones of the road to truth.

HCOB 18 Jun 78R	New Era Dianetics Series 4R ASSESSMENT AND HOW TO GET THE ITEM

Injuries, operations, delivery of babies, severe illnesses and periods of intense emotional shock all deserve to be handled with thorough and complete assists.

*C/ears, OTs and Dianetic Clears are no longer run on Dianetic auditing assists, secondaries, engrams or narrative incidents. They may however receive Touch Assists and Contact Assists, etc. If further handling is required a New Era Dianetics Special Rundown for OTs has been developed which is available at AOs and Flag. (Ref: BTB 17 Sep 78 BREAKTHROUGH and HCOB 12 Sep 78 DIANETICS FORBIDDEN ON CLEARS AND OTs.)*

*New Era Dianetics assists may be done, as usual, whenever needed by preclears.*

Medical examination and diagnosis should be sought where needed, and where treatment is routinely successful, medical treatment should be obtained. As an assist can at

times cover up an actual injury or broken bone, no chances should be taken, especially if the condition does not easily respond. In other words where something is merely thought to be a slight sprain, to be on the safe side an X-ray should be obtained, particularly if it does not at once respond. An assist is not a substitute for medical treatment but is complementary to it. It is even doubtful if full healing can be accomplished by medical treatment alone and it is certain that an assist greatly speeds recovery. In short, one should realize that physical healing does not take into account the being and the repercussion on the spiritual beingness of the person.

Injury and illness are PREDISPOSED by the spiritual state of the person. They are PRECIPITATED by the being himself as a manifestation of his current spiritual condition. And they are PROLONGED by any failure to fully handle the spiritual factors associated with them.

The causes of PREDISPOSITION, PRECIPITATION and PROLONGATION are basically the following:

1. Postulates.
2. Engrams.
3. Secondaries.
4. ARC breaks with the environment, situations, others or the body part.
5. Problems.
6. Overt acts.
7. Withholds.
8. Out of communicationness.

The purely physical facts of injuries, illnesses and stresses are themselves incapacitating and do themselves often require physical analysis and treatment by a doctor or nutritionist. These could be briefly catalogued as:

- A. Physical damage to structure.
- B. Disease of a pathological nature.
- C. Inadequacies of structure.
- D. Excessive structure.
- E. Nutritional errors.
- F. Nutritional inadequacies.
- G. Vitamin and bio-compound excesses.
- H. Vitamin and bio-compound deficiencies.
- I. Mineral excesses.
- J. Mineral deficiencies.
- K. Structural malfunction.
- L. Erroneous examination.
- M. Erroneous diagnosis.
- N. Erroneous structural treatment.
- O. Erroneous medication.

There is another group which belongs to both the spiritual and physical divisions. These are:

- i. Allergies
- ii. Addictions
- iii. Habits
- iv. Neglect v. Decay.

Any of these things in any of the three groups can be a cause of non-optimum personal existence.

We are not discussing here the full handling of any of these groups or what optimum state can be attained or maintained. But it should be obvious that there is a level below which life is not very tolerable. How well a person can be or how efficient or how active is another subject entirely.

Certainly life is not very tolerable to a person who has been injured or ill, to a woman who has just delivered a baby, to a person who has just suffered a heavy emotional shock. And there is no reason a person should remain in such a low state, particularly for weeks, months or years when he or she could be remarkably ASSISTED to recover in hours, days or weeks.

It is in fact a sort of practiced cruelty to insist by neglect that a person continue on in such a state when one can learn and practice and obtain relief for such a person.

We are mainly concerned with the first group, 1-8. The group is not listed in the order that it is done but in the order that it has influence upon the being.

The idea has grown that one handles injuries with Touch Assists only. This is true for someone who as an auditor has only a smattering of Scientology. It is true for someone in such pain or state of case (which would have to be pretty bad) that he cannot respond to actual auditing.

But a Scientologist really has no business “having only a smattering” of auditing skills that could save his or the lives of others. And the case is very rare who cannot experience proper auditing.

The actual cause of not handling such conditions is, then, to be found as iv. NEGLECT. And where there is neglect, v. DECAY is very likely to follow.

One does not have to be a medical doctor to take someone to a medical doctor. And one does not have to be a medical doctor to observe that medical treatment may not be helping the patient. And one does not have to be a medical doctor to handle things caused spiritually by the being himself.

Just as there are two sides to healing—the spiritual and the structural or physical, there are also two states that can be spiritually attained. The first of these states might be classified as “humanly tolerable.” Assists come under this heading. The second is spiritually improved. Grade auditing comes under this second heading.

Any minister (and this has been true as long as there has been a subject called religion) is bound to relieve his fellow being of anguish. There are many ways a minister can do this.

An assist is not engaging in healing. It is certainly not engaging in treatment. What it is doing is ASSISTING THE INDIVIDUAL TO HEAL HIMSELF OR BE HEALED BY ANOTHER AGENCY BY REMOVING HIS REASONS FOR PRECIPITATING, AND PROLONGING HIS CONDITION AND LESSENING HIS PREDISPOSITION TO FURTHER INJURE HIMSELF OR REMAIN IN AN INTOLERABLE CONDITION.

This is entirely outside the field of “healing” as envisioned by the medical doctor and by actual records of results is very, very far beyond the capability of psychology, psychiatry and “mental treatment” as practiced by them.

In short, the assist is strictly and entirely in the field of the spirit and is the traditional province of religion.

A minister should realize the power which lies in his hands and his potential skills when trained. He has this to give in the presence of suffering: he can make life tolerable. He can also shorten a term of recovery and may even make recovery possible when it might not be otherwise.

When a minister confronts someone who has been injured or ill, operated upon or who has suffered a grave emotional shock, he should be equipped to do and should do the following:

A CONTACT ASSIST where possible and where indicated until the person has reestablished his communication with the physical universe site. To F/N.

A TOUCH ASSIST until the person has reestablished communication with the physical part or parts affected. To F/N.

HANDLE ANY ARC BREAK that might have existed at the time a) with the environment, b) with another, c) with others, d) with himself, e) with the body part or the body, and f) with any failure to recover at once. Each to F/N.

HANDLE ANY PROBLEM the person may have had a) at the time of illness or injury, b) subsequently due to his or her condition. Each to F/N.

HANDLE ANY OVERT ACT the person may feel he or she committed a) to self, b) to the body, c) to another, and d) to others. Each to F/N.

HANDLE ANY WITHHOLD a) the person might have had at the time, b) any subsequent withhold, and c) any having to withhold the body from work or others or the environment due to being physically unable to approach it.

RUN THE INCIDENT ITSELF Narrative R3RA Quad to erasure and full EP. Interest is checked. It is understood here that Flow 1 was the physical incident itself, not necessarily something done to the person but as something that happened to him or her.

(Ref: HCOB 26 June 78RA, New Era Dianetics Series 6RA, R3RA REVISED ENGRAM RUNNING BY CHAINS; HCOB 28 June 78RA, New Era Dianetics Series 7RA, R3RA COMMANDS; HCOB 25 June 78R, New Era Dianetics Series 8R, DIANETICS, BEGINNING A PC ON.)

HANDLE ANY SECONDARY, which is to say emotional reactions, stresses or shocks before, during or after the situation. Narrative secondaries are run R3RA Narrative Quad. Interest is checked. It is important to get the earliest beginning of the incident and to continue to check for earlier beginning each run through. (Ref: HCOB 26 June 78RA, New Era Dianetics Series 6RA, R3RA REVISED ENGRAM RUNNING BY CHAINS; HCOB 28 June 78RA, New Era Dianetics Series 7RA, R3RA COMMANDS; HCOB 25 June 78R, New Era Dianetics Series 8R, DIANETICS, BEGINNING A PC ON.)

PREASSESS THE INCIDENT and take to full Dianetic EP all somatics connected with the incident in which the pc is interested. The full preassessment procedure is given in HCOB 18 June 78R, New Era Dianetics Series 4R, ASSESSMENT AND HOW TO GET THE ITEM and the above issues.

POSTULATE TWO-WAY COMM. This is two-way comm on the subject of “any decision to be hurt” or some such wording. This is done only if the person has not already discovered that he had decisions connected to the incident. It is carried to F/N. One must be careful not to invalidate the person.

Where a person is injured, given a Contact or Touch Assist and then medical examination and treatment, he is given the remainder as soon as he is able to be audited. The drug “five days” does not need to apply. But where the person has been given an assist over drugs, one must later come back to the case when he is off drugs and run the drug part out or at least make sure that nothing was submerged by the drugs. It is not uncommon for a person to be oblivious of certain parts of a treatment or operation at the time of initial auditing, only to have a missing piece of the incident pop up days, months or even years later. THIS is the reason injuries or operations occasionally seem to persist despite a full assist: a piece of it was left unhandled due to a drugged condition during the operation; such bits may come off unexpectedly in routine auditing on some other apparently disrelated chain.

(Ref: HCOB 27 June 78RA, New Era Dianetics Series 9R, DRUG HANDLING and HCOB 19 May 69RA, DRUG AND ALCOHOL CASES, PRIOR ASSESSING.)

It can happen that a person is in the midst of some grade auditing at the time of an injury or illness or receiving an emotional shock. The question arises as to whether or not to disrupt the grade auditing to handle the situation. It is a difficult question. But certainly the person cannot go on with grade auditing while upset or ill. The usual answer is to give a full assist and repair the ease to bridge it back into the grade auditing. The question however may be complicated in that some error in the grade auditing is also sitting there, not to cause the illness or accident but to complicate the assist. This question is handled fully only by study of the case by a competent Case Supervisor. The point is not to let the person go on suffering while time is consumed making a decision.

PRIOR CONFUSION: Fixed ideas follow a period of confusion. This is also true of engrams that hang up as physical injury. Slow recovery after an engram has been run can be caused by the prior confusion mechanism. The engram of accident or injury can be a stable item in a confusion. By 2-way comm see if a confusion existed prior to the accident, injury or illness. If so, it may be 2WCed earlier similar to F/N.

MYSTERY POINT: Often there is some part of an incident which is mysterious to a preclear. The engram itself may hang up on a mystery. A thetan could be called a

“mystery sandwich” in that he tends to stick in on mysteries. 2WC any mysterious aspect of the incident. 2WC it earlier similar to F/N cog VGIs.

**SUPPRESSIVE PRESENCE:** Mistakes or accidents or injuries occur in the presence of suppression. One wants to know if any such suppressive influence or factor existed just prior to the incident being handled. This could be the area it occurred in or persons the preclear had just spoken to. 2WC any suppressive or invalidative presence that may have caused a mistake to be made or the accident to occur. 2WC E/S to F/N cog VGIs.

**AGREEMENT:** Get any agreement the person may have had in or with the incident. There is usually a point where the person agrees with some part of the scene. If this point is found it will tend to unpin the pc from going on agreeing to be sick or injured.

**PROTEST:** 2WC any protest in the incident.

**PREDICTION:** The person is usually concerned about his recovery. Undue worry about it can extend the effects into the future. 2WC (a) how long he/she expects to take to recover. (b) Get the person to tell you any predictions others have made about it. 2WC it to an F/N cog VGIs. Note—avoid getting the person to predict it as a very long time by getting him to talk about that further.

**LOSSES:** A person who has just experienced a loss may become ill. This is particularly true of colds. 2WC anything the pc may have lost to F/N.

**PRESENT TIME:** An injured or sick person is out of present time. Thus running HAVINGNESS in every assist session is vital. This not only remedies havingness but also brings the preclear to present time.

**HIGH OR LO TA:** A C/S 53 RL should be used to get the TA under control during assists if it cannot be gotten down. It must be done by an auditor who knows how to meter and can get reads.

**ILLNESS FOLLOWING AUDITING:** It can occur that a pc gets ill after being audited where the “auditing” is out tech. When this occurs or is suspected, a Green Form should be assessed only by an auditor who can meter and whose TR 1 gets reads. The GF reads are then handled. Out interiorization, bad lists, missed W/Hs, ARC breaks and incomplete or flubbed engrams are the commonest errors.

**BEFORE-AFTER:** Where an injured or ill pc is so stuck that he has a fixed picture that does not move, one can jar it loose by asking him to recall a time before the incident and then asking him to recall a time after it. This will “jar the engram loose” and change the stuck point.

**UNCONSCIOUSNESS:** A pc can be audited even if in a coma. The processes are objective, not significance processes. One process is to use his hand to reach and withdraw from an object such as a pillow or blanket. One makes the hand do it while giving the commands. One can even arrange a “signal system” where the pc is in a coma and cannot talk by holding his hand and telling him to squeeze one’s hand once for yes, twice for no. It is astonishing that the pc will often respond and he can be questioned this way.

**TEMPERATURE ASSISTS:** There is an HCOB, HCOB 23 Jut 71R, ASSISTS, on how to do assists that bring down the temperature. Holding objects still repetitively is the basic process.

Quite often an injury or illness will miraculously clear up before one has run all the steps possible. If this is the case one should end off any further assist.

All auditing of injured or ill people must be kept fairly light. Errors in TRs (such as a bad TR 4), errors in tech rebound on them very heavily. An ill or injured person can easily be audited into a mess if the processes are too heavy for him to handle and if the auditor is goofing. Very exact in tech, good TRs, good metering sessions are all that should be tolerated in assists.

## SUMMARY

Religion exists in no small part to handle the upsets and anguish of life. These include spiritual duress by reason of physical conditions.

Ministers long before the Apostles had as a part of their duties the ministering to the spiritual anguish of their people. They have concentrated upon spiritual uplift and betterment. But where physical suffering impeded this course, they have acted. To devote themselves only to the alleviation of physical duress is of course to attest that the physical body is more important than the spiritual beingness of the person which, of course, it is not. But physical anguish can so distract a being that he deserts any aspirations of betterment and begins to seek some cessation of his suffering. The specialty of the medical doctor is the curing of physical disease or non-optimum physical conditions. In some instances he can do so. It is no invasion of his province to assist the patient to greater healing potential. And ills that are solely spiritual in nature are not medical.

The “psych-iatrist” and “psych-ologist” on the other hand took their very names from religion since “psyche” means soul. They, by actual statistics, are not as successful as priests in relieving mental anguish. But they modernly seek to do so by using drugs or hypnotism or physical means. They damage more than they help.

The minister has a responsibility to his people and those about him to relieve suffering. He has many ways to do this. He is quite successful in doing so and he does not need or use drugs or hypnotism or shock or surgery or violence. Until his people are at a level where they have no need of physical things, he has as a duty preventing their spiritual or physical decay by relieving where he can their suffering.

His primary method of doing so is the ASSIST.

As the knowledge of how to do them exists and as the skill is easily acquired, he actually has no right to neglect those for whose well-being he is responsible, as only then can he lead them to higher levels of spiritual attainment.

An auditor has it in his power to make pcs recover spectacularly. That power is in direct proportion to his flawlessness as an auditor. Only the most exact and proper tech will produce the desired result.

If you truly want to help your fellows, that exact skill and those results are very well worth having.

HCO POLICY LETTER OF 16 NOVEMBER 1973

Remimeo

**STUDY TECH & POST**

(References: HCO PL 4 April 72 Revised  
7 Apr 72 ETHICS AND STUDY TECH and HCO PL  
4 April Issue III Revised 7 Apr 72 Addition.)

It has just been found that certain staff could not perform their duties because they knowingly went by misunderstood words in despatches and telexes.

By this willful failure they had dumped their hats on seniors for two years.

They were wiped out on post, could not evaluate or find out what was going on. And spent a bulk of their time sleeping.

THEREFORE:

5. Any person who goes by misunderstood words or abbreviations in telexes or despatches or materials he handles on post without clarifying them SHALL BE SUMMONSED TO A COURT OF ETHICS.

The charge is NEGLECT OF DUTY and the minimum sentence is TREASON.

6. Any auditor failing to write clearly on worksheets or put down enough text to make the worksheet understandable shall be summonsed to a Court of Ethics.

The charge is NO REPORT.

7. Any Case Supervisor who permits an auditor to write incomprehensibly or omit data shall be summonsed to a Court of Ethics.

The charge is CONDONING NEGLECT OF DUTY.

**ADDITIONAL PENALTY**

Whenever this policy letter or its references are found to be out in an area and not enforced there can be no plea of ignorance and the seniors of the area are themselves liable to Comm Ev.

Violations of study tech and failures to use this technology are responsible for great losses and out tech, out admin and overwork of seniors.

The matter has been regarded too lightly and has caused great losses, blows and has impeded progress on this planet.

**DRY AND WET HANDS  
MAKE FALSE TA**

A couple of years ago some auditors were solving high TA problems by putting hand cream on the pcs' hands when they were calloused and talcum powder on a pc's hands when they were too wet. Since no research had been done they were censured.

Research has now been done on this matter of dry and wet hands.

Apparently when a person has taken certain medicines or chemicals, or uses detergent soaps or is in contact with certain chemicals (such as those in some furniture polishes) the ordinary skin oils vanish. These oils are needed to make an electrical contact with the cans.

When these oils are absent, there is no adequate electrical contact and the "TA is high."

When a person is deficient in certain minerals or vitamins such as magnesium or B Complex, his hands can be excessively wet.

Either of these two conditions in hands can produce an incorrect TA position.

The dry condition produces a false high TA. The overly wet condition produces a false low TA.

The TA depends on normally moist hands. This does not mean the meter works on "sweat." It does mean the meter works only when there is a correct electrical contact.

Too much and too greasy hand cream could produce too low a TA.

Vanishing creams don't work as they are found to actually dry out the skin after repeated application and so produce a falsely high TA. Too much powder or drier could produce too high a TA.

Therefore one must not go to extremes.

**DRY HANDS**

The excessively "dry" hand is seen as shiny or polished looking. It feels very dry.

The correct treatment is to use a hand cream such as Vaseline Intensive Care Lotion (obtainable from any cosmetics store) not a greasy hand cream or vanishing

A good hand cream rubs all the way into the skin and leaves no excess grease. This restores normal electrical contact.

Such a hand cream would only have to be applied once per session—at session start—as it lasts for a long while. Hand cream is never applied during session.

If a cream leaves smears on a can, it is too heavily applied or too little absorbed.

Hand cream is usually smeared on, rubbed in and can then be thoroughly wiped off. The hands will usually produce, then, a normal TA and meter response.

#### WET HANDS

Anti-perspirants can be applied to too wet hands. There are many brands of these, often a powder or spray.

It can be wiped off after application and should work for two or three hours.

If the TA then goes too high, use hand cream on top of it.

#### SUMMARY

While much work could be done still, the above is enough for a practical result.

#### WARNING

Hi TAs and Lo TAs do not widely F/N. If you are getting wide persistent F/N with the TA too high (above 3) or too low (below 2) you have a pc whose hands are too dry or too wet. Using this HCOB should correct it and in future sessions you should continue the remedy on *that* pc.

NOTHING in this HCOB excuses the misreading or falsifying of a TA. Get the TA in normal range with this HCOB before you start calling processes ended.

CS-53RJ and the False TA Checklist HCOB *21 Jan 1977* are your tools for handling too high and too low TAs.

The only other conditions I know of that make an auditor mess up a pc's TA are:

- (a) A discharged meter (registers high).
- (b) An incorrectly set meter by trim button.
- (c) A "fleeting F/N" where the pc F/Ns so briefly the auditor misses it and overruns.
- (d) Bad TRs.
- (e) Unflat processes.
- (f) Overrun processes.
- (g) Heavy drugs or medicines.

False TA often comes to light when the auditor runs out of reasons it is hi or low and it dawns on him that he is dealing with false TA. In the latter case he should know all MATERIALS ON THIS SUBJECT OF FALSE TA (given on HCOB *21 Jan 1977 FALSE TA CHECKLIST* as references) AND REMEDY THE FALSE TA SITUATION AND THEN RESUME NORMAL AUDITING. He must not go on calling hi or low TA F/Ns just by assuming the TA is false.

Given a contact the meter always tells the truth.

Ex Dn C/Ses

*(Revisions in this type style)*

***Expanded Dianetics Series 22RA***

**EXPANDED DIANETICS  
REQUISITES**

The recent review of Expanded Dianetics has shown that Ex Dn can be made to fail if the pc is improperly set up for it.

The following checklist is for use by C/Ses to ensure full set-ups for Ex Dn have been done.

Attach to the inside left cover of the folder.

1. Pc has done a full set of TRs 0-4 and 6-9. \_\_\_\_\_
2. Pc has had a full battery of Objective Processes run to full EP. \_\_\_\_\_
3. Pc has been given a thorough CS-1 and is grooved in. \_\_\_\_\_
4. Pc has completed (very) Drug RD which is FLAT. No no-interest but reading items remain unrun. No medicine, drug or stimulant left unrun. \_\_\_\_\_
5. Pc successful at Dianetic engram running. Can run Dn easily. \_\_\_\_\_
6. Pc has had Word Clearing Method 1 run very flat to F/N list. \_\_\_\_\_
7. Pc has been Word Cleared Method 5 on the L-3ExDRB and R3R words. \_\_\_\_\_
8. Pc has had any high or low TA handled with a C/S 53RJ. \_\_\_\_\_
9. Pc is not in the Non-Interference area. \_\_\_\_\_
10. Pc has had any messed up L & N and Why lists corrected. \_\_\_\_\_
11. Pc has not been left in the middle of a major action or RD to start Ex Dn. \_\_\_\_\_
12. Pc is getting Ex Dn after Dn (*like Drug RDs, etc*) but before grades, after grades but before Power, after Power but before Solo and after OT III or after any single grade above OT III. These are the *only* points Ex Dn is run on a case. \_\_\_\_\_

Only if you make sure each of these points is fully in will the pc fly on Ex Dn.

CANCELS  
HCOB 30 OCT 71  
TRIPLE GRADES VS EXPANDED

URGENT

*C/S Series 93RA*

**NEW GRADE CHART**

The "NEW" thing to do is the Grade Chart. Everything you are doing should contribute to getting the pc up the Bridge. THIS is the Bridge.

There is a new Grade Chart being prepared which has some changes in it, based on recent discoveries. It is urgent that you know of these in advance.

**DRUG RUNDOWN**

The effects of an omitted or incomplete Drug RD are severe enough to deny a person any lasting case gain.

This is covered in HCOB 31 May 74 "Unhandled Drugs and Ethics." Some orgs have taken this HCOB so literally however, that they have taken pcs off Adv Cses Grades, refused to do assists on ill pcs and some showed pcs the HCOB and invaled their gains.

This was not the intention of the HCOB. The C/S Series remain valid.

The Drug RD belongs on the Grade Chart after Life Repair. A Drug RD cannot be done over out ruds and a Life Repair may be necessary to get in a pc's ruds.

Life Repair is not a prerequisite for the Drug RD, however, and if done is not to be dragged out intensive after intensive. In some cases a pc could not complete Life Repair without a Drug RD.

Following the Drug RD is ARC S/W, then the rest of Dianetics to completion.

*QUAD VS EXPANDED GRADES*

*Expanded Grades are NOT a prerequisite for Power. They may come anywhere on a pc's program as given in HCOB 5 April 77 "Expanded Grades" including after OT III. Quad Grades are a prerequisite for Power.*

**EXPANDED DIANETICS**

Ex Dn by the way belongs ideally after Grade IV Expanded, but can be done after Dn, after Power but before Solo, and after OT III or any single OT Level above OT III.

Some pcs R/S and have evil purposes to do others in. But no Grade 0 or Grade I or Grade II. What others? Martians?

"Got to secretly do everybody in" probably applies to Apeville some long date ago and he's never come up to PT.

The best answer is to bring the pc up the Grade Chart to Grade IV *then* do his Ex Dn unless the pc would need XDN to make it at all. (See HCOB 15 Apr 72 "Expanded Dianetics Series 1R" and HCOB 29 Nov 70 "C/S Series 22.")

The prerequisites for Ex Dn are covered on HCOB 23 April 74R "Ex Dn Series 22R, Expanded Dianetics Requisites."

## GRADE II

Some orgs specialize in Grade II, especially on org staff. The pc is always getting *Confessionals* or his O/Ws pulled on so and so.

If you look on the Grade Chart you will find withholds and overts are Grade *TWO*.

Below Grade Two lies Grade I (Problems) and Grade Zero (Communications). And below that is Dianetics and at the bottom end of Dianetics is the drug handling.

Now how do you expect a fellow who has unhandled drugs (or omitted drug items because of “no interest”) to even know (no Grade 0) that other people are around or that (Grade I) he is caved in with problems he’s never cognited on?

And he’s supposed to have enough responsibility to answer up on Grade II? With real overts and withholds?

This does not mean you must never Sec Check. It does mean that Sec Checks are no substitute for auditing or guarantee of innocence.

Grades are grades and the Grade Chart sequence is correct.

## SOLO SET-UPS

Set-ups for Solo are fully covered on HCOB 8 Jan 72RC, Solo C/S Series 11RC.

This will be included as part of Solo on the Grade Chart as it is a vital step.

Pcs won’t make it on Solo if they aren’t set up.

## FULL LIST

Here’s the full list of grades showing where the various RDs now offered fit.

GROUP PROCESSING—not mandatory or a prerequisite.

LIFE REPAIR—as needed but not prerequisite for Drug RD. To get ruds in on life.

DRUG RD, means:

TRs 0-4, 6-9—mandatory for a druggie currently on drugs, FLAT.

Full C/S-1—where not done. To fully educate pc.

Objectives—Full battery to full EPs per basic books and early HCOBs on them.

Class VIII Drug Handling—list and rehab all drugs, 3 way recalls, secondaries and engrams of taking and giving drugs.

AESPs on each reading drug—listed separately and handled with R3R, each drug to full F/N assessment of drug list.

“No Interest” drug items—all reading ones run where they exist.

Prior Assessment—AESPs listed separately and run R3R, prior to first drug or alcohol taken.

ARC S/W *QUAD*.

DIANETICS, means:

C/S 54—complete handling of Pc Assessment Form begun with Drug RD.

Health Form—fully handled to full F/N assessment.

*QUAD* GRADE 0—as issued.

*QUAD* GRADE I—as issued.

*QUAD* GRADE II—as issued.

*QUAD* GRADE III—as issued.

*QUAD* GRADE IV—as issued.

EX DN—not mandatory except where pc is a low OCA, an R/Ser (2%), chronically ill or psycho. Means:

Set-ups—per HCOB 23 April 74R, “Ex Dn Series 22R.”

OCA Left Side Handling—as issued.

OCA Right Side Handling—as issued.

*All Ev Purps and R/Ses FULLY handled with no shortcuts.*

*EXPANDED GRADES—Ideally can go after Ex Dn and before Power, but is not a prerequisite for Power (Quad Grades are a prerequisite). Can come after Drug RD, Full Dn RD, Quad Grades, Ex Dn, Power (but before Solo), after OT III or any single OT level on up.*

*POWER PROCESSING—Grade IV Quad and Drug RD required and as per the Power Checklist.*

SOLO GRADE VI, means:

Solo Set-ups—done at SH or AO per Solo C/S Series 11RC.

Solo Auditor’s Course.

Solo Audit Grade VI materials.

CLEARING COURSE

OT I

OT II

OT III

OT VII PROCESSES

OT III EXPANDED

OT IV

OT V

OT VI

FULL OT VII VERIFICATION

OT VIII—when issued.

*OT IX on up.*

## PROGRAMMING

The C/S Series, especially the early HCOBs, numbers 1-13RA, fully cover the use of the Grade Chart in programming.

THE GRADE CHART IS THE BASIC PROGRAMME OF A PC.

This datum has been neglected in some orgs, who have specialized in the new RDs developed since ‘71.

With refinement of repair and corrective actions and the release of new RDs, some may have forgotten that repair is only done to get off the overwhelm so that you can put the pc back on the Grade Chart.

## SUMMARY

I thought I’d better fill you in on these changes and how the new Grade Chart lines up. Make full use of this Chart with C/S Series programming tech in and your pcs will fly. Here’s to lots of case gain and rave success stories.

REVISED 5 SEPTEMBER 1978

Remimeo  
XDn Spclsts (Revised to correct the definition of a rock slam.)  
CI IVs & Above *Revisions in this type style.*  
C/Ss *Ellipsis indicates deletion.*  
HCO Dept 3 Hats  
PTS/SP Detection Crs

**ROCK SLAMS AND ROCK SLAMMERS**

*Reference: HCOB 3 September 1978  
DEFINITION OF A ROCK SLAM*

A lot of controversy has shown up this year on the subject of R/Ses and R/Sers. Therefore, the following bulletin was compiled from my materials to clarify the matter. My research on this was actually done years ago and remains very valid indeed.

R/Ses

An R/S or rock slam is defined as the crazy, irregular left-right slashing motion of the needle *on the E-Meter dial*. *R/Ses repeat left and right slashes unevenly and savagely, faster than the eye easily follows. The needle is frantic. The width of an R/S depends largely on sensitivity setting. It goes from one-fourth inch to whole dial. But it slams back and forth. It is actually quite startling to see one. IT IS VERY DIFFERENT FROM OTHER METER PHENOMENA.*

Recently auditors arriving on Flag were found not to know what an R/S was but were calling dirty needles, dirty reads, rocket reads, body motion and even ticks as R/Ses. That comes from never having been trained on what an R/S is and never having seen one. **R/SES ARE UNIQUE IN APPEARANCE.** On the other hand, far more serious is the fact that auditors have many times seen R/Ses, didn't mark them down and didn't report them! This is a High Crime as it injures society, the org and the person himself (see HCOB 10 Aug 76R "R/Ses, What They Mean").

Actually this is quite a serious matter because pcs get labelled as R/Sers and get run on evil purposes connected with this "R/S" that isn't one. You can really foul up a pc that way.

A meter also sometimes "goes crazy" on an R/Ser. You see it work, then it doesn't read, etc. While this is rare it does happen. Auditors have changed their meters just to find the new one was also crazy. But the R/S will show up through all this. An inoperational meter does not mean you have an R/Ser—you might have just forgotten to charge it or have faulty leads.

**ROCK SLAMMERS**

In a normal group of 400, the actual percentage of R/Sers is low. It's about 8 in 400, or 2 - 2 1/2%. Those figures should seem familiar. They are the same percentage for SPs. And that gives you a clue to the identification of an R/Ser.

Where requirements for Scn or SO orgs have been established for R/Ses they apply to the 2 - 2 1/2% of real R/Sers as these are high risks for staff purposes.

These people can of course be salvaged as pcs using Expanded Dianetics. Letting them on staff could be disastrous, however.

A handled R/Ser can be expected to eventually wind up in the same category as a cleared cannibal. His experiential track is too educated in evil and too uneducated in anything else. So even when cleaned up will need a lot of living.

R/Sers are also very expensive people to keep around. They waste the available resources and produce overt products. They cost a fortune in waste, repairs, lost business. They also cost a heartbreaking number of damaged people.

### CHECKLIST

To assist you in the identification of R/Sers a checklist of characteristics and their reference has been done.

This checklist is to be used whenever a C/S is called upon to inspect a folder to determine whether a person is an R/Ser. That he R/Ses is the main thing. The other points simply help investigate whether he R/Ses. He doesn't have to have all these characteristics to be an R/Ser.

1. The R/Ses reported are actual R/Ses and not some other read or broken meter leads, a dusty or worn TA or trim "pot," or cans in contact with metal such as rings, bracelets, etc. \_\_\_\_\_

Ref: *E-Meter Essentials*; *Book of E-Meter Drills*; *The Book Introducing the E-Meter*; HCOB 8 Nov 62 "Somatics, How to Tell Terminals and Opposition Terminals" pg 2 and 4; HCOB 6 Dec 62 "R2-10, R2-12, 3GAXX"; *BTB* 14 Jan 63 "Rings Causing Rock Slams"; HCOB "False TA Series" 24 Oct 71R, 12 Nov 71RA, 15 Feb 72R, 18 Feb 72R, 21 Jan 77R, 23 Nov 73RA .

2. R/Ses have to do with evil thoughts, overts or intentions. \_\_\_\_\_

3. Pc is slow or no case gain. \_\_\_\_\_

- 3A. Pc is in a chronically nattery or critical state. \_\_\_\_\_

Ref: HCOB 23 Nov 62 "Routine Two-Twelve"; . . . HCOB 6 Dec 62 "R2-10, R2-12, 3GAXX"; HCOB 28 Nov 70 C/S Series 22 "Psychosis"; BPL 31 May 71RG "PTS/SP Detection, Routing 8. Handling Checksheet" and materials. \_\_\_\_\_

4. Pc chronically ill or who acts most "PTS." This can be suppressed and hidden from view, however. \_\_\_\_\_

Ref: HCO PL 15 Nov 70R "HCO and Confessionals"; HCOB 28 Nov 70 C/S Series 22 "Psychosis"; PTS/SP Pack.

- 4A. He covers up his crimes with lots of PR. \_\_\_\_\_

5. Pc's product is consistently an overt act and his activities destructive to others whether they have spotted this or not. \_\_\_\_\_

Ref: HCO PL 14 Nov 70 Org Series 14 "The Product as an Overt Act"; PTS/SP Pack; HCO Manual of Justice.

6. Pc's behavior or condition or OCA classifies as psychotic. \_\_\_\_\_

Ref: HCOB Ex Dn Series and tapes; HCOB 28 Nov 70.

7. The people near him get in trouble. \_\_\_\_\_

Where some of the answers to this checklist are yes you can be certain an R/S will be found in auditing. HCO handles and Qual programs them for rehabilitation.

### LIST ONE R/Ser

There are, for our purposes, two kinds of R/Sers. (a) Those who R/S on subjects not connected with Scn and (b) Those who R/S on subjects connected to Scientology. The latter is a "List One R/Ser" and it is of great importance to us that they be located and moved off lines when they are part of staffs as their intent is solely to destroy us whatever else they say: their long run actions will prove it.

The definition of a List One R/Ser is anyone who has R/Sed on List One. If that is confirmed fully, that's it. Not all points on the checklist have to be present. The full list of Scientology List One items can be found in HCOB 24 Nov AD 12 "Routine 2-12 List One - Issue One, the Scientology List."

Where there is any doubt as to the validity of a List One R/S, a verification should be done. The procedure is to vigorously Sec Check the pc on the subject of the reported List One R/S. This Sec Check must be done by an auditor who knows R/Ses and can make lists read and pull W/Hs connected with R/S.

#### PCs WHO R/S

Pcs who R/S are given Ex Dn. This does not change even though the pc is not an R/Ser. See HCOB C/S Series 93 and HCOB 10 Aug 76R "R/Ses, What They Mean."

Where a pc R/Ses he will have evil purposes and be on a succumb as a result. R/Ses indicate an area of psychosis which will ruin the pc's life if allowed to go unhandled.

#### SUMMARY

This HCOB in no way changes Ex Dn as a requirement for R/Ses or makes it OK not to handle them.

Staff concerned must be able to identify an R/Ser which is different from someone with an R/S.

### PAST LIFE REMEDIES

*(Note: This Bulletin has been revised to align with the  
New Era Dianetics Series Bulletins Series 1-18.)*

There are many remedies and considerable tech developed over the years on the subject of pcs unable to go earlier than this life. There was no full coverage bulletin which gave the full story on this.

The earliest was getting the pc to locate and run imaginary incidents. This is fully covered in *Science of Survival*, especially Book Two, Chapter Nine, "Imaginary Incidents." The auditor clears the idea of imaginary incidents and running them, then persuades the pc to run them without forcing him.

Delusion tends to run off but the real incidents move into view as well. These imaginary incidents can be run R3RA Narrative *Quad.... Full preassessment procedure (per New Era Dianetics Series tech) of the somatics, emotions, etc., of the imaginary incident, can be incorporated in the Past Life Remedy* as part of the action of grooving in the pc. *(See: HCOB 18 June 78, New Era Dianetics Series 4, ASSESSMENT AND HOW TO GET THE ITEM, and HCOB 28 June 78, New Era Dianetics Series 7, R3RA COMMANDS, for Narrative and R3RA Quad commands.)*

*Another Past Life Remedy would be for the auditor to assess the following list on the pc:*

<i>earlier existences</i>	<i>abandoned pictures</i>
<i>previous existences</i>	<i>past life experiences</i>
<i>past lives</i>	<i>memory</i>
<i>earlier lives</i>	<i>amnesia</i>
<i>unreal pictures</i>	<i>forgetting</i>
<i>other times</i>	<i>leaving bodies</i>
<i>past deaths</i>	<i>past bodies</i>
<i>going backtrack</i>	<i>new bodies</i>
<i>imaginary incidents</i>	<i>lost possessions</i>
<i>invalidated pictures</i>	<i>forgotten pictures</i>
<i>other identities</i>	<i>death</i>
<i>imaginary beingnesses</i>	<i>losing a body</i>
<i>pretended injuries</i>	<i>forgotten memories</i>
<i>pretended illnesses</i>	<i>invalidated memories</i>
<i>disgusting pictures</i>	<i>painful pictures</i>
<i>painful memories</i>	<i>ignored pictures</i>
<i>enforced pictures</i>	<i>fading pictures</i>
<i>fearful incidents</i>	<i>fearful pictures</i>
<i>sad pictures</i>	<i>forgotten times</i>
<i>invalidated track</i>	<i>pretended incidents</i>
<i>only one lifetime</i>	<i>unbelievable pictures</i>
<i>unknown incidents</i>	<i>forgotten families</i>
<i>lost friends</i>	<i>between body experiences</i>
<i>degraded experiences</i>	<i>unreal experiences</i>
<i>deja vu</i>	<i>forgotten beingness</i>
<i>forgotten lives</i>	<i>abandoned deaths</i>
<i>not-ised existence</i>	<i>not-ised existences</i>
<i>invalidated pictures</i>	<i>invalidated memories</i>

*invalidated imagination  
invalidated perception  
things you don't want to find out about*

*not-ised imagination  
abandoned perceptions*

*Any item can be added to the above by the pc.*

*You then take the largest reading item found in the above and ask the pc to describe it briefly. Ask him "In your own words briefly describe (item that read)."*

*Use the exact wording the pa gave you. Treat that wording as an original item exactly as though it had been obtained on the Original Assessment List, New Era Dianetics Series 5.*

*Handle the items the pa gives you exactly as you would handle any original item or items in New Era Dianetics Series 4 (preassessment, etc.)*

*Exhaust all reading items in the above prepared list.*

*Reassess the prepared list and do each of the above steps.*

*When the pa is able to go earlier than this life with good reality then the remedy is complete.*

*Often the pc won't go backtrack because he's a druggie.*

What has happened here is that he restimulated past lives with drugs, got into frightening pictures that he didn't understand and now backs off from ANY bank content except drugs. That is handled with a full Drug RD, including a full battery of Objectives and all reading items run including "no interest" items. The standard approach on any pc is to get *full drug handling done first*. See: HCOB 27 June 78, New Era Dianetics Series 9, DRUG HANDLING.

Another reason could be the pc is in recent shock of having died. Such a case is overburdened and is destimulated with general auditing and then gets a Past Life Remedy if he hasn't gone backtrack. You could even do a Prior Assessment to this life.

The subject of invalidation of past lives and people talking about them out of session or claiming to be famous people invalidates past lives for a pc and is actually related to suppression and PTS phenomena. If you suspect this you could ask "Has anyone been talking to you about past lives or famous people?" From this question possible suppression in the environment can be located and used in a PTS RD, HCOB 9 Dec 71R, Revised 21 Oct 74.

## CHILDREN

Children are usually very burdened cases and can be hard to C/S on Dianetics *if* it hits this life only which will leave the pc wide open to key-in and at the age of 20 be found all keyed-in "with all grades run."

I find they are jammed into fiction stories, education, books and movies and run these like engrams. These children speak of "remembering" all the time. They say they can't go backtrack "because they don't remember." They don't seem to take it from pictures. Contrary to psychology theories and popular belief I find children in very rough case shape, nervous, frightened, griefy, etc. They get stuck in the books and movies they see.

I have handled this in various ways. The easiest way to unburden cases is by Objectives (contact processes) and Recall (ARC S/W, Self Analysis). That is the general approach. You can list for mental image pictures pc has seen in life, in movies or books, *take the best reading one and do full preassessment procedure on it, handling the running item obtained with R3RA Quad. Then repeat the preassessment steps until you get no reads on the Preassessment List you have assessed for that original item.*

*Return to the mental image pictures list, take the next largest reading item and do full preassessment, etc. Follow HCOB 18 June 1978, ASSESSMENT AND HOW TO GET THE ITEM (New Era Dianetics Series 4) exact/y.*

*Preassessment can also be done on unwanted attitudes, emotions, pains, etc. (the Preassessment List) one had as a child. These would then be fully handled as above to unburden the case.*

A direct approach is to ask “What book or movie were you particularly interested in?” You’ll usually find that the person had a stuck picture on it. Then ask “Did you ever have anything to do with that sort of thing?” Then they go into it because you’re asking for an E/S. You could then run out the earlier incident *Narrative R3RA Quad* and you’d be away.

Where the pc is stuck in upsetting incidents from movies or books you can list for “Bad incidents you’ve seen or read about,” take the best reading one *with pc interest and run it out R3RA Narrative Quad*. Then handle with preassessment procedure, per above. Be sure to accept stories, TV, movies or books as these are fully valid to run.

## REVIEW

A Scientology review action that can be done is to assess auditors, auditing, past lives, Dianetics, Scientology, time, preclears and erasure. Then prepcheck in order of reads, reassess and prepcheck. This is a valuable action to do before ARC S/W Triple and often by itself will handle those unable to go past track.

A further Scientology approach would be to assess the past, memory pictures, past lives and prepcheck in order of reads. Then L&N “Who or what would have no future?” then L&N “Who or what would it have been awful to have been?” These items can be checked and used in a PTS RD or can have their intentions listed and run as part of Ex Dn handling.

## SUMMARY

The technology on past lives is important for a C/S to know, especially the Dianetics C/S.

The subject usually resolves with a Drug RD and general auditing but when it doesn’t you have these remedies to use.

Use them well.

**VANISHING CREAM AND FALSE TA**

Ref: HCOB 24 Oct 71R FALSE TA  
HCOB 12 Nov 71RA FALSE TA ADDITION  
HCOB 15 Feb 72R FALSE TA ADDITION 2  
HCOB 18 Feb 72R FALSE TA ADDITION 3  
*HCOB 21 Jan 77* FALSE TA CHECKLIST  
HCOB 23 Nov 73RA DRY AND WET HANDS  
MAKE FALSE TA

After further and more extensive tests vanishing creams have proven unsuitable as a solution to dry hands.

In some cases vanishing creams have actually dried out pcs' hands and caused a false high TA.

Vaseline Intensive Care Lotion has proven very workable when applied to a pc's hands, rubbed in and any excess wiped off.

Another cream called Locorten was also found workable but it contains cortisone which burns the eyes if you rub them with your hands. Further tests are underway on Locorten without cortisone but these are not yet complete.

Another hand cream formula was found 90% effective upon test and is somewhat similar to the Locorten formula without cortisone. Its formula is:

75 grams Emulsified Cetomacrofolis Wax  
(80% cetostearyl alcohol and 20% cetomacrofol 1000)  
100 grams Cetyl Alcohol  
20 grams Sorbitol Solution - 70%  
1 gram Sorbic Acid  
up to  
500 grams water.

You could have this cream made up by any pharmacist.

**A NOTE ON FOOTPLATES**

*Footplates obscure F/Ns and reads.*

*Their use is hereby cancelled.*

**FALSE TA HANDLING**

It has never been OK to call a pc's attention to his hands or TA or meter during a session. Therefore when handling a false TA get the TA in range with hand cream or can size or grip *before* session.

Don't check for hand cream or can grip or change cans during the session except as directed on correction lists such as a C/S Series 53RJ under false TA.

Otherwise it throws the pc out of session and puts his attention on his TA.

Use the session for auditing.

# **THE TECHNICAL BULLETINS OF DIANETICS AND SCIENTOLOGY**

**by L. Ron Hubbard**

**Published August 1976**

The Technical Bulletins of Dianetics and Scientology represent the complete reference work of Dianetics and Scientology technical bulletins.

The first eight volumes of this big ten volume set contain all of Ron's technical bulletins from 1950 to 1976. This is the complete time track of Ron's written technical materials.

The ninth volume contains all of the technical series issues, such as the Basic Auditing Series, Expanded Dianetics Series, Cramming Series, and many more.

The tenth volume contains the famous C/S Series plus a 250-page master subject index. You can find all of the references for any subject listed in this index. Over 20,000 entries!

Four-way indexing makes any technical reference easy to find. Each volume has the bulletins listed by date, by date with a summary of contents, alphabetically by title, and a subject index in each volume.

Ten hardbound volumes, all the size of the Organization Executive Course Volumes (7 3/4" by 12"), 5,600 pages total, each volume over 500 pages thick and individually indexed plus a cumulative index for the set. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Church of Scientology Publications Organization U.S., 4833 Fountain Ave., East Annex, Los Angeles, California 90029, U.S.A.; or Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark.

DEFINITION OF A ROCK SLAM*

**R/Ses, WHAT THEY MEAN**

*(HANDLING OF CONFESSIONALS CHECKSHEETS)  
(PTS PROCESSING CHECKSHEETS)  
(EXPANDED DIANETICS CHECKSHEETS)  
(METER OPERATION CHECKSHEETS)  
(VARIOUS RUNDOWN CHECKSHEETS)*

*The crazy, irregular, left-right slashing motion of the needle in the E-Meter dial is called "A rock slam" or "R/S." It repeats left and right slashes unevenly and savagely, faster than the eye easily follows. The needle is frantic. The width of an R/S depends largely on sensitivity setting. It goes from one-fourth inch to whole dial. But it slams back and forth.*

The term was taken from a process in the 50s which sought to locate "A rock" on the pc's early time track; the "slam" is a description of the needle violence, meaning it "slams" back and forth. For a time all left-right motions of the needle were considered and called "rock slams" until it was found that a *smooth* left-right flow was a symptom of release or key-out and this became the "floating needle." There is yet another left-right motion of the needle called the "theta bop." This occurs when the person has or is trying to exteriorize. "Theta" is the symbol for the person as a spirit or goodness; "bop" is an electronic term for a slight hitch in the sweep of a needle. A "theta bop" hitches evenly at each end of the sweep left and right and is very even in the middle of the sweep.

Neither the "floating needle" nor the "theta bop" can be confused with a "rock slam." The difference of the rock slam is uneven, *frantic slashing left and right*; even the distances traveled left and right are likely to be different in each swing from the last.

A "rock slam" can be caused sometimes by leaving rings on the pc's fingers or by a short circuit in the meter or by the cans (electrodes) touching something like a dress. These are the mechanical considerations and must be ruled out before the pc can be considered to have "rock slammed." If the pc is not wearing rings and if the meter needle is calm with the lead unplugged, if the lead is okay, and if the pc is not jiggling the ends of the cans against his clothes, then the pc's rock slam is caused by the pc's bank .

One has to be very careful about the correctness of the pc actually having rock slammed while on the meter, that it was actually observed, that it was not mechanically caused as above. One puts the R/S down on the worksheet and also gives exactly what was asked. And also that the mechanical points were checked without distracting the pc.

ONE MUST ALWAYS REPORT A ROCK SLAM IN THE AUDITING REPORT, NOTE IT WITH SESSION DATE AND PAGE INSIDE THE LEFT COVER OF THE PC'S FOLDER AND REPORT IT TO ETHICS INCLUDING THE QUESTION OR SUBJECT WHICH ROCK SLAMMED, PHRASED EXACTLY.

Why? Because the rock slam is the most important needle manifestation! It gives the clue to the pc's case.

In 1970 I began a full-scale research project into the subject of insanity and its relationship to cases and case gains and suppression. It was only then that the full significance of the rock slam was unearthed. This research developed into what is now called EXPANDED DIANETICS, a series of special processes and actions with their drills and training which permits the auditor to handle a specific case type. This was, by the way, Man's first system of positive detection and handling of psychosis and the first full understanding of what psychosis is.

While this bulletin is not in any way a two-minute course in or a substitute for full training in Expanded Dianetics, any auditor who audits, Sec Checks, or handles people on a meter has to know what a rock slam is and how it behaves and what he should do about it.

The first thing is to be able to recognize one and to quickly with the scan of the eye and unplug of the meter cord (without any distraction of or notice by the pc) make the checks for a mechanical rock slam as given above.

You can make a meter "rock slam" with no pc or cord connected to it by (a) turning it on; (b) put the sensitivity at perhaps 2; © put the needle at "set"; (d) rapidly, very rapidly, move the TA back and forth maybe a quarter of an inch and do it unevenly. *That*, if you did it very fast and unevenly, would be something that resembled a rock slam. But no matter how fast you made your fingers move, a real R/S is a trifle faster. If you do that you will see what an R/S looks like. The needle in this experiment is not made to hit the sides of the meter.

Now if you take the same set-up and smoothly slowly move the tone arm back and forth about 2 times a second without any roughness and the same distance right and left, you will have a floating needle. Note it very well as this comes at a time of release and is the thing a good auditor hopes to see and gives him the end-off signal for a process. It has to be well known as you NEVER bypass one in a session and to do so makes an uncomfortable pc. (The pc will often cognite—get a realization about himself or life at this point and one does not stop him from doing this.) This is the thing you indicate to the pc. You don't ever indicate rock slams or theta bops. When you see it, and without stopping or interrupting the pc's cognition, you always say, "Your needle is floating."

Now the theta bop can also be shown to yourself by you. Set up the meter as above. Only this time, you smoothly swing it to the right and give it a tiny twitch in the same direction. Then you smoothly, at once, swing it to the left and give it a tiny twitch in the same direction. Then do it to the right. And so on. This is a theta bop. It is different than a floating needle only in that it hitches at each end of the swing. So learn to recognize it.

There is a vicious smooth right direction slash that occurs when a pc hits a certain area of the bank that is called a "rocket read" and there is of course the small fall, long fall (which both go to the right and indicate a charged question or reaction) and there is the gradual rise to the left. But these do not repeat back and forth which is the characteristic of the rock slam, floating needle and theta bop.

All right, so we know exactly what it looks like when we talk about a ROCK SLAM as a read of the meter. We know how it can be mechanically caused. And we know what we have to record and report when it is seen.

But exactly *what* does a rock slam mean with regards to the pc?

If you don't know this you can miss on the pc, on the case, on the org and humanity.

A ROCK SLAM MEANS A HIDDEN EVIL INTENTION ON THE SUBJECT OR QUESTION UNDER DISCUSSION OR AUDITING.

Two things underlie insanity, or to be more specific, there are two causes and conditions both of which have been lumped together by man and called insanity. He could not of course define it as he didn't know what caused it.

The first of these two things does not concern us overly much here and is the subject of a separate checksheet and training and is called PTS or Potential Trouble Source handling. A "PTS" is a person who has been or is connected with somebody who has evil intentions. A PTS can feel uncomfortable in life or be neurotic or go insane because of the actions upon him of a person with evil intentions. Most of the people in institutions are probable PTSes.

The second of these two things is insanity caused to the individual himself (let alone others) by hidden evil intentions.

The extent of these intentions and what the person will do (and hide) in order to carry them out is quite shocking. These people are covert or overt criminals and many of them are insane—meaning beyond all rationality in their acts. Because their evil intentions are hidden and because they are often very plausible such individuals are what make "behavior so mysterious" and "Man look so evil when you see what Mankind does" and all sorts of fallacies.

It is this last type, the chronic, heavy rock slammer, which Expanded Dianetics handles.

One rock slam doesn't make a psychotic. Or a total menace to everyone. But it does mean there could be more and it might in rare cases mean you have, seeing enough of these R/Ses, a very dangerous person on your hands and in your vicinity. And that person must be handled by Expanded Dianetics.

You won't see a great many rock slams in auditing people so you could be totally thrown off by surprise when you see one. And mess it all up because you are surprised. So know what it is and don't get all quivery and make mistakes and blow your confront. Just carry on.

If you don't note the EXACT question that was asked and the EXACTLY worded statement the pc made when the R/S was seen, you can muck it up for the Expanded Dianetics guys. They won't be able to get it turned back on again easily and will lose a lot of time. So you have to be sure your auditing report is accurate, that the R/S is written BIG on the column and circled and, no matter what else you do in the session, you have to get it recorded in the left front cover of the folder giving the date and page of the session and you have to report it to Ethics. And also you don't third party the pc and give him a bad time in the session because of it.

Now R/Ses most easily turn on during Sec Checks or Integrity Processing or when pulling withholds or trying to investigate something. So the people who see these most often are those engaged in that activity and not routine auditing (when they can also but more rarely turn on). Further the most likely person to collide with "needing to be Sec Checked" is an R/Ser, which again increases the numbers of R/Ses seen in these activities compared to routine auditing. But a very heavy R/Ser will also turn them on in routine auditing.

It is the exact *point* of the R/S in the session, the exact question that was asked and the exact subject or phrase where the R/S turned on that are important. And these are very important as then the person can be fully handled with a full Expanded Dianetics Rundown by a qualified Expanded Dianetics Specialist. When, of course, the person gets to that point on his Grade Chart. The Grade Chart points are after Dianetics (like Drug RDs, etc.) but before grades, after grades but before Power, after Power but before Solo, and after OT III or after any single grade above OT III. These are the only

points where Expanded Dianetics can be delivered and the R/S fully and completely handled.

Now here is how you can turn off an R/S and mistakenly think it is handled:

1. The overt-motivator sequence has two sides. One is what the person has done (overt) and what is done to the person (motivator). You can ask, when the person R/Ses on something, if anyone has ever INVALIDATED him on that subject or action. He will find some and the R/S will turn off AND WON'T EVEN BE FAINTLY HANDLED BUT ONLY SUBMERGED. One can believe he has "handled" the R/S. Not true. He has just turned it off and maybe made it harder to find next time. One can ask what the person has done TO the subject mentioned and while this may unburden the case and make the person a bit better, the R/S is NOT handled, only turned off or submerged. It's almost as if there are so many overts and motivators on this subject or in this area that the push-pull of it makes the needle go wild (R/S). And indeed, this may be the energy cause, in the bank, of the needle reaction. But neither overt nor motivator handles an R/S finally because the CAUSE of the R/S is an INTENTION to harm and it isn't all that likely the basic intention will be reached.
2. Another apparent way the R/S can get "handled" and isn't is to take the R/Ser earlier similar on the subject of the R/S. The R/S will probably cease, go "clean." But in actual fact it is still there, hidden.
3. The third way an R/S can be falsely "handled" is to direct the person's attention to something else. If, when this is done, the exact subject of the R/S is not noted by the auditor, it will be difficult to find it again when the person goes into Expanded Dianetic auditing.
4. Yet another, and probably the last way to falsely "handle" an R/S is to abuse the person about his conduct or behavior or the R/S, or to "educate" him to do better, or to "modify" his behavior with shocks or surgery or other tortures like the psychiatrists do. In other words one can seek to suppress the R/S in numerous ways. Maybe the R/S won't occur (being too overburdened now) but it is still there, buried very deep and possibly beyond reach now.

So if you understand the above four points you will see that although you can ease off the R/S, you have not handled it. It has merely gone out of sight.

All right, what then DOES HANDLE an R/S?

I warned you that this isn't a two-minute course on Expanded Dianetics and it isn't. An R/S is HANDLED by a fully qualified Expanded Dianetics auditor delivering full Expanded Dianetics to the person at that point on the Grade Chart where Expanded Dianetics is supposed to be delivered. If anyone thinks it can be done effectively any other way or if he C/Ses it to be done and the auditor is stupid enough to try to do that C/S, then it's Committees of Evidence and suspended certificates all around.

With that warning, and only with that warning, I can briefly state what has to be done with the case. This is not what YOU do if you are not delivering full Expanded Dianetics at the right point on the Grade Chart. It is a brief statement so that you can understand what lies under that R/S.

The pc with an R/S on any given subject and who R/Ses while discussing that or related subjects HAS AN EVIL INTENTION TOWARD THE SUBJECT DISCUSSED OR SOME CLOSELY RELATED SUBJECT. The pc intends that subject or area of life nothing but calculating, covert, underhanded HARM which will be at all times carefully hidden from that subject.

Thus, the Expanded Dianetics Specialist, in handling that case (at the proper point on the Grade Chart) has to be able to locate each and every subject and question and R/S in that person's folder as noted by Sec Checkers and previous auditors or

Cramming Officers or Why Finders. He has to have the complete list of R/S subjects. If they are noted as to session date and page and if all Sec Checking papers and cramming papers are in that person's folder, then the Expanded Dianetics Specialist can do a full and complete job. Otherwise he has to do a lot of other time wasting actions to get the R/Ses found and turned on again.

What the Expanded Dianetics Specialist actually does is locate EXACTLY the actual evil intention for every R/S on the case and handle each one to total conclusion. When he is finished, if he has done his job well, the person's behavior will be magically improved and as to his social presence, menace and conduct, well that will be toward survival.

When you see an R/S, if you are not an Expanded Dianetic Specialist doing Expanded Dianetics at the correct point on the Grade Chart, you don't say "Hey, you've got an evil intention!" and you don't ask "Say, what's that evil intention?" or do corny things like that because you'll get the pc self-listing, you may get a wrong item, you won't know what to do with it and you're just likely to get the auditing room wrapped around your neck right there.

No, you quietly note it, make sure it isn't a mechanical fault, write it big on the worksheet, write down everything the pc is saying swiftly, note what question you were asking and let the pc talk and ack him and go on with what you are doing with the pc at the time. And after session you note it in the left-hand cover of the folder and send a report to Ethics.

And some day, when he's done his Drug Rundown or gotten to one of the points on the Grade Chart where a full XDn can be done, why then it will be handled. And a good C/S will program or tip the case for that to be done.

So that's the know-how you have to know about R/Ses to really help the guy and the society and your group.

We're not in the business of curing psychos. The governments at this writing pay the psychiatrists billions a year to torture and kill because of R/Ses they don't know anything about. The crime in the society out there is caused by people who R/S. Stalin, Hitler, Napoleon and Caesar were probably the most loaded R/Sers of all time unless it was Jack the Ripper or your local friendly psychiatrist.

So know what you are seeing when you see it and know what to do about it. And don't kid yourself. Or vilify or mow down people who R/S; we're not in that business.

And the Expanded Dianetic Specialist *and* the pc someday will love you dearly for knowing your job and doing it right.

# **THE VOLUNTEER MINISTER'S HANDBOOK**

by

**L. Ron Hubbard**

**Published October 1976**

In *The Volunteer Minister's Handbook*, L. Ron Hubbard has made available many of his discoveries in the fields of communication and social interaction, which can be used by anyone to help themselves and others.

How do you deal with an emotional upset? How do you salvage a broken marriage? What can you do when there is an emergency or a sudden accident? How do you handle a drug problem or alcoholism? What could you do to help a runaway teenager? A failing businessman? What is the right way—the effective way—to handle these situations and thousands of situations like them?

As a Volunteer Minister, you'll know the answers.

Simply being critical of people or situations accomplishes nothing. When a person finds fault with something, it implies that he wants to do something about it, and would if he could.

By studying this book, you can gain the knowledge you need to really help others lead happier lives. And you'll be helping yourself too.

676 pages, 66 brilliant full-color photographs mostly taken by L. Ron Hubbard, index, glossary, hard cover with dust jacket. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Church of Scientology Publications Organization U.S., 4833 Fountain Ave., East Annex, Los Angeles, California 90029, U.S.A.; or Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark.

PTS/SP Checksheet

Issue II

**PTS HANDLING**

Once in a while I hear of PTS handlings that “didn’t work” or “still PTS” or some such. Or I’ll come across such extremes as a PTS is virtually an incurable leper to be shunned and kept isolated or almost everyone is PTS to some degree so what can you really do about it. The basic thing to realize is that PTSness, like any other case condition afflicting Man, responds to plain old standard tech. But one has to have studied and understood that tech to apply it, naturally.

I recall years ago in handling PTSES, that *none* of them at first knew what PTS really meant or what it was all about even when they used the term freely! So I recently called for a pilot to see what would be the effect of a study method of curing PTSES.

FIRST PILOT

Before the final pilot was done, an earlier pilot was attempted by an Aide which was not conducted as laid down. CS-5 reviewed the failed pilot to find why so many failed on it. 4 out of 6 were never completed and the 2 that did failed.

CS-5 reported “What I found on these was that they uniformly were not PTS in the first place or were PTS but that was not the major trouble with the person. Three of the cases (2 on auditing and 1 on study) were out-ethics, R/Sing, Exp Dn cases who were trying to use PTS as the reason for their behavior. Thus handling their PTSness would not resolve anything. The most interesting case here was the study one who realized that he was not PTS and that that had been a wrong indication and that what was really wrong with him was that he had bad intentions and was committing overts. One of the audited cases had a similar realization but has not done as well on post and did get very sick 2 months or so later. Of the other 3 pilot cases in this first batch one could only come up with in-the-org terminals so is another Exp Dn case and the other 2 assigned to study were severely bugged students so never got off the ground (one has now finished the course 4 months later). So that’s what happened to the original pilot.”

The second pilot was then ordered to determine the original possibility, that people could study their way out of being PTS.

SECOND PILOT

Three were put onto the PTS/SP Checksheet to study and three were handled by internes who had done the PTS/SP Checksheet themselves. The cases handled by auditing/interview steps completed their handlings within 10 hours. The study cases averaged 4-6 weeks of part-time study. Two studiers from the original pilot also completed the course. All were then watched for bad originations to the Examiner, medical reports, ethics trouble or trouble on post. In all cases, including those not yet complete on study, none of these indicators showed up. One case originated case troubles but this turned out to be one of the “Exp Dn” cases not PTSness.

On the study pilot the daily reports and success stories on completion uniformly mention more certainty, more stability and being more at cause with the data. Of particular interest is that three of the participants “cogged” they were not actually PTS (yet evidence of real PTS sits had gotten them on the project) but while they were studying they would align past PTS handlings they didn’t fully understand at the time, spot why past PTS terminals were correct or incorrect, spot terminals who gave them a hard time in the past and see why certain people behaved the way they did. In short it

appears the studiers were blowing charge on their past PTS handlings and on terminals in their life almost like an auditing session and while they were saying *not* PTS, *no longer* PTS (now that they had the data) is probably closer to the truth. All are reported to be doing well on post with no illness, roller-coaster or ethics trouble.

The PTS handlers (who had done the PTS/SP pack) were of particular use where the person had a study bug that needed handling before study could be done and assisting in working out the handlings for PTS sits that were uncovered. Also S&Ds and 10 Aug HCOB handlings and PTS interviews are *not* Solo actions. And it takes hours, not intensives to handle.

### FALSE PTS

As noted from the first pilot false PTSness must be watched for as unhattedness, ignorance of Scientology basics for handling life, past bad auditing uncorrected as well as unhandled bad intentions and personal out-ethics can be mistaken for PTSness and won't resolve as PTSness. This should be suspected when your "PTSES" start going above 20% of staff and public.

### SUMMARY

We have had the tech of PTSness for years, but it wasn't being fully used and then got mixed in with Exp Dn. PTSness can be handled routinely when the tech is fully known and applied. A PTS person can be brought to cause over his situation through study of the PTS tech. This is vitally important for staff. We can handle and the person himself can handle.

There is no substitute for understanding.

Remimeo  
All Orgs  
All HGCs

### INTERNSHIP AND HGC

Effective 1 December 1976

No new auditor may audit for the HGC, from the Tech Training Corps or field or wherever, who has not done the internships for his Class.

Any auditor now C/Sing or auditing may continue to do so until 1 Feb 77 providing he does his full internship part-time and off production hours. The completion of such internship must occur before 1 Feb 1977.

Interne supervisors or Qual Secs may not hold back internes in completion by extended and unreasonable auditing requirements.

Until 1 Feb 1977, auditors auditing in the HGC or C/Ses C/Sing for it may count their HGC successes and hours as internship auditing.

**DELIVERY REPAIR LISTS**

THERE'S NOTHING WRONG WITH YOUR CF, YOUR PC, YOUR STUDENT, STAFF MEMBER OR YOUR OWN DELIVERY THAT A PREPARED LIST WON'T HANDLE.

“ARC broken CFs,” blown students, demanded refunds, low success stories, withdrawn auditors, ineffective staffs are pretty silly problems to have these days.

Many years ago I developed a system called “Prepared Lists.”

These isolated the trouble the pc was having in auditing without taxing anyone's imagination and sending the auditor into a figure-figure on the pc.

These prepared lists were assessed on an E-Meter. One took up the biggest read first and then cleaned up all other reads.

Time has gone on. The system of prepared lists has been expanded to include not only pcs but students and staff.

It may have gone overlooked that such lists now include anything that could happen to a pc or student. In other words, prepared lists have become very thorough.

WHO CAN USE

The only reason ever found for prepared lists not working was an auditor's weak TR 1 and inability to read a meter.

Even this difficulty has been handled by “Qual Okay to Audit” checksheets.

Before an auditor should be let near a prepared list he should be put through at least six “Okay to Audit” short checksheets in Qual.

Qual is *not* fast flow. Things done in Qual are Method 4 Word Cleared and star-rated, with all demos and drills. *Only* if this is done can you have some certainty that a prepared list will read on the pc and that the pc or student will get handled.

These Qual “Okay to Audit” checksheets are done AFTER a student has been trained and classed as an auditor. The “Okay to Audit” is for auditing in an org whether staff or interne.

The checksheets are:

- (1) Board Policy Letter 14 Nov 74RA Issue I  
QUAL OKAY TO OPERATE AN E-METER
- (2) Board Policy Letter 14 Nov 74R Issue II  
QUAL OK NO. 2R, QUAL OK TO ASSESS PREPARED LISTS

- (3) Board Policy Letter 14 Nov 74 Issue III  
QUAL OK NO. 3, QUAL OK TO AUDIT LISTING AND NULLING
- (4) Board Policy Letter 14 Nov 74 Issue IV  
QUAL OK NO. 4, QUAL OK TO CORRECT LISTING AND NULLING
- (5) Board Policy Letter 8 Nov 71RC  
QUAL OK NO. 5RA, INTERNESHIPS ELECTRONIC ATTESTATION  
FORM
- (6) Board Policy Letter 20 July 70R Issue III Revised 25 Nov 74  
TWO-WAY COMM CHECKSHEET

Only when these have been thoroughly and honestly studied, drilled and done should an auditor be permitted to assess prepared lists on pcs and students.

It takes standard auditor training to handle the points found reading on a list.  
CASE SUPERVISING

A C/S who is trained as a C/S must know what lists to use. And he must see to it that his auditors are trained via the above checklists. Otherwise the lists just won't read and the C/S, the pc and the org are left up the creek!

LOTS of "lists that didn't read" are found in folders. I used to make a practice of just having them nulled again by an auditor whose metering and TRs were good and **THEY READ AND THE CASE RESOLVED.**

#### PC LISTS

1. HCO BULLETIN 24 NOVEMBER 1973RD, C/S SERIES 53RK, "SHORT HI-LO TA ASSESSMENT C/S." This is a famous list. It solved the long long problem of high and low TAs and really solved it. Unfortunately it has a name of being done for high and low TAs. In truth it practically handles the whole repair of any difficult case today! One assesses it Method 5. One handles the reads from the top down. It can also be reassessed several times until it F/Ns on a whole M5 assessment. It is quite remarkable what it will do for a case that has been running badly or is bogged, quite in addition to handling high and low TAs!

2. HCO BULLETIN 1 JANUARY 1972RB, "LIX HI-LO TA REVISED." This is the same list as C/S 53RK above. It has been brought up-to-date. It gives the *whole question* for each subject as in C/S 53RK and the same handling. It is easier to use on a pc whose attention wanders or who is not very familiar with terms.

3. HCO BULLETIN 29 OCTOBER 1971R, "INT RUNDOWN CORRECTION LIST REVISED." As Interiorization-Exteriorization problems (when they exist) have to be handled before any other thing is handled, an auditor sometimes assesses another list and then finds himself doing this list. "Int" appears on many other lists and when it reads one does this list. One has to go back and complete the original list of course. "Int" problems cause high TA, headaches and general upset. I've begun to think after seeing a lot of headache cases that maybe only Int-Ext problems cause headaches! Instead of repairing Int, sometimes auditors will run it again and again. Also Int can go flat to cog VVGIs on an early flow, even a recall flow. Then if one insists on finishing the Int RD, one has trouble and I mean trouble. So this is a valuable list.

4. HCO BULLETIN 15 DECEMBER 1968R, "L4BR" "FOR ASSESSMENT OF ALL LISTING ERRORS." An out list (meaning one done by listing and nulling, not a prepared list) can raise more concentrated hell with a pc than any other single auditing error. The amount of misemotion or illness which a wrong list generates has to be seen to be believed. When a pc is ill after a session or up to 3 days after, always suspect that a listing action done on the pc had an error in it. It **MUST** be corrected. This *prepared* list L4BR corrects lists of the listing and nulling variety. It can be run on old lists,

current lists, general listing. There has been no reason to revise this since 2 June 1972. It really works!

5. HCO BULLETIN 19 MARCH 1971, "LIST 1-C." This is the updated version of the earliest list ever compiled. It is used during sessions at the auditor's discretion and in other ways. It also prevents some pc from insisting "It's an ARC Brk" (which never clears) when it's really a withhold, a common error. It can also be addressed to life. Usually when a session blows up, an L1C is used fast rather than just sit and ack!

6. HCO BULLETIN 11 APRIL 1971 RA, L3RD "DIANETICS AND INT RD REPAIR LIST." This is the key list of Dianetic auditing and is the Dianetic standby in case of trouble. As the Int RD is also Dianetics, while doing it, one uses L3RD for trouble.

7. HCO BULLETIN 2 APRIL 1972RB ISSUE II, EXPANDED DIANETICS SERIES 3RB, "L3 EXD RB." This is the prepared list for Expanded Dianetics.

8. HCO BULLETIN 21 JANUARY 1977, "FALSE TA CHECKLIST." This was a very important discovery about TAs. One uses this when another list indicates a false TA or one is suspected. Auditors have been known to get so desperate about a pc's TA that they falsified worksheets. This (and C/S 53RK) make that totally needless. I've seen this change a case from despair to VVVVGIs!

9. HCO BULLETIN 16 APRIL 1972, "PTS RD CORRECTION LIST." It also gives the expected actions of a PTS Rundown. Doing PTS Rundowns without this prepared list handy can be risky.

10. HCO POLICY LETTER 7 APRIL 1970RA, "GREEN FORM." This was the earliest Qual Saint Hill weapon (26 June 65) for case cracking. It is modernized up to 29 Sept 74 in the above issue. Used for general case clean-up particularly on an out rud type pc or when ruds won't fly. It is not used to handle high or low TA.

11. HCO BULLETIN 30 JUNE 1971R, "EXPANDED GF 40RB." Called "GF 40X." This is the "7 resistive type cases" at the end of the Green Form expanded out. This is how you get those "earlier practices" and other case stoppers. This done well gives a lot of extensive work in Dianetics. It's lengthy but really pays off.

If you were to do a C/S 53RK Method 5, all handled, and to an F/Ning list and then do a GF 40XRB, all handled, reassessed to an F/Ning list you would "crack" most cases to a point where they ran well.

12. BOARD TECHNICAL BULLETIN 28 MAY 1974R, "FULL ASSIST CHECKLIST FOR INJURY AND ILLNESS." While you don't put the pc on the cans for this one, you mark it as to the state the pc is in and it says what you do for illness and injury. This one, done correctly, is how the minister runs the medico out of business.

#### STUDENT LISTS

13. HCO BULLETIN 15 NOVEMBER 1973R, "FEAR OF PEOPLE LIST-R." This is for the handling of timid tech staff who back off from handling rough pcs.

14. HCO BULLETIN 15 NOVEMBER 1974, "STUDENT REHABILITATION LIST." This is the one that gets a bogged student sailing, gets a blown student back, gets an auditor back auditing. It even cures the revolutionary student! This is the master list for students—even students in grammar schools and colleges! A real winner.

15. BOARD TECHNICAL BULLETIN 27 MARCH 1972R ISSUE I, "STUDENT CORRECTION LIST, STUDY CORR LIST-1." A list for correcting students on course.

## STAFF LISTS

16. HCO BULLETIN 27 MARCH 1972R ISSUE II, "COURSE SUPERVISOR CORRECTION LIST, STUDY CORR LIST 2R." This is to get the Course Supervisor going well.
17. HCO BULLETIN 27 MARCH 1972RA ISSUE III, "AUDITOR CORRECTION LIST, STUDY CORR LIST 3." This one corrects auditors who are having a rough time.
18. BOARD TECHNICAL BULLETIN 27 MARCH 1972RA ISSUE IV, "CASE SUPERVISOR CORRECTION LIST, STUDY CORR LIST 4." This one corrects Case Supervisors, gets them back on the rails.
19. BOARD TECHNICAL BULLETIN 27 MARCH 1972RC ISSUE V, "EXECUTIVE CORRECTION LIST, STUDY CORR LIST 5." This prepared list locates an executive's troubles and indicates handling.
20. BOARD TECHNICAL BULLETIN 4 FEBRUARY 1972RD, "STUDY SERIES 7." A real long workout for a person who won't study or who is having real trouble on a course. Goes after it in depth. Can be used as a second list to Student Rehab List above or by itself.
21. HCO BULLETIN 21 JULY 1971RD, WORD CLEARING SERIES 35RD, "WORD CLEARING CORRECTION LIST REVISED." Usually written "WCCL." This is the famous list that goes with Method 1 Word Clearing or with any Word Clearing bog. Also corrects high and low TA WHEN it occurs in a Word Clearing session. This is the Word Clearer's friendly friend.
22. HCO POLICY LETTER 9 APRIL 1972, "ETHICS, CORRECT DANGER CONDITION HANDLING." Locates the trouble area that got him into a Danger condition. Goes with the famous "3 May P/L" HCO PL 3 May 1972.
23. HCO POLICY LETTER 13 MARCH 1972, "ESTABLISHMENT OFFICER SERIES NO. 5." An invaluable text and list for PRODUCT CLEARING. It's a list of what you do to clear products. From it a prepared list can be made.
24. HCO POLICY LETTER 23 MARCH 1972, ESTABLISHMENT OFFICER SERIES 11, "FULL PRODUCT CLEARING LONG FORM."
25. HCO POLICY LETTER 12 JUNE 1972, DATA SERIES 26, ESTO SERIES 18. A list you assess to locate trouble an evaluator might be having. Also for slow evaluators or slow students on a Data Series Course.
26. HCO BULLETIN 28 AUGUST 1970RA, "HC OUT-POINT—PLUS-POINT LISTS RA." This is a prepared list that locates the out-points in a person's own thinking. When people can't seem to evaluate (or think brightly) this list will do wonders. Some Data Series Course students make no progress at all until they are assessed on this list and handled.
27. HCO BULLETIN 2 DECEMBER 1974, "DYNAMIC SORT OUT ASSESSMENT." (Revised from BTB 4 Dec 71 Issue II, replacing HCOB 4 Dec 71 Issue II R-I C Assessment by Dynamics. ) This gets those dynamics that are charged and handles them. Increases social personality and even can shift valences.

## CONFIDENTIAL AND AO LISTS

28. *HCO BULLETIN 21 SEPTEMBER 1970, "LP1." This is a Power Process correction list for Power Processes. It is not used for Power Plus.*

29. *HCO BULLETIN 13 MAY 1965, "LIST 6 EW." This list is used in locating bypassed charge when auditing R6EW.*
30. *HCO BULLETIN 2 AUGUST 1966, "LIST 7 CORRECTED." This list is used for students Solo auditing on Grade VII.*
31. *HCO BULLETIN 12 OCTOBER 1969RA, "LDN OT III RA." This is the list used to handle bypassed charge on OT III.*
32. *HCO POLICY LETTER 14 JANUARY 1972, "THE GREEN GREEN FORM REVISED." This form is called a "Green Green Form" because it can be done over and over. It is an auditing form used on OT III.*

#### **REPAIR LIST FOR PREPARED LISTS**

*HCO BULLETIN OF 21 DECEMBER 1975R, "REPAIR LIST FOR PREPARED LISTS" is a basic prepared list which when used will clean up bypassed charge on improperly done past prepared lists and handle a pc who begins by protesting a repair list being done.*

*This list is only done if the pc sees a list and goes Bls or protests a "C/S 53" being done. The auditor must have very good obnosis and be well trained to do this switch of actions smoothly.*

*The Repair List for Prepared Lists should be reassessed and all reads handled until it F/Ns on assessment or pa feeling happy about receiving prepared lists and shows no further protest on the subject.*

#### **WORD LISTS FOR PREPARED LISTS**

Nearly every prepared list has all its words on a separate sheet, ready for Word Clearing on the pc. All the words on a list are cleared on a pc without repeating the same word or asking the list question. Such lists are issued for auditor convenience.

A list of these word lists is being issued as HCOB I Dec 74 so that you can match them to the prepared lists in this bulletin.

#### **OTHER LISTS**

From time to time when a need for prepared list is found new ones will be issued on different subjects.

One can REPAIR a pc or student or staff member. One can also FORWARD a case into new areas with other prepared lists.

#### **MIMEO**

Some orgs backlog their mimeos.

The AVAILABILITY of lists to auditors is something which should NOT be neglected. It is highly uneconomical as one loses re-signs and students and staff when prepared lists are in non-existence in an org or even short supply.

Tech is the atomic fuel an org runs on.

**KEEP PREPARED LISTS IN SUPPLY FOR USE.**

## TRANSLATED ISSUES

In non-English speaking orgs lists must be very carefully translated and mimeoed for use. In such orgs, more than any others, great care must be taken to have and use lists as they keep tech straight where it tends to go hearsay and verbal.

So, that's quite an array of prepared lists, isn't it?

If they are not in full use in your org don't wonder about your Delivery Stats Why. Or your org and CF problems. It's a lack of full use of this tech.

Hidden in these prepared lists is a wealth of tech that explodes into wins for your org. your CF, your pcs and students.

**AUDITING REPORTS, FALSIFYING OF**

Probably the most covert and vicious crime in auditing is falsifying an auditing report.

At first glance, to someone who is trying to PR himself as an auditor or to escape consequences of session goofs, this might not seem to be the huge crime that it is.

When an auditing report is falsified, means of repairing the pc are denied, out tech and a need for restudy or redrilling of materials is covered up, out tech is spread about and the repute of the org and Scientology are at risk.

There are many ways of falsifying an auditing report. Chief amongst them is omission of vital data in the report. Another is faking the things run or the pc's actions or reactions.

To the person doing this it may seem that he has covered up his incompetence but in actual fact it is eventually detected.

A twice declared person recently messed up the cases of several VIPs by simply omitting some of their disagreements with what was being done.

Three SPs, now declared, some years ago had a mutual understanding that they would not put down each other's withholds. These three also falsified auditing reports to the effect that they had run certain things on pcs "and there was nothing on them," when in fact they either had not run them or there was reaction which they did not put into the report. They messed up about a dozen people before they were caught and it took many, many hours of careful C/Sing and auditing to salvage those cases (and it also took about two years). They made several hundred serious enemies for themselves and today I doubt any Scientologist would even speak to them and their names are remembered with scathing contempt.

It is not only easy to detect a falsified auditing report, it is also inevitable that it will be detected.

The person whose auditing reports have been falsified is easy to spot in folders and records. The auditor marks "VGIs, F/N" and the Examiner notes bypassed charge and bad indicators. An auditor seeking to prevent this being detected has been known to take the Examiner Report from the folder but that there is no Examiner Report would be the first thing a C/S would notice. Examiner Reports have been forged and exchanged with the actual one but this too is very visible.

Lack of a proper success story points directly to out tech and if it is not visible in the folder then that folder contains falsified auditing reports.

The pc in the midst of his auditing, refuses to re-sign for more. An inspection of folder either finds the out tech in the auditing reports or it doesn't. If the Folder Error Summary finds no out tech, the next thing that is looked for is falsified auditing reports and this is extended to looking at the other cases this auditor has handled to see if there is any similarity of reaction.

A D of P interview with the pc will reveal falsified auditing reports. It will contain data that does not appear in the auditing reports. The first thing suspect is the auditing reports.

Basically, correct tech applied by a competent auditor who has been trained and interned, works and works every time. When it “doesn’t work,” a C/S begins to look for the real scene. There are many ways he can ascertain the actual scene. Amongst these are outside-the-door session taping, monitors, interviews, lack of success stories, failures to declare, failures to re-sign, Examiner Reports at variances with the session reports, personal check-up into the case and many others.

The only thing which temporarily misleads a C/S is a falsified auditing report. But in all our experience with these, the detection of such reports is inevitable even if it occurs a long time afterwards.

The person who would falsify an auditing report is usually found to be a suppressive with abundant R/Ses and evil intentions who never should have been trained in the first place.

Therefore, the penalty for knowingly falsifying an auditing report in order to make oneself seem more competent than one is or to hide departures from the C/S or to omit vital data necessary to C/Sing, resulting in upsets to a case and time spent in investigation by seniors, is actionable by a Committee of Evidence and if the matter is proven beyond reasonable doubt, a cancellation of all certificates and awards, a declare and an expulsion order are mandatory.

Should the person perpetrating the falsification of auditing reports run away (blow) before action can be taken, the result is the same and is enforceable even if the person is not present.

A green auditor may look upon the offense as slight. If he is too untrained to realize that proper application of tech works every time and that improper application is a gross overt act, he may not realize the seriousness of his action. This however cannot be pleaded as a defense. It is not a light thing to end the hopes and close the door on a pc just because one is trying to cover up his blunders. The blundering auditor can be repaired by cramming and retraining. But only if it is known how he has blundered. That in itself is nowhere near as serious as hiding the fact.

Honesty is the road to truth.

**AUDITING FOLDERS,  
OMISSIONS IN COMPLETENESS**

(Ref: HCO PL 26 OCT 76 Issue I  
HCO B 26 OCT 76)

Omissions from folders and complete loss of folders is a very serious matter.

A Case Supervisor, as well as a Folder Error Summary auditor and the auditor himself can be impeded greatly by folder omissions. Loss of folders entirely is a much greater catastrophe.

While cases and even folders can be reconstructed and eventually handled (at enormous trouble and time to the pc and technical people) this does not minimize the offense.

Usually-Folder Pages are regarded too lightly as a post and are subject to much transfer even when posted. The Director of Tech Services is often far too lax in posting a Folder Archives I/C even as a double hat. Space restrictions often impede the careful preservation of folders in orgs. But all these posts and spaces are vital to a smooth delivery of auditing and should not be lightly looked upon.

The commonest (and most senseless) omissions from folders are:

1. **WORD CLEARING WORKSHEETS.** These are done in Academies or training or interne areas as well as the HGC and it is often an omitted action to forward them to the person's pc folder. Often the lines to do so are unknown or completely missing. Yet *every* metered Word Clearing action should not only be the subject of a worksheet but also must be included in the person's pc folder in date order. Word Clearers can fail to F/N a chain or even fail to clear a word as a chain when it doesn't F/N. Such goofs can mess up cases and leave a C/S perplexed as to how the pc was running well one day and badly the next—yet there is no Word Clearing worksheet there, so the fact of ANOTHER AUDITOR on the case is hidden.

2. **QUAL WHY FINDING ACTIONS.** As Why Finding also includes listing, possibly the most vicious omission is the failure to include Why Finding worksheets in the person's folder or even do a worksheet on it. Yet at least one org has been temporarily wrecked by indiscriminate "Why Finding" in Qual that resulted in wrong items and wrong lists and messed up the cases of whole staffs. This poor Why Finding has led at times to Why Finding becoming a restricted or forbidden practice. Qual worksheets of Why Finding **MUST** be included in the person's folder along with any list made which itself must include the question asked.

3. **HCO WHY FINDING.** These actions must also be the subject of worksheets and must also be included in the person's folder.

4. **ALL SEC CHECKS AND INTEGRITY PROCESS LISTS AND ACTIONS.** It doesn't matter who or what is doing the Sec Check, the resulting action is **NOT** the property of the department or branch or person doing the Sec Checking. A full worksheet must be made and **ALL** such actions done **MUST** be included in the routine pc folder of the person.

As it is very vital that a pc's folder be COMPLETE as well as exist, hereinafter the loss of a pc's folders and the failure to make worksheets and include them in the person's pc folder shall be actionable by a Committee of Evidence, to be convened by the Senior C/S of an org. and applies to any person or auditor whether staff, mission or field.

# **MODERN MANAGEMENT TECHNOLOGY DEFINED**

by  
**L. Ron Hubbard**

**Published December 1976**

Modern Management Technology Defined is the key to understanding all Scientology administrative terms and puts full understanding and application of policy at your fingertips.

This vital companion to the OEC Volumes contains over 8,600 words and 13,200 definitions, including 2,000 non Scientology business terms. Near the back of the book is a large list of Scientology abbreviations and their definitions.

A team of researchers spent over a year combing through Ron's administrative writings, policies, books and taped lectures extracting the definitions for this dictionary, then many months were spent verifying that the definitions as extracted were complete, clear and in context.

Not only does this dictionary make it easy to use Scientology administrative policy, it is a key to understanding business and corporate management.

This book is a must for anyone wanting a better understanding of organization and administration; for Scientology admin course students; for owners of OEC Volumes; for anyone who runs or works in a business, large corporation or any organization.

690 pages, illustrated, hard cover with dust jacket. **ILLEGAL PCS, ACCEPTANCE OF  
HIGH CRIME BULLETIN**

It shall be a Committee of Evidence offense for a Case Supervisor or auditor to C/S or accept for processing and process any pc:

1. Who is terminally (fatally) ill, regardless of what the org or registrars may have promised or asserted. Such diseases as advanced cancer are included.
2. Who has an extensive institutional history which includes heavy drugs, shocks of various kinds and/or so-called psychiatric brain operations.
3. Who has been denied processing by the Guardian Office for reason of past history or connections or current state as it may affect the safety and security of the org.

It shall also be a Committee of Evidence offense for any ED/CO, Org Exec Sec. Technical Secretary, Director of Processing or other executive or staff member to bring pressure or persuasion upon any Case Supervisor or auditor to process such persons.

It is not that such cases cannot in many instances be handled. It is that neither Scientology nor the org. but doctors and psychiatrists, have brought about the condition and such conditions are outside the zone of responsibility of the org.

Registering such pcs is already illegal, but where it has occurred intentionally or accidentally, no one has the right to force such persons upon Case Supervisors or auditors for any reason.

Any promise made by an org to such a person or his relatives is not binding upon an organization or its staff and such promises are also a Comm Ev offense.

Special petition may be made by the person concerned to the Guardian Office, the representatives of which may act to correct injustices or erroneous use of this Policy Letter. But the Guardian Office itself does not have the right to persuade or insist that Case Supervisors or auditors accept the person for processing unless it is very clearly demonstrated that the person does not fall under any of the above three categories.

Doctors are too often careless and incompetent, psychiatrists are simply outright murderers. The solution is not to pick up their pieces for them but to demand medical doctors become competent and to abolish psychiatry and psychiatrists as well as psychologists and other infamous Nazi criminal outgrowths. Society and police agencies should deal with such offenses. It is not up to Scientologists to salvage the wreckage created by these professions, but to prevent it from happening in the first place by reforming a degraded society.

Until such time as doctors have become fully competent and psychiatry and psychology have been recognized for what they are and abolished, Case Supervisors and auditors are actionable for surrendering their rights and handling such. It is not that they cannot. They must not.

URGENT—IMPORTANT

*C/S Series 99RA*

**SCIENTOLOGY F/N AND TA POSITION**

Through verbal tech just located, it has been found that some auditors have been ordered to disregard all F/Ns that were above 3.0 or below 2.0 on the meter.

Auditors have also called F/Ns which were ARC break needles, thus falsely indicating to the pc.

These two actions—disregarding actual F/Ns because the TA was not between 2.0 and 3.0 and calling “F/Ns” that were actually ARC break needles—have upset many preclears.

The outnesses here are: A. not considering pc indicators as senior and B. not noting pc indicators when calling an F/N and C. ignoring and giving junior importance to the technology covered in false TAs. (See list of references at end of this HCOB or the Subject Index of the HCOB Volumes.)

Auditors have even been led to falsify worksheets (giving TA as in range when it actually was not when calling an F/N) because they might “get in trouble” for calling an F/N in the wrong range, such as 1.8 or 3.2.

The CORRECT procedure for out of range F/Ns is:

1. Look at the pc's indicators.
2. Call the F/N regardless of its range.
3. Mark down the ACTUAL TA position.
4. Handle the false TA at the earliest opportunity when it will not intrude into the current cycle on which the pc is being audited. (You don't interrupt a Quad R3RA, for instance, to handle false TA; you complete it and then, when directed by the C/S, you handle the false TA.)
5. On any pc you suspect has had his F/Ns disregarded because of false TA, you C/S for and get run a repair and rehab of this error.

E-Meter cans can monitor or change TA position when the palms are too dry or too wet or when the cans are too big or too small or when the wrong hand cream is used. The E-Meter does not read on hand moisture alone as was long believed by people in electronics. But TA depends upon resistance to electrical current in the palms, leads, and meter as well as its main resistance which happens to be mental masses or lack of them.

To simply tell some interne “Always disregard an F/N not in correct range” is to set him up for loses and set the pc up for crashes. The correct information is that an F/N which isn't in range is accompanied by pc indicators that indicate whether it is an F/N or not. AND indicates you better get the false TA handled fast as soon as it won't

interrupt the current cycle. AND you always note where it F/Ned so the C/S can C/S for false TA handling.

Where an ARC break needle (which looks like an F/N) is observed, whether it is in range or out of range (2.0 to 3.0 or below 2.0 or above 3.0) you LOOK at the pc and establish the pc's indicators before falsely calling an F/N. A pc who is about to cry is NOT an F/Ning pc and if you indicate an F/N to that pc you will further the ARC break and suppress the emotional charge that is about to come off.

## REPAIR

Where the above matters have not been fully understood and errors have occurred on pcs, it must be assumed that:

1. Auditors have falsified their worksheets as to TA position and thus built up withholds and made themselves blowy.
2. That every pc who has ever had high or low TA trouble has had F/Ns disregarded and ARC break F/Ns falsely indicated.
3. That a briefing and drilling of all internes and auditors must occur on this HCOB.
4. That a brief program of clean-up of disregarded F/Ns and falsely called ARC break F/Ns be done on every pc.
5. That every such pc be considered as having false TA troubles and these must be C/Sed for and corrected.
6. That all auditors and internes be drilled on all HCOBs relating to pc indicators.

## SAMPLE CLEAN-UP C/S

Disregard TA position, use only F/Ns and pc indicators in doing this C/S.

1. It has been found that some of your F/Ns (release points) may have been disregarded by past or present auditors.
2. Have you ever felt an F/N (release point or end of an action) had been bypassed on your case? . . .
3. Find and rehab the . . . overrun of *the* release point to F/N. *Check for any other bypassed F/Ns and rehab them.*
4. Have you ever felt an F/N should not have been indicated by the auditor when it was? . . .
5. Find the . . . point and get in Suppress on it and complete the action. *Check "Are there any other F/Ns which should not have been indicated by the auditor when they were?" and handle as above.*
6. Find and run the ARC breaks bypassed, with ARC break handling.
7. Find and handle the false TA in totality.

## DIANETIC F/Ns

*An F/N seen by the auditor in running R3RA is not called until the full Dianetic EP is reached.*

*An auditor running R3RA is NOT looking for F/Ns. He is looking for the postulate which is sitting at the bottom of the chain he is running.*

*The EP of a Dianetic chain is always always always the postulate coming off.*

*The postulate is what holds the chain in its place. Release the postulate and the chain blows. That's it.*

*The auditor must recognize the postulate when the pc gives it, note the VGIs, call the F/N and end off auditing that chain.*

*An F/N seen as the incident is erasing is not called.*

*The pc does not have to state that the incident has erased. Once he has given up the postulate, the erasure has occurred. The auditor will see an F/N and VGIs. NOW the F/N is called. F/Ns are not indicated until the EP of postulate off, F/N and VGIs is reached.*

*It's the postulate—not the F/N that we are going for in New Era Dianetics.*

#### POWER F/Ns

F/Ns are disregarded in Power.

Each Power Process has its own end phenomena and is ended only when that is obtained.

*Word Clearing Series 55*

**HOW TO WIN WITH WORD CLEARING**

By actual application of the tech Word Clearers can obtain much higher results and wins. Several recent examples have come up where some top tech and admin personnel were not duplicating issues and instructions yet they had been word cleared on these materials with no MUs found. When word cleared again by someone who really knew his business the MUs came off for hours with a resurgence of activity at the end. In a number of the cases success stories were written about never having found a misunderstood word before! All of the examples cited had the following common denominators:

1. The Word Clearer could really handle a meter and make a question read.
2. The Word Clearers had personal certainty on the workability of Word Clearing and could apply it exactly and find MUs to rave results.

**TRs AND METERING**

The fact that most Word Clearing starts off with the phrase “I am not auditing you” does not mean that TRs and metering do not apply. Quite the contrary they are vital skills that need to be kept sharp by daily TRs just like any auditor and a weekly or monthly Qual check on TR 1 and the ability to make a question read. The reason is quite simple. A Word Clearer must grasp that all forms of Word Clearing that he can apply, either metered or unmetered, were developed to help the individual find the MUs he was unable to find himself. One must assume that the person has already looked up all the MUs he could find (it is after all an ethics offense to fail to clarify words not understood) and is now putting himself in the hands of the Word Clearer to find any MUs that may be just beyond his awareness. Any lack of impingement on metered Word Clearing or reasonableness about slips and slurs or missed definitions on non-metered Word Clearing will leave a person “knowing” he has no MUs but wondering why he still has difficulty with the subject or post.

It may just be that people who find themselves resistive to Word Clearing have not grasped these points either, and wonder why they need Word Clearing when they don't “think” they have MUs.

**PERSONAL CERTAINTY**

Word Clearing works. There is no shortage of people who can attest to that. The only times Word Clearing would seem to fail would be if there were errors such as:

- a) No reads or missed reads.
- b) Ignored slips and flubs in non-metered Word Clearing.
- c) Getting off into considerations or confusions without getting to the MUs that always exist at the bottom and then getting the MUs fully defined.

The remedy is simple. If one has been word cleared on an area without a resolution of the original difficulty then MUs have been missed and one need only report right back to a Word Clearer and say “I want my MUs found!” In some cases a WCCL may be required, but more often than not it's just find the missed MUs.

For anyone who has not yet experienced what it's like to find a real MU then just report to a Word Clearer and pick *any* subject or area of difficulty and start getting the

MUs found until the subject or area now makes sense. Continue this on as many subjects as needed to leave no doubt as to the workability of Word Clearing. (The case gain from a real MU found can sometimes rival the biggest wins in auditing.) Any Word Clearer must have this certainty and pass it on to those he word clears.

The wins and gains are there for the taking. A better functioning org with highly productive staff and public is the reward. You deserve it. Just follow the tech as laid out in the Word Clearing Series and you will have it.

**ETHICS AND WORD CLEARING**

(References: HCO PL 4 April 72R  
ETHICS AND STUDY TECH and HCO PL  
16 November 73 STUDY TECH & POST)

While it has been made a Court of Ethics offense to fail to clarify words not understood no provision has been made for this failure stemming from faulty Word Clearing which does not locate the MUs.

THEREFORE:

8. Any Word Clearer who word cleared materials on which misunderstandings have been found at a later date SHALL BE SUMMONSED TO A COURT OF ETHICS.

The charge is OUT TECH.

The references for this Policy Letter are still very much in force.

Book: *E-Meter Essentials*  
Book: *Introduction to the E-Meter*  
HCOB 10 Dec 76 F/N & TA Position  
HCOB 21 Jan 77R *False TA Checklist*

HCOB 13 Jan 77 Handling a False TA is revised to show LRH quotes (which are indicated by quotation marks).

“It has recently been discovered that auditors have been mishandling false TA by assessing with the meter to find what the cause of the false TA is instead of directly checking the pc themselves.

“A recent example of this is the False TA Checklist (HCOB 29 Feb 72RA Revised 23 April 75) was being used by assessment on the meter to try to find the pc’s false TA cause. The false TA was not remedied as the auditor never even *felt* the pc’s hands! Never even *checked* the pc’s grip! Never felt what the pc’s hands felt like with cream on them! The auditor just checked the lines on the meter and when a read was obtained the pc was asked and nothing came of it. The false TA, now being unhandled, due to the auditor’s confusion caused the pc to be audited over further false TA and drove the pc into desperation. I had to jump in and handle this one. All I did was check the grip and I found that the can size was way too big and part of the pc’s hand (the palm cup) was not touching the can thus causing the TA to read higher = false TA. The cans had to be reduced to 1 1/4 inch diameter aluminum tubing! This particular pc was also misapplying hand cream. The quantity was incorrect and the way the pc was putting it on was not handling the false TA. This pc needed to put Vaseline Intensive Care on extensively then wipe off the hands with Kleenex and then put a bit more on and rub it all over the hands and ensure that the thumbs were being covered. One more factor that messed up the case was the sensitivity was set too high and consequently F/Ns were missed and the TA shot up.”

Another example of this was we had a pc who constantly had low TA F/Ns. Upon checking his grip we discovered that he held the cans so tight that it caused his hands to sweat and part of the hand was actually off the cans. Adjusting the grip handled the false TA. This pc then started to cognite that he was really a fast pc after all and there was nothing wrong with him.

We had another interesting one. This particular pc crossed her legs and had cans that were too big. By having her uncross her legs and recognizing that the can size was off and needed changing to 1 3/4” diameter aluminum tubing remedied her false TA.

So you have to watch it. Make sure that the sensitivity is set correctly for that pc so you don’t miss the F/Ns.

“NONE OF THIS WAS DONE BY AUDITOR ASSESSING A LIST. IT WAS DONE BY OBSERVING THE PC’S HANDLING OF CANS AND POSITIONS AND SEEING WHAT IT DID TO TA POSITION.

“The main point here was the auditor thought that a false TA was think and would register on the meter. That is as silly as asking the meter if you should buy ice cream today or not. The meter can’t answer when the answer is required of the preclear. How the hell would the meter know if the pc’s hands were dry or cold. The auditor has to feel them, touch them, check for dryness by feeling them. Do they *FEEL* dry? Do they *FEEL* cold? Are the pc’s feet so cold that no circulation gets through? Do you know without feeling them? Does the hand cream you are using dry up? How do you know without feeling the pc’s hands? I have known a pc to say no it hasn’t dried up because the pc hated wearing cream and didn’t want to put more on. So feel the hands. Don’t just ask the pc and then assume that that is it. You will mess up cases and won’t handle the false TA.

“False TA is in the physical universe. It is something that really exists. When you start checking for meter reads you are violating this law. It is in the physical universe not the pc’s think or bank. It can badly mess up a case to not find the cause of false TAs and then carry on with auditing.”

Understanding the meter and what the meter reads on and understanding false TA and what causes it are the basics behind finding a false TA and remedying it so that the pc can happily continue on with auditing and advance.

“If you think that you have solved a false TA yet the pc still has high or low TA F/Ns then you haven’t solved it at all and you had better roll up your sleeves and get bright and go in there and find it. And the way you do this is to check the pc. What do the hands feel like? What type of clothing is the pc wearing? Feel for tight clothes. Don’t just take the pc’s word. Maybe they like wearing tight shoes but look at that 4.5 F/N. Let them wear tight shoes out of session but get rid of those tight shoes in session so you can get an accurate reading meter.”

Don’t use this to hassle pcs and interject it into sessions whenever you please. When you see a false TA phenomena note it down and the C/S will include it in the program to be handled. This is covered in HCOB 10 Dec 76 F/N AND TA POSITION.

There is no pc on this planet or any planet that wants to experience over-repair and misery due to false TAs. You will be doing them a great service to handle it for them so they can happily be audited after that. Don’t Q&A with the pc’s considerations just find what ‘in *the physical universe*’ is causing the false TA and remedy that in the physical universe.

*Note:* The False TA Checklist has been rewritten and issued as HCOB 21 Jan 77R.

**FALSE TA CHECKLIST**

Ref:	HCOB 24 Oct 71R	FALSE TA
	HCOB 12 Nov 71RA	FALSE TA ADDITION
	HCOB 15 Feb 72R	FALSE TA ADDITION 2
	HCOB 18 Feb 72R	FALSE TA ADDITION 3
	<i>BTB</i> 24 Jan 73R 11	<i>EXAMINER &amp; FALSE TA</i>
	HCOB 24 Nov 73RC	C/S 53RK
	HCOB 23 Nov 73RA	DRY AND WET HANDS MAKE FALSE TA
	HCOB 13 Jan 77RA	HANDLING A FALSE TA

“This Bulletin cancels HCOB 29 February 1972RA Revised 23 April 1975 as it is misleading and has caused some auditors to assess the pc on the meter to find the cause of false TA instead of checking directly with the pc.”

This Bulletin reinstates the False TA Checklist with specific handlings that are directly from the issues that I wrote on false TA.

“The following are the items to be checked by an auditor on any pc. It need only be done once unless the check itself is suspected false, or if conditions of the pc’s hands, etc. change.

“The checklist is kept in the pc folder and is entered on the Folder Summary as an action done.

“The value of operating with correct can size should not be underestimated, the reference HCOBs state why.”

The auditor signs and answers the following points on the checklist. The auditor must obtain information by checking the pc’s hands himself or herself to see if the hands are dry or wet. The cause of false TA is in the physical universe and that is where the check is done. It is not done by asking the pc or checking the questions on the pc for meter reads. So the auditor would feel the hands of the pc to establish if they are dry or wet, would feel the pc’s hands with cream on them to see if the cream has dried up, would see if the pc’s hands cup so as to form an area that does not touch the cans and so forth. False TA is not think or mental mass. It is in the physical universe and that is where it has to be handled for it to be remedied. The handling sheet follows the items mentioned below.

“R-Factor to pc: ‘I am going to check the cans, your hands and various other things to adjust everything for best accuracy.’”

(See numbered list at back for handlings. Each number in the checklist is exactly represented in the handling by the same number to make it easy to switch to the handling section when doing this checklist.)

1. Is the meter charged fully? \_\_\_\_\_
2. Is the meter trimmed correctly? \_\_\_\_\_
3. Are the leads connected to the meter and cans? \_\_\_\_\_
4. Are the cans rusty? \_\_\_\_\_
5. Are pc’s hands excessively dry requiring hand cream? \_\_\_\_\_
6. Are the pc’s hands excessively wet requiring powder? \_\_\_\_\_

7. The pc is *NOT* being told continually to wipe his hands? \_\_\_\_\_
8. The pc's grip on the cans is *NOT* being continually checked by the auditor in a way that interrupts the pc? \_\_\_\_\_
9. TA position on large cans? Size approx *4 1/2 inches by 3 inches* or *11 cm by 8 cm* \_\_\_\_\_
10. TA position on medium cans? Size approx *4 7/8 inches by 2 5/8 inches* or *12 1/2 cm by 7 cm* \_\_\_\_\_
11. TA position on small cans? Size approx *3 3/4 inches by 2 1/8 inches* or *9 cm by 5 cm* \_\_\_\_\_
- 11A. Can size for a child is incorrect? Size can go down to photographic aluminum 35 mm film cans for a child. *Size approx 2 inches by 1 3/16 inches* or *5 cm by 3 cm* Note down TA position. \_\_\_\_\_
- 11B. If the above mentioned can sizes aren't correct for the pc's hands other sizes can be tried. 1 1/4" tubing 1 3/4" tubing as well as other can size checked to see which fits the pc's hand. Note down TA position. \_\_\_\_\_
12. Are the cans too large for the pc? \_\_\_\_\_
13. Are the cans too small for the pc? \_\_\_\_\_
14. Are the cans just right in size? \_\_\_\_\_
15. Are the cans cold? \_\_\_\_\_
16. Are the pc's hands dry or calloused? \_\_\_\_\_
17. Does the pc have arthritic hands? \_\_\_\_\_
18. Does the pc loosen his grip on the cans? \_\_\_\_\_
19. Check the pc's grip, does he hold the cans correctly? (See E-Meter Drill 5.) \_\_\_\_\_
20. Is the pc hot? \_\_\_\_\_
21. Has the pc slept well? \_\_\_\_\_
22. Is the pc cold? \_\_\_\_\_
23. Is the pc hungry? \_\_\_\_\_
24. Is it too late at night? \_\_\_\_\_
25. Is the auditing being done not in the pc's normal *regular* awake hours? \_\_\_\_\_
26. Are there rings on the pc's hands? (Remove any rings.) \_\_\_\_\_
27. Is the pc wearing tight shoes? \_\_\_\_\_
28. Is the pc wearing tight clothes? \_\_\_\_\_
29. Is the pc using the wrong hand cream? \_\_\_\_\_
30. Is the application of the hand cream correct and does it cover the entire hand? \_\_\_\_\_
31. Is the chair the pc is sitting in comfortable? \_\_\_\_\_
32. Is it actually chronic high or low TA case condition? \_\_\_\_\_

33. Has the pc gone into despair over his TA? -----

The handling of these points is stated in the reference HCOBs.

The handling of high or low TA after checking these points is by C/S 53RK, Short Hi-Lo TA Assessment C/S.

The way to be sure of a C/S 53RK or Hi-Lo TA list is by continued assessment and handling of these lists until an F/N on assessment is gotten.

So standard tech handles the high and low TA. The C/S Series gives more data on the subject.

#### FALSE TA CHECKLIST HANDLING SHEET

1. IS THE METER FULLY CHARGED?

Handling: "Keep a meter charged at least one hour for every 10 of auditing for 240 AC volt charging current, or 2 hrs for every 10 of auditing on a 110 AC volt charging current.

"Before each session snap the knob over to TEST. The needle should hit hard on the right side of the face. It can even bounce. If the needle doesn't snap to the right hard or if it doesn't quite get there on TEST, then that meter will go flat in mid-session and give false TA and no reads or TA on hot subjects." LRH (HCOB 24 Oct 1971R False TA.)

2. IS THE METER TRIMMED CORRECTLY?

Handling: "A meter can be improperly trimmed (not set at 2.0 with the trim knob) and can give a false TA position. When a meter is not left on a minute or two before trimming, it can drift in the session and give a slightly false TA.

"The trim can quietly be checked in mid-session by snapping out the jack where the cord goes into the box and putting the TA on 2, seeing if the needle is now on SET. If not, the trim knob can be moved to adjust it. The jack is quietly slipped back in. All without distracting the pc." LRH (HCOB 24 Oct 1971R False TA.)

3. ARE THE LEADS CONNECTED TO THE METER AND CANS?

Handling: "A properly set up meter with cans (electrodes) fitted to a pc who is holding them properly IS ALWAYS CORRECT." LRH (HCOB 24 Oct 1971R.) Reference for setting up a meter is covered in E-Meter Drills book EM 4.

4. ARE THE CANS RUSTY?

Handling: "Corroded cans can falsify TA. Get new ones now and then." LRH (HCOB 24 Oct 71R.)

5. ARE PC'S HANDS EXCESSIVELY DRY REQUIRING HAND CREAM?

Handling: "A quick test is have the pc put the cans under his armpits and you'll see if it's his calloused or chemically dried out hands. The excessively dry hand is seen as shiny or polished looking. It feels very dry. The correct treatment is to use a hand cream such as Vaseline Intensive Care Lotion (obtainable from any cosmetics store) not a greasy hand cream or vanishing cream. A good hand cream rubs all the way into the hand and leaves no excess grease. Hand cream is usually smeared on, rubbed in and can then be thoroughly wiped off. The hands will usually produce, then, a normal TA and meter response." LRH (HCOB 23 Nov 73RA Revised 23 April 75 Revised 26 Jan 77 Dry and Wet Hands Make False TA.)

6. ARE THE PC'S HANDS EXCESSIVELY WET REQUIRING POWDER?

Handling: "If the TA is low, check if the pc's hands are wet. If so have him wipe them and get a new read. It is usually found that the 1.6 was really 2.0 . . . Have the pc wipe hands. LRH (HCOB 24 Oct 71R.)

“Anti-perspirants can be applied to too wet hands. There are many brands of these, often a powder or spray. It can be wiped off after application & should work for two to three hours.” LRH (HCOB 23 Apr 73RA.)

7. THE PC IS NOT BEING TOLD CONTINUALLY TO WIPE HIS HANDS?

Handling: Above per wet hands.

8. THE PC'S GRIP ON THE CANS IS NOT BEING CONTINUALLY CHECKED BY THE AUDITOR IN A WAY THAT INTERRUPTS THE PC?

Handling: “Keep the pc's hands in sight. Check the pc's grip. Get smaller cans.” LRH (HCOB 24 Oct 71R.)

9. TA POSITION FOR LARGE CANS?

Handling: “For a normal or large handed pc the can size is about 4 7/8ths inches by 2 5/8ths inches or 12 1/2 cm by 7 cm. This can be altered as big as 4 1/2 inches by 3 inches diameter or 11 cm by 8 cm. This is standard.” LRH (HCOB 24 Oct 71R.)

10. TA POSITION ON MEDIUM CANS?

Handling: Covered above.

11. TA POSITION ON SMALL CANS?

Handling: “This can should be 3 3/4 inches by 2 1/8th inches or 9 cm by 5 cm diameter or thereabouts. A small child would be lost even with that can. So a small 35 mm film can could be used. This is 2 inches long by 1 3/16ths diameter or 5 cm by 3 cm. This works but watch it as these cans are aluminum. They do work but test for true read with a slightly larger can and then trim to adjust for the aluminum if any different. “Cans of course should be steel with a thin tin plating. Regular soup cans. Can size to match the pc avoids slack can grip or tiring the hands into going slack, giving the auditor 3.2 F/Ns and trouble.” LRH (HCOB 24 Oct 71R.)

11A. CAN SIZE FOR A CHILD IS INCORRECT?

Handling: Size can go down to photographic aluminum 35 mm film cans for a child. Note down TA position.

11B. IF THE ABOVE MENTIONED CAN SIZES AREN'T CORRECT FOR THE PC'S HANDS OTHER SIZES CAN BE TRIED.

Handling: 1 1/4” tubing or 1 3/4” tubing as well as other can size checked to see which fits the pc's hand. Note TA position.

12. ARE THE CANS TOO LARGE FOR THE PC?

Handling: “Can size to match the pc avoids slack can grip or tiring the hands into going slack.” LRH (HCOB 24 Oct 71R.)

Check the pc's grip and see if the hand is touching all of the can and if the size is comfortable. (Ref: HCOB 13 Jan 77RA Handling a False TA.)

13. ARE THE CANS TOO SMALL FOR THE PC?

Handling: Per above. Check how the pc is holding the cans and if the entire hand is on the cans and if they are comfortable and adjust accordingly per above.

14. ARE THE CANS JUST RIGHT FOR THE PC?

Handling: Check the grip and see if the can size is correct for the pc. Do the cans comfortably fit the pc's hands with the hand touching the cans so it gets an accurate reading on the meter? If the can size is correct then you must ensure that the grip is also correct on the cans.

15. ARE THE CANS COLD?

Handling: “Regardless of can size, cold E-Meter electrodes tend to give a much higher tone arm reading particularly on some pcs.

“Until the cans warm up, the reading is generally false and is false in the direction of high. Some pcs are ‘cool blooded’ and the shock of ice cold cans can drive the TA up and it takes awhile to drift down.

“A practice which gets around this is for the auditor or Examiner to hold the cans briefly until they are warm and then give them to the pc. A variation is for the auditor or Examiner to put the cans under his armpits while setting up. This warms them. There are probably many other ways to warm up cans to body temperature.”  
LRH (HCOB 12 Nov 71RA Revised 26 Jan 77.)

16. ARE THE PC’S HANDS DRY OR CALLOUSED?

Handling: Covered above under pc’s hands excessively dry requiring hand cream.

There are ways to apply the hand cream so that it is correct for that individual pc and does handle the false TA. You can spread it on extensively then wipe it off and then rub a bit more in ensuring the thumbs are included is one way. (Ref: HCOB 13 Jan 77RA.)

The point is to feel the hands with the cream on them to see if it has handled the excessively dry hand that is seen as shiny or polished looking.

And it now should no longer feel dry. (HCOB 23 Nov 73RA Revised 23 Apr 75, Revised 26 Jan 77.) The correct treatment is to use a hand cream such as Vaseline Intensive Care Lotion (obtainable from any cosmetics store) not greasy hand cream or vanishing cream.

A good hand cream rubs all the way into the skin and leaves no excess grease. This restores normal electrical contact. Such a hand cream would only have to be applied once per session—at session start—as it lasts for a long while.

If a cream leaves smears on a can, it is too heavily applied or too little absorbed. (HCOB 23 Apr 75R, Revised 26 Jan 77.)

17. DOES THE PC HAVE ARTHRITIC HANDS?

Handling: “A rare pc is so crippled with arthritis that he doesn’t make contact fully with the cans. This gives high TA. Use wide wrist straps and you’ll get a right read.”  
LRH (HCOB 24 Oct 71R.)

18. DOES THE PC LOOSEN HIS GRIP ON THE CANS?

Handling: Check the grip. Does the angle of the cans go across the palms of the pc? Is the natural curl of the fingers sufficient to hold the cans in place, and is the placement of the cans at an angle ensuring that the maximum skin area is touching the cans? (Ref: *Book of E-Meter Drills.* ) See if the palm is touching the can and not elevated off. (Ref: HCOB 13 Jan 77RA.)

19. CHECK THE PC’S GRIP, DOES HE HOLD THE CANS CORRECTLY?

Handling: Covered in above section. Also check to see if the pc is holding the cans so tight that it is causing the hands to sweat and read falsely low. (Ref: HCOB 13 Jan 77RA.)

20. IS THE PC HOT?

Handling: Get a fan in the room or handle the room so that it is cooler and the pc comfortable.

21. HAS THE PC SLEPT WELL?

Handling: Don’t audit a pc who has not had sufficient rest or is physically tired. (Ref: HCO PL 14 Oct 68R The Auditor’s Code.)

22. IS THE PC COLD?

Handling: "A pc who is too cold sometimes has a falsely high TA. Wrap him in a blanket or get a warmer auditing room. The auditing environment is the responsibility of the auditor." LRH (HCOB 24 Oct 71R.)

23. IS THE PC HUNGRY?

Handling: Get the pc something to eat and don't audit a pc who has not had enough to eat or is hungry. (Ref: HCO PL 14 Oct 68R The Auditor's Code.)

24. IS IT TOO LATE AT NIGHT?

Handling: "Between 2 and 3 AM or late at night a pc's TA may be very high. The time depends on when he sleeps usually. This TA will be found normal in regular hours." LRH (HCOB 24 Oct 71R.)

25. IS THE AUDITING BEING DONE NOT IN THE PC'S NORMAL REGULAR AWAKE HOURS?

Handling: Covered above.

26. ARE THERE RINGS ON THE PC'S HANDS?

Handling: "Rings on the pc's hands must always be removed. They don't influence TA but they give a false rock slam." LRH (HCOB 24 Oct 71R.)

If the ring can't come off use a small strip of paper around them to shield the ring touching the can.

27. IS THE PC WEARING TIGHT SHOES?

Handling: Remove them. (Ref: HCOB 24 Oct 71R, HCOB 13 Jan 77RA.)

28. IS THE PC WEARING TIGHT CLOTHES?

Handling: If it turns out that tight clothing is affecting the TA ensure that the pc doesn't wear tight clothes in future sessions. If possible have the pc remove the tight clothing and see what the effect was that it had on the TA and make sure no more tight clothes are worn in future sessions.

29. IS THE PC USING THE WRONG HAND CREAM?

Handling: Using the reference materials find the right hand cream and test it on the pc. Note TA position.

30. IS THE APPLICATION OF THE HAND CREAM CORRECT AND DOES IT COVER THE ENTIRE HAND?

Handling: Watch how the pc puts on hand cream and see if it covers the entire hand, thumb included. If not then have the pc put on hand cream covering the entire hand and pick up the cans and note TA position. Some pcs may have to put cream on and wipe it off and then re-apply it. (Ref: HCOB 13 Jan 77RA.)

31. IS THE CHAIR THE PC IS SITTING IN COMFORTABLE?

Handling: Get a new chair that is comfortable for the pc.

32. IS IT ACTUALLY A CHRONIC HIGH OR LOW TA CASE CONDITION?

Handling: C/S Series 53RK or Hi-Lo TA Assessment. Done to F/Ning assessment.

33. HAS THE PC GONE INTO DESPAIR OVER HIS TA?

Handling: Handle the false TA with using this list as a guideline so that the cause of false TA is found and fully handled with the pc by the various handlings covered above. When false TA is handled check TA worries, TA hassles and LIC best read.

This handling sheet is used in conjunction with the items that are checked. This gives you the way to handle them.

Refer to reference material in reference section above for further data on handling a false TA.

**IN-TECH, THE ONLY WAY  
TO ACHIEVE IT**

The dominating factor of tech being in, is whether the auditor really wants to do a good job and help the pc. It is a matter of professional competence and pride.

If the auditor does not have this there is no amount of rules, reading or supervision that will bring about technical successes.

Fortunately the vast majority of auditors have a high professional conscience and are willing to study, drill and do everything possible to perfect their tech. The Course Supervisor, the D of P. the C/S and Qual Cramming terminals must realize this and must do all possible to fortify it and must abstain from invalidations and accusations and injustices which tend to nullify it.

From this springboard of belief in the auditor and a willingness on the part of those training and handling him, to strengthen the auditor's determination to be professionally competent, in-tech will only then blossom in an org.

**URGENT AND IMPORTANT**  
**TECH CORRECTION ROUND-UP**

Auditors and Scientologists for 27 years have tended to be suspicious of HCOBs and Policy Letters not written by myself.

Until a few months ago my opinion was that this, while flattering, was not entirely justified.

However, these last few months have sharply changed my belief into total agreement with all those who have expressed some fear of reinterpretations of bulletins by others.

I have been engaged for some months now in a round-up of out tech issues.

And I have found, I am sorry to say, that mice have been gnawing at the pillars of the Bridge, putting up traffic barriers and false detour signs.

I have been finding serious out tech issues and correcting them.

Whether because of misunderstood words (the commonest cause of out tech alterations) or other reasons, there have been a staggering number of tech sectors that have been corrupted by issues by others that alter-ised.

The corrections I have been doing have been, are being or will be issued shortly. However, not all auditors and Scientologists keep pace with current issues and so I am here giving you a rapid summary of the gross departures from standard tech which have occurred in the past 3 or 4 years and their corrections.

So you were right!

A very few people (3 or 4) have wittingly or unwittingly brought about outnesses which could easily make the difference between successful case handling and failed cases.

Action has been taken to handle them and there are a great many good people at work now in compiling and reissuing the workable tech which I developed in the first place.

It is now forbidden to write an HCOB or an HCO PL and sign my name to it.

If anyone helped compile it or wrote it, my name is followed by "Assisted by \_\_\_\_\_" the person who helped get it back together at my directions.

Also no Board Technical Bulletin may cancel an HCOB.

So from here on you are relatively safe.

I am always the first to tell you and this is no exception.

TECH CORRECTIONS

There follows here a long list of incorrect procedures or data found to have been issued.

Also a brief rundown of the correct procedure will be found, which is the correct and standard tech.

What makes tech correct? When it doesn't get results it is incorrect. When it gets the expected result it is correct.

My own writings and researches are based wholly upon things that got and get results.

When another, through misunderstood words or other reasons, "interprets" or changes the original tech, it has been the general experience that results are not obtained.

By studying this list you may very well find some alter-ised points which caused you to have trouble or which caused confusion.

Therefore, the subjects themselves are described in summary form.

Not all issues are out yet which accomplish full correction. Their HCOB numbers therefore cannot be given. Some of the issues are not yet released but will be soon. However, there is no reason to deny you the essence of the material and so I am giving you the full list to date.

I trust this list and HCOB restore some stability.

I hope that any failures you may have had due to alter-ised materials will be spotted by you. And that you will be able to apply some of these right now and get the full materials later.

I like results, you like results. And the following may include some of the reasons you may have had a hard time with some sessions.

I am sorry for that. I have come back on tech lines especially to correct it, and have spent seven months spotting areas where there has been trouble or failures, evaluating them and discovering the alter-is of original materials and issues. In many cases the alter-is sure was hidden. This completes 7 months of search for tech outnesses.

Here is the list.

#### A: PTS HANDLING

The first shock (which actually began this current search for out tech issues) was the discovery that PTS conditions were going unhandled across the world and had been for some time.

"PTS" means Potential Trouble Source and means the person is affected adversely by a suppressive in his life. A PTS person can be a lot of trouble to himself and to others. The condition is not too difficult to handle and to find that all the tech of handling it was in disuse explained why there had been a lot of trouble and upset on various lines.

After a great deal of search, it was found that PTS handling and another rundown (The Vital Information Rundown) had been restricted only to Expanded Dianetics. Thus one would find on pcs' programs that they were supposed to go all the way through Dianetics and their grades before their PTS condition was handled. In actual fact a person who is PTS cannot be audited on anything else until the PTSness has been straightened out. This was operating as an effective barrier to cases.

Fortunately, the Technical Bulletin Volumes were not quite off the press and this one was caught with HCOB 27 July 1976 which will be found on page 428 of Volume VIII.

The first thing you do for a pc in *any* grade or without grades is handle his PTSness.

As long as the subject was hot I decided to look further into it to make sure that the actual tech was still available and to get a pilot done to verify its use in actual practice since few had had any PTS handling for a couple of years.

I initiated a pilot project and it was well executed by CS-5.

The results of this project are found in HCOB 20 Oct 1976.

The outcome of this further research as contained in that HCOB was that the person, for full handling, should be gotten through his PTSness and *then* should study the complete pack of PTS/SP Checksheet, BPL 31 May 71RC, so that he knows the full mechanics that had been wrecking his life. This is contained in HCO PL of 20 Oct 1976.

While the above named checksheet is quite adequate, a project is now in progress to collect up all original LRH Case Supervisor notes (C/Ses) and handwritten materials on PTSness so that additional issues may be brought out and the checksheet extended. The reason for this is that there is a sector of *non-audited* handling of PTSness which has never been fully released. This comes under the heading of additional material and the existing PTS material is not only workable but is vital.

So this scene was rounded up and PTSness is again being handled successfully over the world.

As an additional note, a cassette is now being made for general distribution and sale which will soon be released so that PTS people can get one and send it or play it to persons antagonistic to their leading a better life.

## B: ORG DELIVERY

No auditing is a technical situation. The ability to procure auditing has a considerable bearing on people's case progress—naturally.

It was found that some organizations were slow in delivery and were backlogging which tends to create a no auditing situation amongst pcs.

To remedy this backlog, the Technical Secretary of every org was given a new statistic, "VALUE OF SERVICES DELIVERED." This gives an index of the delivery of the org and brings backlogs into view and will serve as a means of alleviating a no auditing situation in the field where it exists as it calls the fact spectacularly to the attention of all management, local and international. This is HCO PL 12 Nov. 76.

Along with this another situation came to view which again was a matter of other people writing HCOBs.

The Director of Processing had been given in HCOB 16 June 1972R a statistic which encouraged him to simply route pcs out of the org once they had completed a small part of their processing.

Accordingly the statistic of the Director of Processing in an org was revised in HCOB 16 June 1972RA to "the number of pcs routed back into the lines."

The Director of Tech Services was given a stat of getting actions completed on pcs.

With these two stats operating, one after the other, a no auditing situation in an area is further alleviated.

People do not sufficiently consider no auditing as the most basic failure of cases. It seems so “of course” that it gets entirely overlooked yet it can cause a great deal of trouble.

#### C: HSDC RE-DO

The first inkling that the Hubbard Standard Dianetics Course curriculum had gone adrift was noticing that two key drills had been omitted and even cancelled by others even though they were vital to an auditor’s skill in handling a Dianetic session.

These drills were Dianetic Training Drills 101, 102, 103 and 104. These have to do with student auditors remembering their commands in session, making him practiced in using commands while handling his meter and admin, training him to use the right command in the right place according to what the pc does and finally training him to use commands and handle the session in spite of any and all distractions or reactions from a pc. Obviously if a Dianetic auditor cannot do these things he cannot run a Dianetic session.

These drills now have been emphatically reinstated in HCOB 19 July 1969R reissued 9 Dec 1976; they are for use in all Dianetic training.

Looking into this further, I found that there was a new unauthorized Dianetics Course which supposedly was based on *Dianetics Today* being issued which would be a sort of a competitive course to an HSDC. In following this further it was found that even the most fundamental formats of the HSDC which I personally developed and piloted had been grossly alter-ised, that a number of persons had been writing HCOBs on the subject, and that the format had been lost.

The original HSDC is being gathered together at this time with all instructions, C/Ses and drills in the pattern and format which was originally developed and which DID make GREAT auditors. So you can expect a considerable resurgence in the quality of Dianetic auditing some time in the future.

At the same time, a new course, which makes a senior Dianetic auditor, is being put together which is a post-graduate step after a person has become an HSDC. This will take in all the materials found in *Dianetics Today* and should cover areas of special Dianetic application.

#### D: ROCK SLAMS

A rock slam (R/S) is defined as “a crazy irregular slashing motion of the needle.”

This particular meter reaction was found to be relatively unknown to auditors on an examination I made of some worksheets. They were calling dirty needles, dirty reads, rocket reads, body motion and even ticks as “R/Ses.” They were also missing real R/Ses.

As the R/S is probably the single most important and dangerous read on the meter, clarifications of this were in order.

Accordingly I wrote HCOB 10 Aug 1976, “R/Ses, WHAT THEY MEAN” and caused to be written from my notes HCOB 1 Nov 1974R, “ROCK SLAMS AND ROCK SLAMMERS.”

For a pc to be branded as an R/Ser is a very serious thing. Also for a real R/Ser to be overlooked by an auditor is a catastrophe both to the pc and to those around that particular person.

Therefore, this is very dangerous ground to have wrong.

These issues will help to clarify that.

At the same time I'm currently at work on a video tape which will be available in Academies some time in the future, which gives all meter reads.

Meanwhile, don't make any mistakes on R/Ses. Read those bulletins.

Another confusion in this sector was how to define and identify a "List 1 R/Ser."

All characteristics given in a list issued as HCOB 1 Nov 74 and signed by another with my name were stated to have to be present before a person was a "List 1 R/Ser." The incorrect HCOB is on page 344 Vol VIII of the HCOB Volumes and will be corrected in later editions.

"List 1" refers to Scientology related terminals as found on page 57 of *The Book Of E-Meter Drills*.

The additional characteristics on this list only help to look for a List 1 R/S. I issued HCOB 1 Nov 1974R revised 30 Dec 1976 which now corrects this error.

A List 1 R/Ser is simply one who R/Ses on List 1.

## E: SEC CHECKING AND INTEGRITY PROCESSING

Following down the trail of auditors missing R/Ses, it was found that Sec Checking had become a nearly lost art.

Sec Checking means, unfortunately, "Security Checking." That it was so misnamed in its origins obscures the fact that Confessionals have been part and parcel of religion nearly as long as religion has existed.

In actual fact the meter simply gets a pastor or minister over the very dangerous situation of missing a withhold on his parishioner. A person with a missed withhold can become very upset with the person who misses it; the meter, properly operated, makes sure that none are missed.

In an effort to get around what was thought to be a public relations scene, the name "Security Checking" was changed to "Integrity Processing." This was also a PR error because the actual truth of the matter is it originated as "Confessional" and should have simply been changed back to "handling of confessions."

This administrative demand of name alteration threw the original issues on "Sec Checking" into disuse.

Additionally "Integrity Processing" did not include all the tech of Sec Checking. And some even thought they were different subjects!

The loss of Sec Checking, more properly called Confessionals, and the failure to use a meter to verify withholds resulted in many student blows (dropouts) and has permitted the continuance of a great deal of natter and upset which are simply the result of missing withholds on people.

When you realize that a lot of the trouble of the Roman Catholic Church probably arose through not having a meter to verify the completeness of Confessionals, you can see what the loss of Sec Checking would do to our own churches and organizations. In other words, we were about to repeat history!

All this original "Sec Checking," properly Confessional, tech is being rounded up again and will be issued in checksheet form and there will be courses in "The Handling of Confessionals." But even before you receive these, you should resume the use of

this metered tech as it will save you having people “mad at you” simply because you have missed withholds on them.

It is highly self-protective both from the viewpoint of the auditor and the organization to have the proper metered handling of Confessionals fully in.

BTB 31 Aug 1972RA “HCO CONFSSIONAL PROCEDURE” clarified the matter but this bulletin was on a very limited distribution and is not known. It contains the tech I developed on Sec Checking in the autumn of ‘72.

There should be no further confusion in this matter. “Sec Checking,” “Integrity Processing” and “Confessionals” are all the exact same procedure and any materials on these subjects is interchangeable under these titles.

The materials when all recollected and consolidated and reissued will be under the title of “Confessionals.” But even before that reaches you, you had better determine to become an expert in it, since an auditor’s inability to handle this is a fast route to “how to win enemies and wrongly influence people.”

## F: EXPANDED DIANETICS OVERHAUL

Expanded Dianetics began in development in 1970. It is a very fully developed subject. However, for some reason or another, the *total* materials of Expanded Dianetics were never packaged and exported even when it was reported that they had been. Thus auditors who have been trained as Expanded Dianetics auditors had been denied considerable key materials and have even lost the reason for Expanded Dianetics.

Contributing to this was the removal of “Sec Checking” (Confessionals) materials from the Expanded Dianetics Course to make up the “Integrity Processing Rundown.” Thus the course was stripped even further, for an Expanded Dianetics auditor has to be very expert in the handling of Confessionals.

The actual extent of Expanded Dianetics can be described as follows: “Ex Dn consists of all the work I did on psychos and very difficult cases from 1970 forward, my C/Ses, case histories, any tape lectures or notes, which includes as well all data known to date on Confessionals, and all data on PTSes. The product of the course is an auditor who can handle psychos, R/Sers and any person’s evil intentions as well as any PTSes.”

That would be the full extent and skill of an Expanded Dianetics auditor. There is considerable data connected with the subject and it is the only data, proven, workable data, Man has on the subject of neurosis and psychosis, and is the first breakthrough made in this field as to its actual cause. This also embraces criminality.

While we are very far from being in the business of handling psychos, not all psychos are in institutions or classified as psychos in this society. Furthermore PTS persons become PTS to people who are usually psycho.

Thus this whole scope and breadth of Expanded Dianetics has to be and is being recompiled and issued.

Furthermore the position of Expanded Dianetics on the Grade and Class Chart was muddied up. Actually Expanded Dianetics can be given after a Drug Rundown, after Standard Dianetics, after Scientology grades, after Power, after OT III and at any point upwards after completion of Grade OT III.

A PTS Rundown can be given without regard to whether the person had had Expanded Dianetics or not. A PTS Rundown can be given anywhere and better had be.

An auditor is trained on Expanded Dianetics after he has become an HSDC, a Class IV auditor.

An auditor does not have to be an Expanded Dianetics auditor in order to deliver a PTS Rundown. All he has to do is complete the PTS Checksheet and should be a Class IV in order to audit it. There are even some portions of the PTS Checksheet, particularly as it would be revised, which can be delivered by a person who is not trained as an auditor at all, but this would be non-audited handling which consists mainly of coaching the person as to how to handle his scene.

The complete Expanded Dianetics tech is, as I have said, being recompiled, issued and gotten back in.

## G: WORD CLEARING

Having discovered an executive who had “been word cleared” by a “Word Clearer” but who then required more than 4 1/2 hours to clear the first two pages of the same material when handled by a higher classed auditor, I investigated the extent of Word Clearing training and use being out.

A study of the Word Clearing Series was ordered and it was found that there was little concentration on *metering* and *TRs*.

These seem to have been slighted because Word Clearing starts with the phrase “I am not auditing you” and this apparently has been taken to mean that one didn’t have to know his meter and TRs in order to word clear. HCOB 10 January 1977, Word Clearing Series 55, “HOW TO WIN WITH WORD CLEARING” is a result of this investigation and should be given particular importance.

Another factor was spotted and is handled in Board Technical Bulletin 12 January 1977 Revised 16 January 1977, which was issued as a result of my having found that Word Clearers had a wrong stat. The stat of Well Done Auditing Hours would not apply to a Word Clearer. Their stat is now “Number of Misunderstood Words honestly found and fully handled in applicable materials.”

Another action is found in HCO Policy Letter 10 January 1977, “ETHICS AND WORD CLEARING,” wherein “Any Word Clearer who word cleared materials on which misunderstands have been found at a later date shall be summoned to a Court of Ethics.”

The phrase “I am not auditing you” does not excuse ignorance on the Word Clearer’s part of a meter or a poor command of TRs. Of course this must also include his knowledge of Word Clearing tech. His TRs and metering must be excellent.

The marvelous wins that can be gotten with Word Clearing had been lost and with this should now be recovered.

## H: F/N TA POSITION

The subject of missing F/Ns (floating needles) on pcs is very important as a pc who has had an F/N missed becomes overrun and can be very upset and his case can even be stalled.

The first instance I ran into of this (some years ago) had to do with the sensitivity setting on the meter. Most auditors apparently simply would set a sensitivity knob on 5 and leave it there, regardless of how the pc advanced and regardless of who they were auditing. This would give them extremely wide F/Ns which would hit the pin, on one or both sides, and hang up as they were unable to keep the needle on “set.” The correct way to go about this is to always set the sensitivity knob by pc can squeeze. When the pc squeezes the cans, the sensitivity knob should give about a third of a dial drop, no more, no less. Only in that way can you keep a needle on the “set” mark on the dial. Otherwise, F/Ns get missed. Some pcs have to go up to 128 (32) which is a front face meter setting to get such a fall on a can squeeze and I have just noted a pc who had such a wide F/N swing that the sensitivity had to be set at 1 (32), which is about as low as the meter can go without turning off, and even then this pc got a half a dial can squeeze

fall and so had to be watched very carefully so that F/Ns were not missed. I mention this in case it has dropped out again.

The current discovery which just dropped with a clang was that in one interne-ship, an interne supervisor was using verbal tech which had then spread all over the world to the effect that you MUST NOT call an F/N an F/N unless it were between 2 and 3 on the tone arm dial, and that any F/N type motion which occurred with the TA above 3 or below 2 could not possibly be called an F/N. This was his own craziness and he wished it off with a bunch of verbal tech on an awful lot of auditors and caused an enormous amount of pcs subsequently to be very unhappy.

The result and remedy of this is contained in HCOB 10 December 1976, which is marked *Urgent* and *Important*. It is marked that way because apparently there are very few pcs around right now who haven't had F/Ns missed on them.

This HCOB should be very carefully studied. However, in brief, the correct procedure for out of range (above 3 or below 2) F/Ns is:

1. Look at the pc's indicators,
2. Call the F/N regardless of its range, if the indicators are alright,
3. Mark down the actual TA position when the F/N is indicated,
4. Handle the false TA at the earliest opportunity when it will not intrude into the current cycle of auditing,
5. On any pc you suspect has had his F/Ns disregarded because of false TA, you C/S for and get run a repair and rehab of points in his auditing when F/Ns were missed on him.

In other words, have your sensitivity correct and when an F/N occurs outside of the range between 2 and 3, know that it is an F/N by the needle motion and by the *pc s indicators* and call it, indicate it and put it down on the worksheet. Note the actual TA position. Then, before the next session or after you have finished a crucial cycle of auditing on the pc, in the next several sessions, go into the whole subject of his false TA and handle it.

Missing an F/N is very cruel on a pc because it invalidates his having released the charge on the subject on which he is being audited and tends to tell him that he is not better even though he feels better. There is one historic case of an auditor having gotten an F/N in the first ten minutes of auditing and then, because it occurred slightly above 3, auditing the pc for an additional three hours with the TA climbing, the pc unhappy and no results being obtained from the processing. This sort of thing is pretty gruesome.

Verbal tech is no substitute for HCOBs.

#### I: FALSE TA

Having written the HCOB just above telling auditors that they call the F/N regardless of where it was, providing the pc's indicators were OK and then handle the TA on the pc, I found that issues on correcting false TA had been messed up.

In both HCOB 29 Feb 1972R Revised 23 Nov 1973 and its successor HCOB 29 Feb 1972RA Revised 23 Apr 1975, careless reading could imply that the False TA Checklist was *audited* on the pc like any other prepared list. In other words this idiocy set in that the meter reads were going to be used to divine whether or not the meter knew whether or not the pc was responding properly. The list actually, is a list of things the auditor *manually, mechanically* checks on the pc. He does not consult reads and he does not assess anything on the pc; he simply personally does a checklist and

this was the checklist. It was not assessed to find a reading item. Therefore an auditor trying to correct false TA and get the TA to read between 2 and 3 by using a meter to assess the list would never find out what was going on and would be unable to get the meter into that position.

Accordingly, HCOB 13 Jan 1977 was directed to be written, and the full and entire checklist to be done by the auditor on the pc recompiled and updated. It is being issued as HCOB 21 Jan 1977.

Therefore it will now be very easy for an auditor to correct the false TA on a pc and he will be able to get the meter tone arm properly between 2 and 3.

You know, don't you, that a TA goes up more than a division when you start using a one-hand electrode? This is not a "false TA" that you can correct. Solo auditors using just one hand have their TAs riding around 3.7 and 4.5 on the tone arm. This is not a case of false TA, it is always checked by using both hands on the cans at the start and end of session. But here again false TA can occur if the hands are too dry or too wet or the can size is wrong.

You shouldn't have very much trouble with this. Actually it's a very simple matter, but the outnesses in this sector have caused an awful lot of trouble and I was very happy to be able to find the erroneous issues and get it straight for you.

A video which will eventually become available in Academies will also cover false TA handling.

#### J: INCOMPLETE AUDITING FOLDERS

For some time Word Clearers, Sec Checkers, Ethics Officers and Cramming Officers have neglected to include their worksheets in the pc's actual folder.

This causes considerable difficulty for a Case Supervisor since the person may have wrong lists in "Why Finding," may have R/Sed on a Sec Check, may have had incomplete or incorrect Word Clearing and other tech outnesses in between regular sessions. Where these folder omissions occur an FESer (Folder Error Summary maker) is often prevented from finding where the case went wrong.

Then there is the matter of no folders at all. Somebody has lost them or mislaid them, yet some auditor needs them desperately to find out lists or to actually verify grades attained. The preservation and availability of auditing folders to the next auditor or a Case Supervisor years up the track is of very great importance.

Accordingly HCO PL 28 Oct 1976 and HCOB 28 Oct 1976, C/S Series 98 (which are both the same equal texts) were written by me to remedy these very dangerous tech outnesses.

#### K: FALSIFYING AUDITOR REPORTS

Along with missing reports it was found that there had been some difficult situations created by the falsification of auditing reports.

From the small matter of saying that the TA was at 3.0 when actually is at 4.5 when the F/N occurred (thus obscuring the fact that false TA had to be handled), up to the very large crime of faking the fact that certain processes had been run when they had not just to get a completion or a bonus and up to falsifying the data or text which the pc gave, this matter of false Auditor Reports can cause enormous amounts of trouble.

The consequences and detection of the falsification of auditing reports is now contained in HCO Policy Letter 26 Oct 1976 Issue 1, the same text issued as HCOB 26 Oct 1976 Issue 1, C/S Series 97. This makes even the minor falsification of an auditing

report a matter of Comm Ev and, if the crime is proven beyond reasonable doubt, there can result a cancellation of all certificates and awards, a declare and an expulsion order.

If you think this is unnecessarily harsh, think of the poor pc.

#### L: CHECKLIST FOR FESers

It can happen that a pc is taken up into new grades without having completed earlier, more basic grades and without being set up for the later grade. This can result in somebody going through several grades just to cure a mild somatic or a PTP. It can also throw a pc in over his head.

For a long time there have been checklists showing the requirements for most major grades.

A recent instance of a pc going all the way through to OT 111 who had not completed anything caused me to investigate the reasons behind this.

It was discovered that very few Case Supervisors ever check a folder to find out if the pc has actually made the grades lower than the one that he is about to be put on.

A further check showed that few C/Ses ever looked up the earlier history of the case and this resulted in pcs being put up through levels for which they have not been set up and past levels they have not made.

A further investigation showed that these checklists were not in existence for every grade and action.

It became obvious that the people who should be using these checklists would be the Folder Error Summary auditors. These FESers are the only ones who thoroughly go through the folders and Case Supervisors depend on them. Thus if the FESer is not required to verify whether the pc has properly attained the level he is about to go onto and if he has been set up for the level, then nobody is going to check this over and a great many pcs are going to be audited on skipped gradients without set-ups and will get into difficulty.

I have ordered that checklists be made up for FESers to use for each major grade so that they can check off the requisites for each grade and thus handle this out gradient situation. These checklists are being worked on at this time and will be issued in the near future.

In the meantime it is the duty of the FESer to indicate whether or not the pc has actually reached each grade to which he has attested and whether or not he is properly set up for the grade he is about to be embarked upon.

#### M: AUDITOR RECOVERY

It can happen here and there that an auditor who has been auditing eases off and ceases to audit.

There are various reasons for this. One of the common ones is a skipped gradient in his training. Another one is misunderstood words and the commonest one is omissions of omission or commission on the subject of auditing or pcs which have not been handled.

An LRH ED 176RB INT originally issued on 24 April 1972 was unfortunately revised 2 or 3 times by other people and lost its punch.

I reworked this and restored it to its earlier form on 7 Nov 1976 and this is available as LRH ED 176RB INT. The investigation and reissue being assisted by CS-7.

It is available in this form and in the near future will be issued as an HCOB.

## N: STUDY TECH

During an investigation of pricing I discovered that "The Student Hat" had disappeared from use and in its place had been put an optional *Basic Study Manual*. The fact is that the *Basic Study Manual* has its own uses and is very valuable but it does not begin to replace The Student Hat.

This meant actually that study tech had more or less disappeared in Academies and was not in general use.

The actions taken were to make The Student Hat mandatory on a one-time basis before the next major course a person took and to include it free as a bonus to the person taking that course.

The Student Hat has been restored in totality as a requisite for study tech. This will make study much more positive and much faster.

The *Basic Study Manual* was put forward sometime ago as a means of getting staffs hatted on their hat materials and as a fast method of getting people reading the materials of their posts. I suppose that is how it drifted over onto major courses, where it has no business.

Thus The Student Hat is back full force and if there are any blown students around you should realize that the reason for their blow is either lack of study tech or undisclosed overts. The thing to do is to get them back and push them through The Student Hat so they can win at their studies and get their overts off so they can look their fellow man in the eye.

There has been another training outness found which I will mention in passing. In some internships the entire Qual staff of the org has been employed in checking out students. Actually such checkouts are done by the students themselves, on each other where starrates are required *in internships*.

It has also been found that twinning on theory occasionally creeps back in. People have not noticed that twinning on theory, meaning two students always study together, went out many years ago and has been cancelled. It makes a noisy classroom and prevents students from getting through their courses rapidly. Twinning on theory sets up too many difficulties such as the loss of one's twin by reason of graduation or transfer, being sent to Cramming, an odd number of people on the course so that one is without a twin and so on.

Practical is another matter. In practical drilling is done on the twin basis.

The theory and practical are *never* in the same room; they must be in different rooms. The theory room must be very, very quiet where a student can concentrate and the practical room must be so situated as to allow students to make noise. If any Academy has a noisy theory classroom or if the Academy is difficult to study in, this is probably what is in violation: probably the twinning is going on in theory or the theory rooms are noisy. Only a practical room can be made noisy.

The two issues (putting twinning in on theory) have now been revised and cancelled. They are HCOB 26 Nov 71, Tape Course Series 10, W/Cing Series 26 "HANDLING MISUNDERSTOOD WORDS ON TAPE RECORDED MATERIALS," which has been revised and cancelled by BTB 26 Nov 71RA (Tape Course Series 8, W/C Series 26RA) of same title (Tech Volume IX, page 440). HCOB 7 Feb 72 Issue 11, W/Cing Series 31, "METHOD 3 WORD CLEARING BY THE STUDENT'S TWIN" has been revised and cancelled by BTB 7 Feb 1972RA Issue II, W/Cing Series 31RA "METHOD 3 WORD CLEARING" (Tech Volume IX, page 448).

The main point is you want a quiet and orderly theory training room and put the noisy demo and practical actions elsewhere. And also don't hang up people on theory because they lose their twins. Practical twins are highly interchangeable.

#### O: PROFESSIONAL RATES

It was found in some cases that pcs would enroll on courses and then never take them just so they could have professional rates in their auditing.

This not only denied them the training they paid for but it was also making organizations short of auditors.

Accordingly HCO PL 13 Nov 1976 was issued which clarified "professional rates" which makes it necessary for an auditor to be fully classed in the class of that org from which he is seeking service in order to qualify for a 50% professional discount in auditing. This does not apply to his family.

What's the matter with becoming an auditor? There are 2 or 3 billion pcs out there and only a few of us auditors. Have a heart and also lend a hand. Furthermore how do you know what good auditing is unless you're trained?

#### P: SENIOR CASE SUPERVISOR LINE

It was recently found that the Senior Case Supervisor, in at least one large org. spent most of his time giving advice to executives on personnel case requirements for the crew! This is so far from the duties of a Snr C/S that the HCO PL outlining their duties has been rewritten and has become HCO PL of 26 Sept 1974R, revised and reissued 21 Jan 1977, which tells a Snr C/S in effect to look after the tech quality in his org.

There is another modification on Snr Case Supervisors. Previously it was necessary for someone to go to a distant org and become a Class VIII before he could be qualified as the Snr Case Supervisor of an org. This is no longer necessary. HCO PL 24 Oct 76 Issue III modifies these requirements so that a Snr Case Supervisor can be trained by his local org.

In this same Policy Letter the award of Dean of Technology is outlined. These would be gold certificate Case Supervisors. They are Saint Hill Special Briefing Course Class VIII Course auditors who have attained the case level to the class of his org and has a uniform record of case supervision.

This general overhaul of the Snr Case Supervisor and his lines and duties is in effort to correct out tech and establish excellent tech in any org and its area.

#### Q: INTERNESHIPS

It was found that very few interneships were now being taught and an investigation undertaken by the Action Aide Flag Bureau at my orders, finally uncovered that internship checksheets had been added to and added to and stirred about until they had become checksheets within checksheets, thus making interneships interminable.

As a result of this, a special mission was put on the job of reforming internship checksheets.

These checksheets have now been issued and exist for every level as Board Policy Letters issued from 10 Nov 76 up through BPL 25 Nov 76 Issue 1. They have been greatly simplified and have made interneships into very worthwhile actions.

These new simplified internship checksheets are in full use at this time.

Along with this internship program, HCO Policy Letter of 25 Oct 1976 has been issued which requires that all past provisional certificates which have not been validated by an internship and which are one year or more old from the date of course completion are cancelled. It states such students should be notified and should be enrolled on the internship for the class. If a properly conducted internship is satisfactorily completed, their permanent certificate may be reissued.

All of this is in an effort to get auditors straightened out, getting wins and making them really proficient and professional in all areas of the world.

#### R: ILLEGAL PCs

It has occasionally happened that an auditor has had pushed off on him by persuasion or pressure, cases who should not have been accepted by the org.

HCOB 6 Dec 1976 also HCO PL 6 Dec 76 (identical texts), make this a High Crime.

Certain types of cases may not therefore be forced off on auditors by anyone, and anyone seeking to force such a pc upon an auditor against policy, is actionable by a Committee of Evidence.

#### S: EXPANDED GRADES BEING REDONE

It has been found that some processes were left out of Expanded Grades 0 to IV and that in some cases these grades had been quickied. Therefore, all Expanded Grades checklists are being reissued and will contain more extensive processes.

Until you have the new Expanded Grades checklists, the ones you are using are still OK.

#### T: REPAIR LIST REVISED

Through an oversight, an incomplete Board Technical Bulletin 11 Aug 1972RA revised 18 Dec 1974, C/S Series 83RA, was included on page 230 of Volume X of the HCOB Volumes.

A far more extensive write-up, LRH ED 257 INT of 1 Dec 1974, existed which gave much more data and many more prepared lists as repair tools for the auditor.

The LRH ED has now been issued as HCOB of 24 Oct 1976 C/S Series 96 "DELIVERY REPAIR LISTS."

Although this issue has been updated to some degree, there are still one or two repair lists omitted. Therefore, this is about to be issued again as C/S Series 96R, which will include the additional and valuable lists.

#### U: ROUTING FORMS AND STAFF STATUSES

It has been found that Staff Status 0, 1 & 11, Sea Org Products 0, 1 & 11 and Org Routing Forms were not in full agreement with one another.

This is taking a lot of straightening out and is very much in need of it, as in one major org it was found to be impossible for a new staff member to route onto post!

This is under full coordination rewrite and will be issued in the near future.

#### V: STAFF SECTION OFFICER

I have for some time been concerned about the lack of care some orgs had been giving their own staff members.

As a result HCO PL 22 May 1976 was issued which established the post of Staff Section Officer, who was responsible for the training and the processing of staff members.

To further enforce this, the Qual Divisions of orgs were given a new Gross Divisional Statistic in HCO PL of 4 Nov 1976. This gave the dominant Qual Divisional Statistic as "Fully qualified and trained staff members in the org. cumulative."

Additionally, in HCO PL of 10 Nov 1976 certain staff courses were made mandatory in orgs.

So as not to neglect staff cases, even when auditors were absent, a whole new project has been released concerning "co-audits."

This is actually a recovery of lost tech. There used to be co-audits, very successful ones, and they had their own special technology.

A tech mission to the UK, reassembled the tech and got staff co-audits going with rave wins.

All of this technology and how it is done, has been issued as Board Technical Bulletins dated around early December 1976 under the title of "Co-audit Series."

Both the co-audit tech and Group Processing fell under the category of lost tech, but have been restored, polished up and are being issued for full use.

#### W: UNISSUED RUNDOWNS

It came to my attention in July of '76 that about 5 years worth of my developments on Flag had never been fully packaged up or issued for use. The reason for this is, that the Tech Compilations Units which had previously worked on this were disbanded in 1972 by the then CS-4 and was not reestablished.

Several years worth of intensive research and development are therefore backlogged in being issued.

Only one of these areas of development is restricted to Flag, as it is the famous "L" series of rundowns which require such technical accuracy that they can only be audited by a Class XII.

The rest of the rundowns, however, are fully capable of being fully compiled from the notes, lectures, issues and my case supervision notes and released.

Including the repackaging necessary for the HSDC, Expanded Dianetics and reissue of Expanded Grades, all mentioned above, there were 9 rundowns in all which were never compiled or exported.

For that matter, the much earlier Class Vial Course was added to and varied and it also is being repackaged in its original form and exported and is now being taught again in Advanced Orgs.

The remaining rundowns are being worked on for issue as never having seen the light of day in Class IV, Saint Hill and Advanced Orgs.

All this is now being done. So soon this important new tech will appear and be available in orgs.

## X: ADVANCED GRADES

For a number of years people have wondered when OT VIII would be released.

Well, to tell you the honest truth, OT VIII has been in existence all those several years, and to it has been added a very large number of OT grades. None of them have been issued. Notes for all these grades are in existence.

What I have been waiting for is 2 or 3 months of free time to go over these materials and write them up and make them available through Advanced Organizations.

Now I will make a bargain with you. If you get all the tech straightened out and the orgs and flaps and emergencies off my lines and get your training in and your Word Clearing in and everything flying and this civilization even more thoroughly pointed in a civilized direction, you will buy me those 3 months' worth of time so I will be able to afford the time to write up all these Advanced Levels I have researched. Do your job well and buy me these three months.

Is it a bargain?

**JOKERS AND DEGRADERS**

It is an old principle that people who do not understand something occasionally make fun of it.

A recent investigation however into the backgrounds and case condition of a small handful of people who were joking about their posts and those around them showed a somewhat more sinister scene.

Each of these persons fell into one or more of the following categories:

1. Were rock slammers. (Some List 1.)
2. Were institutional type cases.
3. Were "NCG" (meaning no case gain) (the only cause of which is continuous present time overts).
4. Were severely PTS (Potential Trouble Source) (connected to rock slammers).

It might be supposed that misunderstood word phenomena could also be part of this. The rebellious student in universities is usually handled by clearing up his misunderstandings or curing his hopelessness for his future. However, the investigation did not find that any of these jokers or degraders were acting that way solely because of misunderstood words, but the possibility cannot be ruled out.

The four categories above were, however, fully verified.

All the persons investigated were found to be the subject of declining statistics, both having them and causing them. Their areas were enturbulated. At least one of the jokers was physically driving basic course students out of an org.

In some cultural areas, wit and humor are looked upon as a healthy release. However, in the case of orgs, this was not found to be the case. Intentional destruction of the org or fellow staff members was the direct purpose.

Therefore all executives, HCO personnel and Case Supervisors as well as Qual personnel and Staff Section Officers have a valuable indicator. Where they have a joker or degrader on their hands they also have one or more of the above four conditions in that person.

This opens the door to handling such people.

Properly assigned and then fully done conditions are the correct ethics handlings.

Correctly done Expanded Dianetics, which includes Confessionals and fully done PTS handlings are the case remedies.

Where ethics tech itself is not known or neglected and where there are no HCOs one can, of course, not expect the matter to be handled. And this would be too bad because the case gain and life improvement available in proper ethics handlings, when fully followed through, can be quite miraculous.

Where rock slammers have been undermining the tech and it is not fully known or used or is altered into unworkability one cannot expect Confessionals to be properly done or Expanded Dianetics to be known and properly applied.

The joker is advertising his symptoms. He is also advertising an area of the org where there is enturbulation and down statistics as well as staff members being victimized.

Therefore this is an administrative and technical indicator which cannot be overlooked and should be followed up.

Spotted, investigated and handled, this can be the beginning of an upward spiral for an organization.

Where someone is driving ethics out, tech is not likely to go in. You have to get in ethics and tech before you can begin to get in admin.

The next time you, as an executive, wonder why you are working so hard, look for the joker in the deck.

Humor is one thing. Destroyed orgs and human beings are quite something else.

It is our business to get the show on the road and get the job done.

REVISED 20 FEBRUARY 1977

Remimeo  
Tr & Serv Aide  
Pubs Orgs  
Course Supervisors  
All Students

IMPORTANT  
**COURSE NECESSITIES**

Effective on receipt on all students who have not begun the levels named and on all internes for the relevant class:

1. All materials on Word Clearing are added to Level Zero checksheets.
2. All materials on Confessionals (formerly known also as Sec Checking or Integrity Processing) are added to Grade II.
3. All materials on listing and nulling and all materials on PTS, SP tech are added to Level IV.
4. All materials on co-audits are added to the Senior Class IV checksheets.

Where the student has not earlier covered them or as review all the above materials are added to the Senior Class IV checksheets.

5. All the above materials for a first time or review if earlier covered in lower levels are added to the Saint Hill Special Briefing Course.

It has been found that some Class IV auditors who have gone through these levels do not know these vital technologies.

Those who have done so should take their Senior Class IV in their local org or the SHSBC at their earliest ability to do so. Failure to attain a thorough command of the above mentioned tech as well as the previous materials of the mentioned classes can give them loses on their preclears.

All Course Supervisors are responsible for seeing that these materials and current improved checksheets are available to such students without delay. The improved checksheets of this material exist and the bulk of the materials exists in HCOB Volumes where packs are not at once available.

*Nothing in this HCOB states these materials cannot be independently studied by other persons or auditors of other or no c/ass.*

This HCOB does not assign these materials to pus only at that level and they can be done at any level at need.

Auditors at or above C/ass IV who do not know these materials and can use them well had better do the relevant packs fast to get their tech up to date.

Keep Scientology Working.

**EXPANDED DIANETICS CASES**

Those who "compiled" Expanded Dianetics materials previously chose only the case histories of the early research cases.

These cases were not completed on Expanded Dianetics at that time.

According to the Training and Services Aide, this has given auditors the impression that one does not complete Expanded Dianetics cases.

This conclusion is not correct. One DOES fully and completely complete Expanded Dianetics cases!

Not included in the "Case Histories" released was the later complete Expanded Dianetics auditing most of these cases did receive.

Therefore any impression that one does not complete Expanded Dianetics or that *one* uses small bits of it mixed up with other rundowns or grades should be amended. One DOES complete any such case.

They are often quite lengthy.

**CANCELLATION OF  
INTEGRITY PROCESSING HCOBs**

Several HCOBs in the Integrity Processing Series were actually excerpted from earlier LRH HCOBs.

These excerpted versions are cancelled with this issue.

The original LRH HCOBs are listed below along with the Integrity Processing HCOBs which are cancelled with this issue.

The consolidation of Confessional materials can be found in BTB 31 Aug 1972RB CONFESSONAL PROCEDURE.

1. HCOB 9 Dec 1974 Integrity Processing Series 6RA EFFECTIVENESS OF OVERTS IN PROCESSING is cancelled. The data is covered in HCOB 10 July 1964 OVERTS—ORDER OF EFFECTIVENESS IN PROCESSING.
2. HCOB 13 Dec 1972R Integrity Processing Series 10R INTEGRITY QUESTIONS MUST BE F/Ned is cancelled. The data is covered in HCOB 19 Oct 1961 SECURITY QUESTIONS MUST BE NULLED.
3. HCOB 14 Dec 1972R Integrity Processing Series 11R GENERALITIES WON'T DO is cancelled. The data is covered in HCOB 16 Nov 1961 SEC CHECKING GENERALITIES WON'T DO.
4. HCOB 15 Dec 1972R Integrity Processing Series 12R is cancelled. The data is covered in HCOB 22 Feb 1962 WITHHOLDS, MISSED AND PARTIAL.
5. HCOB 16 Dec 1972 Integrity Processing Series 13 HELP THE PC is cancelled. The material is covered in HCOB 10 May 1962 PREPCHECKING AND SEC CHECKING.
6. HCOB 17 Dec 1972 Integrity Processing Series 14 HAVINGNESS is cancelled. The material is covered in HCOB 11 Jan 1962 SECURITY CHECKING TWENTY-TEN THEORY.

## CONFESSIOAL FORMS

Never subtract anything from a Confessional.

The best method is to write out a predetermined series of questions, as an additional thing, which is for that person particularly. You figure out about what their relationship to life has been, and then you write a little special series of questions.

It's always possible to write up an additional list. Don't make that the only Confessional form. Give that along with a standard Confessional.

You get the idea of what kind of life your preclear has been leading, what his professional and domestic zones are, and you adapt Confessional questions to that and you add it to standard forms.

INTEGRITY PROCESSING QUESTIONS

## FORMULATING CONFESSIONAL QUESTIONS

(Compiled from LRH taped lecture "Teaching the  
Field Sec Checks," SHSBC 6109C26 SH Spec 58.)

Withholds don't add up to withholds. They add up to overts, they add up to secrecies, they add up to individuations, they add up to games conditions, they add up to a lot more things than O/W.

Although we carelessly call them withholds, we're asking a person to straighten out their interpersonal relationships with another terminal.

Our normal Confessional is addressed to the individual versus the society or his family.

It's what people would consider reprehensible that makes a withhold.

In a Catholic society, not having kept Mass would be a reprehensible action. In a non-Catholic society, nobody would think twice about it. So, most of our Confessionals are aimed at transgressions against the mores of the group. That is the basic center line of the Confessional.

You can have a special mores between the son and the mother, a special mores between the husband and the wife, just as you have a special mores, of course, between the auditor and the preclear.

It's a moral code that you are processing in one way or the other.

You are straightening out somebody on a moral code, the "Now I'm supposed to's." They've transgressed on a series of "Now I'm supposed to's." Having so transgressed, they are now individuated. If their individuation is too obsessive, they snap in and become the terminal. All of these cycles exist around the idea of the transgression against the "Now I'm supposed to's." That is what a Confessional clears up and that is all it clears up. It's a great deal more than a withhold.

You would go straight to a person's handling of masses and changes of space. On lacking a clue in that direction, you would go into his most confused motional areas (not e-motional).

This fellow has been a recluse ever since he was twenty. He has not done anything since he was twenty. He has never been anyplace since he was twenty. His hidden standard is he would "get about more." Could he find himself getting about more, he would know that Scientology was working. You find what area he was in before he was twenty. Staying in the house is a cure for something. So you put him on an E-Meter. You can't find areas of moving heavy masses or changes in spaces before he was twenty because he wasn't working. It probably lies in the zone of, maybe, he was in the service? Maybe he was in a boarding school? So all of a sudden you hit the jackpot and you find an area of considerable activity. You're looking for the area of considerable activity which lies prior to the difficulty. Then you run a Confessional on that area of activity.

You trace it back to boarding school. There's one boarding school that he absolutely detests, he suddenly remembers. That's what you do the Confessional on.

Every question you ask has to do with this boarding school. Just add up the factors. How many things can go on in a boarding school? How many people are present? What is there in a boarding school? There are students, boys, instructors, coaches, headmasters, buildings, athletic equipment, and probably transport from there to home, etc.

Find out all the types of crimes that he might have been able to commit against these items. You can dream up a whole form.

One of the ways of doing it is taking an existing Confessional form and just moving it over to the zone of the school. That is not as satisfactory as just putting down all the things he really did in this school that he is never going to tell anybody.

It inevitably is going to be an area of tight mores. He has cut up against those mores, so has individuated himself against the school, so he cannot as-is any part of the track. He's trapped in that particular zone and activity.

Any set of cut sensory perception will operate as overt bait. Forget is a version of not know. So that any sensory perceptive cut off is an effort not to know and you have a target.

