### **THE NEW CIVILIZATION CONVENTION**

A Lecture by Capt. W.B. Robertson  
5 Nov 1988 at the Park Hotel Atlantis

#### **The New Civilization Game**

Well, here I am, your Hauptchef for the New Civilization Restaurant Game. *[Note: Bill made a joke here, referring to the previous lecture called OT MISSIONS AND PROJECTS, by Arnold Hermann.]*

Now, I have the Sector 9 Book here and in it is a New Civilization Game. Now the reason I'm giving this lecture is first of all because it's the New Civilization Convention '88. And the second reason is because so many people have read this book but very few have ever originated to me anything about the New Civilization Game purposes and they are the most important thing in there and hardly anybody recognizes their importance.

Now the reason those purposes are there is because it is part of a process on a Policy-Letter LRH wrote called "OT-Organizations". And in that Policy-Letter there is a statement that if you find and rehabilitate — I'm not giving the exact quote — but if you find and rehabilitate a failed purpose or any purpose that is a real purpose you can instantly generate new life in an area, an organization or a person. And as you all know from doing auditing as a PC or Pre-OT you are rehabilitating your purposes in the game and as you do so you feel more life and more alive. And this is a process used on the 4th Dynamic that doesn't need much of an E-Meter, it only needs an exact observation and evaluation to find the purpose of the area and rehabilitate it. That's all you have to do.

Most of our OT-Projects and Missions — at least in the last stages, because you may need several missions to establish all this — but in the last stages it is to do that "OT-Orgs" Process. Therefore, as most of you know from doing the Bridge, every player in this game has agreed to play the game for a certain purpose. We are talking here just about the Physical Universe Games, this Games Universe Model, nothing more. And just talking about the 4th Dynamic

not higher things that you may know about — but just the people out there sitting in U3, the MEST-Universe. So, if you know what the purposes were that they got into the game for, into this Physical Universe, and you rehabilitate those purposes they will start... first, life will suddenly appear and then action and they will flow right through to the end of the game!

If you heard the lecture by Niels Kjellerup from Denmark you know that he is using that type of Technology to make millions and millions of Kroner. Now I will go over these purposes. There are only seven here, but I will say one thing first. In auditing, this whole series of games including the MEST-Universe has as a purpose to improve the quality of life or Theta. And many auditors are using this, or finding this, in their sessions... that that was what most of the Thetans had as an original purpose. And when they find that, it starts spreading like wildfire on every Thetan that is encountered in auditing. And now within a few — well, about a year and a half of that being found — we now find that that purpose is being quoted back to us by newspapers, television, companies and advertising. They are saying all their products are to "improve the quality of life". Now they didn't really understand it, as Niels said in his lecture, and they don't really apply it to the right thing

in advertising — they think if you have their latest model television that improves the quality of your life. But, they're all saying it. And it is penetrating into every level of the society. New that could be looked at as sort of an overall purpose which everyone will agree with in the whole universe.

Now down on this planet we have the New Civilization Game purposes which are applied specifically through the Seven-Division Org-Board of the New Civilization to Earth. So these are more exactly evaluated for this planet, by division:

No. 1: "To actively put our Home Planet Earth in order, maintaining its Natural Balance for the survival of the New Civilization ..."

All sounds good, doesn't it?

And many organizations out there say things just like that, don't they? But — they don't say the second half! And the second half is what missions and projects are all about, just like what Arnold was saying. And here is the second half:

" ... and preventing, restraining and/or ceasing to co-operate with those who would destroy our Home."

No earthman is capable of doing that. He can not confront it. Only OTs can do that half. Do you begin to understand? You can't even get people in America to turn off their television sets as a protest, even when they are getting all kinds of garbage and trash and lies in the news and everything. They won't turn off their televisions. I know. I tried to get a few Scientologists and OTs to start that, and they wouldn't even do it!

Don't you know the advertisers would leave that station immediately if they found out people were turning it off? And the whole program would be off the air. And that was about the 5th or 6th gradient I had cut down to try and find out where the American cause-level was in 1980. So I've "had it" with them. If they couldn't even turn off their television set to help out an OT-Project I better come to Europe. Also, as it says in the book (Sector 9) — it's from LRH's original evaluation — that "if Scientology ever got taken over or suppressed in the United States that Europe was the answer". That was an evaluation he did in 1966! And it had to be applied in 1980! He was 14 years before 1980 looking up there at the alternative plans for the future!

OK. No. 2: Second purpose: "To viably develop the technology and equipment for free enterprise and private and public travel to other planets and systems for the expansion of the New Civilization..."

The second part of this purpose — you may even find a few people doing this — but not for the same reason: "... and to protest loudly and refuse to co-operate with those who would keep and use these developments for purely military , destructive or other suppressive intentions.

Like implanting or something... ok?

So, the first 2 purposes have to do with the establishment of your Home Planet and your communication lines for expansion and exchange. Now you've got to have products and services on those lines and that's the 3rd purpose:

"To make available technology, products, goods and services for all the peoples of Earth and develop the capability to export surpluses to other planets and systems, decrying (denouncing) and refusing to co-operate with those who would keep people unemployed, ignorant, poor, underfed and unhealthy for suppressive reasons of their own ."

