From the utter simplicity of „don`t think, look“, the entire research track of Dianetics and Scientology took a dramatic leap forward with a view of reality that had never been explored. What this new view brought to light were the follies of a society that thinks of solutions to problems rather than looking at the problems. In consequence, we forever see MEST universe brutality mirrored in man`s handling of his fellow man, with all its attendant miseries.

The real solutions given here raise one above thinking and the use of violence as a substitute for the ability to pervade, and how to extend anchor points and make space, to replenish energy at will and to assume a vital role in a universe of action.

Here, you will find Ron`s definitive answer to the crucial question „What is a Scientologist?“ with 8 specific functions that make a Scientologist. The lectures from this congress are, in fact, the postulates of a new civilization on Earth.

- *Learn the follies (Torheiten, Narrheiten) of a thinking society that values the machine over the man*