Take everything that you've worked up to right there and now do a Confessional on it. Eventually you'll get a "What do you know!" He's too in the thing to see it. You can see it because you're outside of it.

You write up every noun you could possibly think of on the subject of the zone or dynamic that he is having difficulty with and which he fails to cognite on in any way shape or form. You can immediately assume that if he doesn't cognite on that zone or area, that he's really pinned down and that he has withholds from you and from the area on the subject of the area that not even he knows.

A cognition is totally dependent upon the freedom to know. Overts and withholds are dedicated to another thing, these are dedicated to not knowingness. So if the person doesn't cognite, you can immediately assume that he has a large area of not knowingness on the subject that he doesn't even suspect. You as an outsider to his case can suspect where this fellow is having trouble. You dream up a Confessional to match it. The formula for making up a Confessional is just make up a list of all the items you can think of which have anything to do with that target.

Let's say his family; he's always had family trouble. You can get this from a pc's PTPs. If you look at the type of PTP that the pc has, you'll know that it is a present time problem of long duration. If it adds up to three or four times in a row of PTPs with his family, it must be a problem of long duration. The hottest way to get rid of that particular zone is to do a Confessional on it. Again, the way to do a Confessional, is to make a list of all the nouns and all the doingnesses which you can think of and just ask the person if he has overts against any of them; has he done anything to, has he interfered with anything about, e.g. "Have you ever interfered with schooling," "Have you ever done anything to schooling," "Have you ever prevented schooling."

It's little by little that this cognition will take place. It's not all going to take place in one bang.

In the long run it will be a bang, but the bang only took place because you took the pebbles off the top. When you've finally got the thing uncovered—he can look at it and blow it.

**This is the rule: ANY ZONE OR ACTIVITY WITH WHICH A PERSON IS HAVING DIFFICULTY IN LIFE OR HAS HAD DIFFICULTY WITH IN LIFE IS A FRUITFUL AREA FOR A CONFESSIONAL.**

You will find out every time, he's got withholds in that zone or area.

One of the indicators of that is a present time problem. Therefore you know it's a problem of long duration. Three problems of short duration equals one problem of long duration. It's a good detector mechanism.

**THE RULE IN CONFESSIONALS IS BREAK THE PROBLEM DOWN TO ITS MOST FUNDAMENTAL EXPRESSION.**

Then write down those nouns associated with it and those basic doings associated with the fundamental expression and then just phrase your Confessional questions on the basis "Have you ever . . . ?" and any other verb you want to put in. "Have you ever done anything to . . . ?" "Have you ever prevented . . . ?"

You don't have to be fancy as the needle's going to fall every time you come close to it.

Any area where a person is having difficulty in, he is stupid in. Stupidity is not knowingness. This is through overts. But the overt has to be hidden, so it must be an overt that is withheld.

So, these withholds then add up to stupidity and he of course, has trouble.

There isn't anything complicated in it at all.

**A VALID CONFSSIONAL**

The following Confessional is reissued for your use.

1. Do you have anything in your possession that really belongs to us?
2. Do you illegally have any Clearing Course data?
3. Have you passed on any confidential information to anyone?
4. Have you falsely attested to the Ethics Officer?
5. Are you using Scientology unethically for your own personal profit?
6. Have you altered any Scientology data?
7. Have you misused any Scientology processes?
8. Are you in possession of confidential data you shouldn't have?
9. Are you withholding information?
10. Have you broken the Auditor's Code?
11. Have you validated a suppressive person?
12. Have you validated a suppressive group?
13. Have you altered standard technology?
14. Do you have any knowledge of an undisclosed crime against Scientology?
15. Have you spread destructive rumours?
16. Have you claimed false qualification?
17. Have you illegally run any version of the Power Processes on anyone?
18. Have you illegally discussed the Power Processes with anyone?
19. Have you altered the Power Processes commands?
20. Have you illegally run the Power Processes on someone?
21. Has anything been missed?
22. Have you told any half-truths?
23. Have you told any untruths?
24. Do you have dishonourable intentions?
25. Do you intend abiding by policy?

26. Do you intend running the Power Processes before you are trained on them?
27. Have you mixed the processes of Scientology with other practices?
28. Have you used Scientology data to restimulate another?
29. Has anyone got keyed-in as a result of your having discussed high level data with them?
30. Have you overwhelmed a preclear?
31. Have you goofed and not patched up a case?
32. Do you agree with standard technology?
33. Do you intend abiding by the rules?
34. Do you intend to give the Clearing Course material to anyone?
35. Do you intend to run the Clearing Course materials on anyone?
36. Have you invalidated clearing?
37. Have you invalidated the state of Clear?
38. Are you here as an agent for someone?
39. Has something been nearly found out?
40. Have you given a false attestation?
41. Has anything been missed?
42. What question on this list wouldn't you like me to ask you again?
43. Are you connected to a suppressive person?
44. Are you connected to a suppressive group?
45. Have you stolen anything from a Scientology org?
46. Are you out to get even with Scientology?
47. Have you ever broken into a Scientology org?

WHEN MADE OUT STAPLE TO INSIDE LEFT COVER OF PRECLEAR’S  
AUDITING FOLDER.

C/S CHECKLIST ON FOLDERS OF PRECLEARS ONTO POWER

1. TA range OK. \_\_\_\_\_
2. Has been de-PTSed with PTS RD auditing and/or PTS/SP  
Detection, Routing and Handling Checksheet so that any PTSness  
is terminatedly handled. \_\_\_\_\_
3. C/S 53 done. \_\_\_\_\_
4. Int RD OK or properly corrected. \_\_\_\_\_
5. Lists OK or verified/corrected. \_\_\_\_\_
6. C/S Series 78 done if necessary. \_\_\_\_\_
7. Drug RD fully done: \_\_\_\_\_
  - (a) Full battery of Objectives. \_\_\_\_\_
  - (b) Disinterest drug items that read all run—none left unrun. \_\_\_\_\_
  - (c) All drugs on the list. \_\_\_\_\_
  - (d) Class VIII PSEAs and Prior Assessment all fully done.  
(“class VIII auditor not required.”) \_\_\_\_\_
8. GF 40X fully handled including engrams—if resistive or Former  
Therapy or Earlier Practices. \_\_\_\_\_
9. Runs well on Dianetics. (*Including runs past lives.*) \_\_\_\_\_
10. C/S 54 fully done—all items run R3R. \_\_\_\_\_
11. All grades run to EP with good Success Stories:  
Single ( ) Triple ( ) Quad ( ) \_\_\_\_\_
  - (a) ARC S/W \_\_\_\_\_
  - (b) Dianetics \_\_\_\_\_
  - (c) Gr 0 \_\_\_\_\_
  - (d) Gr I \_\_\_\_\_
  - (e) Gr II \_\_\_\_\_
  - (f) Gr III \_\_\_\_\_
  - (g) Gr IV \_\_\_\_\_

12. R/Ses handled with full Expanded Dianetics. \_\_\_\_\_
  13. Low OCA has been handled. (*This means FULL Expanded Dianetics.*) “Means don’t put a pc on Power who has not had his evil purposes and R/Ses handled.” \_\_\_\_\_
  14. No illness after Grade IV or Expanded Dianetics. \_\_\_\_\_
  15. No ethics trouble after Grade IV or Expanded Dianetics. \_\_\_\_\_
  16. By D of P interview pc is happy with gains and not still wanting something handled. \_\_\_\_\_
  17. GF Method 3. \_\_\_\_\_
  18. In Life ruds. \_\_\_\_\_
- PC is fully set up and OK to go onto Power. \_\_\_\_\_
- PC not OK for Power and needs the following per this checklist: \_\_\_\_\_
- 
- 
- 

#### EX DN

*“The Grade Chart points are after Dianetics (like Drug RDs etc) but before grades, after grades but before Power, after Power but before Solo, and after OT III or after any single grade above OT III. These are the only points where Expanded Dianetics can be delivered and the R/S fully and completely handled.”*

If a pc has to have Ex Dn due to being an R/Ser before being allowed onto Power he must be given full Ex Dn and no short cuts.

#### EXPANDED GRADES

Expanded Grades is not a requisite for Power. Expanded Grades very often comes after OT III. It comes after Power too, but not between Solo, Grade VI and OT III.

*Expanded Dianetics Series 25*

**THE GAMBLER**

An obsessive gambler is a psychotic just like a drug addict or an alcoholic.

They are handled the way you handle any other psychotic. They don't have to do anything for real in life because it all depends on chance and never on themselves. So you have them on the minus effect scale.

Life isn't real to a psychotic gambler and therefore they never really buckle down to anything. Consequences are unreal to them and criminal acts are incomprehensible as nothing is real anyway.

Getting off overts is nothing to such people because they are not there and take no responsibility for them. Everything else is responsible—not them. Thus you have to find the trail to the R/Ses on the subject and discharge those.

This aspect of such a case is the emergency number one handling.

It has to be recognized for what it is—PSYCHOSIS.

**PROGRAMMING OF EXPANDED DIANETICS**

Ref: HCOB 19 Jun 70	C/S Q & A
HCOB 26 Aug 70	Incomplete Cases
HCOB 31 Mar 71	Programming and Misprogramming
HCOB 28 Sep 71	Know Before You Go

“Expanded Dianetics audits the pc at cause. PTS handling audits the pc at effect. When you start a case or use a piece of Expanded Dianetics you are auditing the case at cause.

“If you suddenly switch off Expanded Dianetics before it is complete you cease to audit the case at cause and if PTS handling is then done you would switch the case over to effect.

“This would be a valence shift and would worsen the case.

“This is one of the consequences of not handling Expanded Dianetics fully and completely once it has begun.

“Sec Checking also audits the case at cause.

“One might program a case to handle his PTSness then handle by Sec Checking and then finish with Expanded Dianetics and be home perfectly safe.

“If one Sec Checked a case, began Expanded Dianetics, failed to complete it and switched to PTS handling, the case would be audited out of sequence and would flip from being cause to being effect.”

So when a case is programmed for Expanded Dianetics and started on Expanded Dianetics it should be fully and completely handled before any other auditing is interjected. Expanded Dianetics should be a fully completed cycle of action and not bit and piece.

“It is not OK to mix up Expanded Dianetics. It doesn't go into the middle of PTS handling. Hold the form of grades and processes.

“Don't start a pc on one thing and switch to another without finishing what you began. For example a case was started on Expanded Dianetics out of the blue, followed by three S & Ds, then a GF of some kind, then a track repair and then the S & Ds were handled. This is very bad programming.

“A case started on Expanded Dianetics must be programmed to complete Expanded Dianetics. This should be programmed according to Expanded Dianetics tech and not just one isolated item that needs handling.

“What is started on a case must be completed.

“A case on Expanded Dianetics, would fall into the other half of the PTS/SP scene. By failing to handle a valence shift could occur the moment that somebody starts

to assume that an Expanded Dianetics pc was the effect (PTS) instead of the cause of the scene (Expanded Dianetics).”

**EXPANDED GRADES**

Expanded Grades *can* be done:

- After Drug RD
- After Full Dn RD
- After Quad Grades
- After Expanded Dn
- After Power (but before Solo or Clear or OT I to III and not during these)
- After OT III
- After OT IV
- After OT V
- After OT VI
- After OT VII

In other words they can be done *after* any full completion of any one of the above.

A typical and IDEAL program for a pc would be:

- Sub Grade Handling
- Drug Rundown
- Full Dianetics RD
- Quad Grades
- Expanded Dn
- Expanded Grades
- Power
- R6EW
- Clear
- OT I
- OT II
- OT III
- OT III X
- OT IV
- OT V
- OT VI
- OT VII.

However, due to bit and piece auditing done on some pcs Expanded Grades is sometimes entered at other points.

Quad Grades (or even Single Grades for that matter) never should have been abandoned and are restored.

Expanded Grades is NOT a requisite for Power but Quad Grades are.

Pcs flubbily can be programmed backwards like Expanded Grades, Drug RD, Expanded Dn—etc. etc. But it *is far* from ideal.

**LIST ERRORS  
CORRECTION OF**

It has been found that the correction of lists, a very vital piece of tech, has been a source of confusion in the field as it apparently has never been written up in an issue. It really is simple if you know your Laws of L & N.

**VERIFYING A LIST**

The correct procedure for verifying/correcting past L & Ns is to check the items as to whether or not they are correct. Then do an L4BRA on each list where the item is found to be incorrect. You would have to orient the pc to the listing question and the item. You do not direct the question to see if it read. And don't just do an L4BRA and then not find the right item for the pc as part of the handling (unless the question proves to be uncharged or some such).

**NULLING A LIST**

One nulls a list when he doesn't get a BD F/N item on listing. The Laws of L & N strictly apply. An L4BRA would be used if the action bogs with still no item found. One would also null lists the pc made where no item had been found such as a 2WC which turned into a listing action with the pc giving off items or a list the pc somehow made while not on a meter. In these cases there is no item to verify with the pc as correct. Just cull the items into a list, work out with the pc what the question was if it's not already noted, and null the list.

**RECONSTRUCTING A LIST**

Sometimes you just don't have the list and can't get it or it's an old Why Finding or PTS interview for which there are no worksheets. In this case you get from the pc what the question was and then get him to give you the items that were already on the list as the item probably was already on the list and you don't want the pc to get into newly listing the question in PT and then getting into an overlisting situation. Just get him to give you the items he had already put on the list and more often than not you will get a BD F/N item. If you don't get the item that way then you can extend the list.

**SELF-LISTING**

Watch it on these as every random stray thought a person has about "why this or that" does not mean it's a self-list. But do look for it on a person who is manifesting the horrendous BPC an out list can generate, who is introspected or has been trying to figure out who is doing him in after just having seen the Ethics Officer. Just don't get into trying to make a list out of some non-standard listing question that won't give you an item. And actually the usual reason for self-listing is a prior wrong L & N item or an item not found. People will self-list to try to find the right item. So find and correct the earlier out list.

**LIST CORRECTION BLOW-UP**

When you are going along correcting lists and suddenly you get a big pc blow-up and it is not resolving on the list you are correcting you had better quickly realize that you probably are not correcting the list that is out and you'd better find out which list

it is. There is usually an earlier out list to be found, if the list you are correcting does not resolve the upset.

### LISTS NOT READING

When you start getting key lists such as Grades III and IV not reading and no items found it's time for that auditor to get a thorough overhaul on his metering, eyesight and to get off all his MUs on L & N. You also could be setting the pc up for a self-listing situation as he has been given the listing question but no item has been found. So be very sure the question did not read even with Suppress and Inval and TRs were in before getting off a key L & N process.

### USE OF L4BRA

The prepared list L4BRA corrects L & N lists. It can be run on old lists, current lists, general listing. When a pc is ill after a listing and nulling session or up to 3 days after, always suspect that a listing action done on the pc had an error in it and get those lists corrected.

Sometimes it is obvious what the error was per the Laws of Listing and Nulling. For example there could be two reading items left on the list in which case you would know to extend the list as it has been underlisted. If this didn't go, then an L4BRA would be done on the list.

### HANDLING AN L4BRA

You handle reading questions on the L4BRA by the directions under the question that read. You don't just 2WC these questions. For example say question 4 read on the L4BRA, "Is a list incomplete? SF." You then ask the pc, "What list is incomplete?" Locate it and get it completed to a BD F/N item. You don't just 2WC "incomplete lists" to an F/N and leave it at that.

By the way the L4BRA is missing a line which is "Was it the first item on the list?" This is being added as it's quite common that it is the first item and is most often missed.

### DO IT RIGHT

An out list can create more concentrated hell with a pc than any other single auditing error. So it's imperative that listing errors get properly corrected.

The best thing to do is to have the Laws of Listing and Nulling drilled line by line and down cold and just do it right in the first place. Then you will also see at once where old lists violated these laws and you will not be yourself doing lists that have to be corrected later.

**RECURRING WITHHOLDS AND OVERTS**

Ref: HCO PL 7 Apr 70RA	GREEN FORM
HCO B 15 Aug 69	FLYING RUDS
HCO B 10 Jul 64	OVERTS ORDER OF EFFECTIVENESS IN PROCESSING
HCO B 6 Sep 68	CHECKING FOR FALSE READS
HCO B 11 Sep 68	FALSE READS

**DEFINITION**

The definition of recurring withhold or overt is an overt or withhold that keeps coming up, repeats again, or shows up again. Definition is obtained here from the American Heritage Dictionary and "the Scientology Tech Dictionary." Before a recurring withhold or overt can be handled it must be understood what one is. It is simply a withhold or overt that has already been gotten off and comes up again as an answer to an apparent reading withhold or overt question. The pc may also become exasperated at having to get off an overt or withhold that has already been gotten off. The pc may become upset, seem resigned or even protest a recurring overt or withhold. These are just a couple of the signs of a recurring withhold or overt.

**METHODS AND HANDLINGS**

1. When a pc gets upset with a withhold being demanded that they already got off and they get into protest then "there is obviously a false read as the pc is getting off overts already gotten off."

HANDLING: "Check for false reads on overts by asking the pc what overt he or she has gotten off more than once and tracing it back with the pc to what auditor or person said something read when it didn't. You would clean all these up." (Reference: HCOB 6 Sept 68 CHECKING FOR FALSE READS.)

2. When number 1 above doesn't handle the recurring overt or withhold:

HANDLING: "Who said or seemed to infer something read when it didn't? Then this would be dated to blow and located to blow." (Reference: HCOB 11 Sept 68 FALSE READS.)

3. When a pc gets upset with getting off withholds or overts or mentions he or she felt his or her overts weren't accepted.

HANDLING: Ask who wouldn't accept it E/S. (Reference: HCO PL 7 April 70RA GREEN FORM.)

4. "The pc has been invalidated for getting it off."

HANDLING: Find out who invalidated the pc for getting off overts or withholds. (Note any terminals for later handling on the PTS RD.)

5. "The pc has been punished for getting it off."

HANDLING: "Find out who punished the pc for getting off overts and withholds."

The above methods of handling recurring overts and withholds can be found in the reference materials listed above.

HCO BULLETIN OF 7 MAY 1977

Remimeo

### **LONG DURATION SEC CHECKING**

It has been found on some cases which did not immediately R/S, even though their crimes and past would seem to indicate they should have R/Ses, that when Sec Checking was carried on for several sessions, one each on several consecutive days, R/Ses then began to show up. In two cases, List One R/Ses showed up on persons who had never been noticed as having R/Ses before.

It can then be concluded that R/Sers do not R/S necessarily on casual brief Sec Checks.

Part of this phenomena is that the person quite commonly gives off very shallow overts of the order of "I stole a pen from HASI" or "I thought your TRs were bad and I didn't tell you" and other shallow PT answers to searching Sec Check questions.

This is so much the case that whenever I see shallow wishy-washy "averts" coming off a case day after day, I suspect that sooner or later a good auditor will suddenly find real roaring overts and R/Ses sitting there.

The soft-spoken quiet "inoffensive" person is also a candidate for this sort of disclosure.

Particularly notable is the person who "has never done anything wrong in his whole life and has no overts of any kind."

These are just special cases of the same thing and an auditor should be alert to them.

HCO BULLETIN OF 9 MAY 1977

Remimeo

**FOREWORD OF  
EXPANDED DIANETICS  
COURSE**

(Issued on the 27th Anniversary of  
*Dianetics: The Modern Science of Mental Health*)

Expanded Dianetics contains our tech for the handling of the neurotic, psychotic and destructive impulses in Man as well as some people who give themselves trouble or have trouble.

Dianetics as early as 1950 and 1951 had its successes in this field. Twenty years of research and experience isolated in 1970 what psychosis really was.

When Expanded Dianetics was first issued those who compiled the case histories left many of them out and those they included were not shown as completed. This omission gave the impression that one did not finish an Expanded Dianetics case. In the current checksheets this has been repaired.

Upper level auditors, in 1973, were using fragments of Expanded Dianetics along with other processes. This has been smoothed out in the present organization of the materials.

Such cases as those who can only be solved by Expanded Dianetics live difficult lives and are often difficult to manage. Thus the auditor must be very knowledgeable on these materials and very skilled. We can solve such cases. But only where people know their business.

There are far more such cases around than one would suspect.

The destructiveness of Man and his apparent *general* tendency toward 4th dynamic suicide stems entirely from a few of these types in his midst.

So Expanded Dianetics actually begins taking form with the first words of the first chapter of *Dianetics: The Modern Science of Mental Health*:

“A science of mind is a goal which has engrossed thousands of generations of Man. Armies, dynasties and whole civilizations have perished for the lack of it. Rome went to dust for the want of it. China swims in blood for the need of it; and down in the arsenal is an atom bomb, its hopeful nose full-armed in ignorance of it.”

The last words of DMSMH were “For God’s sake, get busy and build a better bridge!” Nobody built the better bridge. So I did.

This full issue of materials and subsequent research presents, 27 years later, all the tools we have in the field of handling destructiveness in cases.

Use of these technologies brings us to a potential realization of handling the state Man is in.

**PSYCHOSIS, MORE ABOUT**

(Excerpted from HCOB 17 June 1971)

All aberration is to a greater or lesser degree nonsurvival.

To be rid of major aberrations is to have a new life.

To understand this one must understand the most severe aberration which is psychosis.

The actual basis of all psychosis is motive. It is NOT competence or incompetence.

Below all psychotic conduct lies an evil purpose.

Because psychiatry and psychology did not have this single technical fact they defined psychosis as "incompetence," had the wrong target and so could not and never did understand psychosis and were thereby led into atrocities such as shocks and brain surgery and, in the country where these subjects originated (Germany), slaughtered 300,000 insane in gas chambers some time before Hitler came to power.

A true psychotic can be brilliant or stupid, competent or incompetent. It is his general motive or purpose that determines whether or not he is insane or sane.

Famous psychotics like Napoleon, Ivan the Terrible, Stalin and Hitler were all quite brilliant yet wound up destroying everything in sight including their own people.

They had a destructive basic purpose. Every psychotic has one. It is usually covert, hidden, but in full play against his unsuspecting friends.

The sole difference in motive is whether it is destructive or constructive.

Everyone has a basic purpose. The psychotic has a destructive one.

The test of a personality then, is whether the result of a person's activity is destructive or constructive.

Man is basically good. When he finds he is being too destructive he recognizes he is bad for others and seeks to leave. He will also try to become less powerful, ill or to kill himself.

The progress of psychosis then begins with a belief something is evil. This is followed with an effort to stop it. This stop becomes general. A basic purpose is then formed which contains an evil intent.

The being then goes on from disaster to disaster, seeking overtly or covertly to destroy everything around him.

At a guess about 15% to 25% of living human beings are psychotic and bring covert disaster to those around them and themselves.

The evil purpose is expressed by committing harmful acts and withholding them.

Ordinary overt/withhold processes, as in Grade II Expanded, can handle this condition providing the person can be audited and providing the evil purpose is also brought to view.

About 1/3rd of the psychotics handled in this way recover their sanity fully and lead constructive decent lives. Two-thirds are either so far gone or irresponsible hard to audit that they improve but are of little use.

Those already subjected to the brutalities of psychiatric “treatment” or psychological “counseling” are the most difficult.

Those who have been on drugs, particularly LSD 25 as developed by psychiatry “so their nurses would be able to experience what being insane feels like” around 1950, are very difficult cases.

**LSD**

**YEARS AFTER THEY HAVE  
“COME OFF OF” LSD**

Characteristics of persons who have been on it from examination of 2 cases:

- 1) They are disassociated—meaning they are separate from anything they are doing.
- 2) Whatever occurs has nothing to do with him.
- 3) Not responsible for their own action or anything else and it doesn't occur to them that they ever should be.
- 4) Their emotions are shut off to a greater or lesser extent.
- 5) Consequences mean little or nothing to them.
- 6) They are stupid.
- 7) Normal actions that another can do easily get mucked up by them.
- 8) They are unpleasant to associate with.
- 9) They are de-humanized and can be vicious or irrationally cruel.

Apparently they have become a sort of a vegetable or a zombie to a greater or lesser degree.

The LSD apparently stays in the system and is liable to go into action again giving them unpredictable “trips.” Which could be quite fatal while driving and even walking around.

A Drug Rundown which has to include LSD cannot be considered complete until the person has undergone a long period of sweating and heavy liquids and exercise.

The way LSD got popular was because of Henry Luce, the head of Time Magazine, who publicized it and glorified it from mid-1950 on. He and his wife were under psychiatric care and were on LSD.

Nearly as I can trace it, it was the Nazi intelligence drug developed in Switzerland and was probably intended for use in municipal water systems to paralyze the population just prior to an invasion as the invading enemy would then find them all irrational.

It only takes a millionth of an ounce to produce a “full trip.”

When you are dealing with an LSD case or anyone who has ever taken LSD you cannot and must not consider their Drug Rundown complete until they have been sweated and given liquids and exercised for months as well as heavily audited. They *can* recover with auditing and this handling, but it won't be very fast.

(HCOB 30 AUGUST 71RA ISSUES I & 11)  
(BTB 30 AUGUST 71 ISSUE I RG)

**PAID COMPLETIONS SIMPLIFIED**

Board Technical Bulletin 30 August 71 Issue I RF Revised 24 September 76, RF-I, Issue I RF-I, I RF-2 are hereby cancelled. It is not valid anyway, nor any previous BTB on the subject of student, preclear or internship Paid Completions as they and their series cancel an HCOB. BTBs cannot cancel HCOBs.

HCO Bulletins from 30 August 71 Issue I and Issue II forward dealing with Paid Comps, student and pc points and ending with 30 August 71R Issue I are likewise cancelled.

In their place is the formula given in LRH ED 153RK of 14 June 77.

1. Major Training Service 20 Points
2. Major Processing Service 5 Points
3. Minor Service 2 Points

**MAJOR TRAINING SERVICE**

This is defined as a certificate level action requiring around a month to complete. Examples are HSDC, Class I, Class II, Class III, Class IV. The Student Hat is included as a major course even if covered in payment by a Class course. The Primary Rundown, OEC, Senior Class IV, Expanded Dianetics, Salesmanship Course, any formal special course, but not Dept 17 courses.

Any internship for a single class counts equally to a full course and is 20 points.

Saint Hills get 80 points for a completed SHSBC and 80 points for a Senior SHSBC as these are very long courses.

AOs get 20 points for every Advanced Course completed and successfully Solo audited (see auditing points as well for AO Solo).

When scholarships form part of any training fee and when the balance was fully paid and the service successfully completed the full points of the course are credited to Paid Comps.

**MAJOR PROCESSING SERVICE**

This is simply any 12 1/2 hour intensive completed on any formal HGC processing. It includes any rundown, Word Clearing or auditing action received by the preclear.

Saint Hills are the same but with an additional 5 points of each part of Power completed.

AOs get a credit of 2 points for every 12 1/2 hours Solo audited.

Free auditing or service, student co-audits, staff auditing do not count on this stat.

## MINOR (DIVISION 6) SERVICES

These are any and all courses, services, co-audits requiring around 1 to 2 weeks to deliver.

These include HAS, TRs, HQS, public co-audits, any course or counselling or public paid action offered by Department 17.

These minor services must be paid, attended and completed to count on the stat.

No points at all may be taken for any service the person did not complete to the end.

## BONUS POINTS

The three classes of service are interchangeable for the purposes of bonus.

Anyone who, having successfully completed a (1), (2) or (3) service who then re-signs up for any other (1), (2) or (3) service is credited with double the amount of the service just completed.

These bonus points are intended to ensure:

- A. Quality of service.
- B. Re-sign ups.
- C. Bettered organization.

Any Reg. Public or Div 2, may sign up or re-sign up for any or all the org's services.

Bonus points are received for every student or pc sent to an SH or AO, meaning double for the last service taken in the sending org.

## PACKAGE SALES

Where packages are sold such as multiple intensives or several courses, Paid Comps are credited on the successful completion of each part of the package—such as each 12 1/2 intensive and the bonus points for the last intensive or course are automatically credited. This awards package sales. They must of course be fully paid to count as Paid Comps or bonuses.

No bonus points at all may be taken unless the person actually signs up for the next or another org service.

## PENALTIES

The lack of bonus points on those who blow, request refunds etc. operates as a penalty. Recovery or good handling so as to avert refund, as in ARC break pgms, operates to restore the Paid Comps and, if new service is signed up for, the bonus points that would otherwise have been denied the stat are now restored to it.

F/N VGIs ratio at the Examiner is retained as per the original HCOB 30 August 71. In any given day where the F/N ratio at the Examiner falls below 90%, at the Examiner, there is a penalty of one point subtracted from Paid Comps for each No below 90%. There is one point added to Paid Comps for each % above 90% for any given day where F/N VGIs ratio at the Examiner is above 90%.

If there is an unhandled red tag that is left unhandled for more than 24 hours, ALL HGC (or AO Solo & HGC) Paid Comps are lost for that day and for every successive day that that pc remains red tagged.

For every day there is no HAS, full-time competent Recruiter, a Qual Sec and a Staff Section Officer single-hatted on post in the org by reason of no appointment (not by reason of occasional absence by reason of leave or a day off) the CO or ED loses all his Paid Comps.

#### VERIFICATION

All Paid Comps and bonus computations must be verified by HCO. This verification consists of examining the actual invoices for the completed service to ensure it is fully paid, examination of C&A records and courses to ensure it was actually completed. For bonuses verification consists of examination of the actual invoices for re-sign up and the past invoices of completion of the last service and other records to ensure the service was fully paid and fully completed.

Of course the easiest way to verify is to have an up-to-date filed into CF with the invoices going into them.

Any query or question concerning this HCOB is to be referred to LRH Comm International via the local and Continental LRH Comm.

## ART AND COMMUNICATION

(Art HCOB No. 3)

When a work of painting, music or other form attains two-way communication, it is truly art.

One occasionally hears an artist being criticized on the basis that his work is too "literal" or too "common." But one has rarely if ever heard any definition of "literal" or "common." And there are many artists simply hung up on this, protesting it. Also, some avant-garde schools go completely over the cliff in avoiding anything "literal" or "common"—and indeed go completely out of communication!

The *return* flow from the person viewing a work would be contribution. True art always elicits a contribution from those who view or hear or experience it. By contribution is meant "adding to it."

An illustration is "literal" in that it tells everything there is to know. Let us say the illustration is a picture of a tiger approaching a chained girl. It does not really matter how well the painting is executed, it remains an illustration and it IS literal. But now let us take a small portion out of the scene and enlarge it. Let us take, say, the head of the tiger with its baleful eye and snarl. Suddenly we no longer have an illustration. It is no longer "literal." And the reason lies in the fact that the viewer can fit this expression into his own concepts, ideas or experience: he can supply the why of the snarl, he can compare the head to someone he knows. In short he can CONTRIBUTE to the head.

The skill with which the head is executed determines the degree of response.

Because the viewer can contribute to the picture, it is art.

In music, the hearer can contribute his own emotion or motion. And even if the music is only a single drum, if it elicits a contribution of emotion or motion, it is truly art.

That work which delivers everything and gets little or nothing in return is not art. The "common" or overused melody, the expected shape or form gets little or no contribution from the hearer or viewer. That work which is too unclear or too poorly executed may get no contribution.

Incidental to this, one can ask if a photograph can ever be art, a controversy which has been raging for a century or more. One could say that it is only difficult to decide because one has to establish how much the photographer has contributed to the "reality" or "literalness" in front of his camera, how he has interpreted it, but really the point is whether or not that photograph elicits a contribution from its viewer. If it does, it is art.

Innovation plays a large role in all works which may become art. But even this can be overdone. Originality can be overdone to the point where it is no longer within any possible understanding by those viewing or hearing it. One can be so original one goes entirely outside the most distant perimeter of agreement with his viewers or listeners. Sometimes this is done, one suspects, when one has not spent the labor necessary to execute the work. Various excuses are assigned such an action, the most faulty of which is "self-satisfaction" of the artist. While it is quite all right to commune with oneself, one cannot also then claim that it is art if it communicates with no one else and no other's communication is possible.

The third flow, of people talking to one another about a work can also be considered a communication and where it occurs is a valid contribution as it makes the work known.

Destructive attitudes about a work can be considered as a refusal to contribute. Works that are shocking or bizarre to a point of eliciting protest may bring to themselves notoriety thereby and may shake things up; but when the refusal to contribute is too widespread, such works tend to disqualify as art.

There is also the matter of divided opinion about a work. Some contribute to it, some refuse to contribute to it. In such cases one must examine who is contributing and who is refusing. One can then say that it is a work of art to those who contribute to it and that it is not to those who refuse to contribute to it.

Criticism is some sort of index of degree of contribution. There are, roughly, two types of criticism: one can be called "invalidative criticism," the other "constructive criticism."

Invalidative criticism is all too prevalent in the arts for there exist such things as "individual taste," contemporary standards and, unfortunately, even envy or jealousy. Too often, criticism is simply an individual refusal to contribute. One could also state that "those who destructively criticize can't do."

"Constructive criticism" is a term which is often used but seldom defined. But it has use. It could probably be best defined as criticism which "indicates a better way to do," at least in the opinion of the critic. Those who simply find fault and never suggest a practical means of doing it better rather forfeit their right to criticize.

Art is probably the most uncodified and least organized of all fields. It therefore acquires to itself the most "authorities." Usually nothing is required of an "authority" except to say what is right, wrong, good, bad, acceptable or unacceptable. Too often the sole qualification of the authority (as in poor teaching of some subjects) is a memorized list of objects and their creators and dates with some hazy idea of what the work was. An "authority" could considerably improve his status by using rather precise definitions of his terms. The modern trend of seeking the significance in what the artist meant is of course not likely to advance the arts very much.

Viewing and experiencing art on the basis of what one is contributing to it and what others contribute to it is a workable approach. And it would result in improved art and improved appreciation.

Such a viewpoint, interestingly, also includes some things into the field of art not previously so viewed.

# HAVE YOU LIVED BEFORE THIS LIFE?

by

L. Ron Hubbard

Published October 1977

Have You Lived Before This Life? was first published in March 1960. Growing public demand for knowledge about past lives was the catalyst for expanding and republishing this book in October 1977. One of the new chapters includes Ron's lecture entitled *Death*, originally given on 30 July 1957.

Both Dianetics and Scientology were researched by L. Ron Hubbard, American writer and philosopher.

One of the more startling discoveries of Dianetics and Scientology was that if a person's awareness and memory were adequately improved, past life memories could be contacted. The memories were *there*, in person after person, case after case.

Incredible? "Past lives are 'incredible' only to those who dare not confront them," says Hubbard, "In others, the fact of former existence can be quickly established subjectively."

Thousands and thousands of case histories have proven this out in over a quarter of a century of research. Doubters and believers, skeptics and scoffers have all discovered hidden memories they never knew existed.

This discovery has sparked off a tremendous amount of public interest over the last 25 years. Today, more and more people are wondering about past and future lives.

*Have You Lived Before This Life?* presents the original discoveries that started it all.

If past and future lives are a reality, it calls for a reevaluation of many of our current views, values and lifestyles.

This is a book which vitally affects every man and woman in the world today. It is a look into the possibility of larger vistas to the human drama than have ever been dreamed before—the possibility of a continuing existence, with memory, beyond one lifetime.

An adventure awaits you. The adventure of you. You now stand on the threshold of discovery.

324 pages, hard cover with dust jacket, glossary. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Church of Scientology Publications Organization U.S., 4833 Fountain Ave., East Annex, Los Angeles, California 90029, U.S.A.; or Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark.

Remimeo  
All Levels  
All Auditors

**CHECKLIST FOR SETTING UP  
SESSIONS AND AN E-METER**

In order to prevent constant interruptions of a session to get dictionaries, prepared lists, etc. etc. and in the vital interest of keeping the pc smoothly in session—interested in own case and willing to talk to the auditor, the following checklist has been made.

An auditor should drill this checklist until he has it down thoroughly, without reference to it.

**A. PRE-APPOINTMENT:**

1. Paid invoice slip of pc. \_\_\_\_\_
2. Pc folders; 2A. Current 2B. Old. \_\_\_\_\_
3. Pc folder study by auditor. \_\_\_\_\_
4. Folder Error Summary. \_\_\_\_\_
5. A C/S for the session. \_\_\_\_\_
6. Any cramming actions on the C/S. \_\_\_\_\_

**B. CALL IN:**

7. Enough time to do session. \_\_\_\_\_
8. APPOINTMENT (made by auditor or Technical Services). \_\_\_\_\_
9. Scheduling Board (auditor, pc, room, time). \_\_\_\_\_

**C. ROOM READINESS:**

10. Clean up room. \_\_\_\_\_
11. Smells removed. \_\_\_\_\_
12. Room temperature handled. \_\_\_\_\_
13. Area and hall silence signs made. \_\_\_\_\_
14. Silence signs placed. \_\_\_\_\_
15. Knowing where the w.c. is. \_\_\_\_\_
16. Right sized table, sturdy, doesn't squeak. \_\_\_\_\_
17. Side table. \_\_\_\_\_
18. Adequate light if room gets dark. \_\_\_\_\_
19. Flashlight in case power fails. \_\_\_\_\_
20. Quiet clock or watch. \_\_\_\_\_
21. Blanket for pc in case gets cold. \_\_\_\_\_
22. Fan or A/C in case pc gets too hot. \_\_\_\_\_

**D. AUDITING MATERIEL:**

23. Paper for W/Ss and lists. \_\_\_\_\_
24. Ballpoints or pencils. \_\_\_\_\_
25. Kleenex. \_\_\_\_\_
26. Anti-perspirant for sweaty palms. \_\_\_\_\_
27. Hand cream for dry palms. \_\_\_\_\_

28. Dictionaries including Tech and Admin Dictionaries and a non-dinky one in language. \_\_\_\_\_
29. Grammar. \_\_\_\_\_
30. Auditing materiel, white forms, prepared lists including those that might be called for on other prepared lists. \_\_\_\_\_
31. E-Meter. \_\_\_\_\_
32. Spare meter. \_\_\_\_\_
33. Preliminary meter check for charge and operational condition. \_\_\_\_\_
34. Meter shield (to obscure meter from pc). \_\_\_\_\_
25. In Session sign for door. \_\_\_\_\_
36. Extra meter lead. \_\_\_\_\_
37. Different sized cans. \_\_\_\_\_
38. A plastic bag to cover one can for pcs who knock cans together. \_\_\_\_\_
39. Finalize setting up room for session. \_\_\_\_\_

E. PC ENTRANCE TO AUDITING ROOM:

40. In Session sign on door. \_\_\_\_\_
41. Phone shut off. \_\_\_\_\_
42. Putting pc in chair. \_\_\_\_\_
43. Comfort of chair check with pc and handle. \_\_\_\_\_
44. Adjusting pc's chair. \_\_\_\_\_
45. Check pc clothes, shoes for tightness and handle. \_\_\_\_\_
46. Check with pc if room is all right and handle. \_\_\_\_\_

F. METER SET UP FOR SESSION:

47. Check test (for charge). \_\_\_\_\_
48. See that needle is not dancing by itself or auditing itself. \_\_\_\_\_
49. Make sure 2.0 = 2.0 by trim. \_\_\_\_\_
50. Snap in leads jack. \_\_\_\_\_
51. Verify trim by calibration resistor onto alligator clips. \_\_\_\_\_
52. Put needle on set. \_\_\_\_\_
53. Put pc on. \_\_\_\_\_
54. Adjust pc sensitivity for 1/3 dial drop by pc can squeeze. \_\_\_\_\_
55. Go through False TA Correction as needed including change of cans, cream, anti-perspirant as needed. \_\_\_\_\_
56. Have pc take a deep breath and let it out and see if needle gives a latent fall (which it should). \_\_\_\_\_
57. Check for adequate sleep. \_\_\_\_\_
58. Check to be sure pc has eaten and is not hungry. \_\_\_\_\_
59. Ask for any reason not to begin session. \_\_\_\_\_

G. START THE SESSION.

**LSD AND THE SWEAT PROGRAM**

Ref: HCOB 25 Oct 71 DRUG DRYING OUT  
HCOB 31 May 77 LSD  
HCOB 2 Jun 71 CONFRONTING (for ref on gradients)  
HCOB 5 Nov 74 DRUGS, MORE ABOUT

It has come to my attention that clarification is needed on HCOB *LSD Years After They Have "Come Off Of" LSD*. No outlined program has been issued on handling the LSD case.

For purpose of clarification "AN LSD CASE" is anyone who has ever had LSD and not sweated it out and had a full Drug Rundown including Objectives. "When you are dealing with an LSD case or anyone who has ever taken LSD you cannot and must not consider their Drug Rundown complete until they have been sweated and given liquids and exercised for months as well as heavily audited. They *can* recover with auditing and this handling, but it won't be very fast."

The Sweat Program came about because the "Restim" people who have been on LSD experience appears to act like they had just taken more LSD. When you audit out any other drug that's the end of it. But this isn't true of LSD.

As it only takes 1/millionth of an ounce of LSD to produce a drugged condition and because it is basically wheat rust which simply cuts off circulation, my original thinking on this over the years was that LSD sticks around in the body. That basically is the idea that underlies the Sweat Program.

LSD is a "KILLER DRUG" and should be labelled as such. It was recently found that many exec trainees who were off-loaded were LSD cases.

Don't hold somebody off Objectives and Drug Rundown just because he has not had a Sweat Program. They can have their Objectives and Drug Rundown and then go on the Sweat Program, that was the way it was originally designed.

A "Sweat Program" would be for somebody who couldn't run Objectives or a Drug Rundown because of LSD or for use after Objectives and a Drug Rundown to get rid of the residual LSD.

It is the residual LSD we're trying to get rid of—LSD that may still be in the body. It's no substitute for Objectives and a Drug Rundown. You must not consider their Drug Rundown complete until they have completed the Sweat Program and been heavily audited.

As the Sweat Program can be strenuous anyone not in good physical condition is required to see a medical doctor in liaison with the Medical Liaison Officer and C/S to obtain permission to exercise and do jogging. Where exercise and jogging would be detrimental to the individual's health this program should not be done and a more basic nutritional, medical and auditing program done.

Doing this *gradiently is very important* as you are not only working LSD out of the system but other bodily poisons will also be flushed out. If the program is done out gradient the individual can become ill from body changes that he is not able to keep up with.

As sweating depletes the body's mineral supply, extra salt needs to be taken during this program. Indicators of salt depletion can be clammy skin, tiredness, weakness, headache—perhaps cramps, nausea—dizziness (possible vomiting), or possibly fainting. At the first sign of any one of these, some salt should be taken. You can carry a salt shaker with you while running too.

On this program, a person has to be watched because he will be getting out crystals and could go on a trip—a real LSD trip from the crystals coming out.

It is advised that the running jogging portion of this program be done with another person.

## VITAMINS AND MINERALS

The “Drug Bomb” in HCOB 25 October 71 DRUGS DRYING OUT, should be taken three times a day. In addition the “Cal-Mag Formula” in HCOB 5 November 74 DRUGS, MORE ABOUT, should be taken 2 times a day. Plus, a teaspoon of salt should be taken daily.

## DIET

Quite reduced food intake is important here to get body fat or just mass of the body decreased so that the residual crystals of LSD that have accumulated can come out. If a person keeps eating a lot the body is going to keep building layers of muscles and be busy with metabolizing new food and chemicals for body energy as opposed to using the fat which has been accumulated. This is especially important with the person who has fat as fat has few blood vessels in it. Circulation in fat is poor so LSD in it will not come out until that actual fat is burnt off the body.

In addition to reduced food intake it is important to increase liquid intake as it actually flushes the wastes out of the body. In this way LSD and other accumulated drugs when released from the cells pass through the body pretty quickly so are not as likely to be re-absorbed. Natural juices, no sugar or chemicals added, preferably freshly made, is the desirable liquid to take and you can take as much as you want. Two quarts of fluid a day is the minimum quantity to take. Fresh fruits can be eaten to get rid of the hunger feelings one may experience but should not be consumed in excess. For example: 4 nectarines, 1/2 lb of grapes, a pear and a banana for the day.

In addition to the fruits satisfying the hunger they also give the body minerals lost through sweating.

Besides fruit and juices some protein should be taken. The best source being predigested liquid protein. These must be gotten from a good health food store as opposed to a department store. For example “Progest” which is made in New York is very good.

## EXERCISE

It is very essential to exercise. The major exercise being done is jogging or running. Exercise increases the circulation throughout the whole body thus A) carries out cell waste more rapidly and B) causes the circulation to go deeper into the muscles and tissues so those areas which have been stagnant can now get rid of the “residual crystals” which have accumulated.

In addition to increased circulation, exercise especially running causes the body to sweat which will cause the crystals and toxic products in the body to come out through the body pores.

A rubberized nylon sweat suit is essential in running as it will aid sweating. This should not be started until the second to third week so that the body can gradually get used to profuse sweating.

## THE SWEAT PROGRAM

1. The C/S in liaison with the Medical Liaison Officer starts the person off on this program.
2. As necessary the C/S in liaison with the Medical Liaison Officer orders the person to a medical exam by a medical doctor.
3. The Medical Liaison Officer informs the person of the vitamins he or she is to take daily. This includes the "Drug Bomb" three times a day and "Cal-Mag Formula" two times a day plus at least a teaspoon of salt.
4. The diet is fruit, heavy juices and water and two ounces of liquid protein daily (2 oz of liquid protein daily is the minimum dose).
5. The jogging/running is now started on a gradient. The minimum exercise time should be an hour a day. The more time that is put in, the more sweating will be done and the program completed all the faster.

A person can gradiently build up jogging/walking until he is solidly up to Jogging/running for the entire hour.

It is important to set daily goals and try to make them to establish a game and purpose to the daily exercise.

6. *Once the Drug Rundown, which is Objectives plus Dianetics is done, the pc may be audited on other actions while continuing with the Sweat Program.*

*Lack of a Sweat Program doesn't stop other auditing actions. It is factual that drug handling cannot be considered complete on a pa who has taken LSD until the Sweat Program is completed.*

*The Drug Rundown is a specific rundown as given in HCOBs and is finished as an auditing action when the pc has done all its steps.*

*What is not finished apparently is the possible residual LSD and this is handled by a Sweat Out Program. The LSD and the body are part of the physical universe.*

*So do not stop a pays auditing after he's done the HCOB's steps of a Drug Rundown just because he still has to do a Sweat Out Program. Go on auditing him on other actions but be sure he also completes a Sweat Program.*

*A Sweat Program can be done BEFORE a DRD or even Objectives but should not hold these up either.*

## RESULTS

The final result is to get the LSD residual crystals out of the body. The phenomena that can occur are many. On this program one has to be watched, because he will be getting out crystals and could go on a trip.

The reactions that one can undergo on this program can vary from anything like actual tripping, heavy misemotion, somatics turning off and on, etc. As the program progresses, the individual will become more causative in his or her environment.

Confront and responsibility will definitely increase and have lasting effects. The individual will become easier to work with and will like and feel more comfortable with himself.

He will be healthier and more in tune with his body.

At first the individual may feel other-determinism about doing this program but that will gradually change and he or she will want to do it for their own welfare. Their responsibility will come up for themselves and others.

Emotions that have been shut off may start to reappear; they can blow through stupidity and become more aware; they can do actions more easily; consequences start to take on meaning to them; and they are aware of the effects that their own actions have on themselves and others.

The above will vary from individual to individual but in each case there will be great change for the better.

### **LSD AND THE SWEAT PROGRAM—ADDITION**

Ref: HCOB 31 May 77 LSD  
HCOB 6 Feb 78R LSD AND THE SWEAT PROGRAM

Clarification is needed at this time on the matter of the auditing of the pc while on the LSD Sweat Program.

Once the Drug Rundown, which is Objectives plus Dianetics, is done the pc may be audited on other actions while continuing with the Sweat Program.

Lack of a Sweat Program doesn't stop other auditing actions.

However, it is factual that drug handling cannot be considered complete on a pc who has taken LSD until the Sweat Program is completed.

The Drug Rundown is a specific rundown as given in HCOBs and is finished as an auditing action when the pc has done all its steps.

What is not finished apparently is the possible residual LSD and this is handled by a Sweat Out Program. The LSD and the body are part of the physical universe.

So do not stop a pc's auditing after he's done the HCOB's steps of a DRD just because he still has to do a Sweat Out Program. Go on auditing him on other actions but be sure he also completes a Sweat Program.

The Sweat Program can also be done *before* a DRD or even Objectives but should not hold up a DRD or Objectives.

Interneships  
Academies

### INTERNESHIPS VS COURSES

Courses are those activities done in Div IV, Dept 11 for the purpose of training a student on the theory and materials necessary to perform certain skills. The product of a course is a graduate who has learned his materials and successfully applies what he has learned.

Interneships are those activities done in Div V, Dept 14 for the purpose of perfecting the interneesh application of the basic skills learned on the Div IV course. The product of the interneship is a flubless professional.

Courses and interneships are two separate and distinct activities. When you confuse the two by failure to fully comprehend their actions and products you end up with overlong courses *and* overlong interneships.

### FAST COURSES

A well-run course is where the student gets the theory. Through Word Clearing, demos, drills and actual practical application of the materials per his checksheet, the student is quickly gotten to a point where he grasps the simplicity of the fundamentals of the level and can apply them. Then from the viewpoint of experience with the basics he then rapidly studies the rest of the techniques that comprise the level. He can produce a competent result. This is a course graduate.

### FAST INTERNESHIPS

Interneships are not where you learn theory. That belongs on the course. Interneships are there to add polish to professional level. Interneesh by definition train "on-the-job" under skilled supervision. They acquire skills by *doing*, not by reading their theory again. They audit. They C/S. They supervise. They get their errors corrected and they audit, C/S and supervise some more. When they have done this in volume and polished up their rough edges so they can think with their materials without hesitation on what to do, they become professionals. This is an interneship graduate.

### EXISTING SCENE

All too often it is being found that interneships are being used to teach the course again. Weeks are being spent restudying the materials for checkouts. High Crime checkouts which have been done before are being done again. High Crime checkouts have become everything on a level rather than the basics which is *not* a lot of issues for any level. The purposes expressed in the 5 Qual OK to Audit Series plus polishing to professional standards the level just studied is the true purpose of interneships. Any course grad who wore his hat as a student should be able to sit down and check out his materials straight off as it is assumed he got it the first time.

So any attempt to turn an interneship into a redo of the original course must be a solution to quickied or badly supervised courses. The right handling would be to reform your courses and get them straight and require retreads on that course for any who show they missed the materials when on the course.

## THE REMEDY

The internships will be streamlined on theory. Following HCOB 28 April 71 "OKAYS TO AUDIT IN HGCs," will make good auditors. To prevent the internships from becoming a long haul on theory it will now be required that the student pass an exam on the course materials before routing on to the internship. Passing grade will be 85%. Missed questions are handled in Cramming. Any who do not get a passing grade must retread the course before being allowed on the internship.

Should there be too many flunks then a Comm Ev must be requested by the org KOT or LRH Comm on the org's executives for neglect and failure to handle the courses.

## SUMMARY

The theory and routine practical belong on the course. If an internship gets heavily into theory then there must be poor courses and they had better be corrected and fast. This should settle any questions on the matter.

- \_\_\_\_\_ Dianetic Case Completion, any org
- \_\_\_\_\_ Quad or Expanded Grades, any org
- \_\_\_\_\_ Expanded Dianetics, Continental Orgs, St. Hills, orgs where authorized
- \_\_\_\_\_ Power, in a St. Hill Org
- \_\_\_\_\_ Solo Levels (R6EW, Clear, and OT) in an Advanced Org
- \_\_\_\_\_ Any special type of rundowns (Ls, Int RD, PTS RD, etc.). Specify what rundowns: \_\_\_\_\_

I realize it may be necessary to prepare my case for a major action, such as above or to handle medical actions or to get auditing for chronic somatics or particular difficulties.

\_\_\_\_\_  
SIGNATURE OF APPLICANT

REGISTRAR: \_\_\_\_\_ DATE: \_\_\_\_\_

- \_\_\_\_\_ 1. Originates this Routing Form.
- \_\_\_\_\_ 2. Tentatively signs up the applicant and receives payment.
- \_\_\_\_\_ 3. Issues temporary invoice for payment received.
- \_\_\_\_\_ 4. Logs name of applicant to follow up if not returned on this form.
- \_\_\_\_\_ 5. Routes applicant and this form to Testing.
- \_\_\_\_\_ 6. Alerts Tech Services to applicant arrival on lines and to get applicant's PT folder to Tech Estimator for study as applicant will be there shortly.

TESTING: \_\_\_\_\_ DATE: \_\_\_\_\_

LOCATION: \_\_\_\_\_

- \_\_\_\_\_ 1. Immediately administers OCA/APA, Aptitude and IQ tests.
- \_\_\_\_\_ 2. Has applicant wait while tests are immediately graded.
- \_\_\_\_\_ 3. If necessary gets help from Tech Services so applicant is not kept waiting.
- \_\_\_\_\_ 4. Attaches test results to this form.
- \_\_\_\_\_ 5. Routes applicant to Tech Estimator.

TECH ESTIMATOR: \_\_\_\_\_ DATE: \_\_\_\_\_

LOCATION: \_\_\_\_\_

- \_\_\_\_\_ 1. Quickly reviews pc's PT folder (if available). Does not keep pc waiting.
- \_\_\_\_\_ 2. Interviews the applicant, following the HGC PC TECH ESTIMATION FORM.
- \_\_\_\_\_ 3. Reviews the tests and Estimation Form with regard to case gain, what the applicant is trying to handle, time spent on earlier actions.
- \_\_\_\_\_ 4. Writes in his estimate on the last page of Estimation Form in duplicate with any additional comments for the Registrar and signs the form.
- \_\_\_\_\_ 5. Pc is/is not (circle one) accepted on lines. Number of intensives required:

\_\_\_\_\_  
TECH ESTIMATOR

- \_\_\_\_\_ 6. Informs the applicant of the estimate. Handles any purely technical questions but not finance or sales matters.
- \_\_\_\_\_ 7. Routes the applicant and this form to the Reg with a duplicate copy of last page of Tech Estimation Form.
- \_\_\_\_\_ 8. Routes the Tech Estimation Form to pc's folder.

MAA: \_\_\_\_\_ DATE: \_\_\_\_\_

LOCATION: \_\_\_\_\_

(AOs AND SHs ONLY)

- \_\_\_\_\_ 1. Gives ethics clearance to receive Advanced Levels (Power and up).

REGISTRAR: \_\_\_\_\_ DATE: \_\_\_\_\_

LOCATION: \_\_\_\_\_

- \_\_\_\_\_ 1. If an illegal pc, returns any money temporarily invoiced and routes to Ethics for R-Factor.
- \_\_\_\_\_ 2. Signs the applicant up for the full estimate.
- \_\_\_\_\_ 3. Receives payment for rest of the estimate or arranges payment for the rest as applicable. Fully invoices all money received including any on temporary invoice.
- \_\_\_\_\_ 4. Completes full sign-up forms, waivers, etc. for full tech estimate.
- \_\_\_\_\_ 5. Signifies applicant fully accepted by his agreement to full estimate.
- \_\_\_\_\_ 6. Signifies applicant not accepted by his refusal to accept estimate and/or work out necessary financial arrangements. Routes to Ethics for R-Factor.
- \_\_\_\_\_ 7. If first sign-up, Reg makes a record for his own files for future follow -up .
- \_\_\_\_\_ 8. Prospects at the close for others in need of tech estimates.
- \_\_\_\_\_ 9. Routes applicant and this form to Tech Services.

TECH SERVICES: \_\_\_\_\_ DATE: \_\_\_\_\_

LOCATION: \_\_\_\_\_

- \_\_\_\_\_ 1. Finds out where the pc's folders are and arranges to get them immediately.
- \_\_\_\_\_ 2. Schedules the pc for auditing.
- \_\_\_\_\_ 3. Routes this form to CF.

All Dianetic Auditors

**POSTULATES AND ENGRAMS**

Ref: Dianetic Auditor's Bulletin Jan 52  
(Tech Vol 1, page 196)  
HCOB 20 Aug 63, R3R-R3N THE PRECLEAR'S POSTULATES  
HCOB 16 Jun 70, C/S Series 6, WHAT THE C/S IS DOING  
*ADVANCED PROCEDURES AND AXIOMS*  
DMSMH

A full Dianetic EP consists of F/N, erasure, *cognition* and VGIs. This has been well covered in Dianetic HCOBs and is expected of all Dianetic auditors. The Dianetic auditor is running out the forces and charge contained in the pc's engrams and in doing so the pc's thoughts and postulates which were buried in the charge will come off in the form of *cognitions*. When the charge is removed the pc is then able to evaluate and discard these postulates in PT as he sees fit. It is also an indicator of a full EP as a pc who has not gotten the force off an incident is very unlikely to recover the thoughts in the form of cognitions.

Where a pc reaches the basic on a chain and apparently flattens this but without all parts of a full Dianetic EP in evidence the auditor can ask the pc if he postulated anything in the basic incident. This should complete the full Dianetic EP. If not, the incident hasn't had all the force taken off and should be run through again and continued per standard Dianetic tech to full EP. In the case of an assist one can ask for the postulate made just prior to the illness or injury. Where you have a full Dianetic EP of F/N, erasure, cog and VGIs there is no need to ask for anything further.

One does not list for anything. One doesn't use "what." No repeater technique. Just ask the question and get your full EP or flatten the incident.

What the pc postulated just before or while under the stress and pain of his engram could be any manner of significance to the pc, but it is of no significance to the Dianetic auditor other than as a means of ensuring he has gotten the full Dianetic EP and has removed all the charge and force in the pc's engram. Then you will see a very happy preclear.

AN ENGRAM CHAIN IS *NOT* COMPLETE UNLESS IT ENDS WITH F/N, ERASURE, COGNITION AND VGIs.

**QUICKIE OBJECTIVES**

Ref: HCOB 12 Apr 62, CCHs PURPOSE  
HCOB 11 Jun 57, TRAINING & CCH PROCESSES  
HCOB 3 Feb 59, FLATTENING A PROCESS  
*CREATION OF HUMAN ABILITY*  
*CONTROL AND THE MECHANICS OF SCS*  
HCOB 14 Aug 63, LECTURE GRAPHS (No. 5 on  
pg 342 of Tech Vol V)

Recent investigations into the effectiveness of Drug RDs including their rate of repair and re-repair revealed a marked tendency to quickie Objectives.

Failure to run Objectives fully and completely, especially on a case with an extensive drug history can set up the pc for less than optimum gain on Dianetics. A Drug RD without full and complete Objectives is not a Drug RD.

**TWO-WAY COMM**

The easiest and very out tech way to quickie Objectives is to run some commands and then put the pc on the meter and 2WC to F/N or do some fast "rehab." But did the Objective process ever get run? What actually F/Ned, the Objective or the 2WC? Any Objectives run this way are invalid.

The tech of Objectives is extensive and still very much in force. *They have their own EPs* and with these they are fully run to actual change for the pc. Only this is valid handling of Objectives.

**CURE**

The way to handle auditors who quickie Objectives is a full W/Cing of the subject and a big clay demo of the purpose of Objectives and a big clay demo of what effect Objectives have on running a Drug RD and R3R. Then get the auditor's own Objectives flattened.

Any Drug RD that needs to be repaired or redone must include a careful study of the Objectives to see if they were honestly run and if the valid Objective EPs on the processes themselves were obtained. Where the Objective was obviously quickied just R-Factor the pc you are going to flatten it and do so. If the EP of an Objective was questionable you can ask the pc what happened and if he F/Ns on a real Objective EP fine, otherwise flatten the process.

A fully completed Drug RD with Objectives sets the stage for the pc to fly up the Grade Chart so do it right the first time.

*(Revisions in this type style)*

*(Cancels BTB 16 Dec 73 Word Clearing  
Series 51 WORD CLEARING ERRORS.)  
Word Clearing Series 59R*

## **WORD CLEARING DEFINITIONS**

Ref: Word Clearing Series 54

The question has recently come up of whether you clear each and every definition of a word for that word to be word cleared. Some words have definitions that lead into technical definitions, specialized definitions or obsolete definitions. So what do you clear when clearing a definition of a word?

There is no reason under the sun to look up every definition or to even read specialized definitions for a word.

The rule actually is to know the definition of the word as given for the context for which it is being used. and that's it.

You have to look over a full definition to find out which definition applies to the text you have been reading.

There are some words that have 30 or 40 definitions—most of them highly specialized and of no real use in a vocabulary.

So you don't need to look up definitions of a word that don't apply. **YOU WANT THE DEFINITION WHICH APPLIES TO THE TEXT YOU HAVE BEEN READING.** *Of course, if you are clearing a word with Word Clearing Method 1 or Method 8 or when the context of the word is not given you would clear each definition excepting technical and specialized definitions which do not apply.*

Then you use it in sentences until you have it as a concept.

A cleared word has been defined as follows:

**A WORD WHICH HAS BEEN CLEARED TO THE  
POINT OF FULL CONCEPTUAL UNDERSTANDING.**

Also you don't look up every word in *that* definition either. You look up words in a definition *only* if you find in the definition *another* word you don't understand.

Hope this helps to make your Word Clearing a more simple and pleasant task.

*Word Clearing Series 58*

**ETHICS PENALTY FOR WORD CLEARERS**

(Ref: HCOB 13 Sep 71, Para No. 3)

It has been found that the reason Word Clearers cease to be Word Clearers and blow Word Clearing and the reason Word Clearing drops out in orgs lies in the failure of the Word Clearer to clear the words on himself at the same time he was clearing them on the preclear. This is done without losing one's presence as an auditor or Word Clearer and without winding up with the student word clearing the Word Clearer.

Hereafter when it is found that a Word Clearer has been accumulating misunderstood words by failure to clear them on himself he will be subject to a Court of Ethics with minimum penalty the loss of a week's pay or allowance and if the offence is repeated he will be subject to a Comm Ev.

The offences on this are frequent and are a basic Why on Word Clearing dropping out in orgs.

HCOB 8 Dec 1974 TR 0—NOTES ON BLINKING  
BTB 18 Aug 1971R TR COURSE—HOW TO RUN  
BTB 5 Nov 1971RA TR COURSE DEBUG DRILL

The purpose of this list is to give a TR Supervisor a standard list to find the cause of a student's bog on doing TRs, after standard Word Clearing actions have been done but have not resolved the situation.

The supervisor must have an OK to operate an E-Meter and must have been passed on Assessment TRs in Qual to assess the list.

The student is put on the meter, checked for sleep and enough to eat. He is then given an R-Factor that you are going to do a short assessment to find out what the real trouble is on doing TRs.

Then the list is assessed.

Clear the words of each line from the last word to the first before calling the line.

1. Have you been doing TRs over a misunderstood word? \_\_\_\_\_  
(Clear the misunderstood word or words. Each to F/N.)
2. Have you gone exterior while doing a TR? \_\_\_\_\_  
(Indicate. If no F/N on indication route the student to Qual for handling.)
3. Have you been overrun on a TR? \_\_\_\_\_  
(Indicate, rehab if no F/N.)
4. Were you put on the TR Course in the middle of another auditing action? \_\_\_\_\_  
(2WC the action he was incomplete on to F/N. Send data to C/S for OK or not OK on continuing TRs.)
5. While on the TR Course did you already have an upset in life? \_\_\_\_\_  
(Handle the ARC Brk or send to C/S.)
6. While on the TR Course did you already have a heavy problem? \_\_\_\_\_  
(Handle the problem or send to C/S.)
7. While on the TR Course did you already have an unwillingness to let something be known? \_\_\_\_\_  
(Pull the W/H or send to C/S.)
8. On the TR Course have you been falsely passed? \_\_\_\_\_
9. Have you falsely passed someone? \_\_\_\_\_
10. Did you fake passing so you could get out of doing more? \_\_\_\_\_

11. Is there some other reason?  
(Send to HGC for handling.) \_\_\_\_\_
12. Was this list unnecessary?  
(Indicate it and return student to course.) \_\_\_\_\_

**AN F/N IS A READ**

Ref: HCOB 2 Nov 1968R    CASE SUPERVISOR CLASS VIII  
   THE BASIC PROCESSES  
      HCOB 20 Feb 1970    FLOATING NEEDLES AND END PHENOMENA  
      HCOB I Aug 1970RA   F/N AND ERASURE

I recently took over the C/Sing of a case on a Dianetic Assist and found that F/Ns were being neglected as reads.

This pc had a Dianetic list listed out that gave an F/Ning item. All the other reading items were handled with the exception of this F/Ning item.

An F/Ning item is a reading item. An F/N is only a read when an item F/Ns at the end of you calling it. The F/N would occur instantly upon calling the item.

So what does this mean that an F/N is a read? A read means there's charge there to handle. It means there is force connected with that significance that is available to the pc to view and run. An F/Ning item means there's charge there as the F/N means something just keyed-out so there must be charge there for there to be a key-out. After all what is keying out?

You can get four F/Ns off the same item. The first one is in finding the item, the second one in running recalls, the third one is in running secondaries and the fourth one is in running the engrams.

The basic mechanics of key-out, key-in and erasure have to be understood before you can understand why an F/N is a read and when it would be a read.

An F/N also means stop that is it end of process, end of rud or end of action being handled. To confuse this with an F/N being a read could be fatal for a pc.

There is no substitute to understanding basics when it comes to understanding what an F/N is; when it means go and when it means stop for that process or action.

An F/Ning assessment does not mean that the assessment is now all reading. This means that the actions have been done and the charge is off that area at least temporarily.

An instant F/N on an item means this item is keying out some charge that can be keyed-in again and run which is really what any other read is saying; there's charge there to handle.

This piece of tech can make the difference in a case being totally handled and just doing better. Understand it and use it and you will see the difference in the results.

**THE SWEAT PROGRAM FURTHER DATA**

Ref: HCOB 6 Feb 78R LSD AND THE SWEAT PROGRAM  
HCOB 31 May 77 LSD  
HCOB 3 Aug 73 PEP  
HCOB 5 Nov 74 DRUGS, MORE ABOUT

The Sweat Program HCOB of 6 February 1978R describes how the original Sweat Program was run. This is a very effective program.

Recent research has given us more data for the program which you should know about.

**OVERWEIGHT PEOPLE**

It is important that fat on the body be removed as this is one of the main places that LSD can lodge. Compared to the rest of the body, fat tissue has little circulation in it. LSD lodged in fat can stay there for a long time.

**UNDERWEIGHT PEOPLE**

Underweight people on a strict diet and running can lose more weight than they can afford to lose. This could be detrimental to their health.

On the LSD Sweat Program, a regular balanced diet is okay for the thin person. The weight should be maintained. However, refined sugar or flour and their products should not be taken. See HCOB 3 August 73, PEP.

In this program, the increased circulation and exercise is as important as the sweating.

**NORMAL WEIGHT PEOPLE**

Those who start at a normal weight and continue to lose weight to the point that their health can be affected should go back to eating well-balanced meals (omitting refined sugar and flour products). This should stop the continued weight loss.

**TRIPS**

If a person is having trips during the program, he should take a lot of extra Vitamin B Complex and Vitamin C as these aid the body, especially the liver in getting rid of the LSD which is in the system. Normally the vitamins in the program are sufficient for the body to handle the LSD which comes out.

**VITAMINS**

Pure natural plain yoghurt taken with the vitamins will help prevent stomach upsets from taking too many vitamins at once. Please ensure that your vitamins are not taken on an empty stomach for they can cause stomach burn. Enteric vitamins are not essential as long as the "bomb" is taken with food.

## SHOES

The best type of shoes to use for jogging are the ones which are well cushioned in the heel and toe. These are quite popular right now for jogging. They are available in all different colors and stripes.

They should be of good quality, give arch support, be comfortable and be well cushioned, especially in the heel.

This cushioning absorbs the shocks to the body as the heel hits the ground. Running and jogging go much better with these shoes.

## CAL-MAG

Calcium and magnesium supplements can be taken as a substitute for the CalMag Formula in HCOB 5 Nov 74, DRUGS, MORE ABOUT. Just ensure that the full daily requirement of each is taken daily. This will prevent muscle soreness from the exercising.

## VEGETABLES

Green vegetables are okay during the program. To get the most benefit from them, they should be taken raw or steamed. Different lettuces, tomatoes and cucumbers are fine to take. The majority of the food eaten should still be fruit.

Vegetable juices are OK. A variety should be used throughout the program so that different nutrients and minerals can be gotten from the different vegetable sources.

## PROTEIN

Predigested protein is not the only protein that need be taken. It was used on the original program to good effect, however, there are several good powdered protein supplements on the market. Check your health food store for data on these. Be sure to get one with a high protein, very low carbohydrate content, which has all 8 of the essential amino acids. The label should state or show that all of the essential amino acids are present.

## SALT AND POTASSIUM

Salt (sodium chloride) is not mandatory on the program. It is only necessary as a treatment if the symptoms of salt depletion (heat exhaustion) occur. These are clammy skin, tiredness, weakness, headache, sometimes cramps, nausea, dizziness, sometimes vomiting and fainting.

As potassium is also lost in sweating, some of the above symptoms can come from potassium depletion. So, if salt does not handle the above symptoms then try either potassium gluconate tablets or "salt substitute" which is mainly potassium.

In the program, few of the above symptoms occurred when heavy fruit intake was occurring. This is due to the fact that there is sodium and potassium in fruit and vegetables. Consequently supplementing these minerals is not usually necessary if a lot of fruit and vegetables are consumed.

## HEALTH

If a person does not feel better during this program after 3 to 4 weeks, a doctor can be consulted to check for endocrine problems or organ malfunctions as these can sometimes hinder a person's progress on the program.

People with known heart conditions and high blood pressure or kidney conditions must do a program which is of a much lower gradient. An exercise program and diet must be worked out with a doctor.

## GRADIENT

Doing this program gradually is very important.

Here is a typical program sequence: First of all start jogging wearing the proper shoes. The first couple of days just jog 10 minutes, don't worry about diet or vitamins or sweat suit. Just get out and jog.

The next couple of days jog 15 minutes. Continue increasing the jogging time gradually until after 4 weeks you are up to 1 hour.

If you can get up to one hour running sooner, all the better. If you can run more than an hour a day regularly, that is even better. The more running and sweating, the better.

If you are so breathless that you can't speak to another while you are running then you are straining too much. Cut the gradient back.

You can start taking vitamins anywhere in the first couple of weeks, but the best results occur if the vitamins and minerals are taken from the start.

During the first month of build up, you should cut out all sweets, especially refined sugars and flours and their products. If you are overweight, cut down on food quantity in this time. At the end of the month, meat should be eliminated and fruit and vegetables should be the source of food.

After 1 month you can start running with the sweat suit. You should be running a full hour pretty comfortably before you start with the sweat suit. Sweating when wearing the sweat suit will increase markedly so watch for salt depletion.

## PROGRAM ODDITY

Very occasionally you will come across someone who has undergone extensive exercise and sweating for months and gotten rid of residual LSD. When starting on the LSD program, no further changes occur but there were earlier changes during the earlier sweating and exercise.

It is not just sweating that is necessary but also the increased circulation from the intensive exercise. LSD also has the effect of reducing circulation.

The point is, the case was sweated, exercised earlier and did get rid of the LSD. This is a very occasional phenomenon but has been known to occur.

## EP

The evidence that there is no more LSD there, is that points 1 through 9 in HCOB 31 May 77, LSD are no longer present. The final adjudication of the completion of the LSD Sweat Program lies with the C/S in liaison with the Medical Liaison Officer.

**TECH QUALITY**

My current concern is tech quality over the world. Whereas the majority of auditors do a good job, there are some who don't, and it is these who have our reputation at stake.

The general outness has been traced (as usual) to out TRs and metering.

Lack of a Cramming in Qual Divs and even lack of Qual Divs is what has brought this about.

TRs and metering are out of the view of a C/S. He only sees what is written on the Auditor Report.

A Cramming should exist in every org and every bog should cause the auditor to be sent to Cramming on the material missed.

As TRs and metering are not visible to the C/S, Cramming should always add "Two hours TRs and metering" as a matter of course. This was the way it was when tech was more consistent.

A TR 1 that can't be heard (or blows the pc's head off), a TR 2 that consists of "That didn't read. That read" and TR 4 that is pure Q and A, plus missed reads and bypassed F/Ns can wreck any program.

A Cramming in every org and required verification of TRs and metering will go a long ways to improve tech quality.

**DIANETICS: URGENT COMMAND CHANGE**

Ref: HCOB 26 May 197811 ROUTINE 3R REVISED  
ENGRAM RUNNING BY CHAINS

It came to my attention the other day that Dianetics is being run using the wrong commands and even has some omitted procedure. This was quite a breakthrough to find as it explains some of the trouble that has been showing up with Dianetics throughout the world.

**MOVING THROUGH THE INCIDENT**

When a pc is first made to run an incident he is given the command to move through the incident to some certain time later. On the second run through the pc has been given the command SCAN through to the end of the incident. This second command is *incorrect*. The pc should be made to move through the incident with each run through.

Scanning an incident is another tech entirely and is covered in the early PABs under scanning but when you scan a pc during engram running you don't get them back into the incident and couldn't possibly discharge that incident. As early as Book One I found that you had to return the pc to the incident and MOVE them through and if they bounced then you would command them to RETURN TO THE INCIDENT as that is what you are after. So R3R Command C is changed to "MOVE THROUGH THE INCIDENT."

**RETURNING THE PC TO THE INCIDENT**

It will happen in Dianetic running that something in the incident that the pc is running will command them off the incident. This is called a BOUNCER. The pc just bounces right off the incident. The way to handle this is quite simple you simply command the pc to RETURN TO THE BEGINNING OF THE INCIDENT and to move through the incident. Commanding the pc to RETURN TO THE INCIDENT will enable you to get the pc to move through it and the force of the incident will come off.

This is quite an interesting piece of tech that has been known and worked since the advent of Book One. It, unfortunately, fell out somewhere along the line and wasn't being used. It is now being reinstated and in fact its use is making a tremendous difference in Dianetics running right this very minute.

**GETTING THE POSTULATES IN THE BASIC INCIDENT**

Now and again a pc will run Dianetics whereby they F/N on the basic incident and have VGIs but no cognition has come off. The pc has not fully viewed the postulates in the incident here to obtain full end phenomena.

When this occurs and you have your F/N VGIs yet no cognition is voiced, ask the pc "Was there something that you postulated in that incident." The results will be quite astonishing and the pc will have his or her full end phenomena and that will be it for that chain.

To not allow a pc to fully view the incident that is basic and get all the charge and postulates out of it will leave the case charged up and sooner or later the case will go sour on Dianetics.

There may be more than one postulate in the basic incident. You as the auditor want to get off the postulates in the basic incident accompanied by F/N and VGIs. This is your Dianetic end phenomena.

When the pc voices the postulate and has the full end phenomena there is no need to check further.

The auditor has to know his HCOBs on end phenomenas.

### NARRATIVE HANDLING OF INCIDENTS

We just had a pc the other day that ran for 25 hours on one incident and when that pc was finished with the incident the results were miraculous—a changed person with changed activities in life. The old rule applies of it takes as long as it takes is really true with Dianetics narrative running or any other Dianetics for that matter.

Narrative running can take a long time to get the pc through and what you are interested in here is running the incident narrative to erasure and only going earlier similar if it starts to grind very badly.

Failure to properly run a narrative incident will give the auditor and C/S the idea that things don't seem to handle on this case. It also gives the pc losses on handling things for himself. All that is needed is sufficient running of the narrative incident to its full end phenomena and this will no longer be the case as Dianetics does work except when it is not applied correctly. Part of the application of narrative running is to ensure that enough run throughs have occurred so that the incident is fully discharged.

### URGENT EMPHASIS

Emphasis on the proper running of Dianetics cannot be stressed enough as it can make the difference between a well and happy preclear or one with losses in auditing, things not being handled and Dianetics getting a bad name when in fact it is the only technology ever known to handle the mind.

Dianetics, when properly applied, produces miracles so why settle for less. Apply it by the book and those miracles are yours to be had.

IMPORTANT

*Cramming Series 18R*

**CRAMMING REPAIR ASSESSMENT LIST**

**HISTORY:** I recently made an important technical discovery that a person, org or area can be totally bogged by a mis-cram or by an R/Ser operating under the guise of a "Cramming Officer." In the particular instance, one R/Sing Cramming Officer had bogged an org and then a second R/Sing Cramming Officer took over to "repair it," resulting in a nearly total crash.

To remedy this, I developed the following Cramming Repair List. In subsequent use of it, including people who had been mis-crammed elsewhere, the usage appeared quite miraculous.

It has been found that faulty, quickie or mis-cramming can result in continual goofs or an apparency of out-ethics as the person isn't correcting. This list covers the basic errors that can occur in cramming. It has also been found that a Cramming Officer who has consistent overt products will mess up an area. This list is used to correct such cramming.

This list can be used by an auditor in session who finds the pc has bypassed charge on his past cramming. It is also used when a bog or impasse occurs during or following a cramming action.

Its main use is to clear up an org or area where it is found that one or more Cramming Officers have been messing it up. In such an instance, it is applied to every past or present staff member. In such an instance particularly, its use can result in a miraculous resurge of the org or area.

Needless to say it can produce a remarkable resurgence in a person who has a history of being mis-crammed.

The list is done in a session by an auditor who has a Qual OK to assess a prepared list and Qual OK to operate an E-Meter.

**Auditor Instruction:** In case of a wrong why, use L4BRA. In case of self-listing or out list, use L4BRA. In case of any read find out who and when as needed to handle the question. If any question reads keep at it until you F/N it. F/N every item on the list that reads, then F/N the whole list on a final assessment of it.

In calling these items to the pc call them as questions, not as statements. This is the case in this list or any other prepared list. Do not call them as statements as this will tend to evaluate for the pc and even invalidate him.

If the list does not F/N or if the cramming repair does not seem to be getting anywhere, do a C/S 53RK and return to and F/N the Cramming Repair List after you've handled the C/S 53RK.

**URGENT IMPORTANT**

The key to Expanded Dianetics is:

1. Incomplete or misdone Objectives.
2. Incomplete or misdone Drug Rundown including Sweat Program.
3. Incomplete or misdone Dianetics.

When these are not done, incomplete or misdone, one does not have any real chance of getting down to the basic evil purposes of the case and will at best run off locks and so the case won't recover or will relapse.

*New Era Dianetics Series 4R*

**ASSESSMENT AND HOW TO GET THE ITEM**

A great deal of material has existed about assessment of the preclear. In New Era Dianetics Dianetic assessment has been summarized and simplified and added to. These New Era Dianetics assessment steps are precise. And they will detect and isolate the things that have to be handled to make a pc a well and happy being.

It is important to understand what assessment is and what you are attempting to accomplish when doing an assessment.

If you simply understand that you are trying to find an item that reads well, brings in the pc's indicators, in which the pc is interested, an item which was usefully worded and would run, you would have it.

In New Era Dianetics, several different kinds of assessment are used to get items to run out R3RA on the pc.

The New Era Dianetics Original Assessment Items

This is the first assessment done in New Era Dianetics. It has been known by various names, "Health Form," "Preclear Assessment Sheet" and is now reissued with only minor changes as HCOB 24 June 78R New Era Dianetics Series 5R, ORIGINAL ASSESSMENT SHEET.

It contains the pc's physical history and background, and gives the auditor and C/S a picture of the case. It is an assessment as it is done on the meter and enables the auditor and C/S to see what needs to be handled.

Original Item

The original item is a condition, illness, accident, drug, alcohol or medicine, etc. that has been given by the pc to the auditor. This will come from the Original Assessment Sheet, from another New Era Dianetics rundown or may simply be offered by the pc.

Original items tend to be general in character, such as "lame" or a medical condition, and are either lacking things you will find on the Preassessment List or are too broad to be audited. Pcs normally give items this way when asked for them on the New Era Dianetics Original Assessment Sheet, NED Series 5R.

Preassessment

Preassessment is a new procedure in New Era Dianetics. It is done with a prepared Preassessment List and determines what categories of somatics are connected to the original item, and which of these is the most highly charged.

It is called the preassessment because it comes before the assessment of the actual item to run out R3RA. (The item to be run out is now called the running item.)

Preassessment is done on the original item with the Preassessment List.

Preassessment List

This is found in New Era Dianetics Series 4-1.

A prepared list of categories of somatics which is assessed in connection with the original item. (The list includes pains, sensations, feelings, emotions, attitudes, misemotions, unconsciousnesses, sorenesses, compulsions, fears, aches, tirednesses, pressures, discomforts, dislikes, numbnesses.)

### Preassessment Item

The largest reading item obtained on an assessment of the Preassessment List. This item is used to get running items.

### LISTING FOR RUNNING ITEMS

The auditor now takes the preassessment item and makes a list on a separate sheet of paper and asks the pc, "What (preassessment item found) are/is connected with (original item found)?"

The auditor writes down exactly what the pc says in a column and notes the meter reads at the exact moment the pc ends the statement of the running item.

The result is a list called the "running item list."

If the pc gives you an exact feeling ("feeling scared," "a burning feeling in my ear," "a sharp pain in my toe") the feeling is simply run out R3RA Quad if it reads and the pc is interested.

An item which states a somatic and is runnable is called a running item. Running items are exactly stated pains, sensations, feelings, emotions, attitudes, misemotions, unconsciousnesses, sorenesses, compulsions, fears, aches, tirednesses, pressures, discomforts, dislikes, numbnesses.

If the pc gives you a general type item like "stomach problems," a drug, alcohol, medicine, medical term or narrative, which does not state a feeling (etc.), the feelings (etc.) for the item must be found so they can be run. The preassessment is done to get running items.

### Running Item

The auditor takes the best reading item on the running item list (possibly an LF or an LFBD or an *instant* F/N) and checks with the pc, "Are you interested in this item?" and if so it becomes the running item which you will run by R3RA Quad.

Running items are sometimes abruptly volunteered by the pc and if they are within the categories of the assessment list they can be run, but be careful of: 1) jumping onto some other subject than the original item you are trying to handle or 2) upsetting the pc because you refuse to audit it. Warning: If you go off New Era Dianetics assessment procedure you will be pot shooting all over a case and never finish it.

All this New Era Dianetics procedure is leading up to finding running items that will run and resolve the case. So the thing you are after in assessment is the running item and it is most accurately obtained as above.

This is done by taking the original item, say "stomach problems," doing a preassessment on it, and with the preassessment item, finding a running item.

(Example: Stomach problems is the original item. A preassessment is done and "sorenesses" is the largest reading item on the Preassessment List. The auditor then lists for running items, using sorenesses, and gets "A dull soreness on my left side." This is the running item, which will be handled with R3RA Quad.)

## PREASSESSMENT

Previous to New Era Dianetics you would have taken a Dianetic item such as a drug or a chronic condition or an accident and you would have asked the pc to give you the attitudes, emotions, sensations and pains connected to the item.

I have just developed a new procedure on the handling and running of Dianetics. It is called the preassessment. This is how it works.

1. The auditor obtains an original item from the pc. This will be from a drug list, the Original Assessment Sheet or other New Era Dianetics rundown. (It will be a drug, a condition, an illness, an accident, etc.)
2. He then preassesses the feelings on the Preassessment List to find out which preassessment item is the most highly charged in connection with the original item.
3. From the preassessment item (the largest reading Preassessment List item) the auditor can get specific somatics called running items from the pc. These running items will be the ones the pc is most interested in.
4. The running item found in Step 3 is run R3RA Quad.

Example: The original item is "bronchitis." The auditor assesses the Preassessment List below by asking the pc:

"Are \_\_\_\_\_ connected with bronchitis?"

pains	compulsions
sensations	fears
feelings	aches
emotions	tirednesses
attitudes	pressures
misemotions	discomforts
unconsciousnesses	dislikes
sorenesses	numbnesses

He gets an LF on misemotions. This is the largest read.

"What misemotions are connected with bronchitis?"

As the pc tells him, the auditor takes them down, noting meter reads while the pc is giving the items. (And that's all there is to the preassessment.)

## PREASSESSMENT ITEM

This is in turn the largest reading item on the Preassessment List above and then subsequently lesser reading items from the same list are taken up.

With the preassessment item gotten, the auditor can list to find the running items.

(Example: The preassessment item is "misemotion." The auditor asks, "What misemotions are connected with bronchitis?")

He writes down all the answers the pc gives him, with their reads.

Feeling like I want to give up X  
Worried about my lungs LFBD  
Feeling angry about not breathing F  
Scared to death sF

The auditor would first run “worried about my lungs” R3RA Quad and then would return to the next best reading item, in this case, “Feeling angry about not breathing. “

### RUNNING ITEM

The auditor chooses the largest reading item the pc has given and checks interest for the next chain. This is the running item.

### ACTUAL AUDITING

Having found the running item the auditor then runs it out R3RA Quad.  
FINDING THE NEXT RUNNING ITEM

The auditor has a choice of taking a lesser reading item from the Preassessment List or the running item list or (safer) do a new preassessment on the same original item. (You don’t stop working on the original item until it is gone completely and forever. )

Having done a preassessment on the same original item you do a new running item list, take the best read (fall, LF, *instant* F/N) and use it as your new running item.

### ASSESSMENT COMMANDS

Commands for the Original Assessment Sheet of the New Era Dianetics Rundown:

- 1) Ask the question on the Original Assessment Sheet. Write answer and note meter read.
- 2) “Are (preassessment item being called) connected with (original item being preassessed)? “
- 3) “What (largest reading preassessment item) are connected with (original item)?”
- 4) “Are you interested in running (largest reading or *instantly* F/Ning running item found in 3 above)?”
- 5) Go straight into R3RA Quad, using the item in 4 if the pc is interested.

### HANDLING SOMATICS

The Preassessment List is designed to locate somatics which the auditor can then handle with R3RA.

By somatic is meant a pain or ache, sensation, misemotion, or even unconsciousness. There are a thousand different descriptive words that could add up to a *feeling* Pain, aches, dizziness, sadness, they are all feelings.

All chains are held together by the general various awarenesses which are named on the Preassessment List.

One generally identified difficulty given by the pc on the original assessment is, in actual fact, in almost all cases composed of pains, sensations, feelings, emotions, attitudes, misemotions, unconsciousnesses, sorenesses, compulsions, fears, aches, tirednesses, pressures, discomforts, dislikes and numbnesses as well as one or more postulates. It is very possible that any major Original Assessment item contains 3 or 4 full chains for each one of these.

Hence an auditor really hasn’t got a prayer of eradicating a major Original Assessment unless he runs 64 or more complete chains thoroughly and accurately. Some might give up with less and some might require many more.

If you follow the New Era Dianetics assessment procedure perfectly and flawlessly, well you have every chance of achieving a well and happy human being.

## HANDLING NARRATIVES

A narrative is a story, an account, a tale.

For many years narratives were held in disrepute and auditors were sometimes warned against running them. The reason for this is that when you try to solve a case on narratives alone it takes several thousand hours of auditing.

However to abandon narratives totally is to abandon some of the most dramatic case changes you can get.

Occasionally the pc will come into a session after a physically or emotionally painful experience, an accident, illness, loss or great emotional stress. Running these incidents out narrative erases the psychic trauma the person has undergone and speeds recovery.

You sometimes find that a person's whole life changed around the death of a relative or child or a divorce or an auto accident or some other similar catastrophe. This is usually found and handled in ACTION NINE in the HCOB 22 June 1978R New Era Dianetics Series 2R, NEW ERA DIANETICS FULL PC PROGRAM OUTLINE.

When running a narrative, one is running out the narrative *incident*. A narrative needs to be run and run and run on that one incident. You are running that incident to erasure and you only go earlier similar if it starts to grind very badly.

The trick in running narratives is to find the earlier beginning each time the person is moved through it. (See ACTION NINE, New Era Dianetics Series 2.)

A condition or circumstance without an incident is NOT narrative. An example of this would be "obstruction of justice." It would not run as there is not an exact incident. "Hitting a cop" is a narrative. "Feeling sick about cops" is not a narrative as there is no story connected with it, but there is a somatic.

## RUNNING NARRATIVES

To run a narrative item, the auditor must first find out exactly what happened with the pc, then, by asking the pc "What shall we call this incident?" he will have the preclear's wording and can run it narrative using the New Era Dianetics narrative commands. One would run a narrative item ONLY if it reads well and the pc is interested in running it out.

Narrative handling to its full EP can give miraculous results, but it can take a long time to get the pc through it. A full Dianetic EP of *postulate off* (which IS the erasure), *F/N* and *VGIs* must be reached. If the pc gives a cognition which is not the actual postulate from the incident or doesn't sound like it to the auditor, the postulate is asked for.

## NARRATIVE ASSESSMENT COMMANDS

- 1) Ask the questions called for on the Original Assessment Sheet.
- 2) Note any original items that contain recent losses, illnesses, accidents, upsets or deaths and ask:  
  
"Are you interested in handling (description of item on the Original Assessment Sheet)?"
- 3) If the pc signifies that he is, go immediately into R3RA Narrative.

## ASSESSING TONE OF VOICE

The auditor does the assessing by asking the question as a question, not as a statement of fact. To assess the question as a statement tends to evaluate and can even invalidate the preclear.

You can go around asking questions with a tape recorder going. Play it back and you will notice the voice tone rises on a question and goes down on a statement. So the right way to assess the questions would be to have a slight upcurve at the end, and actually assess it as a question.

ASSESSMENT IS DONE BY THE AUDITOR BETWEEN THE PC'S BANK AND THE METER. THERE IS NO PARTICULAR NEED IN DIANETIC ASSESSING TO LOOK AT THE PC. JUST NOTE WHICH ITEM HAS THE LONGEST FALL OR BD. THE AUDITOR LOOKS AT THE METER WHILE DOING AN ASSESSMENT.

Rote procedure gets heavily in the road of a Dianetic assessment. The pc gives a list, the auditor doesn't watch the reads and note them, then the auditor commonly goes back to assess the list. By that time the surface charge is off. He should have watched the meter in the first place and taken reads while the pc was originating the item. Why all this assessing of the finished list? Of course when you already have a list done by another with no reads marked on it, you have to read it off and mark what reads. And using a list a second time you have to read it off to the pc to see what reads.

In Dianetics one always handles *an instant F/N first, then any LFBD, LF, F or sF, in that order. The largest reading items are the ones the pc can most easily confront.* When the largest reading item is handled go on to the next biggest reading item (and so on) until all reading items have been handled. This same principle applies to all New Era Dianetics auditing. Take up the biggest reading areas and handle those first.

You may find there is something plainly visible that is wrong with the preclear, like a broken leg, yet it may not read at all. Instead the meter is reading on the pain in his arm. You do the standard action of handling the items that the meter reads on.

In assessing a prepared list such as the Preassessment List always take up the item *which got an instant F/N first followed by the next largest read.*

In a list like the running items list you continue listing until the pc says that's all or you've got an F/N item. If you get in trouble right after listing a running item list on a pc and the pc seems upset and you are not a Scientology auditor, go get a Scientology auditor Class IV fast and have him repair the list for you as it may have become a Scientology list either through auditor error or inability to read a meter or missing a read or whatever.

The laws of listing and nulling always apply to Scientology lists and sometimes on rare occasions apply to a Dianetic list and can on these cases cause trouble.

Listing for a running item on the running item list usually doesn't cause trouble as it is already taken from the Preassessment List and is not a very broad question.

This and a failure to follow New Era Dianetics assessment and R3RA procedure exactly or failure to actually erase the basic on a chain is about all the trouble you'd run into.

Review New Era Dianetics Series 1 on what is expected of a student.

*New Era Dianetics Series 3*

**OBJECTIVE ARC**

I have recently added a new process to be done before the full battery of Objective Processes. It is called Objective ARC.

Objective ARC is the first Objective Process to be done on a pc. It is followed by CCHs 1-10, Op Pro by Dup. SCS on an object, SCS, and SOP 8C as covered in HCOB 11 June 57 Reissued 12 May 77 Training and CCH Processes, PAB 80, PAB 97, PAB 34, and HCOB 4 Feb 59 Op Pro by Dup.

The commands of Objective ARC are run 1-2-3, 1-2-3, three commands given repetitively.

The commands are:

“Look around here and find something that is really real to you.”

“Look around here and find something you wouldn’t mind communicating with.”

“Look around here and find something you wouldn’t mind being around.” (An alteration of the original command because the original command was too steep.)

The pc and auditor are ambulant.

This process will bite suddenly and bring a person up to present time. It has been known to crack cases.

Of all Objectives, this process tends to be the shortest. It often ends with a very bright cog after only a few commands.

The end phenomena of this process would be person in present time, cognition, and very good indicators, accompanied by an F/N.

The above will accomplish a great deal for the pc if done correctly and with flawless TRs.

**IDENTITY RUNDOWN**

We have never before had a Dianetic process specifically directed to getting a pc into valence. This result has occasionally been achieved by Standard Dianetics as one of many miracles produced, but previous to this there has been no Dianetic RD which specifically lends itself to handling valences.

You can, of course, order them into valence in an incident but that isn't in the realm of R3RA.

**PROCEDURE**

1. Have the pc make a list of all the things he has never wanted to have.
2. Do preassessment on those that read in 1. Quad R3RA reading items, first checking interest.
3. Have the pc list all the things he has never wanted to do.
4. Do preassessment on those that read in 3. Quad R3RA reading items, first checking interest.
5. Have the pc list all of the things he has never wanted to be.
6. Do preassessment on those items that read in 5. Quad R3RA reading items, first checking interest.

The end phenomena of this process is when the pc originates that he is in valence, or some similar remark such as for the first time he feels himself.

HCO BULLETIN OF 21 JUNE 1978

Remimeo

***NEW ERA DIANETICS***  
***SERIES I***

New Era Dianetics is a summary and refinement of Dianetics based upon 30 years of experience in the application of the subject.

In that 30 years I have found much that could improve results if properly applied.

And in that 30 years, many issues have been written by others that were a bit altered and some materials have been lost. New Era Dianetics corrects these points.

Also, recently, I have done additional research and have come up with a few breakthroughs.

In 1950, I said we should build a better Bridge.

Well, in 1978, here is a better Dianetics section of the Bridge.

Old-timers in Dianetics will only approve these upgrades. There is no invalidation of what they know already to be true. But there are refinements about which they are jumping with joy.

New Era Dianetics is even more acceptable, even more workable.

I did this review to move Dianetics back into the "miracles as usual" band and the student studying it and the auditor practicing it will find that if he follows its precision drills with precision he will be able to handle life and the spirit as never before.

Of course I cannot claim or guarantee that anyone audited on Dianetics or New Era Dianetics will become cured of illnesses which would best be handled by immediate medical treatment and I cannot promise any pc that all of his undesirable conditions will be eradicated since that depends on the state of training and the accuracy of application by the student.

**THE STUDENT**

What does a student need to know and do to acquire the skill of a Dianetic auditor?

0. The student needs to have completed the Student Hat. He needs to be able to handle study tech. Without that, his misunderstood words will wipe him out. Study tech is contained in the Student Hat. The definitions are in the Tech and Admin dictionaries and standard dictionaries. The student must not go by a single word he does not know the definition of.

1. He should know the background of Dianetics as contained in several books on the subject, particularly the *Original Thesis* and *Dianetics: The Modern Science of Mental Health*.

2. He needs an E-Meter and must know how to handle it.

3. He should have good TRs as acquired in a TR course.

4. He should have a good grasp of Objective Processes, both to make him a better auditor, and to enable him to do full Drug Rundowns.

Objectives are actually Scientology processing but if a Dianetic auditor doesn't know and cannot do them he is dependent on a Scientology auditor to finish up the Drug Rundown.

The training of a Dianetic auditor in Objectives is not as complete as a Scientology auditor's. But it is sufficient to enable him to do those Objective Processes necessary to get a person off drugs or to get him in condition to run Dianetic processes.

5. He should have a good grasp of the materials of New Era Dianetics.
6. He should be able to make and assess lists of Dianetic items as called for in specific assessments of a preclear in order to complete rundowns and preclears.
7. He must be able to do TR 101 to 104 flawlessly. using the commands of New Era Dianetics.
8. He must know how to do Dianetic Assists.
9. He must be able to assess and handle a Dianetic Repair List and do repair actions.
10. He must be able to handle Dianetic remedies and all other actions called for in a complete Dianetic course or processing.
11. He needs to be able to apply what he knows.

If the student can acquire the above skills he will achieve fine results.

It does not require mile long checksheets to make a good Dianetic auditor.

It *does* require study and hard effective drilling.

And it requires a desire to help oneself and others and really make a better Bridge and a better world by putting it there in terms of faultless application.

Scientology goes on and is above Dianetics. But Dianetics is the solid base of all this research. So learn and apply it well.

HCO BULLETIN OF 22 JUNE 1978R  
REVISED 16 SEPTEMBER 1978

Remimeo

*(Revisions in this type sty/e)  
(Ellipses indicate deletions)*

*This bulletin has been revised to give the rearranged steps and a new final step for the New Era Dianetics Drug Rundown.*

***New Era Dianetics Series 2R***

**NEW ERA DIANETICS FULL PC PROGRAM OUTLINE**

As a person goes through life and lifetimes he collides with secondaries, losses, deaths of those he is closely connected with, injuries, accidents, illnesses, operations and emotional stresses. These of course are not all, but cover the main complaints and symptoms of pcs.

Dianetics lends itself to handle the current, past and occasional complaints and symptoms as above.

It achieves its results by addressing and handling the spirit and is in no way to be confused with medical or other practices.

The end phenomena of Dianetic auditing is a well and happy pc. These steps as laid out below if *ALL DONE* and with precision will give just that.

**NEW ERA DIANETICS FULL PROGRAM OUTLINE:**

**THE ACTIONS OF THE NEW ERA DIANETICS FULL PROGRAM ARE TO BE RUN IN THE ORDER THEY ARE GIVEN. THE PRODUCT IS A WELL AND HAPPY PC AND THIS IS THE DIRECTION YOU GO, STEP BY STEP TO ACHIEVE THAT PRODUCT.**

**ACTION ONE: ORIGINAL ASSESSMENT SHEET**

This sheet is thoroughly filled out with the pc on the meter. It gives you the pc's history, what drugs and alcohol he has taken *in this lifetime*, illnesses, operations, present physical conditions, mental treatment, medicines and perception difficulties. (Ref: HCOB 24 June 1978R New Era Dianetics Series 5R, ORIGINAL ASSESSMENT SHEET).

At this point the data is taken only. Do not attempt to handle any of the items on this step. (Ref: HCOB 24 June 1978R NED Series 5R).

**ACTION TWO: HANDLE ANY PTSNESS**

It must be noted that you have to handle any PTSness before you can begin any auditing. Pcs who are PTS will not hold their gain. Therefore any PTSness must be handled before auditing is begun. (Ref: HCOB 10 Aug 73 PTS HANDLING, HCOB 20 Apr 72 SUPPRESSED PCs AND PTS TECH, HCOB 9 Dec 71RC PTS RD).

**ACTION THREE: OBJECTIVE ARC**

I have added a new process to be done before the full battery of Objective Processes. It is called Objective ARC. This is the first process to be done on a pc

and will bring a person up to present time. (Ref: Objective ARC is covered in HCOB 19 Jun 1978, New Era Dianetics Series 3, OBJECTIVE ARC).

#### ACTION FOUR: SWEAT PROGRAM

A Sweat Program will be necessary if the person has taken LSD or Angel Dust. It may also be indicated when a person has been subjected to exposure to toxic substances which have lodged in the tissue and fat of the body. In future times psychiatrists or others of ill repute may develop other compounds such as LSD which lodge in the systems; a Sweat Program may be indicated in these. (Ref: HCOB 15 July 71RA III Rev 27 Jun 78, *Re-Rev 19 Sep 78*, New Era Dianetics Series 9R, DRUG HANDLING).

#### ACTION FIVE: OBJECTIVES

A . . . battery of Objectives is done on this step. *This consists of the following Objective Processes properly and fully done to their complete EP for each process: ... CCH 1-10, ... SCS on an Object and SCS.... (Note: SOP 8C and Op Pro By Dup are run on a later step.)* (Ref: HCOB 15 July 71RA III Rev 27 Jun 78, *Re-Rev 19 Sep 78*, New Era Dianetics Series 9R, DRUG HANDLING).

#### ACTION SIX: HARD TR COURSE

On this course, the preclear will thoroughly do TRs 0-9. (Ref: HCOB 15 July 71RA III Rev 27 Jun 78, *Re-Rev 19 Sep 78*, New Era Dianetics Series 9R, DRUG HANDLING, HCOB 16 Aug 71R, TRAINING DRILLS REMODERNIZED, HCOB 7 May 68, UPPER INDOC TRs, *BPL 18 Sep 78 New Era Dianetics Hard TRs Course*).

#### ACTION SEVEN: CS-1

Before we can even begin a pc on Dianetics we have to indoctrinate him into what Dianetics is and what is expected of him as a pc.

This is standardly and effectively accomplished by using the Standard Dianetics CS-1, HCOB 9 Jul 78R, DIANETIC CS-1.

#### ACTION EIGHT: DRUG RUNDOWN QUAD

It has been proven time and time again that until you audit out, each by name, the drugs, alcohol and medicine a person has taken, he does not make good case gain.

A person who has been on drugs, alcohol or medicine seldom runs any other type of engram, seldom goes backtrack well, and is subject to somatic, emotional and perceptic shut-offs, making any other type of Dianetic or Scientology auditing a difficult activity.

Therefore if drugs, medicine or alcohol, or individual names of them read on the meter on the Original Assessment Sheet, they are handled FIRST AND FOREMOST .

*(Note: You do not ask the pc for whole track drugs. You want only drugs, medicine or alcohol he has taken in this lifetime.)*

In New Era Dianetics the Drug Rundown has *five* parts: 1) The Original Assessment in which the names of drugs, medicines or alcohol *the pc has taken in this lifetime* are obtained, 2) *The running of each reading drug, medicine or alcohol Narrative R3RA Quad*, 3) The preassessment of each of these and the running by R3RA Quad of the items, 4) The prior assessment to drugs or alcohol for each, 5) *The final step of bringing the pc fully into PT and stabilizing him by the running of further Objectives, SOP 8C and Op Pro By Dup.*

1. The Original Assessment

*This has already been done as Action One. It may be necessary to get the preclear to add to the list and it is highly possible that he has taken more types of drugs in this lifetime than he remembered at the time the Original Assessment was done. You have to have all drugs, medicines and alcohol by their actual names as known to the pc. It is not enough to use an item like “drugs,” “alcohol” or “medicine” as you will get nowhere. They have to be “heroin,” or “penicillin” or “bourbon.”*

2. Narrative Handling of Drugs

*Before any other handling, the pc runs out EACH of the reading drugs, medicines or alcohols Narrative R3RA Quad. This is done FIRST.*

3. The Preassessment

New Era Dianetics handling for drugs includes the use of the Preassessment List. This is a new procedure on the handling and running of Dianetics. Previous to this you would ask the pc for attitudes, emotions, sensations and pains connected with an item. Instead the preassessment is done. It ensures that every somatic is gotten off in connection with whatever you are handling. (Ref: HCOB 18 Jun 78R New Era Dianetics Series 4R, ASSESSMENT AND HOW TO GET THE ITEM).

Each item found by preassessment is run by R3RA Quad as soon as the running item is found in every case. Then one continues with further preassessment until all possible drugs, medicines and alcohols are fully handled R3RA Quad.

4. The Prior Assessment

After all reading drugs, medicines and alcohols have been preassessed and run out R3RA Quad, the prior assessment to drugs or alcohol is done. This step locates and runs out all the feelings, attitudes, misemotions, pains, etc. the pc had prior to first taking each drug, medicine or alcohol. (Ref: HCOB 15 Jul 71RA III, Rev 27 Jun 78 New Era Dianetics Series 9R, C/S Series 48RB, DRUG HANDLING).

**ACTION EIGHT-A:**

5. *The Final Step—More Objectives*

*As a final step, the pc is brought fully into present time with further Objectives: SOP 8C and then Op Pro By Dup. each run to its complete EP.*

This completes the Dianetic Drug Rundown.

**ACTION NINE: RELIEF RUNDOWN**

Where the Original Assessment Sheet has shown losses by death or other severe changes in a person’s life such as losses of position or pets or objects it will be found that the person’s life changed for the worse at that point.

The auditor spots these points of change either on the Original Assessment Sheet or by asking the preclear. These points are then handled with New Era Dianetics procedure.

It will be found that when all such great changes in a person’s life have been handled the person will experience a considerable relief about life. (Ref: HCOB 3 July 1978R, NED Series 10R).

**ACTION TEN: DIANETIC REMEDIES—OPTIONAL**

The Picture and Masses Remedy and the Past Life Remedy are optional and are only done when you run into trouble. They are run after the Drug Rundown because unhandled drugs are the cause of most of that trouble.

The Picture and Masses Remedy  
(Ref: HCOB 22 Jul 69 HIGH TA ASSESSMENT  
HCOB 24 Jul 78 DIANETIC REMEDIES)

Past Life Remedy  
(Ref: HCOB 16 Jan 75 PAST LIFE REMEDY  
HCOB 24 Jul 78 DIANETIC REMEDIES)

#### ACTION ELEVEN: COMPLETE HANDLING ON THE ORIGINAL ASSESSMENT SHEET

You have handled all drugs, alcohol and medicine and all losses the pc has had fully and completely. The pc is now set up to go ahead with handling the rest of his complaints and symptoms.

The full procedure of handling the remainder of this Original Assessment Sheet is laid out in full in HCOB 28 July 71RA Rev 25 June 78 New Era Dianetics Series 8R DIANETICS, BEGINNING A PC ON and HCOB 18 June 78R New Era Dianetics Series 4R ASSESSMENT AND HOW TO GET THE ITEM. Follow these issues exactly.

#### ACTION TWELVE: REASSESSMENT OF THE ORIGINAL ASSESSMENT SHEET

When all Original Assessment Sheet items are handled as above, the Original Assessment Sheet is reassessed. The pc's memory will have improved if you've done a good job of auditing so far and his targets in processing will have changed.

So we reassess the Original Assessment Sheet and handle any now reading area.

(Ref: HCOB 4 Jul 78R New Era Dianetics Series 12R, SECOND ORIGINAL ASSESSMENT) .

#### ACTION THIRTEEN: DIANETIC STUDENT RESCUE INTENSIVE

This is an optional step to be taken if your pc is having any trouble with study. It takes up and handles any and all somatics connected with the subject of study.

A Student Rescue Intensive is not run until the pc has been completed up to ACTION ELEVEN as it would interrupt his program because drugs, if he has taken any, are a probable contributory cause to being unable to study. Also the Dianetic Student Rescue Intensive is not a substitute for proper Word Clearing of Dianetic, Scientology and earlier courses and training. It does however make the latter much more effective.

(Ref: HCOB 2 Jul 78 New Era Dianetics Series 11, DIANETIC STUDENT RESCUE INTENSIVE).

#### ACTION FOURTEEN: PREPARED ASSESSMENT FORM

This is an early step I developed in Dianetics which fell into disuse and abandonment. However it can produce some amazing results and so is being put back as a standard step in the running of Dianetics. It is done by assessing a prepared list of types of somatics and fully handling each one using New Era Dianetics.

When you have an F/Ning list and the pc is VGIs it is the end of this step.

The procedure and list is covered on HCOB 1 Jul 78 New Era Dianetics Series 13, DIANETICS PREPARED ASSESSMENT RUNDOWN.

#### ACTION FIFTEEN: DISABILITY RUNDOWN

This rundown handles anything the pc considers a disability; mental, physical or otherwise. It handles everything from being too short to not being able to speak Arabic or not wanting to go to parties. It takes each disability and handles it with R3RA.

(Ref: HCOB 29 June 78 New Era Dianetics Series 14, DISABILITY RUNDOWN).

#### ACTION SIXTEEN: IDENTITY RUNDOWN

We have never before had a Dianetic process specifically directed to getting a pc into valence. The Identity Rundown now handles that. It specifically takes up and handles valences the pc may be in by using the New Era Dianetics tech.

(Ref: HCOB 20 Jun 78 New Era Dianetics Series 15, IDENTITY RUNDOWN).

#### ACTION SEVENTEEN: AUDITING OUT SESSIONS—OPTIONAL

Now and then it is necessary to audit out an auditing session or all auditing. One does this by R3RA, running the incident narrative to erasure and only going earlier similar if it starts to grind very badly or, if all auditing, handling it session by session as a chain.

(Ref: HCOB 23 May 69 AUDITING OUT SESSIONS  
HCOB 26 Jun 78RA New Era Dianetics Series 6RA  
Issue II ENGRAM RUNNING BY CHAINS  
HCOB 18 Jun 78R New Era Dianetics Series 4R  
ASSESSMENT AND HOW TO GET THE ITEM).

#### IF YOU GET INTO TROUBLE

If you run into any trouble on these Dianetic steps, use the L3RF and handle all reading items to EP. Or go to Cramming on Dianetics. (Ref: HCOB 11 April 71RC L3RF).

#### SUMMARY

Completing all the above steps thoroughly and completely ensuring that all chains are run to full end phenomena is the only way you will have a well and happy pc.

**PRECLEAR CHECKLIST**

INFORMATION: When a pc is ready to start Dianetics this form must be filled out with his name and commencing date and kept in the front of the pc folder.

It is his advanced program.

As each step of Dianetics is done, the auditor plus C/S must attest by that step that this pc has done the step thoroughly per HCOB 22 June 1978R *New Era Dianetics Series 2R, New Era Dianetics Full PC Program Outline.*

When all steps have been run and completed, the pc's Dianetic folders, with this checklist included, get sent to the Qual Sec for full verification and attest before the pc is allowed to attest to Dianetic Case Completion.

After a grace period of 3 weeks after the date of this issue it will be a commevable offense for the auditor, C/S and Qual Sec to let any pc attest to Dianetic Case Completion without having thoroughly completed EACH step of this checklist.

*(Revisions in this type style)*

*New Era Dianetics Series 5R*

**ORIGINAL ASSESSMENT SHEET**

**WHEN IS THE ORIGINAL ASSESSMENT SHEET DONE**

This Original Assessment Sheet is done as the beginning action of Dianetics. It is done in a formal Dianetic auditing session in an auditing room with the pc duly signed up, and in session.

**WHO DOES THE ORIGINAL ASSESSMENT SHEET**

The auditor assigned to audit the preclear does the assessment. It is included as part of the preclear's auditing time as it is valuable data collection on the preclear's case, done with the preclear on the meter.

**PURPOSE OF ORIGINAL ASSESSMENT SHEET**

The purpose of this form is to provide essential data regarding the preclear to the C/S, the D of P and the auditor, and to better acquaint the auditor with the preclear at the onset of auditing.

**HOW IS THE ORIGINAL ASSESSMENT SHEET DONE**

The assessment is done with the preclear on the meter.

The preclear is given the R-Factor that you will simply be asking him for essential data about himself for the purpose given above.

The auditor notes down the data as the pc gives it. He does not take up the pc's answers to the questions, except, when necessary, to make sure the question is answered and the auditor has the facts straight. TA at start and end of the assessment is noted, along with any TA action during the assessment. Needle reactions to the questions are noted when the question is given plus any needle reaction that occurs during the pc's reply.

**NEATNESS OF ORIGINAL ASSESSMENT SHEET**

The data should be written plainly and neatly on the assessment sheet so that it is readable, as the information is wanted. Auditor does not delay or hold up the pc giving answers, however, while he completes admin.

**WHERE DOES THE ORIGINAL ASSESSMENT SHEET GO WHEN COMPLETED**

When completed, the Original Assessment Sheet is kept in the preclear's folder. A note is made on the Summary Sheet of pc's folder that the Original Assessment Sheet has been done.

ORIGINAL ASSESSMENT SHEET

Name of pc: \_\_\_\_\_ Age of pc: \_\_\_\_\_

Auditor: \_\_\_\_\_ Org: \_\_\_\_\_

TA Position at Start of Assessment: \_\_\_\_\_

A. FAMILY:

1. Is mother living? \_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

2. Date of Death: \_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

3. Pc's statement of relationship with mother: \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

4. Is father living? \_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

5. Date of Death: \_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

6. Pc's statement of relationship with father: \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

7. List brothers, sisters, and other relatives of the pc, date of death of any and E-Meter reaction:

Relation	Date of Death	E-Meter Reaction
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

8. Where and with whom do you live? \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

9. Are you currently associated with anyone who is antagonistic to mental or spiritual treatment or Scientology?

(If yes, who?): \_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

On questions 10 through 17 if the answer is “yes” find out who and E-Meter reaction.

10. Is anyone actively objecting to your getting treatment? \_\_\_\_\_

---

---

11. Has anyone insisted you get treatment? \_\_\_\_\_

---

---

12. Has anyone ever objected to your getting treatment? \_\_\_\_\_

---

---

13. Has anyone encouraged you to get treatment? \_\_\_\_\_

---

---

14. Has anyone ever objected to you getting better? \_\_\_\_\_

---

---

15. Has anyone ever assisted you in self-betterment? \_\_\_\_\_

---

---

16. Does anyone not like you the way you are? \_\_\_\_\_

---

---

17. Has anyone tried to make you change or be different? \_\_\_\_\_

---

---

**B. MARITAL STATUS:**

1. Married \_\_\_\_\_ Single \_\_\_\_\_ No. of times Divorced \_\_\_\_\_

2. Pc's statement of relationship with spouse: \_\_\_\_\_

---

---

E-Meter Reaction \_\_\_\_\_

3. List any marital difficulties pc presently has: \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

4. If divorced, list reasons for divorce and pc's emotional feeling about divorce: \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

5. List children, date of death of any child and E-Meter reaction: \_\_\_\_\_

Children	Date of Death	E-Meter Reaction
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

C. EDUCATION LEVEL:

State the level of schooling pc has had, university education, or professional training:

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

D. PROFESSIONAL LIFE:

State main jobs pc has held:

Job	E-Meter Reaction
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

E. DRUGS: (*NOTE: LIST DRUGS, MEDICINE OR ALCOHOL TAKEN THIS LIFETIME ONLY.*)

1. Are you taking any drugs currently?

What Drug	Date (How Long)	E-Meter Reaction
_____	_____	_____
_____	_____	_____
_____	_____	_____

Have you ever taken drugs?

What Drug	Date (How Long)	E-Meter Reaction

2. Are you taking any alcohol or alcoholic drink currently?

What Alcohol/ Alcoholic Drink	Date (How Long)	E-Meter Reaction

Have you ever taken alcohol or alcoholic drinks?

What Alcohol/ Alcoholic Drink	Date (How Long)	E-Meter Reaction

3. List any medicine currently or previously taken.

What	When	E-Meter Reaction

F. LOSSES:

What severe losses have you had in life that influenced it?

Loss	Date	Description	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

G. DEATHS:

What deaths have severely affected your life?

Loss	Date	Description	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

H. UPSETS:

Are you upset with or cross about anything or anyone at this particular time?

Upset	Date	Description	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

I. DANGERS:

1. Are you in any particular danger at this time?

Description	E-Meter Reaction
_____	_____
_____	_____
_____	_____
_____	_____

2. Are there engrams that match this in the past?

(Note meter read.) \_\_\_\_\_

**J. ACCIDENTS:**

List any serious accidents pc has had, the date of such, any permanent physical damage, and E-Meter reaction.

Accident	Date	Physical Damage	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

**K. ILLNESSES:**

List any serious illness pc has had giving date of each, any permanent-physical damage, and E-Meter reaction.

Illness	Date	Physical Damage	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

**L. OPERATIONS:**

List any operation, the date of each and E-Meter reaction.

Operation	Date	E-Meter Reaction
_____	_____	_____
_____	_____	_____
_____	_____	_____

**M. PRESENT PHYSICAL CONDITION:**

List any bad physical condition pc presently has and E-Meter reaction to such.

Physical Condition	E-Meter Reaction
_____	_____
_____	_____

---

---

---

**N. PT ILLNESSES:**

1. List any illnesses the pc currently has.

Illness	Date	E-Meter Reaction
_____	_____	_____
_____	_____	_____
_____	_____	_____

2. Do you have any recurring physical ailment? \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

**O. DISABILITY PAYMENT OR PENSION:**

List any disability payment or pension received by the pc, what it is for, how much and for how long it has been received.

What For	How Much	Duration	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

**P. ANY FAMILY HISTORY OF INSANITY:**

Who	What	When	E-Meter Reaction
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

**Q. EYES:**

	E-Meter Reaction
Any tint in eye white _____	_____
Eye Color _____	_____

Color Blindness \_\_\_\_\_

Glasses \_\_\_\_\_

R. BODY WEIGHT: E-Meter Reaction

Overweight? \_\_\_\_\_

Underweight? \_\_\_\_\_

S. ANY PERCEPTION DIFFICULTIES:

What E-Meter Reaction

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

T. ANY PERCEPTION TROUBLE IN FAMILY: E-Meter Reaction

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

U. SICK OR DISABLED FAMILY: E-Meter Reaction

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

V. EARLIER ALLIES OR CLOSE FRIENDS: E-Meter Reaction

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

W. HUSBAND OR WIFE PHYSICAL TROUBLES:

What E-Meter Reaction

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

X. ATTITUDE TOWARDS ILLNESS: E-Meter Reaction

---

---

Y. ATTITUDE TOWARDS TREATMENT: E-Meter Reaction

---

---

Z. ANY CURRENT TREATMENT IN PROGRESS: E-Meter Reaction

---

---

AA. COMPULSIONS, REPRESSIONS AND FEARS:

List any compulsions (things pc feels compelled to do), repressions (things pc must prevent himself from doing) and any fears of pc.

Compulsions: E-Meter Reaction

---

---

Repressions: E-Meter Reaction

---

---

Fears: E-Meter Reaction

---

---

Are you trying to change something someone else doesn't like?

What and Who E-Meter Reaction

---

---

BB. CRIMINAL RECORD:

List any crime committed by pc, prison sentence, if any, and E-Meter reactions:

Crime	Sentence	E-Meter Reaction
<hr/>	<hr/>	<hr/>

---

---

CC. INTERESTS AND HOBBIES:

List any interests and hobbies of pc.

Interests and Hobbies	E-Meter Reaction
<hr/>	<hr/>
<hr/>	<hr/>

DD. ARE YOU HERE ON YOUR OWN SELF-DETERMINISM? \_\_\_\_\_

\_\_\_\_\_ E-Meter Reaction \_\_\_\_\_

EE. PREVIOUS DIANETIC OR SCIENTOLOGY PROCESSING:

1. List auditors, hours, and E-Meter reaction to any processing done.

Auditor	Hours	E-Meter Reaction
<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>

2. List briefly processes run: \_\_\_\_\_  
\_\_\_\_\_

3. List goals attained from such processing:

	E-Meter Reaction
<hr/>	<hr/>
<hr/>	<hr/>
<hr/>	<hr/>

4. List goals not attained from such processing:

	E-Meter Reaction
<hr/>	<hr/>
<hr/>	<hr/>
<hr/>	<hr/>

FF. 1. Do you look on yourself as somebody else?

E-Meter Reaction

_____	_____
_____	_____
_____	_____

2. When you see pictures of the past do you see yourself from a distance?

E-Meter Reaction

_____	_____
_____	_____
_____	_____

GG. FORMER PRACTICES:

1. What practices or treatments have you engaged upon in the past?

Practice or Therapy	Date	E-Meter Reaction
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

2. Are you continuing any of the above in the present?

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

HH. What problems are you trying to solve by processing?

E-Meter Reaction

_____	_____
_____	_____
_____	_____

II. Have you ever done anything harmful to Dianetics, Dianeticists, Scientology, Scientologists or organizations? (Note any meter read.)

---

---

---

---

---

JJ. REALITY FACTOR:

You know of course that people sometimes get cross at the auditor or run away when they are withholding information from them and we don't want you to do that.

Anything you tell me is confidential and is protected under ministerial confidence.

Is there anything we have missed or omitted while doing this assessment? (Carefully note any meter reads.)

Ask: "Is there anything you would care to tell me about this?"

---

---

---

---

---

State of needle at the end of the above \_\_\_\_\_

	HCOB 16 Sep 78	POSTULATE OFF EQUALS ERASURE

The search to unravel the mystery of the human mind was so long and so complex that it had many turnings. Methods were changed so as to be perfected as understanding increased in the research line. Unfortunately this was taken advantage of by some of questionable intent. Because there had been changes and perfecting actions they could introduce unworkable changes that would go relatively undetected.

Probably this is the fate of all subjects and why Man is in a state of high material cultural achievement yet does not have really workable equipment and is in a terrible mess, surrounded on every hand by a failing material culture.

Probably the heaviest hat I've worn in recent years is the recovery of lost Dianetic and Scientology tech and eradicating and correcting alterations introduced into the subject by others.

Given a knowledge of the composition and behavior of the time track, engram running by chains is so simple that any auditor begins by overcomplication. You almost can't get uncomplicated enough in engram running.

In teaching people to run engrams in 1949, my chief despair was summed up in one sentence to the group I was instructing: "All auditors talk too much." And that's the first lesson.

The second lesson is: "All auditors acknowledge too little." Instead of cheerily asking what the pc said and saying "Continue," auditors are always asking for more

data and usually for more data than the pc could ever give. Example: Pc: "I see a house here." Auditor: "Okay. How big is it?"

That's not engram running, that's just lousy "Q and A."

The proper action is: Pc: "I see a house here." Auditor: "Okay. Continue."

The exceptions to this rule are non-existent. This isn't a special brand of engram running. It is modern engram running. It was the first engram running and is the latest and you can put aside any complications in between.

The rule is ACKNOWLEDGE WHAT THE PC SAYS AND TELL HIM TO CONTINUE.

Then there's the matter of being doubtful of control. Wrong example: Auditor: "Move to yesterday. Are you there? How do you know it's yesterday? What do you see that makes you think..." FLUNK, FLUNK, FLUNK.

Right example: Auditor: "Move to the beginning of that incident and tell me when you are there." (Pc answers.) "What do you see? . . . . . Good."

Another error is a failure to take the pc's data. You take the pc's data. Never take his orders.

### EARLY ENGRAM RUNNING

No auditor who knew earlier than June 1978 engram running should consider he or she knows how to run engrams.

Routine 3RA is itself. It has *no* dependence on earlier methods of running engrams. Failure to study and learn R3RA "because one knows about engram running" will cause a lot of case failure.

If you know old-time engram running there is no attempt here to invalidate you or that knowledge or make you wrong in any way. Those are all ways to run engrams and gave you a better grasp on it. I only wish to call to your attention that R3RA is not old-time engram running.

### ROUTINE 3RA

Engram running by chains is designated "Routine 3RA."

It is a new triumph of simplicity. It does not demand visio, sonic or other perception at once by the pc. It develops them.

### R3RA REVISED BY STEPS

The first thing the auditor does is to make sure the room and session are set up. This means, in other words, that the room is as comfortable as possible and free from interruptions and distractions; that the auditor's meter is fully charged and set up and that the auditor has all the administrative supplies he will need for the session. Prepared correction lists for Dianetics must also be included.

He has the C/S for that session.

The pc is seated in the chair furthest from the door and is asked to pick up the cans.

The auditor checks that the pc has had enough to eat by doing the metabolism test and also checks that the pc has the correct sensitivity setting by having the pc squeeze

the cans and adjusting the sensitivity knob so that the needle registers one third of a dial fall when squeezing the cans.

The auditor then starts the session by saying, "This is the session" (Tone 40).

The auditor then puts in the R (reality) factor with the pc by telling the pc briefly what he is going to do in the session.

#### PRELIMINARY STEP:

Establish the type of chain the pc is to run by assessment. Ref: HCOB 18 June 78 New Era Dianetics Series 4, ASSESSMENT AND HOW TO GET THE ITEM.

### R3RA COMMANDS

#### FLOW 1:

##### STEP ONE:

Locate the first incident by the command "Locate a time when you had\_\_\_\_\_."

##### STEP TWO:

"When was it?" You accept any time or date or approximation the pc gives you. Do not attempt any dating drill.

##### STEP THREE:

Move the pc to the incident with the exact command, "Move to that incident." (This step is omitted if the pc keeps telling you he is there already.)

##### STEP FOUR:

"What is the duration of that incident?" Accept any duration the pc gives you or any statement he makes about it. Do not attempt to meter him a more accurate duration.

##### STEP FIVE:

Move the pc to the beginning of the incident with the exact command: "Move to the beginning of that incident and tell me when you are there."

##### STEP SIX:

Ask pc what he or she is looking at with the exact command: "What do you see?" (If the pc's eyes are open, tell the pc first, "Close your eyes," acknowledge him quietly for doing so and then give him the command.)

##### STEP SEVEN:

"Move through that incident to a point (duration pc said) later."

##### STEP EIGHT:

Ask nothing, say nothing, do nothing (except observe the meter or make *quiet* notes) while pc is going through the incident. If pc comments before reaching the end say "OK, continue."

##### STEP NINE:

When the pc reaches the end of the incident say *only*: "What happened?"

Take whatever pc says, acknowledge only as needful. Say *nothing* else, ask *nothing* else. When pc has told little or much and has finished talking, give him a final acknowledgement .

*If the TA has risen (from its position at Step 1) the auditor immediately checks for an earlier incident (Step G). If no earlier incident, he asks for an earlier beginning to the incident (Step H).*

*If the TA is the same or lower, he runs the incident through again (Step A).*

*In going through an incident the second or successive times one DOES NOT ask for date and duration or any description.*

- A. *(When the pc has told what happened and the auditor has acknowledged) "Move to the beginning of that incident and tell me when you are there."*
- B. *"Move through to the end of that incident."*
- C. *(When the pc has done so) "Tell me what happened."*
- Ca. *"Is that incident erasing or going more solid?" (TA rising means the incident has gone more solid so the question is unnecessary if TA is higher.)*

*If the incident is erasing, go through it again (Step D).*

*If it has gone more solid, ask for an earlier incident (Step G) and if no earlier incident, ask for an earlier beginning (Step H).*

- D. *"Return to the beginning of that incident and tell me when you are there."*
- E. *"Move through to the end of that incident."*
- F. *"Tell me what happened."*
- Fa. *"Is that incident erasing or going more solid?" (TA rising means the incident has gone more solid so the question is unnecessary if TA is higher.)*

*If the incident is erasing, go through it again (Step D).*

*If it has gone more solid, ask for an earlier incident (Step G) and if no earlier incident, ask for an earlier beginning (Step H).*

- G. *"Is there an earlier incident when you had a (exact same somatic)?"*  
*Continue on down the chain of the SAME somatic using Steps 2-9, A, B, C, D, E, F, G, H, and EYE.*
- H. *"Is there an earlier beginning to this incident?" or "Does the one we are running start earlier?" or "Does there seem to be an earlier starting point to this incident?"*

*(If not, give command D and put the pc through the incident again. If there is an earlier beginning, give command EYE.)*

- EYE. *"Go to the new beginning of that incident and tell me when you are there."  
(Followed by B, C.)*

### *POSTULATE OFF EQUALS ERASURE*

When it appears that you have reached the basic incident of the chain and that it is erasing, after each pass through, ask:

“Has it erased?”

The pc sometimes thinks the incident is erasing but it's not erasing, so you have to go back to your G. H. EYE followed by 2-9, A-EYE. In some cases this can happen several times in one chain.

*The postulate coming off is the EP of the chain and means that you have obtained an erasure. This will be accompanied by F/N and VGIs.*

*Getting the postulate is the important thing. Even if you get an F/N you don't call the F/N UNTIL you've gotten the postulate, at which time you have reached the EP and end off on that chain.*

*If the pc says the chain has erased, but the postulate made during the time of the incident has not been volunteered by the pa ask:*

*“Did you make a postulate at the time of that incident?”*

*Only when the postulate has come off to F/N and VGIs can one consider that the full EP of a Dianetic incident or chain has been reached.*

*You must recognize what the postulate is when it comes up. If you overrun past the postulate you can really mess a pc up and he may need extensive repair. All you're trying to get off the line is the postulate. That is what is keeping the chain there.*

*If the pc has given the postulate to F/N and VGIs, that is it. You have the EP of that chain.*

### GOING EARLIER

*Ordinarily one runs an incident through twice, (Steps 1-9 then A-C), to unburden it and allow the pa to locate earlier incidents on the chain.*

*However, the TA rising on Step 9 is an indication that there is something earlier. If the auditor observes the TA rising, he should ask the pc if there is an earlier incident, using in the command the exact same somatic or feeling used in Step One. If there is no earlier incident he asks if there is an earlier beginning.*

*An auditor should never solidify a pays bank by putting him through an incident TWICE, when by observation of the TA it is c/ear that the incident has gone more solid by the end of the FIRST run through.*

*Checking for an earlier incident after the first run through (if the TA has risen) is the solution to this.*

*If, after the second pass through, when you have asked the pc “Is the incident erasing or going more solid?” and the pc doesn't know or isn't sure, ask for an earlier incident.*

*Never ask erasing/solid in the middle of an incident.*

### BOUNCERS

*If the pc is out of the session, out of the incident, bounces from the incident, etc., you would have to have him or her RETURN to the beginning of the incident and move through the incident, returning the pc to the incident as necessary.*

*The pc who bounces out of an incident on a “bouncer” has to be put back into the incident and continue running it.*

*The commands to do this are: As soon as you have seen that the pc has bounced give him command D (“Return to the beginning of that incident and tell me when you are there.”), followed with E, F. Fa.*

### *FLows 2, 3 AND 0*

*Step One and Step G (going earlier) commands for Flows 2, 3 and 0 are:*

#### **FLOW 2:**

STEP ONE:

“Locate an incident of your causing another\_\_\_\_\_ (the exact somatic or feeling used in Flow 1).”

STEP G:

“Is there an earlier incident of your causing another\_\_\_\_\_ (the exact somatic or feeling used in Flow 1)?”

#### **FLOW 3:**

STEP ONE:

“Locate an incident of others causing others\_\_\_\_\_ (plural of the somatic or feeling used in Flow 1). “

STEP G:

“Is there an earlier incident of others causing others\_\_\_\_\_ (plural of the exact somatic or feeling used in Flow 1)?”

#### **FLOW 0:**

STEP ONE:

“Locate an incident of you causing yourself\_\_\_\_\_ (the exact somatic or feeling used in Flow 1).”

STEP G:

“Is there an earlier incident of you causing yourself\_\_\_\_\_ (the exact somatic or feeling used in Flow 1)?”

Each of these Step One and Step G commands are run on the full verbatim 1-9, A-EYE steps as given herein.

### **NARRATIVE R3RA**

A narrative item is often run to run out the physical experiences the person has just undergone. This could be for example an accident, illness, an operation or emotional shock.

However, a condition or circumstance without an incident is NOT narrative. It’s just an incorrect item. An example of this would be trying to run the item, “Obstruction of justice.” It would not run as there is no exact incident there.

Narratives are too often just run through once or twice and abandoned. This, unfortunately, leaves the incident still charged and affecting the pc. A narrative needs to

be run and run and run on that one incident. What you are doing is running the incident narrative to erasure and only going earlier similar if it starts to grind very badly.

Most narratives will run out by themselves without going earlier even though it takes a very long time but if you want to change somebody's life, that's how you can do it.

When you are running a narrative you always add the known incident to the command.

Using the earlier beginning command in running narratives is essential. For example: If the pc is running out a death of somebody closely related to him you will find that the incident actually started when he heard the phone ring, then, going back earlier to when somebody looked at him peculiarly, etc.

So using the earlier beginning command in narrative running is VITAL.

The commands for Narrative are:

### **FLOW 1:**

#### **STEP ONE:**

“Return to the time you \_\_\_\_\_(specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time....”).*

*Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pa to the new beginning of the incident (Step EYE) then follow with Steps B and C.*

*If there is no earlier beginning, return the pa to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use steps D, E, F making certain to check for earlier beginning after each pass through, and only when the pa is obviously starting to grind and gets no place does one then use the command, “Is there an earlier similar incident?”*

### **FLOW 2:**

#### **STEP ONE:**

“Return to the time you caused another to/a (specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time . . .”).*

*Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pc to the new beginning of the incident (Step EYE) then follow with Steps B and C.*

*If there is no earlier beginning, return the pa to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use Steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pa is obviously starting to grind and gets no place does one then use the command, “Is there an earner similar incident?”*

### **FLOW 3:**

#### **STEP ONE:**

“Return to the time others caused others to/a (specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time....”).*

*Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pc to the new beginning of the incident (Step EYE) then follow with Steps B and C.*

*If there is no earlier beginning, return the pa to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pc is obviously starting to grind and gets no place does one then use the command, “Is there an earlier similar incident?”*

### **FLOW 0:**

#### **STEP ONE:**

“Return to the time you caused yourself to/a (specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time....”).*

*Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pa to the new beginning of the incident (Step EYE) then follow with Steps B and C.*

*If there is no earlier beginning, return the pc to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pc is obviously starting to grind and gets no place does one then use the command, “Is there an earlier similar incident?”*

### **SECONDARIES**

Secondaries are run with the same commands as R3RA. If they are narrative secondaries they are run with the same commands as Narrative R3RA engrams.

The earlier similar command is “Is there an earlier similar incident?”

**ALWAYS RUN NARRATIVE INCIDENTS TRIPLE OR QUAD FLOW AS ABOVE.**

#### **AUDITOR KNOWLEDGE OF COMMANDS**

These commands and procedures as given above must be thoroughly drilled with TR 101, 102, 103 and 104 before any Dianetic auditing may be done on a pc.

Pcs can be messed up by incorrect and sloppy commands.

## SPEED OF COMMANDS

Some pcs run fast and some run slow. An auditor must never rush a pc or hold him up when he is ready to go on with the next command. The auditor must never keep a pc waiting for him while he handles his admin or comm lags before giving the next command.

Timing and speed are especially crucial when the auditor gives the command to move through the incident after having told the pc to move to the beginning of the incident. With a slow command, the pc would wind up halfway through the incident before he receives the command to move through it.

The better an auditor knows his TRs, his process commands, his meter and admin the faster and more accurately he can operate. Speed is very important, especially when auditing *fast pcs*.

## PC INTEREST

In doing R3RA it is necessary that (a) one chooses things the pc is interested in and (b) one does not force a pc to run things he is protesting being run on.

## LAST INCIDENT FOUND

If you ask if there is an earlier *beginning* and you have already checked for an *earlier incident* and the pc says there is no earlier *beginning*, you do not just walk off from the one he was just running. You send the pc through it again and it will erase with full end phenomena or the pc will then be able to see an earlier incident and continue with the chain.

## COMPLETING CHAINS

*If you do sloppy R3RA and do one thing after another without getting the full EP of:*

- 1) *the actual postulate WHICH WILL BE THE ERASURE,*
- 2) *F/N,*
- 3) *VGIs,*

*you will get the pc stuck up on the track. You complete each chain to full EP as above, remembering that when the postulate comes off, THAT is your EP. The chain will have blown.*

*F/Ns*

*In running Dianetics you do not stop at the first sign of an F/N, you do not call F/Ns during the running. Dianetics runs only by asking the pc if it is erasing. You ignore F/Ns until the postulate has come off to F/N and VGIs. THEN you call the F/N and that's it for that chain.*

## BLOWING BY INSPECTION

An auditor may occasionally encounter a pc who erases chains before he can even tell about them. Along about Step 3 of R3RA, the TA blows down, the needle F/Ns, the pc says, "It's gone," and VGIs come in. This is called blowing by inspection and occurs once in a while with a fast running pc on a light chain.

If it was basic for that chain and the auditor fails to recognize and handle it, the pc will go into another chain or a heavy protest.

## ENDING SESSION

An R3RA session can be safely ended on a completed chain that ended with the full Dianetic EP as above stated....

This doesn't mean the end of all Dianetic auditing. In the next session another assessment will turn up more unwanted feelings, etc.

## ENDING DIANETICS

Dianetics is ended off only when a pc has become well and happy and remains that way.

And there you have it, engram running superior to any engram running ever done and giving superior and faster results.

### *SPECIAL NEW ERA DIANETICS RUNDOWN FOR OTs*

*New Era Dianetics or any Dianetics is NOT to be run on Clears or above or on Dianetic Clears.*

*Clears and OTs are to be audited on the Special New Era Dianetics Rundown for OTs, which is available at Advanced Orgs and Flag. (Ref: HCOB 12 Sep 78 Dianetics Forbidden on Clears and OTs.)*

HCO BULLETIN OF 28 JUNE 1978RA  
REVISED 4 SEPTEMBER 1978  
RE-REVISED 15 SEPTEMBER 1978

*(Revisions in this type style)*

***New Era Dianetics Series 7RA***

**IMPORTANT:** *Included in the vital revisions of this Bulletin is a change in the order of R3RA commands.*

**R3RA COMMANDS**

This is a short list on R3RA commands.

- STEP 1: "Locate a time when you had\_\_\_\_\_."
- STEP 2: "When was it?" (Note: You accept any time or date or approximation the pc gives you. Do not attempt any dating drill.)
- STEP 3: "Move to that incident." (This step is omitted if the pc keeps telling you he is there already.)
- STEP 4: "What is the duration of that incident?" (Accept any duration the pc gives you or any statement he makes about it. Do not attempt to meter him a more accurate duration.)
- STEP 5: "Move to the beginning of that incident and tell me when you are there."
- STEP 6: "What do you see?" (If the pc's eyes are open, tell the pc first, "Close your eyes," acknowledge him quietly for doing so and then give him the command.)
- STEP 7: "Move through that incident to a point (duration pc said) later."
- STEP 8: If pc comments before reaching the end say "OK, continue."
- STEP 9: When pc has reached the end of the incident ask "What happened?"

*If the TA has risen (from its position at Step 1) the auditor immediately checks for an earlier incident (Step G). If no earlier incident, he asks for an earlier beginning to the incident (Step H).*

If the TA is the same or lower, he runs the incident through again (Step A).

In going through an incident the second or successive times one DOES NOT ask for date and duration or any description.

- A. (When the pa has told what happened and the auditor has acknowledged) "Move to the beginning of that incident and tell me when you are there."
- B. "Move through to the end of that incident."
- C. (When the pa has done so) "Tell me what happened."
- Ca. *"Is that incident erasing or going more solid?" (TA rising means the: incident has gone more solid so the question is unnecessary if TA is higher.)*

If the incident is erasing, go through it again (Step D).

If it has gone more solid, ask for an earlier incident (Step G) and if no earlier incident, ask for an earlier beginning (Step H).

D. "Return to the beginning of that incident and tell me when you are there."

E. "Move through to the end of that incident."

F. "Tell me what happened."

Fa. "Is that incident erasing or going more solid?" (TA rising means the incident has gone more solid so the question is unnecessary if TA is higher.)

If the incident is erasing, go through it again (Step D).

If it has gone more solid, ask for an earlier incident (Step G) and if no earlier incident, ask for an earlier beginning (Step H).

G. "Is there an earlier incident when you had a (exact same somatic)?"

Continue on down the chain of the SAME somatic using Steps 2-9, A, B, C, D, E, F, G, H and EYE.

H. "Is there an earlier beginning to this incident?" or "Does the one we are running start earlier?" or "Does there seem to be an earlier starting point to this incident?"

(If not, give command D and put the pc through the incident again. If there is an earlier beginning, give command EYE.)

EYE. "Go to the new beginning of that incident and tell me when you are there."  
(Followed by B, C.)

When it appears that you have reached the basic incident of the chain and that it is erasing, after each pass through, ask:

"Has it erased?"

The pc sometimes thinks the incident is erasing but it's not erasing, so you have to go back to your G, H, EYE, followed by 2-9, A-EYE. In some cases this can happen several times in one chain.

### *POSTULATE OFF EQUALS ERASURE*

The postulate coming off is the EP of the chain and means that you have obtained an erasure. This will be accompanied by F/N and VGIs.

Getting the postulate is the important thing. Even if you get an F/N you don't call the F/N UNTIL you've gotten the postulate, at which time you have reached the EP and end off on that chain.

If the pc says the chain has erased, but the postulate made during the time of the incident has not been volunteered by the pc ask:

*"Did you make a postulate at the time of that incident?"*

Only when the postulate has come off to F/N and VGIs can one consider that the full EP of a Dianetic incident or chain has been reached.

You must recognize what the postulate is when it comes up. If you overrun past the postulate you can really mess a pa up and he may need extensive repair. All you're trying to get off the line is the postulate. That is what is keeping the chain there.

If the pc has given the postulate to F/N and VGIs, that is it. You have the EP of that chain.

### GOING EARLIER

Ordinarily one runs an incident through twice, (Steps 1-9 then A-C), to unburden it and allow the pc to locate earlier incidents on the chain.

However, the TA rising on Step 9 is an indication that there is something earlier. If the auditor observes the TA rising, he should ask the pc if there is an earlier incident, using in the command the exact same somatic or feeling used in Step One. If there is no earlier he asks if there is an earlier beginning.

An auditor should never solidify a pc's bank by putting him through an incident TWICE, when by observation of the TA it is c/ear that the incident has gone more solid by the end of the FIRST run through.

Checking for an earlier incident after the first run through (if the TA has risen) is the solution to this.

If, after the second pass through, when you have asked the pc "Is the incident erasing or going more solid?" and the pc doesn't know or isn't sure, ask for an earlier incident.

Never ask erasing/solid in the middle of an incident.

### BOUNCERS

If the pc is out of the session, out of the incident, bounces from the incident, etc. you would have to have him or her RETURN to the beginning of the incident and move through the incident, returning the pc to the incident as necessary.

The pc who bounces out of an incident on a "bouncer" has to be put back into the incident and continue running it.

The commands to do this are: As soon as you have seen that the pc has bounced give him command D ("Return to the beginning of that incident and tell me when you are there."), followed with E, F. Fa.

### FLOWS 2, 3 AND 0

#### **FLOW 2:**

STEP ONE: "Locate an incident of your causing another \_\_\_\_\_ (the exact somatic or feeling in Flow 1)."

STEP G: "Is there an earlier incident of your causing another \_\_\_\_\_ (the exact somatic or feeling used in Flow 1)?"

#### **FLOW 3:**

STEP ONE: "Locate an incident of others causing others \_\_\_\_\_ (plural of the somatic or feeling used in Flow 1)."

STEP G.: “Is there an earlier incident of others causing others\_\_\_\_\_ (plural of the exact somatic or feeling used in Flow 1)?”

### **FLOW 0:**

STEP ONE: “Locate an incident of you causing yourself\_\_\_\_\_ (the exact somatic or feeling used in Flow 1).”

STEP G: “Is there an earlier incident of you causing yourself\_\_\_\_\_ (the exact somatic or feeling used in Flow 1)?”

The commands for Narrative are:

### **FLOW 1:**

STEP ONE: “Return to the time you (specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time....”).*

Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pc to the new beginning of the incident (Step EYE) then follow with Steps B and C.

If there is no earlier beginning, return the pc to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use Steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pc is obviously starting to grind and gets no place does one then use the command, “Is there an earlier similar incident?”

### **FLOW 2:**

STEP ONE: “Return to the time you caused another to/a (specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time....”).*

Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pc to the new beginning of the incident (Step EYE) then follow with Steps B and C.

If there is no earlier beginning, return the pc to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use Steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pc is obviously starting to grind and gets no place does one then use the command, “Is there an earlier similar incident?”

### **FLOW 3:**

STEP ONE: “Return to the time others caused others to/a (specific incident) and tell me when you are there.”

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, “Return to the time....”).*

Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pc to the new beginning of the incident (Step EYE) then follow with Steps B and C.

If there is no earlier beginning, return the pc to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use Steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pc is obviously starting to grind and gets no place does one then use the command, "Is there an earlier similar incident?"

#### **FLOW 0:**

STEP ONE: "Return to the time you caused yourself to (specific incident) and tell me when you are there."

*Steps 2-9 are followed (3 is omitted as you have already got the pc to the incident by giving him the first command, "Return to the time....").*

Earlier beginning (Step H) is checked after each run through the incident. If there is one, send the pc to the new beginning of the incident (Step EYE) then follow with Steps B and C.

If there is no earlier beginning, return the pc to the incident with Step A, followed by B and C, again checking earlier beginning (Step H) at the end of each run through the incident. On third and subsequent runs through the incident use Steps D, E, F. making certain to check for earlier beginning after each pass through, and only when the pc is obviously starting to grind and gets no place does one then use the command, "Is there an earlier similar incident?"

#### **SECONDARIES**

Secondaries are run with the same commands as R3RA. If they are narrative secondaries they are run with the same commands as Narrative R3RA engrams.

The earlier similar command is "Is there an earlier similar incident?"

**ALWAYS RUN NARRATIVE INCIDENTS TRIPLE OR QUAD FLOW AS ABOVE.**

Auditors must be thoroughly drilled on these commands until they have them down cold using TR 101, 102, 103 and 104.

This must be done before the auditor audits the pc on Dianetics.

Remimeo  
All Auditors

*New Era Dianetics Series 14*

**DISABILITY RUNDOWN**

This rundown is done by getting the pc to give you anything he considers a disability, mental, physical or otherwise.

This list can include anything from a withered foot to being too small to not being able to learn French.

Make a list of all items the pc gives you ensuring you get the meter read as the pc gives you the item.

Take the largest reading item and do a full preassessment on it. Check interest and handle each reading item from the preassessment Quad R3RA. Take up the next biggest reading disability and do a preassessment and handling on it.

Reassess/add to the original list. Use Suppress and Invalidate buttons as needed.

When you have exhausted the list of all reading disabilities and the pc says there are no more disabilities this rundown is complete.

*New Era Dianetics Series 13*

**THE DIANETIC PREPARED ASSESSMENT RUNDOWN  
ACTION FOURTEEN**

Many chains, locks, secondaries and engrams are available on any pc. But some of them are beyond the pc's reality and ability and some of them are too featherweight to get any case gain. This rundown is designed to locate items that can be run R3RA. It is called the Dianetic Prepared Assessment Rundown.

**EARLIER ASSESSMENT DONE**

The very earliest assessment (1948) used was "What the pc could see" when he closed his or her eyes. This was then run.

This was followed by an arbitrary method of assigning necessary incidents to be run such as birth and prenatals.

The next earliest assessment (1949) was to ask each time for "the incident necessary to resolve the case." An automaticity known as the "File Clerk" was depended upon, impinged on by finger snapping.

The next period (1951) concerned whole track exploration running whatever you could get to read on a meter.

The next period (1952) concerned overt engrams located by what the pc seemed to be doing physically.

This ended the Dianetic period when engrams were run to clear a case.

Variations of these assessments were revived from time to time in Dianetic uses, culminating in the 5th ACC where overt engrams were run with confront and great stress was laid on getting the postulates out of them. The meter and shrewd guesses played their part in assessments.

Significance and story content have no bearing on the rightness or wrongness of a chain selected. They are entirely incidental to judging the correctness of a chain.

1. The first action of this RD is to assess the following list:

infirmity	_____
sickness	_____
being unwell	_____
bad feelings	_____
unpleasant feelings	_____
disagreeable feelings	_____

soreness	_____	panic	_____
hurting	_____	apprehension	_____
ailment	_____	qualms	_____
complaint	_____	alarm	_____
a malady	_____	timidity	_____
a disorder	_____	physical disabilities	_____
damaged body parts	_____	casualty	_____
hurt body parts	_____	distress	_____
disabled body parts	_____	bodily affliction	_____
skin irritation	_____	defective body parts	_____
skin disorder	_____	allergies	_____
unwanted feelings	_____	relatives	_____
dental problems	_____	jobs	_____
an unwanted body condition	_____	environment	_____
unwanted states of the body	_____	this area	_____
an unwanted manner	_____	upsets	_____
depression	_____	problems	_____
infection	_____	children	_____
unwanted behavior	_____	marriage	_____
injuries	_____	smells	_____
mishap	_____	machinery	_____
perception troubles	_____	matter	_____
loss of a loved one	_____	energy	_____
impulses	_____	space	_____
crimes	_____	time	_____
urges	_____	orgs	_____
restraints	_____	Dianetics	_____
frights	_____	Scientology	_____
anxiety	_____	auditors	_____
terror	_____	auditing	_____
horror	_____	preclears	_____

2. You then take an item found as above and ask the pc to describe it briefly. Ask him, "In your own words briefly describe (item that read)."
3. Use the exact wording the pc gave you in 2. Treat that wording as an original item exactly as though it had been obtained on the Original Assessment List NED Series 5.
4. Handle the items in 3 above exactly as you would handle any original item or items in NED Series 4 (Assessment and How to Get the Item).
5. Exhaust all reading items on the above prepared list.
6. Reassess the prepared list and do 2 to 5 above.
7. When this prepared list no longer gives reads and only F/Ns you have finished Action Fourteen.

### L3RE

If you run into any trouble an L3RE should be done immediately.

Done correctly, with standard R3RA and flawless metering the gains from this rundown will not be small.

Dianetic Student Rescue Intensive.)

*New Era Dianetics Series 11*

**DIANETIC STUDENT RESCUE INTENSIVE**

Dianetic Student Rescue Intensive. This is an optional step to be taken if your pc is having *any* trouble with study.

The steps are very simple:

- |            |                |             |
|------------|----------------|-------------|
| 1. Assess: | Being Trained  | Stress      |
|            | Being Educated | Education   |
|            | Study          | Schools     |
|            | Learning       | Teachers    |
|            | Examination    | Enforcement |
|            | Misunderstoods |             |

for best read.

2. Do a preassessment on the largest reading item from Step 1.
3. Find the running item, using standard preassessment procedure (ref. NED Series 4).
4. Run out the item you have found in Step 3 R3RA Quad.
5. Repeat the preassessment on the original item found in Step 1, and repeat the following steps 3 and 4 on that item.
6. Continue reassessing the Preassessment List on the original item and running out R3RA Quad the best reading running item until there are no further reads on the preassessment of that original item.

The intensive should be concluded when the pc is now happy about study.

REVISED 22 SEPTEMBER 1978

Remimeo

*(Revisions in this type style)*

**New Era Dianetics Series 10R**

**RELIEF RUNDOWN**

Where the Original Assessment Sheet has shown losses by death or other severe changes in a person's life such as losses of position or pets or objects it will be found that the person's life changed for the worse at that point. (See Sections F. G. H. and I of HCOB 24 June 78R New Era Dianetics Series 5R Original Assessment Sheet.)

The auditor spots these points of change either on the Original Assessment Sheet or by asking the preclear. These points are then run Narrative R3RA Quad.

If the Narrative R3RA Quad does not clean it *up fully* one goes to the pre-assessment step of New Era Dianetics Series 4R and carries on from there, but do not do this until the narrative is fully handled.

In running such incidents narrative it will be found that the clue to erasure lies in locating earlier beginnings each time the pc has been moved through the incident. It will be found that the pc finds earlier and earlier moments when he received the information that then built up to a catastrophe. This can even go back to a dream or a telepathic awareness or a premonition that the incident was going to occur. Narrative erasures often depend utterly on finding, after each run through, if there was any earlier beginning.

If the incident starts to grind (no change of TA or content) despite having repeatedly searched for an earlier beginning only then do you go into an earlier narrative incident but do so with caution as most narratives expertly run will erase all by themselves and running a chain of deaths for instance can go back an awfully long way.

When all such great changes in a person's life have been found and erased the person should experience a considerable sense of relief about life.

If he does not, then treat the narrative, even though handled as a narrative, as an original item and preassess it to find other running items connected with it and treat it with R3RA full handling. Also do this if the narrative grinds and there is trouble going earlier.

Narrative chains properly run produce dramatic and miraculous case changes.

**SECOND ORIGINAL ASSESSMENT**

At the point in the New Era Dianetics Program, when the pc has fully completed his Drug Rundown and handled the items on the Original Assessment Sheet, the Original Assessment Sheet is REDONE.

The Second Original Assessment Sheet gives a comparison. The somatics and pains not mentioned in the second assessment can be considered to be gone.

A second form done gives the auditor and the C/S an indication of the actual improvement.

Additionally, the pc's memory will have improved if you've done a good job of auditing.

So we reassess the Original Assessment Sheet and handle any additional items which come up.

In assessing this list the second time, mark **SECOND ORIGINAL ASSESSMENT** across the top of the sheet.

It is important to give your pc an R-Factor at this stage so he'll not feel invalidated by doing this form again.

Let him know that you will be asking him questions from the Original Assessment Sheet for the purpose of picking up any new items which he may now remember and to make sure you've handled all the charge on the items you have already taken up. Ask him to answer each question as fully as he can even if he has already given the information in a previous session.

Handle the items on the Second Original Assessment according to the directions for handling the Original Assessment Sheet, HCOB 24 June 1978R New Era Dianetics Series 5R, THE ORIGINAL ASSESSMENT SHEET.

POSTULATES AND ENGRAMS

**DIANETIC F/Ns**

An F/N seen by the auditor in running R3RA is NOT called. It simply means that the pc is running well.

An auditor running R3RA is NOT looking for F/Ns. He is looking for total, complete erasure of the basic of a chain.

In running R3RA one has to CONSULT THE PC! This is part of R3RA commands.

An F/N can occur five or more engrams *before* basic is reached! You just go on with R3RA. Only when the pc says the engram has totally erased, when he has cognited, is VGIs and the postulate in the basic has come off do you consider the chain complete.

The E-Meter will have been F/Ning for some time.

When the full end phenomena of a Dianetic chain is obtained, the needle will of course be F/Ning. The F/N simply broadens.

The auditor does not call F/Ns when running Dianetics until the fu/l EP of the chain is reached.

- 1) When it appears that you have reached the basic incident of the chain and that it is erasing, after each pass through the auditor asks, "Has it erased?"
- 2) The meter will have been F/Ning for some time.
- 3) When the pc has stated that it has erased the auditor should also expect a cognition volunteered by the pc.
- 4) The auditor should expect to see very good indicators (VGIs).
- 5) If no postulate made during the time of the incident has come off and been volunteered by the pc the auditor should ask, "Did you make a postulate at the time of that incident?" Note that the postulate may have come off in the form of a cognition and on the other hand may not have even though a cognition was given.

Only when these latter steps have occurred can one consider that the EP of a Dianetic incident or chain has been obtained.

**POWER F/Ns**

F/Ns are disregarded in Power.

Each Power Process has its own end phenomena and is ended only when that is obtained.

Auditors	71R. Rev 18.6.74. Auditing CS-1 for Dianetics
C/Ses	and Scientology and BTB 28 April 74R. Dia
Supers	netics, Clearing Lists and R3R)

### DIANETIC CS-1

The Dianetic CS-1 is for new, unaudited pcs or for old pcs who have misunderstands, who try to be psychoanalytic cases or who don't catch on.

The Dianetic CS-1 is done on the pc's auditing time.

It is done to give the pc the necessary data and R-Factor on basics and Dianetic procedure so he fully understands and is able and willing to be audited successfully.

The auditor should know his materials very well and should have a Tech Dictionary, his HCOB pack, a regular but simple dictionary in the language being audited, ready in the CS-I session for reference and for clearing up any misunderstands or questions the pc may have.

A) To clear the various Dianetic terms, use the Definitions Sheet attached to this issue (Attachment No. 1), where the definitions have been taken from the glossary at the back of the book *Dianetics Today* and from the Tech Dictionary.

Also make full use of the Tech Dictionary, *Dianetics Picture Book*, plus BTB 11 Dec 69R "Dianetic Illustrations" and other references listed at the end of this issue.

If further references are needed, ensure you use source materials.

B) When the pc has read and grasped the definition of a Dianetic term have him give you the definition in his own words and if necessary have him give you sentences using it correctly. Have him give you examples—"real life" examples where possible, using his experiences or those of friends or relatives. Have him demonstrate the word or item, using a demo kit.

C) Lists of the words used in R3RA commands, the preassessment, the L3RE, etc. are also included at the end of this issue (Attachment No. 2).

To clear these words, use the CS-1 Definitions Sheet attached as it applies or a good (not dinky) dictionary, such as one of the Thorndike Barnhart editions.

D) Check for any questions (or misunderstands) as you go along and ensure any such get handled so the pc winds up with a clear understanding of the word, item or procedure.

Do not settle for glibness that does not show understanding but, on the other hand, do not overrun or put duress on the pc.

Ensure that each word cleared on the pc is taken to F/N.

## DIANETIC CS- 1 PROCEDURE:

1. Clear the word: Dianetics.
2. Clear the words: a) thetan b) mind c) body. Have the pc use the demo kit to ensure the pc gets the relationship between these (as well as using the above references).
3. Now clear the words: a) picture b) mental image picture c) reactive mind d) bank. Ensure you include pc doing a demo to show that the reactive mind or bank is made up of pictures.
4. Clear the words: a) auditing b) auditing session c) preclear d) auditor.
5. Clear with the pc:
  - a) the communication cycle. Get the pc to give you examples he has observed.
  - b) the auditing comm cycle.  
Get the pc to explain the difference between a comm cycle and the auditing comm cycle. Have him demonstrate it.  
  
You can also ask him questions like: "Have you eaten dinner?" (or breakfast or lunch) and when he replies, ask "What did you do when I asked you that question?"
6. Work with TRs on the pc until he has a good idea of auditing.
7. Clear the words: a) charge b) mental mass.
8. Go over with the pc what the meter does (registers interest and charge/mental mass) .  
  
For demonstrations, you can do a "pinch test" where you explain to the pc that to show him how the meter registers mental mass you will give him a pinch as part of the demonstration. Then get him to think of the pinch (while he is holding the cans) showing him the meter reaction and explaining how it registers mental mass.
9. Define: floating needle.  
  
In Dianetics the auditor will only indicate the F/N when full end phenomena has been reached.
10. Define: a) lock b) secondary c) engram.  
  
Ensure pc understands each and how these three differ.  
  
Use the *Dianetics Picture Book*, HCOB 23 Apr 69R "Dianetics Basic Definitions" and BTB 11 Dec 69R, "Dianetic Illustrations." Get examples. Use demo kit as necessary.
11. Define: incident.  
  
Have the pc give you examples.
12. Define: duration.  
  
Have the pc demonstrate duration, using a demo kit.
13. Define: chain. Use examples. Get the pc to demonstrate a chain, using a demo kit.

14. Define: erasure.

For demonstration, have the pc draw something on a piece of paper and then have him fully erase it with an eraser.

15. Define: postulate.

Have the pc give you some examples of a postulate. Then have him give you an example of at least one time when he postulated something and got it.

16. Define: cognition.

Have the pc give you some examples of a cognition.

17. a) Clear the word: flow. b) Clear each of the Flows 1, 2, 3, 0. c) Have the pc give examples and demonstrations of each.

18. Take up Routine 3RA.

- a) Clear each word of each command of the R3RA procedure. (See attached Word List.)

- b) Ensure the pc understands:

(1) “erasing.” For demonstration, have the pc draw something with pencil on a piece of paper. Then have him erase *parts of it* (not the whole).

(2) “going more solid.” For demonstration, have the pc draw something with pencil on a piece of paper. Then have him make what he has drawn *more solid*. again using the pencil to do so.

When the above demonstrations have been done, you can also get the pc to demonstrate “erasing” and “going more solid” for you with a demo kit.

- c) Tell the preclear that you and he will do a demonstration so he will get a reality on how the Dianetic R3RA procedure works in auditing.

- d) Have the preclear put the cans down and pinch his right arm. Then tell the preclear “Locate a time you had a pinching feeling in your right arm.” Continue with steps 2 through 9, A to F of R3RA, erasing/solid and earlier incidents, etc., clearing each step.

- e) After each step of R3RA ask the preclear “What did you do?” so that he gets the idea of how R3RA is run. Don’t overdo this but ensure the preclear understands what is required of him at each step.

19. Clear briefly with the pc the fact you will be getting data from him on his background on the Original Assessment Sheet, and later on the Second Original Assessment Sheet.

(Do NOT ask the preclear questions from this or any other sheet or list.)

20. a) Give him a brief R-Factor on doing the preassessment. Let him know he will be giving you items for the preassessment, but do NOT get into ANY listing at this point.

- b) Clear the Preassessment List words. (See Attachment No. 2.)

21. a) Give pc the R-Factor that if at any time there is any difficulty in the Dianetic auditing, you will be using a *prepared* assessment list (L3RE) to find and handle the exact difficulty.

- b) Ensure he understands that when you are assessing a prepared list he sits quietly holding the cans while you call the list and take meter reads to locate the difficulty.
  - c) Clear each word on the attached L3RE Word List. (Attachment No. 2.)
22. a) Give the pc an R-Factor on the Examiner and the fact that he will go to the Examiner immediately after each auditing session. Ensure he understands the Examiner says nothing to the preclear at that time, only recording what the pc says and noting down the tone arm position and state of the needle.

Ensure he also understands the Examiner is the person he sees if he wishes to make any sort of statement regarding his case or if there is something he wants handled regarding his case.

- b) Clear: Examiner.
23. Turn the folder in to the C/S.

This CS-1 can usually be completed in one session. If it is done in more than one, the session should be ended off at the end of a step or completion of a word or demonstration—never in the middle.

Make sure you do not leave your preclear with a misunderstood or confusion.

This CS-1 will result in huge wins for any preclear whether new or previously audited.

The following are SOME of the references the auditor should be very familiar with:

*Dianetics: The Modern Science of Mental Health* (Book)

*Scientology Picture Book* (Book)

## DIANETIC CS-1 DEFINITIONS SHEET

The following definitions have been taken from the glossary of the book *DIANETICS TODAY* and from the Technical Dictionary.