Now you see what we are doing here. We are drawing the line. We are saying — "Here is the New Civilization over here, and here is a big barrier and all you guys that are doing this — out!" And that's putting in the Ethics while you're putting in the Tech. You are rehabilitating a purpose and putting in Ethics at the same time and pointing out who

are the real enemies of the people playing this game. You see the power of these purposes? That's why we want to spread them around. OK.

Here is the next one: "To develop, standardize and get in use a stable mediums) of exchange so that the New Civilization can confidently flourish and prosper without inflations, deflations and depressions."

OK, here is the ethics and education part. Remember, that misunderstands are underlying the overts:

"And to educate people in basic economics so that they NEVER fall prey to or support those persons and groups who use economics to suppress."

I tell you this: That if I ever hear of an OT again who is saying "Yeah, I support the New Civilization but my cheque won't clear for 3 weeks." I am telling him to "Read the second half of that purpose, baby, and find yourself another bank. Don't you know that every day they are delaying your cheque, man, they are making money on yours and 5000 other guys? They can claim that as an asset in the bank and loan it out. Every day, you are getting fucked!"

Ok, next one: "To recognize, validate and support all types of creative endeavors and pro-survival and pro-expansion activities, cherishing one's own freedom as the key to achievement of ALL the New Civilization's purposes."

And here is the second half — which is right down the track of OT-Projects and Missions:

"... and ACTIVELY resisting and DEFEATING any attempt to limit or regulate ones freedom or rights in the New Civilization Game."

Do you know something? As OTs and Missionaires, you only have to do the second half of each of these purposes and give the first half to everybody else on the planet and the whole planet will boom. You see? Everybody else on the planet can't confront those big "reads" they get on the second half. You see? But OT-Missionaires and so on, they love that. That means somebody is "in session" — and needs a "case-handling"!

The next one: "To encourage, assist and/or take part in a renaissance of cultural, artistic and social events; sports, hobbies, reading, writing, poetry, music, drama, stage and screen productions, and other creative and philosophic/artistic endeavors as these best express the values, purposes and dreams and vitality of a civilization — and help in distributing the message — (that's the message of the New Civilization) — to others who may wish to join the game and have fun too."

Now, notice that you don't see a negative intention in there. And you notice that even Marcabians have their own art and music, you know? It's called "modern expressionism" and things like that. Even Implanters have their own "aesthetics", you know? "Boom, boom — zzzit!" — like that, you know? And: "The machines are working good tonight, we got a lot of thetans in there, ja?" And actually those give us a good indicator of exactly what the tone-level of the society is.

And you don't handle that by opposing those artists. You only handle that by auditing those artists that are doing that kind of stuff. Because they are following the art-formula. They are communicating what their reality is at the moment. They are saying: "Help! I'm stuck in an implant", or they are saying: "The Marcabians are suppressing the shit out of me, and nobody else will pay me for this shit." Well, you don't try to restrain those artists, you just audit them. That will bring them upstairs and their art will come upstairs too. (And — maybe they need a Drug-Rundown too!)

OK, last one: This is the executive thing: "To coordinate the New Civilization according to its definition.." (and that's the definition of a civilization being "an economic engine, fueled by ideas") ".. so that its thrust and vectors are aligned for survival, expansion and prosperity in

a manner which relies on the continued freedom and happiness of the individuals comprising it."

OK. Now, where is the negative side to that one? mean, where is the ethics side to that one?

That comes on the next page (Sector 9 Book) where it says: "The New Civilization — Why?" And it tells about (as you probably have read) to people are giving their power to the guys who suppress them!

And that's what is known in an evaluation as "the individual why for each person — something he can do something about." And you notice how I evaluated the cause-level of most people on this planet? I did not evaluate that they would do anything. But I could count on them to stop doing something. Anyone knows that people under suppression a long time take on the valence of the SP and the SP specializes in stopping. So they are going to be hatted to stop things. So, you ask them to stop supporting the SPs!

And the next page is giving the guy sort of an "ethics rehabilitation." So if he does some of this or actually agrees to it then you give him back what the SP has taken away from him. That is sort of like a "PTS-Rundown". You make him un-PTS by saying:

"You have the power, you have the freedom, you have the purposes. You have the knowledge about how to play the game. You have the right to your own sanity and will not agree to insane uses of power. You have the right to leave any game you don't like, take your power, knowledge and purposes with you and join another, start another, or just not play."

These are the Rights of a Thetan coming in there. You give him those and then say: "You will enjoy the New Civilization Game if you decide to play. And if you decide to play you and all of us on this planet will win."

See? That will make him un-PTS. I'm just giving you as an auditor and C/S here the whole processing line here in this New Civilization Game. The "auditing" of it

ok?

Now, as planetary coordinator and Senior-C/S I hope have just checked you out on the C/Sing on the 4 Dynamic and the processes to run on them.

Does anybody recognize now what they didn't before about the importance of the New Civilization Game?

Did anyone recognize the value of it as a 4th Dynamic process?

And do you understand that the only people who can actually confront and handle those ethics purposes in there are you — each of you?

If you don't have any misunderstands on that please raise your hands on the whole thing which I've been saying. Everybody in agreement? Everyone think they understand it? You understand it? I'm just checking for understanding here — sehr gut, sehr gut.....

"START OF SESSION ! ! ! "
