

MASTER TAPE LIST

6 April 1978

The following is a Master Tape List that includes all known LRH lectures. The majority of lectures shown exist in the Archives of Dianetics and Scientology, but unfortunately approximately 240 are missing. Those missing are marked on the list with a double asterisk **.

It is also possible that further lectures were given which are not on this list. If you are aware of a lecture that was given that is not on the list, or if you know the whereabouts of any tape that is marked as missing, please advise the Tapes to Books Project, Flag, immediately with full details.

ARRANGEMENT OF THE LIST

The list is arranged chronologically. Unknown dates are placed at the beginning of the period in which they were most likely given. For example, a lecture with a totally unknown date appears at the beginning of the list. One known to have been given in 1952 with month and day unknown appears at the beginning of 1952. One in which the year and month are known, but in which the day is not, appears at the beginning of that month.

NUMERICAL LIST NUMBER

Each entry is preceded by a numerical list number. This is used for rapid reference. Tapes found since the list was numbered are given a .1 or .2 number, for example see 1217.1, 1217.2 and 1217.3. These numbers have no more significance than their being a quick easy reference number to an entry.

DATE CODE

The next column of the list is the Date Code. The first two numbers give the year, the next two numbers the month, C stands for copy, and the third pair of numbers given the day of the month. Occasionally the last pair of numbers are followed by a letter. This usually distinguishes between two lectures given on the same day, and sometimes means that the one lecture has been broken up into two or more parts.

The date code has not always been presented in the same format and you may come across lectures with a different format date code. If you cannot decipher the date code, then report the code and all other information on the tape label to the Tapes to Books Project, Flag in case it is a lecture we do not have. Occasionally the date code used as a mixture of the Date Code and the Lecture Code.

LECTURE CODE

The Lecture Code is simply an abbreviation or acronym made up from the title of the Lecture Series in which the lecture was given.