DIANETICS:	Man's most advanced school of the mind. From the Greek <i>dia</i> , through, and <i>noos</i> , <i>soul</i> , thus "through soul" or "through thought."
THETAN:	From THETA (life static), a word taken from the Greek symbol or letter: theta, traditional symbol for thought or spirit. The thetan is the individual himself—not the body or the mind. The thetan is the "T"; one doesn't have or own a thetan; one is a thetan.
MIND:	A control system between the thetan and the physical universe. It is <i>not</i> the brain. The mind is the accumulated recordings of thoughts, conclusions, decisions, observations and perceptions of a thetan throughout his entire existence. The thetan can and does use the mind in handling life and the physical universe.
BODY:	The organized physical composition or substance of an animal or man whether living or dead. It can also mean a grouping or gathering, or any whole of anything.
PICTURE:	An exact likeness; image. A mental image.
MENTAL IMAGE PICTURES:	Mental pictures, facsimiles and mock-ups; a copy of one's perceptions of the physical universe sometime in the past.
REACTIVE MIND:	Reactive bank. The portion of the mind which works on a stimulus-response basis (given a certain stimulus it will automatically give a certain response) which is not under a person's volitional control and which exerts force and power over a person's awareness, purposes, thoughts, body and actions. It consists of locks, secondaries, engrams and chains of them and is the single source of human aberration and psychosomatic ills.
BANK:	Reactive bank; reactive mind; engram bank. The mental image picture collection of the preclear. It comes from computer technology where all data is in a "bank"; portion of the mind which contains engrams, secondaries and locks.
AUDITING:	Processing, the application of Dianetic or Scientology processes and procedures to someone by a trained auditor. The exact definition of auditing is: the action of asking a preclear a question (which he can understand and answer), getting an answer to that question and acknowledging him for that answer.
AUDITING SESSION:	<ol style="list-style-type: none"><li>1. a precise period of time during which the auditor listens to the preclear's ideas about himself.</li><li>2. a period in which an auditor and preclear are in a quiet place where they will not be disturbed. The auditor gives the preclear certain and exact commands which the preclear can follow.</li></ol>

PRECLEAR:	From pre-Clear, a person not yet Clear; generally a person being audited, who is thus on the road to Clear; a person who, through Dianetic and Scientology processing, is finding out more about himself and life.
AUDITOR:	A person trained and qualified in applying Dianetics and/or Scientology processes and procedures to individuals for their betterment; called an auditor because auditor means "one who listens." An auditor is a minister of the Church of Scientology.
COMMUNICATION CYCLE:	A completed communication, including origination of the communication, receipt of the communication, and answer or acknowledgement of the communication. A communication cycle consists of just: cause, distance, effect, with intention, attention, duplication and understanding.
AUDITING COMM CYCLE:	This is the auditing comm cycle that is <i>always</i> in use: <ol style="list-style-type: none"> <li>1) is the pc ready to receive the command? (appearance/presence),</li> <li>2) auditor gives command/question to pc (cause, distance, effect),</li> <li>3) pc looks to bank for answer,</li> <li>4) pc receives answer from bank,</li> <li>5) pc gives answer to auditor (cause, distance, effect),</li> <li>6) auditor acknowledges pc,</li> <li>7) auditor sees that pc received acknowledgement (attention),</li> <li>8) new cycle beginning with (1).</li> </ol>
CHARGE:	The stored quantities of energy in the time track; stored energy or stored or recreatable potentials of energy. The electrical impulse on the case that activates the meter. Harmful energy or force accumulated and generated in the reactive mind, resulting from the conflicts and unpleasant experiences that a person has had.
MENTAL MASS:	Mocking up matter, energy, space and time. Its proportionate weight would be terribly slight compared to the real object which the person is mocking up a picture of.
FLOATING NEEDLE:	A floating needle is a rhythmic sweep of the dial at a slow, even pace of the needle. It can occur after a cognition, blowdown of the tone arm, or just moves into floating. The pc may or may not voice the cognition. In Dianetics the auditor will only indicate the F/N when full end phenomena of the process has been reached.
MENTAL IMAGE	(Already defined earlier) PICTURE:
LOCK:	A mental image picture of an incident where one was knowingly or unknowingly reminded of a secondary or engram. It does not itself contain a blow or burn or impact and is not any major cause of misemotion. It does not contain unconsciousness. It may contain a feeling of pain or illness, etc., but is not itself the source of it.
SECONDARY:	A secondary is a mental image picture of a moment of severe and shocking loss or threat of loss which contains misemotion such as anger, fear, grief, apathy or "deathfulness." It is a mental image picture recording of a time of severe mental stress. It may contain unconsciousness.

ENGRAM:	A mental image picture of an experience containing pain, unconsciousness, and a real or fancied threat to survival. It is a recording in the reactive mind of something which actually happened to an individual in the past and which contained pain and unconsciousness, both of which are recorded in the mental image picture called an engram. It must, by definition, have impact or injury as part of its content. These engrams are a complete recording, down to the last accurate detail, of every perception present in a moment of partial or full unconsciousness.
INCIDENT:	The recording of an experience, simple or complex, related by the same subject, location or people, understood to take place in a short or finite time period such as minutes or hours or days.
DURATION:	Length of time; time during which anything continues. (Thorn dike Barnhart Dictionary)
CHAIN:	A series of incidents of similar nature or similar subject matter. . . . A series of recordings of similar experiences. A chain has engrams, secondaries and locks. Example—Head injury chain in the sequence encountered by an auditor and run by R3RA—sporting goods display window seeing it (lock), losing a bat (secondary), hit in the head with a bat (engram). The engram is the earliest date, the secondary a later date, the lock the most recent.
ERASURE:	<ol style="list-style-type: none"> <li>1. The action of erasing, (rubbing out) locks, secondaries or engrams.</li> <li>2. Apparent removal of the engram from the files of the engram bank and refile in the standard bank as memory.</li> </ol>
POSTULATE:	<p>A conclusion, decision or resolution made by the individual himself; to conclude, decide or resolve a problem or to set a pattern for the future or to nullify a pattern of the past.</p> <p>. . . We mean, by postulate, self-created truth. A postulate is, of course, that thing which is a directed desire or order, or inhibition, or enforcement, on the part of the individual in the form of an idea.</p> <p>. . . Postulate means to cause a thinkingness or consideration.</p>
COGNITION:	A pc origination indicating he has “come to realize.” It’s a “What do you know? I....” statement. A new realization of life. It results in a higher degree of awareness and consequently a greater ability to succeed with one’s endeavors in life.
FLOW:	<p>An impulse or direction of energy particles or thought or masses between terminals.</p> <p>The progress of particles or impulses or waves from point A to point B.</p> <p>A progress of energy between two points.</p>
SOLID:	When the meter needle is not floating the TA is registering mass, mental mass. When you see a TA going up, up, up you know the picture isn’t erasing but is getting more solid. Strongly put together; hard; firm.

AFFINITY:	Degree of liking or affection or lack of it. Affinity is a tolerance of distance. A great affinity would be a tolerance of or liking of close proximity. A lack of affinity would be an intolerance of or dislike of close proximity. Affinity is one of the components of understanding; the other components being reality and communication.
REALITY:	The agreed upon apparency of existence. A reality is an data that agrees with the person's perceptions, computations and education. Reality is one of the components of understanding. Reality is what <i>is</i> .
COMMUNICATION:	The interchange of ideas or objects between two people or terminals. More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication of that which emanated from the source point. The formula of communication is: cause, distance, effect, with attention and duplication. Communication by definition does not need to be two-way. Communication is one of the component parts of understanding.
ARC BREAK:	A sudden drop or cutting of one's affinity, reality or communication with someone or something. It is pronounced by its letters A-R-C break.
PROBLEM:	Anything which has opposing sides of equal force; especially postulate-counter-postulate, intention-counter-intention or idea counter-idea; an intention-counter-intention that worries the preclear.
PRESENT TIME PROBLEM:	A specific problem that exists in the physical universe <i>now</i> , on which a person has his attention fixed.  ... Any set of circumstances that so engages the attention of the preclear that he feels he should be doing something about it instead of being audited.
WITHHOLD:	An undisclosed harmful (contra-survival) act.
MISSED WITHHOLD:	An undisclosed contra-survival act which has been restimulated by another but not disclosed. This is a withhold which another person nearly found out about, leaving the person with the withhold in a state of wondering whether his hidden deed is known or not.
EXAMINER:	Preclear Examiner. The person in a Scientology church to whom preclears are sent immediately after any auditing session. The Examiner says nothing to the preclear in this situation, noting only what the pc's tone arm position and state of the needle are on the E-Meter and recording what the pc says, if anything. The Examiner is also the person a preclear sees if he wishes to make any sort of statement regarding his case, or if there is something he wants handled regarding his case.

## DIANETIC CS-1 WORD LIST

### R3RA COMMAND WORD LIST:

a	it	tell
an	later	that
and	locate	the
another	lose	there
are	lost	this
be	me	through
beginning	more	time
caused	move	to
causing	of	was
do	one	we
does	or	what
duration	others	when
earlier	point	you
end	return	your
erasing	running	yourself
go	see	
going	seem	
had	similar	
happened	solid	
incident	start	
is	starting	

### PREASSESSMENT WORD LIST:

aches	emotions	pressures
are	fears	sensations
attitudes	feelings	soreness
compulsions	is	tiredness
connected	misemotions	unconsciousness
discomforts	<i>numbness</i>	what
dislikes	pains	with

### RUDIMENTS WORD LIST:

a	are	do
about	been	earlier
affinity	communication	enforced
an	curious	has
ARC break	desired	have
inhibited	problem	that
missed	present time problem	understanding
missed withhold	refused	withhold
no	reality	withholding
overt	similar	you

L3RE WORD LIST:

abandoned	<i>get</i>	problem
<i>alcohol</i>	<i>giving</i>	protesting
accept	gone	real
all	<i>goof</i>	really
ARC break	got	reason
<i>assessed</i>	have	refused
<i>attain</i>	<i>heavily</i>	<i>resent</i>
audited	<i>held</i>	<i>(not recent)</i>
auditor	<i>held up</i>	restimulated
basic	implant	run
<i>because</i>	incident	<i>say</i>
black	incorrect	<i>said</i>
chain	indicated	same
chains	<i>interest</i>	saying
changed	<i>interrupted</i>	<i>sequence</i>
changing	Int RD	should
charge	invalidated	<i>simply</i>
<i>charged</i>	invisible	<i>skipped</i>
<i>C/ear</i>	item	<i>some</i>
<i>cognition</i>	<i>jump</i>	something
command	jumped	soon
commands	<i>just</i>	<i>state</i>
<i>completed</i>	late	<i>stop</i>
confused	<i>left</i>	<i>still</i>
constantly	<i>/et</i>	stopped
could	mass	stuck
date	medicine	suppressed
death	messed	<i>than</i>
<i>declare</i>	misrun	thing
demanded	missed	<i>tired</i>
Dianetic	misunderstood	<i>time</i>
<i>did</i>	<i>misworded</i>	too
didn't	no	trouble
<i>different</i>	<i>nobody</i>	twice
distracted	not	two
drugs	<i>nothing</i>	<i>unnecessary</i>
else	on	up
engrams	<i>originally</i>	upset
<i>erased</i>	over	went
<i>expressed</i>	past	<i>were</i>
exterior	persistent	<i>while</i>
false	picture	with
first	pictures	withhold
<i>Flows</i>	<i>postulate</i>	<i>wording</i>
flubbed	place	<i>would</i>
F/N	pressure	wrong
found	prevented	

HUBBARD COMMUNICATIONS OFFICE  
 Saint Hill Manor, East Grinstead, Sussex

HCO BULLETIN OF 11 JULY 1978  
 REISSUED 11 OCTOBER 1978

Remimeo

*New Era Dianetics Series 4-1*

**THE PREASSESSMENT LIST**

This Preassessment List will get you running items, if the pc has given you a general somatic item, a drug item, alcohol item, etc.

To be used as described in HCOB 18 June 1978, New Era Dianetics Series 4 ASSESSMENT AND HOW TO GET THE ITEM.

Pc Name \_\_\_\_\_ Date \_\_\_\_\_

Auditor Name \_\_\_\_\_

Name of New Era Dianetics Rundown being done \_\_\_\_\_

Original item being preassessed \_\_\_\_\_

Assess the list below, using each preassessment item.

“Are \_\_\_\_\_ connected with (original item)?”

	1	2	3	4	5	6
<b>Pains</b>						
<b>Sensations</b>						
<b>Feelings</b>						
<b>Emotions</b>						
<b>Attitudes</b>						
<b>Misemotions</b>						
<b>Unconsciousnesses</b>						
<b>Sorenesses</b>						
<b>Compulsions</b>						
<b>Fears</b>						
<b>Aches</b>						
<b>Tirednesses</b>						
<b>Pressures</b>						
<b>Discomforts</b>						
<b>Dislikes</b>						

Take the largest reading preassessment item and ask pc: “What (largest reading preassessment item) are connected with (original item)?”

Do the preassessment on this sheet.

List the question and the pays answers on a *separate* sheet and note reads of each including F/Ns.

(See BTB 7 Nov 72R Issue IV Auditor Admin Series 19R, DIANETIC ASSESSMENT LISTS.)

(Revisions not in Script)

**TYPICAL DIANETIC CHAIN**

Original item: "Bronchitis"

Preassessment item: "Misemotion"

Running item: "Horrible feeling in my lungs"

<b>Incident</b>	<b>Date of Incident</b>	<b>Duration of Incident</b>	<b>TA Position</b>
<u>1st Incident</u> run 2 times through	1 Mar 1970	<u>2 Hours</u>	3.3 at Step 1 3.2 at Step 9 3.5 at Step C
<u>2nd Incident</u> run 3 times through (due to there being an EB)	2 Jul 1963	7 <u>Minutes</u> EB-----	3.4 at Step 9 3.4 at Step C (Earl. Begin.) 3.5 at Step F
<u>3rd Incident</u> run 1 time through	3 Aug 1960	-----5 Hours-----	3.6 at Step 9
<u>4th Incident</u> run 2 times through	1 Dec 1951	1 1/2 <u>Hours</u>	3.5 at Step 9 3.6 at Step C
<u>5th Incident</u> run 1 time through	16 Feb 1921	2 1/2 <u>Hours</u>	3.7 at Step 9
<u>6th Incident</u> run 2 times through	2 Feb 1898	<u>2 Hours</u>	3.2 at Step 9 3.4 at Step C
<u>7th Incident</u> run 8 times through (BASIC)	22 May 1882	1 <u>Hour</u> EB----- EB-----	3.3 at Step 9 3.2 at Step C 3.0 at Step F 2.8 at Step F (Earl. Begin.) 2.8 at Step F 2.9 at Step F (Earl. Begin.) 2.6 at Step F BD & F/N Pc gives Postulate Wide F/N & VGIs EP of chain.

The three remaining flows are each run as above to their basics. Then do further preassessment per R3RA. Twenty-five more running item Quad chains to go. (100 in all). Meaning 100 more chains, each one of which reaches a BASIC and each one of which has an EP of F/N, POSTULATE, VGIs, accompanied by an erasure.

HCO BULLETIN OF 15 JULY 1978

Remimeo

(Cancels BTB 8 Jan 71R, Auditing CS-1  
for Dianetics and Scientology)

**SCIENTOLOGY  
AUDITING CS-1**

The Scientology CS-1 is to give a pc new to Scientology or a previously audited pc, as needed, the necessary data and R-Factor on basics and auditing procedure so that he understands and is able and willing to be audited successfully.

NOTE: Some pcs who have been trained or audited previously may protest that they know the terms and procedure. If this happens, acknowledge with excellent TRs and without invalidation or evaluation and tell them that this CS is intended to make auditing more effective for all pcs. If the auditor uses excellent TRs and good R-Factor, no ARC breaks should ever occur and the pc will have tremendous wins.

It is not necessary to reclear those sections of this Scn CS-1 which the pc may have already covered in a recent and thorough Dianetics CS-1, *provided* the auditor is *certain* of the pc's understanding of the terms.

The auditor should be fully familiar with this issue as well as:

HCOB 17 Oct 64 III	ALL LEVELS GETTING THE PC SESSIONABLE
HCOB 5 Apr 69	NEW PRECLEARS, THE WORKABILITY OF SCIENTOLOGY
HCOB 16 Jun 70	C/S Series 6 WHAT THE C/S IS DOING

He will need to take a very thorough look at what has to be covered with the pc in this CS-1 and *know* his materials very well and have them ready in the CS-1 session for reference and clearing any misunderstandings or questions the pc may have.

The following will be needed in the auditing room:

Technical Dictionary  
Admin Dictionary

A good English dictionary

A good dictionary in the pc's native language, and for a foreign language case a dual dictionary (English-to-foreign language and foreign language itself).

Scn CS-1 Definitions Sheet—Attachment No. 1 of this issue.

*The Basic Scientology Picture Book*  
*Fundamentals of Thought*

HCOB 14 Oct 68R, The Auditor's Code

Demo Kit

and the auditor makes full use of these as necessary. If further references are needed, ensure source materials are used.

- A. Have the pc define each Scientology (or other) term, using the references. (Note: *You don't* ask: "Do you know what this word means?" You ask: "What is the definition of \_\_\_\_\_?")

When he has done so, have him give you a sentence or two using the term correctly. Where it applies, have him give you examples, using his experiences where possible or those of relatives or friends and/or have him demonstrate the item using a demo kit. Cover by exact definition all terms used.

- B. Check for any questions (or misunderstandings) as you go along and ensure any such get handled so the pc winds up with a clear understanding of the word, item or procedure.

Don't settle for glibness that does not show understanding, but, on the other hand, don't overrun or put duress on the pc either.

Ensure that each word cleared on the pc is taken to F/N.

#### SCN CS-1 PROCEDURE:

1. Give pc the R-Factor that you are going to do a Scientology Auditing CS-1 to familiarize him with auditing procedure and any basic data that may require clarification.
2. Clear the word: Scientology.
3. Clear the words:

a) auditing	d) Clear
b) auditing session	e) preclear
c) auditor	
4. Clear the words:

a) thetan
b) mind
c) body

Have pc use the demo kit as well as the references to ensure he gets the relationship between these.

5. Now clear the words:

a) picture	c) reactive mind
b) mental image	d) bank picture

Have the pc give you examples of how the reactive mind works on a stimulus response basis, and have him demo it.

6. Clear with the pc:
  - a) the communication cycle.

Get the pc to give you examples he has observed. Have him demo the communication cycle.

- b) the auditing comm cycle.

Get the pc to explain the difference between a comm cycle and the auditing comm cycle. Have him demonstrate it.

You can also ask him questions like: "Have you eaten dinner?" (or breakfast or lunch) and when he replies, ask: "What did you do when I asked you that question?"

7. Go over the TRs with the pc, demonstrating each with him, until he has a good idea of how they are used in auditing.
8. Clear the words:

a) charge	b) mental mass
-----------	----------------
9. Go over with the pc what the meter does (registers charge/mental mass).

For demonstration, you can do a "pinch test" where you explain to the pc that to show him how the meter registers mental mass you will give him a pinch as part of the demonstration. Then get him to think of the pinch (while he is holding the cans) showing him the meter reaction and explaining how it registers mental mass.

10. a) Clear the words:
  1. key-in
  2. key-out

and have the pc demo and give you examples of each.

- b) Clear the word: release. Have the pc demo it.

11. a) Clear the word: postulate.
- b) Have pc give you examples of a time or two when he postulated something and got it.
12. a) Clear the word: cognition.
- b) Have the pc give you some examples of a cognition.
13. Clear: floating needle.
14. a) Give the pc an R-Factor on rudiments and when these would be used.
- b) Clear the word: rudiment.
- c) Clear: 1. affinity  
2. reality  
3. communication

Have pc give you examples of each.

- d) Clear: ARC break.

Have the pc demo it for you.

- e) Clear the words: curious, desired, enforced, inhibited, no, refused.

- f) Clear: 1. problem  
2. present time problem

Have the pc demo: 1) a problem 2) a present time problem.

- g) Clear: 1) overt 2) withhold 3) missed withhold.

Have the pc demo: 1) an overt 2) withhold 3) missed withhold.

(Use Definitions Sheet, or other references as needed.)

15. a) Clear the words: 1. similar 2. earlier.
- b) Then clear: "earlier similar." Give the pc examples of where it would be used.
16. Clear with the pc what a repetitive process is. Ensure he understands why and how it is done. Have the pc demo it for you.
17. a) Clear the word: flow.
- b) Clear each of the Flows 1, 2, 3, 0.
- c) Have the pc give you an example and demo of each.
18. Clear the words: a) assess b) assessment.
19. a) Explain to the pc that if at any time there is any difficulty in the auditing, you (or another auditor) will be using a prepared list to find and handle the exact difficulty.
- b) Ensure he understands that when such a list is being assessed he sits quietly holding the cans while the auditor calls the list and takes meter reads to locate the difficulty.
20. Go over the Auditor's Code, Items 1, 2, 3, 4, 5, 6, 8, 9, 14, 17, 18, 19 and 22.  
Check for and clear up any questions or misunderstands the pc may have on this.
21. a) Clear: Examiner.

- b) Give the pc an R-Factor on the Examiner and the fact that he will go to the Examiner immediately after each auditing session. Ensure he understands the Examiner says nothing to the preclear at that time, only recording what the pc says and noting down the tone arm position and state of the needle.

Also, be sure the pc understands that the Examiner is the person he sees if he wishes to make any sort of statement regarding his case.

22. Turn the folder in to the C/S.

The C/S can also order any additional actions to the above.

The Scientology Auditing CS-1 can usually be completed in one session. If it takes more than one session, the first session should be ended off at the end of a step or completion of a word or demonstration—never in the middle of an action.

Make sure you do not leave your preclear with a question or a misunderstood or confusion. Know the preclear in front of you and get your product of an educated pc who can run Scientology processes easily and with gain.

### CLEARING COMMANDS

The Scientology Auditing CS-1 does not preclude clearing the commands of each process or clearing a procedure in a session where the pc is begun on a new process or procedure. (Ref: HCOB 9 Aug 78 II, CLEARING COMMANDS)

This would include the first time the pc is given a two-way comm session or a listing & nulling session, where the procedure would first be fully cleared on the pc by the auditor.

### CLEARING WORDS ON CORRECTION LISTS

In addition to the CS-1, to fully prepare the pc for his auditing up the Grade Chart, it is standard to clear the words on the various correction lists very early in auditing, before the need for them arises. (Otherwise, it is difficult to clear the words of a correction list over heavy bypassed charge.) Thus, when the need for correction lists does arise the words have already been cleared and the correction list can be used without delay. (Ref: HCOB 9 Aug 78 II, CLEARING COMMANDS, Items 7 and 8.)

This would be done as ordered by the C/S.

## SCIENTOLOGY CS-1 DEFINITIONS SHEET

The following definitions have been taken from the Technical Dictionary and from the glossary of the book *Dianetics Today*.

Use these in conjunction with the *Basic Scientology Picture Book*. If further references are needed when clearing these terms and concepts, ensure source materials are used. For any non-Scientology terms use a good non-dinky dictionary.

### SCIENTOLOGY:

An applied religious philosophy developed by L. Ron Hubbard dealing with the study of knowledge, which through the application of its technology can bring about desirable changes in the conditions of life.

(Taken from the Latin word *scio*, knowing in the fullest sense of the word, and the Greek word *logos*, to study.)

A body of knowledge which, when properly used, gives freedom and truth to the individual.

### AUDITING:

Processing, the application of Scientology (or Dianetic) processes and procedures to someone by a trained auditor. The exact definition of auditing is: the action of asking a preclear a question (which he can understand and answer), getting an answer to that question and acknowledging him for that answer.

### AUDITING SESSION:

A period in which an auditor and preclear are in a quiet place where they will not be disturbed. The auditor gives the preclear certain and exact commands which the preclear can follow.

### AUDITOR:

A person trained and qualified in applying Scientology and/or Dianetic processes and procedures to individuals for their betterment; called an auditor because auditor means "one who listens." An auditor is a minister of the Church of Scientology.

### \*CLEAR:

A thetan who can be at cause knowingly and at will over mental matter, energy, space and time as regards the first dynamic (survival for self). The state of Clear is above the release grades of Scientology (all of which are requisite to clearing) and is attained by completion of the Clearing Course at an Advanced Church of Scientology.

### PRECLEAR:

From pre-Clear, a person not yet Clear; generally a person being audited, who is thus on the road to Clear; a person who, through Scientology and Dianetic processing, is finding out more about himself and life.

\* [An additional reference on Clear is: HCOB 24 September 1978. Issue III, *Dianetic Clear*, "The State of Clear can be achieved on Dianetics."]

## THETAN:

From THETA (life static), a word taken from the Greek symbol or letter: theta, traditional symbol for thought or spirit. The thetan is the individual himself—not the body or the mind. The thetan is the “I”; one doesn’t have or own a thetan; one is a thetan.

## MIND:

A control system between the thetan and the physical universe. It is *not* the brain. The mind is the accumulated recordings of thoughts, conclusions, decisions, observations and perceptions of a thetan throughout his entire existence. The thetan can and does use the mind in handling life and the physical universe.

## BODY:

The organized physical composition or substance of an animal or man whether living or dead.

## PICTURE:

An exact likeness; image. A mental image.

## MENTAL IMAGE PICTURE:

Mental pictures; facsimiles and mock-ups; a copy of one’s perceptions of the physical universe sometime in the past.

## REACTIVE MIND:

Reactive bank. The portion of the mind which works on a stimulus-response basis (given a certain stimulus it will automatically give a certain response) which is not under a person’s volitional control and which exerts force and power over a person’s awareness, purposes, thoughts, body and actions.

The reactive mind never stops operating. Pictures of the environment, of a very low order, are taken by this mind even in some states of unconsciousness.

## BANK:

A colloquial name for the reactive mind. The mental image picture collection of the pc.

## COMMUNICATION CYCLE:

A completed communication, including origination of the communication, receipt of the communication, and answer or acknowledgement of the communication. A communication cycle consists of just: cause, distance, effect, with intention, attention, duplication and understanding.

## AUDITING COMM CYCLE:

(HCOB 30 Apr 71) This is the auditing comm cycle that is *always* in use:

- (1) is the pc ready to receive the command? (appearance, presence)
- (2) auditor gives command/question to pc (cause, distance, effect)
- (3) pc looks to bank for answer . . .
- (4) pc receives answer from bank

- (5) pc gives answer to auditor (cause, distance, effect)
- (6) auditor acknowledges pc
- (7) auditor sees that pc received acknowledgement (attention)
- (8) new cycle beginning with (1).

#### CHARGE:

The stored quantities of energy in the time track; stored energy or stored or recreatable potentials of energy. The electrical impulse on the case that activates the meter. Harmful energy or force accumulated and generated in the reactive mind, resulting from the conflicts and unpleasant experiences that a person has had.

#### MENTAL MASS:

Mocking up matter, energy, space and time. Its proportionate weight would be terribly slight compared to the real object which the person is mocking up a picture of.

#### KEY-IN:

The action of recording a lock on a secondary or engram; the moment an earlier upset or earlier incident has been restimulated.

#### KEY-OUT:

An action of an engram or secondary dropping away without being erased. Released or separate from one's reactive mind or some portion of it.

#### RELEASE:

A preclear whose reactive mind or some major portion of it is keyed-out and is not influencing him.

A series of gradual key-outs. At any given one of those key-outs the individual detaches from the remainder of his reactive bank.

In Scientology processing there are eight major grades of Release. They are, from the lowest to the highest: Grade 0 Communications Release, Grade I Problems Release, Grade II Relief Release, Grade III Freedom Release, Grade IV Ability Release, Grade V Power Release, Grade VA Power Plus Release, Grade VI Whole Track Release. Each is a distinct and definite step toward greater levels of awareness and ability.

#### POSTULATE:

A conclusion, decision or resolution made by the individual himself; to conclude, decide or resolve a problem or to set a pattern for the future or to nullify a pattern of the past.

. . . We mean, by postulate, a self-created truth. A postulate is, of course, that thing which is directed desire or order, or inhibition, or enforcement, on the part of the individual in the form of an idea.

. . . Postulate means to cause a thinkingness or consideration.

#### COGNITION:

A pc origination indicating he has “come to realize.” It’s a “What do you know? I . . .” statement. A new realization of life. It results in a higher degree of awareness and consequently a greater ability to succeed with one’s endeavors in life.

#### FLOATING NEEDLE:

A floating needle is a rhythmic sweep of the dial at a slow, even pace of the needle.

It is always accompanied by very good indicators in the pc. (Ref: HCOB 10 Dec 76R, C/S Series 99R SCN F/N AND TA POSITION, HCOB 21 Jul 78 WHAT IS AN F/N.)

#### RUDIMENTS:

First principles, steps, stages or conditions. The basic actions done at the beginning of a session to set up the pc for the major session action; ARC breaks, PTPs, withholds.

#### AFFINITY:

Degree of liking or affection or lack of it. Affinity is a tolerance of distance. A great affinity would be a tolerance of or liking of close proximity. A lack of affinity would be an intolerance of or dislike of close proximity. Affinity is one of the components of understanding, the other components being reality and communication.

#### REALITY:

The agreed upon apparency of existence. A reality is any data that agrees with the person’s perceptions, computations and education. Reality is one of the components of understanding. Reality is what is.

#### COMMUNICATION:

The interchange of ideas or objects between two people or terminals. More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication of that which emanated from the source point. The formula of communication is: cause, distance, effect, with attention and duplication. Communication by definition does not need to be two-way. Communication is one of the component parts of understanding.

#### ARC BREAK:

A sudden drop or cutting of one’s affinity, reality or communication with someone or something. It is pronounced by its letters *A-R-C break*.

#### PROBLEM:

Anything which has opposing sides of equal force; especially postulate-counter-postulate, intention-counter-intention or idea-counter-idea; an intention-counter-intention that worries the preclear.

#### PRESENT TIME PROBLEM:

A specific problem that exists in the physical universe *now*, on which a person has his attention fixed.

. . . Any set of circumstances that so engages the attention of the preclear that he feels he should be doing something about it instead of being audited.

## OVERT:

An overt act is an act of omission or commission which does the least good for the least number of dynamics or the most harm to the greatest number of dynamics.

. . . An aggressive or destructive act by the individual against one or more of the eight dynamics (self, family, group, mankind, animals or plants, mest, life or the infinite). That thing which you do which you aren't willing to have happen to you.

## WITHHOLD:

An undisclosed harmful (contra-survival) act.

## MISSED WITHHOLD:

An undisclosed contra-survival act which has been restimulated by another but not disclosed. This is a withhold which another person nearly found out about, leaving the person with the withhold in a state of wondering whether his hidden deed is known or not.

## REPETITIVE PROCESS:

... A process that is run over and over with the same question of the pc.... we don't expect the auditor to do anything but state the command (or ask the question) with no variation, acknowledge the pc's answer and handle the pc origins by understanding and acknowledging what the pc said. A process which permits the individual to examine his mind and environment and out of it select the unimportances and importances.

## FLOW:

A progress of energy between two points.

An impulse or direction of energy particles or thought or masses between terminals.

The progress of particles or impulses or waves from Point A to Point B.

## ASSESS:

To choose, from a list of statements—which item or thing has the longest read and the pc's interest. The longest read usually will also have the pc's interest.

## ASSESSMENT:

. . . an action done from a prepared list. Assessment is done by the auditor between the pc's bank and the meter.... just notes which item has the longest fall or Lowdown. The auditor looks at the meter while doing an assessment. Assessment is the whole action of obtaining a significant item from a pc.

## EXAMINER:

Preclear Examiner. The person in a Scientology church to whom preclears are sent immediately after any auditing session. The Examiner says nothing to the preclear in this situation, noting only what the pc's tone arm position and state of the needle are on the E-Meter and recording what the pc says, if anything. The Examiner is also the person a preclear sees if he wishes to make any sort of statement regarding his case, or if there is something he wants handled regarding his case.

*New Era Dianetics Series 17*

**DIANETIC PERSISTENT F/Ns**

If the original item is not totally and completely gone you can run into a condition where the pc is on a persistent F/N with regard to it but it's still there slightly and nothing reads but it only F/Ns.

What you can do in that case is:

1. take the pc off auditing for a few days while the persistent F/N dies out and the environment keys something in and continue then with the assessment of that original item or
2. go on with some other original item that *does* read and make a big clear notation in the pc's program to come back to the original item after you have run some other original items on the case.

If you get stopped by a persistent F/N and some condition is still there, don't use an F/N as an excuse not to come back to the original item!

*New Era Dianetics Series 18*

**AFTER THE FACT ITEMS**

You will sometimes have trouble with a particular kind of running item.

It is known as an “after the fact item.”

First, why do you get erasures only because you ask for earlier beginnings or earlier similars? Because the thetan’s mind where pictures are concerned parallels the time track.

*Late* things hang up where *earlier* like things exist.

For some reason best known to thetans, you have to get the earlier like thing before you can erase the later like thing.

This is built into R3RA.

But what isn’t built in is preventing the pc giving or the auditor choosing an “after the fact” running item.

An “after the fact” running item is one which clearly has an earlier thing before it, yet, by its very wording, prohibits reaching the earlier thing.

Example of an “after the fact” running item: “Repression.”

Now clearly something had to happen *before* in order to have something repress.

The pc dutifully begins to run “Feeling repressed.” But what happened that caused it is not part of the item. So he is forced to run late in the incident.

Example: “Feeling blue about hospitals.”

This will find him in hospitals but will avoid letting him run what put him there.

The item is *after the fact* of having been run over.

The way to handle “after the fact” running items is:

1. Learn to recognize them.
2. Don’t choose one off a running item list. Choose something else that read.

### ASSESSMENT TRs

The right way to do an assessment is to ask the pc the question in a *questioning* tone of voice.

In assessing, some auditors have made assessment questions into statements of fact, which of course is a cousin to evaluation.

A downcurve at the end of an assessment question contributes to making it a statement. Questions should go up at the end.

A remedy for this is to record ordinary conversation. Ask some normal questions and make some normal statements and you will find that the voice tone rises on a question and goes down on a statement.

Assessing with a statement's tone of voice instead of a questioning tone of voice results in evaluation for the pc. The pc feels accused or evaluated for rather than assessed and an auditor can get a lot of false and protest reads.

It's all tone of voice. Auditors have to be drilled in asking questions. Assessment questions have an upcurve at the end.

Get it?

Then drill it.

*C/S Series 101*

## LIST OF PERCEPTICS

This was researched and dated of 1951.

It's the 57 human perceptions.

1. Time
2. Sight
3. Taste
4. Colour
5. *Depth*
6. Solidity (Barriers)
7. Relative Sizes (External)
8. Sound
9. Pitch
10. Tone
11. Volume
12. Rhythm
13. Smell (*The sense of smell has four subdivisions which are categories of the type of odor.*)
14. Touch *a) Pressure b) Friction c) Heat or Cold d) Oiliness*
15. Personal Emotion
16. Endocrine States
17. Awareness of Awareness
18. Personal Size
19. Organic Sensation (Including Hunger)
20. Heartbeat
21. Blood Circulation
22. Cellular and Bacterial Position
23. Gravitic (Self and Other Weights)
24. Motion of Self
25. Motion (Exterior)
26. Body Position
27. Joint Position

28. Internal Temperature
29. External Temperature
30. Balance
31. Muscular Tension
32. Saline Content of Self (Body)
33. Fields/Magnetic
34. Time Track Motion
35. Physical Energy (Personal Weariness etc.)
36. Self-Determinism (Relative on each dynamic)
37. Moisture (Self)
38. Sound Direction
39. Emotional State of Other Organs
40. Personal Position on the Tone Scale
41. Affinity (Self and Others)
42. Communication (Self and Others)
43. Reality (Self and Others)
44. Emotional State of Groups
45. Compass Direction
46. Level of Consciousness
47. Pain
48. Perception of Conclusions (Past and Present)
49. Perception of Computations (Past and Present)
50. Perception of Imagination (Past and Present)
51. Perception of Having Perceived (Past and Present)
52. Awareness of Not Knowing
53. Awareness of Importance, Unimportance
54. Awareness of Others
55. Awareness of Location and Placement a) Masses b) Spaces c) Location Itself
56. Perception of Appetite (. . .)
57. *Kinesthesia*

(Cancels and replaces BTB 3  
Oct 69R DIANETIC REMEDIES)

**DIANETIC REMEDIES**

The remedies given here will handle pcs who go anaten or dope off in session even though they are well rested beforehand. They will also handle high TAs caused by chains left in restimulation by reason of not taking them to a full Dianetic EP.

**WORD CLEARING**

One of the beginning pc's first steps in auditing is a thorough and complete CS-I. This is given as ACTION SEVEN on New Era Dianetics Series 2, FULL PC PROGRAM OUTLINE. It must be done until the pc well understands the commands of R3RA and knows what is expected of him as a pc. (Ref: HCOB 9 Jul 78, DIANETIC CS-I.)

DO NOT attempt to run R3RA on a pc who is not properly indoctrinated. Clear the commands. Clear the list words and clear the procedures with him. It is the auditor's responsibility to ensure the pc understands the commands and the procedure he is being run on.

So the first remedy given here is WORD CLEARING. A pc who does not understand R3RA commands, assessment procedures, etc. will only restimulate masses in Dianetic sessions, he will not be able to erase them.

If there is any doubt that your pc understands the commands and procedures of R3RA, you clear these up immediately.

There are uniformly two things that prevent pcs from running engrams. They are the failure to fully clear all the commands and procedures of R3RA as we have covered above, and unhandled drugs.

Hence, the following remedies are to be done in their correct sequence on the pc's Dianetic program, after a full and complete drug handling per New Era Dianetics Series 99 DRUG HANDLING. (Ref: New Era Dianetics Series 2, FULL PC PROGRAM OUTLINE.)

**PICTURES OR MASSES**

The following remedy is ordered by the C/S when the pc has no misunderstood words but still goes anaten in session, even when assessment and R3RA procedure are correctly done and the pc has had sufficient sleep, with no unflat chains evident by folder inspection but has a very high or low TA.

The auditor asks: "What pictures or masses have you touched on in life or in auditing that have been left unhandled?"

The most obvious remedy is simply to take the best reading picture that was left unflat in auditing and simply finish the chain. If the pc had only run it single flow at the time then finish it single flow for certain and check the other flows to see if they read and run them if they do. The question one checks is Step One narrative or Step One regular R3RA. One uses narrative when it is simply an incident and regular R3RA when he remembers what somatic he was running at the time.

The essence of this is simply to complete something that was already started and wasn't completed.

If it was a picture which simply appeared in life, one can treat it as an original item per the Assessment HCOB and carry on from there.

Caution should be observed in running a pc on Quad who hitherto had only been run on single or triple flows. One can get onto the subject of bypassed charge when he suddenly runs a new flow (like Flow 0) that has never been run before on a new item. What happens is the pc, audited on single or triple on other items in previous auditing, collides with some of the unrun charge of previously unhandled chains of that flow and can get quite upset. The best handling of this sort of thing is called "Quading up a pc" as contained in HCOB 7 March 71R, USE OF QUADRUPLE DIANETICS.

*Masses* are handled simply by treating them as an original item as in the Assessment HCOB.

In pictures or masses remedies, one is best off following New Era Dianetics Series 4. Just treat the picture or mass as an original item. Therefore, when the pc gives you a list of pictures or masses that have been touched on in life or auditing he is really giving you a list of original items so far as handling is concerned. The auditor takes the best reading item from that list and does a preassessment on it.

"Are/is (preassessment item) connected with (item)?" is the preassessment question.

The auditor then follows the procedure outlined in HCOB 18 June 1978 New Era Dianetics Series 4, doing a full preassessment and runs out R3RA Quad all reading items with pc interest.

When this action is correctly performed the TA of the pc will be back in range, and the pc will be bright.

#### AUTOMATICITY OF PICTURES

There are some pcs who keep talking about "this huge automaticity of pictures coming in, faster and faster." They also dope off in session and they are somewhat hard to get an F/N on.

The thing which is really wrong with the pc is instability. He can't hold things still.

A C/S could order HCO Training Bulletin of 6 Feb 1957 (Technical Volume III) — "Hold It Still."

Objectives are also indicated, particularly SCS, as the pc can't control things.

After flattening Objectives it will be found that the pc's bank is more stable.

As the multipictures may also have keyed something in a C/S, after Objectives are flat, could order the following:

"Ask the pc 'What pictures have you seen in life or auditing?' and treat the best reading items in the resulting list as original items, handling them per New Era Dianetics Series 4."

The phenomenon of automatic pictures is also called "an avalanche" and data on it is available in the Technical Bulletins Volume II, page 39, Volume VIII, page 106. The above section is the best handling.

## OVERTS

When the pc goes anaten in session but there is no evidence of unflat chains, the C/S issues this C/S:

“Assess for: Overts on unconscious people Overts on anaten people Overts on asleep people Overts on sick people.

“Run each reading item with interest R3RA Narrative Quad, running F2 first.”

The C/S could vary the assessment list, adding items if necessary in accordance with what the pc was motivating from.

## IMAGINARY INCIDENTS

Sometimes a pc cannot confront the actual incidents that are keyed-in by life or auditing. Such a pc will not go backtrack. In this case the running of imaginary incidents is quite productive. Sometimes the preclear will run them, quite astonishingly, with somatics. But he is not being required to face any reality about them and the auditor is not insisting that any reality exists concerning them. In a surprisingly high percentage of times, however, he will be running actual incidents. So long as he does not have to admit that these incidents are actual he can do something about them.

It should be understood that no amount of imaginary incidents can supplant the running of real incidents. The first value that this technique has—the invitation to the preclear to run avowedly imaginary incidents in his past—is to build up, the preclear’s confidence in the auditor. The preclear begins to feel that he will not be censured for indulging in fantasy.

When the preclear discovers that he has an auditor who not only will listen to imagination but who encourages it, the affinity level rises and the preclear’s ability to differentiate in terms of reality will itself rise.

The auditor must never, after the incident has been run, then insist that the incident was real. This would be a break of faith. He and the preclear have entered into a contract that what is being run is pure imagination, and the auditor must not break his contract.

To run imaginary incidents, the auditor discusses with the pc how they will be running imaginary incidents and gets the pc’s agreement to do so.

The auditor then asks, “What imaginary incidents or pictures have you touched on?”

All the pc’s responses to this question, with their meter reads are noted by the auditor. He then takes up the best reading incident or picture and runs it out R3RA Narrative Quad, first checking interest. Lesser reading items are then taken up.

This action is done until the pc is brighter and more able to confront actual incidents as they come up in auditing.

In doing this remedy be certain the pc understands R3RA procedure and has NO MISUNDERSTOODS.

ASSESSMENT AND HOW TO GET THE ITEM

### INSTANT READS

The correct definition of INSTANT READ is THAT REACTION OF THE NEEDLE WHICH OCCURS AT THE PRECISE END OF ANY MAJOR THOUGHT VOICED BY THE AUDITOR.

All definitions which state it is fractions of seconds after the question is asked, are cancelled.

Thus an instant read which occurs when the auditor assesses an item or calls a question is valid and would be taken up and latent reads, which occur fractions of seconds after the major thought, are ignored.

Additionally, when looking for reads while clearing commands or when the preclear is originating items, the auditor must note only those reads which occur at the exact moment the pc ends his statement of the item or command.

## HAVINGNESS

### FINDING AND RUNNING THE PC'S HAVINGNESS PROCESS

Ref: HCOB 11 Jan 62, Security Checking Twenty-Ten Theory  
HCOB 29 Sep 60, Havingness and Duplication  
HCOB 6 Oct 60R, Thirty-Six New Presessions  
Rev. 8 May 74  
Book: *E-Meter Essentials*, Section G:  
Finding Havingness & Confront Processes

NOTE: This issue is by no means a complete summary of the subject of havingness. There is a vast amount of material on havingness and the remedy of havingness in early publications and other HCOBs to be found in the Technical Volumes—data the student will acquire as he continues to train up the levels and on the SHSBC.

This issue is to give the beginning auditor a working knowledge of the subject of havingness.

“HAVINGNESS: 1) that which permits the experience of mass and pressure. 2) the feeling that one owns or possesses. 3) can be simply defined as ARC with the environment.... 6) the ability to duplicate that which one perceives, or to be willing to create a duplication of it.... 8) havingness is the concept of being able to reach or not being prevented from reaching.... 4) that activity which is run when needed and when it will not violently deflect the pc's attention.”

(From the Technical Dictionary.)

The above are all valid, but the final definition of havingness can be simply stated as:

**HAVINGNESS IS THE CONCEPT OF BEING ABLE TO REACH. NO HAVINGNESS IS THE CONCEPT OF NOT BEING ABLE TO REACH.**

Inherent in the ability to reach is the willingness and ability to duplicate. That which makes *communication* work in processes is the duplication part of the communication formula (Axiom 28 Amended).

The position of a being on the Tone Scale is determined by his ability to reach (and thus his willingness and ability to duplicate, to communicate and experience). The lower the tone of the being the less willing he is to reach, communicate with and experience his present time environment, and the less willing he is to reach and duplicate events of the past or permit them to happen again.

This is remedied by Objective Havingness Processes. These are processes that deal with observing and touching objects in the auditing room or in the environment. They are “look around” or physical contact processes, used to remedy a low or “no havingness” condition.

Thus we find the pc's Havingness Process early on in auditing and use it to gain or remedy havingness before or after processes or at session end.

## FINDING AND RUNNING THE PC'S HAVINGNESS PROCESS

The preclear's Havingness Process is tested for on the meter in an exact way. You test it on the *needle* with can squeezes from the pc.

Use HCOB 6 October 1960R, Revised 8 May 74, "Thirty-Six New Presessions."

1. Set the sensitivity for 1/3 of a dial drop when the pc squeezes the cans. (See E-Meter Drill 5, *The Book of E-Meter Drills*.)
2. Run 5 to 8 commands of the first Havingness Process on the above bulletin, with the pc on the meter.
3. Then have the pc squeeze the cans, noting the size of the needle read now. If this second can squeeze shows the needle looser (wider swing) than the first can squeeze did, you've got it. The Havingness Process you've tested is the Havingness Process for the preclear and may be used to remedy his havingness as necessary.
4. If the process *tightens* the needle during the test, don't use it. Don't bridge off. Just get off the process now and test the next process, or the next, continuing until you find a Havingness Process that does loosen the needle and gives a wider swing. One will be found among the list of Havingness Processes on HCOB 6 Oct 60R.
5. The correct Havingness Process selected is then run 10 to 12 commands at a time, usually just before ending off a session.

A pc's Havingness Process can change as the pc changes with auditing. If at some point in the auditing the Havingness Process which has been being used fails to get the desired result, simply re-test for a new Havingness Process, find one that works and use it.

Even the right Havingness Process, if run too much at one time (more than 10 or 20 commands) will start running the bank. It doesn't harm the preclear but that isn't its use, as there are other processes that run the bank better.

The *purpose* of a Havingness Process is to get the preclear stabilized in his environment.

**NEW ERA DIANETICS**  
**A REQUISITE FOR EXPANDED DIANETICS**

(Ref: New Era Dianetics Series Bulletins  
Expanded Dianetics Series Bulletins)

THE NEW ERA DIANETICS FULL PC PROGRAM MUST COME BEFORE EXPANDED DIANETICS ON ANY PC WHO HASN'T HAD NEW ERA DIANETICS .

Thus:

THE NEW ERA DIANETICS FULL PC PROGRAM AND EXPANDED DIANETICS, IN THAT SEQUENCE, ARE MANDATORY IN EVERY R/S CASE.

The New Era Dianetics Full Pc Program is itself. The Expanded Dianetics Program is itself. They are NOT mixed. The one quite naturally precedes the other. New Era Dianetics fully completed paves the way for smooth, rapid, spot-on running of Expanded Dianetics on the pc.

On those pcs who have already had many hours of Dianetics, numerous chains will have been erased with somatics and/or illnesses blown and disabilities handled, and these gains are not to be invalidated. Dianetics properly applied has always brought about fantastic results.

New Era Dianetics, however, with its new Preassessment procedure and its new rundowns tailored to find and handle *any* unhandled Dianetic aspect of the case, will result in undreamed of gains for old and new pcs alike. It is already doing so.

Further, it ensures the full and thorough handling of those aspects of the case which must be gotten out of the way before proceeding with Ex Dn, as these could complicate and lengthen Ex Dn unnecessarily.

Thus we have the above rules.

This is a swifter and more thorough route than ever before to a well and happy pc and a swifter more thorough route than ever before to *a full* Expanded Dianetics completion .

(Cancels BTB 2 May 72R, Rev. 10.6.74,  
CLEARING COMMANDS.)

**CLEARING COMMANDS**

(Ref: HCOB 14 Nov 65, CLEARING COMMANDS  
HCOB 9 Nov 68, CLEARING COMMANDS, ALL LEVELS  
HCO PL 4 Apr 72R ETHICS AND STUDY TECH)

Always when running a process newly or whenever the preclear is confused about the meaning of commands, clear each word of each command with the preclear. using the dictionary if necessary. This has long been standard procedure.

You want a pc set up to run smoothly, knowing what is expected of him and understanding exactly the question being asked or the command being given. A misunderstood word or auditing command can waste hours of auditing time and keep a whole case from moving.

Thus this preliminary step to running a process or procedure for the first time is VITAL.

The rules of clearing commands are:

1. UNDER NO CIRCUMSTANCES IS THE AUDITOR TO EVALUATE FOR THE PC AND TELL HIM WHAT THE WORD OR COMMAND MEANS.
2. ALWAYS HAVE THE NECESSARY (AND *GOOD*) DICTIONARIES IN THE AUDITING ROOM WITH YOU.

This would include the Tech Dictionary, the Admin Dictionary, a good English dictionary, and a good non-dinky dictionary in the pc's native language. For a foreign language case (where the pc's native language is not English) you will also need a dual dictionary for that language and English.

(Example: English word "apple" is looked up in English/French dictionary and "pomme" is found. Now look in the French dictionary to define "pomme.")

So for the foreign language case two dictionaries are needed: (1) English to foreign language (2) foreign language itself.

3. HAVE THE PC ON THE CANS THROUGHOUT THE CLEARING OF THE WORDS AND COMMANDS.
4. CLEAR THE COMMAND (OR QUESTION OR LIST ITEM) BACKWARDS BY FIRST CLEARING IN TURN EACH WORD IN THE COMMAND IN BACKWARDS SEQUENCE.

(Example: To clear the command "Do fish swim?" clear "swim" first, then "fish," then "do.")

This prevents the pc starting to run the process by himself while you are still clearing the words.

4A. NOTE: F/Ns OBTAINED ON CLEARING THE *WORDS* DOES NOT MEAN THE *PROCESS* HAS BEEN RUN.

5. NEXT, CLEAR THE COMMAND ITSELF.

Auditor asks the pc, "What does this command mean to you?" If it is evident from the pc's answer that he has misunderstood a word as it is used in the context of the command:

- (a) Re-clear the obvious word (or words) using the dictionary.
- (b) Have him use each word in a sentence until he has it. (The worst fault is the pc using a new set of words in place of the actual word and answering the alter-ised word, not the word itself. See HCOB 10 Mar 65, *WORDS, MISUNDERSTOOD GOOFS*.)
- (c) Re-clear the command.
- (d) If necessary, repeat Steps a, b and c above to make sure he understands the command.

5A. NOTE: THAT A *WORD* READS WHEN CLEARING A COMMAND, AN ASSESSMENT QUESTION OR LISTING QUESTION DOES NOT MEAN THE *COMMAND* OR *QUESTION* ITSELF HAS READ NECESSARILY. MISUNDERSTOOD WORDS READ ON THE METER.

6. WHEN CLEARING THE COMMAND, WATCH THE METER AND NOTE ANY READ ON THE COMMAND. (Ref: HCOB 28 Feb 71, C/S Series 24, *IMPORTANT METERING READING ITEMS*.)

7. DON'T CLEAR THE COMMANDS OF ALL RUDS AND RUN THEM, OR OF ALL PROCESSES AND RUN THEM. YOU'LL MISS F/Ns. THE COMMANDS OF ONE PROCESS ARE CLEARED JUST BEFORE *THAT* PROCESS IS RUN.

8. ARC BREAKS AND LISTS SHOULD BE WORD CLEARED BEFORE A PC GETS INTO THEM AND SHOULD BE TAGGED IN THE PC'S FOLDER ON A YELLOW SHEET AS CLEARED. (Ref: BTB 5 Nov 72R II, Rev. 24.7.74, Auditor Admin Series 6R, *THE YELLOW SHEET*.)

As it is difficult to clear all the words of a correction list on a pc over heavy bypassed charge, it is standard to clear the words of an L1C and ruds very early in auditing and to clear an L4BRA *before* commencing listing processes or an L3RE *before* running R3RA. Then, when the need for these correction lists arises one does not need to clear all the words as it has already been done. Thus, such correction lists can be used without delay.

It is also standard to clear the words of the Word Clearing Correction List early in auditing and before other correction lists are cleared. This way, if the pc bogs on subsequent Word Clearing, you have your Word Clearing Correction List ready to use.

9. IF, HOWEVER, YOUR PC IS SITTING IN THE MIDDLE OF AN ARC BREAK (OR OTHER HEAVY CHARGE) AND THE WORDS OF THE L1C (OR OTHER CORRECTION LIST) HAVE *NOT* BEEN CLEARED YET, DON'T CLEAR FIRST. GO AHEAD AND ASSESS THE LIST TO HANDLE THE CHARGE. OTHERWISE IT'S AUDITING OVER AN ARC BREAK.

In this case you just verify by asking afterwards if he had any misunderstands on the list.

All the words of the L1C (or other correction list) would then be cleared thoroughly at the first opportunity—per your C/S's instructions.

10. DO NOT RE-CLEAR ALL THE WORDS OF ASSESSMENT LISTS EACH TIME THE LIST IS USED ON THE SAME PC. Do it once, fully and properly the first time and note clearly in the folder, on the yellow sheet for future reference, which of the- standard assessment lists have been cleared.
11. THESE RULES APPLY TO ALL PROCESSES, LISTING QUESTIONS AND ASSESSMENTS .
12. THE WORDS OF THE PLATENS OF ADVANCED COURSE MATERIALS ARE NOT SO CLEARED.

---

Any violation of full and correct clearing of commands or assessment questions, whether done in a formal session or not, is an ethics offense per HCO PL 4 Apr 72R (Rev. 21.6.75) ETHICS AND STUDY TECH, Section 4, which states:

“ANY AUDITOR FAILING TO CLEAR EACH AND EVERY WORD OF EVERY COMMAND OR LIST USED MAY BE SUMMONED BEFORE A COURT OF ETHICS.

“The charge is OUT TECH.”

**RUDIMENTS**

**DEFINITIONS AND PATTERN**

(Ref: HCOB 15 Aug 69, FLYING RUDS)

(NOTE: This Bulletin in no way summarizes all the data there is to be known about ARC breaks, PTPs and missed withholds, or handling rudiments.)

There is a wealth of technology and data on these subjects contained throughout the Technical Volumes and in Scientology books which the student auditor will need as he progresses up the levels.)

A rudiment is that which is used to get the pc in shape to be audited in that session.

For auditing to take place at all the pc must be in session which means:

1. Willing to talk to the auditor
2. Interested in own case.

That is all you want to accomplish with rudiments. You want to set up the case to run by getting the rudiments in, not use the rudiments to run the case.

ARC breaks, present time problems and withholds all keep a session from occurring. It is elementary auditing knowledge that auditing over the top of an ARC break can reduce a graph, hang the pc up in sessions or worsen his case, and that in the presence of PTPs, overts and missed withholds (a restimulated undisclosed overt) no gains can occur. Thus these are the rudiments we are most concerned with getting in at the beginning of a session so that auditing with gains can occur.

**GETTING THE F/N**

If you know bank structure you know it is necessary to find an earlier item if something does not release.

If a rud doesn't F/N then there is an earlier (or an earlier or an earlier) lock which is preventing it from F/Ning.

Thus we have the procedure and the rule:

**IF A RUD READS YOU ALWAYS TAKE IT EARLIER SIMILAR UNTIL IT F/Ns.**

The question used is:

“Is there an earlier similar (ARC break) or (problem) or (missed withhold)?”

If at the beginning of a session the rudiments are *in* (the needle is floating *and* the pc is VGIs), the auditor goes directly into the major actions of the session. If not, the auditor must fly a rud or ruds, as ordered by the C/S.

## ARC BREAKS

ARC: A word from the initial letters of Affinity, Reality and Communication which together equate to Understanding.

ARC BREAK: A sudden drop or cutting of one's affinity, reality or communication with someone or something. Upsets with people or things come about because of a lessening or sundering of affinity, reality, communication or understanding.

While the earlier similar rule fully applies to ARC breaks, there is an additional action taken in handling ARC breaks that enables the pc to spot precisely what happened that resulted in the upset.

An ARC break is called that—an “A-R-C break”—instead of an upset because, if one discovers which of the three points of understanding have been cut, one can bring about a rapid recovery in the person's state of mind.

You never audit over the top of an ARC break, and you never *audit* an ARC break itself; they cannot be audited. But they can be *assessed* to locate which of the basic elements of ARC the charge is on.

Thus to handle an ARC break you assess affinity, reality, communication and understanding to find which of these points the break occurred on.

Having determined that, you assess the item found (A or R or C or U) against the Expanded CDEI Scale (curious, desired, enforced, inhibited, no and refused). Ref: HCOB 13 Oct 59, DEI EXPANDED SCALE, *Scientology S8. The Book of Basics*, and HCOB 18 Sep 67, corrected 4.4.74, SCALES.

With this assessment the actual bypassed charge can be located and indicated even more accurately, thus enabling the pc to blow it.

The assessment is done on every ARC break as you go earlier similar until the rudiment is in with F/N and VGIs.

The first rudiment question is:

1. “Do you have an ARC break?”
2. If there is an ARC break, get the data on it briefly.
3. Find out by assessment which point the ARC break occurred on: “Was that a break in Affinity?  
Reality?  
Communication?  
Understanding?”

You assess it *once* and get the read (or the largest read) on, say, communication.

4. Check it with the pc: “Was that a break in (communication)? If he says no, rehandle. If yes, let him tell you about it if he wishes. Then give it to him by indicating it, i.e. “I'd like to indicate that *was* a break in communication.”

PROVIDED THE RIGHT ITEM HAS BEEN GOTTEN, the pc will brighten up, even if ever so slightly, *on the very first assessment*.

NOTE: On Step 4 the pc may originate: “Yes, I guess it was communication but to me it's really more like a break in reality,” for example. The wise auditor then acknowledges and indicates it was a break in “reality.”

5. Taking the item found in Step 4 above, assess it against the CDEI Scale:

“Was it:

Curious about	(communication) ?
Desired	“ ?
Enforced	“ ?
Inhibited	“ ?
No	“ ?
Refused	“ ?”

6. As in Steps 3 and 4 above, assess it *once*, get the item and check it with the pc:

“Was it (desired) communication?”

If no, rehandle. If yes, indicate it.

7. If no F/N at this point you follow it earlier with the question:

“Is there an earlier similar ARC break?”

8. Get the earlier similar ARC break, get in ARCU, CDEINR, indicate. If no F/N, repeat Step 7, continuing to go earlier, always using ARCU, CDEINR until you get an F/N.

When you get the F/N *and* VGIs you have it.

#### PRESENT TIME PROBLEM

**PROBLEM:** A conflict arising from two opposing intentions. It’s one thing versus another thing; an intention-counter-intention that worries the preclear.

**PRESENT TIME PROBLEM:** . . . A special problem that exists in the physical universe now, on which the pc has his attention fixed.

. . . Any set of circumstances that so engages the attention of the preclear that he feels he should be doing something about it instead of being audited.

A violation of “in session-ness” occurs when the pc’s attention is fixed on some concern that is “right now” in the physical universe. The pc’s attention is “over there” not on his case. If the auditor overlooks and doesn’t handle the PTP then the pc is never in session, grows agitated, ARC breaks. And no gains are made because he is not in session.

The second rudiment question is:

1. “Do you have a present time problem?”
2. If there is a PTP, have the pc tell you about it.
3. If no F/N take it earlier with the question:  
“Is there an earlier similar problem?”
4. Get the earlier problem and if no F/N, follow it earlier similar, earlier similar, earlier similar to F/N.

## MISSED WITHHOLDS

**OVERT ACT:** An intentionally committed harmful act committed in an effort to solve a problem.

. . . an act of omission or commission which does the least good for the least number of dynamics or the most harm to the greatest number of dynamics.

That thing which you do which you aren't willing to have happen to you.

**WITHHOLD:** An undisclosed harmful (contra-survival) act. Something the pc did that he isn't talking about.

**MISSED WITHHOLD:** An undisclosed contra-survival act which has been restimulated by another but not disclosed. This is a withhold which another person nearly found out about, leaving the person with the withhold in a state of wondering whether his hidden deed is known or not.

The pc with a missed withhold will not be honestly "willing to talk to the auditor" and, therefore, not in session until the missed withhold is pulled.

Missing a withhold or not getting all of it is the sole source of an ARC break. A missed withhold is observable by any of the following: pc not making progress, pc critical of, nattery or angry at the auditor, refusing to talk to the auditor, not desirous of being audited, boiling off, exhausted, foggy at session end, dropped havingness, telling others the auditor is no good, demanding redress of wrongs, critical of Scientology or organizations or people of Scientology, lack of auditing results, dissemination failures. (Ref: HCOB 3 May 62, ARC BREAKS, MISSED WITHHOLDS.) The auditor must *not* overlook any manifestations of a missed withhold.

Thus, if the pc has a missed withhold you get it, get all of it using the system described below, and use the same system on each earlier similar missed withhold until you get the F/N.

The third rudiment question is:

1. "Has a withhold been missed?"
2. If you get a missed withhold, find out:
  - (a) What was it?
  - (b) When was it?
  - (c) Is that all of the withhold?
  - (d) WHO missed it?
  - (e) What did (he/she) do to make you wonder whether or not (he/she) knew?
  - (f) Who else missed it? (Repeat (e) above).

Get another and another who missed it, using the Suppress button as necessary, and repeating (e) above.

3. Clean it to F/N, or if no F/N take it earlier similar with the question:  
"Is there an earlier similar missed withhold?"
4. Handle each earlier similar missed withhold you get per Step 2 above, until you get an F/N.

## SUPPRESS

If a rudiment doesn't read and is not F/Ning, put in the Suppress button, using:  
"On the question 'Do you have an ARC break?' has anything been suppressed?"

If it reads, take it and ask ARCU, CDEINR, earlier similar, etc.

Use Suppress in the same way for non-reading PTP and missed withhold rudiments.

## FALSE

If the pc protests, comments, or seems bewildered put in the False button. The question used is:

"Has anyone said you had a when you didn't have one?" Get who, what, when and take it earlier, if necessary, to F/N.

## END PHENOMENA

In ruds when you've got your F/N and that charge has moved off, indicate it. Don't push the pc on for some other "EP."

When the pc F/Ns with VGIs, you've got it.

## HIGH OR LOW TA

Never try to fly ruds on a high or low TA.

Seeing a high or low TA at session start, the Dianetic or Scientology auditor up to Class II does not start the session but sends the folder back to the C/S for a higher classed auditor to handle. The C/S will order the required correction list to be done by an auditor Class III or above.

Issue II

Remimeo  
All Auditors

(Cancels BTB 18 Nov 68R, MODEL SESSION)

**MODEL SESSION**

(Note: If a Dianetic or Level 0, I, II auditor is not trained in flying rudiments he would have to get a Level III (or above) auditor to fly the pc's ruds before starting the major action of the session.)

**1. Setting Up for the Session**

Prior to the session the auditor is to make sure the room and session are set up, to ensure a smooth session with no interruptions or distractions.

Use HCOB 4 December 1977, "Checklist for Setting Up Sessions and An E-Meter," getting in every point of the checklist.

The pc is seated in the chair furthest from the door. From the time he is asked to pick up the cans he remains on the meter until the end of the session.

When it is established there is no reason not to begin the session the auditor starts the session.

**2. Start of Session**

The auditor says: "This is the session." (Tone 40.)

If the needle is floating and the pc has VGIs, the auditor goes directly into the major action of the session. If not, the auditor must fly a rud.

**3. Rudiments**

Rudiments are handled per HCOB 11 August 1978, Issue I, "Rudiments, Definitions and Patter."

(If the TA is high or low at session start, or if the auditor cannot get a rud to fly, he ends off and sends the pc folder to the C/S. A Class IV auditor (or above) may do a Green Form or another type of correction list.)

When the pc has F/N, VGIs the auditor goes into the major action of the session.

**4. Major Action of the Session**

a) R-Factor to the pc. The auditor informs the pc what is going to be done in the session with:

"Now we are going to handle ."

b) Clearing commands. The commands of the process are cleared per HCOB 9 August 1978 Issue II, "Clearing Commands."

c) The process. The auditor runs the process or completes the C/S instructions for the session to end phenomena.

In Dianetics, the end phenomena would be: F/N, erasure of the chain, cognition, postulate (if not voiced in the cognition) and VGIs.

In Scientology processes, the end phenomena is: F/N, cognition, VGIs. The Power Processes have their own EP.

## **5. Havingness**

When Havingness is indicated or included in the C/S instructions, the auditor runs approximately 10 to 12 commands of the pc's Havingness Process to where the pc is bright, F/Ning and in PT. (Note: Havingness is never run to obscure or hide the fact of failure to F/N the main process or an auditing or Confessional question.)

(Ref: HCOB 7 August 78, "Havingness, Finding & Running The Pc's Havingness Process.")

## **6. End of Session**

a) When the auditor is ready to end the session he gives the R-Factor that he will be ending the session.

b) Then he asks: "Is there anything you would care to say or ask before I end this session?" Pc answers. Auditor acknowledges and notes down the answer.

c) If the pc asks a question, answer it if you can or acknowledge and say, "I will note that down for the C/S."

d) Auditor ends the session with: "End of session." (Tone 40.)

(Note: The phrase "That's it" is incorrect for the purpose of ending a session and is not used. The correct phrase is "*End of Session.*")

---

Immediately after the end of session the auditor or a Page takes the pc to the pc Examiner.

**RUNNING FLOWS THAT WON'T ERASE**

You can run into trouble in R3RA with a flow that won't erase and this can be due to an earlier unerased flow.

You can be running a flow and it won't erase because you have left an earlier flow unerased.

You have to go back and erase the unerased flow and then return to the one you are working on, which will then erase.

If you are on Flow 2 and find it won't erase because Flow 1 has been left unerased, the thing to do is go back to Flow 1 and fully erase it. Then return to Flow 2.

What you are running into on the flow that won't erase is generally the earlier unerased flow and that is what you need to handle to obtain a clean erasure.

### ***MORE ON DRUGS***

Drug *users* are apparently sitting on the idea that if you're numb nothing can hurt you and it's probably a defense against the physical universe. That's probably why Objectives pull them out of it.

Drugs are an impression of fear on the physical universe and what it might do to a person.

That is why Objectives work. It reassures them they aren't going to get bit.

That's the ambition of the drug culture.

There are several more sensible ways of handling the same problem.

The first of these is exteriorization. One exteriorizes before the impact. Yet drugs often make it impossible to exteriorize.

A second way is to simply control the nerves so they don't transmit.

A third is not to be in such a protest against pain as it increases the intensity of the thing. It is a fact that pain is a sort of havingness and if a person is processed on wasting and having pain he finds it is just another sensation and he can have it and doesn't need these other remedies and that it is not that much of a problem.

There are other unwanted sensations that drugs block off but there is a whole sector of desirable sensations and drugs block off all sensations. In spite of the propaganda to the contrary even sexual sensation is blocked off with drugs and this is true even after drugs have apparently heightened it for one or two times, after that it is dead, dead, dead.

The only brief that can be held out for drugs is that they give a short quick oblivion from immediate agony and permit the handling of a person to effect repair. But even then this is applicable to persons who have no other system to handle their pain.

Dexterity, ability and alertness are the main things that prevent getting into painful situations and a primary target of these all vanish with drugs. So drugs set you up to get into situations which are truly disastrous and keep you that way.

One has a choice between being dead with drugs or being alive without them. Drugs rob life of the sensations and joys which are the only reasons for living anyhow.

(Cancels HCOB 1 Aug AD12)

URGENT—URGENT—URGENT

**DEFINITION OF A ROCK SLAM**

The following is the only valid definition of an R/S:

**ROCK SLAM:** THE CRAZY, IRREGULAR, *LEFT-RIGHT* SLASHING MOTION OF THE NEEDLE ON THE E-METER DIAL. R/SES REPEAT LEFT AND RIGHT SLASHES UNEVENLY AND SAVAGELY, FASTER THAN THE EYE EASILY FOLLOWS. THE NEEDLE IS FRANTIC. THE WIDTH OF AN R/S DEPENDS LARGELY ON SENSITIVITY SETTING. IT GOES FROM ONE-FOURTH INCH TO WHOLE DIAL. BUT IT SLAMS *BACK AND FORTH*.

A ROCK SLAM (R/S) MEANS A HIDDEN EVIL INTENTION ON THE SUBJECT OR QUESTION UNDER AUDITING OR DISCUSSION.

VALID R/SES ARE NOT ALWAYS INSTANT READS. AN R/S CAN READ PRIOR OR LATENTLY.

HCOB 5 December AD12, "2-12, 3GAXX, 3-21 and Routine 2-10 Modern Assessment" is an HCOB composited by others incorrectly and is *CANCELLED* as it misdefines an R/S as a single slash left or right. It contains the statements: "One or two slashes make an R/S.... If it slashed up or down once call it an R/S." The data is utterly false. By this *wrong* definition a rocket read could be mistaken for an R/S, or any sudden rise could be mistaken for an R/S. ONE SLASH DOESN'T *BEGIN* TO BE AN R/S. NOR TWO OR THREE FOR THAT MATTER. THE CORRECT DEFINITION OF AN R/S INCLUDES THAT IT SLASHES SAVAGELY *LEFT AND RIGHT*.

**DEFINITION OF A DIRTY NEEDLE**

The following is the only valid definition of a dirty needle:

**DIRTY NEEDLE:** AN ERRATIC AGITATION OF THE NEEDLE WHICH IS RAGGED, JERKY, TICKING, NOT SWEEPING, AND TENDS TO BE PERSISTENT. IT IS NOT LIMITED IN SIZE.

A DIRTY NEEDLE IS CAUSED BY ONE OF THREE THINGS:

1. THE AUDITOR'S TRs ARE BAD.
2. THE AUDITOR IS BREAKING THE AUDITOR'S CODE.
3. THE PC HAS WITHHOLDS HE DOES NOT WISH KNOWN.

The definitions of a dirty needle as “a small rock slam” and “a smaller edition of the rock slam” in HCOB 13 August AD12, “Rock Slams and Dirty Needles,” are CANCELLED. The definition of a dirty needle as “a minute rock slam” in HCOB 1 August AD12, “Routine 3GA, Goals, Nulling by Mid Ruds,” is CANCELLED.

All definitions which limit the size of a dirty needle to “one quarter of an inch” or “less than one quarter of an inch” are CANCELLED.

A dirty needle is NOT TO BE CONFUSED with an R/S. They are distinctly different reads. You never mistake an R/S if you have ever seen one. A dirty needle is far less frantic.

THE DIFFERENCE BETWEEN A ROCK SLAM AND A DIRTY NEEDLE IS IN THE *CHARACTER OF THE READ*. NOT THE SIZE.

Persistent use of “fish and fumble” can sometimes turn a dirty needle into a rock slam. However until it does it is simply a dirty needle.

AUDITORS, C/SES, SUPERVISORS MUST MUST MUST KNOW THE DIFFERENCE BETWEEN THESE TWO TYPES OF READS COLD.

**ANATOMY OF A SERVICE FACSIMILE**

Ref: HCOB 22 Jul 63 YOU CAN BE RIGHT  
HCOB I Sep 63 SCIENTOLOGY THREE CLEARING,  
CLEARING, CLEARING, ROUTINE THREE SC  
HCOB 23 Aug 66 SERVICE FACSIMILE  
HCOB 30 Nov 66 ASSESSMENT FOR SERVICE FACSIMILES  
TAPE: 6308C27 SH SPEC 299 RIGHTNESS AND WRONGNESS  
TAPE: 6309C04 SH SPEC 302 HOW TO FIND A SERVICE FACSIMILE  
TAPE: 6309C03 SH SPEC 302A R3SC  
TAPE: 6309C05 SH SPEC 303 SERVICE FACSIMILE ASSESSMENT  
TAPE: 6309C18 SH SPEC 308 ST HILL SERVICE FAC HANDLING

**FACSIMILE:** A mental picture unknowingly created; a copy of the physical universe environment, complete with all the perceptions, at some time in the past.

**SERVICE:** A method of providing a person with the use of something; the action or result of giving assistance or advantage; work done; duty performed.

**COMPUTATION:** That aberrated evaluation and postulate that one must be in a certain state in order to succeed.

**SERVICE FACSIMILE:** THE SERVICE FACSIMILE IS THAT COMPUTATION GENERATED BY *THE PRECLEAR* (NOT THE BANK) TO MAKE SELF RIGHT AND OTHERS WRONG: TO DOMINATE OR ESCAPE DOMINATION AND ENHANCE OWN SURVIVAL AND INJURE THAT OF OTHERS.

Note that it is a computation, not a doingness, beingness or havingness. We could call this a "service computation" but we will maintain the term we have used to describe this phenomenon throughout the technology: "service facsimile."

It is a computation that the pc adopted when, in an extreme situation, he felt endangered by something but could not itsa it.

It is called a service facsimile because he uses it; it is "of service" to him.

Aberration, anybody's aberration on any subject, has been of some use to them *at some time or other*. You can trace it back. It's been of some use, otherwise they wouldn't keep mocking it up. But *now*, if you put it up against survival standards, you'd find it very non-survival.

The pc adopted this because he couldn't stand the confusion in a situation. So he adopted a safe solution. A safe solution is always adopted as a retreat from the environmental restimulation. He adopted a safe solution in that instance and he survived. His safe solution became his stable datum. He has hung onto it ever since. It is the computation, the fixed idea, he uses to handle life, his service facsimile.

## HOW THE SERVICE FACSIMILE BECOMES FIXED

An idea is the thing most easily substituted for a thetan. An idea doesn't have any mass connected with it basically. And it appears to have some wisdom in it so it's very easily substituted for a thetan. Thus the idea, the stable datum he has adopted, is substituted for the thetan.

How does this stable datum become so fixed? It gets fixed, and more and more firmly as time goes on, by the confusion it is supposed to handle but doesn't.

The stable datum was adopted in lieu of inspection. The person ceased to inspect, he fell back from inspecting, he fell back from living. He put the datum there to substitute for his own observation and his own coping with life, and at that moment he started an accumulation of confusion.

That which is not confronted and inspected tends to persist. Thus in the absence of his own confronting mass collects. The stable datum forbids inspection. It's an automatic solution. It's "safe." It solves everything. He no longer has to inspect to solve, so he never anises the mass. He gets caught in the middle of the mass. And it collects more and more confusion and his ability to inspect becomes less and less. The more he isn't confronting, the less he can confront. This becomes a dwindling spiral.

So the thing he has adopted to handle his environment for him is the thing which reduces his ability to handle his environment.

Those things which do not respond to routine auditing, that routine auditing won't change, are rooted in this mechanism.

Therefore, it is important to find the idea on which he is so fixed. Pull the fixed idea and you free the individual for a broader perimeter of inspection.

In service fac handling the reason you get tone arm action when the fixed idea has been pulled is that the confusion which has been amassed and dammed up for so long is now running off.

## RIGHT/WRONG, DOMINATE AND SURVIVE

Right and wrong are the tools of survival. In order to survive you have to be right. There is a level at which true rightness is analytical, and there is a level at which rightness and wrongness cease to be analytical or comprehensible. When it drops below that point it's aberration.

The point you degenerate from survive to succumb is the point you recognize you are wrong. That is the beginning of succumb. The moment one becomes worried about his own survival he enters into the necessity to dominate in order to survive.

It goes: the insistence upon survival, followed by the necessity to dominate, followed *then* by the necessity to be right. These postulates go downhill. So you get an aberrated rightness or wrongness. The game of domination consists of making the other fellow wrong in order to be right.

That is the essence of the service facsimile.

The reason the service facsimile isn't rational is because you have A=A=As along the whole line. Coming down the line it works itself back and forth in an aberrated A=A=A. If the individual is surviving he must be right. And people will defend the most fantastic wrongnesses on the basis they are being right.

In PT and at any point along the track, the fellow is trying to be right, trying to be right, trying to be right. *Whatever* he's doing he's trying to be right. In order to survive

you have to be right more than you're wrong, so you get the obsession to be right in order to survive. The lie is that he can't do anything else except survive.

It isn't that trying to be right is wrong—it's obsessively being right about something that's obviously wrong. That's when the individual is no longer able to select his own course of behaviour. When he is obsessively following courses of behaviour which are uninspected in order to be right.

There is nothing sane about a service facsimile, there is no rationality to it. The computation does not fit the incident or event occurring. It simply enforces, exaggerates and destroys freedom of choice over the exercise of ability to be happy or powerful or normal or active. It destroys power, destroys freedom of choice.

Wherever that zone or area is you'll see the individual worsening. He is on a dwindling spiral. But he himself is generating it.

The intention to be right is the strongest intention in the universe. Above it you have the effort to dominate and above that you have the effort to survive. These things are strong. But we're talking here about a *mental activity*. A *thinking activity*. An *intentional activity*.

Survival—that just happens. Domination—that just happens. Those are not *intended* things. But you get down along the level of *intended* and it's right or wrong. The strongest intention in the universe.

It is always an aberrated solution. It always exists in PT and is part of the environment of the pc. He's generating it. It's his solution. Overwhelmed as he is by it, he is still generating it. It's aberrated because it's an uninspected solution. And it is something that everyone unintentionally or otherwise is telling the pc is wrong and causing him to assert that it is right. The perfect solution when he first got hold of it. But now it monitors his life; it's living his life for him. And it doesn't even vaguely begin to take care of his life.

That is the anatomy of the service facsimile.

You are going to find these on any pc you audit. A service facsimile is the clue, the key to a pc's case. The route to succumb which he blindly asserts is his route to survival. And every pc has more than one of these.

Fortunately, we have the tech to salvage him. We are the only ones who do.

**FOLLOWING UP ON DIRTY NEEDLES**

(Ref: HCOB 3 Sep 78	DEFINITION OF A ROCK SLAM
HCOB 28 Jun 62	DIRTY NEEDLES
HCOB 17 May 69	TRs AND DIRTY NEEDLES
E-Meter Drills	
17, 20, 21:	<i>THE BOOK OF E-METER DRILLS</i>
TAPE: 6205C23	
SH TVD-7	FISH & FUMBLE, CHECKING DIRTY NEEDLES.)

The only valid definition of a dirty needle is given in HCOB 3 September 78, DEFINITION OF A ROCK SLAM, as:

“DIRTY NEEDLE: AN ERRATIC AGITATION OF THE NEEDLE WHICH IS RAGGED, JERKY, TICKING, NOT SWEEPING, AND TENDS TO BE PERSISTENT. IT IS NOT LIMITED IN SIZE.”

It is caused by one of three things: 1) the auditor's TRs are bad or 2) the auditor is breaking the Auditor's Code or 3) the pc has withholds he does not wish known.

The definitions are pointed up in the above HCOB because it is *vital* not to confuse a dirty needle with an R/S. They are distinctly different reads. The difference is in *the character of the read*: it has nothing to do with size.

Auditors, supervisors and C/Ses must understand the difference between these two reads and must be able to recognize each instantly when they occur.

Because of the underlying causes of these two different types of reads they are both most apt to appear when Confessionals are being done or when areas of O/Ws are being addressed. But they are different and the auditor must know the difference cold.

A dirty needle must not be ignored especially when doing any type of Confessional action.

If the auditor's TRs are in and he is maintaining the Auditor's Code, a dirty needle, taken up, will either clean or turn into an R/S. It is not to be overlooked.

The dirty needle is your hottest string to pull in finding and turning on an R/S. *Whatever is* behind it, ignoring it will cut the comm line between auditor and pc and wreck the auditing comm cycle.

The area that is producing a dirty needle, when questioned to get full data, will either clean or go into an R/S.

The area is considered clean when you can go over the area that gave the dirty needle and it no longer produces a dirty needle.

If it still produces a dirty needle then there is more to the withhold itself or something the pc isn't voicing about the withhold or how he feels about the withhold, or the auditor's TRs are terrible, but—pursued and taken up with auditor's TRs in—this dirty needle will either turn into an R/S or it will fully clean. Until it does, however, it is still a dirty needle.

The procedure for fishing a read is covered in AUDITING DEMO TAPE 6205C23 SH TVD-7, "FISH AND FUMBLE, CHECKING DIRTY NEEDLES." Cleaning a dirty needle is covered in E-Meter Drills 17, 20 and 21 as well, and Class II auditors and above should be very adept at this.

The rule is: DON'T IGNORE DIRTY NEEDLES. ALWAYS FOLLOW THEM UP.

HCOB 3 Sep 78	Definition Of A Rock Slam
HCOB 10 Aug 76R	R/Ses, What They Mean

---

A service facsimile is a brother to R/Ses and evil intentions.

This is easily seen when one understands the anatomy of the service fac and the right/wrong, dominate and survive computations that enter into it. And when one understands that an R/S always means a hidden, evil intention and that the total reason for an R/S is to make wrong. In order to get someone to succumb they have to be wrong.

Way back up there the idea preceding the service fac was right, really right. Then it came down a bit and was a method of survival and then it was a method of dominating and then it was a method of being right in order to make others wrong.

And in that contest one got enough overts so that the communication line took a switcheroo. What was right about it is now wrong about it and what was once wrong is now *right*. A=A=A enters into the situation where rightness becomes wrongness. All of his overts get piled up on one of these fixed ideas, or what we call a service facsimile.

It isn't actually a facsimile at all. It's the guy himself keeping facsimiles in restimulation because he "knows" what's best. The person himself is generating the fixed idea; it is not the bank.

It isn't what aberration the individual is dramatizing. It's what aberration does the individual *dredge up* in order to make somebody wrong. It isn't the accidental thing you think it is. It's *intended*.

The intention is to be right and make others wrong, to dominate others and escape domination oneself, to aid own survival and hinder the survival of others. That is the service fac—blood brother to the hidden, evil intention that is behind the rock slam.

This does not mean you will necessarily see R/Ses on every service fac you run. It does mean that WHERE A PC IS R/SING IN AN AREA YOU HAVE AN AREA OF A HEAVY, A SEVERE, SERVICE FAC.

Know when you see an R/S that the individual is in the grip of an evil intention which he himself is generating. He intends that area or subject on which he is R/Sing nothing but harm. Calculatingly, covertly, he will go to great lengths to carry his intentions out, at all times carefully concealing the fact.

The evil intention is not limited to terminals. He's not R/Sing on a terminal; he's R/Sing on the evil intention. The evil intention can associate with many terminals.

The R/S dominates the individual; it is the person. He has been overwhelmed by it. In that area he has no ability to reason; he has no freedom to choose. The evil intention is substituted for livingness. It is his safe solution to life, his service facsimile.

The service fac does not respond to ordinary auditing because in the course of ordinary auditing it does not get inspected. It, by its nature, forbids inspection. But when addressed at the right/wrong level the pc gives it up easily because in that area he has no power of choice.

#### MORE THAN ONE SERVICE FAC PER PC

We have had, for many years, service fac processing with which to handle these obsessions, and thus to handle the person who R/Ses.

*But it is not just finding one service facsimile. You find many service facs which then add up to the big one. At Saint Hill in the mid-60s this was commonly associated with R/Ses.*

It was what the pc had *done* with the service fac to make others wrong which was important, not just finding it. Early on, the tech included auditing them out with Dianetics. And you found many, many more than one on each pc. We used to get complete character changes with this.

The full tech on this has been submerged over the past several years. It is probably this omission of requiring several service facs to be run and then auditing them out with Dianetics that has resulted in so many R/Sers going on up undetected.

As of this writing the full tech has been exhumed and we have now New Era Dianetics tech to help strip these packages down and take them apart at their basics.

So we not only have a more thorough means of handling service facs than ever before—we also have a more reliable route to the handling of an R/Ser.

#### BUT IT'S MORE THAN ONE SERVICE FAC PER PC.

You may audit off one, two or three apparent service facsimiles that all answer up to the complete description of a service fac. And they will run. But all are actually leaning on the central service fac that is in restimulation in PT. As you take these lesser service facs off the central one comes to view.

On the first ones you find, the most you can hope for is you found something that blew the TA down and moved you closer to finding the main service fac. So you take them.

If you've found a service fac the needle will be looser and the TA in reasonable range. And it will run on the right/wrong, etc. brackets and the pc will get off automaticities. When you've finally found several and walked it all the way through to *the* service fac it's as if all the other service facs you've been peeling off are like the bands of trees and sod that lie up against the mountain peak. So you take the service facsimiles and run them as you find them. You unburden the cliffs before you pull the mountain out by the roots.

As you're running out the first service facs you're reversing the dwindling spiral, you're restoring the individual's ability to handle his environment because he's now seeing it, he's now beginning to confront it.

And by the time you've pulled the main one—the mountain—out by its roots you've returned him to sanity. He is now able to inspect; he no longer needs a "safe solution."

It is the most dangerous thing in the world to have a safe solution, because that is the hole out of which sanity drains.

---

NOTE: Dianetic Clears may be run on service facs but only with any Dianetics steps deleted, as they are not to be run on Dianetics.

---

We are into a new echelon of service facsimile running.

At Saint Hill in the mid-60s many, many service facs were found on each pc and the earliest service fac running included the use of Dianetics.

This was later omitted from service fac procedure and service facs were handled solely with Scientology tech by running off the automaticities on the computation to cognition, F/N and VGIs in the pc.

Phenomenal gains and case changes were made on pcs with that tech alone—all of them valid. That tech has been retained as a vital action to service fac handling.

Now, with the advent of New Era Dianetics, service fac handling has been restored to its full technology.

New Era Dianetics has opened the door to a more complete and finite handling of a service fac, with precision and exactness, than we have had heretofore. We no longer just find a service fac, audit off the automaticities, key it out and forget it. We audit it out fully and terminatedly, using New Era Dianetics to take it down to its basics and erase those.

This in no way contradicts the fact that there were many pcs who, with a service fac found and the automaticities taken off, were able to actually then blow the service fac computation upon inspection.

What it does make possible is the actual erasure of a service fac and its residuals on every pc, one for one. And not just one service facsimile per pc, but many.

An auditor who has been trained on service fac running prior to this bulletin will need the tech he already has plus an excellent command of New Era Dianetics tech. If he has not done the New Era Dianetics Course it will be required before attempting to run Routine 3SC-A. A Class IV auditor who has already done the New Era Dianetics Course need only review it in order to be able to handle all the steps of the new, full service fac procedure.

### SERVICE FACSIMILE HANDLING REVISED BY STEPS

Before you can run flows on a service facsimile you must first find it. You want the *pc's* service facsimile. You don't find a service facsimile by listing for it on flows. You find the *pc's* service facsimile and run it on the flows.

The sequence is: You list for the *pc's* service fac, find it, run the automaticities off it; then you run the service fac itself on R3RA, engram running by chains. It is run to basic and full Dianetic end phenomena.

You don't leave a service fac until you have taken it apart and blown it at its very roots.

Then you list for another service fac, using a different listing question, and handle it fully. And another, and another. A *pc* can have many, many service facsimiles. You peel them off until you find *the* main service fac at the core of the case. And you handle that one fully, as you do the others, per the steps above.

Needless to say, you are going to see some remarkable results.

### FULL SERVICE FACSIMILE PROCEDURE

#### PRELIMINARY STEPS:

- 0a. Put in the R (Reality) Factor with the *pc*, telling him briefly what is going to be done in the session.
- 0b. Clear "computation" very thoroughly with the *pc*. Use the Tech Dictionary, HCOB 23 Aug 66, SERVICE FACSIMILE, and any other reference you feel the *pc* may need. Have him demo it until you are certain *he fully* understands it.
- 0c. Clear the bracket commands (right/wrong, dominate, survival) first, using "Birds fly" as a sample service facsimile. Clearing the bracket commands is done at this point so you will be able to use these questions immediately when the service fac is found without putting stops on the *pc's* first rush of automaticities coming off.
- 0d. Then, clear the listing question.

#### STEPS OF THE PROCEDURE:

- A. List and null for the *pc's* service fac, using the question:

"In this lifetime, what do you use to make others wrong?"

You want a BD F/N item that is a *computation* (not a doingness, beingness or havingness).

When you get it, indicate the item. Then indicate the F/N. Then, despite the BD F/N, go on to the next step of the handling.

B. Run the service fac found in 1 on the brackets:

1. In this lifetime, how would (service fac) make you right?
2. In this lifetime, how would (service fac) make others wrong?
3. In this lifetime, how would (service fac) help you escape domination?
4. In this lifetime, how would (service fac) help you to dominate others?
5. In this lifetime, how would (service fac) aid your survival?
6. In this lifetime, how would (service fac) hinder the survival of others?

These are run as follows:

Give the pc the first question, "In this lifetime, how would (service fac) make you right?" and let him run with it. He will have a rush of answers, answers coming too fast to be said easily, at this stage. Don't repeat the question unless the pc needs it. Just let him answer 1-1-1-1-1-1-1 (he may give you as many as 50 answers) until he comes to a cognition or runs out of answers or inadvertently answers Question 2.

Then switch to Question 2: "In this lifetime how would (service fac) make others wrong?" Treat this the same way, i.e. let him answer 2-2-2-2-2-2-2 until he cognites or runs out of answers or starts to answer Question 1. Then switch back to Question 1, same handling, back to Question 2, same handling, as long as pc has answers coming easily. Upon cognition and F/N, acknowledge, indicate the F/N and end off on 1 and 2.

Now give him Question 3: "In this lifetime how would (service fac) help you escape domination?" and let it run by the same method as above. When this seems cooled off, use Question 4: "In this lifetime, how would (service fac) help you to dominate others?" Use Questions 3 and 4 as above, as long as pc has answers coming easily. Upon cognition and F/N, acknowledge, indicate the F/N and go on to the next bracket.

Using the same method as above, give him Question 5: "In this lifetime, how would (service fac) aid your survival?" When he's run out on 5-5-5-5-5-5, switch to Question 6: "In this lifetime, how would (service fac) hinder the survival of others?" Use Questions 5 and 6 as above as long as pc has answers coming easily. Let him get off all the automaticities and come to a cognition and F/N. Acknowledge and indicate the F/N.

At this point it is safe to end off on running the brackets. The idea is not to beat the process to death. The pc will have automaticities coming off thick and fast early in the run. These must be gone and the pc bright, F/Ning and VGIs when you end off. You are only trying to end the compulsive character of the service facsimile found and get it off automatic and get the pc to see it better at this stage, not to bleed the process of every bit of TA action.

Running the service fac in the brackets will result in a major cognition, which could occur at any point during this running. When it does occur it is the EP of this step of the service fac handling. End off and go onto the R3RA step.

NOTE: In running a Dianetic Clear on service facs, you would end off running *this* service fac at this point, when the pc had reached a good cognition, F/N and VGIs. Do NOT run the Dianetic actions of service fac handling on a Dianetic Clear, as these pcs are not to be run on Dianetics. When you have completed one service fac on Steps A and B. you can then list for another service fac and repeat the procedure.

(NOTE: If the service fac found on any pc did not run on the brackets, it would need to be prepchecked. See sections “When Running Off The Automaticity” and “When To Prepcheck” below.)

- C. Run the service fac R3RA Quad, each flow to EP. It is not run narrative and it is not preassessed; otherwise full New Era Dianetics tech is used, per HCOB 26 June 78R II, New Era Dianetics Series 6, ROUTINE 3RA, ENGRAM RUNNING BY CHAINS.

The service fac phrase itself is used as the running item.

The commands for running a service fac on R3RA Quad Flows are:

FLOW 1: “Locate a time when you used (service fac).”

(Example: “Locate a time when you used *all horses sleep in beds.* “)

FLOW 2: “Locate an incident of your causing another to use (service fac).”

FLOW 3: “Locate an incident of others causing others to use (service fac).”

FLOW 0: “Locate an incident of you causing yourself to use (service fac).”

Take each flow down its chain of incidents to the basic and full Dianetic EP: F/N, postulate (postulate off = erasure), and VGIs.

That will be the end of all vestiges of that service fac.

- D. List for another service fac on the pc, using the listing question:

“In this lifetime, what do you use to dominate others?”

When you have the service fac, repeat Steps B and C above.

- E. Find another service fac on the pc with the listing question:

“In this lifetime, what do you use to aid your own survival?”

Handle the service fac per Steps B and C above.

- F. Continue to find and handle service facs on the pc, using, in order, the following listing questions:

1. “In this lifetime, what do you use to make yourself right?”

2. “In this lifetime, what do you use to escape domination?”

3. “In this lifetime, what do you use to hinder the survival of others?”

Further listing questions which can be used are given on HCOB 30 Nov 66, ASSESSMENT FOR SERVICE FACSIMILES.

You will need to find and handle several service facsimiles on the pc which will then add up to the big one.

#### WHEN LISTING FOR THE SERVICE FACSIMILE

You are listing for a BD F/N item. Write down each computation the pc gives you exactly as he states it, VERBATIM, with its read, no matter how improbable, non sequitur or inane it may sound.

The service fac operates like a magnet as you're listing. You've given the pc the question and as the question is in the vicinity of the service fac you've already ticked it. It draws the pc's attention to it. He's listing along and suddenly he'll put a non sequitur item on the list. It doesn't make sense. It doesn't even answer the question, but there it is. Because his attention is being pulled to this inevitably. You're asking him for answers and he gives you the rightest answer he knows—"People always jump off the Empire State Building." That's the solution. That solves everything. It blows the TA down. That's the service fac.

Indicate the item to the pc; then indicate the F/N.

You're now ready to run it in the brackets.

#### WHEN RUNNING OFF THE AUTOMATICITY

If you've found a service fac the pc won't be able to stay out of it, I guarantee you.

The first question is always how would it make him right. (Never how would it make him wrong. Never, never, never.) The automaticities should start with the first question. If not, ask him how it would make others wrong. You almost always enter it at the level of right/wrong. But don't make the blunder of thinking it can't be a service fac if it doesn't enter at that level. Try it on the other levels. It can enter at the level of dominate; it might enter at the level of survival.

But if—on one of those—the pc doesn't immediately jump in and swim into the whirlpool, it's not it. If he tells you, "Well, let's see . . . make me right, no, hmmm..." or "... escape domination ... no, doesn't make sense," that's not it.

If he says that isn't it, then that isn't it. Don't hang him with a wrong service fac because it's too easy to find a right one. They abound.

If he hasn't jumped in and swum madly to the center of the whirlpool and gotten embroiled in this thing, it's not it. Because that's the first thing they want to do with a service fac—drown.

When you have the right one you'll get the automaticities coming off thick and fast. Don't stop the avalanche with acknowledgements. Don't stop it with a new question. Let it run out.

It's not one auditing question for one answer. It's one auditing question for one waterfall.

#### WHEN TO PREPCHECK

When the item found as a service fac won't run on any of the brackets you prepcheck it to EP (F/N, cog, VGIs). Ref: HCOB 14 March 71R, F/N EVERYTHING.

A rightness/wrongness computation doesn't surrender to normal auditing because it is a service fac. The pc has a vested interest in holding onto it. He won't be able to it'sa it on a Prepcheck. Thus, a service fac, if present, will turn on mass on a Prepcheck.

The Prepcheck is a series of types of decisions thetans make about things. So if it doesn't prepcheck the Prepcheck must be in conflict with the rightness and wrongness.

Reversely, if it's not a service fac it *will* prepcheck, and you polish it off by that method to EP.

Then go back to the list and find a service fac that will run.

## COMPLETING SERVICE FACSIMILE HANDLING WITH R3RA

Even when the pc has gotten off the automaticities, has cognited and is comparatively free of the compulsive character of the service facsimile, there is more to be handled.

Running the service fac using R3RA enables him to run out what he has *done* with it to make others wrong, etc. These will be the actual most charged incidents in which he's used it, which will have accumulated in his wake as he went along substituting the service fac for himself and never inspecting the consequences. He will now be free to inspect those parts of the track as himself, and to inspect as well the effects of the service fac on the other flows.

Finally, the use of R3RA, engram running by chains, enables him to fully erase the somatics and engram chains which have their roots in the service fac, or vice versa—as well as the postulates underlying them.

## ENDING SERVICE FAC RUNNING

Service fac running can be ended off when you have fully run many service facs (which will lead to the main service fac). When the main service fac has been run to full EP, service fac handling is complete.

NOTE: It might happen (rarely) that you get the main service fac on the pc on your first listing and nulling. It will be rare because the main one does not usually come to view until the others have been taken off. You run it, of course. Any service fac, run, produces change, but on this one you will see the pc changing character before your eyes. The results are quite astounding.

But realize that he does have other, lesser service facs which do not simply dissolve because the main core service fac is now gone, even though they have been leaning upon it. You will need to L&N for these and completely clean the pc of service facs.

The main core service facsimile will be the one the pc has used as a solution to *all* of life. When found and run it will be unmistakable to both the pc and the auditor. When this one has been completed on all the steps above, as well as the lesser service facs surrounding it, you will have attained the EP on service fac running.

You will have brought about a complete character change in the individual, returned his freedom of choice and his freedom to inspect and enabled him to be truly right.

And that is the stuff of which sanity is made.

This level is actually the sanity level.

HCO BULLETIN OF 7 SEPTEMBER 1978R  
REVISED 21 OCTOBER 1978

*(Revisions in this type style)*

Remimeo

(This HCOB cancels HCOB 8 April 70 Iss II, MORE ON PREPCHECKS and BTB 10 April 72RA PREPCHECKS. The correct procedure for handling an ARC break uncovered during a Prepcheck is contained herein.)

### **MODERN REPETITIVE PREPCHECKING**

Prepchecking in varying forms has been with us since the early sixties and has quite a long history which is available in the Saint Hill Special Briefing Course tapes and the Tech Volumes.

The latest form of Prepchecking, Repetitive Prepchecking, has been used by many with very good results for quite some time. It is a simple and very workable process which can be widely used.

Since there has been no comprehensive bulletin on Modern Repetitive Prepchecking, I thought I would describe and clarify it for you.

---

There are 20 Prepcheck buttons, *which* are used in the *following* order:

SUPPRESSED  
EVALUATED  
IN VALIDATED  
CAREFUL OF  
DIDN'T REVEAL  
NOT-ISED  
SUGGESTED  
MISTAKE BEEN MADE  
PROTESTED  
ANXIOUS ABOUT  
DECIDED  
WITHDRAWN FROM  
REACHED  
IGNORED  
STATED  
HELPED  
ALTERED  
REVEALED  
ASSERTED  
AGREED WITH

Virtually any charged subject or area can be prepchecked. The buttons are used to take charge off the subject.

A question is formed around each of the buttons, and each question is run repetitively to F/N, cog, VGIs. The button is prefaced with the subject ("On going to school," "On auditing," etc.) or with a time limiter ("Since last August," "Since your last session," etc.). Both subject and time limiter can be used. Thorough use of the Prepcheck buttons will blow the charge from that item.

The only time Prepchecking cannot be done is while running Dianetics. To do so mushes up engrams.

The question has to be tailored to the button. So we have:

“(Subject or time limiter) has anything been (button)?” or

“(Subject or time limiter) is there anything you have (*been*) (button)?” or

“(Subject or time limiter) is there anything you (button)?”

In the case of the button Mistake Been Made, the command would be: “(Subject or time limiter) has a (button)?”

## THE PROCEDURE

*0. If this is the pays first Prepcheck, or if it has not been previously cleared, fully clear the definitions of each of the Prepcheck buttons with the pc, clear the Prepcheck questions, and go over the procedure with him so that he understands how it will be run.*

*1. Clear the subject or time limiter you will be using.*

*2. Let the pc know you will be checking the first question on the meter.*

*“On has anything been suppressed?” (or appropriate variation, depending on the use of the time limiter or subject.)*

*If the question does not read instantly, leave it and go on to the next Prepcheck question. You do not run unreading questions, so there’s no sense in sitting there, waiting for the pc to rummage around for an answer when the meter shows there is no charge on the question in the first place.*

*If the question reads, go right into it and run it repetitively to F/N, cog, VGIs.*

*3. Check the next Prepcheck button. “On has anything been evaluated?” If reading, take to F/N, cog, VGIs per the above procedure.*

*4. Handle each Prepcheck button until you have reached the EP of a big win, major cog on the subject or regained ability, accompanied by an F/N and VGIs.*

In some cases you may have to prepcheck all the buttons before the EP is reached, but be alert. Recognize the EP. Don’t overrun.

There is no need, when the pc *runs* out of answers, to *recheck* the question. The question has already read, so you just run it *repetitively* to F/N, cog, VGIs. If the pc insists he’s out of answers, it may be that an out rudiment or some situation requiring TR 4 or other handling has cropped up. Find out what’s going on and handle. Do not just abandon the Prepcheck button because it does not now read. Take it to its EP!

When a Prepcheck uncovers an ARC break, you handle the ARC break with ARCU CDEINR E/S to F/N. The ARC break thus handled, that is the EP for that Prepcheck button. You then go on to the next button and check it.

Prepchecks are a very effective method for releasing charge and provide much relief. And they’re very simple to do, especially in their most modern form. So just study up, drill it well, and do it with your pc. You’ll have fine results.

**MINI LIST OF GRADE 0-IV PROCESSES**

**SPECIAL NOTE:** The list below is by no means a complete list of Grade 0-IV processes. Many, many processes exist on the Grades 0-IV on which a preclear may need to be audited to achieve the full end phenomena (ability gained) for a grade, and which would also be required for a pc run on Expanded Grades.

The following is a MINI LIST of Grade 0-IV processes.

At the completion of each of the training levels, the student audits the processes on this list for that level.

Commands for Flows 1, 2, 3 and 0 (Quads) for those processes that are run Quad are to be found on BTBs 15 November 1976, Issues I through VI, "0-IV Expanded Grade Processes - Quads," Parts A, B, C, D, E and F.

**URGENT- IMPORTANT**

**DIANETICS FORBIDDEN  
ON CLEARS AND OTS**

New Era Dianetics or any Dianetics is NOT to be run on Clears or above or on Dianetic Clears.

This applies even when they say they can see some pictures.

Anyone who has purchased NED auditing who is Clear or above must be routed to an AO or Flag to receive the special NED Rundown for OTs. They are NOT to be run on regular New Era Dianetics.

Anyone who is Clear but not OT III is to get through OT III immediately so he can receive this special rundown.

The EP of this rundown is: CAUSE OVER LIFE.

**OVERRUN BY DEMANDING  
EARLIER THAN THERE IS**

When you go past the postulate or insist on an earlier similar when there isn't one the pc can go later or jump chains and put into action other phenomena. This, and bad assessment is when you get tangled cases and repair.

OVERRUN OF BASIC

When you get a blowdown and the pc tells you the postulate and then you tell him to return to the beginning of the incident again, you can overrun the incident and turn the analytical concept of it back into a solid picture which will just get more and more solid and you'll think there was nothing erased.

What you're erasing, actually, is the basic postulate that made the chain occur in the first place.

OVERRUN OF NON-BASIC

In engram running by chains, when you demand a pc go through the incident more than twice, and it is not basic that incident will grow more solid. A good Dianetic auditor watches his TA and the moment that TA starts to rise while running an incident on the chain he knows there is an earlier similar incident. It is told to him by the TA, which is saying this incident is getting more solid.

When he sees this, he immediately asks for an earlier incident after either Step 9 or Step C of R3RA.

When you ask for earlier beginnings and then run the incident again and keep doing this you can run a non-basic through several times and it will inevitably become more solid. The degree that this can exert pressure on a pc is very great and is extremely uncomfortable.

A really smooth Dianetic auditor never increases the solidity of the bank. It is a non-determined point whether an earlier beginning alone will, if found, decrease the solidity of a non-basic.

AMOUNT OF TA

A Scientology auditor works for amount of TA out of a process.

A Dianetic auditor works for the eradication of a chain. The Dianetic auditor could get lots of TA if he overran every non-basic engram, but it is this that he does *not* want.

The Dianetic auditor is not concerned with the amount of TA that he gets. A TA has to go up before it goes down. In running an engram chain if you let a non-basic engram raise the TA more than a thousandth of an inch at Step 9 or Step C and do not immediately ask for an earlier incident, you goofed as you will make the pc's bank more solid.

Scientology audits by the amount of TA. The most expert Dianetic auditor audits with a minimum of TA.

## ASSESSMENTS

A lousy job of assessment, trying to run unreading items, will find the pc going into chains that are not ready to be run and will cause trouble, which consists of many unwanted phenomena such as pc unable to find incidents, jumping chains, etc.

URGENT - IMPORTANT

**R3RA ENGRAM RUNNING BY CHAINS AND  
NARRATIVE R3RA - AN ADDITIONAL DIFFERENCE**

Since the release of New Era Dianetics I have been keeping a close eye on the running of NED on an extensive basis. Pcs have been experiencing tremendous and quite amazing gains and resolving areas of their cases which have never before been handled so fully.

This new and more precise Dianetics tech can and is changing the lives of many across the planet.

When this tech was researched and developed I wanted to get it into your hands immediately. Now that it is in broad use, there is a wealth of data coming in on its application and the use of the new commands and handling of EPs. From this, I have located a point where NED, as originally issued, could go wrong on some pcs where earlier Dianetics did not.

As it has always been my practice to provide you with the most accurate, proven and workable tech as it is developed, and as NED is a more powerful tech than any earlier Dianetics, it is important that you have this data.

The point referred to above is on the auditor asking for earlier beginning or earlier incident.

The basic stable datum is and always has been: TA up even slightly at the end of pc's run through the incident = something earlier. The "something earlier" could be an earlier incident or an earlier beginning to the incident being run.

There is a slight difference between the way these two are handled in R3RA Engram Running By Chains and R3RA Narrative running, because of what the auditor is trying to accomplish with each. The difference is in the order of importance of earlier beginning and earlier incident.

**R3RA ENGRAM RUNNING BY CHAINS**

In R3RA Engram Running By Chains you are following down and erasing a somatic chain. Here, in almost all cases, an earlier incident on the chain takes precedence over an earlier beginning to the incident being run.

Therefore, if the TA is even slightly up at the end of the pc's run through an incident on the chain, the auditor *asks first* for an earlier incident and if there is none (or none the pc can yet see) he asks for an earlier beginning to the incident being run.

Where you find an earlier beginning to *an incident on the chain that is not the basic incident you* rerun that incident only *once* more through from the earlier beginning to the end of the incident. If TA does not come down on that run through, there's an earlier incident.

The whole point being made here is that on engram running by chains you always want the earlier incident as soon as that is available. Thus, you ask for the earlier incident first, then, if necessary, for an earlier beginning.

### R3RA NARRATIVE RUNNING

In R3RA Narrative running you are handling one single narrative incident, such as an accident, a physically or emotionally painful experience, an illness, loss, or period of great emotional stress, which is not, ordinarily, part of a chain.

You are running that one incident many, many times through to erasure. The clue to erasure of a narrative incident lies in locating earlier beginnings to the incident. It will be found that the pc finds earlier and earlier moments when he was told or had an awareness that the incident was going to occur.

Thus, in running R3RA Narrative, it is the earlier *beginning* that takes precedence, and that is what the auditor asks for after each run through a narrative incident. Only if the incident starts to grind (no change of content, etc.), after having repeatedly searched for an earlier beginning, would you ask for an earlier similar narrative incident.

This data on earlier beginning is a new breakthrough on *narrative incident* running and erasure, and the NED auditor should fully understand it and the tech on which this additional difference between the two procedures is based.

As pointed out in other issues, erasure of the somatic chain *or* the narrative incident occurs when the postulate is obtained, and it is vital that the auditor not go beyond that.

New Era Dianetics Series 6 and 7 have been revised to incorporate this difference in earlier incident and earlier beginning handlings.

I wanted you to have the full and exact data on why these commands are being slightly revised.

This should make for even smoother running of New Era Dianetics all around.

**CLEARs, OTs AND R/SES**

(Ref: HCOB 12 Sep 78, URGENT! IMPORTANT!  
DIANETICS FORBIDDEN ON CLEARs AND OTs.)

If there are any Clear or OTs who are R/Sing they are not R/Sers. It is an entirely different handling, and this handling is incorporated in the New Era Dianetic Rundown for OTs.

If a pre-OT staff member is R/Sing and dramatizing the R/Ses and has therefore been put on an RPF, he is required to receive full handling per the Special NED Rundown for OTs before graduating that RPF. If he is Clear but not yet OT III, he is to get up to and through OT III as fast as possible so he can receive this special rundown.

The New Era Dianetic Rundown for OTs can only be delivered at AOs and at Flag.

**CONFIDENTIALITY  
OF UPPER LEVEL RUNDOWNS**

In order to safeguard the materials of confidential rundowns and levels and to prevent their unauthorized use or misuse, the following is to be done:

1. Before being given access to confidential materials such as “NED for OTs,” any student, auditor, Case Supervisor, Course Supervisor, etc., must sign a bond not to disclose the materials or to communicate them to any unauthorized person, nor to use them in an unauthorized manner, nor to use them without being properly trained by checksheet and qualified. “NED for OTs” materials may only be studied by contracted staff members properly enrolled on course.
2. Folders of pre-OTs being audited on “NED for OTs” must be colour flashed with red diagonal slash across corner of folder, and the folder marked as confidential, with the level on folder, and such folders must be kept secure.
3. The HGC auditors and C/S must be trained at Flag before the AOs can deliver “NED for OTs.”

### POSTULATE OFF EQUALS ERASURE

The EP of a Dianetic chain is always always always the postulate coming off. The postulate is what holds the chain in place. Release the postulate, the chain blows. That's it.

You must recognize the postulate when the pc gives it, note the VGIs, call the F/N and end off auditing on that chain.

Even if you get an F/N as the incident is erasing, you don't call it until you've gotten the postulate.

1. When it appears that you have reached the basic incident of the chain and that it is erasing, after each pass through the auditor asks, "Has the incident erased?"
2. When the pc has stated that it has erased the auditor should also expect a postulate to be volunteered by the pc.
3. If the pc says the incident has erased, but no postulate (made during the time of the incident) has come off and been volunteered by the pc the auditor should ask, "Did you make a postulate at the time of that incident?"

(Note that the postulate will usually come off in the form of a cognition. However the pc may give a cognition which does not contain a postulate. If this is the case, simply ask, "Did you make a postulate at the time of that incident?")

4. The pc does not have to state that the incident has erased. Once he has given up the postulate, the chain has blown. You will have an F/N and VGIs. This is a full Dianetic EP. NOW you call the F/N. Do not call F/Ns until you have reached the EP.

You must learn to recognize a postulate when you hear one. It is a vitally important skill as postulates *can* be confused with bouncers and deniers when they are in no respect similar and require totally different handlings.

"Women are no good" is an obvious postulate.

"That's the way men are" is a postulate.

"I can't stay here" is a bouncer.

"I can't remember this" is a denier.

To push a pc earlier after he has given the postulate is a severe invalidation of the erasure and you will soon have the pc believing that nothing erases, anyway.

To cause a pc to search for further, earlier incidents on a chain (which is no longer there) will get him into some very serious overrun. He may pull in another flow of the item, he may think the erased incident is still there and try to mock it up, or he may find another incident of an entirely different chain and start to run that.

Dianetic overruns are repaired by assessing and handling the L3RF. But the real cure is to flawlessly handle Dianetic EPs by getting the postulate, F/N and VGIs and then promptly ending off on that chain with a bright and happy pc.

Recognizing the postulate when it comes off and never never running a pc beyond it are vitally important to the success of New Era Dianetics sessions.

It's the POSTULATE we are going for in New Era Dianetics.

### A.D. 28 THE YEAR OF TECHNICAL BREAKTHROUGHS

This year has so far resulted in technical breakthroughs from one end of the Grade Chart to the other.

Each of these is the result of years of research and in recent months one major discovery has led to another with great rapidity and astounding success. On a research line one sometimes hits pay dirt, this time I struck pure gold, not once, but several times and we now have new major grades and rundowns at both ends of the Bridge.

New Era Dianetics has already been released and is internationally reported to be working fabulously well producing 80% more gain.

An attempt to run NED on an OT resulted in a phenomenon which caught my attention, and on further investigation brought to light the fact that you cannot run NED, or any Dianetics for that matter, on a Clear (Dianetic or Scientology Clear) or above. Research into this paid off handsomely with a fantastic breakthrough for Clears and OTs. I have now developed an entirely new rundown called "NED for OTs." This deals with living lightning, the very stuff of life itself. Run exactly correctly by the book it produces remarkable results in the OT band, and has made it possible for me to now release OT VIII. "NED for OTs" is a highly confidential rundown done by a Class IV, OT III auditor, called an Advanced Courses Specialist (ACS), who is specially trained on its rundown and techniques. It is now forbidden to run NED on Clears or above. From Grade VI to OT III is the Non-Interference Zone, during which nothing should be run. Persons in this zone should move on up to OT III so that they may be audited on "NED for OTs." This rundown will be delivered in AOs and Flag to OT IIIs and above. Clears and OTs who have paid for NED will now receive "NED for OTs" which in the pilot auditing produced results beyond their wildest dreams. While much of it is confidential I can tell you that the first step of "NED for OTs" is designed to raise perceptions, especially theta perception, and as for the rest of the rundown . . . surprise, surprise, surprise!

#### OT VIII

Although OT VIII has been researched earlier, I knew there was something that had to be handled before I could release OT VIII. "NED for OTs" does just that, and now I am very pleased to announce the release of OT VIII, which will be available at AOs and Flag to OTs who have completed "NED for OTs." It is a Solo level which will fortify an OT already in excellent shape from "NED for OTs."

#### END OF ENDLESS DRUG RUNDOWNS

These breakthroughs at the OT level suddenly brought to view the reason why Drug Rundowns become endless when they do! And gave the way to resolve this. Now the Drug Rundown will be a comparatively short action and many many Scientologists will be able to make much faster progress up the Bridge. If you have had

an “Endless Drug Rundown” you can now look forward to getting it completed with ease and get on to your grades and OT Levels. In this druggie culture in which we live, it is a very timely discovery because now we can undo the mind-crippling effects of drugs (psychiatrists’ gift to Mankind) with great ease, and with complete rehabilitation of the individual in a few intensives of auditing.

The “End of Endless Drug Rundowns” has been incorporated into NED and will be available in all orgs by NED auditors as soon as they are trained on it, which will be in about 2 weeks.

#### TRAINING—FAST COURSES

All these new techniques require auditors and C/Ses fully trained and specialists in that level to audit and C/S them. It is forbidden for any auditor or C/S to run any of these without being properly trained and certified.

It is therefore just as well that I overhauled the training route earlier this year, resulting in fast training. We might even say the “End of Endless Training.” Today, it takes 4 weeks or less to train a NED auditor. The checksheet and course for training Class IV, OT III auditors, Advanced Courses Specialists who will deliver “NED for OTs” is also a fast but accurate training level. So we are able to train auditors and C/Ses rapidly to deliver these fabulous rundowns, and thus make them available to you very soon.

I have always said that as soon as I make technical discoveries I will get them to you as fast as I can, and I am doing that now.

I appreciate your support and help which makes it possible for me to do this research for you.

1978 is the Year of Technical Breakthroughs, there have been more this year than in any other year so far.

I am delighted to be able to make these available to you.

Love,

**THE END OF ENDLESS DRUG RDs**

The possibility of running a Drug RD flat on a pc is totally zilch and the reason for this is that there have been innumerable cultures in the several universes that were far more drug oriented than this one. And even on a person that's not manifesting drugs and hasn't taken any this lifetime, you can collide with these cultures and universes if you keep pushing it.

You can always find more drugs on the track. What you're interested in is this lifetime and this body. This doesn't mean you don't run track on the Drug RD, just don't push it. Don't ask for whole track drugs. When you list out the drugs a pc has taken, you only want the ones he has taken this lifetime.

The steps of the Drug RD have been rearranged to prevent this endless running and allow the rundown to be taken to a flat point of freedom from the harmful effects of this lifetime drugs and an F/Ning drug list.

Objectives are run on the pc. Each drug is run narrative followed by preassessment then prior assessment and then some more Objectives to put the pc back to PT after the engram running. The full and complete steps are listed in C/S Series 48RB, NED Series 9R and NED Series 2R.

Also, there is now a Drug RD Repair List which will handle bypassed charge caused by endless Drug RDs.

A lot of cases will now be sorted out and the speed of moving up the Bridge will be greatly increased.

**THE END OF ENDLESS DRUG RUNDOWNS**  
**DRUG RUNDOWN REPAIR LIST**

This repair list is used on a pc who has been over-audited on drugs, who has had an endless Drug Rundown, and/or has BPC on auditing on drugs.

Assess it Method 5 and handle in order of largest read.

1. WAS THE DRUG RUNDOWN CONTINUED PAST THE POINT WHEN YOU WERE NO LONGER AFFECTED BY DRUGS?  
(Indicate. Ask pc if he can find that point.) \_\_\_\_\_
2. WAS THE DRUG RUNDOWN CONTINUED PAST THE POINT WHEN YOU WERE RELEASED FROM THE EFFECTS OF DRUGS?  
(Indicate. Ask pc if he can find that point.) \_\_\_\_\_
3. ON THE DRUG RUNDOWN, WERE YOU RUN ON AN UNCHARGED DRUG?  
(Find which drug wasn't charged and indicate it shouldn't have been run. May be more than one uncharged drug; handle each.) \_\_\_\_\_
4. ON THE DRUG RUNDOWN, WERE YOU RUN ON AN UNCHARGED INCIDENT OR ITEM?  
(Find which and indicate it shouldn't have been run. There may be more than one; handle each.) \_\_\_\_\_
5. ON THE DRUG RUNDOWN, WERE YOU ASKED TO LIST WHOLE TRACK DRUGS?  
(Indicate that this may have restimulated drugs he was not affected by in this lifetime.) \_\_\_\_\_
6. ON THE DRUG RUNDOWN, WERE YOU PREVENTED FROM GETTING GRADES OR OTHER AUDITING?  
(Indicate.) \_\_\_\_\_
7. ON THE DRUG RUNDOWN, WAS AN INCIDENT OR CHAIN LEFT UNFLAT?  
(Indicate. Flatten the incident or chain R3RA.) \_\_\_\_\_
8. ON THE DRUG RUNDOWN, WAS AN INCIDENT OR CHAIN OVERRUN?  
(Indicate it. Spot the flat point.) \_\_\_\_\_
9. ON THE DRUG RUNDOWN, WAS A CHARGED DRUG NOT RUN?  
(Find which and handle per NED Drug RD steps.) \_\_\_\_\_
10. WAS THE DRUG RUNDOWN CONTINUED PAST THE POINT WHEN YOU FELT THE DRUG LIST WAS F/Ning?  
(Indicate. Ask pc if he can spot that point.) \_\_\_\_\_

11. WERE YOU NOT ALLOWED TO DECLARE YOUR DRUG RUNDOWN COMPLETE?  
(Indicate. Let pc say what he/she wishes on this.) \_\_\_\_\_
12. WERE YOU TOLD YOU WERE A DRUGGIE WHEN YOU WEREN'T?  
(Indicate it, and that pc isn't a druggie.) \_\_\_\_\_
13. WERE YOU AUDITED ON DIANETICS OR NEW ERA DIANETICS AFTER DIANETIC CLEAR?  
(If so, indicate that Dianetic auditing should not have been continued past Dianetic Clear.) \_\_\_\_\_
14. ON THE DRUG RUNDOWN, WAS SOMETHING ELSE WRONG?  
(Indicate. Have pc tell you what he/she thinks this was. If no F/N, turn it in to a Scientology C/S to handle.) \_\_\_\_\_

(Cancels HCOB 8 Apr 78, An F/N Is A Read)  
(Reissued to delete an incorrect reference.)

**AN INSTANT F/N IS A READ**

Ref: HCOB 2 Nov 68R Case Supervisor Class VIII  
The Basic Processes  
HCOB 20 Feb 70 Floating Needles and End Phenomena

An instant F/N is an F/N which occurs instantly at the end of the major thought voiced by the auditor or at the end of the major thought voiced by the pc (when he originates items or tells what the command means).

It will most usually be seen as a LFBD/F/N or a LF/F/N.

So what does this mean, "An instant F/N is a read?"

A read means there's charge there to handle. It means there is force connected with that significance which is available to the pc to view and run. It means that item is real to the pc.

An F/N means something has keyed-out.

Now a key-out is what we are looking for on many processes which are run. It means "Stop. End of process, end of rud, end of action." So an instant F/N does not always mean you should take up that item.

To sort this out, you will have to understand the basic mechanics of key-out, key-in and erasure. It will then become clear why an F/N is a read and *when it* is taken up. To confuse this could really mess up a pc.

For example, on ruds, Prepcheck questions, protest, overrun, rehabs, to name a few, an instant F/N would not be taken up. The EP of charge keyed-out has been attained.

But to ignore an instant F/N on Dianetic items and certain correction lists etc., will leave the pc with bypassed charge and major areas of case unhandled. The key is "Is a *handling* required on the item or is an F/N the legitimate EP?"

You will also have to understand that we are talking about INSTANT F/Ns. An F/N which continues to F/N through an assessment means "No Charge."

An instant F/N on an item means charge has just keyed-out on that item, and that it can key back in again. There are actions, as in Dianetics, where a key-out is not what you are going for. You want the postulate off the basic incident of the chain, which indicates you have an erasure.

In Dianetics an instant F/N takes precedence over all other reads. This is because, the pc, having just keyed-out the charge on that item, will find it most real. It will be the most runnable item. An instantly F/Ning item is taken up first. LFBD, LF, F and sF follow in their usual order.

The use of this thing is mainly a C/S use. A C/S can look down a column of two-way comm or look down an L and N list and spot what F/Ned. If the C/S doesn't realize that this was *the* item he can then take erroneously some LFBD item or F item out of the columns of two-way comm as the resulting item for that subject.

The use of an F/N as a read is almost entirely relegated to the next C/S except when used in Dianetics.

Example: A C/S is looking for the actual service facsimile in two-way comm. (You usually L and N to find service facs but you may have an instance where you found one in two-way comm.) The pc mentions several and finally one F/Ns. The C/S knows at once it is *the* service fac.

Example: A two-way comm has operated as a list and the C/S is trying to reconstruct it. Unless he knows that an F/N is a read he might overlook the actual item on that list which is the one which occurred immediately before the F/N. This is the item.

When used in the session itself the auditor has to know that an F/N is a read in doing L and N. The item which F/Ned is of course the item.

In a Dianetic session it is not uncommon to find a brief F/N occurring on a list or a preassessment. In Dianetics we are not interested in key-outs. We are interested in chains and erasures. So the "hottest reading item" on the list is the one that gave an F/N. Usually it will be a BD F/N. If the Dianetic auditor does not know that an instant F/N is a read he is likely to ignore the item that F/Ned.

In Dianetics, you will find that an F/N taken up again, will immediately key-in but this is what the Dianetic auditor wants.

The Scientology auditor is usually handling other phenomena and if he bypassed an F/N and kept on going the TA would go up and he would have trouble.

So the use of this principle is a very touchy thing and has to be understood.

Of course the first thing you have to know about is what an F/N looks like.

This tech fully understood and applied will mean the difference between a case beingfully *handled* and "just doing better." Understand it and use it. You'll see the difference in your results.

Class IV  
Grad  
Check sheets  
Snr VI

(Cancels and replaces BTB 26 Nov 71, Issue III OUT OF VALENCE - 220H and BTB 25 Mar 72R URGENT IMPORTANT LX3 HANDLING REVISED AND REISSUED. This bulletin does not change in any way the Class VIII data on LX Lists or Out of Valence handling.)

**LX LIST HANDLING**

Ref: HCOB 26 Jun 78 RA II	New Era Dianetics Series 6RA URGENT IMPORTANT. ROUTINE 3RA ENGRAM RUNNING BY CHAINS
HCOB 5 Nov 69R	LX3 (ATTITUDES) (Used before LX2)
HCOB 3 Aug 69R	LX2
HCOB 9 Aug 69R	LX1 (CONDITIONS)
HCOB 2 Aug 69R	"LX" LISTS

In handling Out of Valence from the GF 40 or the Expanded GF 40RD the LX Lists are used in this order: LX3, LX2, LX1 and if necessary, the last step, 220H.

**END PHENOMENA**

The end phenomena of the LX Lists is a remarkable valence shift. The pc will cognite on having been out of valence and will become himself. It is a cognition on beingness, not doingness or havingness that indicates the EP of the LX Lists. DO NOT OVERRUN A PC PAST THIS POINT.

**PROCEDURE**

Clear each word on the list before assessing it and note any instant reads which appear while clearing the item. These are valid reads. (Ref: HCOB 5 Aug 78 INSTANT READS)

Assess the list Method 5 and take up the largest reading item. Run each recall flow of that item, then check with the pc to see if he is interested in running it R3RA. Handle each flow of the item to EP. After a complete handling of the item handle the lesser reading items (if any) as above.

**LX3 ATTITUDES**

LX3 is the first list assessed. Run reading LX3 items 3 Way or Quad Recalls and 3 Way or Quad Engrams R3RA. Use the following commands:

- Recalls: F1: Recall a time you took the attitude of \_\_\_\_\_.
- F2: Recall a time you caused another to take the attitude of \_\_\_\_\_.
- F3: Recall a time others caused others to take the attitude of \_\_\_\_\_.
- F0: Recall a time you caused yourself to take the attitude of \_\_\_\_\_.

- Engrams: F1: Locate a time containing pain and unconsciousness when you took the attitude of \_\_\_\_\_.
- F2: Locate a time containing pain and unconsciousness of your causing another to take the attitude of \_\_\_\_\_.
- F3: Locate a time containing pain and unconsciousness of others causing others to take the attitude of \_\_\_\_\_.
- F0: Locate a time containing pain and unconsciousness of you causing yourself to take the attitude of \_\_\_\_\_.

### LX2 EMOTIONS

LX2 items are run 3 Way or Quad Recalls and Engrams R3RA as above, substituting the reading emotion for the attitude.

### LX1 CONDITIONS

LX1 items are run 3 Way or Quad Recalls and Engrams R3RA using the following commands:

- Recalls: F1: Recall a time you were \_\_\_\_\_.
- F2: Recall a time you caused another to be \_\_\_\_\_.
- F3: Recall a time others caused others to be \_\_\_\_\_.
- F0: Recall a time you caused yourself to be \_\_\_\_\_.
- Engrams: F1: Locate a time containing pain and unconsciousness when you were \_\_\_\_\_.
- F2: Locate a time containing pain and unconsciousness of your causing another to be \_\_\_\_\_.
- F3: Locate a time containing pain and unconsciousness of others causing others to be \_\_\_\_\_.
- F0: Locate a time containing pain and unconsciousness of you causing yourself to be \_\_\_\_\_.

Note: On items “grief” and “loss” the command would be “Recall a time you had (a) \_\_\_\_\_.” and “Locate a time containing pain and unconsciousness when you had (a) \_\_\_\_\_.”, etc.

### 220H

220H is done after completing LX3, LX2 and LX1 if the pc has not experienced a remarkable valence shift and had a valence cognition. If the valence shift and cognition occur any time during the handling of the LX Lists, that is the end phenomena for LX handling and all further actions connected with LX Lists handling are ceased.

220H is run 3 Way or Quad Recalls and Engrams R3RA, using the following commands:

- Recalls: F1: Recall a time you were being someone else.
- F2: Recall a time you caused another to be someone else.

F3: Recall a time others caused others to be someone else.

F0: Recall a time you caused yourself to be someone else.

Engrams: F1: Locate a time containing pain and unconsciousness when you were being someone else.

F2: Locate a time containing pain and unconsciousness of your causing another to be someone else.

F3: Locate a time containing pain and unconsciousness of others causing others to be someone else.

F0: Locate a time containing pain and unconsciousness of you causing yourself to be someone else.

Each recall flow is run to F/N, cognition and VGIs. Each engram flow must go to F/N, postulate and VGIs. (This will be the erasure.) If you encounter any trouble, use an L3RF.

Done correctly, LX Lists will bring about some very major changes in your pc.

NED Grad Crse  
All C/Ses

*New Era Dianetics Series 19*

*C/S Series 103*

**NED AUDITOR ANALYSIS CHECKLIST**

When an auditor is not having good success with New Era Dianetics, this NED Auditor Analysis Checklist is used to find his exact trouble areas and misunderstands and get them corrected.

New Era Dianetics is so powerful and exact that when correctly applied it is successful on pcs, one for one. If an auditor is not getting good results it is important to get the situation handled early on, for the sake of his pcs, the auditor himself, and to protect this vital, workable tech against invalidation through misuse.

A C/S should order an auditor to have a NED Auditor Analysis Checklist when that auditor's pcs are not making good gains or when the Auditor's Reports show indicators of misunderstands or misapplications, or when the auditor is goofing and does not correct with ordinary cramming.

**HOW THE CHECKLIST IS DONE**

The checklist has two parts. Part I consists of an assessment done on the auditor by the Cramming Officer or another auditor. The assessment will disclose general areas of weakness or uncertainty on the part of the auditor (TRs, metering, etc.), which are then looked into extensively on Part II.

Part II is divided into sections which correspond to those in Part I. If a section has read on Part I, that section is taken up on Part II, where the auditor must do exact drills, demos and checkouts which will show up his ability or inability to handle that aspect of R3RA. The purpose of this checklist is to help the auditor; it must be done without invalidating him or making him wrong.

Each area taken up is fully explored, per the checklist, and is signed off, point by point, by the Cramming Officer as it is covered. The Cramming Officer decides how to best correct the auditor based on what he has found. This can be a cram, retread, retrain, and/or handling in session or in Ethics. (Cramming is of course not limited to the references given in each section, and should cover fully, with Word Clearing, checkouts, demos, clay demos and drills, whatever the auditor is weak on or misunderstands.)

When all corrective actions have been completed the auditor sees the Cramming Officer, who ensures he's really got it. The auditor should be very bright and eager by this point. He then goes to the Examiner and attests to the NED Auditor Analysis Checklist.

The auditor may now resume auditing New Era Dianetics.

This checklist, promptly C/Sed for and promptly done can save entire HGCs, not to mention needless stress and strain on individual pcs, auditors and C/Ses. Use it to get to the bottom of auditors who are not winning as they should.

PART I

AUDITOR'S NAME: \_\_\_\_\_ DATE: \_\_\_\_\_

CRAMMING OFFICER OR AUDITOR ASSESSING LIST: \_\_\_\_\_

R-Factor to auditor: I am going to assess a NED Auditor Analysis Checklist so we can locate any weak points in your auditing of NED and get them corrected. (If assessment is done by an auditor other than the Cramming Officer, explain that the second part will be handled in Cramming.)

Assess the list Method 5. Handle any reading section on Part I by taking up the corresponding section in Part II. Vigorously check out each item in the section you take up and cram the auditor appropriately based on what is found. (This is not an auditing action, it is a cramming tool.)

A-1 IN SESSION, DO YOUR TRs GO OUT? \_\_\_\_\_

A-2 IN SESSION, DO YOU GET NERVOUS OR AFRAID? \_\_\_\_\_

A-3 IS IT HARD TO SIT STILL DURING A LONG SESSION? \_\_\_\_\_

A-4 DO YOUR PCs HAVE TROUBLE HEARING YOU? \_\_\_\_\_

(If any of the questions in Section A read, go to Section A of Part II and fully handle per the instructions given.)

B-1 HAVE YOU BEEN UNSURE THAT ITEMS REALLY READ? \_\_\_\_\_

B-2 HAVE YOU INDICATED F/Ns WRONGLY? \_\_\_\_\_

B-3 IS THERE ANY AREA OF METERING YOU FEEL UNSURE OF? \_\_\_\_\_

B-4 CAN'T YOU READ A METER? \_\_\_\_\_

(If any of the questions in Section B read, go to Section B of Part II and fully cover each item in that section.)

C-1 IS IT HARD TO KEEP UP WITH THE PC? \_\_\_\_\_

C-2 DO YOU FORGET THE COMMANDS? \_\_\_\_\_

C-3 ARE YOU IN MYSTERY ABOUT WHAT'S HAPPENING DURING A SESSION? \_\_\_\_\_

C-4 IS THERE SOMETHING ABOUT R3RA YOU DON'T GET? \_\_\_\_\_

(If any of the questions in Section C read, go to Section C of Part II and fully cover each item in that section.)

D-1 ARE YOU CONFUSED ABOUT WHAT A POSTULATE IS? \_\_\_\_\_

D-2 DO YOU WORRY ABOUT EPs? \_\_\_\_\_

D-3 HAVE YOU WONDERED WHETHER YOU'VE GOTTEN EPs ON YOUR PCs? \_\_\_\_\_

(If any of the questions in Section D read, go to Section D of Part II and fully cover each item in that section.)

E-1 ARE YOU UNSURE ABOUT WHICH ITEMS TO RUN? \_\_\_\_\_

- E-2 DO YOU KNOW WHICH ITEM THE PC SHOULD BE RUN ON BEFORE ASSESSING? \_\_\_\_\_
- E-3 IS THERE SOME CONFUSION ABOUT HOW TO PRE-ASSESS? \_\_\_\_\_
- E-4 IS THERE SOMETHING YOU DON'T GET ABOUT NARRATIVES? \_\_\_\_\_
- (If any of the questions in Section E read, go to Section E of Part II and fully cover each item in that section.)
- F-1 DO YOUR TRs GO OUT WHEN A CHAIN BOGS? \_\_\_\_\_
- F-2 ARE YOU UNCERTAIN ABOUT YOUR ASSESSMENT TRs? \_\_\_\_\_
- F-3 DO YOU DREAD DOING L3RFs? \_\_\_\_\_
- (If any of the questions in Section F read, go to Section F of Part II and fully cover each item in that section.)
- G-1 IS THERE SOME PART OF THE DRUG RUNDOWN YOU NEVER UNDERSTOOD? \_\_\_\_\_
- G-2 IS THERE SOMETHING ABOUT THE DRUG HANDLING STEPS THAT DOESN'T MAKE SENSE? \_\_\_\_\_
- G-3 IS THERE SOMETHING ABOUT DRUG HANDLING YOU DISAGREE WITH? \_\_\_\_\_
- (If any of the questions in Section G read, go to Section G of Part II and fully cover each item in that section.)
- H-1 IS THE MIND REAL? \_\_\_\_\_
- H-2 DO YOU EVER WONDER IF THERE REALLY ARE SUCH THINGS AS ENGRAMS OR MENTAL IMAGE PICTURES? \_\_\_\_\_
- H-3 HAVE YOU NOT HAD WINS BEING AUDITED ON NED OR DIANETICS? \_\_\_\_\_
- (If any of the questions in Section H read, go to Section H of Part II and fully handle per the instructions given.)
- I-1 IS THERE SOME TRICK YOU USE TO MAKE SURE THE SESSION COMES OUT OKAY? \_\_\_\_\_
- I-2 IS THERE SOMETHING YOU DO IN SESSION YOU WOULDN'T WANT THE C/S TO KNOW? \_\_\_\_\_
- I-3 HAVE YOU TRIED TO MAKE A SESSION LOOK BETTER THAN IT REALLY WAS? \_\_\_\_\_
- I-4 HAVE YOU EVER FALSIFIED A WORKSHEET? \_\_\_\_\_
- I-5 HAVE YOU EVER AGREED NOT TO PUT SOMETHING DOWN ON A WORKSHEET? \_\_\_\_\_
- I-6 HAVE YOU DONE SOMETHING WITH A PC YOU DON'T WANT US TO FIND OUT? \_\_\_\_\_
- I-7 ARE PCs MEAN OR UNCOOPERATIVE? \_\_\_\_\_

I-8 ARE YOU INVOLVED IN AN OUT-ETHICS SITUATION? \_\_\_\_\_

I-9 ARE YOU JUST FAKING THAT YOU CAN AUDIT? \_\_\_\_\_

(If any of the questions in Section I (Eye) read, go to Section I (Eye) of Part II and fully handle per the instructions given.)

J-1 AS A STUDENT, HAVE YOU FAILED TO LOOK UP MIS-UNDERSTOODS? \_\_\_\_\_

J-2 ON COURSE, HAVE YOU LET THINGS GO BY WHICH YOU DIDN'T REALLY GET? \_\_\_\_\_

J-3 HAVE YOU FAKED THAT YOU GOT IT? \_\_\_\_\_

J-4 DO YOU HAVE DIFFICULTIES AS A STUDENT? \_\_\_\_\_

J-5 DON'T YOU LIKE TO STUDY? \_\_\_\_\_

J-6 HAVE YOU PRETENDED KNOWINGNESS YOU DON'T HAVE? \_\_\_\_\_

(If any of the questions in Section J read, go to Section J of Part II and fully handle per the instructions given.)

K-1 DOES SOMEONE OBJECT TO YOUR BEING TRAINED? \_\_\_\_\_

K-2 HAS SOMEONE BEEN ENTURBULATING YOU? \_\_\_\_\_

K-3 ARE YOU PTS? \_\_\_\_\_

(If any of the questions in Section K read, go to Section K of Part 11 and fully handle per the instructions given.)

## PART II

### A. TRs

Check out and correct the auditor's TRs 0-IV. It may be his TRs have never been flattened, in which case he should be sent to do a Hard TRs Course.

The auditor's TRs may be going out due to misunderstands and uncertainties about the tech. Be sure to explore this possibility also.

### B. METERING

1. Have the auditor set up a meter. (Note any uncertainties in handling the meter.) \_\_\_\_\_

2. Show me how you would check to make sure your meter is operational. \_\_\_\_\_

3. Check: Does the auditor wear glasses? If so, do the rims obstruct his seeing the meter while he is looking at the worksheets or the pc? \_\_\_\_\_

Are his glasses satisfactory? Does he have any difficulty with them at all? Is the prescription correct? (i.e. can he *see* with them?) Don't just ask. Check it out. \_\_\_\_\_

4. Tell me what a reading item is. \_\_\_\_\_

5. Demonstrate each of the reads and which you would take up first. \_\_\_\_\_
6. Is there any area of metering you feel unsure of? \_\_\_\_\_
7. Check the auditor out on the following meter drills: \_\_\_\_\_

EM 12 \_\_\_\_\_ EM 23 \_\_\_\_\_ EM 26 \_\_\_\_\_

EM 13 \_\_\_\_\_ EM 24 \_\_\_\_\_

Handle any MUs then have him do meter drills, meter drills, meter drills.

HCOB 29 Apr 69	ASSESSMENT AND INTEREST

C. R3RA THEORY AND PROCEDURE

1. Define lock, secondary, engram, basic. \_\_\_\_\_
2. Have the auditor demonstrate what each R3RA command does, showing in detail how it affects the pc and the bank. \_\_\_\_\_
3. How would you know whether an incident was erasing or going more solid? \_\_\_\_\_
4. Have the auditor “run out” an item on you, keeping full session admin. \_\_\_\_\_

Auditor knows R3RA commands *cold*.

While the auditor is running out the item, mock up situations which require the auditor handles the following:

- a) pc bouncing from incident. \_\_\_\_\_
- b) recognizing and handling the basic incident on the chain when it is reached. (Does he ask “Has it erased?”). \_\_\_\_\_
- c) TA rising after the first run through the incident. \_\_\_\_\_
- d) pc gets no visio. \_\_\_\_\_
- e) pc says there’s nothing earlier. \_\_\_\_\_

- f) incident has erased, but no postulate volunteered. \_\_\_\_\_
- g) cognition volunteered, but no postulate. (Can he tell the difference between a cog and a postulate?) \_\_\_\_\_
- h) TA high, pc says, "It's erased." No VGIs. \_\_\_\_\_
- i) incident blown by inspection. \_\_\_\_\_

(While doing this section, note all aspects of the auditor's handling; his TRs, his session admin, meter position as well as procedure. )

If it's out admin, cram on handwriting until the auditor can write fast and legibly without effort.

Outnesses on commands indicate out basics. Handle with TRs 101-104 (per HCOB 17 Jul 69RB New Era Dianetics Command Training Drills) and/or cram using the appropriate references:

	BOOK: <i>DIANETICS: THE ORIGINAL THESIS</i>
HCOB 16 Sep 78	POSTULATE OFF EQUALS ERASURE

#### D. POSTULATE AND ERASURE

1. Demonstrate what holds a chain in place. \_\_\_\_\_
2. Demo erasure and how it is accomplished. \_\_\_\_\_
3. Define postulate. \_\_\_\_\_
4. Give some examples of postulates. \_\_\_\_\_

#### REFERENCES:

HCOB 26 Jun 78RA II	NED Series 6RA, URGENT IMPORTANT ROUTINE 3RA ENGRAM RUNNING BY CHAINS
HCOB 16 Sep 78	POSTULATE OFF EQUALS ERASURE

#### E. ASSESSMENT AND PREASSESSMENT

1. Have the auditor give several examples of narrative items, somatic items, after the fact items and medical terms. \_\_\_\_\_
2. Mock up situation of the pc offering to the auditor medical terms, after the fact items and conditions to run. Auditor to handle correctly, without evaluation or invalidation. \_\_\_\_\_
3. Mock up a session. Start with an original item. Have the auditor do a full preassessment and choose the correct running item. (Note all aspects of his handling, as above.) Auditor's preassessment procedure correct. \_\_\_\_\_

During the preassessment, mock up the following situations for the auditor to handle: a) no reads on list. b) an instant F/N. c) a body motion “read” on a preassessment item. d) prior and latent reads. e) pc wants to run something that hasn’t read. REFERENCES:

F. L3RF

1. Have the auditor give several examples of when an L3RF would be used. \_\_\_\_\_
2. Have the auditor assess an L3RF on a doll. (Check his assessment TRs, meter position, etc.) \_\_\_\_\_
3. Choose several L3RF items and have the auditor handle them as he would in a session. \_\_\_\_\_
4. Are there any L3RF items you don’t feel certain about or don’t understand? \_\_\_\_\_
5. Check out the auditor on E-Meter Drill 24. \_\_\_\_\_

(and references in the metering section).

G. DRUG HANDLING

1. Demo why you run out drugs narrative. \_\_\_\_\_
2. Demo why you preassess drugs. \_\_\_\_\_
3. Demo why you do a prior assessment to drugs. \_\_\_\_\_
4. Demonstrate why you don’t list whole track drugs. \_\_\_\_\_
5. Demo what drugs do to a person and why they have to be handled. \_\_\_\_\_
6. Is there anything about drug handling that isn’t clear? \_\_\_\_\_

## H. DOESN'T KNOW AUDITING WORKS

2WC the reading question with the auditor to establish whether he has any personal reality on the mind and engrams and whether he has had any wins from receiving Dianetic auditing himself. If he doesn't know from personal experience that the mind is real, that engrams and mental image pictures are real and that auditing gives personal gains, put him on a program to finish his Drug RD, including Objectives. If that doesn't handle, then do an Expanded Green Form 40RD.

## I. OUT ETHICS AS AN AUDITOR

Program for an Ethics Repair List and the Personal Revival Rundown. He will not win as an auditor until he is honest and straight.

## J. STUDY DIFFICULTIES

Program for full handling by using a Student Confessional List, Student Rehab List, Student Rescue Intensive or any other appropriate auditing action. Also, handle study difficulties with any rereads or retrains warranted (i.e. Student Hat, PRD, etc.).

## K. PTS

Return to C/S to program for PTS handling.

This completed checklist plus the corrective actions taken are kept in the auditor's pc folder.

  - success story lacking, what it means, 254

## SUBJECT INDEX—1976/1978

- case supervising, case supervision, C/Sing (*cont.*)
  - tech “doesn’t work,” handling, 255
  - tech quality, improvement of, 342
  - tips, 146
  - VGIs F/N cog at session end, but sour grapes at Examiner, 101
  - “Well Done,” when to give one in Dianetics, 85
  - what is started on a case must be completed, 305
  - when all else fails use GF 40, 120
- case supervising Dianetics,
  - area of interest that hasn’t read in Dianetics, handling, 103
  - “assess existing lists or add” and NED auditor says no items, handling, 102
  - auditor assessed by interest only, not by read, handling, 76
  - auditor can find no item in Dianetics, handling, 102
  - auditor sent pc earlier than basic, handling, 76
  - betterment isn’t occurring with Dianetics, handling, 102
  - case that has had all possible NED gain, handling, 82
  - case that makes no gain on NED due to case “oddy,” handling, 82
  - commonest C/S for pc after Dianetic session that ends with high or low TA and/or BIs at Examiner, 101
  - correct an auditor positively and refer to the Dianetic HCOB, 82
  - correcting a bad session, 75
  - C/Sing Dianetics vs, Scientology, 68
  - C/S point of view in NED, 82
  - Dianetic case supervision, 58, 75, 82, 84
  - Dianetic Clears, auditing of, 117
  - Dianetic pc audited over out ruds, manifestations of and handling, 101
  - Dianetic pcs, how long to audit them on NED, 117
  - Dianetic session failures, four main reasons for, 100
  - four Dianetic errors that are detectable if C/S reads the worksheets, 100
  - four errors that are beyond the view of the C/S, 100
  - four possible actions for a NED C/S to take, 82
  - habitual drug taker, handling, 105
  - how to spot failure to ask for earlier beginning, 100
  - how to spot failure to ask for earlier incident, 101
  - how to spot grinding in the session, 100
  - how to spot pc being forced to go earlier below basic, 101
  - Hubbard New Era Dianetics Graduate is required in order to C/S NED, 82
  - if L3RF doesn’t resolve it, 101
  - illness following auditing, handling, 219
  - jumped chains, how to spot it, 101
  - lots of DEFs and session ground to a high TA, 85
  - “L3RF Method 5 and Handle,” 101
  - misassessment in Dianetics, spotting it, 101
  - NED Auditor Analysis Checklist, 492
  - NED auditor in a Dianetic session does nothing but NED, 82
  - NED case folder analysis, 100
  - NED folders, C/Sing of, 75, 82, 84
  - NED folders, how Ron handles them, 84
  - NED pcs, when to give a GF, 83
  - non-standard NED session requires pc be sent to a Scientology auditor, 83
  - “oddy” case in NED, 83
  - pc has not done well on Dianetics and no other reason can be found, handling, 192
  - pc who gets sad at session end in Dianetics, handling, 101
  - physically ill pcs, handling, 102
- case supervising Dianetics (*cont.*)
  - reasons chains do not erase, 100
  - reasons Dianetic session does not complete with VGIs, 100
  - relapsing onto drugs, how it affects running the case, 129
  - “secret” of producing high case gain and total results with NED and Scientology, 108
  - two types of cases only that come up (in NED), 83
  - when to let a N-D auditor audit, 75
- Case Supervisor(s),
  - acting on a case without an FES, 202
  - acting on a case without an up-to-date Folder Summary, 202
  - admin in auditing, 36
  - Advance Courses and C/S okay, 46
  - Advanced Course material insecurity, handling, 129
  - auditor not following C/S instructions, 37
  - basic Case Supervisor actions, 163
  - being presented with lousy admin, 36
  - bonuses and, 202
  - books the C/S must know, 121
  - correction of, 251
  - Dean of Technology, 285
  - does not see the pc, 36
  - does not talk to the auditor, 36
  - dreaming things up, 85
  - ending off the session and sending it to the C/S, 36
  - expertise, 148
  - falsifying a stat, 202
  - FESers, how C/Ses depend on them, 283
  - getting sessions monitored, 144
  - gold certificate Case Supervisors, 285
  - has to know his materials better than an auditor, 148
  - illegal pcs, penalty for acceptance of, 259
  - invalidations or accusations of auditors, 273
  - lucky is the C/S who has a fine Class VIII, 83
  - must be confident he could crack the case as an auditor, 148
  - not checking folder to find if pc has made earlier grades, 283
  - offenses that result in two weeks loss of pav and a suspension of certs, 202
  - penalties for various offenses, 202
  - penalty for permitting auditor to write incomprehensibly or omit data, 221
  - perfect C/S, how to be a, 148
  - Preclear Checklist and, 365
  - reasonable, C/S never gets, 101
  - reason C/S must be an excellent NED auditor, 109
  - right to get his programs completed, 213
  - Senior C/S; *see* Senior Case Supervisor
  - strengthening auditor’s determination to be professionally competent, 273
  - successful C/S, how to be a, 148
  - suspension of certs, reasons for, 202
  - what the value of a Case Supervisor depends on, 85
  - when the C/S’s job becomes unhappy, 85
  - where trouble a C/S is running into comes from, 144
- Case Supervisor Comction List, use of, 251
- catastrophe,
  - handling its effects on a person’s life, 354
  - Relief RD to handle, 400
- cause, causative,
  - attaining cause over life, 473
  - engrams are the record of moments when a thetan was least at cause, 29
  - Ex Dn audits pc at cause, 305
  - imaginary cause, 49
  - Sec Checking audits the case at cause, 305

## SUBJECT INDEX—1976/1978

- cause, causative (*cont.*)  
Sweat Program making one more causative, 326
- cave in, caved in,  
cases which “cave in hard,” handling, 49  
pc wound up at Examiner caved in, handling, 171
- CCHs, reference, 471
- certainb, number of times over the material equals  
certainty and results, 73
- certificate(s), cert(s), certified, certifying,  
certifying a NED auditor who doesn’t get provenly  
excellent results is an act of treason, 109  
false auditing reports causing cancellation of, 282  
forbidden to run new techniques without being properly  
trained and certified, 483  
gold certificate Case Supervisors, 285  
permanent certificates, internships as prerequisite  
for, 285  
provisional certificates and internships, 285  
suspension of certs, reasons for, 202
- chain(s); *see also* engram running; Routine 3RA  
abandoned chain, handling, 139  
all picture chains are there because the first time is  
there, 80  
always end up in a basic engram, 70  
asking pc to look for an erased chain, effects of, 141  
bank (chains) is jammed when auditing over drugs,  
105  
basic and postulate hold chain in place, 80  
blowing by inspection, 388  
charge is held in place by the basic, 28  
completing chains, reason for, 388  
definition, 62, 410  
Dianetic chain is not a release, 142  
don’t use Scientology rehab tech on a Dianetic chain,  
142  
effect of running several somatic chains without erasing  
any, 71  
ending off a chain or engram at the first sight of an  
F/N, 131  
engram running by chains, 25, 380  
engram running by chains and Narrative R3RA—an  
additional difference, 476  
EP of a Dianetic chain, 62, 66, 125, 262, 332, 344,  
384, 388, 391, 403, 451, 480  
erased chains can be overrun, 143  
example of how a typical Dianetic chain might run,  
416  
example of how a typical narrative item might run,  
417  
high TA and unflat or restimulated engram chains,  
124  
high TA caused by chains left in restimulation, handling,  
433  
high TA due to running incident on the chain without  
going earlier, 71  
how chains are held together, 69, 353  
how many chains can come from an Original Assessment,  
353  
how pc gets onto an entirely different chain, 480  
jumped chains; *see* jumped chains  
late things hang up where earlier like things exist, 428  
narrative vs, somatic chains, 79  
not completed, handling, 136  
not enough auditing on enough chains, 122  
overrun, effects and handling of, 480  
overrun past postulate on chain, effects of, 384, 392,  
480  
postulate bypassed, handling, 136  
postulate holds chain in place, 62, 80, 262, 384, 392,  
480
- chain(s) (*cont.*)  
previous flubbed chains, handling, 142  
reason all picture chains are there, 80  
reason for staying on the chain of only one somatic in  
Dianetics, 62  
reasons chains do not erase, 100  
rehabbing chains, commands for 141  
same thing run twice, handling, 138  
takes more than one chain of engrams to build up an  
ill area, 92  
things that can cause a pc to key-in chains, 124  
too late on the chain, handling, 136  
went past basic on a chain, handling, 137  
what happens when the basic on the chain is found  
and erased, 29  
what you’re erasing, 474  
will key-in again if you don’t get the basic engram, 70
- chair, pc is seated in chair furthest from the door, 381
- changes, handling severe changes in person’s life, 362,  
400
- charge,  
allowing pc to get all the charge and postulates out of  
basic, 344  
ARC breaks and, 28  
bulk of the charge on the time track lies in engrams,  
29  
chronic charge defined, 29  
“chronic meter of a case” is an index of chronic  
charge, 28  
definition, 27, 28, 29, 409, 424  
E-Meter registers charge, 28  
E-Meter registers released charge, 28  
how charge is discharged, 29  
incident left too heavily charged in Dianetics, handling,  
137  
instant F/N and, 487  
is held in place by the basic on a chain, 28  
is the sole thing being removed by the auditor from  
the time track, 27  
no charge on the item in the first place, 136  
out of valence and, 96  
overcharged case, recognition and handling of, 97  
preassessment item had no charge on it, handling, 137  
Prepchecks as a method for releasing charge, 470  
prevents pc from confronting the time track, 28  
reads and, 487  
reason for reducing the charge on the existing track,  
25  
reasons for releasing charge from a case, 29  
time track and the, 27  
time track is submerged from view by, 28  
what causes the case to “charge up,” 28
- checklist(s),  
Ex Dn set-ups checklist, 225  
False TA Checklist, 267  
for FESers, 282  
for setting up sessions and an E-Meter, 322  
Full Assist Checklist for Injury and Illness, 250  
NED Auditor Analysis Checklist, 492  
Power Checklist, 302  
Preclear Checklist, 365  
to assist in the identification of R/Sers, 230
- checkout(s),  
High Crime checkouts and internships, 328  
internship students do their own checkouts, 284
- checksheets(s),  
are gone through in the sequence laid down, 74  
end of endless training, breakthrough, 483  
internship checksheets being added to and added  
to, 285

## SUBJECT INDEX—1976/1978

- checksheet(s) (*cont.*)
  - materials that must be added to certain checksheets, 293
  - mile long checksheets not required to make a good Dianetic auditor, 359
  - Okay to Audit Checksheet, 248
  - PTS/SP Checksheet, study of, 244, 245, 246, 276
- chest trouble, handling, 92
- child, children,
  - are usually burdened cases, 233
  - can size for a, 196,268
  - childbirth, running out the engram of delivery, 65
  - getting stuck in the books and movies they see, handling, 234
  - LX Lists and, 97
  - overcharged cases, handling of, 97
  - past life remedies and, 233
  - R/Ses and, 38
  - unburdening of, 234
- choice,
  - freedom of choice returned with Routine 3SC-A, 468
  - restoring power of choice, 29
  - R/S causing no freedom to choose, 462
  - service fac destroys freedom of choice, 458
- chronic somatic(s),
  - handling with Dianetics, 127
  - persistent, chronic and recurring somatics, handling, 122
  - programming of pc who has a, 125
  - references, 122
  - something which continually hurts or disables may be structural or physical, 91
  - unresolved pains, two reasons for, 122
- circulation,
  - cut off by LSD, 324
  - exercise and, 325
  - fat tissue has little circulation in it, 339
  - in fat is poor, 325
- Class 0, W/Cing materials added to, 293
- Class II, Confessional materials added to, 293
- Class IV,
  - course necessities (checksheet additions), 293
  - materials that must be known, 293
  - Senior Class IV and, 293
- Class VIII,
  - Advanced Orgs teaching Cl VIII Course, 287
  - auditor who thinks he can fly before he can even creep, 41
  - Case Supervisor Actions HCOB, 163
  - “Case Supervisor Actions” HCOB is still valid, 121
  - Class VIII Drug Rundown commands, 176
  - course being repackaged in its original form and exported, 287
  - difference between a probably six months or 3-week course, 44
  - VIII actions, 118
  - VIII actions are all valid, 121
  - first thing I learned about teaching a Class VIII auditor, 41
  - IV Rundown, reason it was developed, 120
  - idea that the “old” is always cancelled by anything “new,” 118
  - lucky is the C/S who has a fine Class VIII, 83
  - out of valence handling, 152
  - study of the “Well Done” LRH C/S folder, 44
  - what VIII standardization aimed at, 119
  - what the course will teach and include, 35
  - why an VIII who is not a proven Dianetic auditor is not dependable as an auditor, 109
  - why VIII auditing was developed, 119
- Classification Gradation and Awareness Chart, The Bridge,
  - basic program of a pc is, 228
  - C/S Series I-13RA cover use of the Grade Chart in programming, 228
  - definition, 117
  - Drug RD position on the, 226
  - Expanded Dianetics position on, 279
  - Expanded Dianetics, when it can be run, 241
  - full list of grades showing where the various RDs now offered fit, 227
  - new Grade Chart, 226
  - programming and, 228
  - Quad vs, Expanded Grades, 226
  - technical breakthroughs, 482
- clay,
  - auditor must be able to relate all the EP of a process to an F/N in clay, 42
  - things student is weak on are done in clay, 74
- clean, pc hard to clean, handling, 172
- clean needle,
  - complete list and, 21
  - definition, 21
  - is vital in order to null a list in Routine 2, 22
  - Routine 2 methods for converting a dirty needle to a, 21
- Clear(s); *see also* Dianetic Clear
  - assists and, 91, 117, 150, 215
  - can be achieved on Dianetics, 117
  - Clears or OTs who are R/Sing are not R/Sers, 478
  - definition, 422
  - Dianetic Auditing Assists, secondaries, engrams or narrative incidents are no longer run on, 215
  - Dianetic Clear defined, 117
  - Dianetics forbidden on, 91, 150, 473
  - Dianetics not run on, 215, 389, 482
  - illness, handling on, 91
  - pc went Clear and nobody would let him declare, handling, 140
  - State of Case Scale and, 27
- clearing commands,
  - auditor responsibility to ensure pc understands the commands and procedure, 433
  - clearing word lists for prepared lists, 252
  - engram running prevented by failure to clear commands and procedures of R3RA, 433
  - example, 442
  - F/Ns obtained during, 443
  - have pc on cans throughout, 442
  - penalty for failure to clear each word of every command or list used, 204
  - procedure, 442
  - question reads and pc says he doesn’t understand it, handling, 135
  - reads during, 438, 443
  - references, 442
  - rules of, 442
  - Scientology CS-1 does not preclude clearing commands, 421
  - violation of correct clearing of commands is an ethics offense, 444
  - when to do it, 443
- Clearing Course L7 and, 252
- clothes, tight, 266, 272
- co-audits,
  - materials on co-audits added to Senior Cl IV check sheets, 293
  - staff and, 287
- coffee shop auditing,
  - definition, 128

## SUBJECT INDEX—1976/1978

- coffee shop auditing (*cont.*)
    - dirty needle and, 7
  - cognition(s),
    - definition, 410, 424
    - F/N and, 48, 72
    - F/N VGIs yet no cognition (in Dianetics), handling, 343
    - interrupted (in Dianetics), handling, 139
    - is totally dependent upon the freedom to know, 298
    - no cognition, reason for, 298
    - postulate vs., 403, 480
    - postulate will usually come off in the form of a, 480
    - Solo cognitions, what they depend upon, 145
  - cold (temperature),
    - chilled pc and high TA, 198
    - cold cans and high TA, 198
    - cold cans, handling, 271
    - high TA and cold pc, 196
    - pain and, 10
    - pc cold, handling, 196, 272
  - colds, losses and, 219
  - coma, assist procedure on pc in a, 219
  - combination terminal, combined terminal, coterminous,
    - definition, 11
  - method of testing for, 12
    - pain and sensation is turned on by, 12
  - command(s); *see also* question
  - auditor goofed on a sequence of commands in Dianetics, handling, 136
    - auditor responsibility to ensure pc understands the commands and procedure, 433
    - auditor stopped giving commands, handling (in Dianetics), 138
  - clearing commands; *see* clearing commands
  - duplicating an auditing question without variation (TR3), 160
  - evaluation by telling pc what the word or command means, 442
  - flubbed commands, 100
  - flubbed commands in Dianetics, handling, 136
  - forgetting the commands during session, handling, 86
  - fumbling commands, 108
  - getting the command answered (TR3), 160
  - lack of speed in giving commands, 100
  - misunderstood command, effects of, 442
  - misunderstood on the command, handling, 136
  - misusing command sequence or procedure, handling, 86
  - never ask second question until the one asked is answered, 160
  - pc confused about the meaning of commands, handling, 442
  - pc didn't have a command in Dianetics, handling, 136
  - penalty for failure to clear each word of every command or list used, 204
  - question reads and pc says he doesn't understand it, handling, 135
  - speed of commands in R3RA, 388
  - training the student how to deliver a command (TRI), 159
  - TR3: Duplicative Question, 160
- comment, definition, 162
- Committee of Evidence; *see also* penalties
  - for accepting or processing illegal pcs, 259
  - for failing to make out and include worksheets in pc's folder, 257
  - for falsifying an auditing report, 255
  - for letting pc attest Dianetics Case Completion before Preclear Checklist is complete, 365
  - for losing pc's folders, 257- communicate, communication(s), comm,
  - art and, 319
  - Axiom 28 amended, 204
  - chopped comm and high TA, 124
  - component parts of, 204
  - definition, 204, 411, 425
  - duplication is what makes communication work in processes, 439
  - formula of, 204
  - less willingness to communicate, remedy of, 439
  - non-communication, what it consists of, 204
  - overrun and cutting pc's comm, 42
  - Tone Scale position and, 439
  - two-way comm; *see* two-way communication
    - what makes communication work in processes, 439
    - when to cut a pc's comm with regard to an F/N, 42
- communication cycle, definition, 409, 423
- communication lag(s), comm lag(s),
  - auditor or auditing failures due to, 94
  - lack of speed in giving commands, 100
  - slow auditor, handling, 94
  - speed of commands vs., 388
- competence, competent,
  - competence or incompetence is not the basis of psychosis, 313
  - professional competence and pride, 273
  - strengthening auditor's determination to be professionally competent, 273
- complaint(s); *see also* troubles
  - don't be reasonable about pc's complaints, 5
  - main complaints and symptoms of pcs, 360
  - resistive case and, 181
- complete list,
  - clean needle and, 21
  - only reasons a list will not complete on Routine 2, 20
  - Routine 2 and, 21, 22
- completion(s), completed; *see also* Paid Completions
  - bonuses may not be paid for "completions," 202
  - definition of the completed intensives stat, 214
  - Dianetic Case Completion, Preclear Checklist must be complete before attesting to, 365
  - Ex Dn case histories were incomplete giving the idea that one didn't complete Ex Dn cases, 312
  - Ex Dn cases must be completed, 294
  - Major Processing Service defined, 316
  - Major Training Service defined, 316
  - Minor (Division 6) Services defined, 317

## SUBJECT INDEX—1976/1978

- Confessional(s) (*cont.*)  
form (A Valid Confessional), 300  
formula for making up a, 298  
formulating Confessional questions, 297  
going into person's most confused emotional areas, 297  
going straight to a person's handling of masses and changes of space, 297  
handling zones of difficulty with, 298  
Integrity Processing, Sec Checking and, 278  
materials on Confessionals added to Grade II, 293  
never subtract anything from a, 296  
nouns and, 299  
problem of long duration, handling, 299  
PTPs of pc looked at for areas to handle with Confessionals, 299  
rules for, 299  
Sec Checking vs, Integrity Processing, 278  
tech correction round-up data concerning, 278  
what a Confessional clears up, 297  
what areas to do the Confessional on, 297  
writing a special series of questions for, 296
- confidence,  
improving pc's confidence, 7  
pc confidence lies in how standard the auditor is, 3  
confidentiality of upper level RDs, 479  
confront(ing); *see also* TR 0  
charge prevents pc from confronting the time track, 28  
handling students confronting with their eyes, blinking, etc, 158  
havingness is proportional to pc's ability to confront in the session, 23  
increased by Sweat Program, 326  
largest reading items are ones pc can most easily confront, 355  
OT TR 0 and, 157  
procedure, 158  
rough auditing lowers pc's ability to confront in the session, 23  
that which is not confronted and inspected tends to persist, 457  
the more he isn't confronting, the less he can confront, 457  
TR 0: Confronting Preclear, 158  
with a body part, 158
- confusion(s), confused,  
Confessionals going into person's most confused emotional areas, 297  
engram of accident or injury can be a stable item in a, 219  
fixed ideas follow a period of, 219  
flubs in TRs are the basis of all confusion in subsequent efforts to audit, 157  
pc confused about the meaning of commands, handling, 442  
stable datums, service facts and, 456  
teaching of basic data restimulates confusions, 74  
consequences, LSD case and, 315  
constructive criticism, 320
- Contact Assist(s),  
checking for overrun, 151  
Clears, OTs and Dianetic Clears may receive, 150, 215  
EP of, 150  
F/N and, 217  
how long to do one, 217  
in making them touch something that was moving, stop it first, 151  
in making them touch things that were hot, cool them first, 151  
mandatory to take pc to Examiner afterwards, 129  
no F/N, handling, 151
- Contact Assist(s) (*cont.*)  
procedure, 55, 150  
reference, 150  
theory of, 55  
theory of what an assist is doing, 217  
Touch and Contact Assists interrupting a general course of auditing, handling, 128  
worksheet is required, 129  
contemptuous personality, 96  
continuous overt(s),  
handling, 185  
no case gain and, 291  
PTS and environmental continual overt, 50  
contribution, art and, 319  
control, auditor being doubtful of control in engram running, 381  
correction, tech correction round-up, 274  
correction lists; *see* prepared lists  
cortisone, 235  
coterm; *see* combination terminal  
course(s); *see also* study; training  
application; *see* application  
definition, 328  
Dianetics Course; *see* Dianetics Course  
end of endless training, breakthrough, 483  
enrolling on courses but not taking them in order to get professional rates in auditing, 284  
fast courses, 328, 483  
graduate described, 328  
how you get a course text weighing one ton, 80  
internships being used to teach the course again, 328  
internships vs., 328  
Major Training Service defined, 316  
Minor (Division 6) Services defined, 317  
necessities, 293  
passing grade will be 85% to get on internships, 329  
person having real trouble on a course, handling, 251  
product of a, 328  
retread course if no passing grade is obtained, 329  
staff courses made mandatory, 286  
study rundowns should be done at the start of courses, 129  
theory and, 328  
well-run course described, 328
- Course Supervisor(s),  
checking students on a meter for misunderstandings, 149  
correction of, 251  
interpretation or evaluation not allowed, 74  
steps to speed student product flow, 149  
Course Supervisor Correction List, use of, 251
- Court of Ethics; *see also* penalties  
ethics penalty for Word Clearers, 335  
faulty W/Cing and, 264  
for failing to write clearly on worksheets, 221  
for going by MUs in despatches or telexes, 221  
penalties for violations of study tech, 203, 221
- cramming,  
auditors who quickie Objectives, handling, 333  
bogged by a mis-cram, handling, 345  
C/S should insist on a carbon copy of the fact that cramming has been done, 146  
errors that can occur in, 345  
handling the student who makes bad auditing goofs, 74  
how to check auditor's grasp of R3RA theory and procedure, 496  
invalidations or accusations of auditors, 273  
mis-crammed person, handling, 345  
NED Auditor Analysis Checklist and, 492  
NED auditor not correcting with ordinary cramming, handling, 492  
NED auditor trouble areas and misunderstandings, find-

## SUBJECT INDEX—1976/1978

- cramming (*cont.*)  
    ing and handling of, 492  
    out TRs and metering caused by lack of, 342  
    send auditors to Cramming on all flubs, 146  
    sending auditors to Cramming for the slightest flub, 144  
    sending auditor to Cramming for every bog, 342  
    student is sent to Cramming at own expense for bad auditing goofs, 74  
    tech quality, improvement of, 342  
    “Two hours TRs and metering” should always be added, 342  
Cramming Officer(s),  
    clearing up an org or area messed up by, 345  
    NED Auditor Analysis Checklist and, 492  
    overt products and, 345  
    R/Sing Cramming Officer, effect of, 345  
Cramming Repair Assessment List, 345  
creating, creation; *see also* destruction  
    drugs and, 105, 176  
    effects of aspirin and pain depressants on the creation of mental image pictures, 104  
crime(s), “dead thetan” read,  
    be sure to get the crime back of the R/S, 172  
    caused by people who R/S, 242  
    High Crime; *see* High Crime  
criminal(s), criminalib,

Injury Rundown, 153  
“insane” handling of, 65, 84  
instant F/N is always handled first, 355  
instant F/N takes precedence over all other reads, 487  
Int actions and, 103  
interest and, 63, 67, 70  
IQ raised by, 66  
it’s the postulate—not the F/N that we are going for in NED, 62  
it takes as long as it takes, 344  
legality of, 64  
longest read or pc’s interest, 63  
losses and, 66  
L3RF to handle trouble, 364  
medical examination and, 91  
medical terms or symptoms, never assess them, 69  
mentally retarded and, 65  
miracles and, 344, 358

## SUBJECT INDEX—1976/1978

- Dianetic(s), New Era Dianetics (*cont.*)  
misapplications, handling the auditor, 492  
mixing Scientology and, 68, 76  
NED auditing is so simple it demonstrates cleanly  
  whether person can audit or not, 108  
NED auditor in a Dianetic session does nothing but  
  NED, 82  
NED for OTs; *see* NED for OTs  
NED High Crime, 473  
nine things that can go wrong in a NED session, 100  
no conflict of interest between any healing profession  
  and, 57  
no gain, handling, 82  
non-standard session requires pc be sent to a Scien-  
  tology auditor, 83  
“oddy” case in NED, 83  
one is handling the effect of the spirit on the body, 64  
operations and Dianetic handling, 65  
Original Assessment Sheet, handling of, 155  
out of valence handling, 357  
out ruds and, 76  
overrun, effects and handling of, 480  
past life remedies, 232  
pastoral counselling and, 64  
pc has done something harmful to Dianetics, hand-  
  ling of, 156  
pc has not done well on Dianetics and no other reason  
  can be found, handling, 192  
pc says it’s gone but no full EP, 78  
pc’s manifestations and remarks never change, hand-  
  ling, 102  
playing Scientology auditing against NED, 83  
postulate vs. F/N in NED, 262  
precision drills and, 358  
Prepcheck is not done while doing Dianetics, 143  
procedure violation, C/S handling of, 76  
product of, 360  
program outline in full, 360  
psychosomatic illness and, 57, 65  
PTSness handled before you begin auditing, 360  
put down only the list items pc says, 70  
Quadruple Dianetics; *see* Quadruple Dianetics  
rashes and, 66  
rate of healing and, 65  
reason C/S must be an excellent NED auditor, 109  
reason for conflict between psychiatry and, 57  
reason for staying on the chain of only one somatic, 62  
reason it was originally designed, 57  
reasons session does not complete with VGIs, 100  
recovery from disease under treatment is speeded up  
  by, 65  
remedies, 363, 433  
remedies anything caused by the mind, 66  
repair flubbed session or chain within 24 hours with  
  L3RF, 156  
repairing a chain or engram, 135  
results, 68, 75, 108  
results are achieved by addressing and handling the  
  spirit, 360  
results are a well body and a being happy with it, 68  
results depend on state of training and accuracy of  
  application, 358  
results vs. deviating from exact procedure, 75  
review and the Dianetic pc, 58  
roller-coaster on NED, handling, 83  
ruds done by a Scientology auditor, 76  
running out previous auditing, 79, 155  
Scientology result sometimes attained with, 68  
Scientology vs., 58, 60, 65, 68  
“secret” of producing high case gain and total results  
  with NED and Scientology, 108
- Dianetic(s), New Era Dianetics (*cont.*)  
service fac handling, 463  
severe changes in person’s life, handling, 400  
Single Dianetics; *see* Single Dianetics  
sinusitis and, 70  
skin blotches and, 66  
spiritual healing and, 64  
TA action, Dianetic auditor is not concerned with, 474  
tech “out” in an area because some auditors can’t  
  deliver simple Dianetic sessions, 109  
“total-apathy-won’t answer” session upset, handling  
  as a list error, 192  
Triple Dianetics; *see* Triple Dianetics  
two types of cases only that come up (in NED), 83  
unhappy school experiences handled by, 66  
unresolved pains, two reasons for, 122  
use of, 64, 68  
use R3RA even to correct ARC breaks and PTPs and  
  bad auditing, 67  
valence handling, 357  
very sick pcs, handling, 84  
violent session upset, handling as a list error, 192  
well and happy pc (being) and, 85,350,353,360,  
  389, 441  
what it handles, 57, 65  
what one is handling in, 64  
when to let a NED auditor audit, 75  
why Dianetics fell out of use, 64
- Dianetic Assist(s), Auditing Assist(s),  
can be given despite pc having taken drugs, 106  
can be run Quad, 151  
Clears, OTs and Dianetic Clears are no longer run  
  on, 215  
Dianetic Clears and, 117, 215  
Dianetics forbidden on Clears and OTs, 91  
EP of, 150  
“psychic trauma” and, 56  
references, 150  
what it consists of, 56
- Dianetic auditor(s),  
books he should know, 358  
demanded more than pc could see, handling, 138  
does not have to know how to do GFs or ruds, 76  
does nothing but NED in a Dianetic session, 82  
doesn’t know auditing works, handling, 499  
doing odd things because auditor gets nervous, 86  
  failed sessions due to lack of speed, 94  
failures, reason for, 63  
forgetting the commands during session, handling, 86  
goofed on a sequence of commands, handling, 136  
high or low TA at session start, handling, 449  
high TA at session start, handling, 130

## E

- earlier beginning,  
asking for earlier beginning in engram running by  
chains vs, in narrative running, 476  
checking for earlier beginning after Step 9 R3RA,  
383, 390  
command, 81, 383, 391  
demanding pc go through non-basic more than twice,  
effects of, 474  
earlier incident vs., 474, 476  
earlier similar vs, earlier beginning in Narrative

## SUBJECT INDEX—1976/1978

- earlier beginning (*cont.*)  
R3RA, 79  
failure to call for earlier beginning when pc can find no earlier incident, 100  
finding it each time person is moved through the narrative, 354  
forcing pc toward “earlier incident” when it required “earlier beginning” making pc jump chains, 108  
how the C/S spots failure to ask for, 100  
late things hang up where earlier like things exist, 428  
lots of DEFs and session ground to a high TA, 85  
making a non-basic more solid by running through it several times, 474  
narrative erasure often depends on finding the, 400  
narrative running and the importance of using the earlier beginning command, 386  
no earlier incident, no earlier beginning in R3RA, handling, 388  
not asking for earlier beginning causing no erasure, 131  
TA starting to climb and, 80  
TA up even slightly indicates something earlier, 476  
there was an earlier beginning, handling, 135  
there was no earlier beginning, handling, 135  
when an earlier incident takes precedence over, 476
- earlier incident,  
asking for earlier incident in engram running by chains vs. in narrative running, 476  
auditor sent pc earlier than basic, handling, 76  
checking for earlier incident after Step 9 R3RA, 383, 390, 474  
checking for earlier incident after the first run through (in R3RA), 384, 392  
command for R3RA, 383, 391  
commands for going earlier in R3RA Flows 2, 3 and O, 385, 392  
demanding pc go earlier than basic, 100  
earlier beginning vs., 474, 476  
failure to call for earlier beginning when pc can find no earlier incident, 100  
failure to call for earlier incident when there is one, 100  
forcing pc toward “earlier incident” when it required “earlier beginning” making pc jump chains, 108  
forcing the pc earlier than basic, 80  
high TA due to running incident late on the chain without going earlier, 71  
how the C/S spots failure to ask for, 101  
incident going more solid indicates an, 474  
late things hang up where earlier like things exist, 428  
no earlier incident, no earlier beginning in R3RA, handling, 388  
not asking for an earlier incident mentioning the same item causes a grind, 130  
overrun by demanding earlier than there is, 474  
overrun, effects and handling of, 480  
preventing pc from going earlier when he should, 80  
procedure for going earlier in R3RA, 384, 392  
pushing pc earlier after he has given the postulate, effects of, 480  
TA rising indicates something earlier, 80, 474, 476  
TA rising on Step 9 R3RA indicates something earlier, 384, 392  
when it takes precedence over an earlier beginning, 476  
when to ask for an, 61, 474
- earlier practices; *see* practices
- earlier similar,  
asking for an earlier similar incident using Narrative R3RA, 79  
command for ruds, 445  
command (Narrative R3RA), 79
- earlier similar (*cont.*)  
commands for all flows of R3RA Narrative running, 386, 393  
earlier beginning vs. earlier similar in Narrative R3RA, 79  
false TA causing auditor to ask for, 194  
it is necessary to find an earlier item if something does not release, 445  
only going E/S in narrative running if it starts to grind very badly, 79, 130, 344, 354, 386  
ruds earlier similar rule, 445  
there was no earlier similar incident, handling, 135
- EB; *see* earlier beginning
- effect,  
engrams are the record of moments when a thetan was most at effect, 29  
pc who is ill is easily made an effect, 95  
person heavily the effect of something has done it as an overt, 176  
PTS handling audits the pc at effect, 305

- failure(s),  
  auditor or auditing failures, reasons for, 94

## SUBJECT INDEX—1976/1978

- failure(s) (*cont.*)  
no auditing as the most basic failure of cases, 277  
physical illness causing auditing failures, 94  
reason for the bulk of “failed pcs” in an area, 109
- fall, longest fall or BD noted in Dianetic assessment, 355
- false, definition, 209
- false (auditing) report(s),  
asking pc what the auditor did, 144  
calling an F/N in the wrong range and, 260  
cancellation of certs for, 282  
C/S getting sessions monitored, 144  
detection of, 254  
effects of, 254  
false TA obscured by, 282  
F/N VGI session end but TA up at Examiner, 125  
HCOB on, 254  
means of repairing pc are denied by, 254  
out tech covered up by, 254  
out tech spread about by, 254  
penalty for, 202, 255, 282  
penalty for C/S permitting auditor to write incomprehensibly or omit data, 221  
person who would falsify an auditing report, 255  
retrain ordered due to, 144  
revealed by D of P interview, 255  
steps to handle, 209  
tech correction round-up data concerning, 282  
ways of falsifying an auditing report, 254
- false motivator, 49
- false overts, handling, 49
- false read(s),  
assessing with a statement’s tone of voice causes, 430  
command to check for, 166, 170, 310, 449  
handling, 310  
lots of False assertions by auditors, handling, 170  
repeating false read, 38  
ruds and, 38, 46, 166, 170  
Suppress and False used in ruds, 46, 166, 170
- false TA,  
addition, 198  
addition 2, 199  
addition 3, 200  
arthritic hands causing, 196  
basics behind finding and remedying of, 266  
big can vs. small can TA readings, 195  
cans; *see* cans  
check for dryness by feeling hands, 266  
checking the pc directly, 265  
checking the pc’s grip, 265  
checklist, 267  
chilled pc and, 198  
cold cans and, 198  
cold pc has falsely high TA, 196  
conditions that make an auditor mess up a pc’s TA, 223  
crossed legs and, 265  
discharged meter and, 195  
dry hands, causes of, 222  
dry hands causing, 196, 222  
dry hands, recognizing and handling of, 222  
earlier similar incident asked due to, 194  
E-Meter and, 269  
examples, 194  
exterior pc moving into the body sending the TA up, 198  
floating TA and, 197  
F/N overrun due to false TA, example, 194  
F/Ns and, 194  
F/Ns disregarded because of false TA, handling, 260, 261  
hand cream; *see* hand cream  
handling, 265
- false TA (*cont.*)  
handlings per the False TA Checklist, 267  
hands; *see* hands  
having pc wipe his hands every few minutes to get the TA above 2,0, 201  
high TA and, 125  
holding cans so tight it caused pc’s hands to sweat, 265  
how it comes about, 194  
improperly trimmed meter causing, 194  
is in the physical universe not the pc’s think or bank, 266  
late at night pc’s TA may be high, 197  
making a meter read falsely low with hand cream, 201  
making meter read falsely high with talcum powder, 201  
mishandling false TA by assessing with the meter instead of directly checking the pc, 265  
not OK to call pc’s attention to his hands, TA, or meter during session, 235  
obscured by false auditing reports, 282  
one-hand electrode and, 48, 72, 195, 282  
out of range F/Ns, correct procedure for, 260, 281  
over-repair due to, 266  
part of pc’s hand (the palm cup) not touching the can, 265  
pc gone into despair over his TA, handling, 273  
pcs who falsify, 198  
reasons for, 269  
references, 262, 265, 267, 288, 290  
rings causing false R/S, 197  
rusty corroded cans falsify TA, 197  
Scientology F/N and TA position, 260  
slack grip and, 196  
sweaty hands causing low TA, 195  
TA depends on normally moist hands, 222  
tech correction round-up and, 281  
tight clothes and, 266, 272  
tight shoes and, 197, 266, 272  
trim knob thrown off causing false TA, 199  
vanishing creams, 222, 235  
very small cans or too small cans and, 196  
warming up the cans, 198  
wet hands, cause of, 222  
wet hands, handling of, 223  
when to handle false TA, 260  
wrist straps, use of, 271  
wrong can size, handling, 196
- False TA Checklist,  
form, 267  
is manually checked on the pc, 281  
mishandling false TA by assessing with the meter, 265  
use of, 250, 281
- famib,  
family insanity, handling of, 156  
trouble, handling with Confessionals, 298
- fast flow, Qual is not, 248
- fat,  
circulation in, 325, 339  
LSD lodged in, 339  
toxic substances lodged in body fat, handling, 361  
Fear of People List, use of, 250
- fears, handling of, 156
- feeling,  
somatics and, 353  
unfeeling due to drugs, 105
- FES; *see* Folder Error Summary
- FESer(s); *see also* Folder Error Summary  
checking folder to find if pc has made earlier grades, 283  
checklist for, 282  
duty to indicate if pc made last grade and is set up

## SUBJECT INDEX—1976/1978

- FESer(s) (*cont.*)  
for next grade, 283  
how C/Ses depend on, 283  
FFD; *see* Full Flow Dianetics  
firefight, definition, 143

First Dynamic Danger Formula, 211  
fish and fumble, 460  
fixation, fixed idea(s),  
alcohol use and religious fixations, 175  
period of confusion is followed by, 219  
service fac and, 461  
service fac, how it becomes fixed, 457  
Flag,  
“L” series of RDs restricted to, 287  
“NED for OTs” auditors and C/S must be trained at, 479  
NED for OTs delivered at, 389, 478  
fleeting F/N, definition, 223  
flinching pc, 31  
floating needle(s), F/N(s) (ed)(ing),  
ARC break needle differentiated from, 47, 48, 261  
assists and, 150, 153  
auditing pc under protest causes no F/N, 131  
auditor must be able to relate all the EP of a process to an F/N in clay, 42  
auditor stopped just because there was an F/N, handling (in Dianetics), 135  
auditor who called F/Ns regardless of TA position, 201  
bad indicators and “F/N,” 47  
bypassed F/Ns, symptoms of and handling, 177  
bypassing one makes pc uncomfortable, 239  
calling “F/Ns” that were actually ARC break needles, 260  
calling high or low TA F/Ns, 223  
calling out of range F/Ns, 260, 281  
can occur five or more engrams before basic is reached, 403  
case has ceased to F/N, handling, 178  
clearing commands and, 443  
cognition and, 48, 72  
command for rehabbing bypassed F/Ns, 178  
complaints by pc about F/Ns, handling, 169  
definition, 48, 72, 409, 425, 429  
demonstrating one on a meter with no pc or cord connected, 239  
Dianetic F/Ns, calling of, 262, 388, 403, 480  
Dianetic handling of, 61  
disregarded F/Ns, handling, 260, 261, 281  
disregarding actual F/Ns because the TA was not between 2,0 and 3,0, 260  
don’t call F/N until you’ve gotten the postulate, 384, 391  
effect of indicating ARC break needle as an, 261  
ending off a chain or engram at the first sight of an F/N, 131  
EP and, 48  
exam F/Ns after flubs, 147  
false TA and, 194  
“fleeting F/N” defined, 223  
floating TA and, 197  
flying a rud or ruds if no F/N, 445  
F/Ning student, 149  
F/Ning too quickly to be processed well is symptom of heavily charged case, 97  
F/N session end but pc’s TA up at Examiner, reason for, 124  
F/N VGIs at session end but low TA at exam, reasons for, 126  
floating needle(s), F/N(s)(ed)(ing) (*cont.*)  
F/N VGIs ratio stat, 317  
F/N VGIs yet no cognition (in Dianetics), handling, 343  
footplates obscure F/Ns and reads, 235  
getting an F/N at the Examiner, 131  
getting the F/N to Examiner, 124  
good indicators and, 47, 48  
hard to get F/Ns and resistive case, 181  
HCOB on, 48, 72  
high TA and, 48, 177 223, 261  
high TAs and low TAs do not widely F/N, 223  
ignore Dianetic F/Ns until postulate has come off to F/N and VGIs, 388  
indicated too late in Dianetics, handling, 135  
indicated too soon in Dianetics, handling, 135  
indicating F/Ns (patter), 239  
indicating the, 42, 72  
indicators and, 260, 261, 281  
instant F/N; *see* instant F/N  
it’s the postulate—not the F/N that we are going for in NED, 62  
key-out, and, 487  
low TA F/Ns and false TA, 196  
low TA F/Ns from pc holding cans so tight it caused his hands to sweat, 265  
missed F/N due to false TA, example, 194  
missed F/Ns, prevention of, 280  
missing F/Ns on pcs, effects of, 280, 281  
not writing in F/Ns, 36  
occurs just before pc is aware of it, 48, 72  
one-hand electrode and, 48, 72, 93  
out of range F/Ns, correct procedure for, 260, 281  
overran the F/N due to false TA, example, 194  
overrun and missed F/Ns, 280  
packed up F/N, handling, 178  
pcs and pre-OTs often signal an F/N with a “pop” to the left, 48, 72  
pcs who falsify F/Ns, 198  
persistent F/N before original item is gone, handling, 427  
persistent F/Ns in Dianetics, handling, 427  
postulate vs. F/N in NED, 262  
Power F/Ns, 262, 403  
precise instant to tell the pc it’s an F/N, 42  
pre-OTs and, 48, 72  
prepchecking F/Ns, 169  
propitiation and, 47  
read, when F/N is a read, 338  
rehabbing an F/N, 48  
R/S and, 48, 72  
R/S differentiated from, 238  
rud doesn’t F/N, reason, 445  
ruds, getting the F/N on, 445  
Scientology F/N and TA position, 260  
sensitivity and, 280  
sensitivity too high causing missed F/Ns, 265  
set up a case with F/N before undertaking major actions, 38  
TA climbs when F/N is overrun or missed, 48  
taking a road out by “getting an F/N at will,” 198  
TA must be between 2 and 3 for a correct F/N, 194  
tech correction round-up and, 280  
theta bop differentiated from, 239  
thinking of something else to get an F/N, 198  
was not indicated at all in Dianetics, handling, 136  
when to cut a pc’s comm with regard to an F/N, 42  
why pcs don’t come back into session with an F/N, 42  
wide F/Ns which hit the pin, handling, 280  
wide persistent F/N with high or low TA, what it means, 223  
wrong can size causing 3,2 F/Ns, 196

## SUBJECT INDEX—1976/1978

- floating TA, description, 197  
flour, Sweat Program and, 339  
flow(s),  
    bypassed flows can cause high TA, heavy pressure and illness, 132  
    definition, 411, 426  
    earlier unrun flows restimulated by those flows used in later actions causing high TA, 132  
    getting in all flows, 133  
    jumped flows in Dianetics, handling, 136  
    missing flows, running of, 133  
    “rehab or run F1, F2, F3, F0 if they read” when getting in all flows, 133  
    running flows that won’t erase, 452  
    unerased flow preventing others from erasing, 452  
    what happens if any later grade is run with more flows than was used in earlier actions, 132  
    what happens if Dianetics was run single and grades are run triple, 132  
    what happens when a flow not run on earlier items is run on later items, 132  
Flow 0,  
    commands for R3RA, 385, 393  
    missing flows, running of, 133  
    running Zero flows, 134  
    suddenly running a single or triple pc on quad, effect of, 434  
Flow 2, commands for R3RA, 385, 392  
Flow 3, commands for R3RA, 385, 393  
flubs; *see* errors

general motive or purpose determines whether or not he is insane or sane, 313  
"insane," handling the, 65  
"insane" pc, handling, 84  
"insane" pc, main trouble with, 84  
is often the suppressed agony of physical illness and injury, 55  
medical illness and "insane" pc, 84  
physical illness and, 55  
PTS and, 240  
rest, a secure environment and any needful medical treatment, 84  
symptoms of mental derangement often accompany illness, 57  
temporarily insane by reason of emotional shock, handling, 56  
two things which underlie it, 240  
what medical treatment of "insanity" requires, 55  
why the sick and insane do not respond to processing, 50
- in session; *see also* out of session  
auditor using freak control methods or processes to  
in session (*cont.*)  
keep a pc in session, 2  
definition, 198, 445  
M/W/H causing pc not to be in session, 448  
picking up M/W/Hs keeps pcs in sessions, 2  
PTP vs., 447
- inspect(ed)(ion),  
ability to inspect becoming less and less, reason, 457  
blowing engrams by, 81, 388  
returning his freedom to inspect, 468  
service fac forbids inspection, 462  
stable datum adopted in lieu of, 457  
that which is not confronted and inspected tends to persist, 457
- instant F/N,  
always handled first in Dianetics, 355  
charge and, 487  
definition, 487  
instant F/N and BD Dianetic items are the best, 130  
is a read, 487  
recognition of, 487  
running item and, 351  
when it is taken up, 487
- instant read(s),  
definition, 438  
valid R/Ses are not always instant reads, 454
- Instant rock slam, definition, 11
- institution(s), institutional,  
extensive institutional history, 259  
institutional cases and jokers and degraders, 291  
institutional history and illegal pcs, 259  
most people in institutions are probable PTSES, 240
- in-tech, the only way to achieve it, 273
- Integrity Processing; *see also* Confessionals; Security Checking  
cancellation of HCOBs on, 295  
Sec Checking, Confessionals and, 278  
tech correction round-up data concerning, 278
- intensive(s),  
concluding intensives by cleaning up M/W/Hs, 4  
definition of the completed intensives stat, 214  
major Why of 121/2 hour intensives dropping out, 213  
Paid Comps and, 316
- intention, strongest intention in the universe is the intention to be right, 458
- interest,  
auditor assessed by interest only, not by read, handling, 76  
check interest on narrative running of the incident in assists, 218  
command for checking interest in an item, 351, 353  
Dianetics and pc interest, 67, 70  
longest read or pc's interest, 63  
narrative running and, 218, 354  
protest vs, interest in R3RA, 388  
Routine 3RA rules concerning, 388  
running items and, 351  
taking an item in which pc has no interest, 100  
there was no interest in running an item, handling, 137
- interiorization; *see also* exteriorization  
headaches caused by Int problems, 249  
high TA and, 249
- Interiorization Rundown,  
cautions, 143  
effect of running pc who has exteriorized in auditing on something other than Int RD, 130  
End of Endless Int Repair RD vs, Int RD Correction List, 103  
going flat to cog VVGIs on an early flow, 249  
high TA and out Int RD, 199

## SUBJECT INDEX—1976/1978

- Interiorization Rundown (*cont.*)  
is essentially a Dianetic action, 143  
L3RE used when restim occurs, 143  
L3RF form, 135  
messed up Int RD, handling, 103, 140  
reason it is done, 133  
repair list, 135  
theory of, 133  
what it does for the pc, 103  
when C/S orders it, 103  
which auditors can be trusted with, 143
- Int Rundown Correction Llst,  
End of Endless Int Repair RD vs., 103  
use of, 249
- interneship(s),  
being used to teach the course again, 328  
checkouts are done by the students themselves, 284  
checksheets being added to and added to, 285  
courses vs., 328  
definition, 328  
extended and unreasonable auditing requirements  
and, 247  
fast interneships, 328  
graduate described, 328  
HGC auditor must have done interneships for his  
class, 247  
High Crime checkouts and, 328  
interminable interneships, 285  
materials that must be added to certain checksheets,  
293  
Paid Comps and, 316  
permanent certificate issued after interneship, 285  
preventing too much theory on, 329  
product of an, 328  
provisional certificates and, 285  
purpose of, 328
- interpretatlon, InterpretIng,  
Course Supervisor and, 74
- interpreting the tech, 275  
study and, 74
- introverting shock causing self-auditing, 128
- invalidate(s), invalldating, Invalidation,  
auditors, invalidation of, 273  
by pushing pc earlier after he has given the postulate,  
480  
calling prepared lists as statements can invalidate  
pc, 345  
checking for invalidated gains, 180  
example of auditor invalidating pc, 141  
gains invalidated, symptoms and handling of, 180  
invalidative criticism and art, 320  
item invalidated (in Dianetics), handling, 139  
low TA caused by, 196  
missed F/Ns and, 281  
past lives, invalidation of, 233  
pc attained some state and it was invalidated, hand-  
ling, 140  
pc invalidated for getting overt or W/H off, hand-  
ling, 310  
pc looking or feeling continually tired and, 41  
R/S and, 241  
R/S caused by, 172  
“Since last session has anything been invalidated?”,  
180
- invisible field,  
definition, 61  
handling (in Dianetics), 139  
state of case and, 27
- IQ raised by Dianetics, 66
- item(s),  
abandoned item, 139  
item(s) (*cont.*)  
definition, 11  
Dianetic item; *see* Dianetic item  
error of representing an R/Sing item, 18  
instant F/N is a read, 487  
making a ring around the item found, 36  
method of testing for the character of an, 12  
no BD F/N item found in L&N, handling, 308  
no item found in listing, handling, 308, 309  
not giving pc his item, 37  
noting reads while pc is originating items, 438  
only do opposition lists on R/Sing items, 18  
original item; *see* original item  
persistent item that doesn't blow, handling, 175  
persistent item that doesn't blow is usually a wrong  
item, 39  
preassessment item; *see* preassessment item  
read means item is real to pc, 487  
running item; *see* running item  
testing for the character of an item whether term,  
oppterm or coterm, 12  
unreadable item run causing high TA, 124  
unreadable item run causing low TA, 126  
unreadable items being run, handling, 124  
wrong item; *see* wrong item  
it takes as long as it takes, 344
- ### J
- Jogging,  
gradient for Sweat Program, 341  
Sweat Program and, 325  
type of shoes to use, 340
- Jokers and degraders, 291
- Jumped chain(s),  
by forcing pc toward “earlier incident” when it re-  
quired “earlier beginning,” 108  
F/N indicated too late as a cause of, 135  
forced to go earlier below basic causing, 101  
handling, 136  
how pc gets onto an entirely different chain, 480  
jumping chains by saying “it was getting more solid”  
to escape each incident, 102  
making pc jump into another chain, 100  
overrun by demanding earlier than there is, 474  
postulate bypassed as a cause of, 136  
went past basic and jumped chains, handling, 137  
when the item isn't also mentioned in the command,  
130
- Justice; *see also* ethics  
breakdown in many orgs is a failure of executives to  
wear their ethics and justice hats, 207  
definition, 209  
when to use group justice procedures on a staff  
member, 209
- ### K
- key-in; *see also* restimulate  
definition, 61, 424  
lot of engrams keying in, handling, 124  
things that can cause a pc to key-in chains, 124
- key-out; *see also* destimulate  
definition, 61, 424  
F/N and, 487  
instant F/N and, 487  
pc will destimulate in from 3 to 10 days, 71, 124

## SUBJECT INDEX—1976/1978

- Kleenex, 195, 322

Advanced Course material insecurity, cases wrecked  
by, 129  
alter-is of, 275  
confidentiality of upper level RDs, 479  
C/S has to know his materials better than an auditor,  
148  
number of times over the material equals certainty  
and results, 73  
preventing unauthorized use or misuse of upper level  
materials, 479
- material culture failing, 380
- medical doctor(s),  
demanding they become competent, 259  
give the handling of the structural disease side of  
illness to the, 93  
it is not up to Scientologists to salvage the wreckage  
created by, 259
- medical doctor(s) (*cont.*)
- ministers and, 220  
Sweat Program and, 324  
Touch Assist and, 55  
very sick pcs are sent to a, 84
- medical examination(s),  
as an answer to pcs hiding general illness, 128  
assists and, 216  
illness and, 102  
seriously physically ill and, 95, 186  
should be sought where needed, 216  
Sweat Program and, 326  
when C/S orders it, 102  
when to send pc for a, 91
- Medical Liaison Officer, Sweat Program and, 325
- medical treatment, medical; *see also* operations  
assist is not engaging in, 217  
assists and, 216  
Dianetics is not to be confused with medical or other  
practices, 360  
medical terms or symptoms are never assessed in  
Dianetics, 69  
medical terms were put on the running item list,  
handling, 76  
no conflict of interest between any healing profession  
and Dianetics, 57  
Touch Assist causing medical treatment to now work,  
65  
what medical treatment of "insanity" requires, 55  
when to use medical treatment, 92
- medication, medicine(s),  
audited over medicine (in Dianetics), handling, 140  
auditing a pc while on medication, 37  
medicines are drugs, 155
- memory, drugs render thetan forgetful, 105
- mental image picture(s); *see also* pictures  
actions of aspirin and pain depressants on, 104  
auditor has more control over pc's mental image  
pictures than pc does, 61  
definition, 408, 423  
mass and, 71  
mental image pictures are all there is in pc's "mind,"  
60  
psychosomatic pain or discomfort caused by, 104
- mental institution; *see* institution
- mentally retarded, Dianetics and, 65
- mental mass; *see* mass
- metabolism test to check that pc has had enough to eat  
(take a deep breath and let it out), 323, 382
- meter; *see* E-Meter
- metering,  
checking the auditor's glasses out, 495  
checking the auditor's metering out, 495  
discovering auditor weakness or uncertainty in meter-  
ing, 492  
how to tell auditors who have their metering or basic  
definitions madly out, 101  
out metering caused by lack of Cramming and lack  
of Qual Divs, 342  
references for NED auditors, 496  
"Two hours TRs and metering" should always be  
added by Cramming, 342  
Word Clearers and, 263  
Word Clearing, TRs and, 280

thetan could be called a “mystery sandwich,” 219
- N**
- narrative(s), narrative running,  
asking for earlier incident in engram running by  
chains vs, in narrative running, 476  
assists and running the incident itself narrative, 218  
auditing out sessions, 79, 364  
chains are not held together by, 69  
chronically ill pc and, 56  
clue to erasure of a, 477  
commands for all flows, 386, 393  
commands for narrative assessment, 354  
definition of narrative (item), 130, 354  
drilling handling of narrative incident commands, 88  
Drug RD narrative handling of drugs, 362  
earlier beginning command, importance of using it,  
386  
earlier beginning, finding it each time person is moved  
through the incident, 354  
earlier beginning takes precedence over earlier inci-  
dent, 477  
earlier beginning vs, earlier incident, 393, 400  
earlier beginning vs, earlier similar, 79  
engram running by chains vs., 476  
ensuring enough run throughs have occurred, 344  
EP, 354  
EP, how to attain it, 344  
erasure occurs when the postulate is obtained, 477  
erasure, what it depends upon, 400  
example, 101, 130, 417  
example of how a typical narrative item might run,  
417  
example of what is and isn't a, 354  
example of what isn't a, 385  
failure to properly run a narrative incident, effects  
of and how to handle, 344  
getting pc's wording of it, 354  
grinding and, 386, 400, 477  
handling of, 344, 354  
interest and, 354  
it takes as long as it takes, 344  
long sessions running narratives, reason for, 79  
not asking for earlier beginning causing no erasure,  
131  
only going E/S if it starts to grind very badly, 79,  
130, 344, 354, 386  
Original Assessment Sheet, handling of, 155  
postulate, asking for the postulate, 354  
preventing narratives from being run through once  
ortwiceandabandoned, 130  
procedure for narrative running, 354, 386, 393  
psychic trauma, handling of, 354  
reason for running a, 385  
results of narrative handling, 354  
running a narrative item by regular R3RA instead of  
narrative(s), narrative running (*cont.*)  
by Narrative R3RA, 100  
run only if it reads well with pc interest, 354  
secondaries, handling of, 387, 394  
somatic chains vs., 79  
taking narrative items and running them as somatic  
chains, 108  
trick in running narratives, 354  
using Narrative R3RA Quad and full preassessment  
procedure on troubled areas, 102  
what you are handling in R3RA Narrative running,  
477  
when to go earlier similar, 130  
natter(y),  
handling nattery or critical pc, 169  
M/W/H gives a nattery critical aspect, 41  
pc nattery as a symptom of errors in lists, 173  
withholds and, 76  
Nazi(s),  
LSD and, 315  
Nazi criminal outgrowths, 259  
NED Auditor Analysis Checklist, 492

GF used on, 250  
manifestations of (in Dianetics), 101  
many pcs get better even when audited over all kinds of, 102  
NED session and, 76

## SUBJECT INDEX—1976/1978

- out rudiment(s) (*cont.*)  
OT IV Rundown and out ruds pcs, 46  
pc generating out ruds by lying to his NED auditor, 102  
physically ill pcs and, 102  
review and, 102  
special versions of out ruds, 102  
symptoms of, 101, 168
- out tech,  
basic Why of the majority of, 203  
covered up by false auditing report, 254  
detecting falsified auditing reports, 254  
faulty W/Cing and, 264  
illness following auditing, reasons for and handling 219  
in-tech, the only way to achieve it, 273  
lack of proper success story points to, 254  
misunderstood words are the commonest cause of out tech alterations, 274  
misunderstood words as the basic Why of, 203  
pc refusing to re-sign and, 254  
penalty for failure to clear each word of every command or list used, 204  
reason for the bulk of out tech in an area, 109  
round-up of out tech issues, 274  
spreading about due to false auditing reports, 254  
tech "out" in an area because some auditors can't deliver simple Dianetic sessions, 109  
violation of correct clearing of commands is, 444
- out TRs,  
as a major NED error, 108  
caused by lack of Cramming and lack of Qual Divs, 342  
either being inaudible or overwhelming or TR 4 not handled, 100  
handling, 495  
reasons for, 495
- overburdened case, destimulation of, 233  
overburdened incident, 122  
overcharged case, recognition and handling of, 97
- overrun(s), overrunning,  
basic, overrun of, 474  
bypassed F/Ns, handling, 261  
caused by recklessly or continuously rehabbing a past major action, 132  
checking overrun when TA goes high on ruds, 167, 168  
Contact Assist or Touch Assist and, 151  
cutting pc's comm and, 42  
demanding earlier than there is causing, 474  
Dianetic overrun, effects and handling of, 480  
erased chains can be overrun, 143  
F/N indicated too late (in Dianetics), handling, 135  
F/N not indicated at all causing overrun (in Dianetics), handling, 136  
F/N overrun due to false TA, example, 194  
high TA and, 48, 71, 124, 132, 142  
incomplete actions and, 171  
jumped chains causing overrun, handling, 136  
missed F/Ns and, 280  
non-basic, overrun of, 474  
postulate bypassed causing overrun (in Dianetics), handling, 136  
postulate on chain, effects of overrun past the, 384, 392, 480  
Quad Dianetics and, 134  
rehabbing old no longer used processes, 43  
same thing run twice in Dianetics, handling, 138  
underrun, incomplete actions and, 171  
why TAs go high on, 124
- overt(s), overt act(s); *see also* rudiments  
anaten in session caused by overts, handling, 435  
assists and overt act handling, 218  
continuous overts; *see* continuous overts  
definition, 49, 426, 448  
definition of "a goal which is an overt against Scientology," 8  
evil purpose is expressed by committing harmful acts and withholding them, 314  
false motivator and, 49  
false overts case, 49  
false overts, handling, 49  
false reads, checking for, 310  
gamblers take no responsibility for, 304  
"Greatest Overt" process, 114  
high TA and, 199  
invalidated for getting it off, handling, 310  
motivators and, 49  
never did anything wrong in his whole life, 311  
no gains occur in the presence of, 445  
no overts person, 311  
not knowingness and- 298  
overt engrams, running of, 396  
overt of omission, definition, 49  
pc felt overts weren't accepted, handling, 310  
person heavily the effect of something has done it as an overt, 176  
protesting getting off overts already gotten off, handling, 310  
PTS and environmental continual overt, 50  
punished for getting it off handling 310  
recurring overt defined, 310  
recurring withholds and overts, handling, 310  
references, 449  
service facts and, 461  
shallow overts, 311  
stupidity caused by, 299
- overt-motivator sequence, two sides of, 241  
Overt-Withhold Straightwire, Know to Mystery Scale and, 1  
overweight people and Sweat Program, 339
- overwhelm(ed)(ing),  
handling overwhelmed pc, 124  
high TA and, 124  
it is engrams which overwhelm the thetan, 29  
low TA and, 126, 147, 199, 201  
low TA caused by overwhelming TRs, 199, 201  
"overwhelmed" added to GF 40, 119  
"overwhelmed by auditing" added to IV Rundown, 120  
repair is only done to get off the overwhelm, 228  
O/W, dictum of using no O/W processes in ruds, 4  
Oxford Capacity Analysis; *see* OCA graph

joking about one’s post, 291  
penalty for going by MUs in despatches or telexes, 221  
roller-coaster on, 210  
study tech and, 221
- postpartum psychosis, 65
- postulate(s),  
allowing pc to get all the charge and postulates out of basic, 344  
all picture chains are there because the first time and the postulate are there, 80  
assists and postulate two-way comm, 218  
bypassed postulate on the chain, handling, 136

## SUBJECT INDEX—1976/1978

- postulate(s) (*cont.*)  
can be confused with bouncers and deniers, 480  
chain is held in place by the, 62, 80, 262, 384, 392, 480  
chain is held in place by the basic and the, 80  
cognition vs., 403, 480  
command (in R3RA) to ask for, 343, 384, 392, 403, 480  
definition, 410, 424  
don't call F/N until you've gotten the, 384, 388, 391  
drilling checking for postulate in R3RA, 88  
effect of ending off before pc has given the, 71  
ending, chain or engram at first sight of an F/N and wondering why no postulate came off, 131  
engrams and, 332  
EP of chain is postulate coming off, 384, 392  
EP of Dianetic chain and, 62, 66, 125, 262, 332, 343, 384, 388, 392, 403, 451, 480  
erasure occurs when the postulate is obtained, 477  
erasure occurs when the postulate made during the basic incident is gotten off, 59  
examples, 480  
F/N vs, postulate in NED, 262  
getting the postulates in the basic incident, 343  
ignore Dianetic F/Ns until postulate has come off to F/N and VGIs, 388  
it's the postulate—not the F/N that we are going for in NED, 62  
leaving picture partially there by not getting the postulate, 71  
more than one postulate in the basic incident, 344  
narrative running and, 354  
overrun by demanding earlier than there is, 474  
overrun past postulate on chain, effects of, 384, 392, 480  
postulate off equals erasure, 384, 391, 480  
recognizing when you hear one, 480  
there was a postulate that was not expressed (in Dianetics), handling, 139  
usually comes off in the form of a cognition, 480  
what you're erasing is the basic postulate that made the chain, 474
- potassium and Sweat Program, 340  
potassium gluconate tablets, 340  
potential trouble source(s), (PTS)es~ness); *see also* roller-coaster  
accidents and, 210  
blowing charge on past PTS handlings, 246  
cassette to send or play to antagonistic people, 276  
constant recurring somatic, pressure or mass and, 50  
data, 244, 245  
definition, 50, 240, 275  
environmental continual overt and, 50  
environmental menace and, 50
- PTSness, 247  
full handling of, 275  
gains not held by PTS pcs, 360  
handling, 246, 275  
handling PTSness before you begin Dianetic auditing, 360  
handling, what full handling would consist of, 244, 245  
insanity and, 240  
jokers and degraders and, 291  
materials on L&N, PTS and SP tech added to Level IV, 293  
mechanism of, 50  
most people in institutions are probable PTSes, 240  
non-audited handling of, 280

marking TA readings from a one-hand electrode, 195  
measures mental mass, 80  
not OK to call pc's attention to his hands, TA, or  
meter during session, 235  
one-hand electrode and, 93, 195, 282  
pc gone into despair over his TA, handling, 273  
pcs who falsify TA or F/Ns, 198  
resistance, E-Meter and, 260  
rising TA means incident has gone more solid (in  
Dianetics), 61, 383, 391  
Scientology F/N and TA position, 260  
what TA depends upon, 260  
why the TA rises, 71
- tone arm action, tone arm motion,  
Dianetic auditor is not concerned with, 474  
no TA on a Sec Check, what it means, 39  
Original Assessment Sheet and, 367  
Scientology audits by the amount of TA, 474  
service fac handling and, 457
- tone arm motion; *see* tone arm action
- tone level(s),  
misunderstood vs, tone level during study, 149  
Tone Scale position, what determines it, 439  
what happens as tone goes lower, 439
- tone of voice; *see* voice
- Tone Scale,  
ability to reach determines position on, 439  
illustrated in full, 193
- tooth, teeth,  
bursting feelings in, 123  
decay and, 123  
persisting tooth trouble, NED handling of, 123
- toothache(s),  
handling toothache that does not resolve, 123

## SUBJECT INDEX—1976/1978

- toothache(s) (*cont.*)  
    persisting tooth trouble, NED handling of, 123  
    sympathetic nervous system pains and, 123
- Touch Assist(s),  
    checking for overrun, 151  
    Clears, OTs and Dianetic Clears may receive, 215  
    EP of, 151  
    F/N and, 218  
    handling something around the head, 153  
    head somatic also sticks in the spine, 153  
    how it permits healing to occur, 55  
    how long to do one, 218  
    interrupting a general course of auditing, handling,  
        128  
    mandatory to take pc to Examiner afterwards, 129  
    medical treatment now working because of, 65  
    no F/N, handling, 151  
    operation should be followed by, 65  
    pain gets stopped in the nerves, 122  
    references, 151  
    sympathetic nervous system pains and, 122  
    theory of, 55  
    theory of what an assist is doing, 217  
    workability of “laying on of hands,” 55  
    worksheet is required, 129
- toxic substances lodged in body fat, handling, 361
- track; *see* time track
- train(ed)(ing); *see also* checkouts; course; Course Supervisor; drills; internship; practical; student; study; theory; TRs  
    application; *see* application  
    biggest failure in training auditors, 63  
    Dianetic auditor requires a month to train, 66  
    end of endless training, breakthrough, 483  
    fast courses, 483  
    forbidden to run new techniques without being properly trained and certified, 483  
    four weeks or less to train a NED auditor, 483  
    how do you know what good auditing is unless you’re trained?, 285  
    how you get a course text weighing one ton, 80  
    Major Training Service defined, 316  
    NED command training drills, 86  
    number of times over the material equals certainty and results, 73  
    Paid Completions simplified, 316  
    pc cannot buy training or processing due to money troubles, handling, 179  
    pc who has trouble needs training, 117  
    pretending training or grades not attained, handling, 181  
    product of a course, 328  
    professional rates, 284  
    questions by the student, handling, 74  
    schedule and Dianetic Course, 74  
    Solo student, training of, 113  
    teaching of basic data restimulates confusions, 74  
    teaching the Dianetics Course, 74  
    things student is weak on are done in clay, 74  
    why it’s cheaper to be trained, 117  
    why speed and accuracy is the stress of all training, 94
- TR Debug Assessment, form, 336
- trap(s); *see also* implants  
    implants, degradation and entrapment, 30  
    importance of obliterating entrapment activities, 30  
    what traps a thetan, 132
- tranquilizer(s),  
    delusion, how drugs produce it, 176  
    drugs, aspirin and, 104
- transgression, individuation and, 297
- translations of prepared lists, 252
- treason, person in treason on Ist dynamic is out of valence, 97
- treatment; *see* medical treatment
- trim (knob), trimmed, trimming,  
    checking the trim in mid-session, 269  
    false TA by throwing the trim knob off, 199  
    false TA due to improperly trimmed meter, 194  
    improperly trimmed meter gives false TA, 269  
    leaving meter on a minute or two before trimming, 269  
    procedure for checking trim, 77, 194  
    reason meter should be left on a minute or two before trimming, 194  
    temperature changes making E-Meters go out of trim, 77
- Triple Dianetics,  
    missing flows, running of, 133  
    rehab, 133  
    reruns, 132  
    what happens when a flow not run on earlier items is run on later items, 132
- Triple Grades,  
    Quad Grades restored, 307  
    what happens if Dianetics was run single and grades were run triple, 132
- trips during the Sweat Program, handling, 339
- trouble(s), difficult; *see also* complaints  
    handling zones of difficulty with Confessionals, 298  
    how we are making all our own trouble, 5  
    NED auditor not having good success with NED, handling, 492  
    makes trouble for auditors, handling, 181  
    pc who has trouble needs training, 117  
    student having real trouble on course, handling, 251  
    what a difficulty given by pc on Original Assessment is composed of, 353  
    where trouble a C/S is running into comes from, 144
- TRs,  
    are how one runs a session, 141  
    assessment TRs, 430  
    auditing skill remains only as good as student can do his TRs, 157  
    bogs on TRs, handling, 336  
    confusions on meter, Model Session and processes stemming from inability to do TRs, 157  
    daily TRs, 263  
    Debug Assessment form, 336  
    discovering auditor weakness or uncertainty in, 492  
    flubs in TRs are the basis of all confusion in subsequent efforts to audit, 157  
    going through TRs several times getting tougher each time, 162  
    lousy TRs causing low TA, 196  
    misunderstood word, doing TRs over a, 336  
        NED command training drills, 86  
    out TRs; *see* out TRs  
    overwhelming TRs causing low TA, 199, 201  
    processes will not function in the presence of bad TRs, 157  
    reasons LRH modernized TRs O to 4, 157  
    reasons TRs are important, 157  
    references, 336  
    remodernized, 157  
    speed of auditor related to, 94  
    “Two hours TRs and metering” should always be added by Cramming, 342  
    withdrawal symptoms eased by, 106  
    Word Clearers and, 263  
    Word Clearing, metering and, 280
- TR 0; *see also* confronting  
    commands, position, purpose, etc., 158

## SUBJECT INDEX—1976/1978

### TR 0 (*cont.*)

- Confronting Bullbaited, 158
- OT TR 0 commands, position, purpose, etc., 157
- reason it exists, 141
- TR 1,
  - auditor could find no item in Dianetics due to bad TR 1, 102
  - commands, position, purpose, etc., 159
  - must be done so pc can hear and understand auditor, 141
  - prepared lists don't work with weak TR I, 248
  - weekly or monthly Qual check on TR I and ability to make a question read, 263
- TR 2; *see also* acknowledgement
  - commands, position, purpose, etc., 159
  - must be done so that pc gets acknowledged, 141
- TR 21/2, commands, position, purpose, etc, 160
- TR 3, *see also* duplication
  - commands, position, purpose, etc., 160
  - reason for, 141
- TR 4; *see also* originations
  - commands, position, purpose, etc., 162
  - reason for, 141
- TR 100, commands, position, purpose, 87
- TR 100-A, commands, position, purpose, 87
- TR 101,
  - commands, position, purpose, 88
  - importance of, 277
- TR 102,
  - commands, position, purpose, 88
  - importance of, 277
- TR 103,
  - commands, position, purpose, 89
  - importance of, 277
- TR 104,
  - commands, position, purpose, 89
  - importance of, 277
- TRs 101-104,
  - situations auditor must know how to handle in R3RA, 496
  - slow auditor handled with, 94
  - speeding the auditor up with, 94
- TRs Course, Hard TRs Course,
  - programming of, for NED, 361
  - public courses on TRs are not "softened," 157
  - when to send auditor to do a, 495
- truth,
  - honesty is the road to, 255
  - road to truth is begun with honesty, 214
  - sanity is truth, 214
- 24 hours, repair flubbed Dianetic session or chain within, 156
- twin(s), twinning,
  - practical twins are highly interchangeable, 284
  - theory room must be quiet, 284
  - twinning on theory, reason it was cancelled, 284
- 220H,
  - commands for running recalls and engrams, 490
  - EP of, 96
  - use of, 97
- two-way communication(s),
  - art and, 319
  - assists and postulate two-way comm, 218
  - assists, two-way comm steps of, 219
  - check for read on two-way comm subjects, 124
  - forbidden to do two-way comm actions as Solo, 127
  - M/W/H handling with, 4
  - Objectives quicked with, 333
  - references, 472
  - what it consists of, 4
  - which turned into a listing action, 308

## U

- unaware, State of Case Scale and, 27
- unburden(ing),
  - definition, 62
  - destimulation; *see* destimulation
  - easiest way to unburden cases, 234
  - erasure and, 80
  - overburdened incident, 122
  - with Objectives and Recall (ARC S/W, Self Analysis) 234
- unconscious pc, assist handling of, 151
- underrun, handling, 171
- undershd(ing)~
  - making fun of things one doesn't understand, 291
  - there is no substitute for, 81, 247
  - unusual solutions vs., 81
- underweight people, Sweat Program and, 339
- unflat pictures or masses, handling, 433
- universe; *see* physical universe
- unresolving cases, 50
- unusual solution(s),
  - auditor asking D of P for an, 36
  - when one will require unusual solutions, 81
- upset(s),
  - due to suddenly running a single or triple pc on quad, 434
  - earlier Dianetic upset was restimulated, handling, 138
  - handling of (on Original Assessment Sheet), 155
  - Int problems and, 249
  - list errors and, 192
  - missed F/Ns and, 280
  - M/W/H and, 278
  - people whose ethics are low will upset a group, 208
  - running item list, pc upset after listing a, 355
  - violent session upset in Dianetics, handling as a list error, 192
  - wrong item and, 210

## V

- valence(s),
  - command (valence shifter list question), 39
  - definition, 63
  - Dianetic RD to handle, 357
  - Dynamic Sort Out Assessment can shift valences, 251
  - out of valence; *see* out of valence
  - pc's own valence in the past is a terminal, 10
- vanishing creams, 222, 235
- Vaseline Intensive Care, 235, 265, 271
- vegehbles, Sweat Program and, 340
- verbal tech is no substitute for HCOBs, 281
- very good indicators; *see* good indicators
- visio, R3RA develops visio, 381
- Vital Info RD not restricted to Ex Dn, 275
- vitamin(s),
  - are not drugs, 176
  - enteric coated vitamins and Sweat Program, 339
  - stomach upsets and, 339
  - Sweat Program and, 325, 339
- Vitamin B Complex,
  - aids in getting rid of LSD in the system, 339
  - wet hands caused by deficiency of, 222
- Vitamin B1,
  - alcohol burns it up, 175
  - effects of, 176
  - given to pc before session, 175
  - reduces obsessive create by thetan due to drugs, 176

## SUBJECT INDEX—1976/1978

Vitamin C, aids in getting rid of LSD in the system, 339  
voice,  
  ask pc the question in a questioning tone of voice, 430  
  tone of voice in assessing, 355  
  tone rises on a question and goes down on a statement, 355  
*Volunteer Minister s Handbook, The*, 243  
  upset with getting off

### W

walk, taking a walk as a remedy for pc who can't get some rest, 125  
WDAHs, second D of P stat is, 214  
well and happy pc (being), 85, 350, 353, 360, 389, 441  
well done, when to give one in Dianetics, 85  
"What are you tging to prevent?", 172  
whole track drugs are not asked for on Drug RD, 361, 484  
Why(s),  
  basic Why on W/Cing dropping out in orgs, 335

---

*I will not always be here on guard.  
The stars twinkle in the Milky Way  
And the wind sighs for songs  
Across the empty fields of a planet  
A Galaxy away.*

*You won't always be here.  
But before you go,  
Whisper this to your sons  
And their sons —  
“The work was free.  
Keep it so. “*

## **EDITOR'S NOTE**

This is Volume XII of *The Technical Bulletins of Dianetics and Scientology* by L. Ron Hubbard. It contains the many fantastic technical breakthroughs achieved by Ron during the latter part of 1978 up to the end of 1979, carrying on directly from where Volume XI ends.

As in other Technical Volumes, if an issue has been revised, replaced, or canceled, this has been indicated in the upper right-hand corner along with the date of the issue which should be referred to.

The Chronological Contents shows at what point on the time track each issue in this volume was released, and the Long Contents gives you a breakdown of the subject content of each separate HCOB or issue.

In the Subject Index at the back of this volume, main entries appear in boldface type to make it easy to find any subject.

If the title of a bulletin is known but not the date of issue, the Alphabetical List of Titles may be consulted to locate the issue fast.

Lastly, the Cancellations and Revisions lists show you which issues in previous Technical Volumes have been canceled or revised by issues presented in Volume XII.

The Editor

# TECHNICAL BULLETINS 1978-1979

## CONTENTS

### 1961

- 8 June R E-Meter Watching (revised 22 Feb. 1979) 1

### 1965

- 16 Nov. R E-Meter Sensitivity Setting (revised 22 Feb. 1979) 4

### 1966

- 10 Feb. R Tech Recovery (HCO PL) (revised 22 Feb. 1979) 5  
11 Feb. R Free Needles, How to Get Them on a Pc (revised 22 Feb. 1979) 9

### 1967

- 12 Feb. The Responsibilities of Leaders (corrected and reissued 4 Sept. 1979) 11

### 1969

- 19 May RB Drug and Alcohol Cases—Prior Assessing (re-revised 14 Nov. 1978) 22  
16 Aug. R Handling Illness in Scientology (revised 25 Sept. 1978) 24

### 1970

- 7 Apr. RB Green Form (HCO PL) (revised 8 Dec. 1978) 27  
11 Apr. R Auditing Past Exterior (Int. RD. Series 6) (revised 23 Sept. 1978) 32

- 4 Jan. R Exteriorization and High TA—The Interiorization Rundown Revised (Int. RD. Series 2) (revised 24 Sept. 1978) 43

## 1971 (cont.)

13	Jan. R	Exteriorization (Int. RD. Series 9) (revised 24 Sept. 1978)	51
7	Mar. R	Use of Quadruple Dianetics (C/S Series 28RA-1RA) (revised 12 Dec. 1978)	53
15	Mar. R	Data Series Auditing (HCO PL) (Data Series 21R) (revised 6 Jan. 1979)	56
4	Apr. R	Use of Quad Dianetics (C/S Series 32RA-1RC) (revised 12 Dec. 1978)	57
30	June RB	Expanded Green Form 40RD—EXGF 40RD (revised 4 Dec. 1978)	60
3	July R	Auditing by Lists (revised 22 Feb. 1979)	70
15	July RC	Drug Handling (C/S Series 48RD) (NED Series 9RB) (re-revised 31 Jan. 1979)	73
24	Sept. R	Interiorization Rundown—Correction Drill: Date to Blow/ Locate to Blow (Int. RD. Series 11) (revised 24 Sept. 1978)	79
29	Oct. RA	Int Rundown Correction List Revised (Int. RD. Series 12) (re-revised 24 Sept. 1978)	84
9	Dec. RC	PTS Rundown, Audited (re-revised 8 Dec. 1978)	90
16	Dec. RB	Interiorization Errors (C/S Series 35RB, Int. RD. Series 10) (re-revised 24 Sept. 1978)	98
17	Dec. RB	Interiorization Summary (Int. RD. Series 15, C/S Series 23RB) (re-revised 24 Sept. 1978)	102

## 1972

1	Jan. RB	LIX Hi-Lo TA List Revised (revised 10 Feb. 1977)	107
20	Jan. R	PTS RD Addition (revised 8 Dec. 1978)	124
3	June RA	PTS Rundown, Final Step (re-revised 8 Dec. 1978)	126

## 1973

30	Jan. RC	Method 9 Word Clearing the Right Way (W/C Series 46RC) (revised 19 Dec. 1979)	128
7	Apr. RA	Gradients in TRs (revised 22 Feb. 1979)	142
15	Oct. RB	Nulling and F/Ning Prepared Lists (C/S Series 87RB) (re-revised 4 Dec. 1978)	144
24	Nov. RD	Short Hi-Lo TA Assessment C/S (C/S Series 53RL SF) (revised 30 Oct. 1978)	147
24	Nov. RE	C/S Series 53RL LF (Long Form) (revised 30 Oct. 1978)	150

## 1974

18	Mar. R	E-Meters—Sensitivity Errors (revised 22 Feb. 1979)	154
----	--------	--	-----

## 1975

29	Mar. R	Antibiotics, Administering of (revised 23 Oct. 1978)	156
----	--------	--	-----

## 1977

14	June -1	Paid Comps Simplified—Addition I —C/S Series 81RA—Auditor’s Rights Modified—Addition I (addition of 12 June 1979)	162
----	---------	---	-----

## 1978

6	Feb. RA	The Purification Rundown Replaces the Sweat Program (re-revised 4 Dec. 1979)	163
6	Feb.RA-1	The Purification Rundown—Errata and Additions (addition of 20 Dec. 1979)	180
23	Mar. RA	Clearing Words (W/C Series 59RA) (revised 14 Dec. 1979)	182
19	Sept. R	The End of Endless Drug RDs (revised 31 Jan. 1979)	185
19	Sept. R	The End of Endless Drug Rundowns Repair List (revised 31 Jan. 1979)	187
24	Sept. RA	The End of Endless Int Repair Rundown (Int. RD. Series 4RA) (revised 21 Feb. 1979)	189
24	Sept.	Preassessment, AESPs and Int (Int. RD. Series 13)	199
24	Sept.	Dianetic Clear	200
25	Sept.	Quad Commands for Int Buttons (Int. RD. Series 5)	201
25	Sept.	Starrate Checkouts for Interiorization Rundown (Int. RD. Series 14)	206
29	Sept.	FESing of Folders and Full Flow Tables	209
3	Oct.	NED Rule	210
4	Oct.	Interiorization Handling Simplified (Int. RD. Series 1)	211
16	Oct.	Repair Correction List	214
16	Oct.	C/S Checklist of Int Errors (Int. RD. Series 16, C/S Series 102)	217
30	Oct.	C/S Series 53, Use of	220
30	Oct.	Courses—Their Ideal Scene	223
10	Nov. R	Proclamation—Power to Forgive (revised 3 Dec. 1978)	225
10	Nov. R-1	Proclamation: Power to Forgive Addition (addition of 26 Nov. 1978)	227
15	Nov.	Dating and Locating	228
19	Nov.	L & N Lists—The Item “Me”	237
27	Nov.	Word Clearing Correction List (W/C Series 35RF)	238
28	Nov.	Auditors Who Miss Withholds, Penalty	242
29	Nov.	Dianetic Clear Attests (C/S Series 104)	243
30	Nov.	Confessional Procedure	245
	Dec.	<i>What Is Scientology?</i>	251
1	Dec.	Programming the Dianetic Clear for His Next Step	252
3	Dec.	Unreading Flows	253
4	Dec.	How to Read through an F/N	254
5	Dec.	Dianetic Clear Attests—Additional Data (C/S Series 105)	256
6	Dec.	Revivification	259

## 1978 (cont.)

7	Dec.	HCOB 1 October 1978, HCOB 6 October 1978 on Bright Think Rundown Withdrawn	260
8	Dec.	Green Form and Expanded Green Form 40RDs Use of	261
9	Dec.	HCO PL 23 Oct. 76 and BPL 29 Nov. 1976 Canceled (HCO PL)	263
13	Dec. R	Pc Set-Ups and C/S 53 (revised 24 Sept. 1979)	264
17	Dec.	Ron's Journal 30—1978—The Year of Lightning Fast New Tech (LRH ED 301 INT)	265
29	Dec.	The Suppressed Person Rundown	276
30	Dec. R	Suppressed Person Rundown Problems Processes (revised 6 Jan. 1979)	279
31	Dec.	Outline of PTS Handling	290
31	Dec.	Educating the Potential Trouble Source, the First Step Toward Handling: PTS C/S-1	293

## 1979

6	Jan.	HCOB 24 July 1970 and HCOB 28 August 1970RA Canceled ( <i>cancelled—see</i> HCOB 28 Aug. 1970RB Vol. XIII)	300
6	Jan.	Correction to Ron's Journal 30—Requirements for Super Power Auditors (LRH ED 301-1 INT)	301
9	Jan.	BTB Cancellation	302
17	Jan.	A New Type of Crime (HCO PL)	303
19	Jan.	Cancellation (HCO PL) (Data Series 47)	304
28	Jan.	C/S Qualifications	304
31	Jan.	Mood Drills	305
3	Feb.	Change the Civilization Eval (corrected and reissued 8 Feb. 1979)	307
3	Feb.	Confront Tech Has to Be Part of the TR Checksheet	311
7	Feb. R	E-Meter Drill 5RA—Can Squeeze (revised 15 Feb. 1979)	312
9	Feb.	How to Defeat Verbal Tech	317
15	Feb.	Verbal Tech: Penalties	318
21	Feb.	E-Meter Essentials Errata Sheet (HCO PL) (corrected and reissued 6 May 1979)	319

# CHRONOLOGICAL CONTENTS

The Chronological Contents is a full contents list showing the chronology of the issues in this volume. It lists the issues under the date when each was last revised or reissued. If the issue has never been revised or reissued then it is simply listed under its original issue date. Persons who wish to study the HCOBs in chronological sequence will find the Chronological Contents especially useful.

## 1977

10 Feb.	LIX Hi-Lo TA List Revised (revision of HCOB I Jan. 1972)	107
---------	--	-----

## 1978

23 Sept.	Auditing Past Exterior (Int. RD. Series 6) (revision of HCOB 11 Apr. 1970)	32
23 Sept.	Interiorization Intensive—2-Way Comm (Int. RD. Series 3) (revision of HCOB 30 May 1970)	38
23 Sept.	Interiorization Rundown Musts (Int. RD. Series 8) (revision of HCOB 20 Aug. 1970)	40
24 Sept.	Blows—Auditing Past Exterior (Int. RD. Series 7) (revision of HCOB 6 May 1970)	34
24 Sept.	Exteriorization and High TA—The Interiorization Rundown Revised (Int. RD. Series 2) (revision of HCOB 4 Jan. 1971)	43
24 Sept.	Exteriorization (Int. RD. Series 9) (revision of HCOB 13 Jan. 1971)	51
24 Sept.	Interiorization Rundown—Correction Drill: Date to Blow/ Locate to Blow (Int. RD. Series 11) (revision of HCOB 24 Sept. 1971)	79
24 Sept.	Int Rundown Correction List Revised (Int. RD. Series 12) (re-revision of HCOB 29 Oct. 1971)	84
24 Sept.	Interiorization Errors (C/S Series 35RB, Int. RD. Series 10) (re-revision of HCOB 16 Dec. 1971)	98

# LONG CONTENTS

## **HCO B 8 June 1961R E-METER WATCHING, 1**

Reactive mind responds instantly, 1  
Pc response, analytical vs. reactive, 1  
Why assessments can be wrong, 1  
E-Meter responds instantly, 2  
How to assess Pre-Hav Scale, 2  
Don't think you have to wait for a needle response, 3

## **HCO B 16 Nov. 1965R E-METER SENSITIVITY SETTING, 4**

Setting up an E-Meter for session, 4  
Determining pc's sensitivity setting, 4

## **HCO PL 10 Feb. 1966R TECH RECOVERY, 5**

Rehabbing lower grades, 5  
Overrunning free needles, 5  
Rehab by rehab procedure, don't use another process, 6  
Don't use unusual solutions, 6  
When SP is discovered, give an S & D to his associates, 6  
After SP is removed, if stats are still down, look for another SP, 6  
Case Supervisor lives in an Ivory Tower, 7  
Primary indication of the presence of an SP, 8

## **HCO B 11 Feb. 1966R FREE NEEDLES, HOW TO GET THEM ON A PC, 9**

Rehabbing several overruns, 9  
Free needle and sensitivity setting, 9  
Pcs are most apt to go free needle after a big cog, 9  
Three causes of dirty needles, 10

## **HCO B 12 Feb. 1967 THE RESPONSIBILITIES OF LEADERS, 11**

Comments on power, 11  
Bolivar's errors, 11  
The tragedy of Manuela Saenz, 16  
Seven things about power, 19

## **HCO B 19 May 1969RB DRUG AND ALCOHOL CASES—PRIOR ASSESSING, 22**

Characteristics of drug cases, 22  
Prior assessment steps, 22  
Noting and handling reads, 22

## **HCO B 16 Aug. 1969R HANDLING ILLNESS IN SCIENTOLOGY, 24**

Sickness is the result of engram chains in restimulation, 24  
Illness handling steps, 24  
Life ruds, 25  
Procedure for three S & Ds, 25  
Handling a resistive illness situation, 26

REVISED 22 FEBRUARY 1979

*(Revisions in this type style)*

## **E-METER WATCHING**

### **ARE YOU WAITING FOR THE METER TO PLAY DIXIE?**

I have been a bit surprised by the length of time it is taking people to do assessments on the Prehav, on Security Checks and goals.

A query into this, which may reveal more, has discovered that students wait patiently for the meter to react, which Mary Sue has noticed.

It dawns on me that auditors believe they are doing an *analytical* assessment on the Prehav, etc. *This is wrong.*

The Prehav Scale is not a picture of analytical thought. It is in the order it is in because it is a picture of reactive thought. It is how the reactive mind is stacked up. (See *Dianetics: The Modern Science of Mental Health* for the chapter on the reactive mind. )

Now an E-Meter reacts only on the reactive mind. A Clear doesn't react because he is able to be conscious. An aberree reacts because he can't think without thought exciting the reactivity of the reactive mind. This, being composed of mass, energy, space, time and thought, responds to tiny electrical impulses.

If your auditing was not aimed at reactivity it would not register on a meter. Thus, you run what reacts because it reacts and is therefore part of the reactive mind.

The reactive mind responds instantly on data a billion years ago. How is this? Time in the reactive mind is out of order. So is space. So is matter, so is energy. Pin a sign on the reactive mind: "Out of Order." It connects wrong connections. Hence, the E-Meter.

What is wrong with the pc is not known to the pc. Therefore if a pc knows all about it, it isn't wrong with him.

That's why you never run what the pc says. You run *only* what the meter says. Example: pc *is sure* his current general Prehav Level that should be run now is "Order or Command." "Order" rapidly vanishes. "Command" follows suit. CONQUER stays in. This is an actual example. I just assessed it a few minutes ago on a pc who is in pretty good shape. He didn't like CONQUER. He said Order and Command were long track. Somebody running a Q and A on his assessment would have said, perhaps, the pc knows best, so we'll run Order. Even if it doesn't fall. But when I said it was CONQUER that we were going to run as only *it* now fell, the pc sighed and gave in. Finding the Conquer level questions produced a very responsive meter needle. It was wrong with the pc because he didn't know about it. It was part of his reactive mind. Order and Command were analytical responses prompted by an entirely different thing CONQUER. If Order or Command had been run the pc would have had a lot of auditing time wasted on him.

Now, why are assessments wrong sometimes? Because the auditor is persuaded by the pc, not the meter. If the pc and the meter agree, so what. You can still run it. But only if the meter says so, for only then is it reactive.

Now, what about *slow* assessments? Well, the auditor thinks the pc must consider things before he answers, waits for the pc to answer and waits for the question to sink in so the meter will react.

This is entirely wrong. Based on a misunderstanding of assessment, the meter and the reactive mind.

1. The pc does not have to be given a chance to think before the needle responds.
2. The pc does not have to answer or say one word to make the needle respond.
3. All needle response is reactive.
4. There is no time in the reactive mind.
5. If the pc knew what was wrong with him it wouldn't be wrong.
6. Only the meter knows.
7. The auditor has more control over the pc's reactive mind than the pc since the pc is influenced by the reactive mind responses and the auditor is not so influenced.

The meter responds instantly. The reaction you will get on the needle starts to occur on the needle *instantly* after you utter it.

There is no need to sit there afterwards waiting for the needle to respond again, for it won't until you push that button again.

The only wait is caused by letting the needle come back at the end of a fall. This may take one second.

Therefore: TO WAIT MORE THAN *ONE* SECOND BEFORE UTTERING THE NEXT WORD ON THE LIST IS A COMPLETE WASTE OF AUDITING TIME.

All the response you want will begin to occur instantly after you utter a goal, terminal, level or security question. Thus the maximum time between questions on the Prehav Level is at most a three-second interval of silence while you digest the data.

Further, on an assessment for a Prehav run on the General Scale (as in Routine 2, HCOB 5 June 1961), you do not now say, "Do you . . ." or any other dunnage. You just say the level itself, note response, put a pencil point down on the level if it responds, say the next word, etc., etc. Takes about 5 minutes to run the Primary Scale up and down to find its level. You start at the bottom. You just say the word. If it responds you dot the sheet (using different symbols to tell them apart like dots, X's, lines). Then go back down the scale touching only those you marked going up. Add another dot if they still fall or react. Then play off those left one against the other, saying a level only once each time. The remaining level is now the only one that reacts. So you assemble your 5-way bracket and carry on with auditing.

The pc doesn't have to say a word throughout the whole assessment. You can even ask him politely not to, as breath going in and out in speech can vibrate the needle.

When you assess over into the Secondary Scale of the level you found, you do exactly the same as above. You read them all off once, then only those that reacted, eliminate them and you've got it. (And, by the way, if you go over the Secondary Scale, you then don't only run levels on that Secondary forever; in each new assessment you use the Primary Scale again to find a new Secondary Level to assess.)

This is also true of a Joburg. If you're going to get a reaction on the needle, it will come fast. No waiting. If you get a reaction you clear that reaction, not the pc's whole life. The moment the needle is null, you go on to the next question. Of course, in a Joburg, the pc talks. He better!

All auditing actions except the CCHs are now done in Model Session.

And all auditing actions and questions are done effectively, neither frantically rushed nor slowly.

So it boils down to this. Weeks can be added to Joburgs and assessments if you think you have to wait for a needle response.

What are you waiting for? The whole action only requires a second.

Don't wait for the E-Meter to play Dixie. It was made in the Nawth.

REVISED 22 FEBRUARY 1979  
(Revisions in this type style)

**TECH RECOVERY**

(Ref: HCOB 7 Feb 79R, E-METER DRILL 5RA—CAN SQUEEZE)

My study of a Nov 1965 plummeting HGC Completion Statistic indicates certain policies are necessary in all HGCs and Qual Divisions.

The following errors were found:

1. The HGC ceased to look for former release grades to rehabilitate and ignored opportunities to do so on the basis that “outer orgs have rehabbed them already.” This came out in the Comm Ev held on a D of P of that period. Of course, if the HGC failed to rehab earlier grades (or earlier life overruns) it could achieve no later grades or Grade V. This alone would have ended completions promptly on all grades and wiped out the graph.

2. Invalidation of the appearance of a free needle and invalidating any auditor who “thought he saw one.” This wiped out all Release attainments and made for total overrun of all pcs of all grades. This error existed for 15 years so it is not surprising that it got back in again.

3. Whenever an overrun occurred, “rehabilitation of it” was done by running *different* new processes instead of standard rehab routine as in HCOBs, i.e. doing ARC break PPS, rudiments anything but a real rehab of that process that was overrun.

4. Abandonment of standard tech in favor of unusual solutions. This is always present when a collapse of tech occurs.

5. One SP was found in the middle of all this but after his departure the statistic did not recover so one can assume another SP was in the middle of it still or that the HGC remained PTS and didn’t separate from the SP found because he was so convincing, so reasonable and so persuasive as to why a tech statistic must remain down.

It is interesting that (1) above—Ceasing to rehab lower grades—would be absolutely fatal to any upper grades. Therefore this becomes policy:

**NO UPPER GRADE OF RELEASE MAY BE BEGUN NEWLY ON A PC UNTIL ALL LOWER GRADES ARE FULLY REHABBED TO FREE NEEDLE. THIS APPLIES TO ALL GRADES 0 TO VII.**

Regarding (2)—Invalidation of what a free needle is—and thus running past all free needles let it be noted that this is an Auditor’s Code break—continuing a process that has ceased to produce change—and is therefore a crime. This was wrong too long to be allowed to go wrong again. Thus we get the policy:

**AN AUDITOR WHO HAS BEEN FOUND TO HAVE OVERRUN A FREE NEEDLE ON A PERCALE MUST BE GIVEN AN ETHICS CHIT; AND IF THE ACTION IS SEVERAL TIMES REPEATED, ETHICS MUST ORDER A FULL REVIEW OF THE AUDITOR’S CASE INCLUDING AN EYESIGHT TEST AND CONDUCT A THOROUGH ETHICS INVESTIGATION AND HEARING.**

Note that a meter run with too high a sensitivity setting does not give a marked change when *the* needle floats. *A meter cranked up to 128 sensitivity looks like a floating needle all of the time at a casual glance on most pcs. On the other hand, if the sensitivity is set too low then the free needle may not be seen. Thus the sensitivity must be set for 1/3 of a dial drop on the can squeeze for each session. Then a free needle will be plainly visible.*

Also, meters go out of 5,000 ohm calibration and don't read on the M and F "Clear" reads and change of electrodes can change M and F "Clear" reads.

A free needle, if a process is overrun, vanishes with just one extra command so an auditor must be alert.

Please also note that this has been part of the Auditor's Code for ages—running past a flat point of a process has been forbidden since the first formulations of the Auditor's Code.

Regarding (3)—Rehabilitation by using other processes—the HCOBs on rehabs are very explicit. To run *another* process would clobber the pc. Thus we get the policy:

REHABILITATIONS MUST BE DONE BY REHABILITATING THE PC ONLY ON THE PROCESS OVERRUN AND ONLY BY STANDARD HCOBs ON REHAB PROCEDURE.

Re (4)—Unusual solutions—we get the policy:

ANY AUDITOR ACCEPTING AN UNUSUAL SOLUTION WITHOUT FILING A JOB ENDANGERMENT CHIT OR FOUND USING AN UNUSUAL SOLUTION MUST BE CHARGED WITH A CRIME AND GIVEN AN ETHICS HEARING. FAILING TO REPORT AN UNUSUAL SOLUTION ADVISED OR USED IS ALSO SO HANDLED. AN UNUSUAL SOLUTION IS ONE EVOLVED TO REMEDY AN ABUSE OF EXISTING TECHNOLOGY.

On (5)—Statistic failing to recover after an SP is spotted in a department gives us the 2 policies:

WHENEVER AN SP IS DISCOVERED AND DECLARED IN AN ORGANIZATION ALL HIS ASSOCIATES IN THAT PORTION OF THE ORG MUST BE CHECKED OUT FOR OR GIVEN AN S & D.

And

WHEN AN SP IS DISCOVERED IN AN ORGANIZATION, IS DISMISSED OR REMOVED AND THE STATISTIC DOES NOT RECOVER, ANOTHER SP MUST BE LOOKED FOR.

It is noted that the general condition of the Completion Statistic of Dec 65 to Jan 66 could be attributed to the above gross errors.

It is now certain that (1) rehabilitation of earlier grades, (2) free needle and (3) rehabilitation by standard practice are primary targets in our technology for anyone seeking to mess it up and that unwitting tampering with these three things and lack of HCO enforcement on them will reduce HGC statistics and prevent their recovery.

Of course one could also go mad in the opposite direction—(1) rehabilitate earlier grades endlessly on a pc regardless of how many times a free needle had been obtained, (2) call any loosening up of a needle a free needle and (3) refuse to even 2-way comm with a pc under repair for overrun for fear it violates standard procedure for rehab.

The middle course is the correct course in this case. Relax and just be *very* sure the pc has been *properly* rehabbed to free needle on each grade up to the one one is going to start by demanding the awards of Release that were granted and if these

weren't ever awarded, then do the rehabs necessary grade by grade. The only sticky point in this is that if a pc had ever been run on a higher grade without rehab of a lower, one must rehab "from the top down" at times, tackling the highest overrun first, but nevertheless doing all of them that were bypassed eventually.

The way to recognize a free needle is watch for one. When it happens you will see one. Then you will never afterwards wonder. The free needles available on a case can *all* be swallowed up by a failure to rehab all grades ever bypassed or overrun. If no free needles show up on a case at all then partially rehab any grade available for rehab back and forth until one has one of them go free needle and then get a free needle on the remainder. Life can also be an overrun and a pc never audited will respond to a rehab of "something overdone." This doesn't mean the pc went release before Scientology—it means that *purpose* overrun then jams—rehab of life situations of overrun consists of hitting the *purpose* that was overrun and when this is hit, the pc goes Release in PT and was not a Release in the past. An example is an overrun located in 20 AD when the person, alert to Christianity, decided to be good, made it and then *overran* it for 1945 years. When the *purpose* was found (to be good) and dated and the overrun spotted the needle went free. Rough auditing, bad TRs, "letting the pc itsa," etc., can swallow up free needles. Also a totally ARC Broke meter that won't read at all with bad indicators all over the place won't record a read, looks sometimes like a floating needle, the difference being the pc has total bad indicators—sour, mean, sad, etc. A free needle occurs most often after a big cognition and the unskilled auditor looks *at the pc* who is being bright and interesting and just doesn't see the needle float, asks more questions and overruns. and the free needle vanishes—when a pc is cogniting, *look at the meter* not the pc. And the instant the TA starts up and the needle goes sticky suspect an overrun and check.

As for doing something else rather than standard procedure for rehab, plain ignorance can cause it. The auditor's desire to help the pc if unaccompanied by solid tech background leads to wild efforts, new processes and anything but cool standard procedure.

When the person checking out pcs is also the Case Supervisor, unusual solutions creep in. The most errors I've seen made by a Case Supervisor were made after he had seen the pc or talked with the auditor. Cases have to be run by report only and auditors have to be supervised and their sessions listened to by somebody else besides the Case Supervisor. Tech is tech. There is such a thing as standard tech. Pc wild tales and hollow eyes and auditor hobbyhorses have to be kept off Case Supervisor lines. So there must be a person who checks out pcs and supervises auditors *and* their auditing *performance* but who never opens his or her face to suggest instructions about the pc and only writes down that the auditor is rough or the process is flat or the process is overrun. The Case Supervisor lives in an Ivory Tower. Sounds strange but unless it's done that way, wild departures from standard rehab procedure and from standard tech in general will occur. Hell, all psychiatry went down that drain—the desperate patient, the desperate measures. Squirreling stems from the Case Supervisor being the auditor supervisor and the pc interviewer. Oil, water, being in two divisions, Commies and Fascists, dogs and cats. won't mix. Neither will the personal contactor of auditors and pcs and the Case Supervisor ever successfully stay crossed. The individual practitioner breaks down only because he does both auditing and case supervision. Auditing is an organization action which is why today we have field staff members and HGCs.

Additional notes of things discovered in the investigation of the plummeted statistic on completions were:

1. Auditors rabbiting out of uncertainty and so stumbling past end phenomena and floating needles.
2. Case Supervisor getting auditors to ask leading questions on Pr Pr 2—"Ask the pc if he is interested in Medical Practices."
3. D of P: "Find out what the needle is floating on."

4. Case Supervisor: Told auditor that a floating needle was not the end phenomenon of a process in which “the TA had to be run out.”
5. Lack of knowledge and understanding of the technology and not knowing the difference between such things as anaten, secondaries and engrams by Case Supervisor, D of P. and so confusing auditors.

Of course the one thing one can't technically overcome is an SP keeping an area messed up. His case doesn't improve because of his intentions and overts and fear of people getting better or being bigger than he. When an SP dominates an area, only ethics actions can handle.

The *primary* indicator of the presence of an SP in an org is a plummeting statistic immediately after he starts handling a portion of it.

Indifferent leadership, even inaction, can't drive a statistic down. Only active suppression can.

So watch the statistics and don't get reasonable when they fall. Either outside the org suppression has been brought down on that portion of the org. making it PTS or there is an SP there. The final answer is what happened just before the statistic fell. If a new appointment was made and it fell, unappoint it fast. If nothing cures the down statistic find the SP or handle the PTS situation because one or the other is *there*.

Completions stayed down for 15 years. Then we found auditors never noticed free needles. Now for heaven's sakes, 15 years was enough. Don't repeat the error!

It *does* work you know.

**FREE NEEDLES, HOW TO  
GET THEM ON A PC**

(Ref: HCOB 7 Feb 79R E-METER DRILL 5RA—CAN SQUEEZE  
Rev. 15.2.79  
HCOB 4 Dec 77 CHECKLIST FOR SETTING UP SESSIONS  
AND AN E-METER  
HCOB 3 Sep 78 DEFINITION OF A ROCK SLAM)

Free needles can be obscured *only* by overruns and auditor goofs in the rehab session and ARC breaks in past auditing.

When a TA goes up or is up it means an overrun in life or on a process or grade of release.

The only place you can't get an overrun is at Grade VII. All grades below that are subject to overrun.

Life subjects are subject to overrun before Scientology. The mechanism is this: one conceived a purpose. He or she succeeded in it, then kept on and overran it. In auditing one hits the purpose and the overrun of it and gets a free needle on it. That doesn't mean the person was a Release then. It means that the spotting of the purpose and the overrun by auditing produces a free needle *today*.

It may be necessary to find whole track overruns on some pcs in rehabilitation of grades. If a lot of levels have been run past free needle it may be necessary to take apart the mess like a bundle of yarn to get the first free needle. In such a case one rehabs any grade *the pc has been run on* that the pc can remember. One handles this briefly until the pc is happy but not necessarily to free needle. One then finds another overrun, does the same. One goes on and on looking for moments the pc felt good about processing at one or another time. If you keep this up, suddenly you will see a free needle on the pc! Establish what grade it is free on, then quickly get the needle free on the remaining overrun grades (but not grades pc was never run on). It may be necessary to take into account a whole track overrun of a purpose or even the purpose to get Release, Clear or OT.

It is all very quick, deft auditing, very much *on* procedure using standard rehab tech—but no repetitive grind.

*If you set the sensitivity too low you won't see the free needle (floating needle) and if you set the sensitivity too high it will obscure every free needle as the needle is too loose already for the auditor to see any change. So you always set the sensitivity for each session for a 1/3 of a dial drop when the pc squeezes the cans and you will be able to easily recognize free needles when they appear.*

Pcs are most apt to go free needle after a big cog. So don't be so engrossed in looking at the pc during cognitions. Keep an eye on that needle. And if it goes free, don't ask anything else. Just gently give the pc a "That's it" and *without a chop* of comm, ease the pc off to "Declare?" in Qual. (Or if a field auditor, start the next grade. )

Gently, gently. smooth TRs get you free needles.

*A dirty needle is caused by one of three things: 1. The auditor's TRs are bad. 2. The auditor is breaking the Auditor's Code. 3. The pc has withholds he does not wish known. If a needle goes dirty in a rehab session, do an LIC right now and quickly find why.*

Rehabs are not a substitute for processes. If a grade hasn't been *run*. *you* can't rehab it of course.

In rehab, never use a new process to cure an overrun. Rehab the process that was overrun, not new ruds.

And see HCO Pol Ltr 10 Feb 1966 on this subject.

You can get free needles on pcs. It just requires standard TRs, standard tech. standard rehab *and wanting to get one* and letting a pc have one.

THE RESPONSIBILITIES OF LEADERS  
reissued as an HCOB; as well as  
existing in HCO PL form.)

ADMIN KNOW-HOW

**THE RESPONSIBILITIES OF LEADERS**

A few comments on POWER, being or working close to or under a power, which is to say a leader or one who exerts wide primary influence on the affairs of men.

I have written it this way, using two actual people to give an example of magnitude enough to interest and to furnish some pleasant reading. And I used a military sphere so it could be seen clearly without restimulation of admin problems.

The book referenced is a fantastically able book by the way.

THE MISTAKES OF SIMON BOLIVAR  
AND MANUELA SAENZ

Reference: The book entitled:

*The Four Seasons of Manuela* by  
Victor W. von Hagen, a biography.

A Mayflower Dell Paperback. Oct 1966. 6/-

Simon Bolivar was the liberator of South America from the yoke of Spain.

Manuela Saenz was the liberatress and consort.

Their acts and fates are well recorded in this moving biography.

But aside from any purely dramatic value the book lays bare and motivates various actions of great interest to those who lead, who support or are near leaders.

Simon Bolivar was a very strong character. He was one of the richest men in South America. He had real personal ability given to only a handful on the planet. He was a military commander without peer in history. Why he would fail and die an exile to be later deified is thus of great interest. What mistakes did he make?

Manuela Saenz was a brilliant, beautiful and able woman. She was loyal, devoted, quite comparable to Bolivar, far above the cut of average humanoids. Why then did she live a vilified outcast, receive such violent social rejection and die of poverty and remain unknown to history? What mistakes did she make?

BOLIVAR'S ERRORS

The freeing of things is the reverse unstated dramatization (the opposite side of the coin) to the slavery enjoined by the mechanisms of the mind.

Unless there is something to free men *into*, the act of freeing is simply a protest of slavery. And as no humanoid is free while aberrated in the body cycle, it is of course a gesture to free him politically as it frees him only into the anarchy of dramatizing his aberrations with NO control whatever and without something to fight exterior and with no exteriorization of his interest he simply goes mad noisily or quietly.

Once as great a wrong as depraving beings has been done there is of course no freedom short of freeing one from the depravity itself or *at least* from its most obvious influences in the society. In short one would have to de-aberrate a man before his whole social structure could be de-aberrated.

If one lacked the whole ability to free man wholly from his reactive patterns, then one could free man from their restimulators in the society at least. If one had the whole of the data (but lacked the Scientology tech), one would simply use reactive patterns to blow the old society apart and then pick up the pieces neatly in a new pattern. If one had no inkling of how reactive one can get (and Bolivar of course had no knowledge whatever in that field), there yet remained a workable formula used “instinctively” by most successful practical political leaders.

If you free a society from those things you see wrong with it and use force to demand it do what is right, and if you carry forward with decision and thoroughness, and without continual temporizing you can, in the applications of your charm and gifts, bring about a great political reform or improve a failing country.

So Bolivar’s first error, most consistent it was, too, was contained in the vital words “you see” in the above paragraph. He didn’t look and he didn’t even listen to sound intelligence reports. He was so *sure* he could *glow* things right or fight things right or charm things right that he never looked for anything wrong to correct until it was too late. This is the ne-plus-ultra of personal confidence, amounting to supreme vanity. “When he appeared it would all come right” was not only his belief but his basic philosophy. So the first time it didn’t work, he collapsed. All his skills and charm were channeled into this one test. Only that could he observe.

Not to compare with Bolivar but to show my understanding of this:

I once had a similar one. “I would keep going as long as I could and when I was stopped I would then die.” This was a solution mild enough to state and really hard to understand until you had an inkling of what I meant by keeping going. Meteors keep going—very, very fast. And so did I. Then one day ages back I finally *was* stopped after countless little stoppings by social contacts and family to prepare me culminating in a navy more devoted to braid than dead enemies and literally I quit. For a while I couldn’t get a clue of what was wrong with me. Life went completely unlivable until I found a *new* solution. So I know the frailty of these single solutions. Not to compare myself but just to show it happens to us all, not just Bolivars.

Bolivar had no personal insight at all. He could only “outsight” and even then he did not look or listen. He *glowed* things right. Pitifully it was his undoing that he could. Until he no longer could. When he couldn’t glow he roared and when he couldn’t roar he fought a battle. Then civic enemies were not military enemies so he had no solution left at all.

It *never* occurred to him to do more than personally *magnetize* things into being right and victorious.

His downfall was that he made far too heavy use of a skill simply because it was easy. He was too good at this one thing. So he never looked to any other skill and he never even dreamed there was any other way.

He had no view of any situation and no idea of the organizational or preparatory steps necessary to political and personal victory. He only knew military organization which is where his organizational insight ceased.

He was taught on the high wine of French revolt, notorious in its organizational inability to form cultures, and that fatally by a childhood teacher who was intensely impractical in his own private life (Simon Rodriguez, an unfrocked priest turned tutor).

Bolivar had no personal financial skill. He started wealthy and wound up a pauper, a statistic descending from one of the, if not the, richest man in South America down to a borrowed nightshirt to be buried in as an exile. And *this* while the property of Royalists was wide open, the greatest land and mine valuables of South America wide open to his hand and that's not believable! But true. He never collected his own debt of loans to governments even when the head of those governments.

So it is no wonder we find two more very real errors leading to his downfall. He did not get his troops or officers *rewarded* and he did not aim for any solvency of the states he controlled. It was all right if there were long years of battle ahead for them to be unpaid as no real riches were yet won, but not to *reward* them when the whole place was at his disposal! Well!

The limit of his ability consisted of demanding a bit of cash for current pay from churches—which were not actively against him at first but which annoyed them no end—and a few household expenses.

He could have (and should have) set aside all Royalist property and estates for division amongst all officers, their men and his supporters. It had no owners now. And this failure cost the economy of the country the tax loss of all those productive estates (the whole wealth of the land). So it is no wonder his government, its taxable estates now inoperative or at best lorded by a profiteer or looted by Indians, was insolvent. Also, by failing to do such an obvious act he delivered property into the hands of more provident enemies and left his officers and men penniless to finance any support for their own stability in the new society and so for his own.

As for state finance the great mines of South America, suddenly ownerless, were overlooked and were then grabbed and worked by foreign adventurers who simply came in and took them without payment.

Spain had run the country on the finance of mine tithes and general taxes. Bolivar not only didn't collect the tithes, he let the land become so worthless as to be untaxable. He should have gotten the estates going by any shifts and should have state operated all Royalist mines once he had them. To not do these things was complete, but typically humanoid, folly.

In doing this property division he should have left it all up to officers' committees operating as courts of claim without staining his own hands in the natural corruption. He was left doubly open as he not only did not attend to it, he also got the name of corruption when anybody did grab something.

He failed as well to recognize the distant widespread nature of his countries despite all his riding and fighting over them and so sought tightly centralized government, not only centralizing states but also centralizing the various nations into a federal state. And this over a huge land mass full of insurmountable ranges, impassable jungles and deserts and without mail, telegraph, relay stages, roads, railroads, river vessels or even foot bridges repaired after a war of attrition.

A step echelon from a pueblo (village) to a state, from a state to a country and a country to a federal state was only possible in such huge spaces of country where candidates could never be known personally over any wide area and whose opinions could not even be circulated more than a few miles of burro trail, where only the pueblo was democratic and the rest all appointive from pueblo on up, himself the ratifier of titles if he even needed that. With his own officers and armies controlling the land as owners of all wrested from Royalists and the crown of Spain, he would have had no revolts. There would have been little civil wars of course but a court to settle their final claims could have existed at federal level and kept them traveling so much over those vast distances it would have crippled their enthusiasm for litigation on the one hand and

on the other, by dog eat dog settlements, would have given him the strongest rulers—if he took neither side.

He did not step out and abdicate a dictatorial position. He mistook military acclaim and ability for the tool of peace. War only brings anarchy, so he had anarchy. Peace is more than a “command for unity,” his favorite phrase. A productive peace is getting men busy and giving them something to make something of that they *want* to make something of and telling them to get on with it.

He never began to recognize a suppressive and never considered anyone needed killing except on a battlefield. There it was glorious. But somebody destroying his very name and soul, and the security of every supporter and friend, the SP Santander, his vice-president, who could have been arrested and executed by a corporal’s guard on one one-hundredth of available evidence, could suborn the whole treasury and population against him, without Bolivar, continually warned, loaded with evidence, ever even reprimanding him. And this brought about his loss of popularity and his eventual exile .

He also failed in the same way to protect his military family or Manuela Saenz from other enemies. So he weakened his friends and ignored his enemies just by oversight.

His greatest error lay in that while dismissing Spain he did not dismiss that nation’s most powerful minion, the Church, and did not even localize it or reward a South American separate branch to loyalty or do anything at all (except extort money from it) to an organization which continually worked for Spain as only it could work—on every person in the land in a direct anti-Bolivar reign of terror behind the scenes. You either suborn such a group or you take them out when they cease to be universal and become or are an enemy’s partner.

As the Church held huge properties and as Bolivar’s troops and supporters went *unpaid* even of the penny soldiers’ pay, if one was going to overlook the Royalist estates, one could at least have seized the Church property and given it to the soldiers. General Vallejo did this in 1835 in California, a nearly contemporary act, with no catastrophe from Rome. Or the penniless countries could have taken them over. You don’t leave an enemy financed and solvent while you let your friends starve in a game like South American politics. Oh no.

He wasted his enemies. He exported the “godos” or defeated Royalist soldiers. They mostly had no homes but South America. He issued no amnesties they could count on. They were shipped off or left to die in the “ditch”—the best artisan in the country among them.

When one (General Rodil) would not surrender Calloa fortress after Peru was *won*, Bolivar after great gestures of amnesty failed to obtain surrender and then fought the fort. Four thousand political refugees and four thousand Royalist troops died over many months in full sight of Lima, fought heavily by Bolivar only because the *fort* was fighting. But Bolivar had to straighten up Peru urgently not fight a defeated enemy. The right answer to such a foolish commander as Rodil as Bolivar did have the troops to do it, was to cover the roads with cannon enfilade potential to discourage any sortie from the fort, put a large number of his own troops in a distant position of offense but ease and comfort and say, “We’re not going to fight. The war’s over, silly man. Look at the silly fellows in there, living on rats when they can just walk out and sleep home nights or go to Spain or enlist with me or just go camping,” and let anybody walk in and out who pleased, making the fort Commander (Rodil) the prey of every pleading wife and mother without and would-be deserter or mutineer within until he did indeed sheepishly give up the pretense—a man cannot fight alone. But battle was glory to Bolivar. And he became intensely disliked because the incessant cannonade which got nowhere was annoying.

Honors meant a great deal to Bolivar. To be liked was his life. And it probably meant more to him than to see things really right. He never compromised his principles

but he lived on admiration, a rather sickening diet since it demands in turn continuous “theatre.” One is what one is, not what one is admired or hated for. To judge oneself by one’s successes is simply to observe that one’s postulates worked and breeds confidence in one’s ability. To have to be *told* it worked only criticizes one’s own eyesight and hands a spear to the enemy to make his wound of vanity at his will. Applause is nice. It’s great to be thanked and admired. But to work only for that? And his craving for that, his addiction to the most unstable drug in history—fame—killed Bolivar. That self offered spear. He told the world continually how to kill him—reduce its esteem. So as money and land can buy any quantity of cabals, he could be killed by curdling the esteem, the easiest thing you can get a mob to do.

He had all the power. He did not use it for good or evil. One cannot hold power and not use it. It violates the power formula. For it then prevents *others* from doing things if *they* had some of the power so they then see as their only solution the destruction of the holder of the power as he, not using power or delegating it, is the unwitting block to all their plans. So even many of his friends and armies finally agreed he had to go. They were not able men. They were in a mess. But bad or good they had to do *something*. Things were desperate, broken down and starving after 14 years of civil war. Therefore they either had to have *some* of that absolute power or else nothing could be done at all. They were not great minds. He did not need any “great minds,” he thought, even though he invited them verbally. He saw their petty, often murderous solutions and he rebuked them. And so held the power and didn’t use it.

He could not stand another *personality* threat.

The trouble in Peru came when he bested its real conqueror (from the Argentine), La Mar, in a petty triumph over adding Guayaquil to Columbia. Bolivar wished to look triumphant again and didn’t notice it really cost him the support and Peru the support of La Mar—who understandably resigned and went home, leaving Bolivar *Peru to conquer*. Unfortunately, it had already been in his hands. La Mar needed some troops to clean up a small Royalist army that was all. La Mar didn’t need Peru’s loss of Guayaquil—which never did anybody any real good anyway!

Bolivar would become inactive when faced with two areas’ worth of problems—he did not know which way to go. So he did nothing.

Brave beyond any general in history on the battlefield, the Andes or in torrential rivers, he did not really have the bravery needed to trust inferior minds and stand by their often shocking blunders. He feared their blunders. So he did not dare unleash his many willing hounds.

He could lead men, make men feel wonderful, make men fight and lay down their lives after hardships no army elsewhere in the world has ever faced before or since. But he could not *use* men even when they were begging to be used.

It is a frightening level of bravery to use men you know can be cruel, vicious, and incompetent. He had no fear of their turning on him ever. When they finally did only then he was shocked. But he protected “the people” from authority given to questionably competent men. So he really never used but three or four generals of mild disposition and enormously outstanding ability. And to the rest he denied power. Very thoughtful of the nebulous “people” but very bad indeed for the general good. And it really caused his death.

No. Bolivar was theatre. It was all theatre. One cannot make such errors and still pretend that one thinks of life as life, red-blooded and factual. Real men and real life are full of dangerous, violent, live situations and wounds *hurt* and starvation is desperation itself especially when you see it in one you love.

This mighty actor, backed up with fantastic personal potential, made the mistake of thinking the theme of liberty and his own great role upon the stage was enough to interest all the working, suffering hours of men, buy their bread, pay their whores,

shoot their wives' lovers and bind their wounds or even put enough drama into very hard pressed lives to make them want to live it.

No, Bolivar was unfortunately the only actor on the stage and no other man in the world was real to him.

And so he died. They loved him. But they were also on the stage too, where they were dying in his script or Rousseau's script for liberty but no script for living their very real lives.

He was the greatest military general in any history measured against his obstacles, the people and the land across which he fought.

And he was a complete failure to himself and his friends.

While being one of the greatest *men* alive at that. So we see how truly shabby others in leaders' boots amongst men must be.

### MANUELA SAENZ

The tragedy of Manuela Saenz as Bolivar's mistress was that she was never *used*, never really had a share and was neither protected nor honored by Bolivar

Here was a clever, spectacular woman of fantastic fidelity and skill, with an enormous "flaire," capable of giving great satisfaction and service. And only her satisfaction ability was taken and that not consistently nor even honestly.

In the first place, Bolivar never married her. He never married anybody. This opened up a fantastic breach in any defense she could ever make against her or his enemies who were legion. So her first mistake was in not in some way contriving a marriage.

That she had an estranged husband she had been more or less sold to was permitted by her to wreck her life obliquely.

She was too selfless to be real in all her very able plotting.

For this marriage problem she could have engineered any number of actions.

She had the solid friendship of all his trusted advisers, even his old tutor. Yet she arranged nothing for herself.

She was utterly devoted, completely brilliant and utterly incapable of really bringing off an action of any final kind.

She violated the power formula in not realizing that she had power.

Manuela was up against a hard man to handle. But she did not know enough to make her own court effective. She organized one. She did not know what to do with it.

Her most fatal mistake was in not bringing down Santander, Bolivar's chief enemy. That cost her everything she had before the end and after Bolivar died. She knew for years Santander had to be killed. She said it or wrote it every few days. Yet never did she promise some young officer a nice night or a handful of gold to do it in a day when *dueling* was in *fashion*. It's like standing around discussing how the plainly visible wolf in the garden that's eating the chickens must be shot, even holding a gun, and never even lifting it while all one's chickens vanish for years.

In a land overridden with priests she never got herself a tame priest to bring about her ends.

She was a fantastic intelligence officer. But she fed her data to a man who could not act to protect himself or friends, who could only fight armies dramatically.

She did not see this and also quietly take on the portfolio of secret police chief. Her mistake was waiting to be asked—to be asked to come to him, to act. She voluntarily was his best political intelligence agent. Therefore she should have also assumed further roles.

She guarded his correspondence, was intimate with his secretaries. And yet she never collected or forged or stole any document to bring down enemies either through representations to Bolivar or a court circle of her own. And in an area with that low an ethic, that's fatal.

She openly pamphleteered and fought violently as in a battle against her rabble.

She had a great deal of money at her disposal. In a land of for-sale Indians she never used a penny to buy a quick knife or even a solid piece of evidence.

When merely opening her lips she could have had any sequestered Royalist estate she went to litigation for a legitimate legacy never won and another won but never paid.

They lived on the edge of quicksand. She never bought a plank or a rope.

Carried away by the glory of it all, devoted completely, potentially able and a formidable enemy, she did not *act*.

She waited to be told to come to him even when he lay dying and exiled.

His command over her who never obeyed any other was too absolute for his own or her survival.

Her assigned mistakes (pointed out at the time as her caprice and play acting) were not her errors. They only made her interesting. They were far from fatal.

She was not ruthless enough to make up for his lack of ruthlessness and not provident enough to make up for his lack of providence.

The ways open to her for finance, for action, were completely doorless. The avenue stretched out to the horizon.

She fought bravely but she just didn't take action.

She was an actress for the theatre alone.

And she died of it. And she let Bolivar die because of it.

Never once did Manuela look about and say, "See here, things mustn't go this wrong. My lover holds half a continent and even I hold the loyalty of battalions. Yet that woman threw a fish!"

Never did Manuela tell Bolivar's doctor, a rumoured lover, "Tell that man he will not live without my becoming a constant part of his entourage, and tell him until he believes it or we'll have a new physician around here."

The world was open. Where Theodosius, the wife of Emperor Justinian II of Constantinople, a mere circus girl and a whore, ruled harder than her husband but for her husband behind his back—and made him marry her as well, Manuela never had any bushel basket of gold brought in to give Bolivar for his unpaid troops with a "Just found it, dear" to his "Where on Earth . . . ?" after the Royalist captives had been carefully ransomed for gaol escapes by her enterprising own entourage and officer friends. She never handed over any daughter of a family clamoring against her to Negro troops and then said, "Which over-verbal family is next?"

She even held a colonel's rank but only used it because she wore man's clothing afternoons. It was a brutal, violent, ruthless land, not a game of musical chairs.

And so Manuela, penniless, improvident, died badly and in poverty, exiled by enemies and deserted by her friends.

But why not deserted by her friends? They had all been poverty-stricken to a point quite incapable of helping her even though they wanted to—for she once had the power to make them solvent. And didn't use it. They were in poverty before they won but they did eventually control the land. After that why make it a bad habit?

And so we see two pathetic, truly dear, but tinsel figures, both on a stage, both *far* removed from the reality of it all.

And one can say, "But if they had not been such idealists they never would have fought so hard and freed half a continent," or "If she had stooped to such intrigue or he had been known for violent political actions they would never have had the strength and never would have been loved."

All very idealistic itself. They died "in the ditch" unloved, hated and despised, two decent brave people, almost too good for this world.

A true hero, a true heroine. But on a stage and not in life. Impractical and improvident and with no faintest gift either one to use the power they could assemble.

This story of Bolivar and Manuela is a tragedy of the most piteous kind.

They fought a hidden enemy, the Church; they were killed by their friends.

But don't overlook how impractical it is not to give your friends power enough when you have it to give. You can always give some of it to another if the first one collapses through inability. And one can always be brought down like a hare at a hunt who seeks to use the delegated power to kill you—if you have the other friends

Life is not a stage for posturing and "Look at me!" "Look at me." "Look at me." If one is to lead a life of command or a life near to command one must handle it as life. Life bleeds. It suffers. It hungers. And it has to have the right to shoot its enemies until such time as comes a golden age.

Aberrated man is not capable of supporting in his present state, a golden declared age for three minutes, given all the tools and wealth of the world.

If one would live a life of command or one near to a command, one must then accumulate power as fast as possible and delegate it as quickly as feasible and use every humanoid in long reach to the best and beyond his talents if one is to live *at all*.

If one does not choose to live such a life then go on the stage and be a real actor. Don't kill men while pretending it isn't real. Or one can become a recluse or a student or a clerk. Or study butterflies or take up tennis.

For one is committed to certain irrevocable natural laws the moment one starts out upon a conquest, either as the man in charge or a person near to him or on his staff or in his army. And the foremost law, if one's ambition is to win, is of course to win.

But also to keep on providing things to win and enemies to conquer.

Bolivar let his cycle run to "freedom" and end there He never had another plan beyond that point He ran out of territory to free Then he didn't know what to do with it and didn't know enough, either, to find somewhere else to free But of course all limited games come to end. And when they do their players fall over on the field and become rag dolls unless somebody at least tells them the game has ended and they have no more game nor any dressing room or houses but just that field.

And they lie upon the field, not noticing there can be no more game since the other team has fled and after a bit they have to do *something* and if the leader and his consort are sitting over on the grass being rag dolls too, of course there isn't any game. And so the players start fighting amongst themselves just to have a game And if the leader then says, "No, no" and his consort doesn't say, "Honey, you better phone the Baltimore Orioles for Saturday," then of course the poor players, bored stiff, say, "He's out." "She's out." "Now we're going to split the team in half and have a game."

And that's what happened to Bolivar and Manuela. They *had* to be gotten rid of for there was no game and they didn't develop one to play while forbidding the only available game—minor civil wars.

A *whole continent* containing the then major mines of the world, whole populations were left sitting there, "freed." But none owned any of it though the former owners had left. They weren't given it. Nor were they made to manage it. No game.

And if Bolivar had not been smart enough for that he could at least have said, "Well! You monkeys are going to have quite a time getting the wheels going but that's not my job. You decide on your type of government and what it's to be. Soldiers are my line. Now I'm taking over those old estates of mine and the Royalist ones near by and the emerald mines just as souvenirs and me and Manuela we're going home." And he should have said that 5 minutes after the last Royalist army was defeated in Peru.

And his official family with him, and a thousand troops to which he was giving land would have moved right off smartly with him. And the people after a few screams of horror at being deserted would have fallen on each other, sabered a state together here and a town there and gotten busy out of sheer self protection in a vital new game, "Who's going to be Bolivar now?"

Then when home he should have said, "Say those nice woods look awfully Royalist to me, and also those 1,000,000 hectares of grazing land, Manuela. Its owner once threw a Royalist fish, remember? So that's yours."

And the rest of the country would have done the same and gotten on with the new game of "You was a Royalist."

And Bolivar and Manuela would have had statues built to them by the TON at once as soon as agents could get to Paris with orders from an adoring populace.

"Bolivar, come rule us!" should have gotten an "I don't see any unfree South America. When you see a French or Spanish army coming, come back and tell me."

That would have worked. And this poor couple would have died suitably adored in the sanctity of glory and (perhaps more importantly) in their own beds, not "in a ditch."

And if they had *had* to go on ruling they could have declared a new game of "Pay the soldiers and officers with Royalist land." And when that was a gone game, "Oust the Church and give its land to the poor friendly Indians."

You can't stand bowing back of the footlights forever with no show even if you are quite an actor. Somebody else can make better use of any stage than even the handsomest actor who will not use it.

Man is too aberrated to understand at least 7 things about power:

1. Life is lived by lots of people. And if you lead you must either let them get on with it or lead them on with it actively.
2. When the game or the show is over, there must be a new game or a new show. And if there isn't somebody else is jolly well going to start one and if you won't let *anyone* do it the game will become "getting you."

3. If you have power use it or delegate it or you sure won't have it long.
4. When you have people use them or they will soon become most unhappy and you won't have them any more.
5. When you move off a point of power, pay all your obligations on the nail, empower all your friends completely and move off with your pockets full of artillery, potential blackmail on every erstwhile rival, unlimited funds in your private account and the addresses of experienced assassins and go live in Bulgravia and bribe the police. And even then you may not live long if you have retained one scrap of domination in any camp you do not now control or if you even say, "I favour Politician Jiggs." Abandoning power *utterly is* dangerous indeed.

But we can't all be leaders or figures strutting in the limelight and so there's more to know about this:

6. When you're close to power get some delegated to you, enough to do your job and protect yourself and your interests, for you can be shot, fellow, shot, as the position near power is delicious but dangerous, dangerous always, open to the taunts of any enemy of the power who dare not really boot the power but can boot you. So to live at all in the shadow or employ of a power you must yourself gather and USE enough power to hold your own—without just nattering to the power to "kill Pete," in straightforward or more suppressive veiled ways to him as these wreck the power that supports yours. He doesn't have to know all the bad news and if he's a power really he won't ask all the time, "What are all those dead bodies doing at the door?" And if you are clever, you never let it be thought HE killed them—that weakens you and also hurts the power source. "Well, boss, about all those dead bodies, nobody at all will suppose you did it. *She* over there, those pink legs sticking out, didn't like me." "Well," he'll say if he really is a power, "why are you bothering me with it if it's done and you did it. Where's my blue ink?" Or "Skipper, three shore patrolmen will be along soon with your cook, Dober, and they'll want to tell you he beat up Simson." "Who's Simson?" "He's a clerk in the enemy office downtown." "Good, when they've done it, take Dober down to the dispensary for any treatment he needs. Oh yes. Raise his pay." Or "Sir, could I have the power to sign divisional orders?" "Sure."
7. And lastly and most important, for we all aren't on the stage with our names in lights, always push power in the direction of anyone on whose power you depend. It may be more money for the power, or more ease, or a snarling defense of the power to a critic, or even the dull thud of one of his enemies in the dark, or the glorious blaze of the whole enemy camp as a birthday surprise.

If you work like that and the power you are near or depend upon is a power that has at least some inkling about how to be one, and if you make others work like that, then the power-factor expands and expands and expands and you too acquire a sphere of power bigger than you would have if you worked alone. Real powers are developed by tight conspiracies of this kind pushing someone up in whose leadership they have faith. And if they are right and also manage their man and keep him from collapsing through overwork, bad temper or bad data, a kind of juggernaut builds up. Don't ever feel weaker because you work for somebody stronger. The only failure lies in taxing or pulling down the strength on which you depend. All failures to remain a power's power are failures to contribute to the strength and longevity of the work, health and power of that power. Devotion requires active contribution outwards from the power as well as in.

If Bolivar and Manuela had known these things they would have lived an epic, not a tragedy. They would not have "died in the ditch," he bereft of really earned praise for his real accomplishments even to this day. And Manuela would not be unknown even in the archives of her country as the heroine she was.

Brave, brave figures. But if this can happen to such stellar personalities gifted with ability tenfold over the greatest of other mortals, to people who could take a rabble in a vast impossible land and defeat one of Earth's then foremost powers, with no money or arms, on personality alone, what then must be the ignorance and confusion of human leaders in general, much less little men stumbling through their lives of boredom and suffering?

Let us wise them up, huh? You can't live in a world where even the great leaders can't lead.

**DRUG AND ALCOHOL CASES  
PRIOR ASSESSING**

Those cases which have been long and habitually on drugs, medicine and alcohol sometimes suffer from a "SOMATIC SHUT-OFF." They appear anaesthetized (unfeeling) and sometimes have "nothing troubling them" whereas they are on drugs, drink or medicine and are in reality in a suppressed physical condition and cannot cease to take drugs or drink or medicine.

One can find, in such a case, a very high TA which doesn't seem to reduce. The TA can be brought down by auditing the drug and alcohol engrams as a chain.

Any such case took up drugs, alcohol or medicine because of unwanted pain or sensation or misemotion. You can use that as a stable datum which resolves the situation.

All it requires is a special assessment called a PRIOR ASSESSMENT. For the person looked on drugs, alcohol or medicine as a cure for unwanted feelings. One has to assess what was wrong *before* or prior to the cure.

(NOTE: Prior assessment is done after narrative running and preassessment with R3RA running of the drug, medicine or alcohol.)

Using the drug list obtained on the Original Assessment, take up the largest reading this lifetime drug, medicine or alcohol and ask the pc the following preassessment question:

"Prior to taking (the drug, medicine or alcohol) were there (preassessment item)?"

Take the largest reading item from the preassessment and ask the pc:

"What (item) did you have prior to taking (the drug, medicine or alcohol)?"

Continue with a full handling of the preassessment per HCOB 18 Jun 78R, New Era Dianetics Series 4R, ASSESSMENT AND HOW TO GET THE ITEM and HCOB 15 Jul 71RB, New Era Dianetics Series 9RA, DRUG HANDLING.

In doing this assessment, you must grab the read and mark it plainly as it occurs. If you just list and then go over the list the person may be back in present time and, as these are now cut off by the masses of drug or alcohol engrams on top of them, they won't read again. So you must catch the read as the person first mentions it.

You choose the longest read and find and run the chain by R3RA as in any other New Era Dianetics auditing.

The only difference is the assessment time period. You are listing for a time before they went on drugs, alcohol, or medicine.

*The above prior assessment steps are done on each drug, medicine or alcohol that has read. They are handled in order of largest read. (Ref: HCOB 15 Jun 78R, NED Series 9RA, DRUG HANDLING.)*

The running out of the chain of unwanted feelings they had before going on drugs or alcohol or medicine removes the reason they started taking drugs, or medicine, smoking marijuana or drinking. The compulsion to still use drugs or drink is lessened and they can come off it.

This can also be used as a working rule to get earlier than any “curative” activity. Almost anything which comes later is a cure for something earlier. It could be said that the present time being is a compound of past cures. To handle, the action would be the same as for drugs, alcohol, or medicine. Preassess the unwanted pains or feelings before the cure and run the longest reads by R3RA.

As there will be more than one chain involved, you of course take your next longest read and run that next, just as in any assessment.

The general term for this type of assessment is PRIOR assessing, not because it is done before auditing but to determine what the pc was suffering from before he used a harmful “cure.”

### HANDLING ILLNESS IN SCIENTOLOGY

Sickness is of course the result of engram chains in restimulation.

One has to ask, however, what causes restimulation to occur?

The answer is out-ruds plus a suppressive environment or situation.

Therefore, obviously, if one wanted to really handle handle handle sickness and do some miracles, one would use the lot of one's weapons.

Don't mistake that Dianetics (HCOB 24 July 1969R *SERIOUSLY ILL PCS*) can all by itself practically bring the dead to life to all intents and purposes and it can be used all by itself.

However, when that doesn't work completely, then the Class VIII Case Supervisor and well-trained Scientology auditors can step in.

Let us examine the basic full dress parade routine of what Scientology and Dianetics could be used.

1. Put in life ruds (as given below).
2. 3 S & Ds.
3. *Narrative handling and full preassessment on the sick area, run Triple or Quad, plus other Dianetic Assist actions and any needed medical treatment. (See HCOB 2 April 69RA, Rev. 28.7.78, DIANETIC ASSISTS, which cautions against overwhelming a sick pc with too much restim.)*
4. *NED for OTs (on OT III and above).*

Obviously this illness hasn't a chance at all. It disappears in 1. Or in 2. Or in 3. Or in 4....

The system is obvious. You take away the current out-ruds and the illness can destimulate. You take away the suppressions and destimulation is more positive.

You erase all the engrams and the source is gone.

You do the second, . . . third, *and zero flows* and the overts and sympathies are also vanished.

On ruds alone you can of course get a recurrence.

You also risk a recurrence on the S & Ds.

The motivators go on the engram chains.

The overts and sympathy for like illness goes on the second, . . . third *and zero*

## LIFE RUDS

As the person with out-ruds makes no real gain it is wise to put ruds in “In life.”

This is done with

“In life have you had an ARC break?”

“In life have you had a problem?”

“In life have you had a withhold?”

If the person has had much auditing you ask after each of the “In life” questions  
“Was that present in an auditing session?”

## S & Ds

The full parade for three S & Ds (as given in HCOB 19 January 1968 in the Class VIII pack) is as follows:

3 item S & D

Fly a rud.

Assess

Withdraw from

Stop

Unmock

Suppress

Invalidate

Make nothing of

Suggest

Been careful of

Fail to reveal

Take the 3 that read best (null to 3 items). Use the one that read most first.

Test one of these items in these two questions to see which question then reads best.

“Who or what has attempted to \_\_\_\_\_ you?”

“Who or what have you tried to \_\_\_\_\_?”

List the best reading question by the laws of listing and nulling. BE EXACT IN FOLLOWING THOSE LAWS or you’ll make the person even sicker!

Use each of the 3 this way.

Prepcheck any item that does not F/N until it F/Ns or proves not to be the correct one in which event correct the list. If the list item does not F/N on being found and indicated, you prepcheck it to F/N.

## DIANETICS

*The New Era Dianetics HCOBs fully cover assists and Dianetic handling of body problems and illnesses.*

This rundown is what could be known as beating an illness to death.

Handling it medically and spiritually should bring home a winner every time.

This full approach is recommended only when one has encountered a resistive situation.

Very often a Dianetic Assist precedes all this.

Usually the Dianetic handling is done without the ruds or S & Ds.

But when you have somebody whose “lumbosis” has not surrendered to Dianetics, you have this full approach to fall back on.

It’s nice to have a full arsenal.

**GREEN FORM**

The Green Form is used to detect the peculiarities and elements of a pc's life which are causing case trouble or preventing gains. (It is not used to cure high or low TA.)

You can assess it Method 3 and handle, not going beyond the first F/N, but its real use is Method 5 and send to the C/S for programming.

It can also be used in combination with the Expanded Green Form 40RD to precisely locate and solve any resistiveness of a pc's case.

Directions for use of the Green Form and the Expanded Green Form 40RD are given in HCOB 8 December 78 11, GREEN FORM AND EXPANDED GREEN FORM 40RD, USE OF. It is vital, before using these lists, that any auditor or C/S first checks out on the above issue.

PC NAME: \_\_\_\_\_ DATE: \_\_\_\_\_

AUDITOR: \_\_\_\_\_

- 1A. HAVE YOU NOT HAD SUFFICIENT SLEEP? \_\_\_\_\_
- 1B. ARE YOU PHYSICALLY TIRED? \_\_\_\_\_
- 1C. HAVE YOU NOT HAD ENOUGH FOOD? \_\_\_\_\_
- 1D. ARE YOU HUNGRY? \_\_\_\_\_
- 1E. HAVE YOU DRUNK ALCOHOL? \_\_\_\_\_
- 1F. HAVE YOU TAKEN ASPIRIN? \_\_\_\_\_
- 1G. HAVE YOU TAKEN TRANQUILIZERS? \_\_\_\_\_
- 1H. HAVE YOU TAKEN DRUGS? \_\_\_\_\_

Do not audit a pc who has not had sufficient food or rest or who has taken aspirin or drugs. If one of the above questions reads, assess no further; take the question up with the pc. If he is tired, send him home to rest, if he is hungry, send him to get *well* fed, and if he has taken drugs, he will have to dry out for the time specified in HCOB 17 Oct 69RA, DRUGS, ASPIRIN AND TRANQUILIZERS.

- 2A. HAVE YOU GONE EXTERIOR IN AUDITING? \_\_\_\_\_  
If the pc is Clear, Dianetic Clear or OT and has not had an Int RD, do the End of Endless Int Repair RD per Int Series 4R. Do not run any Dianetics. Otherwise, if the pc has never had an Int RD, give him a standard Int RD per Int Series 2.

- 2B. HAS YOUR INT RD BEEN MESSED UP? \_\_\_\_\_  
 Do an Int RD Correction List Revised (HCOB 29 Oct 71RA). If Int Correction has already been done on the pc get an FES of the Int RD *and* its corrections. When all errors are corrected the C/S may order the End of Endless Int Repair RD per Int Series 4R.
3. HAS THERE BEEN A LIST ERROR? \_\_\_\_\_  
 Find out which and handle with an L4BRA.
- 4A. DO YOU HAVE AN ARC BREAK? \_\_\_\_\_  
 Handle with ARCU CDEINR E/S to F/N.
- 4B. DO YOU HAVE AN ARC BREAK WITH THE ENVIRONMENT? \_\_\_\_\_  
 ARCU CDEINR E/S to F/N or Remedy B if ordered by the C/S. (Ref: BTB 14 Aug 68R, REMEDY B—ENVIRONMENT AND “NEW STYLE.”)
- 4C. DO YOU HAVE A PRESENT TIME PROBLEM? \_\_\_\_\_  
 Itsa E/S itsa to F/N.
- 4D. HAS A WITHHOLD BEEN MISSED? \_\_\_\_\_  
 Get what, who nearly found out, what they did to miss it, E/S M/W/H to F/N.
- 4E. WAS THERE A WITHHOLD THAT KEPT COMING UP? \_\_\_\_\_  
 Who wouldn’t accept it, who said it still read. Indicate it was a false read. 2WC the concern.
- 4F. HAVE YOU COMMITTED AN OVERT? \_\_\_\_\_  
 Pull it, E/S to F/N.
5. ARE YOU EXPERIMENTING? \_\_\_\_\_  
 Get time, place, form and event E/S to F/N.
6. ARE YOU ALTERING TECH? \_\_\_\_\_  
 Get time, place, form and event E/S to F/N.
7. ARE YOU DOING SOMETHING ELSE WITH TECH? \_\_\_\_\_  
 Get time, place, form and event E/S to F/N.
8. HAVE YOU TYPED, HANDWRITTEN OR TAPED COPIES OF ANY CONFIDENTIAL MATERIALS? \_\_\_\_\_  
 Get time, place, form and event E/S to F/N.
9. ARE YOU HERE TO GET DATA FOR SOMEONE ELSE? \_\_\_\_\_  
 Get what, when, all, who E/S to F/N.
10. DO YOU HAVE A CRIMINAL RECORD OR CRIMES FOR WHICH YOU COULD BE ARRESTED? \_\_\_\_\_  
 Note all crimes, with what, when, all and who and handle with E/S to F/N.
11. ARE YOU HERE TO BE CURED OF SOMETHING NOT MENTIONED? \_\_\_\_\_  
 Itsa E/S itsa to F/N.
12. DO YOU HAVE UNPAID DEBTS TO ORGS? \_\_\_\_\_  
 Get time, place, form and event E/S to F/N.
13. DO YOU HAVE KNOWLEDGE OF A CRIME AGAINST SCIENTOLOGY? \_\_\_\_\_  
 Get time, place, form and event E/S to F/N.

14. ARE THERE IGNORED ORIGINATIONS?  
Itsa E/S itsa to F/N. \_\_\_\_\_
15. HAVE YOU BEEN SELF-AUDITING!  
Itsa E/S itsa to F/N or L1C on the prior upset. If prior upset was in auditing, use the appropriate correction list. \_\_\_\_\_
- 16A. HAVE YOU BEEN AUDITED BY A NONSTANDARD AUDITOR?  
Itsa E/S itsa to F/N. \_\_\_\_\_
- 16B. HAS THERE BEEN A NONSTANDARD PROCESS?  
Itsa E/S itsa to F/N. \_\_\_\_\_
- 16C. HAS THERE BEEN A BAD AUDITING COMM CYCLE? Itsa E/S itsa to F/N.  
L1C if necessary. \_\_\_\_\_
- 16D. HAVE THERE BEEN CODE BREAKS?  
Itsa E/S itsa to F/N. \_\_\_\_\_
- 17A. IS THERE AN ENGRAM IN RESTIMULATION?  
L3RF and handle. (On a Clear, OT or Dianetic Clear, indicate the read. You may do an L3RF if needed, however. do no handling beyond indicating the read. See HCOB 30 Oct 78 C/S Series 53, USE OF for further data on handling reading Dianetic items on Clears, OTs and Dianetic Clears.) \_\_\_\_\_
- 17B. IS A PICTURE NOT ERASED?  
Handle as in 17A above. \_\_\_\_\_
18. IS THERE AN ENGRAM EXACTLY MATCHING PT DANGERS?  
Run it out Triple or Quad. (On Clears, OTs and Dianetic Clears, handle as in 17A above.) \_\_\_\_\_
19. ARE YOU CONNECTED TO A SUPPRESSIVE PERSON?  
2WC to F/N. Return to C/S for instructions on further handling if needed. \_\_\_\_\_
20. ARE YOU CONNECTED TO A SUPPRESSIVE GROUP?  
2WC to F/N. Return to C/S for instructions on further handling if needed. \_\_\_\_\_
21. IS THERE AN ENVIRONMENTAL MENACE?  
2WC to F/N. Return to C/S. \_\_\_\_\_
22. ARE YOU HERE BECAUSE SOMEONE ELSE DEMANDED IT?  
2WC to F/N. Return to C/S. \_\_\_\_\_
- 23A. DO YOU HAVE A HIDDEN STANDARD?  
L&N "What hasn't been handled?"  
L&N "Who or what would have (item above)?"  
Run O/W on the item. \_\_\_\_\_
- 23B. WHAT WOULD HAVE TO HAPPEN FOR YOU TO KNOW SCIENTOLOGY WORKS?  
Handle as in 23A above. \_\_\_\_\_
24. WHAT WOULD HAPPEN IF SCIENTOLOGY WORKED?  
Itsa E/S itsa to F/N. \_\_\_\_\_

25. CAN'T YOU STUDY? \_\_\_\_\_  
Assess and handle a Study Green Form.
26. HAS ANYTHING BEEN SUPPRESSED? \_\_\_\_\_  
Itsa E/S itsa to F/N.
27. HAS ANYTHING BEEN INVALIDATED? \_\_\_\_\_  
Itsa E/S itsa to F/N.
28. HAS ANYTHING BEEN EVALUATED? \_\_\_\_\_  
Itsa E/S itsa to F/N.
29. HAS ANYTHING BEEN RUSHED? \_\_\_\_\_  
Itsa E/S itsa to F/N.
30. HAS ANYTHING BEEN MISSED? \_\_\_\_\_  
Itsa E/S itsa to F/N.
31. HAS A PROCESS BEEN LEFT UNFLAT? \_\_\_\_\_  
2WC for data to F/N. Return to C/S.
32. HAS A PROCESS BEEN OVERRUN? \_\_\_\_\_  
Rehab.
33. HAS A RELEASE BEEN BYPASSED? \_\_\_\_\_  
Rehab.
34. HAVE YOU BEEN OVERREPAIRED? \_\_\_\_\_  
Repair Correction List.
35. HAVE YOU GONE DIANETIC CLEAR? \_\_\_\_\_  
Date/Locate.
36. IS THERE ANYTHING UPSETTING ABOUT THIS REVIEW? \_\_\_\_\_  
Itsa E/S itsa to F/N.
37. IS THIS LIST UNNECESSARY? \_\_\_\_\_  
Indicate. If no F/N rehab or Date/Locate.
38. IS THERE SOMETHING THAT HASN'T BEEN HANDLED? \_\_\_\_\_  
Find out what and handle or return to the C/S.
39. IS THERE SOMETHING ELSE WRONG? \_\_\_\_\_  
Find out what and handle or return to C/S.

### RESISTIVE CASES ASSESSMENT

Assess Method 5 the following resistive cases. If any item reads, go to its corresponding section on the Expanded Green Form 40RD and assess Method 5 all the items in that section. Assess the section on the Expanded Green Form 40RD that corresponds to *each* reading item.

When all sections corresponding to the reading resistive cases items are assessed you will have a full picture of the pc's resistiveness.

Then, if you have C/S okay, take up each reading section on the EXGF 40RD in the order in which they are listed below and handle reads per the instructions given.

Otherwise, return to the C/S for programming.

- A-1. WENT DIANETIC CLEAR AND NEVER ATTESTED \_\_\_\_\_
- A-2. HAD ENGRAMS RUN AFTER BEING DIANETIC CLEAR \_\_\_\_\_
- B. DOESN'T WANT AUDITING \_\_\_\_\_
- C. AUDITED WITH RUDIMENTS OUT \_\_\_\_\_
- D. OVERWHELMED \_\_\_\_\_
- E. CONTINUOUSLY COMMITTING OVERTS ON SCIENTOLOGY \_\_\_\_\_
- F-1. SUPPRESSED \_\_\_\_\_
- F-2. CONNECTED TO AN ANTAGONISTIC PERSON \_\_\_\_\_
- G. SERIOUSLY PHYSICALLY ILL \_\_\_\_\_
- H. HAS NOT HAD AUDITING \_\_\_\_\_
- I-1. SEEKING THE SAME THRILL ATTAINED FROM DRUGS \_\_\_\_\_
- I-2. HAS TAKEN DRUGS \_\_\_\_\_
- J. FORMER THERAPY BEFORE SCIENTOLOGY \_\_\_\_\_
- K. HAS BEEN PART OF EARLIER PRACTICES \_\_\_\_\_
- L-1. OUT OF VALENCE \_\_\_\_\_
- L-2. ARE YOU BEING SOMEONE ELSE \_\_\_\_\_
- M. PRETENDING TRAINING OR GRADES NOT ATTAINED \_\_\_\_\_
- N. AUDITED WITH PRIOR GRADES OUT \_\_\_\_\_
- O. MISUNDERSTOODS IN AUDITING \_\_\_\_\_

**Interiorization Rundown Series 6**

**AUDITING PAST EXTERIOR**

(Ref: HCOB 4 Jan 71R      *Int RD Series 2, EXTERIOR  
IZATION AND HIGH TA, THE  
INTERIORIZATION RUNDOWN  
REVISED*

HCOB 24 Sep 78 I      *Int RD Series 4, URGENT  
IMPORTANT, THE END OF END  
LESS INT REPAIR RUNDOWN*

HCOB 26 Jun 78RA      *New Era Dianetics Series  
Issue II      6RA, URGENT IMPORTANT,  
ROUTINE 3RA ENGRAM RUNNING  
BY CHAINS*

HCOB 7 Mar 75      *EXT AND ENDING SESSION.)*

On Flag where we do a lot of auditing on pcs when I took over C/Sing after 8 months off C/S lines, I found a very high percentage of cases had been audited past exterior. It was a very high percentage.

Many of these pcs (most of them VAs or on OT levels) had various symptoms:

Headaches Body aches and pains Effort Pressures from environment.

The common denominator was "audited over exterior."

The main symptom of this was high TA at session start or TA up at Examiner after F/Ns, cog, VGIs at session end. Not all however suffered from high TA but all who had high TA after lots of auditing had been audited past exterior.

The first (1970) version of the above-referenced HCOB (now HCOB 4 Jan 71R) re exteriorization and interiorization was tested and written as the breakthrough which permits auditing after exteriorization and going on up the grades.

The check even after this showed such a high percent of cases had been audited past exterior on Dianetics, Scn, Power, Clearing or OT grades that I wish to bring the point home emphatically to C/Ses that it is of major importance to handle this situation by checking for it and running interiorization.

*NOTE: Per HCOB 12 Sep 78, URGENT IMPORTANT, DIANETICS FORBIDDEN ON CLEARS AND OTs, Clears and OTs and Dianetic Clears would not now be audited on the routine Interiorization RD (Int RD Series 2), as they are not to be run on Dianetics. Dianetic Clears, Clears and above may be audited on the End of Endless Int Repair RD, which runs Int by Recall. (Ref: HCOB 24 Sep 78, Issue I, Int RD Series 4, URGENT IMPORTANT, THE END OF ENDLESS INT REPAIR RD.) A C/ear or OT who then has any further unresolving Int problems should, as soon as possible, be handled at an AO.*

*The standard C/S for any other pc who has exteriorized in auditing, has high TA, headaches, body aches, heavy pressures or discomfort (any of these), is to order a check on interiorization, exactly per the steps given on HCOB 4 Jan 71R,*

*EXTERIORIZATION AND HIGH TA, THE INTERIORIZATION RUNDOWN REVISED. Then, if Int is found to be charged, the person is given the Int Rundown.*

*When the Int Rundown steps are completed, in a separate session some time within the next few days, this C/S must be done:*

1. Two-way comm on interiorization and exteriorization.

This pushes the cognition further. The pc may not have added it all up yet. Don't evaluate. Just question and listen with no Q and A.

Pcs or pre-OTs can go up to higher grades after exteriorization if interiorization is run. This is even true of Dianetic Clears. *For Clears, OTs and Dianetic Clears, however, Int can only be run using the End of Endless Int Repair RD as referenced above.*

We are far more successful in early auditing (such as Dianetics and lower grades) than we think!

*Interiorization Rundown Series 7*

**BLOWS  
AUDITING PAST EXTERIOR**

(Ref: HCOB 4 Jan 71R Int RD Series 2, EXTERIOR  
IZATION AND HIGH TA, THE  
INTERIORIZATION RUNDOWN REVISED  
HCOB 24 Sep 78 I Int RD Series 4, URGENT  
IMPORTANT, END OF ENDLESS  
INT REPAIR RD  
HCOB 7 Mar 75 EXT AND ENDING SESSION)

I have found a major cause of blows from classes, orgs and Scientology.

Overts are of course a primary cause but many have overts and *don't* blow, so why do such people blow?

A case audited past exterior, particularly if it is not acked, tends to get stuck on exteriorizing. This can (but doesn't always by any means) cause the person to take himself away!

Three recent "blows" all fell in this category. One who was trying to blow, when audited on interiorization, changed his mind.

An amazing number of pcs go exterior on modern auditing. Modern processes, Dianetics and Scientology are very fast.

Some haven't even realized it, didn't know what it was.

When they go exterior and you keep on auditing them without running interiorization as per HCOB 4 Jan 71R, Int RD Series 2, EXTERIORIZATION AND HIGH TA, THE INTERIORIZATION RUNDOWN REVISED, they become stronger as thetans while being reinteriorized and they get odd somatics, particularly in the head.

Uncomfortable they want OUT. Trying and failing to get out (since interiorization has not been run) in desperation they *leave* an org or class, body and all, without being exterior as a thetan.

If you rehab exterior and run an Interiorization *Rundown* the dramatization ceases.

The excuses such "blows" give you would fill a large book. Yet it is only that they are seeking to exteriorize, can't, so they "exteriorize" by leaving, body and all.

The Interiorization *Rundown* is given in HCOB 4 Jan 71R.

*For Clears, OTs and Dianetic Clears, the handling is the End of Endless Int Repair Rundown. (HCOB 24 Sep 78, Issue I.)*

*A person couldn't be audited past exterior, you know.*

*But if given an Interiorization Rundown* he or she can be.

When they have been audited past exterior without an Interiorization *Rundown* you will have trouble with the case, the TA and with blows. So use the interiorization tech.

**UNREADING QUESTIONS AND ITEMS**

*Reference: HCOB 3 Dec 78 UNREADING FLOWS*

Never list a listing question that doesn't read.

Never prepcheck an item that doesn't read.

These rules hold good for all lists, all items, *all flows, including Dianetics.*

A "tick" or a "stop" is not a read. Reads are small falls or falls or long falls or long fall blowdown (of TA).

A preclear's case can be gotten into serious trouble by listing a list that doesn't read or prepchecking *an item that doesn't read* or running an item or flow that doesn't read.

On a list, this is the sort of thing that happens:

The list is "Who or what would fly kites?" The C/S has said to "List this to a BD F/N item." So the auditor *does* list it without checking the read at all. The list can go on 99 pages with the pc protesting, getting upset. This is called a "Dead horse list" because it gave no item. The reason it didn't was that the list question itself didn't read. One does an *L4BRA* on the pc to correct the situation and gets "unnecessary action."

On a list that is getting no item you don't *extend*. You correctly use *L4BRA* or any subsequent issue of it. If you extend a "dead horse list" you just make things worse. Use an *L4BRA* and it will set it right.

This weird thing can also happen. C/S says to list "Who or what would kill buffaloes?" The auditor does, gets a BD F/N item "A hunter." The C/S *also* says to list as a second action "Who or what would feel tough?" The auditor fails to test the question for read and lists it. Had he tested it, the list would not have read. But the list comes up with an item, "A mean hunter." It has stirred up charge from the first question and the item "A mean hunter" is a wrong item as it is a misworded variation of the first list's item! Now we have an unnecessary action *and* a wrong item. We do an *L4BRA* and the pc is still upset as maybe only one or the other of the *two* errors read.

In a Dianetic "list" one is not doing a listing action. One is only trying to find a somatic or sensation, etc. that will run. The item must read well. Or it won't produce a chain to run. In actual fact the Dn list Q does usually read but one doesn't bother to test it.

But an item or flow that doesn't read will produce no chain, no basic and the pc will jump around the track trying but just jamming up his bank.

The moral of this story is:

**ALWAYS TEST A LISTING QUESTION BEFORE LETTING THE PC LIST.**

**ALWAYS MARK THE READ IT GAVE (SF, F, LF, LFBD) ON THE WORKSHEET.**

ALWAYS TEST AN ITEM FOR READ BEFORE PREPCHECKING A *ND*  
*ALWAYS CHECK AN ITEM AND FLOW BEFORE* RUNNING RECALLS OR  
ENGRAMS.

ALWAYS MARK THE READ AN ITEM GAVE (SF, F, LF, LFBD) ON THE  
WORKSHEET.

### CHARGE

The whole subject of “charge” is based on this. “Charge” is the electrical impulse  
on the case that activates the meter.

“Charge” shows not only that an area has something in it. It also shows that the  
pc has possible *reality* on it.

A pc can have a broken leg, yet it might not read on a meter. It would be *charged*  
but below the pc’s reality. So it won’t read.

### THINGS THAT DON’T READ WON’T RUN.

The Case Supervisor always counts on the AUDITOR to test questions and items  
*and flows* for read before running them.

The auditor, when a question or item or flow doesn’t read, can and should always  
put in “Suppress” and “Invalidate.” “On this (question) (item) (flow), has anything  
been suppressed?” “On this (question) (item) (flow), has anything been invalidated?” If  
either one read, the question or item or flow will also read. The Case Supervisor also  
counts on the AUDITOR to use Suppress and Invalidate on a question or item or flow.  
If after this there is still no read on the question or item or flow, that’s it. Don’t use it,  
don’t list it. Go to the next action on the C/S or end off.

***Interiorization Rundown Series 3***

**INTERIORIZATION INTENSIVE  
2-WAY COMM**

The Interiorization Rundown *Revised* (HCOB of 4 Jan 71R, EXTERIORIZATION AND HIGH TAs *THE INTERIORIZATION RUNDOWN REVISED*) is ALWAYS followed by a *final* session with “2-way comm on interiorization-exteriorization.”

If the interiorization auditing has to be repaired, that is done first of course.

BUT AN INTERIORIZATION RUNDOWN IS NEVER COMPLETE UNTIL AN ADDITIONAL LATER SESSION IS GIVEN ON 2-WAY COMM ON INTERIOR EXTERIOR.

A C/S in repairing cases should always look to see if a pc:

1. Has exteriorized at some time during auditing.
2. If the pc has exteriorized and has not had an Int RD, Int must be checked, per HCOB 4 Jan 71R, and if charged the only C/S that can now be done is the Interiorization Rundown (except on C/ears or above, who get the Recall version).
3. If an Int Rundown has been given, then the C/S must check to see if a later session was given on “2-way comm Int-Ext.”
4. If this 2-way comm was omitted, or not in a separate session, then “2-way comm on Int-Ext” must be ordered even if there have been several intervening sessions.

***THE PROCESS***

*As an auditor you would give the pc an R-Factor that you are going to go over the subject of interiorization and exteriorization with him.*

*Get him to tell you how he feels about these, based on the Int button(s) that was assessed and run, and on the subject of Int in general.*

*The two-way comm session is always taken to F/N.*

**COG**

It is *usually* the case that the pc did not fully cognite when he had the Int Rundown. His TA may stay high after an Int session. O/R is of little use to get it down. What's missing is the 2-way comm session. In it the pc usually cognites and things then go right.

The current C/S and auditor error is trying to do everything briefly and all at once. Ordering an Int Rundown and 2-way comm on it in the same session would be part of such an erroneous trend.

The 2-way comm must be *another* session preferably on another later day.

It is a flagrant C/S error to omit “2-way comm Int-Ext” after an Interiorization Rundown session.

The signal to order *a check on interiorization per HCOB 4 Jan 71R* is pc went exterior in auditing or has been found to have gone exterior. Auditing will not run well when the pc is audited past or after exteriorizing.

*If charged*, an Int Rundown must now be ordered.

If unsuccessful it must be repaired.

Successful or repaired, an Int Rundown must be followed by the 2-way comm session.

Two-way comm must be done with exact TRs. The auditor must not Q and A. He must not evaluate (tell the pc what it’s all about).

Two-way comm is a precision process. The pc is kept talking, not by giving him commands. He is kept on the subject of Int-Ext (or the 2-way comm subject), not encouraged to leap about by Q and A.

You cannot consider an Interiorization Rundown complete unless followed by 2-way comm.

If the case hasn’t had it following his Int Rundown he must be ordered to it.

*(Title has been changed from  
Exteriorization RD Musts to  
Interiorization Rundown Musts)*

*(Revisions in this type style)*

*(Ellipses indicate deletions)*

***Interiorization Rundown Series 8***

**INTERORIZATION RUNDOWN MUSTS**

*(Reference: HCOB 4 Jan R, Int RD Series 2  
EXT AND HIGH TA, THE INT RD REVISED)*

An Interiorization Rundown must be:

1. **COMPLETED IN AS FEW SESSIONS AS POSSIBLE, WITH EACH SUCCEEDING SESSION GIVEN ON THE NEXT CONSECUTIVE DAY.**
2. **RUN SO AS TO COMPLETE ANY FLOW ON ANY READING BUTTON IN ONE SESSION.** *(This means you do not leave a chain half run.)*
3. **RUN WITHOUT FLUBS.**
4. **FOLLOWED BY A FINAL SESSION OF 2-WAY COMM RUN TO F/N, COG, VGIs.**

**COMPLETING THE RUNDOWN ON AN INTENSIVE BASIS**

*Originally, when only "went in" and "go in" were assessed on the Int Rundown, the rule was that the entire rundown was to be given in one session.*

*The reason for this was that there is a frequent chance of ruds going out between sessions and of course they cannot be put in until the Int Rundown is complete as it's "auditing a pc past exterior."*

*This is still true.*

*However, with the full array of Int buttons now to be assessed and any reading button run on Quad or Triple Flows, and with re-assessment of the Int buttons, the one session rule may not be workable without "quickie-ing" the rundown, which must not be done.*

*Thus, allowance must be made for sufficient time to get the rundown done fully while still completing it as rapidly as possible, to safeguard against out-ruds situations cropping up before it is complete.*

*The safest way to accomplish this is to ensure that the Int Rundown:*

1. *Is completed in as few sessions as possible.*
2. *After the first session each succeeding session is given on the next consecutive day.*
3. *Plenty of time (2 to 5 hours) must be allowed for each daily session.*
4. *The auditor must make sure the pc DOES have the necessary time for this before starting the rundown.*
5. *Any one flow on any reading Int button MUST be completed in one session. (You do not end a session with a chain only half or partially run.)*
6. *There are no session breaks taken. (Unless pc has a physical PTP, in which case he can be given a MINIMAL break to handle it and return right back to session.)*

### FLUBLESS

Auditors who have occasional flubs—Dn failures to flatten chains or run them to chopped EP instead of a correct F/N *postulate off* and VGIs at basic HAVE NO BUSINESS RUNNING INT RUNDOWNS.

Flubs in any event are just corny.

They are particularly messy when they occur in the *INT* RUNDOWN.

The *Int* Rundown is auditing by the book!

(Ref: HCOB 4 Jan 71R *Int* RD Series 2 EXTERIORIZATION & HIGH TA,  
THE INT RD REVISED  
HCOB 26 Jun 78RA NED Series 6RA URGENT IMPORTANT  
ROUTINE 3RA, ENGRAM RUNNING BY CHAINS  
HCOB 16 Sep 78 POSTULATE OFF EQUALS ERASURE)

Flubs mar any auditing result. They make a real mess on an *Int* Rundown as review auditing over an *exteriorization* if the rundown is not complete, is difficult and results in high TA.

Yet one franchise invalidated the pc's cog, made the pc do it all in clay, left chains incomplete and took a week over it! And then wondered why the pc was unhappy!

NO FLUBS!

### FOLLOW WITH 2-WAY COMM

A day or two or a week after the *Int* Rundown (not less than a day nor more than a week), an *Int* Rundown MUST BE FOLLOWED BY A TWO-WAY COMM SESSION.

The reason for this is that there is a cognition delay on almost all cases. The 2way comm blows off locks, etc. and the pc usually gets a big cog and never afterwards worries about exteriorization.

If the *Int* Rundown is *not* done in *DAILY* sessions, flubbed, not followed by 2-way comm in a later session, the pc can get hung up on the subject.

The auditor doing 2-way comm must have experience and know-how on 2-way comm. (See HCOB 21 April 70, "2-WAY COMM C/Ses," HCOB 3 July '70, "C/Sing 2-WAY COMM," BTB 10 July '70, "2-WAY COMM—A CLASS III ACTION.")

*All* 2-way comm sessions go to end phenomena of an F/N.

It *is often* found the subject of interiorization-exteriorization *is still* charged. But it should be checked for read as in all items and subjects used in auditing. The rule is you don't audit things that don't read. Suppress and Inval buttons can be put in to get a read. If you audit things that don't read, the TA is liable to go up.

A nicely done 2-way comm on interiorization and exteriorization blows the pc to present time and cleans him up nicely.

*The Interiorization Rundown is to be done when it is found the pc has been audited past exterior, providing of course one of the Int buttons reads on checking. If reading, the RD HAS to be done before review auditing, ruds or anything else. So it's dicey—a delicate proposition.*

An . . . Interiorization . . . Rundown is about the hottest thing that's come along for some time. It solves, for instance, the total goal of Buddhism. It is the key to immortality. It's pure theta gold.

So respect it by running by the book, exactly, perfectly and to a total win.

For a long while we have known that if you audit a person after he or she has exteriorized, you often get a high tone arm, somatics and an upset case.

The answer has *been* to cease to audit a person after exteriorization has occurred.

This is so much a fact that five out of five "in trouble" cases I recently examined had every one of them been audited for some time after they exteriorized. The TA had or had not gone high but the cases were bogged. They revived at once when the fact of exteriorization was located. F/N, VGIs and when rehabbed (by counting number of times) somatics ceased.

The rule has been—don't audit after a pc has exteriorized.

This is one of those very fundamental things that seems to defy research and yet if not solved will keep things messed up. Persons who exteriorize on lower grades need their upper grades and yet if audited further may mess up. This places a limit on auditing and yet the person may still have aberrations and somatics. But the fact of having exteriorized bars the road.

So I got to work and made a breakthrough on it. Hurrah!

It has now been fully vindicated by long tests and is now released for general use.

### EXTERIORIZATION

Exteriorization is defined as the act of moving out of the body with or without full perception.

It is the fact of this act which proves that the individual is not a body but an individual. This discovery in 1952 proved beyond any question the existence of a thetan, that the individual *was* a thetan, not a body, and disproved that Man was an animal and that he was a spiritual being timeless and deathless.

Techniques have existed since 1952 that exteriorize a person. These are not now used because (a) the person, still being aberrated and not Clear, soon returns to his body and (b) when audited thereafter has trouble.

This is a major problem a thetan sometimes has at death. How to exteriorize? He makes it eventually of course but he should be able to do so at once.

But, in my research, I found it unreasonable that a person would be hard to audit just because he had exteriorized and had re-interiorized. For he has obviously done just that at every death and birth and must have done so hundreds of billions of times. So why should a recent exteriorization then make him hard to audit? Yet it did.

My asking of that question was the first breakthrough. The rest soon followed.

### ENGRAM BEHAVIOR

We know in Dianetics that if you continue to run the last part of an engram which has in fact an earlier beginning which isn't being run and is ignored the TA will go up.

The reason for this is that the first of a chain or the first part of an experience or a first experience (basic on a chain of incidents) has to be run for the chain or incident to erase.

If you only ran the end of incidents you would get a high TA and no erasure.

If you only ran incidents late on the chain you would get a high TA.

Pcs are uncomfortable, feel under pressure, when their TA is high (above 3.5 or up).

If you don't erase incidents or chains of incidents when auditing (or key them out as in release) you get a perpetually high TA.

High TA cases have been "overrun" on something. That however is a very oversimplified explanation. The truth is that they have been run on something that didn't erase. The something has an earlier beginning than was detected or an earlier incident. In life one, having engrams about it, adds new incidents in living until something is "overrun" or done too often. The TA is therefore high.

A TA records MASS. Mental mass has a higher electrical resistance and so measures more "ohms" of resistance, an electrical term for the trouble electricity has in

passing through something. The more resistance the more units of resistance are recorded on the meter. The TA actually measures resistance.

Thus, the end of an incident can be restimulated. If the beginning of it is never touched then one will just accumulate more and more mass.

### THE MISSED BEGINNING

What has happened here, as regards exteriorization is that we have concentrated on EXTERIORIZATION.

If one is IN something, he must have gotten into it.

Therefore the beginning of an exteriorization is the INTERIORIZATION.

The being went *into* something before he went out of it.

Exteriorization occurs at death. That's an engram. Interiorization occurs at birth, that's an engram.

So when somebody goes exterior he is actually liable to key-in having gone interior in the first place.

Get it?

So when you exteriorize somebody or he exteriorizes during auditing he gets keyed-in a bit and without having audited earlier INTERIORIZATIONS, he has been put in the last part (exteriorization) of an incident which began with interiorization.

Not only are you touching on something (exteriorization) late on a chain (which has hundreds of billions of like incidents ahead of it), you are also touching something which is late in the incident (which began with interiorization).

On both counts then, the TA may go high.

### THE REMEDY

The remedy is to audit out *interiorizations* (i.e., times the person *went in*) using the correctly assessed *Int* button.

If this is done, then the pc can be audited all you want after exteriorization.

Auditing the interiorizations with *R3RA*, *Quad* or *Triple Flows*, restores the possibility of auditing a pc after an exteriorization has occurred in auditing.

### INT RUNDOWN REVISED BY STEPS

*Based on recent researches, the original Int Rundown has been newly revised and simplified.*

*A full array of Int buttons has been added.*

*The Recall and Secondary steps have been deleted, so the pc gets to the basic of any Int trouble on a faster route.*

*Int chains are run using a simpler R3RA command for Int, and each chain taken to full New Era Dianetics EP.*

*The revised rundown follows.*

## THE PROCESS

### THE INTERIORIZATION RUNDOWN REVISED

The case supervision directions for an Interiorization RD are to be done by a Scientology auditor *who is also a Hubbard New Era Dianetics Auditor*.

*He must have an excellent command of metering, TRs, R3RA, the theory of Int and the Int RD commands, and he must know and be able to recognize an F/N, a postulate and full Dianetic EP when these occur.*

1. Omit ruds of any kind and do NOT attempt a rapid LIC. The TA will just go up out the roof on any type of ruds or list. Simply start the session and go right onto the following steps.
2. With the pc on the meter, have him read pages 1-3 of this bulletin (HCOB 4 Jan FIR), through the section entitled "The Remedy." C/ear up any confusion. Handle any misunderstood words. Help the pc do a simple demo of the theory that: "In" is the earlier beginning or the earlier similar incident of "Out. "

(This is *not* to be a clay demo nor complex. Keep it simple, just ensure the pc gets it.)

3. Clear EXTERIORIZATION with the pc as *THE ACT OF MOVING OUT OF THE BODY WITH OR WITHOUT FULL PERCEPTION*. Make certain he's got it. Demo it, if necessary.
4. Check for having been audited after exteriorization. (TA should come down and F/N, cog, VGIs.)
5. Rehab (rehabilitate) this condition by getting or counting the number of times exteriorized. You should get F/N, cog, VGIs.
6. Assess the following list of Int buttons. (Do NOT clear the buttons first.)

#### INT BUTTONS

GO IN

WENT IN

PUT IN

INTERIORIZED INTO SOMETHING

WANT TO GO IN

CAN'T GET IN

KICKED OUT OF SPACES

CAN'T GO IN

BEING TRAPPED

FORCED IN

PULLED IN.

*If none of the Int buttons read on this assessment, get in Suppress, Invalidate and Misunderstood on the Int button list. (Do not omit this basic rule of assessment. Ref: HCOB 15 Oct 73RA, C/S Series 87RA, NULLING AND F/NING PREPARED LISTS.)*

7. Then clear and demo ONLY the button that reads.

*If the pc seems disinterested or unhappy with the button that reads, check False.*

*CAUTION: The pc may have an MU which caused a particular button to read. Thus ensure the button is not reading on an MU, and if a button has read on an MU then clear it and reassess it. Don't give the pc a wrong item or even monkey around with a wrong item. The above actions help you ensure getting the CORRECT Int button.*

*It is important, in clearing the reading buttons, that the pc understands you will be auditing times he WENT IN or WAS BEING TRAPPED, etc. and NOT "was in" or "was already trapped" or "was stuck in," etc. You will be auditing the actual times the action of moving in occurred.*

*THE ABOVE CLEARING STEPS ARE VITAL, AS THE PC WILL NOT BE ABLE TO DO THE INT RD OVER MISUNDERSTOODS OR ON A MISASSESSED INT BUTTON. TO AUDIT HIM OVER MUs CONSTITUTES A BREACH OF THE AUDITOR'S CODE. ON THE OTHER HAND, DO NOT OVERDO THESE CLEARING ACTIONS, AS YOU ALREADY HAVE A PC ON YOUR HANDS WHO IS IN TROUBLE.*

*NOTE: If none of the Int buttons read even when Suppress, Invalidate and Misunderstood are applied, do NOT clear them and do NOT continue the Int Rundown steps.*

8. *When the largest reading button has been cleared per Step 7, take that button and run it R3RA Quad. (TRIPLE IF PC IS ONLY TRIPLE.) Each flow is taken to full Dianetic EP, using the command:*

*"Locate a time when you (Int button)."*

*EXAMPLE:*

*Int button with largest read: FORCED IN*

*Run:*

*Fl 1: Locate a time when you were forced in. (To full Dn EP)*

*Fl 2: Locate a time when you forced another in. (To full Dn EP)*

*Fl 3: Locate a time when others forced others in. (To full Dn EP)*

*Fl 0: Locate a time when you forced yourself in. (To full Dn EP)*

*(NOTE: The Quad command wordings for each of the Int buttons are listed on: HCOB 25 Sep 781, Int RD Series 5, QUAD COMMANDS FOR INT BUTTONS.)*

*DO NOT EVER RUN A PC ON FLOW ZERO FOR THE FIRST TIME ON INT. A TRIPLE PC CAN BE QUADED UP AFTER INT HANDLING IS COMPLETE, BUT IT IS NEVER DONE ON INT HANDLING OR INT REPAIR.*

9. *When all four flows on the reading button have each been run to full EP, reassess the Int button list per Step 6. If another button now reads, repeat Steps 7 and 8.*

*Should you have a persistent F/N after the four flows on the first button have been run, reassess the next day per Step 6 and if any button then reads, repeat Steps 7 and 8. If, on the other hand, you now have an F/Ning Int button list, it is safe to end off the Int Rundown.*

10. *Otherwise, you continue to assess the Int button list per Step 6 and to run any reading item R3RA Quad (or Triple) per Steps 7 and 8, until the entire Int button list is F/Ning on assessment.*

*DO NOT OVERRUN THE INT RUNDOWN. See section below on "Vital Data on Int RD End Phenomena."*

*CAUTION: ANY FLOW ON ANY READING BUTTON MUST BE RUN TO EP IN ONE SESSION, AND THE INT RUNDOWN MUST BE COMPLETED IN AS FEW SESSIONS AS POSSIBLE.*

11. *The final step, which is done after the final session, preferably on another later day, is a 2-way comm session on Int/Ext. (Ref: HCOB 30 May 70R, Int RD Series 3, INTERIORIZATION INTENSIVE 2-WAY COMM.)*

#### *RUNNING INT WITH R3RA*

*The R3RA steps and procedure are standard except that they address the subject of "interiorization" (expressed as any one of the buttons on the Int button list).*

*Note that New Era Dianetics preassessment is not included in the revised Int Rundown, nor is the running of AESPs. (See HCOB 24 Sep 78 II, Int RD Series 13, PREASSESSMENT, AESPs AND INT.)*

*In running the Int chain (or chains) it is important to run the actual "going in" action which would be near or at the beginning of the incident. Thus, if the pc is running an incident where he is "already in," ensure you check for an earlier beginning to the incident to pick up the "going in" type of action.*

*The questions to find an earlier beginning when running R3RA are:*

*"Is there an earlier beginning to this incident?" or*

*"Does the one we're running start earlier?" or*

*"Does there seem to be an earlier starting point to this incident?"*

*The earlier similar command when running R3RA is:*

*"Is there an earlier incident when you (Int button)?"*

*Each flow must be taken to basic and the full Dianetic EP of: F/N, postulate (postulate off = erasure), and VGIs.*

*The auditor must have an excellent command of New Era Dianetics tech.*

*(Reference for New Era Dianetics R3RA commands and procedure is: HCOB 26 Jun 78RA 11, NED Series 6RA, URGENT IMPORTANT, ROUTINE 3RA, ENGRAM RUNNING B Y CHA INS.)*

#### *VITAL DATA ON INT RD END PHENOMENA*

*Exteriorization is not the EP of the Int Rundown. If it happens that the pc goes exterior during the RD, you end off gently as in any other auditing. But that is not the EP, and you may have to pick him up again later and complete the Int RD or handle it with the End of Endless Int Repair Rundown.*

*THE EP OF THE INT RUNDOWN IS NO MORE CONCERN OR TROUBLE WITH EXTERIORIZATION OR INTERIORIZATION.*

*This is generally accomplished by auditing the pc to an F/Ning Int button list.*

*But there is another phenomenon that can occur while running Int. IT IS VITAL THAT AN AUDITOR DOES NOT MISS THIS SHOULD IT HAPPEN.*

*It goes like this: You're auditing along and suddenly some mass discharges, down comes the TA, you suddenly have a floating TA, and that's it. The pc has hit the EP.*

*If you proceed past that point you're in trouble. You DON'T then reassess the Int button list and you DON'T continue running Quad Flows, even if all the flows have not yet been run on one reading button.*

*You do nothing but take your paws off the meter and gently end the session. If you do otherwise you can mess up a case.*

*It isn't exteriorization. Exteriorization could occur at the same time; however we could not care less because exteriorization is not the EP of the process.*

*But at ANY point at which the above phenomenon occurs on the Int RD—mass moves off, the TA comes crashing down and you can't keep the needle on the dial because the TA itself is floating—you end off the rundown because you have the EP.*

*What has happened here is that you've blown the stuck flow of "going in."*

*Int sends the TA up because the person has plowed deeper into more and more mass and come out of less and less mass. You have been auditing the pc on what has been, for eons, a stuck flow of obsessively going in. At any point in the auditing that stuck flow can suddenly give way. It heaves in the opposite direction, and the stuck flow of "going in" vanishes.*

*When that happens it's the end of the process, as that is all you want to accomplish with the Int Rundown.*

*If you were then to check the Int button list (which you DO NOT DO AT THIS POINT) you would find the Int buttons all F/Ning.*

#### FUTURE AUDITING

*When the pc has attained the EP of Int, either on the above phenomenon or by reassessing the Int buttons and running them on the flows to an F/Ning Int button list, one should now be able to audit the pc even after exteriorization.*

*However, HCOB 7 Mar 75, EXT AND ENDING SESSION would still be applied.*

#### WARNING

*The Int Rundown is a major case action and should only be run when the pc is rested and in good physical shape.*

#### THE END OF ENDLESS INT REPAIR

*The End of Endless Int Repair Rundown (HCOB 24 Sep 781, Int RD Series 4, URGENT IMPORTANT, THE END OF ENDLESS INT REPAIR RUNDOWN) is the superbly workable new process just developed to handle any needed Int repair.*

*It resolves any Int troubles that might persist even after a pc has had an Int Rundown done totally standardly.*

*It does not replace the Int Rundown; rather, it complements it, when necessary, as it runs Int by Recalls. We audit out the Int engrams on the Int Rundown. Then if repair is needed, the End of Endless Int Repair RD can be used to clean it up smoothly with Recalls. It is the answer to overrepair of Int on any pc.*

*Additionally, it can be used for handling Int repair on Clears, OTs and Dianetic Clears.*

*The above HCOB, 24 Sep 78 I, fully covers the purpose and use of this valuable new repair rundown.*

#### SUMMARY

*If a pc goes exterior on Dianetics or any Scientology auditing you must, as his next session, check the Int buttons for read, and if any read, clear them and do the new, vastly simplified and revised Int Rundown using the above C/S. With this done the pc . . . can go on being audited. And if repair is needed, the End of Endless Int Repair Rundown is the answer.*

*These new developments and refinements give us a simpler, more thorough tech for resolving Int than we have ever had before.*

The way is open to more powerful OTs.

All fundamental discoveries are essentially simple ones.

Class IV  
Grad  
Checksheet

(Revisions and Additions in this type style)

(Ellipses indicate deletions)

(Revised 24 Sep 78 to give current data on  
references covering exteriorization and its handling.)

**Interiorization Rundown Series 9**

**EXTERIORIZATION**

On reviews of field-given exteriorization intensives during the past year, I found many cases had been flubbed.

On researching this I found the following:

1. The remedy was being used as an effort to exteriorize people. People exteriorize in any normal auditing. What was needed was a *remedy* to be able to audit them thereafter without driving their TAs up.
2. Auditors evidently skimped their HDC Courses and did not know WHY one went to an earlier beginning or earlier incident. Thus they didn't know why you had to run interiorization.
3. HCOB 22 Mar 70 EXTERIORIZATION AND HIGH TA, (*now HCOB 4 Jan 71R, EXTERIORIZATION AND HIGH TA, THE INTERIORIZATION RUNDOWN REVISED*) must have been studied only for the rote commands. The theory of it was *not* studied.
4. Common Dianetic goofs got in the road of the rundown, the auditor failing to repeat the chain in asking for an earlier incident.... (*Ref: HCOB 26 Jun 78RA, Issue II, New Era Dianetics Series 6RA.*)
5. The exteriorization intensive was being stretched over several sessions. As only it can be audited, between sessions PPS, etc., would intervene.... (*Current ref: HCOB 20 Aug 70R, Int RD Series 8, INT RD MUSTS.*)
6. Clearing the command was flubby and the pc often thought interiorization meant "being in and trying to get out" and so the wrong end of the incident (the end) was being run.
7. People who hadn't been exterior at all and whose TAs were normal—not high—were being run on it.
8. It was being sold as a special rundown to exteriorize people, not just to enable them to go on being audited.

The number of Exteriorization Rundown flubs is excessive.

Therefore new HCOBs and a new pack have been issued. These include:

HCOB 4 Jan 71, EXTERIORIZATION AND HIGH TA, REVISED, (*now HCOB 4 Jan 71R EXTERIORIZATION AND HIGH TA, THE INTERIORIZATION RUNDOWN REVISED*) which contains the theory and NEW COMMANDS nobody can goof.

HCOB 6 Jan 71, STARRATE CHECKOUTS FOR EXTERIORIZATION INTENSIVE. (*This data is now in HCOB 25 Sep 78, Issue II, Int RD Series 14 STARRATE CHECKOUTS FOR INTERIORIZATION RUNDOWN.*)

HCOB 5 Jan 71, GOING EARLIER IN R3R AND EXTERIORIZATION INTENSIVES. (*This issue has been canceled by BTB 10 Dec 74, Issue VIII.*)

Commands and procedure for running New Era Dianetics in an Interiorization RD are now contained in:

HCOB 4 Jan 71R, Int RD Series 2, EXTERIORIZATION AND HIGH TA, THE INTERIORIZATION RUNDOWN REVISED.

HCOB 26 Jun 78RA, Issue II, New Era Dianetics Series 6RA, URGENT IMPORTANT, ROUTINE 3RA, ENGRAM RUNNING BY CHAINS.

The glaring outness is Dianetic . . . skill..A *Dianetic auditor* who can't run a flubless Dianetic session and get all . . . flows down to F/N studied in doubt, audits in doubt and ought to be in a condition of doubt until he retreads and actually reads the text and does the drills. Dianetics . . . is just too easy to be flubbed.

After patching up many of these done in the field I became very alert to the state of training. A new Course Supervisor course has been done and is being issued.

Obviously, auditors are no longer required to be starrated on new materials before they audit them. This omission must be remedied at once. NO AUDITOR MAY AUDIT MATERIALS OR APPLY HCOBs ON WHICH HE HAS NOT BEEN STARRATED .

No HGC or C/S may order an auditor to run a process if that auditor has not been starrated on its theory and practical first.

As for Dianetics, an auditor who cannot routinely carry a chain to an F/N VGI cog and erasure . . . may not retain his certificate unless retreaded and his *certificate* is suspended until he is retreaded. (*full New Era Dianetics EP is covered in HCOB 16 Sep 78, POSTULATE OFF EQUALS ERASURE.*)

For people to goof up using these clean positive tools is inexcusable.

The results are there to be obtained. WE OBTAIN SPECTACULAR POSITIVE RESULTS WITH THESE SAME MATERIALS DAILY WHEREVER THEY ARE ACTUALLY STUDIED AND APPLIED.

Please correct flubby auditing wherever you find it. Auditors must be checked out and drilled on new materials. Courses must be precisely taught. People who flub must be crammed until they don't. And those who still flub must be retreaded.

The materials when applied produce great results. When they are not applied they don't.

SO APPLY THEM!

CORRECTLY.

**C/S Series 28RA-1RA**

**USE OF QUADRUPLE DIANETICS**

With the introduction of QUADRUPLE DIANETICS the problems of how to C/S it arise.

This rule is followed:

... THE FOURTH FLOW—0—MUST BE RUN ON ALL ITEMS FORWARD FROM THE FIRST DIANETIC ITEM EVER RUN ON THE CASE IF THE PC IS QUAD AND THE FLOW 0 READS.

Where a case has already had Flows 2 and 3 run on Singles, one goes back and runs Flow 0 on those items if it reads.

Where a case has only been run on Single Flow Dianetics (Flow 1) one goes back to the first Dianetic item ever run of which record can be found and does F2, F3, F0 in that order checking the command for read before running it, and then verifying the F1.

*If you fail to "quad up" a pc and start with the first item never run on that flow and if you suddenly begin to run Quad on a pc who is Single or Triple without picking up and running the original items which were Single or Triple into Quad form, you will stir up and bypass all the charge that was on that flow originally. To suddenly begin Quad without catching the pc up is to invite catastrophe as the charge bypassed will kick the pc in the teeth, and hard.*

Example: Joe was run on Single Flow for six months. His auditor finds a new item and suddenly decides to run it Quad. Six months worth of Flow 2, Flow 3 and Flow 0 will now restim because it is bypassing that charge. The auditor's proper correction action is to indicate to the pc what has happened and catch up the missing flows on all the earlier items run THAT NOW READ.

To C/S a case for Quad Dianetics it is best to first lay out a Scientology repair, making sure the case is flying, then list out the items already run on Single and Triple. Then get them run so that all four flows are complete on each item in sequence from first to last.

This includes any LX items, former practice, drugs or any other engram running. These, like Dianetic items, are listed in their correct sequence of former running.

Then the missing flows are run if they read.

A rehab step of the flows already run is not necessary. This rehab of a flow already run to EP is usually used only when there is question about its having gone to *postulate off, F/N and VGIs (erasure)*.

In C/Sing for Quadruple one COMPLETES any flow of an item found that did not erase. This is indicated on the item list.

### DOING THE LIST

The item list is done by the auditor in his admin time for well done time credits.

All former Dianetic items ever run are listed and what flows have been run on them and to what end phenomena.

Example:

#### Engram List

3 Sept 69	Sadness (exact wording that was used)	F1
4 Sept 69	A Bored Feeling	F1 Bogged
6 Sept 69	An Apathetic Outlook	F1 Bogged
6 Nov 69	LX Agonized	F1 F2 F3
7 Nov 69	Former Therapy	F1 F2 F3 F2 Bogged
9 Nov 69	Earlier Practices	F1 Bogged
10 Nov 69	A Horrible Sadness	F1 Bogged
5 July 70	Int RD	F1 F2 F3 F3 Bogged
6 July 71	An Awful Pressure	F1 Bogged

Such a list is then handled from the earliest forward by:

- (a) Completing the bogged flow and
- (b) Completing the missing flow, if it reads.

### INT RUNDOWN

If the TA on the pc is currently high or *the pc is having Int troubles*, Int is handled before any other action is done. *The fourth flow is never suddenly introduced on Int if the pc has been run on Triples.*

The fourth flow on Int is then audited in its proper sequence when one gets to it in Quading, IF IT READS.

Note that a drug chain also makes a high TA if in existence or unflat.

### AUDITOR CHECKOUT

BEFORE RUNNING *NEW ERA* DIANETICS QUADRUPLE EVERY AUDITOR HDC, . . ., IV, VI, VII, VIII AND C/Ses MUST BE A *GRADUATE OF THE HUBBARD NEW ERA DIANETICS ... COURSE...*

### FLUBS

If any auditor has a poor record of getting Dianetics results, of bogged flows, etc., he needs a New Era Dianetics retreat. His drills and TRs are out or he is committing gross auditing errors.

Dianetics gives remarkable results only when flawlessly done.

The commands must be precisely given and *all* commands are used. It is NEVER shorted "because the pc did it."

THUS ANY NEW ERA DIANETICS AUDITOR TO. . . QUAD A *PC'S UN-RUN FLOWS MUST*:

- (A) HAVE A RECORD OF GOOD FLUBLESS *NEW ERA* DIANETIC AUDITING or
- (B) MUST HAVE A RETREAD UNDER A COMPETENT SUPERVISOR and
- (C) MUST HAVE COMPLETED THE HUBBARD *NEW ERA* DIANETICS GRADUATE (CASE SUPERVISOR) COURSE *OR HAVE CHECKED OUT FULLY ON THE QUAD ISSUES*.

#### C/Sing

Quad Dianetics, with the above, otherwise C/Ses the same as *NEW ERA DIANETICS*.

It should be realized Dianetics is its own field of C/Sing. This remains the same in Quad Dianetics.

#### PROMOTION

Quad Dianetics should be promoted only when you have Dianetic auditors, the auditors checked out and okayed to audit as above and when you *CAN DELIVER*.

IVs or VIs should be available to do the Progress Pgms and steps.

#### UPPER LEVELS

When the IVs, VIs, VIIs, VIIIs or IXs are checked out as above, they should use Quad Dianetics to handle any and all engram steps called for in general auditing.

That they are upper level auditors does not make it less necessary to do the above.

#### RESULTS

Quad Dianetics, including the rerun actions, produces some very startling new gains.

Well done Dianetics always has produced fine results.

Quad Dianetics almost doubles the gain.

#### REMEDIES

Any and all Dianetic Remedies and general technology remain in full use. They are not changed at all. Only the Zero Flow is added in each case.

Good luck.

HCO BULLETIN OF 4 APRIL 1971-1RC  
ADDITION OF 13 JANUARY 1975  
REVISED 25 JULY 1978  
REVISED 2 OCTOBER 1978  
REVISED 12 DECEMBER 1978

*(Revisions in this type style)*

**C/S Series 32RA-1RC**

**USE OF QUAD DIANETICS**

With the introduction of Quadruple Dianetics it is mandatory important urgent that one does not audit four flow items until one has brought *all* earlier Dianetic items into four flows, *checking each flow for a read, of course, before running it.*

**TRIPLE**

This also applies to Triple Dianetics. On a case where only Flow One (Single) has been run, you don't suddenly run a Triple (F1, F2, F3) such as on the LX Class VIII Lists until one has run the earliest Dn item ever run (or that can be found) on Dn Triple and then on forward on Triple up to the LX.

**QUAD**

However, one would now not bother to run only Triples forward. He would locate the earliest Single or Triple (if no Single Flow) item and run it Quadruple by now running the missing flows if *reading*.

**INT RD**

In doing an INTERIORIZATION RUNDOWN one mustn't suddenly introduce the 4th flow (F Zero).

If the case has only had Triples in Dianetics one mustn't suddenly introduce a Flow Zero on INT. The case should be done on Triple Flow INT.

THEN all earlier Dn items in sequence run are:

- (a) Listed from W/S or Folder Summaries.
- (b) Brought up to current by running in all the missing flows of Quad if *reading*.
- (c) The INT RD fourth flow is audited in when one gets to it IF IT READS.

*The moral of the story is: RUN ONLY FLOWS THAT INSTANT READ WHEN CALLED.*

**REASON**

Auditing additional flows while earlier items remain Single or Triple restimulates the missing flows and stacks them up as mass. They can make a pc uncomfortable until run.

All the missing flows (that were not run) are still potential mass.

This mass restimulates like something too late on the chain when a flow not run on earlier items is run on later items.

Auditing itself is a sort of time track. The earliest session blows the later sessions.

### FULL FLOW TABLE

Before running Quad Dianetics one makes a table of earlier items run. Like this:

### FULL FLOW TABLE

Date	Item	Flow	
		Previously Run	Must Run
2.3.62	Guf Shoulder	F1	F2, 3, 0
3.3.67	Gow in Foot	F1	F2, 3, 0
30.4.67	Chow in Chump	F1	F2, 3, 0
29.9.68	LX Anger	F1, 2, 3	F0
	LX Peeved	F1, 2, 3	F0
4.10.69	Feeling Numb	F1, 2, 3	F0
5.9.70	Int RD	F1, 2, 3	F0
9.10.70	Feeling of Goof	F1, 2, 3	F0
10.10.71	Dn Assist on Head	F1	F2, 3, 0

### FLOWS

F1 is FLOW ONE, something happening to self.

F2 is FLOW TWO, doing something to another.

F3 is FLOW THREE, others doing things to others.

F0 is FLOW ZERO, self doing something to self.

### R3RA COMMANDS

Standard R3RA commands are used on Quad Dianetics.

They are the subject of another HCOB.

### *MULTIPLE SOMATIC ITEMS*

The question will come up, do we Triple or Quad multiple somatic items.

The test is, did the flows already run go to EP when they were originally run. If they did, include them. If they didn't run exclude them.

This does not mean you omit everything that didn't run.

### REPAIR

While auditing this FULL FLOW DIANETICS you will find various chains that did not go to EP when originally run.

These are included and should be concluded to EP. This means one has to find out if they bypassed the F/N, went too early, jumped the chain, etc. Usually an L3RF assessed on that faulty action will give the answer. It is easy to take these old flubbed chains to EP unless you work at it too hard. Usually the reason they didn't is visible on the old worksheet. The auditor forgot to ask for earlier beginning or jumped the chain or tried to run it twice forgetting he'd run it before. Corny errors.

## RESULT

The result of doing a FULL FLOW DIANETIC ACTION on a case is quite spectacular. The shadowy remains of somatics blow, mass blows and the pc comes up shining.

## OFFERING FFD

Offering the public Full Flow Dianetics must include the cost of FESing, FF Table making, and C/S work since it is sometimes lengthy. The auditing can be remarkably brief. The greatest amount of time is usually spent on the C/Sing and the table making.

FFD is offered to the public in intensives as per HCOB 31 May 1971R, C/S Series 39R, STANDARD 12/2 HOUR INTENSIVE PROGRAMS. Admin time spent on C/Sing, FESing and FF Table making should be deducted from the intensive hours purchased by the pc. This must be made known to the public when purchasing the service.

When offering FFD it should be called Quadruple Dianetics—4 times more powerful than previous auditing.

A C/S must liaise with the Dissem Sec and Treasury Sec on selling it or he'll find the org is losing money doing the C/Sing and tables.

## WARNING

When doing Quadruple Dianetics on some cases it may be found that many chains are now missing or are just copies of the original. Don't be disturbed. Pc says they're gone now they're gone. Just F/N the fact and carry on with the next flow or item.

**EXPANDED GREEN FORM 40RD  
EXGF 40RD**

The Expanded Green Form 40RD is used with the Resistive Cases Assessment on a resistive case to precisely locate and solve its resistiveness.

The assessment of the resistive cases will direct the auditor to the type of the pc's resistiveness. Further assessment is then done in the section of the Expanded Green Form 40RD appropriate to what has read on the Resistive Cases Assessment and handlings are given for what has been found.

This list provides a fast and direct method for solving resistive cases.

Before using this list on any pc the auditor must have first checked out on HCOB 8 Dec 78 Iss II GREEN FORM AND EXPANDED GREEN FORM 40RD, USE OF.

**RESISTIVE CASES ASSESSMENT**

(If this assessment has just been done on the Green Form No. 40 question, it is not repeated. Go right into the Expanded Green Form 40RD assessments.)

Assess Method 5 the following resistive cases. If any item reads, go to its corresponding section on the Expanded Green Form 40RD and assess Method 5 all the items in that section. Assess the section on the Expanded Green Form 40RD that corresponds to *each* reading item.

When all sections corresponding to the reading resistive cases items are assessed you will have a full picture of the pc's resistiveness.

Then, if you have C/S okay, take up each reading section on the EXGF 40RD in the order in which they are listed below and handle reads per the instructions given.

Otherwise, return to the C/S for programming.

- A-1 WENT DIANETIC CLEAR AND NEVER ATTESTED \_\_\_\_\_
- A-2 HAD ENGRAMS RUN AFTER BEING DIANETIC CLEAR \_\_\_\_\_
- B DOESN'T WANT AUDITING \_\_\_\_\_
- C AUDITED WITH RUDIMENTS OUT \_\_\_\_\_
- D OVERWHELMED \_\_\_\_\_
- E CONTINUOUSLY COMMITTING OVERTS ON SCIENTOLOGY \_\_\_\_\_
- F-1 SUPPRESSED \_\_\_\_\_
- F-2 CONNECTED TO AN ANTAGONISTIC PERSON \_\_\_\_\_
- G SERIOUSLY PHYSICALLY ILL \_\_\_\_\_

- H HAS NOT HAD AUDITING \_\_\_\_\_
- I-1 SEEKING THE SAME THRILL ATTAINED FROM DRUGS \_\_\_\_\_
- I-2 HAS TAKEN DRUGS \_\_\_\_\_
- J FORMER THERAPY BEFORE SCIENTOLOGY \_\_\_\_\_
- K HAS BEEN PART OF EARLIER PRACTICES \_\_\_\_\_
- L-1 OUT OF VALENCE \_\_\_\_\_
- L-2 ARE YOU BEING SOMEONE ELSE \_\_\_\_\_
- M PRETENDING TRAINING OR GRADES NOT ATTAINED \_\_\_\_\_
- N AUDITED WITH PRIOR GRADES OUT \_\_\_\_\_
- O MISUNDERSTOODS IN AUDITING \_\_\_\_\_

SECTION A—WENT DIANETIC CLEAR AND  
NEVER ATTESTED

If item A-1 reads, Date/Locate. If item A-2 reads, 2WC to F/N and return to the C/S.

SECTION B—DOESN'T WANT AUDITING

- B-1 DO YOU NOT WANT AUDITING? \_\_\_\_\_  
2WC to find out why not. It will be an out-rud or an out-list.  
Handle appropriately.
- B-2 ARE YOU REFUSING AUDITING? \_\_\_\_\_  
2WC to find out why. It will be an out-rud or an out-list. Handle  
appropriately.
- B-3 ARE YOU PROTESTING AUDITING? \_\_\_\_\_  
Itsa E/S itsa to F/N.
- B-4 DO YOU DISLIKE TALKING TO AN AUDITOR? \_\_\_\_\_  
If so, run "Look at me. Who am I?" to F/N. Then "What could  
you say?" to F/N.
- B-5 HAS NO ONE ASKED WHAT YOU REALLY WANT? \_\_\_\_\_  
Itsa E/S itsa to F/N.
- B-6 HAS THERE BEEN ANYTHING WRONG WITH F/NS? \_\_\_\_\_  
Find the fault and handle with false TA HCOBs. Rehab any  
overruns due to false TA.

SECTION C—AUDITED WITH RUDIMENTS OUT

- C-1 HAVE YOU BEEN AUDITED WITH RUDIMENTS OUT? \_\_\_\_\_  
Find out which and handle to F/N.
- C-2 HAVE YOU BEEN AUDITED OVER AN ARC BREAK? \_\_\_\_\_  
ARCU CDEINR E/S to F/N.
- C-3 HAVE YOU BEEN AUDITED OVER A PROBLEM? \_\_\_\_\_  
Itsa E/S itsa to F/N.
- C-4 HAVE YOU BEEN AUDITED OVER A WITHHOLD? \_\_\_\_\_  
What was the withhold? Who missed it? E/S to F/N.
- C-5 HAVE YOU BEEN AUDITED OVER AN OVERT? \_\_\_\_\_  
What was the overt? E/S overt to F/N.

- C-6 ARE YOU LYING TO PEOPLE? \_\_\_\_\_  
Itsa E/S itsa to F/N.
- C-7 DO YOU HAVE SECRETS? \_\_\_\_\_  
2WC what secrets E/S to F/N.
- C-8 ARE YOU HERE FOR REASONS NOT DISCLOSED? \_\_\_\_\_  
If so, L&N “What was your original reason for coming here?”  
R3RA Triple or Quad if an evil purpose. Program for EX DN. (On  
a Clear, OT or Dianetic Clear, do the L&N step only.)
- C-9 DO YOU HAVE AN EVIL PURPOSE? \_\_\_\_\_  
L&N “What evil purpose do you have?” R3RA Triple or Quad.  
Program for EX DN. (On a Clear, OT or Dianetic Clear, do the  
L&N step only.)

#### SECTION D—OVERWHELMED

- D-1 HAVE YOU BEEN OVERWHELMED BY AUDITING? \_\_\_\_\_  
Run out the incident of overwhelm R3RA Narrative Triple or Quad.  
(On Flow 1, acknowledge what the pc says and continue with R3RA  
Narrative commands 2-9 A-EYE.)
- F2: Return to the time you caused another to be overwhelmed  
by auditing and tell me when you are there.
- F3: Return to the time others caused others to be overwhelmed  
by auditing and tell me when you are there.
- F0: Return to the time you caused yourself to be overwhelmed  
by auditing and tell me when you are there.  
( Progress Program . )
- (On a Clear, OT or Dianetic Clear 2WC for data and use the appropriate  
correction list to locate and indicate the bypassed charge )
- D-2 HAVE YOU BEEN OVERWHELMED BY LIFE? \_\_\_\_\_  
Handle as in D-1 with Narrative R3RA Triple or Quad, substituting  
“by life.” (Progress Program.) 2WC and the appropriate  
correction list on Clears and above.
- D-3 HAVE YOU BEEN OVERWHELMED BY FAMILY  
CONNECTIONS ? \_\_\_\_\_  
Handle as in D-1 with Narrative R3RA Triple or Quad, substituting  
“by family connections.” (Progress Program.) 2WC and the  
appropriate correction list on Clears and above.
- D-4 HAVE YOU BEEN OVERWHELMED ON YOUR POST? \_\_\_\_\_  
(ON YOUR JOB?)  
Handle as in D-1 with Narrative R3RA Triple or Quad, substituting  
“on your post” or “on your job” whichever is appropriate and  
has read. (Progress Program.) 2WC and the appropriate correction  
list on Clears and above.
- D-5 ARE YOU RESTIMULATED IN YOUR CURRENT  
ENVIRONMENT? \_\_\_\_\_  
Run out the time he felt restimulated in his environment R3RA  
Narrative Triple or Quad. (Progress Program.) 2WC and the  
appropriate correction list on Clears and above.

#### SECTION E—CONTINUOUSLY COMMITTING OVERTS ON SCIENTOLOGY

- E-1 ARE YOU CONTINUOUSLY COMMITTING OVERTS ON  
SCIENTOLOGY? \_\_\_\_\_  
L&N “What are you trying to prevent?” R3RA Triple/Quad  
preventing (item). 2WC committing continuous overts and pull  
them, E/S to F/N. On a Clear, OT or Dianetic Clear the handling is:  
L&N “What are you trying to prevent?” 2WC committing  
continuous overts and pull them, E/S to F/N.

E-2 DO YOU KEEP ON GOOFING? \_\_\_\_\_  
Handle as in E-1.

E-3 ARE YOU COMMITTING CONTINUOUS OVERTS IN LIFE? \_\_\_\_\_  
Handle as in E-1.

SECTION F—SUPPRESSED  
CONNECTED TO AN ANTAGONISTIC PERSON

F-1 ARE YOU CONNECTED TO SOMEONE HOSTILE OR \_\_\_\_\_  
ANTAGONISTIC TO SCIENTOLOGY?  
PTS interview. C/S to program as needed for further PTS handling.

F-2 ARE OTHERS ANTAGONISTIC TO WHAT YOU ARE DOING? \_\_\_\_\_  
PTS interview. C/S to program as needed for further PTS handling.

F-3 HAVE YOU BEEN SUPPRESSED BY ANOTHER? \_\_\_\_\_  
2WC to F/N. C/S to program as needed for further PTS handling.

F-4 DO YOU MAKE GAINS AND THEN LOSE THEM? \_\_\_\_\_  
PTS interview. C/S to program as needed for further PTS handling.

F-5 DO YOU RECEIVE GAINS OR BENEFITS FROM BEING ILL \_\_\_\_\_  
OR DISABLED?  
2WC to F/N. Return to C/S.

SECTION G—SERIOUSLY PHYSICALLY ILL

G-1 ARE YOU SERIOUSLY PHYSICALLY ILL? \_\_\_\_\_  
2WC to find out what the illness or symptoms are. Return the folder  
to the C/S. Program per HCOB 24 Jul 69R SERIOUSLY ILL PCs  
and BTB 28 May 74RB FULL ASSIST CHECKLIST FOR  
INJURIES AND ILLNESSES.

G-2 IS YOUR BODY ILL? \_\_\_\_\_  
2WC “What seems to be wrong with your body?” to F/N. Program  
per BTB 28 May 74RB FULL ASSIST CHECKLIST FOR  
INJURIES AND ILLNESSES.

G-3 ARE YOU MENTALLY ILL? \_\_\_\_\_  
Handle as a withhold. E/S “Is there an earlier time you were  
mentally ill?” to F/N. R3RA Narrative Triple/Quad. Then do a full  
preassessment on it.

G-4 DO YOU HAVE ANY BROKEN BONES? \_\_\_\_\_  
2WC to F/N. Medical treatment followed by a program per BTB 28  
May 74RB FULL ASSIST CHECKLIST FOR INJURIES AND  
ILLNESSES .

G-5 DO YOU HAVE ANY INFECTIOUS DISEASE? \_\_\_\_\_  
2WC to get the data on what it is to F/N. Medical treatment followed  
by a program per BTB 28 May 74RB FULL ASSIST CHECKLIST  
FOR INJURIES AND ILLNESSES.

G-6 DO YOU HAVE ANY HIDDEN ILLNESSES? \_\_\_\_\_  
2WC to F/N. Program per BTB 28 May 74RB FULL ASSIST  
CHECKLIST FOR INJURIES AND ILLNESSES.

G-7 DO YOU HAVE ANY TOOTH DECAY? \_\_\_\_\_  
2WC to F/N. Dental treatment followed by a program per BTB 28  
May 74RB FULL ASSIST CHECKLIST FOR INJURIES AND  
ILLNESSES .

G-8 DO YOU HAVE ANY PHYSICALLY DAMAGED PARTS? \_\_\_\_\_  
2WC to find out what, to F/N. Program per BTB 28 May 74RB  
FULL ASSIST CHECKLIST FOR INJURIES AND ILLNESSES.

- G-9 DO YOU HAVE ANY BODY PARTS MISSING? \_\_\_\_\_  
 2WC to find out what, to F/N. Program per BTB 28 May 74RB  
 FULL ASSIST CHECKLIST FOR INJURIES AND ILLNESSES.
- G-10 HAVE YOU HAD ANY BODY PARTS REMOVED? \_\_\_\_\_  
 2WC to find out what, to F/N. Program per BTB 28 May 74RB  
 FULL ASSIST CHECKLIST FOR INJURIES AND ILLNESSES.

SECTION H—HAS NOT HAD AUDITING

- H-1 HAVE YOU NOT HAD AUDITING? \_\_\_\_\_  
 L&N “Who or what would prevent auditing?” Triple or Quad ruds  
 and overts on the item.
- H-2 HAVE YOU BEEN SELF-AUDITING? \_\_\_\_\_  
 2WC to find out when the pc first started self-auditing. Do an L1C  
 on the prior upset. If the prior upset was in auditing, use the  
 appropriate correction list.
- H-3 HAVE YOU BEEN AUDITED IN AN EARLIER LIFE? \_\_\_\_\_  
 2WC to F/N. C/S to program to handle any overrun or other diffi-  
 culties with past auditing, if needed.

SECTION I—SEEKING THE SAME THRILL  
 ATTAINED FROM DRUGS  
 HAS TAKEN DRUGS

- I-1 ARE YOU SEEKING THE SAME THRILL ATTAINED FROM \_\_\_\_\_  
 DRUGS?  
 2WC to F/N. (E/S if needed “Is there an earlier time you were seek-  
 ing the same thrill attained from drugs?”) Advance Program for a  
 Drug RD or to complete it. (On Clears, OTs and Dianetic Clears,  
 indicate the item. Do no further handling.)
- I-2 HAVE YOU TAKEN DRUGS? \_\_\_\_\_  
 2WC to F/N. If pc has had his Drug RD do a Drug RD Repair List.  
 L3RF if needed. Advance Program for a Drug RD or to complete  
 it. (On Clears, OTs and Dianetic Clears, handle as in I-1.)
- I-3 DO YOU WANT TO CONTINUE TO TAKE DRUGS? \_\_\_\_\_  
 2WC to F/N. If pc has had his Drug RD do a Drug RD Repair List.  
 L3RF if needed. Advance Program for a Drug RD or to complete  
 it. (On Clears, OTs and Dianetic Clears, handle as in I-1.)
- I-4 HAVE YOU NEVER TAKEN DRUGS? \_\_\_\_\_  
 2WC to F/N. (E/S if needed “Is there an earlier time you never took  
 drugs?”)
- I-5 ARE YOU CURIOUS ABOUT DRUGS? \_\_\_\_\_  
 2WC to F/N. (E/S if needed “Is there an earlier time you were  
 curious about drugs?”)
- I-6 HAS MEDICINE ACTED AS DRUGS? \_\_\_\_\_  
 2WC to F/N. If pc has had a Drug RD do a Drug RD Repair List.  
 L3RF if needed. Advance Program to handle all reading drugs,  
 medicine and alcohol with a full Drug RD or to complete it. (On  
 Clears, OTs and Dianetic Clears, handle as in I-1.)
- I-7 HAVE YOU DRUNK ALCOHOL? \_\_\_\_\_  
 2WC to F/N If pc has had a Drug RD do a Drug RD Repair List.  
 L3RF if needed. Advance Program for a Drug RD or to complete  
 it. (On Clears, OTs and Dianetic Clears, handle as in I-1.)

SECTION J—FORMER THERAPY BEFORE SCIENTOLOGY

(If any item in this section reads on a Clear, OT or Dianetic Clear, indicate the reading item, let the person tell you about it if he wishes, and indicate the F/N. Do no further handling.)

- J-1 HAVE YOU HAD A FORMER THERAPY BEFORE SCIENTOLOGY?  
Narrative R3RA Triple or Quad on having a former therapy. \_\_\_\_\_
- F1: Return to the time you had a former therapy and tell me when you are there.
- F2: Return to the time you gave a former therapy to another and tell me when you are there.
- F3: Return to the time others gave a former therapy to others and tell me when you are there.
- F0: Return to the time you gave a former therapy to yourself and tell me when you are there.
- J-2 HAVE YOU HAD MEDICAL THERAPY?  
Narrative R3RA Triple or Quad, as in J-1, substituting “medical therapy.” \_\_\_\_\_
- J-3 HAVE YOU HAD PSYCHIATRIC THERAPY?  
Narrative R3RA Triple or Quad, as in J-1, substituting “psychiatric therapy.” \_\_\_\_\_
- J-4 HAVE YOU HAD PSYCHOLOGY THERAPY?  
Narrative R3RA Triple or Quad, as in J-1, substituting “psychology therapy.” \_\_\_\_\_
- J-5 HAVE YOU HAD DENTAL THERAPY?  
Narrative R3RA Triple or Quad, as in J-1, substituting “dental therapy.” \_\_\_\_\_
- J-6 HAVE YOU HAD ELECTRIC SHOCK?  
2WC to F/N. Return to C/S for okay to run out the electric shock  
Narrative R3RA Triple or Quad, as in J-1, followed by a preassessment of the electric shock. \_\_\_\_\_

SECTION K—HAS BEEN PART OF EARLIER PRACTICES

(If any item in this section reads on a Clear, OT or Dianetic Clear, indicate the reading item, let the person tell you about it if he wishes, and indicate the F/N. Do no further handling.)

- K-1 ARE YOU CURRENTLY DOING ANY BODY PRACTICES?  
Narrative R3RA Triple or Quad on body practices. \_\_\_\_\_
- F1: Return to the time you took part in body practices and tell me when you are there.
- F2: Return to the time you caused another to take part in body practices and tell me when you are there.
- F3: Return to the time others caused others to take part in body practices and tell me when you are there.
- F0: Return to the time you caused yourself to take part in body practices and tell me when you are there.
- K-2 ARE YOU CURRENTLY DOING ANY EXERCISES?  
Narrative R3RA Triple or Quad, as in K-1, substituting “exercises.” \_\_\_\_\_
- K-3 ARE YOU CURRENTLY PRACTICING ANY RITES?  
Narrative R3RA Triple or Quad, as in K-1, substituting “rites.” \_\_\_\_\_
- K-4 ARE YOU CURRENTLY PRACTICING YOGA?  
Narrative R3RA Triple or Quad, as in K-1, substituting “yoga.” \_\_\_\_\_
- K-5 DO YOU HOLD ANY EASTERN BELIEFS?  
Narrative R3RA Triple or Quad, as in K-1, substituting “eastern beliefs.” \_\_\_\_\_
- K-6 ARE YOU DOING ANY MENTAL EXERCISES? \_\_\_\_\_

- Narrative R3RA Triple or Quad, as in K-1, substituting “mental exercises . “
- K-7 DO YOU CURRENTLY PRACTICE MEDITATION? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “meditation.”
- K-8 HAVE YOU TAKEN PART IN EARLIER PRACTICES BEFORE SCIENTOLOGY? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier practices before Scientology.”
- K-9 HAVE YOU TAKEN PART IN EARLIER RELIGIONS? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier religions.”
- K-10 HAVE YOU TAKEN PART IN EARLIER RITES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier rites.”
- K-11 HAVE YOU TAKEN PART IN EARLIER EXERCISES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier exercises.”
- K-12 HAVE YOU TAKEN PART IN HYPNOTISM? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “hypnotism.”
- K-13 HAVE YOU HELD EASTERN BELIEFS? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “eastern beliefs . “
- K-14 HAVE YOU TAKEN PART IN EARLIER INDOCTRINATIONS? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier indoctrinations . “
- K-15 HAVE YOU TAKEN PART IN EARLIER SCIENTIFIC PRACTICES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier scientific practices.”
- K-16 HAVE YOU TAKEN PART IN EARLIER ELECTRONIC PRACTICES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier electronic practices.”
- K-17 HAVE YOU TAKEN PART IN EARLIER THOUGHT PRACTICES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier thought practices.”
- K-18 HAVE YOU TAKEN PART IN EARLIER SPIRITUAL PRACTICES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier spiritual practices.”
- K-19 HAVE YOU TAKEN PART IN EARLIER EASTERN RITES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier eastern rites.”
- K-20 HAVE YOU TAKEN PART IN EARLIER EASTERN PRACTICES? \_\_\_\_\_  
 Narrative R3RA Triple or Quad, as in K-1, substituting “earlier eastern practices.”
- K-21 HAVE YOU TAKEN PART IN EARLIER IMPLANTING TECHNIQUES? \_\_\_\_\_

Narrative R3RA Triple or Quad, as in K-1, substituting “earlier implanting techniques.”

K-22 HAVE YOU PRACTICED WITCHCRAFT? \_\_\_\_\_  
Narrative R3RA Triple or Quad on practicing witchcraft.

- F1: Return to the time you had witchcraft practiced on you and tell me when you are there.
- F2: Return to the time you practiced witchcraft on another and tell me when you are there.
- F3: Return to the time others practiced witchcraft on others and tell me when you are there.
- F0: Return to the time you practiced witchcraft on yourself and tell me when you are there.

K-23 HAVE YOU CAST SPELLS? \_\_\_\_\_  
Narrative R3RA Triple or Quad on using spells.

- F1: Return to the time a spell was used on you and tell me when you are there.
- F2: Return to the time you used a spell on another and tell me when you are there.
- F3: Return to the time others used spells on others and tell me when you are there.
- F0: Return to the time you used a spell on yourself and tell me when you are there.

K-24 ARE YOU DOING SOME EXERCISE BETWEEN SESSIONS? \_\_\_\_\_  
Narrative R3RA Triple or Quad, as in K-1, substituting “exercises.”

SECTION L—OUT OF VALENCE  
ARE YOU BEING SOMEONE ELSE

If items L-1 or L-2 read, the handling is LX3, LX2, LX1 and 220H if necessary.

Ref: HCOB 2 Aug 69R “LX” LISTS  
HCOB 5 Nov 69R V LX3 (ATTITUDES)  
HCOB 3 Aug 69R LX2 (EMOTIONAL ASSESSMENT LIST)  
HCOB 9 Aug 69R LX1 (CONDITIONS)  
HCOB 20 Sep 78 II LX LIST HANDLING

(If one of these items read on a Clear, OT or Dianetic Clear, indicate the item, let the person tell you about it if he wishes, and indicate the F/N. Do no further handling.)

SECTION M—PRETENDING TRAINING OR GRADES  
NOT ATTAINED

(If any item in this section reads on a Clear, OT or Dianetic Clear, indicate the reading item, let the person tell you about it if he wishes, and indicate the F/N.)

M-1 ARE YOU PRETENDING? \_\_\_\_\_  
Narrative R3RA Triple or Quad on pretending.

- F1: Return to the time another pretended to you and tell me when you are there.
- F2: Return to the time you pretended to another and tell me when you are there.
- F3: Return to the time others pretended to others and tell me when you are there.
- F0: Return to the time you pretended to yourself and tell me when you are there.

M-2 ARE YOU PRETENDING TRAINING NOT ATTAINED? \_\_\_\_\_  
Narrative R3RA Triple or Quad on pretending as in M-1.

M-3 ARE YOU PRETENDING ATTAINMENTS IN LIFE NOT REALLY ATTAINED? \_\_\_\_\_

Narrative R3RA Triple or Quad on pretending as in M-1.

M-4 ARE YOU PRETENDING GRADES NOT ATTAINED? \_\_\_\_\_  
Narrative R3RA Triple or Quad on pretending as in M-1.

SECTION N—AUDITED WITH PRIOR GRADES OUT

N-1 HAVE YOU BEEN AUDITED WITH PRIOR GRADES OUT? \_\_\_\_\_  
2WC to find out what grades the pc feels are out. Indicate it. If no F/N, “Is there an earlier time you were audited over that/those out-grade(s)?” Note for C/S.

N-2 IS YOUR DIANETICS INCOMPLETE? \_\_\_\_\_  
2WC to F/N. Note for C/S.

N-3 DO ENGRAMS FAIL TO ERASE? \_\_\_\_\_  
L3RF Rundown. (R-Factor: “We are looking for engrams contacted in your early auditing and not fully handled.” Assess L3RF Method 5 with the preface “In your early Dianetics ?” Handle with R3RA over and over until the entire list F/Ns )

(On a Clear, OT or Dianetic Clear, indicate the read If no F/N you may do an L3RF if needed, however do no handling beyond indicating the reading questions, to F/N.)

N-4 IS YOUR COMMUNICATION GRADE OUT? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade 0

N-5 IS YOUR PROBLEMS GRADE OUT? \_\_\_\_\_  
2WC to F/N Program for Expanded or Quad Grade I.

N-6 IS YOUR OVERT/WITHHOLD GRADE OUT? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade II.

N-7 DO YOU HAVE PERSISTING ARC BREAKS? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade III.

N-8 ARE YOU ANXIOUS ABOUT CHANGE? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade III.

N-9 DO YOU HAVE SERVICE FACSIMILES? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade IV.

N-10 DO YOU HAVE FIXED IDEAS? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade IV.

N-11 ARE YOU CONCERNED ABOUT BEING RIGHT OR WRONG? \_\_\_\_\_  
2WC to F/N. Program for Expanded or Quad Grade IV.

N-12 HAVE YOU FAILED TO ATTAIN OTHER GRADES? \_\_\_\_\_  
2WC to F/N. Note for C/S.

N-13 HAVE WINS ON GRADES BEEN BYPASSED? \_\_\_\_\_  
Rehab each to F/N.

SECTION O—MISUNDERSTOODS IN AUDITING

O-1 HAVE YOU HAD MISUNDERSTOODS IN AUDITING? \_\_\_\_\_  
Find and clear the misunderstands or do a WCCL prefaced with “In auditing.” Dianetic C/S-1 and/or Scientology C/S-1 if needed.

O-2 HAVE YOU HAD TROUBLE UNDERSTANDING WHAT WAS GOING ON IN A SESSION? \_\_\_\_\_  
Clear this up with Word Clearing on the action that wasn’t understood. Dianetic C/S-1 and/or Scientology C/S-1 if needed.

O-3 HAVE YOU HAD TROUBLE UNDERSTANDING AN AUDITOR? \_\_\_\_\_

2WC to F/N. Handle any MUs with Word Clearing on the area the pc didn't understand. Dianetic C/S-1 and/or Scientology C/S-1 if needed.

O-4 HAVE YOU HAD TROUBLE IN AUDITING BECAUSE OF MISUNDERSTOODS? \_\_\_\_\_

Find the misunderstands and clear them up.

Note what actions were done over misunderstood words and handle with the proper repair list if needed. Dianetic C/S-1 and/or Scientology C/S-1 if needed.

SCIENTOLOGY III

**AUDITING BY LISTS**

(Note: We now F/N everything. We do NOT  
tell the pc what the meter is doing. This  
changes "Auditing By Lists" in both respects.  
We do not say to the pc. "That's clean" or  
"that reads.")

Ref: HCOB 14 Mar 71 F/N EVERYTHING  
HCOB 4 Dec 77 CHECKLIST FOR  
SETTING UP SESSIONS  
AND AN E-METER  
HCOB 24 Jan 77 TECH CORRECTION  
ROUND-UP  
HCOB 7 Feb 79R E-METER DRILL 5RA CAN SQUEEZE  
HCOB 8 Dec 78II GREEN FORM AND EXPANDED GREEN FORM  
40RD, USE OF

Use any authorized published LIST. (Green Form for general review, L1C for  
ARC Brks, L4BRA for *list errors*.)

METHOD 3

*Set the sensitivity for 1/3 of a dial drop on a correct can squeeze per E-Meter Drill  
5RA (Reference: HCOB 7 Feb 79R E-METER DRILL 5RA CAN SQUEEZE).*

Have your meter in a position (line of sight) so you can see the list and the needle  
or you can see the needle and the pc. The meter position is important.

Hold the mimeoed list close beside the meter. Have your worksheet more to the  
right. Keep record on your worksheet. Mark the pc's name and date on it. Mark what  
list it is on the W/S with time. It remains in the folder stapled to the W/S.

Read the question on the list, note if it reads. Do NOT read it while looking at the  
pc, do NOT read it to yourself and then say it while looking at the pc. These are the  
L10 actions and are called Method 6, not Method 3. It is more important to see the pc's  
cans than his face as can fiddle can fake or upset reads.

TR 1 must be good so the pc clearly hears it.

You are looking for an INSTANT READ that occurs at the end of the exact last  
syllable of the question.

If it does not read, mark the list X. If the list is being done through an F/N and  
the F/N just continues, mark the question F/N.

If the question reads, do *not* say “That reads.” Mark the read at once (tick, SF, F, LF, LFBD, R/S), transfer the number of the Q to the W/S and look expectantly at the pc. You can repeat the Q by just saying it again if pc doesn’t begin to talk. He has probably already begun to answer as the Q was live in his bank as noted by the meter.

Take down the pc’s remarks in shortened form on the W/S. Note any TA changes on the W/S.

If the pc’s answer results in an F/N (cog VGIs sometimes follow, GIs always accompany a real F/N), mark it rapidly on the W/S and say, “Thank you. I would like to indicate your needle is floating.”

Do NOT wait endlessly for the pc to say more. If you do he will go into doubt and find more, also do NOT chop what he is saying. Both are TR errors that are very bad.

If there is no F/N, at the first pause that looks like the pc thinks he has said it, ask for an earlier similar whatever the question concerned. Do NOT change the Q. Do NOT fail to repeat what the question is. “Was there an earlier similar restimulation of ‘rejected affinity’?” This is the “E/S” part of it. You do *not* leave such a question merely “clean.”

It does not matter now if you look at the pc when you say it or not. But you can look at the pc when you say it.

The pc will answer. If he comes to a “looks like he thinks he said it” and no F/N, you ask the same Q as above.

You ask this Q “Was there an earlier similar “ until you finally get an F/N and GIs. You indicate the F/N.

That is the last of that particular question.

You mark “F/N” on the list and call the next question on the list. You call this and other questions without looking at the pc.

Those that do not read, you X as out.

The next question that reads, you mark it on the list, transfer the question number to the W/S.

Take the pc’s answer.

Follow the above E/S procedure as needed until you get an F/N and GIs for the question. Ack. Indicate and return to the mimeoed list.

You keep this up until you have done the whole list in this fashion.

If you got no read on the list question but the pc volunteers some answer to an unreading question, do NOT take it up. Just ack and carry on with your mimeoed list.

BELIEVE YOUR METER. Do not take up things that don’t read. Don’t get “hunches.” Don’t let the pc run his own case by answering nonreading items and then the auditor taking them up. Also don’t let a pc “fiddle the cans” to get a false read or to obscure a real one. (Very rare but these two actions have happened.)

## BIG WIN

If halfway down a prepared list (the last part not yet done) the pc on some question gets a wide F/N, big cog, VGIs, the auditor is justified in calling the list complete and going to the next C/S action or ending the session, *except in the case*

where an F/Ning list is C/Sed for, e.g. C/S 53RL. The auditor does not violate C/S Series 20 PERSISTENT F/N. If he is intending to F/N the list, and the pc is on a big win, the auditor would end off, let the pc have his win, and then in another later session, continue with the list.

There are two reasons for this—one, the F/N will usually just persist and can't be read through and further action will tend to invalidate the win.

The auditor can also carry on to the end of the prepared list if he thinks there may be something else on it, if *it does not violate C/S Series 20 PERSISTENT F/N*.

### GF AND METHOD 3

When a GF is taken up Method 3 (item by item, one at a time) *one ends it at the first F/N (Reference: HCOB 8 Dec 78 II GREEN FORM AND EXPANDED GREEN FORM 40RD, USE OF)*. If the auditor were to continue, it can occur that the TA will go suddenly high. The pc feels he is being repaired, that the clearing up of the first item on the GF handled it and protests. It is the protest that sends the TA up.

Thus a GF is best done by Method 5 (once through for reads, then the reads handled) .

L1C, L3RF, L7 and other such lists are best done Method 3.

The above steps and actions are exactly how you do Auditing by List today. Any earlier data contrary to this is canceled. Only 2 points change—we F/N everything that reads by E/S or a process to handle (L3RF requires processes, not E/S to get an F/N) or *else check for false read if the pc shows manifestations of this*, and we never tell the pc that it read or didn't read, thus putting his attention on the meter.

We still indicate F/Ns to the pc as a form of completion.

L1C and Method 3 are NOT used on high or very low TAs to get them down or up.

The purpose of these lists is to clean up bypassed charge.

An auditor also indicates when he has finished with the list.

An auditor should dummy drill this action both on a doll and bullbait.

The action is very successful when precisely done.

<i>Issue I</i>	RUNDOWNS
Rev. 31.1.79	

A person who has been on drugs is one of the “seven types of resistive cases.”  
(These types are found on the Scientology Green Form No. 40.)

A person who has been on drugs, alcohol or medicines seldom runs on any other type of engram, seldom goes backtrack well, and is subject to somatic, emotional and perceptic shut-offs making any other type of Dianetic running a vain activity.

Drugs since 1962 have been in very widespread use. Before then they were rare. A worldwide spread of drugs occurred. A large percentage of people became and are drug takers.

By drugs (to mention a few) are meant—tranquilizers, opium, cocaine, marijuana, peyote, amphetamine and the psychiatrist's gifts to Man, LSD and Angel Dust, which are the worst. Any medical drugs are included. Drugs are drugs. There are thousands of trade names and slang terms for these drugs.

ALCOHOL is included as a drug and receives the same treatment in auditing.

By alcohol (to mention a few) is meant whiskey beer, wine, vodka, rum, gin, etc.—in other words any fermented or distilled liquor or drink of any kind or fumes of such with some percentage of alcohol content.

Drugs are supposed to do wonderful things but all they really do is ruin the person.

Even someone off drugs for years still has “blank periods.” The abilities to concentrate or to balance are injured.

The moral part of it has nothing to do with auditing. The facts are that:

- (a) People who have been on drugs can be a liability until the condition is handled in auditing.
- (b) A former drug user is a resistive case that does not make stable gains until the condition is handled.
- (c) Auditing is the only successful means ever developed for handling drug damage.

#### DRUG ENGRAMS

People who have been on drugs are sometimes afraid of running engrams.

In fact, it is almost a way to detect a “druggie.”

The drugs, particularly LSD and even sometimes antibiotics or other medicines to which the person has an allergy, can turn on whole track pictures violently.

These tend to overwhelm the person and make him feel crazy. Some of these people are afraid to confront the bank again.

If a person “doesn't like Dianetics” and doesn't want to be run on engrams, it is necessary to put him through the Hard TRs Course and Objectives. If Dianetics *has* been run but poorly, it should of course be repaired fully with an L3RF (list used to correct Dianetic errors). But if the person still flinches, the Hard TRs Course and Objectives successfully completed will handle.

#### THOSE ON DRUGS

Objective Processes are numerous. It may be necessary to run these on a person still on drugs and even put the person through a Hard TRs Course to get the person off drugs. Doing this usually avoids the painful “withdrawal symptoms,” particularly present in coming off heroin or psychiatric “treatment” drugs. (Note, some persons have been put on some therapeutic drug by an M.D.—such as insulin and possibly should remain on it until well advanced into auditing. But these are not the usual drug. It is up to the pc, the auditor and the doctor what should be done in such cases. Tranquilizers are not acceptable, however.)

#### DONE FIRST

Drugs are done *first*.

Why? Because drugs make a resistive case! Other Dianetic actions and Scientology as well will get loses if drugs are not handled first.

Any current Dianetic case failures are from flubby Dianetic auditing or the person has been on drugs or alcohol which were not handled by Dianetics.

It hasn't harmed anyone to omit drug handling. But it made it hard or impossible to get stable case gain.

THUS ANY DIANETIC PC WHO HAS HAD DRUG HANDLING OMITTED MUST BE RUN ON DRUGS AS SOON AS POSSIBLE BEFORE MORE AUDITING IS GIVEN.

I repeat, drugs or alcohol in most instances make a resistive case so the point must be handled before the case will attain and hold case gain.

ANY PC WHO IS NOT MAKING IT IN AUDITING SHOULD BE CHECKED FOR A DRUG OR ALCOHOL HISTORY.

### DISCOVERY

In investigating a series of cases who were not making it. I found in each one that the person had been on drugs or alcohol and that drugs or the alcohol had not been run out.

Drug data was not covered fully enough in the Dianetics pack. Only Prior Assessment to Drugs was given.

Thus I have found several Dianetic pcs were only run on the Prior Assessment to Drugs. This is not good enough as it is only a partial handling.

### FULL DRUG RUNDOWN

Here is the full New Era Dianetics Drug Rundown.

0. The Original Assessment Sheet. Ask the pc each question on the Original Assessment Sheet. Mark all reads. Make sure you get specific and complete answers to your questions.

*NOTE:* On Item E, do not ask the pc for whole track drugs. You want only drugs medicine or alcohol he has taken this lifetime.

1. Objective ARC.

(Ref: HCOB 19 Jun 78 New Era Dianetics Series 3, OBJECTIVE ARC.)

2. Sweat Out Program if LSD or Angel Dust has been taken. This step can be done concurrently with other drug handling.

(Ref: HCOB 30 Apr 78 SWEAT PROGRAM FURTHER DATA  
HCOB 6 Feb 78R LSD AND THE SWEAT PROGRAM  
HCOB 6 Feb 78R-1 LSD AND THE SWEAT PROGRAM ADDITION )

3. A battery of Objective Processes. This includes CCHs 1-10, SCS on an Object and SCS.

(SOP 8C and Op Pro by Dup are included in later steps of the Drug Rundown.)

4. Hard TRs Course for ex-drug users or alcoholics. A Hard TRs Course consists of TRs 0-9.

Ref: HCOB 16 Aug 71R TRAINING DRILLS REMODERNIZED  
HCOB 7 May 68 UPPER INDOC TRs  
BPL 18 Sep 78 NEW ERA DIANETICS HARD TRs COURSE)

5. Full Dianetic C/S-1 to educate the pc so he fully understands Dianetic procedure and is able and willing to be audited successfully.

(Ref: HCOB 9 Jul 78 DIANETIC C/S-1 )

6. Narrative Handling on Drugs—First.

All drugs, medicine and alcohol which the pc has taken in this lifetime have been listed on the Original Assessment Sheet.

At this point, choose the best reading drug, alcohol or medicine from the Original Assessment Sheet and run it out R3RA Quad Narrative. (For example: “Return to the time you took whiskey and tell me when you are there.”)

YOU DO NOT CHECK INTEREST ON DRUG ITEMS.

RUN OUT EACH READING DRUG, ALCOHOL OR MEDICINE ON THE DRUG LIST (IN ORDER OF READ) BY R3RA QUAD NARRATIVE *FIRST*. Otherwise, you can end up spinning the pc way down the track.

In running narrative on this lifetime drug, medicine or alcohol individual items you will find that it is easier to do if you run earlier beginning and earlier incident rather than attempt to limit him to the first this lifetime incident he comes up with, as there will usually be more than one incident when he took whiskey, for example. So you always ask earlier beginning but if it is necessary you ask earlier incident with the question, “Is there an earlier incident when you took whiskey?”

Pcs commonly tend to wind up way back down the whole track at this stage of their auditing and that is not what you’re aiming for here either. What you’re interested in is this lifetime, this body. But this doesn’t mean you don’t run track on the Drug Rundown; just don’t push it. And never insist the pc run any type of chain when he says there’s nothing there.

When all reading drugs, medicines, alcohols on the list have been run to EP by R3RA Narrative Quad, go on to the next step.

7. Preassessment on Each Reading Drug, Medicine or Alcohol Taken in This Lifetime.

- A) Choose the best reading drug, alcohol or medicine from the Original Assessment Sheet and do a *preassessment* on it.

“Are (preassessment item) connected with taking (the drug, medicine or alcohol)?”

is the preassessment question.

- B) Take the best reading preassessment item off the preassessment and ask the pc:

“What (best reading preassessment item) are connected with taking (the drug, medicine, or alcohol)?”

This is the running item list question for that particular drug. You write this question at the top of the page and write down exactly what the pc said, noting any read that occurred when he said it.

- C) Take up the best reading running item (make sure you noted reads as the pc gave you the items) and run it R3RA Quad.

DO NOT CHECK INTEREST ON DRUG ITEMS.

- D) Handle all reading running items found in Step B in order of read with R3RA Quad.
- E) Using that same original drug item repeat Step A.
- F) Repeat Steps B to E.
- Fa) Using the first original item continue Steps A. B. C, D, E until the Preassessment List simply F/Ns.
- Fb) Take the next individual drug, medicine, or alcohol item that read on the original list and repeat Steps A to Fa on it until you have handled every item that read on the Original Assessment Sheet.
- G) When there are no more items unhandled on the original list that read and no further items reading, but there are some unrun original items on the list, null with Suppress and Invalidate buttons.
- H) Run any now reading items with Steps A to Fb.
- I) Use up the whole list of drugs in this way, doing the preassessment and Steps B to H on all reading drugs. Reassess the drug list. Handle per above instructions any drug which now reads. This is done until the entire drug list F/Ns when called. (Note: If, during the rundown the pc thinks of other drugs he has taken in this lifetime, add them to the original list with their reads noted, and handle them in turn according to size of read, ensuring you run them R3RA Quad Narrative *first*.)

8. The Prior Assessment.

- A) Using the drug list obtained on the Original Assessment, take up the largest reading drug, medicine or alcohol, ask the pc the following preassessment question:  
  
“Prior to taking (the best reading drug, medicine or alcohol), were there (preassessment item)?”
- B) Take the best reading preassessment item and ask:  
  
“What (preassessment item) did you have prior to taking (the drug, medicine or alcohol)?”
- C) Use full preassessment steps and run out all reading running items R3RA Quad.
- D) Reassess any remaining unrun items found in Step B to see if they now read. If they do, run them. Also check for any more items the pc has to add to the list, and mark down their reads as the pc gives them.
- E) Repeat above steps on any items that now read.
- F) When there are no more items to add and no more items reading, but there are some unrun items on the list, null with Suppress and Invalidate buttons.
- G) Run any now reading items R3RA Quad.

- H) Reassess the Preassessment List, using the drug, medicine or alcohol in Step A. Follow remaining steps until all reading items are taken to EP and there are no further reads on reassessment of the Preassessment List.
- I) Take up the next best reading drug, medicine or alcohol from Step A. Repeat Steps B to I.

The above prior assessment steps are done on each drug, medicine or alcohol that has read. They are handled in order of largest read.

9. More Objectives.

The final step of the Drug Rundown, when all above steps are fully complete. is to run another set of Objectives on the pc.

These are:

A) SOP 8C

B) OP PRO BY DUP

run in that order, each to its complete EP.

This is done to bring the pc fully into present time. and it will be a present time which he is now far better able to confront.

---

This completes the Drug Rundown.

The Sweat Out Program, if not yet complete by this time, is carried through to completion .

*(Revisions in this type style)*

***Interiorization Rundown Series 11***

URGENT

**INTERIORIZATION RUNDOWN—  
CORRECTION DRILL: DATE TO BLOW/LOCATE TO BLOW**

It *usually* happens that an Interiorization Rundown (also known as Int-Ext RD for Interiorization-Exteriorization Rundown) is—

1. Done when not necessary.
2. Is flubbed in R3RA.
3. Is overrun.

UNNECESSARY

*The Int buttons must be assessed FIRST, then any reading button or buttons cleared. If a button has read on an MU it must be cleared, then reassessed. If an Int button is validly reading, one does the Int Rundown, per HCOB 4 Jan 71R, Int RD Series 2, EXTERIORIZATION AND HIGH TA, THE INT RD REVISED.*

*(Clears, OTs and Dianetic Clears would be run instead on The End of Endless Int Repair RD as they cannot be run on Dianetics. This rundown is also well suited as a preliminary action for weak or ill pcs who may be unable to run engrams or secondaries. Ref: HCOB 24 Sept 78, Issue 1, Int RD Series 4, URGENT IMPORTANT, THE END OF ENDLESS INT REPAIR RD.)*

If there aren't any reads on the Int buttons even after Suppress, Inval, Misunderstood and False have been applied to the Int button list, one does NOT do an Int Rundown on the pc as it is unnecessary and classifies as "running an unreading item."

When this test is omitted you get an unnecessary Int RD being done on a pc.

This will eventually have to be repaired.

FLUBBED R3RA

When the auditor does not do flubless auditing, errors occur in the auditing itself. These will hang up an Int RD.

OVERRUN

It *usually* happens that an Int RD is overrun. *The EP is reached on Flow 2*, let us say. The auditor keeps on going past the win.

This will hang up the rundown.

One of the ways an overrun occurs is the pc goes exterior during it. Yet the auditor keeps on.

Another way is pc has a big cog, big win. Auditor keeps going on with the RD.

### REASON FOR ERRORS

*The Int RD is a simple and precise REMEDY which stabilizes a pc after exteriorizing and permits him to be further audited.*

*When a pc exteriorizes in session it is the end phenomena for that process or action. One gently ends off in any case. If the pc has not had an Interiorization Run-down, it is vital, in his next session, to check Int (as above) as the first action. All manner of physical and emotional upsets can result, including a high TA, if this step is omitted.*

**INT MUST BE CHECKED AS THE NEXT ACTION AFTER THE FACT OF THE PC'S FIRST EXTERIORIZATION.**

*No other auditing is to be done before Int is handled fully or proves to be uncharged upon checking.*

One reason unnecessary Int RDs get done is that the Registrar sells one. That makes the Reg a C/S. So the C/S and auditor run it.

Maybe it wasn't needed.

So if it wasn't needed it will eventually have to be repaired.

### HEADACHES

Headaches are a symptom (not *every* headache is) of a needed or an incorrect Int RD.

### CORRECTION DRILL

The following is *the* Correction Drill for an Int RD.

Ninety percent of the pcs run on Int need it.

### REQUIREMENTS

An auditor before being allowed to go near a pc Int RD correction must have:

1. Word cleared the Int RD pack.
2. Must have good TRs.
3. Must be good with a meter.
4. Must know and use the Auditor's Code.
5. *Must have completed the starrate checkouts per Int RD Series 14.*
6. **MUST DO THIS DRILL ON A DOLL UNTIL HE IS FLAWLESS.**

Then he can be trusted to do an Int RD correction.

This is the drill (written by a Class XII auditor for use on Flag):

*FAILED INT/EXT RD REPAIR  
DATE TO BLOW—LOCATE TO BLOW*

1. *By C/S or prepared list read, Int appears overrun.*
2. *Auditor: “We’re going to take a look at the subject of going into things and your Int RD.”*
3. *Auditor: “What was the first time in your auditing that you were willing to go into things? “*
4. *Auditor establishes by pc answer to above and any further 2WC if (a) a flat point exists in or as a result of auditing (or training), (b) the pc feels the Int RD is unflat (c) the pc has misunderstands on the RD, or (d) the pc never had any trouble with going in and out of things or being audited after exterior. The pc and auditor are satisfied with what they establish above.*
5. *If (a) flat point, auditor establishes what the point was. If (b) unflat, the auditor does an Int RD Correction List or L3RF, if needed. If it does turn out that the Int RD was overrun or unnecessary the auditor proceeds per this drill. If (c) misunderstands, the auditor clears them up with the pc and then finds out if it was overrun, unflat or unnecessary and handles per this drill. If (d) unnecessary, the auditor indicates it was an unnecessary action and gets an F/N.*
6. *The Int RD was overrun and the flat point has been established per Step 5. The auditor tells the pc, “We’re going to date that point in years, months, etc., ago until something blows off—some mass or energy, etc. I want you to tell me as soon as that happens. Alright?”*
7. *If the pc is confused about “blow” the auditor can do a demo by putting his hand on the pc’s arm and taking it away suddenly.*
8. *When the pc understands what’s expected of him, the auditor establishes the order of magnitude by asking the pc, “Was it years or months ago?”*
9. *The auditor gets the years, months, days, hours, minutes, seconds and fractions of seconds ago to a point when something blows and F/Ns. If the pc gives up on this only then does the auditor meter date the flat point to a blow-F/N.*
10. *If a big BD occurs and the auditor suspects a blow but the pc will not originate it, the auditor can ask the pc if it blew.*
11. *If no blow occurs the auditor verifies each part of the date and corrects where necessary to a blow-F/N. If still no blow-F/N the auditor then checks for an earlier flat point. If there is one, the auditor dates that point to a blow-F/N. If still no blow-F/N the auditor does an L3RF “On your Int RD” and handles fully.*
12. *When the date has gone to a blow-F/N and the F/N has been indicated the auditor tells the pc, “Now we’re going to spot the exact location where that flat point occurred, until something blows off. I want you to tell me when that happens. Alright?” The auditor is getting the PAST physical universe location.*
13. *The auditor clears the words stars, planet, galaxy, location, point, if this is the first time Date/Locate is being done on the pc.*
14. *When the pc understands what’s expected of him the auditor begins the Locate steps.*

15. The auditor says, “Point to that location.” The pc points with his finger until he is satisfied he has the exact direction. Then the auditor goes down the rest of the steps to a blow-F/N.

Distance?

Exact?

What galaxy?

What star?

What planet?

What country?

What city?

What street?

What house?

Position on street?

What room?

Distance from front of house?

Where in the room?

How far from *each wall*?

How far off the floor?

How far from the ceiling?

*(NOTE: This step is not rote. Use the questions that apply. For example, if it occurred “next door” you wouldn’t ask “What galaxy?”, etc.)*

16. If, while locating, the pc starts running the incident or gives too much “scene” the auditor has the pc point again then continues from where he left off on the locate steps.
17. If at some point on these steps the location turns out to be in the middle of the ocean or in a field, etc., the auditor uses available landmarks or reference points to get the location (i.e. distance from nearest point of land? or distance from the big rock?) down to a blow-F/N.
18. If no blow-F/N, the auditor verifies each *part* of the Locate step and corrects any necessary to a blow-F/N.
19. If the auditor suspects a blow but the pc doesn’t originate it, the auditor asks, “Did something blow?” If the auditor suspects he’s gone past a blow he can check “Did it blow previously?” If so and no F/N the auditor rehabs by asking the pc how long ago that happened and gets the F/N.
20. If no blow after verifying the location, or after checking for an earlier location blow, the auditor then has to do an *L3RF* “On your Int RD” and handle fully.

*NOTE: A blow is a definite manifestation and the pc must say “something blew” or “it disappeared” or “it’s gone” or “it vanished,” not “I feel lighter.”*

## IMPORTANT

*The Date/Locate steps must NOT be done robotically. One has to understand the mechanics of how it's done and why.*

*If the pc says "two years ago" on dating, one doesn't then ask "What galaxy?" on the Locate step, as of course it's this one. Or what star, etc., either. If you start asking "What galaxy?" on an incident on Earth the pc is thrown back track.*

*If it happened outside a town in the open you wouldn't ask what city, house, or street or room, either.*

*On dating, it's AGO or it is an actual date. When the pc has it, the auditor doesn't then alter-is it in sequence. Found by years—months—days—hours— minutes—seconds and fractions, one doesn't then call it by day, year, month, as it tangles the pc. It's called back in the same order.*

*AND in dating one calls the date found back to the pc if there was no instant blow while it was being found. It usually blows on the call of it after it's known.*

*AND in locating the same thing occurs. If no blow and it seems correct then the location is called back to the pc.*

*The essence of the drill is to bring a pc to PT by erasing the date by spotting and the location by spotting, as the pc is out of PT fixed by both date and location.*

*If the theory is not understood nobody could do it rotely.*

*This is a highly precise action to be done smoothly with good TRs. Its results are phenomenal.*

*Interiorization Rundown Series 12*

**INT RUNDOWN CORRECTION LIST  
REVISED**

PC: \_\_\_\_\_ DATE: \_\_\_\_\_

PC GRADE: \_\_\_\_\_ AUDITOR: \_\_\_\_\_

The purpose of this list is to correct an unflat, overrun or otherwise messed up Int RD.

This list is used when:

- A) The subject of Int/Ext reads on a repair list and the Int RD has already been run.
- B) A bog occurs on the Int RD itself. An L3RF would first be used to detect any Dianetic errors.
- C) The pc is upset after the Int RD or the End of Endless Int Repair RD, has head somatics, high or low TA, or is not VGIs on the subject of going into things.

*NOTE 1:* Per HCOB 12 Sep 78, URGENT. IMPORTANT, DIANETICS FORBIDDEN ON CLEARS AND OTs, Dianetic Clears, Clears and OTs are not to be audited on the Int RD as it uses Dianetics. They may be given the End of Endless Int Repair RD as it is a Recall Process.

The following list may be assessed on Dianetic Clears, Clears and OTs, however, as: 1) it also applies to the End of Endless Int Repair RD and 2) the pc may have been run on the Int RD before the above HCOB was issued.

If a Dianetic Clear, Clear or OT reads on any question which calls for a Dianetic handling (Ex: Questions 2, 3, 4, 7, 9, 29) the Dianetic handling is not done. Do NOT engage in any activity that brings about further engram running.

The correct action, if you get a read on one of the above questions, is to *indicate* it and let the pc tell you about it if he wishes, to bring it to an F/N.

Where the handling calls for an L3RF, an L3RF could be assessed, but you must not do more than *indicate* the reading questions. You must *not* engage in engram running.

Otherwise, the handlings given on the Int RD Correction List may be done on Clears and OTs. A Clear or OT who then has any further unresolving Int trouble would be referred to an AO for handling.

*NOTE 2:* If the pc has had only the End of Endless Int Repair RD do not assess those questions marked with an asterisk (\*) (Questions 2, 3, 4, 29) or do any repair action that calls for Dianetics.

Assess this list Method 3.

Take up each item that reads and get the reading item fully repaired to F/N. Suppress and False can be used as needed to take a question to F/N. Handle each read to F/N. Do not go on to another question leaving one that has not F/Ned.

If at any time while doing the list the pc has a big win with F/N, VGIs, acknowledge, indicate the F/N and end off. Do not take the list beyond a major win for the pc.

R-FACTOR: We are going to do an assessment concerning the subject of interiorization. (If pc does not understand this R-Factor clear up what the Int RD or the End of Endless Int Repair RD was as he may not have recognized it.)

1. ON YOUR INT HANDLING IS A RECALL FLOW UNFLAT? \_\_\_\_\_

Assess the following, using the Int button the pc has been run on.

Is recall a time when you (Int button) unflat? \_\_\_\_\_

Is recall a time when you caused another (Int button) unflat? \_\_\_\_\_

Is recall a time when others caused others (Int button) unflat? \_\_\_\_\_

Is recall a time when you caused yourself (Int button) unflat?  
(Assess on Quad pcs only.) \_\_\_\_\_

For Int RD: Flatten the unflat flow(s) to F/N, cog, VGIs.

For End of Endless Int Repair RD: Pick up the unflat flow and handle to four F/Ning flows on that Int button. Then reassess the Int buttons, as the entire RD may not have been flattened and will now need to be.

\*2. ON YOUR INT RD WAS A CHAIN OR INCIDENT LEFT UNFLAT? \_\_\_\_\_

Find out which one(s). Handle with an L3RF.

\*3. (NOTE: ASSESS No. 3 ONLY ON PCs WHO'VE HAD THE ORIGINAL INT RD, NOT THE REVISED INT RD.)

IS A SECONDARY FLOW UNFLAT? \_\_\_\_\_

L3RF and handle.

\*4. IS AN ENGRAM FLOW UNFLAT? \_\_\_\_\_  
L3RF and handle.

5. WAS SOME PART OF YOUR INT HANDLING MISRUN? \_\_\_\_\_  
Find out what.

For Int RD: handle with an L3RF any messed up chains.

For End of Endless Int Repair RD: straighten out any messed up recall flows and handle per No. 1 above.

6. DID YOU RUN THE CONCEPT OF "BEING IN" OR "BEING STUCK IN" INSTEAD OF THE CONCEPT OF "GOING IN?" \_\_\_\_\_

Sort it out. Find out what was run. Handle any confusions. If it is established that he didn't run the concept of "going in" on *whatever* the running button was, check the button for read. If it reads, run the Int RD or End of Endless Int Repair RD properly. Do not run the RD if the button doesn't read.

7. WERE YOU RUNNING AN ITEM THAT WAS DIFFERENT THAN THE ONE ASSESSED? \_\_\_\_\_

Indicate it. Get the item the pc was actually running and take it to full EP if not yet flat. Then recheck the item that was assessed, put in Suppress and Inval as necessary, and if charged run the item that was assessed (on whichever RD the pc had).

8. DID THE INT BUTTON ASSESSED HAVE NO CHARGE ON IT? \_\_\_\_\_

Indicate the button was uncharged and should not have been run and all actions connected with it should not have been run. D/L if necessary.

9. WAS THERE ANOTHER INT BUTTON THAT SHOULD HAVE READ? \_\_\_\_\_

Get what it was and note its read as the pc gives it. Find out if the Int button that was taken up instead is charged. If so, complete any handling on it to F/N. If not, handle as in No. 8 above. Then handle the new item, if charged, on Int RD or End of Endless Int Repair RD, whichever applies.

10. ON YOUR INT HANDLING WERE YOU RUN ON A RECALL FLOW THAT HAD NO CHARGE ON IT? \_\_\_\_\_

Find out which one and indicate that that flow should not have been run.

11. CAN'T YOU GET IN? \_\_\_\_\_

If so, L&N to BD F/N item "Who or what was afraid to go into things?" Then run alternate repetitively "What did (item found) do?" "What did (item found) withhold?" to an F/N and a blow.

12. DO YOU HAVE AN OUT-LIST? \_\_\_\_\_

Handle with L4BRA.

13. WAS THE RUNDOWN DONE OVER AN ARC BREAK? \_\_\_\_\_

PROBLEM? \_\_\_\_\_

WITHHOLD? \_\_\_\_\_

OVERT? \_\_\_\_\_

Indicate and handle to F/N.

14. WAS THE RUNDOWN DONE OVER SOME OTHER BYPASSED CHARGE? \_\_\_\_\_

Find out what and handle.

15. WAS THE WORDING OF THE RUNDOWN BADLY CLEARED? \_\_\_\_\_

Fully clear all MUs to F/N.

16. ON YOUR INT HANDLING WAS THERE A MISUNDERSTOOD WORD? \_\_\_\_\_  
Fully clear all MUs to F/N.
17. WERE YOU CONFUSED ABOUT SOMETHING? \_\_\_\_\_  
Clear it up with the correct references. Itsa E/S itsa to F/N.
18. DIDN'T YOU UNDERSTAND WHAT THE RD WAS FOR? \_\_\_\_\_  
Clear this up with correct references. Itsa E/S itsa to F/N.
19. WERE YOU THINKING OF LEAVING DURING INT? \_\_\_\_\_  
Itsa E/S itsa to F/N.
20. WERE YOU LEAVING A POST? \_\_\_\_\_  
Itsa E/S itsa to F/N.
21. WERE YOU TRYING TO GET A POST? \_\_\_\_\_  
Itsa E/S itsa to F/N.
22. ANYTHING TO DO WITH JAILS? \_\_\_\_\_  
Itsa E/S itsa to F/N.
23. ARE YOU WANTED ANYWHERE? \_\_\_\_\_  
Itsa E/S itsa to F/N.
24. ARE YOU AFRAID THAT IF YOU GET OUT YOU WILL CAUSE DAMAGE? \_\_\_\_\_  
Itsa E/S itsa to F/N.
25. WOULD LETTING YOU OUT BE AN OVERT? \_\_\_\_\_  
Itsa E/S itsa to F/N.
26. HAVE YOU FAILED TO GET OUT IN AN EARLIER RELIGION OR PRACTICE? \_\_\_\_\_  
Itsa E/S itsa to F/N. Note for C/S to handle earlier practices on program.
27. DO YOU JUST MOVE BACK INTO THE BODY AND PUSH AGAINST IT? \_\_\_\_\_  
Itsa E/S itsa to F/N.
28. WERE THERE AUDITOR ERRORS? \_\_\_\_\_  
Indicate. Sort it out and clean up BPC. If R3RA errors, use an L3RF (except for Clears, etc.), L1C if necessary.
- \*29. WERE THERE ERRORS ON ENGRAMS? \_\_\_\_\_  
Find out what and handle with an L3RF.

30. (ASSESS ONLY ON DN CLEARS, CLEARS OR OTs.) WERE YOU AUDITED ON DIANETICS AFTER GOING DIANETIC CLEAR OR SCN CLEAR? \_\_\_\_\_
- Indicate that he should not have been run on Dianetics after Clear. If no F/N, D/L when he went Clear.
31. HAS INT BEEN NEGLECTED FOR A LONG TIME? \_\_\_\_\_
- Indicate. Itsa E/S itsa to F/N.
32. ARE YOU WORRIED BECAUSE INTERIORIZATION CONTINUES TO READ? \_\_\_\_\_
- Indicate. Itsa E/S itsa to F/N.
33. ARE YOU CONCERNED BECAUSE YOU HAVE TO BE REVIEWED? \_\_\_\_\_
- Indicate. Itsa E/S itsa to F/N.
34. WAS THE INT RD (END OF ENDLESS INT REPAIR RD) ALREADY FLAT? \_\_\_\_\_
- Indicate. Date/Locate the flat point.
35. WAS YOUR INT HANDLING OVERRUN? \_\_\_\_\_
- Indicate. Date/Locate the flat point.
36. WAS INT HANDLING UNNECESSARY IN THE FIRST PLACE? \_\_\_\_\_
- Indicate. If no F/N, Date/Locate the point he felt good about going into things.
37. DID YOU FEEL FINE ABOUT GOING INTO THINGS TO BEGIN WITH? \_\_\_\_\_
- Indicate it. If no F/Ns Date/Locate that point.
38. IS YOUR INT HANDLING PERFECTLY OKAY? \_\_\_\_\_
- Indicate. If no F/N, Date/Locate the point he felt good about going into things.
39. HAS YOUR INT HANDLING BEEN OVERREPAIRED? \_\_\_\_\_
- Indicate. Date/Locate the flat point.
40. HAS INT BEEN RUN SEVERAL TIMES OVER? \_\_\_\_\_
- Indicate. Date/Locate the flat point.
41. HAS THE INT RD CORRECTION LIST BEEN OVERDONE? \_\_\_\_\_
- Indicate. If no F/N Date/Locate the point he felt his Int RD was repaired.
42. ON YOUR INT HANDLING DID YOU GO PAST A WIN?

Indicate. Rehab the win to F/N VGIs. If no F/N, Date/Locate that point.

43. DURING YOUR INT HANDLING DID YOU GO EXTERIOR? \_\_\_\_\_

Indicate. Rehab to F/N VGIs. If no F/N, Date/Locate that point.

44. IS THIS ACTION UNNECESSARY? \_\_\_\_\_

Indicate. If no F/N itsa E/S itsa to F/N.

45. IS THERE SOMETHING ELSE WRONG? \_\_\_\_\_

Find out what and handle.

<i>HCOB 16 Aug 69R</i>	<i>HANDLING ILLNESS IN SCIENTOLOGY</i>

CASES

One remaining problem in cases was "PTS phenomena."

PTS means potential trouble source. When someone is suppressed he becomes a potential trouble source.

There are numerous HCOBs and PLs on this subject. All of them are true observations and predictions.

The cause of ROLLER-COASTER is PTS. Roller-coaster means a slump after a gain. Pcs who do not hold their gains are PTS.

S and Ds (for Search and Discovery) was the earlier approach. These are still valid and "3 S&Ds" as a rundown is used in the PTS Rundown without change.

Now with the PTS Rundown, this common and all too frequent case condition can be handled.

WHO DOES IT

*There are actually three PTS handlings:*

*1. This is essentially an ethics action done by the Ethics Officer. Its substance is contained in BOARD POLICY LETTER 5 Apr 72RC Issue I, PTS TYPE A HANDLING. It is usually the first step at any sign of trouble. It is not an audited action, it is an interview. The PTS person is given a program in order to handle the scene.*

2. *This is the PTS RUNDOWN, AUDITED as covered in this HCOB, in HCOB 20 Jan 72R, PTS RD ADDITION and in HCOB 3 Jun 72RA. It is done by an auditor in regular session as described in these HCOBs.*

. . . It can be done by Class IV Grads who are also HNEDEAs, HGC Okay to Audits.

For an auditor who is not HNEDEA, Class IV Grad Okay to Audit HGC by competent internship to attempt a PTS Rundown would be very risky for the pc as it needs exact listing, exact TRs, exact metering, exact Code keeping and very honest auditing and competent C/Sing.

3. *The third handling is THE SUPPRESSED PERSON RUNDOWN, HCOB 29 Dec 78, and HCOB 30 Dec 78R—the SUPPRESSED PERSON RD PROBLEMS PROCESSES. It is done by a qualified auditor in regular session. Essentially, it handles the OTHER person connected to the pc.*

*Therefore, what you have here is THREE stages of handling PTSness. The first above, the interview, cools off the scene and in many cases that is that. But when the pc is further affected by the connection and roller-coasters, he is given the audited rundown as in 2 above. This usually handles the case of PTSness as a case. But there sometimes remains another person, the SP person or group and its relationship in the real universe to the pc. And this is handled with 3 above.*

#### CLEARs, OTs AND DIANETIC CLEARs

*The Dianetic steps of the PTS Rundown, Audited are not run on Clears, OTs or Dianetic Clears. (Ref: HCOB 12 Sep 78, DIANETICS FORBIDDEN ON CLEARs AND OTs.)*

*Clears, OTs and Dianetic Clears can of course be given the interview step (1 above) and can be given the Suppressed Person Rundown as in 3 above as neither contains any handling of engrams.*

#### DEVELOPMENT

Early discovery and development of the PTS theory is extensively covered.

The recent wrap-up came about through my OT research in November 1971.

The principle breakthrough was realizing one should NOT invalidate having known certain people before.

This is similar to the past life discovery in 1950. Some people thinking this was “unpopular” frowned on it. Some others were only famous characters so flagrantly that past lives were easily invalidated. But people who don’t go past track in Dianetics don’t recover. Even running them as “imaginary” as in *Science of Survival* advices suddenly breaks through for a stalled Dianetic case.

In this same way with young men and girls using “I knew you when you were “ for 2D advantage tended to invalidate having known certain individuals before this life.

But now it turns out that the ONLY PTS situation that is serious and lasting and can cause a roller-coaster comes from having known the person *before* this life.

Possibly in the last life or earlier lives one knew persons before *that* life too. This however shows up in the 3 S&Ds.

## BREAKDOWN

There are only four points of breakdown of the PTS Rundown.

1. Improperly audited. Auditor not able to always do a correct list. TRs out, metering out, poor R3RA, just plain untrained or not totally familiar with this rundown.
2. Pc not completely set up. Like: Has TA trouble but no C/S 53 done, is a no change case but no EXGF 40RD done, old auditing not repaired by . . . proper programming or . . . pc too tired or too ill for the R3RA.
3. The rundown not fully and completely done, but chopped or left incomplete (pc will still roller-coaster).
4. People who “can’t run engrams”—which means a druggie who hasn’t had a full Drug Rundown.

There is nothing especially tricky about the auditing of the PTS Rundown except that all auditing should be of flubless quality and when the PTS RD is flubbed by bad lists or poor R3RA or out-TRs or poor metering it really IS a mess. The RD is so powerful that errors in C/Sing and auditing it are especially rough.

Currently sick pcs should not be run on the PTS Rundown as a standard practice. It IS what they need BUT you can easily overwhelm a sick pc with engram running.

The time to run a PTS RD is when the pc is set up and when it is noted the pc roller-coasters, not when he collapses with a temperature.

Roller-coaster can also be caused by a bad Interiorization RD or Int repair, out-lists, bypassed charge of other descriptions. These should be gotten rid of before a PTS RD is attempted.

The prerequisites for a PTS RD are covered in 2 and 4 above. It is not restricted to Ex Dn but is a separate RD developed before Ex Dn.

## BEHAVIOR OF RD

Valence shifts occur rapidly and frequently in PTS RDs and should be noted on the worksheet.

The R3RA can sometimes be a bit of a long haul on a basic incident. Be sure with an L3RF. But get *the postulate off the basic* no matter how hard you have to work at it. In the PTS RD incidents can “develop.” Missing pieces can appear. A whole new slant can occur on the subject when one goes to F2 after finishing F1.

Chronic somatics are likely to appear and be handled on this rundown. And case conditions not previously remedied by other means can be remedied by this rundown.

## END PHENOMENA

There is a point where the pc is absolutely sure he knew the person before this life. This is NOT the EP.

A pc can exteriorize on this RD. That is NOT the EP (but *can require* an Int RD if none has been done before . . .).

**THE EP IS A PC WHO IS GETTING AND KEEPING CASE GAINS AND NEVER AGAIN ROLLER-COASTERS.**

## FLAWS

You cannot use Flow 1 as any old direction to or from pc. To do this fouls it up.  
*Flow 1 is to the pc.*

Flow 2 is pc to the person (or place).

Flow 3 is the person (or place) to others.

*Flow 0 is the pc to himself because of the person (or place).*

If you did F1 R3RA as "Locate a time you knew" you might get to the pc, pc to the person or the person to others. You would not get a clean motivator F1. This would leave the PTS chain partially run.

This is also true of the ruds.

## RE-DOS

If the pc does *not* recover, then reasons for failure 1 to 4 above should be checked into.

Then the lists and R3RA should be handled with L4BRA and L3RF.

Then an overlooked item or person or place should be scouted for and handled. There is no question of the validity of the rundown. It might have missed. "True love" might have been passed over as unlikely but such obsessive attraction is always based on having known (and probably done in) the other person.

Then the true EP will be attained where it only appeared to be before.

## SUMMARY OF REFERENCES

## THE RUNDOWN

### A. PAST S&Ds:

1. Collect up past S&D items (which should have already been verified on set-ups) or get the pc to tell you them if no folder.
-

2. On the earliest one ask if known before. If it so reads handle per steps 3-6. If not, pick next item and repeat this check for validity. \_\_\_\_\_
3. R3RA Triple/Quad the item using these commands:
- F1. Locate a time when \_\_\_\_\_did something to you.  
R3RA.
- F2. Locate a time when you did something to \_\_\_\_\_.  
R3RA.
- F3. Locate a time when\_\_\_\_\_did something to others.  
R3RA.
- F0. Locate a time when you did something to yourself because of \_\_\_\_\_. R3RA. \_\_\_\_\_
4. Triple/Quad ruds and overts on the item using these commands:
- (a) Did \_\_\_\_\_ARC break you? ARCU CDEINR. E/S to F/N.
- (b) Did you ARC break \_\_\_\_\_? ARCU CDEINR. E/S to F/N.
- (c) Did \_\_\_\_\_ARC break others? ARCU CDEINR.
- (d) Did you ARC break with yourself because of\_\_\_\_\_?  
ARCU CDEINR. \_\_\_\_\_
- ALWAYS DO A FRESH ARCU CDEINR ON EACH E/S.
- (e) Did \_\_\_\_\_give you a problem? E/S to F/N.
- (f) Did you give\_\_\_\_\_ a problem? E/S to F/N.
- (g) Did \_\_\_\_\_give others problems? E/S to F/N.
- (h) Did you give yourself problems because of\_\_\_\_\_? E/S to F/N. \_\_\_\_\_
- (i) Did you withhold anything from \_\_\_\_\_? E/S to F/N.
- (j) Did \_\_\_\_\_withhold anything from you? E/S to F/N.
- (k) Did \_\_\_\_\_withhold anything from others? E/S to F/N.
- (l) Did you withhold anything from yourself because of \_\_\_\_\_? E/S to F/N. \_\_\_\_\_
- (m) Did \_\_\_\_\_commit an overt (harmful act) on you? E/S to F/N.
- (n) Did you commit an overt (harmful act) on \_\_\_\_\_? E/S to F/N.
- (o) Did \_\_\_\_\_commit an overt on others? E/S to F/N.
- (p) Did you commit an overt on yourself because of \_\_\_\_\_? E/S to F/N. \_\_\_\_\_

5. Run "Can't Hav/Enforced Hav" with these steps:
  - (a) Clear "can't have," "couldn't have" as DENIAL OF SOMETHING TO SOMEONE ELSE. Clear "enforced have" as MAKING SOMEONE ACCEPT WHAT THEY DIDN'T WANT. Have pc get the idea of these with an example or two.
  - (b) Run on the SP items "can't have/enforced have" as motivator repetitive, then overt repetitive, the Flow 3 terminal to others, others to terminal (four flows of two commands each, or five if pc Quad).
  - (c) After EACH item is handled with the four flows, Objective Havingness should be run.

THE COMMANDS:

*F1. Did \_\_\_\_\_run a can't have on you? Tell me about it.*

*Did \_\_\_\_\_force something on you you didn't want? Tell me about it. (Alternate/repetitive to EP.)*

*F2. Did you run a can't have on \_\_\_\_\_? Tell me about it.*

*Did you try to force something on \_\_\_\_\_that he (she, it) didn't want? Tell me about it. (Alternate/repetitive to EP.)*

*F3. Did \_\_\_\_\_run a can't have on others? Tell me about it.*

*Did \_\_\_\_\_force something on others they didn't want? Tell me about it. (Alternate/repetitive to EP.)*

*F3A. Did others run a can't have on \_\_\_\_\_? Tell me about it.*

*Did others force something on \_\_\_\_\_that he (she, it) didn't want? Tell me about it. (Alternate/repetitive to EP.)*

*F0. Did you run a can't have on yourself because of \_\_\_\_\_? Tell me about it.*

*Did you try to force something on yourself that you didn't want because of \_\_\_\_\_? Tell me about it. (Alternate/repetitive to EP.)*

—OBJECTIVE HAVINGNESS—

6. Handle all past S&D items per above steps.

B. PAST PTS INTERVIEWS:

7. Collect up all past PTS interview items (which should have already been verified with C/S Series 78 on set-ups).

8. Check known before on earliest one. If it so reads handle as below. \_\_\_\_\_
  9. R3RA Triple/Quad the item. \_\_\_\_\_
  10. Triple/Quad ruds and overts on the item. \_\_\_\_\_
  11. Can't Hav/Enforced Hav on the item followed by Objective Hav. \_\_\_\_\_
  12. Repeat steps 8-11 on all valid past PTS interview items. \_\_\_\_\_
- C. NEW S&Ds (3 S&Ds):
13. Do 3 S&Ds per HCOB 16 Aug 69R, HANDLING ILLNESS IN SCIENTOLOGY, ASSESSMENT AND L&Ns. \_\_\_\_\_
  14. Check the first item for known before, handle if it so reads. \_\_\_\_\_
  15. R3RA Triple/Quad the item. \_\_\_\_\_
  16. Triple/Quad ruds and overts on the item. \_\_\_\_\_
  17. Can't Hav/Enforced Hav on the item, followed by Objective Hav. \_\_\_\_\_
  18. Repeat steps 14-17 on the other items if valid. \_\_\_\_\_
- D. TROUBLED/WORRIED:
19. L&N Who have you known this lifetime who has troubled or worried you? to BD F/N item. (Usually includes father, mother, wife or wives, husband, brothers, sisters, aunts, uncles, grandparents, lovers.) \_\_\_\_\_
  20. Check item for known before, if it so reads: \_\_\_\_\_
  21. R3RA Triple/Quad. \_\_\_\_\_
  22. Triple/Quad ruds and overts. \_\_\_\_\_
  23. Can't Hav/Enforced Hav followed by Objective Hav. \_\_\_\_\_
- E. BEEN AFTER:
24. L&N Who have you been after this life? to BD F/N item. \_\_\_\_\_
  25. Check known before and if it reads: \_\_\_\_\_
  26. R3RA Triple/Quad. \_\_\_\_\_
  27. Triple/Quad ruds & overts. \_\_\_\_\_
  28. Can't Hav/Enforced Hav plus Objective Hav. \_\_\_\_\_
- F. PLANETS:
29. L&N What planets have you known before this lifetime? to BD F/N item. \_\_\_\_\_
  30. R3RA Triple/Quad. \_\_\_\_\_

31. Triple/Quad ruds and overts. \_\_\_\_\_
32. Can't Hav/Enforced Hav plus Objective Hav. \_\_\_\_\_
33. D of P interview the person AFTER the RD is "complete" to be sure the person is now all right (not PTS). \_\_\_\_\_

### READING FLOWS

*Each flow of each process on the rundown is checked for a read before it is run. This includes Dianetics, ruds, Can't Hav/Enforced Hav. You do not run unreading flows.*

### REPAIR

Auditor errors during the RD are handled with L4BRA, L3RF, . . . and . . . C/S 53 if necessary.

A really big snarl up on the RD that won't clear up is handled with HCOB 16 Apr 72 PTS RD CORRECTION LIST.

If pc gets ill or roller-coasters after the RD is complete the PTS RD CORRECTION LIST HCOB 16 Apr 72 is done and whatever was missed is cleared up.

### SUMMARY

The PTS RD as revised is very direct and powerful. The L&N blows each aspect apart. Don't miss on it with auditor flubs. Get it drilled thoroughly before it is delivered.

***Interiorization RD Series 10***

**INTERIORIZATION ERRORS**

REFERENCES:

<i>HCOB 11 Apr 71 RC</i>	<i>IMPORTANT L3RF, DN &amp; INT RD REPAIR LIST</i>
<i>HCOB 16 Sep 78</i>	<i>POSTULATE OFF EQUALS ERASURE</i>
<i>HCOB 4 Jan 71R</i>	<i>Int RD Series 2, EXT AND HIGH TA, THE INT RD REVISED</i>
<i>HCOB 24 Sep 78 I</i>	<i>Int RD Series 4, URGENT IMPORTANT, END OF ENDLESS INT REPAIR RD</i>
<i>HCOB 24 Sep 78 II</i>	<i>Int RD Series 13, PREASSESSMENT AESPs AND INT</i>

Almost all the errors in an Interiorization Rundown are Dianetic errors. Most are very ordinary, even corny.

**IT IS VITAL TO CORRECT AN INT RD ERROR AS A FIRST ACTION.**

There is one Int RD error that is not a purely Dianetic error and that is the error of doing anything else at all before an Int RD is done properly or an Int RD error is fully corrected.

The Int RD error may be . . . that *the Int button run* did not read on the meter, or read only because of an MU on the word, yet . . . was run. (*HCOB 4 Jan 71R.*) This classifies as "running an unreading item."

*A common Int error is that the pc is not cleared on the concept of interiorization and the words and commands, so he is being audited over misunderstands.*

Or the Int RD could have been overrun. *The EP is reached on . . . F2*, let us say. The auditor keeps on going past the win. This will hang up the rundown. One of the ways an overrun occurs is the pc goes exterior during it. Yet the auditor keeps on. Another way is pc has a big cog, big win. Auditor keeps going on with the RD.

When a pc is exteriorized by auditing and is then audited further without being given an Interiorization Rundown, his TA will go high or low and he may be very upset. Heavy masses may come in and he may also get ill.

Int RD errors also may go back to earlier Dianetic errors. A number of unflat incidents invite the overrun of these if they also occur on a Dianetic chain.

To clean up a balled-up Int RD chain or incident one may have to find and clean up the Dianetic error it is sitting on *during* the clean-up of the Int RD error.

Int RD errors, goofs, etc., are handled by using an Int RD Correction List Revised, HCOB 29 Oct 71RA.

*This must be excellently metered so that the original error is not further compounded by misassessment of the correction list and a falsely reading item taken up.*

Auditors who can't run ordinary *R3RA* with great success should not be let near an Interiorization *RD* as their lack of smoothness in handling Dianetics will wreck the *Int RD*.

*Auditors who cannot read a meter flublessly should not be let near an Int RD or an Int RD Correction List, or The End of Endless Int Repair RD.*

#### CLASS IV GRAD, HNED AUDITORS

An excellent Class IV *Grad, HNED* auditor can easily repair a messed-up Interiorization Rundown after a folder study and by use of an *Int RD Correction List Revised, HCOB 29 Oct 71RA and, as indicated, The End of Endless Int Repair RD, HCOB 24 Sep 781, Int RD Series 4.*

A Class IV *Grad, HNED* auditor with an excellent Dianetic record of wins can be given an *Int RD* to do or to correct IF HE IS STARRATED ON THE INT PACK AND THE TWO-WAY COMM PACK.

#### REPAIR

Wherever you see a TA high and a pc in trouble your first suspicions should be:

1. Audited past Ext in auditing without an *Int RD* being done.
2. *Int RD* botched by being unnecessary (*none of the Int buttons read or read only on MUs*), or overrun or auditor goofs in the session.
3. A previously messed-up Dianetic action has gotten fouled up with the *Int RD*.
4. The *Int* command was improperly cleared (such as “means go in and out again” “means trapped” “meant leaving,” etc.).
5. Firefights and worries over the high or low TA have ensued after an *Int* ball-up has occurred.
6. Some major action like grades or items of Power have been run twice.
7. A C/S has hopefully kept on getting the pc audited without detecting the real reason as a flubbed *Int RD, and without getting the Int RD and any repair fully FESed.*

#### PERCENTAGES

The percent of misrun *Int RDs* is high, many being unnecessary or overrun.

The liability of leaving them unrepaired is high.

Reasons for high TA are averaging out close to 100% as an unrun or a flubbed and unrepaired *Int RD*.

#### EXT IN SESSION

When a pc exteriorizes in session it is the end phenomena for that process or action. One gently ends off in any case. *If the pc has not had an Interiorization Rundown, it is vital, in his next session, to check Int (per HCOB 24 Sep 71R INTERIORIZATION RUNDOWN CORRECTION DRILL—DATE TO BLOW/LOCATE TO BLOW) as the first action. All manner of physical and emotion upsets can result, including a high TA, if this step is omitted.*

*INT MUST BE CHECKED AS THE NEXT ACTION AFTER THE FACT OF THE PC'S FIRST EXTERIORIZATION.*

*No other auditing is to be done before Int is handled fully or proves to be uncharged upon checking.*

If even years after an Int *RD* the pc has a high *TA* or a low *TA* then Int trouble is at once suspected and the original Int *RD* and any repair of it is suspect and must *be handled*.

The Int *RD* Correction *List* Revised (HCOB 29 Oct 71RA) has been designed to straighten out Int *RD* errors. *L3RF* handles the Dianetic errors. Where Int Correction *Lists* have been done and the pc still has headaches or other Int troubles a thorough *FES* must be done *FIRST* on any Int repairs and the Int *RD* itself *BEFORE* another correction list or other action is ordered.

*Isolate any errors and get them cleaned up by an auditor who can read a meter and run and repair Dianetics standardly.*

*If Int troubles persist and the C/S is certain that any and all errors have been fully repaired & cleaned off the line, he orders The End of Endless Int Repair RD (HCOB 24 Sep 781, Int RD Series 4). This should totally handle Int.*

*Or if the C/S is in doubt about how to handle and gets into a mess trying to repair chains, he can cut directly onto the End of Endless Int Repair Rundown and he will get someplace.*

There is no real trick to either running a correct Int *RD* or repairing a flubbed one.

The whole clue is whether or not the auditor can audit plain ordinary garden variety *R3RA*, and is able to read a meter.

So when *ANY* auditor audits a pc past exterior and the pc's *TA* goes high he should be checked out fully on the Int *RD* Checksheet so he won't continue to commit the error.

*And when ANYONE is going to run an Int RD he must:*

- A. Be an expert *New Era Dianetics* auditor and Class IV Graduate.
- B. Be starrated on all the Int *RD* Series.
- C. Be able to read a meter flublessly.

And when any C/S is confronted with high *TAs* or low *TAs* and doesn't handle at once by getting an Int *RD* properly run or properly repaired he must be rechecked on the *New Era* Dianetics pack and the Int *RD* pack.

#### *DN C/S 1*

A very careful Dianetic C/S 1 must be done on a previously unindoctrinated pc before he is run on an Int *RD*.

Otherwise it's all too new.

A C/S 1 isn't auditing.

The pc who can't do what the auditor says or can't correct an erroneous action is lost.

A fully safe pc would be one who when he goes Ext in auditing is made to do *the Hubbard New Era Dianetics Course* at once before he even gets any ruds put in and not audited again until he *is a Hubbard New Era Dianetics Auditor*. He'd be a pc who was relatively safe.

A pc who does what an inexperienced auditor says without question can really get fouled up! Uneducated pcs require really flawless topnotch auditors. The auditor who can audit an uneducated pc is a jewel. He really has to know his business. Because the pc does whatever he says. And if he says wrongly, then there goes the session. Ever notice pc corrections in a worksheet? "I think you bypassed an F/N." "This feels overrun." "I *had* Grade 1 last year." Such auditors are not fully enough trained to handle wholly green pcs!

#### SIMPLICITY

Honest fellows, it's as easy to run an Int RD as it is to run "an ear pain."

It isn't even mysterious or tough.

IT IS ONLY VERY IMPORTANT TO DETECT WHEN IT NEEDS TO BE DONE OR REPAIRED.

There are no mysteries.

Some auditors have got me feeling like I'm trying to teach them to chew soft bread!

HCOB 26 Jun 78RA	New Era Dianetics Series 6RA
Issue II	Urgent, Important, Routine 3RA, Engram Running By Chains
BTB 12 Jan 75	Quads Reinstated
HCOB 4 Apr 71-1RB	C/S Series 32RA-1RB Use of Quad Dianetics
HCOB 21 Apr 70	2-Way Comm C/Ses
HCOB 3 Jul 70	C/S Series 14 Two-Way Comm
HCOB 17 Mar 74	TWC Checksheets, TWC, Using Wrong Questions

The examination of Interiorization Rundowns done in the field discloses that some auditors engaged in running it have not been fully checked out on it. HCO PL 26 Aug 1965 gives the correct way to do a starrate checkout. Clay demos must also be correctly done. These are covered in HCOB 11 Oct 1967 and HCOB 10 Dec 1970/.

These HCOBs on starrates and clay demos, the Int RD Series, the above-listed issues on R3RA, Engram Running by Chains (New Era Dianetics Series 6RA), 2-Way Comm Sessions, and Quads, make the necessary pack for checking out an auditor before letting him near an Int Rundown. And all interiorization materials as above MUST BE CHECKED OUT STARRATE AND IN CLAY before a C/S permits one of his auditors to run it on a pc.

#### UNNECESSARY

*The Int buttons MUST be assessed before clearing, and then any reading button cleared before it is run. The auditor must ensure that if a button read on an MU it is first cleared, then reassessed for read. If one or more of the buttons is validly reading, one does an Int Rundown per HCOB 4 Jan 71R, Int RD Series 2, Exteriorization and High TA, The Int Rundown Revised.*

If there aren't any reads, even after Suppress, Invalidate, Misunderstood, and False have been applied to the Int button list, one does NOT do an Int Rundown on the pc as it is unnecessary and classifies as "running an unreading item."

When this test is omitted you get an unnecessary Int RD being done on a pc.

This *would* eventually have to be repaired.

#### FLUBBED R3RA

When the auditor does not do flubless auditing, errors occur in the auditing itself. These will hang up an Int RD.

#### QUADS OR TRIPLES

DO NOT RUN A PC ON FLOW ZERO FOR THE FIRST TIME ON INT. A TRIPLE PC CAN BE QUADED AFTER INT HANDLING IS COMPLETE, BUT IT IS NEVER DONE ON INT HANDLING OR INT REPAIR. (Ref: HCOB 4 Jan 71R.)

#### OVERRUN

It *usually* happens that an Int RD is overrun. The EP is reached on F2, let us say. The auditor keeps on going past the win.

This will hang up the rundown.

One of the ways an overrun occurs is the pc goes exterior during it. Yet the auditor keeps on.

Another way is pc has a big cog, big win. Auditor keeps going on with the RD. (HCOB 24 Sep 71R, Rev. 24.9.7B, Int RD Series 11, Urgent, Interiorization Rundown—Correction Drill: Date to Blow/Locate to Blow.)

Also see HCOB 24 Sep 781, Urgent Important, The End of Endless Int Repair RD.

#### REPAIR OF INT

If even years after an Int RD the pc has a high TA or a low TA, then Int trouble is at once suspected and the original Int RD and any repair of it is suspect and must *be handled*. (HCOB 16 Dec FORD, C/S Series 35RB, Int RD Series 10, Interiorization Errors.)

The Int RD Correction List Revised (HCOB 29 Oct BRA) has been designed to straighten out Int RDs. L3RF handles the Dianetic errors. Where Int Correction Lists have been done and the pc still has headaches or other Int troubles a thorough FES must be done FIRST on any Int repairs and the Int RD itself BEFORE another correction list or other action is ordered.

Isolate any errors and get them cleaned up by an auditor who can read a meter and run and repair Dianetics standards

With any errors cleaned off the line, if Int troubles persist the C/S orders The End of Endless Int Repair RD (HCOB 24 Sep 781, Int RD Series 4). (HCOB 16 Dec ORB, C/S Series 35RB, Int RD Series 10, Interiorization Errors.)

#### TWO-WAY COMM

There is a two-way comm step that follows a day or so after an Interiorization Rundown.

An auditor doing this step, preferably the same auditor, MUST BE CHECKED OUT ON TWO-WAY COMM.

No C/S should permit any auditor to do any 2-way comm until the auditor has been checked out on:

*HCOB 21 Apr 70, 2-Way Comm C/Ses*  
HCOB 3 July 70, C/S Series 14, C/Sing Two-Way Comm  
HCOB 17 Mar 74, TWC Checksheets, TWC, Using Wrong Questions

and has been drilled on two-way comm until he can do it correctly and comfortably.

#### PREASSESSMENTS, AESPs NOT USED ON INT

The Int Rundown and its repair do NOT include the use of New Era Dianetics preassessment (nor any form of AESPs).

The rule is: WHEN HANDLING INT YOU ADDRESS ONLY INT, NOTHING ELSE. DO NOT RUN PREASSESSMENT OR AESPs ON INT. (HCOB 24 Sep 7811, Int RD Series 13, Preassessment, AESPs and Int.)

#### C/SING INT

The correcting of an Interiorization Rundown is far harder than making sure that auditors can do the usual in the first place.

Nearly all a C/S's hard work comes from auditors not well trained on courses (indifferent courses) and failing to check auditors out well on the materials *before* permitting them to deliver a new rundown.

The correction of Int is hard since until it is complete, other auditing is inadvisable. One however, gets the Int Rundown done.

*The End of Endless Int Repair Rundown has vastly simplified the handling of Int repair. (Ref: HCOB 24 Sep 78 I, Int RD Series 4, Urgent Important The End of Endless Int Repair Rundown.)*

#### INT IS A REMEDY

*The Int RD is a simple and precise REMEDY which stabilizes a pc after exteriorizing and permits him to be further audited.*

When a pc exteriorizes in session it is the end phenomena for that process or action. One gently ends off in any case. If the pc has not had an Interiorization Rundown, it is vital, in his next session, to check Int (per HCOB 24 Sep OR, Rev. 24 Sep 78, Int RD Series 11, Urgent, Interiorization Rundown Correction Drill: Date to Blow/Locate to Blow) as the first action. All manner of physical and emotional upsets can result, including a high TA, if this step is omitted.

**INT MUST BE CHECKED AS THE NEXT ACTION AFTER THE FACT OF THE PC'S FIRST EXTERIORIZATION.**

No other auditing is to be done before Int is handled fully or proves to be uncharged upon checking.

One reason unnecessary Int RDs get done is that the Registrar sells one. That makes the Reg a C/S. So the C/S and auditor run it.

Maybe it wasn't needed.

So if it wasn't needed it will eventually have to be repaired. (HCOB 24 Sep 71R, Rev. 24 Sep 78, Int RD Series 11, Urgent, Interiorization Rundown Correction Drill: Date to Blow/Locate to Blow). (Repair with an Int RD Correction List Revised HCOB 29 Oct 1971RA and/or an End of Endless Int Repair RD, HCOB 24 Sep 78 I, Int RD Series 4.

The Interiorization Rundown is a REMEDY designed to permit the pc to be further audited after he has gone exterior.

*In the case of Dianetic Clears or Son Clears and OTs, as they are not to be audited on Dianetics, the REMEDY would be the End of Endless Int Repair RD.*

The Int Rundown is NOT to be sold or passed off as a method of exteriorizing a pc. Nor is the End of Endless Int Repair Rundown. This is very important.

It is general auditing on usual Dianetics and Scientology actions that brings about Exteriorization .

When the pc goes or is found to be exterior and Int proves to be charged on checking one then orders the Interiorization Rundown. Otherwise the TA will misbehave.

**The rundown is a REMEDY USED AFTER EXTERIORIZATION HAS OCCURRED BY REASON OF GENERAL AUDITING.**

Anxiety to get exterior will prompt a pc to buy and a Registrar to sell an Interiorization Rundown. It is in effect just more auditing as far as the Registrar is concerned. When a pc has gone exterior the Registrar can insist on his buying enough hours for the remedy.

The Int Rundown stabilizes the exteriorization and makes it possible to audit the pc further.

## DISABILITY

If an auditor can't smoothly audit a rundown as simple as an Int Rundown, then he is exposed as being unable to run standard Dianetics and should be cleared of his misunderstandings and overts and retrained.

The only real trouble one gets into on an Int Rundown stems from the inability of the auditor to run a smooth, good TRed R3RA session. Pcs are not hard to run on it.

## C/S WINS

A C/S cannot win at all if he is continually having to make up for flubby auditing by the auditor.

Therefore the C/S must be very sure his auditors are fully checked out on things they are to run before running them.

If there is no Qual Staff Training Officer or no cramming, a C/S can fully afford to do the training and cramming himself. Otherwise he will lose far more than that time in C/Sing for auditors not checked out.

By the skill of his auditors you know the C/S. Not by his unusual solutions after flubs.

The Int Rundown is too easy to do to have any trouble—the trouble comes when the auditors are not checked out beforehand, starrate and in clay on new things they are to run.

CANCELS  
BTB OF 1 JANUARY 1972R  
SAME TITLE

**LIX HI-LO TA LIST REVISED**

(Cancels earlier list HCOB 17 Feb 71  
and 22 Feb 71 and 25 Feb 71 and 3 March 71  
and 13 March 71 and 1 Jan 72.)

This assessment has been developed to detect all the reasons for high and low TA. There is nothing unusual about the processes necessary to handle these points. This is the full list and is used when a C/S Series 53RK has been done and the high or low TA persists.

Interiorization or a flubbed Interiorization R/D that must be run with WENT IN is the usual reason. Listing errors and out-rudiments are another reason.

The list is assessed Method 5. Handle the reads in the order given on HCOB 10 June 71, C/S Series 44R. Any reading questions must be carried to F/N by major action or 2-Way Comm. Can be taken to full F/Ning list.

Must be done by an auditor who can make a list read with cramming on TR1 and cramming on HCOBs 28 Feb 71 C/S Series 24, 9 June 71 C/S Series 41, 20 Dec 71 C/S Series 72, 15 June 72 C/S Series 80, 15 Oct 73 C/S Series 87, 20 Nov 73 C/S Series 89, 6 Dec 73 C/S Series 90 and BTB 16 June 71R Issue II (formerly HCOB 16 June 71R Issue II).

HI-LO TA ASSESSMENT

- 1A. IS YOUR INT R/D UNFLAT? \_\_\_\_\_  
If the pc has had an Int R/D, do an Int  
R/D Correction List and handle the reads.  
(HCOB 29 Oct 71, Revised 14 May 74.) If the pc has never had  
an Int R/D, then give him a standard Int R/D providing you  
have checked out on the Int-Ext pack and have drilled the pro-  
cedure.
- 2A. WAS YOUR INT R/D MESSED UP? \_\_\_\_\_  
Int R/D Correction List.
- 3A. IS YOUR INT R/D OVERRUN? \_\_\_\_\_  
Int R/D Correction List.
- 4A. HAVE YOU BEEN AUDITED OVER EXTERIOR? \_\_\_\_\_  
Int R/D Correction List or Int R/D.
- 5A. ARE YOU TRAPPED? \_\_\_\_\_  
Int R/D Correction List or Int R/D.
- 6A. YOU WENT IN. \_\_\_\_\_  
Int R/D Correction List or Int R/D.

- 7A. *GO IN.*  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 8A. ARE YOU OUT AND CAN'T GET IN?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 9A. ARE YOU IN AND CAN'T GET OUT?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 10A. ARE YOU URGENTLY TRYING TO LEAVE?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 11A. DO YOU WANT TO GET OUT?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 12A. WERE YOU KICKED OUT OF SPACES?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 13A. YOU CAN'T GO.  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 14A. HAVE YOU EVER INTERIORIZED INTO SOMETHING?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 15A. HAVE YOU EVER GONE INTO SOMETHING?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- 16A. DO YOU WANT TO GO INTO SOMETHING?  
Int R/D Correction List or Int R/D. \_\_\_\_\_
- \_\_\_\_\_
- 1B. IS THERE A LIST ERROR?  
Do an L4BR on the earliest lists you can find that have not been corrected. Lacking these, do an L4BR in general. You can go over an L4BR several times handling each read to F/N until the whole L4BR gives nothing but F/Ns. \_\_\_\_\_
- 2B. HAS A LIST BEEN OVERLISTED?  
Find out which and handle with an L4BR. \_\_\_\_\_
- 3B. WERE YOU GIVEN A WRONG ITEM?  
L4BR and handle. \_\_\_\_\_
- 4B. ARE YOU UPSET WITH GIVING ITEMS TO THE AUDITOR?  
L4BR and handle. \_\_\_\_\_
- 5B. WERE YOU GIVEN A WRONG INDICATION?  
L4BR and handle. \_\_\_\_\_
- 6B. WERE YOU GIVEN A WRONG WHY?  
L4BR on the Why Finding. Get the correct Why. \_\_\_\_\_
- 7B. HAVE YOU BEEN GIVEN A WRONG PTS ITEM?  
L4BR on that PTS interview. Watch for earlier out PTS interviews and if they exist, L4BR the earliest one. Watch for earlier S&Ds and if out, correct the earliest of each kind with an L4BR. \_\_\_\_\_
- 8B. ARE YOU NOT SATISFIED WITH AN ITEM FOUND ON THE LIST?  
L4BR. Correct the list. \_\_\_\_\_

- 9B. HAVE READING ITEMS BEEN LEFT CHARGED UP?  
L4BR and handle if L&N lists otherwise spot them and clean them by taking to F/N. \_\_\_\_\_
- 10B. *HAVE YOU EVER BEEN GIVEN A WRONG DATE?*  
Correct the date. L4BR if pc upset. \_\_\_\_\_
- 11B. HAVE YOU EVER BEEN GIVEN A WRONG LOCATION?  
Correct the location. L4BR if pc upset. \_\_\_\_\_
- 12B. HAVE YOU EVER FELT BAD AFTER A LISTING AND NULLING ACTION IN SESSION?  
Find what list and L4BR. Handle each session by finding the list and do an L4BR on that list. \_\_\_\_\_
- 13B. HAVE YOU EVER FELT BAD AFTER A WHY FINDING WAS DONE?  
L4BR on Why Finding. \_\_\_\_\_
- 14B. HAVE YOU EVER FELT BAD AFTER A PTS INTERVIEW?  
L4BR on the interview. \_\_\_\_\_
- 15B. HAVE YOU EVER FELT BAD AFTER A CRAMMING ACTION?  
L4BR on the cramming action. \_\_\_\_\_
- 16B. HAVE YOU LISTED TO YOURSELF OUT OF SESSION?  
L4BR on listing out of session. \_\_\_\_\_
- 17B. DID YOU EVER FEEL YOU WERE NOT GIVEN A CORRECT WHY?  
L4BR on the Why Finding. \_\_\_\_\_
- 18B. HAVE YOU EVER BEEN ASSIGNED A WRONG CONDITION?  
L4BR on being assigned wrong conditions. \_\_\_\_\_
- 19B. HAS ANYTHING IN LIFE ACTED LIKE AN OUT-LIST?  
L4BR what turns up. \_\_\_\_\_
- 20B. HAVE TWO-WAY COMM QUESTIONS EVER ACTED LIKE A LIST ACTION?  
L4BR. \_\_\_\_\_
- 21B. HAVE YOU EVER BEEN LABELLED A WHO INCORRECTLY?  
L4BR. \_\_\_\_\_
- 22B. HAVE YOU EXPERIENCED SOME OTHER TYPE OF BPC ON LISTING AND NULLING ACTIONS?  
L4BR. \_\_\_\_\_
- \_\_\_\_\_
- 1C. DO YOU HAVE AN ARC BREAK?  
ARCU CDEINR. \_\_\_\_\_
- 2C. HAVE YOU ARC BROKEN ANOTHER?  
ARCU CDEINR. \_\_\_\_\_
- 3C. HAVE OTHERS ARC BROKEN SOMEONE ELSE?  
ARCU CDEINR. \_\_\_\_\_
- 4C. *HAVE YOU ARC BROKEN YOURSELF?* \_\_\_\_\_

ARCU CDEINR.

- 5C. DO YOU HAVE A PROBLEM?  
Itsa E/S to F/N. \_\_\_\_\_
- 6C. HAVE YOU GIVEN A PROBLEM TO ANOTHER?  
Itsa E/S to F/N. \_\_\_\_\_
- 7C. HAVE OTHERS GIVEN A PROBLEM TO SOMEONE ELSE?  
Itsa E/S to F/N. \_\_\_\_\_
- 8C. HAVE YOU GIVEN YOURSELF A PROBLEM?  
Itsa E/S to F/N. \_\_\_\_\_
- 9C. ARE YOU WITHHOLDING SOMETHING?  
Get what. 2WC E/S to F/N. \_\_\_\_\_
- 10C. IS ANOTHER WITHHOLDING SOMETHING FROM YOU?  
Get what. 2WC to F/N. \_\_\_\_\_
- 11C. ARE OTHERS WITHHOLDING SOMETHING FROM  
SOMEONE ELSE?  
Get what. 2WC to F/N. \_\_\_\_\_
- 12C. ARE YOU WITHHOLDING SOMETHING FROM  
YOURSELF?  
Get what. 2WC to F/N. \_\_\_\_\_
- 13C. HAVE YOU BEEN AUDITED OVER AN ARC BREAK?  
PROBLEM?  
WITHHOLD?  
Indicate it and handle E/S to F/N. \_\_\_\_\_  
\_\_\_\_\_
- 14C. HAVE YOU EVER HAD A SESSION ARC BREAK?  
ARCU CDEINR. \_\_\_\_\_
- 15C. HAVE YOU EVER ARC BROKEN ANOTHER IN  
SESSION?  
ARCU CDEINR. \_\_\_\_\_
- 16C. HAVE OTHERS EVER ARC BROKEN SOMEONE ELSE IN  
SESSION?  
ARCU CDEINR. \_\_\_\_\_
- 17C. HAVE YOU CAUSED YOURSELF TO HAVE A SESSION  
ARC BREAK?  
ARCU CDEINR. \_\_\_\_\_
- 18C. HAVE YOU EVER HAD A PROBLEM WITH A SESSION?  
Itsa E/S to F/N. \_\_\_\_\_
- 19C. HAVE YOU CAUSED SOMEONE TO HAVE A PROBLEM  
WITH A SESSION?  
Itsa E/S to F/N. \_\_\_\_\_
- 20C. HAVE YOU CAUSED YOURSELF TO HAVE A PROBLEM  
WITH A SESSION?  
Itsa E/S to F/N. \_\_\_\_\_
- 21C. HAVE YOU WITHHELD ANYTHING IN A SESSION?  
Get what. 2WC E/S to F/N. \_\_\_\_\_

- 22C. *HAS ANOTHER WITHHELD FROM YOU IN A SESSION?* \_\_\_\_\_  
*Get what. 2WC E/S to F/N.*
- 23C. *HAVE OTHERS WITHHELD FROM SOMEONE ELSE IN A SESSION?* \_\_\_\_\_  
*Get What. 2WC E/S to F/N.*
- 24C. *HAVE YOU WITHHELD SOMETHING FROM YOURSELF IN SESSION?* \_\_\_\_\_  
*Get what. 2WC E/S to F/N.*
- 25C. *IN LIFE HAVE YOU HAD AN ARC BREAK?* \_\_\_\_\_  
*ARCU CDEINR.*
- 26C. *IN LIFE HAVE YOU ARC BROKEN ANOTHER?* \_\_\_\_\_  
*ARCU CDEINR.*
- 27C. *IN LIFE HAVE OTHERS ARC BROKEN SOMEONE ELSE?* \_\_\_\_\_  
*ARCU CDEINR.*
- 28C. *IN LIFE HAVE YOU ARC BROKEN YOURSELF?* \_\_\_\_\_  
*ARCU CDEINR.*
- 29C. *IN LIFE HAVE YOU HAD A PROBLEM?* \_\_\_\_\_  
*Itsa E/S to F/N.*
- 30C. *IN LIFE HAVE YOU GIVEN A PROBLEM TO SOMEONE ELSE?* \_\_\_\_\_  
*Itsa E/S to F/N.*
- 31C. *IN LIFE HAVE OTHERS GIVEN A PROBLEM TO SOMEONE ELSE?* \_\_\_\_\_  
*Itsa E/S to F/N.*
- 32C. *IN LIFE HAVE YOU GIVEN A PROBLEM TO YOURSELF?* \_\_\_\_\_  
*Itsa E/S to F/N.*
- 33C. *IN LIFE HAVE YOU HAD A WITHHOLD?* \_\_\_\_\_  
*Get what. 2WC to F/N.*
- 34C. *IN LIFE HAS ANOTHER WITHHELD SOMETHING FROM YOU?* \_\_\_\_\_  
*Get what. 2WC to F/N.*
- 35C. *IN LIFE HAVE OTHERS WITHHELD SOMETHING FROM SOMEONE ELSE?* \_\_\_\_\_  
*Get what. 2WC to F/N.*
- 36C. *IN LIFE HAVE YOU WITHHELD SOMETHING FROM YOURSELF?* \_\_\_\_\_  
*Get what. 2WC to F/N.*
- 37C. *DO YOU HAVE AN ARC BREAK OF LONG DURATION?* \_\_\_\_\_  
*ARCU CDEINR.*
- 38C. *HAS ANOTHER HAD AN ARC BREAK OF LONG DURATION WITH YOU?* \_\_\_\_\_  
*ARCU CDEINR.*
- 39C. *HAVE OTHERS HAD AN ARC BREAK OF LONG DURATION WITH SOMEONE ELSE?* \_\_\_\_\_  
*ARCU CDEINR.*

- 40C. HAVE YOU HAD AN ARC BREAK OF LONG DURATION WITH YOURSELF?  
 ARCU CDEINR. \_\_\_\_\_
- 41C. DO YOU HAVE A PROBLEM OF LONG DURATION?  
 Itsa E/S to F/N. \_\_\_\_\_
- 42C. HAVE YOU GIVEN ANOTHER A PROBLEM OF LONG DURATION?  
 Itsa E/S to F/N. \_\_\_\_\_
- 43C. HAVE OTHERS GIVEN SOMEONE ELSE A PROBLEM OF LONG DURATION?  
 Itsa E/S to F/N. \_\_\_\_\_
- 44C. HAVE YOU GIVEN YOURSELF A PROBLEM OF LONG DURATION?  
 Itsa E/S to F/N. \_\_\_\_\_
- 45C. DO YOU HAVE A WITHHOLD OF LONG DURATION?  
 Get what. 2WC to F/N. \_\_\_\_\_
- 46C. HAS ANOTHER HAD A WITHHOLD FROM YOU OF LONG DURATION?  
 Get what. 2WC to F/N. \_\_\_\_\_
- 47C. HAVE OTHERS HAD A WITHHOLD OF LONG DURATION FROM SOMEONE ELSE?  
 Get what. 2WC to F/N. \_\_\_\_\_
- 48C. HAVE YOU HAD A WITHHOLD FROM YOURSELF OF LONG DURATION?  
 Get what. 2WC to F/N. \_\_\_\_\_
- 49C. HAVE YOU EVER EXPERIENCED SOME OTHER SORT OF ARC BREAK?  
 ARCU CDEINR. \_\_\_\_\_
- 50C. HAVE YOU EXPERIENCED SOME OTHER SORT OF PROBLEM?  
 Itsa E/S to F/N. \_\_\_\_\_
- 51C. IS THERE ANYTHING ELSE YOU MAY HAVE WITHHELD?  
 Get what. 2WC to F/N. \_\_\_\_\_
- 52C. HAVE YOU EVER NOT-ISED AN OUT-RUD?  
 Get what and handle per above. \_\_\_\_\_
- 53C. HAVE YOU EVER SUPPRESSED AN OUT-RUD?  
 Get what and handle per above. \_\_\_\_\_
- 54C. HAVE OUT-RUDS EVER BEEN INVALIDATED?  
 Get what and handle. \_\_\_\_\_
- 55C. ARE THERE ANY UNDISCLOSED OUT-RUDS?  
 Get what and handle. \_\_\_\_\_
- 56C. HAVE YOU EVER STUDIED OVER OUT-RUDS?  
 Get what and handle. \_\_\_\_\_
- 57C. IS THERE SOME OTHER SORT OF WITHHOLD? \_\_\_\_\_

Get what and handle per above.

- 58C. *Is THERE ANYTHING THAT YOU ARE NOT SAYING?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 59C. *Is THERE ANYTHING YOU DON'T WANT TO SAY?* \_\_\_\_\_  
Get what. 2Wc to F/N.
- 60C. *Is THERE SOMETHING YOU DON'T LIKE?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 61C. *ARE YOU PROTESTING ANYTHING?* \_\_\_\_\_  
Itsa E/S to F/N.
- 62C. *DO YOU FEEL SAD?* \_\_\_\_\_  
Itsa E/S to F/N.
- 63C. *DO YOU FEEL RUSHED?* \_\_\_\_\_  
Itsa E/S to F/N.
- 64C. *DO YOU FEEL TIRED?* \_\_\_\_\_  
Itsa E/S to F/N.
- 65C. *DO YOU FEEL UPSET?* \_\_\_\_\_  
Itsa E/S to F/N.
- 66C. *DO YOU FEEL LIKE YOU CAN'T GET IT?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 67C. *HAS ANOTHER COMMITTED OVERTS ON YOU?* \_\_\_\_\_  
Get what. 2Wc to F/N.
- 68C. *HAVE YOU COMMITTED ANY OVERTS?* \_\_\_\_\_  
Get what. 2Wc to F/N.
- 69C. *HAVE OTHERS COMMITTED OVERTS ON OTHERS?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 70C. *HAVE YOU COMMITTED ANY OVERTS ON YOURSELF?* \_\_\_\_\_  
Get what. 2Wc to F/N.
- 71C. *ARE YOU NOT-ISING ANY OVERTS?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 72C. *HAVE YOU COMMITTED CRIMES?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 73C. *ARE YOU COMMITTING CRIMES IN PT?* \_\_\_\_\_  
Get what. 2Wc to F/N.
- 74C. *IS THERE SOMETHING YOU DON'T DARE SAY?* \_\_\_\_\_  
Get what. 2WC to F/N.
- 75C. *IS THERE A LIE?* \_\_\_\_\_  
Get what. 2Wc to F/N.
- 76C. *ARE YOU HIDING FROM SOMEONE OR SOMETHING?* \_\_\_\_\_  
2Wc to F/N.
- 77C. *DO YOU HAVE CONSIDERATIONS YOU DON'T DARE SAY?* \_\_\_\_\_  
Get what. 2Wc to F/N.

- 78C. DO YOU HAVE OPINIONS YOU DON'T DARE SAY? \_\_\_\_\_  
Get what. 2Wc to F/N.
- 79C. ARE YOU HERE FOR UNDISCLOSED REASONS? \_\_\_\_\_  
Get what. 2Wc to F/N.
- 80C. DO YOU HAVE UNDISCLOSED PROBLEMS? \_\_\_\_\_  
Itsa E/S to F/N.
- 81C. IS THERE SOMETHING YOU'RE NOT TELLING YOUR AUDITOR ? \_\_\_\_\_  
Get what. 2Wc to F/N.
- 82C. Is YOUR ATTENTION NOT ON YOUR CASE IN SESSION? \_\_\_\_\_  
2Wc to F/N.
- 83C. DO YOU FEEL AFRAID TO BE AUDITED? \_\_\_\_\_  
2Wc to F/N.
- 84C. ARE YOU AFRAID SOMETHING WILL BE FOUND OUT ABOUT YOU? \_\_\_\_\_  
2Wc to F/N.
- 85C. ARE YOU WITHHOLDING YOUR ACTUAL CASE STATE? \_\_\_\_\_  
2Wc to F/N.
- 86C. ARE YOU NOT TELLING YOUR AUDITOR YOUR COGNITIONS? \_\_\_\_\_  
2Wc to F/N.
- 87C. ARE YOU UNWILLING TO TALK TO THE AUDITOR? \_\_\_\_\_  
2Wc to F/N.
- 88C. DO YOU HAVE DISAGREEMENTS? \_\_\_\_\_  
2Wc to F/N.
- 89C. ARE YOU A WARE OF SOME OTHER SORT OF OUT-RUD? \_\_\_\_\_  
Get what and handle.
- 90C. HAS ANYONE EVER TOLD YOU YOU HAD AN ARC BREAK WHEN YOU DIDN'T? \_\_\_\_\_  
Itsa E/S to F/N.
- 91C. HAS ANYONE EVER SAID YOU HAD A PROBLEM WHEN YOU DIDN'T? \_\_\_\_\_  
Itsa E/S to F/N.
- 92C. HAS ANYONE EVER SAID YOU HAD A WITHHOLD WHEN YOU DIDN'T? \_\_\_\_\_  
Itsa E/S to F/N.
- 93C. HAVE YOU EVER BEEN WRONGLY ACCUSED OF HAVING OVERTS? \_\_\_\_\_  
2Wc to F/N.
- 94C. DO YOU FEEL YOU'RE REALLY DOING FINE? \_\_\_\_\_  
2Wc to F/N.
- \_\_\_\_\_
- 1D. ARE YOU TAKING OR SMOKING DRUGS? \_\_\_\_\_  
2WC to F/N.  
Rehab releases on each "drug" taken to F/N.

If pc has had a Drug R/D, do L3RD on it and handle.  
Program the pc for a Drug R/D or verification of it if it is incomplete or there are “no interest” items.

- 2D. DID YOU ONCE TAKE DRUGS? \_\_\_\_\_  
2WC to F/N. Rehab releases on each drug to F/N. L3RD on Drug R/D if he had one. Program for Drug R/D or verification if incomplete.
- 3D. HAVE YOU TAKEN LSD? \_\_\_\_\_  
2WC to F/N. Drug rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 4D. HAVE YOU DRUNK ALCOHOL? \_\_\_\_\_  
2WC to F/N. Drug/alcohol rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 5D. HAVE YOU SMOKED POT? \_\_\_\_\_  
2WC to F/N. Drug rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 6D. ARE YOU TAKING MEDICINE? \_\_\_\_\_  
2WC to F/N. Drug/medicine rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 7D. DID YOU ONCE TAKE MEDICINE? \_\_\_\_\_  
2WC to F/N. Drug/medicine rehabs. L3RD on Drug R/D if he had one. Program for full Drug R/D or verification if unflat.
- 8D. *DO YOU WANT TO CONTINUE TO TAKE DRUGS?* \_\_\_\_\_  
2WC to F/N. Rehab releases on each “drug” taken to F/N. If pc has had a Drug R/D, do L3RD on it and handle. Program the pc for a Drug R/D or verification of it if it is incomplete or there are “no interest” items.
- 9D. DO YOU WANT TO CONTINUE TO SMOKE POT? \_\_\_\_\_  
Handle per above.
- 10D. DO YOU WANT TO CONTINUE TO DRINK ALCOHOL? \_\_\_\_\_  
Handle per above.
- 11 D. HAVE YOU TAKEN SOME DRUG NOT COVERED ? \_\_\_\_\_  
2WC to F/N. Rehab releases. If pc already had a Drug R/D, do L3RD on it and handle. Program the pc for a Drug R/D or verification of it if it is incomplete and run the new drug just found.
- 12D. IS YOUR DRUG R/D UNFLAT? \_\_\_\_\_  
2WC to F/N. L3RD on Drug R/D. Program to flatten Drug R/D.
- 13D. WAS YOUR DRUG RUNDOWN OVERRUN? \_\_\_\_\_  
Date-Locate the flat point.
- 14D. WERE THERE ITEMS NOT RUN BECAUSE YOU WEREN'T INTERESTED? \_\_\_\_\_  
2WC to F/N. L3RD on “your Drug R/D.” Program to run the no interest items.

- 15D. IS THERE A DRUG THAT HAS BEEN MISSED?  
2WC to F/N. Rehab releases. L3RD on “Drug R/D.”  
Program to complete the Drug R/D. \_\_\_\_\_
- 16D. *IS THERE SOME ALCOHOL THAT HAS BEEN MISSED?*  
*Handle per above.* \_\_\_\_\_
- 17D. HAS A MEDICINE BEEN MISSED?  
Handle per above. \_\_\_\_\_
- 18D. IS THERE SOMETHING THAT ACTS LIKE A DRUG?  
Handle per above. \_\_\_\_\_
- 19D. ON YOUR DRUG RUNDOWN IS THERE AN UNFLAT  
PROCESS ON RECALLS?  
2WC to F/N. Program to flatten the Recalls and L3RD on the  
Drug R/D. \_\_\_\_\_
- 20D. ON YOUR DRUG R/D IS THERE AN UNFLAT  
SECONDARY CHAIN?  
L3RD on the secondary chain. Then L3RD on your Drug R/D. \_\_\_\_\_
- 21D. ON YOUR DRUG RUNDOWN ARE THERE ANY UNFLAT  
ENGRAMS?  
L3RD on unflat engrams on your Drug R/D. \_\_\_\_\_
- 22D. ON YOUR DRUG R/D IS THERE SOME MISSED WHOLE  
TRACK DRUG, MEDICINE OR ALCOHOL?  
2WC to F/N. L3RD on Drug R/D. Program to finish the Drug  
R/D and run the missed drug, medicine or alcohol. \_\_\_\_\_
- 23D. ARE YOUR OBJECTIVES UNFLAT?  
2WC to F/N. Program to flatten. \_\_\_\_\_
- 24D. WERE YOUR OBJECTIVES OVERRUN?  
Rehab the releases. \_\_\_\_\_
- 25D. DO YOU STILL FEEL THE SAME ABOUT DRUGS,  
MEDICINE OR ALCOHOL?  
2WC to F/N. If pc has had a Drug R/D do an L3RD. Program to  
complete Drug Rundown or do one if never had. \_\_\_\_\_
- 26D. IS THERE NOTHING WRONG WITH YOUR DRUG R/D?  
2WC to F/N. \_\_\_\_\_
- 27D. DO YOU FEEL LIKE YOUR DRUG RUNDOWN HAS BEEN  
OVERREPAIRED?  
Date-Locate flat point of repair of Drug R/D. \_\_\_\_\_
- 1E. IS THERE AN ENGRAM IN RESTIMULATION?  
Find out which and do L3RD and handle per its instructions. \_\_\_\_\_
- 2E. ARE THERE UNFLAT CHAINS?  
Find out what chains and L3RD on each. \_\_\_\_\_
- 3E. DO YOU HAVE A STUCK PICTURE?  
Indicate it. Do an L3RD on it. You can also unstick it by  
having him recall a time before it and recall a time after it.  
D/L if necessary. C/S can order Picture and Masses Remedy  
Dn done after this list is handled—if necessary. \_\_\_\_\_
- 4E. DO YOU HAVE PICTURES IN RESTIMULATION? \_\_\_\_\_

L3RD and handle. Pictures and Masses Remedy Dn.

- 5E. DO YOU HAVE MASSES IN RESTIMULATION?  
L3RD and handle. Pictures and Masses Remedy Dn. \_\_\_\_\_
- 6E. HAS THE SAME ENGRAM BEEN RUN TWICE?  
L3RD and handle. \_\_\_\_\_
- 7E. YOU CAN'T SEE ENGRAMS TOO WELL?  
Do L3RD Method 5 and handle. Program for L3RD  
Rundown if necessary. \_\_\_\_\_
- 8E. IS IT INVISIBLE?  
Spot the invisible field or picture. L3RD on it and handle. \_\_\_\_\_
- 9E. IS IT ALL BLACK?  
Spot the black field or picture. L3RD on it and handle. \_\_\_\_\_
- 10E. HAS THERE BEEN A LOSS?  
Do L3RD on it and handle. Run it out R3R Triple if not run  
out and still not handled. \_\_\_\_\_
- 11E. HAVE YOU LOST ANYTHING?  
Do L3RD on it and handle. If not yet run out and still  
unhandled run R3R Triple. \_\_\_\_\_
- 12E. *DO YOU HAVE MISUNDERSTOODS ON R3R  
PROCEDURE?*  
*2WC to F/N. Program for an Auditing C/S-1.* \_\_\_\_\_
- 13E. *DO YOU HAVE MISUNDERSTOODS ON AUDITING?*  
*2WC to F/N. Program for an Auditing C/S-1.* \_\_\_\_\_
- 14E. *DO YOU HAVE TROUBLE GOING WHOLE TRACK?*  
*2WC to F/N. Program to handle with whole track remedies.* \_\_\_\_\_
- 15E. *HAVE YOUR DIANETIC ITEMS NOT BEEN TRIPLED?*  
*2WC to F/N. Program to Triple Dianetics.* \_\_\_\_\_
- 16E. *HAVE YOUR DIANETIC ITEMS NOT BEEN QUADED UP?*  
*2WC to F/N. Program to Quad Dianetics.* \_\_\_\_\_
- 17E. *HAVE YOU RUN ANYTHING QUAD WHEN YOU WERE A  
TRIPLE PC?*  
*2WC to F/N. Program to handle with FFD.* \_\_\_\_\_
- 18E. *ARE THERE ANY UNRUN FLOWS?*  
*2WC to F/N. Program to put in unrun flows.* \_\_\_\_\_
- 19E. *ARE THERE ANY MISSED FLOWS?*  
*2WC to F/N. Program to handle missed flows.* \_\_\_\_\_
- 20E. *DO YOU BLOW INCIDENTS BY INSPECTION?*  
*2WC to F/N. If 2WC shows Dianetic auditing is charged  
do L3RD on your Dianetic auditing.* \_\_\_\_\_
- 21 E. *DO YOU HAVE ANY PERSISTENT MASSES?*  
*2WC to F/N. L3RD on persistent masses.* \_\_\_\_\_
- 22E. *IS SOMETHING ELSE WRONG WITH INCIDENTS?*  
*2WC to F/N. Program to handle what comes up.* \_\_\_\_\_

- 23E. *WERE COMMANDS WRONG?* \_\_\_\_\_  
*2WC to F/N. Program to handle what comes up.*
- 24E. *DO INCIDENTS FAIL TO ERASE?* \_\_\_\_\_  
*2WC to F/N. Program to handle what comes up.*
- 25E. *IS IT ALL OK?* \_\_\_\_\_  
*2WC to F/N.*
- \_\_\_\_\_
- 1F. *HAS THE SAME THING BEEN RUN TWICE?* \_\_\_\_\_  
*Clean up any protest and inval and rehab to F/N.*
- 2F. *HAS THE SAME ACTION BEEN DONE BY ANOTHER AUDITOR?* \_\_\_\_\_  
*Clean up any protest and inval and rehab to F/N.*
- \_\_\_\_\_
- 1G. *ARE YOU DOING SOMETHING WITH THE MIND BETWEEN SESSIONS?* \_\_\_\_\_  
*Find out what it is. If yoga or mystic exercises or some such, 2WC E/S to first time done, find out what upset had occurred before that and if TA now down, do L1C on *that* period of pc's life.*
- 2G. *ARE YOU INVOLVED IN SOME OTHER PRACTICE?* \_\_\_\_\_  
*Find out what it is. If yoga or mystic exercises or some such, 2WC E/S to first time done, L1C on the prior upset or period of pc's life just before that.*
- 3G. *HAVE YOU BEEN AUDITED PAST EPs ?* \_\_\_\_\_  
*2WC to F/N. Rehab the EPs that were audited past.*
- 4G. *HAVE YOU BEEN AUDITED PAST A BLOW?* \_\_\_\_\_  
*2WC to F/N. Date to blow. Locate to blow.*
- 5G. *HAVE YOU EVER PROTESTED AN ACTION?* \_\_\_\_\_  
*Itsa E/S to F/N.*
- 6G. *ARE YOU INVOLVED IN SOME OUT-ETHICS?* \_\_\_\_\_  
*Get what. 2WC to F/N.*
- 7G. *DO YOU FEEL YOU HAVE TO HANDLE YOUR OWN CASE AFTER SESSION?* \_\_\_\_\_  
*2WC to F/N.*
- 8G. *DO YOU FEEL LIKE YOU DON'T HAVE AN AUDITOR?* \_\_\_\_\_  
*2WC to F/N.*
- 9G. *IS IT NO AUDITING?* \_\_\_\_\_  
*2WC to F/N.*
- \_\_\_\_\_
- 1H. *ARE THERE WORD CLEARING ERRORS?* \_\_\_\_\_  
*Do a Word Clearing Correction List, handle all reads.*
- 2H. *ARE THERE ANY MISUNDERSTOOD WORDS?* \_\_\_\_\_  
*Find and clear them up. Use a WCCL, handle all reads.*

- 3H. ARE THERE ANY MISUNDERSTOOD WORDS IN SESSION?  
Find and clear them up. Use a WCCL if necessary. \_\_\_\_\_
- 4H. ARE THERE STUDY ERRORS?  
2WC to F/N and add a Student Rehabilitation List (HCOB 15 Nov 74) or full Study Correction List (BTB 4 Feb 72RC) to the pc's program. \_\_\_\_\_
- 5H. ON STUDY IS THERE SOME OTHER KIND OF BPC?  
2WC to F/N. Program to handle what comes up. \_\_\_\_\_
- 1I. HAVE YOU EVER HAD TROUBLE WITH YOUR TA OR F/Ns?  
Use HCOBs 24 Oct 71R, 12 Nov 71RA, 18 Nov 72, 29 Feb 72, 23 Nov 73RA, all on False TA. Then clean up the bypassed charge with 1) Assess for best read a) TA worries b) F/N worries. 2) Then 2WC times he has worried about (item) E/S to F/N. 3) Rehab any overruns due to false TA obscuring F/Ns. \_\_\_\_\_
- 2I. HAVE YOU HAD A FALSE TA?  
Handle as in 1I. \_\_\_\_\_
- 3I. ARE YOU USING THE WRONG SIZED CANS?  
Handle as in 1I. \_\_\_\_\_
- 4I. DO YOUR HANDS GET TIRED IN AUDITING?  
Handle as in 1I. \_\_\_\_\_
- 5I. ARE YOUR HANDS DRY?  
Handle as in 1I. \_\_\_\_\_
- 6I. ARE YOUR HANDS WET?  
Handle as in 1I. \_\_\_\_\_
- 7I. DO YOU LOOSEN YOUR GRIP ON THE CANS?  
Handle as in 1I. \_\_\_\_\_
- 8I. ARE YOU USING THE WRONG HAND CREAM?  
Handle as in 1I. \_\_\_\_\_
- 9I. HAVE YOU HAD TA HASSLES?  
Assess for best read (a) TA worries (b) F/N worries. 2WC times he was worried about (item) E/S to F/N. Rehab the overruns due to false TA obscuring F/Ns. \_\_\_\_\_
- 10I. ARE YOU WEARING ANY TIGHT CLOTHING?  
Handle as in 1I. \_\_\_\_\_
- 11I. IS THERE SOMETHING ELSE CAUSING FALSE TA?  
Find out what it is and handle as in 1I. \_\_\_\_\_
- \_\_\_\_\_
- 1J. HAVE YOU BEEN SELF-AUDITING?  
2WC to first time. L1C on the prior upset or if prior upset was in auditing use the appropriate correction list and L1C on that time. \_\_\_\_\_
- 2J. WAS A WRONG OVERRUN FOUND?  
Correct it to F/N by indication and rehabbing the right \_\_\_\_\_

overrun.

- 3J. HAS THERE BEEN AN OVERRUN IN LIFE? \_\_\_\_\_  
Locate, indicate, rehab to F/N.
- 4J. HAS THERE BEEN AN OVERRUN IN AUDITING? \_\_\_\_\_  
Locate, indicate, rehab to F/N.
- 5J. HAS THERE BEEN SOMETHING WRONG WITH F/Ns? \_\_\_\_\_  
Indicate. 2WC E/S to F/N. Rehab if necessary.
- 6J. HAVE F/Ns BEEN OVERRUN? \_\_\_\_\_  
Indicate. 2WC E/S to F/N. Rehab if necessary.
- 7J. HAVE F/Ns NOT BEEN INDICATED? \_\_\_\_\_  
Indicate. 2WC E/S to F/N. Rehab if necessary.
- 8J. HAVE F/Ns BEEN MISSED? \_\_\_\_\_  
Indicate. 2WC E/S to F/N. Rehab if necessary.
- 9J. HAVE AUDITING QUESTIONS NOT BEEN UNDERSTOOD? \_\_\_\_\_  
2WC, get them properly understood with Word Clearing, E/S if needed to F/N.
- 10J. *COULDN'T HEAR THE AUDITOR?* \_\_\_\_\_  
*2WC E/S to F/N.*
- 11J. *COULDN'T UNDERSTAND WHAT WAS BEING SAID?* \_\_\_\_\_  
*2WC E/S to F/N.*
- 12J. *COULDN'T UNDERSTAND WHAT WAS BEING DONE?* \_\_\_\_\_  
*2WC E/S to F/N.*
- 13J. HAVE ITEMS NOT REALLY READ? \_\_\_\_\_  
2WC E/S to F/N.
- 14J. DID YOU SAY SOMETHING MUST HAVE READ? \_\_\_\_\_  
2WC E/S to F/N.
- 15J. WERE YOU STILL UPSET WHEN SOMEBODY THOUGHT IT WAS HANDLED? \_\_\_\_\_  
Find and handle to F/N.
- 16J. HAVE YOU HAD BAD AUDITING? \_\_\_\_\_  
2WC E/S to F/N.
- 17J. ARE THERE INCOMPLETE ACTIONS? \_\_\_\_\_  
2WC E/S to F/N.
- 18J. HAS THERE BEEN ANY INVALIDATION? \_\_\_\_\_  
2WC E/S to F/N.
- 19J. HAS THERE BEEN ANY EVALUATION? \_\_\_\_\_  
2WC E/S to F/N.
- 20J. COULDN'T YOU GET AUDITING? \_\_\_\_\_  
2WC E/S to F/N.
- 21J. HAVE THERE BEEN INTERRUPTIONS? \_\_\_\_\_  
2WC E/S to F/N.

- 22J. DOES YOUR AUDITOR OVERWHELM YOU?  
2WC E/S to F/N. \_\_\_\_\_
- 23J. DO YOU FEEL ATTACKED?  
2WC E/S to F/N. \_\_\_\_\_
- 24J. ARE YOU SCARED OF WHAT MIGHT HAPPEN IN  
AUDITING?  
2WC E/S to F/N. \_\_\_\_\_
- 25J. ARE YOU TALKING TO OTHERS ABOUT YOUR CASE?  
2WC E/S to F/N. \_\_\_\_\_
- 26J. ARE YOU LISTENING TO OTHERS TALK ABOUT THEIR  
CASES?  
2WC E/S to F/N. \_\_\_\_\_
- 27J. HAVE YOU BEEN LOOKING AT OR LISTENING TO TECH  
MATERIALS YOU SHOULDN'T?  
2WC E/S to F/N. \_\_\_\_\_
- 28J. ARE YOU WAITING FOR SOMETHING TO HAPPEN?  
2WC E/S to F/N. \_\_\_\_\_
- 29J. *HAVE YOU BEEN GIVEN FALSE READS?*  
*2WC E/S to F/N.* \_\_\_\_\_
- 30J. *WERE YOU RUN ON A WRONG C/S?*  
*2WC E/S to F/N.* \_\_\_\_\_
- 31J. *DID YOU HAVE A PERSONALITY CLASH WITH AN  
AUDITOR?*  
*2WC E/S to F/N.* \_\_\_\_\_
- \_\_\_\_\_
- 1K. IS SOMEONE OR SOMETHING HOSTILE TO YOU?  
Check for SP with a PTS interview or get a full PTS R/D  
programmed. \_\_\_\_\_
- 2K. ARE YOU PTS ?  
PTS interview or get a full PTS R/D programmed. \_\_\_\_\_
- 3K. ARE YOU CONNECTED TO SOMEONE HOSTILE TO  
DIANETICS OR SCIENTOLOGY?  
PTS interview or get a full PTS R/D programmed. \_\_\_\_\_
- 4K. DO YOU FEEL SUPPRESSED?  
PTS interview or get a full PTS R/D programmed. \_\_\_\_\_
- 5K. *DO YOU HAVE SOME OTHER SORT OF PTS  
CONNECTION?*  
*PTS interview or get a full PTS R/D programmed.* \_\_\_\_\_
- 6K. *YOU'RE NOT PTS?*  
*2WC to F/N.* \_\_\_\_\_
- 1L. *SOME SORT OF CAN'T HAVE?*  
*Find correct Havingness Process and remedy.* \_\_\_\_\_
- 2L. *IS YOUR HAVINGNESS LOW?*  
*Find correct Havingness Process and remedy.* \_\_\_\_\_

- 3L. *HAVE YOU BEEN RUN ON THE WRONG HAVINGNESS PROCESS?*  
Find correct Havingness Process and remedy. \_\_\_\_\_
- 4L. *HAVE YOU BEEN RUN ON HAVINGNESS WITHOUT CONFRONT?*  
Find correct Havingness and Confront Process and remedy. \_\_\_\_\_
- 5L. *YOU DIDN'T NEED ANY HAVINGNESS?*  
2WC to F/N. \_\_\_\_\_
- 6L. *YOUR HAVINGNESS IS FINE?*  
2WC to F/N. \_\_\_\_\_
- \_\_\_\_\_
- 1M. HAS SOMETHING GONE ON TOO LONG?  
Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow if qualified). \_\_\_\_\_
- 2M. YOU WENT ON BY A RELEASE POINT?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 3M. HAS SOMETHING BEEN OVERRUN?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 4M. THE AUDITOR KEPT ON GOING?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 5M. HAS THERE BEEN ANY OVERREPAIR?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 6M. ARE YOU PUZZLED ABOUT WHY THE AUDITOR KEEPS ON?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 7M. ARE THERE STOPS?  
Find out what. Clean up any protest. Rehab to F/N or D/L. \_\_\_\_\_
- 8M. *IS THERE SOMETHING ELSE WE SHOULD COVER?*  
2WC to F/N. \_\_\_\_\_
- \_\_\_\_\_
- 1N. HAVE YOU SEPARATED OUT?  
2WC E/S to F/N. Then Triple Expanded Grade Two or L10 on Advance Program. \_\_\_\_\_
- 2N. ARE YOU SOMEBODY ELSE?  
2WC E/S to F/N. Program for LX Lists. \_\_\_\_\_
- 3N. DO YOU THINK SOMETHING ELSE IS WRONG?  
2WC to find what. Note BD item. If BD item is covered by one of the other questions on the list, handle per instructions. Otherwise, GF M5 and handle. \_\_\_\_\_
- 4N. ARE YOU PHYSICALLY ILL?  
2WC to find what. Note BD item. 2WC to F/N and get further C/S instructions for handling if necessary. \_\_\_\_\_
- 5N. *DID YOU THINK OF SOMETHING ELSE THAT SHOULD HAVE BEEN ON THIS ASSESSMENT?*  
2WC to F/N. \_\_\_\_\_

10. *HAVE WE BEEN REPAIRING A TA THAT ISN'T HIGH?* \_\_\_\_\_  
 2WC to F/N.
20. *HAVE WE BEEN REPAIRING A TA THAT ISN'T LOW?* \_\_\_\_\_  
 2WC to F/N.
30. **IS THE METER FAULTY?** \_\_\_\_\_  
 Get pc to tell you about it briefly. If correct, then indicate  
 to F/N. Go E/S and indicate it if no F/N on first.
40. **IS THERE NOTHING WRONG?** \_\_\_\_\_  
 Get pc to tell you about it briefly. If correct, then indicate  
 to F/N. Go E/S and indicate it if no F/N on first.

\_\_\_\_\_

- 1P. **WAS THERE A FALSE EXAM REPORT?** \_\_\_\_\_  
 Indicate and 2WC to F/N.
- 2P. **HAVE YOU HAD TO WAIT AT THE EXAMINER?** \_\_\_\_\_  
 Indicate and 2WC to F/N.
- 3P. **HAVE YOU BEEN UPSET BY THE EXAMINER?** \_\_\_\_\_  
 Indicate and 2WC to F/N.

**PTS RD ADDITION**

(Refers to:  
*HCOB 9 Dec 71R PTS RUNDOWN,*  
*Rev. 8 Dec 78 AUDITED)*

The only reasons a PTS RD does not work are:

C/S error: 1. Not doing one at all.

C/S error: 2. Doing one in the middle of another RD.

C/S error: 3. Doing one without set-up, *including a complete PTS C/S-1.*

C/S error: 4. The person was not PTS—which is to say was not chronically ill or roller-coaster and the items or *flows* didn't read.

Auditor error: 5. The RD was badly run auditor-wise. R3R was bad, metering poor, ruds not correctly or fully done.

Auditor & C/S error: 6. The RD was quickie, only doing step (a) and brushing it off.

C/S error: 7. Even though the whole RD was done fully, there remained on the case an undetected additional person or thing to which the pc was PTS.

The rules of PTS are

A PERSON WHO ROLLER-COASTERS IS ALWAYS PTS.

A PERSON WHO IS CHRONICALLY ILL ALWAYS IS PTS.

A PTS RUNDOWN THAT DOES NOT WORK HAS NOT BEEN DONE AS PER 1 TO 7 ABOVE.

The remedies to the above are

1. Do it.
2. Pgm it in correct sequence.
3. Set the case up properly so it is running well and past errors handled.
4. Establish how well the person holds his gains before pgming one. If any Q at all, do the RD.

5. Cram the auditor on TRs, metering, R3RA drills and ruds. Do *L4BRA*, . . . L3RF on the pc *and handle* accordingly.
6. Complete the *rundown*.
7. 2WC “What is your attention on?” to F/N. On PTS Rundown fly all ruds single; L&N “On the PTS Rundown what being or thing was missed?”; R3RA Triple or *Quad* on it; fly all ruds and overts on it Triple or *Quad*; run “*Can’t Have/Enforce Have*” Triple or *Quad*. If all not very okay now L&N “What other subject or people might have been overlooked on the PTS Rundown?” *and handle the item on each step of the rundown per HCOB 9 Dec 71RC, Rev. 8 Dec 78 PTS RUNDOWN.*

A PTS RD *always* works. If it works with a relapse there is an error in it as in the numbered paras above.

THIS IS VITAL TECH TO THE PC. IT MAKES THE MOST DIFFICULT CASES FLY *IF IT IS DONE RIGHT.*

**PTS RUNDOWN, FINAL STEP**

The following is an additional step to the PTS Rundown developed by me and tested at Flag. This step is run after *each* terminal is run, to prevent bypassing charge.

THE STEPS ARE:

1. Select the terminal already run in R3RA and ruds.
2. Clear "can't have," "couldn't have" as DENIAL OF SOMETHING TO SOMEONE ELSE. Clear "enforced have" as MAKING SOMEONE ACCEPT WHAT THEY DIDN'T WANT. Have pc get the idea of these with an example or two.
3. Run on the SP item "can't have/enforced have" as motivator repetitive, then overt repetitive, the Flow Three terminal to others, others to terminal *and the Flow Zero of the pc to himself because of the terminal* (four flows of two commands each or five if the pc is Quad). *Check the flows for a read before running them. Do not run unreading flows.*
4. After *the terminal* is handled with the four (or five) flows of "can't have/enforced have" Objective Havingness should be run. Then the next PTS Rundown item is taken up *and run on all steps, as above.*

THE COMMANDS:

F1. *Did \_\_\_\_\_run a can't have on you? Tell me about it.*

*Did \_\_\_\_\_force something on you you didn't want?  
Tell me about it. (Alternate/repetitive to EP.)*

F2. *Did you run a can't have on\_\_\_\_\_?  
Tell me about it.*

*Did you try to force something on\_\_\_\_\_that he (she, it)  
didn't want? Tell me about it. (Alternate/repetitive to EP.)*

F3. *Did \_\_\_\_\_run a can't have on others?  
Tell me about it.*

*Did \_\_\_\_\_force something on others they didn't want?  
Tell me about it. (Alternate/repetitive to EP.)*

F3A. *Did others run a can't have on\_\_\_\_\_?  
Tell me about it.*

*Did others force something on\_\_\_\_\_that he (she, it) didn't want?  
Tell me about it. (Alternate/repetitive to EP.)*

F0. *Did you run a can't have on yourself because of \_\_\_\_\_?  
Tell me about it.*

*Did you try to force something on yourself that you didn't want because  
of \_\_\_\_\_?  
Tell me about it.* (Alternate/repetitive to EP.)

## —OBJECTIVE HAVINGNESS—

### THEORY

The theory is that SPs are SPs because they deny Hav and enforce unwanted Hav. They also deny *do* and enforce unwanted *do*. They also deny *be* and enforce unwanted *be*. This is why we have never before been able to run Subjective Hav. It collided with SPs, overts, and withholds on them.

A very full rundown then would be to start with *don't be, must be*; go on to *don't do must do*: end up with *can't have, enforced have*. (Not to be run at this time.) Hav alone should handle without resorting to be or do.

END OFF AT ONCE AND BEGIN OBJECTIVE HAVINGNESS IF THE TA SOARS OR THE PC CAVES IN. If this does not handle, then do a C/S 53RL at once and handle.

### PTS RD NOTES

With the issue of HCOB 17 Mar 74, TWC, USING WRONG QUESTIONS, it becomes necessary to convert the PTS RD 2WCs for items into L&N questions. Example: Who have you known this lifetime who has troubled or worried you? L&N to BD F/N item.

Avoid listing the same question twice. The L&N for places and planets should be restricted to planets only on VA pcs and an L4BRA used at the first sign of trouble.

Additional PTS RD items can be obtained from past PTS interviews. Done by L&N the RD is very powerful and direct. The pc must be well set up for it.

***Word Clearing Series 46RC***

**METHOD 9 WORD CLEARING THE RIGHT WAY**

(Cancels BTB 30 January 1973RA  
Word Clearing Series 46RA  
METHOD 9)

*(Ref: M9 PICTURE BOOK—which will be  
issued in due time as part of a special course.  
HCOB 23 March 78RA Revised 14 Nov 79,  
Word Clearing Series 59RA, CLEARING WORDS.)*

*Word Clearing Series 46RB was the first HCOB which gave the full and correct use and handling of M9. It has been revised here to include developments on how one goes about clearing a word. This revision is on page 133, section 7 “CLEAR THE WORD.” There are five other changes, all minor. Earlier write-ups on this subject, not by myself, stated that the person’s Mis-U was that word on which he stumbled. This is not the case. It is only occasionally the word on which he stumbles that is misunderstood. Usually, as was covered long since in study tech, it is the earlier word or symbol which has caused the stumble or twitch or blink or omit or mispronunciation or what have you.*

**HISTORICAL**

Method 9 Word Clearing was first developed in a pilot project which sought to teach people to read who were not reading in their native tongue. The first versions of M9 were not correctly written up but the technology nevertheless began to spread in use. It was found that not only non-English students didn’t know what they were reading but as the educational standards of the culture deteriorated, it was found that people reading in their native tongue could benefit with the use of M9. It was then found that college students could not get through M9. And the latest survey has demonstrated that 31 school teachers taken at random throughout the school systems flunked M9 on their common reading materials. What has apparently happened here is that we have drifted down in literacy to a point where the culture can’t read or hear. In a technical culture such as this, one should not ask further why it is failing.

Because there are not enough Supervisors to personally M9 all the people on the planet, much less a medium size class, it has to be done on a turnabout basis by the students themselves. This caused a difficulty with M9 because one was asking students who couldn’t read to understand how to do the Method 9 which would find the things which prevented them from reading. Here again we have the chicken and egg problem. Therefore, *the procedure has been demonstrated in a picture book which will be issued in due time as a part of a special course.* This picture book shows the student how to M9 another student and he can, after being drilled by the Supervisor on the picture book. So this has also been solved.

M9 is probably the top key method of Word Clearing today. You would be utterly amazed to find somebody who habitually reads Western stories cannot pass an M9 on them. He sees, “He mounted his roan (a type of horse)” and he understands from this,

“He roamed around the mountains.” He has become so accustomed to not-ising his inability to understand what he is reading that he thinks it is ordinary. Isn’t that the way everybody reads?

M9 brings it home forcefully to him that he really doesn’t understand what he is reading. This is not why one uses it. One uses it to produce somebody who can read. But, like one of the English teachers who was M9ed on his own text, although he may begin with hostile protest that of course he knows what he is reading, he soon gets into the real reality of it and sees where he is at. His willingness to continue then has already been secured.

It will be found that the simple things are the main things on which he stumbles. Thus M9ing is usually preceded by M8 as covered in the new basic comprehensive reading course. This shows him by picture book how to use a dictionary and gets him to define the simple words of the language. Commas, semicolons, even capital letters will be found to be commonly misunderstood.

The usefulness of M9 has gone then from a way of spotting the points where a foreign language student is falling down to detecting and handling the professors and the rest of the culture. It is an extremely important method of Word Clearing and should be learned very well.

### HOW TO LEARN METHOD 9

Method 9 Word Clearing is a way of finding the words a person doesn’t understand in a book or other written material by having him read it aloud to the Word Clearer.

It is very simple and precise and it can be done by students on one another with great success as well as by a professional Word Clearer. Method 9 does not require expertise and it does not require a meter as many other methods of Word Clearing do. *Method 2 Word Clearing is very similar to Method 9 but it requires the use of a meter to pick up the misunderstands. The virtue of Method 9 is that, while it is very thorough and effective, it is not restricted in use to those who can operate a meter and who have other expertise needed for Method 2. It can therefore be learned very easily and used very broadly. To teach M9 the Supervisor gets the student through the picture book version of M9, which will be issued in due time as part of a special course and drills him so that he can do Method 9 Word Clearing and he can M9 other students. One can also learn how to do it all by himself by going through this picture book and this HCOB.*

### MISUNDERSTOOD WORDS

A student, when reading by himself, often does not know he has gone past misunderstood words. But whenever he does go by misunderstood words, he will have trouble with what he is reading.

A misunderstood word keeps a person from duplicating what the written materials actually say. It causes the communication formula to go out.

A word can be misunderstood in many different ways and it is important that these different types of misunderstands are known to the person doing Method 9. A word can be misunderstood because of a *false* (totally wrong) definition, an *incorrect* definition, an *incomplete* definition, an *unsuitable* definition, a *homonymic* (one word which has two or more distinctly separate meanings) definition, a *substitute* (synonym—a word which has a similar but not the same meaning) definition, a *no* (omitted) definition, a *rejected* (by the person himself, usually due to a false datum) definition or an *invented* (by the person himself, usually due to a false datum) definition. This is covered more fully on HCOB *17 Jul 79 Issue 1, THE MISUNDERSTOOD WORD DEFINED.*

If a person has habitually gone past many, many misunderstood words in his reading or his education (which most everybody in this present culture has), not only will his ability to read be lowered but also his intelligence. What he himself writes and says won't be understood, what he reads and hears he won't understand, and he will be out of communication. The probability is that he will have sunk back to the first dynamic, the world will look like a very peculiar place to him, he will feel that he is "not understood" (how true!) and life will look a bit miserable to him. He can even appear to others to be criminal. At best he will become a sort of robot or zombie. So you see, it is very important to clear misunderstood words. Lack of the ability to communicate probably underlies the causes for the current drug culture.

You will be amazed that somebody who appears to be a criminal idiot all of a sudden begins to look comparatively like a genius after he has been M9ed.

### WHY METHOD 9 WORKS

A student who understands all the words on the page he is reading will be able to read the page aloud perfectly. He will feel bright and alert and will fully understand what he reads. But when a student passes a word or symbol he doesn't understand, the misunderstood causes an interruption of his voice or physical beingness. His voice may change, or he may stumble on a word or make a face or squint his eyes or react in some other way.

This is easy to understand if you remember that a person can go blank after he passes a word or symbol he doesn't understand. He may make a mistake in his reading right there at the point of the misunderstood, or he may continue reading past the misunderstood and make a mistake on a later word or symbol. He will feel duller and he will try to make up for the dull feeling by reading with more effort. This will always be expressed by a nonoptimum action of some kind which must be noted and handled at once by the Word Clearer.

A nonoptimum reaction is anything the student does besides read the page *easily naturally*. and *perfectly*. Examples of some of the nonoptimum reactions that may show up are:

1. Student adding a word or leaving out a word or changing a word in the sentence he is reading.
2. Student stumbling on a word or saying it incorrectly.
3. Student pausing or reading more slowly.
4. Student frowning or looking uncertain.
5. Student going stiff or tensing a body part, such as squinting his eyes or tightening the grip of his hands, or biting his lip or some other physical reaction.
6. Student reading with effort.
7. Student reading with a glib, robotic attitude (which is how he gets after he has been forced to read "correctly" by someone who doesn't know anything about Mis-Us).

Other manifestations can occur.

Note that the above is not a complete list of reactions but is intended to give an idea of what to look for. In all fairness, one can stumble when reading if he is trying to read in a dim light or he is having eye trouble or the print or handwriting or pencilled corrections in the text are very hard to make out. Thus it is necessary to do M9 Word Clearing only in bright light and if the fellow is supposed to be wearing glasses, he should be wearing glasses, and the material being M9ed must not contain smudges and

deletions itself. All possible reasons why he cannot *see* the text and unclear text must be removed. Otherwise, the student will simply say he couldn't see it or the light was bad or some other wrong *Why*.

Anytime the person makes an error in his reading or reacts in some nonoptimum way, a misunderstood will ALWAYS be found just *before* that point or sometimes at that point itself.

*Example:* The student is reading the page aloud. He reads, "Raymond walked home slowly and thoughtfully," then he frowns. The other student, who is M9ing him says: "That's it. Is there some word or symbol there that you didn't understand?" (If the student wonders why he was stopped, the Word Clearer tells him what reaction he noticed.)

The student looks over what he has read. He feels uncertain about the word "slowly." He tells this to the Word Clearer and the word "slowly" is looked up in the dictionary and used in sentences until the student fully understands it.

When the word that was misunderstood is located and cleared, the student will brighten up and will begin reading clearly and correctly once again.

### THE GLIB STUDENT

Glibness is often trained into students by the current educational methods used in schools. The student is drilled to suppress or go by misunderstood words and to robotically answer back with what the book says. If he can do this, he is said to be a "good student" and a "good reader."

With this method, a student's understanding of what he has read is actually considered to be separate from the act of reading. If the educators bother with comprehension at all, it is only to measure memorization, not understanding.

In today's schools, students are actually instructed to go right on past words they don't understand; to figure out how to say them and to continue reading whether they understand the text or not. One textbook even advises, "If you find a hard word, read it as best you can and continue to read." Students are expressly drilled to suppress reactions such as mispronouncing words, substituting one word for another, inserting extra words, repeating words, and omitting words. These reactions indicate misunderstandings have been bypassed, but under heavy drilling a student can learn to become robotic enough to suppress even these reactions, and read on, leaving misunderstandings piled up behind him. In all fairness, his teachers were not just trying to victimize him. The discovery of the effects of a misunderstood word and the reasons for such stumbles had not been discovered. Teachers did not know about them. Thus they invented various drills to force the student not to make these "comprehension errors." They did not have the tech or even know what caused these manifestations. You have the reasons for them in Method 9 and in study tech.

You can spot a glib student on Method 9 because he sounds and looks robotic when he reads. One step to take on such a glib student is to ask him if he has ever been taught to suppress reactions on words which, when he read them, he did not understand. One is asking him to take the "suppress" off. He will tell you immediately that he has been when this is true, and some emotional reaction can occur. One simply lets him talk about it until the charge seems to be off of it and then gets him to start his M9ing again. Some of it may be left, of course, but he will gradually get into it and become more honest and more there. He thinks, of course, when you're M9ing him that you simply want him to utter certain sounds. This is what he has been trained to expect. If he is supposed to read aloud, he is supposed to utter certain sounds. These sounds, of course, are meaningless to him but that doesn't matter. Previously, his whole purpose and training pattern in reading aloud was narrowed into getting passed. So it may be necessary for the Supervisor to take up why he is being M9ed. But even though he is reading like a robot and suppressing everything, you will be able to see the

suppression deepen when he hits the really big Mis-U's. He reads them even more robotically than he does the other parts of the text, so these too can be detected. As soon as he has found a few of these things out and found out what you are trying to do, he will begin to respond much more readily with M9. Method 9 on common reading materials will show up a student's lack of reading comprehension and show up his misunderstandings so that he can really see it for himself. It may be an entirely new idea to him that written pages and sound waves communicate something.

Another method, an extreme one, of handling the extensively mistrained glib student is to get him to read a paragraph and then, employing a method known as "clay table," get him to demonstrate it. He won't be able to do so. Furthermore, he will realize he isn't able to do so. It was just sounds.

## METHOD 9 ON COMMON READING MATERIALS

To do Method 9 on common reading materials, the student chooses a paperback book or something that he reads for his own pleasure and he reads it aloud to the Word Clearer.

If he cannot read it perfectly, it is because he has gone by misunderstood words. At first it may not be real to the student that he has misunderstood words. But after he has found and cleared a number of them using Method 9, the student will realize that he *does* have misunderstood words and that his misunderstandings are getting in the way of his ability to read.

When the student reaches the point of realizing that he does actually have misunderstood words on the materials he commonly reads for his own pleasure, he becomes very willing to find his own misunderstood words and he can usually do so easily. Method 9 of common reading materials can be ended at this point. The student is now much more aware of and *able to find and handle his own misunderstandings* and he is on his way toward reading naturally, correctly and *with understanding*.

## HOW TO DO METHOD 9

### 1. STUDENT AND WORD CLEARER SIT ACROSS FROM EACH OTHER.

The student and the Word Clearer sit across from each other at a table or desk. Each person has his own copy of the text to be word cleared. The Word Clearer must be able to see the student *and* the page in front of him at the same time.

### 2. DICTIONARIES ARE AVAILABLE.

A good, simple English language dictionary, and any other dictionaries the student may need are available. (Above all things, do not use what is called a "dinky dictionary." This is different than a simple well-expressed dictionary. A dinky dictionary is what you commonly get off the paperback racks in drug stores. It quite often defines word A as word B and then defines word B as word A. It also omits all the *alternative* definitions and all the technical definitions. Always have to hand, at least in the classroom, the most extensive and voluminous set of dictionaries anybody ever heard of on all the subjects ever heard of under the sun, plus any encyclopedias that you can round up.)

### 3. STUDENT RECOGNITION OF MISUNDERSTOODS.

Before the student starts reading, he should be told that if he sees a word he doesn't know the meaning of, he should stop and look the word up and clear it instead of going on past it. And the student should be encouraged to find and clear misunderstood words himself. M9 brings about the ability to do this, so that the student will find and clear his own misunderstandings in future. The Word Clearer on M9 would never prevent the student from clearing a word that the student recognizes as misunderstood.

Correctly done M9 will bring about the ability of the student to find and clear his own misunderstandings.... (If you don't want to spend ten years M9ing one page, it is best to get him through Method 8 on simple English words. *This will be part of a special course which will greatly improve someone's level of literacy.*)

#### 4. *STUDENT READS THE TEXT ALOUD TO THE WORD CLEARER.*

*The student reads the text aloud to the Word Clearer. He is not on the meter. While the student reads, the Word Clearer follows his own copy of the same text, watches the student and listens to him.*

*The Word Clearer must be very alert and see or hear any nonoptimum reactions of the student while he is reading.*

#### 5. *NONOPTIMUM REACTION EQUALS MISUNDERSTOOD WORD.*

*A nonoptimum reaction by the student to what he is reading is the clue to the Word Clearer that the student has encountered a misunderstood word. The Word Clearer and student must now locate the exact misunderstood word or symbol. It will be found just before or sometimes at the point the nonoptimum reaction occurred.*

#### 6. *FIND THE MISUNDERSTOOD.*

If it is not obvious to the student that he has reacted and he just continues reading, the Word Clearer says, "That's it. Is there some word or symbol there that you didn't understand?" It is the duty of the Word Clearer to steer the student to the misunderstood. It is either at the point of the nonoptimum reaction or before it. The point is that the student must be steered onto it. And it then is looked up.

The student may be able to spot his misunderstood word right away and tell the Word Clearer what it is. Or he may have difficulty finding it and the Word Clearer will have to help him find it.

The Word Clearer helps the student by getting him to look earlier and earlier in the text from the point where he reacted until the misunderstood word is found. The Word Clearer can also spot-check the student. Spot-checking means choosing words from the text the student has already read and checking with him to see if he knows the definitions of those words.

If the student is uncertain about any word or gives a wrong definition, then that word is taken up and cleared in the dictionary.

#### 7. *CLEAR THE WORD.*

*Once the misunderstood is found it must be fully cleared in the dictionary. The person will be hung up on the definition of the word as it is used in the context of what is being word cleared, which will not necessarily be the first definition given in the dictionary. To try and clear any other definition before clearing the one he is stuck in would cause him to try and clear a word over misunderstood. Therefore he would rapidly go over the definitions to find the one that fits the context and clear that first. Then the remaining definitions would be cleared.*

*This is how a word is cleared:*

*The first step is to look rapidly over the definitions to find the one which applies to the context in which the word was misunderstood. One reads the definition and uses it in sentences until one has a clear concept of that meaning of the word. This could require ten or more sentences.*

*Then one clears each of the other definitions of that word, using each in sentences until one has a conceptual understanding of each definition.*

*The next thing to do is to clear the derivation—which is the explanation of where the word came from originally. This will help gain a basic understanding of the word.*

*Don't clear the technical or specialized definitions (math, biology, etc.) or obsolete (no longer used) or archaic (ancient and no longer in general use) definitions unless the word is being used that way in the context where it was misunderstood.*

*Most dictionaries give the idioms of a word. An idiom is a phrase or expression whose meaning cannot be understood from the ordinary meanings of the words. For example "give in" is an English idiom meaning "yield." Quite a few words in English have idiomatic uses and these are usually given in a dictionary after the definitions of the word itself. These idioms have to be cleared.*

*One must also clear any other information given about the word, such as notes on its usage, synonyms, etc. so as to have a full understanding of the word.*

*If one encounters a misunderstood word or symbol in the definition of a word being cleared, one must clear it right away using this same procedure and then return to the definition one was clearing. (Dictionary symbols and abbreviations are usually given in the front of the dictionary.)*

#### 8. READ THE SENTENCE AGAIN.

The Word Clearer then asks the student to read once again the sentence in the text in which the misunderstood word or symbol was found. The student does so and if he reads it correctly with understanding, he continues reading the text. Any further nonoptimum reactions are handled by finding the next misunderstood word and clearing it, as above.

#### 9. METHOD 9 IS CONTINUED UNTIL THE TEXT HAS BEEN COMPLETED.

Method 9 is continued until the text to be word cleared is completed.

#### 10. STUDENT GOES TO EXAMINER AT THE END OF METHOD 9 WORD CLEARING .

The student is always sent to the PC Examiner at the end of a Method 9 session.

And that's all there is to doing Method 9!

#### METHOD 9 CAUTION

When the Word Clearer has misunderstands of his own on the material being word cleared, he tends to go "wooden" and just sits and does nothing to handle the student. The Word Clearer must always clear his own misunderstood words or else when the student stumbles on a word, the Word Clearer won't even *see* it or *hear* it because of his own misunderstands. He can miss the student's stumble and never get the student's misunderstood word.

The Word Clearer can also miss a student's reactions when he has so much attention on the page that he becomes unaware of the student or doesn't even look at the student.

When students are M9ing each other on the same study materials, they do NOT first just read the materials as this will only give them misunderstands. They take the materials being word cleared one paragraph or section at a time and M9 each other on it. This is done by a student first M9ing his twin on one section, and then getting M9ed on what he just word cleared his twin on, plus the next section. It then turns around again. The twin gets M9ed on what he just word cleared the other student on, and on the next section. In this way one person is not constantly leading. Unless the M9ing reversals are done in this fashion, misunderstands could be missed. The whole text would be covered in this way.

## EXAMPLES OF STUDENT REACTIONS AND THEIR CORRECT HANDLING

There are many, many different kinds of reactions that can occur when a student passes a word he doesn't understand. There are also many different ways a student will respond to Method 9. All that is needed for success with Method 9 is for the Word Clearer to understand Method 9 and to apply it exactly according to this bulletin.

Given here are some examples of student reactions and correct handlings by the Word Clearer:

### A. THE STUDENT CHANGES A WORD IN THE SENTENCE.

Example:

The page says: "The boy then reached down and patted his dog."

The student says: "The boy *than* reached down and patted his dog."

The Word Clearer says, "That's it. Is there some word or symbol there that you didn't understand?"

The student looks at the words "then," "boy" and "the." He knows those words. So he looks in the sentence before that one. In that sentence he sees the word "collie." He's not sure what that is.

He tells the Word Clearer and they clear the word "collie."

### B. THE STUDENT ADDS AN EXTRA WORD.

Example:

The page says: "the child went to school."

The student says: "The child went to *the* school."

The Word Clearer says, "That's it. Is there some word or symbol there that you didn't understand?"

The student looks over the sentence. He says he understands all the words, but thinks the sentence should say, "A child went to school" rather than, "The child went to school."

The Word Clearer says, "Okay. let's spot-check some words. What does 'the' mean in this sentence?"

The student looks blank for a moment and doesn't say anything. The Word Clearer says, "All right. We're going to look up the definition of 'the'."

"The" is then looked up and cleared.

### C. THE STUDENT LEAVES OUT A WORD.

Example:

The page says: "Robert then visited the city."

The student says: "Robert visited the city."

The Word Clearer says, "That's it. Is there some word or symbol there that you didn't understand?"

The student reads over the sentence. He can't find anything he doesn't understand. The Word Clearer asks him to look over the next earlier sentence for a misunderstood word. The student can't find any there, either. The Word Clearer has the student keep looking earlier and earlier in the text and finally the student spots the misunderstood word in the first sentence of the page.

The word found is then cleared.

D. THE STUDENT LEAVES OFF A PART OF A WORD, SUCH AS AN "S" OR AN "ED" AT THE END.

Example:

The page says: "There was a huge pile of assorted tools in the woodshed."

The student says: "There was a huge pile of assorted tool in the woodshed."

The Word Clearer says, "That's it. You left the 's' off 'tools.' Have a look over that sentence or page and tell me what word or symbol was misunderstood."

The student says, "I don't have any misunderstood words on this page."

The Word Clearer acknowledges him and asks him once again to have a look for the misunderstood word or symbol.

The student looks over the entire page but still says he has no misunderstandings. So the Word Clearer starts spot-checking the student on the definitions of the words on the page.

The Word Clearer asks, "What's the definition of 'tools'?" The student says, "It means 'implements of work'." The Word Clearer says, "That's fine. What's the definition of 'assorted'?" The student gives it to him correctly, so the Word Clearer simply backs up the sentence words one by one, getting the definition of each one until he hits the word "was."

Student says, "It's something you saw with." The Word Clearer says, "Let's have a look at 'was' in the dictionary." Each definition of "was" is *then* cleared and it is suddenly discovered that the person has never understood that it had anything to do with the conjugation of the verb "to be."

E. THE STUDENT STUMBLES ON A WORD OR SAYS IT INCORRECTLY.

Example:

The page says: "I think I'll go shopping."

The student says: "I th-think...."

The student stops after he stumbles. The Word Clearer says, "Is there some word or symbol there that you don't understand?"

The student says, "Well, it just doesn't make sense."

The Word Clearer asks, "What doesn't make sense?"

The student says, "I don't see why it says 'think' here."

The Word Clearer says, "All right. Let's have a look at 'think' in the dictionary."

"Think" is then looked up in the dictionary, but the student can't seem to get it, even though he understands all the words in the definition.

The Word Clearer asks, "Tell me, what part of speech is 'think' in that sentence?"

The student says, "Uh, I don't know."

The Word Clearer says, "Okay. Well, right here in the dictionary, it says 'verb'. What does that mean to you?"

Student: "Mm . . ." (long pause).

The Word Clearer says, "All right." He gets a grammar book and says, "Have a look at this definition of 'verb'."

"Verb" is then cleared but while clearing it, the student says, "Hey, I always thought you could only have one verb in one sentence and that sentence has two verbs in it. Somebody threw me a curve." And as he has cognited and has now got it straight, M9ing continues. He uses it in sentences until he's really got it, then they go on to the next definition of "think" in the dictionary.

**F. THE STUDENT HESITATES OR PAUSES WHILE HE IS READING OR BEGINS READING MORE SLOWLY.**

Example:

The page says: "The sun was shining on the flowers."

The student says: "The sun——was shining on the flowers."

The Word Clearer says, "That's it. What word or symbol was misunderstood just before that point?"

The student very carefully looks back over the page, but he can't find any words he doesn't understand.

The Word Clearer says, "Okay. I'll spot-check you." He gives the student a thorough spot-check, but no misunderstood words are found.

The Word Clearer then asks, "Show me where you were last doing really well on this text."

The student shows him. It's three paragraphs back.

The Word Clearer says, "Good. We're going to check from this point back for any misunderstood words."

He extensively spot-checks the student in that area, and the student's misunderstood word is finally found and cleared.

**G. THE STUDENT FROWNS, LOOKS UNCERTAIN, GOES STIFF, OR IN SOME WAY SHOWS LACK OF COMPREHENSION.**

Example:

The page says: "The family ate dinner together every night."

The student says: "The family ate dinner together every night."

While the student is reading, there is a slight look of uncertainty on his face.

The Word Clearer says, "That's it. Look over this section you've just read and tell me what word or symbol has been misunderstood."

The student says, "But why did you stop me?"

The Word Clearer says, “You were looking uncertain as you read that last sentence.”

The student says, “Well actually, I did have some attention back on the sentence before last.”

The Word Clearer says, “Okay. Was there any misunderstood word or symbol there?”

The student says, “I have some attention on the word ‘for’, but I’ve looked that up before.”

The Word Clearer says, “Well, let’s have another look at it.”

“For” is then cleared and the student realizes that he hadn’t fully cleared all of the definitions when he had previously looked it up.

H. THE STUDENT TENSES HIS BODY IN SOME WAY. THIS COULD BE TIGHTENING HIS GRIP, SQUINTING, TENSING HIS JAW, JERKING HIS BODY, STIFFENING ANY BODY PART, ETC.

1-The page says: “The girls were delighted to see one another.”

The student says: “The girls (tightens the muscles in his jaw) were delighted to see one another.”

The Word Clearer says, “That’s it. Look back over this section you have just read. Was there a misunderstood word or symbol there?”

The student looks at the page a long time. The Word Clearer can see he is looking earlier and earlier on the page. Finally the student says, “I can’t see any words I don’t understand, but this line seems a bit strange to me: ‘It was Christmas Eve. Alice was listening to “Silent Night” when Carol came into the room.’”

The Word Clearer says, “All right. Let’s do a spot-check in that area. What does ‘Carol’ mean?”

The student says, “That’s a girl’s name.”

The Word Clearer says, “Good. What do the quotation marks show in that sentence?”

The student says, “Hm. Well, someone said ‘Silent Night’ to Alice.”

The Word Clearer says, “All right. I want you to read this section in the grammar book on quotation marks.”

The student reads the section aloud and says, “Oh, I see. ‘Silent Night’ is a song and you use quotation marks around the names of songs. I’ve got it now!”

The Word Clearer says, “Great,” and has the student give some examples of the use of quotation marks. They then return to the text.

2-The page says: “The men walked quietly through the dockyard.”

The student says: “The men walked quietly through the dockyard.” (Student leans forward and looks at the page more intently.)

The Word Clearer says, “That’s it. Is there some word or symbol there that you didn’t understand?”

The student looks over the sentence. “Well, I’ve never seen ‘dockyard’ used like that before. It doesn’t make sense.”

The Word Clearer acknowledges him and has him look it up. The student reads the definition and starts brightening up. He turns to the Word Clearer and says, “And all this time I thought a dockyard was a place where you built docks, I never could understand why....”

3-The page says: “The car drove off, leaving a trail of dust in the air.”

The student says: “The car drove off, leaving a trail (student squints his eyes at the page) of dust in the air.”

The Word Clearer says, “Is there some misunderstood word or symbol in that area?”

Student looks bewildered. “No, the sentence just doesn’t make sense.”

Word Clearer says, “All right. What is the definition of ‘trail’?”

“Oh, that’s the impression of a horse hoof where a horse has been.”

The Word Clearer says, “Okay, look up the word ‘trail’.” The word is cleared and the student sees that he had a totally wrong definition.

I. THE STUDENT YAWNS, SUPPRESSES A YAWN, GETS WATERY EYES, ETC.

The page says: “A bright red apple was on the table.”

The student says: “A bright red apple was (yawn) . . .”

The Word Clearer says, “Okay. Let’s find the word or symbol that was misunderstood in this section.”

The student says, “I’m not sure I have the right definition for ‘bright’. Could we look it up?”

The Word Clearer says, “Sure,” and they look up the word “bright.”

J. THE STUDENT BEGINS READING WITH MORE EFFORT. THIS INCLUDES READING VERY CAREFULLY OR UNNATURALLY OR ROBOTICALLY OR READING IN SUCH A WAY AS TO SHOW THAT THE WORDS HAVE NO MEANING TO HIM, OR THAT HE DOESN’T UNDERSTAND WHAT HE IS READING.

The page says: “The families were having a picnic on the beach.”

The student says: “The families were having a picnic on the beach.” X

The student reads the page correctly, but he is being very careful not to make any mistakes.

The Word Clearer says, “That’s it. Let’s find the misunderstood word or symbol that you didn’t understand before this sentence.”

The student says, “Yes, I started feeling uncomfortable while I was reading the sentence before last.”

The Word Clearer says, “Good. Let’s look just before that for the misunderstood word.”

The student finds his misunderstood and it is cleared.

The important point for the Word Clearer to remember is *that* WHERE THERE IS A STUDENT REACTION, A MISUNDERSTOOD WORD WILL BE FOUND, USUALLY JUST BEFORE THE POINT HE REACTED.

The misunderstood word can always, always be located with good communication, persistence and a totally standard application of Method 9 tech, as given in this HCOB. If the student can't easily achieve this, he must go to the Supervisor for help.

### TRs AND M9

To be a very successful M9 Word Clearer, one's TRs must be in. One has to be able to TR 3 the question and get the actual misunderstood, yet at the same time, one should never go robotic or rote on the Method 9 procedure. For example it may happen that halfway through a sentence, the student stops, smiles, and then continues on. Upon questioning, you find that a bulletin he has read many, many times before is now finally making sense. You wouldn't then ask him for his misunderstood. Just acknowledge his win and carry on with your Word Clearing with your TRs in and your application of this bulletin 100% standard. The wins and gains of those you word clear will by no means be slight.

### QUARRELS OR UPSETS

It occasionally happens that the students doing the Word Clearing get into a quarrel or upset. If this happens, you know that one of two things has happened, either:

1. "Misunderstoods" that were really understood were forced off on the student, or
2. Actual misunderstoods were not detected and were passed by.

1. If this happens, you can clean up any falsely looked-up words by asking him if he was made to look up words he understood. If this is the case, the student will brighten up and tell you the word or words he was wrongly made to clear. This done, the M9ing can be resumed.

2. If the above doesn't handle it, then one knows that misunderstoods have been missed. Have the twin who is doing the Word Clearing take him back to when he was last doing well and then come forward in the text, M9ing as he goes, picking up the missed misunderstoods. It will usually be found that several misunderstoods have been missed, not just one.

### WORKSHEETS

Worksheets are a written record of the Word Clearing session. They contain the student's name, the Word Clearer's name, the date and the name or title of what is being word cleared. The Word Clearer keeps worksheets during the Word Clearing session and writes down which words have been looked up and cleared and any other important information concerning the Word Clearing.

Worksheets are stapled to the student's Exam Form when Word Clearing is complete. They are filed in his pc folder.

### TEACHING THE STUDENT TO DO METHOD 9

This is done using *this HCOB or the M9 Picture Book (which will be issued in due time as part of a special course)*. This is a simple picture *book* which is handed to the student. He goes through the *book* and then does some M9 drilling as contained in

the back of it. The Supervisor checks him out and corrects him if needed, using *only* the data in *the M9 Picture Book* and this HCOB. No verbal tech or opinions are thrown in.

The end result of a well done Method 9 is a student who is certain he has no misunderstandings on that material so that he can easily study the material and apply it.

Method 9 is a great civilization saver.

It is easy to do. It's fun and it gives tremendous gains.

It is vital that *Method 9 is done* correctly, exactly by the book. Otherwise, *people* will be denied the enormous wins that can be attained with it.

HCO BULLETIN OF 7 APRIL 1973RA  
REVISED 22 FEBRUARY 1979

*(This bulletin has been revised  
to incorporate new discoveries  
on the subject of coaching TRs.)*

*(Revisions in this type style)  
(Ellipsis indicates deletion)*

### GRADIENTS IN TRS

*References:*

*HCOB 16 Aug 71R II TRs MODERNIZED  
TAPE: 30 Jun 61 TRAINING ON TRs—  
(6106C30) LECTURE ON AUDITING  
HCOB 3 Feb 79 I CHANGE THE CIVILI  
ZATION EVAL*

Time after time you're going to find somebody in an organization trying to teach the TRs this way: Go on to TR 0 and stick there.

Eight months later he'll still be doing the TR 0.

You're going to find that consistently, because the element of ENDURE enters into it. That is improper. *TRs are done to improve a person's handling of the cycle of communication. When he sticks somewhere on a TR instead of cycling through them, each one to a win, minor or major, over and over again, you don't accomplish the purpose of TRs.*

Here is the way you do the TRs. You'll find it very valuable.

*You do OT TR 0 to a win or a cognition or an improved ability to simply BE THERE. You go on to TR 0. The student hasn't gotten a full pass on OT TR 0. He just got accustomed to it and had a win.*

*You do TR 0 to a win for the student that HE recognizes as a win.*

*You do TR 0 Bullbait to a win for the student that he recognizes as a win.*

*You do TR 1 to a win for the student that he recognizes as a win. You don't try to cure or even necessarily mention faults. When you do flunk the student you handle every flunk with an HCOB, but you concentrate on the student acquiring skills rather than eradicating faults. You can't eradicate a fault from something a person knows little about in the first place.*

*You do TR 2 to a win for the student that he recognizes as a win.*

*You do TR 3 to a win for the student that he recognizes as a win.*

*You do TR 4 to a win for the student that he recognizes as a win.*

*Now you come back to OT TR 0. Get the student better at OT TR 0. Then go through all the TRs again. It's kind of like running CCHs—they get a little bit of a win at it and you go on to the next one.*

*Each time the student cycles through the TRs he is coached in the direction of increasing the skills he has—never in the direction of a lose or a flunk. It is very*

*simple. You ensure that the student 1) KNOWS the TRs HCOBs, 2) DUPLICATES the drill, 3) DOES the drill, and then you always, always COACH HIM TO A WIN.*

*There is no reason or use in making the student wrong, he usually is about as wrong as you can get. Unreasonable as it may seem to some, the job of the coach and Supervisor is to make the student right.*

If you do that, you shorten considerably the time it takes to learn the TRs.

In other words, you approach this with a gradient scale.

We did learn about gradient scales many years ago and we should continue to apply that knowledge.

*Eventually, when you use this approach to TRs the student will eventually be able to do a faultless 2-hour OT TR 0, a faultless 2-hour TR 0, a perfect TR 1, an incredibly good TR 2, an error-free TR 3 and an easy, satisfying, flawless TR 4 without Q and A or ARC breaking the pc, which just makes the session flow. And once his TRs are "in" they will stay in for life and he will be able to handle a communication cycle so smoothly and so effortlessly that nobody including himself even recognizes that he is doing it.*

*This is the way to fast, successful TRs Courses, full passes and TR graduates with natural, easy, flubless TRs.*

***C/S Series 87RB***

**NULLING AND F/Ning PREPARED LISTS**

*(Ref: HCOB 4 December 1978, HOW TO READ THROUGH AN F/N)*

A prepared list is one which is issued in an HCOB and is used to correct cases. There are many of these. Notable amongst them is C/S 53 and its corrections.

It is customary for the auditor to be required to F/N such a list. This means on calling it that the whole list item by item is to F/N.

To F/N a list, you do it Method 3. Somebody's got the wrong idea that it is done Method 5—going over and over and over something.

A recent C/S of *mine* on the subject stated: "The reason you're having trouble F/Ning a list is because you don't do M3, handle each read to the end and then reassess M3 and handle each read to the end. It is obvious from your list markings that you were doing M5 over and over, which of course gets into protest. Usually M3 at some point will begin to F/N and that is the reason you do M3. Also, when you miss on a prepared list the F/N stops. So there were a few minor misses on these lists but mostly because you were doing it M5. Also, it takes an R-Factor that you're going to clean up everything on the list."

You handle a list Method 3 by calling the line and handling the line. A prepared list should be used to get optimum results on a pc. If a prepared list reveals that more needs to be handled, i.e. engram in restimulation, then it would be handled. *(Note: In this case the handling would be to assess the L3RF and handle the reads. WARNING: You would NOT run Dianetics on a Clear, Dianetic Clear or OT. For C/ears and OTs you would assess the L3RF and then simply INDICATE the read.)*

*If a more major action was found to be needed it would be programmed for handling, per list instructions.* If something hot leaps into view on a prepared list then handle it.

It is the wrong think that one has to quickie a prepared list and get it to F/N in a hurry rather than to use it to get optimum results on a pc.

All the list must be called a final time.

***"NONREADING, NON-F/Ning" LISTS***

Now and then you get the extreme oddity of a list selected to exactly remedy the case not reading but not F/Ning.

Of course this might happen if the list did not apply to the case (such as an OT prepared list being used on a Grade IV, heaven forbid). In the case of lists to correct listing and in particular the C/S 53 Series, it is nearly impossible for this situation to occur.

A C/S will very often see that the auditor has assessed the list on the pc, has gotten no reads, and the list did not F/N.

A “reasonable” C/S (heaven forbid) lets this go by.

Yet he has before him first class evidence that the auditor

1. Has out-TRs in general,
2. Has no impingement whatever with TR 1,
3. Is placing his meter in the wrong position in the auditing session so that he cannot see it, the pc and his worksheet,
4. That the auditor’s eyesight is bad.

One or more of these conditions certainly exist.

To do nothing about it is to ask for catastrophe after catastrophe with pcs and to have one’s confidence in one’s own C/Sing deteriorate badly.

An amazing number of auditors cannot make a prepared list read for one of the above reasons.

Putting in Suppress, Invalidation or Misunderstood Words on the list will either get a read or the list will F/N. If a list does not F/N then the subject of the list is still charged or there is something wrong with the list.

The moral of this is that prepared lists that do not read F/N. When prepared lists that do not read do not F/N or when the auditor cannot get a prepared list to F/N, serious auditing errors are present which will defeat a C/S.

In the interest of obtaining results and being merciful on pcs, the wise C/S never lets this situation go by without finding what it is all about.

### *READING THROUGH AN F/N*

*There is a skill that any auditor who is handling lists should master and that is reading through an F/N.*

***WHEN TAKING A LIST TO F/Ning ASSESSMENT AN AUDITOR MUST KNOW HOW TO READ THROUGH AN F/N.***

*When going down a list that is F/Ning you’ll sometimes see the F/N “check” briefly and then continue. The swinging weight of the F/Ning needle has momentum and it will tend to obscure a read. But a sharp auditor will see this “check” or slow in an F/N, know he has a hot item and take it up and handle it. An auditor who can’t read through an F/N will miss it and go right on by, and the F/N then kills within the next couple of items. Now he’s got a suppressed read and he’s going to have trouble F/Ning the list.*

*When this happens, even if you can’t read through an F/N, you should go back up the list an item or two and find it. BUT one should be able to read through an F/N. It is the secret of being able to take a list accurately to an honestly F/Ning assessment, with no wasted time or effort. (Ref: HCOB 4 December 78, HOW TO READ THROUGH AN F/N.)*

### *THE “RABBIT BUTTONS”*

*To “rabbit” means to run away from the bank. (The term derives from the fact that a rabbit is timid and runs away from just about everything.)*

*Some auditors have been known to “rabbit” from auditing sessions or from certain session actions. This is wholly due to out-TRs or shaky metering and the auditor not knowing how to use his tools. Rabbiting shows up in various ways—not getting the pc through the engram and not taking a Dianetic chain to full EP, or calling an F/N when it’s an ARC break needle, or simply ending off when the going gets rough, etc. It’s running away from the action rather than completing it.*

*One of the ways some auditors rabbit from F/Ning a list is by using what have come to be known as the “rabbit buttons.” Given a C/S 53 (or other list) to take to F/Ning assessment, the auditor begins assessing and handling the list items but on the slightest provocation (such as a minor protest from the pc), introduces such questions as: “Is the C/S 53 being overrun?”, “Is this list unnecessary?”, “Do you feel over-repaired ?” or something similar.*

*These questions are valid enough when they occur, as they do, at the end of some prepared lists. But used out of sequence they serve to get the auditor out of taking the C/S 53 or other assigned list to F/Ning assessment. Auditor throws in the “rabbit buttons,” pc immediately agrees it’s “overrun” or “unnecessary,” and the auditor ends off, with the majority of the list items unchecked for charge.*

*This is by no means true of all auditors but it has happened frequently enough for these questions, used out of sequence, to be dubbed the “rabbit buttons.”*

*And each time an auditor has rabbited in this way from F/Ning a list, something has been found later that should have been handled.*

***Thus: WHEN THE C/S CALLS FOR F/Ning A LIST IT MUST BE TAKEN TO COMPLETION AND NOT QUIT BEFORE THE ENTIRE LIST IS F/Ning, ITEM BY ITEM, ON ASSESSMENT.***

*Any pc protest or upset or apprehension over extensive repair actions or a list having to be F/Ned stems mainly from auditor out-TRs and mismetering (missing reads and calling false reads) when doing repair lists.*

*Any auditor back-off or protest on F/Ning a list stems from these same points plus having to handle pc upset or protest.*

*The solution is for the auditor to polish his TRs and sharpen up his metering. AND learn to read through an F/N.*

*Given good TRs and standard metering, the auditor who can then also read through an F/N will have no difficulty taking a list to F/Ning assessment.*

A. If A or any of the A Group reads on ANY pc (including Dianetic Clear, Clear or OT) who has had an Int RD, do an Int RD Correction List Revised (HCOB 29 Oct 71RA) and handle the reads. If Int correction has already been done on the pc get an FES on the Int RD AND its corrections. When all errors are corrected, the C/S may order the End of Endless Int Repair RD per Int RD Series 4.

*If the pc is C/ear, Dianetic C/ear or OT and has not had an Int RD, do the End of Endless Int Repair RD. Do not run any Dianetics.*

*Otherwise, if the pc has never had an Int RD, give him a standard Int RD per Int RD Series 2.*

*WHEN DOING AN INT HANDLING RUN ONLY THE INT BUTTONS GIVEN ON THE INT RD SERIES HCOBs. Note on the assessment which button(s) have just read on the C/S 53. Other items in the A Group are designed to detect out-Int, but don't embrace the earlier beginning, so do NOT run these.*

B. If any of these read, do an L4BRA on the earliest lists you can find that have not been corrected. Lacking these, do an L4BRA in general. You can go over an L4BRA several times handling each read to F/N until the whole L4BRA gives nothing but F/Ns. Handle a Wrong Why or Wrong Indication or Wrong PTS item per C/S Series 78.

C. Any reading item must be F/Ned. Use standard handlings on rudiments questions. On "Out-Ruds" find which rud and handle. "Feel Sad" = ARC break of long duration so handle the ARC break. If "Deadness" or "Unconsciousness" read 2WC to F/N (E/S if necessary) and then program for the Personal Revival Rundown.

D. 2WC to F/N. Do a Drug RD Repair List if the pc has had his Drug RD. (HCOB 19 Sep 78 II) L3RF if needed. Advance Program to handle all reading drugs as soon as possible per NED Series 9R. (The above handling does not apply to Clears and OTs. On these, indicate the read. See HCOB 30 Oct 78, C/S SERIES 53, USE OF for further data on the handling of Dianetic questions which are reading on Clears and OTs.)

E. If any of these read, do an L3RF and handle per the instructions. (On Clears and OTs simply indicate the read. Don't run any engrams or seek further to repair. See HCOB 30 Oct 78, C/S SERIES 53, USE OF.)

- F. Clean up any protest and inval and rehab to F/N.
- G. Find out what it is. If yogi or mystic exercises or some such 2WC E/S it to first time done, find out what upset had occurred before that and if TA now down do L1C on *that* period of pc's life.
- H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If study errors, 2WC E/S to F/N, and add a Study Correction List to the pc's program.
- I. False TA is wrong cans or other error. Use HCOBs 12 Nov 71RA, 15 Feb 72R, 18 Feb 72R, 21 Jan 77RA, HCOB 23 Nov 73RB, all on false TA. Then clean up the bypassed charge with (1) Assess for best read (a) TA worries (b) F/N worries. (2) Then 2WC times he was worried about (item) E/S to F/N. (3) Rehab any overruns due to false TA obscuring F/Ns.
- J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. An F/N can be obscured and mistaken for a read if sensitivity too high. These items are all 2WC E/S to F/N. Auditors who made them need cramming badly or reread. Rehab F/Ns that have been missed.
- K. Can't have or Hav. Find correct Havingness Process and remedy.
- L. 2WC to F/N. C/S to program as needed for further PTS handling.
- M. Find out what. Clean up any protest. Rehab to F/N or Date/Locate. On "Went on past Dianetic Clear" 2WC to F/N. Return to C/S. A qualified C/S who has fully checked out on the materials must adjudicate whether this state has been attained before the preclear may attest to Dianetic Clear.
- N. 2WC to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2WC to F/N and get further C/S instructions for handling if necessary.
- O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate it if no F/N on first. If false TA handle per 1 above.
- P. Indicate and 2WC to F/N.

*Per HCOB 30 October 1978, C/S SERIES 53, USE OF, the order in which reads are to be taken up is built into the C/S 53 itself. You simply start at the top of the list and take up and handle to F/N each read as you come to it.*

|---|---|

A. If A or any of the A Group reads on ANY pc (including Dianetic Clears, Clears, OTs) who has had an Int RD, do an Int RD Correction List Revised (HCOB 29 Oct BRA) and handle the reads. If Int correction has already been done on the pc get an FES on the Int RD AND its corrections. When all errors are corrected, the C/S may order the End of Endless Int Repair RD per Int RD Series 4.

If the pc is Clear, Dianetic C/ear or OT and has not had an Int RD, do the End of Endless Int Repair RD. Do not run any Dianetics.

*Otherwise, if the pc has never had an Int RD, give him a standard Int RD per Int RD Series 2.*

WHEN DOING AN INT HANDLING RUN ONLY THE INT BUTTONS GIVEN ON THE INT RD SERIES HCOBs. Note on the assessment which button(s) have just read on the C/S 53. Other items in the A Group are designed to detect out-Int, but don't embrace the earlier beginning, so do NOT run these.

B. If any of these read, do an L4BRA on the earliest lists you can find that have not been corrected. Lacking these, do an L4BRA in general. You can go over an L4BRA several times handling each read to F/N until the whole L4BRA gives nothing but F/Ns. Handle a Wrong Why or Wrong Indication or Wrong PTS item per C/S Series 78.

C. Any reading item must be F/Ned. Use standard handlings on rudiments questions. On "Out-Ruds" find which rud and handle. "Feel Sad" = ARC break of Long Duration so handle the ARC break. If "Deadness" or "Unconsciousness" read 2WC to F/N (E/S if necessary) and then program for the Personal Revival Rundown.

D. 2WC to F/N. Do a Drug RD Repair List if the pc has had his Drug RD. (HCOB 19 Sep 78 II) L3RF if needed. Advance Program to handle all reading drugs as soon as possible per NED Series 9R. (The above handling does not apply to Clears and OTs. On these, indicate the read. See HCOB 30 Oct 78, C/S SERIES 53, USE OF for further data on the handling of Dianetic questions which are reading on Clears & OTs.)

E. If any of these read, do a L3RF and handle per the instructions. (On Clears and OTs simply indicate the read. Don't run any engrams or seek further to repair. See HCOB 30 Oct 78, C/S SERIES 53, USE OF.)

F. Clean up any protest and inval and rehab to F/N.

G. Find out what it is. If yogi or mystic exercises or some such 2WC E/S it to first time done, find out what upset had occurred before that and if TA now down do L1C on that period of pc's life.

H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If study errors, 2WC E/S to F/N, and add a Study Correction List to the pc's program.

I. False TA is wrong cans or other error. Use HCOB 12 Nov 71RA, 15 Feb 72R, 18 Feb 72R, 21 Jan 77RA, HCOB 23 Nov 73RB, all on false TA. Then clean up the bypassed charge with (1) Assess for best read (a) TA worries (b) F/N worries. (2) Then 2WC times he was worried about (item) E/S to F/N. (3) Rehab any overruns due to false TA obscuring F/Ns.

J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. An F/N can be obscured and mistaken for a read if sensitivity too high. These items are all 2WC E/S to F/N. Auditors who made them need cramming badly or reread. Rehab F/Ns that have been missed.

K. Can't have or Hav. Find correct Havingness Process and remedy.

L. 2WC to F/N. C/S to program as needed for further PTS handling.

M. Find out what. Clean up any protest. Rehab to F/N or Date/Locate. On "Have you gone past Dianetic C/ear?" 2WC to F/N. Return to C/S. A qualified C/S who has fully checked out on the materials must adjudicate whether this state has been attained before the preclear may attest to Dianetic C/ear.

N. 2WC to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2WC to F/N and get further C/S instructions for handling if necessary.

O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate it if no F/N on first. If false TA handle per 1 above.

P. Indicate and 2WC to F/N.

*Per HCOB 30 October 1978, C/S SERIES 53, USE OF, the order in which reads are to be taken up is built into the C/S 53 itself. You simply start at the top of the list and take up and handle to F/N each read as you come to it.*

## E-METERS

### SENSITIVITY ERRORS

(Ref: HCOB 4 Dec 77 CHECKLIST FOR SETTING UP  
SESSIONS AND AN E-METER  
HCOB 14 Jan 77 URGENT AND IMPORTANT  
TECH CORRECTION ROUND-UP  
HCOB 7 Feb 79R E-METER DRILL 5RA CAN  
SQUEEZE)

An auditor must set the sensitivity of an E-Meter exactly right for *each pc and each session*.

The setting is different for almost every *pc and can change, session to session, even for one pc*.

#### TOO LOW

Too low a sensitivity on some pcs (like Sens 1) will obscure reads and make them look like ticks. It will obscure an F/N. Whereas a Sens 16-128 will show reads and F/Ns.

A pc can be hindered by the auditor not setting the sensitivity high enough to show reads and F/Ns. Items are missed as well as F/Ns.

*On almost any pc, a convulsive or incorrect can squeeze can shoot the needle across the dial and cause the auditor to reduce his sensitivity down and down and down until he finally sets it at a point where long falls become ticks and F/Ns don't exist. E-Meter Drill 5RA tells one how to do a proper can squeeze.*

#### TOO HIGH

When auditing a flying pc or a Clear or OT the auditor who sets the sensitivity too high gets weird impressions of the case.

“Latent reads” on such a case are common. They aren't latent at all. What happens is that the F/N is more than a dial wide at high sensitivity and a started F/N looks like a read as its sweep is stopped by the pin on the right of the dial.

*Also, the pc can delicately press the cans improperly with his thumbs and fore-fingers when doing a can squeeze and cause the auditor to push the sensitivity up and up and up. And then with the sensitivity set too high, be unable to keep the needle on the dial and so miss or imagine reads. E-Meter Drill 5RA now teaches how to do this properly.*

In this way uncharged items are taken up, the case is slowed, overrun and general upsets requiring repairs occur.

On a one-hand electrode an OT VII sometimes has a 1/3 dial wide F/N at Sens 2!

This would mean a 3/4 dial *wide* F/N . . . with two cans.

A Clear sometimes has a floating TA at Sens 5 *or* 10 instead of an F/N. He *might* have to be run at Sens 1 on two cans to keep him on a dial or detect F/Ns.

This is a very important matter as the auditor will miss F/Ns, think beginning F/Ns are reads and as the pre-OT is off the dial, miss reads.

Thus uncharged areas are run and charged ones are missed.

The result is very chaotic to repair.

*Many* lower level pcs also have a need for lower sensitivity settings.

#### SUMMARY

Sometimes an easy pc looks very difficult just because of wrong sensitivity settings *brought about by wrong can squeeze procedure.*

Set the sensitivity for the pc for 1/3 of a dial drop on a correct can squeeze per *E-Meter Drill 5RA (Reference: HCOB 7 Feb 79R, E-METER DRILL 5RA CAN SQUEEZE). And do the drills. You will be amazed.*

Don't get repairs.

Get wins.

(This bulletin has been revised  
to include updated data on  
NEW oral penicillin.)

**ANTIBIOTICS,  
ADMINISTERING OF**

(This cancels FO 2313 "Antibiotics,  
Further Data" and revises FO 2186.)

(Note: This data is given for information alone and is not intended to prescribe or otherwise treat an individual. All prescriptions and treatments should be done in due accordance with the medical laws of any country in which a person seeks treatment.)

There are several "antibiotics." These are moulds or chemical compounds which cause bacteria, germs, to be unable to reproduce themselves (hits their 2D) while not destroying the cells of the body. At least that is one of the leading theories of why they work. "Antibiotic" means *anti* = against, *biotic* = living beings (such as bacteria). So it's against bugs.

Disease is said to be caused by germs or virus. Germs are microscopic cells which breed and have a bad effect on body cells and fluids. Virus is a germ that is too small to be seen in a microscope. Thus there are germ infections and virus infections.

Usually one type of germ equals one disease, i.e. typhoid fever. However, an illness can be a compound of several types of germs but this is not usual.

Virus diseases respond very badly to most antibiotics. In fact, in the presence of penicillin, a virus sort of suspends action without any real temperature change while the penicillin is present and gets busy again when the penicillin is gone.

The effect of most antibiotics on virus is zero. Some claims are made *that antibiotics work* against virus. Measles is a virus illness.

So antibiotics are mainly effective against germs. Venereal disease, pneumonia, wound infections and a long parade of diseases can be cured by antibiotics.

When illness is accompanied by temperature, antibiotics is usually the first thought.

Antibiotics can however be GROSSLY MISADMINISTERED and in fact usually are even in hospitals.

The trick is to get the temperature subnormal with antibiotics within the blood leveling period. Blood leveling means when the antibiotic has gotten into the blood and is actually holding the infection (stopping the bacteria's "2D" from continuing). More of the same antibiotic is given approx. 2 hours prior to blood leveling time. This then brings the temperature right on down to subnormal; continue the antibiotic so that it keeps the temperature subnormal until it just can't keep it subnormal any more and it comes up to normal. It will be found that the patient is now well and not likely to relapse. If blood leveling time is reached (the time is always stated on the instructions and contraindications write-up) and the temperature continues to rise, you have not used the correct antibiotic and must at this point change to another kind of antibiotic.

Each antibiotic has its own blood leveling time: penicillin is 24 hours, cephaloridine is 8 hours, streptomycin is 6 hours, etc.

Before administering antibiotics you must ensure that you know exactly what toxicity it is (toxic or poisonous quality the antibiotic has to the patient). For example streptomycin can cause pregnant mothers to give birth to children who have impaired hearing. Renal (kidneys; having to do with them) damage can be caused by certain antibiotics if the person has too much of a certain kind of antibiotic. Therefore, prior to administering any kind of antibiotic ensure that you know the patient's full medical history, as well as knowing exactly what the toxicity of the antibiotic is so that you do not damage the patient.

If not enough antibiotic is given or if it is the wrong kind for that disease the temperature will not be heavily affected or at best sinks to normal without going subnormal. This condition can go on and on and on and the patient relapses.

Also if antibiotics are given too briefly the temperature goes to subnormal, the antibiotic ceases to be given, the patient feels better, then probably relapses—gets ill all over again.

The above important three error situations are:

NOT ENOUGH  
WRONG KIND  
STOPPED TOO SOON.

To these can be added:

GIVEN TOO IRREGULARLY.

This last is almost always present when you give the patient the bottle. This is a common medical error. The patients aren't doctors, seldom take the medicine correctly and often not at all. Antibiotics should be handed out and seen taken.

Where there is a large number ill, the times can be standardized for the group. For instance all get it at 3:00 to 3:30, 9:00 to 9:30, etc. Or even 3 hourly can be done this way.

One takes the temperature before giving the pill. (A glass of water or a cigarette before temperature taking gives a false report.) Also in this way one can increase or decrease the dose depending on what the temperature was.

In very sick cases one has to watch the temperature more closely. In this way *every* time the temperature *starts* to rise from the subnormal where you are holding it, you immediately dose the patient.

An antibiotic all by itself cannot depress temperature. It's the reaction of the disease and body that's doing that.

## TEMPERATURE

98.6°F or 37°C is normal. A thermometer can be a bit off (.1 or .2 high or low) and temperature can vary a bit for "normal" one person to the next.

Rising temperature (above normal) is a reaction to a disease. Lowered temperature (below normal) is a reaction to a disease being handled by the body or the antibiotic plus the body.

100°F or 37.8°C is well above normal and is a sick temperature. 104°F or 40.5°C is dangerously (possible *death*) high.

97°F or 36.2°C is very satisfactorily subnormal.

Temperature rise is probably a body mechanism to burn up a disease, possibly not. But a slight temperature, a few tenths high, can make a person feel really bad. Then when it gets up higher they feel drifty and with it very high go delirious.

A subnormal temperature doesn't much affect how one feels.

"Chills" come with high temperature.

### ADMINISTERING DOSES

The general rule when administering antibiotics is:

1. One gives antibiotics until the temperature comes down past normal to subnormal and comes up to normal again with antibiotics.

After blood leveling time of the first antibiotic the temperature should break (go normal or below), the person going into a sweat. If it doesn't, then it's either not enough antibiotic or the wrong kind.

2. After dosage if the temperature just came down a bit from where it was, that type of antibiotic probably will handle the illness but *enough has not been given*. Increase the amount being given.

If after blood leveling time from the first antibiotic the temperature did not go lower or even rose, it's the wrong *antibiotic*. You change off to another and start all over again.

### TAKING EFFECT

The blood leveling period of an antibiotic is always stated on the write-up of the antibiotic (in the box, accompanying the antibiotic). The second administration is usually given 2 hours prior to the blood leveling period. Thus if the blood leveling period is 8 hours the second dose is given 6 hours after the first dose. Take the temperature before the dose and within the next 2 hours take the temperature again and you will know whether the antibiotic is working as the temperature should now be leveling and/or falling.

If the temperature has not leveled or dropped at this period change the antibiotic. When giving antibiotics FO 2187 "Medical Charts" must be followed. If you don't have a medical chart you don't know and can't see how the antibiotic is working.

### PAST MALADMINISTRATION

If a person in the past has been treated wrongly with antibiotics, i.e. got taken off as soon as temperature reached normal and was not continued as by rule 1 or 2, the germ remains dormant and *the area may reinfect at a later date*.

If more antibiotics are then administered the temperature *will* go subnormal and then to normal with the antibiotic. In other words, the cycle will complete. At this point the germ has been killed.

### SESSIONS

Before any session, a heavy dose of vitamins should be given, if the person is on antibiotics.

### KEY PROCEDURE

When the temperature goes subnormal keep it subnormal until it just won't stay down with the person still taking the antibiotic. The patient will then be well.

The faster you can get the temperature subnormal the better.

### SIDE EFFECTS

Antibiotics have side effects, often very bad.

A patient can be allergic to a certain antibiotic meaning he goes red, gets hives, has bad reactions in varying degrees of severity. If so get him on another antibiotic now.

You can test for allergy by scratching the skin and putting a dab of antibiotic on it (not the sugar or protective covering) on a Band-Aid. After a while if the person is allergic to it the area will get red and puffy. This is not usually done unless you are being super cautious.

The chloro and aureo families can affect the sense of balance and early preparations destroyed the sense of balance forever.

All oral antibiotics sooner or later give the patient a stomach ache and indigestion. So they should be taken with milk or after a meal, never with just water.

The *longer you* keep them on an antibiotic the harder it is on the patient's system.

The operating rule is *give enough of the right kind to get a fast cure.*

If you started on the wrong kind get them on the right kind the moment you detect the error.

### DISEASE CYCLES

Diseases have their own cycles of action and time periods if not given antibiotics. Some run for days, some for weeks, some for a lifetime. Gonorrhea for instance lasts a year in man, five years in a woman. Syphilis has its own cure, not an antibiotic, which is "Ehrlich's Magic Bullet," neoarsphenamine *and* Preparation 606, which is a oneshot cure if done right and only kills 1 out of 10,000. Syphilis untreated is a lifetime cycle and drives one crazy, the condition being known as " paresis." Perhaps modern antibiotics will include it as curative.

Pneumonia runs about 6 weeks on its own if the patient lives.

These disease cycles do not hold true when antibiotics are used. They take as long to cure as it takes to slam the temperature to subnormal and hold it there until it can't be held any longer. 24 to 36 hours is the new cycle for lighter illnesses treated with *properly dosed correct* antibiotics.

More serious diseases require longer but mostly because the areas they infect have poorer blood circulation (such as bone infections).

### SULFA DRUGS

The oldest antibiotics are the sulfa drugs. These are white tablets usually. Enterovioform for stomach illness is a sulfa drug.

They have a very heavy side effect of dizziness and sometimes delusion (spiders on the wall).

Sulfathiazole is usually now used as a powder to pour in open wounds and it and its brother sulfas are the only ones that can be used “topically” which means as a surface treatment (as different from internal).

They follow when taken internally all the rules of antibiotic administration.

“Gerontal,” a trade name for a water-soluble sulfa, is excellent in kidney infections if the rules of antibiotics are followed. It needs large quantities.

You can fall back on sulfa when all else fails.

Sulfas are chemical compounds.

## PENICILLIN

Penicillin is the first of the antibiotics made from mould (as in mouldy bread, etc.).

It is the USUAL antibiotic.

It is growing less effective due to diseases getting used to it and medical misadministration of it.

A disease treated with an antibiotic which is not cured, when communicated to another body becomes able in the new body to resist treatment. Thus new antibiotics are continually searched for.

However, penicillin is the basic, usual, antibiotic to use.

*A new penicillin (VK) can be taken orally or injected. It would always need to be prescribed by a physician, and the actual dosage would need to be prescribed by a physician, but it could then be taken under the care of an M.O. (Medical Officer).*

The oral penicillin VK does work when administered orally (by mouth). Penicillin VK is a potassium salt of penicillin that is stable in stomach acids. It does not have to be shot with a needle.

The type of penicillin that does NOT work when taken by mouth is penicillin G. Stomach acids kill it.

Penicillin G has to be SHOT with a needle. *Procaine* penicillin in 1cc or 2cc amounts, shot into the buttocks with the person lying down on his *stomach* (muscles relaxed), lasts for 24 hours when a 2nd shot is given. Other types of penicillin can also work this way. *Ordinary* penicillin however (*penicillin G*) has to be shot every 3 hours! Read the literature carefully.

If a shot of 24 or 36 hour penicillin hasn't worked in 8 hours to reduce the temperature at least somewhat use some other antibiotic at once.

Penicillin is no good, even when shot, for stomach or bowel complaints like dysentery. It is excellent for other types of bacterial infection. It is usually no good for virus infections.

*Oral versus injections of penicillin depends upon the type of and seriousness of the infection. The injectable penicillin cuts the blood leveling time to about half as compared to the oral penicillin. So the injectable penicillin is faster.*

If a person is allergic to penicillin some other antibiotic MUST be used.

## OTHER ANTIBIOTICS

Chloro \_\_\_\_\_aureo\_\_\_\_\_ strepto\_\_\_\_\_ compounds are offered under a variety of trade names. The blank fills “mycin” or “mycetin.” Kemacetin or some such spelling is a company trade name for chloro\_\_\_\_\_. Chlorofin is almost the same thing.

Read the literature for the strength of each tablet or shot and what it is good for. You can puzzle this out even in a foreign language.

Follow the literature.

If one doesn't work, another will. Chloro or aureo handles dysentery, stomach and bowel upsets, some viruses and a lot of other things.

## VITAMINS

B1 should be given when giving antibiotics or the patient gets depressed as all the B1 gets eaten up by antibiotics, just as alcohol or sleeping pills eat up B1. 100 mg of B1 a day is an absolute minimum for a person taking antibiotics.

B2 is vital to give anyone with stomach and bowel complaints whether he is on antibiotics or not.

Vitamin C is excellent for helping colds and infections. 250 mg is the usual dose a couple times a day. It's much like fruit in that fruit contains a lot of it. If anyone's teeth or gums get sore push in lots of Vitamin C.

So B1 and C are usual along with antibiotics. B1, C and B2 are vital to help clear up stomach and bowel complaints along with antibiotics.

## INTESTINAL BACTERIA

Natural intestinal bacteria are vital to digest and handle food. These all get killed off by oral antibiotics and must be replaced.

Yoghurt is the usual remedy and one should eat it for several days, a portion a day after getting well with antibiotics.

The clever French put these exact bacteria in glass vials for daily dosage. This does the same thing even better than yoghurt. It is called “Biolactyl.”

NOTE: Under medical supervision, LRH has been handling antibiotics as a ship captain for a long time and has done as well independent biological research. Some of the data (the use of subnormal temperatures) is not known to the medical profession but was discovered by Ron in 1952 when he had to discover it to save an important person's life after two relapses from doctors using older methods. It has since been proven out by many quick successes using antibiotics on ships.

A person treating someone on antibiotics must go over this HCOB very carefully as it is very condensed, very precise and means exactly what it says. When this data is not known some get into long illnesses which are needless.

A person treating another with antibiotics has to know many other things but the above is very vital.

All Div 5 personnel and anyone who will administer antibiotics must starrate, M9, M4 in Qual on this HCOB. Medical charts (see FO 2187 “MEDICAL CHARTS”) must be made up so that, in case of any fever, the person will be treated standardly to a speedy recovery.

HCO BULLETIN OF 16 JUNE 1972 RA- 1  
ADDITION OF 12 JUNE 1979

Remimeo

**PAID COMPS SIMPLIFIED—ADDITION 1  
C/S SERIES 81RA  
AUDITOR'S RIGHTS MODIFIED—ADDITION 1**

HCO PL 1 May 79 DIANETIC CLEAR SPECIAL INTENSIVES introduces a new 5-hour intensive. This is for the purpose of getting a Dianetic Clear check and rehabilitation only.

For the successful completion of this intensive you may count 3 Paid Completion points with a bonus of a further 3 points when the person then re-signs for the next or another service as verified by HCO.

The DTS may count a 5-hour Dianetic Clear Special Intensive as a 1/2 on the intensive part of his statistic (see HCOB 16 Sun 72RA, C/S Series 81 RA).

Issue I CONFRONTING

(This issue has been revised to incorporate data from recent research into the progress of cases in view of the current environmental and drug scene, and to give the full steps of the new Purification Rundown.)

(The Purification Rundown does not supplant technology developed and in use especially in Narconon for persons currently on drugs and apt to experience withdrawal symptoms when taken off of them. The rundown would be begun only after such technology was applied.)

(While it is being published now as a holding action until the Purification Rundown is issued as an individual package, this issue does contain the rundown as it has been piloted.)

(We are not concerned with handling bodies with the Purification Rundown. Our concern is freeing the individual up spiritually. The only dosages recommended are those classified as food. There are no medical recommendations or claims for it. The only claim is future spiritual improvement.)

(This data is released as a record of researches and results noted. It cannot be construed as a recommendation of medical treatment or medication and it is undertaken or delivered by anyone on his own responsibility. I receive no percentage of fees for administering this rundown and my development of it is a contribution and gift to my friends. )

*Glossary:* Any words you find in this HCOB which you do not understand can be found in a normal dictionary or in the *Dianetics and Scientology Technical Dictionary* or are explained in the following text.

The planet has hit a barrier that prevents widespread clearing—drugs and biochemical substances. These can put beings in a condition that can prevent case gain.

That's the situation today.

What would you give for a rundown that undercut every case on the planet and could be administered by technicians who did not require long periods of training?

Sweeping breakthroughs have been made recently through my 29 year study of the progress of cases against the environmental factors and biochemical aspect of our current society.

One immediate result of this is the Purification Rundown.

The Purification Rundown is simply a program to clean out and purify one's system. Based on the original Sweat Out Program, it is a new much more thorough and much faster version of that program, streamlined by the introduction of the sauna bath for sweating, and with a much broader use.

It should be clearly understood at the outset that the Purification Rundown is not a substitute for any kind of processing.

Rather, because of the biochemical problem that besets society today, it is the undercut that has become necessary to prepare the majority of pcs for making optimum case gain from their processing.

In point of fact, the Purification Rundown is for anyone.

### BIOCHEMICAL FACTORS

By "biochemical" is meant:

The interaction of life forms and chemical substances.

BIO means life; of living things. From the Greek "BIOS," life or way of life.

CHEMICAL: of or having to do with chemicals.

"Chemicals" are substances, simple or complex, which are the building blocks of matter.

We live in a chemical oriented society.

One would be hard put to find someone in the present-day civilization who is not affected by this fact. The vast majority of the public is subjected every day to the intake of food preservatives and other chemical poisons including atmospheric poisons, pesticides and the like. Added to this are the pain pills, tranquilizers and other medical drugs used and prescribed by doctors. And we have as well the widespread use of marijuana, LSD, Angel Dust and other street drugs which contribute heavily to the scene.

I have even found that there is such a thing as the "drug personality." Drugs can apparently change the attitude of a person from his original personality to one secretly harboring hostilities and hatreds he does not permit to show on the surface. While this possibly is not always the case, it does establish a linkage between drugs and increasing difficulties with crime, production, program execution and the modern breakdown of the social and industrial culture.

These factors are *all* part of the biochemical problem.

### WHY "PURIFICATION"?

We have known since 1968 that it is a mistake to try to do mental and spiritual handling on somebody who has been on drugs. People who have been on drugs do not make case gain until the drugs are handled. In the early '70s the Drug Rundown was developed and put into broad use and it included the auditing out of drugs, medicines and alcohol.

In 1977 I issued HCOB 1 May 77 in which I stated that LSD apparently stays in the system, lodging in the tissues and mainly the fatty tissues of the body and is liable to go into action again, giving the person unpredictable "trips."

The "restimulation" experienced by people who had been on LSD appeared to act as if they had just taken more LSD.

As it has been stated that it only takes 1/millionth of an ounce of LSD to produce a drugged condition and because it is basically wheat rust which simply cuts off circulation, my original thinking on this over the years was that LSD sticks around in the body. That basically is the idea underlying the original Sweat Program. The remedy given was to sweat it out.

From the most recent research developments, it now appears that:

Not only LSD but other chemical poisons and toxins, preservatives, pesticides, etc., as well as medical drugs and the long list of heavy street drugs (Angel Dust, heroin, marijuana, etc.) can lodge in the tissues and remain in the body for years.

Even medicinal drugs such as diet pills, codeine, novocaine, and others have gone into "restim" years after they were taken and had supposedly been eliminated from the body.

Thus it seems that any or all of these hostile biochemical substances can get caught up in the tissues and their accumulation probably disarranges the biochemistry and fluid balance of the body. These substances must be eliminated if the person is to get the most possible gains from mental and spiritual processing.

The operating rule is that mental actions and even biophysical processes (Objectives, etc.) do not work in the presence of drugs.

Drug residues can stop any mental help. They also stop a person's life!

THE ONLY REASON WE ARE HANDLING DRUGS AND DRUG DEPOSITS IN THE BODY IS SO THAT THE INDIVIDUAL CAN *THEN* GET CASE GAIN.

APPARENT GAIN OCCURS BY CLEANING UP THE BODY AND CAN BE SEEN AS AN END ALL IN ITSELF. THIS IS NOT THE CASE.

DRUGS AND BIOCHEMICAL SUBSTANCES CAN *PREVENT* CASE GAIN FROM OCCURRING.

Only when we have accomplished the biochemical handling can we then go onto the next step, the biophysical handling (the relationship of the being to the body, the environment or universe) and then onto mental and spiritual processing.

When you try to move these around and put them out of sequence you get losses.

*EXAMPLES:* Actual tests have demonstrated that a person who has been on heavy drugs requires up to ten times the time to obtain a result which a non-drug person attained in only 6 to 8 hours of processing. Early tests are also showing that the learning rate of a person who has been on drugs is much lower than a non-drug person. The memory of a person who has been on drugs is such as to remove him from fear of consequences. Rate of case gain is enormously retarded by toxic substances such as drugs.

The reason we can make a breakthrough with this is because of the "Theta-MEST theory" covered in the text *Science of Survival*. Older scientific thought believed all life came from matter, a belief which goes back to the ancient Egyptian priests and remains today the dominant belief of chemists, psychologists and psychiatrists.

A life form is a combination of life itself and the physical universe. Certain elements in the physical universe are highly antipathetic to life and when introduced into life forms, inhibit proper functioning and even destroy.

The being (thetan) of course has potential pictures of these toxic substances and states and as long as they are in the body, these actual substances can restimulate a

being. When they are gone from the body, the constant restimulation can cease. So it is actually a spiritual action that is being done.

A Case Supervisor should be aware of the fact that he is wasting his time if he ignores the above.

The removal of these life-hostile chemical substances from the body of any person apparently speeds, and in some cases even makes possible, case gain. It is even worth doing for its own sake.

The Purification Rundown, therefore, is for anyone.

There is probably not a pc today who is outside this requirement.

### THE PURIFICATION RUNDOWN

The rundown is a tightly supervised regimen which includes:

- Exercise
- Sauna sweat out
- Nutrition, including vitamins, minerals, etc., as well as oil intake
- A properly ordered personal schedule.

An OCA and IQ Test are given the person before starting the rundown and upon its completion.

With each of these points kept in and the introduction of the sauna bath for sweating out, it is a refined and streamlined version of the original Sweat Out and can be completed in a fraction of the time Sweat Outs have taken in the past. Properly scheduled, with exercise and sauna sweat out done 5 hours a day the program can be completed by many in two weeks time. Some pcs may require more than that, some less.

*When The Purification Rundown Is Done:* The Purification Rundown could be considered mandatory to any person who has been on LSD or heavy drugs or who has a heavy medical drug history. Such a pc is not likely to get very fast case gain without it.

There are many pcs who have had hundreds of hours of auditing, including Drug Rundowns, who have never done a sweat out of any kind. While tremendous gains have been made by such pcs which are not to be invalidated, there is no doubt but what a large majority of them would benefit by the Purification Rundown and benefit even further from future auditing as a result.

Additionally, there are those who have done Sweat Out Programs in the past who have not experienced all the gain from it possible, or who have skimped or are incomplete on Sweat Outs.

In all cases such as those above, it is a matter for C/S adjudication as to whether or not the person would now do the program.

One would not interrupt a case that was running smoothly and making excellent gains progressively. One would not interrupt an on-going auditing action to throw in such a program randomly.

On the other hand, where a pc is consistently not making the expected gains from his processing, or is not continuing up the Bridge on his grades, a C/S might suspect the need for this program and it now becomes a part of the tech of C/Sing to take this into consideration.

In the case of a pc who has started and is continuing up the grades, it would require the correct programming.

As the Purification Rundown is always done under C/S supervision, it becomes a matter for the C/S to decide.

*The Purification Rundown and Auditing:* Originally, Sweat Outs were used to debar people from processing, so they were then permitted to be done during processing, which was not the most optimum solution.

Today, as the Purification Rundown via sauna can take as little as two weeks, it is not done concurrently with auditing. The program is done by itself, intensively, to completion under the daily supervision of the C/S.

### WARNING

This program can be strenuous and should not be undertaken by anyone who has a weak heart or who is anemic. It is therefore absolutely essential that the following rules are strictly adhered to:

1. Any person, before being put on the Purification Rundown, must first have written okay from the Medical Officer or a medical doctor. The C/S and the MO must ensure this prerequisite is kept in.
2. The MO must ensure that no one who has a weak heart or who is anemic is allowed onto the program. These points must be checked before the person starts the program. Where the Medical Officer is trained in testing blood pressure and anemia, the tests can be done by him or her. Where there is no trained Medical Officer to do these tests, they must be done by a reliable medical doctor. People with known heart conditions or high blood pressure or who are anemic, and even those with certain kidney conditions must do a program which is of a much lower gradient. An exercise program and nutrition must be worked out for them with a medical doctor.
3. The Medical Officer tests are continued periodically as the person goes through the program and if any signs of a weak heart or anemia should appear, the person is taken off the rundown and handled medically.

### EXERCISE AND SAUNA

In order to flush the poisons and chemical substances out of the body, the following actions are done.

1. *OUTSIDE RUNNING.* The first action is outside running. The purpose of this is NOT to generate sweat but to get the blood circulating and the system functioning so that impurities held in the system can be released and are pumped out.

Running increases the circulation throughout the whole body, thus: (a) it carries out cell waste more rapidly and (b) causes the circulation to go deeper into the muscles and tissues so those areas which have been stagnant can now get rid of the accumulation of biochemical deposits and, in the case of LSD, the "residual crystals" which have been stored.

Running is done on a daily basis once the person has been assigned to this program. It is done in a rubberized or vinyl-type sweat suit.

The running should be done on a gradient. If you are so breathless that you can't talk to another while you are running, then you are straining too much, so cut the gradient.

2. *SWEATING IN THE SAUNA.* The second action, following the running, is sweating. A person goes into the sauna to sweat. The impurities can now be dispelled from the body and leave the system through the pores.

A sweat suit is NEVER worn in the sauna as this acts as insulation much the same as when a diver wears a wet suit to insulate against the cold of the sea. Wearing a sweat suit in the sauna would insulate against the heat and so inhibit and curtail sweating.

Thus far, the use of a dry sauna has proved to be the most successful in inducing profuse sweating on most people. It is possible that some people may sweat more in a wet sauna; it may be that it is an individual matter and it has not yet been fully tested. There is no regulation on the rundown that outlaws the use of a wet sauna. Whichever type of sauna is employed, the whole idea is to use the system which permits the person to sweat the most.

Sweating in the sauna is done at temperatures ranging anywhere from 140 degrees to 180 degrees. It is a matter of what temperature the person can take. Usually, but not always, a person beginning the rundown will start at a lower temperature and work up. Then as he progresses he will find he can take increasing degrees of heat.

On the Purification Rundown, five hours a day are spent on a combination of running and sweating. There are no arbitraries set as to exact time limits for each, but the bulk of the period would probably be best spent in the sauna after the person had gotten his circulation up with running. One would not stint on the running, however, as the most benefit is obtained from the sweating when the circulation has been worked up so that the impurities are ready to be flushed out.

Running and sauna sweat out should be done with another person, as restimulation of past drugs, medicines, even anesthetics, etc., can and often does occur, as the toxins get sweated out. This can include the restimulation of a full-blown "trip" from LSD or other drugs one may have taken. It is a safeguard, therefore, to be accompanied by a partner or twin.

*Salt and Potassium:* Salt (sodium chloride) is not mandatory for every individual on the program. It is only necessary as a treatment if the symptoms of salt depletion (heat exhaustion) occur. These are clammy skin, tiredness, weakness, headache, sometimes cramps, nausea, dizziness, sometimes vomiting or fainting.

As potassium is lost in sweating, some of the above symptoms can be from potassium depletion. So, if salt does not handle the above symptoms, then one would switch to either potassium gluconate tablets or "salt substitute" which is mainly potassium.

Salt and potassium must be available to anyone who is on the Purification Rundown. Ideally, they would be located very near the sauna, clearly labeled.

*Liquids:* While on this program, it is important that one drink plenty of water which greatly assists in flushing and cleansing the system out. Additionally, with all the sweating done in the sauna it would be dangerous not to replenish body fluids.

## PERSONAL SCHEDULE

It is important that a person on the Purification Rundown maintains a properly ordered personal schedule.

This means that once one has started on the program he must stick to it sensibly and not skip days or do it in a random fashion. It also means that one should get enough sleep.

If one proceeds through the program in an orderly fashion it will be faster and more effective.

## NUTRITION

When we speak of nutrition we are not talking about food, as such. We are talking about vitamins and minerals as well, as these are vital to proper nutrition and

vital to the effectiveness of this rundown. We are not, however, talking about “diet” in the overused sense of the word.

### Diet and Food Fads

There are NO diets required on this rundown.

The person simply eats what he normally eats and he should make sure he gets some vegetables and that the vegetables aren't cooked to death. Vegetables contain a lot of minerals and fiber as well as some vitamins necessary to his recovery.

We are not food faddists. However, there is plenty of food faddism going on in society and you can easily start such a fad, so this must be watched on the Purification Rundown. If we don't watch it on all this we'll have people eating banana fronds split into diamonds and star shapes and blessed by some deity or other. Or a fad of “three lettuce leaves criss-crossed with two slabs of peanut butter an absolute must 18 times a day” as the only food a person can have.

Food is subject to becoming very faddist and frankly people know very little about it.

I wrote an essay on this subject (HCOB 25 Mar 75 DIET, THEORY OF A NATURAL DIET) to the effect that nobody has ever isolated the proper diet for Homo sapiens. It gives the formula of how one would go about finding the exact and proper diet. It tells you that all this diet faddism is based on no data.

So, there is no thought here of putting the person on any kind of special diet at all. There are no restrictions on what one may eat. We are not even trying to preach against toxic foods or campaign against diet abuses or junk foods or anything of that sort.

We are only trying to handle the *accumulation* of impurities built up in the body. If you wanted to defend your body against all future impurities then that is another program and not part of this one.

What is part of this scene is that a person will need certain nutrition in the form of vitamin intake and minerals.

One follows his normal eating habits. There are, however, some *additions* to the normal eating habits which consist of taking a quantity of “All Blend” oil each day, secondly, drinking lots of water to help flush out the system and thirdly, ensuring that the vitamin and mineral intake is adequate.

To put a person on a diet different than that to which he is accustomed is to introduce a sudden change in the midst of these other changes. A change of diet might be just one too many changes and is an additive to this rundown.

### Oil

There is an oil called “All Blend” which has the four essential oils in it (soy, walnut, peanut and safflower oil) which is available in the US in health food stores. If this type of oil is not obtainable elsewhere, one could blend it from these four oils in the proper amounts, or find an adequate substitute. “All Blend” oil would be best but any oil used must be cold-pressed and polyunsaturated. The oil must be kept refrigerated so that it does not go rancid.

Toxic substances tend to lock up *mainly*, but not exclusively, in the fat tissue of the body. (There is no such thing as a fat cell.) The theory, then, is that one could replace the fat tissues that hold these accumulations. The body will actually tend to hold onto something it is short of. Thus, if you try to get rid of something it is short of, it won't give it up. So, in the matter of oil, if the person takes some oil the body might possibly exchange the good oil for the bad fat in the body. That is the basic theory.

It is a theory of exchange. It is based on the Have-Waste formulas and processes which were extant in Scientology in the late '50s. That whole body of data applies to this oil's scene.

(Ref: PAB No. 123            THE REALITY SCALE  
1 Nov 57                    Vol III, page 136

ASSOCIATE NEWSLETTER NO. 2, 1953, ca. early May, Vol. 1, page 330  
ASSOCIATE NEWSLETTER NO. 7, 1953, ca. late July, Vol 1, page 412)

If one wants somebody to clean up the fat tissue in the body, he had better give the body some fat in order to make up for the fat tissues the body is now releasing or changing. The effort is to get the body to take good oil or fat in exchange for the bad fat it is holding onto. In this way we have some chance of getting the body to release fatty tissue which is impregnated with toxic substances.

### How Much Oil?

The exact quantity of oil needed by the person on the rundown has not been definitely established, but it is very likely somewhere between two tablespoonsful and a half a cup. One tablespoonful of oil is not going to accomplish much. Too little oil won't let the body substitute the fat tissue. If too much is given it can cause diarrhea. One way to test for the right amount of oil for the person would be to put him on a scale and keep a close check on his weight. This should be done routinely in any event when a person is on the Purification Rundown. If the fat is being replaced in the body despite the intake of oil then the weight will not go up. If the body is simply assimilating the oil, with no exchange in fat tissue, the weight will go up. Change in weight would tend to indicate whether or not the body was exchanging old fat tissue for new fat tissue or simply adding new fat tissue.

All people, be they fat or thin, have some fatty tissue. Some of course have more fat stored in their bodies than others. On this program we simply want to get rid of the fat that contains the toxic substances, we are not even trying to make people lose weight.

(Worth mentioning here is also the fact, particularly in regard to thin people, that while toxic substances lock up *mainly* in fat tissue it does not mean that the person cannot have drug deposits inside cells.)

One could not expect the results that can be achieved on the Purification Rundown without sufficient oil intake.

### Nutritional Deficiencies

Having been an early discoverer and instigator of vitamin therapy over the past 29 years, I know whereof I speak on the subject of nutritional deficiencies. My work covering vitamins and deficiencies, stimulants and depressants and the field of biochemistry goes back to the spring of 1950.

Though I have been interested in vitamins primarily only as they might aid, speed or assist auditing, my research along this line has been extensive. This is not to devalue the work and contributions of others in the nutritional fields.

It takes a mere skimming of the surface of this subject, however, to recognize that the Purification Rundown will not be effective in the face of a vitamin or mineral deficiency in the person.

One of the things that toxins and drugs do is create nutritional deficiencies in the body in the form of vitamin and mineral deficiencies. Obviously a C deficiency, a B

Complex deficiency and a niacin deficiency are brought about by drugs. There may be other deficiencies that we are not aware of at this time. But that list is certain.

Also, alcohol, for example, depends for its effects on a person being able to burn up B1. When it burns up all the B1 in the system the person goes into DTs (delirium tremens) and nightmares.

In the case of other toxic substances the probability exists that other vitamins besides B1 are burned up. What we seem to have hit on here is that the LSD and street drugs burn up not only B1 and B Complex (which we assume they do) but also create a deficiency in niacin in the body and that they possibly depend on niacin (one of the B Complex vitamins) for their effect.

It is easily seen that there is a wide range of toxic substances which create nutritional deficiencies.

It is quite vital that any vitamin or mineral deficiency is being handled while the person is on this rundown.

In the piloting and development of the Purification Rundown, the most effective handling for this was found to be starting the person on the following:

*Vitamin A*—approximately 5000 IU per day.

*Vitamin B Complex*—approximately 2 caps per day. Ensure the Vitamin B2 and B6 are balanced (approximately the same amount of each).

*Vitamin B<sub>12</sub>*—special additional amounts of B1 are required, 250-500 mg or greater daily, depending on the amount of niacin given.

*Vitamin C*—250-1000 mg daily, depending upon the person's tolerance. (As Vitamin C can cause stomach problems or diarrhea, each person's tolerance must be worked out.)

Vitamin C has to be increased in proportion to the niacin given. Records exist wherein Vitamin C has become so deficient in a drug user that he used up tens of thousands of milligrams per day before he began to eliminate any. Vitamin C deficiencies result in scurvy. "Live C" from raw onions or raw potatoes is sometimes necessary in addition to synthetic C and were the traditional remedies for scurvy.

*Vitamin D*—approximately 400 IU daily.

*Vitamin E*—approximately 800 IU daily.

*Niacin*—100 mg daily to begin.

It is then increased gradiently to as high as 5000 mg. Particularly B1 and C have to keep pace with it as it is increased in dosage.

*Cal-Mag*—one glass daily, at least.

*Multi-Minerals*—(a balanced combination of minerals).

These would then be increased proportionately according to need and/or niacin increase as the person progressed on the rundown.

A person may have certain vitamin deficiencies which are not handled by the above. When he routes onto the Purification Rundown he should be sent to the Medical Officer or a medical doctor who would determine what, if any, additional vitamin deficiencies he might have. Any such not covered in the above list would then be handled with specific supplements for those deficiencies.

Vitamins would be taken after meals or with yoghurt. If taken on an empty stomach they could cause stomach burn.

## NIACIN

Niacin, as one of the B Complex vitamins, is essential to nutrition. It is so vital to the effectiveness of the Purification Rundown that it requires some extensive mention here.

It can produce some startling and in the end very beneficial results when taken properly on the rundown, along with the other necessary vitamins and minerals in sufficient and proportionate quantities and along with proper running and sweat out.

Its effects can be quite dramatic so one should understand what niacin is and does and have a good R-Factor on it when starting the rundown. Taken in sufficient quantities it appears to break up and unleash LSD, marijuana and other drugs and poisons from the tissues and cells. It can rapidly release LSD crystals into the system and send a person who has taken LSD on a trip. (One fellow who had done the earlier sweat out for a period of months and who believed he had no more LSD in his system took 100 mg of niacin and promptly turned on a restimulation of a full blown LSD trip!)

Running and sweating must be done in conjunction with taking niacin to ensure the toxic substances it releases actually do get flushed out of the body.

### Niacin: Background History

Niacin's biochemical reaction is my own private, personal discovery. In the middle of the 1950s, I was doing work on radiation and I worked out that it must be niacin that operated on radiation. I was recently told by a doctor that the Dianazene formula of that time is remarkably workable today.

Niacin runs out radiation. It will often cause a very hot flush and prickly, itchy skin which can last up to an hour or longer. It may also bring on chills or make a person feel tired.

The outpoint in medical thinking has been that they thought the niacin itself turned on a flush. So they invented something called niacinamide to keep from turning on this flush. Niacin all by its lonesome does not turn on any flush. What it starts to do is immediately run out sunburn or radiation. So the niacinamide they invented is worthless and it should be mentioned that it is.

In 1973 someone got a Nobel Prize for curing insanity with niacin, but it was fairly marked that he didn't know the facts of what was actually happening because it was then promptly abandoned as people found that prolonged quantities of niacin "gave very bad side effects." The truth of the matter is that if one continues niacin, always along with the other necessary vitamins in proper amounts, the bad effects will vanish. In other words, the work I did on this was picked up and misapplied and then abandoned. This is the background history of niacin.

Now more recently doctors in megavitamin research have been administering niacin to get people through withdrawal symptoms or get them over bad drug kicks and they have been using enormous doses of, for example, 5000 mg.

I have no personal knowledge that such enormous doses are necessary for handling drugs. It is very possible that, given the combination of all the points on the Purification Rundown, many people would be able to handle drugs with lesser amounts of niacin, something under 5000 mgs.

### Niacin Theory

In theory, niacin apparently does not do anything by itself. It is simply interacting with niacin deficiencies which already exist in the cellular structure. It doesn't turn on

allergies; it runs out allergies. Evidently anything that niacin does is the result of running out and running through past deficiencies.

*CAUTION:* The manifestations niacin produces can be quite horrifying. Some of the somatics and manifestations the person may turn on are not just somatics in lots of cases, in my experience. I have seen a full blown case of skin cancer turn on and run out. *So, a person can turn on skin cancer with this and if that should happen if niacin is continued the skin cancer has run out completely.*

Other things that may turn on are hives, flu symptoms, gastroenteritis (inflammation of the mucous membrane of the stomach and intestine), aching bones, upset stomach or a fearful or terrified condition. There seems to be no limit to the variety of phenomena that may occur with niacin. If it is there to turn on by niacin it apparently will do so with niacin.

The two vital and proven facts here are:

1. When the niacin was carried on until these things discharged they did run out, as they *will* do. (Sometimes people chicken out on it and don't finish the course and it leaves them hung up. This should not be allowed to happen.)

IT IS A MATTER OF RECORD THAT WHAT TURNS IT ON WILL TURN IT OFF WHERE NIACIN IS CONCERNED.

2. When the niacin dosage was increased and the whole lot of the rest of the vitamins being taken was also increased proportionately, the niacin itself, taken in large amounts, did not create a vitamin deficiency.

#### Increasing Niacin and Other Vitamin Quantities

Most persons who have done the Purification Rundown started niacin at 100 mgs a day (some took lesser amounts, depending upon tolerance) and increased the dosage as they progressed.

The best results were obtained when niacin was taken all at one time, not split up during the day. Taken with water on an empty stomach it can be very upsetting. It is found to be best taken after a meal or with yoghurt or milk.

To increase the dosage, a specific quantity of niacin was administered each day until the effect that dosage produced diminished. One would then, next day, up the dosage on a gradient, say in amounts of 100 mg. In this way you get an overlap of the old dosage becoming useless and the new dosage being needed. This tended to speed up the action considerably when continued each time the effect of the dosage diminished.

The other vitamins would have to be increased proportionately to niacin at the same time the niacin is increased as they are interacting in the deficiencies and more are needed.

It was found essential that C, B1 and other B vitamins need to be given in ratio to the niacin being fed. In other words, as you up the niacin you would up the B1 and the B Complex. And also as the niacin is upped, the Vitamin C would be upped. These things would have to be kept in ratio.

The theory here is that one, by overdosing one vitamin, can create a deficiency artificially of another vitamin. This is a principle I hit upon as early as 1950 and proved it.

You can actually create a deficiency in C by administering B and calcium. All you have to do is pump those things to the guy in very very heavy dosages and he will develop the deficiency characteristics of C. His teeth begin to hurt. Then when you give

him C the manifestations go away. In other words, an overdose of X and Y can apparently create a deficiency in vitamin Z.

The reason for all this is that a vitamin is making certain changes in the body and these changes to occur fully also require the additional vitamin. But that additional vitamin isn't there. So it gives the manifestation of being in deficiency. All of this is my own private theory; it isn't anywhere else and it hasn't been subjected to tremendous and intensive research. But I sure can turn on a Vitamin C deficiency in anybody by overadministering B and calcium.

In other words, vitamin rations would have to be in proportion to one another.

## MINERALS

Between 1945 and 1973 I studied the endocrine system. In 1973 it seemed that minerals and trace minerals operating in the blood stream and circulated by other body fluids were a key to glandular interactions. The theory is: Every gland in the body specializes in one or more minerals and actually that is how they make themselves interact one with another. The endocrine system of the body monitors the endocrine system of the body apparently through minerals.

As various drugs upset the whole endocrine system of the body you can see that the moment you start administering vitamins and sweat out and things like that you're going to get a mineral demand in the body. Therefore, there would need to be certain mineral dosages right along with the rest of this package.

The principle here is that by giving one or two vitamins in excess amount you can create a nutritional deficiency of another vitamin which isn't being given or isn't being given in enough quantity.

Thus, what could slow down the Purification Rundown and make it appear unflat would be a nutritional failure—a failure to flank the niacin on either side by sufficient amounts of the other needed vitamins and minerals in proportion and a food intake which includes vegetables and oil.

In such a case one would be looking at *created* nutritional deficiencies—not conditions which were there to begin with to be run out.

Not knowing these things is probably what made the medics earlier believe that niacin had side effects. The side effects were probably somatics and manifestations half run out and deficiencies created by not flanking niacin with the other vitamins and minerals and oils necessary to cause a rebuild.

## CAL-MAG

Calcium is a must where any healing or exchange process is involved as it is a basic building block. But more important, it is calcium which affects the nervous system. I do not know the total relationship between calcium and toxic substances (and neither does anyone else) but it actually exists. The rationale back of this is that calcium in deficiency sets a person up for spasms. Nerve spasms occur in the absence of calcium. A person who thinks he is in high tension or something of the sort may simply have a calcium deficiency .

Calcium would be administered in company with magnesium. Magnesium itself has been proven necessary to keep the nerves smoothed out. The proven ratio is one half the quantity of magnesium to the quantity of calcium.

Something else odd about calcium is that it has to have an acidic base to operate in. If the system is too alkaline the calcium will not release the positive ion which makes it possible for the calcium to operate in the cellular structure and go through the vein walls and the intestinal walls and so forth. In other words, in an alkaline system

calcium is ineffective and inactive. So this brings us up to vinegar, which would add the acidic base. With calcium, magnesium and vinegar, in their correct quantities, in water exactly per the recipe, we have Cal-Mag. That is what "Cal-Mag" is and what it does. I developed and worked this out in 1973 against the very best biochemical background and references and tests.

Calcium and magnesium can be taken in order to prevent sore muscles. Cal-Mag has been found to have the added benefit of balancing out the Vitamin B1 taken, as Vitamin B1 taken without calcium can cause serious teeth problems due to causing an imbalance of vitamins and minerals.

The Cal-Mag formula, as given in HCOB 5 Nov 74 DRUGS, MORE ABOUT is repeated here:

1. Put one level tablespoon of calcium gluconate in a normal sized glass.
2. Add 1/2 level teaspoon of magnesium carbonate.
3. Add 1 tablespoon of cider vinegar (at least 5% acidity).
4. Stir it well.
5. Add 1/2 glass of boiling water and stir until all the powder is dissolved and the liquid is clear. (If this doesn't occur it could be from poor grade or old magnesium carbonate.)
6. Fill the remainder of glass with lukewarm or cold water and cover.

It will stay good for 2 days.

*NOTE:* There is a warning about Cal-Mag. Variations from the above can produce an unsuccessful mess that can taste pretty horrible. It can be made incorrectly so that it doesn't dissolve and become the most unpalatable, ghastly stuff anybody ever fed anybody. Possibly made incorrectly it is even unworkable. Made *correctly* it is a very clear liquid, quite pleasant to take and palatable. So the directions should be followed very explicitly to produce a proper Cal-Mag, pleasant to take and very beneficial.

## MANIFESTATIONS

Various manifestations turn up on the Purification Program and these can vary widely from person to person. Anything from insect bites to a full blown restimulation of an LSD trip may turn on and these all simply run themselves out and blow as the program is continued. If there are heavy drugs to be flushed out it is not uncommon for the person to experience a restim of whatever the effects of the drug or medicine were when he first took it. Old injuries or old somatics may turn on, flare up for a brief spell and vanish.

It is important to note that a given manifestation which turns on may turn on and vanish wholly or partly in any given day. Then it may turn on again the following day but less. If one increases the vitamin and mineral dosage at this time, the manifestation will turn on again. But it will be less. These things don't become more and more violent day by day, they become less and less day by day, providing the whole Purification Rundown is continued properly. At length, the vitamins, minerals, etc. no longer turn the manifestation on and it is gone. There is evidence that no amount of vitamins and mineral dosage above a certain final level for the given individual will turn the manifestation on again. The trick is to take a proper gradient with the vitamins and minerals. When you go out gradient they can turn on awfully hard so don't get in a rush. And don't chicken out either.

Emotions that have been shut off may start to reappear. The person can blow through stupidity and become more aware. He may find he can do actions more easily and consequences start to take on a new meaning to him. Memory can return.

At first some individuals may feel other-determinism about doing this program but that will gradually change and he or she will want to do it on his own determinism and for his or her own welfare. Most individuals embrace it with enthusiasm.

As long as the precautions listed earlier are well taken and the procedure followed exactly as given, the solution to any manifestation is to continue the program until the phenomenon blows. The manifestations become less and less frequent until finally they cease altogether.

### TRIPS

If a person is having trips during the program, he should take a lot of extra Vitamin B Complex and Vitamin C in correct ratio to other vitamins as these aid the body, especially the liver in getting rid of the drugs in the system. Normally the vitamins and minerals in the program are sufficient for the body to handle the residual drugs which come out.

### ADMINISTRATION

The advices on the administration of the Purification Rundown are taken from the practical experience of large pilot projects. They should not be lightly disregarded. One may find that people administering the program tend to enter their own fads and hobbies into it, or needing it themselves, avoid delivering it. The Purification Rundown runs best when purely delivered.

Any org or person administering it should:

- A. Get a signed release or quit claim from the person as is usual.
- B. See that the person understands that the action is being undertaken to help free him as a spirit and is not a medical treatment.
- C. No medication of a medical nature; vitamins, minerals and oils are food.
- D. Brief the person as to what he can expect and why, making no promises.
- E. Getting his promise to follow orders and complete the rundown and not blow it because it's uncomfortable or because he is lazy or has other appointments.

### Testing

A battery of tests should be done on the individual and should be done before and after the Purification Rundown. These would include OCA, IQ, any learning rate tests that may exist and any other tests which would give a before and after picture of the person. These of course, include weight, blood pressure, etc.

The Purification Program must be tightly supervised to be successful. The program is done under the close supervision of the Medical Officer, the Purification Program In Charge and the Case Supervisor.

### Purification Program In Charge

The In Charge will be the D of P (for org public) or the DPE or other appointed person (for org staff). The Program I/C must closely supervise each person's progress on the program and must ensure the program is done faithfully and with all points of the program in. When supervising a large group, the Program I/C is assisted by one or more deputies and a Purification Program Admin, who maintains the progress board, handles filing in pc folders and transports folders to and from the C/S.

The person's daily schedule must be set up so that he is always running or sweating in the sauna with at least one other person. It is important, especially when a group of people are doing the Purification Program at the same time, that musters and

roll calls are held by the Program I/C or his deputy. Where individuals are not doing the program in a group, they should twin up and each twin assumes responsibility for the other and sees that he does the program fully.

Anyone not keeping to his schedule or the program as written is handled by the Program I/C with warnings, cramming, chits, or ethics, as needed.

THE PROGRAM I/C IS RESPONSIBLE FOR SEEING THAT EVERYONE PARTICIPATING IN THE PROGRAM GETS THROUGH IT CORRECTLY AND COMPLETELY AND ATTESTS TO IT UPON COMPLETION.

#### Medical Officer

Before beginning the Purification Program, a person must first get written Medical Officer okay. The Medical Officer gives a person okay to go onto the program only after ensuring that the person's blood pressure is normal and that he is not anemic. The M.O. does these checks himself where he is trained to do so. He also checks for any vitamin and mineral deficiencies the person may have and gets him onto a program of vitamin and mineral supplements to correct this. A thorough medical examination by a doctor may, in some cases, be required before a person is given a medical okay to begin the Purification Program.

While on the program, the person daily reports in to the Medical Officer who issues him his vitamins, minerals, niacin and oil and sees how he is doing. Blood pressure and anemia checks are redone as needed. He also writes up any needed medical reports on the person and these are immediately filed in his pc folder for the C/S to inspect.

#### Case Supervisor

C/S okay to begin the program is required. The C/S then continues to supervise the progress of each person on the program on a daily basis.

It must be noted that this is a fully C/Sed action.

#### Daily Reports

Each program participant writes a daily report which includes:

1. How long he jogged.
2. How long he sweated in the sauna.
3. Vitamins taken and in what amount.
4. Minerals taken and in what amount.
5. Niacin taken and in what amount.
6. Cal-Mag taken and in what amount.
7. Salt taken and in what amount.
8. Weight (include any gain or loss).
9. Any occurrences, somatics, restimulations.
10. Wins.

The daily reports are given to the Program I/C or his deputy or are placed in his basket. They are read by the I/C to ensure the person is doing the program and then filed in his pc folder, which goes in to the C/S.

The C/S verifies each person's daily progress (initialling the daily report and any medical reports to show he has inspected them) and writes orders to correct any out-tech found, such as not taking the right vitamins, etc.

The folder is returned to the Program I/C who checks the written C/S and executes any C/S orders, such as getting the person back onto the correct vitamins, getting the person to attest, and so on. The program is run in this fashion until it is completed.

## END PHENOMENA

The purpose of this program is very simply to clean out and purify one's system of all the accumulated impurities such as drugs, insecticides and pesticides, food preservatives, etc., etc. For someone who has taken LSD or Angel Dust this would include getting rid of any residual crystals from the body.

When this has been accomplished the program is complete.

As the person goes through the Purification Program, one should be able to see an improvement in his physical well-being as he rids the system of its accumulated impurities.

Obviously if the person is still feeling the effects of past drugs or chemicals going into restimulation, the program cannot be considered complete and must be continued until all these manifestations have turned off completely.

The product of this program is a purified body, free from the impurities, drugs, etc., that had accumulated in it.

It is up to the C/S to send the person to attest when the above product has been achieved.

A continuation of the vitamins, minerals, oil, vegetables and Cal-Mag, at least at the rate of recommended daily requirements in balanced amounts is wise after the rundown is completed. A sudden cessation of such a heavy vitamin dosage can itself produce a letdown. It is possible the person should come off them on a steep gradient rather than abruptly. Particularly, where drug damage to the brain or nerves has occurred, the body needs these things to rebuild itself. If one doesn't do the above there can be a brief appearance of a letdown.

Remember that the person has probably been leading an unhealthy life without proper nutrition, sleep and exercise so it would be a good idea to recommend moderate daily dietetic and exercise disciplines so he will stay healthy, having nothing to do with therapy.

If such a letdown occurs the C/S should take the above into account, otherwise he may be puzzled. He will find a certain number skimped the rundown are unflat but the majority of such simply went back to an exerciseless, five packs of cigs a day, vitamin and mineral deprived life. Such regimen recommendations are up to people who specialize in them. No fads please. The C/S must remember that the person should now be restored to any interrupted program or C/Sed for his next level or, if he is also PTS. should be de-PTSed. For most the next C/S would be Objective Processing. The person has not finished his processing with the Purification Rundown. He has just cleared the way to get real case gains.

## LENGTH OF PROGRAM

One should be able to get through the whole program in two weeks at five hours a day. Some will take more and some will take less.

If the procedure in this HCOB is exactly followed this will not become a long, drawn-out action.

## SUMMARY

With the Purification Program we now have the means to get rapid recovery from the effects of the accumulation of the environmental chemical poisons as well as the medical drugs and street drugs which inhibit the progress of cases.

By reducing the time required for sweat out and increasing its efficiency, we are able to make the Purification Program a single, easily completed step.

With the inclusion of vitamins, minerals and oils we are able to work toward restoring the biochemical balance of the body and make it possible for the body to reconstruct itself from the damage done by drugs and other biochemical substances.

We have brought the person up to the level where he is now ready for processing and can truly achieve biophysical and then mental and spiritual gain.

From this step alone one will see some sparkling results.

The Purification Rundown should be ideally followed by auditing. The type of auditing most beneficial for the next step is "Objective Processing." An enormous body of work exists for this next level, none of which is changed by the Purification Rundown. The Purification Rundown only undercuts it. As the world sinks we get below it to prop it up!

Let's give this program a total push and take a major step toward a drug-free society and planet!

The Purification Rundown has as its sole purpose the handling of the restimulative effects of drugs and toxic residuals on a spiritual being. The Purification Rundown is a spiritual activity based on and administered according to the doctrine and practices of the religion of Scientology as set forth in the writings of L. Ron Hubbard and adopted by the Church. No part of the rundown is intended as the diagnosis, prescription for, or treatment of any bodily or physical condition or ill. The Church is not responsible for the handling of any bodily or physical condition or ill, it being the responsibility of the individual to seek the competent medical advice and treatment of his doctor in such matters.

**THE PURIFICATION RUNDOWN  
—ERRATA AND ADDITIONS**

Amendment to HCOB 6 Feb 78RA, THE PURIFICATION  
RUNDOWN REPLACES THE SWEAT PROGRAM

ERRATA

In HCOB 6 Feb 78RA, THE PURIFICATION RUNDOWN REPLACES THE SWEAT PROGRAM, under "Exercise and Sauna," page 167, in the twelfth paragraph from the top of the page, a clarification was omitted at the end of the last sentence. This paragraph, with the full clarification added, is amended to read:

"Running is done on a daily basis once the person has been assigned to this program. It is done in a rubberized or vinyl-type sweat suit when persons are not also being given sauna or steam bath treatment. When the Purification Rundown is being delivered with the sauna, the rubberized or vinyl-type sweat suit is omitted in running but the running is still done and is a necessary part of the rundown."

In other words, when the person is doing the Purification Rundown standardly and using the sauna he must also run to work up his circulation prior to going into the sauna, but he does not wear a rubberized or vinyl-type sweat suit when he runs. When a sauna is not available, some but much slower results are obtained by running in a rubberized sweat suit, as in the original Sweat Out Program, which has now been supplemented by my later discoveries.

ADDITIONS

Exercise and Sauna

As stated in HCOB 6 Feb 78RA, the bulk of the 5 hours daily period of running and sauna sweat out is best spent in the sauna after the circulation has been worked up by running.

It should be reemphasized here that the 5-hour period is NOT 50% exercising and 50% sauna. The rundown gives best results and works like a bomb with a much lower percentage of time exercising and a much higher percentage in the sauna.

Sauna

When people get too warm or feeling faint, or when the body temperature gets too high in the sauna, it is permissible for one to go out and take a shower and then go back into the sauna. One could get over-heated to the point of simply keeling over due to the heat, and the handling for this is to take a cold shower. People who are having a hard time spending consecutive hours in the sauna are permitted to do so.

A similar manifestation can be caused by lack of salt or potassium, so one must watch for any symptoms of salt or potassium depletion and handle such manifestations with extra salt intake or potassium gluconate tablets, as covered on page 168 of HCOB 6 Feb 78RA.

It is advisable not to fall asleep in the sauna as overheating or salt or potassium depletion could occur while one was asleep.

### Steam Baths

Steam baths, at similar temperatures to the sauna, can be used by themselves when available. They serve much the same purpose as the dry sauna and it has been suggested that a steam bath may even work faster, but this has not been tested or confirmed. The steam bath is not preferable to a sauna but produces a similar effect. Either can be used.

The same tips and precautions apply to the use of a steam bath as to the sauna.

### Eucalyptus Oil

A small quantity of eucalyptus oil is sometimes added to the steam in a steam bath or similarly used in some saunas.

In a modern sauna or steam bath, the procedure is to simply put one or two capfuls of eucalyptus oil in a bucket of water in the room. As it then evaporates (the oil will evaporate before the water does), more can be added as needed.

Some people don't like the smell of eucalyptus at all, while others find it pleasant. If the solution is too strong it can cause watering of the eyes or nausea in some cases. Thus, one would survey before using it and, if used, it should be in appropriate small quantities.

Used correctly, eucalyptus has been reported to be beneficial in clearing up the lungs and clearing the sinuses. One person has reported his voice smoothing out as a result of using eucalyptus oil in the sauna.

It is not a mandatory step on the Purification Rundown, but as an optional step the data given here on the use of eucalyptus oil in the sauna or steam bath should be known.

Whether or not eucalyptus is used, it goes without saying that a sauna or steam bath should be kept hygienic and free of odors by scrubbing the room at least once, or oftener, daily.

HCO BULLETIN OF 23 MARCH 1978RA  
REVISED 14 NOVEMBER 1979

Remimeo

(CANCELS BTB 16 Dec 73, Word Clearing  
Series 51, WORD CLEARING ERRORS.)

(Revisions not printed in a different type style)

**Word Clearing Series 59RA**

**CLEARING WORDS**

(Ref: HCOB 7 Sep 74      Word Clearing Series 54  
                                 SUPERLITERACY AND THE  
                                 CLEARED WORD  
         HCOB 17 Jul 79 I    Word Clearing Series 64  
                                 THE MISUNDERSTOOD WORD,  
                                 DEFINED)

In research concerning Word Clearing, study and training done with various groups over the recent past months, it has become all too obvious that a misunderstood word remains misunderstood and will later hang a person up unless he clears the meaning of the word in the context of the materials being read or studied *and also* clears it in all of its various uses in general communication.

When a word has several different definitions, one cannot limit his understanding of the word to one definition only and call the word “understood.” One must be able to understand the word when, at a later date, it is used in a different way.

**HOW TO CLEAR A WORD**

To clear a word one looks it up in a good dictionary. Dictionaries recommended are The Oxford English Dictionary or the Shorter Oxford Dictionary and Funk and Wagnalls Standard English Dictionary.

The first step is to look rapidly over the definitions to find the one which applies to the context in which the word was misunderstood. One reads the definition and uses it in sentences until one has a clear concept of that meaning of the word. This could require ten or more sentences.

Then one clears each of the other definitions of that word, using each in sentences until one has a conceptual understanding of each definition.

The next thing to do is to clear the derivation—which is the explanation of where the word came from originally. This will help gain a basic understanding of the word.

Don't clear the technical or specialized definitions (math, biology, etc.) or obsolete (no longer used) or archaic (ancient and no longer in general use) definitions unless the word is being used that way in the context where it was misunderstood.

Most dictionaries give the idioms of a word. An idiom is a phrase or expression whose meaning cannot be understood from the ordinary meanings of the words. For example, “give in” is an English idiom meaning “yield.” Quite a few words in English have idiomatic uses and these are usually given in a dictionary after the definitions of the word itself. These idioms have to be cleared.

One must also clear any other information given about the word, such as notes on its usage, synonyms, etc. so as to have a full understanding of the word.

If one encounters a misunderstood word or symbol in the definition of a word being cleared, one must clear it right away using this same procedure and then return to the definition one was clearing. (Dictionary symbols and abbreviations are usually given in the front of the dictionary.)

### EXAMPLE

You are reading the sentence “He used to clean chimneys for a living” and you’re not sure what “chimneys” means.

You find it in the dictionary and look through the definitions for the one that applies. It says “A flue for the smoke or gases from a fire.”

You’re not sure what “flue” means so you look that up: it says “A channel or passage for smoke, air or gasses of combustion.” That fits and makes sense so you use it in some sentences until you have a clear concept of it.

“Flue” in this dictionary has other definitions, each of which you would clear and use in sentences.

Look up the derivation of the word “flue.”

Now go back to “chimney.” The definition “A flue for the smoke or gases from a fire,” now makes sense so you use it in sentences until you have a concept of it.

You then clear the other definitions. One dictionary has an obsolete definition and a geological definition. You would skip both of these as they aren’t in common usage.

Now clear up the derivation of the word. One finds in the derivation that it originally came from the Greek word “kaminos,” which means “furnace.”

If the word had any synonym studies, usage notes or idioms, they would all be cleared too.

That would be the end of clearing “chimney.”

### CONTEXT UNKNOWN

If you don’t know the context of the word, as in Word Clearing Methods 1, 5 (when done from a list), 6 or 8, you should start with the first definition and clear *all* definitions, derivation, idioms, etc. as covered above.

### “WORD CHAINS”

If you find yourself spending a lot of time clearing words within definitions of words, you should get a simpler dictionary. A good dictionary will enable you to clear a word without having to look up a lot of other ones in the process.

### CLEARED WORDS

A CLEARED WORD IS ONE WHICH HAS BEEN CLEARED TO THE POINT OF FULL CONCEPTUAL UNDERSTANDING BY CLEARING EACH OF THE COMMON MEANINGS OF THAT WORD PLUS ANY TECHNICAL OR SPECIALIZED MEANINGS OF THAT WORD THAT PERTAIN TO THE SUBJECT BEING HANDLED.

That's what a cleared word is. It is a word that is understood. In metered Word Clearing this would be accompanied by a floating needle and very good indicators. There can be more than one F/N per word. Clearing a word must end in an F/N and VGIs. Off the meter this would be accompanied by very good indicators.

The above is the way a word should be cleared.

When words are understood, communication can take place and with communication any given subject can be understood.

All Auditors

REVISED 31 JANUARY 1979  
(Revisions not printed in a different type style)

**THE END OF ENDLESS DRUG RDs**

(Ref: HCOB 19 Sep 78R THE END OF ENDLESS  
Iss II DRUG RUNDOWNS REPAIR  
Rev. 31.1.79 LIST)

The possibility of running a Drug RD flat on a pc is totally zilch and the reason for this is that there have been innumerable cultures in the several universes that were far more drug oriented than this one. And even on a person that's not manifesting drugs and hasn't taken any this lifetime, you can collide with these cultures and universes if you keep pushing it.

Over the years some pcs have had Drug Rundowns which stretched interminably into hundreds of hours. And some pcs have had drugs handled once, only to have them rehandled and then rehandled again at some later date in what appear to have been endless Drug Rundowns.

This has been largely due to the listing and running of whole track drugs or, through Dianetic auditing errors, the collision with and restimulation of early drug cultures on the track.

This endless auditing of drugs can have built up charge which is preventing the pc from getting all the gain possible from his next grade, or it can even act to prevent him from wanting further auditing.

There is an end to endless drug handling.

We have it now in a rundown which is called The End of Endless Drug Rundowns Repair List.

**THE END OF ENDLESS DRUG RUNDOWNS REPAIR LIST**

(Ref: HCOB 19 Sept 78R, Issue II,  
Rev. 31.1.79, same title.)

A prerequisite for this rundown is the C/S 53RL to F/Ning list. (The C/S 53 is not included as a part of the rundown itself, but is done separately as a set-up action.)

When properly set up, the pc is given THE END OF ENDLESS DRUG RUNDOWNS REPAIR LIST and any reading items handled as indicated.

This rundown is for those pcs who have previously been run on an old Drug Rundown, done by old style drug handling. (Rarely, if ever, would it apply to a person audited on the NED new Drug Rundown as covered in HCOB 15 July 71RC, NED Series 9RB, DRUG HANDLING.)

THE END OF ENDLESS DRUG RUNDOWNS REPAIR LIST resolves the situation for a pc who has been overaudited on drugs, who has been misrun on drugs, who has had an endless Drug Rundown and/or who has bypassed charge on auditing on drugs.

It simply and terminatedly cleans up any overrun, misrun or unrun drugs and the charge left with the pc as a result of these. In fairly short order it gets the pc truly completed on the subject, in good shape and ready to continue on his next case action.

A lot of cases will now be sorted out and the speed of moving up the Bridge will be greatly increased.

#### NEW ERA DIANETICS DRUG RUNDOWN A SEPARATE ACTION

The NED Drug Rundown (HCOB 15 July 71 RC, Issue III, IMPORTANT URGENT, C/S Series 48RD, NED Series 9RB, DRUG HANDLING) is an entirely separate action from THE END OF ENDLESS DRUG RUNDOWNS REPAIR LIST.

The NED Drug Rundown is for beginning Dianetic pcs or those who have not previously had a Drug Rundown.

Its steps have been arranged to prevent the endless running and rehandling of drugs.

You can always find more drugs on the track. What you're interested in is this lifetime and this body. This doesn't mean you don't run track on the Drug RD, you just don't push it. Don't ask for whole track drugs. When you list out the drugs, medicine and alcohol a pc has taken, you only want the ones he has taken this lifetime.

Objectives are run first on the pc. Each *reading drug, medicine or alcohol the pc has taken this lifetime is then* run narrative, followed by preassessment then prior assessment and, *as a final step*, more Objectives are given to bring the pc into PT after the engram running. The full and complete steps are listed in HCOB 15 July 71RC, URGENT IMPORTANT, C/S Series 48RD, NED Series 9RB, DRUG HANDLING and HCOB 22 June 78R, NED Series 2R, NEW ERA DIANETICS FULL PC PROGRAM OUTLINE.

These refined and thorough steps allow the Drug Rundown to be taken to a flat point of freedom from the harmful effects of this lifetime drugs, medicine and alcohol and an F/Ning drug list.

Where the old Drug Rundown took hundreds of hours and sometimes had to be repeated, the NED Drug Rundown requires only a few intensives to accomplish the final, finished result.

With the tech of these two separate rundowns—one for the new pc, one for handling the pc who has been run and rerun on drugs old style—we truly have an end to endless drug handling.

THE END OF ENDLESS DRUG RUNDOWNS REPAIR LIST is to be put to full use to rapidly handle those pcs who have been stalled and plagued by endless drug handling.

I expect each org and mission to get it applied and get such pcs advancing!

All C/Ses

Issue II  
REVISED 31 JANUARY 1979

*(Revisions in this type style)*

**THE END OF ENDLESS DRUG RUNDOWNS**

***REPAIR LIST***

*(Ref: HCOB 19 Sep 78R, Iss 1, Rev. 31 Jan 79,  
THE END Of ENDLESS DRUG RDs.)*

*The End of Endless Drug Rundowns Repair List is the rundown for handling a pc who has been overaudited on drugs, who has had an endless Drug Rundown done by old style drug auditing, and/or who has bypassed charge on auditing on drugs.*

*A prerequisite for the rundown is that the pc is first set up for the rundown with a C/S 53RL to F/Ning list. (The C/S 53 is not part of the rundown itself but is required as a set-up action which is done separately.)*

*The End of Endless Drug Rundowns Repair List is then delivered as a rundown in itself.*

Assess it Method 5 and handle in order of largest read.

*NOTE: This list can be assessed on Dianetic Clears, Clears and OTs, but where a reading item calls for any Dianetic auditing (items 7 and 9) it is NOT done. (Ref: HCOB 12 Sep 78, DIANETICS FORBIDDEN ON CLEARS AND OTs.) On Clears, OTs and Dianetic Clears the handling on such items is to simply indicate the read.*

1. WAS THE DRUG RUNDOWN CONTINUED PAST THE POINT WHEN YOU WERE NO LONGER AFFECTED BY DRUGS?  
(Indicate. Ask pc if he can find that point.) \_\_\_\_\_
2. WAS THE DRUG RUNDOWN CONTINUED PAST THE POINT WHEN YOU WERE RELEASED FROM THE EFFECTS OF DRUGS?  
(Indicate. Ask pc if he can find that point.) \_\_\_\_\_
3. ON THE DRUG RUNDOWN, WERE YOU RUN ON AN UNCHARGED DRUG?  
(Find which drug wasn't charged and indicate it shouldn't have been run. May be more than one uncharged drug; handle each by indicating on each. ) \_\_\_\_\_
4. ON THE DRUG RUNDOWN, WERE YOU RUN ON AN UNCHARGED INCIDENT OR ITEM?  
(Find which and indicate it shouldn't have been run. There may be more than one; handle each by indicating on each. ) \_\_\_\_\_
5. ON THE DRUG RUNDOWN, WERE YOU ASKED TO LIST WHOLE TRACK DRUGS?  
(Indicate that this may have restimulated drugs he was not affected by in this lifetime.) \_\_\_\_\_

6. ON THE DRUG RUNDOWN, WERE YOU PREVENTED FROM GETTING GRADES OR OTHER AUDITING?  
(Indicate.) \_\_\_\_\_
7. ON THE DRUG RUNDOWN, WAS AN INCIDENT OR CHAIN LEFT UNFLAT?  
(Indicate. Flatten the incident or chain R3RA.) \_\_\_\_\_
8. ON THE DRUG RUNDOWN, WAS AN INCIDENT OR CHAIN OVERRUN?  
(Indicate it. Spot the flat point.) \_\_\_\_\_
9. ON THE DRUG RUNDOWN, WAS A CHARGED DRUG NOT RUN?  
(Find which and handle per NED Drug RD steps.) \_\_\_\_\_
10. WAS THE DRUG RUNDOWN CONTINUED PAST THE POINT WHEN YOU FELT THE DRUG LIST WAS F/NING?  
(Indicate. Ask pc if he can spot that point.) \_\_\_\_\_
11. WERE YOU NOT ALLOWED TO DECLARE YOUR DRUG RUNDOWN COMPLETE?  
(Indicate. Let pc say what he/she wishes on this.) \_\_\_\_\_
12. WERE YOU TOLD YOU WERE A DRUGGIE WHEN YOU WEREN'T?  
(Indicate it, and that pc isn't a druggie.) \_\_\_\_\_
13. WERE YOU AUDITED ON DIANETICS OR NEW ERA DIANETICS AFTER DIANETIC CLEAR?  
(If so, indicate that Dianetic auditing should not have been continued past Dianetic Clear. ) \_\_\_\_\_
14. ON THE DRUG RUNDOWN, WAS SOMETHING ELSE WRONG?  
(Indicate. Have pc tell you what he/she thinks this was. If no F/N, turn it in to a Scientology C/S to handle.) \_\_\_\_\_

REVISED 21 FEBRUARY 1979

*(All changes are in this type style)  
(Ellipses indicate deletions)*

*(NOTE: Some auditors have had trouble with this rundown. It has therefore been extensively revised as per this issue. Before running a pc on this rundown, get the auditor M9ed and M4ed and starrated on the RD. Also make sure that he can operate a meter and do TRs if he has trouble with it in the future. These changes in this RD are considerable and are for immediate use and the earlier rendition of it is not to be used. Out-Int as a case condition along with R3RA audited over and beyond Dianetic Clear are primary reasons for case bogs. The percentage of out-Int may be as much as 75% in any given area. Therefore the Int RD run with NED on non-Clears and the End of Endless Int Repair Rundown are the most important single auditing actions an auditor can do and will produce the most surprising results when the condition is present and is expertly audited.)*

***Interiorization Rundown Series 4RA***

URGENT—IMPORTANT

**THE END OF ENDLESS INT REPAIR RUNDOWN**

We needed a rundown that would handle what, for some pcs, has been an endless trail of repair of repair of repair of Int.

I have now fully researched and developed the process to handle this and can release it for broad use.

THE END OF ENDLESS INT REPAIR RUNDOWN is just that.

It is the answer to Int troubles.

The rundown consists of running Int by Recall by a very precise and simple method.

At first glance it would not seem possible that such a process would handle the more resistive-appearing Int repair problems which keep coming up on some pcs. This appearance is deceptive, however, as the process is very, very effective. It runs lightly and easily on pcs, but with far-reaching results.

Skillfully handled, it quite miraculously smooths out and resolves Int on both new pcs and those pcs on whom Int repeatedly kicks in.

Of course an Int Rundown has to be run, per HCOB 4 Jan 71R, but when it is later found that the Int Rundown must be repaired then this rundown is used.

It does not replace the original Int Rundown, which has been newly revised with several more buttons and New Era Dianetics commands added (HCOB 4 Jan 71R). Rather, it complements it.

The End of Endless Int Repair RD can be run on Dianetic Clears . . . as it addresses Int with Recalls....

*(NOTE: It can NOT be run on any pc or pre-OT in the Non-interference Zone (those between R6 Solo and OT 111 attest). As the End of Endless Int Repair RD is a major action, not a repair action, it is forbidden to be run on anyone in the Noninterference Zone.*

*Where a person in the Non-interference Zone has been run on End of Endless Int he should finish up his current Solo level as feasible and get onto his next Solo level.*

*Anyone who has been run on End of Endless Int while on OT III should be finished up as feasible on Solo OT III and gotten onto NED for OTs.)*

In certain isolated cases this process could be used as a *preliminary* method for handling Int on pcs who are weak or ill and not immediately up to running engrams or secondaries, or it could be used to cool down out-Int on a new pc who exteriorizes on Objectives and has not yet had a Dn C/S-1 or any NED auditing.

But it is not a substitute for the revised Int Rundown and in the above instances you may find the pc may eventually need the revised Int Rundown itself.

The prime purpose and use of the End of Endless Int Repair Rundown is, exactly as its name implies, to handle an endless “repair of repair of repair” of Int. If a regular Int Rundown has been done and Int continues to kick in after fully standard Int correction, the End of Endless Int Repair Rundown is the answer. It effectively resolves persistent Int problems.

#### WHEN TO RUN AN END OF ENDLESS INT RUNDOWN

*When an auditor or C/S encounters out-Int on a case there is a choice of what action to take to handle it. The choice depends on what actions have been taken previously on the case on the subject of Int.*

*The first thing to determine is whether or not Int is actually out. You cannot audit a person on anything else besides Int, if Int is out. You also cannot run anything which is not charged (reading), as to do so hangs the pc with a wrong/uncharged item. An auditor getting a read on the Int section of the C/S 53 must be careful to verify that this is a valid read, and not a false read or protest read. This is very important as you must not audit a pc on Int if it is not charged, and you must not audit a pc on anything else if Int is out.*

*You determine whether the pc has already had an Int Rundown, and whether it was correctly done or flubbed. If it was flubbed were Dianetic errors repaired with an L3RF on the Dianetic chains? Has the pc had an Int Rundown Correction List? (These must be determined because the End of Endless Int Rundown is not a substitute for the Int Rundown, and it does not substitute for an Int Rundown Correction List. Dianetic errors must be repaired with an L3RF.) These must be determined by folder study and FES of the Int Rundown and any repairs of Int Rundown.*

*If the pc has had an Int Rundown and it has been flubbed, you would do an Int Rundown Correction List and handle all of the various actions necessary, providing this is within the normal time span of the rundown. Don't try this months or years later. The End of Endless Int Rundown will not repair flagrant Dianetic errors. If the pc is having or was recently given an Int Rundown which has bogged or failed, then an Int Rundown Correction List including repair of any Dianetic errors is to be done. If the pc still has out-Int despite having had the Int Rundown and it has been repaired and all that is usual and ordinary has been done, then you would do the End of Endless Int Rundown.*

*You must determine whether the pc is a Dianetic Clear, or whether he has become one somewhere along the line. If the pc has had Dianetic Clear rehabbed since the original Int RD, check the dates to determine whether the pc was run on the Int RD by R3R or R3RA when he was a Dianetic Clear. If so this can be repaired by indicating to*

*the pc that he was run on the Int RD on R3R or R3RA after Dianetic C/ear. If these Int Dianetic chains are now reading, repair them by assessing an L3RF and indicating. (Do not get into running or continuing any R3R or R3RA on a Dianetic Clear.) If the person is a Dianetic Clear and Int is still out for some peculiar reason best known to Man or beast, the only choice we have is the End of Endless Int Rundown.*

*The way to determine whether Int is out is normally by assessment of the C/S 53 buttons, and it is on this prepared list that out-Int is most often detected. You don't flatten the button, or try to handle the button that was found on the C/S 53. This is the one exception on the C/S 53 whereby you do not just F/N it on the C/S 53 and go on. We have to examine the condition of the person on the subject of Int as above, to determine which way to go. Therefore you stop right there with a C/S 53, being careful to verify the fact that you actually have a read on Int, and not a false read or protest read. (And remember that some pcs, especially when Int has been run or repaired when it wasn't charged, can get so protesty on the subject that Int will now give a false read whenever it is mentioned due to protest. An auditor's TRs, metering and obnosis of the pc and whether the pc is in session or not have to be bad for this to occur, or for the auditor to now fail to determine whether it is a valid or false read on Int.) Having determined that you do have a valid read on Int, you would not proceed with the C/S 53, but end off the session.*

### **INT RUNDOWN TABLE**

*The following table tells the auditor and C/S which way to go when handling out-Int. Once filled out this table should be kept with the pc Folder Summary in front inside of the pc folder beneath the pgm. And the table should be updated.*

	Yes	No
<b>A. IS THE READ ON INT A VALID READ?</b>	_____	_____
<i>Is there any evidence of the pc having been run on Int due to a false or protest read?</i>	_____	_____
<i>Any evidence of the read being caused by a Mis-U word?</i>	_____	_____
<i>(If 'yes' on above get 'False read?' and 'Protest?' cleaned up or the Mis-U cleared and recheck the buttons on Section A of C/S 53 to find out if Int is charged.)</i>		
<b>B. HAS THE PC HAD A FULL INT RUNDOWN?</b>	_____	_____
<i>(If 'no' or incomplete, it would have to be repaired and completed. NOTE: The Int RD would NOT be run on a Dianetic Clear, Clear or OT as they are not to be run on Dianetics in any form.)</i>		
<b>C. HAS THE PC HAD AN INT RUNDOWN CORRECTION LIST?</b>	_____	_____
<i>(If not, and there is any evidence of errors or lack of expected result, this should be done before continuing the Int RD or doing End of Endless Int Rundown. And if the pc has had several Int Rundown Correction Lists, realize that either the auditor can't make a list read, or is only getting false reads.)</i>		
<b>D. HAVE ANY R3R OR R3RA DIANETIC ERRORS ON THE INT RUNDOWN BEEN CORRECTED WITH AN L3RF?</b>	_____	_____
<i>(If not, get these repaired, as continuing the RD, or doing End of Endless Int Rundown won't solve R3R or R3RA errors.)</i>		

E. IS THE PC A DIANETIC CLEAR OR ABOVE? \_\_\_\_\_

Was the pc a Dianetic Clear when the Int RD was run on him by R3R or R3RA ? \_\_\_\_\_

*(If 'yes' to either above, you must not run any Dianetics but if Int is still out after repairing any errors the End of Endless Int Rundown can be done on a Dianetic Clear. It can NOT be done between R6 Solo and OT III attest.)*

*If the pc was run on Dianetics on the Int RD after Dn C/ear, the first action is to indicate the error of running Dianetics after Clear, and then repair any reading Dianetic Int chain with an L3RF, taking care to handle the reading lines by indication only, and not get into any running of Dianetics. This action alone will often cure any Int trouble on a Dn Clear, but if Int is still reading you can now handle it with the End of Endless Int Rundown.)*

### THE END OF ENDLESS INT RUNDOWN PROCEDURE

*Having determined that you are going to do the End of Endless Int Rundown from the table above, you proceed as follows:*

1. *The auditor has the pc demonstrate the various flows. Remember that this must not be arduous because it is actually almost auditing to do this and the person's Int is out. If the pc is a Triple pc, have him demonstrate Flows 1, 2, 3. If the pc is a Quad pc, have him demonstrate Flows 1, 2, 3, 0.*

*(Do not engage in flying ruds, Word Clearing, Touch Assists, Havingness or any other auditing over out-Int.)*

2. *Assess the End of Endless Int Rundown buttons. Take the largest read.*
3. *You then proceed to run this button with the End of Endless Int Rundown. This is done by assessing the flows. Take the flow that reads the largest and using the Recall Process that applies to that flow, run it until an F/N is achieved.*
4. *Then reassess all flows. You'll find the one you ran will be F/Ning. Another flow will be reading. Run the best reading flow by the Recall Process until it F/Ns. You repeat this procedure until all flows F/N.*

*If during the period you are running these flows on that button, the pc has a large cog, F/N, GIs, remember that you may have blown all flows. At that moment without interrupting the pc's cognition you realize that you are finished with assessing the flows of this button. For caution's sake, you check the button to see if it now reads. Of course it will F/N.*

5. *You now reassess the whole End of Endless Int Rundown button list. The whole list might F/N at this point. On the other hand it might not. If you get a read on this assessment, you treat it exactly the same as you did priorly, (steps 3, 4, 5). You keep this up until you get an F/Ning assessment of the Int buttons.*
6. *You then wait a week and reassess the Int buttons list again. If you get a read, check for false read, check for protest. Make sure it is a valid read that you have and if it is, you treat that button exactly the same as above and proceed (per steps 3, 4, 5).*

*When you get an F/Ning assessment of the Int buttons after the one week wait, the End of Endless Int Rundown is complete, and the pc is sent to declare.*

## THE INT BUTTONS

GO IN

WENT IN

PUT IN

INTERIORIZED INTO SOMETHING

WANT TO GO IN

CAN'T GET IN

KICKED OUT OF SPACES

CAN'T GO IN

BEING TRAPPED

FORCED IN

PULLED IN

*PUSHED IN*

. . . .

### EXAMPLE:

Int button assessed: PUT IN

Assess the four flows with the wordings for that button but *without* using the word "Recall":

F1: . . . you were put in something x

F2: . . . you put another in something

F3: . . . others put others in something x

F0: . . . you put yourself in something sf

Flow 2 reads best, so run Flow 2 to F/N, using the entire Recall command (i.e. "Recall a time when you put another in something"). Reassess all four flows, as above, using the same Int button....

. . . .

Examples of the running commands for "PUT IN" would be:

If F1 reads: "Recall a time when you were put in something." (to F/N.)

If F2 reads: "Recall a time when you put another in something." (to F/N.)

If F3 reads: "Recall a time when others put others in something." (to F/N.)

If F0 reads: "Recall a time when you put yourself in something." (to F/N.)

## CAUTIONS AND C/S TIPS

*The only time you check the button again while assessing flows is when the pc has had a cog, F/N, GIs, at which time you must suspect that the whole button has blown. This by the way happens in Int Rundowns and is the commonest cause of overrun Int.*

*There is another way of addressing this if the pc isn't getting cognitions to amount to anything. When you get all flows on a button F/Ning, you can end off the session and check the next day to see if the flows are still F/Ning. It some times happens where you have a not very responsive pc, that it takes several days of assessment of the flows which F/Ned yesterday to carry the F/N through a whole day. These flows often read again the next day. This is because you are running Recall Processes, and Recall Processes are simply key-outs. Therefore you are getting something keying in and keying out and keying in and keying out. This is eventually overcome. Where you are doing this day-to-day handling of the same button, it would be vital to check the button for read before you assessed the flows on it the next day.*

*The one-week wait is a compromise for the 3 to 10 day key-out period; you can't say wait for 3 to 10 days, so it is set at one week. During the rundown there may have been a momentary stir-up of some kind, such as a tiny ripple on an auditor's TRs rendition, or a badly mishandled origin that could cause an ARC break needle, or something like this could happen, so if you wait a week such trouble will key out, before you assess the buttons list again. Or you may have been riding a win, a persistent F/N on one button, when the whole subject of Int is not handled, and you will get environmental restimulation. Remember you are only handling Recalls, and a little more Recalls run will probably blow it for good. So you are waiting a week to see if the environment keys him in again. You reassess a week later and if the buttons are all clean, fine. But if something reads on the week later assessment that must mean an engram or something is pretty close to the surface still. You then handle it again and this time the little point that was missed will turn up and that will be the end of that. You handle the buttons to F/Ning assessment and then that is the end of that. The End of Endless Int Repair. (There is no second wait for another week.)*

*Now of course if during the one-week wait the pc gets keyed-in again or originates or by reason of BIs or manifestation that Int is still out, you would not robotically wait out the whole week before giving the next session, as you now know he is not on a persistent F/N, and you know there is more to handle.*

*And on the reassessment of the buttons after the week wait, the auditor must again be sure that it is a valid read on Int and not a false or protest read before he launches off into running anything again. False reads on the assessment, protest reads, or the pc suffering from something else entirely besides out-Int can cause a false read on assessment of the Int buttons. Hence the necessity to be sure you have a valid read before you proceed. And if the pc is caved in or BIs about it there is a little checklist that tells a C/S what to do about that too.*

*The things that could go wrong are rather simple and are few in number. These are:*

- a) Int wasn't out in the first place,*
- b) The pc has been run on false reads,*
- c) The pc was suffering from something else entirely other than out-Int,*
- d) The auditor's TRs are bad, or broke the Auditor's Code,*
- e) The auditor's metering was bad, giving wrong assessments,*
- f) The auditor overran F/Ns, or reran a flow that just F/Ned invalidating the F/N just gotten,*

- g) *Pc had a Mis-U on the word 'Recall' and was trying to run through engrams on the Recall Process,*
- h) *The pc had a major cog on the subject of Int, blowing the whole thing and the auditor went on, overrunning the Int Rundown or End of Endless Int Rundown,*
- i) *Pc was audited on some other action other than Int while Int was out—such as rudiments, Touch Assists, Word Clearing or any other auditing or assist action, including illegal 2-way comms about his case or auditing, coffee shop or eval or inval by his 'friends' or others between sessions,*
- j) *Errors on the original Int RD weren't repaired before starting the End of Endless Int Rundown.*

*If a C/S can't tell by folder inspection which of these it is he can have the pc interviewed by a D of P to find out, or even get the above assessed to find out which it is.*

#### **VITAL DATA ON INT RD END PHENOMENA**

*Exteriorization is not the EP of the Int Rundown. If it happens that the pc goes exterior during the RD, you end off gently as in any other auditing. But that is not the EP, and you may have to pick him up again later and complete the Int RD or handle it with the End of Endless Int Repair Rundown.*

**THE EP OF THE INT RUNDOWN IS NO MORE CONCERN OR TROUBLE WITH EXTERIORIZATION OR INTERIORIZATION.**

*This is generally accomplished by auditing the pc to an F/Ning Int button list.*

**But there is another phenomenon that can occur while running Int. IT IS VITAL THAT AN AUDITOR DOES NOT MISS THIS SHOULD IT HAPPEN.**

*It goes like this: You're auditing along and suddenly some mass discharges, down comes the TA, you suddenly have a floating TA, and that's it. The pc has hit the EP.*

*If you proceed past that point you're in trouble. You DON'T then reassess the Int button list and you DON'T continue running Quad Flows, even if all the flows have not yet been run on one reading button.*

*You do nothing but take your paws off the meter and gently end the session. If you do otherwise you can mess up a case.*

*It isn't exteriorization. Exteriorization could occur at the same time; however we could not care less because exteriorization is not the EP of the process.*

*But at ANY point at which the above phenomenon occurs on the Int RD—mass moves off, the TA comes crashing down and you can't keep the needle on the dial because the TA itself is floating—you end off the rundown because you have the EP.*

*What has happened here is that you've blown the stuck flow of "going in."*

*Int sends the TA up because the person has plowed deeper into more and more mass and come out of less and less mass. You have been auditing the pc on what has been, for eons, a stuck flow of obsessively going in. At any point in the auditing that stuck flow can suddenly give way. It heaves in the opposite direction, and the stuck flow of "going in" vanishes.*

*When that happens it's the end of the process, as that is all you want to accomplish with the Int Rundown.*

*If you were then to check the Int button list (which you DO NOT DO AT THIS POINT) you would find the Int buttons all F/Ning.*

## REPAIRING REPAIR

Over the years Int auditing has tended to be flubby. Int repair has been far too frequent and even repetitive on some pcs. Some auditors and C/Ses have decided Int RDs were “delicate” or “difficult” or very special. Well, Int is special and sometimes delicate, but it’s not difficult.

If an auditor is going to audit the Int Rundown successfully he must be skilled at metering, he must be flubless on R3RA and the commands of the process, and understand the theory of Int. He must know what an F/N is and what a Dianetic EP is and be able to recognize these when they occur.

Much of the Int repair needed stems from errors made by auditors (or C/Ses): running Int when it was not needed, running it with the idea it would exteriorize the pc, auditing the RD over misunderstands, overrunning the RD. These are all violations of the Auditor’s Code, many of them then further complicated by Dianetic errors in running or repairing Int.

There is another factor regarding the original Int Rundown which must not be overlooked. Although it comes under the heading of “overrunning the Int Rundown,” it is sometimes neither seen nor understood. In doing the original Int Rundown it can occur that it completes before all flows are run.

EXAMPLE: The auditor runs Flow I on engrams on the revised Int RD, then Flow 2, and suddenly gets a wide, persistent F/N and a dramatic resurgence of the pc. The TA goes into lower range and the pc is bright and smiling. Then the auditor, if he’s an idiot, proceeds to robotically run Flow 3 and Flow 0. The TA goes back up, the pc’s chronic headache turns back on and the pc is set up for an endless repair of Int.

I have seen this happen several times. The Int Rundown finished itself and nobody noticed except the pc. This is probably the most flagrant cause of Int repair and is peculiar to this rundown.

The way to handle this is to rehab the point of completion as best you can and then run the recall version as given above and you will find that it usually comes out straight. The best way to handle, of course, is to do it right in the first place.

But if, added to any or all of the above, you get an Int Correction List misassessed so that what’s really wrong is missed and a falsely reading item taken up, you wind up with a mess.

There is no excuse for overrunning the rundown, for Auditor’s Code breaks, poor metering or flubby Dianetic auditing.

On the other hand, interiorization, like any other condition connected with engrams, may have many chains connected with it. Thus, the process of day-to-day living can restimulate those chains and throw Int out.

A C/S, faced with the possibility of any or all of the above being wrong could find himself staring into a maze. And he could err and order correction list after correction list, ad infinitum.

The rule is:

**THE CORRECT ACTION TO TAKE *FIRST*, IF SOMEONE IS HAVING TROUBLE WITH INT, IS TO ALWAYS GET A THOROUGH FES DONE ON THE ORIGINAL INT RD ITSELF AND ANY INT REPAIRS THAT HAVE BEEN DONE—BEFORE ANOTHER CORRECTION LIST IS ORDERED.**

Very often the answer to the puzzle then leaps out.

Get the errors corrected *correctly*. Any misassessed lists, misrun Dianetic chains, code breaks—get it all cleaned up by an auditor who can read a meter and run and repair Dianetics flublessly. Don't let any auditor who isn't flubless on these points near an Int pc.

With the errors truly and standardly handled and out of the way, if Int then continues to kick in, it's not another Int RD or another Int Correction List, it's the END OF ENDLESS INT REPAIR RUNDOWN you use.

Run it to its EP and that will be the end of the trail of endless Int repair.

If the C/S is in doubt about all this and gets into a mess trying to repair chains, he can cut directly onto this repair rundown as above with simply the Recall Processes, and he will get someplace.

*AFTER AN INT RD OR END OF ENDLESS INT RUNDOWN HAS BEEN COMPLETED ON A CASE AND DECLARED, THE NEXT ACTION MUST BE A C/S 53, ASSESSED AND HANDLED TO F/NING LIST. THIS MUST BE DONE AS THE NEXT ACTION AND MAY NOT BE LEFT NOT DONE. (The reason for this is that there are other things that can be wrong with a case, all of which are covered on the C/S 53, and these too must be handled.)*

There is no reason now for any pc (or C/S) to continue to be plagued with Int troubles .

We have here a rundown which is easily and simply done, which can be run on a Dianetic C/ear, or a pre-OT who is NOT on OT III or ANYWHERE between R6 Solo and OT III attest, on fragile pcs or weak or ill pcs, and is a rescue from overrepair.

*Interiorization Rundown Series 13*

**PREASSESSMENT, AESPs AND INT**

Although the newly revised Int Rundown uses New Era Dianetics R3RA commands, with the assessed Int button as the running item, the rundown and its repair do NOT include the use of New Era Dianetics preassessment (nor any form of AESPs).

In Int you can only address *Int*. A preassessment addresses something else.

Wins are sometimes reported on the use of preassessment on Int but it is a dangerous and dicey procedure. It isn't really directly addressing Int. That actually violates the law that when handling Int you run only Int, nothing else.

Using preassessment, whereas you might have one win you'll have five failures along with it. Sure, somebody got some wins on it but the next five guys will cave right in and go over the cliff.

The apparenacy of the win is this: Int flattened and this went unnoticed and then they were running an original item having to do with headaches or some other symptom. This was then preassessed and the person was on the line with R3RA which, of course, can be run *after* you've done an Int Rundown.

So the apparenacy here is that the use of preassessment handled Int, whereas Int probably had actually flattened first and then the person was able to get gains from the preassessment and auditing that was done.

This could go in the opposite direction. For example, with Int still unflat you go into preassessment, and you're not now addressing the subject of Int itself. You are now into chains that are not Int chains, with the Int chains themselves restimulated but not yet run, or not fully run. So it is actually a violation of basic tech and it would very swiftly get into a tangled mess.

The rule is: WHEN HANDLING INT YOU ADDRESS ONLY INT, NOTHING ELSE. AND YOU DO NOT RUN PREASSESSMENT OR AESPs ON INT.

We have a new, simplified Int Rundown with which to handle it and an extremely workable process in the End of Endless Int Repair Rundown which resolves any persistent Int trouble.

R3RA and preassessment can be run in full by the book, exactly per the New Era Dianetics Series, *after* Int handling has been completed.

**DIANETIC CLEAR**

(Ref: HCOB 12 Sep 78 URGENT—IMPORTANT, DIANETICS  
FORBIDDEN ON CLEARS AND OTs)

(This bulletin revises the definition of “Dianetic Clear,” page 113, Technical Dictionary, and the definition of “Keyed-Out Clear,” page 221, Technical Dictionary. )

The state of Clear can be achieved on Dianetics.

I have now determined there is no such thing as Keyed-Out Clear. There is only a Dianetic Clear and he is a Clear.

The state of Dianetic Clear means the pc has erased his Dianetic case or mental image pictures; he has attained the ability to be at cause over mental matter, energy, space and time on the First Dynamic.

When this happens the person is not run further on Dianetics. He can be given Touch or Contact Assists (as can Scn Clears and OTs), and can be given NED for OTs once he is OT III. He is not to be given any Dianetic Auditing Assist nor any Dianetic auditing. (He can, of course, receive any actions on the Assist Summary bulletin, *excluding* R3RA.)

The Dianetic Clear, on achieving this state, can be audited on Scientology Grades 0-IV. He would not be run on the R3RA section of service facts, however. On completing Grades 0-IV, he is not run on Power, R6EW or the Clearing Course but goes onto OT I, after doing the Solo Auditor Course.

Should a pc being audited on Dianetics originate that he has achieved Dianetic Clear, or if a Dianetic auditor thinks this has occurred with his pc, the folders must be routed to an org C/S who is Clear or above and who can adjudicate.

(NOTE: No auditor or C/S must evaluate for a pc on this nor feed or coax him to any cognition, which is a comm-evable offense. Clears are made through auditing, not by feeding cognitions to pcs. This is important as someone who has not made Clear will *not* make it on the OT levels.)

Field auditors and missions would route the folders of a pc believed to be Dianetic Clear to the nearest org with a C/S who is Clear, for adjudication and declare of the state.

Such submissions must be handled promptly, so there is no delay put on any individual's progress up the Bridge.

Once declared, the pc folders must be clearly marked “DIANETIC CLEAR.” The pc may then be C/Sed to receive Scientology auditing, per the above. The pc is not, however, given any further Dianetic auditing.

*Interiorization Rundown Series 5*

**QUAD COMMANDS FOR INT BUTTONS**

(Cancels BTB 30 Dec 71 IMPORTANT INTERIORIZATION  
RUNDOWN COMMANDS)

Ref: HCOB 4 Jan 71R Int RD Series 2  
EXTERIORIZATION AND HIGH TA,  
THE INTERIORIZATION RUNDOWN  
REVISED

HCOB 24 Sep 78 I Int RD Series 4  
URGENT IMPORTANT, THE END OF  
ENDLESS INT REPAIR RUNDOWN

NOTE: IN USING THESE COMMANDS (R3RA AND RECALLS) DO NOT  
*EVER* RUN A PC ON FLOW ZERO FOR THE FIRST TIME ON INT.  
HANDLING INT BY ANY METHOD IS NOT THE TIME TO INTRO-  
DUCE A FLOW ZERO ON A PC. A TRIPLE PC CAN BE QUADED  
*UP AFTER* INT HANDLING IS COMPLETE, BUT IT IS NEVER  
DONE ON INT HANDLING OR INT REPAIR.

**INTERIORIZATION RUNDOWN REVISED**

The following are the R3RA Quad Flows commands for each of the Int buttons  
on the Interiorization Rundown Revised.

1. GO IN/WENT IN:

- F1: Locate a time when you went in.
- F2: Locate a time when you caused another to go in.
- F3: Locate a time when others caused others to go in.
- F0: Locate a time when you caused yourself to go in.

2. PUT IN:

- F1: Locate a time when you were put in something.
- F2: Locate a time when you put another in something.
- F3: Locate a time when others put others in something.
- F0: Locate a time when you put yourself in something.

3. INTERIORIZED INTO SOMETHING:

- F1: Locate a time when you interiorized into something.

- F2: Locate a time when you interiorized another into something.
- F3: Locate a time when others interiorized others into something.
- F0: Locate a time when you interiorized yourself into something.
4. WANT TO GO IN:
- F1: Locate a time when you wanted to go into something.
- F2: Locate a time when you caused another to want to go into something
- F3: Locate a time when others caused others to want to go into something
- F0: Locate a time when you caused yourself to want to go into something
5. CAN'T GET IN:
- F1: Locate a time when you couldn't get in.
- F2: Locate a time when you caused another to be unable to get in.
- F3: Locate a time when others caused others to be unable to get in.
- F0: Locate a time when you caused yourself to be unable to get in.
6. KICKED OUT OF SPACES:
- F1: Locate a time when you were kicked out of spaces.
- F2: Locate a time when you kicked another out of spaces.
- F3: Locate a time when others kicked others out of spaces.
- F0: Locate a time when you caused yourself to be kicked out of spaces.
7. CAN'T GO IN:
- F1: Locate a time when you couldn't go in.
- F2: Locate a time when you caused another to be unable to go in.
- F3: Locate a time when others caused others to be unable to go in.
- F0: Locate a time when you caused yourself to be unable to go in.
8. BEING TRAPPED:
- F1: Locate a time when you were being trapped.
- F2: Locate a time when you were trapping another.
- F3: Locate a time when others were trapping others.
- F0: Locate a time when you were trapping yourself.
9. FORCED IN:
- F1: Locate a time when you were forced in.
- F2: Locate a time when you forced another in.

F3: Locate a time when others forced others in.

F0: Locate a time when you forced yourself in.

10. PULLED IN:

F1: Locate a time when you were pulled in.

F2: Locate a time when you pulled another in.

F3: Locate a time when others pulled others in.

F0: Locate a time when you pulled yourself in.

Each flow must be taken to the basic and the full New Era Dianetic EP: F/N, postulate off (postulate off = erasure) and VGIs. (Ref: HCOB 26 Jun 78RA II, New Era Dianetics Series 6RA, ROUTINE 3RA, ENGRAM RUNNING BY CHAINS.)

### THE END OF ENDLESS INT REPAIR RUNDOWN

The following are the Recall Quad Flows commands for each of the Int buttons on the End of Endless Int Repair Rundown.

1. GO IN/WENT IN:

RF 1: Recall a time when you went in.

RF 2: Recall a time when you caused another to go in.

RF 3: Recall a time when others caused others to go in.

RF 0: Recall a time when you caused yourself to go in.

2. PUT IN:

RF 1: Recall a time when you were put in something.

RF 2: Recall a time when you put another in something.

RF 3: Recall a time when others put others in something.

RF 0: Recall a time when you put yourself in something.

3. INTERIORIZED INTO SOMETHING:

RF 1: Recall a time when you interiorized into something.

RF 2: Recall a time when you interiorized another into something.

RF 3: Recall a time when others interiorized others into something.

RF 0: Recall a time when you interiorized yourself into something.

4. WANT TO GO IN:

RF 1: Recall a time when you wanted to go into something.

RF 2: Recall a time when you caused another to want to go into something.

RF 3: Recall a time when others caused others to want to go into something

- RF 0: Recall a time when you caused yourself to want to go into something.
5. CAN'T GET IN:
- RF 1: Recall a time when you couldn't get in.
- RF 2: Recall a time when you caused another to be unable to get in.
- RF 3: Recall a time when others caused others to be unable to get in.
- RF 0: Recall a time when you caused yourself to be unable to get in.
6. KICKED OUT OF SPACES:
- RF 1: Recall a time when you were kicked out of spaces.
- RF 2: Recall a time when you kicked another out of spaces.
- RF 3: Recall a time when others kicked others out of spaces.
- RF 0: Recall a time when you caused yourself to be kicked out of spaces.
7. CAN'T GO IN:
- RF 1: Recall a time when you couldn't go in.
- RF 2: Recall a time when you caused another to be unable to go in.
- RF 3: Recall a time when others caused others to be unable to go in.
- RF 0: Recall a time when you caused yourself to be unable to go in.
8. BEING TRAPPED:
- RF 1: Recall a time when you were being trapped.
- RF 2: Recall a time when you were trapping another.
- RF 3: Recall a time when others were trapping others.
- RF 0: Recall a time when you were trapping yourself.
9. FORCED IN:
- RF 1: Recall a time when you were forced in.
- RF 2: Recall a time when you forced another in.
- RF 3: Recall a time when others forced others in.
- RF 0: Recall a time when you forced yourself in.
10. PULLED IN:
- RF 1: Recall a time when you were pulled in.
- RF 2: Recall a time when you pulled another in.
- RF 3: Recall a time when others pulled others in.
- RF 0: Recall a time when you pulled yourself in.

Each Recall Flow must be taken to F/N, VGIs.

(Ref: HCOB 24 Sep 78 I, Int RD Series 4, URGENT IMPORTANT, THE END OF ENDLESS INT REPAIR RUNDOWN.)

**STARRATE CHECKOUTS FOR  
INTERIORIZATION RUNDOWN**

(Ref: HCOB 4 Jan 71R	Int RD Series 2, EXTERIORIZATION & HIGH TA, THE INTERIORIZATION RUNDOWN REVISED
HCOB 25 Sep 78 I	Int RD Series 5, QUAD COMMANDS FOR INT BUTTONS
HCOB 24 Sep 78 I	Int RD Series 4, URGENT IMPORTANT THE END OF ENDLESS INT REPAIR RUNDOWN
HCOB 26 Jun 78RA	New Era Dianetics Series 6RA, ROUTINE 3RA, ENGRAM RUNNING BY CHAINS
HCOB 10 Sep 78	NED HIGH CRIME)

---

INT must be run flawlessly.

It is to be done by a Class IV auditor, skilled in the materials of that level, who is also certificate trained on New Era Dianetics and the running of R3RA.

BECAUSE IT IS MANDATORY THAT:

1. COMMANDS OF THE INTERIORIZATION RUNDOWN BE CLEARED EXCELLENTLY FOR THE PC'S UNDERSTANDING,
2. THE GOING EARLIER COMMAND BE GIVEN FULLY WITH THE ITEM,
3. THE AUDITOR UNDERSTAND FULLY THE THEORY AND COMMANDS HE IS RUNNING.

ALL AUDITORS AND THE C/S OF INTERIORIZATION RUNDOWNS MUST STARRATE WITH CLAY DEMOS ON THE THEORY AND COMMANDS OF THE INT RD.

ALL AUDITORS MUST HAVE AN "OKAY TO AUDIT INT RUNDOWN" FROM THE DIR OF VALIDITY OR THE QUAL SEC BEFORE THEY MAY DO SO.

No auditor may audit a pc on the Interiorization Rundown unless he has passed tough starrate checkouts and excellent clay demos on the materials below, and has an "Okay to Audit Int RD" chit from Qual.

When he has done so, he is qualified and will be able to deliver an Interiorization Rundown to his pc with the exceptional results for which this rundown was intended.

STARRATE CHECKOUTS FOR "OKAY TO AUDIT INT RD"

Auditor's Name: \_\_\_\_\_ Org: \_\_\_\_\_

I attest:

- a) I am a Senior Class IV or Class IV Graduate Auditor.
- b) I am certificate trained on the New Era Dianetics Course and the running of R3RA.

Auditor's Attest: \_\_\_\_\_ Date: \_\_\_\_\_

1. The following checkouts are to be done starrate to a pass from the Supervisor or Interne Supervisor.

1. CLAY DEMO:

- |                                     |                                    |
|-------------------------------------|------------------------------------|
| a) Lock                             | k) Interiorization<br>(as went in) |
| b) Secondary                        | l) The picture<br>erasing          |
| c) Engram                           | m) F/N                             |
| d) Chain                            | n) Cognition                       |
| e) Picture                          | o) Erasure                         |
| f) Solid                            | p) Postulate                       |
| g) Erasing                          | q) Postulate off<br>= erasure      |
| h) Caused                           |                                    |
| i) Exteriorization                  |                                    |
| j) Interiorization<br>(as being in) |                                    |

2. CLAY DEMO: (per HCOB 4 Jan 71 R)

- a) Commands for running Int by R3RA, including the going earlier and earlier beginning commands.

3. CLAY DEMO: (per HCOB 24 Sep 78 I, Int RD Series 4)

- a) The End of Endless Int Repair Rundown procedure and commands.

This auditor has done excellent clay demos on all of the above.

SUPERVISOR/INTERNE SUPERVISOR: \_\_\_\_\_ DATE: \_\_\_\_\_

4. STARRATE:

- a) HCOB 4 Jan 71R, Int RD Series 2, EXT AND HIGH TA, THE INT RD REVISED.
- b) HCOB 26 Jun 78RA, NED Series 6RA, ROUTINE 3RA, ENGRAM RUNNING BY CHAINS.
- c) HCOB 24 Sep 78 I, Int RD Series 4, URGENT IMPORTANT END OF ENDLESS INT REPAIR RD.

This auditor has passed tough Narrate checkouts on the above HCOBs.

SUPER/INTERNE SUPER: \_\_\_\_\_ DATE: \_\_\_\_\_

5. This auditor knows his R3RA and Int procedure cold and can apply it.

SUPER/INTERNE SUPER: \_\_\_\_\_ DATE: \_\_\_\_\_

6. This auditor has excellent TRs.

SUPER/INTERNE SUPER: \_\_\_\_\_ DATE: \_\_\_\_\_

II. I attest this auditor has been issued an "OKAY TO AUDIT INT RD" chit.

DIR VALIDITY/QUAL SEC: \_\_\_\_\_ DATE: \_\_\_\_\_

(Route this form to Course Admin for student's folder.)

HCO BULLETIN OF 29 SEPTEMBER 1978

FESers  
All Auditors  
All C/Ses

**FESING OF FOLDERS  
AND FULL FLOW TABLES**

An FES should contain the name of the auditor and name of the C/S, per existing issues.

It now becomes imperative that the name of the auditor be clearly noted on the FFT (Full Flow Table) as well as the FES. In making up FFTs on any Dianetic or NED auditing clearly note the auditor's name, as well as the date and item run by that auditor. Existing FFTs do not need to be redone—just print in the name of the auditor, in different coloured ink (to make it very visible) against the items run by that auditor.

On new FFTs add a column on left side of sheet for auditor's name.

PC's NAME \_\_\_\_\_

**FULL FLOW TABLE**

<b>AUDITOR (Name)</b>	<b>DATE</b>	<b>ITEM RUN</b>	<b>F1</b>	<b>F2</b>	<b>F3</b>	<b>F0</b>

Some cases have had unreading items, wrong items, run on them, sometimes the auditor changed the pc's item, or even just decided what to run on a pc. These are grave and can have serious consequences on a case.

In order to fully handle such a situation it is imperative that all the data above is available to a C/S or auditor.

HCO BULLETIN OF 3 OCTOBER 1978

Remimeo  
NED Checksheet

**NED RULE**

A NEW ERA DIANETICS AUDITOR MUST UNDERSTAND THE FUNCTION AND PURPOSE OF EACH OF THE R3RA COMMANDS IN A DIANETIC SESSION .

A Dianetic session given in the absence of an understanding of the basic laws of the time track and how the R3RA commands handle and control the time track is a chancy proposition.

You will not have confidence in yourself as an auditor of New Era Dianetics nor get uniformly good results with R3RA until you know this. No rote procedure, L3RF, TR4, or any remedy or solution can take the place of such an understanding.

Every New Era Dianetics auditor is to study the references and demo out what each R3RA command does (showing how it affects the pc and the bank) to a full understanding.

The following are your references:

*Interiorization Rundown Series 1*

**INTERIORIZATION HANDLING SIMPLIFIED**

(Ref: HCOB 4 Jan 71R Int RD Series 2, Exteriorization and High TA,  
The Interiorization Rundown Revised  
HCOB 24 Sep 781 Int RD Series 4, Urgent—Important,  
The End of Endless Int Repair Rundown.)

Exteriorization

Exteriorization is defined as the act of moving out of the body with or without full perception.

It is the fact of this act which proves that the individual is not a body but an individual. This discovery in 1952 proved beyond any question the existence of a thetan, that the individual was a thetan, not a body, and disproved that Man was an animal, and proved that he was a spiritual being, timeless and deathless.

---

The issues on exteriorization and interiorization and the handling of out-Int have now been collected into the Interiorization Rundown Series.

We have had the remedy for out-Int, the Interiorization Rundown, for some years now, but we have also had pcs who ran into the need for excessive repair of the remedy itself. Much of this need for repair has stemmed from auditor errors in running or repairing Int, and these have been enumerated on other bulletins.

Whatever the reasons for repair, a simple, effective method of repairing Int was needed. This need has now been filled with the release of the new End of Endless Int Repair Rundown.

With the research that was done to develop this repair rundown which uses Recalls, I have also had the opportunity to reevaluate the original Int Rundown itself. The result is a newly revised Int Rundown.

So we have two very effective new tools for handling Int:

1. A simplified Interiorization Rundown
2. The End of Endless Int Repair Rundown, which handles Int repair smoothly and terminatedly by a special method of assessment and running it on Recall flows.

The full steps of both of these rundowns are included in issues in the Interiorization Rundown Series.

NOTE: Per HCOB 12 Sep 78, "Urgent Important, Dianetics Forbidden on Clears and OTs," Dianetic Clears, Scn Clears and OTs are not to be audited on the Int Rundown as it uses Dianetics. They may be run on The End of Endless Int Repair RD (HCOB 24 Sep 78 I, Int RD Series 4), as it runs Int on Recalls.

Additionally, the basics on exteriorization and interiorization are covered quite fully in the Int RD Series, particularly in HCOB 4 Jan 71R, Exteriorization and High TA, The Interiorization Rundown Revised.

Any auditor who is going to go near an Int Rundown or an Int repair action must know those fundamentals cold.

He must understand that it is the first of a chain or the first part of an experience or a first experience (basic on the chain of incidents) that has to be run for the chain or incident to erase. In other words, he must understand the principle of getting the earlier beginning to an incident or an earlier incident in order to erase a chains as in R3RA.

He must understand that if one is IN something, he must have gotten into it. And that, therefore, the beginning of an exteriorization is an interiorization.

The full theory on this also is covered in the above HCOB 4 Jan 71R, which the auditor should be fully familiar with.

There is some further data which you should have, on the subject of Int and flows.

Basically, Int is a compound of stuck flows and prior incidents. There is a stuck flow of obsessively going in. In most of the pc's Int engrams you've got an operating trigger that puts him into them. The earlier beginning is always "in." These must be audited out, blown, before you're through with Int.

The way this trigger works is, for example: A pc may blow out of his head with F/N, VGIs on Tuesday. But he has not erased the basic on Int. He went out on a "reaction flow" on Tuesday. On Friday he comes in with his TA at 5. What has happened is the flow has retriggered. He's now blown back in on a "re-reaction flow." Any regular auditing and he will plow in deeper. So you've got to handle his Int terminatedly.

Prior to now, an Int Rundown has been done by clearing and then assessing the Int buttons "went in" and "go in." If one of them read the Int button was first run on Recall Triple or Quad Flows, next on Secondaries Triple or Quad Flows, and then on Engrams Triple or Quad Flows. This handled Int for many, many pcs. But it is probable that one reason we also got so many Int repairs was that in many of these repair cases the pc never ran any basic. Beginning the Int Rundown with Recalls with the stuck flow of "going in" still in operation you could get a key-out, key-in, key-out, key-in repeatedly and not get to the basic.

We had an exteriorization command in the early years which was "Try not to be three feet back of your head," and it exteriorized people. But all that did was unstick the flow and trigger the person out of his head. You're likely to get the same result if you run Int by Recall first crack. You give the command "Recall a time...." and boom, he's out. But he hasn't run the basic on Int.

So if you entered an Int Rundown on a Recall basis you could get some of that mechanism cutting in. And you could get repetitive Int, with the engrams he didn't run out keying in.

There is another phenomenon that can occur. Time itself can be a stuck flow.

You get a certain number of pcs who can't move back on the time track more than minutes. They get stuck on the stuck flow of time. On Recall commands such a pc may F/N very quickly. (Or even on an R3RA command, "Locate a time when you went in.")

he may run shallow, he may run only locks and F/N quickly.) Then suddenly he hits the skids and goes hurtling backtrack. The flow is reversed and he doesn't fire out of his head, he fires backwards on the time track, on a restim. And you'll have out-Int repeating itself all over again. That's the rest of the mechanism.

Addressed in R3RA engram auditing properly done, always getting the earlier beginning and/or the earlier incident, these chains of incidents on the stuck flow of going in can be audited out in an orderly fashion on the majority of pcs. You erase the engrams and you dissolve the obsessive stuck flow of going in, and you have the EP of Int.

Or, at some point in the engram auditing the flow gets unstuck enough to heave into reverse, it heaves in the opposite direction and it erases itself and the whole package blows. That, too, is an EP for Int which must not be ignored by the auditor. (See HCOB 4 Jan 71R.)

Thereafter, the pc will usually have no more trouble or concern with Int.

So we are safer entering the Int Rundown by running engrams to begin with, and running only engrams on that rundown, and that is how the revised Int Rundown has now been set up. We had better run the engram chains and their basics out first and then, if repair is needed, repair them with Recalls, using the End of Endless Int Repair Rundown.

#### MORE ON RECALLS

Entering Int with Recalls has its liabilities, as described above. But there are also definite advantages in having Recalls as a tool to use, as necessary, in running Int on some cases.

You are going to encounter some few isolated instances where the pc can't run engrams for one reason or another. Such pcs can then be audited by the Recall method as given in the End of Endless Int Repair Rundown, using the rundown not as a repair but as a process. Dianetic Clears, Scn Clears and OTs can be handled on out-Int with this method. It can also be used to relieve out-Int on weak or ill pcs until they are up to running engrams.

It is not a fast method. Using the Recall system (per End of Endless Int Repair RD) to run out-Int, can go on and on. In time though, by taking the pc up on a gradient, you can eventually get him to a point where he is actually as-ising engrams, blowing them by inspection. The revised Int Rundown is by far the swifter route for handling a pc initially on out-Int.

However, the use of Recalls is ideal in the handling of *repair* of Int, when it is necessary after an Int Rundown has been done. The End of Endless Int Repair Rundown gives the exact method for assessment of the Int buttons and flows and running these on Recalls as a repair action. And here we get a smooth run on the Recall flows and the resolving of any Int troubles.

Thus, from this research we get a new, simplified version of the Int Rundown and an invaluable process for any Int repair.

Further issues in the Int Rundown Series cover these and other technical data relating to Int.

Class VI  
Checksheet  
C/Ses

(Cancels and replaces HCOB 21 Dec 75R  
Repair List for Prepared Lists.)

**REPAIR CORRECTION LIST**

Use this list to clean up bypassed charge on improperly done or unnecessary prepared lists or repair actions. This list is done when a pc protests a prepared list or repair action, when BIs are present on the subject of repair or prepared lists or when improper past repair or use of correction lists reads on a correction list.

Assess this list Method 5 and handle all reads. The EP of this list is charge off the subject of repair and prepared lists and the pc happy about being audited. This list can, if necessary, be reassessed and taken to an F/Ning assessment.

The words "prepared list," "repair" and all other words on this list should be fully cleared with the pc before assessing this list on him. However, if the pc is very upset and the words have not yet been cleared, assess the list to handle the charge and check with the pc for any MUs on the assessment. (Ref: HCOB 9 Aug 78 II CLEARING COMMANDS)

1. HAVE YOU GONE EXTERIOR IN AUDITING? \_\_\_\_\_  
If the pc has never had an Int RD, do an Int RD per HCOB 4 Jan 71R Int RD Series 2 EXTERIORIZATION AND HIGH TA THE INT RD REVISED if you have checked out on the Int Series and are a NED auditor.  
  
If the pc has had an Int RD, do an Int RD Correction List Revised (HCOB 29 Oct 71 RA) or end off for C/S instructions to do an End of Endless Int Repair RD per HCOB 24 Sep 78 I URGENT IMPORTANT END OF ENDLESS INT REPAIR RD.
2. HAS YOUR INT RD BEEN MESSED UP? \_\_\_\_\_  
Do an Int RD Correction List or end off for C/S instructions to do the End of Endless Int Repair RD.
3. DO YOU HAVE AN OUT-LIST? \_\_\_\_\_  
L4BRA.
4. HAVE YOU HAD TOO MANY PREPARED LISTS DONE ON YOU? \_\_\_\_\_  
Indicate. Itsa E/S itsa to F/N or Date/Locate the first successful prepared list.
5. HAVE YOU HAD UNNECESSARY REPAIRS? \_\_\_\_\_  
Indicate. Itsa E/S itsa to F/N or Date/Locate the first valid repair.
6. HAS AN AUDITOR MISSED A READ? \_\_\_\_\_  
Get what, itsa E/S itsa to F/N, or handle as needed.
7. DID YOU THINK SOMETHING SHOULD HAVE READ WHEN IT DIDN'T? \_\_\_\_\_  
Get what, itsa E/S itsa to F/N, or handle as needed.
8. HAS AN ITEM NOT READ WHEN IT SHOULD HAVE? \_\_\_\_\_  
Get what, itsa E/S itsa to F/N, or handle as needed.

9. HAS THERE BEEN A FALSE READ?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
10. WERE YOU TOLD SOMETHING READ WHEN YOU DIDN'T SEE HOW IT COULD HAVE?  
Get what, indicate it was a false read. Itsa E/S itsa to F/N. \_\_\_\_\_
11. DID THE AUDITOR TAKE UP AN ITEM WITH NO CHARGE ON IT?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
12. WERE YOU GIVEN A PREPARED LIST TO HANDLE HIGH TA WHEN YOUR TA WASN'T HIGH?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
13. WERE YOU GIVEN A PREPARED LIST TO HANDLE LOW TA WHEN YOUR TA WASN'T LOW?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
14. HAS THERE BEEN A TIME WHEN YOU DIDN'T WANT TO DO A PREPARED LIST AND THE AUDITOR DID ONE ANYWAY?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
15. HAS THERE BEEN A TIME WHEN YOU DIDN'T WANT TO GET A REPAIR ACTION AND YOU WERE GIVEN ONE ANYWAY?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
16. WHILE BEING AUDITED ON A PREPARED LIST DID YOU JUST WANT TO GET ON WITH IT?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
17. DID YOU TELL THE AUDITOR SOMETHING WAS HANDLED JUST TO BE DONE WITH IT?  
Indicate. Itsa E/S itsa to F/N. Note for C/S. \_\_\_\_\_
18. HAS OVERREPAIR KEPT YOU FROM GOING UP THE GRADE CHART?  
Indicate. Itsa E/S itsa to F/N. \_\_\_\_\_
19. HAVE YOU BEEN TOLD A REPAIR ACTION WOULD HANDLE YOUR CASE WHEN IT DIDN'T?  
Indicate. 2WC to F/N or 2WC for data. \_\_\_\_\_
20. HAS AN AUDITOR MISASSESSED A PREPARED LIST ON YOU?  
Itsa E/S itsa to F/N. \_\_\_\_\_
21. WHEN YOU HAD A PREPARED LIST DONE, DID IT FAIL TO HANDLE THE BYPASSED CHARGE?  
Itsa E/S itsa to F/N. \_\_\_\_\_
22. DID A REPAIR ACTION FAIL TO HANDLE WHAT WAS REALLY WRONG?  
Itsa E/S itsa to F/N. \_\_\_\_\_
23. HAVE YOU BEEN ASSESSED BY AN AUDITOR WITH BAD TRs?  
Itsa E/S itsa to F/N. \_\_\_\_\_

24. HAS AN AUDITOR TOLD YOU YOU HAD AN F/N WHEN YOU KNEW YOU DIDN'T?  
Itsa E/S itsa to F/N. \_\_\_\_\_
25. DID AN AUDITOR EVER INDICATE AN ASSESSMENT WAS F/NING WHEN YOU KNEW IT WASN'T?  
Itsa E/S itsa to F/N. \_\_\_\_\_
26. WERE YOU ASKED TO DECLARE A CYCLE YOU FELT WASN'T COMPLETE?  
Itsa E/S itsa to F/N. \_\_\_\_\_
27. DID YOU EVER FEEL A PREPARED LIST SHOULD HAVE F/NED ON AN ASSESSMENT WHEN IT DIDN'T?  
Indicate. Rehab the EP or Date/Locate the point. \_\_\_\_\_
28. ON A REPAIR ACTION, WERE YOU PREVENTED FROM ATTESTING?  
Indicate. Date/Locate the EP of the repair. \_\_\_\_\_
29. HAS YOUR REPAIR BEEN REPAIRED OFTEN?  
Indicate. Itsa E/S itsa to F/N or Date/Locate the first successful repair. \_\_\_\_\_
30. HAS AN F/N BEEN MISSED?  
Indicate. Rehab it. \_\_\_\_\_
31. HAS A WIN BEEN BYPASSED?  
Indicate. Rehab. \_\_\_\_\_
32. HAS SOMETHING BEEN OVERRUN?  
Get what. Rehab it. \_\_\_\_\_
33. IS THERE SOME OTHER BYPASSED CHARGE?  
Find what and handle. \_\_\_\_\_

*Interiorization Rundown Series 16*

*C/S Series 102*

**C/S CHECKLIST OF INT ERRORS**

There are two major errors that occur most frequently on Int handling which a C/S must be on the alert for:

1. DOING OR RUNNING *ANYTHING* ELSE BEFORE AN INT RUNDOWN WHEN ONE IS NEEDED.
2. OVERRUNNING THE INT RUNDOWN.

By far the commonest error is number one above. It happens most often at the very beginning of a session on Int itself, by the auditor engaging in two-way comm or ruds or a belabored and overcomplicated clearing of commands, or some other action than getting right onto the running of Int.

This is flagrant. When I was C/Sing, it is what I kept running into—the auditor doing all kinds of preliminary steps before starting Int. It boils down to auditing over out-Int, and it can't be done.

You'll get the auditor who says, "But all I did was ask him how he was feeling." That's enough. That's two-way comm, and you can't run *anything* else but Int when Int is out, and that includes two-way comm. You don't ask the pc how he feels about anything. You just start the Int Rundown.

So that's the first major error to watch for: somebody trying to run something else before the Int Rundown itself.

The second is OVERRUN. Pc has a big cognition, a big win, TA blowdown, and the auditor misses it, goes right on past it and continues auditing. Or the pc exteriorizes and the auditor continues past exterior.

There is vital data on the end phenomena of Int on HCOB 4 Jan 71R, Int RD Series 2, and both C/S and auditor MUST have this data and know and be able to recognize the EP of Int when it occurs. Otherwise it will really mess up a case.

Those are the two major violations a C/S (and an auditor) must not permit in the running of Int if it is to be successful.

Because they are the most major errors they have been included first on the checklist below.

**C/S CHECKLIST FOR DETECTING ERRORS ON INT:**

The following is a checklist to be used in the C/Sing of Int. The C/S checks a bogged session or any session on Int, against this list to detect the exact cause of the trouble, or an error that could be the source of future trouble in ensuing sessions.

1. Doing or running *anything* else before an Int Rundown when one is needed. (Includes ruds, 2-way comm, L1C, anything.)
2. Auditing over out-Int.
3. Overrunning the Int Rundown.
4. Auditing past exterior.
5. Overdoing the clearing steps preceding the actual rundown.
6. Running an Int button that only read on an MU or false read. (Failure to clear an Int button before running it.)
7. Clearing *all* of the Int buttons before assessment, instead of clearing only the button with the largest valid read.
8. Failure to use Suppress, Invalidate, and Misunderstood on an unreading Int button list.
9. Misassessment of the Int button list.
10. Doing an Int Rundown when none of the buttons have read. (Constitutes running an unreading item.)
11. Auditor can't get reads or make a list read.
12. Not taking the Int Rundown to its full EP.
13. Not understanding the theory of Int and R3RA, and WHY one goes earlier or asks for an earlier beginning to the incident.
14. Running the concept of "was in" or "stuck in" instead of the concept of "moving in" or "going in" (on whatever the reading Int button is).
15. Not repeating the actual button for the chain when asking for an earlier incident. (Not knowing R3RA commands.)
16. Not completing a chain to full Dianetic EP.
17. Not completing any one flow on an Int button in one session; thus ending a session on an unflat flow.
18. Introducing Flow 0 to a pc for the first time on Int Rundown or Int repair. (I.e. running a Triple pc on Quad Flows.)
19. Auditing over an earlier Dianetic error.
20. Auditing the rundown "to exteriorize" the pc.
21. Using preassessment or AESPs on Int.
22. Misassessing or incorrectly handling the Int Correction List.
23. Overcorrecting the Int Rundown.
24. Running Dianetics on a Dianetic Clear, Scn Clear or OT.
25. And, on the part of the C/S, attempting to correct a botched Int Rundown without a full FES of the Int RD or any Int repair being done first.

The above points are all covered fully in the Int Rundown Series. Cases that are not running well on Int will be found to have had one or more of these errors committed on them.

Using the above list to spot and *prevent* Int errors will make the C/S's job lighter and give both auditor and pc a smoother run on Int.

Auditors

**C/S SERIES 53,  
USE OF**

The C/S Series 53 Short Form is the basic prepared list used by auditors to get a TA up or down into normal range or to correct case outnesses. It contains every element that could be wrong with the mind. It is written the way it is because we just want to know if a subject reads in the pc's mind, and if so you handle it to F/N.

The C/S Series 53 Long Form is exactly the same as the short form except that it puts the items into full questions so that a less educated pc can understand what is being asked. The questions actually limit its use a bit, but are needed with uneducated pcs. The limit comes about through making the questions a bit too specific whereas the general questions of the short form don't say to what they apply so are less limited.

Both the short form and the long form are assessed Method 5. (This means going down the list, calling off the items or questions to the pc, watching the meter and marking any tick, small fall, fall, long fall, long fall blowdown (to what TA). Do not take up instant F/Ns. You can program instant F/Ns, but not off a C/S 53.

The order the reads must be taken up is built into the list itself. You can't audit a case on anything if Int is out. Auditing must be very limited if a list is out. If you audit over an ARC break very long the pc will go into a sad effect. If you audit over a problem the pc won't make case gain. If you audit over a withhold the pc will get mad at you. If you look at this and compare it to the C/S 53 you will see that the list itself is built on a declining order of urgency. It is true of the remaining items on the list.

There are two ways of using a C/S 53. The first is to simply assess it and indicate the largest read. This is a sort of brushoff but is very useful in handling blown students or pcs, will get off charge and get them back into the org or more comfortable. The other way is its proper use in session. You simply start at the first read and handle it. Go to the next read and handle it, etc. Note that this is at variance with the general handling of prepared lists where you simply take the largest read and next largest read and so forth.

That an item reads, with the exception of Int, does not mean you have to do a full rundown at that point. You just have to F/N it. If further actions are needed to take an item to full handling, get it onto the pc's Advance Program. (This includes drug handling, etc. but not, as I've said, Int. If Int reads, you handle it fully because no auditing can take place over out-Int. If he has already had a full Int Rd you would run the End of Endless Int Repair Rundown. If he or she is already Clear or OT and has not had an Int RD you would run the End of Endless Int Repair Rundown as the primary action.)

The object of the C/S 53 is to key out things that are bothering the pc and get anything you found on the list to an F/N. That something read (except Int) does not mean the auditor doing the C/S 53 must at once run up 110 hours of auditing before he can finish the C/S 53 to an F/Ning list. Auditors who don't realize this can get stuck in on a C/S 53 mostly because they misconceive a C/S 53 to be wholly a case analysis list.

Its primary purpose is to get the case rolling so you can do something else that is scheduled on the pc's program. Because it can be made to serve as a case analysis and is sometimes called for by a C/S to help him do a repair or advance program or to confirm it, sometimes misleads the auditor into believing he is not supposed to F/N the list.

I have even used a C/S 53 in a D of P interview when the pc wasn't speaking up. Then by getting the reads I could program the pc and unless it was Int reading I would conclude the interview simply by indicating the largest read which would get me my F/N and let the pc go away happy while we really got to work on him in the C/S department.

So the C/S 53 is a child of many uses as it does after all, contain all the elements known to us that bring about case foul-ups.

### CLEARs AND OTs

Sections D and E of the C/S 53 *can* be assessed on Clear's and OT's and Dianetic Clear's. However do NOT engage in any activity that brings about further engram running. The correct way to handle Clear's and OT's if you get a read in Section D is indicate and let him tell you about it if he wishes, to get an F/N. On Section E you can do an L3RF but you must not do more than indicate the item. You must NOT engage in engram running. (Ref: HCOB 12 Sep 78, DIANETICS FORBIDDEN ON CLEARs AND OTs)

You realize of course that LSD and some other drugs can apparently stay in the physiological body and release themselves now and then. If a Clear, OT or Dianetic Clear got a read on Section D (drugs, etc.) and it didn't clear up easily you would program the person for a Sweat Program and even Objectives. You would not however, do any engram running on the drugs. Even Recalls might be a bit dicey. The Sweat Program and Objectives would however handle, if you got into the goofy situation of heavy or persistent Section D reads on a Clear, OT or Dianetic Clear. It would not be very usual but you better know about it.

On Section E (engrams and masses, etc.) if you got reads on a Clear, OT or Dianetic Clear you could indicate them and if they didn't clear to F/N you could do an L3RF, remembering that the instructions on the L3RF handlings do not apply. Your actions as an auditor would simply be to indicate the read and you would probably get your F/N, providing of course your read wasn't false. The way to program a persistent read on this would be to get the person up to OT I, II and III fast. And then program NED for OT's. But whatever you do don't try to run these reads out with Dianetics.

The rest of the C/S 53 (except D and E as above) is quite valid on Clear's, OT's and Dianetic Clear's as it is mostly concerned with think, environment and practices.

### F/Ning A C/S 53

Unless you run into the necessity to do an Int handling or you goof or get false reads you can F/N a whole C/S 53 rather rapidly.

### C/S 53 TO F/Ning LIST

Getting a C/S 53 to an F/Ning list is done by Method 5ing it, handling any Int RD necessary and handling the rest of the items, each to F/N.

You then Method 5 the whole C/S 53 again. You may pick up an additional read or two. You F/N these. Hopefully, if Int is now handled properly, if it did read in the first place, it won't read again. But if it does, you have the End of Endless Int Repair

RD which if done already may not have been carried to EP so you simply get it carried to EP, which is an F/Ning Int button list.

You then Method 5 the C/S 53 again. You will probably get an F/Ning assessment throughout. If you don't you simply Method 5 it again.

The eventual EP of getting a prepared list to F/N will occur unless the meter, the auditor's metering or TRs, or use of the list are badly out. The thing to do in that event is to get another auditor or get liberally crammed or retreaded, as frankly, F/Ning a C/S 53 is a piece of cake.

F/Ning a C/S 53 to F/Ning list is relatively easy to do and can produce a remarkable resurgence of case. It's an easy and simple way to do a set-up for a major rundown.

## BUG

Some pcs, particularly those who have a false TA have gotten so bugged by C/S 53s being done on them that when they see an auditor reach for one, they react adversely.

The way to handle this is 2WC the C/S 53 itself, E/S, taking the F/Ns and ignoring the TA position and then do a full false TA handling on the pc per HCOB 21 Jan 77RA, FALSE TA CHECKLIST.

In essence what you have discovered is the biggest reading item of all without even looking at your meter.

No further repair is needed than the above as a C/S 53 will now work like a clock and can be done smoothly and correctly. It will even pick up the latent charge of "Endless C/S 53s" if you do the above.

The C/S 53 Series is a wonderful tool and like any tool can be well handled or mishandled.

Part of its proper use is understanding exactly what it is and handling it with a good meter, good metering, and good TRs.

There is no other document in history that has rounded up so completely the factors which can be wrong with the mind. And also put it, in its short form, on one sheet of paper.

HCO PL 7 May 69 II    STUDENTS GUIDE TO ACCEPTABLE BEHAVIOUR  
HCO PL 16 Apr 65     THE "HIDDEN DATA LINE"  
HCO PL 24 Oct 68     SUPERVISOR KNOW-HOW, RUNNING THE CLASS  
HCO PL 16 Mar 71R    WHAT IS A COURSE?)

There are two ways a course can be run. It can be in-ethics or out-ethics.

An in-ethics course means that HCOBs are applied, verbal data doesn't exist whatsoever, schedules are strictly adhered to, musters are held, the Supervisor applies *all* the study tech, etc.

An out-ethics course would be anything less and sometimes becomes so obviously out-ethics that you see students goofing around on course, late arrivals for roll call, students taking cigarette breaks whenever they feel like it, verbal data running rampant, and a Course Supervisor that does nothing but stand around.

There's such a thing as group agreement and if a new student walks into an out-ethics course room, he will tend to go into agreement with it and join in.

There's no in-between point. A course (or any activity for that matter) cannot be run semi-standardly or with "pretty much in-ethics." It must be run with totally standard tech and in-ethics. If this is not the case you'll get a gradually lowered ethics level, admin will go out and standard tech slips down to "some of the tech being applied when we can."

When a student or Supervisor goes into a course room and sees things that are out-ethics or nonstandard or "not the way Ron says they should be" and doesn't do something effective to handle the scene then he himself will become part of it; he goes into agreement with it and will actually contribute to the out-ethics.

This situation is a widespread thing in our society today. It's not limited to our course rooms. You see it in marriages. It has become an acceptable thing to get divorced, create broken homes, cheat on your spouse. In the world of big business you're told to swindle Mr. X before he swindles you. This is group agreement. It is agreed upon out-ethics.

Now, if a course room is run like this you'll get auditors who won't keep auditing appointments, misapply tech, fail to handle their pcs' ethics, give and accept verbal data, have nonstandard admin, etc., etc. You will also train executives who will operate out-ethics, off-policy orgs. Either way, you're setting yourself up for losses.

Therefore, it is now a Comm Ev offense for a Course Supervisor or MAA (Ethics Officer) to allow the following out-ethics activities in their course rooms, with the result of declare of being a suppressive person:

1. Does not muster his students in the morning, after lunch, and after dinner. precisely on time, note absences and take action.
2. Permit students to talk to each other or wander around or take unscheduled breaks or goof off during course hours.
3. Permit students to eat or smoke in the course room.
4. Permitting persons to come into the course room and bother students for any reason.
5. Supervisor standing around or sitting at his desk not actively handling students who need help.
6. Not getting students through their course and graduated.

It goes without saying that all elements of HCO PL 16 March 71R WHAT IS A COURSE? should be in on a course. A Supervisor who does not run a course per checksheet, lets students study without dictionaries and demo kits, does not make all materials available and does not fully apply study tech and use Word Clearing is of course suppressive and should be declared, as he is actively blocking Scientologists from having and benefiting from Scientology.

Flag and FOLO observers and missions should always have a target to see that this policy letter is fully in.

You see, our success in clearing this planet depends upon the success of our courses as this is where we train our auditors, C/Ses, Supervisors and administrators and *that is the whole* team!

Issue 1  
REVISED 3 DECEMBER 1978

Remimeo

*(Revision in this type style)*

(Also issued as an HCO Policy Letter  
under same date and title.)

**PROCLAMATION  
POWER TO FORGIVE**

A Scientology minister who has been duly trained and certified in the Confessional procedure of the Church of Scientology and is in good standing with the Church with his certificates in force, is invested with the power to forgive the admitted sins of an individual to whom he has administered full Confessional procedure.

Confessionals have been part and parcel of religion nearly as long as religion has existed.

It has been broadly recognized down through the ages that only when a person has owned up to his sins can he experience relief from the burden of guilt he carries because of them.

In Scientology we have had, since the early years, procedures whereby an individual is able to confess his withholds and the overt acts underlying them. We have long known that confessing one's overt acts is the first step toward taking responsibility for them and seeking to make things right again.

The acknowledgement that follows each confession in Scientology procedure is an assurance to the person that his confession has been heard.

Such assurance helps him to end cycle on the bad things he has done and unsticks him from a preoccupation with his guilt over them to where he can then put his attention on constructive activities.

That is the purpose of any Confessional.

There is another element that further helps the individual to accomplish this, and that is forgiveness.

Thus, at the end of a Confessional, when it has been fully completed, the Scientology auditor who has administered the Confessional must inform the person that he is forgiven for the sins he has just confessed, and that he is cleared of these sins and free of them.

The statement that is used is:

*“By the power invested in me, any overts and withholds you have fully and truthfully told me are forgiven by Scientologists.”*

*A special certificate is to be issued to each Scientology minister who has been trained and certified on the Level II Course or the Confessional Course to administer Confessional procedure, and who is in good standing with the Church with his certificates in force, investing him with the power to forgive the sins confessed to him by an individual in a Confessional session.*

*Any auditor who is trained to deliver the Ethics Repair List has priority in the issuance of such certificate.*

Confessional  
Course

**PROCLAMATION: POWER TO FORGIVE  
ADDITION**

Addition to HCOB 10 Nov 78R, Issue I  
Proclamation: Power to Forgive

Reference: BTB 8 Dec 72RCs The Confessional  
Repair List (LCRC)

ON ANY ADVERSE REACTION TO THE PROCLAMATION OF FORGIVENESS, GET THE REST OF THE WITHHOLD OR REPAIR THE WITHHOLD SESSION.

When the Scientology minister doing a Confessional or Ethics Repair List acknowledges the confession and informs the person that his confessed overt and withholds are forgiven, the usual response is instant relief and VGIs. Rarely the person may react adversely such as not being able to accept forgiveness or still feeling bad. This is because something has been missed. The person is still stuck in the shame, blame and regret of the unconfessed overt or withhold and will not feel better until all is told. The Scientology minister encountering this in session must get the rest of the withhold or repair the withhold session. Should the person show this reaction later, outside of session, the folder must be turned in to the C/S to handle immediately.

An incomplete confession can be due to the following errors:

- (a) Did not tell "all."
- (b) Thought of one overt, but told a different overt.
- (c) Told part of a withhold but not the rest.
- (d) An overt or withhold was not taken earlier similar to basic.
- (e) During the session an overt or withhold was restimulated, but not asked for or gotten off.
- (f) There have been errors in the Confessional such as withholds gotten off more than once, false reads, out-TRs, invalidation, evaluation, etc., and these must be cleaned up.

The above categories and the Confessional Repair List are useful to a C/S in correcting any adverse reaction to the Power to Forgive Proclamation, by ensuring that the person gets the full relief and VGIs which invariably accompany a complete confession and forgiveness.

## DATING AND LOCATING

(Reference:

Book: AXIOMS AND LOGICS  
Book: THE BOOK OF E-METER DRILLS  
EM DRILL 22, E-METER HIDDEN DATE,;  
THIS LIFE EM DRILL 25 TRACK DATING  
HCOB ALL ROUTINES, E-METER ERRORS,  
4 Aug 63 COMMUNICATION CYCLE ERROR.)

*Axiom 30:* “The general rule of auditing is that anything which is unwanted and yet persists must be thoroughly viewed, at which time it will vanish.”  
—The Axioms of Scientology

*Excerpt from Axiom 38:* “... Truth is the exact time, place, form and event.... Thus we see that the discovery of Truth would bring about an As-is-ness by actual experiment.”  
—The Axioms of Scientology

A thetan knows that if he could remember the exact place a thing had been generated, the exact time and the exact conditions, and the exact person who did it, he would then get a disappearance of the thing.

Dating is the action the auditor takes to help the pc spot the exact *time* something happened.

Locating is the action the auditor takes to help the pc spot the exact *place* something happened.

By dating and locating, getting the exact time and place a specific thing happened, the pc is able to blow the mass and energy connected with the occurrence which has hung him up at that point.

Date/Locate, as called for in the various prepared correction lists, is a very effective tool for the handling of certain items found to be out on such a list. These could be points of overrun, wins that have been bypassed or invalidated in some way, moments of loss, trauma, painful emotion, or any of various stuck points of this nature. It is also used in the correction of wrong dates or wrong locations given the pc in previous auditing.

In any of these cases the pc will be somewhat stuck at these points, or at the very least will have some attention units hung up at these points, and getting the exact “when” and “where” will unstick him.

That which is viewed in its own time, place, form and event can be as-ised.

## WHY YOU DATE AND LOCATE

A person can have a wrong date for an incident, or he might have a date totally occluded. He might have a confusion on two incidents, thinking one happened before the other when it is actually vice versa. He could have two incidents collapsed into one, time-wise. Or, more severely, he can be stuck in the time of an incident which acts as present time for him. In other words, that time is still in existence for him in PT. He is seeing things from that point in time.

By dating it exactly you blow the stuck viewpoint in time. You see it as a blow-down on the meter and the pc will feel the sudden dissipation of mass.

The question might then arise: If you have dated an incident to a “blow” what is there left to blow on the Locate step? The answer is that, in addition to a stuck viewpoint in time, a person can have a stuck viewpoint of location.

Since he had the wrong time, he could, as well, have the wrong location, or an occluded location, or a confusion between two or more locations. He could be quite stuck in a past location. That past location is still in existence for him. The point of view from that location is still there for him.

So you date *and* locate. Finding when it was and where it was blows both the time of the incident and the place of the incident. If he’s still hung up in either of these he’s out of present time and out of present location. Getting the precise date and location blows him out of these into present time.

Sometimes during dating the pc spots the correct past location simultaneously with getting the correct date, and it (the location) then blows at the same time. The auditor must know that this can occur and recognize when it does as he would not then rotely try to put the pc through the Locate steps.

### DATE/LOCATE NOT A ROTE PROCEDURE

While Date/Locate is a precise action, it is by no means a rote procedure. The auditor must know the theory of the action if he is to Date/Locate successfully. He must understand that he takes the pc’s data and he works with the pc. Robotic application of the steps will not only not produce the desired result but can result in messing up a case badly.

### BLOW

*Definition of blow:* The sudden dissipation of mass in the mind with an accompanying feeling of relief. (Technical Dictionary.)

This definition must be understood by both auditor and pc. It is cleared with the pc before beginning the Date/Locate steps. Have the pc demo it, using a demo kit, if necessary, so he has no confusion on it.

A blow is a definite manifestation. Vital data for the auditor is that the pc must say “Something blew” or “It disappeared” or “It’s gone” or “It vanished,” not simply “I feel lighter.”

### METERING

During Dating/Locating the pc is on the meter but the auditor is consulting the *pc* and getting the pc’s answers, while also keeping an eye on the meter. He does *not* resort to meter dating or meter locating unless the pc himself gives up on one or the other of these steps.

A pc can be made more dependent on the meter or can be made more independent of the meter, depending upon the way the meter is used by the auditor. If the pc’s case is improving he becomes more independent of the meter. That is the direction you want to go.

“RULE: Use the meter to date and verify date correctness by all means but *only* after the pc has been unable to come up with the date.” (HCOB 4 Aug 63, ALL ROUTINES, E-METER ERRORS, COMM CYCLE ERROR.)

The same rule would apply to using the meter on the Locate steps.

## TIME

When dating anything you are using a system of measurement of time. There are various systems for measuring time and as time is basically a postulate or consideration there is no absolute system for measuring time. Time can be measured in terms of years ago. It can be measured by year, month and day (1918 AD, January 1st). These two systems are applicable to this planet, as the term “year” is the time it takes this planet to complete an orbit around the sun. In larger whole track dates different systems were used. The whole point is to use the system the pc is using, because the whole point of dating is to blow a past time that the pc is stuck in. And the pc will very often use the dating system of the time period he is stuck in. It doesn’t matter what system of time measurement the pc uses. It is important that the auditor accepts and uses the system the pc is using and doesn’t try to change it.

You’re first going to ask the pc, “When was it?”. He may tell you in terms of “years ago” or “weeks ago.” Or he may say “It was 1890” or “It was the 24th of August 1672.” Or he may use an earlier track system of dating. Either way, you take it, and if he has said “High noon on May 2nd, 1912” you don’t then ask “How many years ago?” as he has just told you, and your question would be altering the dating system the pc is using.

**YOU CAN USE ANY SYSTEM OF TIME MEASUREMENT IN DATING; THE IMPORTANT THING IS THAT YOU USE THE SYSTEM THE PC IS USING.**

It is remarkable that a pc can date something that happened earlier than this planet in terms of years ago. He can by some sort of mental computer, but the auditor mustn’t require that the pc convert a date to some other system.

And when the pc has it, the auditor doesn’t then alter-is it in sequence. Found by years—months—weeks—days—hours—minutes—seconds and fractions of a second, one doesn’t then call it back by day, year, month, as it tangles the pc. It is called back in the same order.

**WHEN CALLING BACK A DATE AS AN INDICATION, ALWAYS CALL IT BACK IN THE *SAME SEQUENCE* THAT THE DATE WAS FOUND OR GIVEN.**

## IMPLANT DATES/ACTUAL DATES

Implant dates usually only give small reads whereas actual dates read well. If you suspect that you are getting false dates out of an implant, you meter check “Implant date?” and you’ll get a read on that question, and the false implant date will no longer read. The actual date will read well.

Meter check if it is:

- a) a false date from an implant?
- b) an actual date?

and the meter read will tell.

## DATING

**THE PURPOSE OF DATING IS TO *GET A BLOW* OF THE PAST TIME THE PC IS STUCK IN.**

Whether the pc gives the date, or whether the auditor has to meter date it, you must remember that all you are going for is a blow.

Sometimes you will get a blow as easily as the pc saying “It was a long time ago.” A blow is accompanied by a BD and F/N. So be alert when dating for a sudden or BD and F/N. And if the pc doesn’t originate that it blew, ask him so you won’t go on trying to date to blow, something that has already blown!

Very often a date has to be dated precisely down to the fraction of a second in order to get a blow.

If there is no blow on pc giving the date, or on auditor meter dating it, you then call the date back as an indication and it will blow. If it doesn’t it is because there is an error in the date, or the auditor altered the date or its sequence in calling it back, or there already was a blow on dating that wasn’t noticed and was overrun.

Usually a pc will need help from the auditor to start with and the auditor might need to do the whole dating drill on the meter establishing the order of magnitude and every part of the date on the meter. Then the pc’s ability improves and the pc starts to become more able to find dates himself. The auditor must be alert for this and accept the pc’s data and *never* challenge, meter check or invalidate the pc’s data. Sometimes the pc will blurt the whole date out at once, and the auditor must be ready to write this down accurately and call it back accurately.

## LOCATIONS AND DISTANCE

When locating something you are using *direction* and a system of *measurement of distance*. Just as time is basically a consideration, so is distance. And there are many systems of measuring distance, both on this planet and earlier on the track. Distance can be measured in miles, kilometers, light-years, to name a few. In one whole track space opera civilization, intergalactic distances were measured in terms of how long it took a particular spaceship, called a Hylan and intergalactic distances were measured by the number of “days of Hylan spaceflight.” You will probably find that the pc will tend to use the system of measurement of distance that was used at the time of the past location that he is stuck in. Just as a pc can use a sort of mental computer to convert whole track dates into “years ago,” he can also mentally convert some distances into “miles.” But the auditor never expects him to do so, and never asks him to.

**YOU CAN USE ANY SYSTEM OF MEASUREMENT OF DISTANCE IN LOCATING, THE IMPORTANT THING IS THAT YOU USE THE SYSTEM THE PC IS USING.**

And when you have the distance you must call it back accurately, and not alter-is it in sequence either.

**WHEN CALLING BACK A DISTANCE AS AN INDICATION, ALWAYS CALL IT BACK ACCURATELY, AND IN THE SAME SEQUENCE THAT IT WAS GIVEN OR FOUND.**

## LOCATING

**THE PURPOSE OF LOCATING IS TO GET A BLOW OF THE PAST LOCATION THE PC IS STUCK IN.**

As in dating the auditor may have to help the pc with the meter but usually the pc will be able to find and give the data, and the auditor never resorts to the meter if the pc can get it.

And you may get a blow on direction step alone or on the pc realizing it happened somewhere else, or “not here” or “Greece” or whatever. The auditor must be alert for the or BD and F/N and ask the pc if it blew, so as not to go on trying to get a blow of a location that has already blown!

Usually if you don't get a blow on finding the direction and distance, you will get a blow on calling the location back to the pc as an indication. If not there is an error in the direction or distance or the auditor altered it in calling it back.

In locating, the auditor is getting the *past* physical location. E.g. the auditor gets the direction, distance, what galaxy, star, planet, country, etc., pinpointing it down to the exact location in space where it happened.

But these items are not taken up rotely; one uses the questions that apply.

For example, if it occurred "next door" one would not ask "What planet?". Or if the pc has said it's "two years ago" when dating, in locating one doesn't then ask "What galaxy?" as, of course, it's this one. Or what star, either. If you start asking "What galaxy?" on an incident on Earth the pc is thrown backtrack.

And if it happened outside a town in the open you wouldn't ask what city, house, or street or room, either. You must use the questions that apply.

The pc is of course IN the auditing room. One doesn't ask where *he is*. And it's never "Who else was there?" or "What else is there?" as these things put the pc down the track. One does not try to run engrams at the same time one is doing the Locate step. It is simply *location*. Where? What? How far? *Location*.

AND in locating, if there is no instant blow when the location is fully spotted and it seems correct, the location is called back to the pc. It usually blows when it is called back to the pc after it is known.

## TWO SEPARATE DRILLS

There are two separate drills for dating and locating, and which is used depends upon pc ability to find and give the data. The first drill given is where the pc volunteers or gives the data. The second drill is where the auditor establishes all the data by metering. As with all processing, the pc's ability increases as you go along, and the auditor must be alert for this and change from meter dating and meter locating to accepting and taking the pc's data. It can also happen that a pc who was able to find and give the data may run into something particularly heavy and now need assistance from the auditor. The rule is:

**NEVER RESORT TO THE METER IF THE PC CAN FIND AND GIVE THE DATA, AND NEVER LET A PC STRUGGLE IF HE CAN'T FIND THE DATA. AND NEVER, NEVER USE THE METER TO CHALLENGE, 'CORRECT' OR INVALIDATE THE PC'S DATA.**

## PRELIMINARY STEP

Before dating and locating on a pc for the first time you must clear what you will be doing and the words and terms used, so that he understands these and knows what is expected of him.

1. Give the pc an R-Factor that you will be dating the *past time* of the incident (i.e. when it happened), until that blows.
2. Clear the word "blow" with the pc per the Tech Dictionary definitions No. 1 and No. 2.
3. Clear any misunderstands the pc has on dates and dating or words used in measurement of time, or numbers (e.g. "billions," etc.).

4. Give the pc an R-Factor that you will be establishing the direction and distance in order to find the *past* location of the incident (i.e. where it happened), until that blows.
5. Clear the term “direction” and the concept of pointing. Clear the term “distance” and any misunderstands the pc has on measurement of distance (e.g. miles, light-years, etc.).
6. Let the pc know you will be getting answers from him, not the meter, unless it is necessary to help him with the meter. And that if the pc should suddenly get the date or location he should tell you. Also let the pc know that you are dating and locating to get a blow and that when a blow occurs to tell you, as the purpose of this procedure is to get the mass to blow.

### DATING TO BLOW/LOCATING TO BLOW PROCEDURE BY STEPS

#### PROCEDURE ONE, PC GIVING THE DATA

##### DATING DRILL No. 1

1. R-Factor: “We’re going to date the past time when that (\_\_\_\_\_) happened precisely, until the mass blows.”
2. Ask the pc when it happened. (If the pc doesn’t know, go to meter dating, per Dating Drill No. 2.)
3. Write down the pc’s answer.
4. If not already given, have the pc give the rest of the date right on down to the fraction of a second.
5. Call the date back to the pc accurately and in the same sequence in which it was given, and it will blow.

(Caution: The blow may occur earlier in the dating steps and the auditor must not go on past a blow. If you suspect a blow and pc hasn’t volunteered this, ask him if it blew.)

##### LOCATING DRILL No. 1

1. R-Factor: “We’re going to find the past location where ( ) happened precisely, until the mass blows.”
2. Get the pc to *point* to where it happened. (Points with finger in the direction to the past location.)
3. Ask the pc the *distance* to that location. (This is the distance from where the pc is now to that past location.)
4. If not already given have the pc give the rest of the distance right on down to fractions, until you have a precise distance.
5. Call the distance back to the pc accurately and in the same sequence in which it was given, and it will blow.

NB. If the pc starts giving you the location in some other terms such as “On the corner of Times Square, New York,” you would of course accept the pc’s data, and not ask him to convert that into miles away, or anything else.

(Caution: The blow may occur earlier in the locating steps and the auditor must not go on past the blow. Sometimes the blow will occur on asking the pc to point. Sometimes the pc while dating will also get the location and blow it too. If you suspect a blow due to a BD and F/N and the pc hasn't volunteered this, ask him if it blew . )

## PROCEDURE TWO, AUDITOR FINDING THE DATA BY METERING

### DATING DRILL No. 2

If the pc didn't know when it happened (on step 2 of Dating Drill No. 1), you go to meter dating.

1. Establish what system of dating or time measurement this date is measured in. Such as "years ago," or by year (i.e. 1918 AD), or some entirely different system. Do not do this if you already know it is a this lifetime date, or a this planet date, as that would be robotic.
2. Establish the *order of magnitude*.
3. Meter date the date right on down precisely, even to fractions of a second, until you get a blow—F/N.
4. If no blow—F/N when the full date is found, call it back to the pc accurately and in the same order it was found and you should get a blow.
5. If you haven't got a blow, there is either an error in the date or some part of the date, or it is not precise enough, or it blew earlier and wasn't noticed.

Meter check:

Wrong date?

Incompletely dated?

Implant date?

Some part of the date was incorrect?

Already blown?

and handle what reads, and you will get a blow—F/N.

### LOCATING DRILL No. 2

It is rare that a pc can't get the direction and distance, or otherwise pinpoint the exact past location. Should you encounter this, do the same drill as given in Locating Drill No. 1, with the auditor establishing each step by metering.

1. Get pc to point to the location to get direction.
2. Establish what system of measurement of distance (i.e. miles, or light-years, or whatever).
3. Get the distance.
4. Get any remaining increments of distance on down to fractions or decimal points.
5. Call back the distance or location as an indication, and you should get a blow—F/N.
6. If no blow there has been an error and you should meter check:

Is some part of the location wrong?

Wrong direction?  
Wrong distance?  
Incompletely located?  
Already blown?

and handle what comes up, and you will get a blow—F/N.

**CAUTION:** In Date/Locate, if it bogs and the auditor can't easily correct the error in dating or in locating, do not continue messing up the pc with wrong dates or wrong locations, as these can be very upsetting to a case. **INDICATE TO THE PC THAT THERE IS AN ERROR IN DATING OR LOCATING AND END OFF FOR C/S INSTRUCTIONS .**

A drill that can be used in locating when applicable is given below. This must not however be done rote when it doesn't apply. If you knew the incident occurred in the recent past or this lifetime, you would not ask "What galaxy?" as the question wouldn't make sense, and would throw the pc backtrack.

Point (pc points with finger)  
Distance? (including increments of distance to get the exact distance)  
What galaxy?  
What star?  
What planet?  
What country?  
What city?  
What street?  
What house?  
Position on street?  
What room?  
Distance from front of house?  
Where in the room?  
How far from *each wall*?  
How far off the floor?  
How far from the ceiling?

continuing with questions which will narrow it down to the precise location, to a blow—F/N .

**NOTE:** The above steps, particularly, cannot be rote. Listen to the pc and work with him, realistically, to get the location spotted exactly, but do not evaluate for him in any way.

If at some point on these steps the location turns out to be in the middle of the ocean or in a field, etc., the auditor uses available landmarks or reference points to get the location (i.e., distance from the nearest point of land? or, distance from the big rock?) down to a blow—F/N.

If, while locating, the pc starts running the incident or gives too much "scene" the auditor has the pc point again, then continues from where he left off on the Locate steps.

## LIABILITY

In dating and locating there is a possible source of BPC, peculiar to dating and locating.

A correct date for one incident or mass can act as a wrong date for another incident or mass, as it is a wrong date for it.

A correct location for one incident or mass can act as a wrong location for other incidents or masses, as it is wrong for the others.

It is peculiar to dating and locating that a right date or a right location can cause BPC by also being a wrong date or wrong location for other incidents or masses. This does not always occur, but is noted here should an auditor or C/S encounter it.

Manifestations of this are:

- a) pc getting upset inexplicably
- b) getting a read on both "Correct date?" and "Wrong date?"
- c) TA going up
- d) increase of mass or pressure.

It will relieve on the indication that the date found is a wrong date for other incidents or masses, and on the indication that the location found is a wrong location for other incidents or masses.

## SUMMARY

A CORRECT DATE, ESPECIALLY IF TAKEN DOWN TO SECONDS AND FRACTIONS OF A SECOND, WILL BLOW.

A CORRECT LOCATION, ESPECIALLY IF TAKEN DOWN TO MINUTE INCREMENTS OF DISTANCE, WILL BLOW.

Date/Locate, when done correctly, quickly and smoothly, works well and is successful. The longer it takes the more it will restimulate all sorts of other things which have nothing to do with the course of action.

The Date/Locate steps must NOT be done robotically. One has to understand the mechanics of how it's done and why.

The essence of Date/Locate is to bring the pc to PT by erasing the date by spotting and the location by spotting, as the pc is out of PT fixed by both date and location.

If the theory is understood nobody would do it rotely.

This is a highly precise action to be done smoothly with good TRs. Its results are phenomenal.

URGENT—IMPORTANT

**L & N LISTS—THE ITEM “ME”**

RULE: THE ITEM “ME” MUST BE ACCEPTED ON ANY S & D LIST.

RULE: THE ITEM “ME” MUST NEVER BE REPRESENTED.

The item “Me” on an L & N list must be accepted as the item, as it is basically the only right item there could be for an identity or valence list.

The item “Me” often appears on S & D lists, or similar L & N lists which ask for an identity or valence. If it is not accepted, or if it is represented, it will really mess up the case. (This includes the pronouns, “myself,” and “I.”)

The right thing to do when the pc gives this item, is to accept it as the item for the list, and do not continue that list or take any further action with that item.

Word Clearing Correction List Revised)

*Word Clearing Series 35RF*

**WORD CLEARING CORRECTION LIST**

The WCCL is the list to use when any form of Word Clearing bogs down. Any and all trouble with Word Clearing should be corrected by assessing and handling this list. The WCCL has been designed to parallel errors made in *Word Clearing*. not study, not the person's case, and it is to be used in Word Clearing sessions to correct Word Clearing errors.

If, after the Word Clearing Correction List has been fully handled, there seems to be other bypassed charge connected with the subject of study, a Study Green Form should be done.

This list can be assessed Method 3 or Method 5.

All Word Clearers are to check out on and use this list to correct Word Clearing errors.

1. IS THERE SOMETHING WRONG WITH YOUR CASE? \_\_\_\_\_  
If this list is being assessed during course room metered Word Clearing, end off for C/S instructions, otherwise assess and handle a C/S Series 53.
2. HAVE YOU BEEN WORD CLEARED OVER OUT-RUDS? \_\_\_\_\_  
Find out which and handle to F/N and VGIs.
3. IS A WORD STILL MISUNDERSTOOD? \_\_\_\_\_  
Find out which and get it cleared to F/N. (If Method 1 Word Clearing, clear it E/S to EP.)
4. WAS A WORD IN A DEFINITION MISUNDERSTOOD? \_\_\_\_\_  
Find out which word and get it cleared to F/N.
5. COULDN'T YOU FIND THE ACTUAL MISUNDERSTOOD? \_\_\_\_\_  
Using your meter and 2WC, find the misunderstood word and clear to F/N. (If Method 1 Word Clearing clear it E/S to EP.)
6. DID YOU NOT GET THE BASIC WORD? \_\_\_\_\_  
Find out which word or subject was not taken to EP, locate the misunderstood words and clear each to F/N, going E/S to EP.
7. DID YOU FAIL TO USE THE WORD YOU WERE CLEARING IN ENOUGH SENTENCES? \_\_\_\_\_  
Get the word used in sentences until it is fully understood, to F/N and VGIs.
8. DID YOU NEED TO DEMO THE WORD YOU WERE CLEARING? \_\_\_\_\_  
Get the word demoed to full understanding, F/N and VGIs.

9. WERE YOU USING AN IMPROPER DICTIONARY? \_\_\_\_\_  
Find out what word and what dictionary. Get a proper dictionary and clear it to F/N and VGIs.
10. WAS THERE AN EARLIER SIMILAR MISUNDERSTOOD WORD NOT CLEARED? \_\_\_\_\_  
Find out what it is and clear it to F/N. (If Method 1 Word Clearing, clear it E/S to EP.)
11. DID YOU NOT FEEL GOOD ABOUT A WORD WHEN IT WAS CLEARED? \_\_\_\_\_  
Find the word and reclear it to F/N.
12. DO YOU KEEP FORGETTING WORDS YOU HAVE ALREADY DEFINED? \_\_\_\_\_  
Locate the other or related word he didn't define and clear it to F/N.
13. DID YOU HAVE TO CLEAR A WORD YOU ALREADY KNEW? \_\_\_\_\_  
Find out what the word was and indicate. If no F/N get off any protest or inval and rehab to F/N.
14. WAS A WORD OVERRUN? \_\_\_\_\_  
Find out what word and rehab.
15. WAS A WORD READING ON PROTEST? \_\_\_\_\_  
Get which word, indicate. If no F/N handle with itsa E/S itsa to F/N.
16. DID A WORD NOT REALLY READ? \_\_\_\_\_  
Get which word, indicate. If no F/N handle with itsa E/S itsa to F/N.
17. COULDN'T YOU HEAR THE WORD CLEARER? \_\_\_\_\_  
Itsa E/S itsa to F/N.
18. DIDN'T YOU UNDERSTAND WHAT THE WORD CLEARER SAID? \_\_\_\_\_  
Itsa E/S itsa to F/N.
19. DIDN'T YOU UNDERSTAND THE ACTION BEING DONE? \_\_\_\_\_  
Find out what it was and handle with itsa E/S itsa to F/N or clear it up with correct references to F/N and VGIs.
20. WERE YOU CONFUSED BY SOMETHING? \_\_\_\_\_  
Find out what it was and handle with itsa E/S itsa to F/N or clear it up with correct references to F/N and VGIs.
21. WERE YOU PUZZLED WHY THE WORD CLEARER KEPT ON WORD CLEARING? \_\_\_\_\_  
Find out what happened and handle with itsa E/S itsa to F/N or rehab the win.
22. ON WORD CLEARING DID YOU FEEL OVERWHELMED? \_\_\_\_\_  
Find out what happened and handle with itsa E/S itsa to F/N.
23. ON WORD CLEARING DID YOU FEEL HOPELESS? \_\_\_\_\_  
Find out what happened and handle with itsa E/S itsa to F/N.
24. ON WORD CLEARING DID YOU FEEL INVALIDATED? \_\_\_\_\_  
Find out what happened and handle with itsa E/S itsa to F/N.

25. ON WORD CLEARING WAS THERE ANY EVALUATION?  
Find out what happened and handle with itsa E/S itsa to F/N.
26. ON WORD CLEARING WERE YOU PROTESTING? \_\_\_\_\_  
Itsa E/S itsa to F/N.
27. DID YOU GET DISTRACTED DURING WORD CLEARING? \_\_\_\_\_  
Find out what happened and handle with itsa E/S itsa to F/N.
28. WAS THERE SOMETHING WRONG WITH THE F/Ns INDICATED? \_\_\_\_\_  
Find out what happened and handle with itsa E/S itsa to F/N or clear to F/N any words not fully cleared.
29. DID YOU HAVE TO LOOK UP TECHNICAL OR SPECIALIZED DEFINITIONS OF WORDS THAT DIDN'T APPLY? \_\_\_\_\_  
Find out what the word was. Indicate this was an unnecessary action. Correctly clear the word to F/N. (If Method 1 Word Clearing, take E/S to EP.)
30. DID YOU TELL THE WORD CLEARER IT WAS UNDERSTOOD JUST TO GET RID OF HIM? \_\_\_\_\_  
Get the word (plus any others) and clear each to F/N.
31. WAS IT NOT YOUR MISUNDERSTOOD? \_\_\_\_\_  
Itsa E/S itsa to F/N.
32. WAS THERE INVALIDATION OF KNOWINGNESS? \_\_\_\_\_  
Find out what it was, and handle with itsa E/S itsa to F/N.
33. DID YOU USE THE WRONG SIZED CANS? \_\_\_\_\_  
False TA Checklist. Work out the right sized cans with the pc.
34. DID YOUR HANDS GET TIRED IN WORD CLEARING? \_\_\_\_\_  
False TA Checklist. Work out the right sized cans with the pc.
35. WAS A WORD ON THE LIST OF SUBJECTS MISUNDERSTOOD? \_\_\_\_\_  
Find out what it is and clear to F/N. (If Method 1 Word Clearing, take E/S to EP.)
36. IS A SUBJECT STILL MISUNDERSTOOD? \_\_\_\_\_  
Get which subject and which word and clear it to F/N. (If Method 1 Word Clearing, take E/S to EP.)
37. DID YOU NOT GET THE BASIC SUBJECT? \_\_\_\_\_  
Find out what subject is incomplete by 2WC, locate the misunderstood words in it and clear each to F/N. (If Method 1 Word Clearing, take E/S to EP.)
38. IN REGARD TO EARLIER SUBJECTS OR COURSES YOU STUDIED DID YOU FIND ANY OF THEM DIFFICULT? \_\_\_\_\_  
When this question is answered ask this second question: WERE THERE ANY WORDS ON THESE COURSES THAT YOU DIDN'T FULLY UNDERSTAND? Find by subject and get each defined. Then do steps again until both questions F/N.
39. DO YOU STILL HAVE MISUNDERSTOODS ON EARLIER COURSES? \_\_\_\_\_

Find out which course (or courses) and get each misunderstood word cleared. Then recheck the question and handle until it F/Ns on checking.

40. DO YOU HAVE MISUNDERSTOODS ON YOUR EARLIER THAN SCIENTOLOGY SCHOOL OR FAMILY TRAINING? \_\_\_\_\_  
When this question has been answered, ask: WAS THERE ANY WORD IN (SUBJECT NAMED) YOU DIDN'T UNDERSTAND? Get it fully defined to F/N and all such words cleared up for that subject. Handle all subjects the person has named as above. Then recheck the original question and handle until it F/Ns on checking.
41. WERE YOU BEING WORD CLEARED ON AN UNREADING SUBJECT? \_\_\_\_\_  
Find out what. Indicate. If no F/N rehab or Date/Locate.
42. WAS A SUBJECT OVERRUN? \_\_\_\_\_  
Find out what and indicate. If no F/N rehab.
43. WAS A MISUNDERSTOOD SUBJECT MISSED? \_\_\_\_\_  
Find out which subject(s) and which words and clear each to F/N. (If Method 1 Word Clearing, take E/S to EP.)
44. DID YOU TRY TO MAKE THE LIST F/N? \_\_\_\_\_  
Put in ruds on Word Clearing, each to F/N, VGIs. Rehab any overruns.
45. IS THERE A SUBJECT WHICH SHOULD HAVE BEEN ON THE LIST BUT WASN'T? \_\_\_\_\_  
Find out what the subject is and clear all misunderstood words to F/N, going E/S to EP.
46. HAS A WIN BEEN BYPASSED? \_\_\_\_\_  
Find out what and rehab.
47. IS THERE SOMETHING ELSE WRONG? \_\_\_\_\_  
Find out what and handle or return to the C/S.
48. WAS THERE NOTHING WRONG IN THE FIRST PLACE? \_\_\_\_\_  
Indicate. If no F/N rehab or Date/Locate.
49. IS THERE SOME OTHER BYPASSED CHARGE ON THE SUBJECT OF STUDY? \_\_\_\_\_  
Assess and handle a Study Green Form.

### **AUDITORS WHO MISS WITHHOLDS, PENALTY**

As one of the most destructive things an auditor can do is miss a withhold on a pc and as missing a withhold stems exactly from being inexpert, out-metering, out-TRs, or mutual out-ruds, and as pcs and staff can blow and cause a great deal of trouble when withholds have been missed in Sec Checking or Confessionals, the penalty for missing a withhold on a pc is as follows:

Comm Ev, and if found guilty, suspension of certificates until retrained.

This penalty has been issued in the past but was omitted in modern compilations.

It is no light thing to mess up Sec Checking on a pc.

Pcs who blow their auditing in orgs, staff who want to leave, out-ethics mushrooming up in an org can usually be traced to one or more auditors who miss withholds either by their own out-tech or mutual ruds.

It is highly possible that the reason husband/wife teams often fail is that they have mutual out-ruds or that they miss withholds on each other.

This is no light thing. If this order is not vigorously enforced, lack of enforcement will end up destroying lives, just as it does in the wog world every day.

So, get your ethics presence up and make sure that Sec Checking is done correctly, without error and with no missed withholds.

This HCOB/PL is retroactive for a decade.

HCO BULLETIN OF 29 NOVEMBER 1978

All C/Ses  
NED Auditors  
Scn Auditors

**C/S Series 104**

**DIANETIC CLEAR ATTESTS**

Well, well. I seem to have been right in Book One about making Clears, but it seems to have exceeded mass reality.

**WARNING TO NED AND SCN AUDITORS**

If the case you are auditing has a fantastic win and then seems to go into a decline, beware—the pc might have become a pre-OT and that funny behavior of the needle and tone arm might have been a floating TA, when he went Clear.

**NOTE FOR C/Ses**

I have found some very interesting case phenomena being resolved since past Dianetic Clears are attesting to the state.

Some of the manifestations of some of the cases who were audited past Dianetic Clear (unrecognized and unattested to) are:

- (a) Manifesting PTSness and illnesses until the state was acknowledged and attested to.
- (b) Appearing to be no case gain, out-ethics cases.
- (c) Not moving up the Bridge but remaining “parked” at some point. (They have many “reasons” for this.)
- (d) Becoming inactive as a Scientologist.

A C/S should look for these cases and recognize them when he sees them. This in no way means that every PTS or out-ethics case has an unacknowledged state of Clear underlying it but this fact certainly needs to be included in any C/S’s case debug line-up.

In the cases mentioned above, you will almost always find that the condition started at a certain point in the pc’s auditing (or in his last life, as a pc). If you do a thorough folder study and interview the pc you will find that he went Dianetic Clear just prior to the case going awry. (Or, by interview, you might find he went Dianetic Clear in his last life.) (Note: One percent have track dates when they went Clear.)

Advance Scheduling Registrars and those working in the Central Files of an org can go through CF folders and ask the org C/S to check the folders of those who have drifted off lines or stopped going up the processing side of the Bridge, as an unacknowledged Dianetic Clear state may just be the cause.

**CLEAR IN LAST LIFE**

Some people didn’t believe one had lived before this life. Also some people wondered what happened to old Dianeticists and Scientologists who had died. But

others used to have the phrase “Well, we’ll pick them up in the next lifetime,” or “the next time around.”

Well it seems like the former shouldn’t have wondered and the latter were right. We are coming up with quite a few pcs who had gone Clear in their last lifetime during Book One auditing, Goals Processing, etc. This is something that the pc originates or something he has been “wondering about” but invalidated.

#### INVAL/EVAL

The state of Clear having been truly attained yet not acknowledged and attested to, can cause an extraordinary amount of invalidation. Evaluation also occurs on this subject and comes from others and even the pc himself.

Because of the amount of inval and eval which may exist, a pc will often have to have these buttons put in before he can acknowledge the state he has attained. In this case this would have to be done before the point he went Clear is Date/Located. In some cases you may have to assess a Dianetic Clear Repair List to handle the pc’s bypassed charge.

#### ETHICS WARNING

It is a comm-eval offense to coach the pc with data about Clear in any way. You also do not evaluate for any pc and try to convince him he has gone Dianetic Clear when he hasn’t. You do not turn to “the pc must have gone Dianetic Clear” when you can’t easily solve a pc’s case. You use the C/S Series in full.

Only a C/S who is Clear and who knows the full EP of Dianetic Clear can send a pc through to attest to this state. To send a pc through to attest to Dianetic Clear when he hasn’t truly made it is a suppressive act as that preclear will not make it on the OT levels.

If the C/S is not a Clear he should send the person or the person’s folders to a Class IV Org C/S who is Clear, or to an AO.

#### THE POWER OF AUDITING

The power of modern auditing shouldn’t be underestimated. It was pretty hot in 1950, but realize there were 28 years of research and development. This has been enormously stepped up. For 28 years, apparently, the power of auditing has been underestimated .

With better trained auditors than ever, and with their TRs and metering really in, the C/S who is keeping tech in on his lines can expect a lot more of this sort of thing, so he must be alert to it, without at the same time going delusory or failing to handle cases that really *are* bogged for quite some other reason.

Given standard tech used by standard auditors and C/Sed by standard C/Ses, there is no reason why we cannot Clear the planet.

---

“Sec Checking,” “Integrity Processing” and “Confessionals” are all the exact same procedure and any materials on these subjects is interchangeable under these titles (HCOB 24 Jan 1977 TECH CORRECTION ROUND-UP )

Withholds don't just add up to withholds They add up to overts, they add up to secrecies, they add up to individuations, they add up to games conditions, they add up to a lot more things than O/W.

You are straightening out somebody on a moral code, the “Now I'm supposed to's.” They've transgressed on a series of “Now I'm supposed to's.” Having so transgressed, they are now individuated. If their individuation is too obsessive, they snap in and become the terminal. All of these cycles exist around the idea of the transgression against the “Now I'm supposed to's.” That is what a Confessional clears up and that is all it clears up. It's a great deal more than a withhold. (HCOB 1 March 77, Iss III, FORMULATING CONFESSONAL QUESTIONS.)

## PROCEDURE

A Confessional must be done by someone who is a well trained auditor, skilled in TRs, basic auditing and metering, who can make a prepared list read, and who has been fully checked out and drilled on these techniques.

Every reading question of a Confessional is F/Ned. The original question must be taken to F/N, not some other question.

Here is the basic procedure for a Confessional:

1. Set up the room with the auditor seated closer to the door than the pc, so that he can gently put the pc back in his chair if he tries to blow the session. Ensure all the necessary materials are to hand, per HCOB 4 Dec 77, CHECKLIST FOR SETTING UP SESSIONS AND AN E-METER.
2. Make sure the person is well fed and well rested, that his hands are not too dry or moist, that the cans are the correct size and that the person knows how to hold them. Include all the steps of HCOB 4 Dec 77, CHECKLIST FOR SETTING UP SESSIONS AND AN E-METER. (Also ref: FALSE TA HCOBs.)
3. Start the Confessional. Model Session and rudiments are used. Ref: HCOB 11 Aug 78, Iss II, MODEL SESSION. If the TA is high or low, do a C/S Series 53RL, assess and handle. If you are not trained in doing a C/S Series 53, end off for C/S instruction.
4. Put in any needed R-Factor on doing the Confessional. Briefly explain the meter and the procedure to the person if they are not already known to him or her.

The term "I am not auditing you" only occurs when a Confessional is done for justice reasons. Otherwise the procedure is the same. (By "justice reasons" is meant when a person is refusing to come clean on a Comm Ev, B of I, etc., or as part of a specific HCO investigation when the person is withholding data or evidence from such HCO personnel.)

A Confessional done for justice reasons is not auditing and the data uncovered is not withheld from the proper authorities. Any other Confessional is auditing and is kept confidential.

By F/Ning each question that reads, and by the use of Examiner and review, there is a great deal of case gain in a Confessional. It permits the person to again feel a part of his group.

5. Clear the procedure and the use of the buttons "Suppress" and "False" etc. If necessary as an example run a non-significant question to demonstrate the procedure (e.g. "Have you ever eaten an apple?").
6. Take up the first question and clear the words backwards. Then clear the full command, noting any instant read that occurs on the command while clearing, as this is *valid*. See HCOB 9 Aug 78 Iss II, CLEARING COMMANDS, HCOB 28 Feb 71, C/S Series 24, IMPORTANT, METERING READING ITEMS, and HCOB 5 Aug 78, INSTANT READS.

Ensure the pc fully understands the question and what it encompasses.

7. With good TR 1 give the person the first question, keeping an eye on the meter and noting any instant read, i.e. SF, F., LFBD. (Ref: HCOB 5 Aug 78, INSTANT READS.) A tick is always noted and in some cases becomes a wide read. (Ref: HCOB 28 Feb 71, C/S Series 24, IMPORTANT, METERING READING ITEMS.) But don't assume you have a read because you get a tick. Put in Suppress and it will either read or the tick will vanish. In a Confessional, even the smallest change of needle characteristic, if it is instant, is checked into

before you go on. But NOTE: YOU DON'T TAKE A RISE AS A CHANGE OF CHARACTERISTIC IN SEC CHECKING.

8. Take up each reading question, getting the what, when, where, *all* of every overt. Find out who missed it or who nearly found out, and what that person did to make the pc wonder if he knew. Get specifics, not general or vague answers. If no F/N, take the overt E/S to F/N. And ensure that the original question that read is taken to F/N before you leave it.
9. For security investigation purposes, get all the exact names, dates, addresses, phone numbers, and any other information that might be helpful in investigating the case further, should this be needed.
10. If the pc gives you three or four overts at once in reply to a reading question, you note them and ensure you take each separate reading overt or withhold to an F/N, or E/S to F/N.
11. Some people you have to ask the *exact* question. If your question is even faintly off they F/N. Low responsibility of the pc does this.
12. If the person gives off another's overt, ask if *he* ever did something like that. You want what the person himself has done.
13. DO NOT TAKE UP UNREADING QUESTIONS.

- a) If a question does not read and does not F/N you can put in the buttons Suppress and Invalidate, asking:  
"On the question\_\_\_\_\_ has anything been suppressed?"  
"On the question\_\_\_\_\_ has anything been invalidated?"

But don't require it to be answered and don't look up at the pc expectantly either. If it's not reading, tell him so and go on.

- b) If Suppress or Invalidate reads, it means the read has transferred *exactly* from the Confessional question to the button. (Ref: HCOB 1 Aug 68, THE LAWS OF LISTING & NULLING.) Put in the button (simply get what the pc has to say and acknowledge), then take up the question. Fully clean the question, as in No. 8 above. Then go on to the next question.
  - c) Or, if the question reads and the pc is trying to answer it and is groping, puzzling, baffled and doesn't have any answer, then check False. Ask: "Was that a false read?", in which case it will read and on indication that it was a false read will now F/N. If no F/N, E/S to F/N.
14. FOLLOW UP FULLY ON ANY DIRTY NEEDLE. A dirty needle will either clean or turn into an R/S. It is your hottest string to pull in finding and turning on an R/S. Thus it is not to be overlooked. The area that is producing a dirty needle when questioned for full data will either clean or go into an R/S. The area that gave the dirty needle is considered clean when you can go over it and it no longer produces a dirty needle. If a dirty needle still persists then there is more to the withhold itself or something the pc isn't voicing about the withhold or how he feels about the withhold. But, *pushed*. with auditor's TRs in, this dirty needle will turn into an R/S or it will fully clean. (Ref: HCOB 6 Sept 78, FOLLOWING UP ON DIRTY NEEDLES, and HCOB 17 May 69, TRs AND DIRTY NEEDLES.)

The auditor MUST know COLD the difference between an R/S and a dirty needle. The difference is in *the character of the read* NOT the size. (Ref: HCOB 3 Sept 78, URGENT, URGENT, URGENT, DEFINITION OF A ROCK SLAM.)

A Confessional is not a rote procedure. Your job is to get the data and help the pc. Sometimes you will be thrown curves or may encounter attempts to be led off in

the wrong direction. This is simply a sure indicator the subject is withholding and that the withhold is in restimulation. One has to ignore the volunteer misdirections of the pc as the pc is of course misdirecting, and simply get the read E/Sed or the W/H F/Ned. You must use your tools as given in HCOBs, Sec Checking tapes and tape demonstrations since 1961.

15. TAKE THE ORIGINAL READING QUESTION TO F/N. Not some other question. This all comes under the heading of completing cycles of action and getting one auditing question answered before you ask a second question.

In going earlier similar to take the question to F/N, always repeat the Confessional question as part of the earlier similar command to keep the person on that question.

Example: "Is there an earlier similar time you ate an apple?"

16. On each question be sure you get *all* the overts. When you have taken a specific chain of overts earlier similar to F/N, then re-check the original question for any read. If it F/Ns, fine. It's clean.

If it reads you have another overt or overt chain to clear to F/N on that question. Use False and Protest buttons as needed.

Example:

Question A: "Have you committed any overts against apples?" Meter reads. Auditor gets an overt, takes it E/S to F/N. Auditor then re-checks Question A. Meter reads. Pc finds another overt against apples. Auditor takes it E/S to F/N.

You clean it, getting all, until the original question F/Ns.

(Ref: HCOB 14 Mar 71R Corr & Rev 25 Jul 73, F/N EVERYTHING HCOB 19 Oct 61, SECURITY QUESTIONS MUST BE NULLED HCOB 10 May 62, PREPCHECKING AND SEC CHECKING.)

17. If the person gets critical, realize you have missed a withhold and pull it. It is no light thing to miss withholds and mess up a pc when doing a Confessional. So be alert for any of the 15 manifestations of missed withhold and handle fully should any of these crop up. (Ref: HCOB 8 Feb 62, URGENT, MISSED WITHHOLDS, HCOB 12 Feb 62, HOW TO CLEAR WITHHOLDS AND MISSED WITHHOLDS, HCOB 3 May 62R Rev 5 Sep 78, ARC BREAKS, MISSED WITHHOLDS, HCOB 11 Aug 78 Iss I, RUDIMENTS, DEFINITIONS AND PATTERN.)

It is wise, particularly when doing a Confessional of any length, to periodically check the question, "In this session has a withhold been missed?" or "Have I missed a withhold on you?"

18. At the first sign of *any* trouble in doing a Confessional check for: missed withholds, false reads and ARC breaks, in that order, and fully handle what you get. In the majority of cases the above buttons should resolve the difficulty.

If not, handle with an LCRC (BTB 8 Dec 72RC, CONFESSORIAL REPAIR LIST). Use of the above buttons first, however, before resorting to the LCRC, avoids the possibility of getting into an "overrepair" situation.

19. If the pc consistently immediately dives whole track on Confessional questions, use the preface "In this lifetime . . .", with good R-Factor. This should not be used to prevent him going whole track on the earlier similar command to F/N the question.

20. ONE MUST ALWAYS REPORT A ROCK SLAM IN THE AUDITING REPORT, NOTE IT WITH SESSION DATE AND PAGE INSIDE THE LEFT COVER OF THE PC'S FOLDER AND REPORT IT TO ETHICS INCLUDING THE QUESTION OR SUBJECT WHICH ROCK SLAMMED, PHRASED EXACTLY. (HCOB 10 Aug 76R, Rev 5 Sep 78, R/Ses, WHAT THEY MEAN.)

As the R/S is probably the single most important and dangerous read on the meter, it is important that they are carefully noted when doing a Confessional.

For a pc to be branded as an R/Ser is a very serious thing. Also for a real R/Ser to be overlooked by an auditor is a catastrophe both to the pc and to those around that particular person. (Ref: HCOB 24 Jan 77, TECH CORRECTION ROUND-UP.)

Valid R/Ses are not always instant reads. An R/S can read prior or latently. (HCOB 3 Sep 78, URGENT, URGENT, URGENT, DEFINITION OF A ROCK SLAM.)

21. If you want a pc to stop fiddling with the cans you make them put their hands on the table and keep them there.
22. HCO or executives may request a Confessional be done but neither Tech nor Qual are bound by such requests as an FES could reveal that the trouble stems from "out-lists" or other matters needing correction. They should however take cognizance of such requests and do all possible to get the person handled.
23. If a reading question does not go to F/N and bogs or the TA goes high, take up an LCRC (Confessional Repair List, BTB 8 Dec 72RC), assess and handle per instructions.
24. End off any Confessional session and the entire Confessional itself, when complete, with the rudiments which would pick up anything which might have been missed: Half Truth, Untruth, Missed Withhold, Told All, etc. Use the prefix "In this session . . ." or "In this Confessional . . .". Take any reading rudiment E/S as needed to F/N.
25. When the Confessional is fully completed, the auditor who has administered the Confessional informs the person he is forgiven for the overts and withholds he has just confessed, using the following statement:

"By the power invested in me, any overts and withholds you have fully and truthfully told me are forgiven by Scientologists."

The usual response of the pc is instant relief and VGIs. On any adverse reaction to the Proclamation of Forgiveness, get the rest of the withhold or repair the Confessional session at once.

(Ref: HCOB 10 Nov 78 R. PROCLAMATION: POWER TO FORGIVE HCOB 10 Nov 78R-1, Addition of 26 Nov 78, PROCLAMATION: POWER TO FORGIVE—ADDITION.)

26. All worksheets are routed to Tech Services so they can be included in the person's pc folder. (Ref: HCOB 28 Oct 76, C/S Series 98, AUDITING FOLDERS, OMISSIONS IN COMPLETENESS.)
27. EXAMINER. All Confessionals must be followed immediately by a standard pc examination. The folder is then routed to the C/S.

The C/S looks for any nonsequitur F/N on some other subject. It's the primary thing he inspects.

If a person falls on his head after a Confessional session an LCRC is given. However, an FES to find missing questions that F/Ned on something else is done. Standard C/S rules apply to Confessionals.

28. On any bad Exam Report (non-F/N, BIs or nonoptimum statement) after a Confessional, or on any person who gets sick or upset or does not do well or has a high or low TA, give an LCRC as the very next action.

The 24-hour red tag rule must be strictly enforced.

#### AUDITOR ATTITUDE AND TRs

If the pc is not *in session* you won't get the withholds. TRs play a large part in the pc being willing to talk to the auditor. A wrong or challenging auditor attitude can throw the scene off as there is a destroyed comm cycle. If TRs are rough or choppy the pc feels he's being accused.

A poor or comm lag TR 2, hidden from the view of the C/S, can also mess up a person in a Confessional. It invalidates his answers and makes him feel he hasn't gotten it off. If suspected, this could be checked by D of P interview or person to the Examiner for: "What did the auditor do?" (Also see HCOB 16 Aug 71R Iss II, Rev 5 Jul 78, TRAINING DRILLS REMODERNIZED.)

So TRs must be polished and the auditor, while maintaining good ethics presence, takes the role of confessor when handling the pc's answers and makes it safe for the pc to get off his overts and withholds. Similarly, an auditor who is certain of his tech and does not miss withholds will build the pc's confidence in him.

Anyone doing a Confessional should be fully trained and interned by doing a course and internship in the handling of Confessionals.

You had better determine to become an expert in it, since an auditor's inability to handle this is a fast route to "how to win enemies and wrongly influence people." (HCOB 24 Jan 77, TECH CORRECTION ROUND-UP.)

But even more important is the fact that, in knowing and applying Confessional tech correctly, you are helping the individual to face up to his responsibilities in his group and the society and putting him back into communication with his fellow man, his family, and the world at large.

# WHAT IS SCIENTOLOGY?

based on  
the works  
of

L. Ron Hubbard

Published

December 1978

An encyclopedia is terrific and can answer some questions about the world. But *What Is Scientology?* is more important. It answers questions about the organization of life and death and gives the real answers to the questions people ask.

*What Is Scientology?* contains the most extensive collection of information ever published about Scientology and Scientologists. It is a data-packed, fact-packed book about the fastest growing religion in the world today: its Founder, its history, its tenets, its structure and doctrines, its training and counseling, its effectiveness, its victories, its future and much, much more.

It's all here: the statistics, addresses, dates, what, who, when and how.

464 pages, 137 color photos and paintings, many charts, graphs and documents, full index and glossary, hundreds of thousands of words, all in a big 8 1/2 by 11 inch hardcover book, beautifully printed and bound on top quality paper complete with dust jacket. Available from your nearest Scientology Organization or Mission or direct from the publishers: Church of Scientology Publications Organization U.S., 4833 Fountain Ave., East Annex, Los Angeles, California 90029, U.S.A.; or Scientology Publications Organization, Store Kongensgade 55, 1264 Copenhagen K, Denmark.

**PROGRAMMING THE DIANETIC CLEAR  
FOR HIS NEXT STEP**

(Ref: HCOB 24 Sept 78, Iss III,  
DIANETIC CLEAR)

The following are the guidelines for programming a Dianetic Clear after he has attested and the state has been declared:

1. If a Dianetic Clear has had no previous auditing on Grades 0-IV, you can run him on Quad Grades 0-IV. You omit the R3RA step of service facs. (Ref: HCOB 6 Sept 78, Iss III, ROUTINE THREE SC-A, FULL SERVICE FACSIMILE HANDLING UPDATED WITH NEW ERA DIANETICS.)
2. If a Dianetic Clear was incomplete on Grades 0-IV prior to the Dianetic Clear attest (i.e. mid-grades), you would complete the unrun grades (Quad or Expanded) through to Grade IV (omitting the R3RA steps on Service Facs).

If a pc goes Clear on a grade then you can give him the other grades, but you'd end off *that* grade and not continue it.

3. If a Dianetic Clear has previously completed Grades 0-IV, he can go directly onto the Solo Audit Course and OT 1.
4. If a Dianetic Clear is an old-timer who has had a lot of pre-grades Scientology processes run (before formal grades existed). you would not run Grades 0-IV after Dianetic Clear attest. He can be routed onto the Solo Audit Course and OT 1.

The Dianetic Clear is not run on Power, R6EW or the Clearing Course.

**IMPORTANT—NEW RUNDOWN**

There is even an alternate step to Power specially designed for Dianetic Clears called "Super Power" which will shortly be available in Saint Hills.

AND NOTE: Power Processing is still very valid and a vital step on the Bridge for those persons not Dianetic Clear.

**UNREADING FLOWS**

References:	HCOB 5 Aug 78	INSTANT READS
	HCOB 25 May 62	E-METER INSTANT READS
	HCOB 28 Feb 71	C/S Series 24 METERING READING ITEMS
	HCOB 8 Jun 61	E-METER WATCH ING
	HCOB 27 May 70R	UNREADING QUESTIONS AND ITEMS
	Rev 3.12.78	

EACH FLOW OF AN ITEM OR QUESTION IS CHECKED FOR A READ BEFORE RUNNING IT. UNREADING FLOWS ARE NOT RUN.

One of the governing laws of auditing is that you don't run unreading items. It doesn't matter what you are auditing. You don't run unreading items. And you don't run unreading flows. You don't run an unreading anything. Ever. For any reason.

Auditing is aimed at reactivity. You run what reacts on the meter *because* it reacts and is therefore part of the reactive mind. A read means there is charge present and available to run. Running *reading* items, flows and questions is the only way to make a pc better. This is our purpose in auditing. To run unreading flows, etc. requires the pc to run "analytical" answers or to "run" things that aren't there or to put something there to "run."

The most trouble you can get a pc into is running him on uncharged items or flows. For an auditor to sit in session watching a meter that didn't read, looking expectantly at the pc for an answer to an uncharged question, flow or item is a GAE and will wreck cases faster than anything you can do.

So you must check questions, flows or items before running anything. If it doesn't read you just say "Thank you" and go on to the next one. You would, of course, use the buttons to ensure nothing was suppressed! invalidated or misunderstood before leaving an unreading item, flow or question.

This is probably one of the reasons that it has been observed that I can audit a pc for 2/2 hours and get the same result that another auditor might get in 25 hours. There's nothing mysterious about it. I never run a pc on things that aren't charged. And I don't miss reads.

I expect no less from you.

**HOW TO READ THROUGH AN F/N**

(Ref: HCOB 15 Oct 73RB, C/S Series 87RB,  
NULLING AND F/NING PREPARED LISTS)

**WHEN TAKING A LIST TO F/NING ASSESSMENT AN AUDITOR MUST  
KNOW HOW TO READ THROUGH AN F/N.**

This is a skill that, up to this point, has been used routinely only by highly trained auditors or a few very sharp Class IIIs or IVs or above. But with the difficulty auditors have had in F/Ning prepared lists, it becomes obvious that, from Class III on up, all auditors should be trained to read the meter through an F/N.

It is the answer to almost any difficulty an auditor has had in taking a list to F/Ning assessment.

An F/N speeds up or slows down or does different things while still remaining an F/N and one *can* read through it.

It is done like this: The swinging weight of the needle (F/Ning from an earlier item) has momentum and it will tend to obscure the read on another item. It will almost obscure it, but not quite. You'll see the F/N "check" or slow up briefly and then continue and this means you have a hot item. Any item that would cause an F/N to "check" will be hot. The auditor who can read through an F/N will spot this and handle the item then and there. Then he continues on down the list, missing nothing, handling what is there to be handled and, with this skilled metering, takes it to a genuinely F/Ning list on assessment. And it doesn't take days or even several sessions, necessarily, to do it.

If an auditor can't read through an F/N he'll miss this. He's going down the list, the F/N "checks" or slows and he doesn't see it so he goes right on by it. Then, within the next couple of items the F/N kills. He's going to have a hard time F/Ning that list because he's now got a suppressed read.

Example:

Auditor in assessing starts with an F/N which continues as he goes on down the list calling the items. On, say, item 5 the F/N "checks" or slows briefly. Auditor can't read through an F/N so he misses this and goes on by. On about the 6th or 7th item the F/N packs up, and the auditor is in a quandary because the F/N has turned off but he didn't get a read on items 6 or 7 either. Or he may mis-duplicate the killed F/N as a read on items 6 or 7 and attempt to take up one or the other of them. Either way he's in for trouble because he's missed the actual item and he may even try to handle a wrong item. He's going to find it difficult to take that list to an F/Ning assessment.

The correct action when an F/N packs up this way is to go back up the list and reassess the last several items to find the missed read. But one should be able to read through an F/N.

Probably the main reason for pc upset or protest against "overrepair" and being handled again and again with repair lists lies in this factor alone—the auditor can't read through an F/N. Thus he misses the charged items and takes up items that are

uncharged. And the repair goes on interminably, as the charged lines are not found and handled.

This is also probably the reason that auditors have been known to back off from having to F/N a list. They “know” from experience that it is a laborious business.

The truth is it’s not necessary for an auditor to labor over taking a list to F/Ning assessment. It simply requires good TRs and skilled metering, including the ability to read through F/Ns.

An auditor can be trained to see a read through an F/N. The drill would be to sit him down in front of a meter with an F/Ning student on the cans and assess the prepared lists in *The Book of E-Meter Drills*, spotting each time he gets a “check” or a “slow” or any change in an otherwise continuing F/N. He’ll find that he *can* read through an F/N and become very adept at this, and from then on he won’t miss.

You’ll have an auditor who is confident of his ability to F/N a list accurately and thoroughly in one-half the time (and trauma) it would take otherwise.

And far fewer “overrepaired” pcs. (“Overrepaired” pcs are usually pcs with actual reads missed and false reads taken up. So “overrepair” is really “misrepaired” or “not repaired.”)

This is metering at its best and most accurate. We now expect the best and most accurate metering from the auditor who is in the business of F/Ning prepared lists.

**HCO DIANETIC CLEAR ATTESTS—ADDITIONAL DATA**

(Ref: HCOB 29 Nov 78    C/S Series 104  
                                  DIANETIC CLEAR  
                                  ATTESTS

HCOB 1 Dec 78    PROGRAMMING THE  
                                  DIANETIC CLEAR  
                                  FOR HIS NEXT STEP)

Since the HCOBs on Dianetic Clear have come out there have been many attestations and many cases unbugged, and there will continue to be more Dianetic Clears as pcs continue to get standard processing. This bulletin gives some additional guidelines to help smooth the lines and prevent needless stops for the person who has made Dianetic Clear. It will also help handle the person who hasn't made it so that he may achieve all the gains available to him.

**UNACKNOWLEDGED DIANETIC CLEARS**

A person who has reached the state of Dianetic Clear without it being acknowledged can run into difficulties afterwards. You may find that he's been in ethics trouble or had a low OCA or poor case gain since that point.

It's not only lack of acknowledgement but also invalidation by running certain processes that a Clear wouldn't respond to, such as engrams, or continuing to run the grades, or continuing Goals Processing, etc.

Also, with Clears and OTs who went Clear before they did the Clearing Course and never knew it or spotted it, bypassed charge results because they are running something which is trying to achieve what they have already achieved. It serves as an overrun .

In the case where a pc has this unacknowledged, invalidated Dianetic Clear state, you would most likely find a point in his auditing where it looks as if he had made it and a slump occurred afterwards. This point could have occurred many years back. If you don't see a resurgence of the state in an interview or session when the pc mentions when he went Dianetic Clear, the C/S would be to Date/Locate it. (Ref: HCOB 15 Nov 78, DATING AND LOCATING.)

**ETHICS**

The fact that a person may currently be in ethics trouble is no basis on which to adjudicate whether or not he has achieved the state of Clear. It is not a criterion to be used to refuse to allow the person to attest. Clear is Clear. When a Clear is audited on R3RA, when the state is invalidated or goes unacknowledged, he can get into trouble. So apply this to your understanding and analysis of cases.

The MAA interview and A to J check on the Dianetic Clear Routing Form is not to imply he's out-ethics but will furnish the C/S with data on the case which may or may not come up in a D of P interview. It will also detect the rare case where the person is attempting to attest in order to save money or for status reasons. In one instance it was discovered that the person routing through was actually a plant. These last examples are a very, very small percentage of the cases.

## METER PHENOMENA

When the state of Dianetic Clear has been acknowledged and any inval cleaned off the line, you'll see a very floppy needle at low sensitivity, an F/N that nothing can break up and, in many cases, a floating TA. A low sensitivity setting (1 to 4) will be needed to even keep the needle on the dial, and the TA will be riding between 2.0 and 3.0.

You'll find in many cases that the meter now reads on the pc's postulates—i.e., a Clear's postulates read as a surge. A read therefore does not mean invariably "Yes" or that the question is charged. "No" can read if the pc says it or thinks it to himself as an answer to a question. (Ref: HCOB 18 April 68, NEEDLE REACTIONS ABOVE GRADE IV.)

Bear in mind that you might not get the above meter phenomena immediately on a Dianetic Clear where the state has been bypassed, even though the state is valid.

In some cases the TA and needle can be packed up prior to Date/Locate of the exact time the pc went Clear. The pc may have out-Int to be handled. (The handling of out-Int on a Dianetic Clear is the END OF ENDLESS INT REPAIR RD, HCOB 24 Sep 78R, Rev. 21 Nov 78, Iss 1, Int RD Series 4R.) The person may still be hung up on misrun R3R or Dianetics run after he went Clear, or on some point of eval or inval that has occurred.

If, after a Date/Locate has been correctly done, you're still not getting the expected meter phenomena, a C/S 53RL assessed and handled precisely by the book and taken to F/Ning assessment will clean up any remaining charge.

You'll then see a full resurgence of the state, with the pc VVVGIs, a floating, floppy needle at low sensitivity, and a floating TA.

### PRIOR DIANETIC CLEARS AND KEYED-OUT CLEARS

The definitions of Dianetic Clear and Keyed-Out Clear in HCOB 24 Sep 78, Iss III, DIANETIC CLEAR, replace the definitions in the Tech Dictionary. The person who attested to Dianetic Clear or Keyed-Out Clear in past years would not necessarily qualify as a Dianetic Clear now, though the chances are good he did make it. Any pc who has attested to Dianetic Clear or Keyed-Out Clear in the past should be called in for an interview and any necessary C/Sing to ascertain the state. This must be adjudicated by an AO C/S or by an org C/S who is Clear.

You will find that many of those who attested to Dianetic Clear earlier on actually did make it, and after confirmation of this they will need to be issued Clear certs and Clear numbers and be properly programmed to move on up the Bridge. (See HCOB 1 Dec 78, PROGRAMMING THE DIANETIC CLEAR FOR HIS NEXT STEP.)

Additionally, where the C/S knows of a case where it looks very likely, from folder study, that the pc went Dianetic Clear but it was unsuspected at the time and never originated, he should have such pcs also called in for confirmation.

### THE PERSON WHO HASN'T MADE IT

Where it is obvious that a person who has already been allowed to attest hasn't attained Dianetic Clear. give the pc a good R-Factor that the person handling the attest cycle didn't have all the data. He must also be given the R-Factor that he is being programmed so as not to be denied any of the gains on the Grade Chart and so that he will be adequately prepared to do the OT levels. The C/S then programs the case so that this can occur and the pc is informed he should continue with his auditing program.

In the case where the person wanting to attest clearly hasn't made it, you tell him so. There may be some state he did achieve that he may wish to attest to and he should be allowed to do so.

In both the above cases the person very likely has made some big gain or achieved a new ability, so validate that and give him an appropriate acknowledgement on his win .

#### NEXT STEP FOR DIANETIC CLEARS

Use HCOB 1 Dec 78, PROGRAMMING THE DIANETIC CLEAR FOR HIS NEXT STEP, as a guide when programming the Dianetic Clear for his next action.

#### SUMMARY

Keep in mind that a good percentage of the cases you see who by origination want to attest to Dianetic Clear will have achieved the state. If you follow these guidelines and apply the HCOBs on the subject, both those who have attained Dianetic Clear and those who haven't will be able to move on swiftly up the Bridge on the right gradient .

C/Ses should maintain their Ivory Towers and use the above data and all will go well in this area. It is already going well and this additional data will handle the various situations that have come to light.

**REVIVIFICATION**

Revivification is the bringing back to life of an engram in which a preclear is stuck. The engram or some portion thereof is being acted out in present time by the preclear. It is called a revivification because the engram is suddenly more real to the preclear than present time has ever been. He relives that moment briefly. He does not merely recall or remember it.

This is not the same thing as the "returning" to an incident or engram that is employed in Dianetic auditing. *Return* is the method of retaining the body and the awareness of the subject in present time while he is told to go back to a certain incident. *Revivification* is the reliving of an incident or a portion of it as if it were happening *now*.

This phenomenon can occur in a pc during the End of Endless Int Repair Run-down. (Ref: HCOB 24 Sep 78R, Iss 1, Int RD Series 4R, THE END OF ENDLESS INT REPAIR RUNDOWN.)

The pc, being run on Recalls on Int, will often begin by recalling locks but these can trigger into full play an engram in which he may be stuck and the pc may go into a revivification of it. He will actually be answering and acting from the point or points down the track where he has been stuck.

Should this happen the auditor simply continues to run the process and get the pc through it. As the pc revivifies he blows through these stuck points on his track and comes out of them, newly, and is now truly in present time.

As revivification is apt to occur on the End of Endless Int Repair, auditors must understand and be able to recognize the phenomena and handle it routinely with excellent TRs when it does.

**GREEN FORM AND  
EXPANDED GREEN FORM 40RD,  
USE OF**

**GREEN FORM**

The Green Form is a precision tool which covers the things bugging a case that no other list will detect. It is not intended to correct session errors or cure high or low TA. It specializes in picking up the peculiarities and elements of a pc's life which are out of view in normal auditing and which cause a case to behave unusually. The case may not be particularly resistive, just bugged or not making sense and the Green Form is the list to use to sort it out. It is an excellent C/S tool for getting an estimate of a case and getting it untangled.

You can assess it Method 3 and handle, not going beyond the first F/N, when ruds won't fly at the start of session, but its real use is to assess Method 5 and then send to the C/S for programming.

If the case appears to be resistive or hasn't sorted out after a full handling of all reading items has been done on the Green Form, then the No. 40 question, called the Resistive Cases Assessment, is assessed Method 5.

**RESISTIVE CASES**

Each item on the Resistive Cases Assessment has a corresponding section on the Expanded Green Form 40RD. When an item reads on the Resistive Cases Assessment, you go to the section of the Expanded Green Form 40RD which corresponds (by letter) and assess Method 5 that section.

You assess one section of the Expanded Green Form 40RD for each Resistive Cases Assessment item that reads. For example, on the Resistive Cases Assessment, Item C "Audited With Ruds Out" and Item 1-2 "Has Taken Drugs" read. The auditor will now go to the Expanded Green Form 40RD, assess all of Section C "Audited With Ruds Out" and all of Section I "Has Taken Drugs."

Then, depending on C/S instructions, the auditor will 1) return the folder to the C/S for programming of the case based on the reads he has just gotten or, if he has C/S okay, 2) handle the reads per the instructions given for each reading question.

**HANDLING READS**

The sections of the Expanded Green Form 40RD have been arranged in the order in which they are to be taken up if reading.

Occasionally an item may read on the Resistive Cases Assessment, but give no reads on the assessment of the appropriate section of the EXGF 40RD. (Example: Section G "Seriously Physically Ill" reads on the Resistive Cases Assessment, but when the auditor assesses Section G on the EXGF 40RD, even after putting in the

buttons, there are no reads.) If this occurs, check False and Protest and take the item to an F/N.

### CLEARs, OTs AND DIANETIC CLEARs

The Green Form and especially the Expanded Green Form 40RD call for Dianetic handlings (R3RA) on many items. In using these lists on someone who is Clear, OT or Dianetic Clear, *NO* Dianetic handlings are done on any items, nor is *ant* activity to be engaged in which brings about further engram running.

Where Dianetic handlings are called for on items, there are given additional, special handlings for Clears, OTs and Dianetic Clears, which consist of indicating the bypassed charge, letting the person tell you about it if he wishes and indicating the F/N.

This, of course, cannot be considered a full handling for many items and the Clear, OT or Dianetic Clear should be programmed for NED for OTs as soon as possible to fully handle any areas of case which, due to his case state, are beyond the scope of New Era Dianetics.

### DRUGS

If unhandled drugs are reading, drugs must be fully handled with the NED Drug Rundown as soon as the EXGF 40RD is complete.

If a Clear, OT or Dianetic Clear is being a resistive case due to unhandled drugs. the answer is to program the person for a Sweat Program and even Objectives. (You do not run engrams.) The Sweat Program and Objectives will handle drugs where they are hanging up a Clear, OT or Dianetic Clear.

### END PHENOMENA

Otherwise. unless you have missed a read, you will have handled the resistiveness of the pc's case upon completion of the EXGF 40RD.

The Green Form, used by itself, or with the EXGF 40RD will solve cases that no other list will handle. They will get a pc winning who has been making no or slow case gains due to some peculiarity or element of his life or case, and they will do this faster and more easily than ever before.

*(Revisions in this type style)*

**PC SET-UPS AND C/S 53**

*(Ref: C/S Series 1- 10)*

The original issue of this HCOB stated "A pc set-up before a major action must include a C/S 53RL to F/Ning list." *It then named various Flag-only rundowns. It was not intended for distribution to orgs outside Flag, and has been misimplemented to create a shortage of pus for NED Course students and internes and Class IV Course students and interned by requiring that these must not audit pcs who have not first had a C/S 53 to F/Ning list. But every major action does not require a C/S 53 to F/Ning list as a set-up. Therefore this clarification is issued.*

A pa must be set up before a major action. What this set-up consists of is covered in C/S Series 1 - 10. It does not have to include a C/S 53 to F/Ning list.

A C/S 53 to F/Ning list is the most thorough way to set up a case, or to repair a case who has had rough auditing. This is because the C/S 53 is a masterpiece in that it contains everything that could be wrong with the mind. A pc who has had much auditing, especially if any of the auditing was not skillfully delivered, will get a remarkable case resurgence from a C/S 53 done to F/Ning list.

But a pa who is already flying, or who has not had much auditing, does not require a C/S 53 to F/Ning list and possibly would not even understand many of the C/S 53 lines. It does not have to be done before every major action. To do so would violate the rules of C/Sing and programming of cases, and is an arbitrary. It is very poor show to enter or use arbitraries as these prevent getting any tech done at all! And not requiring a C/S 53 to F/Ning list does not mean that you can audit a pc who is not set up.

Follow the rules of programming and C/Sing cases already very adequately covered in the C/S Series, especially in C/S Series 1 - 10. It is very easy to do.

### RON'S JOURNAL 30

#### 1978—THE YEAR OF LIGHTNING FAST NEW TECH

Hello.

I have some exciting news about services.

Processing has gotten so fast that actually clearing whole areas is in view.

1978 was indeed the year of tech breakthroughs!

If processing had to get more expensive due to inflation, why then it had to be made much quicker and better. Actually processing costs today per result are much cheaper than ever before and will continue to be as the improvements have been so great.

It all began with New Era Dianetics. When I look back and remember the hundreds and even thousands of hours some people spent on Book One Dianetics, it's like an old story half-remembered. If one of those 1950 auditors had the tools of NED they would have been bug-eyed at its fast results. Even the 1968 Dianetic auditor would have been incredulous if his preclears had responded with the speed that NED pcs are achieving. It's probably about 100 to 1.

But, the 1950-1968 auditors as auditors might even have objected a little bit to NED as it would have run them out of pcs. The overall cost of 1950-1977 processing, despite being cheaper per hour, was *much* more expensive.

Take a Drug Rundown. These used to go on for hundreds of hours and somebody said they would have cost many thousands of dollars to complete. But with NED Drug Rundowns, they go off zip, zip, zip in one or two intensives.

NED is so fast that even an incomplete old DRD can be finished up and repaired and ended utterly in less than one intensive. You would be amazed how fast and thorough it is. So it isn't the cost by hour or by intensive; it's how much the whole rundown costs that counts and if it can be given in far fewer hours it is cheaper no matter the cost per hour.

NED is cleaning up anything and everything Book One ever mentioned with lightning speed. Of course, when somebody goes Dianetic Clear, he can't be run on more engrams. right? Right! So it's forbidden now to run NED on Dianetic Clears.

The main problem of good auditors today is hitting such tremendous wins on pcs that they have to wait 2 or 3 days for the F/N to die down—if it does. Auditors are getting sore legs from just walking in and out of sessions. It's awful.

We are making Clears these days in many cases so fast that Clearing Course bracelet numbers are jumping up by the thousands per month. We are also finding that some old Dianetic pcs had gone Clear and the auditors didn't notice. Incredibly enough, sometimes on a next life basis we are running into Dianetic Clears from 1949 and '50 so even those auditors were better than they thought they were. So we're not only making new ones we're finding old ones—such is the power of NED.

There have been technical improvements and discoveries and advances in '78 that are reaching into every level of tech and speeding it up.

The following is just a partial list:

(Key:

\* means the action can be done on a non-Clear or on a Dianetic Clear.

\*\* means the action is for OT III and above only.

† means it is a *new* rundown/action.)

#### DISCOVERIES AND ADVANCEMENTS IN TECH IN 1978

1. *NED*. (New Era Dianetics). A refinement of all previous Dianetic techniques from 1950 up to present time as well as the development of new technique giving much faster results and far higher gain per hour of auditing and speedy resolution of Dianetic cases.

Included in NED are twelve brand new developments. They are all contained in far more detail in the NED HCOBs and packs. Due to the extensive changes and improvements in Dianetics, old Dianetic auditors are also training on the NED Course as it only takes 3 weeks for the able student.

A. *PREASSESSMENT*. With the new preassessment tech developed for NED, each illness or condition the pc needs and wants handled gets handled with a new technique.

B. *NEW DRUG RUNDOWN*. This is the answer to a druggie's dreams. Without withdrawal symptoms and in a no pain, no strain rocket ride, he comes right back up to life and living.

Where the old DRD took hundreds of hours and sometimes had to be repeated, the NED DRD requires only a few intensives that are a joy all the way according to the avalanches of success stories which poured in on me from over the world during the pilots.

With a good NED trained auditor, the cost of a final, finished, completed Drug Rundown has shrunk way below what it did and far below the habit. The Mafia, Drug Enforcement Agency and other criminals hate it, as it's doing them out of a job. Enlightened foreign governments liked Narconon but boy they'll love it now. Indeed, the dead will walk again.

C. *END OF ENDLESS DRUG RUNDOWNS REPAIR LIST*. A lot of people who have had Drug Rundowns old style and have had to have them repeated will be overjoyed to know that they can be finished with rapidity. In fact with new developments, a repair list can be finished off so fast that the rundown has to be sold on the basis of one intensive. This applies only to getting a C/S 53 and the repair list and is done only on those people who have "completed" an old Drug Rundown and does not apply to the

NED new rundown in Section B above. If it takes more, that's too bad for the org. If one wants to get his old Drug Rundown handled terminatedly he should ask for the End of Endless DRD Repair List. (Demand a "C/S 53" to begin it and then get the repair.)

D. *OBJECTIVE ARC*. This brand new process introduces the pc to the wide, bright world .

E. *SWEAT PROGRAM*. Some of these new drugs, like the intelligence drug, LSD (developed to poison and paralyze whole cities) or Angel Dust (developed by crooked gamblers to handle race horses and fix races) have a nasty habit of remaining in the body and popping up unexpectedly to send people on "trips." The Sweat Program has been refined to handle this. It is pretty strenuous—but so is a traffic accident when an unexpected "trip" happens. Everyone who has had the courage to go on a Sweat Program and stay with it has come up bright as a gold nugget.

F. *POSTULATE OFF AS THE EP OF A DIANETIC CHAIN*. The discovery that some old Dianetic auditors had not been actually completing a chain to the correct end phenomena of getting a postulate off opened the door to a lot of residual gain. Pcs with mean reputations keep right on being mean until they get the postulate off.

G. *RELIEF RUNDOWN*. This handles the losses that push people into the despair and shadows of life and wipes away the tears of the ages.

H. *DIANETIC STUDENT RESCUE INTENSIVE*. Those who find study difficult will be delighted with this one. The slow student turns into a blur of absorbed new knowledge .

I. *PREPARED ASSESSMENT FORM*. This NED process list dredges up the unwanted conditions that wait in the future so they can be handled before they hit the pc.

J. *IDENTITY RUNDOWN*. Freud said that people who are detached and to whom things are unreal could never be handled. This one makes him wrong and the pc right.

K. *DISABILITY RUNDOWN*. To a pc, disability can take many guises, anything from an inability to talk to girls to being unable to speak Arabic. We have a way to handle this now and it works.

L. *DIANETIC REMEDIES*. The Dianetic remedies formerly in use in Dianetics have been refined and expanded with New Era Dianetics tech. They're used where the pc is having trouble with secondaries or engrams and speed up the already swift potentials of NED for the pc who might bog on it.

2. *SUPER POWER*. A super fantastic, but confidential series of rundowns that can be done on anyone whether Dianetic Clear or not that puts the person into fantastic shape unleashing the super power of a thetan. This is the means that puts Scientologists into a new realm of ability enabling them to create the New World. It puts world Clearing within reach in the future. This is a parallel rundown to Power in Saint Hills which is taken by the Dianetic Clear. It consists of 12 *separate high power rundowns* which are brand new and enter realms of the tech never before approached. Power is still very much in use on the Grade Chart but is for those who didn't go Clear on Dianetics. Super Power will be delivered at Saint Hills within the next 6 weeks as we are right now super grooming the Super Power auditors in a special international course. It will be delivered in almost all languages.

The New World Corps is being formed and trained this very minute, candidates for which must be Class IV, OT IIIs. Orgs were once promised Power for their staffs.

If org staff are very, very good and get on policy and everything. they will one day look up and see a New World Corps team move in on them, and then.... New World Corps mean just that!

3. *END OF ENDLESS INT REPAIR*. Pcs in the past have often had to have their Interiorization Rundown repaired and sometimes more than once. This repair, found while researching upper levels finalizes any seemingly endless redo of interiorization repairs. Pcs on the pilot actions of this have been ecstatic with relief.

4. *NEW INTERIORIZATION RUNDOWN*. When a pc exteriorizes during processing, he can thereafter find it difficult to exteriorize again—to put it mildly. The new Interiorization Rundown, in good hands, puts a final finish to any such trouble and the pc ceases to have any trouble because of exteriorization or in exteriorizing.

5. *DIANETIC CLEARS*. Undoubtedly the BIG news that resounded around the world in '78 was the huge numbers of people who were discovered to have made Dianetic Clear. In 1950 and on, people used to ask “Where are all the Clears?” Well, they were right there! In 1978 I discovered that it was deadly to go on running Dianetics on a Dianetic Clear. Such gave the semblance of no case gain! (Naturally.) So when I announced that running Dianetics on a Dianetic Clear was forbidden, people began to look around and lo and behold they had been making Clears with Dianetics and had been going right on by it! The pc who had made it wasn't declared Clear and further Dianetics didn't work on him (naturally). So in 1978, after my announcement, auditors began to check *and* listen to the pc and found they had real Clears all over the place!

Now NED produces far faster gains and many (not all) NED pcs began to go Clear .

And the Clear numbers have been running up like one of those computers.

Rehabbed and allowed to declare these Dianetic Clears abruptly attained the full results of Clear!

Excited avalanches of success stories have been pouring in on me for months in the thousands and from all over the world.

And it's interesting that amongst those found there are a few who went Clear on Dianetics in their last life—in the 50's! (It's quite a scramble locating their last life folder and records so they can go on to full OT!)

“Where are the Clears?” There they were!

6. *REDEFINITION OF INSTANT READ*. Making it easier for auditors to learn metering and giving pcs vastly increased speed of gains due to higher accuracy of metering .

7. *CLARIFICATION OF CONFESSIONAL PROCEDURE*. Resulting in faster gain in a shorter period of time.

8. *SERVICE FACSIMILES REVISITED*. The early 60's handling of service facs was revised and overhauled and became the new Grade IV of Scientology processing.

9. *POWER TO FORGIVE*. Making it possible for the pc to fully end cycle on any shame, blame, regret or guilt of the past.

\*\* 10. *NED FOR OTs*. The discovery and development of techniques by which the Second Wall of Fire can be overcome.

This consists of 29 fantastic new confidential rundowns, delivered by a specially trained OT auditor.

The auditors are in training right now from AOs to give NED for OTs to all those who are OT III and auditors already trained on it are delivering it at Flag in Flag's new Advanced Org Division 4A.

Some of the miracles of life have been exposed to full view for the first time ever in NED for OTs. The rave success stories coming from this are the talk of the auditing world.

\*\* 11. *OT VIII*. This rundown was developed and will be available to OT VIIs who have completed their NED for OTs which is a prerequisite for OT VIII.

12. *UPPER LEVELS*. There are other OT levels above VIII but these will be released from time to time when people are ready for them. We're already higher than Man has ever been and it can get quite stratospheric.

## TRAINING

In 1978 giant training strides were made for I was very busy on that as well. The NED Course was brought down to 3 weeks, Class 0-4 Checksheets were carefully shortened back to the 1968 level when auditors were being made at speed but without losing tech which is quite a trick when you come to think of it!

When you realize that a large portion of training costs goes into living expenses while taking the course, reducing the length of time of a course gives an enormous reduction in course costs. regardless of what's being charged. Training is also being helped by scholarships.

## CLASS IV AUDITING ACTIONS THAT CAN BE RUN

Class IV Orgs—those orgs which are in major cities on 5 continents—have a large variety of public services which they can give. Many of these are very economical and are there for the raw public as well as to keep their fields getting service. Amongst them are the following:

1. *GROUP PROCESSING*. After an Intro Lecture a successful gradient for raw public is being part of a group who are audited simultaneously. Group Processing can be pretty effective and on a large number of "releases attained" you will find the public reporting great gains made in group auditing. It is an economical way to keep one going even after he's had professional processing.

2. *CO-AUDIT*. (*Cooperative Auditing*). A public person is instructed in the rudiments of auditing and under the supervision of a trained auditor, groups of teams audit each other, attaining good gains.

†3. *LIVINGNESS REPAIR*. This is often the first action taken on a person by a professional auditor and can bring a great deal of brightness back into his life.

†4. *NED*. (*New Era Dianetics*). This was the bombshell of '78 and NED auditors (as well as courses) are available in every org.

NED consists of at least 12 separate rundowns as noted in the New Discovery section above. It occasionally makes a Dianetic Clear although this must not be promised. The only "trouble" with NED compared to earlier Dianetics is that it produces results very fast. One can achieve more result per hour of auditing time by about 100 to 1 over old Dianetics and when you realize that old Dianetics was the first and remains the only fast and effective processing known to Man you get some idea of where NED is at. It is interesting that when somebody has been skillfully mucking himself up for trillions and trillions of years that a NED auditor can salvage him in under 100 hours!

† 5. *XDN*. (*Expanded Dianetics*). In '78 improvements on this were undertaken and the full new Expanded Dianetics is being released in '79. It comprises very specialized applications of Dianetics for the more difficult case.

\* 6. *QUAD GRADES AND EXPANDED GRADES 0-IV*. These are more fully covered in the book *What is Scientology?* They are the wonder workers which put ability to live back into life. They handle the basics of relationships amongst people and improve one's ability to handle himself and others. For Dianetic Clears, this is usually their first auditing (less the engram running R3RA part of New Grade IV) after attaining Clear and permits them to expand beyond their previously barriered existence. These grades are very far from limited to Clears.

† 7. *NEW GRADE IV*. Grade IV has been improved enormously by including and refining formerly Class VI materials. The engram running part cannot be run on Clears but the listing processes can. It is guaranteed to make the preclear fully and completely right.

† 8. *REVISED C/S 53*. It is quite a technical achievement to put on one side of one sheet of paper everything that can be wrong with a mind. The "C/S" stands for Case Supervisor who is the one, unseen in some Ivory Tower, who tells the auditor exactly what to do between sessions when you're getting audited. This is a primary tool he uses in analysis. In '78 it was polished up and made as bright as the morning star to detect and handle things you didn't even know were wrong but which might have you totally caved in.

† 9. *GREEN FORM*. This tool of case analysis has been improved.

† 10. *NEW GREEN FORM 4() EXPANDED*. This detects and handles any reason why a case might be resistive to processing, thus handling any tendency towards slow gain and making it possible for such cases to make faster gains in future processing.

†\* 11. *STUDY GREEN FORM*. This is a rundown which isolates and handles anything that could be wrong with any student or pupil.

\* 12. *STUDENT CORRECTION LIST*. This handles difficulties that a student or pupil may have encountered in his studies and frees him up from these. so that he can now study easily.

\* 13. *NEW METHOD ONE WORD CLEARING*. This is far more reaching in clearing up past misunderstands which stuck the person in previously failed subjects he studied .

14. *CONDITIONS AND EXCHANGE BY DYNAMICS*. This is an auditing action which increases the awareness of exchange and flows on the various dynamics, enabling a person to be at cause over them.

†\* 15. *THE MARRIAGE INTENSIVE*. This is where husbands and wives handle marital difficulties, enabling them to lead happily married lives. It can restore the bloom of spring romance!

†\* 16. *AUDITOR RUNDOWN*. This is an intensive which fully handles any case reasons why an auditor might have difficulty and enables him to move forward without any losses or failures from past efforts to help people stopping him.

†\* 17. *TEACHER OR SUPERVISOR INTENSIVE*. This is for any person involved in teaching or supervising or education and enables him to become a vastly better teacher or supervisor.

†\* 18. *EXECUTIVE OR BUSINESSMAN'S INTENSIVE*. This enables an executive or businessman to face situations of stress with calmness and frees him from past business stresses.

†\* 19. *MONEY PROCESSING INTENSIVE*. This handles the inability to have money resulting in the ability to increase income.

†\* 20. *PROFESSION INTENSIVE*. This enables a person to overcome difficulties that he may encounter in his profession or in any given subject.

†\* 21. *FIXATED PERSON RUNDOWN*. This enables a person to overcome the condition of having his attention fixated on one person.

†\* 22. *SUPPRESSED PERSON RUNDOWN*. This is a magical rundown just now being released to Class IV and other orgs. It utilizes a principle found in an early ACC but never fully developed and released till '78 that one could bring the suppressive in a person's life to communicate to him and seek peace, without ever contacting him. When expertly done on a person who has been the target of suppression by antagonistic people it brings him back to freedom and handles his environment as well. When one realizes that most illness is precipitated by suppression one can understand the need and use of such a miraculous rundown. It's unbelievable until one experiences it.

The way to get processing cheaply is, of course, to take the training route and get trained and make your grades at the same time. Training is very fast these days due to the new checksheets.

Class IV Orgs teach the Co-Audit Auditors Course, the fast New Era Dianetics Course, the NED Validated Auditor Internship, the NED Case Supervisor Course, the Validated NED Case Supervisor Internship, now have all the shorter checksheets for and teach Class 0-IV, the Permanent Class IV Auditor Internship, the Class IV Graduate Auditor and Case Supervisor Course, the Permanent Class IV Graduate Case Supervisor Internship and will teach Expanded Dianetics Auditor and Case Supervisor courses and internships. They also teach a considerable number of public courses, lists of which will shortly be available from Class IV Orgs as in 1978 Department 17 was ordered to get busy handling and training the public as the pre-wave of the New World.

#### CLASS VI ORGS (SAINT HILLS)

The original Class VI Org was located in a beautiful English estate, Saint Hill Manor, East Grinstead, Sussex. When a Class VI Org was formed in Copenhagen to service Europe in all languages it was staffed by people from Saint Hill who named it, of course, "Saint Hill." And when the American Class VI Organization was formed it was staffed by people taken from Saint Hill and, of course, they called it The American Saint Hill Organization. The services remain the same in each of the organizations .

The following services are given at Saint Hill Orgs:

1. *ALL CLASS IV ORG AUDITING ACTIONS AND COURSES*. They cost a bit more but the Saint Hills are essentially training orgs and the auditing delivered there is usually quickly available and very well done.

2. *POWER PROCESSING*. Grades V and VA are still available and being delivered at Saint Hills for persons who did not make Dianetic Clear, delivered only by Class VII auditors who are specialized on it. Power continues to produce its startling results.

†\* 3. *SUPER POWER*. There is no reason a Dianetic Clear should be denied the powerful gains which research made available in '78 (see above). For the public who have gone Dianetic Clear, and those who haven't, Saint Hills will become a mecca where they obtain the most excellent results obtainable in Super Power.

The SAINT HILL SPECIAL BRIEFING COURSE still roars on. This is the place where the auditor gets all the tech that has ever been issued below that level, this is where his sessions are video'd and polished, this is where he gets all his auditing to catch him up on his grades. These are the Dukes of the auditor elite, the Saint Hillers. One joins the clique only by hard work and great results.

CLASS VIII COURSE. This is the course originated on Flag and still taught in its original successful form at Saint Hills. It is a standard tech course and Class VIIIs pride themselves on keeping tech standard over the world.

CLASS IX COURSE. This is the graduate course which contains the materials issued since the Flag Class VIII.

### ADVANCED ORGS

Advanced Orgs are located in Los Angeles, England and Copenhagen.

The Advanced Orgs are the OT (Operating Thetan) orgs of the world. Because of the nature of OT auditing the person has to learn to audit himself as most OT levels are too fast to be audited by another (only OT VII, OT IV and NED for OTs are audited on the pre-OT by a professional).

\* 1. *SET-UPS*. It often happens that one needs to have case difficulties handled before he goes on up the Grade Chart to the stellar realms of the Advanced Orgs. Sometimes a Drug Rundown isn't complete or one is a bit suppressed or too introverted. It saves time to get a set up before starting the rocket ride up the top end of the Grade Chart. The AOs handle this sort of thing routinely when it is needed. They have a checklist of prerequisites for AO levels and this is what they're most interested in getting completed. To not complete it means a stall somewhere along the way. It usually doesn't take much time and saves time later.

\* 2. *SOLO AUDITORS COURSE*. The AOs are the place where the preclear or Dianetic Clear learns to solo audit so he can go on up the Grade Chart. Some people, wanting the best auditing they can get for this Solo flight, also take lower level professional auditor courses and even Class VI at the Saint Hills. At one time a Dianetic Auditors Course was a prerequisite to AO services prior to the Solo Auditors Course and while this is not now demanded, and while the Solo Auditors Course is very good, smart preclears and smart Dianetic Clears take other courses before they get to an AO and then they're sure to make OT even more easily. I've heard Solo auditors say that they only wanted a professional on their case and that's why they were making themselves into one before they went to an AO. Even Class IV Orgs have professional courses .

3. *R6EW*. This is the tech designation of the step a non-Dianetic Clear must take before going onto the Clearing Course in Advanced Orgs. It is Grade VI. It returns powers to act on one's own determinism. It incidentally tells one why the human race often reacts so oddly to life.

†\* 4. *DIANETIC CLEAR REHAB*. The state of Dianetic Clear is checked and rehabilitated which is a very fast action in most cases. It has to be verified because if the person didn't make it he has to go onto the Clearing Course and if he did really make Dianetic Clear, to do the Clearing Course would be disastrous because, of course, he's already Clear. This is why AOs are now engaged on a project of recovering folder libraries particularly of the few pcs who have died in the last few decades. Always bring your own folder or get it sent to the AO if you are going.

5. *THE CLEARING COURSE*. This was one of the most famous breakthroughs of all time requiring years of research. Those who did not make Dianetic Clear solo audit themselves to the full bursting glory of Clear.

\* 6. *OPERATING THETAN I*. For the Dianetic Clear who has had his Solo Course, set-up and verification as Clear, this is the first solo auditing step. These OT grades have their own end phenomena but they are confidential.

\* 7. *OT II*.

\* 8. *OT III*. This is the big step and one has to allow time for it.

\*\* 9. *OT III EXPANDED.*

\*\* 10. *OT VII.* This is an auditing step by a professional OT auditor. It can be given in any sequence after OT III and before OT VIII.

†\*\* 11. *NED FOR OTs.* This is the big news of the OT world. AO auditors were specially trained at Flag and are just now on their way back to AOs to deliver it. The new Division 4A Flag is an AO now and had its gala opening and its first avalanche of pre-OTs on December 16. There is very wild excitement on the results of NED for OTs as, of course, they've never been seen before on this or any other planet. NED for OTs can be given any time after OT III and before OT VIII and is a prerequisite for OT VIII.

\*\* 12. *OT IV.*

\*\* 13. *OT V.*

\*\* 14. *OT VI.*

\*\* 15. *OT VIII.* Although several upper OT grades have been researched, pre-OTs were not ready for them and so they were not released. The needed link which makes it possible is NED for OTs which is its prerequisite. The upper levels above VIII will probably be released from time to time into the future. OT VIII's release is a real cap for the tech breakthroughs of '78.

### FLAG SHIP ORG

The FSO is beginning its third year at the Flag Land Base in Clearwater, Florida. The FSO was several years afloat and has a long tradition as the top training and processing org of the world. Its quarters in the posh Fort Harrison Resort Hotel still carry its distinctly nautical flavor.

Flag is the top tech org of the world and if they can't do it, nobody can.

What you pay for at Flag is the most expert C/Sing for the best rundowns by the best auditors in the world.

Its services are:

1. *ALL LEVELS AND RUNDOWNS.* NED, CLASS IV, CLASS VI, CLASS Vial and all AO services (in its new Division 4A) as listed above are delivered at Flag. (Super Power will be delivered to the staff first and eventually to the public.) (Flag lower org services cost more mainly because they are even more expert and faster than they are in lower orgs and because the service is highly personalized.)

\*\*\* 2. *FULL CASE RESOLUTION.* It is always the fate of the top level org of the world to inherit the rough and "unsolvable" cases. Flag runs on the basis of results or else so far as their tech stuff is concerned. The words "failed case" do not exist on Flag. Therefore they have rundowns and handlings to untangle the most tangled and get it going again. (Flag gets easy cases too. In fact they get some of the easiest and fastest cases in the world because such people have a way of making it through to the top.)

\*\*\* 3. *INTEGRITY PROCESSING.* These are a series of processes which result in a vastly improved performance in the area addressed.

\* 4. *STUDENT BOOSTER RUNDOWN.* This is a specialty on Flag which also trains the executives of orgs and has to have a fast study remedy. It is also given to business executives so that they can absorb effortlessly and with greater speed the vast quantities of data that pass across an executive's desk.

5. *DIANETIC DEBUG AND REPAIR.* Those who couldn't handle and run engrams or have trouble in Dianetics find this a successful way to start winning with Dianetics or NED.

\*\*\* 6. *OT LEVEL DEBUG AND REPAIR*. This is the full repair and resolution of any difficulties a pre-OT may have encountered due to solo auditing errors on any solo level .

7. *NEW VITALITY RUNDOWN (NVRD)*. This was also called the “Special Rundown” when it was being developed in ‘75 and I trained a group of auditors on it at Flag. It has never been exported from Flag. It handled cases that had not progressed well due to suppression or other factors.

8. *POWER REPAIR AND COMPLETION TO FULL EP*. Given in those rare cases where a pc has not made it on Power.

\*\*\* 9. *L-10*. This is the first of the famous Ls (“L” is just the technical designation). The L’s are at Flag only. They are not grades in themselves but incredible boosters that can be delivered at any point after a completed DRD and Expanded Grades. The L’s are audited by Class X, XI and XII auditors who are the most highly trained on the planet.

\*\*\* 10. *L-11*. The next step from L-10.

\*\*\* 11. *L-12*. When I was C/Sing the L’s I would never let a pre-OT leave the ship unless he’d gone exterior with full perceptions and was able to maintain it.

†\*\*\* 12. *NED FOR OTs*. Flag was the place where all the NED for OT auditors were trained. When its new AO Division 4A was opened just before Christmas even other hotels in town had to be booked to take care of the OTs arriving for their NED for OTs. The sensation caused over the world rivalled the original landing at Flag in Florida. They considered it a Christmas present and it was.

13. *ALL AO LEVELS*.

14. *OT VIII*.

Flag teaches a large variety of courses for auditors and is the place where top auditors go to become fully proficient in all classes.

Administrative courses at Flag are much sought after by top executives in businesses and other walks of life. It is a mark of considerable distinction to be known as a graduate of a Flag Executive Briefing Course.

In all, Flag teaches 69 courses which are fitted for the special requirements of the Flag clientele.

The International Training Org. for org personnel only, is also located at Flag and org staffs who are lucky enough to be selected to it are trained for executive positions in orgs. It received a new expansion at the end of ‘78 and was put under the command of one of the Sea Org’s most veteran Officers.

---

1978

Man is a complex being, far more complex than he ever conceived. And he possesses abilities and potentials that neither he nor any of the wise men of the ages ever dreamed of.

In 1978, a great many new insights and revelations about life were disclosed, many of them discovered in my research at very upper levels. These then were used to speed up the lower and more fundamental grades. Without discarding any of the tech we already had, all of which remains very valid, the time and cost for a given result was greatly reduced.

And, as demand for auditors far exceeded supply, new training skills were also developed and the checksheets which govern the time in training were also reduced so that good auditors could be made FAST! A lot of 1978 time was spent on doing this.

But there was one discovery in '78 that I haven't said very much about and am really not likely to since it is a sad thing. It is what really happens to a thetan who is not salvaged or processed and goes on down the route. Man, when I saw that and knew it to be true I actually felt sorry for these guys that try to hit at us. Poor devils. Some religions talk about hell. It's an understatement of what really happens. I got a real close look at what we were salvaging people from. Well, we can do it, better than ever today, especially with these newest discoveries.

All this developmental work was done in '78 despite the fact that I also spent several months of that year directing, photographing, lighting—you name it—nine bright sparkling training films! They are now in the process of being edited and you'll be hearing much more about them when they begin to be released later on in '79.

In case you are under the mistaken impression that Scientology was bruised in 1978 you should know that raw public bought and are buying Scientology texts in a wave of best selling that is making history in the retail and publishing world. There has never before been such a boom in any specialized organization's books. Book publishers use us as an astonishing example of what can happen. Hordes of new public are sweeping these books out of the stores and in the better run orgs, are crowding the Public Division to the rafters for service. Truth doesn't bruise very easily.

*New* books also got attention in '78. *HAVE YOU LIVED BEFORE THIS LIFE?* was introduced at the Atlanta Book Fair and, in the hands of retail distributors, began its own boom. It has gone 5X the normal best seller and is still going. (After all, we discovered past lives.)

And bright, new, and in your bookstore is a big impressive hard cover book *WHAT IS SCIENTOLOGY?* released at Christmas! It contains all kinds of data, really a huge handbook, just the thing to use to inform and overawe your friends. 347 information packed pages plus over a hundred big full color illustrations contain the answers to just about every question ever asked about Scientology. Although staff wrote it, I had to keep it rounded up and to the printer and many a day was spent in tropic heat getting its photographs shot. There is data in it that hardly any Scientologist knows. It's a reference and reading total must for every Scientologist's library. And, incidentally, it's about half the price, despite its quality, of regular bookstore books of the same size—a triumph in itself in these inflationary times!

In '78 a lot of time was spent in developing the new Mark VI E-Meter. It was needed as OTs were going off the top of the Mark V. The New World Corps is equipped with the specially built Mark VI. This beautiful and far more sensitive meter will be available to general auditors around February '79 from Pubs Orgs. The Mark V will continue to be valid and sold as it's a good meter and less expensive. The Mark VI is just a Rolls Royce.

Needless to say, I was very busy this year!

It sure is a lot of work to dig out a planet!

Well, there it is. All yours—for '79.

Love,

**THE SUPPRESSED PERSON RUNDOWN**

**A MAGICAL NEW RUNDOWN**

At times the results of "ordinary" Scientology tech are extremely impressive, even to me. I am by this time, quite accustomed to miracles as usual, but magic is not quite so commonplace an occurrence, even these days, and is worthy of special note.

Many times the suppressive person to whom the pc is PTS exists in present time and is still capable of causing trouble or upset for the pc. It is to this situation that the Suppressed Person Rundown is addressed.

This new rundown, the Suppressed Person Rundown, produces the wondrous result of changing the disposition of an antagonistic terminal at a distance, by auditing the PTS preclear. Where this terminal was antagonistic, invalidative, hostile or downright suppressive, he will suddenly have a change of heart and seek to make peace with the PTS pc.

This rundown is not considered complete until the magic occurs; that is on this rundown, we take a PTS pc and we audit this pc and audit him and audit him on Problems Processes until a major change occurs in the *antagonistic persons universe* which prompts him to make a friendly overture to or concerning the pc.

This friendly and unprompted origination or attempt at origination from the antagonistic terminal to or concerning the pc will occur in all cases *if* Problems Processes are run and are fully flattened. This happens no matter how out of comm the two terminals have been or what length of time has intervened between their last communication .

The rundown is continued until the EP occurs. Each problem process is run to its own EP.

When the PTS Rundown engram running has to be omitted because of Clear or OT this Suppressed Person Rundown can be substituted for the engram part of the PTS Rundown but if so, it is still run to the full EP of the Suppressed Person Rundown .

This is how it works. The pc, due to some act or acts previously committed, has gone the effect of the antagonistic terminal. The terminal then attempts to suppress the pc. The pc, already the effect of the terminal becomes the effect of the suppression. So the pc's own postulate to improve himself and his conditions is countered by the suppressive terminal's counter-postulate, and he is thus given a present time problem of sufficient magnitude to prevent case gain, as only a present time problem will halt the progress of a case. To the present time problem are added ARC breaks with the antagonistic terminal, and as only ARC breaks will worsen a case, the result is no gain or deterioration of a case by reason of the suppressive connection in the environment .

A possible simple explanation for what occurs is: the pc, on running Problems Processes, comes up to cause on his problems with the terminal and when he is con

tinued on problems, he will break through and actually run out the antagonistic terminal's problems which *he* has given to *him*.

When this occurs, the formerly antagonistic terminal will get into communication with the pc or by communicating in a friendly way to others about the pc. He will write a letter to make peace, or he will make a phone call to say "All is well," or he will tell Aunt Sally he feels much better about the pc and has decided to let bygones be bygones. It sometimes occurs that the antago person does not know where the pc is but he will still try to communicate.

This friendly origination by the antagonistic terminal is the EP of the rundown. If the terminal hasn't yet originated, you haven't run enough Problems Processes. **THE ONLY TIME THIS DOESN'T WORK IS WHEN YOU HAVEN'T RUN ALL POSSIBLE PROBLEMS PROCESSES OR HAVE RUN THEM WITH OUT-TECH SUCH AS A BROKEN METER.**

#### WHEN THE RUNDOWN IS DONE

The Suppressed Person Rundown is done after the education step laid out in HCOB 31 Dec 78 III EDUCATING THE POTENTIAL TROUBLE SOURCE, THE FIRST STEP TOWARD HANDLING: PTS C/S-1, and after a PTS interview or a 10 August interview or an S&D has located the antagonistic terminal and handlings on that terminal have been done, and after the PTS Rundown has been done.

This procedure is run on the antagonistic terminal in all instances, even when the PTS scene has apparently been relieved for the pc on earlier PTS handling. Always run this problems procedure, no matter how successful earlier handlings were. This RD is to repair the relationship.

The pc is given the R-Factor to let the auditor know of any communication he receives from or about the antagonistic terminal. (He should not, however, be told what the EP of the rundown is.)

#### HOW THE RUNDOWN IS DONE

The Problems Processes used in the Suppressed Person Rundown are given in HCOB 30 Dec 78 SUPPRESSED PERSON RUNDOWN—PROBLEMS PROCESSES and are run Triple or Quad Flow in the order they are given. Each flow is checked for a read before running and each charged flow is taken to the EP of F/N, cog, VGIs.

The EP of the rundown has been reached when the antagonistic terminal originates in a friendly way to the preclear or seeks to communicate to the pc in a friendly manner. It's not just a cessation of hostilities, it's more than that. Even if the antagonistic terminal doesn't know the pc's address he will find out, or he will put word out and the pc will hear from or about the antagonistic terminal. And it will be a friendly message. Even if the antagonistic terminal doesn't know the pc's address, news will reach the pc that the antagonistic terminal wishes bygones to be bygones. That is the EP you are aiming for, and you continue to audit Problems Processes on the pc on the antagonistic terminal until that occurs.

It is very important not to underrun the rundown. Some auditors will be tempted to end off the rundown because the pc has had a major win or ability regained or some such. When the pc has had a major win, you would of course let him have his win and would leave him off auditing until the persistent F/N dies down, but you do not accept as the EP of the rundown anything other than the formerly antagonistic terminal originating, with no coaxing, in a friendly way to or about the pc. You keep running problems until the EP is attained. You do want to see the magic, don't you? And the only way this rundown can fail is by not continuing to run Problems Processes until this EP is attained.

#### WHO THE RUNDOWN CAN BE DONE ON

The Suppressed Person Rundown can be done on any PTS person of any case level. It is run with good success on Clears, OTs and Dianetic Clears as well as pcs just beginning their auditing. The only requirement is that any pc who receives the rundown must first have received the PTS C/S-1 per HCOB 31 Dec 78 III and must, if previously unindoctrinated, have been educated into the procedures of Scientology auditing by a Scientology C/S-1 per HCOB 15 Jul 78 SCIENTOLOGY AUDITING C/S-1.

And of course, like any other auditing, it is done with the pc's rudiments in.

#### AUDITOR AND C/S NOTE

One of the many advantages of the Suppressed Person Rundown is its simplicity. There are very few places where it can go off the rails. This rundown does, however, require expert metering and very standard handling, and the C/S should be alert to the following:

- 1) The auditor must realize that the target of this rundown is not just the pc; the target is the antagonistic terminal the pc is connected to. And the EP is not just a change in the pc, but a change in the antagonistic terminal of a positive, friendly communication to the pc. The auditor and C/S must realize that the above is the target and EP for this rundown.
- 2) *ALL* Problems Processes must be run on the antagonistic terminal, and failure to run enough Problems Processes is the only thing that will prevent this rundown from working.
- 3) *METERING*. The auditor who does this rundown must be skilled at metering so he doesn't miss reads and fail to run reading flows or attempt to run unreading flows. Imprecise metering can undermine the results of the rundown as the running of *all charged flows on problems is vital*. The auditor must be able to read a meter and must take *instant* reads which occur *instantly* on calling the command. (Reference: HCOB 5 Aug 78 INSTANT READS)
- 4) *EPs*. Each reading flow of each Problems Process must be taken to its full EP which is cog, F/N and VGIs. The C/S should ensure that the processes are indeed taken to EP and should suspect, if there is trouble attaining the rundown EP, that one or more Problems Processes have been left underrun, unflat or unrun.

Some auditors may say they've done the rundown and the pc's in beautiful shape and he's had tremendous gains and now the Suppressed Person Rundown is complete.

Your answer to this is: "Finish the rundown. Continue until the terminal gets in touch with the pc to make peace." And sure enough, a day or two or three later the pc, in utter amazement, will report that her sister, who hasn't spoken to her for 10 years has just sent her an affectionate letter or that his father, who disowned him when he got into Scientology, has just called to say "Hello" and that they had a great chat, just like old times.

It always happens when Problems Processes are fully run.

So there you have it, the Suppressed Person Rundown, quite an amazing magical feat, and very easily achieved with good standard auditing. Use it well and fully and you'll get smashing one-for-one successes on PTS pcs.

HCOB 20 Aug 58	PRESENT TIME PROBLEM—RUNNING OF
PAB 126 15 Dec 57	PROBLEMS: HANDLING AND RUNNING

This bulletin contains the Problems Processes to be run on the Suppressed Person Rundown .

DEFINITION OF PROBLEM

The first and most vital action to begin the Suppressed Person Rundown is to fully clear PROBLEM with the pc as a *problem*. not as a condition or situation.

THE WAR OF PURPOSES GIVES US WHAT WE CALL PROBLEMS. A PROBLEM HAS THE ANATOMY OF PURPOSES. A *PROBLEM CONSISTS OF TWO OR MORE PURPOSES OPPOSED*. IT DOES NOT MATTER WHAT PROBLEM YOU FACE OR HAVE FACED, THE BASIC ANATOMY OF THAT PROBLEM IS PURPOSE-COUNTER-PURPOSE.

THE DEFINITION OF A PROBLEM IS *INTENTION VERSUS INTENTION* OR TWO OR MORE OPPOSING AND CONFLICTING VIEWS ON THE SAME SUBJECT.

The dominant operating action of this rundown is knowing what a problem is. Without the auditor feeding the pc a cog, he must clear the definition of problem with the pc so that it is fully understood and the pc can easily make up examples of problems. You'll get no place on the rundown unless both auditor and *pc* understand what a problem is.

Running problems comes under a gradient scale of confront and can go on and on before the pc gets up to an awareness of anything.

It's really a fascinating phenomenon. The person is being harassed all over the place by something or somebody and he will eventually name it and identify it, which is an achievement right there, but when you first start to run problems on it, you'll find he does not have anything to do with it. It's all by itself, floating out in space someplace. The problem has nothing to do with him or anything else.

Example:

Auditor: "Tell me a problem with your mother."

Pc: "She's never home."

“She’s never home” is not a problem. A problem is two-terminaled. The problem, as the pc has given it in the example above, does not contain anything live. It’s just a condition. But gradually, as Problems Processes are run, he will come up to an actual statement that the problem is something that has to be solved and that it has something to do with *him*. Now we’re getting someplace!

## PROBLEMS PROCESSES

The processes are taken up in the order they are given. Each flow of each process is checked for a read before running it. using the name of the terminal antagonistic to the pc. Each flow taken up is then run to the EP of cognition, F/N and VGIs.

A copy of this process sheet is placed in the folder of the pc being run on the Suppressed Person Rundown and the flows of each process run are initialed and dated by the auditor when they have been taken to a full EP.

## END PHENOMENA

THE SUPPRESSED PERSON RUNDOWN IS TAKEN TO THE EP OF A FRIENDLY AND UNPROMPTED ORINATION TO OR ABOUT THE PC BY THE ANTAGONISTIC TERMINAL.

This EP will occur when enough Problems Processes have been fully run on that terminal. The auditor’s metering must be excellent, as to miss reads and leave charged flows unrun can prevent the pc from attaining the EP of this rundown.

(Reference: HCOB 5 Aug 78 INSTANT READS  
HCOB 3 Dec 78 UNREADING FLOWS)

If the pc has a big win, end off the session and let him have his win. Do not try to audit over a persistent floating needle or you will end up leaving charged flows unhandled due to the “needle having floated all the way through them.” So give the pc some time off auditing to let him have his win, then resume his sessions so he can be taken to the full and magical EP of this rundown.

THE ONLY TIME THIS RUNDOWN DOESN’T WORK IS WHEN YOU HAVEN’T FULLY RUN ALL POSSIBLE PROBLEMS PROCESSES.

1. Ref: *CREATION OF HUMAN ABILITY* R2-34

F1: Can you recall a problem about (terminal) which concerned you?

How did it seem to you then?

How does it seem to you now?

Can you recall another problem about (terminal) which concerned you?

(Continue, using the above commands) to EP\_\_\_\_\_

F2: Can you recall a problem (terminal) has had with you which concerned him?

How did it seem to him then?

How does it seem to him now’!

Can you recall another problem (terminal) has had with you which concerned him?

(Continue, using the above commands) to EP\_\_\_\_\_

F3: Can you recall a problem others have had with (terminal) which concerned them?

How did it seem to them then?

How does it seem to them now?

Can you recall another problem others have had with (terminal) which concerned them?

(Continue. using the above commands) to EP\_\_\_\_\_

F3A: Can you recall a problem (terminal) has had with others which concerned him?

How did it seem to him then?

How does it seem to him now?

Can you recall another problem (terminal) has had with others which concerned him?

(Continue, using the above commands) to EP\_\_\_\_\_

F0: Can you recall a problem you have had with yourself because of (terminal) which concerned you?

How did it seem to you then?

How does it seem to you now?

Can you recall another problem you have had with yourself because of (terminal) which concerned you?

(Continue, using the above commands) to EP\_\_\_\_\_

II. Ref: HCOB 31 Mar 60 THE PRESENT TIME PROBLEM

F1: Tell me your problem with (terminal).

What part of that problem could you confront? to EP\_\_\_\_\_

F2: Tell me (terminal's) problem with you.

What part of that problem could he confront? to EP\_\_\_\_\_

F3: Tell me others' problem with (terminal).

What part of that problem could they confront? to EP\_\_\_\_\_

F3A: Tell me (terminal's) problem with others.

What part of that problem could he confront? to EP\_\_\_\_\_

F0: Tell me your problem with yourself because of (terminal).

What part of that problem could you confront? to EP\_\_\_\_\_

III. Ref: HCOB 31 Mar 60 THE PRESENT TIME PROBLEM

- F1: What problem about (terminal) could you confront? to EP\_\_\_\_
- F2: What problem about you could (terminal) confront? to EP\_\_\_\_
- F3: What problem about (terminal) could others confront? to EP\_\_\_\_
- F3A: What problem about others could (terminal) confront? to EP\_\_\_\_
- F0: What problem about yourself concerning (terminal) could you confront? to EP\_\_\_\_

IV. Ref: HCOB 6 Jul 61 ROUTINE 1A

To be run as a bracket (1-10, 1-10, 1-10, etc. to EP).

1. What problem about (terminal) could you confront?
2. What problem about (terminal) don't you have to confront?
3. What problem about you should (terminal) confront?
4. What problem about you wouldn't (terminal) confront?
5. What problem about (terminal) should others confront?
6. What problem about (terminal) wouldn't others confront?
7. What problem about others should (terminal) confront?
8. What problem about others wouldn't (terminal) confront?
9. What problem about yourself concerning (terminal) could you confront?
10. What problem about yourself concerning (terminal) don't you have to confront? to EP\_\_\_\_

Note: What problem about (terminal) *could* others confront? (or What problem about others *could* (terminal) confront can be used instead of *should* whichever checks out on the meter) .

**OUTLINE OF PTS HANDLING**

PTS situations can arise at any time during a person's Scientology auditing or training program and must be handled speedily and well to get the person back on his course of auditing or training. Many preclears new to Scientology require PTS handling as one of their first actions.

Auditing or training must not be continued over an unhandled PTS sit as processing or study under the duress of suppression will not produce results.

You do not go on hoping or ignore it or call it something else or do any other action except *handle*. Handling PTSness is too easy to allow for any justification or excuse for not doing so, and the steps given below lay out the many handlings which can be used to bring about a full resolution of all PTSness in all pcs.

EDUCATION

A person who is PTS is often the last person to suspect it. He may have become temporarily or momentarily so. And he may have become so very slightly. Or he may be even PTS and have been so for a long time. But he is nevertheless PTS and we must educate him into the subject.

PTS C/S-1

The PTS C/S-1, given in HCOB 31 Dec 78 III EDUCATING THE POTENTIAL TROUBLE SOURCE, THE FIRST STEP TOWARD HANDLING: PTS C/S-1 must be done before any other PTS handling is begun.

This action sets a person up to understand his PTS sit and the mechanics of it. A thorough PTS C/S-1 is the basis of all successful PTS handling.

PTS INTERVIEW

A metered PTS interview per HCOB 24 Apr 72 1, C/S Series 79, PTS INTERVIEWS or a "10 August handling" per HCOB 10 Aug 73 PTS HANDLING done by an auditor in session or an MAA, D of P or SSO will, in most cases, assist the person to spot the antagonistic or SP element. Once spotted, the potential trouble source can be assisted in working out a handling for that terminal, or more rarely, in deciding to disconnect from that person.

(If *all* difficulty is encountered on this step, or if the SP cannot easily be found, the preclear or student is probably not PTS Type I and should be turned over to an auditor qualified to handle Type II PTS situations with more advanced PTS tech.)

HANDLING

Once the antagonistic terminal has been located, a handling is done to move the PTS person from effect to slight gentle cause over his situation. This handling will include whatever is needed to accomplish the result, and will, of course, vary depending on the person and his circumstances.

A good roads, good weather approach to the antagonistic terminal is usually what is needed. The handling must be agreed upon by the potential trouble source and the

person assisting him and must be tailored to put the person at cause over his particular situation.

Handling may include coaching him along to see how he himself actually precipitated the PTS condition in the first place by not applying or by misapplying Scientology basics to his life and relationship with the now antagonistic terminal, per BPL 5 Apr 72RC PTS TYPE A HANDLING.

#### *WHAT IS SCIENTOLOGY?*

It quite often happens that the persons antagonistic to the preclear have no real concept of what Scientology is. This can also be true of a very new Scientologist who then misinforms others.

The book *WHAT IS SCIENTOLOGY?* is a very useful tool. The preclear can send a copy of it to persons antagonistic to him and it will give them hope that the person will respond better to life or if they are antagonistic to Scientology can show them what they're being antagonistic to.

Recommendations that the PTS person obtain and use this book (or anyone else who wants to inform his friends or get them on the right road, as the book was not written for the purpose of de-PTSing people) should be made by the interviewing officer. The book was specially priced so it would be more generally available despite the high cost of publishing. It is a large and imposing book and contains the true answers to all the questions people might ask and so saves the PTS person or any other person a great deal of explanation time.

It is quite a formidable weapon when used in that fashion besides being a good book that Scientologists should own in its own right.

#### *CAN WE EVER BE FRIENDS?*

Extraordinary successes in handling PTS situations with the *Can We Ever Be Friends?* cassette and booklet occur when these are used. Parents, friends, relatives of Scientologists, who, due to misunderstandings or misinformation thought they were opposed to Scientology and its aims have discovered, after listening to this cassette, that they are in full agreement with it and now give Scientology their support. This action is vital and must not be omitted.

The results available with this cassette cannot be underestimated. It can be used by itself when communication has really broken down between the two terminals or in conjunction with other PTS handling.

#### PROGRAM

As a result of interview and the various actions connected with it as given above and in the referenced issues the interviewer must give the person a program to be done by the person. If the person does not do the program or report his actions on it, or the program results in no real change in the situation the interviewing officer must require the person to have auditing on the subject. (Ruds can be flown and/or a PTS RD must be given by a qualified auditor in the HGC.)

Clears and OTs can have ruds flown and can do all the PTS RD except engram handling.

This is usually followed by a Suppressed Person RD.

## RUDIMENTS

Flying ruds and overts Triple or Quad Flow on the antagonistic terminal is often done to “get ruds in” and enable the pc to better confront the PTS situation he is faced with. This would of course, be done only in session by a qualified auditor when so ordered by the Case Supervisor.

## THE PTS RUNDOWN

The PTS Rundown is done when preclears who have had standard, successful PTS handlings roller-coaster at a later date, become ill, slump after making gains, or continue to find additional terminals they are PTS to.

The PTS Rundown handles a more expanded sector of a pc’s PTSness and is run to the end phenomena of *a pc who is getting and keeping case gains and never again roller-coasters.*

Note: Clears, OTs and Dianetic Clears are not run on the Dianetic section of the PTS Rundown.

HCOB 3 Jun 72RA Rev. 8 Dec 78 PTS RUNDOWN, FINAL STEP

## SUPPRESSED PERSON RUNDOWN

This rundown is beautifully simple and magically effective. It can be done with great success on all PTS persons of any case level, from those just beginning their first auditing to Clears, OTs and Dianetic Clears.

The end phenomena of this handling is a miraculous restoration of communication between the estranged terminals *originated* by the formerly antagonistic person. (Reference: HCOB 29 Dec 78 THE SUPPRESSED PERSON RUNDOWN)

## REST, QUIET AND A SAFE ENVIRONMENT

Rest, quiet and a safe environment must be provided for a person who has become PTS Type Three.

“In this case, the Type Two’s *apparent* SP is spread all over the world and is often more than all the people there are—for the person sometimes has ghosts about him or demons and they are just more apparent SPs but imaginary as beings as well.”

“. . . Removed from apparent SPs, kept in a quiet surroundings, not pestered or threatened or put in fear, the person comes up to Type Two and a Search and Discovery should end the matter.”

(HCOB 24 Nov 65 SEARCH AND DISCOVERY)

These are powerful and precision tools. With them we can handle our PTS students, preclears and staffs and get resounding one-for-one successes.

I am counting on you to do this.

HCOB 31 Dec 78 11	OUTLINE OF PTS HANDLING

When you find you have a potential trouble source on your hands the very first thing you must do is educate him on the fundamentals of PTS/SP tech.

Do not begin any other PTS handling on any PTS person until he has completed the basic education steps of the PTS C/S-1 given in this HCOB.

In the absence of education into the basics of PTS tech you will have PTS students and pcs asserting they're not PTS, you will have upsets. protest, recurrences of "once handled" PTSness. PTSes will not cognite, will not take action to handle the antagonistic terminal, will not recover. Failure to educate simply doesn't work. So a very thorough job must be done at this point to guarantee the success of any PTS handlings which follow.

Now people and circumstances and PTS sits vary, and you may wish to carry the education steps of the PTS person beyond what is given here before you begin any

other handling on him. I will leave that to your educated judgment. However, the steps of the PTS C/S-1 given in this HCOB must be done on all PTS students and pcs before *any sort of PTS Interview or 10 August handling or any PTS auditing is undertaken.*

The person should, of course, study the complete PTS/SP Detection, Routing and Handling Course so that he understands the full mechanics that had been upsetting his life, but the PTS C/S-1 will give sufficient data and understanding so that he or she can begin handling the PTS scene.

### PTS C/S-1

The following PTS C/S-1 is not a long action and can and should be accomplished speedily. Its purpose is to give to any PTS student or pc the necessary data and RFactor on the basics of PTS/SP tech so that he understands and is able and willing to successfully handle his PTS situation. It can be done by an auditor, in session, or in the course room under the supervision of the Word Clearer and Course Supervisor.

Note: Some pcs and students who have been trained or who have in the past received PTS handling may protest that they know the terms and issues. If this happens acknowledge with excellent TRs and without invalidation or evaluation and tell them that this action is intended to make PTS handling effective for all and is a required step of the handling. If the auditor or Word Clearer uses excellent TRs and a good R-Factor, no ARC breaks will occur and the person will have tremendous wins.

The auditor or Word Clearer should be fully familiar with this issue as well as all issues in the PTS/SP Course pack. He will need to take a very thorough look at what has to be covered with the pc in this C/S-1 and know his materials very well and have them ready for reference and clearing any misunderstands or questions the pc may have.

The following will be needed:

Technical Dictionary

Admin Dictionary

A good English Dictionary

A good dictionary in the pc or student's native language, and for a foreign language case a dual dictionary (English-to-foreign language and foreign language itself).

PTS and SP Definitions Sheet—Attachment No. I of this issue

Demo kit

- A. Have the pc define each term, using the reference. (Note: you don't ask: "Do you know what this word means?" You ask: "What is the definition of ?")

When the pc has told you the definition, have him give you a sentence or two using the term correctly. Where it applies, have him give you examples, using his experiences or those of others. Have him demo with a demo kit. Cover by exact definition all terms used and take each term defined to an F/N.

- B. Check for any questions (or misunderstands) as you go along and ensure any such get handled so the pc or student winds up with a clear understanding of the word.

Don't settle for glibness that does not show understanding, but on the other hand, don't overrun or put duress on the pc or student, either.

Ensure each word cleared is taken to F/N.

## PTS C/S- 1 PROCEDURE

1. Give the R-Factor that you are going to clear the basic words and concepts concerning PTSness.
2. Clear the word AFFINITY. Have the pc or student demo its meaning.
3. Clear the word REALITY. Have the pc or student give you sentences and examples showing his understanding.
4. Clear the word COMMUNICATION. Have the pc or student demo its meaning.
5. Clear ARC BREAK. Have the pc or student demo what an ARC break is.
6. Clear PROBLEM. Have the pc or student demo a problem.
7. Clear WITHHOLD. Have the pc or student give you an example of a withhold.
8. Clear MISSED WITHHOLD. Have the pc or student demo a missed withhold.
9. Clear POSTULATE. Ask the pc or student if he's ever postulated anything. Have him tell you about it.
10. Clear COUNTER (the prefix).
11. Have the pc or student demo several examples of a postulate and a counter-postulate.
12. Clear HOSTILE. ANTAGONISM.
13. Clear SUPPRESS. Have the pc Or student demo several different examples of how someone or something could be suppressed.
14. Clear SUPPRESSION. Have the pc or student give you examples of suppression from movies he's seen or books he's read or suppression he's seen or experienced.
15. Clear SUPPRESSIVE PERSON. Have the pc or student demo the definitions.
16. Clear SUPPRESSIVE GROUPS.
17. Clear ROLLER-COASTER. Have the pc or student demo roller-coaster. Ask him if he's ever been around anyone who roller-coastered. Let him tell you about it briefly if he wishes.
18. Clear POTENTIAL TROUBLE SOURCE (PTS). Have the pc or student demo this well.

(If this step is being done by a Word Clearer in the course room, end off at this point and send the pc or student to the Examiner. Then, get him started on the Study Section. If being done in session, the auditor may continue with the Study Section. )

## STUDY SECTION

19. The following issues are to be read by the PTS student or pc, word cleared Method 4 and starrated. This may be done in a course room, under the supervision of the Course Supervisor or in session with an auditor.

HCOB 27 Sep 66

THE ANTI-SOCIAL PERSONALITY  
THE ANTI-SCIENTOLOGIST

HCOB 28 Nov 70	C/S Series 22 PSYCHOSIS
HCOB 24 Nov 65	SEARCH AND DISCOVERY
HCOB 12 Mar 68	MISTAKES, ANATOMY OF
BPL 5 Apr 72RC I	PTS TYPE A HANDLING
Rev. 29.12.78	
BTB 11 Nov 77	HANDLING PTS SITUATIONS
HCOB 24 Apr 72 I	C/S Series 79 EXDN Series 5 PTS INTERVIEWS
HCOB 10 Aug 73	PTS HANDLING

20. End off and send the pc or student to the Examiner. Route the pc's folder with all worksheets to the C/S who will examine them for thoroughness and completeness and then order the person's next step.

---

Educating a PTS person is the key to putting him at cause over the PTS sit. Do this PTS C/S-1 thoroughly and well. It is not to be considered a substitute for the full PTS/SP Detection, Routing and Handling Course, but will set up the PTS student or pc for a highly successful PTS handling. *These* you get him signed up for the course.

PTS tech is highly effective and powerful. Get the most out of it by applying it properly, with EDUCATION as the first step.

ATTACHMENT

### **PTS C/S-1 DEFINITIONS SHEET**

#### AFFINITY

Degree of liking or affection or lack of it. Affinity is a tolerance of distance. A great affinity would be a tolerance of or liking of close proximity. A lack of affinity would be an intolerance of or dislike of close proximity. Affinity is one of the components of understanding; the other components being reality and communication.  
(*Diabetics Today*, Glossary, page 1013)

#### REALITY

The degree of agreement reached by two ends of a communication line. In essence, it is the degree of duplication achieved between cause and effect. That which is real is real simply because it is agreed upon, and for no other reason.  
(*Dianetics and Scientology Technical Dictionary*, page 338)

#### COMMUNICATION

"The interchange of ideas or objects between two people or terminals. More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication and understanding of that which

emanated from the source point.” “The formula of communication is: Cause, Distance, Effect, with Intention, Attention and Duplication with Understanding.” “Communication by definition does not need to be two-way. Communication is one of the component parts of understanding.”

*Dianetics and Scientology Technical Dictionary* page 81)  
(HCOB 5 Apr 73 Reiss. 19 Sep 74 AXIOM 28 AMENDED)  
(*Dianetics Today*. Glossary, page 1020)

## ARC BREAK

A sudden drop or cutting of one’s affinity, reality, or communication with someone or something. Upsets with people or things come about because of a lessening or sundering of affinity, reality, or communication or understanding. It’s called an ARC break instead of an upset, because, if one discovers which of the three points of understanding have been cut, one can bring about a rapid recovery in the person’s state of mind. It is pronounced by its letters A-R-C break.

(*Dianetics and Scientology Technical Dictionary* page 21)

## PROBLEM

Anything which has opposing sides of equal force; especially postulate-counter-postulate, intention-counter-intention or idea-counter-idea; and intention-counter-intention that worries the preclear

(*Dianetics Today* Glossary, page 1034)

## OVERT

1. ... An aggressive or destructive act by the individual against one or more of the eight dynamics (self, family, group, mankind, animals or plants, mest, life or the infinite) .

(*Dianetics Today*. Glossary, page 1032)

2. That thing which you do which you aren’t willing to have happen to you.

(*Dianetics and Scientology Technical Dictionary* page 288)

## WITHHOLD

An undisclosed harmful (contra-survival) act.

(*Dianetics Today*. Glossary, page 1043)

## MISSED WITHHOLD

An undisclosed contra-survival act which has been restimulated by another but not disclosed. This is a withhold which another person nearly found out about, leaving the person with the withhold in a state of wondering whether his hidden deed is known or not.

(*Dianetics Today*. Glossary, page 1030)

## POSTULATE

1. To conclude, decide or resolve a problem or to set a pattern for the future or to nullify a pattern of the past.

(*Dianetics and Scientology Technical Dictionary* page 304)

2. That self-determined thought which starts, stops or changes past, present or future efforts.

(*Dianetics and Scientology Technical Dictionary* page 304)

3. In Scientology the word postulate means to cause a thinkingness or consideration. It is a specially applied word and is defined as causative thinkingness.

(*Dianetics and Scientology Technical Dictionary* page 304)

## COUNTER

1. Opposition, as in direction or purpose; for example countermarch, counteract.  
(*The American Heritage Dictionary of the English Language* page 303)

## HOSTILE

1. Of or pertaining to an enemy.  
(*The American Heritage Dictionary of the English Language*. page 637)
2. Feeling or showing enmity; antagonistic.  
(*The American Heritage Dictionary of the English Language*. page 637)

## ANTAGONISM

1. Mutual resistance; opposition; hostility.  
(*The American Heritage Dictionary of the English Language*. page 55)
2. The condition of being an opposing principle, force or factor.  
(*The American Heritage Dictionary of the English Language* page 55)

## SUPPRESS

1. To squash, to sit on, to make smaller, to refuse to let reach, to make uncertain about his reaching, to render or lessen in any way possible by any means possible. to the harm of the individual and for the fancied protection of a suppressor.  
(*Dianetics and Scientology Technical Dictionary* page 414)

## SUPPRESSION

1. Suppression is “a harmful intention or action against which one cannot fight back.” Thus when one can do anything about it, it is less suppressive.  
(*Dianetics and Scientology Technical Dictionary* page 414)

## SUPPRESSIVE PERSON

1. A person with certain behavior characteristics and who suppresses other people in his vicinity and those other people when he suppresses them become PTS or potential trouble sources.  
(*Dianetics and Scientology Technical Dictionary* page 415)
2. A person who has had a counter-postulate to the pc you are handling.  
(*Dianetics and Scientology Technical Dictionary* page 415)
3. Is one that actively seeks to suppress or damage Scientology or a Scientologist by suppressive acts.  
(*Dianetics and Scientology Technical Dictionary* page 415)

## SUPPRESSIVE GROUPS

1. Are defined as those which seek to destroy Scientology or which specialize in injuring or killing persons or damaging their cases or which advocate suppression of mankind.  
(*Dianetics and Scientology Technical Dictionary* page 414)

## ROLLER-COASTER

1. A case that betters and worsens. A roller-coaster is always connected to a suppressive person and will not get steady gains until the suppressive is found on the case or the basic suppressive person earlier. Because the case doesn't get well he or she is a potential trouble source to us, to others and to himself.

(*Dianetics and Scientology Technical Dictionary*, page 358)

2. Gets better, gets worse, gets better, gets worse.  
(*Dianetics and Scientology Technical Dictionary*, page 358)

#### POTENTIAL TROUBLE SOURCE

1. Somebody who is connected with an SP who is invalidating him, his beingness, his processing, his life.  
(*Dianetics and Scientology Technical Dictionary* page 305)
2. It means someone connected to a person or a group opposed to Scientology. It is a technical thing. It results in illness and roller-coaster and is the cause of illness and roller-coaster.  
(*Dianetics and Scientology Technical Dictionary* page 305)
3. The PTS guy is fairly obvious. He's here, he's way up today and he's way down tomorrow and he gets a beautiful session and then he gets terribly ill. That's the history of his life.  
(*Modern Management Technology Defined* page 400)
4. The mechanism of PTS is environmental menace that keeps something continually keyed-in. This can be a constant recurring somatic or continual, recurring pressure or a mass. The menace in the environment is not imaginary in such extreme cases. The action can be taken to key it out. But if the environmental menace is actual and persists it will just key-in again. This gives recurring pressure unrelieved by usual processing.  
(*Modern Management Technology Defined* page 400)

#### SEARCH AND DISCOVERY

1. Search and discovery of suppression is called an "S and D." It locates the suppressive on the case.  
(HCOB 9 Nov 67, REVIEW AUDITORS, *BOOK OF CASE REMEDIES*. REVISION OF REMEDY A, REMEDY B AND S AND Ds)

"Remember that the real suppressive person (SP) was the one that wove a dangerous environment around the pc. To find that person is to open up the pc's present time perception or space. It's like pulling a wrapping of wool off the pc.

"The SP persuaded or caused the pc to believe the environment was dangerous and that it was *always* dangerous and so made the pc pull in and occupy less space and reach less.

"When the SP is really located and indicated the pc feels this impulse not to reach diminish and so his space opens up.

"The difference between a *safe* environment and a *dangerous* environment is only that a person is willing to reach and expand in a safe environment and reaches less and contracts in a dangerous environment.

"An SP wants the other person to reach less. Sometimes this is done by forcing the person to reach into danger and get hurt so that the person will thereafter reach less.

"The SP wants smaller, less powerful beings. The SP thinks that if another became powerful that one would attack the SP.

"The SP is totally insecure and is battling constantly in covert ways to make others less powerful and less able."

and Students

From: Ron

### **CORRECTION TO RON'S JOURNAL 30 REQUIREMENTS FOR SUPER POWER AUDITORS**

On page 267 of Ron's Journal 30, the listing of OT III as a requirement for New World Corps candidates to be trained on Super Power is a typo and is hereby canceled.

The requirements for auditors or C/Ses who are to be trained to deliver Super Power are:

1. Class IV (does not have to be Class IV Permanent).
2. Not an R/Ser.
3. No LSD or Sweat Out Program very fully completed.
4. Full Drug Rundown completed.

Remimeo

**BTB CANCELLATION**

BTB to MARCH 75. ISSUE IV  
CRAMMING SERIES 5RB  
TRs IN CRAMMING

IS HEREBY *CANCELED*.

No auditor may audit in an HGC who has not done a Hard TRs Course.

Any auditor with good sense will get an honest TRs tape passed by competent authority before he audits *anybody*.

The technical material in the above mentioned BTB is incorrect as once an auditor's TRs are "IN" they don't go out and you certainly don't have to practice to get them back in.

The job is to get them in in the first place.

Auditors whose TRs are out can have false data on TRs found and be word cleared on TR HCOBs and can be put back on a Hard TRs Course.

ADMINISTRATOR  
HCO PL 18 Oct 67 POLICY AND HCOB ALTERA  
TIONS-HIGH CRIME

**TECHNICAL PERVERSIONS**

During an evaluation of an organization, a new crime came to light:

It consisted of carefully teaching and coaching auditors to get a snap can squeeze done so they would set their meter sensitivity so low that no reads could be obtained. It was done knowingly and intentionally by the person so there would be no auditor around that could spot his withholds. He also obscured E-Meter Drill No. 5 which shows the correct way to do a can squeeze and get a proper sensitivity.

Anyone who would do something like this, just to protect a withhold, without realizing he would also mess up hundreds of cases quite in addition to messing up his own, is of course not only irresponsible but insane.

We think of “insane people” as being wild-eyed maniacs but such is seldom the case. More often they are quiet types who have little or nothing to say and speak softly. This person would not have been seen as insane on casual observation. And so he had worked his way into the post of training in charge. Just so he could protect his withholds. And, on that post. then carefully mistreated all auditors in sight.

So this brings to view that there is a new type of crime:

**TO ALTER AND PERVERT TECH OR PROCEDURE TO PREVENT  
DISCOVERY OF WITHHOLDS.**

This enters many areas: Changing or losing issues. Issuing issues in BTB or BPL form that contain incorrect and misleading data. Posting known criminals or incompetents to training posts. Verbal tech. In short, any action which would prevent tech from being known or correctly used.

These fall under the heading of SUPPRESSIVE ACTS and come under the ethics PLs related to them.

**MOOD DRILLS**

Beings can be fixed or stuck in a chronic mood (emotion)—always sad, always angry, always bored, etc. Just in life and livingness this makes them rather hard to live with but in an auditor it is fatal. The mood of an auditor, particularly if fixed and chronic, can color the session and the results he obtains.

TRs are a matter of sound, not how an auditor feels. When an auditor has a stuck or fixated mood, such as monotony, timidity, dullness, showing up in his TR drills or in session, this can slow up a pc's progress or rough up or upset a pc. The auditor's TRs should sound live and interested and natural.

Mood Drills have been developed to handle fixed, uncontrolled or unsuitable tone levels in an auditor. These drills consist of drilling TR I over and over at each tone level of the full Tone Scale (HCOB 25 Sept 71RB, Revised 1 Apr 78 TONE SCALE IN FULL). You start low on the scale and do TRs at each tone level *in that tone*. then up to the next tone, and the next, i.e., TR 1 done over and over at "Dying," then at the tone of "Useless," and so on up the scale. The coach simply has the student do TR I at the particular tone level so that the coach and the student are both satisfied that the student has conveyed that tone and the student has a win.

A technical fact is that moods or emotions are usually "automatic" which means they are not necessarily under control but tend to control the person himself. It is as if he is under other-determinism. Technically, you can "take over" the automaticity and put it under a being's control just by having him consciously do it over and over. You can also change a chronic tone level by shifting a person's attention from it by making him do something else. (Reference: "Ability 36" and "Ability—Straight Wire.")

Body position, voice tone, facial expression and attitude are all part of conveying the mood or tone level. For example, the student doing Mood Drills is on TR 1 working on the tone "Anger." He gives a line from *Alice in Wonderland*. and it sounds a bit weak. Coach's patter: "That's it. It sounds a bit gentle. Let's get some more G-r-r-r-r in it. Start." Student repeats the line, but smiles a bit although he sounds more angry. Coach: "That's it. It *sounded* more angry, but you smiled. Do it again—you *feel* angry. Start." Student gives the line again, this time frowning fiercely and in a *very* snarly tone of voice, leaning forward aggressively. Coach: "Good! Do you feel you did it?" Coach continues until the student is certain he can do it easily. The coach must be able to identify the various emotions and if he is in question about it the dictionary should be resorted to until both student and coach are in agreement on what the tone is or means and that it is being accurately and demonstrably expressed.

A student drilling these must beware of Mis-U's and the coach must make sure that he and the student both understand each mood (tone). Any moods that are too easy to do should be spotted by the coach and repeated until the automaticity is broken.

If a mood is too hard for the student to master, have him do TR 1 in different beingnesses, e.g., a timid student who is trying to sound antagonistic could be asked to do TR 1 as a panther, a lion, a villain, etc. If you had him do it as a timid bird or some such timid thing that would never be antagonistic you would probably have your student where he lived. Again, do such things to a student win and don't use it to harass him. The whole point is to get him to do TR 1 antagonistically. These shifts of beingness help to shift his attention off a repulsion to an emotion he cannot easily do.

Once begun, Mood Drills should be continued until the whole scale is flat so the auditor doesn't get stuck on the Tone Scale but can do any mood easily and without strain. When an auditor is upset about his voice, you can have him try speaking melodiously, boringly, enthusiastically, until he can change his voice mood about at will.

Mood Drills should be done when the auditor sounds mechanical, or his tone is brush off, not interested or some set emotion. An auditor can be drilled on assessments in the E-Meter Drill Book with Mood Drills, when his assessment is dull or monotonous. Any set emotion like "sweet," "light and airy fairy," or sad, dreary, deadly serious, indifferent can be handled by drilling with Mood Drills.

### 50 FOOT MOOD DRILLS

50 Foot Mood Drills can be used to cure a fixed mood that doesn't seem to budge with regular Mood Drills. Student and coach go to an area where they can do some shouting without disturbance. The coach and student are at least 50 feet apart and the Mood Drill is done, as described above, at this distance.

Mood Drills are not only fun to do, but also enable an auditor to be at cause over how he sounds in a session, without strain and without his own feelings interfering with the session and thus to get maximum gain for the pc.

HCO BULLETIN OF 3 FEBRUARY 1979  
Issue I  
CORRECTED AND REISSUED 8 FEBRUARY 1979

Remimeo

(Also issued as HCO PL same date and title.)

**CHANGE THE CIVILIZATION  
EVAL**

*POLICY:* A course consists of a checksheet, theory and practical.

To audit or even do courses requires an ability to confront and communicate and this is brought about on the TRs Course.

People who can't confront can have trouble communicating, reading meters, studying or even detecting what is going on.  
(See Cumulative Index, Vol X Technical Bulletins)

*SITUATION:* TRs AND TECH ARE OUT INTERNATIONALLY.

*STATS:* Refunds high .

Majority of Sea Org staff with incomplete courses.

Lots of blown students.

*DATA:* Auditors pulled in for training couldn't do TRs even though they were trained and had been auditors for years. (OMITTED TRs—COURSES THEY TOOK PREVIOUSLY)

Supervisors didn't know key TR HCOBs, didn't know that you cycle a student through the TRs, not stick him in on one TR for weeks and give him a lose, yet it is clearly expressed in HCOBs. (OMITTED INFORMATION, WRONG TARGET—TR SUPERVISORS)

When I teach a course it takes a week or 6 weeks depending on the course. When it is exported the same course and the same materials can take up to 9 months. (ADDED TIME—SUPERS)

Auditors who had supposedly been trained misread and missed reads on meters. (OMITTED CONFRONTS—AUDITORS)

People who go to writing courses in college almost never become writers. (OMITTED PRODUCTS—COLLEGES)

The common experience of students is they can't do what they're trained to do after they've been "trained" yet the civilization is spending countless billions on "education." (CONTRARY FACTS—CONTEMPORARY TEACHERS)

The "service facsimile" which is processed at Grade IV of Scientology grade processing handles the almost universally present aberration of making others wrong. (ADDED ABERRATION—TEACHERS)

Few teachers are Grade IV Releases. (OMITTED SCIENTOLOGY—TEACHERS)

Because their TRs and metering were out, auditors have not been producing uniformly spectacular results and have not been getting pcs smoothly through their grades. (OMITTED CONFRONT—AUDITORS)

CS-4s who have the responsibility for making up checksheets for courses continue to export a TRs Course without a checksheet that had to be done first before doing TRs. (OMITTED CHECKSHEET—CS-4s)

The identical situation of sticking students in at each TR and making them lose, instead of cycling them through TRs to a win each time was found on Flag some years ago and remedied with an HCOB. Yet the HCOB is unknown, partially because there is no checksheet on the TRs Course. (OMITTED PRESERVATION OF TECHNOLOGY—FLB)

TR Courses over the world uniformly have been taught without being preceded by a theory period. (OMITTED THEORY—TRs COURSE SUPERVISORS)

*OUTPOINT COUNT:*

OMITTED—9	SUPERVISORS—4
WRONG TARGET—1	TEACHERS—3
ADDED—2	AUDITORS—2
CONTRARY FACTS—1	PREVIOUS COURSES—1
	COLLEGES—1
	CS-4s—1
	FLB—1

*WHY:* THERE IS NO CHECKSHEET FOR THE TRs COURSE WHICH IS STUDIED BEFORE THE STUDENT DOES HIS TRs.

*ETHICS WHY:* TARGETTING STUDENTS TOWARD A LOSE BECAUSE THEY ARE DRAMATIZING THEIR SERVICE FACS.

*WHO:* MAJORITY OF PROFESSORS, TEACHERS, ETC.

*IDEAL SCENE:* A TRs COURSE TAUGHT AS A COURSE WITH A PROPER CHECKSHEET AND SUPERVISED BY SUPERVISORS WHO ARE NOT DRAMATIZING A SERVICE FAC OR MAKING OTHERS WRONG AND TRAINING AUDITORS WHO CAN CONFRONT AND COMMUNICATE AND IN ADDITION TO HANDING THEIR PCs SO AS TO OBTAIN UNIFORMLY SPECTACULAR WINS, MAY ALSO EVENTUALLY REACH THE REST OF THE TEACHERS IN THE WORLD SO THAT THEY TOO WILL TEACH STUDENTS TO A WIN.

*HANDLING:*

*BRIGHT IDEA:* Do a checksheet of the TRs Course and retread all auditors who are not making it on it and TRs.

1. Compile the checksheet.

LRH TECHNICAL  
COMPILATIONS     DONE

2. Push all students now on courses on through their courses without interrupting their studies by making them redo the course.

DIRECTORS OF  
TRAINING     \_\_\_\_\_

3. Immediately get the checksheet being applied and the TRs Course redone at the intern level, in the first internship any auditor I/T enters.

QUAL SECS     \_\_\_\_\_

4. Enforce certificate expiration if the person has not done the internship for the level he is certified for.  
DIRs OF VALIDITY \_\_\_\_\_
5. Sell the new TRs Course in one internship.  
REGS \_\_\_\_\_
6. Deliver the new TRs Course complete with checksheet and in practical, cycling through the TRs to a minor win on each instead of sticking the student into one TR at a time to a completion of that TR and so giving them countless loses and extending the course endlessly. But make sure that on the alternate cycle through, they're doing Hard TRs flawlessly.  
SUPERS \_\_\_\_\_
- 6A. Institute the new TRs Course at the beginning of major courses for those students who enter a major course in the future, and at the beginning of any major course substitute the new TRs Course for any existing TRs Course on the checksheet.  
DIRECTORS OF TRAINING \_\_\_\_\_
7. Make DRD and Grade IV a prerequisite for the post of Supervisor and get all Supervisors now on, up to that without removing them from post in a minimum period of time.  
HCO \_\_\_\_\_
8. On all auditors who are failing order a complete modern TRs Course as in Targets 5 and 6, as the only acceptable first cramming order. Time machine it for 2 weeks full time and 6 weeks maximum if done part time.  
CRAMMING OFFICERS \_\_\_\_\_
- 8A. Do not require auditors to "drill TRs" in the morning or evening as TRs do not fall out. Ref: HCOB 9 tan 79, BTB CANCELLATION. Instead, get them through a Hard TRs Course in their study time.  
QUAL SEC \_\_\_\_\_
9. Where the new TRs Course is not running well, inspect and verify that Supervisors exist, that this HCOB is known the WHAT IS A COURSE? P/L is in on the TRs Course or any other reason found and the Supervisors gotten up to Grade IV Release.  
LRH COMM \_\_\_\_\_
10. Only bother to correct other auditor or admin errors after it's verified that the persons sent to Cramming have successfully completed the modern TRs Course to wins on the theory and every TR. When the new TRs Course is obviously and beyond any reasonable doubt fully passed by the auditor, only then and in the future for that auditor, engage in any cramming actions. Do not require that he do the TRs Course again unless it is clearly evident that he failed it the first time.  
CRAMMING OFFICER \_\_\_\_\_
11. If this program is not working, if refunds do not drop, if org stats do not rise, debug this HCOB as it applies to any org or area and get it in and get it working.  
LRH COMM \_\_\_\_\_

12. Program out how we're going to use this to get this civilization functioning.

GUARDIAN  
WORLDWIDE \_\_\_\_\_

13. Report all wins and successes with this HCOB to CS-4.

THOSE APPLYING  
THIS PROGRAM \_\_\_\_\_

14. Take ethics actions on those who refuse to apply this program.

EO/SENIOR EO  
INT \_\_\_\_\_

15. Teach students to a win.

EVERYBODY  
TRAINING  
ANYONE \_\_\_\_\_

**CONFRONT TECH  
HAS TO BE PART OF THE TR CHECKSHEET**

The inability to confront is basically caused by withholds and where a person cannot be drilled into confronting, he has to have his withholds pulled.

That he has committed overts and doesn't want them exposed apparently causes him to withhold his attention and the result is his ability to confront is lessened.

Also where a person has overts on a subject and is withholding, he has a tendency to complicate that subject and cannot get down to its basic simplicities. The world looks very complicated to him, probably because his attention is wrapped up in his withholds instead of on his real problems or the subject.

The new discovery here is that a person who has overts and withholds on a subject cannot perform in that area and introduces complexities, for of course they can't confront it.

Where a person cannot take responsibility for his withholds and he is not benefiting casewise from giving them up, he is half dead as a being. It is a vicious circle: he began to commit overts because he couldn't confront things and then withheld what he had done. Because he had withholds and could not confront, he began to take heavy drugs and alcohol. These pushed him toward deadness and further worsened his ability to confront and even caused him to commit further overts which he then withheld and this further deteriorated his ability to confront. And all this traces back to the fact that he couldn't confront in the first place. There is nothing more irresponsible than a dead man. And when confront drops and withholds enter in, one has entered the death slide as a being.

This vicious circle can be handled in processing at various levels and will unsnarl and the person will become alive and able to confront. But the first steps of it, and ones which could carry him well up the ladder, are the drills of the TR Course if done properly and over and over in rotation each time to a win on each particular drill.

Truly, the world begins anew by regaining the ability to confront.

**E-METER DRILL 5RA  
CAN SQUEEZE**

The following E-Meter Drill immediately revises and replaces E-Meter Drill 5, as it appears in *The Book of E-Meter Drills* and modifies any data to the contrary in *E-Meter Essentials*.

*NUMBER:* EM-5RA

*NAME:* CAN SQUEEZE

*PURPOSE:*

- I. To demonstrate to the student how an incorrect can squeeze gives an inaccurate, unreliable needle reaction.
- II. To train a student auditor how to get a pc to do an accurate can squeeze.
- III. To train a student auditor how to determine the sensitivity setting to get 1/3 of a dial drop of the needle on the can squeeze, for use in setting the correct sensitivity for each preclear in an auditing session.
- IV. To convince a student auditor that he has to use a correct sensitivity setting for 1/3 of a dial drop of the can squeeze to have a workable and readable E-Meter.

*POSITION:* The coach and the student auditor sit facing each other across a table with an E-Meter facing the student auditor. The E-Meter is already set up.

*TRAINING STRESS:*

*SECTION 1:* To give the student auditor a reality on how a can squeeze can be done *incorrectly*. so he will know all the points he may have to correct to ensure he gets an accurate can squeeze.

1. Coach picks up the cans and holds his hands on the table so the student can clearly see them.
2. Coach has student set sensitivity booster knob to lowest position and the sensitivity at I on the sensitivity knob.
3. Coach has student adjust the needle to the set line on the needle dial.

*The coach will have the student readjust the needle to set as necessary at the beginning of each demonstration of the can squeeze.*

4. The coach gives the cans a squeeze with an even pressure. If there is no read or a very small one, less than an inch, at sensitivity 1, the student auditor moves the sensitivity knob to 5, and gets another can squeeze. If still no read or it's smaller than an inch, student moves sensitivity to 16 and gets another squeeze. For pur

poses of the following demonstration, you want to set the sensitivity so that you can obviously see a movement of the needle on the can squeeze of about an inch. So the sensitivity could be set lower than 5 or higher than 5, so long as you get a fall of about an inch on the squeeze.

5. With the sensitivity setting determined in 4 above, the coach will then squeeze the cans incorrectly, each time in a different way. The coach shows the student what particular thing he's doing with his hands, and then has the student observe what happens on the meter and the distance the needle falls on the dial when he does each version of an *incorrect* can squeeze as follows:
  - A. Coach holds the cans with cups of palms and all fingers and both thumbs in complete contact with the cans. As he squeezes the cans, he lifts one finger off and then puts the finger back on after relaxing the squeeze. This is an incorrect can squeeze.
  - B. Coach holds the cans as in A. This time he gives the cans a *very* fast light squeeze. This is an incorrect can squeeze.
  - C. Coach holds the cans as in A, squeezes them with a gradual pressure and then when he releases the squeeze he relaxes his grip on the cans so it is much looser than before the can squeeze. This is an incorrect can squeeze.
  - D. Coach holds the cans as in A, and this time gives a hard fast squeeze. This is an incorrect can squeeze.
  - E. Coach holds the cans as in A, squeezes them firmly and only *partially* releases the squeeze. This is an incorrect can squeeze.
  - F. Coach holds the cans as in A, but gives a squeeze in 2 stages. first a little squeeze, then suddenly a harder one. This is an incorrect can squeeze.
  - G. Coach holds the cans as in A, gives a hard fast squeeze, and *holds the grip*. The student should notice that the needle swings way over to the right due to the *sudden* motion, and that it returns only part of the way with the coach still maintaining the squeeze, thus giving an incorrect measurement of the can squeeze. Student should see that the distance between the first needle position at set and the final needle position with the coach still maintaining the squeeze is the *actual* measurement of the can squeeze fall. It is not the distance between the first needle position of set and the needle position at the far swing to the right. A hard, fast can squeeze is an incorrect can squeeze.
  - H. Coach holds the cans so they are not in contact with the cups of his palms and squeezes them. This is an incorrect can squeeze.
  - I. Coach holds the cans with the thumbs going up the sides and sticking out over the top edge of the cans and squeezes them. This is an incorrect can squeeze.
  - J. Coach holds the cans in a fairly tight grip and squeezes the cans. This is an incorrect can squeeze.
  - K. Coach holds the cans with the forefingers lifted slightly off and puts the forefingers on the cans during the squeeze. This is an incorrect can squeeze.

The drill is continued until the student auditor gets the idea that an incorrect can squeeze gives inaccurate, unreliable needle reactions.

**SECTION II:** To give the student auditor a proper idea as to what a correct can squeeze is, and to train him how to get a correct can squeeze.

1. The following drill should be done first by the coach to demonstrate to the student auditor what a correct can squeeze is:
  - A. The coach has the student auditor shake his hands until the fingers are loose and floppy.
  - B. Then the coach has the student auditor put his hands on the table, palms up, exerting no control on his fingers. The student auditor's fingers will curl in toward the palm.
  - C. Now the coach simply places the cans in the student auditor's hands at an angle across the palms. The natural curl of the fingers is sufficient to hold the cans in place, and the placement of the cans at an angle ensures that the maximum skin area is touching the cans. The cups of the student auditor's palms and all the fingers and both thumbs must be touching the cans. Ensure the thumbs go around the cans and not up the sides.
  - D. Now the coach has the student auditor gradually increase the pressure of his grip on the cans until a light squeeze is achieved, and then relax it. This is a correct can squeeze.
  - E. *NOTE:* Ensure when the student auditor relaxes his grip that he does not take a finger or thumb or his palms off the cans. He should have about the same contact he had at the start as in C above.
  
2. Having done the above, the coach now has the student auditor do the drill as follows:
  - A. Have the coach pick up the cans *and keep his hands on the table so the student can see them throughout the can squeeze.*
  - B. Check the coach's grip on the cans to ensure it is correct as in B and C above. *The student may have to try out different sizes of cans, small, medium or large, depending on the size of the coach's hands, to obtain the correct size can which he can hold comfortably without strain and that fits into the cup of his palm, with maximum skin contact.*
  - C. Adjust the sensitivity booster knob to the lowest position.
  - D. (a) Set the sensitivity knob at 1 on the sensitivity dial.
    - (b) Adjust the needle to the set line on the needle dial.
    - (c) Give the proper commands for getting a can squeeze as follows:  
 . . . .  
 "Squeeze the cans, please."  
 "Thank you."

The student must ensure the coach gradually increases the pressure of his grip on the cans and relaxes it.
  - (d) Note the distance the needle fell when the coach squeezed the cans.
- E. Now increase the sensitivity setting to 2 and repeat steps D (b), © and (d) above, again noting the distance the needle fell when the coach squeezed the cans.
- F. Repeat steps D (b), © and (d) for sensitivity setting at 3, then sensitivity

setting 4, then 5, then 6, and on up until you have the needle hitting the pin on the can squeeze. With the needle hitting the pin on the can squeeze, you wouldn't be able to note the length of the needle fall.

Flunks are given for not having the coach remove all rings or finger jewelry, as they can cause the needle to give unusual reads; for not checking that there is maximum skin contact on the cans; for failing to see that the thumbs go around the can and not up the sides; for failing to set the meter and needle up properly; for failing to notice and handle a sudden or hard or jerky or convulsive can squeeze instead of an even increase of pressure on the cans or sudden letting go of the cans; for not making sure the coach doesn't take a finger or thumb or palm off the cans when he releases the contact; for failing to note accurately the distance the needle fell on the can squeeze; and for giving the wrong commands. Lack of skill in earlier drills is corrected by pink sheet.

*SECTION III:* To give the student auditor a reality on setting the sensitivity for a 1/3 of a dial drop of the needle on the can squeeze.

The student auditor should know that setting the sensitivity for 1/3 of a dial drop on the can squeeze is an integral part of setting up each and every session he does. It is the sensitivity he will be using during the session. It is vitally important he gets the correct sensitivity setting for each preclear at each session, so that he will not miss reads or F/Ns. A sensitivity setting which is too low or too high for that particular preclear in the particular session will obscure reads and F/Ns, thus upsetting the preclear's case. Therefore, the student auditor must be proficient on this drill.

1. A. Have the coach pick up the cans *and keep his hands on the table so the student can see them throughout the can squeeze.*
- B. Check the coach's grip to ensure it is correct, *also ensuring you have the correct can size.*
- C. Adjust the sensitivity booster knob to the lowest position.
- D. (a) Set the sensitivity knob at 5 on the sensitivity dial.  
(b) Adjust the needle to set line on the dial.  
(c) Get the coach to squeeze the cans ensuring he does it properly.  
(d) Note the distance the needle fell when the coach squeezed the cans.
- E. *On Step D (d) the needle will have fallen a distance of either*  
(a) LESS than 1/3 of a dial drop,  
or  
(b) MORE than 1/3 of a dial drop.

If it's (a) raise the sensitivity a bit and repeat steps D (b), © and (d) and continue to do this until you have 1/3 dial drop. If it's (b) lower the sensitivity a bit and repeat steps D (b), (c) and (d) and continue to do this until you have 1/3 dial drop.

In other words, keep adjusting your sensitivity lower or higher according to whether the drop is more or less than 1/3 of a dial drop, until you get the correct sensitivity setting.

Each time a new can squeeze is asked for, the student auditor is to make sure the coach is holding the cans properly and is giving a correct can squeeze.

F. The student then notes the exact sensitivity setting at which he got the 1/3 dial drop. Flunks are given for errors as in Section II above and for failing to

recognize when a 1/3 dial drop of the needle on the can squeeze has been obtained; for failing to recognize if the coach is giving a considerably harder or lighter can squeeze than he was giving at sensitivity 5, and for failing to establish the correct sensitivity setting for 1/3 of a dial drop on the coach.

2. Now the coach has the student auditor do the drill on a number of other students, with the coach watching, until he is satisfied that the student can easily and accurately establish the correct sensitivity setting for a 1/3 dial drop can squeeze.

*SECTION IV:* To give the student auditor a reality on how a correct sensitivity setting for 1/3 of a dial drop on the can squeeze gives a readable and workable meter and how an incorrect sensitivity setting gives an unreadable and unworkable meter, so the student will understand why he has to use a sensitivity setting that gives 1/3 of a dial drop.

1. Coach has the student auditor set the sensitivity accurately on a correct can squeeze for 1/3 dial drop as in Section III.
2. The student auditor does a “pinch test” as follows: student pinches the coach’s arm, hard enough to hurt a little bit.
3. Now, while watching the meter, the student says to the coach:  
“Recall that pinch I just gave you.”  
“Thank you.”
4. Student notes the reaction of the needle to his command and the distance the needle fell.
5. Coach has the student do steps 2, 3, and 4 several times, each time noting what the needle does in response to “Recall that pinch.”
6. Coach now has the student set the sensitivity at 1. Student has coach squeeze the cans and notes whether there’s a read, or not. If there is a read, note size of read and leave the sensitivity at 1. If there’s no read on the squeeze, the student still leaves the sensitivity at 1.
7. The student auditor does a new “pinch test” as in 2, 3, 4 and 5 above, noting the difference in needle response to the command “Recall that pinch” as compared to what it was in Step 5 at the correct sensitivity setting. There may be no read at all and the student should notice that.
8. Coach now has student set the sensitivity at 32, and coach squeezes the cans.
9. Student does the pinch test again and notes the reaction of the needle to his command “Recall that pinch.”
10. Coach has the student then set the sensitivity correctly for 1/3 of a dial drop on a correct can squeeze and does the pinch test again.
11. The student should observe from these pinch tests that an accurate sensitivity setting determined from a correct can squeeze gives a readable and workable meter and that an incorrect sensitivity setting gives an unreadable and unworkable meter. If he does not see this clearly, then the coach would have the student redo steps 7 through 10 until the student sees why the sensitivity must be set for 1/3 of a dial drop determined by a correct can squeeze.

Flunks are given for failing to note what the needle did and size of read in response to student telling coach to recall the pinch and for errors in setting sensitivity accurately and getting a correct can squeeze when called for in the drill.

*HISTORY:* Developed as a training drill by L. Ron Hubbard at Saint Hill in December, 1963 and revised by L. Ron Hubbard in February, 1979.

E-Meter Checksheets

*(Corrections in this type style)*

**E-METER ESSENTIALS  
ERRATA SHEET**

The following corrections are to be made in *E-METER ESSENTIALS*:

**RE: THE TONE ARM:**

*Page 9 Section 10:*

*Delete:* “no matter what the preclear says.”

*Add:* “until the EP of that process is reached.”

*The whole section now reads:* “If the Tone Arm shows motion, continue the process, until the EP of that process is reached.”

*Page 10. Section 12:*

*Delete:* “is a breach of the Auditor’s Code Clause 13. Also to continue a process that is producing no Tone Arm motion is a breach of the same Clause . “

*Add:* “will leave the pc with By-Passed Charge. The process should be continued to the EP of that process.”

*The whole section now reads:* “To change a process while the Tone Arm shows good motion will leave the pc with By-Passed Charge. The process should be continued to the EP of that process.”

**RE: THE SENSITIVITY KNOB:**

*Page 13, Section 5:*

*Delete:* “Have the preclear hold the electrodes comfortably in his hands. Have him tighten his hands and then relax them, still holding the cans. The needle should drop exactly one-third of a dial. Adjust the sensitivity knob by asking the preclear to squeeze the cans again and observing the needle fall.”

*The whole section is substituted with the following:* “The exact setting of the sensitivity knob is done as follows: Have the preclear hold the electrodes (cans) in his hands with the cans in contact with the cups of his palms and all his fingers and both thumbs in a comfortable grip. Set the sensitivity at 5 and adjust the position of the needle to set. Have the preclear squeeze the cans with an even gradual pressure, not a sudden hard squeeze. Watch the distance the needle drops. If the distance the needle fell is less than one-third of a dial drop, raise the sensitivity some and get another can squeeze, continuing this procedure till you’ve got the sensitivity setting that gives you one third dial drop on the can squeeze. If the can squeeze gave you more than one-third dial drop at Sens. 5, lower the sensitivity setting a bit, test

another can squeeze, continuing this procedure till you get one-third of a dial drop.

In other words, keep adjusting your sensitivity lower or higher according to whether the drop is more or less than one-third of a dial drop, until you get the correct sensitivity setting.”

*Page 13. Section 7:*

*Delete:* “Adjust the knob to a still needle that will yet move on needed responses . “

*Add:* “Adjust the sensitivity knob to get a third of a dial drop on the can squeeze, or as close to that as you can.”

*The whole section now reads:* “In short, adjust the sensitivity knob to get a third of a dial drop on the can squeeze, or as close to that as you can.”

## **RE: THE NEEDLE:**

*Page 14. Section 4:*

*Delete:* “A fall always happens with rapidity, within a second or two.”

*Add:* “A fall always happens at the exact end of the question asked.”

*The whole section now reads:* “A falling needle (3) makes a dip to the right as you face the meter. A fall may consist of half a division (about one-eighth of an inch) or may consist of fifteen dials (the whole meter face dropped fifteen times). It is still a fall. A fall always happens at the exact end of the question asked. It is also called a drop, a dip and a register. It denotes that a disagreement with life on which the preclear has greater or lesser reality has met the question asked.”

*Page 15. Section 9:*

*Delete:* “upon the question being asked. A fall can be in two stages or more providing they take place within a second or two after the question.”

*Add:* “at the end of the last word of the question asked.”

*The whole section now reads:* “A fall follows at once at the end of the last word of the question asked.”

## **RE: CHANGE OF CHARACTERISTIC:**

*Page 15. Section 17:*

*Delete:* “we must assume that that is it and we use it.”

*Add:* “it can be further explored with the suppress and invalidate buttons to see if it develops into a sF, F. or BD, which then can be used.”

*The whole section now reads:* “Change of characteristic occurs when we hit on something in the preclear’s bank. It occurs only when and each time that we ask that exact question. As the question or item alone changes the needle pattern, it can be further explored with the suppress and invalidate buttons to see if it develops into a sF, F. or BD, which then can be used.”

*Page 15. Section 18:*

*Delete:* “usually” .

*Add:* “may”.

*The whole section now reads:* “A question that stops a rising needle is a change of characteristic question and like a fall means we have struck something. Further exploration may develop it into a fall.”

*Page 16, Section 21:*

*Delete:* “within one tenth to one half of a second after you have asked a question of the preclear.”

*Add:* “An instant read is defined as that reaction of the needle which occurs at the precise end of any major thought voiced by the auditor.”

*The whole section now reads:* “It is not much used but must be known as it may have to be used sooner or later when we can’t get falls.

“The only needle reactions in which you should be interested are those which occur INSTANTLY. An instant read is defined as that reaction of the needle which occurs at the precise end of any major thought voiced by the auditor.”

## **RE: ROCK SLAMS:**

*Page 17, Section 35, ROCK SLAM (7):*

*Delete:* “This originally meant (and still does) that you are on the rock chain.”

*Add:* “A Rock Slam means a hidden Evil Intention on the subject or question under discussion or auditing.”

*The whole section now reads:* “In assessing or running you occasionally get a Rock Slam. A Rock Slam means a hidden Evil Intention on the subject or question under discussion or auditing.”

*Page 17, Section 36:*

*Delete:* “A Rock Slam is a crazy, irregular, unequal, jerky motion of the needle, narrow as one inch or as wide as three inches happening several times a second. The needle ‘goes crazy’, slamming back and forth, narrowly, widely, over on the left, over on the right, in a mad war dance or as if it were frantically trying to escape. It means hot terminal o r hot anything in an assessment and takes precedence over a fall.”

*The entire section is replaced with:* “A Rock Slam is a crazy, irregular, left-right slashing motion of the needle. It repeats left and right slashes unevenly and savagely, faster than the eye easily follows. The needle is frantic. The width of a Rock Slam (R/S) depends largely on sensitivity setting. It goes from one-fourth inch to whole dial. But it slams back and forth. It means hot item in an assessment and takes precedence over a fall or it means that you have left rings on the pc’s hands or have a loose connection in the leads or meter. If the latter two items verify as not present you are looking at a Rock Slam in the pc.”

## **RE: FREE NEEDLES:**

*Page 17, Section 41:*

*Delete:* “It means an idle, uninfluenced motion, no matter what you say about the goal or terminal. It isn’t just null, it’s uninfluenced by anything (except body reactions).”

*The entire section is replaced by:* “It means the same as a Floating Needle, which is a rhythmic sweep of the dial at a slow, even pace of the needle, back and forth, back and forth, without change in the width of the swing except perhaps to widen as the pc gets off the last small bits of charge. Note that it can get so wide that you have to shift the Tone Arm back and forth, back and forth, to keep the needle on the dial in which case you have a floating tone arm.”

*Page 18 Section 44:*

*Delete:* “It doesn’t happen until a person is well above release, so don’t worry about it until you see it.”

*The whole section is replaced with:* “It can occur after a cognition, blowdown of the Tone Arm, at a release point, or on the erasure of a Dianetic chain.”

*Page 18. Section 46:*

*Delete:* “A Free Needle means, when it’s used as a term, ‘The preclear is getting awful close to clear.’“

*The whole section is replaced with:* “A Free Needle or Floating Needle is one of the parts of the End Phenomena for any process or action.”

## **RE: SECURITY CHECKING:**

*Page 21. Section 3:*

*Delete:* “(b) it’s in a past life and he doesn’t consciously know about it (since the meter precedes preclear consciousness).”

*The entire line is replaced with:* “(b) there’s an earlier similar overt or withhold . “

*Page 22. Section 5:*

*Delete:* “In the case of a past life possibility you add, ‘In this lifetime’ to your security question. As you repeat that, if the misdeed was in a past life, the fall will vanish.”

*The whole section is replaced with:* “In the case of (b) when there’s an earlier similar overt or withhold, you must ask for it and get it.”

*Page 22. Section 7:*

*Delete:* “always (as in all Rudiments) ask the question again as this might not be all of it.”

*Add:* “you get all the data and handle it earlier similar withhold as necessary to an F/N.”

*The whole section now reads:* “If the preclear tells you a withhold, you get all the data and handle it earlier similar withhold as necessary to an F/N.”

*Page 22. Section 9:*

*Delete:* “On a security check sheet, follow up every change of characteristic before you go on.”

*Add:* “On a security check, follow up every change of characteristic, if it is instant, before you go on.”

*The whole section now reads:* “On a security check, follow up every change of characteristic, if it is instant, before you go on. Change of characteristic, if it amounts to anything, will develop into a fall.”

*Page 22, Section 10:*

*Delete.* “(or it’s a past life)”.

*Add:* “or there’s an earlier similar overt or withhold”

*The whole section now reads:* “If the preclear hasn’t told all or there’s an earlier similar overt or withhold, the meter won’t clear.”

*Page 22, Section 14:*

No deletions.

*Add:* “except when it’s a false read which can be checked for.”

*The whole section now reads:* “Grim experience of a decade has taught me that it’s (a) or (b) and never ‘I moved the needle myself’ or ‘I feel nervous just generally’. The E-Meter is right even when it seems to make the preclear wrong, except when it’s a false read which can be checked for.”

## **RE: METER FRILTIES:**

*Page 25, Section 7:*

*Delete:* “if that doesn’t stop it, squirt some lighter fluid into the Tone Arm ‘bearing’ from the meter face side.”

*Add:* “including the Mark V until February 1979”.

*The entire section now reads:* “One exception: The British and American Hubbard Electrometer early models including the Mark V until February 1979 had a ‘carbon pot’ which is to say the Tone Arm was in ‘pure carbon bearings’, if you could call it that. A speck of dust can get in the ‘pot’ and cause the needle to rock slam whether connected to the preclear or not. Pull the lead wire jack (disconnecting cans) and if the slam continues, it’s the ‘pot’ that’s wrong. Work the Tone Arm vigorously for a short while. If that doesn’t stop it, turn it in to be repaired. Later models of the British and American Hubbard Electrometer have ‘wire wound pots’ and this doesn’t happen . “

**ERRATA—P.A.B. No. 147**

P.A.B. No. 147, as it appears in Technical Volume III, page 335, contains a typo to be corrected as follows:

In the first paragraph, 3rd line, delete the word “curve” and insert the word “career.”

The correct sentence reads:

“And if an auditor doesn’t successfully pass the Communication Course, then to the end of any career he has as an auditor, there will be something wrong with his auditing.”

# GROUP AUDITOR'S HANDBOOK

by

**L. Ron Hubbard**

Published March 1979

Group Auditing was first introduced to the public view by L. Ron Hubbard in 1952. Continuous research and development of Dianetics and Scientology by L. Ron Hubbard since that time, has consistently improved the results which may be expected from Group Auditing.

The first publications on the subject of Group Auditing were released in 1954; *Scientology: Group Auditor's Handbook* and *Scientology: Group Auditor's Handbook Volume Two*.

March 1979 saw the publication of a new edition of that first two-volume set—revised to bring it up-to-date and aligned with the tremendous technical developments which have occurred in Scientology since 1954.

The Group Auditor's Handbook is a precise manual of definite and proven procedure. In the hands of an alert Group Auditor it can be a means of initiating immediately the first strong steps toward the goals of better conditions and freedom for mankind, for these sessions are applicable to all kinds of groups: mixed groups, congregations, businessmen and women, industrial employees, sports and military units, disabled soldiers and handicapped persons, governmental groups, and criminals now in institutions.

Today, by Group Auditing, excellent results in improved individual ability, awareness and spiritual well-being can be achieved for the many. This offers a great hope for the future of humanity. Wherever and whenever people get together you will find an exciting opportunity to use these books.

144 pages in Volume One, 136 pages in Volume Two, soft cover, with ten sessions in each volume including instructions and appendices giving remedies and codes. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Church of Scientology Publications Organization U.S., 4833 Fountain Ave., East Annex, Los Angeles, California 90029, U.S.A.: or Scientology Publications Organization, Store Kongensgade 55, 1264 Copenhagen K, Denmark.

### *Art Serves 6*

## ART IN ITS BASICS

Every separate sector of artistic creations has its own basic rules. Such areas include writing, painting, lighting, camera work, costumes, sets, marketing, recording, mixing—every contributory sector to a final art offering.

Each one of these areas has basic stable data which govern it. They are contained in the textbooks on these subjects.

These are the rules—the stable data, the senior data of each specialized activity.

We follow the rules because the rules give impact, effect and message. We don't follow the rules because we're told to, we follow the rules to get a product that is effective and brings about what we want brought about.

Anybody who thinks it's just an odd idea that you just follow the rules should get Short Form Product Clearing, because rules have everything to do with the value of the product.

Anybody can turn out amateur junk. Who looks at it? Who would look at it even if they were paid?

The distance between amateur junk and an effective product is accomplished by knowing and following the basic rules and using them expertly.

When you add to this dexterous handling of materials and equipment and then add some experience you have a professional.

When you add a dash of good sense and talent you have a knockout.

Be professional in whatever you do, the tale is told by the effectiveness of the product on its viewers and intended public.

So whatever your *specialty*, you have to sort out what the senior data are—the rules—and know them cold, so you don't even have to think about them and can think with them.

Did you ever realize that each one of these specialties has only a dozen or two rules?

A=A=A is the way most people handle data, some of these A's however, really have a thousand times the importance of other data.

If you know these and sort them out you have a chance of becoming a professional and if you have sorted them out and can think with them and have manual dexterity with materials and equipment any professional in that field will recognize you as a professional but far more important, your *specialty will* communicate.

If you disregard the above you'll be out of communication with your *specialty* not only *specialty* but every viewer including kids, whether they know the rules or not.

Be a professional in whatever you do.

**DIANETIC CLEAR FALSE DECLARES**

Any org or mission staff declaring a *Dianetic Clear* “achieved in other practices” is subject to expulsion from the Church.

Technically, a very few thetans have never been anything but Clear. *These few didn't “go Clear” on anything; they have simply always been Clear.* When a natural Clear is found it should be so stated. To assign this condition to some other practice is a suppression of *Dianetics and Scientology*.

Anyone evaluating for or feeding a preclear data to persuade him to declare *Dianetic Clear* is also actionable....

Anyone suppressively validating squirrel practices or groups by stating they are producing *Dianetic Clears* is also actionable as above, as it is not possible. *It requires the exact application of Scientology and/or Dianetic technology to bring a preclear up to the state of Clear.*

Falsely declaring a person a *Dianetic Clear* who isn't, and failing to declare one who made it on *Dianetics* or the *Clearing Course* or *who has* always been Clear, are also actionable.

People don't go Clear in garbage eating or psychiatry—they perish. *Thus herding people into their hands by falsely validating them is suppressive.*

Any and all such false declares are canceled.

## MISUNDERSTOOD WORDS AND CYCLES OF ACTION

### MISUNDERSTOOD WORDS AND NO PRODUCT

A misunderstood word can prevent a person from understanding the remainder of what is heard or written.

I have now discovered that: A MISUNDERSTOOD on any given subject CAN PREVENT THE COMPLETION OF A CYCLE OF ACTION related to that subject.

Therefore those people who don't complete cycles of action on certain subjects have a misunderstood word on them.

This then results in no-product situations.

Therefore when you are getting no product, look for the misunderstood word on the subject no matter how long and arduous it is. It's there. And when it's found the person can go on and complete a cycle of action and get a product.

**CAUTION:** Make sure the person actually does have an inability to complete a cycle of action *before you* get into handling him. You don't handle somebody who is completing cycles of action that result in production.

### MISUNDERSTOODS AND PERCEPTION

Misunderstoods can also act as perception shut-offs. They can actually interrupt a person's perception.

It is quite astonishing that perceptions such as sight, sound and even touch can be shut off by Mis-U words.

This opens the door to the fact that people apparently do not see, hear, notice or handle outnesses when they have Mis-Us on them.

This also may open the door to people who have perceptic shut-offs, such as poor eyesight, deafness or other perception difficulties.

### MISUNDERSTOODS AND COMPLEXITY

Misunderstoods lead to complexity. People who have Mis-Us in an area are inclined to develop vast complexities. They can generate confusions and complexities beyond belief.

People do this because, having misunderstands, they do not confront and duplicate in the area and so get into a lot of think-think and unnecessary significance. Their ability to get things done in that area dwindles as a result. And at the bottom of all this is simply misunderstood words.

### MISUNDERSTOODS AND TOTAL ORGANIZE

When you see an area that is organizing only, you know that area is loaded with misunderstands .

When people have incomplete cycles due to Mis-Us they get bogged down into organization.

You can tell when people have Mis-Us—they are totally involved in organize, organize, organize. They don't know what they are doing.

There is a level below this—they have overts and withholds which prevent even organizing.

Below that level people are PTS.

Lacking a sense of organization actually lies below this. It is below the level of Mis-Us, overts and withholds and PTSness—and you'd have to go north through PTSness and overts and withholds to even get to the Mis-Us.

### MISUNDERSTOODS AND NO ORGANIZE

There can also exist a condition where someone does not organize any corner of his area or work or organizations or lines. This manifests itself by irrational demands to only produce and to prevent any organization so that production can occur. At the bottom of this you are very likely to find misunderstood words, particularly on the purpose of the production or why one is producing. It is in this sector that you get overt products most frequently.

### HANDLING

The exact procedure for handling these Mis-Us is given in HCOB 17 Jun 79 CRASHING MIS-US: THE KEY TO COMPLETED CYCLES OF ACTION AND PRODUCTS. Crashing Mis-U finding is done as part of HCO PL 23 Aug 79 / DEBUG TECH. Additional data on the location of Crashing Mis-Us is found in HCOB 14 Aug 79 CRASHING MIS-US, BLOCKS TO FINDING THEM and HCOB 16 Jul 79 THE "ELUSIVE" MIS-U OR CRASHING MIS-U.

With this knowledge we can now handle all the factors that prevent the completion of cycles of action and products.

*Art HCOB 7*

**FINE ARTS VERSUS ILLUSTRATIONS**

The division between fine arts and illustrations is that fine arts permit the viewer to contribute his own interpretations or originations to the scene whereas illustrations are “too literal” and give him the whole works.

To evoke an emotion in fine arts, the spectator must be invited to contribute part of the meaning.

In a poster, the viewer is most often intended to be clobbered.

In illustration, the viewer is intended to be informed.

A work of fine art can elicit quite different emotional contributions from one member of an audience to the next as he is left free to some degree to contribute meaning and emotion at his choice.

In fine arts, the viewer must supply something to make it complete.

Fine arts evoke some chord in the viewer’s nature or past.

**AUDITING THE DIANETIC CLEAR**

(Ref: HCOB 1 Dec 78 PROGRAMMING THE  
DIANETIC CLEAR  
FOR HIS NEXT STEP  
HCOB 8 Oct 70 C/S Series 20  
PERSISTENT F/N  
HCOB 19 Apr 72 C/S Series 77  
“QUICKIE” DEFINED)

It has recently come to my attention that some auditors are delivering grades in outrageously short periods of time to Dianetic Clear pcs and only giving Quad Grades to the Dianetic Clear without making full use of the Expanded Grades. Such pcs are being denied the full gains of the grade processes due to Quickie Grades—out-tech.

From this point forward, anyone auditing a pc who is Dianetic Clear or Natural Clear, on the grades, must:

- 1) M9 and starrate HCOB 8 Oct 70 C/S Series 20 PERSISTENT F/N,
- 2) M9 and starrate HCOB 19 Apr 72 C/S Series 77 “QUICKIE” DEFINED and
- 3) Clay demo the consequences of Quickie Grades.

It is the responsibility of the C/S to see that the above checkouts occur without stopping or slowing delivery lines.

These actions will ensure that the Dianetic Clear has the opportunity to attain *all* the benefits of the grades. In addition to the immediate abilities gained from the grades being properly delivered, having his grades really IN will prevent the pre-OT from running into difficulties on the OT levels.

The grades are a very essential part of the Grade Chart and must not be delivered over a persistent F/N or skimped on in any way. Let's *Keep Scientology Working!*

Iss II	SPECIAL INTENSIVE
	ASSESSMENT LIST
HCOB 3 May 79	DIANETIC CLEAR
	SPECIAL INTENSIVE,
	C/S AND AUDITOR
	REQUIREMENTS)

With the boom in Dianetic Clears it became necessary that a procedure be developed so that the state of Clear would be safeguarded and so that those who did achieve Dianetic Clear could get it properly acknowledged and attain *a full* resurgence of the state.

The Dianetic Clear Special Intensive is designed to sort out and handle the following situations:

1. When an item stating the pc has gone Dianetic Clear has read on a C/S 53, GF, L3RF, End of Endless Drug Rundown List or Int RD Correction List or any other correction list, and the read has been confirmed (i.e. it is not a false or protest read or read on assertion).

Such a read is only two-way commed to F/N, and is not Date/Located or otherwise handled at this point. The person is signed up for a Dianetic Clear Special Intensive, during which he will get the state of Clear fully polished up and rehabilitated.

2. When an individual thinks he is or might be Dianetic Clear.
3. When a person has attested to Dianetic Clear and has not had a formal auditing session to establish it, but has only had a mere D of P interview.

(Trying to audit or rehab in an interview is out-tech, a misuse of D of P interviews, and doesn't verify or rehabilitate the state.)

4. Where there has been some attempt made to rehab the state of Dianetic Clear on

an individual without use of this intensive, which didn't reach the correct end phenomena, or where the person wasn't doing well after the rehab.

(NOTE: The Dianetic Clear Special Intensive is not given to a non-Dianetic Clear in order to audit him up to that state. Its use is for verification and rehabbing of the state of Dianetic Clear, per the above.)

### PURCHASE OF AUDITING

If the person is in the middle of an intensive and goes Clear, or it is discovered that he has gone Clear in past auditing, the remaining hours of the intensive may be applied to the Dianetic Clear Special Intensive, provided there is a minimum of 5 hours remaining. If there is less than five hours remaining, then he would need to purchase a minimum of 5 hours for the Dianetic Clear Special Intensive.

This issue gives the exact procedure to follow to handle each of the above situations standardly in an auditing session.

With HCO PL 1 May 79, DIANETIC CLEAR SPECIAL INTENSIVES, we have established the standard lines and policy concerning Dianetic Clear checks and rehabilitation. The state of Dianetic Clear is not to be checked, verified or rehabbed in a D of P interview or any other type of interview. Such actions are done only in the Dianetic Clear Special Intensive.

This intensive is used to:

- a) Establish with no eval or inval in the procedure whether the person has actually achieved the state or not;
- b) Ensure that the person who has made it attains a FULL resurgence of the state;
- c) Establish for the person who has not yet made Dianetic Clear that he hasn't get any win he has achieved acknowledged, and get him programmed and onto his next auditing to get him further toward achieving the state of Clear;
- d) If he thinks this intensive is going to make him Dianetic Clear, it establishes him on his proper rundown and gets him that much closer to Clear.

### FES AND FOLDER STUDY

Immediately after the intensive is purchased, and before the intensive is begun the first action is a full FES of the pc's folders so that the C/S has an accurate estimation of the case in general as well as data on any originations or actions taken on the subject of Dianetic Clear. This FES must include examining the person's past auditing on the subject of Int and L&N lists, because if either of these are out you cannot audit anything else until these are handled.

### ALTERNATIVE CHOICES

As the FES and folder study may reveal out-Int, out-L&N lists, or past rough auditing needing repair, you would not then be able to proceed with the Dianetic Clear Special Intensive until out-Int, out-L&N lists or rough auditing were repaired.

During the Dianetic Clear Special Intensive you may find that the person has no interest in the questions, that he is there to become Clear and didn't go Clear in past auditing. You may encounter crashing misunderstood words on the subject of Clear or auditing.

This gives a choice between:

- a) If Int or L&N lists are out or the person has had rough auditing, sign him up for and deliver the End of Endless Int Repair Rundown, L&N list repair, or a C/S 53 to F/Ning list. (These are sold by 12t/2 hour intensives, and he would need these actions done anyway before he could proceed up the Bridge.)

NOTE: IF HE HAS GONE DIANETIC CLEAR AND YOU HAVE TO HANDLE INT, LISTS, OR REPAIR PAST AUDITING BEFORE DOING THE DIANETIC CLEAR SPECIAL INTENSIVE, YOU MUST INDICATE THAT HE HAS GONE DIANETIC CLEAR AND THAT THIS HAS NOT YET BEEN PATCHED UP. THIS INDICATION IS MADE BEFORE STARTING TO HANDLE INT, LISTS OR REPAIR.

- b) If there is no evidence of out-Int or out-L&N lists, proceed with the Dianetic Clear Special Intensive.
- c) If during the Dianetic Clear Special Intensive you find that he has no interest and didn't go Clear in past auditing, you would bridge him over to his next auditing step. Don't make him wrong for having bought the Dianetic Clear Special Intensive. but see that he gets onto a proper program and gets that much closer to Clear in the 5 hours.

The correct program is determined by the C/S and would probably be Word Clearing, Objective Processes, or NED (New Era Dianetics). At the end of this 5 hours he would be sent to the Registrar to get further intensives needed to complete.

#### THE PROCEDURE

Each step of the intensive is carried out in a formal auditing session (*never* in an interview).

##### *STEP I: TWO- WAY COMM*

Each of the following questions are taken up with the pc with good two-way communication.

It is important that all reads, tone arm action with length of reads and BDs and needle behaviour are noted clearly in the worksheets.

If the pc shows no interest in the questions, or in Dianetic Clear, don't push him to answer or let him run on an unreading question. Instead clear any misunderstood word or words on the subject of Clear, and end off to get the folder to the C/S to handle per choice c) above under Alternative Choices. This way he will at least get further toward Clear within the 5 hours and it makes him right for having got the auditing.

A typical C/S for Step 1 of the Dianetic Clear Intensive would read as follows:

- A. Give the pc an R-Factor on what you are going to be doing in this session.
- B. Fly each rud.
1. When do you feel you went Dianetic Clear?
  - 1A. (If pc doesn't feel he did go Dianetic Clear and is not interested, ask him "Tell me what you would like to accomplish in auditing?" Take this to F/N and end off for a new C/S.)
  2. What happened at that time?
  3. Is there anything else that occurred that made you feel you went Dianetic Clear?

4. How were you running Dianetics before the point you feel you went Dianetic Clear?
5. How were you running Dianetics after the point you feel you went Dianetic Clear?
6. Did you experience life differently after the point you feel you went Dianetic Clear and since that time? If so, tell me about it.
7. Has there been any invalidation of your originations regarding Dianetic Clear? (If so, get who and what was said.)
8. Has anyone evaluated for you on the subject of Dianetic Clear? (If so, get who and what was said.)
- 8A. (If it turns out that someone suggested that he was Dianetic Clear, or tried to feed him the EP or cognition, take the evaluation or suggestion earlier similar to F/N, and end off for a new C/S.)
9. Did you experience any other changes not already mentioned in this session, that you connect with the state of being Clear?
10. Has anyone discussed the subject of Dianetic Clear with you? (If so, get details and pull strings to ensure there has been no feeding of cognitions.)
11. Have you always been Clear?
12. Is there anything else you would like to say regarding being Dianetic Clear that hasn't already been covered here?

The C/S may add questions of his own to the above at his discretion but these must not be evaluative nor invalidative.

When you have full data on each of the two-way comm questions, end the session and send the folder to the C/S. The auditor should include in his proposed C/S a recommendation as to whether Step II or III should be done as the next action.

#### *STEP II: CONDITIONAL: DATE/LOCATE*

The C/S would ONLY order Step II at this point after full review of data obtained in Step I, and under the following conditions:

- a) It has been verified unquestionably in Step I that the pc had attained the state of Dianetic Clear.
- b) The pc must have given the proper evidences of having gone Clear.
- c) Pc is F/Ning with VGIs.
- d) By content of the session and pc indicators there is no bypassed charge concerning the state of Dianetic Clear to be handled.

It will be in rare instances that Step II is done at this point in the intensive. Ordinarily Date/Locate is done as the last action following the Dianetic Clear Intensive Assessment List. It is included here as a conditional step for the pc who is manifesting all of the above indicators following Step I.

Step II consists of:

1. DATE/LOCATE the point the pc went Dianetic Clear, using the full and exact procedure given in HCOB 15 Nov 78, DATING AND LOCATING.

2. When the point the pc went Dianetic Clear has been correctly dated and located, the folder is sent to the C/S.
3. If Date/Locate has been correctly done, the pc has stated the Clear cognition in some wording, has a floating, floppy needle and floating TA, with VVVGIs, the C/S may send the pc to attest to the state of Dianetic Clear.

If all of the above indicators (a thru d) are not in or if it appears the pc has any bypassed charge to be handled, the C/S would not order Step II at this point but would order Step III, the Dianetic Clear Special Intensive Assessment List be done.

*STEP III: THE DIANETIC CLEAR SPECIAL INTENSIVE ASSESSMENT LIST*

(Ref: HCOB 2 May 79 Iss II, THE DIANETIC CLEAR SPECIAL INTENSIVE ASSESSMENT LIST.)

1. Assess the Dianetic Clear Special Intensive Assessment List by Method 3, and handle each reading item per list instructions.
2. When each reading item has been handled, with pc F/Ning and VGIs, the Date/Locate step (No. 49) is taken to completion, and folder is sent to the C/S.
3. If the assessment list, including the Date/Locate step, has been correctly done, the pc has stated the Clear cognition in some wording, has a floating, floppy needle and floating TA with VVGIs, the C/S may send the pc to attest to the state of Dianetic Clear.

END PHENOMENA

The end phenomena of the Dianetic Clear Special Intensive is A FULL RESURGENCE OF THE STATE OF DIANETIC CLEAR, for the person who has achieved Dianetic Clear.

*STEP IV: CONDITIONAL: FOR THE PERSON WHO HASN'T YET ATTAINED DIANETIC CLEAR.*

On one of the above steps of the intensive, it may become obvious that the person hasn't yet attained Dianetic Clear.

Once this has been adjudicated by the C/S, the following step is done. (If the pc still has any hours remaining from the 5-hour intensive, they would be used for this C/S as it is still part of the intensive. As more hours are needed they would of course have to be purchased.)

- 1) Give the pc the R-Factor that he hasn't attained the state of Dianetic Clear at this point and that he is being programmed so as not to be denied any of the gains on the Grade Chart, as in this way he will be adequately prepared to do Advance Course levels. The C/S then programs the case so that this can occur and the pc is informed he should continue with his auditing program. (If he had already been allowed to attest earlier, that the person handling the attest cycle didn't have all the data at that time .)

If there is any upset on this indication, go to step 2; if no upset, go to step 3.

- 2) Assess a GF M5 to locate and handle the remaining charge. (A C/S 53 may be assessed if more appropriate.)
- 3) With pc VGIs in, find out if there is some valid win or gain of ability that he has achieved. There will usually be one, so get it and give him a good acknowledgement.
- 4) Send the folder to the C/S for adjudication. Unless other actions are necessary, C/S will have the pc sent to Qual to attest to his win and completion of the Dianetic Clear Special Intensive.

The end result of Step IV should be a person who feels good about the gains he has made and who is eager to continue up the Bridge.

#### D/L CAUTION

It has been found that a pc who has gone Dianetic Clear, and who then receives a messed up D/L of the point, may become uncertain as to when he actually did achieve this state. At this point the pc may feel that he didn't go Dianetic Clear after all. He may also be a Natural Clear, in which case there would not be any point to Date/Locate.

(NOTE: A messed up Date/Locate would be handled per HCOB 15 Nov 78, DATING AND LOCATING.)

#### AUDITORS AND C/SES TAKE NOTE

The questions in the above sessions indicate what kind of questions should be asked to verify the state of Dianetic Clear or Natural Clear. There may be other questions the C/S may ask in addition to these. Bear in mind that you may often be dealing with untrained pcs who don't know quite what is being looked for. An excellent comm cycle is essential in these sessions, and very smooth TR 3 and TR 4 are needed to really get your questions answered and clarified as necessary. Otherwise you may lose people who have actually made it. On the other hand, the questions are geared to find out what actually did occur and not to evaluate or lead a person into a premature attestation.

You MUST NOT EVALUATE for a pc by asking questions that ask him to describe his current case state in relation to his bank or mental image pictures, or asking him what his abilities are in relation to his mental image pictures. The rule here is not to evaluate at all as it will only lead you and the pc into trouble.

#### A SMOOTH LINE

So, now you have it clearly stated. We can now get pcs through these verification cycles smoothly. An important point here is that whatever the outcome of the DIANETIC CLEAR SPECIAL INTENSIVE, each individual should continue right along and not get parked somewhere on the Bridge. There is a lot of progress to be made and with this intensive, many more people will be enjoying the upper levels sooner.

So, get to it! This planet needs more OTs, NOW!

**DIANETIC CLEAR SPECIAL INTENSIVE  
ASSESSMENT LIST**

(Ref	HCO PL 1 May 79	DIANETIC CLEAR SPECIAL INTENSIVES
	HCOB 2 May 79 Issue I	DIANETIC CLEAR SPECIAL INTENSIVE
	HCOB 3 May 79	DIANETIC CLEAR SPECIAL INTENSIVE C/S AND AUDITOR REQUIREMENTS)

**IMPORTANT:** THIS LIST MAY ONLY BE DONE AS PART OF THE DIANETIC CLEAR SPECIAL INTENSIVE AND MAY ONLY BE USED BY A FULLY QUALIFIED AUDITOR WHO HAS MET ALL REQUIREMENTS STATED IN HCOB 3 MAY 79 DIANETIC CLEAR SPECIAL INTENSIVE—C/S AND AUDITOR REQUIREMENTS.

This assessment list is the list which is assessed as Step III of the Dianetic Clear Special Intensive. It will sort out and handle any bypassed charge which would prevent a resurgence of the state of Clear. This list is only to be assessed when the C/S has ordered the auditor to do so.

It is to be assessed M3 and may be reassessed as needed. If an item is seen to read but is met with the pc groping, puzzling, or frowning, check False and then Protest if necessary. Don't let him stew in a baffled state on a question as he can easily go into inval at this point.

The end phenomena of the Dianetic Clear Special Intensive Assessment List is a full resurgence of the state of Clear with the accompanying meter phenomena. (Ref: HCOB 5 Dec 78 C/S Series 105 DIANETIC CLEAR ATTESTS—ADDITIONAL DATA). The session must *be ended off* when that occurs. No "say or ask." Just a good ack and an "End of Session." This can happen before getting to item No. 49.

When all reading lines on this list have been handled to F/N. the auditor would then Date/Locate the point per item 49 (if the Clear cog has been originated).

On occasion, it may show up that the person didn't actually make it. When this happens or is suspected. send the folder to the C/S upon completing the item you're working on. Refer to HCOB 2 May 79 Iss I DIANETIC CLEAR SPECIAL INTENSIVE for the handling should the C/S confirm that this is the case.

- 1) Assess the following:
  - A) INTERIORIZED INTO SOMETHING? \_\_\_\_\_
  - B) GO IN? \_\_\_\_\_
  - C) WENT IN? \_\_\_\_\_
  - D) PUT IN? \_\_\_\_\_
  - E) WANT TO GO IN? \_\_\_\_\_

- F) CAN'T GET IN? \_\_\_\_\_
- G) KICKED OUT OF SPACES? \_\_\_\_\_
- H) CAN'T GO IN? \_\_\_\_\_
- I) TRAPPED? \_\_\_\_\_
- J) FORCED IN? \_\_\_\_\_
- K) PULLED IN? \_\_\_\_\_
- L) PUSHED IN? \_\_\_\_\_

(If you get a valid read on any of the above, and it is not a false read or protest read, end off for a new C/S, as if Int is out you must handle it before doing any other auditing action. Ref: HCOB 24 Sep 78RA, Int Series 4RA, THE END OF ENDLESS INT REPAIR RUNDOWN.)

- 2) IS THERE A LIST ERROR?  
(L4BRA and handle) \_\_\_\_\_
- 3) HAVE YOU BEEN GIVEN A WRONG ITEM?  
(L4BRA and handle) \_\_\_\_\_
- 4) HAVE YOU BEEN GIVEN A WRONG INDICATION?  
(L4BRA and handle) \_\_\_\_\_
- 5) IS THERE AN OUT-LIST?  
(L4BRA and handle) \_\_\_\_\_
- 6) DO YOU HAVE AN ARC BREAK?  
(Handle the ARC break E/S to F/N) \_\_\_\_\_
- 7) ARE YOU UPSET?  
(Handle the ARC break E/S to F/N) \_\_\_\_\_
- 8) DO YOU HAVE A PROBLEM?  
(Itsa E/S to F/N) \_\_\_\_\_
- 9) ARE YOU WITHHOLDING ANYTHING?  
(Use withhold system E/S to F/N) \_\_\_\_\_
- 10) IS THERE SOME SORT OF WITHHOLD?  
(Use withhold system E/S to F/N) \_\_\_\_\_
- 11) HAVE YOU COMMITTED ANY OVERTS?  
(Get what it is E/S to F/N) \_\_\_\_\_
- 12) REGARDING DIANETIC CLEAR, DO YOU HAVE AN ARC  
BREAK?  
(Handle the ARC break E/S to F/N) \_\_\_\_\_
- 13) REGARDING DIANETIC CLEAR, ARE YOU UPSET?  
(Get what upset is and handle the ARC break) \_\_\_\_\_
- 14) REGARDING DIANETIC CLEAR, DO YOU HAVE A  
PROBLEM?  
(Itsa E/S to F/N) \_\_\_\_\_

- 15) REGARDING DIANETIC CLEAR, ARE YOU WITHHOLDING ANYTHING?  
(Use withhold system E/S to F/N) \_\_\_\_\_
- 16) HAVE YOU BEEN AUDITED OVER OUT-RUDIMENTS?  
(Standard handling of the out-rud(s) E/S to F/N) \_\_\_\_\_
- 17) H A V E Y O U B E E N I N T E R V I E W E D O V E R  
O U T - R U D I M E N T S ?  
(Standard handling of the out-rud(s) E/S to F/N) \_\_\_\_\_
- 18) HAVE YOU BEEN AUDITED ON ENGRAMS AFTER GOING CLEAR?  
(Indicate and do L3RF INDICATING READING ITEMS ONLY—DO NOT RUN ANY DIANETICS) \_\_\_\_\_
- 19) HAVE YOU HAD TROUBLE WITH DIANETICS?  
(Indicate and do L3RF *INDICATING* READING ITEMS ONLY—DO NOT RUN ANY DIANETICS) \_\_\_\_\_
- 20) HAVE YOU HAD TROUBLE GOING EARLIER SIMILAR ON DIANETICS?  
(Indicate and do L3RF INDICATING READING ITEMS ONLY—DO NOT RUN ANY DIANETICS) \_\_\_\_\_
- 21) DO YOU HAVE UNFLAT R3RA . . . UNFLAT R3R?  
(L3RF and *INDICATE*—DO NOT RUN ANY DIANETICS) \_\_\_\_\_
- 22) HAVE YOU BEEN FORCED TO RUN DIANETICS?  
(L3RF and *INDICATE*—DO NOT RUN ANY DIANETICS) \_\_\_\_\_
- 23) WAS IT NOT YOUR INCIDENT?  
(Ind. E/S to F/N) \_\_\_\_\_
- 24) WERE YOU PUTTING THINGS THERE TO RUN?  
(Ind. 2 W C to F/N) \_\_\_\_\_
- 25) WERE YOU LOOKING FOR THINGS NOT THERE?  
(Ind. E/S to F/N) \_\_\_\_\_
- 26) WERE YOU PUTTING SOMETHING THERE WHERE THERE WAS NOTHING?  
(Ind. 2WC to F/N) \_\_\_\_\_
- 27) ARE YOU PROTESTING ANYTHING?  
(Itsa E/S to F/N) \_\_\_\_\_
- 28) DID YOU GO CLEAR FROM PAST-LIFE AUDITING?  
(Ind. to F/N and then DATE/LOCATE after remaining lines on this list have been F/Ned) \_\_\_\_\_
- 29) HAS THERE BEEN ANY INVALIDATION OF DIANETIC CLEAR?  
(2WC to F/N) \_\_\_\_\_
- 30) HAS THERE BEEN ANY INVALIDATION OF YOUR PREVIOUS AUDITING?  
(2WC to F/N) \_\_\_\_\_
- 31) HAVE YOU BEEN INVALIDATED?  
(Itsa E/S to F/N) \_\_\_\_\_

- 32) HAVE YOU INVALIDATED THE FACT YOU WENT DIANETIC CLEAR?  
(2WC to F/N) \_\_\_\_\_
- 33) HAS ANYONE SUGGESTED TO YOU THAT YOU DIDN'T MAKE IT?  
(Itsa E/S to F/N) \_\_\_\_\_
- 34) HAS THERE BEEN ANY EVALUATION?  
(2WC to F/N) \_\_\_\_\_
- 35) HAS YOUR BEHAVIOR BEEN EVALUATED?  
(2WC to F/N) \_\_\_\_\_
- 36) REGARDING DIANETIC CLEAR, HAS THERE BEEN ANY EVALUATION?  
(2WC to F/N) \_\_\_\_\_
- 37) DO YOU FEEL SUPPRESSED?  
(2WC to F/N. C/S to program as needed for further PTS handling) \_\_\_\_\_
- 38) ARE YOU PTS?  
(Same handing as question 37) \_\_\_\_\_
- 39) IS SOMEONE OR SOMETHING HOSTILE TO YOU?  
(Same handing as question 37) \_\_\_\_\_
- 40) HAVE YOU BEEN PREVENTED FROM ATTESTING?  
(2WC to F/N. Get off any protest and/or out-rud) \_\_\_\_\_
- 41) REGARDING DIANETIC CLEAR, DO YOU FEEL YOU CAN'T BELIEVE IT?  
(2WC to F/N) \_\_\_\_\_
- 42) ARE YOU WAITING FOR A SPECIAL COGNITION?  
(2WC to F/N) \_\_\_\_\_
- 43) COULDN'T YOU UNDERSTAND WHAT WAS BEING DONE?  
(2WC to F/N) \_\_\_\_\_
- 44) HAVE YOU BEEN OVERREPAIRED?  
(Find out what and clean up any protest. Rehab to F/N or D/L. If it is Dianetics or Dianetic Clear, DATE/LOCATE ONLY and END OFF!) \_\_\_\_\_
- 45) IS THERE SOMETHING THAT SHOULD HAVE READ BUT HASN'T?  
(Get what and handle) \_\_\_\_\_
- 46) HAVE YOU ALWAYS BEEN CLEAR?  
(Indicate. Get off any invalidation. Do *not* attempt to do No. 49, Date/ Locate.) \_\_\_\_\_
- 47) ARE YOU PRETENDING TO BE CLEAR TO GET FREE SERVICE OR FOR STATUS?  
(Pull this as a W/H. Do *not* try to Date/Locate as he has not attained the state of Clear. He may have other W/Hs missed in auditing which need to be pulled. Such a person is probably PTS and should be C/Sed for a PTS interview and handling.) \_\_\_\_\_

- 48) IS SOMETHING ELSE WRONG? \_\_\_\_\_  
(2WC to find what. Handle it if you can or return to C/S)

THE AUDITOR MAY REASSESS THIS LIST M3,  
ESPECIALLY IF HEAVILY CHARGED THE FIRST TIME  
THROUGH.

AFTER ALL READS ARE HANDLED AND THE PC IS VGIs,  
*DO* THIS STEP BUT ONLY IF THE CLEAR COG HAD  
ALREADY BEEN GIVEN.

(THIS IS *NOT* ASSESSED: IT IS *DONE*)

- 49) DATE/LOCATE THE POINT THE STATE OF DIANETIC  
CLEAR WAS ATTAINED. \_\_\_\_\_  
(Ref: HCOB 15 Nov 78 DATING AND LOCATING for exact  
procedure)

**DIANETIC CLEAR SPECIAL INTENSIVE  
C/S AND AUDITOR REQUIREMENTS**

(Ref: HCO PL 1 May 79 DIANETIC CLEAR  
SPECIAL INTENSIVES  
HCOB 2 May 79 DIANETIC CLEAR  
Issue I SPECIAL INTENSIVE)

Due to the nature of the Dianetic Clear Special Intensive and the vital data in its accompanying issues, the following requirements must be fully met by every C/S and auditor delivering this intensive to any pc:

1. Must be Dianetic Clear, Clear or above.
2. Must not fall under any of the A-J categories covered in HCO PL 27 Oct 64, POLICIES ON PHYSICAL HEALING, INSANITY AND TROUBLESOME SOURCES.
3. Must be fully bonded by HCO of their org before given access to any confidential Dianetic Clear HCOBs.
4. Must have a valid permanent cert for the level of CI IV or above in order to audit the Dianetic Clear Special Intensive.
5. Must have a valid permanent cert as a CI IV or above C/S in order to C/S the Dianetic Clear Special Intensive.
6. Must Method 9 Word Clear and get a starrate checkout on this HCOB (HCOB 3 May 79 DIANETIC CLEAR SPECIAL INTENSIVE—C/S AND AUDITOR REQUIREMENTS). . .
7. Must have full Qual OK to do two way comm.
8. Must Method 9 Word Clear and get a starrate checkout on HCOB 15 Nov 78 DATING AND LOCATING.
9. Must clay demo the Date/Locate procedure.
10. Must Method 9 Word Clear and get a starrate checkout on the following HCOBs:
  - A) HCOB 24 Sep 78 Iss III DIANETIC CLEAR.
  - B) HCOB 24 Sep 78 Iss IV CONFIDENTIAL—THE STATE OF DIANETIC CLEAR.
  - C) HCOB 29 Nov 78 C/S Series 104 DIANETIC CLEAR ATTESTS.
  - D) HCOB 5 Dec 78 C/S Series 105 DIANETIC CLEAR ATTESTS—ADDITIONAL DATA.

- E) HCOB 5 Mar 79R DIANETIC CLEAR FALSE DECLARES.
- F) HCO PL 1 May 79 DIANETIC CLEAR SPECIAL INTENSIVES.
- G) HCOB 2 May 79 Iss I DIANETIC CLEAR SPECIAL INTENSIVE.
- H) HCOB 2 May 79 Iss II DIANETIC CLEAR SPECIAL INTENSIVE ASSESSMENT LIST.

11. Must fully drill each step of the Dianetic Clear Special Intensive (per HCOB 2 May 79 Iss I—DIANETIC CLEAR SPECIAL INTENSIVE).

*Art Series 8*

**A PROFESSIONAL**

Ref: HCOB 4 March 1979 Art Series 6  
ART IN ITS BASICS

A professional is somebody that can produce a high quality product. A professional is not an audience, and when he views things, he looks for what's good in them and neglects the poor, low-grade things. The reason he does this is so he has an ideal scene. Without an ideal scene, he just operates off technical data and produces, artwise, a low quality product and isn't a professional. Without an ideal scene, he can never get a preconception of the shot.

In viewing things that approach an ideal scene, the true professional works out how they did it and when presented with similar tasks of production, can bring off things which approach an ideal scene in his own work.

Another thing that separates a member of the audience from a professional is that the professional only thinks in terms of getting out an actual product. It never enters his head that he's just there for the ride or that being an "expert" is enough. A member of the audience has no faintest concept or idea of getting out a product.

A professional knows the rules of the game as a matter of course so that he can achieve in the upper strata above that, a high quality of art.

When a person simply looks at everything as to whether he "likes them" or "not likes them," he's just an audience and he's on the wrong side of the footlights.

This applies to a writer, a director, an actor, a cameraman, a makeup man, a propsman, a wardrobe man, a producer, an artist, any professional.

Without this viewpoint, he never accumulates ideal scenes, so how could he produce anything good? He never has a memory library to compare his own products to.

Be a professional.

URGENT—IMPORTANT

**CRASHING MIS-Us: THE KEY TO COMPLETED  
CYCLES OF ACTION AND PRODUCTS**

Ref: HCOB/PL 26 Mar 79R MISUNDERSTOOD WORDS AND  
CYCLES OF ACTION  
HCO PL 26 Jan 72 1 Admin Know-How Series 29  
Exec Series 5  
NOT DONES. HALF DONES AND  
BACKLOGS  
HCO PL DEBUG TECH (LRH ED 302 INT Rewritten)  
THE STUDY TAPES

INCOMPLETE CYCLES

A cycle of action is the sequence that an action goes through, wherein the action is started, is continued for as long as is required and then is completed as planned.

To produce products one has to also have completed cycles of action. A completed cycle of action normally results in a product.

Where steps A-H of HCO PL DEBUG TECH (LRH ED 302 INT Rewritten) have been done to no avail, meaning products are not yet rolling out of the area, then the tech herein is to be used as step I of DEBUG TECH to get the area producing.

Just as a misunderstood word can prevent a person from understanding the remainder of what is heard or written, a misunderstood can prevent a cycle of action from completing.

This is extremely valuable data as it gives us *the* major reason people don't complete cycles of action. It is utterly amazing and magical. An area is plagued with not dones and half dones and no products resulting and one would swear that the reasons were infiltration, sabotage, evil intentions, you name it. But in the majority of cases it will be found that the above discovery is operating. The person has a Mis-U on a key word involved in the cycle of action.

The person usually doesn't realize he has a misunderstood. It is revelatory to him when he finds it so it isn't necessarily true that he will know. So he himself additionally has a number of wrong Whys and wrong reasons.

There is usually one principal misunderstood that is preventing the cycle of action from completing. This is called the "Crashing Mis-U."

APPLICATION

While finding Crashing Mis-Us is not a substitute for full Word Clearing and while it is also true that the person can be PTS and be engaged in creating problems, it is nevertheless uniformly true that a Crashing Misunderstood lies somewhere in the subject matter of the cycle of action which is not being completed.

The tech given in this HCOB can be used by anyone who has checked out on it and drilled it. The steps given here cover metered and nonmetered Crashing Mis-U finding. Using a Word Clearing meter will make the action faster and more accurate but it is not vital.

The whole action does not take long to do and will save hours of purple-faced desk pounding and frustrated attempts to get people to produce.

It is to be USED by execs, Supervisors, Cramming Officers, Estos, missionaries, etc., etc.—anyone who is responsible for seeing that products are gotten out.

Crashing Mis-U tech is used in debugging products. It comes as step I of HCO PL DEBUG TECH. If any of the earlier steps are out then you can find all the Crashing Mis-U's you like and still not get one single product.

## THEORY

A cycle of action is a parallel to a cycle of understanding or a cycle of communication. The cycle of action is the physical universe expression of a cycle of communication. The cycle of communication occurs in the physical universe! A misunderstood interrupts not only the cycle of communication or understanding, but also interrupts the motion or action. That is the discovery. A person is trying to get the product of a finished house. He doesn't understand the word "plumbing." He may tell you that it is because of the price of materials, that nobody can dig in that kind of ground, that certain types of pipes aren't available, that he is having trouble with his wife—and his supervisors and bosses will tell you that he is just plain lazy, that he has been bribed not to, that he is a secret drinker maybe, and even less printable Whys. But when you get right down to it and use the Tech you find that he has a Crashing Mis-U on the word "plumbing." He thinks it is defined as "drilling holes." Mentally this interrupts his ability to think any thoughts through on the subject. His cycle of understanding is being interrupted by the Crashing Mis-U. This then has a parallel cycle, the cycle of action of trying to get the finished house. Thus for want of understanding of a word we get the actual physical inability to finish a cycle of action on a connected subject. I can assure you that ethics conditions, threat of suit, physical violence, none of these things are going to get anybody a finished house. Only when his Crashing Mis-U "plumbing" is found and properly handled are you going to get a finished house.

This tells you incidentally that the time track of shattered civilizations must have been strewn with these things. It doesn't only apply to a house, it applies to almost anything man has ever set out to produce. It would even apply to some general who suddenly won't finish a battle or a war. Amazingly you will discover that the Crashing Mis-U has probably been Man's single greatest barrier to actually creating and maintaining a civilization. You have to work with the tech yourself to actually appreciate its depth and power.

## CRASHING MIS-U FINDING

Where you have a person not getting products, not completing cycles of action despite attempts to debug per A-H of HCO PL DEBUG TECH, you have to get in there and find the Crashing Misunderstood. It will be directly on the subject. There are various approaches to doing this, starting very simply and getting more complex. You would start off using the simplest approach and then, if that didn't handle, you would go into a more thorough handling, and so forth.

## PROCEDURE

1. It is apparent or it is reported that someone is failing to complete cycles and is not getting out his products.
2. Before even talking to him you inspect his area as regards products per HCO PL DEBUG TECH:

- A. You look for what products have been gotten out in the past.
- B. You look for products that are there completed.
- C. You look for products that can be attained in the immediate future.
- D. You look for value of products as compared to overall cost of production.
- E. You look for overt products or cycles where products continuously have to be redone, resulting in no or few products.

This requires a bit of homework.

3. *CONDITIONAL*: If your inspection finds he is getting out actual products and that he is not producing overt products, correct the reports and let him get on with it. Do not go on with the steps in this procedure.

4. Now if the earlier debug steps per HCO PL DEBUG TECH have been done and it is obvious from your inspection that this person is still not getting out the products he is expected to get out or should be getting out you know that he has a Crashing Mis-U. You just start hunting and punching around for the Crashing Mis-U on the subject of the products he should be but is not getting out. “What don’t you understand about that subject?” “What Mis-U word is there on this subject?” You keep at it this way until you get the Crashing Mis-U. On the meter you would use reads to steer him to the area and the Mis-U.

Crashing Mis-U finding differs from regular Word Clearing in that it is an investigatory procedure which utilizes all methods of Word Clearing and whatever else it takes to find the Crashing Mis-U. You can use Method 2, Method 3, Method 4, Method 5, Method 6 or Method 9 to help you find the misunderstood. The person you are handling may be sure that the Mis-U is in a certain issue but doesn’t know what the word is. It may require Method 2 or Method 9 to actually dig it out. Often Method 5 is used whereby the Word Clearer asks for the definition of individual words, checking to make sure that *he* knows the definition as well.

The point is that you are trying to narrow down the area further and further until you finally get the Crashing Mis-U and any method of Word Clearing or investigation that helps you do this is legitimate.

5. You clear this word fully to VGIs (on the meter it would F/N). Don’t assume the dictionary will necessarily give the right definition—a missing or false definition might be the root of his trouble. If no dictionary, textbook or encyclopedia can be found that gives a satisfactory definition for the word you are still not stopped. You can go over all of the related material to the word and work out with him what definition has been omitted or what is the proper definition for it. This is a last resort but it is necessary that anyone doing Crashing Mis-U knows this as Man has not necessarily properly defined everything in his technical sphere or culture. **WARNING**: The inability to find the definitions is a rare case. Only work out the definition when you have exhausted all possible texts and dictionaries and have cleared all of the words you have encountered in them. Whether you looked it up and found it or couldn’t find it and had to evolve it make sure the definition is useful to him and that it blows his difficulty with it.

6. Assure yourself that this was his Crashing Mis-U and that it is real to him. When he finds it he will quite often be chagrined and then go into VGIs and cognite and may change considerably right in front of your eyes.

7. Send him to the Examiner.

8. Run some Reach and Withdraw in the area where he had difficulty to a good win and tell him to get on with it.

9. Check back later to see that he is now completing cycles of action and getting his products out. -If he is then you have got it. That *is* the EP.

10. If he still isn't getting out the product then you haven't yet found the Crashing Mis-U and you have some more work to do. Go over his area with him and look for things that he has difficulty with. Often it will leap right up at you. Get him to tell you what the difficulty is.

11. Now question him to find the Mis-U on that subject that is behind those difficulties. Often his statement of the difficulty will contain the Mis-U itself. On a meter you would get a read as he says it. Off the meter you would have to take the words that he said and ask him what they meant. For example he might say "The plumbing always seems to be the hardest part." On a meter "plumbing" would read and you would take it up right away. If you weren't using a meter you could say "Well what does the word 'plumbing' mean?" and he'll say "Well, it means, uh . . . 'drilling holes'" and there you have it. Now clear the word as in step 4 above, run your Reach and Withdraw and send him back to work.

#### END PHENOMENON

The end phenomenon (EP) of this action is the person now producing the products he wasn't able to produce before and completing the cycles of action related to his product.

The end phenomenon is not: the fellow now all VGIs and saying he can get the products, feeling great, etc. That is all very well but **IS HE NOW GETTING OUT THE PRODUCTS?** And you keep handling him with Crashing Mis-U's and related handling until he is producing the products and then you know you have completed the Crashing Mis-U handling.

#### ADDITIONAL FACTORS

There are various factors which must be known by anyone doing Crashing Mis-U finding and used if the above simple steps do not get the desired result of the person now tearing along getting his products.

#### O/Ws

Since overts and withholds stem from Mis-U's in the first place, you are liable to run into O/Ws when doing Crashing Mis-U finding. If the person has O/Ws in the area this will be manifested in the form of resistance to finding the misunderstood word either overtly or covertly. An example of this would be the person misdefining a word and then when you have him look it up in the dictionary he says that he knew it all along. Or it could be straight noncooperation.

If you are using the Word Clearing meter, the handling for the situation above would be to pull the O/Ws. To do this simply ask "Do you have any overts in the area of ?" and pull them, each one earlier similar to F/N with all specifics until the question F/Ned on asking. Do the same with withholds and missed withholds. Since you run the risk of missing withholds if you try pulling withholds without a meter, in doing the nonmetered Crashing Mis-U finding the way you would handle the above situation is to ask the person if he has some withhold concerning the area you are trying to handle, and getting him to tell you about it. If you do this then you must get him meter checked to ensure nothing has been missed.

There is another manifestation which can be encountered. A Crashing Mis-U simply cannot be found at all yet it obviously must be there. The person seems to cooperate somewhat but no Crashing Mis-U turns up. This is again an O/W phenomenon. The person is holding on to his withhold so hard it is burying the Crashing Mis-U.

Again you could run the risk of missing a withhold if you simply ask him for his withhold on the subject but we cannot rule out the fact that doing so sometimes works. The Crashing Mis-U simply doesn't seem to exist yet by all evidence of no products or overt products it must exist so simply asking him if he has a withhold on the subject gives us the gain of finding it straight off immediately and, if we meter check him afterwards to find out if he has any more withholds, it is very likely to pay off. Once he has gotten off the withholds the Crashing Mis-U can pop right up. When you miss a withhold, remember, a fantastic amount of upset can be caused for the Word Clearer or the person himself. So don't indulge in missing withholds.

Once the O/Ws have been pulled or gotten off by whichever of the above methods, you will now be able to find the Crashing Mis-U and clear it up.

Sometimes in clearing the Mis-U you will hit a chain of overts connected with the subject, and these will have to be cleared up or you may not get your product. An example of this was a cleaner who could not clean. The Crashing Mis-U found was the word "clean" and this went straight into whole track overts which had to be fully handled. When the overts and the Mis-Us were cleared up the person went straight out and started getting real products.

### DEFENSE MECHANISM

You may find the person has a defense mechanism which would make it impossible to find the person's Crashing Mis-U as he believes it is OK to have Mis-Us in that area. The defense mechanism consists of false data which acts as a justifier for the Mis-U. An example of this would be "I don't have to know that as I'm not a professional" or "Well I'm new to the post" and so on. The handling would be simply to ask the person if there was some reason why it would be OK to have Mis-Us in that subject and then strip off the false data and justifications. Then you can recheck for the Crashing Mis-U and you will find it is now available. (See HCOB FALSE DATA STRIPPING)

### THE WORD CLEARER'S MIS-Us

When he has found a Crashing Mis-U on the subject the Word Clearer's first action is to himself look up the definition and the derivation of the word so he himself understands it. He then gets it fully cleared up with the person. This is all done right there in the Crashing Mis-U session. If he doesn't do that he won't be able to perceive how the person has misunderstood it or misapplied it previously.

*Example:* A person in charge of the lights in a theater could never get anything lit. A Crashing Mis-U was looked for and the word "scene" was found. However the person glibly read the dictionary definition and said he had it already. The Word Clearer made him look up the derivation wherein it was found that the glib person didn't understand it at all, for the person, when asked for an example, described an actor and how he would put the light on the actor.

The Word Clearer having looked it up first, before handing the dictionary over, knew that a scene was a stage. It was found that the person's Crashing Mis-U had so introverted him that he had never perceived that a stage had backdrops, scenery and a floor. The Word Clearer practically had to pry him out of his head to get him to see that a stage had walls and backdrops and that these had to be lighted.

If the Word Clearer had not known the correct definition of "scene" he would never have detected that the person thought it meant "actor" even though the dictionary said it had to do with scenery.

Crashing Mis-U tech would have failed as the person was very convincing as to how he knew it all already yet in the example was giving a totally incorrect demonstration.

Showers of light broke through when the person realized for the first time that he had to light the whole stage and had been in total mystery why people kept yelling at him. This had been going on for a long, long time in the person's job and was making him a total failure at it.

## PRACTICAL USAGE

Always ask for instances of practical usage from the person you have found a Crashing Mis-U on. From these you can detect if he's got it and if he hasn't got it he may have to work and work to clear it further.

The end phenomenon of Crashing Mis-U tech is not finding the Crashing Mis-U but getting the person totally straight on it and actually getting out the product.

## DEBUG TECH

Crashing Mis-U finding is an integral part of debug tech as covered fully in HCO PL DEBUG TECH. It comes as step I of the whole procedure. When products are not getting out, cycles are not being completed, there will invariably be Crashing Mis-U's but there may be other factors involved which also have to be resolved. The handling is just to go through the steps of the HCO PL, including Crashing Mis-U finding (step 1) and Product Clearing (step J). You may find more Crashing Mis-U's come up during or after the Product Clearing.

The whole point is that you use the whole debug tech procedure without trying to short cut it. Otherwise you get the ridiculous situation of clearing up the fellow's Crashing Mis-U on "plumbing" and then find he can't get out the product of a finished house because there are no pipes and won't be any for 3 months because the owner can't afford them. This all has to be resolved.

## IMPORTANT NOTE

Since the *sole* purpose of this debug tech is to get the person or area producing what it should be producing you would not continue past a point where this had been achieved. So for example, if after step C of HCO PL DEBUG TECH had been done (any Mis-U's on issues related to the area of production had been cleared up) the person was turning out great products in the expected quantity and time period, you would not then start looking for Crashing Mis-U's. This would act as harassment, not help. Similarly, don't use any other step of A-M of the above PL where it does not apply.

One should let people have their successes. Once you have achieved what is desired with this tech, don't carry on.

The rule is: DON'T CONTINUE DEBUGGING PAST THE POINT WHERE THE PERSON OR AREA HAS BEEN SUCCESSFULLY DEBUGGED AND PRODUCTS ARE NOW ROLLING.

And you would know it was debugged because products of the expected quality would be coming out of the area in the expected quantity.

## GRADIENT APPROACH

The whole idea is to try the simplest approach first and then if that doesn't work go deeper.

The end phenomena for all this is a person cheerfully and willingly getting his products and these appearing visible in the physical universe.

## EXAMPLES

This is how it might go: you might find yourself in the position of being responsible for seeing that the house, in the example given earlier on this bulletin, got

finished. You notice that the deadline has been exceeded by weeks and still there is no house.

The first thing to do would be the inspection as in step 2 of the procedure above. You would discover that the house has no plumbing; that is what is holding up its completion. Points A to H in HCO PL DEBUG TECH have been gone over but things still aren't moving. So you approach the contractor personally and go over this with him. You start hunting and punching around for the Mis-U. Ask him "Is it possible that there is some word you don't fully understand in the area of building this house?" And he'll say: "Well, no—it's just that I don't have enough men to do the plumbing." (Now you already know from step E of your prior inspection that he does have adequate personnel.) So you say "Well, what about plumbing? Is there some word connected with plumbing that you don't get?" He'll say "No, but I've always had trouble with it." Now you ask him "What does 'plumbing' mean?" And when he says, "Everybody knows that plumbing means drilling holes," you have his Crashing Mis-U. As you clear this up his initial embarrassment will turn into floods of relief and off he will go and get the house finished up in no time.

Now if you were able to use a Word Clearing meter, so much the better. You would put him on the meter and ask him something like: "Now on the subject of building houses is it possible you could have a misunderstood?" The meter will read on this and you use the read to steer him to the area and find the misunderstood word. This is then cleared to a floating needle (F/N) and very good indicators (VGIs).

It might not be as straightforward as above. The case could arise where there was plenty of evidence that the person has a Crashing Mis-U yet, despite arduous search, nothing comes up. You would then ask the person: "Is there something about all this you haven't told me?" If your TRs are good and you don't have a challenging or accusative attitude he will come up with it: "I can't finish the house because the machine that cuts and bends pipes is broken." With a bit of further questioning you find that he broke the machine and has been withholding this for weeks and didn't even dare mention that it needed repair for fear of being punished. A simple meter check would ensure that nothing was missed. Then up would pop the misunderstood on "plumbing" which he thought meant drilling holes. No wonder he broke the machine: he was trying to drill holes with it! So now with his withhold off and his MisU cleared up he will feel immensely relieved and will most likely be able to go right off and finish up the house. At the most you might need to product clear him and run some Reach and Withdraw in the area per the issues on Product Clearing in this series.

## CASE HISTORIES

Here are some actual case histories to show how Crashing Mis-U finding goes and the sort of things one might expect to come across and have to handle in order to debug a cycle or product with this tech.

*CASE A:* This was a senior executive who was on the verge of being removed from post. The general manager was impatient with the lack of products from that area.

A. The Word Clearer inspected the executive's department and found that the main area of difficulty seemed to be handling personnel.

B. The Word Clearer put the executive on the meter and asked him if there were any products he should be getting out but wasn't. No Crashing Mis-U came up on this directly.

C. By two-way communication the Word Clearer confirmed that the main area of difficulty was handling personnel.

D. He took the words that were directly related to the area mentioned—"personnel," "staff," etc.—and asked the executive what each one meant. He checked the dictionary to ensure the person had a full understanding of the words. The exec seemed fine on these.

E. There was one word the executive seemed to have some hesitation on so the definition of that word was word cleared Method 9. A few words were cleared up but none of them turned out to be the Crashing Misunderstood.

F. The area of difficulty was further narrowed down by two way comm to “the obtaining and posting of personnel.”

G. Words relating to this area were checked. Some of the definitions were M9ed to make sure the exec really did have them straight—still no Crashing Mis-U was found.

H. The executive originated an area of difficulty to do with handling authority that he felt was interfering with his ability to obtain and post personnel. No MisUs were found in this area however.

I. The Word Clearer asked for overts and withholds in the area (“Is there something you’re not telling about this area?”, “Is there something you’ve done you don’t want known?” etc.) but none were found.

J. He then checked for false data (something that would justify having misunderstands on that subject) and found that the exec was loaded with false data on the subject of authority. This was handled by two way comm—it did not take much to clean up as the exec was realizing by this time where his trouble was coming from and was only too willing to get it sorted out.

K. The word “authority” was found as the Crashing Misunderstood. This became obvious as soon as the false data came off. This word was fully cleared to a floating needle and very good indicators and the executive volunteered that he felt ready to go back on post and produce.

The Word Clearer ended off and returned the executive to work. He started producing actual products and doing well.

*CASE B.:* This was a technician in a highly specialized and complex field who was having difficulty with his job and was unable to get approval on some tests that were urgently needed.

A. An inspection of his area revealed the situation to be exactly as described.

B. The Word Clearer put him on the meter, oriented him to the situation and asked him: “Is there any single misunderstood word in the area of these tests?”

C. A long search ensued in which several words were cleared, none of which turned out to be the Crashing Mis-U.

D. The Word Clearer then checked for a withhold and found out that the technician had never understood an important dispatch relating to the cycle and had been withholding the fact. This withhold was cleared up to a floating needle.

E. This was followed by further search for the misunderstood which uncovered an area of upset and losses to do with technical writing.

F. The Word Clearer checked for the misunderstood that must have preceded the losses and the Crashing Mis-U was found—a very basic technical word in the subject.

G. He attempted to clear the word with a dictionary but found no adequate definition .

H. Encyclopedias and textbooks were consulted but none of them had a useful definition .

I. Eventually, by combining textbooks and working out what it should be, a workable definition was arrived at and the subject became clear to the technician who was greatly relieved.

The technician returned to work and started producing. The very next set of tests submitted were approved.

*CASE C:* This case was an executive who was having trouble getting people in his area to produce. The actions below were done unmetered.

A. The product inspection showed the executive to be unable to get his juniors to produce.

B. He arrived for the Crashing Mis-U finding quite upset and this had to be handled before anything else.

C. The Word Clearer went over his upset with him and sorted it out to a point where he was willing to go ahead with the action.

D. Various words were checked (“What does ‘junior’ mean?” “What is the definition of ‘executive’?”) and so forth. No Crashing Mis-U was found.

E. The area of difficulty was narrowed down further to “getting compliance.”

F. On checking, the Word Clearer found that the exec had a Crashing Mis-U on the word “compliance” which was cleared to very good indicators.

The executive went back to work and found he could now handle his juniors.

*CASE D:* This person was in charge of briefing missions. He had recently had trouble with this and some missions had fired without full briefing resulting in failures.

A. The Word Clearer asked him, on the meter, if there was anything concerning his post he was having difficulty with.

B. The difficulty was narrowed down by two-way comm until it was established that he felt he couldn’t brief them fully due to lack of time.

C. The Word Clearer checked for a Crashing Mis-U concerning this difficulty. None was found.

D. He then asked if there was something the person was withholding about the subject. Several chains of overts were taken up, each one to a floating needle, until the question itself produced a floating needle on asking.

E. The Word Clearer again asked for a Crashing Mis-U in the area and one of the words in the person’s own post title was found and cleared. This was the Crashing Mis-U.

The person was then able to get out his products.

*CASE E:* This was an auditor who was being product cleared on her post.

A. The Product Clearer discovered that there was a certain part of her post that this auditor could not handle. It was a certain aspect of handling the preclear

B. He asked her if there was one single Mis-U in the area, and helped her trace it, using the meter reads.

C. The Crashing Mis-U was found and cleared in the dictionary to very good indicators.

D. The auditor was then able to complete the Product Clearing and get back to work, her main difficulty no longer impeding her from getting products.

The above case histories show the variety of situations that can come up and the handlings that would be done. They are by no means all the situations that can arise in doing Crashing Mis-U finding.

### CAUTIONS

Make sure you guide him on the subject of products all the time. You could get right off the track and find yourself clearing up a whole subject that had nothing to do with getting out his product. An example would be trying to clear up the whole of chemistry on a photographer. There is chemistry involved in photography: the film is developed and so forth with chemicals. But the person is a photographer, not a photo laboratory technician, so he does *not* need to know all of chemistry to get his product.

Another point is that sometimes a person will have a Crashing Mis-U cleared up on himself and immediately suppose that this is the Crashing Mis-U everyone else has. This is not necessarily the case. When one has a Crashing Mis-U on “crackers” it is not necessarily true that everyone else has a Crashing Mis-U on “crackers.” The\* Crashing Mis-Us will be different. It is *their* Mis-Us one is after.

### REPAIR

If the action bogs down and can't be sorted out, or the person becomes upset during or after Crashing Mis-U finding, then the difficulty should be sorted out right away with a Crashing Mis-U Repair List. This list is done on a meter by someone qualified to do so. A botched or bogged Crashing Mis-U finding must be repaired within 24 hours.

### EFFECTS OF CRASHING MIS-US

You can tell someone has a Crashing Mis-U because when you start to question them about the cycle of action or demand the products they will go robotic on you. They sometimes just stand there gaping at you and won't even answer your question. They won't even be able to talk to you. There's another manifestation you will come up against and that is the person becoming annoyed with you. This indicates either that he *was* getting out products in the first place, or that he had a withhold in addition to a Crashing Mis-U.

The solution is not to immediately shoot them for not getting out the product. Find their Crashing Mis-U. If they get annoyed then find out which of the above it was and handle. And then the justice factor would consist of disciplining them for going past misunderstands without clearing them. You have to teach someone to get in his own ethics in this respect so that others do not have to take justice actions on him.

### SUMMARY

Well, here you have the tech that will enable you to debug failures to produce the products required of him. The person using this tech has to learn it well and become practiced in its application. Then he will get the full benefit of it and total reality on its power.

Let's get busy and, along with the remainder of debug tech, find the crashing Mis-U when products aren't coming off the line.

This is indeed miracle tech so let's go get some miracles!

**THE CRASHING MIS-U REPAIR LIST—LC1**

Ref: HCOB 17 Jun 79 CRASHING MIS-Us: THE KEY  
TO COMPLETED CYCLES OF  
ACTION AND PRODUCTS

The Crashing Mis-U Repair List is the list to use in repairing Crashing Mis-U finding. It can be done on the spot by the person doing the Crashing Mis-U finding or in session by an auditor. The Crashing Mis-U Repair List is used in the event of a bog or trouble during Crashing Mis-U finding or a red tagged exam after a Crashing Mis-U finding session. It can also be done if, after the fact of a Crashing Mis-U being found, the person is still not getting out his products or is not completing cycles of action in his area. (Note: The person could be up against a *new* Crashing Mis-U on a whole different cycle of action in the same area.)

If after the Crashing Mis-U Repair List has been done and fully handled, there seems to be some other bypassed charge or BIs connected with the Crashing Mis-U finding, a C/S 53 or WCCL should be done. This would be determined by the C/S.

Any person using this list must have excellent TRs and be able to make a list read and correctly interpret E-Meter reads. They must also be drilled on this correction list and have their High Crime checkouts done on this list as well as HCOB 17 Jun 79 CRASHING MIS-Us: THE KEY TO COMPLETED CYCLES OF ACTION AND PRODUCTS.

This list can be assessed Method 3 or Method 5. Each line that reads is carried to F/N.

0. HAVE YOU FAILED TO UNDERSTAND WHAT A "CRASHING MISUNDERSTOOD" IS? \_\_\_\_\_  
(Check and clear any words in the above that read on the meter.)
1. WAS CRASHING MIS-U FINDING DONE WHEN YOU ALREADY HAD AN UPSET? \_\_\_\_\_  
(Handle the ARC break to F/N VGIs.)
2. DID YOU BECOME UPSET BECAUSE OF THE CRASHING MIS-U FINDING? \_\_\_\_\_  
(Handle the ARC break to F/N VGIs.)
3. WAS THE CRASHING MIS-U FINDING DONE WHILE YOU WERE WORRYING ABOUT SOMETHING ELSE? \_\_\_\_\_  
(Handle the problem to F/N VGIs.)
4. DID THE CRASHING MIS-U FINDING CAUSE YOU TO BECOME WORRIED OR CONCERNED? \_\_\_\_\_  
(Handle the problem to F/N VGIs.)
5. DURING YOUR CRASHING MIS-U FINDING WAS THERE SOMETHING YOU WERE NOT SAYING? \_\_\_\_\_

(Handle by usual missed W/H pulling per HCOB 12 Feb 62 and HCOB 3 May 62.)

6. WAS THERE SOMETHING YOU'D DONE YOU WEREN'T SAYING?  
(Handle as in No. 5.) \_\_\_\_\_
7. WAS THERE SOMETHING YOU WEREN'T SAYING ABOUT THE AREA THAT WAS BEING ADDRESSED?  
(Handle as in No. 5.) \_\_\_\_\_
8. WAS THERE SOMETHING YOU'D DONE IN THE AREA BEING ADDRESSED THAT YOU WEREN'T SAYING?  
(Handle as in No. 5.) \_\_\_\_\_
9. WAS THE WRONG AREA ADDRESSED?  
(Indicate to F/N. Get him to the W/Cer to complete the Crashing Mis-U finding. ) \_\_\_\_\_
10. WAS THE CRASHING MIS-U FINDING DONE ON THE WRONG PRODUCT?  
(Handle as in No. 9 above.) \_\_\_\_\_
11. COULDN'T YOU FIND THE CRASHING MIS-U?  
(Indicate and take it E/S to F/N if necessary. Get him back to the W/Cer for completion of the action.) \_\_\_\_\_
12. WAS THERE NO CRASHING MIS-U IN THE AREA IN THE FIRST PLACE?  
(Indicate that the Crashing Mis-U finding was an unnecessary action and take it to F/N.) \_\_\_\_\_
13. WAS THE CRASHING MIS-U FOUND ONLY SIMILAR TO THE ACTUAL CRASHING MIS-U?  
(Indicate and get an F/N. Send him back to the W/Cer to find the actual Crashing Mis-U.) \_\_\_\_\_
14. IS THERE ANOTHER CRASHING MIS-U IN THE AREA?  
(Indicate to F/N. Send to W/Cer to handle.) \_\_\_\_\_
15. IS THE WORD FOUND STILL MISUNDERSTOOD?  
(Get it fully cleared up to F/N.) \_\_\_\_\_
16. DIDN'T YOU UNDERSTAND WHAT WAS GOING ON?  
(Clear up the questions and confusions to F/N and get him back to the W/Cer.) \_\_\_\_\_
17. WAS THERE METER OR F/N TROUBLE?  
(Indicate and clean it up with false TA handling or LIC, etc.) \_\_\_\_\_
18. WERE AREAS THAT YOU WERE NOT HAVING DIFFICULTY WITH TAKEN UP?  
(Indicate that these areas should not have been taken up. Take it to F/N.) \_\_\_\_\_
19. WERE AREAS THAT YOU WERE HAVING DIFFICULTY WITH NOT TAKEN UP?  
(Indicate and get an F/N. Send back to the W/Cer for handling.) \_\_\_\_\_
20. DID AN AREA YOU FELT SHOULD HAVE BEEN HANDLED NOT GET TAKEN UP OR HANDLED? \_\_\_\_\_

(Indicate. Find out what area to F/N and send back to the W/Cer for handling.)

21. DID YOU GET INVALIDATED?  
(Itsa E/S itsa to F/N.) \_\_\_\_\_
22. DID YOU GET EVALUATED FOR?  
(Itsa E/S itsa to F/N.) \_\_\_\_\_
23. DID THE CRASHING MIS-U FINDING ANNOY YOU?  
(Determine if (a) he has O/Ws as well as a Crashing Mis-U or (b) the Crashing Mis-U finding wasn't necessary in the first place. Handle accordingly.) \_\_\_\_\_
24. WAS THE CRASHING MIS-U FINDING DONE IN THE MIDDLE OF SOME OTHER INCOMPLETE CYCLE?  
(Indicate the BPC and take it to F/N.) \_\_\_\_\_
25. WERE YOU MADE TO GO E/S ON CRASHING MIS-U FINDING WHILE IN THE NON-INTERFERENCE ZONE?  
(Indicate it as an incorrect action and it should not have been done and get your F/N.) \_\_\_\_\_
26. DO YOU NOT BELIEVE YOU HAVE MISUNDERSTOODS?  
(Clear him up on Word Clearing Series 60R. Handle his Mis-Us and get his agreement to do the action unless it is determined it was an unnecessary action. Take this to F/N.) \_\_\_\_\_
27. DID FALSE DATA GET IN YOUR WAY?  
(Strip off the false data per HCOB FALSE DATA STRIPPING. Take it to F/N.) \_\_\_\_\_
28. IS IT ACTUALLY OK TO HAVE MISUNDERSTOODS IN THE AREA?  
(Get why this is OK and strip off the defense mechanism per the Crashing Mis-U HCOB. Take it to F/N.) \_\_\_\_\_
29. IS THERE SOME OTHER WORD CLEARING ERROR?  
(Indicate. Find out what and handle or do a WCCL if necessary.) \_\_\_\_\_
30. WERE YOU NOT HAVING ANY TROUBLE WITH YOUR PRODUCTS IN THE FIRST PLACE?  
(Get the data. If this is the case indicate that the Crashing Mis-U finding was an unnecessary action. Take it to F/N.) \_\_\_\_\_
31. ARE THERE OTHER PRODUCT DEBUG ACTIONS THAT SHOULD HAVE BEEN TAKEN?  
(2WC to F/N. Program him to get Product Debugging per HCO PL DEBUG TECH.) \_\_\_\_\_
32. AREN'T YOU HATTED?  
(2WC to F/N. Program him to get hatted.) \_\_\_\_\_
33. IS YOUR PRODUCT TOTALLY UNKNOWN TO YOU?  
(2WC to F/N. Program him to be Product Cleared.) \_\_\_\_\_
34. ARE YOU LACKING PRODUCT CLEARING?  
(Handle as in No. 33 above.) \_\_\_\_\_
35. ARE YOU CONNECTED TO ANTAGONISTIC PEOPLE?  
(2WC to F/N. Get the PTS Clay Table Handling done or corrected to EP.) \_\_\_\_\_

36. WAS YOUR CRASHING MIS-U FINDING OVERRUN? \_\_\_\_\_  
(Indicate and rehab.)
37. ARE YOU HAVING CASE TROUBLE? \_\_\_\_\_  
(Assess and handle a C/S 53.)
38. IS THERE SOMETHING ELSE WRONG? \_\_\_\_\_  
(Find out what and handle or do the appropriate correction list and handle.)
39. WAS THERE NOTHING WRONG IN THE FIRST PLACE? \_\_\_\_\_  
(Indicate and get it to F/N.)

### **CRASHING MIS-U DEFINITION**

I started calling it Crashing Mis-U because it crashed the person. That's what crashed the subject and crashed the person. That's why it's called a Crashing Mis-U.

It's what crashes something across the dynamics.

HCOB 18 Jun 79 Series 4	W/C Series 62, Product Debug THE CRASHING MIS-U REPAIR LIST—LC1
HCOB/HCO PL 26 Mar 79R Rev. 25.5.79	Esto Series 35R, W/C Series 60R MISUNDERSTOOD WORDS AND CYCLES OF ACTION

Miraculous as it is, a Word Clearer must be aware of the fact that M9 Word Clearing does not uncover false data, Crashing Mis-Us, overts, withholds or PTSness. Other tech exists to handle these. However they also, sometimes in a shadowy way, make their appearance doing M9. People doing M9 are doing it to get something understood or get some order done or get some product actually made and out. In most cases M9 will produce a marked gain. However, when it doesn't work, one of the above is also present. Handling of these is covered in detail in other HCOBs.

However, the item the M9er is most likely to collide with in situations where M9 is really not getting much done is the mysterious Crashing Mis-U.

A Crashing Mis-U, while it is always sitting right there in PT, big as life, can sometimes appear to be elusive. It eludes the most conscientious Word Clearer and the person himself, despite honest efforts to find it.

Let's say you've made an exhaustive search for the CRMU, you've hunted and punched in the area of his products, you've word cleared him on the texts covering his products and you've found and cleared some misunderstood words, none of which are IT. You've done the full CRMU and Product Debug procedure by the book and you still haven't gotten the Crashing Mis-U—as evidenced by no products.

At this point you could suspect one of the following:

1. The word that has caused him to crash may be right there in plain view, it does appear in the texts and orders covering the person's post and products, but it has been missed.

Why? Because the Crashing Mis-U (which is not your ordinary common garden variety of misunderstood word) will not always show up for what it is in M9ing. The word may appear in the materials but the person reads it with no stumble or reaction whatsoever, as he is so certain he knows it and his misunderstanding of it is so obscured by false data and false definitions. It doesn't even read on the meter on Method 2 or 4 because it's way below his awareness.

So you wouldn't just assume there was nothing there because the word didn't turn up on Method 9 or Methods 2 or 4. You'd need to move in with Method 5 or 6 and probably also False Data Stripping in a case like this to really pry it into view.

Or:

2. The Crashing Mis-U may not be on the subject of the product itself but in an area *related to* the subject. If this is suspected you look for the CRMU in the related areas and it's very likely you'll come up with the prize!

The reason it wasn't found in the first place is because the word didn't appear in the materials he was word cleared on and it didn't come up in a search in the area of his products. But it was sitting there, all the time, in an adjacent, a related area!

In two cases recently where staff members were being crammed on rejects of their products this phenomena turned up and was used and it all straightened out nicely!

The watchword is: you utilize all methods of Word Clearing *and whatever else it takes* to find the Crashing Mis-U.

#### ALERT RE METHOD 9

The data above applies to routine Method 9 Word Clearing as well as to Crashing Mis-U finding. Thus, if you've M9ed the person on his post materials and he's not getting it or making it, realize that he may be sliding over an MU or even a Crashing Mis-U where the word actually appears in the materials and is obscured for the above reasons. Or that the misunderstood may be in an area *related to* the subject and the word itself doesn't appear in the text you're handling.

Method 9 is a superlative Word Clearing tool. Word Clearers must keep it effective, and not permit that effectiveness to be dimmed by a failure to know and use the data in this bulletin.

So you check the related areas where it's indicated, or you marry up routine Method 9 with Crashing Mis-U finding and all of its steps where the person isn't making it otherwise. And you'll find the elusive misunderstood or Crashing Mis-U is not so elusive after all. It will come plainly into view—ripe for the plucking!

MISUNDERSTOOD WORDS AND  
CYCLES OF ACTION

“MIS-UNDERSTOOD” or “NOT-UNDERSTOOD” are terms used to define any error or omission in comprehension of a word, concept, symbol or status.

Most people go around thinking that a misunderstood is just something they obviously don't know—a “not-understood.”

A “not-understood” is a misunderstood but there are additional ways a person can misunderstand a word.

**A MISUNDERSTOOD WORD OR SYMBOL IS DEFINED AS A WORD OR SYMBOL FOR WHICH THE STUDENT HAS:**

1. *A FALSE (TOTALLY WRONG) DEFINITION:* A definition that has no relationship to the actual meaning of the word or symbol whatsoever.

*Example:* The person reads or hears the word “cat” and thinks that “cat” means “box.” You can't get more wrong.

*Example:* A person sees an equals sign (=) and thinks it means to subtract something twice.

2. *AN INVENTED DEFINITION:* An invented definition is a version of a false definition. The person has made it up himself or has been given an invented definition. Not knowing the actual definition he invents one for it. This is sometimes difficult to detect because he is certain he knows it, after all he invented it himself. There is enough protest preceding his invention of it to make it read on a meter. In such a case he will be certain he knows the definition of the word or symbol.

*Example:* The person when very young was always called “a girl” by his pals when he refused to do anything daring. He invents the definition of “girl” to be “a cowardly person.”

*Example:* A person never knew the meaning of the symbol for an exclamation point (!) but seeing it in comic strips as representing swear words invents the definition for it “a foul curse” and regards it accordingly in everything he reads.

3. *AN INCORRECT DEFINITION:* A definition that is not right but may have some relationship to the word or symbol or be in a similar category.

*Example:* The person reads or hears the word “computer” and thinks it is “typewriter.” This is an incorrect meaning for “computer” even though a typewriter and a computer are both types of machines.

*Example:* A person thinks a period (.) after an abbreviation means that you halt in reading at that point.

4. **AN INCOMPLETE DEFINITION:** A definition that is inadequate.

*Example:* The person reads the word “office” and thinks it means “room.” The definition of the word “office” is: “a room or building in which a person transacts his business or carries on his stated occupation.” (Ref: Funk and Wagnalls Standard Dictionary of the English Language) The person’s definition is incomplete for the word “office.”

*Example:* The person sees an apostrophe (‘) and knows that it means that something is owned (‘s) but does not know that it also is used to show that a letter has been left out of a word. He sees the word “can’t” and immediately tries to figure out who can is.

5. **AN UNSUITABLE DEFINITION:** A definition that does not fit the word as it is used in the context of the sentence one has heard or read.

*Example:* The person hears the sentence: “I am dressing a turkey.” The person’s understanding of “dressing” is “putting clothes on.” That is *one* definition of “dressing” but it is an unsuitable definition for the word as it is used in the sentence he has heard. Because he has an unsuitable definition he thinks someone is putting clothes on a turkey. As a result the sentence he has heard doesn’t really make sense to him. The definition of “dressing” that correctly applies in the sentence he has heard is: “to prepared for use as food, by making ready to cook, or by cooking.” (Ref: The Oxford English Dictionary)

The person will only truly understand what he is hearing when he has fully cleared the word “dressing” in all its meanings. as he will then also have the definition that correctly applies in the context.

*Example:* The person sees a dash (-) in the sentence: “I finished numbers 3 - 7 today.” He thinks a dash is a minus sign, realizes you cannot subtract 7 from 3 and so cannot understand it.

6. **A HOMONYMIC (one word which has two or more distinctly separate meanings) DEFINITION:** A homonym is a word that is used to designate several different things which have totally different meanings; or a homonym can be one of two or more words that have the same sound, sometimes the same spelling, but differ in meaning.

*Example:* The person reads the sentence: “I like to box.” The person understands this sentence to mean that someone likes to put things in “containers.”

The person has the right meaning for the word “box,” but he has the wrong word! There is another word “box” which is being used in the sentence he has just read and means: “to fight another in a boxing match.” (Ref: Funk and Wagnalls Standard Dictionary of the English Language)

The person has a misunderstood because he has a homonymic definition for the word “box” and will have to clear the second word “box” before he understands the sentence.

*Example:* The person sees a plus sign (+) and as it resembles a cross he thinks it is something religious.

*Example:* The person hears the word “period” in the sentence: “It was a disorderly period in history” and knowing that “period” comes at the end of a sentence and means stop, supposes that the world ended at that point.

*Example:* Homonymic misunderstands can also occur when a person does not know the informal or slang usage of a word. The person hears someone on the radio singing: “When my *Honey* walks down the street.” The person thinks a “thick, sweet, yellow or golden liquid, good to eat, that bees make out of the nectar they collect from flowers” is walking down the street! He doesn’t know the informal definition of “honey” which is: “sweet one: a pet name.” which is how it is being used in the song. (Ref: Funk and Wagnalls Standard Dictionary of the English Language)

7. *A SUBSTITUTE {SYNONYM—*a word which has a similar but not the same meaning*) DEFINITION:* A substitute definition occurs when a person uses a synonym for the definition of a word. A synonym is not a definition. A synonym is a word having a meaning *similar* to that of another word.

*Example:* The person reads the word “portly” and thinks the definition of the word is “fat.” “Fat” is a synonym for the word “portly.” The person has a misunderstanding because the word “portly” means: “of a stately appearance and carriage; impressive, especially on account of size.” (Ref: Funk and Wagnalls Standard Dictionary of the English Language) The person does not have the full meaning of “portly” if he thinks it just means “fat.”

Knowing synonyms for words increases your vocabulary but it does not mean you understand the *meaning* of a word. Learn the full definition for a word as well as its synonyms.

8. *AN OMITTED {MISSING} DEFINITION:* An omitted definition is a definition of a word that the person is missing or is omitted from the dictionary he is using.

*Example:* The person hears the line “The food here is too rich.” This person knows two definitions for the word “rich.” He knows that “rich” means “having much money, land, goods, etc.” and “wealthy people.” Neither of these definitions make much sense to him in the sentence he has just heard. He cannot understand what food could have to do with having a lot of money.

Omitted definitions can come about from using dinky dictionaries. If the person had looked up “rich” in a small paperback dictionary, he would probably still be stuck with his misunderstood. A dinky dictionary probably will not give him the definition he needs. In order to understand the word he would have to get a good sized dictionary to ensure it gives him the omitted definition which is: “having in a high degree qualities pleasing to the senses; luscious to the taste: often implying an unwholesome excess of butter, fats, flavoring, etc.” (Ref: Funk and Wagnalls Standard Dictionary of the English Language)

*Example:* The person reads “He estimated the light at f 5.6.” He can’t figure what this “f” is, so he looks up “f” in the American Heritage Dictionary and wonders if it is temperature or money or sports for “foul” or maybe the money “franc.” The text doesn’t refer to France so he can’t figure it out. Omitted in the American Heritage is the photography definition of “f” which simply means “the number which shows the width of the hole the light goes through in the lens.” The moral of this is to have enough dictionaries around.

*NOTE:* It can occur that an accurate definition for a word is not given in any dictionary which is an error in the language itself.

9. *A NO-DEFINITION:* A no-definition is a “not-understood” word or symbol.

*Example:* The person reads the sentence “The business produced no lucre.” No understanding occurs, as he has no definition for “lucre.” The word means:

“money, especially as the object of greed; gain.” (Ref: Funk and Wagnalls Standard Dictionary of the English Language) It isn't that he has the word incorrectly, unsuitable or any other way defined, he has *no* definition for it at all. He has never looked it up and gotten it defined. Thus he does not understand it. The definition does not exist for him until he looks it up and gets it clearly understood .

*Example:* The person sees a dot at the end of a word on a printed page and having no definition for “a period (.)” tends to run all of his sentences together.

10. *A REJECTED DEFINITION:* A rejected definition is a definition of a word which the person will not accept. The reasons why he will not accept it are usually based on emotional reactions connected with it. The person finds the definition degrading to himself or his friends or group in some imagined way or restimulative to him in some fashion. Although he may have a total misunderstanding on the word he may refuse to have it explained or look it up.

*Example:* The person refuses to look up the word “mathematics.” He doesn't know what it means, he doesn't want to know what it means, and he won't have anything to do with it. A discussion of why he refuses to look it up discloses that he was expelled from school because he flunked with violence his first month of his first course in mathematics. If he were to realize that he flunked because he didn't know what he was supposed to study he would then be willing to look the word up.

*Example:* The person refuses to look up the definition of asterisk (\*). On discussion it turns out that every time he sees an asterisk on the page he knows the material will be “very hard to read” and is “literary,” “difficult” and “highbrow.”

Discussion of why he won't look it up usually reveals and releases the emotional charge connected with it which he may never have looked at before. Properly handled he will now want to look it up, having gained an insight into why he wouldn't.

Any word you come across which fits one or more of the above definitions of a misunderstood word or symbol must be cleared up, using a good size dictionary or more than one dictionary or text book or encyclopedia.

It is catastrophic to go on past or ignore a misunderstood word or symbol as one simply will not understand what he is studying.

A student must discipline himself not to go past misunderstood words. He should learn to recognize from his reaction to what he is reading, especially the mental blankness which usually ensues right after one, that he has gone by a misunderstood. He should look them up and get them fully defined before going on with his reading. Students must be persuaded to do this. It is a self-discipline that has to be learned.

The definitions of “misunderstood” and “not-understood” and their different types, must be clearly understood by a person seeking to clear them in himself and others. The commonest error in Word Clearing is for the person being word cleared to believe that a misunderstood is something he simply does not know. With this limited definition he cannot adequately be word cleared nor can he adequately word clear others. So these definitions of “misunderstood” and “not-understood” should be very well known as it will often be necessary to clarify them to the person being word cleared.

Good reading.

**FALSE DATA STRIPPING**

(Ref: The Study Tapes  
Dianetic Auditor's Bulletin Vol I Numbers 1-2  
STANDARD PROCEDURE  
Tech Vol 1, pgs. 15-20  
Dianetic Auditor's Bulletin Vol I Number 3  
HOW TO RELEASE A CHRONIC SOMATIC  
Tech Vol 1, pgs. 24-26  
*NOTES ON THE*  
LECTURES Pgs. 52-66,112-1 13)

When a person is not functioning well on his post, on his job or in life, at the bottom of his difficulties will often be found *unknown* basic definitions and laws or *false* definitions, false data and false laws, resulting in an inability to think with the words and rules of that activity and an inability to perform the simplest required functions. The person will remain unfamiliar with the fundamentals of his activity, at times appearing idiotic, because of these not-defined and falsely defined words.

Verbal hatting is the main source of false definitions and false data. Someone who "knows" tells someone else a definition or a datum. The person now thinks he knows the definition (even though nothing in the field makes any sense to him). The word may not even read on the meter during misunderstood checks because the person "thinks he knows."

A politician is told by an advisor, "It doesn't matter how much money the government spends. It is good for the society." The politician uses this "rule" and the next thing you know, inflation is driving everybody to starvation and the government to bankruptcy. The politician, knowing he was told this on the very best authority, does not spot it as false data, but continues to use it right up to the point where the angry mobs stand him up in front of a firing squad and shoot him down. And the pity of it is that the politician never once suspected that there was anything false about the data, even though he couldn't work with it.

There is no field in all the society where false data is not rampant. "Experts," "Advisors," "Friends," "Families" seldom go and look at the basic texts on subjects, even when these are known to exist, but indulge in all manner of interpretations and even outright lies to seem wise or expert. The cost, in terms of lost production and damaged equipment is enormous. You will see it in all sectors of society. People cannot think with the fundamentals of their work. They goof. They ruin things. They have to redo what they have already done.

You'll find people whose estimate of the environment is totally perverted to the point they're walking around literally in a fog. The guy looks at a tree and the reality of the tree is blurred by the "fact" that "trees are made by God" so he won't take care of the tree because he is convinced.

What we're trying to cure in people is the inability to think with data. This was traced by me to false data as a phenomenon additional to misunderstood words, although the misunderstood word plays a role in it and will have to be allowed for.

When a person is having difficulty in an area or on a post, when he can't seem to apply what he has "learned" or what he is studying or when he can't get through a specific drill or exercise in his training materials, you would suspect he has false data in that area or on those materials. If he is to use it at all effectively he must first sort out the true facts regarding it from the conflicting bits and pieces of information or opinion he has acquired. This eliminates the false data and lets him get on with it.

### INABILITY TO HAT

We are looking here at a brand new discovery I have made which is that it can be nearly impossible to hat anyone who is sitting on false data on the subject you are trying to hat him on. This is the *primary* reason people cannot be hatted and False Data Stripping therefore enables a person to be hatted even though other approaches have failed. This is a very valuable discovery—it solves the problem of inability to hat or train.

### SOURCES

False data on a subject can come from any number of sources. In the process of day-to-day living people encounter and often accept without inspection all sorts of ideas which may seem to make sense but don't. Advertising, newspapers, TV and other media are packed with such material. The most profound false data can come out of texts such as Stanislavsky (a Russian actor and director); and even mothers have a hand in it, such as "children should be seen and not heard."

Where a subject, such as art, contains innumerable authorities and voluminous opinions you may find that any and all textbooks under that heading reek with false data. Those who have studied study tech will recall that the validity of texts is an important factor in study.

Therefore it is important that any supervisor or teacher seeking to use False Data Stripping must utilize basic *workable* texts. These are most often found to have been written by the original discoverer of the subject and when in doubt avoid texts which are interpretations of somebody else's work. In short, choose only textual material which is closest to the basic facts of the subject and avoid those which embroider upon them.

It can happen, if you do False Data Stripping well and expertly without enforcing your own data on the person, that he can find a *whole* textbook false—much to his amazement. In such a case, locate a more fundamental text on the subject. (Examples of false texts: Eastman Kodak; Lord Keynes treatises on economics; John Dewey's texts on education; Sigmund Freud's texts on the mind; the texts derived from the "work" of Wundt (Leipzig 1879—Father of Modern Psychology); and (joke) a textbook on "Proper Conduct for Sheep" written by A. Wolf.)

### USE OF FALSE DATA STRIPPING

False Data Stripping should be used extensively in all hatting and training activities. Current society is riddled with false data and these must be cleared away so that we can hat and train people. Then they will be able to learn useful data which will enable them to understand things and produce valuable products in life.

False Data Stripping can be done on or off the meter. It can be done by an auditor in session, by a Supervisor, Cramming Officer or Word Clearer or by an exec, Esto or any administrator. Students and staff can be trained to do it on each other.

Not a lot of training is required to deliver this procedure but anyone administering it must have checked out on this HCOB/PL and have demoed and drilled the procedure. If it is going to be done on the meter (which is preferable) the person doing it must have an OK to operate an E-Meter.

## GRADIENTS

It will be found that false data actually comes off in gradients.

For example, a student handled initially on false data on a particular drill will appear to be complete on it. He goes on with his studies and makes progress for a while and then sometimes he will hit a bog or slow in his progress. This is usually an indication that more false data has been flushed up (restimulated or remembered as a result of actually doing studies or drills). At that point more basic false data will come off when asked for. The reason for this is: when you first give a student false data handling he doesn't know enough about the subject to know false data from the true. When he has learned a bit more about the subject he then collides with more false data hitherto buried. This can happen several times, as he is getting more and more expert on the subject.

Thus the action of stripping off false data can and must be checked for and used in any training and hatting.

The rundown has to be given again and again at later and later periods, as a student or staff member may come up against additional faulty data that has been not-ised. It can be repeated as often as necessary in any specific area of training until the person is finally duplicating and is able to use the correct tech and *only* the correct tech exactly.

## THEORY

There is a philosophic background as to why getting off false data on a subject works and why trying to teach a correct datum *over* a false datum on the subject does not work. It is based on the Socratic thesis-antithesis-synthesis philosophical equation.

*Socrates*: 470 B.C. - 399 B.C. A great Greek philosopher.

A *thesis* is a statement or assertion.

*Antithesis*: opposing statement or assertion.

The Socratic equation is mainly used in debate where one debater asserts one thing and the other debater asserts the opposite. It was the contention of Socrates and others that when two forces came into collision a new idea was born. This was the use of the equation in logic and debate. However, had they looked further they would have seen that other effects were brought into play. It has very disastrous effects when it appears in the field of training.

Where the person has acquired a *false* thesis (or datum), the *true* datum you are trying to teach him becomes an antithesis. The true datum comes smack up against the false datum he is hanging on to, as it is counter to it.

In other words, these two things collide, and *neither one will* then make sense to him. At this point he can try to make sense out of the collision and form what is called a synthesis, or his wits simply don't function. (*Synthesis*: a unified whole in which opposites, thesis and antithesis, are reconciled.)

So you wind up with the person either:

- (a) attempting to use a false, unworkable synthesis he has formed, or
- (b) his thinkingness locks up on the subject.

In either case you get an impossible-to-train, impossible-to-hat scene.

## GLIBNESS

Probably we have here the basic anatomy of the "glib student" who can parrot off whole chapters on an examination paper and yet in practice uses his tools as a door stop. This student has been a mystery to the world of education for eons. What he has probably done in order to get by, is set up a circuit which is purely memory.

The truth of it is his understanding or participation is barred off by considerations such as "nothing works anyway but one has to please the professor somehow."

The less a person can confront, the more false data he has accumulated and will accumulate. These syntheses are simply additives and complexities and make the person complicate the subject beyond belief. Or the collision of false data and true data, without the person knowing which is which, makes him look like a meathead.

Therefore, in order to cure him of his additives, complexities, apathy and apparent stupidity on a subject, in addition to cleaning up misunderstood words, it is necessary to strip the false data off the subject. Most of the time this is prior to the true data and so is basic on the chain. Where this is the case, when that basic false data is located and stripped the whole subject clears up more easily.

#### FALSE DATA PRONE

Some people are prone to accepting false data. This stems from overts committed prior to the false data being accepted. The false data then acts as a justifier for the overt.

An example of this would be a student studying past Mis-U's on a subject, cheating in the exam and eventually dropping the subject entirely. Then someone comes along and tells him that the subject is useless and destructive. Well, he will immediately grab hold of this datum and believe it as he needs something to justify his earlier overts.

This actually gets into service facsimiles as the person will use the false data to make the subject or other people wrong.

So if you see someone who is very prone to accepting false data on a particular subject or in general, the answer is to get the prior overts pulled. Then the person will not need to justify his overts by accepting any false data that comes his way.

#### PROCEDURE

You may not easily be able to detect a false datum because the person believes it to be true. When False Data Stripping is done on a meter the false datum won't necessarily read for the same reason.

You therefore ask the person if there is anything he has run across on the subject under discussion which he couldn't think with, which didn't seem to add up or seems to be in conflict with the material one is trying to teach him.

The false datum buries itself and the procedure itself handles this phenomenon.

When the false datum is located it is handled with elementary recall based on 1950 Straightwire. Straight memory technique or Straightwire (so called because one is stringing a line between present time and some incident in the past, and stringing that line directly and without any detours) was developed originally in 1950 as a lighter process than engram running. Cleverly used, Straightwire removed locks and released illnesses without the pc ever having run an engram.

Once one had determined whatever it was that was going to be run with Straightwire, one would have the pc recall where and when it happened, who was involved, what were they doing, what was the pc doing, etc. until the lock blew or the illness keyed out.

Straightwire works at a lock level. When overdone it can key in underlying engrams. When properly done it can be quite miraculous.

#### STEPS

A. Determine whether or not the person needs this procedure by checking the following:

1. The person cannot be hatted on a subject.
2. No Crashing Mis-U's can be found on a subject yet it is obvious they exist.

3. The person is not duplicating the material he has studied as he is incorrectly applying it or only applying part of it, despite Word Clearing.
4. He is rejecting the material he is reading or the definition of the word he is clearing.
5. You suspect or the person originates earlier data he has encountered on the materials that could contain false data.
6. The person talks about or quotes other sources or obviously incorrect sources.
7. He is glib.
8. The person is backing off from actually applying the data he is studying despite standard Word Clearing.
9. He is bogged.
10. He cannot think with the data and it does not seem to apply.

B. Establish the difficulty the person is having—i.e. what are the materials he can't duplicate or apply? These materials must be to hand and the person must be familiar with the basic true data on the subject being addressed.

C. If the action is being done metered, put the person on the meter and properly adjust the sensitivity with a proper can squeeze.

D. Thoroughly clear the concept of false data with the person. Have him give you examples to show he gets it. (This would be done if the person was receiving False Data Stripping for the first time.)

E. The following questions are used to detect and uncover the false data. These questions are cleared before they are used for the first time on anyone. They do not have to read on a meter and may not do so as the person will not necessarily read on something that he believes to be true.

1. "Is there anything you have run across in (subject under discussion) which you couldn't think with?"
2. "Is there anything you have encountered in (subject under discussion) which didn't seem to add up?"
3. "Is there something you have come across in (subject under discussion) that seems to be in conflict with the material you are trying to learn?"
4. "Is there something in (subject under discussion) which never made any sense to you?"
5. "Did you come across any data in (subject under discussion) that you had no use for?"
6. "Was there any data you came across in (subject under discussion) that never seemed to fit in?"
7. "Do you know of any datum that makes it unnecessary for you to do a good job on this subject?"
8. "Do you know of any reason why an overt product is alright?"
9. "Would you be made wrong if you really learned this subject?"
10. "Did anyone ever explain this subject to you verbally?"

11. "Do you know of any datum that conflicts with standard texts on this subject?"
12. "Do you consider you really know best about this subject?"
13. "Would it make somebody else wrong not to learn this subject?"
14. "Is this subject not worth learning?"

The questions are asked in the above sequence. When an area of false data is uncovered by one of these questions one goes straight on to Step F—handling.

F. When the person comes up with an answer to one of the above questions locate the false datum as follows:

1. Ask: "Have you been given any false data regarding this?" and help him locate the false datum. If this is being done on the meter, one can use any meter reads one does get to steer the person. This may require a bit of work as the person may believe the false data he has to be true. Keep at it until you get the false datum.

If the person has given you the false datum in Step E then this step will not be needed: just go straight on to Step G.

G. When the false datum has been located, handle as follows:

1. Ask: "Where did this datum come from?" (This could be a person, a book, TV, etc.)
2. "When was this?"
3. "Where exactly were you at the time?"
4. "Where was (the person, book, etc.) at the time?"
5. "What were you doing at the time?"
6. If the false datum came from a person ask: "what was (the person) doing at the time?"
7. "How did (the person, book, etc.) look at the time?"
8. If the datum has not blown with the above questions ask: "Is there an earlier similar false datum or incident on (the subject under discussion)?" and handle per Steps 1-7.

Continue as above until the false datum has blown. On the meter you will have a floating needle and very good indicators.

**DO NOT CONTINUE PAST A POINT WHERE THE FALSE DATUM HAS BLOWN.**

If you suspect the datum may have blown but the person has not originated then ask: "How does that datum seem to you now?" and either continue if it hasn't blown or end off on that datum if it has blown.

H. When you have handled a particular false datum to a blow, going earlier similar as necessary, you would then go back and repeat the question from E (the detection step) that uncovered the false datum. If there are any more answers to the question, they are handled exactly as in Step F (location) and Step G (handling). That particular question is left when the person has no more answers. Then, if the person is not totally handled on the subject under discussion, one would use the other

questions from Step E and handle them in the same way. All the questions can be asked and handled as above but one would not continue past a point where the whole subject has been cleared up and the person can now duplicate and apply the data he has been having trouble with.

I. *CONDITIONAL*: If False Data Stripping is being done in conjunction with Crashing Mis-U finding one would now proceed with the Crashing Mis-U finding.

J. Send the person to the Examiner.

K. Have the person study or restudy the true data on the subject you have been handling.

#### END PHENOMENA

When the above procedure is done correctly and fully on an area the person is actually having difficulty with he will end up able to duplicate, understand and apply and think with the data that he could not previously grasp. The false data that was standing in the road of duplication will have been cleared away and the person's thinking will have been freed up. When this occurs, no matter where in the procedure, one ends off the False Data Stripping on that subject and sends the person to the Examiner. He will have cognitions and VGIs and on the meter you will have an F/N. This is not the end of all False Data Stripping for that person. It is the end of that False Data Stripping on the person at that particular time. As the person continues to work with and study the subject in question, he will learn more about it and may again collide with false data at which time one repeats the above process.

#### NOTE

False data buries itself as the person may firmly believe that it is true. Sometimes the person will have such faith in a particular person, book, etc. that he cannot conceive that any data from that particular source might be false. One artist being false data stripped had received some false data from a very famous painter. Even though the data didn't really add up and actually caused the artist tremendous problems, he tended to believe it because of where it came from. It took persistence on the part of the person administering the False Data Stripping to eventually blow this false datum with a resulting freeing up of the artist's ability to think and produce in the area.

#### MISUNDERSTOODS

Misunderstoods often come up during False Data Stripping and should be cleared when they do. One would then continue with the False Data Stripping. One person being false data stripped knew he had some false data from a particular source but the false data was a complete blank—he couldn't remember it at all. It was discovered that he had a Mis-U just before he received the false data and as soon as this was cleared up he recalled the false data and it blew.

This is just one example of how Word Clearing can tie in with False Data Stripping.

#### REPEATED USE

False Data Stripping can be done over and over as it will come off in layers as mentioned before. If False Data Stripping has been done on a specific thing and at some later point the person is having difficulty with a drill or the materials, the stripping of false data should be done on him again.

In such a case it will be seen that the person recognizes or remembers *more* false or contrary data he has accumulated on the subject that was not in view earlier.

As he duplicates a drill or his materials more and more exactly, former "interpretations" he had not-ised, incorrect past flunks that acted as invalidation or evaluation, etc., may crop up to be stripped off.

## CAUTIONS

*CODE.* False Data Stripping is done under the discipline of the Auditor's Code. Evaluation and invalidation can be particularly harmful and must be avoided. All points of the code apply.

*RUDIMENTS.* One would not begin False Data Stripping on someone who already has out-ruds. If the person is upset or worried about something or is critical or nattery, then you should fly his ruds or get them flown before you start False Data Stripping.

*OVERRUN.* One must be particularly careful not to overrun the person past a blow of the false datum. The stress in recall is that it is a light action which does not get the person into engrams or heavy charge. Keep it light. If you overrun someone past the point of a blow, he may drop into engrams or heavy charge. Just take the recall step to a blow and don't push him beyond it.

*DATE/LOCATE.* Date/Locate is another way of getting something to blow. If a false datum does not blow on the recall steps despite going earlier similar, then it could be handled with Date/Locate *in session* as ordered by the C/S. This would normally be done as part of a False Data Stripping Repair List. Date/Locating false data would never be done except in session as ordered by the C/S or as directed by the False Data Stripping Repair List. The auditor must be totally starrated on Date and Locating and practiced in it before he attempts it.

*FALSE DATA STRIPPING REPAIR LIST.* The False Data Stripping Repair List is used in session by an auditor when False Data Stripping bogs inextricably or the person is not F/N GIs at exams or gets in trouble after False Data Stripping has been done. A bogged False Data Stripping session must be handled within 24 hours.

*NEW STUDENTS.* Students who are new to Scientology should not use this procedure on each other as they may be insufficiently experienced to deliver it competently. In this case the Supervisor or someone qualified would administer False Data Stripping to those students who need it.

## SUMMARY

The problem of the person who is unable to learn or who is unable to apply what he learns has never been fully resolved before. Misunderstands were and are a major factor and Word Clearing must be used liberally. Now, however, I have made a major breakthrough which finally explains and handles the problem of inability to learn and apply.

Man's texts and education systems are strewn with false data. These false data effectively block someone's understanding of the true data. The handling given in this HCOB/PL makes it possible to remove that block and enable people to learn data so they can apply it.

With the ability to learn comes stability and the production of valuable products. With stability and the production of valuable products comes the achievement of one's purposes and goals, high morale and happiness.

So let's get to work on stripping away the false data which plagues Man, clogs up his ability to think and learn and reduces his competence and effectiveness. Let's increase the ability of individuals and the human race.

**HIGH CRIME—ADDITION**

**HIGH CRIME CHECKOUTS AND WORD CLEARING**

Ref:	HCOB 24 Oct 76R	C/S Series 96R (Modified by this HCOB/PL)
	HCOB 30 Jan 73RB	Word Clearing Series 46RB METHOD 9 WORD CLEARING THE RIGHT WAY
	HCOB/PL 26 Mar 79R Rev. 25.5.79	Esto Series 35R Word Clearing Series 60R MISUNDERSTOOD WORDS AND CYCLES OF ACTION
	HCOB 16 Jul 79	Product Debug Series 5 Word Clearing Series 63 THE "ELUSIVE" MIS-U OR CRASHING MIS-U
	HCO PL 8 Mar 66	HIGH CRIME
	HCO PL 4 Apr 72R III	ETHICS AND STUDY TECH

For many years the top auditors, Case Supervisors and Supervisors have used Word Clearing in their High Crime checkouts, but until now there has not been an issue that makes this a mandatory action.

From now on, High Crime checkouts require Word Clearing in addition to star-rates. The miracle results of Word Clearing make all the difference in the world to the quality of technical delivery.

**CONSEQUENCES OF NO WORD CLEARING**

Lack of Word Clearing has recently brought about some false declares and a return of Quicke Grades.

In many orgs it was found that new HCOBs were not being word cleared AT ALL.

The right thing to do is make full use of Word Clearing technology.

**WORD CLEARING REQUIREMENTS**

From the date of this issue the Qualifications Division, when giving High Crime checkouts, must require *at least* Method 9 Word Clearing on the materials in addition to star-rates and drills. Qual should employ other methods of Word Clearing such as Methods 2, 3, 4, 5, 6, 7 or 8 when deemed necessary to ensure full understanding of the materials being High Crimed. Methods 2, 4 and 5 are very effective in the hands of a Word Clearer who is expert in reading an E-Meter. Method 9 is stressed here and made mandatory because it can be applied easily and is probably the top key method of Word Clearing today.

Where False Data Stripping, Crashing Mis-U tech, O/W handling and service facsimile tech are available and in use these must be employed where needed in checkouts.

The point is that Qual must make full use of Word Clearing in all High Crime checkouts and the student, interne or staff member must be word cleared to where he honestly has no misunderstood words on the materials.

#### FORMER HIGH CRIME CHECKOUTS

Where High Crime checkouts have been done previously and attested they remain valid. But, if the auditor, Case Supervisor or Word Clearer is later crammed on those materials the cramming must include full Method 9 Word Clearing of the materials on which he goofed and other Word Clearing as decided by Qual.

#### TECHNICAL RESULTS

The technology works when it is applied exactly.

Exact application depends on complete understanding.

Complete understanding depends on freedom from misunderstood words.

**TWINNING**

(CANCELS: BTB 16 Mar 71  
STUDENT AND COURSE MORALE,  
TOUGH CHECKOUTS & COACHING)

Cancellation of Issues Canceling Twinning

The following BPLs and HCO PLs which canceled issues on twinning, or canceled or suspended twinning itself, are now CANCELED:

1. HCO PL 29 Jul 72 II FAST FLOW IN TRAINING written by Training and Services Aide. Though the issues it canceled remain canceled, this HCO PL itself was canceled by BPL 10 Oct 75 X CANCELLATION OF POLICY LETTERS 1972 and remains so.
2. HCO PL 31 Aug 74 FAST FLOW TRAINING REINSTATED which suspended twin training or checkouts, was previously canceled and remains so.
3. BPL 18 Oct 76RD, Rev. 10.9.78 URGENT, IMPORTANT, SUCCESSFUL TRAINING LINEUP, which canceled requirements of twin training or checkouts for Academy, has been canceled and replaced by HCO PL 25 Sep 79 I URGENT, IMPORTANT, SUCCESSFUL TRAINING LINEUP.

THERE ARE NO VALID BPLs OR HCO PLs NOW EXISTING WHICH CANCEL TWINNING.

---

“Twinning” is the pairing up of two students training on the same subject to work together on their materials.

It is a Scientology innovation in training. For years it was used highly successfully when done correctly and as a standard action on Scientology courses.

Recently I discovered a big WHY behind course failures. That is that twinning as a subject and practice has become confused and fallen into misuse or fallen out completely and one of the reasons behind that is that a number of HCOBs on twinning were canceled and no one issue exists that covers the subject in its entirety.

THIS HCOB REINSTATES TWINNING FIRMLY AND WITH EMPHASIS.

It is NOT subject to cancellation.

It fully lays out the purpose of twinning, the basics and rules and correct use of twinning, when and how it is done, the responsibility of twins and the responsibility of the Supervisor and the handling of twinning bugs.

It re-establishes mandatory twinning on all practical courses, such as the TRs

Course, or on the practical sections of a course, such as E-Meter Drills. It also covers twinning in some areas of theory study where it is obviously called for, such as Method 9 Word Clearing when done between students.

## BACKGROUND

In 1954 we found that when you teamed up students of comparable case level and ability they then made progress. When we find something that is that workable we put it to use. Twinning was installed as a fundamental part of the Scientology system of training and it immediately and effectively brought up the participation and action levels of entire course rooms of students. Students grasped the application of the materials faster. It gave us results.

Originally twinning was used almost exclusively on practical drills. Later, in the early '60s, it was carried over into twin checkouts on theory. Still later, with the advent of Word Clearing, applied study tech and fast flow, twinning as a broad mandatory action for all students on theory was canceled.

Even so, some orgs continued twinning students unnecessarily on admin courses and some theory courses and were not enforcing twinning on courses where it is mandatory, such as a TRs Course.

Twinning on practical courses and practical actions has never been canceled by me and was never intended to be canceled. However, a line in a BPL (BPL 18 Oct 76RD Rev. 10.9.78 URGENT, IMPORTANT, SUCCESSFUL TRAINING LINEUP) which stated: "Requirements of twin training or checkouts for Academy are canceled" caused twinning to be dropped out even on practical drills in some areas and threw a confusion into the scene in other areas. The above BPL has now been canceled with a vengeance and is replaced by HCO PL 25 Sept 79 I URGENT, IMPORTANT, SUCCESSFUL TRAINING LINEUP.

And this bulletin restores twinning to its rightful place in training as the vital tool that it is.

## WHY TWINNING?

One reason twinning is so vital is that it brings those people who have sunk back into their First Dynamic up out of their First Dynamic and onto the Third. It gives the student a terminal to work with. It puts students into communication, into doingness and participation. One doesn't learn by being a spectator. Twinning not only gets students extroverted but also gets them to take some responsibility for their fellow man. These are factors that are sadly lacking in modern permissive education.

## TWINNING VERSUS MODERN PERMISSIVENESS

With twinning we are cutting right across modern "permissive" teaching.

The modern tendency is to just let everybody do as they please and put their attention on whatever they please. This is the "think" of the day, and it is in in most basic school systems and has spread as well into many different fields.

Probably someone somewhere thought it would be much quicker and easier and require much less confront to just let a student sit there permissively, with his attention wandering around in the total significance of it all and then claim he had passed the subject when he had never gone near it.

It is a symptom of people who can't confront not to make anyone else confront.

We don't buy this. It is totally batty. The creeping disease of permissiveness, non confront and spectatorism is simply a part of "the beautiful world of irresponsible slop." It has no place in Scientology training.

Real twinning, enforced, effectively pulls the student right up out of the vague permissiveness of modern think and lands him with some responsibility right from the start. With that he can be honestly trained.

### CAUSE AND EFFECT

A person being trained is mainly working on an inflow basis. Day after day it is inflow, inflow, inflow. This tends to put him at effect.

In twinning, the person can balance his inflow with outflow. This keeps him from going totally into effect. It puts some cause into the scene.

A person, when he is expected to apply knowledge or skills, must, of course, be at cause. When he is trained totally at effect, he can get into what is called a “stuck flow” phenomenon whereby he can’t outflow the subject. Yet, if he is ever going to apply it, he is going to have to outflow it.

Twinning has the virtue of balancing inflow and outflow. It will be found that when the person comes to apply the tech, he is already able to outflow if he was trained using twinning.

### WHEN TO TWIN

It is not necessary to twin students on admin courses, nor, as a general rule, on tech theory courses. You ensure the student is applying study tech and is not going past misunderstood words and you let him get on with it.

Practical and practical courses are another matter.

#### Mandatory Twinning

Twinning is mandatory on those courses where the essence of the course is to train the student in the practical application of the data. This would include the TRs Course, any Upper Indoc and Objectives Course, a specialized E-Meter Drills Course and courses of a similar nature.

Even though such courses also include theory, the final objective of such a course is a person trained and drilled in the doingness involved and twinning is absolutely essential for this purpose.

Thus, on such a course, twins are assigned at the beginning of the course and they remain assigned through to the completion of that course. We call it “assigning twins in concrete.” One does not musical chair twins, once assigned, nor allow them to drift from one twin to another.

The whole essence of twinning is to get two students to work together, to assist each other and take responsibility for getting each other successfully through the course.

#### Twinning On Practical Sections Of Courses

On certain courses containing both theory and practical, such as Academy Levels, you would not necessarily twin students on the theory section of the course. You would, however, definitely and mandatorily twin them on the practical sections.

For example, twinning is a must on E-Meter Drills, or such actions as assessment drilling, drilling of special rundown procedures where this is called for, Learning Drills, Obnosis Drills and other practical applications.

#### Twinning On Word Clearing

One always twins students where Method 9 Word Clearing is to be done between the students themselves and not by a Word Clearer.

Similarly, Method 8 Word Clearing is twinned, on exactly the same turn-about basis as described in Method 9. (Ref: HCOB 30 Jan 73RB Rev. 1.6.79 Word Clearing Series 46RB METHOD 9 WORD CLEARING THE RIGHT WAY)

An example of turn-about on Method 8 would be: First twin clears word "a." Second twin then clears word "a" AND word "b." First twin then clears word "b" AND word "c," etc. You do two actions consecutively every time.

Twins may also be assigned to get each other through other methods of Word Clearing in this way.

Henceforth, on courses such as the Primary Rundown, where Word Clearing is the essence of the course, twinning is mandatory.

Wherever twins are assigned, whether for an entire course or for practical sections of a course, the rules of twinning apply.

### ASSIGNING TWINS

The Supervisor is responsible for assigning twins.

He should take care to team up students of comparable case level and training and abilities inasmuch as possible. In this way both twins make the best progress. Twinning a very fast student with a slow student should be avoided, if possible, as it can be frustrating and upsetting to both students. This must never be used as an excuse NOT to twin students. However, ideally, one matches them up according to their capabilities and twinning goes smoothly and produces best results when this is done.

In some rare instances it may be necessary to reassign twins who have been incorrectly paired. But it should not be necessary if care was taken in teaming them up correctly to begin with.

Otherwise, once assigned, twins work together through to successful completion of the course or activity.

### TURN-ABOUT

THE RULE OF TWINNING IS THAT IT IS DONE ON A "TURN-ABOUT" BASIS.

"Turn-about" is done as follows:

One student coaches his twin through a drill or a section of a drill. They then turn-about and the second twin does the same drill or section of that drill PLUS the next drill or next section of the drill. They then turn-about again, with the first student doing the drill his twin has just done PLUS the one following.

The same system applies in Method 9 or Method 8 Word Clearing. One twin clears a word or M9s a paragraph or section of the text. They turn-about and the second twin clears the word or M9s the paragraph or section PLUS the following one. They turn-about again, with the first twin now clearing or M9ing the word or section his twin just cleared PLUS the one following.

Turn-about is applied as well to starrate checkouts where these are called for. It may be done by checking out an entire bulletin on one's twin before the turn-about is done. Or, where a very long text is to be starrated, the turn-about can be done after each section.

With the turn-about system one person is not constantly leading and misunderstandings are kept picked up between twins. The twins keep apace with each other, we don't get unbalanced flows and both are kept progressing.

### THE TWIN'S RESPONSIBILITY

A TWIN IS RESPONSIBLE FOR SEEING THAT THE STUDENT WITH WHOM HE IS TWINNED KNOWS AND CAN APPLY THE MATERIAL HE HAS STUDIED .

Twins must be made aware of this responsibility at the onset of the course.

The twin word clears his fellow student. He listens to his sentences and sees that they are correct and fit the definition of the word being cleared. He makes sure his twin understands the materials. If the student doesn't know them cold, the twin helps the student find his misunderstood words and gets him through any difficulties.

Twins do practical drills together. They coach each other to wins and certainty in applying the materials 100% correctly.

If a student flunks a Supervisor checkout on materials he's been passed on by his twin, both students get a flunk. The twin must have a misunderstood himself if he missed the other student's goof.

### Morale and Production

MORALE depends on production.

PRODUCTION, in training, is the evidence of the demonstration of competence.

MORALE IS UP WHEN COMPETENCE IS DEMONSTRATED.

MORALE IS UP WHEN PRODUCTION IS UP.

Morale isn't necessarily built by being "nice." Twinning actions *are* carried out with good ARC, but being "nice" is not enough.

A student getting a good stiff coaching session from his twin and passing—or getting a good, stiff checkout and passing, feels great. He has really accomplished something. He *knows* that he knows the data or drill.

A student who gets poor or nonstandard coaching or checkouts feels and knows that he has been cheated. If his twin is just being "nice" he doesn't win and doesn't appreciate the checkout. His morale will be down.

One keeps his twin's morale and production high. One gives him tough standard coaching sessions so he *becomes* competent. One gives him tough standard checkouts so he KNOWS HE HAS DEMONSTRATED HIS COMPETENCE IN THE MATERIALS. It is always done with good ARC.

It must be real to student and Supervisor alike that twinning is not a namby-pamby, brush-off activity.

One is responsible for getting his twin *through* the course. If one twin goes to Review, the other goes to Review. If one twin goes to Ethics, the other goes to Ethics. If one twin should blow, the other twin must go and get him. One is responsible for getting his twin *through* the course.

There have been cases in the past where one twin worked like mad to get the other twin through an extensive section right at the end of the course. The other twin then

simply went off and would not do the same so the first student could also finish the course.

IT IS NOW FIRM POLICY THAT WHERE SUCH AN INSTANCE OCCURS, THE STUDENT WHO ABANDONED HIS TWIN JUST BECAUSE HE HIMSELF WAS FINISHED MAY *NOT* BE CERTIFIED

AND MAY *NOT* BE GIVEN A COURSE COMPLETION UNTIL HE HAS COMPLETED HIS TWIN.

Twins are responsible for getting each other *through* the course.

### THE SUPERVISOR'S RESPONSIBILITY

It is the Supervisor's responsibility to enforce twinning per the points in this bulletin.

He assigns twins, pairing them according to their capabilities.

He ensures twinning is being done by the book, on a turn-about basis, with *both* twins making progress.

He makes sure twins are wearing their hats as twins and taking responsibility for getting each other through, exactly as laid out in course materials.

A "double flunk" is given when a student flunks a Supervisor checkout on materials his twin has passed him on. "Double flunk" means the student and his twin are both flunked in such a case, as, if the twin has missed the student's goof, he must have misunderstands of his own.

The Supervisor maintains high tech standards by adhering firmly to this system and when he must double flunk he makes sure *both* twins get handled on the goof.

A situation can occur where a student and his twin get into a "games condition," one with the other. This gives a no-progress, problem situation. The students who are twinned are not both working toward the same goal but one is in opposition to the other in some way. This gives no progress, no wins, no production, no demonstration of competence being permitted and low morale.

It is the responsibility of the Supervisor as well as the twinned students to not permit such a situation to occur. With any failure of a twin to be a twin and assume that responsibility, the Supervisor gets the student checked out on this bulletin and any other applicable course material and ensures the student is fully handled.

To keep the course morale high, Supervisors must insist on production and on the demonstration of competence on all materials by the student and his twin.

In a case where a student gets sent to Review or Ethics, the Supervisor must uphold the rule that his twin *always* gets sent as well. He ensures that any blown student is recovered by his twin. In all such cases the Supervisor keeps track of his students and ensures they're handled and gotten back on course rapidly.

A Supervisor who understands the WHY of twinning and sees it is carried out standardly is going to produce causative, responsible graduates who can apply what they have learned.

### EMPHASIS ON NO VERBAL DATA

All students should be made aware, from the beginning of training, that the answers to their questions are in their course materials or other source references.

The issues on verbal tech, HCOB 9 Feb 79 HOW TO DEFEAT VERBAL TECH and HCOB 15 Feb 79 VERBAL TECH PENALTIES, should be well-known in the course room.

Even so, students, particularly when they are new, sometimes get into an exchange of verbal data or opinion while they are twinning. A Supervisor must be on the alert for this and step in to handle at once when he observes it happening. He uses study tech to straighten the scene out and always refers the students to the above mentioned HCOBs on verbal tech.

Twinned students, of course, bear a responsibility for not spreading verbal tech, neither between themselves nor to anyone else, for that matter. A twin always refers his fellow student to source materials.

### HANDLING BUGS ON TWINNING

The main twinning bugs which could arise are those which were encountered earlier on the Saint Hill Special Briefing Course. One twin would get sent to Ethics or Cramming or Review and the other one then had no twin. Thus, twinning could get to be a little bit unpopular and could block somebody from finishing the course unless these factors are handled.

The remedy for this sort of thing is to send *both* twins to Ethics, *both* twins to Cramming, *both* twins to Review and if anybody blows, send his twin after him. In other words, we don't buy the idea that everybody is totally irresponsible for everybody else in this wonderful First Dynamic world. This is not a mere expediency. It takes only a good, straight look at the purpose and WHY of twinning to recognize the value of this system. Those who do recognize its value will enforce and maintain it.

There is another situation which could act as a bug in twinning. What happens when one twin actually does disappear from the scene totally, in spite of checkouts and crammings and ethics? What do you do with the remaining twin? Unhandled, it can stop a course for a student, so handled it must be and with no time wasted. You don't let the odd twin rattle around on his own for very long.

If he's not too far advanced into the course he can be twinned with an oncoming student. (A well-run course room will always have new students enrolling.) Every effort is then made to get the newcomer caught up with his twin as rapidly as possible.

But what of the more advanced student who loses a twin? If there's absolutely no other single terminal to team him up with, there is still a solution far preferable to having him continue on his own. You match him up with a set of twins of comparable ability and advancement to his and you turn that twinship into a trio. Once formed, you run that trio as tightly as you would any twinship. The turn-about system would then need to be adjusted to a "round robin." (Example: A coaches B, B coaches C, C coaches A.) And it would then reverse. This is more easily seen if it is diagrammed:

A coaches B on the 1st  
action (drill, definition,  
etc. ) \_\_\_\_\_ B

B coaches C on the 1st  
action \_\_\_\_\_ C

C coaches A on the 1st  
action \_\_\_\_\_ A

And then it reverses.

B \_\_\_\_\_ C coaches B on the  
2nd action

A \_\_\_\_\_ B coaches A on the  
2nd action

C \_\_\_\_\_ A coaches C on the  
2nd action

And now it reverses back.

A coaches B on the 3rd  
action \_\_\_\_\_ B

B coaches C on the 3rd  
action \_\_\_\_\_ C

C coaches A on the 3rd  
action \_\_\_\_\_ A

And now it would reverse back again (C coaches B. etc.) and so on through the drill, definition or M9 section.

All the rules of twinning then apply to these three. You “assign the trio in concrete” and you ensure they keep advancing. Again, the point here is that we operate on the Third Dynamic where one does take some responsibility for his fellow man.

### HANDLING BOGGED STUDENTS AND THEIR TWINS

When a bogged student cannot be handled in the course room with standard Word Clearing and study tech and he is sent to Cramming, Review or, where indicated, to Ethics, his twin is also always sent.

The idea is not only to keep the twins together and taking responsibility for each other but to also correct and repair *both* of them as needed.

In other words, one twin doesn't simply sit there and observe the other twin being handled. The twin of a bogged student will also require handling in Review, Ethics, or Cramming himself. If a student has ended up on Review lines, it must be assumed that the twin has goofed as a twin and has misunderstands on the course materials. This must be sorted out and resolved by the Dir Review when the twins route through Review.

The Dir Review determines, by interview, what the trouble is and how it should be resolved. This is done on an individual basis for each twin.

For example, the bogged student may need Word Clearing or a Word Clearing Correction List and his twin may need to restudy this twinning bulletin or other course materials.

In Ethics, for example, a student may be involved in some sort of out-ethics situation, such as continually being late for course. In any ethics situation one would look for the possibility of mutual rudiments between twins. Whether or not mutual ruds exist, the twin would always be given some handling in regard to his responsibility in the situation.

In the above example, the Ethics Officer might handle the student with an amends project. He would then go over with the twin the matter of *his* responsibility and what steps *he* could take to ensure the student gets to course on time. The twin would then get the student through his amends, get through his own handling, whatever its nature and the two of them would then go back to course.

The twin sees the student through his review, cramming or ethics cycle and, whenever possible, is used to help the student get through it. He also receives appropriate handling himself.

**THE RULE IS: WHEN ONE STUDENT BECOMES BOGGED, HIS TWIN IS ALWAYS SENT WITH HIM TO CRAMMING, REVIEW OR ETHICS.**

In the rare case where a student is going to require extensive handling in Review or Ethics, such as case handling or suspension from course where such would be truly warranted, the Dir Review or Ethics Officer may send the other twin back to course to be retwinned with another student.
